changed hands several times and were sold to Jay Ronyak on July 24, 1989. While using the jack on August 29, 1989, to raise the Camaro, it malfunctioned, causing the car to fall on Ronyak. He died several days later as a result of the accident. The administrator of Ronyak's estate brought suit against General Motors for breach of warranty. General Motors asserted that the lawsuit was barred by the statute of limitations, but the administrator contended that the warranties in this instance extended to the future performance of the automobile and the jack. She reasoned that "a person who purchases a jack as part of an automobile purchase will have no need for the jack at the time of the purchase, and indeed may not have needed the jack for months or even years after the purchase." Was the lawsuit barred by the four-year statute of limitations in the UCC?

3. Bechtel ordered an alabaster-colored mink coat from Pollock Furs. The coat had been specially made because she required an unusually large size and requested a particular styling. The coat cost $5,500, of which Bechtel paid $250. Several months later, she decided that she did not want the coat and canceled the order, even though Pollack Furs had completed the coat. Pollack Furs then filed suit for the balance of the purchase price. What can Bechtel argue in defense?

4. Cohn advertised a 30-foot sailboat for sale in *The New York Times.* Fisher saw the ad, inspected the sailboat, and offered Cohn $4,650 for the boat. Cohn accepted the offer. Fisher gave Cohn a check for $2,535 as a deposit on the boat. He wrote on the check, "Deposit on aux sloop, D'arc Wind, full amount $4,650." Fisher later refused to go through with the purchase and stopped payment on the deposit check. Cohn readvertised the boat and sold it for the highest offer he received, which was $3,000. Cohn then sued Fisher for breach of contract. He asked for damages of $1,679.50. This represented the $1,650 difference between the contract price and the sale price plus $29.50 in incidental expenses in reselling the boat. Is Cohn entitled to this measure of damages?

5. Dubrow, a widower, was engaged to be married. In October, he placed a large order with a furniture store for delivery the following January. The order included rugs cut to special sizes for the prospective couple's new house and many pieces of furniture for various rooms in the house. One week later, Dubrow died. When the order was delivered, his only heir, his daughter, refused to take the furniture and carpeting. The furniture store then sued his estate to recover the full purchase price. It had not tried to resell the furniture and carpeting to anyone else. Under the circumstances, was the seller entitled to recover the purchase price of the goods?

6. Barr purchased from Crow's Nest Yacht Sales a 31-foot Tiara pleasure yacht manufactured by S-2 Yachts. He had gone to Crow's Nest knowing the style and type yacht he wanted. He was told that the retail price was $102,000 but that he could purchase the model they had for $80,000. When he asked about the reduction in price he was told that Crow's Nest had to move it because there was a change in the model and they had new ones coming in. He was assured that the yacht was new, that there was nothing wrong with it, and that it had only 20 hours on the engines. Barr installed a considerable amount of electronic equipment on the boat. When he began to use it, he experienced tremendous difficulties with equipment malfunctions. On examination by a marine expert it was determined that the yacht had earlier been sunk in salt water, resulting in significant rusting and deterioration in the engine, equipment, and fixtures. Other experts concluded that significant replacement and repair was required, that the engines would have only 25 percent of their normal expected life, and that following its sinking, the yacht would have only half of its original value. Barr then brought suit against Crow's Nest and S-2 Yachts for breach of warranty. To what measure of damages is Barr entitled to recover for breach of warranty?

7. Certina USA is a watch manufacturer that sells its watches through traveling salespeople paid by it. Migerobe, Inc., owns and operates jewelry counters in McRae's department stores, which are located throughout the Southeast. In the summer of 1987, Migerobe contacted Gerald Murff, a Certina salesperson from whom it had previously purchased watches. It notified him that Migerobe was interested in buying Certina watches if the company decided to sell a large portion of its inventory at reduced prices. Migerobe had some reason to believe that Certina had excess inventory, and Certina in fact decided to eliminate its inventory as a result of a corporate decision to withdraw its watches from the U.S. market. Migerobe was hoping to acquire the Certina watches so that they could be used as "doorbusters" for an after-Thanksgiving sale. Doorbusters or "loss leaders" are items offered at a low

price, which are designed to increase the traffic flow through a store and, thereby, increase corollary sales (the sale of nonadvertised items). On October 29, the parties agreed on the sale of over 2,000 watches at a price of $45 per watch. On November 4, the national accounts manager for Certina called Migerobe to say that Certina would not ship the watches. Migerobe brought suit against Certina to recover damages for breach of contract, including consequential damages in the form of lost profits on corollary sales. Migerobe asserted that the Certina salesperson was aware of its plan to use the watches as a loss leader by featuring them in a doorbuster Thanksgiving advertisement at a 50 percent discount. It also had data that showed it previously had increased its corollary sales by 69 to 87 percent when it had used similar doorbuster promotions. Was Migerobe entitled to recover the lost profits on corollary sales as consequential damages caused by Certina's breach of contract?

8. De La Hoya bought a used handgun for $140 from Slim's Gun Shop, a licensed firearms dealer. At the time, neither De La Hoya nor Slim's knew that the gun had been stolen prior to the time Slim's bought it. While De La Hoya was using the gun for target shooting, he was questioned by a police officer. The officer traced the serial number of the gun, determined that it had been stolen, and arrested De La Hoya. De La Hoya had to hire an attorney to defend himself against the criminal charges. De La Hoya then brought a lawsuit against Slim's Gun Shop for breach of warranty of title. He sought to recover the purchase price of the gun plus $8,000, the amount of his attorney's fees, as "consequential damages." Can a buyer who does not get good title to the goods he purchased recover from the seller consequential damages caused by the breach of warranty of title?

9. Schweber contracted to purchase a certain black Rolls-Royce Corniche automobile from Rallye Motors. He made a $3,500 deposit on the car. Rallye later returned his deposit to him and told him that the car was not available. However, Schweber learned that the automobile was available to the dealer and was being sold to another customer. The dealer then offered to sell Schweber a similar car, but with a different interior design. Schweber brought a lawsuit against the dealer to prevent it from selling the Rolls-Royce Corniche to anyone else and to require that it be sold to him. Rallye Motors claimed that he could get only damages and not specific performance. Approximately 100 Rolls-Royce Corniches were being sold each year in the United States, but none of the others would have the specific features and detail of this one. Is the remedy of specific performance available to Schweber?

10.  *Video Case.* See "Sour Grapes." Jelly Manufacturer, a food processor in Chicago, placed a phone order with Grape Grower, a grower in California, for a quantity of perishable produce. The shipping term was CIF with payment to be made on delivery (COD). Grape Grower delivered the goods called for in the contract to a carrier and contracted for their shipment. However, it neglected to provide that the goods be shipped under refrigeration. The goods were loaded on a nonrefrigerated boxcar and as a result the produce was spoiled when it reached Chicago. Jelly Manufacturer, as required by the COD term, paid for the produce by check before discovering the spoilage. When Jelly Manufacturer called Grape Grower to complain, Grower offered to rush a replacement shipment. Jelly Manufacturer declined the offer, stating that it would not arrive in time for the produce to be processed and delivered to Grocery Chain in time to meet processor's contract with Grocery Chain. Jelly Manufacturer arranged for a rush replacement shipment from a nearby source, but had to pay 150 percent of the prevailing market price for the produce. Even so, Jelly Manufacturer was unable to deliver the finished products to Grocery Chain and was required to pay a penalty for late delivery as provided in its contract with Grocery Chain. Can Jelly Manufacturer recover damages from George Grower for breach of contract? If so, what elements can be recovered? Can Grocery Chain recover the penalty from Jelly Manufacturer?

The concept of property is crucial to the organization of society. The essential nature of a particular society is often reflected in the way it views property, including the degree to which property ownership is concentrated in the state, the extent to which it permits individual ownership of property, and the rules that govern such ownership. History is replete with wars and revolutions that arose out of conflicting claims to, or views concerning, property. Significant documents in our Anglo-American legal tradition, such as the Magna Carta and the Constitution, deal explicitly with property rights. This chapter will discuss the nature and classification of property. It will also examine the ways that interests in personal property may be obtained and transferred, such as by production, purchase, or gift. The last half of the chapter explores the law of bailments. A bailment is involved, for example, when you check your coat in a coatroom at a restaurant or when you park your car in a public parking garage and leave your keys with the attendant.

Nature of Property

The word **property** is used to refer to something that is capable of being owned. It is also used to refer to a right or interest that allows a person to exercise dominion over a thing that may be owned or possessed.

When we talk about property ownership, we are speaking of a bundle of rights that the law recognizes and enforces. For example, ownership of a building includes the exclusive right to use, enjoy, sell, mortgage, or rent the building. If someone else tries to use the property without the owner's consent, the owner may use the courts and legal procedures to eject that person. Ownership of a patent includes the rights to produce, use, and sell the patented item, and to license others to do those things.

In the United States, private ownership of property is protected by the Constitution, which provides that the government shall deprive no person of "life, liberty or property without due process of law." We recognize and encourage the rights of individuals to acquire, enjoy, and use property. These rights, however, are not unlimited. For example, a person cannot use property in an unreasonable manner that injures others. Also, the state has **police power** through which it can impose reasonable regulations on the use of property, tax it, and take it for public use by paying the owner compensation for it.

Property is divided into a number of categories based on its characteristics. The same piece of property may fall into more than one class. The following discussion explores the meaning of **personal property** and the numerous ways of classifying property.

Classifications of Property

Personal Property versus Real Property

Personal property is defined by process of exclusion. The term *personal property* is used in contrast to *real property.* Real property is the earth's crust and all things firmly attached to it.[1] For example, land, office buildings, and houses are considered to be real property. All other objects and rights that may be owned are personal property. Clothing, books, and stock in a corporation are examples of personal property.

Real property may be turned into personal property if it is detached from the earth. Personal property, if attached to the earth, becomes real property. For example, marble in the ground is real property. When the marble is quarried, it becomes personal property, but if it is used in constructing a building, it becomes real property again. Perennial vegetation that does not have to be seeded every year, such as trees, shrubs, and grass, is usually treated as part of the real property on which it is growing. When trees and shrubs are severed from the land, they become personal property. Crops that must be planted each year, such as corn, oats, and potatoes, are usually treated as personal property. However, if the real property on which they are growing is sold, the new owner of the real property also becomes the owner of the crops.

When personal property is attached to, or used in conjunction with, real property in such a way as to be treated as part of the real property, it is known as a **fixture.** The law concerning fixtures is discussed in the next chapter.

Tangible versus Intangible Personal Property

Personal property may be either tangible or intangible. Tangible property has a physical existence. Cars, animals, and computers are examples. Property that has no physical existence is called intangible property. For example, rights under a patent, copyright, or trademark would be intangible property.[2]

The distinction between tangible and intangible property is important primarily for tax and estate planning purposes. Generally, tangible property is subject to tax in the state in which it is located, whereas intangible property is usually taxable in the state where its owner lives.

Public and Private Property

Property is also classified as public or private, based on the ownership of the property. If the property is owned by the government or a governmental unit, it is public property. If it is owned by an individual, a group of individuals, a corporation, or some other business organization, it is private property.

[1]The law of real property is treated in Chapter 24.

[2]These important types of intangible property are discussed in Chapter 8.

Acquiring Ownership of Personal Property

Production or Purchase

The most common ways of obtaining ownership of property are by producing it or purchasing it. A person owns the property that she makes unless the person has agreed to do the work for another party. In that case, the other party is the owner of the product of the work. For example, a person who creates a painting, knits a sweater, or develops a computer program is the owner unless she has been retained by someone to create the painting, knit the sweater, or develop the program. Another major way of acquiring property is by purchase. The law regarding the purchase of tangible personal property (that is, sale of goods) is discussed in Chapter 19.

Possession of Unowned Property

In very early times, the most common way of obtaining ownership of personal property was simply by taking possession of unowned property. For example, the first person to take possession of a wild animal became its owner. Today, one may still acquire ownership of personal property by possessing it if the property is unowned. The two major examples of unowned property that may be acquired by possession are wild animals and abandoned property. Abandoned property will be discussed in the next section, which focuses on the rights of finders.

The first person to take possession of a wild animal normally becomes the owner.[3] To acquire ownership of a wild animal by taking possession, a person must obtain enough control over it to deprive it of its freedom. If a person fatally wounds a wild animal, the person becomes the owner. Wild animals caught in a trap or fish caught in a net are usually considered to be the property of the person who set the trap or net. If a captured wild animal escapes and is caught by another person, that person generally becomes the owner. However, if that person knows that the animal is an escaped animal and that the prior owner is chasing it to recapture it, then he does not become the owner.

[3]As wildlife is increasingly protected by law, however, some wild animals cannot be owned because it is illegal to capture them (e.g., endangered species).

Rights of Finders of Lost, Mislaid, and Abandoned Property

The old saying "finders keepers, losers weepers" is not a reliable way of predicting the legal rights of those who find personal property that originally belonged—or still belongs—to another. The rights of the finder will be determined according to whether the property he finds is classified as abandoned, lost, or mislaid.

1. *Abandoned property.* Property is considered to be abandoned if the owner intentionally placed the property out of his possession with the intent to relinquish ownership of it. For example, Norris takes his TV set to the city dump and leaves it there. The finder who takes possession of abandoned property with intent to claim ownership becomes the owner of the property. This means he acquires better rights to the property than anyone else in the world, including the original owner. For example, if Fox finds the TV set, puts it in his car, and takes it home, Fox becomes the owner of the TV set.

2. *Lost property.* Property is considered to be lost when the owner did not intend to part with possession of the property. For example, if Barber's camera fell out of her handbag while she was walking down the street, it would be considered lost property. The person who finds lost property does not acquire ownership of it, but he acquires better rights to the lost property than anyone other than the true owner. For example, suppose Lawrence finds Barber's camera in the grass where it fell. Jones then steals the camera from Lawrence's house. Under these facts, Barber is still the owner of the camera. She has the right to have it returned to her if she discovers where it is—or if Lawrence knows that it belongs to Barber. As the finder of lost property, however, Lawrence has a better right to the camera than anyone else except Barber. This means that Lawrence has the right to require Jones to return it to him if he finds out that Jones has it.

If the finder does not know who the true owner is or cannot easily find out, the finder must still return the property when the real owner shows up and asks for the property. If the finder of lost property knows who the owner is and refuses to return it, the finder is guilty of conversion and must pay the owner the fair value of the property.[4] A finder who sells the property that he has found can pass to the purchaser only those rights that he has; he cannot pass any better title to the

[4]The tort of conversion is discussed in Chapter 6.

property than he himself has. Thus, the true owner could recover the property from the purchaser.

The *Powell* case, which follows shortly, provides further discussion of the rights of a finder of lost property.

3. *Mislaid property.* Property is considered to be mislaid if the owner intentionally placed the property somewhere and accidentally left it there, not intending to relinquish ownership of the property. For example, Fields places her backpack on a coatrack at Campus Bookstore while shopping for textbooks. Forgetting the backpack, Fields leaves the store and goes home. The backpack would be considered mislaid rather than lost because Fields intentionally and voluntarily placed it on the coatrack. If property is classified as mislaid, the finder acquires no rights to the property. Rather, the person in possession of the real property on which the personal property was mislaid has the right to hold the property for the true owner and has better rights to the property than anyone other than the true owner. For example, if Stevens found Fields's backpack in Campus Bookstore, Campus Bookstore would have the right to hold the mislaid property for Fields. Stevens would acquire neither possession nor ownership of the backpack.

The rationale for this rule is that it increases the chances that the property will be returned to its real owner. A person who knowingly placed the property somewhere but forgot to pick it up might well remember later where she left the property and return for it.

Some states have a statute that allows finders of property to clear their title to the property. The statutes generally provide that the person must give public notice of the fact that the property has been found, perhaps by putting an ad in a local newspaper. All states have statutes of limitations that require the true owner of property to claim it or bring a legal action to recover possession of it within a certain number of years. A person who keeps possession of lost or unclaimed property for longer than that period of time will become its owner.

Powell v. Four Thouseand Six Hundred Dollars U.S. Currency

904 P.2d 153 (Okl. Ct. App. 1995)

While driving home from a Valentine's Day party late in the evening of February 14, 1994, Martin and Robyn Hoel and their children came upon what they thought was money scattered along a road in Logan County, Oklahoma. They then decided to drive to the nearby home of some friends. While Mrs. Hoel contacted law enforcement officials, Mr. Hoel and the Hoels' son drove back to where they had seen the money. A Logan County deputy sheriff arrived at the scene, as did Mrs. Hoel. Mr. Hoel assisted the deputy in his search for the money. The search yielded $4,600 in hundred dollar bills. Before the deputy departed, Mr. and Mrs. Hoel told him that they wanted the money if the authorities could not locate its rightful owner.

An Oklahoma statute allows a county sheriff to seek court permission to deposit in a Sheriff's Training Fund money (including stolen, lost, and abandoned money) "which has come into [the sheriff's] possession," if the true owner is unknown and the sheriff has held the money for at least six months. The statutory procedure requires the sheriff to file an application requesting that the appropriate district court issue an order authorizing the deposit of the money. A hearing must be held on the application. According to the statute, if no one appears at the hearing and "prove[s] ownership," the court is to approve the deposit of the money in the training fund.

More than six months after the February 14, 1994, events described earlier, the Logan County sheriff, R. Douglas Powell, filed an application requesting the district court's permission to deposit the found money in his Sheriff's Training Fund. The Hoels appeared at the hearing and objected to the application. The district court ruled in favor of Sheriff Powell and issued an order approving the deposit of the money in the training fund. The Hoels, who were allowed to join the case as parties, appealed.

Jones, Judge Mr. Hoel testified [at the hearing on the sheriff's application] that he and his son returned to the place they had discovered the money in order "to secure the area," by which he meant that he wanted to "[m]ake sure nobody else comes along and picks it up . . . [W]e wanted to make sure nobody touched it." Apparently Mrs. Hoel picked up one or two of the bills, which the deputy examined for signs of forgery. Deciding that the money was indeed genuine legal tender, the deputy then instructed the

Hoels not to pick up any more money, because he wanted to check it for fingerprints and drug traces.

[The Hoels] rely on [statutory] and common law defining a finder's right to assert their claim to the money. By [Oklahoma] statute, if one chooses to take charge of lost goods he finds, he acquires both the rights and the obligations of a bailee for hire of the property owner. And, it is a basic maxim of the law that a finder of property acquires rights in found property which are superior to all claims except that of the rightful owner. [Sheriff Powell] contends this case should be governed by [the Oklahoma statute allowing the sheriff to] apply for court authority to deposit money "which has come into his possession" into the Sheriff's Training Fund. [The Hoels], by their own admission, assert no *prior* ownership of the money (i.e., prior to their discovery on the night of February 14, 1994). [Sheriff Powell therefore] argues that the "owner" of the money has not claimed it, and [that the Hoels] cannot "prove ownership," within the meaning of [the statute].

[The Hoels and the sheriff agree] that the money was truly "lost," i.e., that somehow the original owner(s) parted with the money involuntarily and unintentionally, and that he or she or they did not know that it lay scattered along the road where the Hoels discovered it. Two issues are presented here for us to resolve: first, whether the finder of lost property may qualify as an "owner" of the property, and so obtain sufficient legal rights in the property which would defeat a sheriff's application [under the statute]; and, second (assuming we give an affirmative answer to the first issue), whether the Hoels qualify as "finders" of the money.

The first issue has not been previously decided in this state. However, we conclude that [the Hoels], if they qualified as finders of the money, acquired a sufficient ownership interest in the money to be "owners" of the money as that term is used in the unclaimed property statute. The Legislature did not intend to negate the common or statutory law granting legal rights to finders of lost property. By interpreting the unclaimed property statute in this manner, both legal principles at issue here can be harmonized without undue violence to either.

Having decided that a finder of lost property acquires rights which are superior to the sheriff's rights under the unclaimed property statute, we must next determine whether [the Hoels] qualify as "finders" under the circumstances presented in this case. It is stated by general authorities that the finder of lost property is one who first reduces it to possession, or at least such possession of the thing as its nature and circumstances will permit. [The Oklahoma statute dealing with finders of lost items] expresses a related notion in its opening clause; thus in order to obtain the rights of a finder under the statute, one must "take charge" of [the property].

[I]t is undisputed that Mr. Hoel and his eldest son returned to where the money had been discovered in order to prevent any third person from interfering with the recovery of the money. We should not penalize [the Hoels] for their legitimate concern that the money might have some evidentiary value. In fact, the deputy who subsequently appeared on the scene directed [the Hoels] *not* to pick up the money, precisely because of the possibility it might bear fingerprints or trace evidence. Under these rather unique circumstances, we hold that [the Hoels] "took charge" of the money before the deputy sheriff arrived, and so acquired the rights of a finder under our statutory and common law.

District court's judgment in favor of Sheriff Powell reversed and remanded.

Leasing

A lease of personal property is a transfer of the right to possess and use personal property belonging to another.[5] Although the rights of one who leases personal property (a lessee) do not constitute ownership of personal property, leasing is mentioned here because it is becoming an increasingly important way of acquiring the use of many kinds of personal property, from automobiles to farm equipment.

Articles 2 and 9 of the UCC may sometimes be applied to personal property leases by analogy. However, rules contained in these articles are sometimes inadequate to resolve special problems presented by leasing. For this reason, a new article of the UCC dealing exclusively with leases of goods, Article 2A, was written in 1987. Article 2A has been presented to state leg-

[5] A lease of personal property is a form of bailment, a "bailment for hire." Bailments are discussed later in this chapter.

Concept Review

Rights of Finders of Personal Property

Character of Property	Description	Rights of Finder	Rights of Original Owner
Lost	Owner unintentionally parted with possession	Rights superior to everyone except the owner	Retains ownership; has the right to the return of the property
Mislaid	Owner intentionally put property in a place but unintentionally left it there	None; person in possession of real property on which mislaid property was found holds it for the owner, and has rights superior to everyone except owner	Retains ownership; has the right to the return of the property
Abandoned	Owner intentionally placed property out of his possession with intent to relinquish ownership of it	Finder who takes possession with intent to claim ownership acquires ownership of property	None

islatures for possible adoption. Approximately 40 states have adopted Article 2A.

Gifts

Title to personal property may be obtained by **gift.** A gift is a voluntary transfer of property to the **donee** (the person who receives a gift), for which the **donor** (the person who gives the gift) gets no consideration in return. To have a valid gift, all three of the following elements are necessary:

1. The donor must *intend* to make a gift.
2. The donor must make *delivery* of the gift.
3. The donee must *accept* the gift.

The most critical requirement is delivery. The donor must actually give up possession and control of the property either to the donee or to a third person who is to hold it for the donee. Delivery is important because it makes clear to the donor that he is voluntarily giving up ownership without getting something in exchange. A promise to make a gift is usually not enforceable;[6] the person must actually part with the property. In some cases, the delivery may be symbolic or constructive. For example, handing over the key to a strongbox may be symbolic delivery of the property in the strongbox. *King v. Trustees of Boston University,* which appears in this chapter's examination of bailments, discusses various issues concerning gifts and promises to make gifts for charitable purposes.

There are two kinds of gifts: gifts *inter vivos* and gifts *causa mortis.* A gift *inter vivos* is a gift between two living persons. For example, when Melissa's parents give her a car for her 21st birthday, that is a gift *inter vivos.* A gift *causa mortis* is a gift made in contemplation of death. For example, Uncle Earl, who is about to undergo a serious heart operation, gives his watch to his nephew, Bart, and says that he wants Bart to have it if he does not survive the operation.

A gift *causa mortis* is a conditional gift and is effective unless any of the following occurs:

1. The donor recovers from the peril or sickness under fear of which the gift was made, or
2. The donor revokes or withdraws the gift before he dies, or
3. The donee dies before the donor.

If one of these events takes place, ownership of the property goes back to the donor.

Conditional Gifts

Sometimes a gift is made on condition that the donee comply with certain restrictions or perform certain actions. A conditional gift is not a completed gift. It may be revoked by the donor before the donee complies

[6]The idea is discussed in Chapter 12.

with the conditions. Gifts in contemplation of marriage, such as engagement rings, are a primary example of a conditional gift. Such gifts are generally considered to have been made on an implied condition that marriage between the donor and donee will take place. The traditional rule applied in many states provides that if the donee breaks the engagement without legal justification or the engagement is broken by mutual consent, the donor will be able to recover the ring or other engagement gift. However, if the engagement is unjustifiably broken by the donor, the traditional rule generally bars the donor from recovering gifts made in contemplation of marriage. As illustrated by the *Lindh* case, which follows, a growing number of courts have rejected the traditional approach and its focus on fault. Some states have enacted legislation prescribing the rules applicable to the return of engagement presents.

Lindh v. Surman *742 A.2d 643 (Sup. Ct. Pa. 1999)*

In August 1993, Rodger Lindh (Rodger) proposed marriage to Janis Surman (Janis). Rodger presented her with a diamond engagement ring that he had purchased for $17,400. Janis accepted the marriage proposal and the ring. Two months later, Rodger broke the engagement and asked Janis to return the ring. She did so. Rodger and Janis later reconciled, with Rodger again proposing marriage and again presenting Janis with the engagement ring. Janis accepted the proposal and the ring. In March 1994, Rodger again broke the engagement and asked Janis to return the ring. This time, however, she refused. Rodger sued her, seeking recovery of the ring or a judgment for its value. The trial court held in Rodger's favor and awarded him damages in the amount of the ring's value. When Janis appealed, the Pennsylvania Superior Court affirmed the award of damages and held that when an engagement is broken, the engagement ring must be returned even if the donor broke the engagement. Janis appealed to the Supreme Court of Pennsylvania.

Newman, Justice [W]e are asked to decide whether a donee of an engagement ring must return the ring or its equivalent value when the donor breaks the engagement. We begin our analysis with the only principle on which [the] parties agree: that Pennsylvania law treats the giving of an engagement ring as a conditional gift. In *Pavlicic v. Vogtsberger* (Sup. Ct. Pa. 1957), the plaintiff supplied his ostensible fiancée with numerous gifts, including money for the purchase of engagement and wedding rings, with the understanding that they were given on the condition that she marry him. When the defendant left him for another man, the plaintiff sued her for recovery of these gifts. Justice Musmanno explained the conditional gift principle:

> A gift given by a man to a woman on condition that she embark on the sea of matrimony with him is no different from a gift based on the condition that the donee sail on any other sea. If, after receiving the provisional gift, the donee refuses to leave the harbor—if the anchor of contractual performance sticks in the sands of irresolution and procrastination—the gift must be restored to the donor.

[T]he parties disagree, however, [over] whether fault [on the part of the donor] is relevant to determining return of the ring.

[Janis] contends that Pennsylvania law . . . has never recognized a right of recovery in a donor who severs the engagement. [She maintains that] if the condition of the gift is performance of the marriage ceremony, [a rule allowing a recovery of the ring] would reward a donor who prevents the occurrence of the condition, which the donee was ready, willing, and eagerly waiting to perform. Janis's argument that . . . the donor [should not be allowed] to recover the ring where the donor terminates the engagement has some basis in [decisions from Pennsylvania's lower courts and in treatises]. This Court, however, has not decided the question of whether the donor is entitled to return of the ring where the donor admittedly ended the engagement.

[T]he issue we must resolve is whether we will follow the fault-based theory argued by Janis, or the no-fault rule advocated by Rodger. Under a fault-based analysis, return of the rings depends on an assessment of who broke the engagement, which necessarily entails a determination of why that person broke the engagement. A no-fault approach, however, involves no investigation into the motives or reasons for the cessation of the engagement and requires the return of the engagement ring simply upon the nonoccurence of the marriage.

The rule concerning the return of a ring founded on fault principles has superficial appeal because, in the most outrageous instances of unfair behavior, it appeals to our sense of equity. Where one [of the formerly engaged persons] has truly "wronged" the other, justice appears to dictate that the wronged individual should be allowed to keep [the ring] or have [it] returned, depending on whether [the wronged] person was the donor . . . or the donee. However, the process of determining who is "wrong" and who is "right," when most modern relationships are complex circumstances, makes the fault-based approach less desirable. A thorough fault-based inquiry would not . . . end with the question of who terminated the engagement, but would also examine that person's reasons. In some instances the person who terminated the engagement may have been entirely justified in his or her actions. This kind of inquiry would invite the parties to stage the most bitter and unpleasant accusations against those whom they nearly made their spouse. A ring-return rule based on fault principles will inevitably invite acrimony and encourage parties to portray their ex-fiancées in the worst possible light. Furthermore, it is unlikely that trial courts would be presented with situations where fault was clear and easily ascertained.

The approach that has been described as the modern trend is to apply a no-fault rule to engagement ring cases. Courts that have applied [this rule] have borrowed from the policies of their respective legislatures that have moved away from the notion of fault in their divorce statutes. [A]ll fifty states [have] adopted some form of no-fault divorce. We agree with those jurisdictions that have looked toward the development of no-fault divorce law for a principle to decide engagement ring cases. [In addition, the] inherent weaknesses in any fault-based system lead us to adopt a no-fault approach to resolution of engagement ring disputes.

Decision of Superior Court in favor of Rodger Lindh affirmed.

Cappy, Justice, dissenting The majority urges adoption of [the no-fault rule] to relieve trial courts from having the onerous task of sifting through the debris of the broken engagement in order to ascertain who is truly at fault. Are broken engagements truly more disturbing than cases where we ask judges and juries to discern possible abuses in nursing homes, day care centers, dependency proceedings involving abused children, and criminal cases involving horrific, irrational injuries to innocent victims? The subject matter our able trial courts address on a daily basis is certainly of equal sordidness as any fact pattern they may need to address in a simple case of who broke the engagement and why.

I can envision a scenario whereby the prospective bride and her family have expended thousands of dollars in preparation for the culminating event of matrimony and she is, through no fault of her own, left standing at the altar holding the caterer's bill. To add insult to injury, the majority would also strip her of her engagement ring. Why the majority feels compelled to modernize this relatively simple and ancient legal concept is beyond the understanding of this poor man. [A]s I see no valid reason to forego the [fault-based rule] for determining possession of the engagement ring under the simple concept of conditional gift law, I cannot endorse the modern trend advocated by the majority.

Uniform Transfers to Minors Act

The Uniform Transfers to Minors Act, which has been adopted in one form or another in every state, provides a fairly simple and flexible method for making gifts and other transfers of property to minors.[7] As defined in this act, a minor is anyone under the age of 21. Under the act, an adult may transfer money, securities, real property, insurance policies, and other property. The specific ways of doing this vary according to the type of property transferred. In general, however, the transferor (the person who gives or otherwise transfers the property) delivers, pays, or assigns the property to, or registers the property with, a custodian who acts for the benefit of the minor "under the Uniform Transfers to Minors Act." The custodian is given fairly broad discretion to use the gift for the minor's benefit and may not use it for the custodian's personal benefit. The custodian may be the transferor himself, another adult, or a trust company, depending again on the type of property transferred. If the donor or other transferor

[7]This statute was formerly called, and is still called in some states, the Uniform Gift to Minors Act.

fully complies with the Uniform Transfers to Minors Act, the transfer is considered to be irrevocable.

Will or Inheritance

Ownership of personal property may also be transferred upon the death of the former owner. The property may pass under the terms of a will if the will was validly executed. If there is no valid will, the property is transferred to the heirs of the owner according to state laws. Transfer of property at the death of the owner will be discussed in Chapter 26.

Confusion

Title to personal property may be obtained by **confusion.** Confusion is the intermixing of different owners' goods in such a way that they cannot later be separated. For example, suppose wheat belonging to several different people is mixed in a grain elevator. If the mixing was by agreement or if it resulted from an accident without negligence on anyone's part, each person owns his proportionate share of the entire quantity of wheat. However, a different result would be reached if the wheat was wrongfully or negligently mixed. Suppose a thief steals a truckload of Grade #1 wheat worth $8.50 a bushel from a farmer. The thief dumps the wheat into his storage bin, which contains a lower-grade wheat worth $4.50 a bushel, with the result that the mixture is worth only $4.50 a bushel. The farmer has first claim against the entire mixture to recover the value of the higher-grade wheat that was mixed with the lower-grade wheat. The thief, or any other person whose intentional or negligent act results in confusion of goods, must bear any loss caused by the confusion.

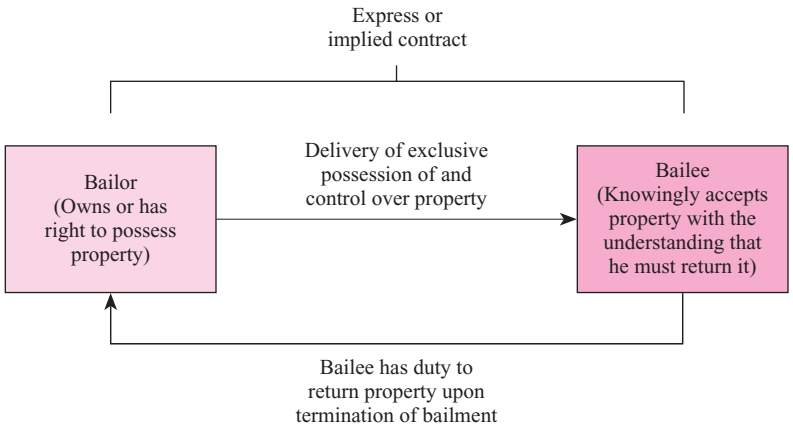
Accession

Ownership of personal property may also be acquired by **accession.** Accession means increasing the value of property by adding materials, labor, or both. As a general rule, the owner of the original property becomes the owner of the improvements. This is particularly likely to be true if the improvement was done with the permission of the owner. For example, Hudson takes his automobile to a shop that replaces the engine with a larger engine and puts in a new four-speed transmission. Hudson is still the owner of the automobile as well as the owner of the parts added by the auto shop.

Problems may arise if materials are added or work is performed on personal property without the consent of the owner. If property is stolen from one person and improved by the thief, the original owner can get it back and does not have to reimburse the thief for the work done or the materials used in improving it. For example, a thief steals Rourke's used car, puts a new engine in it, replaces the tires, and repairs the muffler. Rourke is entitled to get his car back from the thief and does not have to pay him for the engine, tires, and muffler.

The result is less easy to predict, however, if property is mistakenly improved in good faith by someone who believes that he owns the property. In such a case, a court must weigh the respective interests of two innocent parties: the original owner and the improver.

For example, Johnson, a stonecarver, finds a block of limestone by the side of the road. Assuming that it has been abandoned, he takes it home and carves it into a sculpture. In fact, the block was owned by Hayes. Having fallen off a flatbed truck during transportation, the block is merely lost property, which Hayes ordinarily could recover from the finder. In a case such as this, a court could decide the case in either of two ways. The first alternative would be to give the original owner (Hayes) ownership of the improved property, but to allow the person who has improved the property in good faith (Johnson) to recover the cost of the improvements. The second alternative would be to hold that the improver, Johnson, has acquired ownership of the sculpture, but that he is required to pay the original owner the value of the property as of the time he obtained it. The greater the extent to which the improvements have increased the value of the property, the more likely it is that the court will choose the second alternative and permit the improver to acquire ownership of the improved property.



Bailments

Nature of Bailments

A **bailment** is the delivery of personal property by its owner or someone holding the right to possess it (the **bailor**) to another person (the **bailee**) who accepts it and is under an express or implied agreement to return it to the bailor or to someone designated by the bailor. Only personal property can be the subject of bailments.

Although the legal terminology used to describe bailments might be unfamiliar to most people, everyone is familiar with transactions that constitute bailments. For example, Lincoln takes his car to a parking garage where the attendant gives Lincoln a claim check and

Figure 1 *Creation of a Bailment*

then drives the car down the ramp to park it. Charles borrows his neighbor's lawn mower to cut his grass. Tara, who lives next door to Kyle, agrees to take care of Kyle's cat while Kyle goes on a vacation. These are just a few of the everyday situations that involve bailments.

Elements of a Bailment

The essential elements of a bailment are:

1. The bailor owns the property or holds the right to possess it.
2. The bailor delivers exclusive possession of and control over the property to the bailee.
3. The bailee knowingly accepts the property with the understanding that he owes a duty to return the property as directed by the bailor.

Creation of a Bailment

A bailment is created by an express or implied contract. Whether the elements of a bailment have been fulfilled is determined by examining all the facts and circumstances of the particular situation. For example, a patron goes into a restaurant and hangs his hat and coat on an unattended rack. It is unlikely that this created a bailment, because the restaurant owner never assumed exclusive control over the hat and coat. However, if there is a checkroom and the hat and coat are checked with the attendant, a bailment will arise.

If a customer parks her car in a parking lot, keeps the keys, and may drive the car out herself whenever she wishes, a bailment has not been created. The courts treat this situation as a lease of space. Suppose, however, that she takes her car to a parking garage where an attendant, after giving her a claim check, parks the car. There is a bailment of the car because the parking garage has accepted delivery and possession of the car. However, a distinction is made between the car and packages locked in the trunk. If the parking garage was not aware of the packages, it probably would not be a bailee of them as it did not knowingly accept possession of them. The creation of a bailment is illustrated in Figure 1. The conclusion that a bailment was created proved to be critical to the outcome in the *King* case, which follows.

King v. Trustees of Boston University *647 N.E. 2d 1196 (Mass. Sup. Jud. Ct. 1995)*

Approximately four years prior to his death, Dr. Martin Luther King, Jr., provided Boston University with possession of some of his correspondence, manuscripts, and other papers. He did so pursuant to a letter, which read as follows:

On this 16th day of July, 1964, I name the Boston University Library the Repository of my correspondence, manuscripts, and other papers, along with a few of my awards and other materials which may come to be of interest in historical or other research.

In accordance with this action I have authorized the removal of most of the above-mentioned papers and other objects to Boston University, including most correspondence through 1961, at once. It is my intention that after the end of each calendar year, similar files of materials for an additional year should be sent to Boston University.

All papers and other objects which thus pass into the custody of Boston University remain my legal property until otherwise indicated, according to the statements below. However, if, despite scrupulous care, any such materials are damaged or lost while in custody of Boston University, I absolve Boston University of responsibility to me for such damage or loss.

I intend each year to indicate a portion of the materials deposited with Boston University to become the absolute property of Boston University as an outright gift from me, until all shall have been thus given to the University. In the event of my death, all such materials deposited with the University shall become from that date the absolute property of Boston University.

Sincerely yours,
Martin Luther King, Jr.

Acting in her capacity as administrator of Dr. King's estate, his widow, Coretta Scott King, sued Boston University for conversion. (Conversion is discussed in Chapter 6.) The plaintiff alleged that the King estate, and not BU, held title to the papers that had been housed in the BU library's special collection since the 1964 delivery of them. BU contended that it owned the deposited papers because Dr. King had made an enforceable charitable pledge to give them to BU. The case was tried before a jury, which ruled in BU's favor. In response to questions posed by the trial judge on a special verdict form, the jury determined that in his July 16, 1964, letter, Dr. King had made a promise to give BU title to his papers and that this promise was an enforceable charitable pledge supported by consideration or reliance. (See Chapter 12 for a discussion of the concepts of consideration and reliance.) When the trial judge denied her motion for judgment notwithstanding the verdict or for a new trial, the plaintiff appealed.

Abrams, Justice [T]he jury found that BU had acquired rightful ownership of the papers via a charitable pledge. [T]here is scant Massachusetts case law in the area of charitable pledges and subscriptions. A charitable subscription is an oral or written promise to do certain acts or to give real or personal property to a charity or for a charitable purpose. To enforce a charitable subscription in Massachusetts, a party must establish that there was a promise to give some property to a charitable institution and that the promise was supported by consideration or reliance.

The plaintiff argues that the terms of the letter promising "to indicate a portion of the material deposited with [BU] to become the absolute property of [BU] as an outright gift . . . until all shall have been thus given to [BU]," could not as a matter of basic contract law constitute a promise sufficient to establish an inter vivos charitable pledge because there is no indication of a bargained for exchange which would have bound Dr. King to his promise. The plaintiff asserts that the above-quoted excerpt (hereinafter "first statement") from the letter merely described an unenforceable unilateral and gratuitous mechanism by which he might make a gift of the papers in the future. In support of her position that Dr. King did not intend to bind himself to his statement of intent to make a gift of the papers he deposited with BU, the plaintiff points to the [letter's statement] that "[a]ll papers and other objects which thus pass into the custody of [BU] remain my legal property until otherwise indicated, according to the statements below." According to the plaintiff, because of Dr. King's initial retention of legal ownership, BU could not reasonably rely on the letter's statements of intent to make a gift of the papers. We do not agree.

The letter contains two sentences which might reasonably be construed as a promise to give personal property to a charity or for a charitable purpose. The first statement, quoted above, is that Dr. King intended in subsequent installments to transfer title to portions of the papers in BU's custody until all the papers in its custody became its property. The second statement immediately follows the first, expressing an intent that "[i]n the event of [Dr. King's] death, all . . . materials deposited with [BU] shall become from that date the absolute property of [BU]" (hereinafter "second statement"). BU claims that these two sentences should be read together as a

promise to make a gift of all of the papers deposited with it at some point between the first day of deposit and at the very latest, . . . Dr. King's death.

A primary concern in enforcing charitable subscriptions, as with enforcement of other gratuitous transfers such as gifts and trusts, is ascertaining the intent of the donor. If donative intent is sufficiently clear, we shall give effect to that intent to the extent possible without abandoning basic contractual principles, such as specificity of the donor's promise, consideration, and reasonableness of the charity's reliance. In determining the intent of Dr. King as expressed in the letter and the understanding BU had of that letter, we look first to the language of the letter, in its entirety, but also consider the circumstances and relationship of the parties.

First Statement

The plaintiff contends that [the first statement] is not a promise but a mere statement of intent to do something in the future. We might agree that the first statement could induce nothing more than a hope or mere expectation on BU's part, if the statement were considered in a vacuum. However, our interpretation of that first statement is strongly influenced by the bailor-bailee relationship the letter unequivocally established between Dr. King and BU.

A bailment is established by "delivery of personalty for some particular purpose, or on mere deposit, upon a contract, express or implied, that after the purpose has been fulfilled, it shall be redelivered to the person who delivered it, or otherwise dealt with according to his directions, or kept until he reclaims it, as the case may be" (quoting *Williston on Contracts* [3d ed. 1967]). The terms of the letter establish a bailment in which certain "correspondence, manuscripts and other papers, along with a few of [Dr. King's] awards" were placed in "the custody of [BU]." The bailed papers were to "remain [Dr. King's] property until otherwise indicated." By accepting delivery of the papers, BU assumed the duty of care as bailee set forth in the letter, that of "scrupulous care."

Generally there will be a case for the jury as to donative intent if property allegedly promised to a charity or other eleemosynary institution is placed by the donor in the custody of the donee. The bailor-bailee relationship established in the letter could be viewed by a rational factfinder as a security for the promise to give a gift in the future of the bailed property, and thus as evidence in addition to the [letter's] statement of an intent of the donor to be bound. Furthermore, while we have been unwilling to abandon fundamental principles of contract law in determining the enforceability of charitable subscriptions, we do recognize that the "meeting of minds" between a donor and a charitable institution differs from the understanding we require in the context of enforceable arm's-length commercial agreements. Charities depend on donations for their existence, whereas their donors may give personal property on conditions they choose, with or without . . . demanding consideration. In combination with the letter and in the context of a disputed pledge to a charity, the bailment of Dr. King's letters provided sufficient evidence of donative intent to submit to the jury the questions whether there was a promise to transfer ownership of the bailed property and whether there was consideration [for] or reliance on that promise.

Second Statement

The parties agree that a testamentary transfer of the papers by means of the July 16, 1964 letter would be invalid because the letter did not comply with the Statute of Wills ([which requires] testamentary dispositions to be subscribed by two or more competent witnesses). However, the Statute of Wills does not prevent an owner of property from stipulating by contract for the disposition of his property at the time of his death. The parties dispute whether the statement of intent to transfer title on Dr. King's death comports with the Statute of Frauds for contracts to make testamentary dispositions. Although the letter was a writing signed by Dr. King, the plaintiff asserts that [it] does not satisfy the Statute of Frauds because it did not contain all the terms of an enforceable agreement. We do not agree. The Statute of Frauds was not applicable because the letter was not a contract to make a will, but rather was a promise to give BU absolute title to all papers in its possession either at some future point in Dr. King's life or upon his death. [Even if the Statute of Frauds applied here], the first statement of intent to make gifts during his lifetime of the bailed papers could have been interpreted by the jury as a promise to give gifts on which BU reasonably relied or for which BU rendered consideration. The second statement that papers not yet transferred to BU but in its custody at the time of Dr. King's death could

have been interpreted by the jury as a statement of the latest date on which Dr. King intended to make a gift to BU of the bailed property. Such an interpretation states all terms of an enforceable agreement. Thus, [even if] the Statute of Frauds governing contracts to make testamentary dispositions [applied here, it] would be satisfied.

Evidence of Consideration or Reliance

The judge did not err in submitting the second question on charitable pledge, regarding whether there was consideration for or reliance on the promise, to the jury. There was evidence that BU undertook indexing of the papers, made the papers available to researchers, and provided trained staff to care for the papers and assist researchers. BU held a convocation to commemorate receipt of the papers. Dr. King spoke at the convocation. In a speech at that time, he explained why he chose BU as the repository for his papers.

As we explained above, the letter established that so long as BU, as bailee, attended the papers with "scrupulous care," Dr. King, as bailor, would release them from liability for "any such materials . . . damaged or lost while in [its] custody." The jury could conclude that certain actions of BU, including indexing of the papers, went beyond the obligations BU assumed as a bailee to attend the papers with "scrupulous care" and constituted reliance [on] or consideration for the promises Dr. King included in the letter to transfer ownership of all bailed papers to BU at some future date or at his death. We conclude that the letter could have been read to contain a promise supported by consideration or reliance.

Judgment in favor of Boston University affirmed.

Types of Bailments

Bailments are commonly divided into three different categories:

1. Bailments for the sole benefit of the bailor.
2. Bailments for the sole benefit of the bailee.
3. Bailments for mutual benefit.

The type of bailment involved in a case can be important in determining the liability of the bailee for loss of or damage to the property. As will be discussed later, however, some courts no longer rely on these distinctions when they determine whether the bailee is liable.

Bailments for Benefit of Bailor A bailment for the sole benefit of the bailor is one in which the bailee renders some service but does not receive a benefit in return. For example, Brown allows his neighbor, Reston, to park her car in Brown's garage while she is on vacation. Brown does not ask for any compensation. Here, Reston, the bailor, has received a benefit from the bailee, Brown, but Brown has not received a benefit in return.

Bailments for Benefit of Bailee A bailment for the sole benefit of the bailee is one in which the owner of the goods allows someone else to use them free of charge. For example, Anderson lends a lawn mower to her neighbor, Moss, so he can cut his grass.

Bailments for Mutual Benefit If both the bailee and the bailor receive benefits from the bailment, it is a bailment for mutual benefit. For example, Sutton rents china for his daughter's wedding from E-Z Party Supplies for an agreed-on price. Sutton, the bailee, benefits by being able to use the china; E-Z benefits from his payment of the rental charge. On some occasions, the benefit to the bailee is less tangible. For example, a customer checks a coat at an attended coatroom at a restaurant. Even if no charge is made for the service, it is likely to be treated as a bailment for mutual benefit because the restaurant is benefiting from the customer's patronage.

Special Bailments

Certain professional bailees, such as innkeepers and common carriers, are treated somewhat differently by the law and are held to a higher level of responsibility than is the ordinary bailee. The rules applicable to common carriers and innkeepers are detailed later in this chapter.

Duties of the Bailee

The bailee has two basic duties:

1. To take care of the property that has been entrusted to her.
2. To return the property at the termination of the bailment.

The following discussion examines the scope of these duties.

Duty of Bailee to Take Care of Property

The bailee is responsible for taking steps to protect the property during the time she has possession of it. If the bailee does not exercise proper care and the property is lost or damaged, the bailee is liable for negligence. The bailee would then be required to reimburse the bailor for the amount of loss or damage. If the property is lost or damaged without the fault or negligence of the bailee, however, the bailee is not liable to the bailor. The degree of care required of the bailee traditionally has depended in large part on the type of bailment involved.

1. *Bailment for the benefit of the bailor.* If the bailment is solely for the benefit of the bailor, the bailee is expected to exercise only a minimal, or slight, degree of care for the protection of the bailed property. He would be liable, then, only if he were grossly negligent in his care of the bailed property. The rationale for this rule is that if the bailee is doing the bailor a favor, it is not reasonable to expect him to be as careful as when he is deriving some benefit from keeping the goods.

2. *Bailment for mutual benefit.* When the bailment is a bailment for mutual benefit, the bailee is expected to exercise ordinary or reasonable care. This degree of care requires the bailee to use the same care a reasonable person would use to protect his own property in the relevant situation. If the bailee is a professional that holds itself out as a professional bailee, such as a warehouse, it must use the degree of care that would be used by a person in the same profession. This is likely to be more care than the ordinary person would use. In addition, a professional bailee usually has the obligation to explain any loss of or damage to property—that is, to show it was not negligent. If it cannot do so, it will be liable to the bailor.

3. *Bailment for the benefit of the bailee.* If the bailment is solely for the benefit of the bailee, the bailee is expected to exercise a high degree of care. For instance a person who lends a sailboat to a neighbor would probably expect the neighbor to be even more careful with the sailboat than the owner might be. In such a case, the bailee would be liable for damage to the property if his action reflected a relatively small degree of negligence.

A number of courts today view the type of bailment involved in a case as just one factor to be considered in determining whether the bailee should be liable for loss of or damage to bailed goods. The modern trend appears to be moving in the direction of imposing a duty of reasonable care on bailees, regardless of the type of bailment. This flexible standard of care permits courts to take into account a variety of factors such as the nature and value of the property, the provisions of the parties' agreement, the payment of consideration for the bailment, and the experience of the bailee. In addition, the bailee is required to use the property only as was agreed between the parties. For example, Jones borrows Morrow's lawn mower to mow his lawn. If Jones uses the mower to cut the weeds on a trash-filled vacant lot and the mower is damaged, he would be liable because he was exceeding the agreed purpose of the bailment—to cut his lawn.

Bailee's Duty to Return the Property

An essential element of a bailment is the duty of the bailee to return the property at the termination of the bailment. If the bailed property is taken from the bailee by legal process, the bailee should notify the bailor and must take whatever action is necessary to protect the bailor's interest. In most instances, the bailee must return the identical property that was bailed. A person who lends a 1999 Mercury Sable to a friend expects to have that particular car returned. In some cases, the bailor does not expect the return of the identical goods. For example, a farmer who stores 1,500 bushels of Grade #1 wheat at a local grain elevator expects to get back 1,500 bushels of Grade #1 wheat when the bailment is terminated, but not the identical wheat he deposited.

The bailee must return the goods in an undamaged condition to the bailor or to someone designated by the bailor. If the goods have been damaged, destroyed, or lost, there is a rebuttable presumption of negligence on the part of the bailee. To overcome the presumption, the bailee must come forward with evidence showing that he exercised the relevant level of care. The operation of the rebuttable presumption can be seen in the *Magee* case, which follows. If the property is lost or damaged without the fault or negligence of the bailee, however, the bailee is not liable to the bailor.

Magee v. Walbro, Inc. *525 N.E.2d 975 (Ill. Ct. App. 1988)*

Walbro, Inc., doing business as Mysel Furs, was in the business of storing furs. It had arranged for United Parcel Service (UPS) to pick up furs from its customers and deliver them to Mysel's. In May 1982, Mysel's solicited Crella Magee's agreement that Mysel's could store her furs for the summer. Magee so agreed. Pursuant to an arrangement with Mysel's to pick up three furs from Magee, UPS delivered three empty boxes, which were labeled with unique call numbers, to Magee on May 25. Magee inserted a fur in each of the boxes. UPS then picked up the three boxes and gave Magee's husband three tickets bearing call numbers identical to those marked on the boxes. UPS delivered the boxes to Mysel's on May 26. A Mysel's employee signed for the boxes but did not check to be sure that each box had a fur in it. In July, Mysel's provided Magee with a storage receipt that showed only two furs. This storage receipt also contained a term that limited Mysel's liability for lost property to $100. Magee called Mysel's immediately and received assurances that the three furs were in storage.

When Magee went to pick up her three furs in October 1982, however, one of them—a blue fox jacket worth $3,400—was missing. Mysel's did not compensate Magee, arguing that its liability for lost articles was limited to $100. Magee then brought suit against Walbro, Mysel's, and UPS for breach of bailment and conversion. The trial court ruled for the defendants, and Magee appealed. (Magee voluntarily dismissed her case against UPS, so its liability was not involved in the appeal.)

O'Connor, Justice Establishing a prima facie case of bailment raises a presumption of negligence by the defendant, which the defendant must rebut with evidence sufficient to support a finding of the nonexistence of the presumed fact. The trial court ruled that the evidence established a bailment between Magee and Walbro and Mysel's, thus raising the presumption of negligence. Walbro and Mysel produced no evidence, however, to rebut the presumption of negligence.

Based on the evidence presented, the trial court ruled that the lost jacket was delivered to Mysel Furs. Walbro and Mysel's argued that, assuming delivery of the jacket, any presumption of negligence was defeated by the procedures used in storing furs. The furs were placed in a locked, alarmed vault to which several, identifiable Mysel's employees had access. Mysel's then prepared and issued a storage receipt to the customer. Walbro presented no evidence to show that these procedures were followed for Magee's furs, and the storage receipt was not issued until six weeks after the jacket was delivered. It is reasonable to assume that the defendants' procedures and security precautions customarily resulted in the return of the customer's fur. Magee's fur was not returned; therefore, without showing more than the mere existence of safety and security measures, the defendants failed to rebut the presumption of negligence. Magee was therefore entitled to recover her damages.

Finally, the defendants asserted the defense of limitation of liability. Walbro and Mysel's argue that they effectively limited their liability to $100, citing *Schoen v. Wallace,* which upheld an agreement between a fur owner and fur storage company to limit the storage company's liability to $100. *Schoen* and [other cases] indicate, however, that the customer was aware of the limitation of liability before the furs were placed in storage. The *Schoen* decision was based in part on the fact that the plaintiff had dealt with the defendant before, knew of its insurance practices, [and] could have chosen another furrier had she found the limitation objectionable.

In the instant case, Magee testified that she was not told of the limitation until after the fur was lost. Defendants rely on the receipt of July 1982, which stated that liability was limited to $100. Magee should have known of the limitation after she received the receipt in July, but by that time her furs had been at Mysel's for six weeks.

The limitation does not apply in the instant case because Magee had no knowledge of the limitation before agreeing to store her furs. In *Schoen,* the court stated that it would be "unjust to permit the plaintiff to repudiate [the agreement to limit liability] because the coat was lost." In the instant case, it would be unjust to permit Mysel and Walbro to assert a limitation that was not made clear at the

time that the bailment contract was made because the coat was lost. We therefore hold that the $100 limitation of liability is inapplicable in this case.

For the foregoing reasons, judgment in favor of the defendants is reversed, and this case is remanded to the trial court to enter judgment against Walbro and Mysel's and in favor of Magee in the amount of $3,400.

Reversed and remanded in favor of Magee.

Bailee's Liability for Misdelivery

The bailee is also liable to the bailor if he misdelivers the bailed property at the termination of the bailment. The property must be returned to the bailor or to someone specified by the bailor.

The bailee is in a dilemma if a third person, claiming to have rights superior to those of the bailor, demands possession of the bailed property. If the bailee refuses to deliver the bailed property to the third-party claimant and the claimant is entitled to possession, the bailee is liable to the claimant. If the bailee delivers the bailed property to the third-party claimant and the claimant is not entitled to possession, the bailee is liable to the bailor. The circumstances may be such that the conflicting claims of the bailor and the third-party claimant can be determined only by judicial decision. In some cases, the bailee may protect himself by bringing the third-party claimant into a lawsuit along with the bailor so that all the competing claims can be adjudicated by the court before the bailee releases the property. This remedy is not always available, however.

Limits on Liability

Bailees may try to limit or relieve themselves of liability for the bailed property. Some examples include the storage receipt purporting to limit liability to $100 in the *Magee* case, signs near checkrooms such as "Not responsible for loss of or damage to checked property," and disclaimers on claim checks such as "Goods left at owner's risk." The standards used to determine whether such limitations and disclaimers are enforceable are discussed in Chapter 15.

Any attempt by the bailee to be relieved of liability for intentional wrongful acts is against public policy and will not be enforced. A bailee's ability to be relieved of liability for negligence is also limited. Courts look to see whether the disclaimer or limitation of liability was communicated to the bailor at the time of the bailment. When the customer handed her coat to the checkroom attendant, did the attendant point out the "not responsible for loss or damage" sign? Did the parking lot attendant call the car owner's attention to the disclaimer on the back of the claim check?

If not, as in the *Magee* case, the court may hold that the disclaimer was not communicated to the bailor and did not become part of the bailment contract. Even if the bailor was aware of the disclaimer, it still may not be enforced on the ground that it is contrary to public policy.

If the disclaimer was offered on a take-it-or-leave-it basis and was not the subject of arm's-length bargaining, it is less likely to be enforced than if it was negotiated and voluntarily agreed to by the parties. A bailee may be able to limit liability to a certain amount or to relieve himself of liability for certain perils. Ideally, the bailee will give the bailor a chance to declare a higher value and to pay an additional charge in order to be protected up to the declared value of the goods. Common carriers, such as railroads and trucking companies, often take this approach. Courts do not look with favor on efforts by a person to be relieved of liability for negligence. For this reason, terms limiting the liability of a bailee stand a better chance of being enforced than do terms completely relieving the bailee of liability.

An implied agreement as to the bailee's duties may arise from a prior course of dealing between the bailor and the bailee, or from the bailor's knowledge of the bailee's facilities or method of doing business. The bailee may, if he wishes, assume all risks incident to the bailment and contract to return the bailed property undamaged or to pay for any damage to or loss of the property.

Right to Compensation

The express or implied contract creating the bailment controls whether the bailee has the right to receive compensation for keeping the property or must pay for having the right to use it. If the bailment is made as a favor, then the bailee is not entitled to compensation even though the bailment is for the bailor's sole benefit. If the bailment involves the rental of property, the bailee must pay the agreed rental rate. If the bailment is for the

storage or repair of property, the bailee is entitled to the contract price for the storage or repair services. When no specific price was agreed on but compensation was contemplated by the parties, the bailee is entitled to the reasonable value of the services provided.

In many instances, the bailee will have a lien (a charge against property to secure the payment of a debt) on the bailed property for the reasonable value of the services. For example, Silver takes a chair to Ace Upholstery to have it recovered. When the chair has been recovered, Ace has the right to keep it until the agreed price—or, if no price was set, the reasonable value of the work—is paid. This is an example of an **artisan's lien,** which is discussed in Chapter 28.

Bailor's Liability for Defects in the Bailed Property

When personal property is rented or loaned, the bailor makes an implied warranty that the property has no hidden defects that make it unsafe for use. If the bailment is for the bailee's sole benefit, the bailor is liable for injuries that result from defects in the bailed property only if the bailor knew about the defects and did not tell the bailee. For example, Price lends his car, which he knows has bad brakes, to Sloan. If Price does not tell Sloan about the bad brakes and Sloan is injured in an accident because the brakes fail, Price is liable for Sloan's injuries.

If the bailment is a bailment for mutual benefit, the bailor has a greater obligation. The bailor must use reasonable care in inspecting the property and seeing that it is safe for the purpose for which it is intended. The bailor is liable for injuries suffered by the bailee because of defects that the bailor either knew about or should have discovered through reasonable inspection. For example, Acme Rent-All, which rents trailers, does not inspect the trailers after they are returned. A wheel has come loose on a trailer that Acme rents to Hirsch. If the wheel comes off while Hirsch is using the trailer and the goods Hirsch is carrying in it are damaged, Acme is liable to Hirsch. The *Retzler* case, which follows shortly, deals with the bailor's duty of reasonable care.

In addition, product liability doctrines that apply a higher standard of legal responsibility have been applied to bailors who are commercial lessors of personal property.[8] Express or implied warranties of quality under either Article 2 or Article 2A of the UCC may apply. Liability under these warranties does not depend on whether the bailor knew about or should have discovered the defect. The only question is whether the property's condition complied with the warranty. Some courts have also imposed strict liability on the commercial lessor-bailor of defective, unreasonably dangerous goods that cause personal injury or property damage to the lessee-bailee. This liability is imposed regardless of whether the lessor was negligent.

[8]Product liability doctrines are discussed in Chapter 20.

Retzler v. Pratt & Whitney Co. 1999 Ill. App. LEXIS *(Ill. App. 1999)*

In August 1991, a series of financial transactions occurred with regard to a certain ATR 42-300 aircraft. First, AMR Leasing Corp. purchased the aircraft. Immediately thereafter, AMR sold the aircraft to a French company. That firm then leased the aircraft back to AMR, which subleased it to Simmons Airlines, Inc., the owner of American Eagle Airlines.

Karen Retzler was a flight attendant on a September 1991 American Eagle Airlines flight. The aircraft used for the flight was the ATR 42-300 that was the subject of the above-described transactions. Shortly after the aircraft took off from Traverse City, Michigan, for an intended destination of Chicago, the No. 4 bearing within an engine failed. The aircraft cabin and cockpit then filled with smoke. When the pilot suddenly reduced cabin pressure and began an emergency descent and landing, Retzler's body came into violent contact with the galley of the aircraft. Retzler, who sustained injuries as a result, filed suit against AMR and various other defendants. When the trial court granted AMR summary judgment, Retzler appealed.

Quinn, Justice In her complaint, Retzler alleged that AMR is liable for the injuries she sustained in the emergency landing of the ATR 42-300. She alleged that AMR, as owner and/or lessor of the aircraft, had a duty not to place a defective aircraft into the stream of commerce. She claimed that

AMR was negligent in failing to adequately test and inspect the engine to discover the defect, and [in] allowing the aircraft to be flown when AMR should have known the aircraft was not in airworthy condition. As a result of AMR's failure to detect the defect in the aircraft, Retzler alleges, the aircraft was forced into an emergency landing [and Retzler] sustained injuries. [In support of its motion for summary judgment, AMR argued that it did not owe Retzler a duty but that if any duty was owed, it was not breached.]

[T]he leasing of an aircraft is subject to the general rules regarding the bailment or lease of personal property. [When] the bailment is lucrative to the bailor-lessor, the bailor is liable to an injured third person if (1) he supplied the chattel in question; (2) the chattel was defective at the time it was supplied; (3) the defect could have been discovered by a reasonable inspection, when inspection is required (i.e., where the danger of substantial harm because of a defect is great); and (4) the defect was the proximate cause of the injury.

Retzler has clearly established three of the requirements for bailor-lessor liability. First, it is undisputed that AMR supplied the aircraft in question. In fact, not only was AMR the lessor of the aircraft, it actually sold the aircraft to [the French firm that leased it back to AMR, which then subleased it to Simmons]. Second, the aircraft was defective at the time that it was leased to Simmons. The bearing itself was contained inside the engine since the date of the engine's assembly. Third, there is no question that the defective engine led to Retzler's injuries.

The final factor in determining whether AMR is liable under a common law bailment theory is whether the defect in the engine could have been discovered by a reasonable inspection. Such inspection may be required where the danger of substantial harm is great, as we find it is here. AMR admits that it never conducted tests or performed an inspection of the engine. AMR relies on the affidavits of Simmons employees stating that the aircraft was in a safe and airworthy condition and the engines were in good working order at the time of its transfer from AMR to Simmons. Retzler, however, submitted expert testimony that an inspection of the engine would have revealed the defect. Looking at the evidence in the light most favorable to the nonmoving party, here Retzler, we conclude that the question of whether an adequate inspection would have revealed the defect in the aircraft's engine is a genuine issue of material fact that should be resolved by a trier of fact.

Trial court's order granting summary judgment in favor of AMR reversed and case remanded.

Special Bailments

Common Carriers

Bailees that are common carriers are held to a higher level of responsibility than are bailees that are private carriers. Common carriers are licensed by governmental agencies to carry the property of anyone who requests the service. Airlines licensed by the Department of Transportation and trucks and buses licensed by the Interstate Commerce Commission are examples of common carriers. Private contract carriers carry goods only for persons selected by the carrier.

Both common carriers and private contract carriers are bailees. However, the law makes the common carrier a near-absolute insurer of the goods it carries. The common carrier is responsible for virtually any loss of or damage to the entrusted goods, unless the common carrier shows that the loss or damage was caused by one of the following:

1. An act of God.
2. An act of a public enemy.
3. An act or order of the government.
4. An act of the person who shipped the goods.
5. The nature of the goods themselves.

Therefore, the common carrier is liable if goods entrusted to it are stolen by some unknown person, but not if the goods are destroyed when a tornado hits the warehouse. If goods are damaged because the shipper improperly packaged or crated them, the carrier is not liable. Similarly, if perishable goods are not in suitable condition to be shipped and therefore deteriorate in the course of shipment, the carrier is not liable so long as it used reasonable care in handling them.

Concept Review

Duties of Bailees and Bailors

Type of Bailment	Duties of Bailee	Duties of Bailor
Sole Benefit of Bailee	1. Must use great care; liable for even slight negligence. 2. Must return goods to bailor or dispose of them at his direction. 3. May have duty to compensate bailor.	1. Must notify the bailee of any known defects.
Mutual Benefit	1. Must use reasonable care; liable for ordinary negligence. 2. Must return goods to bailor or dispose of them at his direction. 3. May have duty to compensate bailor.	1. Must notify bailee of all known defects and any defects that could be discovered on reasonable inspection. 2. Commercial lessors may be subject to warranties of quality and/or strict liability in tort. 3. May have duty to compensate bailee.
Sole Benefit of Bailor	1. Must use at least slight care; liable for gross negligence. 2. Must return goods to bailor or dispose of them at his direction.	1. Must notify bailee of all known defects and any hidden defects that are known or could be discovered on reasonable inspection. 2. May have duty to compensate bailee.

Common carriers are usually permitted to limit their liability to a stated value unless the bailor declares a higher value for the property and pays an additional fee.

Hotelkeepers

Hotelkeepers are engaged in the business of offering food and/or lodging to transient persons. They hold themselves out to serve the public and are obligated to do so. As is the common carrier, the hotelkeeper is held to a higher standard of care than that of the ordinary bailee. The hotelkeeper, however, is not a bailee in the strict sense of the word. The guest does not usually surrender the exclusive possession of his property to the hotelkeeper. Even so, the hotelkeeper is treated as the virtual insurer of the guest's property. The hotelkeeper is not liable for loss of or damage to property if she shows that it was caused by one of the following:

1. An act of God.
2. An act of a public enemy.
3. An act of a governmental authority.
4. The fault of a member of the guest's party.
5. The nature of the goods.

Most states have passed laws that limit the hotelkeeper's liability, however. Commonly, the law requires the hotel owner to post a notice advising guests that any valuables should be checked into the hotel vault. The hotelkeeper's liability is then limited, usually to a fixed amount, for valuables that are not so checked.

Safe-Deposit Boxes

If a person rents a safe-deposit box at a local bank and places property in the box, the box and the property are in the physical possession of the bank. However, it takes both the renter's key and the key held by the bank to open the box. In most cases, the bank does not know the nature, amount, or value of the goods in the box. Although a few courts have held that the rental of a safe-deposit box does not create a bailment, most courts have concluded that the renter of the box is a bailor and the bank is a bailee. As such, the bank is not an insurer of the contents of the box. It is obligated,

however, to use due care and to come forward and explain loss of or damage to the property entrusted to it.

Involuntary Bailments

Suppose a person owns a cottage on a beach. After a violent storm, a sailboat washed up on his beach. As the finder of lost or misplaced property, he may be considered the **involuntary bailee** or **constructive bailee** of the sailboat. This relationship may arise when a person finds himself in possession of someone else's property without having agreed to accept possession.

The duties of the involuntary bailee are not well defined. The involuntary bailee does not have the right to destroy or use the property. If the true owner shows up, the property must be returned to him. Under some circumstances, the involuntary bailee may be under an obligation to assume control of the property or to take some minimal steps to ascertain the owner's identity, or both.

Ethical and Public Policy Concerns

1. Does a finder of lost or mislaid property have an ethical duty to look for the owner of the property? How effective are the legal principles that you learned in encouraging a finder to do so?

2. What part does ethical conduct play in determining whether a person acquires ownership of personal property by confusion? By accession?

3. You learned that in determining the degree of care a bailee must exercise over bailed property, courts traditionally have applied standards based on the amount of relative benefit the parties derive from the bailment. When both parties benefit, reasonable care is required; when the bailee alone benefits, great care is required; and when the bailor alone benefits, only slight care is required. Modern courts, however, seem to be moving in the direction of applying a standard of reasonable care to all bailments. Which approach is preferable, and why?

Problems and Problem Cases

1. The Jones Institute for Reproductive Medicine, which was located in Virginia, conducted an in vitro fertilization (IVF) program. The IVF process involves removing eggs from a woman's body, fertilizing the eggs in vitro (outside the womb) with the husband's sperm, and then depositing the developing masses into the woman's uterus. When the Jones Institute accepted Steven York and Risa Adler-York (the Yorks) into the IVF program, the parties entered into a written Cryopreservation Agreement. This agreement outlined the procedure for cryopreservation (i.e., freezing) of pre-zygotes and detailed the Yorks' rights in the frozen pre-zygotes. The agreement explained that the cryopreservation procedure would be available if more than five pre-zygotes were retrieved during the IVF process, so that the possibility for multiple births could be reduced and optimal chances for pregnancy maintained. The agreement also stated:

> We [the Yorks] . . . understand our pre-zygotes will be stored only as long as we are active IVF patients at . . . Jones Institute. We have the principal responsibility to decide the disposition of our pre-zygotes. Our frozen pre-zygotes will not be released from storage for the purpose of intrauterine transfer without the written consent of us both. In the event of divorce, we understand legal ownership of any stored pre-zygotes must be determined in a property settlement . . . . Should we for any reason no longer wish to attempt to initiate a pregnancy, we understand we may choose one of three fates for our pre-zygotes that remain in frozen storage. Our pre-zygotes may be: 1) donated to another infertile couple . . . , 2) donated for approved research investigation, [or] 3) thawed but not allowed to undergo further development.

The Yorks underwent IVF treatment four times. Six eggs were removed from Risa and fertilized with Steven's sperm. Six embryos therefore were created. Five of them were transferred to Risa's uterus. The remaining embryo was cryogenically preserved in accordance with the agreement. None of the IVF attempts resulted in pregnancy.

During the course of treatment, the Yorks moved from Virginia to California. They sought to have the remaining pre-zygote transferred from the Jones Institute to a Los Angeles institute, where the Yorks planned to continue with IVF efforts. The Yorks arranged for proper transportation and handling of the pre-zygote, but the Jones Institute, taking the position that the Yorks' options were limited to the "three fates" listed in the Cryopreservation Agreement, refused to allow the transfer. The Yorks therefore filed suit against the Jones Institute in an effort to obtain the pre-zygote. In view of the above facts, did a bailment exist between the Yorks and the Jones Institute? Should the Yorks win the case?

2. First National Bank of Chicago (First Chicago) sold a number of used file cabinets on an "as is" basis to Zibton, an office supply and furniture dealer. Zibton later sold some of these cabinets to Strayve, who gave one of the cabinets—a locked one with no keys—to his friend, Richard Michael. Approximately six weeks later, Michael was moving the file cabinet in his garage. The cabinet fell over, and some of the locked drawers opened. Inside were more than 1,600 certificates of deposit (CDs), including seven recently matured CDs that had not been canceled or stamped paid. Those seven CDs were worth a total of more than $6 million. Six of them were payable to "Bearer." First Chicago had placed the CDs in the cabinet a few months earlier, when the responsibility for storing paid CDs was changed to a different unit of the bank. The CDs were moved from a vault to file cabinets at that time. Each drawer had been labeled with a card stating "Paid Negotiable CDs" and indicating the numbers of the CDs contained in the drawer. The new unit responsible for storing CDs had determined that it could not use the file cabinets, so the CDs were transferred to tote boxes. First Chicago employees randomly checked to determine whether the file cabinets were empty, and then transferred the cabinets to the warehouse for sale. After he discovered the CDs, Michael called the FBI, which took possession of them. Michael and his wife then filed a declaratory judgment action in an effort to have the court determine who owned the CDs. The Michaels contended that the CDs were abandoned property, and that they, as finders of the CDs, should therefore be considered the owners of the CDs. Were the Michaels correct in this contention?

3. Bernice Paset, a customer of the Old Orchard Bank, found $6,325 in currency on the seat of a chair in an examination booth in the bank's safety-deposit vault. The chair was partially under a table. Paset notified officers of the bank and turned the money over to them. She was told by bank officials that the bank would try to locate the owner and that she could have the money if the owner was not located within one year. The bank wrote to everyone who had been in the safety-deposit vault area either on the day of, or on the day preceding, the discovery. The bank's letter stated that some property had been found and invited the customers to describe any property they might have lost. No one reported the loss of any currency. The money remained unclaimed a year after it had been found. The bank refused to deliver the money to Paset, contending that it was mislaid, not lost, property and that it had a better right to it. Was the money mislaid property?

4. John Fierro and Janan Hoel became engaged to be married. At the time Fierro proposed and Hoel accepted, Fierro presented her with a diamond ring that carried a value of approximately $9,000. During the engagement, Fierro and Hoel located a condominium to purchase in New York City. Hoel, however, refused to sign mortgage documents stating that Fierro's parents had loaned them money for the purchase. Fierro later broke the engagement and asked Hoel to return the ring. When Hoel refused to return the ring, Fierro sued her. What type of gift was present in this case? Who should win the case?

5. Ochoa's Studebaker automobile was stolen. Eleven months later, the automobile somehow found its way into the hands of the U.S. government, which sold it to Rogers at a "junk" auction for $85. At the time it was purchased by Rogers, no part of the car was intact. It had no top except a part of the frame; it had no steering wheel, tires, rims, cushions, or battery; the motor, radiator, and gears were out of the car; one wheel was gone, as was one axle; the fenders were partly gone; and the frame was broken. It was no longer an automobile but a pile of broken and dismantled parts. Having purchased these parts, Rogers used them in the construction of a delivery truck at an expense of approximately $800. When the truck was completed, he put it to use in his furniture business. Several months later, Ochoa passed Rogers's place of business and recognized the vehicle from marks on the hood and the radiator. He discovered that the serial and engine numbers matched those of the car he had owned. Ochoa demanded the vehicle from Rogers, who refused to surrender it. Ochoa brought suit to recover possession of the property. In the alternative, he asked for the value of the vehicle at the time of the suit (allegedly $1,000) and for the value of the use of the car from the time Rogers purchased it from the government. Was Ochoa entitled to recover possession of his property, which Rogers had substantially improved?

6. SDP Corp. owned a backhoe that was operable but was still in a developmental phase. Some operational features had not yet been finalized. Steven Pitman, an SDP employee, borrowed the backhoe to do some work at his residence. SDP was to receive information

from Pitman regarding how the backhoe performed. SDP later made various requests that Pitman return the backhoe, but he did not do so. Eventually, Pitman reported to the police that the backhoe had been stolen. Disputes between Pitman and SDP led to Pitman's being fired. Pitman sued SDP in an effort to recover some items of personal property that he had left at SDP's place of business. SDP filed a counterclaim, seeking the return of the backhoe or damages in the amount of its value. Did a bailment exist with regard to the backhoe? If so, what type? Should SDP win its counterclaim?

7. Georgie Simon entrusted 14 gold and silver coins to her ex-husband, Hardie Maloney, to take to a coin show in Atlanta, Georgia. He was to try to sell the coins, for which he would receive a 7 percent commission. Maloney traveled to the coin show along with his girlfriend, Ann Williams, and a male friend, Herbert Pellegrini, with whom he had previously traveled to 40 or 50 coin shows. Just before they got ready to leave the Waverly Hotel, where the show had been held, Maloney and Williams went up to Pellegrini's room. Pellegrini would not permit Williams to use the bathroom because he wanted to check out before the deadline and avoid being charged for another day. Williams and Maloney helped Pellegrini carry his three pieces of luggage to the lobby. As Pellegrini checked out, Williams stopped at the ladies' room, which was located near the lobby. While Williams was in the bathroom, Maloney went to get his car, on the suggestion and insistence of Pellegrini. He initially resisted the suggestion because he was carrying a briefcase containing Georgie Simon's coins, as well as the coins he had brought to, and purchased at, the show. Maloney wanted to wait until they could all walk over to the car together for protection. However, after being assured by Pellegrini that he would watch the briefcase, Maloney went to get the car. Maloney set the briefcase down beside Pellegrini's three bags in front of the hotel. When Maloney returned with the car, Pellegrini walked up to the vehicle carrying all three pieces of his luggage. He left Maloney's briefcase in front of the hotel. When Maloney asked about the whereabouts of the briefcase, Pellegrini replied that he did not know where it was. It was never found. Georgie Simon brought suit against Maloney for $19,000, the value of the coins she had entrusted to him. Maloney, in turn, filed a claim against Pellegrini for the loss of those coins as well as for the $12,300 in coins that he had entrusted to Pellegrini. Was Pellegrini liable for the loss of the coins entrusted to him?

8. Pringle, the head of the drapery department at Wardrobe Cleaners, went to the Axelrods' home to inspect some dining room draperies for dry-cleaning purposes. He spent about 30 minutes looking at the drapes and inspecting both the drapes and the lining. He pointed out some roach spots on the lining that could not be removed by cleaning, but this was not of concern to the Axelrods. He did not indicate to them that the fabric had deteriorated from sunburn, age, dust, or air conditioning so as to make it unsuitable for dry cleaning. He took the drapes and had them dry cleaned. When the drapes were returned, they were unfit for use. The fabric had been a gold floral design on an eggshell-white background. When returned, it was a blotchy gold. Wardrobe Cleaners stated that it was difficult to predict how imported fabrics would respond to the dry-cleaning process and that the company was not equipped to pretest the fabric to see whether it was colorfast. The Axelrods sued Wardrobe Cleaners for $1,000, the replacement value of the drapes. Was Wardrobe Cleaners liable for the damage caused to the drapes during the dry-cleaning process?

9. In April, Carter brought her fur coat to Reichlin Furriers for cleaning, glazing, and storage until the next winter season. She was given a printed form of receipt, upon the front of which an employee of Reichlin had written $100 as the value of the coat. There was no discussion of the value of the coat. Carter did not realize that such a value had been written on the receipt, which she did not read at the time. A space for the customer's signature on the front of the receipt was left blank. Below this space in prominent type appeared a notice to "see reverse side for terms and conditions." The other side of the receipt stated that it was a storage contract and that by its acceptance, the customer would be deemed to have agreed to its terms unless objections were given within 10 days. Fifteen conditions were listed. One of the conditions was as follows: "Storage charges are based upon valuation herein declared by the depositor, and amount recoverable for loss or damage to the article shall not exceed its actual value or the cost of repair or replacement with materials of like kind and quality or the depositor's valuation appearing in this receipt, whichever is less." In the fall of the year, after Carter had paid the bill for storage and other services on the coat, Reichlin informed her that the coat was lost. At that time, the fair market value of the coat was $450. Carter sued

Reichlin for loss of the coat and sought $450 damages. Reichlin claimed that its liability was limited to $100. Is this correct?

10. Marvin Gooden checked into a Day's Inn in Atlanta, paying in advance for two days' lodging. The next day he temporarily left his room. He left behind, in the room, a paper bag filled with approximately $9,000. Shortly after Gooden left, housekeeper Mary Carter entered his room to clean it. Carter found the bag of money. Because she saw no other personal effects, Carter assumed that Gooden had checked out. She therefore turned the bag of money over to her supervisor, Vivian Clark. Clark gave the bag to Dempsey Wilson, who was responsible for general supervision and maintenance of the grounds. During the three years he had worked for Day's Inn, Wilson had occasionally been given items of value to turn in at the hotel's office. In the past, he had always turned in the items. This time, however, he absconded with the bag of money. There was a safe on the Day's Inn premises. Day's Inn had posted, on the door of Gooden's room, a notice concerning the safe's availability for use by guests who had valuables with them. Gooden, who had never sought the use of the safe, brought a tort action against Day's Inn, Clark, and Carter in an effort to collect $9,000 in damages. Day's Inn argued that it was protected against liability by the following Georgia statute: "The innkeeper may provide a safe or other place of deposit for valuable articles and, by posting a notice thereof, may require the guests of the innkeeper to place such valuable articles therein or the innkeeper shall be relieved from responsibility for such articles." Gooden contended, however, that the statute could not insulate an innkeeper from liability when the loss of a guest's valuables is occasioned by the negligent (or other tortious) conduct of the innkeeper's employees. Should Gooden prevail against Day's Inn, Clark, and Carter?

Chapter Twenty-Four

Real Property

Chapter Outline

I. Scope of Real Property
- A. *Fixtures*
  - 1. *Factors Indicating Whether an Item Is a Fixture*
  - 2. *Express Agreement*
  - 3. *Trade Fixtures*
  - 4. *Security Interests in Fixtures*

II. Rights and Interests in Real Property
- A. *Estates in Land*

Land's special importance in the law has long been recognized. In the agrarian society of previous eras, land served as the basic measure and source of wealth. In today's society, land functions not only as a source of food, clothing, and shelter but also as an instrument of commercial and industrial development. It is not surprising, then, that a complex body of law—the law of *real property*—exists regarding the ownership, acquisition, and use of land.

This chapter discusses the scope of real property and the various legal interests in it. In addition, the chapter examines the ways in which real property is transferred and the controls society places on an owner's use of real property.

Scope of Real Property

Real property includes not only land but also things firmly attached to or embedded in land. Buildings and other permanent structures thus are considered real property. The owner of a tract of real property also owns the air above it, the minerals below its surface, and any trees or other vegetation growing on the property.[1]

Unlike readily movable personal property, real property is immovable or attached to something immovable. Distinguishing between real and personal property is important because rules of law governing real property transactions such as sale, taxation, and inheritance are frequently different from those applied to personal property transactions.

Fixtures

An item of personal property may, however, be attached to or used in conjunction with real property in such a way that it ceases being personal property and instead becomes part of the real property. This type of property is called a **fixture.**

Fixtures belong to the owner of the real property. One who provides or attaches fixtures to real property without a request to that effect from the owner of the real property is normally not entitled to compensation from the owner. A conveyance (transfer of ownership) of real property also transfers the fixtures associated with that property, even if the fixtures are not specifically mentioned.

People commonly install items of personal property on the real property they own or rent. Disputes may arise regarding rights to such property. Suppose that Jacobsen buys an elaborate ceiling fan and installs it in his home. When he sells the house to Orr, may Jacobsen remove the ceiling fan, or is it part of the home Orr has bought? Suppose that Luther, a commercial tenant, installs showcases and tracklights in the store she leases from Nelson. May Luther remove the showcases and the lights when her lease expires, or do the items now belong to Nelson? If the parties' contracts are silent on these matters, courts will resolve the cases by applying the law of fixtures. As later discussion will reveal, Jacobsen probably cannot remove the ceiling fan because it is likely to be considered part of the real property purchased by Orr. Luther, on the other hand, may be entitled to remove the showcases and the lights under the special rules governing trade fixtures.

Factors Indicating Whether an Item Is a Fixture

There is no mechanical formula for determining whether an item has become a fixture. As the *Dinsmore* case, which follows shortly, reveals, courts tend to consider these factors:

1. *Attachment.* One factor helping to indicate whether an item is a fixture is the degree to which the item is **attached** or **annexed** to real property. If firmly attached to real property so that it cannot be removed without damaging the property, the item is likely to be considered a fixture. An item of personal property that may be removed with little or no injury to the property is less likely to be considered a fixture.

Actual physical attachment to real property is not necessary, however. A close physical connection between an item of personal property and certain real property may enable a court to conclude that the item is **constructively annexed.** For example, heavy machinery or remote control devices for automatic garage doors may be considered fixtures even though they are not physically attached to real property.

2. *Adaptation.* Another factor to be considered is **adaptation**—the degree to which the item's use is necessary or beneficial to the use of the real property. Adaptation is a particularly relevant factor when the

[1] Ownership of air above one's property is not an unlimited interest, however. Courts have held that the flight of aircraft above property does not violate the property owner's rights, so long as it does not unduly interfere with the owner's enjoyment of her land.

item is not physically attached to the real property or is only slightly attached. When an item would be of little value except for use with certain real property, the item is likely to be considered a fixture even if it is unattached or could easily be removed. For example, keys and custom-sized window screens and storm windows have been held to be fixtures.

3. *Intent.* The third factor to be considered is the **intent** of the person who installed the item. Intent is judged not by what that person subjectively intended, but by what the circumstances indicate he intended. To a great extent, intent is indicated by the annexation and adaptation factors. An owner of real property who improves it by attaching items of personal property presumably intended those items to become part of the real estate. If the owner does not want an attached item to be considered a fixture, he must specifically reserve the right to keep the item. For instance, if a seller of a house wants to keep an antique chandelier that has been installed in the house, she should either replace the chandelier before the house is shown to prospective purchasers or specify in the contract of sale that the chandelier will be excluded from the sale.

Dinsmore v. Lake Electric Co. *719 N.E.2d 1282 (Ind. App. 1999)*

Dinsmore Farms owned land on which an asphalt processing facility was located. The processing facility, which was removable from the land, was owned by another party. That party sold the processing facility to Northern Indiana Resources (NIR) in December 1993. At essentially the same time, NIR entered into a lease agreement with Dinsmore Farms regarding use of the land.

Because the processing facility had not been operated for some time, conversions and repairs were necessary in order to place it in working order. NIR's president retained Lake Electric Co. to perform electrical work at the processing facility. Over a period of approximately two years, Lake provided various services and materials to NIR. NIR made partial payments on bills submitted by Lake. In April 1995, Lake repaired a burner control and the outside bagger system (a piece of equipment) at the processing facility. Lake again repaired the outside bagger system on May 22, 1995. That was the final work performed by Lake for NIR.

NIR failed to pay Lake for most of the work it had performed from November 1993 to May 22, 1995. Lake therefore filed a July 21, 1995, notice of intention to hold a mechanic's lien on the land owned by Dinsmore Farms, as well as "all buildings, other structures, and improvements located thereon." Indiana law provided that for a mechanic's lien to be validly asserted, the lien claimant had to have filed the notice of intention to claim a lien within 60 days after the final furnishing of relevant labor or services. Lake later sued Dinsmore Farms and NIR in order to foreclose the mechanic's lien. After concluding that Lake's mechanic's lien was valid and that Lake was entitled to a $19,600 judgment for labor performed and materials provided, the trial court issued an order for a sheriff's sale of Dinsmore Farms' land (the land on which the processing facility was located). Appropriate sale proceeds were to be devoted to the payment of the judgment. (Chapter 27 contains a discussion of mechanic's liens, which serve as a collection device for those who have not been paid for labor or materials that improved another party's real estate.) The court stayed the sheriff's sale order, however, pending the resolution of Dinsmore Farms' and NIR's appeals to the Court of Appeals of Indiana.

Sullivan, Judge The appellants contend that the trial court [erred] in finding Lake's mechanic's lien valid. [They note that] the last work done by Lake was on an outside bagger system (bagger), which they argue is not subject to a mechanic's lien because it is a portable piece of equipment and is not affixed to the real property. The appellants further maintain that because the last work done does not support a valid mechanic's lien, Lake did not meet the 60-day deadline for filing its notice of intention to hold a mechanic's lien.

In support of their contention that repairs on portable equipment do not fall within the mechanic's lien statute, the appellants maintain that the mechanic's lien statute lists the type of work for which a mechanic's lien may be filed and includes

work done on a variety of structures permanently affixed to real estate, but does not include any type of portable equipment. [The statute] provides that

> contractors . . . and all other persons performing labor or furnishing materials or machinery . . . for the erection, altering, repairing, or remov[al] [of] any house, mill, manufactory, or other building . . . or structures . . . may have a lien separately or jointly upon the house, mill, [or] manufactory . . . and on the interest of the owner of the lot or parcel of land on which it stands or with which it is connected to the extent of the value of any labor done, material furnished, or either. . .

If Lake's repair work on the bagger is subject to a mechanic's lien, it must be upon the [ground] that the bagger is . . . a fixture. It is well settled that fixtures are subject to a mechanic's lien. This necessarily leads to the conclusion that . . . nonfixtures are not lienable. Thus, . . . the issue becomes whether a bagger, a piece of equipment, became a fixture.

A piece of equipment is typically thought of as personal property. In order to determine whether a particular article has become so identified with real property as to become a fixture, Indiana uses a three-part test which considers: (1) actual or constructive annexation of the article to the realty; (2) adaptation to the use or purpose of that part of the realty with which it is connected; and (3) the intention of the party making the annexation to make the article a permanent accession to the freehold. It is the third part of the test which is controlling. If there is doubt as to intent, the property should be regarded as personal.

The bagger sits on a pallet behind one of the buildings at NIR's facility. As described by an employee of Lake, the bagger is "a piece of portable equipment" that is moved up to a control center and can be detached from the control center and moved in a truck. [The bagger] can be moved either by unplugging it or disconnecting the wiring. Even if the first two [parts of the fixture test] were met, it was clearly never the intention of NIR to make the bagger a permanent accession to the freehold. An NIR employee . . . testified that the bagger was on a pallet so it could be moved more easily. Also, NIR leases the land upon which its facility and equipment rest. According to the lease agreement, NIR may remove the [processing facility] and any tangible [personal] property at the termination of the lease. This provision in the lease agreement and the fact that NIR does not own the land upon which its equipment rests are further evidence that NIR did not intend for any of its equipment to become a fixture or permanent accession to the freehold. Thus, the bagger is a portable piece of equipment and not a fixture.

The bagger may appear to be more in the nature of a trade fixture. A trade fixture is personal property put on the premises by a tenant which can be removed without substantial or permanent damage to the premises and is capable of being set up or used in business elsewhere. The bagger . . . can be removed without substantial or permanent damage to the [land leased by NIR from Dinsmore Farms]. Any marks or holes in the ground could be covered with fresh soil. Moreover, the bagger could be used in business elsewhere. Therefore, even if we were to determine that the bagger is a trade fixture, the repair work done on it is not subject to a mechanic's lien. [Precedent cases indicate that items of] personal property in the nature of trade fixtures [are] not subject to a mechanic's lien under our statute.

[Indiana law provides that in order for a mechanic's lien to be valid,] a notice of intention to hold a mechanic's lien must be filed within 60 days of the last work done. The last day Lake performed work for NIR was May 22, 1995; however, . . . work done on the bagger equipment on that date . . . is not subject to a mechanic's lien. Because . . . no other work was done within 60 days of July 21, 1995, [that date's] notice of intention to hold a mechanic's lien was not timely filed. Thus, the mechanic's lien is not valid for any work done by Lake.

Judgment of trial court reversed.

Express Agreement If the parties to an express agreement have clearly stated their intent about whether a particular item is to be considered a fixture, a court will generally enforce that agreement. For example, the buyer and seller of a house might agree to permit the seller to remove a fence or shrubbery that would otherwise be considered a fixture.

Trade Fixtures As noted in *Dinsmore,* an exception to the usual fixture rules is recognized when a tenant at-

Concept Review

Fixtures

Concept	A *fixture* is an item of personal property attached to or used in conjunction with real property in such a way that it is treated as being part of the real property.
Significance	A transfer of the real property will also convey the fixtures on that property.
Factors Considered in Determining Whether Property Is a Fixture	1. Attachment: Is the item physically attached or closely connected to the real property? 2. Adaptation: How necessary or beneficial is the item to the use of the real property? 3. Intent: Did the person who installed the item manifest intent for the property to become part of the real property?
Express Agreement	Express agreements clearly stating intent about whether property is a fixture are generally enforceable.
Trade Fixtures (Tenants' Fixtures)	Definition of *trade fixture:* personal property attached to leased real property by a tenant for the purpose of carrying on his trade or business. Trade fixtures can be removed and retained by the tenant at the termination of the lease except when any of the following applies: 1. Removal would cause substantial damage to the landlord's real property. 2. The tenant fails to remove the fixtures by the end of the lease (or within a reasonable time, if the lease is for an indefinite period of time). 3. An express agreement between the landlord and tenant provides otherwise.

taches personal property to leased premises for the purpose of carrying on her trade or business. Such fixtures, called **trade fixtures,** remain the tenant's personal property and may normally be removed at the termination of the lease. This trade fixtures exception encourages commerce and industry. It recognizes that the commercial tenant who affixed the item of personal property did not intend a permanent improvement of the leased premises.

The tenant's right to remove trade fixtures is subject to two limitations. First, the tenant cannot remove the fixtures if doing so would cause substantial damage to the landlord's realty. Second, the tenant must remove the fixtures by the end of the lease if the lease is for a definite period. If the lease is for an indefinite period, the tenant usually has a reasonable time after the expiration of the lease to remove the fixtures. Trade fixtures not removed within the appropriate time become the landlord's property.

Leases may contain terms expressly addressing the parties' rights in any fixtures. A lease might give the tenant the right to attach items or make other improvements, and to remove them later. The reverse may also be true. The lease could state that any improvements made or fixtures attached will become the landlord's property at the termination of the lease. Courts generally enforce parties' agreements on fixture ownership.

Security Interests in Fixtures Special rules apply to personal property subject to a lien or security interest at the time it is attached to real property. Assume, for example, that a person buys a dishwasher on a time-payment plan from an appliance store and has it installed in his kitchen. To protect itself, the appliance store takes a security interest in the dishwasher and perfects that interest by filing a financing statement in the appropriate real estate records office within the period of time specified by the Uniform Commercial Code. The appliance store then is able to remove the dishwasher if the buyer defaults in his payments. The store could be liable, however, to third parties such as prior real estate mortgagees for any damage removal of the dishwasher caused to the real estate. The rules governing security interests in personal property that will become fixtures are explained more fully in Chapter 28.

Rights and Interests in Real Property

When we think of real property ownership, we normally envision one person owning all of the rights in a particular piece of land. Real property, however, involves a bundle of rights subject to ownership—sometimes by different people. This discussion examines the most common forms of present *possessory interests* (rights to exclusive possession of real property): **fee simple absolute** and **life estate.** It also explores the ways in which two or more persons may share ownership of a possessory interest. Finally, it discusses the interests and rights one may have in another person's real property, such as the right to use the property or restrict the way the owner uses it.

Estates in Land

The term **estate** is used to describe the nature of a person's ownership interest in real property. Estates in land are classified as either **freehold estates** or **nonfreehold estates.** Nonfreehold (or leasehold) estates are those held by persons who lease real property. They will be discussed in the next chapter, which deals with landlord–tenant law. Freehold estates are ownership interests of uncertain duration. The most common types of freehold estates are fee simple absolute and life estates.

Fee Simple Absolute The **fee simple absolute** is what we normally think of as "full ownership" of land. One who owns real property in fee simple absolute has the right to possess and use the property for an unlimited period of time, subject only to governmental regulations or private restrictions. She also has the unconditional power to dispose of the property during her lifetime or upon her death. A person who owns land in fee simple absolute may grant many rights to others without giving up ownership. For example, she may grant a mortgage on the property to a party who has loaned her money, lease the property to a tenant, or grant rights such as those to be discussed later in this section.

Life Estate The property interest known as a **life estate** gives a person the right to possess and use property for a time measured by his or another person's lifetime. For example, if Haney has a life estate (measured by his life) in a tract of land known as Greenacre, he has the right to use Greenacre for the remainder of his life. At Haney's death, the property will revert to the person who conveyed the estate to him or will pass to some other designated person. Although a life tenant has the right to use the property, he is obligated not to commit acts that would result in permanent injury to the property.

Co-Ownership of Real Property

Co-ownership of real property exists when two or more persons share the same ownership interest in certain property. The co-owners do not have separate rights to any portion of the real property; each has a share in the whole property. Seven types of co-ownership are recognized in the United States.

Tenancy in Common Persons who own property under a **tenancy in common** have undivided interests in the property and equal rights to possess it. When property is transferred to two or more persons without specification of their co-ownership form, it is presumed that they acquire the property as tenants in common. The respective ownership interests of tenants in common may be, but need not be, equal. One tenant, for example, could have a two-thirds ownership interest in the property, with the other tenant having a one-third interest.

Each tenant in common has the right to possess and use the property. Individual tenants, however, cannot exclude the other tenants in common from also possessing and using the property. If the property is rented or otherwise produces income, each tenant is entitled to share in the income in proportion to her ownership share. Similarly, each tenant must pay her proportionate share of property taxes and necessary repair costs. If a tenant in sole possession of the property receives no rents or profits from the property, she is not required to pay rent to her cotenant unless her possession is adverse to or inconsistent with her cotenant's property interests.

A tenant in common may dispose of his interest in the property during life and at death. Similarly, his interest is subject to his creditors' claims. When a tenant dies, his interest passes to his heirs or, if he has made a will, to the person or persons specified in the will. Suppose Peterson and Sievers own Blackacre as tenants in common. Sievers dies, having executed a valid will in which he leaves his Blackacre interest to Johanns. In this situation, Peterson and Johanns become tenants in common.

Tenants in common may sever the cotenancy by agreeing to divide the property or, if they are unable to agree, by petitioning a court for *partition.* The court

will physically divide the property if that is feasible, so that each tenant receives her proportionate share. If physical division is not feasible, the court will order that the property be sold and that the proceeds be appropriately divided.

Joint Tenancy A **joint tenancy** is created when equal interests in real property are conveyed to two or more persons by means of a document clearly specifying that they are to own the property as joint tenants. The rights of use, possession, contribution, and partition are the same for a joint tenancy as for a tenancy in common. The joint tenancy's distinguishing feature is that it gives the owners the **right of survivorship,** which means that upon the death of a joint tenant, the deceased tenant's interest automatically passes to the surviving joint tenant(s). The right of survivorship makes it easy for a person to transfer property at death without the need for a will. For example, Devaney and Osborne purchase Redacre and take title as joint tenants. At Devaney's death, his Redacre interest will pass to Osborne even if Devaney did not have a will setting forth such an intent. Moreover, even if Devaney had a will that purported to leave his Redacre interest to someone other than Osborne, the will's Redacre provision would be ineffective.

When the document of conveyance contains ambiguous language, a court may be faced with determining whether persons acquired ownership of real property as joint tenants or, instead, as tenants in common. *James,* which follows shortly, is such a case.

A joint tenant may mortgage, sell, or give away her interest in the property during her lifetime. Her interest in the property is subject to her creditors' claims. When a joint tenant transfers her interest, the joint tenancy is severed and a tenancy in common is created as to the share affected by the transaction. When a joint tenant sells her interest to a third person, the purchaser becomes a tenant in common with the remaining joint tenant(s).

James v. Taylor 1998 Westlaw *251810 (Ark. App. 1998)*

Eula Mae Redmon conveyed certain real estate to her children, W. C. Sewell, Billy Sewell, and Melba Taylor, by means of a January 1993 deed. The deed recited that the property was conveyed to the three grantees "jointly and severally, and unto their heirs, assigns, and successors forever," subject to a life estate retained by Mrs. Redmon.

W. C. Sewell died in November 1993. Billy Sewell died two years later. After Mrs. Redmon passed away in 1997, Melba Taylor filed a declaratory judgment action in which she asked the court to rule that her mother had intended to convey the property to the three grantees as joint tenants and that Taylor, by virtue of her brothers' deaths, had become sole owner of the property under the right of survivorship. Descendants of W. C. and Billy Sewell (referred to hereinafter as "the Sewell descendants") opposed Taylor's request. They contended that Mrs. Redmon's deed created a tenancy in common, and that they had succeeded to the ownership interests W. C. and Billy Sewell held prior to their deaths. The trial judge considered extrinsic evidence of Mrs. Redmon's intent and concluded that she meant to convey the property to her three children as joint tenants with the right of survivorship. He therefore held that Taylor had become sole owner of the property. The Sewell descendants appealed.

Pittman, Judge [Taylor and the Sewell descendants] agree that the term "jointly and severally," as used to describe an estate in property, is ambiguous. However, they disagree over the rule of construction to be applied in the face of such ambiguity. The Sewell descendants contend that under Arkansas law, a deed to two or more persons presumptively creates a tenancy in common unless the deed expressly creates a joint tenancy. They cite Arkansas Code Annotated, section 18–12–603, which reads as follows: "Every interest in real estate granted or devised to two or more persons . . . shall be in tenancy in common unless expressly declared in the grant or devise to be a joint tenancy." According to the Sewell descendants, the very existence of an ambiguity within the deed means that, under the statute, a tenancy in common has been created. Taylor, on the other hand, points to the well-established rule

that, when faced with an ambiguity in a deed, the trial court may determine the intent of the grantor by looking to extraneous circumstances to decide what was really intended by the language in the deed. Because, Taylor argues, [the trial judge] had strong evidence before him that Mrs. Redmon intended to create a joint tenancy in her children, his finding should not be overturned unless clearly erroneous.

The extrinsic evidence considered [by the trial judge] weighs in favor of Taylor. That evidence consisted of Taylor's testimony that her mother had informed her attorney that she wanted the deed drafted so that, if one of her children died, the property would belong to the other two children; that shortly after the death of W. C. Sewell, Mrs. Redmon executed a new will leaving her property to Billy Sewell and Taylor . . . ; that Mrs. Redmon had set up bank accounts payable upon her death to her children, and, after W. C. and Billy died, deleted their names, leaving the name of the surviving child; and that Mrs. Redmon was upset before her death upon learning that there was a problem with the deed. However, we hold that the considerations expressed in section 18–12–603 override the rule of construction urged by Taylor.

Section 18–12–603 is a statute like one of many throughout the country. At common law, joint tenancy was favored and, where possible, that estate was held to exist. However, in Arkansas, and in many other states, statutes have been adopted which presumptively construe an instrument [as creating] a tenancy in common rather than a joint tenancy. These statutes do not prohibit joint tenancies but merely provide for a construction against a joint tenancy if the intention to create it is not clear. Where, from the four corners of an instrument, a court can interpret the intention of the grantor . . . as creating a survivorship estate, the court will deem the estate to be a joint tenancy with the right of survivorship.

Nothing appears from the four corners of the deed in this case to indicate Mrs. Redmon's intent to convey a survivorship interest, unless that intention is to be found in the term "jointly and severally." The Sewell descendants do not cite, nor have we discovered through our own research, any Arkansas case in which a grant of ownership was made to two or more parties "jointly and severally." As [the trial judge] noted below, "jointly and severally" are words of tort, not property. They have no meaning in the world of estates. In the context of an ownership interest, such a term is a legal anomaly; several ownership is, by definition, a denial of joint ownership.

However, two cases from other jurisdictions are persuasive. In [a Colorado case], the court interpreted a will that had devised property to two devisees "jointly and severally." The court held that, in light of a statute similar to ours, no joint tenancy was created. In [a Missouri case], property was deeded to two grantees "jointly." The court, relying on a statute virtually identical to ours, held that a joint tenancy was not created by the use of such language. If use of the word "jointly" is not sufficient to create a joint tenancy, the term "jointly and severally," with its elusive connotation, cannot do so either.

Taylor argues that, given the deed's ambiguity, our focus should be on the intent of the grantor as gleaned not only from the instrument itself but from the extrinsic evidence presented at trial. However, evidence of the grantor's intention cannot prevail over the statute. To allow that would be to render section 18–12–603 meaningless. [We therefore] hold that the deed in this case did not create a joint tenancy in the grantees. The language of the deed is insufficient to overcome the statutory presumption of a tenancy in common.

Trial court's decision reversed and case remanded.

Tenancy by the Entirety Approximately half of the states permit married couples to own real property under a **tenancy by the entirety.** This tenancy is essentially a joint tenancy with the added requirement that the owners be married. As does the joint tenancy, the tenancy by the entirety features the right of survivorship. Neither spouse can transfer the property by will if the other is still living. Upon the death of the husband or wife, the property passes automatically to the surviving spouse.[2]

[2]In states that do not recognize the tenancy by the entirety, married couples often own real property in joint tenancy, but they are not required to elect that co-ownership form.

Figure 1 *Tenancy in Common, Joint Tenancy, and Tenancy by the Entirety*

	Tenancy in Common	Joint Tenancy	Tenancy by the Entirety
Equal Possession and Use?	Yes	Yes	Yes
Share Income?	Yes	Yes	Presumably
Contribution Requirement?	Generally	Generally	Generally
Free Conveyance of Interest?	Yes; transferee becomes tenant in common	Yes, but joint tenancy is severed on conveyance and reverts to tenancy in common	Both must agree; divorce severs tenancy
Effect of Death?	Interest transferable at death by will or inheritance	Right of survivorship; surviving joint tenant takes decedent's share	Right of survivorship; surviving spouse takes decedent's share

A tenancy by the entirety cannot be severed by the act of only one of the parties. Neither spouse can transfer the property unless the other also signs the deed. Thus, a creditor of one tenant cannot claim an interest in that person's share of property held in tenancy by the entirety. Divorce, however, severs a tenancy by the entirety and transforms it into a tenancy in common. Figure 1 compares the features of tenancy in common, joint tenancy, and tenancy by the entirety.

Community Property A number of western and southern states recognize the **community property** system of co-ownership of property by married couples. This type of co-ownership assumes that marriage is a partnership in which each spouse contributes to the family's property base. Property acquired during the marriage through a spouse's industry or efforts is classified as *community* property. Each spouse has an equal interest in such property regardless of who produced or earned the property. Because each spouse has an equal share in community property, neither can convey community property without the other's joining in the transaction. Various community property states permit the parties to dispose of their interests in community property at death. The details of each state's community property system vary, depending on the specific provisions of that state's statutes.

Not all property owned by a married person is community property, however. Property a spouse owned before marriage or acquired during marriage by gift or inheritance is *separate* property. Neither spouse owns a legal interest in the other's separate property. Property exchanged for separate property also remains separately owned.

Tenancy in Partnership When a partnership takes title to property in the partnership's name, the co-ownership form is called **tenancy in partnership.** This form of co-ownership is discussed in Chapter 36.

Condominium Ownership Condominiums have become very common in the United States in recent years, even in locations outside urban and resort areas. Under condominium ownership, a purchaser takes title to her individual unit and becomes a tenant in common with other unit owners in shared facilities such as hallways, elevators, swimming pools, and parking areas. The condominium owner pays property taxes on her individual unit and makes a monthly payment for the maintenance of the common areas. She may generally mortgage or sell her unit without the other unit owners' approval. For federal income tax purposes, the condominium owner is treated as if she owned a single-family home, and is thus allowed to deduct her property taxes and mortgage interest expenses.

Cooperative Ownership In a cooperative, a building is owned by a corporation or group of persons. One who wants to buy an apartment in the building purchases stock in the corporation and holds his apartment under a long-term, renewable lease called a *proprietary lease.* Frequently, the cooperative owner must obtain the other owners' approval to sell or sublease his unit.

Interests in Real Property Owned by Others

In various situations, a person may hold a legally protected interest in someone else's real property. Such interests, to be discussed below, are not possessory because they do not give their holder the right to complete dominion over the land. Rather, they give him the right to use another person's property or to limit the way in which the owner uses the property.

Easements

An **easement** is the right to make certain uses of another person's property (*affirmative easement*) or the right to prevent another person from making certain uses of his own property (*negative easement*). The right to run a sewer line across someone else's property would be an affirmative easement. Suppose an easement prevents Rogers from erecting, on his land, a structure that would block his neighbor McFeely's solar collector. Such an easement would be negative in nature.

If an easement qualifies as an **easement appurtenant,** it will pass with the land. This means that if the owner of the land benefited by an easement appurtenant sells or otherwise conveys the property, the new owner also acquires the right contemplated by the easement. An easement appurtenant is primarily designed to benefit a certain tract of land, rather than merely giving an individual a personal right. For example, Agnew and Nixon are next-door neighbors. They share a common driveway that runs along the borderline of their respective properties. Each has an easement in the portion of the driveway that lies on the other's property. If Agnew sells his property to Ford, Ford also obtains the easement in the driveway portion on Nixon's land. Nixon, of course, still has an easement in the driveway portion on Ford's land.

Creation of Easements

Easements may be acquired in the following ways:

1. *By grant.* When an owner of property expressly provides an easement to another while retaining ownership of the property, he is said to **grant** an easement. For example, Monroe may sell or give Madison, who owns adjoining property, the right to go across Monroe's land to reach an alley behind that land.

2. *By reservation.* When one transfers ownership of her land but retains the right to use it for some specified purpose, she is said to **reserve** an easement in the land. For example, Smythe sells land to Jones but reserves the mineral rights to the property as well as an easement to enter the land to remove the minerals.

3. *By prescription.* An easement by **prescription** is created when one person uses another's land openly, continuously, and in a manner adverse to the owner's rights for a period of time specified by state statute. The necessary period of time varies from state to state. In such a situation, the property owner presumably is on notice that someone else is acting as if she possesses rights to use the property. If the property owner does not take action during the statutory period to stop the other person from making use of his property, he may lose his right to stop that use. Suppose, for instance, that State X allows easements by prescription to be obtained through 15 years of prescriptive use. Tara, who lives in State X, uses the driveway of her next-door neighbor, Kyle. Tara does this openly, on a daily basis, and without Kyle's permission. If this use by Tara continues for the 15-year period established by statute and Kyle takes no action to stop Tara within that time span, Tara will obtain an easement by prescription. In that event, Tara will have the right to use the driveway not only while Kyle owns the property but also when Kyle sells the property to another party. Easements by prescription resemble *adverse possession,* a concept discussed later in this chapter.

4. *By implication.* Sometimes, easements are implied by the nature of the transaction rather than created by express agreement of the parties. Such easements, called **easements by implication,** take either of two forms: easements by prior use and easements by necessity.

An *easement by prior use* may be created when land is subdivided and a path, road, or other apparent and beneficial use exists as of the time that a portion

of the land is conveyed to another person. In this situation, the new owner of the conveyed portion of the land has an easement to continue using the path, road, or other prior use running across the nonconveyed portion of the land. Assume, for example, that a private road runs through Greenacre from north to south, linking the house located on Greenacre's northern portion to the public highway that lies south of Greenacre. Douglas, the owner of Greenacre, sells the northern portion to Kimball. On these facts, Kimball has an easement by implication to continue using the private road even where it runs across the portion of Greenacre retained by Douglas. To prevent such an easement from arising, Douglas and Kimball would need to have specified in their contract of sale that the easement would not exist.

An *easement by necessity* is created when real property once held in common ownership is subdivided in such a fashion that the only reasonable way a new owner can gain access to her land is through passage over another's land that was once part of the same tract. Such an easement is based on the necessity of obtaining access to property. Assume, for instance, that Tinker, the owner of Blackacre, sells Blackacre's northern 25 acres to Evers and its southern 25 acres to Chance. In order to have any reasonable access to her property, Chance must use a public road that runs alongside and just beyond the northern border of the land now owned by Evers; Chance must then go across Evers's property to reach hers. On these facts, Chance is entitled to an easement by necessity to cross Evers's land in order to go to and from her property.

Easements and the Statute of Frauds As interests in land, easements are potentially within the coverage of the statute of frauds. To be enforceable, an express agreement granting or reserving an easement must be evidenced by a suitable writing signed by the party to be charged.[3] An express grant of an easement normally must be executed with the same formalities observed in executing the grant of a fee simple interest. However, easements not granted expressly (such as easements by prior use, necessity, or prescription) are enforceable despite the lack of a writing.

[3]Chapter 16 discusses the statute of frauds and compliance with the writing requirement it imposes when it is applicable.

Profits

A **profit** is a right to enter another person's land and remove some product or part of the land. Timber, gravel, minerals, and oil are among the products and parts frequently made the subject of profits. Generally governed by the same rules applicable to easements, profits are sometimes called *easements with a profit.*

Licenses

A **license** is a temporary right to enter another's land for a specific purpose. Ordinarily, licenses are more informal than easements. Licenses may be created orally or in any other manner indicating the landowner's permission for the licensee to enter the property. Because licenses are considered to be personal rights, they are not true interests in land. The licensor normally may revoke a license at his will. Exceptions to this general rule of revocability arise when the license is coupled with an interest (such as the licensee's ownership of personal property located on the licensor's land) or when the licensee has paid money or provided something else of value either for the license or in reliance on its existence. For example, Branch pays Leif $900 for certain trees on Leif's land. Branch is to dig up the trees and haul them to her own property for transplanting. Branch has an irrevocable license to enter Leif's land to dig up and haul away the trees.

Restrictive Covenants

Within certain limitations, real estate owners may create enforceable agreements that restrict the use of real property. These private agreements are called **restrictive covenants.** For example, Grant owns two adjacent lots. She sells one to Lee subject to the parties' agreement that Lee will not operate any liquor-selling business on the property. This use restriction appears in the deed Grant furnishes Lee. As another illustration, a subdivision developer sells lots in the subdivision and places a provision in each lot's deed regarding the minimum size of house to be built on the property.

The validity and enforceability of such private restrictions on the use of real property depend on the purpose, nature, and scope of the restrictions. A restraint that violates a statute or other expression of public policy will not be enforced. For example, the federal Fair Housing Act (discussed later in this chapter) would make unlawful an attempt by a seller or lessor of residential property to refuse to sell or

rent to certain persons because of an existing restrictive covenant that purports to disqualify those prospective buyers or renters on the basis of their race, color, religion, sex, handicap, familial status, or national origin.

Public policy generally favors the unlimited use and transfer of land. A restrictive covenant therefore is unenforceable if it effectively prevents the sale or transfer of the property. Similarly, ambiguous language in a restrictive covenant is construed in favor of the less restrictive interpretation. A restraint is enforceable, however, if it is clearly expressed and neither unduly restrictive of the use and transfer of the property nor otherwise violative of public policy. Restrictions usually held enforceable include those relating to minimum lot size, building design and size, and maintenance of an area as a residential community.

An important and frequently arising question is whether subsequent owners of property are bound by a restrictive covenant even though they were not parties to the original agreement that established the covenant. Under certain circumstances, restrictive covenants are said to "run with the land" and thus bind subsequent owners of the restricted property. For a covenant to run with the land, it must have been *binding* on the original parties to it, and those parties must have *intended that the covenant bind their successors.* The covenant must also "*touch and concern*" the restricted land. This means that the covenant must involve the use, value, or character of the land, rather than being merely a personal obligation of one of the original parties. In addition, a covenant will not bind a subsequent purchaser unless she had notice of the covenant's existence when she took her interest. This notice would commonly be provided by the recording of the deed (a subject discussed later in this chapter) or other document containing the covenant.

Restrictive covenants may be enforced by the parties to them, by persons meant to benefit from them, and—if the covenants run with the land—by successors of the original parties to them. If restrictive covenants amounting to a general building scheme are contained in a subdivision plat (recorded description of a subdivision), property owners in the subdivision may be able to enforce them against noncomplying property owners.

Mains Farm Homeowners Association illustrates the difficult interpretation, enforceability, and public policy questions sometimes presented by litigation over restrictive covenants that run with the land.

Mains Farm Homeowners Association v. Worthington

854 P.2d 1072 (Wash. Sup. Ct. 1993)

A declaration of restrictive covenants for the platted Mains Farm subdivision was recorded in 1962. Worthington purchased a residential lot in Mains Farm in 1987. A house already existed on the property. Before purchasing, Worthington obtained and read a copy of the restrictive covenants, which stated, in pertinent part, that all lots in Mains Farm "shall be designated as 'Residence Lots' and shall be used for single family residential purposes only." Worthington later began occupying the residence along with four adults who paid her for 24-hour protective supervision and care. These four adults, who were not related to Worthington, were unable to do their own housekeeping, prepare their own meals, or attend to their personal hygiene. In providing this supervision and care on a for-profit basis, Worthington complied with the licensing and inspection requirements established by Washington law governing such enterprises.

The Mains Farm Homeowners Association (Association), which consisted of owners of property in the subdivision, filed suit against Worthington and asked the court to enjoin her from using her property as an adult family home business. Association asserted that Worthington's use violated the restrictive covenants quoted above. The trial court granted Association's motion for summary judgment and issued the requested injunction against Worthington's use. The Washington Court of Appeals affirmed. Worthington appealed to the Washington Supreme Court. Various organizations representing the interests of disabled adults submitted amicus curiae *(friend of the court) briefs urging reversal.*

Brachtenbach, Justice *Before* defendant Worthington bought the premises, she *read* the restrictive covenants. Written opposition by other property owners was made known to her immediately after

her purchase. Despite that knowledge, Worthington applied for a building permit to add a fifth bedroom to the house. She was advised by the county that her intended facility did not comply with applicable zoning. Worthington later obtained the permit by stating that only her family would be living with her. In her words: "I told them what they wanted to hear." These equitable considerations must be kept in mind when we interpret the restrictive covenants at issue here. Our analysis leads to the conclusion that Worthington's commercial use is prohibited.

To reach this conclusion, we consider the meaning of "single family." The cases interpreting "family" are legion. Any of the cases must be used with caution. Some involve a state statute which bears a different relationship to zoning powers than to vested property rights embodied in a restrictive covenant. No purpose will be served by examining and comparing in detail the numerous cases which define "family." Because of the widely differing documents being interpreted, the contexts in which the word is used, and the fact-specific circumstances, it is impossible to arrive at a single, all-purpose definition of "family." The possibilities range from the traditional notion of persons related by blood, marriage, or adoption to the broader concept of a group of people who live, sleep, cook, and eat upon the premises as a single housekeeping unit. Likewise, attempting to use one of the many dictionary classifications solves nothing. For similar reasons, the use of a phrase or two out of a dictionary to define "residential" for purposes of this covenant is not acceptable.

Some reflection leads us to attribute certain characteristics to a concept of "family," even in an extended sense. These include: (1) a sharing of responsibilities among the members and a mutual caring whether physical or emotional, (2) some commonality whether it be friendship, shared employment, mutual social or political interest, (3) some degree of existing or contemplated permanency to the relationship, and (4) a recognition of some common purpose—persons brought together by reasons other than a referral by a state agency. Here, we have four persons, all strangers before arriving at this residence. By law, they cannot be related to Worthington by birth, adoption, or marriage. By law, they cannot be below the age of 18. By regulatory definition, they must require 24-hour protective supervision and care. Worthington could not form this "family" without a license from the State, which must approve the site and is free to inspect it. Worthington meets these qualifications and provides around-the-clock care as a means of making a living.

These are not the characteristics of a single family residence. Our primary goal is to ascertain the intent of the restrictive covenants and to accord the words their ordinary and common usage. The reasonable expectations of the other lot owners who bought their family houses in reliance on the long recorded covenants would not include a State-licensed, 24-hour operating business. In this case, Worthington's main use of her property is not to provide a single family residence, but to provide 24-hour protective care and supervision in exchange for money. It must therefore be concluded that the other lot owners are entitled in equity to the injunction granted by the trial court.

As an alternative ground for reversing the trial court, Worthington argues that the restrictive covenant violates a legislative declaration of public policy and is therefore void. The public policy question should not be resolved in this case, for various reasons. First, the record made in the trial court is not adequate to identify the facts and bases upon which such a significant public policy should be considered. It is true that the Legislature has found "that adult family homes are an important part of the state's long-term care system" [citation to statute omitted]. Unfortunately, this record shows little more. We know that the Legislature has not implemented this finding beyond declaring that such homes are considered residential for *zoning* purposes. We know nothing of the number of persons qualified for adult family homes or of whether that need is being met. We know nothing of the situation along those lines in the community or county in which the Mains Farm subdivision is located. We do not know whether there exists an adequate supply of adult family homes in areas not subject to restrictive covenants. We are unaware whether efforts by individual or governmental units have been successful in locating such homes either without neighborhood opposition or by successful negotiation with concerned owners. We have not been made aware of what coordinated efforts, if any, are being

made by state or local agencies to establish adult family homes. All of these considerations would be relevant to any possible court finding that a significant public policy overrides the existing restrictive covenants at issue in this case.

In addition, the statute relied upon by Worthington as the source of a legislative declaration of public policy favoring adult family homes was not effective until after the written opinion of the trial court, and was not cited to the trial court. Moreover, the statute, in stating that an adult family home should be permitted in an area zoned for single-family dwellings, is by its very terms limited to *zoning.* When the Legislature intends to affect a *private land use restriction* (i.e., a covenant) as compared to *zoning,* it normally does so explicitly.

The cases from other jurisdictions cited by Worthington either do not reach the policy conflict presented here or are based upon entirely different statutory direction or even constitutional dictates. The various *amici curiae* raise a claimed violation of the federal Fair Housing Act. We do not consider issues raised first and only by *amicus*.

We hold that under the equities of these particular facts, the discretionary grant of an injunction was proper. We caution that the interpretation of a particular restrictive covenant is largely dependent upon the facts of the case at hand. Our holding should not be construed as an encompassing declaration concerning covenants and uses under other circumstances. Likewise, our rejection of the claimed public policy is limited to the facts herein, especially due to the record's lack of any comprehensive presentation of governmental goals, efforts, needs, and successes existing in fact.

Injunction in favor of Association and against Worthington's use of property affirmed.

Termination of Restrictive Covenants Restrictive covenants may be terminated in a variety of ways, including voluntary relinquishment or *waiver.* They may also be terminated *by their own terms* (such as when the covenant specifies that it is to exist for a certain length of time) or *by dramatically changed circumstances.* If Oldcodger's property is subject, for instance, to a restrictive covenant allowing only residential use, the fact that all of the surrounding property has come to be used for industrial purposes may operate to terminate the covenant. When a restrictive covenant has been terminated or held invalid, the deed containing the restriction remains a valid instrument of transfer but is treated as if the restriction had been removed from the document.

Acquisition of Real Property

Title to real property may be obtained in various ways, including purchase, gift, will or inheritance, tax sale, and adverse possession. Original title to land in the United States was acquired either from the federal government or from a country that held the land prior to its acquisition by the United States. The land in the 13 original colonies had been granted by the king of England either to the colonies or to certain individuals. The states ceded the land in the Northwest Territory to the federal government, which in turn issued grants or patents of land. Original ownership of much of the land in Florida and the southwest came by grants from Spain's rulers.

Acquisition by Purchase

Selling one's real property is a basic ownership right. Unreasonable restrictions on an owner's right to sell her property are considered unenforceable because they violate public policy. Most owners of real property acquired title by purchasing the property. Each state sets the requirements for proper conveyances of real property located in that state. The various elements of selling and buying real property are discussed later in this chapter.

Acquisition by Gift

Real property ownership may be acquired by gift. For a gift of real property to be valid, the donor must deliver a properly executed deed to the donee or to some third person who is to hold it for the donee. Neither the donee nor the third person needs to take actual possession of the property. The gift's essential element is delivery of the deed. Suppose that Fields executes a deed

to the family farm and leaves it in his safe-deposit box for delivery to his daughter (the intended donee) when he dies. The attempted gift will not be valid, because Fields did not deliver the gift during his lifetime.

Acquisition by Will or Inheritance

The owner of real property generally has the right to dispose of the property by will. The requirements for a valid will are discussed in Chapter 26. If the owner of real property dies without a valid will, the property passes to his heirs as determined under the laws of the state in which the property is located.

Acquisition by Tax Sale

If taxes assessed on real property are not paid when due, they become a *lien* on the property. This lien has priority over other claims to the land. If the taxes remain unpaid, the government may sell the land at a tax sale. Although the purchaser at the tax sale acquires title to the property, a number of states have statutes giving the original owner a limited time (such as a year) within which to buy the property from the tax sale purchaser for the price paid by the purchaser, plus interest.

Acquisition by Adverse Possession

Each state has a statute of limitations that gives an owner of land a specific number of years within which to bring suit to regain possession of her land from someone who is trespassing on it. This period varies from state to state, generally ranging from 5 to 20 years. If someone wrongfully possesses land and acts as if he were the owner, the actual owner must take steps to have the possessor ejected from the land. If the owner fails to do this within the statutory period, she loses her right to eject the possessor.

Assume, for example, that Titus owns a vacant lot next to Holdeman's house. Holdeman frequently uses the vacant lot for a variety of activities and appears to be the property's only user. In addition, Holdeman regularly mows and otherwise maintains the vacant lot. He has also placed a fence around it. By continuing such actions and thus staying in possession of Titus's property for the statutory period (and by meeting each other requirement about to be discussed), Holdeman may position himself to acquire title to the land by **adverse possession.**

To acquire title by adverse possession, one must possess land in a manner that puts the true owner on notice of the owner's cause of action against the possessor. The adverse possessor's acts of possession must be (1) *open,* (2) *actual,* (3) *continuous,* (4) *exclusive,* and (5) *hostile* (or adverse) *to the owner's rights.* The hostility element is not a matter of subjective intent. Rather, it means that the adverse possessor's acts of possession must be inconsistent with the owner's rights. If a person is in possession of another's property under a lease, as a cotenant, or with the permission of the owner, his possession is not hostile. In some states, the possessor of land must also pay the property taxes in order to gain title by adverse possession.

It is not necessary that the same person occupy the land for the statutory period. The periods of possession of several adverse possessors may be "tacked" together when calculating the period of possession if each possessor claimed rights from another possessor. The possession must, however, be continuous for the requisite time.

Transfer by Sale

Steps in a Sale

The major steps normally involved in the sale of real property are:

1. Contracting with a real estate broker to locate a buyer.
2. Negotiating and signing a contract of sale.
3. Arranging for the financing of the purchase and satisfying other requirements, such as having a survey conducted or acquiring title insurance.
4. Closing the sale, which involves payment of the purchase price and transfer of the deed, as well as other matters.
5. Recording the deed.

Contracting with a Real Estate Broker

Although engaging a real estate broker is not a legal requirement for the sale of real property, it is common for one who wishes to sell his property to "list" the property with a broker. A listing contract empowers the broker to act as the seller's agent in procuring a ready, willing, and able buyer and in managing details of the property transfer. A number of states' statutes of frauds

require listing contracts to be evidenced by a writing and signed by the party to be charged.

Real estate brokers are regulated by state and federal law. They owe *fiduciary duties* (duties of trust and confidence) to their clients. Chapter 34 contains additional information regarding the duties imposed on such agents.

Types of Listing Contracts Listing contracts specify such matters as the listing period's duration, the terms on which the seller will sell, and the amount and terms of the broker's commission. There are different types of listing contracts.

1. *Open listing.* Under an open listing contract, the broker receives a *nonexclusive* right to sell the property. This means that the seller and third parties (for example, other brokers) also are entitled to find a buyer for the property. The broker operating under an open listing is entitled to a commission only if he was the first to find a ready, willing, and able buyer.

2. *Exclusive agency listing.* Under an exclusive agency listing, the broker earns a commission if he *or any other agent* finds a ready, willing, and able buyer during the period of time specified in the contract. Thus, the broker operating under such a listing would have the right to a commission even if another broker actually procured the buyer. Under the exclusive agency listing, however, the seller has the right to sell the property himself without being obligated to pay the broker a commission.

3. *Exclusive right to sell.* An exclusive right to sell contract provides the broker the exclusive right to sell the property for a specified period of time and entitles her to a commission no matter who procured the buyer. Under this type of listing, a seller must pay the broker her commission even if it was the seller or some third party who found the buyer during the duration of the listing contract.

Contract of Sale

The contract formation, performance, assignment, and remedies principles about which you read in earlier chapters apply to real estate sales contracts. Such contracts identify the parties and subject property, and set forth the purchase price, the type of deed the purchaser will receive, the items of personal property (if any) included in the sale, and other important aspects of the parties' transaction. Real estate sales contracts often make the closing of the sale contingent on the buyer's obtaining financing at a specified rate of interest, on the seller's procurement of a survey and title insurance, and on the property's passing a termite inspection. Because they are within the statute of frauds, real estate sales contracts must be evidenced by a suitable writing signed by the party to be charged in order to be enforceable.

Financing the Purchase The various arrangements for financing the purchase of real property—such as mortgages, land contracts, and deeds of trust—are discussed in Chapter 27.

Fair Housing Act

The Fair Housing Act, enacted by Congress in 1968 and substantially revised in 1988, is designed to prevent discrimination in the housing market. Its provisions apply to real estate brokers, sellers (other than those selling their own single-family dwellings without the use of a broker), lenders, lessors, and appraisers. Originally, the act prohibited discrimination on the basis of race, color, religion, sex, and national origin. The 1988 amendments added handicap and "familial status" to this list. The familial status category was intended to prevent discrimination in the housing market against pregnant women and families with children.[4] "Adult" or "senior citizen" communities restricting residents' age do not violate the Fair Housing Act even though they exclude families with children, so long as the housing meets the requirements of the act's "housing for older persons" exemption.[5]

The act prohibits discrimination on the above-listed bases in a wide range of matters relating to the sale or rental of housing. These matters include refusals to sell or rent, representations that housing is not available for

[4]"Familial status" is defined as an individual or individuals under the age of 18 who is/are domiciled with a parent, some other person who has custody over him/her/them, or the designee of the parent or custodial individual. The familial status classification also applies to one who is pregnant or in the process of attempting to secure custody of a child or children under the age of 18.

[5]The Fair Housing Act defines "housing for older persons" as housing provided under any state or federal program found by the Secretary of HUD to be specifically designed to assist elderly persons, housing intended for and solely occupied by persons 62 years old or older, or housing that meets the requirements of federal regulations and is intended for occupancy by at least one person 55 years old or older.

sale or rental when in fact it is, and discriminatory actions regarding terms, conditions, or privileges of sale or rental or regarding the provision of services and facilities involved in sale or rental.[6] The act also prohibits discrimination in connection with brokerage services, appraisals, and financing of dwellings.

Prohibited discrimination on the basis of handicap includes refusals to permit a handicapped person to make (at his own expense) reasonable modifications to the property. It also includes refusals to make reasonable accommodations in property-related rules, policies, practices, or services when such modifications or accommodations are necessary to afford the handicapped person full enjoyment of the property. The act also outlaws the building of multifamily housing that is inaccessible to persons with handicaps.

A violation of the Fair Housing Act may result in a civil action brought by the government or the aggrieved individual. If the aggrieved individual sues and prevails, the court may issue injunctions, award actual and punitive damages, assess attorney's fees and costs, and grant other appropriate relief. Finally, the Fair Housing Act invalidates any state or municipal law requiring or permitting an action that would be a discriminatory housing practice under federal law. *City of Edmonds v. Oxford House, Inc.,* which appears later in the chapter, illustrates the role of the Fair Housing Act when a city zoning ordinance allegedly has the effect of discriminating on the basis of handicap.

Deeds

Each state's statutes set out the formalities necessary to accomplish a valid conveyance of land. As a general rule, a valid conveyance is brought about by the execution and delivery of a **deed,** a written instrument that transfers title from one person (the grantor) to another (the grantee). Three types of deeds are in general use in the United States: *quitclaim deeds, warranty deeds,* and *deeds of bargain and sale* (also called *grant deeds*). The precise rights contemplated by a deed depend on the type of deed the parties have used.

Quitclaim Deeds A **quitclaim deed** conveys whatever title the grantor has at the time he executes the deed. It does not, however, contain warranties of title. The grantor who executes a quitclaim deed does not claim to have good title—or any title, for that matter. The grantee has no action against the grantor under a quitclaim deed if the grantee does not acquire good title. Quitclaim deeds are frequently used to cure technical defects in the chain of title to property.

Warranty Deeds A **warranty deed,** unlike a quitclaim deed, contains covenants of warranty. Besides conveying title to the property, the grantor who executes a warranty deed guarantees the title she has conveyed. There are two types of warranty deeds.

1. *General warranty deed.* Under a general warranty deed, the grantor warrants against (and agrees to defend against) all title defects and encumbrances (such as liens and easements), including those that arose before the grantor received her title.

2. *Special warranty deed.* Under a special warranty deed, the grantor warrants against (and agrees to defend against) title defects and encumbrances that arose after she acquired the property. If the property conveyed is subject to an encumbrance such as a mortgage, a long-term lease, or an easement, the grantor frequently provides a special warranty deed that contains a provision excepting those specific encumbrances from the warranty.

Deeds of Bargain and Sale In a **deed of bargain and sale** (also known as a **grant deed**), the grantor makes no covenants. The grantor uses language such as "I grant" or "I bargain and sell" or "I convey" property. Such a deed does contain, however, the grantor's implicit representation that he owns the land and has not previously encumbered it or conveyed it to another party.

Form and Execution of Deed

Some states' statutes suggest a form for deeds. Although the requirements for execution of deeds are not uniform, they do follow a similar pattern. As a general rule, a deed states the *name of the grantee,* contains a *recitation of consideration and a description of the property conveyed,* and is *signed by the grantor.* Most states require that the deed be notarized (acknowledged by the grantor before a notary public or other authorized officer) in order to be eligible for recording in public records.

No technical words of conveyance are necessary for a valid deed. Any language is sufficient if it indicates with reasonable certainty the grantor's intent to transfer ownership of the property. The phrases

[6]Chapter 25 discusses the Fair Housing Act's application to rentals of residential property.

"grant, bargain, and sell" and "convey and warrant" are commonly used. Deeds contain recitations of consideration primarily for historical reasons. The consideration recited is not necessarily the purchase price of the property. Deeds often state that the consideration for the conveyance is "one dollar and other valuable consideration."

The property conveyed must be described in such a manner that it can be identified. This usually means that the legal description of the property must be used. Several methods of legal description are used in the United States. In urban areas, descriptions are usually by lot, block, and plat. In rural areas where the land has been surveyed by the government, property is usually described by reference to the government survey. It may also be described by a metes and bounds description that specifies the boundaries of the tract of land.

Recording Deeds

Delivery of a valid deed conveys title from a grantor to a grantee. Even so, the grantee should promptly **record** the deed in order to prevent his interest from being defeated by third parties who may claim interests in the property. The grantee must pay a fee to have the deed recorded, a process that involves depositing and indexing the deed in the files of a government office designated by state law. A recorded deed operates to provide the public at large with notice of the grantee's property interest.

Recording Statutes Each state has a **recording statute** that establishes a system for the recording of all transactions affecting real property ownership. These statutes are not uniform in their provisions. In general, however, they provide for the recording of all deeds, mortgages, land contracts, and similar documents.

Types of Recording Statutes State recording statutes also provide for priority among competing claimants to rights in real property, in case conflicting rights or interests in property should be deeded to (or otherwise claimed by) more than one person. (Obviously, a grantor has no right to issue two different grantees separate deeds to the same property, but if this should occur, recording statutes provide rules to decide which grantee has superior title.) These priority rules apply only to grantees who have given value for their deeds or other interest-creating documents (primarily purchasers and lenders), and not to donees. A given state's recording law will set up one of three basic types of priority systems: race statutes, notice statutes, and race-notice statutes. Figure 2 explains these priority systems. Although the examples used in Figure 2 deal with recorded and unrecorded deeds, recording

Figure 2 *Three Basic Types of Priority Systems for Recording Deeds*

Race Statutes	Under a race statute—so named because the person who wins the race to the courthouse wins the property ownership "competition"—the first grantee who records a deed to a tract of land has superior title. For example, if Grantor deeds Blackacre to Kerr on March 1 and to Templin on April 1, Templin will have superior title to Blackacre if she records her deed before Kerr's is recorded. Race statutes are relatively uncommon today.
Notice Statutes	Under a notice system of priority, a later grantee of property has superior title if he acquired his interest without notice of an earlier grantee's claim to the property under an unrecorded deed. For example, Grantor deeds Greenacre to Jonson on June 1, but Jonson does not record his deed. On July 1, Marlowe purchases Greenacre without knowledge of Jonson's competing claim. Grantor executes and delivers a deed to Marlowe. In this situation, Marlowe would have superior rights to Greenacre even if Jonson ultimately records his deed before Marlowe's is recorded.
Race-Notice Statutes	The race-notice priority system combines elements of the systems just discussed. Under race-notice statutes, the grantee having priority is the one who both *takes his interest without notice* of any prior unrecorded claim and *records first.* For example, Grantor deeds Redacre to Frazier on September 1. On October 1 (at which time Frazier has not yet recorded his deed), Grantor deeds Redacre to Gill, who is then unaware of any claim by Frazier to Redacre. If Gill records his deed before Frazier's is recorded, Gill has superior rights to Redacre.

statutes apply to other documents that create interests in real estate. Chapter 27 discusses the recording of mortgages, as well as the adverse security interest–related consequences a mortgagee may experience if its mortgage goes unrecorded.

Methods of Assuring Title

In purchasing real property, the buyer is really acquiring the seller's ownership interests. Because the buyer does not want to pay a large sum of money for something that proves to be of little or no value, it is important for her to obtain assurance that the seller has good title to the property. This is commonly done in one of three ways:

1. *Title opinion.* In some states, it is customary to have an attorney examine an **abstract of title.** An abstract of title is a history of what the public records show regarding the passage of title to, and other interests in, a parcel of real property. It is not a guarantee of good title. After examining the abstract, the attorney renders an opinion about whether the grantor has **marketable title,** which is title free from defects or reasonable doubt about its validity. If the grantor's title is defective, the nature of the defects will be stated in the attorney's title opinion.

2. *Torrens system.* A method of title assurance available in a few states is the **Torrens system** of title registration. Under this system, one who owns land in fee simple obtains a certificate of title. When the property is sold, the grantor delivers a deed and a certificate of title to the grantee. All liens and encumbrances against the title are noted on the certificate, thus assuring the purchaser that the title is good except as to the liens and encumbrances noted on the certificate. However, some claims or encumbrances, such as those arising from adverse possession, do not appear on the records and must be discovered through an inspection of the property. In some Torrens states, encumbrances such as tax liens, short-term leases, and highway rights are valid against the purchaser even though they do not appear on the certificate.

3. *Title insurance.* Purchasing a policy of **title insurance** provides the preferred and most common means of protecting title to real property. Title insurance obligates the insurer to reimburse the insured grantee for loss if the title proves to be defective. In addition, title insurance covers litigation costs if the insured grantee must go to court in a title dispute. Lenders commonly require that a separate policy of title insurance be obtained for the lender's protection. Title insurance may be obtained in combination with the other previously discussed methods of ensuring title.

Seller's Responsibilities Regarding the Quality of Residential Property

Buyers of real estate normally consider it important that any structures on the property be in good condition. This factor becomes especially significant if the buyer intends to use the property for residential purposes. The rule of ***caveat emptor*** (let the buyer beware) traditionally applied to the sale of real property unless the seller committed misrepresentation or fraud or made express warranties about the property's condition. In addition, sellers had no duty to disclose hidden defects in the property. In recent years, however, the legal environment for sellers—especially real estate professionals such as developers and builder-vendors of residential property—has changed substantially. This section examines two important sources of liability for sellers of real property.

Implied Warranty of Habitability

Historically, sellers of residential property were not regarded as making any **implied warranty** that the property was habitable or suitable for the buyer's use. The law's attitude toward the buyer–seller relationship in residential property sales began to shift, however, as product liability law underwent rapid change in the late 1960s. Courts began to see that the same policies favoring the creation of implied warranties in the sale of goods applied with equal force to the sale of residential real estate.[7] Both goods and housing are frequently mass-produced. The disparity of knowledge and bargaining power often existing between a buyer of goods and a professional seller is also likely to exist between a buyer of a house and a builder-vendor (one who builds and sells houses). Moreover, many defects in houses are not readily discoverable during a buyer's inspection. This creates the possibility of serious loss,

[7]See Chapter 20 for a discussion of the development of similar doctrines in the law of product liability.

because the purchase of a home is often the largest single investment a person ever makes.

For these reasons, courts in most states now hold that builders, builder-vendors, and developers make an implied warranty of habitability when they build or sell real property for residential purposes. An ordinary owner who sells her house—in other words, a seller who was neither the builder nor the developer of the residential property—does not make an implied warranty of habitability.

The implied warranty of habitability amounts to a guarantee that the house is free of latent (hidden) defects that would render it unsafe or unsuitable for human habitation. A breach of this warranty subjects the defendant to liability for damages, measured by either the cost of repairs or the loss in value of the house.[8]

A related issue that has led to considerable litigation is whether the implied warranty of habitability extends to subsequent purchasers of the house. For example, PDQ Development Co. builds a house and sells it to Johnson, who later sells the house to McClure. May McClure successfully sue PDQ for breach of warranty if a serious defect renders the house uninhabitable? Although some courts have rejected implied warranty actions brought by subsequent purchasers, many courts today hold that an implied warranty made by a builder-vendor or developer would extend to a subsequent purchaser.

May the implied warranty of habitability be *disclaimed* or *limited* in the contract of sale? It appears at least possible to disclaim or limit the warranty through a contract provision, subject to limitations imposed by the unconscionability doctrine, public policy concerns, and contract interpretation principles.[9] Courts construe attempted disclaimers very strictly against the builder-vendor or developer, and often reject disclaimers that are not specific regarding rights supposedly waived by the purchaser.

Duty to Disclose Hidden Defects

Traditional contract law provided that a seller had no duty to disclose to the buyer defects in the property being sold, even if the seller knew about the defects and the buyer could not reasonably find out about them on his own. The seller's failure to volunteer information, therefore, could not constitute misrepresentation or fraud. This traditional rule of nondisclosure was another expression of the prevailing *caveat emptor* notion. Although the nondisclosure rule was subject to certain exceptions,[10] the exceptions seldom applied. Thus, there was no duty to disclose in most sales of real property.

Today, courts in many jurisdictions have substantially eroded the traditional nondisclosure rule and have placed a duty on the seller to disclose any known defect that materially affects the property's value and is not reasonably observable by the buyer. The seller's failure to disclose such defects effectively amounts to an assertion that the defects do not exist—an assertion on which a judicial finding of misrepresentation or fraud may be based.[11] *Strawn v. Canuso* illustrates the trend toward expansion of the duty to disclose by holding that certain sellers of residential property may be obligated to reveal the existence of significant *off-site* physical conditions.

[8]Measures of damages are discussed in Chapter 18.

[9]The unconscionability doctrine and public policy concerns are discussed in Chapter 15. Chapter 16 addresses contract interpretation.

[10]These exceptions are discussed in Chapter 13.

[11]Misrepresentation and fraud are discussed in Chapter 13.

Strawn v. Canuso *657 A.2d 420 (N.J.Sup. Ct. 1995)*

The Buzby Landfill was operated from 1966 to 1978. Although the landfill was not licensed to receive liquid industrial or chemical wastes, large amounts of hazardous materials and chemicals were dumped there. Toxic wastes began to escape from the landfill because it had no liner or cap. Tests performed by the New Jersey Department of Environmental Protection and Energy (DEPE) revealed ground water contamination caused by hazardous waste seepage from the landfill.

High levels of methane gas also emanated from the dump site. Various contaminants were released because there were gas leaks in a venting system that had been installed at the site to vent excessive levels of methane gas. The federal Environmental Protection Agency (EPA) investigated the situation and recommended that the Buzby Landfill site be considered for cleanup under the federal Superfund law. The cleanup did not take place, however.

During the 1980s, Canetic Corp. and Canuso Management Corp. developed a housing subdivision near the closed Buzby Landfill. Some homes in the subdivision were within half a mile of the old landfill. Twenty-six families filed a class action lawsuit against Canetic and Canuso Management on behalf of all purchasers (approximately 150 families) who bought new homes in the subdivision between 1984 and 1987. Other defendants were John B. Canuso, Sr., and John B. Canuso, Jr., who were principals in the corporations mentioned above, and Fox & Lazo, Inc., a brokerage firm that acted as selling agent for the homes in the development. Alleging fraud, negligent misrepresentation, and a violation of the New Jersey Consumer Fraud Act, the plaintiffs contended that prior to selling the plaintiffs their homes, the defendants should have disclosed that the housing development was located near an abandoned hazardous waste dump. According to the plaintiffs, the defendants had received considerable information from the EPA and the DEPE concerning the dangers of placing a housing development in the vicinity of the closed landfill. Nevertheless, the defendants followed a policy of nondisclosure to prospective purchasers.

The trial court granted summary judgment to the defendants, holding that they did not owe prospective purchasers a duty to disclose the condition "of somebody else's property." The New Jersey Appellate Division reversed, holding that Canetic, Canuso Management, and Fox & Lazo had a duty to inform potential buyers of the existence of the nearby, closed landfill. The affected defendants appealed to the Supreme Court of New Jersey.

O'Hern, Justice [T]he doctrine of *caveat emptor* survived [as part of real property law] into the first half of the twentieth century. *[C]aveat emptor* dictates that in the absence of express agreement, a seller is not liable to the buyer or others for the condition of the land existing at the time of transfer.

In *Michaels v. Brookchester, Inc.* (1958), this Court recognized that . . . *caveat emptor* no longer applied to leasehold interests in property. We stated [that even though *caveat emptor* was] "suitable for the agrarian setting in which it was conceived, [it] lagged behind changes in dwelling habits and economic realities." Exceptions to the broad immunity of *caveat emptor* inevitably developed in the sale of land. In *Schipper v. Levitt & Sons, Inc.* (1965), the Court held that a builder-developer . . . gave an implied warranty that the structure it built would be properly constructed—a warranty of its habitability. The Court said [that] "*[c]aveat emptor* developed when the buyer and seller were in an equal bargaining position . . . Buyers of mass produced development homes are not on an equal footing with the builder vendors."

In *McDonald v. Mianecki* (1979), the Court extended the principles of *Schipper* to a small-scale builder of new homes. The Court [noted that applying] *caveat emptor* "to new houses [would be] an anachronism patently out of harmony with modern home buying practices." Finally, in *Weintraub v. Krobatsch* (1974), the Court ruled that a seller of real estate had an obligation to disclose the existence of roach infestation unknown to the buyers. The Court noted that in certain circumstances, "silence may be fraudulent."

Other jurisdictions have limited the doctrine of *caveat emptor.* In California, when the seller knows of facts materially affecting the value or desirability of property and the seller also knows that such facts are not known to, or within the reach of the diligent attention and observation of the buyer, the seller is subject to a duty to disclose those facts to the buyer. [A California court decision classifies] the real estate agent or broker representing the seller [as] a party to the business transaction [and, therefore, as a party with the same duty of disclosure as the seller]. Several jurisdictions have . . . adopted mandatory disclosure laws [or] similar laws [that impose disclosure obligations on real property sellers and their brokers].

In the absence of such legislation or other regulatory requirements affecting real estate brokers, the question is whether our common-law precedent would require disclosure of off-site conditions that materially affect the value of property. By its favorable citation of California precedent, *Weintraub* establishes that a seller of real estate or a broker representing the seller would be liable for nondisclosure of on-site defective conditions if those conditions were known to them and unknown and not readily observable by the buyer. Such conditions, for example, would include radon contamination and a polluted water supply. California cases have extended

this duty [of disclosure] to some off-site conditions. Whether and to what extent we should extend this duty to off-site conditions depends on an assessment of the various policies that have shaped the development of our law.

[T]he principal factors shaping the duty to disclose have been the difference in bargaining power between the professional seller of real estate and the purchaser of such housing, and the difference in access to information between the seller and the buyer. The first factor causes us to limit our holding to professional sellers of residential housing (persons engaged in the business of building or developing residential housing) and the brokers representing them. Neither the reseller of residential real estate nor the seller of commercial property has that same advantage in the bargaining process. Regarding the second factor, professional sellers of residential housing and their brokers enjoy markedly superior access to information. Hence, we believe that it is reasonable to extend to such professionals a similar duty to disclose off-site conditions that materially affect the value or desirability of the property.

[In this case, the] silence of the Fox & Lazo representative and the Canuso Management Corporation's principals and employees created a mistaken impression on the part of the purchaser. Defendants used sales-promotion brochures, newspaper advertisements, and a fact sheet to sell the homes in the development. That material portrayed the development as located in a peaceful, bucolic setting with an abundance of fresh air and clean lake waters. Although the literature mentioned how far the property was from malls, country clubs, and train stations, neither the brochures, the newspaper advertisements, nor any sales personnel mentioned that a landfill [was] located within half a mile of some of the homes.

Is the nearby presence of a toxic-waste dump a condition that materially affects the value of property? Surely, Lois Gibbs would have wanted to know that the home she was buying in Niagara Falls, New York, was within one-quarter mile of the abandoned Love Canal site. *See* Lois M. Gibbs, *Love Canal: My Story* (1982) (recounting residents' political struggle concerning a leaking toxic-chemical dump near their homes). In the case of on-site conditions, courts have imposed affirmative obligations on sellers to disclose information materially affecting the value of property. There is no logical reason why a certain class of sellers and brokers should not disclose off-site matters that materially affect the value of property.

We know that the physical effects of abandoned dump sites are not limited to the confines of the dump. [E]ven without physical intrusion, a landfill may cause diminution in the fair market value of real property located nearby. [O]ur precedent and policy offer reliable evidence that the value of property may be materially affected by adjacent or nearby landfills. Professional sellers in southern New Jersey could not help but have been aware of the potential effects of such conditions.

In December 1983, the Real Estate Commission wrote to the Camden County Board of Realtors, stating that "[b]ecause of the potential effects on health, and because of its impact on the value of property, location of property near a hazardous waste site is a bit of information that should be supplied to potential buyers." In addition, [a New Jersey statute] requires that a broker "make reasonable effort to ascertain all pertinent information concerning every property for which he accepts an agency" [and that the broker] "shall reveal all information material to any transaction to his client or principal and when appropriate to any other party." Although not dispositive of the issues in this case, those sources certainly suggest that professionals should have been aware of some changing duty requiring them to be more forthcoming with respect to conditions affecting the value of property.

The duty that we recognize is not unlimited. We do not hold that sellers and brokers have a duty to investigate or disclose transient social conditions in the community that arguably affect the value of property. In the absence of a purchaser communicating specific needs, builders and brokers should not be held to decide whether the changing nature of a neighborhood, the presence of a group home, or the existence of a school in decline are facts material to the transaction. Rather, we root in the land the duty to disclose off-site conditions that are material to the transaction.

We hold that a builder-developer of residential real estate or a broker representing it is not only liable to a purchaser for affirmative and intentional misrepresentation, but is also liable for nondisclosure of off-site physical conditions known to it and

unknown and not readily observable by the buyer, if the existence of those conditions is of sufficient materiality to affect the habitability, use, or enjoyment of the property and, therefore, render the property less desirable or valuable to the objectively reasonable buyer. Ultimately, a jury will decide whether the presence of a landfill is a factor that materially affects the value of property; whether the presence of a landfill was known by defendants and not known or readily observable by plaintiffs; and whether the presence of a landfill has indeed affected the value of plaintiffs' property.

Decision of Appellate Division affirmed.

Other Property Condition-Related Obligations of Real Property Owners and Possessors

In recent years, the law has increasingly required real property owners and possessors to take steps to further the safety of persons on the property and to make the property more accessible to disabled individuals. This section discusses two legal developments along these lines: the trend toward expansion of *premises liability* and the inclusion of property-related provisions in the *Americans with Disabilities Act.*

Expansion of Premises Liability

Premises liability is the name sometimes used for negligence cases in which property owners or possessors (such as business operators leasing commercial real estate) are held liable to persons injured while on the property. As explained in Chapter 7, property owners and possessors face liability when their *failures to exercise reasonable care* to keep their property reasonably safe result in injuries to persons lawfully on the property.[12] The traditional premises liability case was one in which a property owner's or possessor's negligence led to the existence of a potentially hazardous condition on the property (e.g., a dangerously slick floor or similar physical condition at a business premises), and a person justifiably on the premises (e.g., a business customer) sustained personal injury upon encountering that unexpected condition (e.g., by slipping and falling).

Security Precautions against Foreseeable Criminal Acts Recent years have witnessed a judicial inclination to expand premises liability to cover other situations in addition to the traditional scenario. A key component of this expansion has been many courts' willingness to reconsider the once-customary holding that a property owner or possessor had no legal obligation to implement security measures to protect persons on the property from the wrongful acts of third parties lacking any connection with the owner or possessor. Today, courts frequently hold that a property owner's or possessor's duty to exercise reasonable care includes the obligation to take *reasonable security precautions* designed to protect persons lawfully on the premises from *foreseeable* wrongful (including criminal) acts by third parties.

This expansion has caused hotel, apartment building, and convenience store owners and operators to be among the defendants held liable—sometimes in very large damage amounts—to guests, tenants, and customers on whom third-party attackers inflicted severe physical injuries. In such cases, the property owners' or possessors' negligent failures to take security precautions restricting such wrongdoers' access to the premises served as at least a *substantial factor* leading to the plaintiffs' injuries.[13] The security lapses amounting to a lack of reasonable care in a particular case may have been, for instance, failures to install deadbolt locks, provide adequate locking devices on sliding glass doors, maintain sufficient lighting, or employ security guards.

[12]Chapter 7 explains the law's traditional view that real property owners and possessors owe persons who come on the property certain duties that vary depending on those persons' invitee, licensee, or trespasser status. It also discusses courts' increasing tendency to merge the traditional invitee and licensee classifications and to hold that property owners and possessors owe invitees and licensees the duty to exercise reasonable care to keep the premises reasonably safe.

[13]See Chapter 7's discussion of the *causation* element of a negligence claim.

Determining Foreseeability The security precautions component of the reasonable care duty is triggered only when criminal activity on the premises is foreseeable. It therefore becomes important to determine whether the foreseeability standard has been met. In making this determination, courts look at such factors as whether previous crimes had occurred on or near the subject property (and if so, the nature and frequency of those crimes), whether the property owner or possessor knew or should have known of those prior occurrences, and whether the property was located in a high-crime area. The fact-specific nature of the foreseeability and reasonable care determinations makes the outcome of a given premises liability case difficult to predict in advance. Nevertheless, there is no doubt that the current premises liability climate gives property owners and possessors more reason than ever before to be concerned about security measures.

Americans with Disabilities Act

In 1990, Congress enacted the broad-ranging Americans with Disabilities Act (ADA). This statute was designed to eliminate longstanding patterns of discrimination against disabled persons in matters such as employment, access to public services, and access to business establishments and similar facilities open to the public. The ADA's Title III focuses on places of *public accommodation.*[14] It imposes on certain property owners and possessors the obligation to take reasonable steps to make their property accessible to disabled persons (individuals with a physical or mental impairment that substantially limits one or more major life activities).

Places of Public Accommodation Title III of the ADA classifies numerous businesses and nonbusiness enterprises as places of **public accommodation.** These include hotels, restaurants, bars, theaters, concert halls, auditoriums, stadiums, shopping centers, stores at which goods are sold or rented, service-oriented businesses (running the gamut from gas stations to law firm offices), museums, parks, schools, social services establishments (day care centers, senior citizen centers, homeless shelters, and the like), places of recreation, and various other enterprises, facilities, and establishments. Private clubs and religious organizations, however, are not treated as places of public accommodation for purposes of the statute.

Modifications of Property Under the ADA, the owner or operator of a place of public accommodation cannot exclude disabled persons from the premises or otherwise discriminate against them in terms of their ability to enjoy the public accommodation. Avoiding such exclusion or other discrimination may require alteration of the business or nonbusiness enterprise's practices, policies, and procedures. Moreover, using language contemplating the possible need for physical modifications of property serving as a place of public accommodation, the ADA includes within prohibited discrimination the property owner's or possessor's "failure to take such steps as may be necessary to ensure that no individual with a disability is excluded" or otherwise discriminated against in terms of access to what nondisabled persons are provided. The failure to take these steps does not violate the ADA, however, if the property owner or possessor demonstrates that implementing such steps would "fundamentally alter the nature" of the enterprise or would "result in an undue burden."

Prohibited discrimination may also include the "failure to remove architectural barriers and communication barriers that are structural in nature," if removal is "readily achievable." When the removal of such a barrier is not readily achievable, the property owner or possessor nonetheless engages in prohibited discrimination if he, she, or it does not adopt "alternative methods" to ensure access to the premises and what it has to offer (assuming that the alternative methods are themselves readily achievable). The ADA defines *readily achievable* as "easily accomplishable and able to be carried out without much difficulty or expense." The determination of whether an action is readily achievable involves consideration of factors such as the action's nature and cost, the nature of the enterprise conducted on the property, the financial resources of the affected property owner or possessor, and the effect the action would have on expenses and resources of the property owner or possessor.

New Construction Newly constructed buildings on property used as a place of public accommodation must contain physical features making the buildings *readily accessible* to disabled persons. The same is true of additions built on to previous structures. The ADA is supplemented by federal regulations setting forth property accessibility guidelines designed to lend substance and specificity to the broad legal standards stated in the

[14] 42 U.S.C. §§ 12181–12189. These sections examine only Title III of the ADA. Chapter 50 discusses the employment-related provisions set forth elsewhere in the statute.

statute. In addition, the federal government has issued technical assistance manuals and materials in an effort to educate public accommodation owners and operators regarding their obligations under the ADA.

Remedies A person subjected to disability-based discrimination in any of the respects discussed above may bring a civil suit for injunctive relief. An injunction issued by a court must include "an order to alter facilities" to make the facilities "readily accessible to and usable by individuals with disabilities to the extent required" by the ADA. The court has discretion to award attorney's fees to the prevailing party. The U.S. Attorney General also has the legal authority to institute a civil action alleging a violation of Title III of the ADA. In such a case, the court may choose to grant injunctive and other appropriate equitable relief, award compensatory damages to aggrieved persons (when the Attorney General so requests), and assess civil penalties (up to $50,000 for a first violation and up to $100,000 for any subsequent violation) "to vindicate the public interest." When determining the amount of any such penalty, the court is to give consideration to any good faith effort by the property owner or possessor to comply with the law. The court must also consider whether the owner or possessor could reasonably have anticipated the need to accommodate disabled persons.

Land Use Control

Although a real property owner generally has the right to use his property as he desires, society has placed certain limitations on this right. This section examines the property use limitations imposed by nuisance law and by zoning and subdivision ordinances. It also discusses the ultimate land use restriction—the eminent domain power—which enables the government to deprive property owners of their land.

Nuisance Law

One's enjoyment of her land depends to a great extent on the uses her neighbors make of their land. When the uses of neighboring landowners conflict, the aggrieved party sometimes institutes litigation to resolve the conflict. A property use that unreasonably interferes with another person's ability to use or enjoy her own property may lead to an action for **nuisance** against the landowner or possessor engaging in the objectionable use.

The term *nuisance* has no set definition. It is often regarded, however, as encompassing any property-related use or activity that unreasonably interferes with the rights of others. Property uses potentially constituting nuisances include uses that are inappropriate to the neighborhood (such as using a vacant lot in a residential neighborhood as a garbage dump), bothersome to neighbors (such as keeping a pack of barking dogs in one's backyard), dangerous to others (such as storing large quantities of gasoline in 50-gallon drums in one's garage), or of questionable morality (such as operating a house of prostitution). To amount to a nuisance, a use need not be illegal. The fact that relevant zoning laws allow a given use does not mean that the use cannot be a nuisance. The use's having been in existence before complaining neighbors acquired their property does not mean that the use cannot be a nuisance, though it does lessen the likelihood that the use would be held a nuisance.

The test for determining the presence or absence of a nuisance is necessarily flexible and highly dependent on the individual case's facts. Courts balance a number of factors, such as the social importance of the parties' respective uses, the extent and duration of harm experienced by the aggrieved party, and the feasibility of abating (stopping) the nuisance.

Nuisances may be private or public. To bring a *private nuisance* action, the plaintiff must be a landowner or occupier whose enjoyment of her own land is substantially lessened by the alleged nuisance. The remedies for private nuisance include damages and injunctive relief designed to stop the offending use. A *public nuisance* occurs when a nuisance harms members of the public, who need not be injured in their use of property. For example, if a power plant creates noise and emissions posing a health hazard to pedestrians and workers in nearby buildings, a public nuisance may exist even though the nature of the harm has nothing to do with any loss of enjoyment of property. Public nuisances involve a broader class of affected parties than do private nuisances. The action to abate a public nuisance must usually be brought by the government. Remedies generally include injunctive relief and civil penalties that resemble fines. The *Rezcallah* case, which follows, demonstrates that on occasion, constitutional issues may arise in public nuisance cases brought by the government. Private parties may sue for abatement of a public nuisance or for damages caused by one only when they suffered unique harm different from that experienced by the general public.

State v. Rezcallah *702 N.E.2d 81 (Ohio Sup. Ct. 1998)*

Toledo, Ohio, property owners Mary Rezcallah, Gilbert Terrell, and Teresa Gonzales rented their respective houses to persons who later possessed and sold crack cocaine on the premises. Rezcallah, Terrell, and Gonzales had been unaware that such activities were taking place. Once they learned of the unlawful activities, Rezcallah, Terrell, and Gonzales either assisted the police in their investigations or initiated legal proceedings to evict their tenants, or both. While police investigations and criminal prosecutions of the allegedly drug-dealing tenants were pending, the State of Ohio filed separate nuisance abatement actions against Rezcallah, Terrell, and Gonzales. The trial court dismissed the complaint against Rezcallah, reasoning that the state was not entitled to injunctive relief because the state was unable to prove that Rezcallah knew about, and either tolerated or participated in, the conduct allegedly constituting the nuisance. For the same reason, the trial courts in the nuisance abatement cases against Terrell and Gonzales ruled in the property owners' favor. The state appealed all three decisions, but the Ohio Court of Appeals affirmed each time. When the state appealed to the Supreme Court of Ohio, the three cases were consolidated.

Moyer, Chief Judge Ohio Revised Code (R.C.) 3767.02 provides that "any person who uses, occupies, establishes, or conducts a nuisance . . . , and the owner . . . of any interest in such nuisance . . . is guilty of maintaining a nuisance and shall be enjoined as provided in [later statutory sections]. R.C. 3719.10 provides that "premises or real estate . . . on which a felony violation of [state drug laws] occurs constitute a nuisance subject to abatement pursuant to Chapter 3767." [I]f the existence of a nuisance is admitted or established in [a civil action brought by the state], the court "shall" enter judgment that "perpetually enjoins the defendant and any other person from further maintaining the nuisance" [quoting R.C. 3767.05(D)]. R.C.3767.06(A) also requires that "an order of abatement shall be included in the judgment entry." [Under the order of abatement required by section 3767.06(A),] closure of the real property against use for any purpose for one year [is to be ordered unless the property owner has posted a suitable bond]. Because both R.C. 3767.05(D) and 3767.06(A) use the imperative word "shall," these provisions are deemed mandatory.

R.C. 3767.02, which defines the offense of maintaining a nuisance, is clear and unambiguous and does not include a requirement of knowledge, acquiescence, or participation on the part of an owner of the property deemed to be a nuisance. We thus hold that [the statute] does not require proof of acquiescence to or participation in the creation of a nuisance or the conduct constituting a nuisance in order to find an owner of a nuisance guilty of the civil offense of "maintaining a nuisance."

Proof of an owner's knowledge, acquiescence, or participation is relevant, however, in determining which statutory remedies may be imposed once the owner is found guilty of maintaining a nuisance. We find no constitutional infirmity in . . . the mandatory imposition of . . . a permanent injunction barring the defendant from "further maintaining the nuisance at the place complained of." However, [we reach a different conclusion regarding the application of the mandatory one-year closure order to a property owner who] bears no culpable responsibility in the nature of acquiescence to or participation in the creation or perpetuation of the nuisance.

It bears emphasis that [the mandatory closure order bars use of the property] *for any purpose.* The statute does not allow for judicial discretion in the imposition of the order, nor does it require proof of any knowledge or culpability on the part of the property owner before it may be imposed. [According to *Black's Law Dictionary,* a] forfeiture is "a divestiture of specific property without compensation; it imposes a loss by the taking away of some preexisting valid right without compensation." An order to close property "against its use for any purpose," as mandated by R.C. 3767.06(A), renders the owner's property economically idle for a year. In *Lucas v. South Carolina Coastal Council* (1992), the U.S. Supreme Court noted that "when the owner of real property has been called upon to sacrifice *all* economically beneficial uses in the name of the common good, that is, to leave his property economically idle, he has suffered a taking." The fact that the order is of limited duration does not change this conclusion. It is well-established that the Constitution protects against temporary takings just as it does against permanent takings.

Nor is the closure-order provision saved from constitutional infirmity by the availability of judicial release through the filing of a bond in the full value of the property. Deprivation of the use of resources equal to the value of the property is as much a taking as is deprivation of the use of the property itself. Further, . . . an innocent owner defendant may often be financially incapable of filing such a bond. Accordingly, we hold that padlocking an owner's property, effectively closing it against all uses for a year, is a taking.

We acknowledge that not all forfeitures or temporary takings without compensation are constitutionally infirm. The U.S. Supreme Court has held in a long line of cases that a state may use its police power to enjoin a property owner from activities akin to public nuisances without offending either the due process or takings clauses. This court has also upheld the validity of forfeitures and closure orders resulting from nuisance abatement actions. However, we find these . . . cases to be of limited usefulness in determining the issues now before us. [The earlier cases are distinguishable because they either involved property owners who were not "innocent" owners of the sort present here or dealt with statutes that, unlike the ones at issue here, gave courts discretion to decide whether forfeiture was appropriate.]

[In arguing that the mandatory closure provision of the statute should not be considered a taking, the state points out that the closure provision] advance[s] the state's interest in protecting the public from illegal drug activity by providing incentive to property owners to actively monitor their property. There is no question that the prevention of illegal drug activity is a legitimate state interest. We hold, however, that the mandatory closure provision [does] not substantially advance this interest when imposed against property owners who have not acquiesced to or participated in the illegal activity, and who have promptly abated the nuisance upon its discovery. Even if a landlord did undertake to monitor his or her property, the mere act of surveillance is unlikely to generate any information that would provide sufficient grounds for eviction. Landlords are limited in the actions they may take against tenants engaged in illegal activities. [Landlords] are statutorily prohibited from entering leased residential property unannounced. [They] have no authority to conduct regular drug searches, nor may they break a lease based solely on unsubstantiated suspicions that the tenant is conducting illegal activities.

It is unclear what action the landlord could or should take to avoid forfeiture. The state is apparently not satisfied if the owner informs the police of the illegal activity or [seeks to have] criminal charges [filed] against the resident, as defendant Terrell had done. It apparently is not enough to initiate eviction proceedings, as defendant Rezcallah had done. Nor was the state satisfied with defendant Gonzales' attempt to investigate allegations of drug activity on her own. [I]f owners report a tenant to the police and cooperate with them in investigating and prosecuting the tenant, thereby ending the illegal activity through appropriate and legal means, they have effectively admitted that the property is a nuisance and subjected themselves to the mandatory padlocking provisions of [the statute]. Rather than substantially advancing the goal of encouraging property owners to monitor their property and take all legal steps to abate illegal activities thereon, this provision may actually discourage owners from reporting illegal activity. An additional effect of padlocking the property is that the owner is precluded from maintaining or repairing the property after the offending party has left the premises. This creates an increased risk that the property will further deteriorate and again become a nuisance.

We conclude that the imposition of [an] order . . . effectively closing real property against its use for any purpose for a period of one year does not advance a legitimate state interest when enforced against an innocent owner and that the state's interest does not outweigh the owner's interest in the economic use of his or her property. Therefore, the mandatory closure order provisions of R.C. 3767.06(A) violate the takings clause of the Fifth Amendment . . . when imposed against an innocent owner. Further, we hold that because there is no intentional wrongdoing, no departure from any prescribed standard of action, and no reckless conduct, and because landowners are not completely free to act as they choose due to landlord-tenant laws and other limitations on self-help evictions, forfeiture under these circumstances is so arbitrary and oppressive as to be a taking without due process of law in violation of the Fourteenth Amendment.

Judgments reversed and cases remanded for further proceedings.

Eminent Domain

The Fifth Amendment to the Constitution provides that private property shall not be taken for public use without "just compensation." Implicit in this provision is the principle that the government has the power to take property for public use if it pays "just compensation" to the owner of the property. This power, called the power of **eminent domain,** makes it possible for the government to acquire private property for highways, water control projects, municipal and civic centers, public housing, urban renewal, and other public uses. Governmental units may delegate their eminent domain power to private corporations such as railroads and utility companies.

Although the eminent domain power is a useful tool of efficient government, there are problems inherent in its use. Determining when the power can be properly exercised presents an initial problem. When the governmental unit itself uses the property taken, as would be the case with property acquired for construction of a municipal building or a public highway, the exercise of the power is proper. The use of eminent domain is not so clearly justified, however, when the government acquires the property and resells it to a private developer. Although such acquisitions may be more vulnerable to challenge, recent cases have applied a very lenient standard in determining what constitutes a public use.[15]

Determining *just compensation* in a given case poses a second and frequently encountered eminent domain problem. The property owner is entitled to receive the "fair market value" of his property. Critics assert, however, that this measure of compensation falls short of adequately compensating the owner for her loss, because *fair market value* does not cover such matters as the lost goodwill of a business or one's emotional attachment to his home.

A third problem sometimes encountered is determining when there has been a "taking" that triggers the government's just compensation obligation. The answer is easy when the government institutes a formal legal action to exercise the eminent domain power (often called an action to *condemn* property). In some instances, however, the government causes or permits a serious physical invasion of a landowner's property without having instituted formal condemnation proceedings. For example, the government's dam-building project results in persistent flooding of a private party's land. Courts have recognized the right of property owners in such cases to institute litigation seeking compensation from the governmental unit whose actions effectively amounted to a physical taking of their land. In these so-called **inverse condemnation** cases, the property owner sends the message that "you have taken my land; now pay for it."

[15]This issue is discussed further in Chapter 3, as are other issues relating to eminent domain.

Zoning and Subdivision Laws

State legislatures commonly delegate to cities and other political subdivisions the power to impose reasonable regulations designed to promote the public health, safety, and welfare (often called the *police power*). Zoning ordinances, which regulate real property use, stem from the exercise of the police power. Normally, zoning ordinances divide a city or town into various districts and specify or limit the uses to which property in those districts may be put. They also contain requirements and restrictions regarding improvements built on the land.

Zoning ordinances frequently contain direct restrictions on land use, such as by limiting property use in a given area to single-family or high-density residential uses, or to commercial, light industry, or heavy industry uses. Other sorts of use-related provisions commonly found in zoning ordinances include restrictions on building height, limitations on the portion of a lot that can be covered by a building, and specifications of the distance buildings must be from lot lines (usually called *setback* requirements). Zoning ordinances also commonly restrict property use by establishing population density limitations. Such restrictions specify the maximum number of persons who can be housed on property in a given area and dictate the amount of living space that must be provided for each person occupying residential property. In addition, zoning ordinances often establish restrictions designed to maintain or create a certain aesthetic character in the community. Examples of this type of restriction include specifications of buildings' architectural style, limitations on billboard and sign use, and designations of special zones for historic buildings.

Many local governments also have ordinances dealing with proposed subdivisions. These ordinances often require the subdivision developer to meet certain requirements regarding lot size, street and sidewalk layout, and sanitary facilities. They also require that the city or town approve the proposed development. Such ordinances are designed to further general community interests and to protect prospective buyers of

property in the subdivision by ensuring that the developer meets minimum standards of suitability.

Nonconforming Uses A zoning ordinance has *prospective* effect. This means that the uses and buildings already existing when the ordinance is passed (**nonconforming uses**) are permitted to continue. The ordinance may provide, however, for the gradual phasing out of nonconforming uses and buildings that do not fit the general zoning plan.

Relief from Zoning Ordinances A property owner who wishes to use his property in a manner prohibited by a zoning ordinance has more than one potential avenue of relief from the ordinance. He may, for instance, seek to have the ordinance **amended**—in other words, attempt to get the law changed—on the ground that the proposed amendment is consistent with the essence of the overall zoning plan.

A different approach would be to seek permission from the city or political subdivision to deviate from the zoning law. This permission is called a **variance.** A person seeking a variance usually claims that the ordinance works an undue hardship on her by denying her the opportunity to make reasonable use of her land. Examples of typical variance requests include a property owner's seeking permission to make a commercial use of her property even though it is located in an area zoned for residential purposes, or permission to deviate from normal setback or building size requirements.

Attempts to obtain variances and zoning ordinance amendments frequently clash with the interests of other owners of property in the same area—owners who have a vested interest in maintaining the status quo. As a result, variance and amendment requests often produce heated battles before local zoning authorities.

Challenges to the Validity of the Zoning Ordinance A disgruntled property owner might also attack the zoning ordinance's validity on constitutional grounds. Litigation challenging zoning ordinances has become frequent in recent years, as cities and towns have used their zoning power to achieve social control. For example, assume that a city creates special zoning requirements for adult bookstores or other uses considered moral threats to the community. Such uses of the zoning power have been challenged as unconstitutional restrictions on freedom of speech. In *City of Renton v. Playtime Theatres, Inc.,* however, the Supreme Court upheld a zoning ordinance that prohibited the operation of adult bookstores within 1,000 feet of specified uses such as residential areas and schools.[16] The Court established that the First Amendment rights of operators of adult businesses would not be violated by such an ordinance so long as the city provided them a "reasonable opportunity to open and operate" their businesses within the city. The reasonable opportunity test was satisfied in *City of Renton* even though the ordinance at issue effectively restricted adult bookstores to a small area of the community in which no property was then available to buy or rent. As lower court cases reveal, however, the fact-specific nature of the inquiry contemplated by the reasonable opportunity test means that the government is not guaranteed of passing the test in every case.[17]

Other litigation has stemmed from ordinances by which municipalities have attempted to "zone out" residential facilities such as group homes for mentally retarded adults. In a leading case, the Supreme Court held that the Constitution's Equal Protection Clause was violated by a zoning ordinance that required a special use permit for a group home for the mentally retarded.[18] (For a case indicating that similar issues nonetheless may be treated differently in the *restrictive covenant*—as opposed to zoning—setting, see *Mains Farm Homeowners Association v. Worthington,* which appears earlier in this chapter.) The Fair Housing Act, which forbids discrimination on the basis of handicap and familial status, has also been used as a basis for challenging decisions that zone out group homes. Such a challenge has a chance of success when the plaintiff demonstrates that the zoning board's actions were a

[16] 475 U.S. 41 (U.S. Sup. Ct. 1986). A later case, *FW/PBS, Inc. v. City of Dallas,* 493 U.S. 215 (U.S. Sup. Ct. 1990), presented a different sort of restriction on adult businesses and resulted in a different outcome. There, the Court held that a comprehensive ordinance requiring licensing of adult cabarets and other adult entertainment establishments violated the First Amendment because the ordinance did not have appropriate procedural safeguards against arbitrary denials of licenses. The ordinance's chief defect was its failure to establish a time limit within which city authorities were required to act on license applications.

[17] See, for example, *Topanga Press, Inc. v. City of Los Angeles,* 1993 U.S. App. LEXIS 9423 (9th Cir. 1993). In that case, the Ninth Circuit Court of Appeals upheld the trial court's issuance of a preliminary injunction against the city's *City of Renton*–like zoning ordinance regarding adult businesses. The reasonable opportunity test was not passed by the city, given that much of the real estate supposedly still "available" for relocation of the adult businesses was submerged beneath the Pacific Ocean or was used as a landfill, for petroleum storage, for airport runways, or for some other purpose inconsistent with the notion that the property could somehow become available for use by adult businesses.

[18] *City of Cleburne v. Cleburne Living Centers,* 473 U.S. 432 (U.S. Sup. Ct. 1985).

mere pretext for discrimination.[19] Certain applications of zoning ordinances that establish single-family residential areas may also raise Fair Housing Act–based claims of handicap discrimination. The *Oxford House* case, which follows shortly, is such a case.

Many cities and towns have attempted to restrict single-family residential zones to living units of traditional families related by blood or marriage. In enacting ordinances along those lines, municipalities have sought to prevent the presence of groups of unrelated students, commune members, or religious cult adherents by specifically defining the term *family* in a way that excludes these groups. In *Belle Terre v. Boraas,*[20] the Supreme Court upheld such an ordinance as applied to a group of unrelated students. The Court later held, however, that an ordinance defining *family* so as to prohibit a grandmother from living with her grandsons was an unconstitutional intrusion on personal freedom regarding family life.[21] Restrictive definitions of *family* have been held unconstitutional under state constitutions in some cases but narrowly construed by courts in other cases.

[19]See, for example, *Baxter v. City of Nashville,* 720 F. Supp. 720 (S.D. Ill. 1989), which involves a challenge by a hospice for AIDS patients to a city's denial of a special use permit.

[20]416 U.S. 1 (U.S. Sup. Ct. 1974).

[21]*Moore v. City of East Cleveland,* 431 U.S. 494 (U.S. Sup. Ct. 1977).

City of Edmonds v. Oxford House, Inc. *514 U.S 725 (U.S. Sup. Ct. 1995)*

The zoning code of the City of Edmonds, Washington, allows only single-family dwelling units in certain designated areas of the city. One of this code's ordinances defines family *as "an individual or two or more persons related by genetics, adoption, or marriage, or a group of five or fewer persons who are not related by genetics, adoption, or marriage." Oxford House, Inc., opened a group home on leased property in an area of Edmonds that was zoned for single-family residences. This group home was for 10 to 12 adults who were recovering from alcoholism and drug addiction. Upon learning that the group home was being operated, Edmonds issued criminal citations to the owner and a resident of the house. Because the Oxford House facility housed more than five unrelated persons in a single-family area, it did not conform to the Edmonds zoning code.*

In an effort to keep the group home open, Oxford House relied on the federal Fair Housing Act (FHA), which bars discrimination in the sale or rental of real property on various bases, including the handicap of a buyer or renter. For purposes of the litigation described below, all parties stipulated that the residents of the Oxford House group home were recovering alcoholics or drug addicts and were therefore handicapped persons within the meaning of the FHA. Discrimination prohibited by the FHA includes the refusal to make "reasonable accommodations in rules, policies, practices, or services, when such accommodations may be necessary to afford [handicapped] persons equal opportunity to use and enjoy a dwelling." Oxford House asked Edmonds to make what Oxford House saw as a reasonable accommodation—allowing it to continue to operate the group home in the single-family residential dwelling it had leased. Edmonds denied this request.

Edmonds sued Oxford House in federal court, seeking a declaration that the FHA does not limit the operation of the city's zoning code rule defining family. *The city based its case on an FHA provision that exempts from the FHA's antidiscrimination provisions "any reasonable local, State, or Federal restrictions regarding the maximum number of occupants permitted to occupy a dwelling" [FHA section 3607(b)(1)]. Oxford House counterclaimed under the FHA, alleging that in refusing to permit maintenance of the group home in a single-family zone, Edmonds had failed to make a reasonable accommodation. Holding that the Edmonds zoning code's definition of* family *was a reasonable maximum occupancy restriction for purposes of the FHA exemption set out in section 3607(b)(1), the federal district granted summary judgment in favor of Edmonds. The Ninth Circuit Court of Appeals reversed. It held that section 3607(b)(1)'s exemption did not apply to the Edmonds ordinance. The U.S. Supreme Court granted the city's petition for certiorari.*

Ginsburg, Justice The sole question before the Court is whether Edmonds' family composition rule qualifies as a "restrictio[n] regarding the maximum number of occupants permitted to occupy a dwelling"

within the meaning of the FHA's absolute exemption [section 3607(b)(1)]. In answering this question, we are mindful of the Act's stated policy "to provide . . . for fair housing throughout the United States." We also note precedent recognizing the FHA's "broad and inclusive" compass (quoting *Trafficante v. Metropolitan Life Insurance Co.* (1972). Accordingly, we regard this case as an instance in which an exception to "a general statement of policy" is sensibly read "narrowly in order to preserve the primary operation of the [policy]" (quoting *Commissioner v. Clark* (1989)).

Congress enacted section 3607(b)(1) against the backdrop of an evident distinction between municipal land use restrictions and maximum occupancy restrictions. Land use restrictions designate "districts in which only compatible uses are allowed and incompatible uses are excluded" (quoting D. Mandelker, *Land Use Law* [3d ed. 1993]). These restrictions typically categorize uses as single-family residential, multiple-family residential, commercial, or industrial. Land use restrictions aim to prevent problems caused by the "pig in the parlor instead of the barnyard" (quoting *Village of Euclid v. Ambler Realty Co.* [1926]). [R]eserving land for single-family residences preserves the character of neighborhoods. To limit land use to single-family residences, a municipality must define the term "family"; thus, family composition rules are an essential component of single-family residential uses.

Maximum occupancy restrictions, in contradistinction, cap the number of occupants per dwelling, typically in relation to available floor space or the number and types of rooms. These restrictions ordinarily apply uniformly to *all* residents of *all* dwelling units. Their purpose is to protect health and safety by preventing dwelling overcrowding.

Section 3607 (b)(1)'s language—"restrictions regarding the maximum number of occupants permitted to occupy a dwelling"—surely encompasses maximum occupancy restrictions. But the formulation does not fit family composition rules typically tied to land use restrictions. In sum, rules that cap the total number of occupants in order to prevent overcrowding of a dwelling [clearly] fall within section 3607(b)(1)'s absolute exemption from the FHA's governance; rules designed to preserve the family character of a neighborhood, fastening on the composition of households rather than on the total number of occupants, living quarters can contain, do not.

Turning specifically to the City's [zoning code], we note that the provisions Edmonds invoked against Oxford House [the ordinance establishing single-family residential zoning for the area where the home was located and the ordinance defining *family*] are classic examples of a use restriction and complementing family composition rule. These provisions do not cap the number of people who may live in a dwelling. In plain terms, they direct that dwellings be used only to house families. A separate [Edmonds ordinance] caps the number of occupants a dwelling may house, based on the floor area. Th[e] space and occupancy standard [set forth in this separate ordinance] is a prototypical maximum occupancy restriction.

Edmonds nevertheless argues that its family composition rule falls within . . . the FHA exemption for maximum occupancy restrictions, because the rule caps at five the number of unrelated persons allowed to occupy a single-family dwelling. But Edmonds' family composition rule surely does not answer the question: "What is the maximum number of occupants permitted to occupy a house?" So long as they are related "by genetics, adoption, or marriage," any number of people can live in a house.

Family living, not living space per occupant, is what [the family composition ordinance] describes. Defining family primarily by biological and legal relationships, the provision also accommodates another group association: five or fewer unrelated people are allowed to live together as though they were family. This accommodation is the peg on which Edmonds rests its plea for section 3607(b)(1) exemption. It is curious reasoning indeed that converts a family values preserver into a maximum occupancy restriction once a town adds to a related persons prescription [a reference to a limited number of unrelated persons].

The parties have presented, and we have decided, only a threshold question: Edmonds' zoning code provision describing who may compose a "family" is not a maximum occupancy restriction exempt from the FHA under section 3607(b)(1). It remains for the lower courts to decide whether Edmonds' actions against Oxford House violate the FHA's prohibitions against discrimination.

Judgment of Ninth Circuit Court of Appeals affirmed.

Land Use Regulation and Taking

Another type of litigation seen with increasing frequency in recent years centers around zoning laws and other land use regulations that make the use of property less profitable for development.[22] Affected property owners have challenged the application of such regulations as unconstitutional takings of property without just compensation, even though these cases do not involve the actual physical invasions present in the inverse condemnation cases discussed earlier in this chapter.

States normally have broad discretion to use their police power for the public benefit, even when that means interfering to some extent with an owner's right to develop her property as she desires. Some regulations, however, may interfere with an owner's use of his property to such an extent that they constitute a taking.

For instance, in *Nollan v. California Coastal Commission,*[23] the owners of a beach-front lot (the Nollans) wished to tear down a small house on the lot and replace that structure with a larger house. The California Coastal Commission conditioned the grant of the necessary coastal development permit on the Nollans' agreeing to allow the public an easement across their property. This easement would have allowed the public to reach certain nearby public beaches more easily. The Nollans challenged the validity of the Coastal Commission's action.

Ultimately, the Supreme Court concluded that the Coastal Commission's placing the easement condition on the issuance of the permit amounted to an impermissible regulatory taking of the Nollans' property. In reaching this conclusion, the Court held that the state could not avoid paying compensation to the Nollans by choosing to do by way of the regulatory route what it would have had to pay for if it had followed the formal eminent domain route. In *Dolan v. City of Tigard,* which follows shortly, the Supreme Court further developed the analysis suggested in *Nollan.*

Regulations Denying Economically Beneficial Uses What about a land use regulation that allows the property owner no *economically beneficial use* of his property? *Lucas v. South Carolina Coastal Commission*[24] was brought by a property owner, Lucas, who had paid nearly $1 million for two residential beach-front lots before South Carolina enacted a coastal protection statute. This statute's effect was to bar Lucas from building any permanent habitable structures on the lots. The trial court held that the statute rendered Lucas's property "valueless" and that an unconstitutional taking had occurred, but the South Carolina Supreme Court reversed. The U.S. Supreme Court, however, held that when a land use regulation denies "all economically beneficial use" of property, there normally has been a taking for which just compensation must be paid. The exception to this rule, according to the Court, would be when the economically productive use being prohibited by the land use regulation was already disallowed by nuisance law or other comparable property law principles. The Court therefore reversed and remanded the case for determination of whether there had been a taking under the rule crafted by the Court, or instead an instance in which the "nuisance" exception applied. On remand, the South Carolina Supreme Court concluded that a taking calling for compensation had occurred (and, necessarily, that the nuisance exception did not apply to Lucas's intended residential use).[25]

The mere fact that a land use regulation deprives the owner of the *highest and most profitable use* of his property does not mean, however, that there has been a taking. If the regulation still allows a use that is economically beneficial in a meaningful sense—even though not the most profitable use—the *Lucas* analysis would seem to indicate that an unconstitutional taking probably did not occur. At the same time, *Lucas* offered hints that less-than-total takings (in terms of restrictions on economically beneficial uses) may sometimes trigger a right of compensation on the landowner's part. Thus, it appears that even as to land use regulations that restrict some but not all economically beneficial uses, property owners are likely to continue arguing (as they have in recent years) that the regulations go "too far" and amount to a taking. As the *Rezcallah* case, which appeared earlier in the chapter, indicates, remedies allowed in public nuisance cases may trigger taking arguments if the remedies seem to go too far.

There is no set formula for determining whether a regulation has gone too far. Courts look at the relevant facts and circumstances and weigh a variety of factors, such as the economic impact of the regulation,

[22]This issue is also discussed in Chapter 3.
[23]483 U.S. 825 (U.S. Sup. Ct. 1987).
[24]505 U.S. 1003 (U.S. Sup. Ct. 1992).
[25]424 S.E.2d 484 (S.C. Sup. Ct. 1992).

the degree to which the regulation interferes with the property owner's reasonable expectations, and the character of the government's invasion. The weighing of these factors occurs against the backdrop of a general presumption that state and local governments should have reasonably broad discretion to develop land use restrictions pursuant to the police power. As a result, the outcome of a case in which *regulatory taking* allegations are made is less certain than when a *physical taking* (a physical invasion of the sort addressed in the earlier discussion of inverse condemnation cases) appears to have occurred.

Dolan v. City of Tigard *512 U.S. 374 (U.S. Sup. Ct. 1994)*

The City of Tigard, Oregon, developed a comprehensive land use plan and codified it in its Community Development Code (CDC). This plan identified congestion in the city's central business district as a problem whose severity could be lessened if pedestrian and bicycle pathways were developed. The CDC therefore required that appropriate land development projects facilitate the plan by dedicating land for pedestrian and bicycle pathways.

Tigard's land use plan also noted that flooding had been a problem along Fanno Creek, and that the increase in impervious surfaces associated with continued urbanization would exacerbate the flooding problems. The CDC therefore required that the Fanno Creek Basin be improved through channel excavation and other modifications, that areas in and adjacent to the floodplain be maintained as greenways free of structures, and that the cost of the flood-control-related improvements be borne by owners of property located along the waterway.

Florence Dolan owned a plumbing and electric supply store that was located on a 1.67-acre parcel in Tigard's central business district. Fanno Creek flows through a corner of Dolan's property and along one of its boundaries. The creek's flow renders the area within its 100-year floodplain virtually unusable for commercial development.

Dolan wished to redevelop her property, so she sought a permit from the city for that purpose. Her plans called for nearly doubling her store's size and for paving a gravel parking lot. The City Planning Commission granted Dolan's permit application, subject to certain conditions. These conditions, which were based on CDC requirements, called for Dolan to dedicate (1) the portion of her property lying within the floodplain for improvement of a storm drainage system along Fanno Creek, and (2) a 15-foot strip of land adjacent to the floodplain for use as a "greenway" and as a public pedestrian/bicycle pathway.

Dolan requested that the City Planning Commission grant her a variance (i.e., an exemption from the CDC-based conditions). In denying this request, the Planning Commission made these findings: (1) it was reasonable to assume that the pedestrian/bicycle pathway could help alleviate traffic congestion in the central business district; and (2) the floodplain dedication was reasonably related to Dolan's proposed redevelopment because her project would be likely to increase storm water flow to an already strained drainage basin. The Tigard City Council approved the Planning Commission's action. So did the Land Use Board of Appeals, which rejected Dolan's argument that the conditions imposed by the city were a taking of her property. The Oregon Court of Appeals and the Supreme Court of Oregon each affirmed, concluding that the conditions were appropriately related to Dolan's proposed project. Dolan sought a writ of certiorari from the U.S. Supreme Court.

Rehnquist, Chief Justice We granted certiorari to resolve a question left open by our decision in *Nollan v. California Coastal Commission* (1987)[:] [W]hat is the required degree of connection between the exactions imposed by the city and the projected impacts of the proposed development[?]

The Takings Clause of the Fifth Amendment . . . provides: "[N]or shall private property be taken for public use, without just compensation." One of the principal purposes of the Takings Clause is "to bar Government from forcing some people alone to bear public burdens which, in all fairness and justice, should be borne by the public as a whole" (quoting *Armstrong v. United States* [1960]). Without question, had the city simply required [Dolan] to dedicate a strip of land along Fanno Creek for

public use, rather than conditioning the grant of her permit to redevelop her property on such a dedication, a taking would have occurred.

On the other side of the ledger, the authority of state and local governments to engage in land use planning has been sustained against constitutional challenge as long ago as our decision in *Euclid v. Ambler Realty Co.* (1926). A land use regulation does not effect a taking if it "substantially advance[s] legitimate state interests" and does not "den[y] an owner economically viable use of his land" (quoting *Agins v. Tiburon* [1980]). The . . . land use regulations discussed in the cases just cited, however, differ in two relevant particulars from the present case. First, they involved essentially legislative determinations classifying entire areas of the city, whereas here the city made an adjudicative decision to condition [Dolan's permit approval] on an individual parcel. Second, the conditions imposed were not simply a limitation on the use [Dolan] might make of her own parcel, but a requirement that she deed portions of the property to the city. In *Nollan,* we held that governmental authority to exact such a condition was circumscribed by the Fifth and Fourteenth Amendments.

[Dolan] contends that the city has forced her to choose between the building permit and her right . . . to just compensation for the public easements. [She] does not quarrel with the city's authority to exact some forms of dedications as a condition for the grant of a building permit, but challenges the showing made by the city to justify these exactions. In evaluating [Dolan's] claim, we must first determine whether [an] "essential nexus" exists between the "legitimate state interest" and the permit condition exacted by the city (quoting *Nollan*). If we find that a nexus exists, we must then decide the required degree of connection between the exactions and the projected impact of the proposed development. We were not required to reach this question in *Nollan,* because we concluded that the [required nexus between the permit condition and the government interest was not present].

[In *Nollan,* the] absence of a nexus left [the government] in the position of simply trying to obtain an easement through gimmickry, which converted a valid regulation of land use into [a taking]. No such gimmicks are associated with the permit conditions imposed by the city in this case. Undoubtedly, the prevention of flooding along Fanno Creek and the reduction of traffic in the Central Business District qualify as . . . legitimate public purposes. It seems equally obvious that a nexus exists between preventing flooding along Fanno Creek and limiting development within the creek's 100-year floodplain. [Dolan] proposes to double the size of her retail store and to pave her now-gravel parking lot, thereby expanding the impervious surface on the property and increasing the amount of stormwater run-off into Fanno Creek.

The same may be said for the city's attempt to reduce traffic congestion by providing for alternative means of transportation. In theory, a pedestrian/bicycle pathway provides a useful alternative means of transportation for workers and shoppers.

The second part of our analysis requires us to determine whether the degree of the exactions demanded by the city's permit conditions bear the required relationship to the projected impact of [Dolan's] proposed development. The question for us is whether th[e] findings [of the City Planning Commission when it denied Dolan's request for a variance] are constitutionally sufficient to justify the conditions imposed by the city. We think a term such as "rough proportionality" best encapsulates what we hold to be the [test required under] the Fifth Amendment [for the appropriate degree of connection between the required land dedication and the projected impact of the proposed development]. No precise mathematical calculation is required, but the city must make some sort of individualized determination that the required dedication is related both in nature and extent to the impact of the proposed development. We turn now to analysis of whether the [city's] findings . . . satisfied [the rough proportionality test].

It is axiomatic that increasing the amount of impervious surface will increase the quantity and rate of storm-water flow from [Dolan's] property. Therefore, keeping the floodplain open and free from development would likely confine the pressures on Fanno Creek created by [Dolan's] development. But the city demanded more—it not only wanted [Dolan] not to build in the floodplain, but it also wanted [her] property along Fanno Creek for its greenway system. The city has never said why a public greenway, as opposed to a private one, was required in the interest of flood control. The difference to [Dolan], of course, is the loss of her ability

to exclude others. [T]his right to exclude others is "one of the most essential sticks in the bundle of rights that are commonly characterized as property" (quoting *Kaiser Aetna v. United States* [1979]). It is difficult to see why recreational visitors trampling along petitioner's floodplain easement are sufficiently related to the city's legitimate interest in reducing flooding problems along Fanno Creek. [T]he city has not attempted to make any individualized determination to support this part of its request.

[T]he city wants to impose a permanent recreational easement upon [Dolan's] property that borders Fanno Creek. [Dolan] would lose all rights to regulate the time in which the public entered onto the greenway, regardless of any interference it might pose with her retail store. Her right to exclude would not be regulated, it would be eviscerated. If [Dolan's] proposed development had somehow encroached on existing greenway space in the city, it would have been reasonable to require [her] to provide some alternative greenway space for the public either on her property or elsewhere. But that is not the case here. We conclude that the findings upon which the city relies do not show the required reasonable relationship between the floodplain easement and [Dolan's] proposed new building.

With respect to the pedestrian/bicycle pathway, we have no doubt that the city was correct in finding that the large retail sales facility proposed by [Dolan] will increase traffic on the streets of the Central Business District. The city estimates that the proposed development would generate roughly 435 additional trips per day. Dedications for streets, sidewalks, and other public ways are generally reasonable exactions to avoid excessive congestion from a proposed property use. But on the record before us, the city has not met its burden of demonstrating that the additional number of vehicle and bicycle trips generated by [Dolan's] development reasonably relate to the city's requirement for a dedication of the pedestrian/bicycle easement. As Justice Peterson of the Supreme Court of Oregon explained in his dissenting opinion, "[t]he findings of fact that the bicycle pathway system '*could* offset some of the traffic demand' is a far cry from a finding that the bicycle pathway system *will,* or is *likely to,* offset some of the traffic demand." [Emphasis in original.] No precise mathematical calculation is required, but the city must make some effort to quantify its findings in support of the dedication for the pedestrian/bicycle pathway beyond the conclusory statement that it could offset some of the traffic demand generated.

The city's goals of reducing flooding hazards and traffic congestion, and providing for public greenways, are laudable, but there are outer limits as to how this may be done. "A strong public desire to improve the public condition [will not] warrant achieving the desire by a shorter cut than the constitutional way of paying for the change" (quoting *Pennsylvania Coal Co. v. Mahon* (1922).

Decision of Supreme Court of Oregon reversed, and case remanded for further proceedings.

Ethical and Public Policy Concerns

1. You read that a person may acquire title to another person's real property by adversely possessing that property for a certain period of time. What are some justifications for this doctrine?

2. As you read, restrictive covenants and zoning ordinances are sometimes relied upon by opponents of plans to place group homes for the retarded or disabled in certain residential neighborhoods. What are the major ethical considerations suggested by such uses of restrictive covenants and zoning ordinances? What are the major ethical considerations suggested by attempts to place group homes in certain locations despite arguably contrary language in restrictive covenants and zoning ordinances?

3. In recent years, the law has placed increasing duties on sellers of real property regarding the quality of their property, such as the implied warranty of habitability and a seller's duty to disclose hidden defects in property. Do these developments constitute steps in the right direction? Should the law go further and impose the implied warranty of habitability on all sellers, not just on builder-vendors and developers? Should it require disclosure of all defects, not just hidden ones?

Problems and Problem Cases

1. Norman Van Sickle moved his doublewide mobile home to a plot of land owned by Luella Jedlicka. Van Sickle had the real estate landscaped, a foundation poured, concrete blocks set, and steel girders aligned on the blocks. After removing the hitches and wheels from the mobile home, he had it set on and hooked to the foundation. Van Sickle did this even though an officer of a bank that held a security interest in the mobile home had informed him that the home would become the property of Jedlicka once it was attached to the foundation. Later, Van Sickle substantially modified his doublewide unit by welding it into a single unit, placing a roof over the entire structure, and joining the exterior with siding. As a result, the structure could not be disassembled without tearing it apart and could not be moved as one unit except by a house mover. Four years after the above events, Henry Edsel Ford purchased Jedlicka's land. The contract of sale provided that the real estate being sold included all "attached fixtures." Another five years later, one of Van Sickle's creditors, William Venard, attempted to collect a judgment against Van Sickle by judicially attaching the mobile home and executing against it. Ford then sued Venard, claiming that he (Ford) owned the mobile home. Ford requested an injunction to restrain Venard from executing against the mobile home. Should Ford win the case and obtain the requested injunction?

2. In 1957 or 1958, the Hibbards cleared their land of overgrowth and set up a trailer park. There was no obvious boundary between their land and that of their neighbor to the east, so the Hibbards cleared the land up to a deep drainage ditch. They also built a road for use in entering and leaving the trailer park. In 1960, the Hibbards' neighbor, McMurray, discovered through a survey that the Hibbards had encroached on his land (the eastern parcel) by 20 feet. He so informed the Hibbards. The western parcel later changed hands several times until the Sanderses bought it in 1976. The use of the western parcel changed little over the years. The road remained in continuous use in connection with the trailer park. The area between the road and the drainage ditch was also used by trailer park residents for parking, storage, garbage removal, and picnicking. Trailer personnel and tenants mowed grass up to the drainage ditch and planted flowers. The Sanderses installed underground wiring and surface power poles in the area between the road and the drainage ditch. In 1978, the Chaplins bought the eastern parcel. Shortly thereafter, they had a survey conducted. This survey revealed the Sanderses' encroachments. The Chaplins then sued to quiet title to the road and its shoulder (Parcel A) and the area between the road and the drainage ditch (Parcel B). With 10 years being the relevant possession period under state law, the Sanderses asserted that they owned Parcels A and B by virtue of adverse possession. Were the Sanderses correct?

3. The Wakes owned a tract of land. They used one part of the tract as a farm and the other part as a cattle ranch. Each spring and fall, the Wakes drove cattle from the ranch over an access road on the farm to Butler Springs, which was also located on the farm. From Butler Springs, they ranged the cattle eastward to adjacent government land, where they held grazing rights. In December 1956, the Wakes sold the farm portion of the land on contract to the Hesses. The contract of sale expressly reserved an easement for the Wakes to use the Butler Springs water and the right-of-way from Butler Springs across the property to the federal land. The contract described the Butler Springs area but did not describe the access road leading to Butler Springs from the county road. In 1963, the Hesses sold the farm to the Johnsons. These parties' contract referred to the Wakes' easement. The Wakes continued to use the access road and Butler Springs until 1964, when they sold their ranch and granted the Butler Springs easement to the purchasers. The ranch later changed hands several times, but each owner continued to use the access road and Butler Springs. In 1978, shortly after the Nelsons bought the ranch, the Johnsons sent them a letter "revoking permission" to use the access road. The Johnsons later placed locks on the gates across the access road. The Nelsons alleged that they had easement rights in the Butler Springs area and the access road leading to it. Were they correct?

4. Major developed a subdivision in which he built a number of houses and offered them for sale. The Rozells bought one of the houses. Upon the first rain, water entered under the crawl space of the house. Water then accumulated to a depth of 17 inches in a room where the furnace and water heater were located. This frequently caused the water heater not to work. Major's attempts to keep the water out were unsuccessful. Water continued to accumulate in the room whenever there was a rainfall of any consequence. As a result, the house was damp and had a peculiar odor. Mildew also

became a problem. Did the Rozells have a cause of action against Major? If so, what cause of action?

5. A restrictive covenant applicable to most lots in an industrial park was recorded in 1957. The restrictive covenant prohibited property improvements taller than 45 feet. It also forbade billboards and advertising signs except those identifying the name, business, and products of the person or firm occupying the property on which the billboards or signs appeared. In other words, billboards or signs promoting businesses located elsewhere (off-premises advertising) were prohibited. The City of Rolling Meadows acquired property in the industrial park in 1960. Shortly thereafter, approximately one-tenth of the park's 201 acres were condemned so that a new public highway, Route 53, could run through the park. National Advertising Company and Universal Outdoor, Inc., leased industrial park property during the 1980s and began constructing billboards on their leased property. They intended these billboards to be between 49 and 56 feet tall and available for advertising use by other businesses (i.e., for off-premises advertising). The City of Rolling Meadows learned of the restrictive covenant shortly after construction of the billboards began. The city then filed suit against National and Universal in an effort to enforce the restrictive covenant and halt the billboard construction. National and Universal argued, among other things, that the character of the industrial park area had changed substantially and that the restrictive covenant therefore should no longer be enforceable. As of the time of the litigation, Route 53 was a six-lane highway carrying approximately 100,000 to 150,000 cars per day through the industrial park. Was there a sufficient change in circumstances to justify a conclusion that the restrictive covenant was no longer enforceable?

6. In the 1950s, Francis and Adelaide Paradise subdivided a parcel of land and created a subdivision named Paradise Park Estates. Their recorded plat of the subdivision showed 34 lots, all but one of which were approximately one-half acre in size. That lot was the three-acre Lot 34. In 1957, the Paradises transferred their interests in Paradise Park Estates to a land trustee. The land trustee transferred Lots 24 and 34 back to the Paradises later that same year. The deeds used in these transfers did not list or refer to any restrictive covenants. Over roughly the next two years, the land trustee transferred numerous lots in the subdivision to the Paradises and to other parties. All but the first of these later transfers—a transfer of Lot 4 to the Paradises—were accomplished by deeds that contained a set of restrictive covenants. These covenants included a provision stating that no more than one structure could be built on any lot in Paradise Park Estates, and a provision stating that the covenants were to be enforceable by any and all lot owners of lots in the subdivision. In 1958, the Paradises sold Lot 34 to Edwin and Annette Oberto. The deed provided by the Paradises made no reference to restrictive covenants. The title report issued by a title insurance company did not list any restrictive covenants as encumbering Lot 34. At the same general time that the above transfers were taking place, the county recorder's office's "Public Index of Restrictions and Conditions" (an unofficial set of records kept in a looseleaf notebook) contained notations indicating that the restrictive covenants supposedly applied to all lots in Paradise Park Estates. In 1988, the Obertos contracted to sell Lot 34 to Michael Werchek, who planned to subdivide Lot 34 into three lots and to build a house on each of the resulting lots. Various owners of lots in Paradise Park Estates then sued Werchek and the Obertos, claiming that Werchek's plans for Lot 34 would violate the restrictive covenants referred to above. The plaintiffs therefore sought an injunction that would prohibit Werchek from carrying out these plans. Should the plaintiffs win the case?

7. Morton and Edna Davis entered into a contract to buy a house from Clarence and Dana Johnson for $310,000. The house was three years old. The contract required a $5,000 initial deposit payment and an additional $26,000 deposit payment within five days. After the Davises had paid the initial $5,000 deposit but before they had paid the $26,000 deposit, Mrs. Davis noticed some buckling and peeling plaster around the corner of a window frame, as well as stains on ceilings in several rooms. When Mrs. Davis inquired about this, Mr. Johnson told her that the window had had a minor problem which was corrected long ago and that the stains were wallpaper glue. The Davises then paid the remaining $26,000 deposit, and the Johnsons moved out of the house. Several days later, following a heavy rain, Mrs. Davis entered the house and discovered water gushing in from around the window frame, the ceiling of the family room, the light fixtures, the glass doors, and the stove in the kitchen. The Davises hired roofers, who reported that the roof was inherently defective and that any repairs would be temporary because the roof was "slipping." Only a new

roof, at a cost of $15,000, could be watertight. The Davises then filed this action alleging, among other things, fraud on the part of the Johnsons. The Davises sought rescission of the contract and return of their deposit payments. Did the Johnsons commit fraud?

8. Elliot and Davis owned property in Athens, Georgia, where the University of Georgia is located. Their property was in an area whose residential-purpose zoning allowed an unlimited number of related persons to occupy the same residence but no more than four unrelated persons to occupy the same residence. Elliott and Davis sought to sell their property to The Potter's House, an entity that planned to operate an alcohol and drug rehabilitation center on the property. This center would house 12 rehabilitation program participants (all unrelated persons) plus an employee of The Potter's House. The rehabilitation center therefore would not have complied with applicable zoning. The sale from Elliott and Davis to The Potter's House was conditional on the ability to obtain zoning changes to accommodate the rehabilitation center. After the City of Athens refused requests that the area's zoning be altered to accommodate the rehabilitation center, Elliott, Davis, and The Potter's House sued the city on the theory that the city's refusal to make a zoning accommodation violated the federal Fair Housing Act's provisions prohibiting discrimination on the basis of handicap. All parties to the case agreed that the rehabilitation center's inhabitants would be considered handicapped for purposes of the Fair Housing Act. The city argued, however, that it qualified for an exemption set forth in the Fair Housing Act for reasonable maximum occupancy restrictions imposed by local law. According to the city, its ordinance restricting the number of unrelated persons who could live together was designed to regulate the large university student population in Athens and to guard against extreme density-oriented problems in areas near the University of Georgia. Was the zoning ordinance a reasonable maximum occupancy restriction exempting the city from responsibility under the Fair Housing Act?

9. Mobile home owners commonly place their mobile homes on small plots of land (often called *pads*) they have leased in a mobile home park. In 1978, California enacted the Mobilehome Residency Law. This statute prohibited mobile home park owners from evicting mobile home owners from leased pads unless the mobile home owner defaulted on rental payments or violated park rules, or the park owner decided to change the property from a mobile home park to a different land use. The statute also prohibited the park owner from requiring that a mobile home be removed from a pad when the mobile home was sold to a responsible purchaser who wished to lease the same pad from the park owner. In the late 1980s, the City of Escondido enacted a mobile home rent control ordinance. This ordinance rolled back rents charged by park owners to their 1986 levels and required park owners to obtain City Council approval before raising rents. John and Irene Yee owned two mobile home parks in Escondido. They and other park owners (referred to here collectively as "the Yees") sued the city. The Yees alleged that Escondido's rent control ordinance, when viewed against the backdrop of California's Mobilehome Residency Law, amounted to a *physical taking* of their property without just compensation. Specifically, the Yees asserted that the rent control ordinance "had the effect of depriving the plaintiffs of all use and occupancy of [their] real property and granting to the tenants of mobilehomes . . . the right to physically permanently occupy and use the [plaintiffs'] real property." Were the Yees correct in arguing that the rent control ordinance's effect amounted to a *physical taking?*

10. Emma Yocum was married to James Yocum as of the time of her death in 1990. She and James had begun living together in March 1959. In July 1959, by way of a warranty deed that referred to them as "husband and wife," Emma and James took ownership of a home. She and James, however, were not yet married. Emma was still married to Joseph Perez, from whom she was divorced in April 1960. Emma and James were married in July 1960. When they acquired their home in 1959, James had provided the down payment. A mortgage executed by Emma and James at that time also referred to them as husband and wife even though they were not then married. After Emma's death in 1990, her children by her marriage to Joseph Perez filed suit in an effort to have the court determine present ownership of the home Emma and James had owned during her lifetime. Had Emma and James owned the home as *tenants in common* (meaning that Emma's interest in the property would pass to her estate, in which her children were entitled to share), or instead as either *tenants by the entirety or joint tenants* (meaning that James would then solely own the home by virtue of the right of survivorship)?

11. The Picillos maintained a chemical dump site on their land. The site was a trench roughly 200 feet long, 15 to 30 feet wide, and 15 to 20 feet deep. Pungent, varicolored liquid covered the bottom of the trench. More than 100 55-gallon drums and 5-gallon containers lay around the periphery of the trench. Some of the drums and containers were upright and sealed. Others were tipped; others were partially buried. Approximately 600 feet downhill from the site was a marshy wetland that drained into a river and several ponds. A witness who later testified at trial in a nuisance action brought against the Picillos stated that he saw the operator of a truck knock barrels marked "Combustible" off the truck's tailgate directly to the ground, and that chemicals then flowed from the barrels into the trench. Neighbors complained of sickening odors that forced them to remain inside their homes. State officials' attention was drawn to the site when an explosion erupted into flames in the trench, and the fire could not be extinguished. The state then began an investigation of the site. Edward Wood and other neighboring property owners brought a nuisance action against the Picillos. Was the chemical dump site a nuisance?

Chapter Twenty-five

Landlord and Tenant

Chapter Outline

I. Leases and Tenancies
- A. *Nature of Leases*
- B. *Types of Tenancies*
- C. *Execution of a Lease*

II. Rights, Duties, and Liabilities of the Landlord
- A. *Landlord's Rights*
  - 1. *Security Deposits*
- B. *Landlord's Duties*
  - 1. *Fair Housing Act*
  - 2. *Implied Warranty of Possession*
  - 3. *Implied Warranty of Quiet Enjoyment*
  - 4. *Constructive Eviction*
- C. *Landlord's Responsibility for Condition of Leased Property*
  - 1. *Implied Warranty of Habitability*
  - 2. *Remedies for Breach of Implied Warranty of Habitability*
  - 3. *Housing Codes*
  - 4. *Americans with Disabilities Act*
- D. *Landlord's Tort Liability*
  - 1. *Traditional No-Liability Rule*
  - 2. *Traditional Exceptions to No-Liability Rule*
  - 3. *Current Trends in Landlord's Tort Liability*
  - 4. *Landlord's Liability for Injuries Resulting from Others' Criminal Conduct*

III. Rights, Duties, and Liabilities of the Tenant
- A. *Rights of the Tenant*
- B. *Duty to Pay Rent*
- C. *Duty Not to Commit Waste*
- D. *Assignment and Subleasing*
  - 1. *Lease Provisions Limiting Assignment*
- E. *Tenant's Liability for Injuries to Third Persons*

IV. Termination of the Leasehold
- A. *Eviction*
- B. *Agreement to Surrender*
- C. *Abandonment*

Landlord–tenant law has undergone dramatic change during the past three decades, owing in large part to the changing nature of the relationship between landlords and tenants. In England and in early America, farms were the usual subjects of leases. The tenant sought to lease land on which to grow crops or graze cattle. Accordingly, traditional landlord–tenant law viewed the lease as primarily a conveyance of land and paid relatively little attention to its contractual aspects.

In today's society, however, the landlord–tenant relationship is typified by the lease of property for residential or commercial purposes. The tenant occupies only a small portion of the total property. He bargains primarily for the use of structures on the land rather than for the land itself. He is likely to have signed a landlord-provided form lease, the terms of which he may have had little or no opportunity to negotiate. In areas with a shortage of affordable housing, a residential tenant's ability to bargain for favorable lease provisions is further hampered. Because the typical landlord–tenant relationship can no longer fairly be characterized as one in which the parties have equal knowledge and bargaining power, it is not always realistic to presume that tenants are capable of negotiating to protect their own interests.

Although it was initially slow to recognize the changing nature of the landlord–tenant relationship, the law now tends to place greater emphasis than it

once did on the contract components of the relationship. As a result, modern contract doctrines such as unconscionability, constructive conditions, the duty to mitigate damages, and implied warranties are sometimes applied to leases. Such doctrines may operate to compensate for tenants' lack of bargaining power. In addition, state legislatures and city councils have enacted statutes and ordinances that increasingly regulate leased property and the landlord–tenant relationship.

This chapter's discussion of landlord–tenant law will focus on the nature of leasehold interests, the traditional rights and duties of landlords and tenants, and recent statutory and judicial developments affecting those rights and duties.

Leases and Tenancies

Nature of Leases

A **lease** is a contract under which an owner of property, the **landlord** (also called the *lessor*), conveys to the **tenant** (also called the *lessee*) the exclusive right to possess property for a period of time. The property interest conveyed to the tenant is called a **leasehold estate.**

Types of Tenancies

The duration of the tenant's possessory right depends upon the type of **tenancy** established by or resulting from the lease. There are four main types of tenancies.

1. *Tenancy for a term.* In a **tenancy for a term** (also called a *tenancy for years*), the landlord and tenant have agreed on a specific duration of the lease and have fixed the date on which the tenancy will terminate. For example, if Dudley, a college student, leases an apartment for the academic year ending May 25, 2001, a tenancy for a term will have been created. The tenant's right to possess the property ends on the date agreed upon without any further notice, unless the lease contains a provision permitting extension.

2. *Periodic tenancy.* A **periodic tenancy** is created when the parties agree that rent will be paid in regular successive intervals until notice to terminate is given, but do not agree on a specific lease duration. If the tenant pays rent monthly, the tenancy is from month to month; if the tenant pays yearly, as is sometimes done under agricultural leases, the tenancy is from year to year. (Periodic tenancies therefore are sometimes called *tenancies from month to month* or *tenancies from year to year.*) To terminate a periodic tenancy, either party must give advance notice to the other. The precise amount of notice required is often defined by state statutes. For example, to terminate a tenancy from month to month, most states require that the notice be given at least one month in advance.

3. *Tenancy at will.* A **tenancy at will** occurs when property is leased for an indefinite period of time and either party may choose to conclude the tenancy at any time. Generally, tenancies at will involve situations in which the tenant either does not pay rent or does not pay it at regular intervals. For example, Landon allows her friend Trumbull to live in the apartment over her garage. Although this tenancy's name indicates that it is terminable "at [the] will" of either party, most states require that the landlord give reasonable advance notice to the tenant before exercising the right to terminate the tenancy.

4. *Tenancy at sufferance.* A **tenancy at sufferance** occurs when a tenant remains in possession of the property (holds over) after a lease has expired. In this situation, the landlord has two options: (1) treating the holdover tenant as a trespasser and bringing an action to eject him; and (2) continuing to treat him as a tenant and collecting rent from him. Until the landlord makes her election, the tenant is a tenant at sufferance. Suppose that Templeton has leased an apartment for one year from Larson. At the end of the year, Templeton holds over and does not move out. Templeton is a tenant at sufferance. Larson may have him ejected or may continue treating him as a tenant. If Larson elects the latter alternative, a new tenancy is created. The new tenancy will be either a tenancy for a term or a periodic tenancy, depending on the facts of the case and any presumptions established by state law. Thus, a tenant who holds over for even a few days runs the risk of creating a new tenancy he might not want.

Execution of a Lease

As transfers of interests in land, leases may be covered by the statute of frauds. In most states, a lease for a term of more than one year from the date it is made is unenforceable unless it is evidenced by a suitable writing signed by the party to be charged. A few states, however, require leases to be evidenced by a writing only when they are for a term of more than three years.

Concept Review

Types of Tenancies

Type of Lease	Characteristics	Termination
Tenancy for a Term	Landlord and tenant agree on a specific duration of the lease and fix the date on which the tenancy will end	Ends automatically on the date agreed upon; no additional notice necessary
Periodic Tenancy	Landlord and tenant agree that tenant will pay rent at regular, successive intervals (e.g., month to month)	Either party may terminate by giving the amount of advance notice required by state law
Tenancy at Will	Landlord and tenant agree that tenant may possess property for an indefinite amount of time, with no agreement to pay rent at regular, successive intervals	May be terminated "at will" by either party, but state law requires advance notice
Tenancy at Sufferance	Tenant remains in possession after the termination of one of the leaseholds described above, until landlord brings ejectment action against tenant or collects rent from him	Landlord has choice of: 1. Treating tenant as a trespasser and bringing ejectment action against him, or 2. Accepting rent from tenant, thus creating a new leasehold

Good business practice demands that leases be carefully drafted to make clear the parties' respective rights and obligations. Care in drafting leases is especially important in cases of long-term and commercial leases. Lease provisions normally cover such essential matters as the term of the lease, the rent to be paid, the uses the tenant may make of the property, the circumstances under which the landlord may enter the property, the parties' respective obligations regarding the condition of the property, and the responsibility (as between landlord and tenant) for making repairs. In addition, leases often contain provisions allowing a possible extension of the term of the lease and purporting to limit the parties' rights to assign the lease or sublet the property. State or local law often regulates lease terms. For example, the Uniform Residential Landlord and Tenant Act (URLTA) has been enacted in a substantial minority of states. The URLTA prohibits the inclusion of certain lease provisions, such as a clause by which the tenant supposedly agrees to pay the landlord's attorney's fees in an action to enforce the lease. In states that have not enacted the URLTA, lease terms are likely to be regulated at least to a moderate degree by some combination of state statutes, common law principles, and local housing codes.

Rights, Duties, and Liabilities of the Landlord

Landlord's Rights

The landlord is entitled to receive the *agreed rent* for the term of the lease. Upon expiration of the lease, the landlord has the right to the *return of the property in as good a condition as it was when leased,* except for normal wear and tear and any destruction caused by an act of God.

Security Deposits Landlords commonly require tenants to make security deposits or advance payments of rent. Such deposits operate to protect the landlord's right to receive rent as well as her right to reversion of the property in good condition. In recent years, many cities and states have enacted statutes or ordinances

designed to prevent landlord abuse of security deposits. These laws typically limit the amount a landlord may demand and require that the security deposit be refundable, except for portions withheld by the landlord because of the tenant's nonpayment of rent or tenant-caused property damage beyond ordinary wear and tear. Some statutes or ordinances also require the landlord to place the funds in interest-bearing accounts when the lease is for more than a minimal period of time. As a general rule, these laws require landlords to provide tenants a written accounting regarding their security deposits and any portions being withheld. Such an accounting normally must be provided within a specified period of time (30 days, for example) after the termination of the lease. The landlord's failure to comply with statutes and ordinances regarding security deposits may cause the landlord to experience adverse consequences that vary state by state.

Landlord's Duties

Fair Housing Act As explained in Chapter 24, the Fair Housing Act prohibits housing discrimination on the basis of race, color, sex, religion, national origin, handicap, and familial status.[1] The Fair Housing Act prohibits discriminatory practices in various transactions affecting housing, including the rental of dwellings.[2] Included within the act's prohibited instances of discrimination against a protected person are refusals to rent property to such a person, discrimination against him or her in the terms, conditions, or privileges of rental, publication of any advertisement or statement indicating any preference, limitation, or discrimination operating to the disadvantage of a protected person, and representations that a dwelling is not available for rental to such a person when, in fact, it is available.

The act also makes it a discriminatory practice for a landlord to refuse to permit a tenant with a handicap to make—at his own expense—reasonable modifications to leased property. The landlord may, however, make this permission conditional on the tenant's agreement to restore the property to its previous condition upon termination of the lease, reasonable wear and tear excepted. In addition, landlords are prohibited from refusing to make reasonable accommodations in rules, policies, practices, or services if such accommodations are necessary to afford a handicapped tenant equal opportunity to use and enjoy the leased premises. When constructing certain types of multifamily housing for first occupancy, property owners and developers risk violating the act if they fail to make the housing accessible to persons with handicaps.

Because of a perceived increase in the frequency with which landlords refused to rent to families with children, the act prohibits landlords from excluding families with children. If, however, the dwelling falls within the act's "housing for older persons" exception, this prohibition does not apply.[3]

In *Walker v. Crigler,* which follows, the court demonstrates the importance of the public policy notions underlying the Fair Housing Act by holding that a property owner may be held liable for his agent's discriminatory actions even if the property owner has instructed the agent to comply with applicable antidiscrimination laws.

[1] Familial status is defined in Chapter 24.

[2] The act provides an exemption for certain persons who own and rent single-family houses. To qualify for this exemption, owners must not use a real estate broker or an illegal advertisement and cannot own more than three such houses at one time. It also exempts owners who rent rooms or units in dwellings in which they themselves reside, if those dwellings house no more than four families.

[3] The "housing for older persons" exception is described in Chapter 24.

Walker v. Crigler *976 F.2d 900 (4th Cir. 1992)*

Alleging that the following facts amounted to discrimination on the basis of sex in the rental of housing and that the Fair Housing Act was therefore violated, Darlene Walker filed suit against property owner Frank Whitesell and his property manager, Constance Crigler. Walker, a single mother of one son, worked in Falls Church, Virginia, and wished to rent an apartment there for herself and her son. In July 1989, Walker sought the assistance of the Town and Country Properties (TCP) firm. TCP agents showed Walker the Multiple Listing Service (MLS) listings of available rental properties in Falls Church. After reviewing these listings, Walker became interested in an apartment located at 124 Falls Avenue. Whitesell owned this property.

Crigler, a professional realtor, served as Whitesell's property manager for 124 Falls Avenue and other rental properties owned by Whitesell. Crigler's responsibilities included finding financially qualified tenants for Whitesell's properties.

The MLS listing for 124 Falls Avenue specified $600 per month as the rent and described the property as a two-bedroom apartment that was "ideal for two men." Walker decided that she wanted to rent the apartment because it was close to a school for her son and was accessible to public transportation facilities. A TCP agent testified at trial that when he told Crigler he intended to submit the rental application of a financially qualified single mother (Walker), Crigler stated that she would not rent to a female applicant under any circumstances. Another TCP agent contacted Crigler on Walker's behalf; Crigler reiterated her policy of not renting to women. Walker testified that when she personally telephoned Crigler regarding the apartment, Crigler stated essentially the same thing and added that in the past, boyfriends of single female tenants had caused problems. Roughly two months after these conversations took place, the 124 Falls Avenue apartment was rented to two men who paid a total monthly rent of $580—$20 per month less than what Walker had been willing to pay.

Crigler testified that she never told anyone she would not rent the apartment to a single woman. The evidence revealed that in January 1989 (approximately six months before Walker's unsuccessful attempt to rent the apartment), Whitesell's awareness of housing discrimination suits against landlords caused him to send Crigler a memorandum instructing her to comply with applicable antidiscrimination laws in screening possible tenants for his rental properties.

An instruction given by the trial judge to the jury stated that if the jury found Fair Housing Act violations on Crigler's part, Whitesell would also be liable if Crigler was Whitesell's agent and was acting within the scope of her employment at the time she engaged in discrimination. The jury returned a verdict in Walker's favor against Crigler for $5,000 in compensatory damages. The jury ruled in Whitesell's favor, however, on Walker's claim against him. The trial judge denied Walker's motions for judgment notwithstanding the verdict and for a new trial. Walker appealed.

Murnaghan, Circuit Judge The jury ruled in Whitesell's favor, holding, apparently, that Crigler [despite clearly being Whitesell's agent] was not acting in the scope of her employment when she denied Walker's attempts to rent the 124 Falls Avenue premises because Walker was a woman. The sole evidence to support the jury's conclusion that Whitesell was not liable for damages for the discrimination was the evidence indicating that Crigler was instructed not to refuse to rent on discriminatory grounds. In denying the motion for judgment notwithstanding the verdict, the trial judge concluded that the evidence of Whitesell's instruction was sufficient to support the jury's verdict. We find, however, that the court's conclusion is based on an erroneous theory of law. Since there is no unsettled question of fact to be submitted for decision by the jury, it is appropriate to reverse the judgment that Whitesell was not liable for compensatory damages and to direct entry of judgment against Whitesell in Walker's favor in the amount of $5,000.

The evidence is sufficient to support the conclusion that Whitesell specifically intended that Crigler not discriminate. In many cases involving issues other than housing discrimination, such a finding would refute the assertion that Crigler acted within the scope of employment and would concurrently shield Whitesell from any liability as principal. However, the arguable conclusion that Crigler acted outside the scope of employment is irrelevant in the present case, for Whitesell could not insulate himself from liability for sex discrimination in regard to living premises owned by him and managed for his benefit merely by relinquishing the responsibility for preventing such discrimination to another party. We adopt the general rule applied by other federal courts that the duty of a property owner not to discriminate in the leasing or sale of that property is nondelegable.

We are not unmindful of the arguable incongruity of applying liability to Whitesell and . . . similarly situated [property owners] who are apparently nonculpable in a housing discrimination instance but must still bear the burden of liability. The central question to be decided in a case such as this, however, is which innocent party—the owner whose agent acted contrary to his instruction, or the potential renter who felt the direct harm of the agent's dis-

criminatory failure to offer the residence for rental—will ultimately bear the burden of the harm caused. It is clear that the overriding societal priority of the provision of "fair housing throughout the United States" (clearly set out in the Fair Housing Act) indicates that the one innocent party with the power to control the acts of the agent—the owner of the property or other responsible superior—must act to compensate the injured party for the harm and to ensure that similar harm will not occur in the future.

It must not be overlooked that although the property owner's duty to prevent discrimination is nondelegable, the owner [usually] will not be subjected to liability for the full amount of all successful claims, [because] contribution from other liable parties may offset some or all of the payment for which the owner is responsible. [Although Crigler, in a separate legal proceeding, filed for bankruptcy and obtained a discharge of her judgment debt to Walker and any contribution-related obligation to Whitesell,] we may assume in the great majority of cases that real estate agents will not turn bankrupt or otherwise [become] judgment-proof. They will remain liable for damages flowing from flaunting a principal's intentions.

Just as we feel no qualms in holding a property owner responsible for paying property taxes, meeting health code safety requirements, or ensuring that other responsibilities to protect the public are met—and we refuse to allow the owner to avoid these responsibilities with an assertion that he conferred the duty to another—we must hold those who benefit from the sale and rental of property to the public to the specific mandates of antidiscrimination law if the goal of equal housing opportunity is to be reached. Whitesell, despite forbidding discrimination on the part of Crigler, cannot, under the Fair Housing Act, dispose of his duty to prevent sexual discrimination in the rental of 124 Falls Avenue, a property which he owned and which was operated for his benefit.

Judgment in favor of Whitesell reversed; trial court ordered to enter judgment in favor of Walker and against Whitesell for $5,000 in compensatory damages.

Implied Warranty of Possession Landlords have certain obligations that are imposed by law whenever property is leased. One of these obligations stems from the landlord's **implied warranty of possession.** This warranty guarantees the tenant's right to possess the property for the term of the lease. Suppose that Turner rents an apartment from Long for a term to begin on September 1, 2000, and to end on August 31, 2001. When Turner attempts to move in on September 1, 2000, she finds that Carlson, the previous tenant, is still in possession of the property. In this case, Long has breached the implied warranty of possession.

Implied Warranty of Quiet Enjoyment By leasing property, the landlord also makes an **implied warranty of quiet enjoyment** (or *covenant of quiet enjoyment*). This covenant guarantees that the tenant's possession will not be interfered with as a result of the landlord's act or omission. In the absence of a contrary provision in the lease or an emergency that threatens the property, the landlord may not enter the leased property during the term of the lease. If he does, he will be liable for trespass. In some cases, courts have held that the covenant of quiet enjoyment was violated when the landlord failed to stop third parties, such as trespassers or other tenants who make excessive noise, from interfering with the tenant's enjoyment of the leased premises.

Constructive Eviction The doctrine of **constructive eviction** may aid a tenant when property becomes unsuitable for the purposes for which it was leased because of the landlord's act or omission, such as the breach of a duty to repair or the covenant of quiet enjoyment. Under this doctrine, which applies both to residential and commercial property, the tenant may terminate the lease because she has effectively been evicted as a result of the poor condition or the objectionable circumstances there. Constructive eviction gives a tenant the right to vacate the property without further rent obligation if she does so *promptly* after giving the landlord reasonable notice and an opportunity to correct the problem. Because constructive eviction requires the tenant to vacate the leased premises, it is an unattractive option, however, for tenants who cannot afford to move or do not have a suitable alternative place to live.

Landlord's Responsibility for Condition of Leased Property

The common law historically held that landlords made no implied warranties regarding the *condition* or *quality* of leased premises. As an adjunct to the landlord's right to receive the leased property in good condition at the termination of the lease, the common law imposed on the *tenant* the duty to make repairs. Even when the lease contained a landlord's express warranty or express promise to make repairs, a tenant was not entitled to withhold rent if the landlord failed to carry out his obligations. This was because a fundamental contract performance principle—that a party is not obligated to perform if the other party fails to perform—was considered inapplicable to leases. In recent years, however, changing views of the landlord-tenant relationship have resulted in dramatically increased legal responsibility on the part of landlords for the condition of leased residential property.

Implied Warranty of Habitability The legal principle that landlords made no implied warranty regarding the condition of leased property arose during an era when tenants used land primarily for agricultural purposes. Buildings existing on the property were frequently of secondary importance. They also tended to be simple structures, lacking modern conveniences such as plumbing and wiring. These buildings were fairly easily inspected and repaired by the tenant, who was generally more self-sufficient than today's typical tenant. In view of the relative simplicity of the structures, landlord and tenant were considered to have equal knowledge of the property's condition upon commencement of the lease. Thus, a rule requiring the tenant to make repairs seemed reasonable.

The position of modern residential tenants differs greatly from that of an earlier era's agricultural tenants. The modern residential tenant bargains not for the use of the ground itself but for the use of a building (or portion thereof) as a dwelling. The structures on land today are complex, frequently involving systems (such as plumbing and electrical systems) to which the tenant does not have physical access. Besides decreasing the likelihood of perceiving defects during inspection, this complexity compounds the difficulty of making repairs—something at which today's tenant already tends to be less adept than his grandparents were. Moreover, placing a duty on tenants to negotiate for express warranties and duties to repair is no longer feasible. Residential leases are now routinely executed on standard forms provided by landlords.

For these reasons, statutes or judicial decisions in most states now impose an **implied warranty of habitability** on many landlords who lease residential property. According to the vast majority of cases, this warranty is applicable only to *residential* property, and not to property leased for commercial uses. The implied warranty of habitability's content in lease settings is basically the same as in the sale of real estate: the property must be safe and suitable for human habitation. In lease settings, however, the landlord not only must deliver a habitable dwelling at the beginning of the lease but also must *maintain* the property in a habitable condition during the term of the lease. Various statutes and judicial decisions provide that the warranty includes an obligation that the leased property comply with any applicable housing codes. In the *Johnson* case, which follows shortly, the Supreme Court of Indiana takes a conservative approach to the implied warranty of habitability by holding that it may sometimes arise in the residential lease setting. Courts in other states often give this implied warranty a broader effect by ruling that it applies to all or nearly all instances of residential leasing.

Remedies for Breach of Implied Warranty of Habitability From a tenant's point of view, the implied warranty of habitability is superior to constructive eviction because a tenant does not have to vacate the leased premises in order to seek a remedy for breach of the warranty. The particular remedies for breach of the implied warranty of habitability differ from state to state. Some of the remedies a tenant may pursue include:

1. *Action for damages.* The breach of the implied warranty of habitability violates the lease and renders the landlord liable for damages. The damages generally are measured by the diminished value of the leasehold. The landlord's breach of the implied warranty of habitability may also be asserted by the tenant as a counterclaim and defense in the landlord's action for eviction and/or nonpayment of rent.

2. *Termination of lease.* In extreme cases, the landlord's breach of the implied warranty of habitability may justify the tenant's termination of the lease. For this remedy to be appropriate, the landlord's breach must have been substantial enough to constitute a material breach.

3. *Rent abatement.* Some states permit rent abatement, a remedy under which the tenant withholds part of the rent for the period during which the landlord was in breach of the implied warranty of habitability. Where authorized by law, this approach allows the tenant to pay a reduced rent that reflects the *actual* value of the leasehold in its defective condition. There are different ways of computing this value. State law determines the amount by which the rent will be reduced.

4. *Repair-and-deduct.* A growing number of states have statutes permitting the tenant to have defects repaired and to deduct the repair costs from her rent. The repairs authorized in these statutes are usually limited to essential services such as electricity and plumbing. They also require that the tenant give the landlord notice of the defect and an adequate opportunity to make the repairs himself.

Housing Codes Many cities and states have enacted housing codes that impose duties on property owners with respect to the condition of leased property. Typical of these provisions is Section 2304 of the District of Columbia Housing Code, which provides: "No person shall rent or offer to rent any habitation or the furnishings thereof unless such habitation and its furnishings are in a clean, safe and sanitary condition, in repair and free from rodents or vermin." Such codes commonly call for the provision and maintenance of necessary services such as heat, water, and electricity, as well as suitable bathroom and kitchen facilities. Housing codes also tend to require that specified minimum space–per-tenant standards be met, that windows, doors, floors, and screens be kept in repair, that the property be painted and free of lead paint, that keys and locks meet certain specifications, and that the landlord issue written receipts for rent payments. A landlord's failure to comply with an applicable housing code may result in a fine or in liability for injuries resulting from the property's disrepair. The noncompliance may also result in the landlord's losing part or all of his claim to the agreed-upon rent. Some housing codes establish that tenants have the right to withhold rent until necessary repairs have been made and the right to move out in cases of particularly egregious violations of housing code requirements.

Johnson v. Scandia Associates, Inc. *717 N.E.2d 24 (Ind. Sup. Ct. 1999)*

Scandia Associates, Inc., owned an apartment complex in Indianapolis. Terri Johnson resided in one of the apartments. While cooking in her apartment, Johnson simultaneously touched the oven and the refrigerator and received a severe electric shock. She sustained physical injuries as a result. Alleging claims for negligence and breach of the implied warranty of habitability, Johnson sued Scandia. The trial court granted Scandia's motion to dismiss the implied warranty claim but allowed the negligence claim to go to the jury. The jury returned a verdict in favor of Scandia.

Johnson appealed the dismissal of her implied warranty of habitability claim. The Indiana Court of Appeals reversed, holding that an implied warranty of habitability exists in a residential lease if the landlord is a professional in the residential apartment business. The Court of Appeals further held that the implied warranty of habitability extends to claims for personal injuries caused by a hidden or concealed dangerous condition in the leased premises. Scandia appealed to the Supreme Court of Indiana.

Shepard, Chief Justice Some Indiana [lower-court] cases have recognized that a warranty of habitability may be implied in a residential lease, giving rise to damages for breach of contract upon appropriate proof. In this appeal, we recognize for the first time that such a warranty may be implied in some leases and explore the conditions under which it may be held to exist.

This Court first imported a warranty of habitability into conveyances of real property [in a 1972 decision] holding that a warranty of fitness for habitation may be implied in a builder-vendor's sale of a new house to the first purchaser. [In a decision four years later,] we extended the protection of the implied warranty to subsequent purchasers of the house, but limited [the warranty's] scope to latent or hidden defects.

Asked whether a warranty of habitability is implied in the residential leasehold contract, the Court of Appeals held in *Breezewood Management*

Co. v. Maltbie (Ind. App. 1980) that a landlord could be found liable to his tenant on a breach of implied warranty, at least where there was a housing code and city inspectors had cited the landlord with multiple violations. [The plaintiffs were awarded] damages based on the law of contract: the difference between the rents paid for the apartment as warranted and its fair rental value in the substandard condition, compensating the tenants for their economic loss.

Plainly, a warranty of habitability, whether in the sale or lease of residential dwellings, has developed in the common law of Indiana, and its roots are in the law of contract. Habitability means reasonably fit for occupation as a dwelling. Habitability is not the same as no risk of harm.

When a landlord enters a lease agreement with her tenant, she voluntarily confers certain rights upon the tenant, such as possession and quiet enjoyment for a specific term. She does this in consideration of the tenant's promise to pay rent, not to waste the property, not to use it for illegal purposes, and not to "hold over" beyond the term. The landlord agrees to this legal relationship after balancing the costs and benefits, and the same is true for the tenant.

Defining a warranty of habitability broadly as a tenant's right to be free from injury might have many effects. A broad definition might cause landlords to increase maintenance of properties, at least where doing so would still produce an economic return. It would undoubtedly prompt landlords to purchase additional insurance, spreading the risk of harm more broadly. Landlords would, of course, attempt to pass along increased insurance costs to tenants by raising rents. Increased leasing costs might also cause conversion of some properties from residential uses and outright abandonment of others. This would shrink the supply of affordable housing, which could have potentially adverse social effects and would, of course, be borne by society's poorest renters.

Potential negative outcomes also could flow from a warranty rule on injury—because high standards of upkeep could be discouraged by shifting the risk of liability, and thus economic incentive, from the landlord to the insurer. A contractual right could diminish a tenant's incentive to report or repair defects by eliminating the economic risk of contributory negligence. All of these outcomes would increase the risk of harm to tenants, residents, and guests.

In light of these considerations, we conclude that a warranty of habitability is best thought of along the lines of *Breezewood:* a landlord's promise to convey to a tenant an apartment suitable for living. Habitability is an objective factual determination which may be codified, but is not necessarily prescribed by a housing code. A community's adoption of a building or housing code is evidence of its conception of habitability standards for dwellings in that locale. These codes vary enormously in their prescriptions. Absent explicit statutory or regulatory language imposing on landlords the obligation to warrant a codified standard of habitability in a property rented as a residence, a housing code does not impose a warranty on the residential leasehold transaction.

Even though an implied warranty of habitability is not imposed by law on every residential lease contract, it may be implied in fact in the agreement between landlord and tenant. Contracts and covenants implied in fact arise from the course of dealing between the parties and may be evidenced by acts done in the course of performance or by ordinary practices in the trade. This seems the best way of viewing *Breezewood.* The warranty extended by the landlord was implied in fact from the parties' course of dealing, which included dealings related to the Bloomington Housing Code. [These dealings led to the landlord's stated but unfulfilled promise to take corrective action after the landlord was cited for housing code violations.] The Code thus provided evidence for determining that the landlord breached his promise.

Johnson does not identify any state or local law as the source of the warranty she pleads as implied in her contract. Moreover, she has not identified any facts demonstrating that a warranty of habitability was either express or implied-in-fact in the agreement.

When a landlord warrants his property to be suitable for living and then breaches that promise . . . , the tenant's remedy may take several forms, including conveyance of a suitable property, rescission and reformation of the agreement while the tenant retains possession, rescission of the contract, or damages at law. Consequential damages may be awarded in a breach of contract claim when the nonbreaching party's loss flows natu-

rally and probably from the breach and was contemplated by the parties when the contract was made. This . . . rule . . . generally limits consequential damages to reasonably foreseeable economic losses. Accordingly, recovery for personal injury on a contract claim is allowable only when the particular injury was within the parties' contemplation during contract formation. Thus, to claim consequential damages the tenant must show the parties intended to compensate for personal injury losses caused by the apartment's unfitness. The tenant may prove the promise to compensate personal injury by showing its expression as a contract term or by pointing out evidence showing it to be implied in the agreement.

Johnson complains that her apartment was not suitable for living because its fixtures unexpectedly released an electric current, and, second, that her injuries were foreseeably caused by the breaching condition. She does not allege whether the defect was present at the time of entry or arose after [she took] possession, nor does she have any contention about giving Scandia notice of the defect. Johnson says her leasehold contract is governed by a writing, so we look within the document to see if it extended her a warranty. Because the writing does not show that Scandia expressly warranted the apartment's habitability, Johnson's assertion can mean just one thing: [in Johnson's view,] Scandia impliedly warranted the habitability of Johnson's apartment. Johnson pleads no facts which, if true, tend to show that the agreement formed with Scandia gives a warranty of habitability. Her failure to plead a factual basis showing that Scandia . . . extended the warranty as part of her agreement results in a failure to state a valid claim that the warranty was breached. Moreover, because Johnson's claim is based on an implied warranty theory, the only way she could receive the relief she requests would be through consequential damages. Inasmuch as consequential damages for physical injury are not available on a claim for breach of an implied warranty of habitability, Johnson cannot state a claim entitling her to relief.

Indiana's common law of contract governing the landlord–tenant relationship has developed a warranty of habitability. The warranty is not universally imposed by law, but derives from the agreement between the tenant and the landlord and may be express or implied. The existence of an implied warranty may be proven through evidence of the parties' course of dealing or performance and by evidence of ordinary practices in the trade. Where the warranty is express, consequential damages for injury to the person may be available as a remedy. Where the warranty is implied-in-fact, however, consequential damages may not be awarded because personal injury is outside the parties' contemplation. Johnson's complaint does not aver facts tending to show that Scandia warranted the apartment's habitability or that her injury was reasonably foreseeable within a warranty of habitability.

Decision of Court of Appeals reversed; judgment in favor of Scandia granted.

Americans with Disabilities Act Landlords leasing property constituting a *place of public accommodation* (primarily commercial property as opposed to private residential property) must pay heed to Title III of the Americans with Disabilities Act. Under Title III, owners and possessors of real property that is a place of public accommodation may be expected to make reasonable accommodations, including physical modifications of the property, in order to allow disabled persons to have access to the property. Chapter 24 contains a detailed discussion of Title III's provisions.

Landlord's Tort Liability

Traditional No-Liability Rule There were two major effects of the traditional rule that a landlord had no legal responsibility for the condition of the leased property. The first effect—that the uninhabitability of the premises traditionally did not give a tenant the right to withhold rent, assert a defense to nonpayment, or terminate a lease—has already been discussed. The second effect was that landlords normally could not be held liable in tort for injuries suffered by tenants on leased property. This state of affairs stemmed from the

notion that the tenant had the ability and responsibility to inspect the property for defects before leasing it. By leasing the property, the tenant was presumed to take it as it was, with any existing defects. As to any defects that might arise during the term of the lease, the landlord's tort immunity was seen as justified by his lack of control over the leased property once he had surrendered it to the tenant.

Traditional Exceptions to No-Liability Rule

Even before the current era's protenant legal developments, however, courts created exceptions to the no-liability rule. In the following situations, landlords have traditionally owed the tenant (or an appropriate third party) a duty, the breach of which could constitute a tort:

1. *Duty to maintain common areas.* Landlords have a duty to use reasonable care to *maintain the common areas* (such as stairways, parking lots, and elevators) over which they retain control. If a tenant or a tenant's guest sustains injury as a result of the landlord's negligent maintenance of a common area, the landlord is liable.

2. *Duty to disclose hidden defects.* Landlords have the duty to disclose hidden defects about which they know, if the defects are not reasonably discoverable by the tenant. The landlord is liable if a tenant or appropriate third party suffers injury because of a hidden danger that was known to the landlord but went undisclosed.

3. *Duty to use reasonable care in performing repairs.* If a landlord repairs leased property, he must *exercise reasonable care in making the repairs.* The landlord may be liable for the consequences stemming from negligently performed repairs, even if he was not obligated to perform them.

4. *Duty to maintain property leased for admission to the public.* The landlord has a duty to suitably maintain property that is leased for *admission to the public.* A theater would be an example.

5. *Duty to maintain furnished dwellings.* The landlord who rents a *fully furnished dwelling* for a short time impliedly warrants that the premises are safe and habitable.

Except for the above circumstances, the landlord traditionally was not liable for injuries suffered by the tenant on leased property. Note that none of these exceptions would apply to one of the most common injury scenarios—when the tenant was injured by a defect in her own apartment and the defect resulted from the landlord's failure to repair, rather than from negligently performed repairs.

Current Trends in Landlord's Tort Liability

Today, there is a strong trend toward abolition of the traditional rule of landlord tort immunity. The proliferation of housing codes and the development of the implied warranty of habitability have persuaded a sizable number of courts to impose on landlords the duty to use *reasonable care* in their maintenance of the leased property. As discussed earlier, a landlord's duty to keep the property in repair may be based on an express clause in the lease, the implied warranty of habitability, or provisions of a housing code or statute. The landlord now may be liable if injury results from her negligent failure to carry out her duty to make repairs. As a general rule, a landlord will not be liable unless she had *notice* of the defect and a reasonable opportunity to make repairs.

The duty of care landlords owe tenants has been held to include the duty to take reasonable steps to protect tenants from substantial risks of harm created by other tenants. Courts have held landlords liable for tenants' injuries resulting from dangerous conditions (such as vicious animals) maintained by other tenants when the landlord knew or had reason to know of the danger.

It is not unusual for landlords to attempt to insulate themselves from negligence liability to tenants by including an *exculpatory clause* in the standard form leases they expect tenants to sign. An exculpatory clause purports to relieve the landlord from legal responsibility that the landlord could otherwise face (on negligence or other grounds) in certain instances of premises-related injuries suffered by tenants. In recent years, a number of state legislatures and courts have frowned upon exculpatory clauses when they are included in leases of residential property. There has been an increasing judicial tendency to limit the effect of exculpatory clauses or declare them unenforceable on public policy grounds when they appear in residential leases.

Landlord's Liability for Injuries Resulting from Others' Criminal Conduct Another aspect of the trend toward increasing landlords' legal accountability is that many courts have imposed on landlords the duty to take reasonable steps to protect tenants and others on their property from foreseeable criminal conduct.[4] Although landlords are not insurers of the safety of persons on their property, an increasing number of courts have found them liable for injuries

[4]Chapter 24 contains a more extensive discussion of courts' recent inclination to impose this duty on owners and possessors of property.

sustained by individuals who were criminally attacked on the landlord's property if the attack was facilitated by the landlord's failure to comply with housing codes or maintain reasonable security. This liability has been imposed on residential and commercial landlords (such as shopping mall owners). Some courts have held that the implied warranty of habitability includes the obligation to provide reasonable security. In most states that have imposed this type of liability, however, principles of negligence or negligence per se furnish the controlling rationale.[5] The *Erichsen* case, which follows, applies negligence principles in this fashion.

[5]The law of negligence is covered in detail in Chapter 7.

Erichsen v. No-Frills Supermarkets of Omaha, Inc.

518 N.W. 2d 116 (Neb. Sup. Ct. 1994)

No-Frills Supermarkets of Omaha, Inc., operated a supermarket at a shopping center location leased from the center's owner, Harold Cooperman. Janice Erichsen had been shopping at this supermarket and was returning to her car, which was parked in the store's parking lot. Before Erichsen reached her car, she was robbed and beaten by an assailant. In the course of the attack, Erichsen, who was outside the assailant's vehicle, became entangled in the vehicle's safety belt. She was then dragged on the pavement for 1.6 miles. She sustained serious injuries as a result.

Erichsen sued No-Frills and Cooperman, alleging that they had negligently failed to warn her or take other reasonable steps to protect her against allegedly foreseeable criminal activities. Erichsen alleged that on at least 10 occasions within a 16-month period prior to the attack on her, similar crimes, including theft, purse-snatching, and robbery, had been committed in the No-Frills parking lot or in immediately surrounding areas. Erichsen also contended that No-Frills and Cooperman had a duty to foresee the type of criminal activity to which she fell victim and to take appropriate steps to guard against such harm. The district court sustained the demurrer of No-Frills and Cooperman, holding that they did not owe Erichsen a duty of reasonable care. Erichsen appealed.

Lanphier, Justice For actionable negligence to exist, there must be a legal duty on the part of the defendant to [use reasonable care to] protect the plaintiff from injury, a failure to discharge that duty, and damage proximately resulting from such undischarged duty. A duty . . . may be defined as an obligation, to which the law will give recognition and effect, to conform to a particular standard of conduct toward another. Foreseeability is a factor in establishing a defendant's duty.

We have . . . held that a landlord is under a duty to exercise reasonable care to protect his patrons. Such care may require giving a warning or providing greater protection where there is a *likelihood* that third persons will endanger the safety of the visitors. We have applied these principles in several cases. In *Harvey v. Van Aelstyn* (1982), we held that no liability attached to the owner of a bar where [the plaintiff], a patron, was assaulted by a third party while in the bar. The assailant had not been present in the bar, but . . . entered the bar suddenly, went straight for [the plaintiff], and struck him. The assailant had been violent in the establishment on *one* prior occasion a year or more prior to the incident at issue. We stated that the possessor of the premises was not bound to anticipate the unforeseeable independent acts of third persons, nor did she have a duty to take precautionary measures to protect against such acts, because those acts could not reasonably be anticipated.

[An earlier] case, *Hughes v. Coniglio* (1946), denied recovery against a restaurant owner where a patron suffered injuries from an assault by another patron. This court noted that there was no history of any fights in the establishment and that the assault occurred suddenly and unexpectedly where no precautionary measures would have prevented the assault. In *C.S. v. Sophir* (1985), the plaintiff, a tenant in the defendant landlord's apartment complex, was sexually assaulted. There had been one prior assault in the complex. We held that it would be unfair to impose liability upon a landlord based on a *single* prior assault at the complex.

The most recent case involving landlord liability for the acts of third persons is *K.S.R. v. Novak & Sons, Inc.* (1987). In *K.S.R.,* [the plaintiff] was sexually assaulted in the apartment complex owned by [the defendant]. The assailant had been seen by the building manager several times near the complex

exhibiting inappropriate sexual behavior in public. In *K.S.R.,* we held that unlike *Sophir,* there was a history of criminal activity on the premises, and therefore the assault perpetrated against [the plaintiff] was foreseeable. [We concluded] that liability could be imposed against a landlord for reasonably foreseeable criminal acts of third parties.

This court has denied relief where the [plaintiff] based his or her allegations of negligence on a single act of violence. However, as *K.S.R.* demonstrates, a duty to undertake reasonable precautionary measures will be imposed on the landlord when there is a sufficient amount of criminal activity to make further criminal acts reasonably foreseeable. The trial court was in error in determining that the prior criminal activity must all involve the same suspect to make further criminal acts reasonably foreseeable. Under our standard of review, the allegation of many occasions of "similar" criminal activity in one fairly contiguous area in a limited timespan may make further such acts sufficiently foreseeable to create a duty to a business invitee.

[By referring in her petition to at least 10 instances of criminal activity at or near the No-Frills parking lot, Erichsen has alleged facts that] are legally sufficient to support [her] assertion that [No-Frills and Cooperman] owed her a duty of reasonable care which they breached. Although [Erichsen] concedes that not all of the criminal activities took place in the No-Frills parking lot, she did allege that at least some of the incidents of criminal activity, including a purse-snatching, actually took place on the area of the parking lot assigned to No-Frills. Criminal acts that occur near the premises in question give notice of the risk that crime may travel to the premises of the business owner. Accordingly, the district court erred in sustaining the demurrer.

District court decision reversed and case remanded for further proceedings.

Rights, Duties, and Liabilities of the Tenant

Rights of the Tenant

The tenant has the right to *exclusive possession* and *quiet enjoyment* of the property during the term of the lease. The landlord is not entitled to enter the leased property without the tenant's consent, unless an emergency threatens the property or the landlord is acting under an express lease provision giving her the right to enter. The tenant may use the leased premises for any lawful purpose that is reasonable and appropriate, unless the purpose for which it may be used is expressly limited in the lease. Furthermore, the tenant has both the right to receive leased residential property in a habitable condition at the beginning of the lease and the right to have the property maintained in a habitable condition for the duration of the lease.

Duty to Pay Rent

The tenant, of course, has the duty to pay rent in the agreed amount and at the agreed times. If two or more persons are cotenants, their liability under the lease is *joint and several.* This means that each cotenant has complete responsibility—not just partial responsibility—for performing the tenants' duties under the lease. For example, Alberts and Baker rent an apartment from Caldwell, with both Alberts and Baker signing a one-year lease. If Alberts moves out after three months, Caldwell may hold Baker responsible for the entire rent, not just half of it. Naturally, Alberts remains liable on the lease— as well as to Baker under any rent-sharing agreement the two of them had—but Caldwell is free to proceed against Baker solely if Caldwell so chooses.

Duty Not to Commit Waste

The tenant also has the duty not to commit **waste** on the property. This means that the tenant is responsible for the routine care and upkeep of the property and that he has the duty not to commit any act that would harm the property. In the past, fulfillment of this duty required that the tenant perform necessary repairs. Today, the duty to make repairs has generally been shifted to the landlord by court ruling, statute, or lease provision. The tenant now has no duty to make major repairs unless the relevant damage was caused by his own negligence. When damage exists through no fault of the tenant and the tenant therefore is not obligated to make the actual repairs, the tenant nonetheless has the duty to take reasonable interim steps to prevent further

damage from the elements. This duty would include, but not necessarily be limited to, informing the landlord of the problem. The duty would be triggered, for instance, when a window breaks or the roof leaks.

Assignment and Subleasing

As with rights and duties under most other types of contracts, the rights and duties under a lease may generally be assigned and delegated to third parties. **Assignment** occurs when the landlord or the tenant transfers all of her remaining rights under the lease to another person. For example, a landlord may sell an apartment building and assign the relevant leases to the buyer, who will then become the new landlord. A tenant may assign the remainder of her lease to someone else, who then acquires whatever rights the original tenant had under the lease (including, of course, the right to exclusive possession of the leased premises).

Subleasing occurs when the tenant transfers to another person some, but not all, of his remaining right to possess the property. The relationship of tenant to sublessee then becomes one of landlord and tenant. For example, Dorfman, a college student whose 18-month lease on an apartment is to terminate on December 31, 2001, sublets his apartment to Wembley for the summer months of 2001. This is a sublease rather than an assignment, because Dorfman has not transferred all of his remaining rights under the lease.

The significance of the assignment–sublease distinction is that an assignee acquires rights and duties under the lease between the landlord and the original tenant, but a sublessee does not. An assignee steps into the shoes of the original tenant and acquires any rights she had under the lease.[6] For example, if the lease contained an option to renew, the assignee would have the right to exercise this option. The assignee, of course, becomes personally liable to the landlord for the payment of rent.

Under both an assignment and a sublease, the original tenant remains liable to the landlord for the commitments made in the lease. If the assignee or sublessee fails to pay rent, for example, the tenant has the legal obligation to pay it. Figure 1 compares the characteristics of assignments and subleases.

Figure 1 *Comparison of Assignment and Sublease*

	Assignment	Sublease
Does the tenant transfer to the third party *all* his remaining rights under the lease?	Yes	No
Does the tenant remain liable on the lease?	Yes	Yes
Does the third party (assignee or sublessee) acquire rights and duties under the tenant's lease with the landlord?	Yes	No

Lease Provisions Limiting Assignment Leases commonly contain limitations on assignment and subleasing. This is especially true of commercial leases. Such provisions typically require the landlord's consent to any assignment or sublease, or purport to prohibit such a transfer of the tenant's interests. Provisions requiring the landlord's consent are upheld by the courts, although some courts hold that the landlord cannot withhold consent unreasonably. Total prohibitions against assignment may be enforced as well, but they are disfavored in the law. Courts usually construe them narrowly, resolving ambiguities against the landlord.

[6]Assignment is discussed in detail in Chapter 17.

Tenant's Liability for Injuries to Third Persons

The tenant is normally liable to persons who suffer harm while on the portion of the property over which the tenant has control, *if the injuries resulted from the tenant's negligence.*

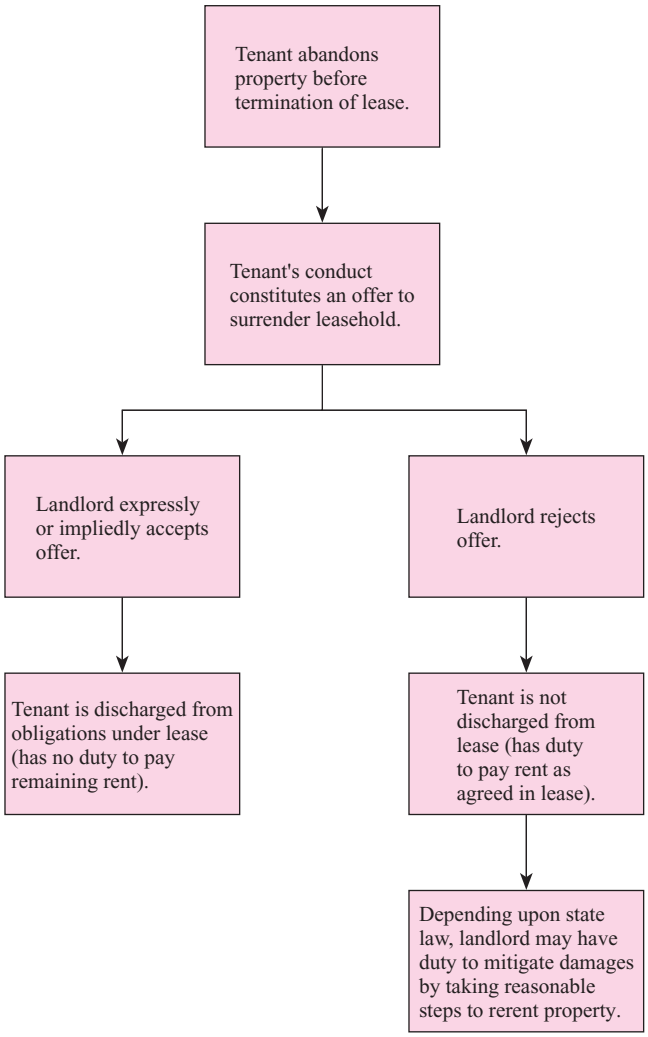
Termination of the Leasehold

A leasehold typically terminates because the lease term has expired. Sometimes, however, the lease is terminated early because of a party's material breach of the lease or because of mutual agreement.

Eviction

If a tenant breaches the lease (most commonly, by nonpayment of rent), the landlord may take action to **evict** the tenant. State statutes usually establish a relatively

speedy eviction procedure. The landlord who desires to evict a tenant must be careful to comply with any applicable state or city regulations governing evictions. These regulations usually forbid self-help measures on the landlord's part, such as forcible entry to change locks. At common law, a landlord had a lien on the tenant's personal property. The landlord therefore could remove and hold such property as security for the rent obligation. This lien has been abolished in many states. Where the lien still exists, it is subject to constitutional limitations requiring that the tenant be given notice of the lien, as well as an opportunity to defend and protect his belongings before they can be sold to satisfy the rent obligation.



Agreement to Surrender

A lease may terminate prematurely by mutual agreement between landlord and tenant to **surrender** the lease (i.e., return the property to the landlord prior to the end of the lease). A valid surrender discharges the tenant from further liability under the lease.

Abandonment

Abandonment occurs when the tenant unjustifiably and permanently vacates the leased premises before the end of the lease term, and defaults in the payment of rent. If a tenant abandons the leased property, he is making an offer to surrender the leasehold. As shown in Figure 2,

Figure 2 *Termination of a Leasehold by Abandonment*

the landlord must make a decision at this point. If the landlord's conduct shows acceptance of the tenant's offer of surrender, the tenant is relieved of the obligation to pay rent for the remaining period of the lease. If the landlord does not accept the surrender, she may sue the tenant for the rent due until such time as she rents the property to someone else, or, if she cannot find a new tenant, for the rent due for the remainder of the term.

At common law, the landlord had no obligation to mitigate (decrease) the damages caused by the abandonment by attempting to rent the leased property to a new tenant. In fact, taking possession of the property for the purpose of trying to rent it to someone else was a risky move for the landlord—her retaking of possession might be construed as acceptance of the surrender. As the *Stonehedge* case illustrates, some states still adhere to the rule that the nonbreaching landlord has no duty to mitigate damages. Many states, however, now place the duty on the landlord to attempt to mitigate damages by making a reasonable effort to rerent the property. These states also hold that the landlord's retaking of possession for the purpose of rerenting does not constitute a waiver of her right to pursue an action to collect unpaid rent.

Stonehedge Square Limited Partnership v. Movie Merchants, Inc.

715 A.2d 1082 (Pa. Sup. Ct. 1998)

Stonehedge Square Limited Partnership owned a shopping center in Carlisle, Pennsylvania. Stonehedge leased space in the shopping center to General Video Corporation under a five-year lease that was to expire on July 6, 1995. In July 1992, General Video assigned its rights, duties, and liabilities under the lease to Movie Merchants, Inc., which operated a video rental store on the premises from July 1992 until late October 1994. In August 1994, Movie Merchants discussed with Stonehedge the possibility of terminating the lease prior to expiration of its remaining term. Stonehedge listed the premises for rent but was unable to find a tenant. Stonehedge informed Movie Merchants that until another tenant could be secured, Movie Merchants would remain liable on the lease.

Near the end of October 1994, Movie Merchants vacated the premises and failed to pay any rent thereafter. Relying on an acceleration clause in the lease (a clause triggered by Movie Merchants' having left the premises and defaulted on the rent obligation), Stonehedge then sued for the amount of the rent due from November 1, 1994 to July 5, 1995. In a bench trial, the court granted judgment in favor of Stonehedge in the amount of $46,797.09, plus interest. When Movie Merchants requested a new trial, the court reversed itself and held that Stonehedge had a duty to mitigate damages by seeking a replacement tenant for the remainder of the lease term. The court ordered a new trial on the damages issue. Stonehedge appealed to the Superior Court of Pennsylvania, which held that Stonehedge had no duty to mitigate damages. The Superior Court therefore reversed the order for a new trial and reinstated the original judgment in favor of Stonehedge. Movie Merchants then appealed to the Supreme Court of Pennsylvania.

Flaherty, Chief Justice The issue in this case is whether the landlord in a commercial lease is required to mitigate its damages when its tenant has breached the lease agreement by moving out before the end of the lease term.

[I]n modern landlord–tenant law, leases have a dual nature, both as conveyances of protected property interests and also as contracts. Because of . . . historical background in which leases are sometimes viewed as conveyances and sometimes as contracts, problems in leases may be resolved either by principles of property law or by principles of contract law.

At common law, the mitigation of damages in a lease was regarded as being controlled by property law. Because the lease was a conveyance of real property, the tenant owned a non-freehold estate, and the landlord had no duty to mitigate damages arising from the tenant's breach of the lease. It was of no concern to the landlord whether the tenant chose to occupy the property or not. This was so in spite of the fact that it is a general principle of contract law that the nonbreaching party to a contract has the duty to reduce his damages, if he can reasonably do so. Nonetheless, Pennsylvania has followed the common law view that a nonbreaching landlord has no

duty to mitigate damages where the tenant has abandoned the property in breach of the lease.

In 1882 this court held that "if the relation of landlord and tenant was not ended by contract, [the landlord] was not bound to rent to another during the term for relief of the [tenant]." *Miller v. Becker* (Pa. Sup. Ct. 1880). Two years later, . . . this court held that "[t]he landlord may allow the property to stand idle, and hold the tenant for the entire rent; or [the landlord] may lease it and hold [the tenant] for the difference, if any." *Auer v. Penn* (Pa. Sup. Ct. 1882). And in 1928 this court [reaffirmed the rule stated in the earlier cases].

The issue becomes, then, whether we should now modify the rule of these cases. Movie Merchants argues that a lease is in the nature of a contract and is controlled by principles of contract law. Further, it argues that the common law rule leads to unfair results, encourages waste, imposes penalties, and fosters bad public policy. Movie Merchants argues that although leases traditionally have been regarded as conveyances of land, modern leases are an exchange of promises, and contract law has long recognized the duty of a nonbreaching party to mitigate damages.

Stonehedge . . . argues that the Pennsylvania rule should continue in effect because precedent requires it, because to require the landlord to mitigate damages would reward the breaching tenant for his breach, and because the requirement of mitigation would place an onerous burden on the breaching landlord, denying him the benefit of his bargain.

For the following reasons, we now hold that a nonbreaching landlord whose tenant has abandoned the property in violation of the lease has no duty to mitigate damages. First, this rule is firmly established in Pennsylvania. As the *Auer* court stated: "Nothing is better settled in Pennsylvania than that a tenant for years cannot relieve himself from his liability under his covenant to pay rent by vacating the demised premises during the term, and sending the key to his landlord." Leases have been drafted and bargained for in reliance on this rule. Business decisions and structured financial arrangements have been made with the expectation that this rule, which has been the law, will continue to be the law.

Second, the established rule has the virtue of simplicity. If the landlord is required to relet the premises, there is unlimited potential for litigation initiated by the tenant concerning the landlord's due diligence . . . and countless other questions in which the breaching tenant is permitted to mount an assault on whatever the landlord did to mitigate damages, alleging that it was somehow deficient. This potential for complexity, expense, and delay is unwelcome and would adversely affect the existing schema utilized to finance commercial development. Third, [Pennsylvania's] Landlord and Tenant Act of 1951, which is a comprehensive [statutory] scheme . . ., does not [indicate that the landlord must mitigate damages, and thus does not depart from the no-duty-to-mitigate rule] established in our cases.

Fourth, there is a fundamental unfairness in allowing the breaching tenant to require the nonbreaching landlord to mitigate the damages caused by the tenant. This unfairness takes the form of depriving the landlord of the benefit of his bargain, forcing the landlord to expend time, energy, and money to respond to the tenant's breach, and putting the landlord at risk of further expense of lawsuits and counterclaims in a matter which he justifiably assumed was closed.

Fifth, in this case, the tenant was in a position to mitigate his own damages. The lease [allowed the tenant to provide] the landlord with a sublessee and the landlord had a duty not to unreasonably withhold consent. It seems self-evident that in choosing between requiring the nonbreaching party [or] the breaching party to mitigate damages, the requirement, if any, should be placed on the breaching party, as it has been for centuries.

Superior Court decision affirmed.

Ethical and Public Policy Concerns

1. Suppose you own an older house and have rented it to a family with three young children. A state statute forbids painting new property with lead-based paint, but it does not forbid renting older property previously painted with lead-based paint. Should you disclose the lead-based paint to your tenants? Would current landlord–tenant law require you to do so?

2. As discussed earlier, the implied warranty of habitability guarantees that leased residential property will be fit for human habitation and that the landlord will

take the actions necessary to keep it in this condition during the term of the lease. Should this warranty be applied to landlords who are not in the business of leasing property but make occasional rentals? Should it apply to obviously rundown housing leased at very low rents?

3. When two or more persons lease property together, they are jointly and severally liable on the lease. This means that any one of them could be held liable to the landlord for 100 percent of the rent or damages. Is it ethical for one tenant to abandon leased property and leave his fellow cotenants with this liability?

Problems and Problem Cases

1. Mary Ajayi and Wemi Alakija were tenants in an apartment complex managed for the landlord by Lloyd Management, Inc. Neighboring tenants complained on various occasions to Lloyd about repeated disturbances that continued late into the night and included yelling and loud noises coming from the apartment shared by Ajayi and Alakija. The sounds of running could also be heard during these disturbances. Neighbors whose apartment walls adjoined those of the Ajayi-Alakija apartment also complained that items were knocked off their walls as a result of banging and jarring coming from the Ajayi-Alakija apartment. Do Lloyd and the landlord have any obligation to take responsive action? If so, why? What course(s) of action might they pursue?

2. Dan Maltbie and John Burke, students at Indiana University, resided in an apartment in an older house in Bloomington, Indiana. The agreed rent was $235 per month. When Maltbie and Burke moved in, they discovered numerous defects: rotting porch floorboards, broken and loose windows, an inoperable front door lock, leaks in the plumbing, a back door that would not close, a missing bathroom door, inadequate water pressure, falling plaster, exposed wiring over the bathtub, and a malfunctioning toilet. Later, they discovered more leaks in the plumbing, a leaking roof, the absence of heat and hot water, cockroach infestation, and pigeons in the attic. The City of Bloomington had a housing code in effect at that time. Code enforcement officers inspected the apartment and found over 50 violations, 11 of which were "life-safety" violations (defined as conditions that might be severely "hazardous to health of the occupant"). These conditions remained largely uncorrected after notice by the code officers and further complaints by Maltbie and Burke. Maltbie vacated the apartment before the one-year lease term expired, notified the landlord, and refused to pay any further rent. The landlord agreed to let Burke remain and pay $112.50 per month. The landlord then filed suit against Maltbie and Burke for $610.75, which was the balance due under the written rental contract plus certain charges. Maltbie and Burke filed counterclaims, seeking damages and abatement of the rent for breach of the implied warranty of habitability. Should the landlord win the case, or should Maltbie and Burke?

3. In order to rent an apartment in a building owned by Tobe McKenzie and McKenzie Development Corporation (MDC), Linda Crawford was required to sign a standard form lease provided by McKenzie and MDC. This lease contained an exculpatory clause stating that McKenzie and MDC "shall not be liable" to Crawford "for any injury to [Crawford's] person or loss of or damage to property for any cause." Two months after Crawford rented the apartment, which was located on the building's second floor, a fire broke out in the first-floor apartment of Debra and Larry Buckner. The fire spread to Crawford's apartment and blocked Crawford from escaping through the front—and only—door of her apartment. To escape the fire, Crawford jumped from a second-story window. When she landed, she sustained numerous injuries, partly due to debris that had accumulated on the ground behind the building. Crawford filed a negligence action against the Buckners, McKenzie, and MDC. McKenzie and MDC argued that the exculpatory clause in the lease barred her negligence claim against them. Should the exculpatory clause be given effect?

4. Kridel entered into a lease with Sommer, owner of the Pierre Apartments, to lease apartment 6-L for two years. Kridel, who was to be married in June, planned to move into the apartment in May. His parents and future parents-in-law had agreed to assume responsibility for the rent, because Kridel was a full-time student who had no funds of his own. Shortly before Kridel was to have moved in, his engagement was broken. He wrote Sommer a letter explaining his situation and stating that he could not take the apartment. Sommer did not answer the letter. When another party inquired about renting apartment 6-L, the person in charge told her that the apartment was already rented to Kridel. Sommer did not enter the apartment or show it to anyone until he rented apartment 6-L to someone else when there were approximately eight months left on

Kridel's lease. He sued Kridel for the full rent for the period of approximately 16 months before the new tenant's lease took effect. Kridel argued that Sommer should not be able to collect rent for the first 16 months of the lease because he did not take reasonable steps to rerent the apartment. Was Sommer entitled to collect the rent he sought?

5. Brock, the administrator of Jackson's estate, sued Levie and Watts Realty in a wrongful death action. Prior to her death, Jackson lived in a Birmingham, Alabama, apartment building owned by Levie. Watts Realty had leased the apartment to Jackson. In her complaint, Brock alleged that Jackson had twice asked the defendants to repair the locks on the back door of Jackson's apartment, but that the defendants had failed to respond. After Jackson made these requests, she notified the police that a prowler was at the "back part" of the apartment. When the police came to the apartment to investigate, they discovered that Jackson had been fatally stabbed. Brock's complaint alleged that Jackson's murderer acquired access to the apartment because of the broken locks on the back door, and that Levie and Watts Realty should be held liable because they violated two Birmingham ordinances in failing to maintain the locks. These ordinances required locks on exterior doors and specified that the locks must be kept "in sound working condition and good repair." Apparently concluding as a matter of law that Levie and Watts Realty could not be held liable for Jackson's death at the hand of a murderer, the trial judge granted summary judgment in favor of Levie and Watts Realty. Was the trial judge correct in doing so?

6. Miguel Muniz, a nine-year-old boy, was permanently blinded when he was shot in the head while passing in front of a building owned by Lefran Realty. The bullet that struck Miguel was shot from inside Lefran Realty's building during a robbery of the illegal "drug supermarket" operated by the tenant of a store located in the building. The illegal use of the store was well known to many people prior to the day when Miguel was shot. Although it had been raided by police on five occasions, the store reopened with the sale of drugs and narcotics soon after each raid. The building superintendent stated that patrons of the store went there to buy drugs rather than clothing and that he had reported the misuse of the store to the landlord several times before the shooting. The executive director of the neighborhood association had received many complaints about the store from persons in the neighborhood. Miguel and his mother brought a negligence suit against Lefran Realty. The trial court granted summary judgment in favor of Lefran Realty. Was the trial court correct in doing so?

7. Linda Schiernbeck rented a house from Clark and Rosa Davis for the sum of $150 per month. Approximately one month after she moved in, Schiernbeck noticed a discolored circular area on one of the walls. There was a screw in the middle of this area. Schiernbeck determined that a smoke detector had been attached to the wall. No smoke detector was present, however, during the time Schiernbeck lived in the house. Schiernbeck later contended that she notified the Davises about the missing smoke detector, but the Davises denied this. Approximately one year and three months after Schiernbeck's tenancy began, a fire broke out in the house. Schiernbeck and her daughter were severely injured. Contending that the Davises should have installed a smoke detector, Schiernbeck sued them on negligence and breach of contract grounds. Did the Davises owe Schiernbeck a duty to install a smoke detector?

8. In October 1981, Cook entered into an oral lease to rent a residence to Melson. Melson agreed to pay $400 per month, in advance, as rent. In November 1987, Cook sent Melson a letter advising that the rent would be increased to $525 per month, effective January 1, 1988, and asking whether Melson was going to pay. On December 10, 1987, Melson replied that he would not pay the increased rent. On January 2, 1988, Melson sent Cook a check for $400 as rent for January. Cook returned the check and stated that the rent was now $525. Melson did not vacate the premises until February 1, 1988. Cook brought a suit against Melson for $525, allegedly the unpaid rent for the month of January. Was Melson liable for the $525?

9. Sippin owned property on Main Street in Monroe, Connecticut. He rented this property to Longo and Ellam pursuant to a written lease, which stipulated that the premises was to be used exclusively for Longo's and Ellam's real estate business. Longo and Ellam did not know that the deed by which Sippin had acquired the property contained a restrictive covenant barring any commercial use of the property. After Longo and Ellam had been in possession of the property for a few months, the local zoning enforcement agency ordered them to remove a commercial real estate sign and to cease operating their business on the property because it was located in a residential zone. Although the residential zoning of the property was in effect at the time they entered into

their lease with Sippin, Longo and Ellam had not previously known of this zoning designation. Further zoning enforcement action caused Longo and Ellam to wind up their real estate business and to vacate the property (without paying further rent) prior to the expiration of the term contemplated by their lease with Sippin. Sippin sued Longo and Ellam in an effort to recover the unpaid rent (as called for by the lease) for the remainder of the lease term, or, in the alternative, to recover the fair rental value of the premises pursuant to a line of Connecticut cases allowing landlords to collect the fair rental value of property from any tenant at sufferance. When the trial court ruled in favor of Long and Ellam, Sippin appealed. Was Sippin entitled to a judgment for the unpaid rent contemplated by the lease? Alternatively, did the line of cases dealing with tenants at sufferance entitle Sippin to a judgment for the fair rental value of the premises?

10. Woodhaven Condominium Association, Inc. (WCA), was a nonprofit New Jersey corporation organized for the administration and management of the 120-unit Woodhaven Condominiums. Albert Gittleman resided in one of these condominiums. The parking spaces at Woodhaven Condominiums were owned by the individual condominium unit owners as tenants in common. The master deed for Woodhaven Condominiums stated that "[t]he parking spaces within the lands described [in the master deed] shall constitute elements for the non-exclusive use of the unit owners." Gittleman, who had a physical disability, requested exclusive use of a particular parking space. WCA concluded that in view of the master deed and the ownership of the parking spaces by numerous parties on a tenancy-in-common basis, it could not approve Gittleman's request without a material amendment to the master deed. A material amendment required a two-thirds vote of approval from the condominium unit owners. WCA therefore presented the unit owners with a proposed resolution that would have amended the master deed to allow assigned parking on an exclusive basis. The resolution did not receive the two-thirds vote of approval. WCA therefore denied Gittleman's request. Gittleman then sued WCA, contending that its denial of his request for an exclusive parking space violated the Fair Housing Act. Was Gittleman's claim meritorious?

Chapter Twenty-Six

Estates and Trusts

Chapter Outline

I. The Law of Estates and Trusts
- *A. Estate Planning*

II. Wills
- *A. Right of Disposition by Will*
- *B. Nature of a Will*

- *J. Termination and Modification of a Trust*
- *K. Implied and Constructive Trusts*

One of the basic features of the ownership of property is the right to dispose of the property during life and at death. You have already learned about the ways in which property is transferred during the owner's life. The owner's death is another major event for the transfer of property. Most people want to be able to choose who will get their property when they die. There are a variety of ways in which a person may control the ultimate disposition of his property. He may take title to the property in a form of joint ownership that gives his co-owner a right of survivorship. He may create a trust and transfer property to it to be used for the benefit of a spouse, child, elderly parent, or other beneficiary. He may execute a will in which he directs that his real and personal property be distributed to persons named in the will. If, however, a person makes no provision for the disposition of his property at his death, his property will be distributed to his heirs as defined by state law. This chapter focuses on the transfer of property at death and on the use of trusts for the transfer and management of property, both during life and at death.

The Law of Estates and Trusts

Each state has its own statutes and common law regulating the distribution of property upon death. Legal requirements and procedures may vary from state to state, but many general principles can be stated. The **Uniform Probate Code (UPC)** is a comprehensive, uniform law that has been enacted in 18 states. It is intended to update and unify state law concerning the disposition and administration of property at death. Several relevant UPC provisions will be discussed in this chapter.

Estate Planning

A person's **estate** is all of the property owned by that person. **Estate planning** is the popular name for the complicated process of planning for the transfer of a person's estate in later life and at death. Estate planning also concerns planning for the possibility of prolonged illness or disability. An attorney who is creating an estate plan will take an inventory of the client's assets, learn the client's objectives, and draft the instruments necessary to carry out the plan. This plan is normally guided by the desire to reduce the amount of tax liability and to provide for the orderly disposition of the estate.

Wills

Right of Disposition by Will

The right to control the disposition of property at death has not always existed. In the English feudal system, the king owned all land. The lords and knights had only the right to use land for their lifetime. A landholder's rights in land terminated upon his death, and no rights descended to his heirs. In 1215, the king granted the nobility the right to pass their interest in the land they held to their heirs. Later, that right was extended to all property owners. In the United States, each state has enacted statutes that establish the requirements for a valid will, including the formalities that must be met to pass property by will.

Nature of a Will

A **will** is a document executed with specific legal formalities by a **testator** (person making a will) that contains his instructions about the way his property will be disposed of at his death. A will can dispose only of property belonging to the testator at the time of his death. Furthermore, wills do not control property that goes to others through other planning devices (such as life insurance policies) or by operation of law (such as by right of survivorship). For example, property held in joint tenancy or tenancy by the entirety is not controlled by a will, because the property passes automatically to the surviving cotenant by right of survivorship. In addition, life insurance proceeds are controlled by the insured's designation of beneficiaries, not by any provision of a will. (Because joint tenancy and life insurance are ways of directing the disposition of property, they are sometimes referred to as "will substitutes.")

Common Will Terminology

Some legal terms commonly used in wills include the following:

1. *Bequest.* A **bequest** (also called **legacy**) is a gift of personal property or money. For example, a will might provide for a bequest of a family heirloom to the testator's daughter. Since a will can direct only property that is owned by the testator at the time of his death, a specific bequest of property that the testator has disposed of before his death is ineffective. This is called **ademption.** For example, Samuel's will states that Warren is to receive Samuel's collection of antique guns. If the guns are destroyed before Warren's death, however, the bequest is ineffective because of ademption.

2. *Devise.* A **devise** is a gift of real property. For example, the testator might devise his family farm to his grandson.

3. *Residuary.* The **residuary** is the balance of the estate that is left after specific devises and bequests are made by the will. After providing for the disposition of specific personal and real property, a testator might provide that the residuary of his estate is to go to his spouse or be divided among his descendants.

4. *Issue.* A person's **issue** are his lineal descendants (children, grandchildren, great-grandchildren, and so forth). This category of persons includes adopted children.

5. *Per capita.* This term and the next one, *per stirpes,* are used to describe the way in which a group of persons are to share a gift. **Per capita** means that each of that group of persons will share equally. For example, Grandfather dies, leaving a will that provides that the residuary of his estate is to go to his issue or descendants *per capita.* Grandfather had two children, Mary and Bill. Mary has two children, John and James. Bill has one child, Margaret. Mary and Bill die before Grandfather (in legal terms, *predecease* him), but all three of Grandfather's grandchildren are living at the time of his death. In this case, John, James, and Margaret would each take one-third of the residuary of Grandfather's estate.

6. *Per stirpes.* When a gift is given to the testator's issue or descendants **per stirpes** (also called **by right of representation**), each surviving descendant divides the share that his or her parent would have taken if the parent had survived. In the preceding example, if Grandfather's will had stated that the residuary of his estate was to go to his issue or descendants *per stirpes,* Margaret would take one-half and John and James would take one-quarter each (that is, they would divide the share that would have gone to their mother).

Testamentary Capacity

The capacity to make a valid will is called **testamentary capacity.** To have testamentary capacity, a person must be *of sound mind* and *of legal age,* which is 18 in most states. A person does not have to be in perfect mental health to have testamentary capacity. Because people often delay executing wills until they are weak and in ill health, the standard for mental capacity to make a will is fairly low. To be of "sound mind," a person need only be sufficiently rational to be capable of understanding the nature and character of his property, of realizing that he is making a will, and of knowing the persons who would normally be the beneficiaries of his affection. A person could move in and out of periods of lucidity and still have testamentary capacity if he executed his will during a lucid period.

Lack of testamentary capacity is a common ground upon which wills are challenged by persons who were excluded from a will. *Fraud* and *undue influence* are also common grounds for challenging the validity of a will.[1]

[1]Fraud and undue influence are discussed in detail in Chapter 13.

Execution of a Will

Unless a will is executed with the formalities required by state law, it is *void.* The courts are strict in interpreting statutes concerning the execution of wills. If a will is declared void, the property of the deceased person will be distributed according to the provisions of state laws that will be discussed later.

The formalities required for a valid will differ from state to state. For that reason, an individual should consult the laws of his state before making a will. If he should move to another state after having executed a will, he should consult a lawyer in his new state to determine whether a new will needs to be executed. All states require that a will be *in writing.* State law also requires that a formal will be *witnessed,* generally by two or three *disinterested* witnesses (persons who do not stand to inherit any property under the will), and that it be *signed* by the testator or by someone else at the testator's direction. Most states also require that the testator *publish* the will—that is, declare or indicate at the time of signing that the instrument is his will. Another formality required by most states is that the testator sign the will in the presence and the sight of the witnesses and that the witnesses sign in the presence and the sight of each other. As a general rule, an **attestation clause,** which states the formalities that have been followed in the execution of the will, is written following the testator's signature. These detailed formalities are designed to prevent fraud. Section 2–502 of the UPC requires that a will must be in writing, signed by the testator (or in the testator's name by some other individual in the testator's conscious presence and by the testator's direction), and signed by at least two individuals, each of whom signed within a reasonable time after he witnessed either the signing of the will or the testator's acknowledgment of that signature or will. Also, under the UPC, any individual who is generally competent to be a witness may witness a will, and the fact that the witness is an interested party does not invalidate the will [2–505]. When a testator has made a technical error in executing a will, however, the UPC permits the document to be treated as if it had been executed properly if it can be proven by clear and convincing evidence that the testator intended the document to constitute his will [2–503].

In some situations, a lawyer might arrange to have the execution of a will *videotaped* to provide evidence relating to the testator's capacity and the use of proper

formalities. (Note that the will is executed in the normal way; the videotape merely records the execution of the will.) Some state probate codes specifically provide that videotapes of the executions of wills are admissible into evidence.

Incorporation by Reference

In some situations, a testator might want his will to refer to and incorporate an existing writing. For example, the testator may have created a list of specific gifts of personal property that he wants to incorporate in the will. A writing such as this is called an **extrinsic document**—that is, a writing apart from the will. In most states, the contents of extrinsic documents can be essentially incorporated into the will when the circumstances satisfy rules that have been designed to ensure that the document is genuine and that it was intended by the testator to be incorporated in the will. This is called **incorporation by reference.** For an extrinsic document to be incorporated by reference, it must have been *in existence at the time the will was executed.* In addition, the writing and the will must refer to each other so that the extrinsic document can be identified and so that it is clear that the testator intended the extrinsic document to be incorporated in the will. Under the UPC, incorporation by reference is allowed when the extrinsic document was in existence when the will was executed, the language of the will manifests the intent to incorporate the writing, and the will describes the writing sufficiently to identify it [2–510].

Informal Wills

Some states recognize certain types of wills that are not executed with these formalities. These are:

1. *Nuncupative wills.* A **nuncupative** will is an oral will. Such wills are recognized as valid in some states, but only under limited circumstances and to a limited extent. In a number of states, for example, nuncupative wills are valid only when made by soldiers in military service and sailors at sea, and even then they will be effective only to dispose of personal property that was in the actual possession of the person at the time the oral will was made. Other states place low dollar limits on the amount of property that can be passed by a nuncupative will.

2. *Holographic wills.* **Holographic wills** are wills that are written and signed in the testator's handwriting. You will see an example of a holographic will in *Estate of Southworth v. North Shore Animal League,* which appears below. The fact that holographic wills are not properly witnessed makes them suspect. They are recognized in about half of the states and by section 2–502(b) of the UPC, even though they are not executed with the formalities usually required of valid wills. For a holographic will to be valid in the states that recognize them, it must evidence testamentary intent and must actually be *handwritten* by the testator. A typed holographic will would be invalid. Some states require that the holographic will be *entirely* handwritten—although the UPC requires only that the signature and material portions of the will be handwritten by the testator [2–502(b)]—and some also require that the will be dated.

Joint and Mutual Wills

In some circumstances, two or more people—a married couple, for example—decide together on a plan for the disposition of their property at death. To carry out this plan, they may execute a **joint will** (a single instrument that constitutes the will of both or all of the testators and is executed by both or all) or they may execute **mutual wills** (joint or separate, individual wills that reflect the common plan of distribution).

Underlying a joint or mutual will is an agreement on a common plan. This common plan often includes an express or implied contract (a contract to make a will or not to revoke the will). One issue that sometimes arises is whether a testator who has made a joint or mutual will can later change his will. Whether joint and mutual wills are revocable depends on the language of the will, on state law, and on the timing of the revocation. For example, a testator who made a joint will with his spouse may be able to revoke his will during the life of his spouse, because the spouse still has a chance to change her own will, but he may be unable to revoke or change the will after the death of his spouse. The UPC provides that the mere fact that a joint or mutual will has been executed does *not* create the presumption of a contract not to revoke the will or wills [2–514].

Construction of Wills

Even in carefully drafted wills, questions sometimes arise as to the meaning or legal effect of a term or provision. Disputes about the meaning of the will are even more likely to occur in wills drafted by the

testator himself, such as holographic wills. To interpret a will, a court will examine the entire instrument in an attempt to determine the testator's intent. The following *Estate of Southworth* case provides a good example of the methods and principles courts use to interpret wills.

Estate of Southworth v. North Shore Animal League

59 Cal. Rptr. 2d 272 (Ct. App. Cal. 1996)

Dorothy Southworth never married and had no children. On March 4, 1986, in response to Southworth's request for information, North Shore Animal League (NSAL) sent a letter to her describing its lifetime pet care program and explaining how to register for it. NSAL asked that she return its enclosed pet care registration card, contact her attorney to include her bequest to NSAL in her estate, and send a copy of the bequest to NSAL. NSAL informed her that "[e]ven if you don't currently have a will, we'll accept your Registration on good faith and maintain an Active file on your pet while you're arranging the Bequest." Southworth never returned the registration card to NSAL. On September 4, 1987, Southworth requested registration with the Neptune Society for cremation of her body upon her death. On the registration form, she stated that she had never married and that Neptune should contact the Ventura County Coroner to make arrangements. On the same date, Southworth sent a letter to NSAL asking whether or not it destroyed animals. Her letter to NSAL states,

> I have been terribly upset since I heard [that NSAL destroys animals] because I have always truly believed that you did not destroy animals and this was the determining factor in my selection of you as the beneficiary of my entire estate as I have no relatives and do not want the State of California, courts, or attorneys to benefit from my hard earned labor. I should appreciate greatly if you would clarify this point about the destruction of animals at your shelter and tell me honestly and truly what your policy is [and] not hedge because I have mentioned leaving my estate to your organization.

In September of 1987, NSAL wrote to assure Southworth that it would not destroy any pet. NSAL included a brochure regarding estate planning. The brochure explained that a letter or a verbal promise would not effectuate a testamentary gift; that a proper written will is required. The mailing urged members to consult an estate planning attorney to avoid the possibility that the estate might end up with "distant relatives whom you didn't even know." Southworth never prepared a formal will.

NSAL sent a donor card to Southworth. It explained that she could change her life insurance policy or provide for animals in her will by calling her attorney. It sought gifts and legacies and asked her to complete and return the donor card. On April 19, 1989, Southworth returned the donor card to NSAL. The card provided three options: naming NSAL as a beneficiary of a life insurance policy, changing one's will to leave securities or cash to NSAL, or not taking immediate action, but stating the donor's intentions. On the card, Southworth circled printed option c, which stated: "I am not taking action now, but my intention is" [in the blank space provided she wrote] "My entire estate is to be left to North Shore Animal League." The donor card also included a printed statement which read, "The total amount that the animal shelter will someday receive is" [she wrote in the blank space] "$500,000." The card then stated what she wanted the money used for. She signed and dated the donor card.

In May of 1989, NSAL sent a thank-you letter to Southworth for "letting us know that you will remember the North Shore Animal League in your will." The letter requested that Southworth have her attorney send it a copy of the will. The Neptune Society asked for additional information, and Southworth returned Neptune's supplemental form and stated that there are "[n]o living relatives" and to "[p]lease notify North Shore Animal League." She included NSAL's address, telephone numbers, and the name of the executive director of NSAL. She signed the supplemental form and dated it October 20, 1989.

On January 14, 1994, Southworth died. The Ventura County Public Administrator was appointed special administrator of her estate. The public administrator filed notice of its petition to administer her estate. NSAL filed its objection to the petition on the grounds that the donor card constituted a holographic will of South-

worth. Francis See, an heir finder to whom Southworth's surviving half-siblings assigned their claims, and nephews of a deceased sister of Southworth contested the admission of the alleged holographic will. See argued that the donor card should be denied admission into probate as a holographic will because not all of its material provisions were in the handwriting of the decedent and there was no showing of testamentary intent at the time she signed the card. NSAL argued that the donor card reflected Southworth's testamentary intent and satisfied the statutory requirements for a holographic will. The trial court concluded that Southworth's handwritten statement on the donor card that "[m]y entire estate is to be left to North Shore Animal League" substantially complied with all the Probate Code requirements for a holographic will. The court viewed the preprinted parts of the donor card and the $500,000 sum written in to be immaterial. The court interpreted the preprinted words stating that "I am not taking action now, but my intention is . . ." to mean that she did not want to immediately transfer her funds to NSAL, but intended to bequeath them upon her death. The trial court admitted the donor card to probate as the last will of Southworth, and See appealed.

Gilbert, Judge A charitable donor card contains printed language showing an intent to make a future gift to the charity. In the blank space following the printed words a testator writes that her entire estate is to be left to the charity. She signs and dates the donor card. Does her handwriting on the donor card constitute a holographic will? No.

Former Civil Code section 1277 stated that "[a] [h]olographic will is one that is entirely written, dated and signed by the hand of the testator himself. It is subject to no other form, . . . and need not be witnessed." In *Estate of De Caccia* (1928), our Supreme Court reversed the order of a trial court which had denied probate to an otherwise handwritten will simply because it was written under a printed letterhead stating, "Oakland, California." In 1931, the Legislature reenacted former Civil Code section 1277 as section 53 of the Probate Code and added a third sentence to codify the rule announced in the *De Caccia* case. The sentence stated, "No address, date or other matter written, printed or stamped upon the document, which is not incorporated in the provisions which are in the handwriting of the decedent, shall be considered as any part of the will." In *Estate of Black,* the decedent wrote out her will on three identical, commercially printed one-page will forms. In the blanks provided, she wrote her signature and place of domicile, and on the third page she inserted the name and gender of her executor, the date of the instrument, and the city and state where she executed it. She either struck out or ignored other printed language regarding residuary gifts, the appointment of an executor, attesting witnesses, and a testimonium clause. The trial court denied probate because the testator incorporated some of the printed language, even though it concerned perfunctory procedural matters in the form will. Our Supreme Court reversed because "none of the incorporated material is either material to the substance of the will or essential to its validity as a testamentary disposition. . . ." *Estate of Black.* The *Black* court explained that "[t]he policy of the law is toward "a construction favoring validity, in determining whether a will has been executed in conformity with statutory requirements." Moreover, we affirmed the tendency of both the courts and the Legislature. . . toward greater liberality in accepting a writing as an holographic will. Courts are to use common sense in evaluating whether a document constitutes a holographic will. The *Black* court recognized that "[i]f testators are to be encouraged by a statute like ours to draw their own wills, the courts should not adopt, upon purely technical reasoning, a construction which would result in invalidating such wills in half the cases." The law recognizes that such wills are generally made by people without legal training. The primary purpose of the statutory holographic will provisions is to prevent fraud. Because counterfeiting another's handwriting is exceedingly difficult, these statutes require the material provisions of holographic wills to be in the testator's handwriting." It was apparent to the *Black* court that the testator mistakenly believed she needed to use the printed language on the commercially printed will form regarding procedural matters. The court determined that the printed clause of the commercial will form referring to a personal representative was "patently irrelevant" to the substance—the dispositive provisions of her will. The court explained that the issue is not whether one mechanically intends to include printed material, but whether one intends to include printed material "because of its importance

or materiality to the testamentary message. . . .” The inclusion of such printed procedural details does not invalidate an otherwise valid will.

Whether a document should be admitted to probate as a holographic will depends on proof of its authorship and authenticity, and whether the words establish that it was intended to be the author’s last will and testament at the time she wrote it. Our high court explained that four questions are pertinent in evaluating whether a document should be invalidated as a holographic will due to printed language in the document: “Was the particular provision relevant to the substance of the will? Was it essential to the will’s validity? Did the testator intend to incorporate the provision? Would invalidation of the holograph defeat the testator’s intent?” *Estate of Black.*

Accordingly, in 1983, the year after our Supreme Court decided *Black,* our Legislature replaced Probate Code section 53 with Probate Code section 6111. Section 6111 provides, in pertinent part, that “(a) A will . . . is valid as a holographic will, whether or not witnessed, if the signature and the material provisions are in the handwriting of the testator.” In 1990, the Legislature added subdivision (c) which provides that “Any statement of testamentary intent contained in a holographic will may be set forth either in the testator’s own handwriting or as part of a commercially printed form will.”

There is no question that the handwriting on the document at issue is that of Dorothy Southworth, and that she signed and dated it. Unlike *Black,* however, the document is not a commercially printed will form. It is a donor card for a charity. It was not drafted to serve as a will. The card provides the option of informing NSAL that the donor has or intends to instruct one’s attorney to change his or her will. Furthermore, the printed language Southworth incorporated from the donor card does not evince her present testamentary intent. Instead of striking the material printed words which state “I am not taking action now, but my intention is,” she chose to incorporate those words with her handwritten statement,“ My entire estate is to be left to North Shore Animal League.” The material printed language together with her handwriting evince a future intent, not present testamentary intent.

Although other evidence, such as her letter to NSAL, and the supplemental Neptune form she signed on October 20, 1989, shows that Southworth desired to leave her estate to NSAL, neither the donor card at issue nor the handwriting on it substantially complies with Probate Code requirements for holographic wills. Although courts may consider statements made before and after a holographic will is made and the surrounding circumstances, evidence of present testamentary intent provided by the instrument at issue is paramount. Here, Southworth incorporated printed language stating that she was not taking any action when she executed it. It does not establish her testamentary intent at the time she executed it. It only states her intention to make a will in the future.

The judgment is reversed in favor of See.

Limitations on Disposition by Will

A person who takes property by will takes it subject to all outstanding claims against the property. For example, if real property is subject to a mortgage or other lien, the beneficiary who takes the property gets it subject to the mortgage or lien. In addition, the rights of the testator’s creditors are superior to the rights of beneficiaries under his will. Thus, if the testator was insolvent (his debts exceeded his assets), persons named as beneficiaries do not receive any property by virtue of the will.

Under the laws of most states, the surviving spouse of the testator has statutory rights in property owned solely by the testator that cannot be defeated by a contrary will provision. This means that a husband cannot effectively disinherit his wife, and vice versa. Even if the will provides for the surviving spouse, he or she can elect to take the share of the decedent’s estate that would be provided by state law rather than the amount specified in the will. In some states, personal property, such as furniture, passes automatically to the surviving spouse.

At common law, a widow had the right to a life estate in one-third of the lands owned by her husband during their marriage. This was known as a widow’s **dower right.** A similar right for a widower was known as **curtesy.** A number of states have changed the right

by statute to give a surviving spouse a one-third interest in fee simple in the real and personal property owned by the deceased spouse at the time of his or her death. (Naturally, a testator can leave his spouse more than this if he desires.) Under UPC 2–201, the surviving spouse's elective share varies depending on the length of the surviving spouse's marriage to the testator—the elective share increases with the length of marriage.

As a general rule, a surviving spouse is given the right to use the family home for a stated period as well as a portion of the deceased spouse's estate. In community property states, each spouse has a one-half interest in community property that cannot be defeated by a contrary will provision. (Note that the surviving spouse will obtain *full* ownership of any property owned by the testator and the surviving spouse as joint tenants or tenants by the entirety.)

Children of the testator who were born or adopted after the will was executed are called **pretermitted** children. There is a presumption that the testator intended to provide for such a child, unless there is evidence to the contrary. State law gives pretermitted children the right to a share of the testator's estate. For example, under section 2–302 of the Uniform Probate Code, a pretermitted child has the right to receive the share he would have received under the state intestacy statute unless it appears that the omission of this child was intentional, the testator gave substantially all of his estate to the child's other parent, or the testator provided for the child outside of the will.

Revocation of Wills

One important feature of a will is that it is *revocable* until the moment of the testator's death. For this reason, a will confers *no present interest* in the testator's property. A person is free to revoke a prior will and, if she wishes, to make a new will. Wills can be revoked in a variety of ways. Physical destruction and mutilation done with intent to revoke a will constitute revocation, as do other acts such as crossing out the will or creating a writing that expressly cancels the will.

In addition, a will is revoked if the testator later executes a valid will that expressly revokes the earlier will. A later will that does not *expressly* revoke an earlier will operates to revoke only those portions of the earlier will that are inconsistent with the later will. Under the UPC, a later will that does not expressly revoke a prior will operates to revoke it by inconsistency if the testator intended the subsequent will to *replace* rather than *supplement* the prior will [2–507(b)]. Furthermore, the UPC presumes that the testator intended the subsequent will to replace rather than supplement the prior will if the subsequent one makes a complete disposition of her estate, but it presumes that the testator intended merely to supplement and not replace the prior will if the subsequent will disposes of only part of her estate [2–507(c), 2–507(d)]. In some states, a will is presumed to have been revoked if it cannot be located after the testator's death, although this presumption can be rebutted with contrary evidence.

Wills can also be revoked by operation of law without any act on the part of the testator signifying revocation. State statutes provide that certain changes in relationships operate as revocations of a will. In some states, marriage will operate to revoke a will that was made when the testator was single. Similarly, a divorce may revoke provisions in a will made during marriage that leave property to the divorced spouse. Under the laws of some states, the birth of a child after the execution of a will may operate as a partial revocation of the will.

Codicils

A **codicil** is an amendment of a will. If a person wants to change a provision of a will without making an entirely new will, she may amend the will by executing a codicil. One may *not* amend a will by merely striking out objectionable provisions and inserting new provisions. The same formalities are required for the creation of a valid codicil as for the creation of a valid will.

Advance Directives: Planning for Disability

Advances in medical technology now permit a person to be kept alive by artificial means, even in many cases in which there is no hope of the person being able to function without life support. Many people are opposed to their lives being prolonged with no chance of recovery. In response to these concerns, almost all states have enacted statutes permitting individuals to state their choices about the medical procedures that should be administered or withheld if they should become incapacitated in the future and cannot recover. Collectively, these devices are called **advance directives.** An advance directive is a written document (such as a living

Figure 1 *Living Will*

LIVING WILL DECLARATION*

Declaration made this _____ day of _____ (month, year). I, _____, being at least eighteen (18) years of age and of sound mind, willfully and voluntarily make known my desires that my dying shall not be artificially prolonged under the circumstances set forth below, and I declare:

If at any time my attending physician certifies in writing that: (1) I have an incurable injury, disease, or illness; (2) my death will occur within a short time; and (3) the use of life prolonging procedures would serve only to artificially prolong the dying process, I direct that such procedures be withheld or withdrawn, and that I be permitted to die naturally with only the performance or provision of any medical procedure or medication necessary to provide me with comfort care or to alleviate pain, and, if I have so indicated below, the provision of artificially supplied nutrition and hydration. (Indicate your choice by initialing or making your mark before signing this declaration):

I wish to receive artificially supplied nutrition and hydration, even if the effort to sustain life is futile or excessively burdensome to me.

I do not wish to receive artificially supplied nutrition and hydration, if the effort to sustain life is futile or excessively burdensome to me.

I intentionally make no decision concerning artificially supplied nutrition and hydration, leaving the decision to my health care representative appointed under IC 16-36-1-7 or my attorney in fact with health care powers under IC 30-5-5.

In the absence of my ability to give directions regarding the use of life prolonging procedures, it is my intention that this declaration be honored by my family and physician as the final expression of my legal right to refuse medical or surgical treatment and accept the consequences of the refusal.

I understand the full import of this declaration.

Signed: _____
City, County, and State of Residence

The declarant has been personally known to me, and I believe (him/her) to be of sound mind. I did not sign the declarant's signature above for or at the direction of the declarant. I am not a parent, spouse, or child of the declarant. I am not entitled to any part of the declarant's estate or directly financially responsible for the declarant's medical care. I am competent and at least eighteen (18) years of age.

will or durable power of attorney) that directs others how future health care decisions should be made in the event that the individual becomes incapacitated.

Living Wills

Living wills are documents in which a person states in advance his intention to forgo or obtain certain life-prolonging medical procedures. Almost all states have enacted statutes recognizing living wills. These statutes also establish the elements and formalities required to create a valid living will and describe the legal effect of living wills. Currently, the law concerning living wills is primarily a matter of state law and differs from state to state. Living wills are typically included with a patient's medical records. Many states require physicians and other health care providers to follow the provisions of a valid living will. Because living wills are created by statute, it is important that all terms and conditions of one's state statute be followed. Figure 1 shows an example of a living will form.

Durable Power of Attorney

Another technique of planning for the eventuality that one may be unable to make decisions for oneself is to execute a document that gives another person the legal authority to act on one's behalf in the case of mental or

physical incapacity. This document is called a **durable power of attorney.**

A *power of attorney* is an express statement in which one person (the **principal**) gives another person (the **attorney in fact**) the authority to do an act or series of acts on his behalf. For example, Andrews enters into a contract to sell his house to Willis, but he must be out of state on the date of the real estate closing. He gives Paulsen a power of attorney to attend the closing and execute the deed on his behalf. Ordinary powers of attorney terminate upon the principal's incapacity. By contrast, the *durable power of attorney* is not affected if the principal becomes incompetent.

A durable power of attorney permits a person to give someone else extremely broad powers to make decisions and enter transactions such as those involving real and personal property, bank accounts, and health care, and to specify that those powers will not terminate upon incapacity. The durable power of attorney is an extremely important planning device. For example, a durable power of attorney executed by an elderly parent to an adult child at a time in which the parent is competent would permit the child to take care of matters such as investments, property, bank accounts, and hospital admission. Without the durable power of attorney, the child would be forced to apply to a court for a guardianship, which is a more expensive and often less efficient manner in which to handle personal and business affairs.

Durable Power of Attorney for Health Care

The majority of states have enacted statutes specifically providing for **durable powers of attorney for health care** (sometimes called **health care representatives**). This is a type of durable power of attorney in which the principal specifically gives the attorney in fact the authority to make certain health care decisions for him if the principal should become incompetent. Depending on state law and the instructions given by the principal to the attorney in fact, this could include decisions such as consenting or withholding consent to surgery, admitting the principal to a nursing home, and possibly withdrawing or prolonging life support. Note that the durable power of attorney becomes relevant only in the event that the principal becomes incompetent. So long as the principal is competent, he retains the ability to make his own health care decisions. This power of attorney is also revocable at the will of the principal. The precise requirements for creation of the durable power of attorney differ from state to state, but all states require a written and signed document executed with specified formalities, such as witnessing by disinterested witnesses.

Federal Law and Advance Directives

A federal statute, The Patient Self-Determination Act,[2] requires health care providers to take active steps to educate people about the opportunity to make advance decisions about medical care and the prolonging of life and to record the choices that they make. This statute, which became effective in 1992, requires health care providers such as hospitals, nursing homes, hospices, and home health agencies, to provide written information to adults receiving medical care about their rights concerning the ability to accept or refuse medical or surgical treatment, the health care provider's policies concerning those rights, and their right to formulate advance directives. The act also requires the provider to document in the patient's medical record whether the patient has executed an advance directive, and it forbids discrimination against the patient based on the individual's choice regarding an advance directive. In addition, the provider is required to ensure compliance with the requirements of state law concerning advance directives and to educate its staff and the community on issues concerning advance directives.

Intestacy

If a person dies without making a will, or if he makes a will that is declared invalid, he is said to have died **intestate.** When that occurs, his property will be distributed to the persons designated as the intestate's heirs under the appropriate state's **intestacy** or **intestate succession** statute. The intestate's real property will be distributed according to the intestacy statute of the state in which the property is located. His personal property will be distributed according to the intestacy statute of the state in which he was **domiciled** at the time of his death. A domicile is a person's permanent home. A person can have only one domicile at a time. Determinations of a person's domicile turn on facts that tend to show that person's intent to make a specific state his permanent home.

[2] 42 U.S.C. section 1395cc (1993).

Figure 2 *Example of a Distribution Scheme under an Intestacy Statute*

Person Dying Intestate Is Survived By	Result
1. Spouse* and child or issue of a deceased child	Spouse 1/2, Child 1/2
2. Spouse and parent(s) but no issue	Spouse 3/4, Parent 1/4
3. Spouse but no parent or issue	All of the estate to spouse
4. Issue but no spouse	Estate is divided among issue
5. Parent(s), brothers, sisters, and/or issue of deceased brothers and sisters but no spouse or issue	Estate is divided among parent(s), brothers, sisters, and issue of deceased brothers and sisters
6. Issue of brothers and sisters but no spouse, issue, parents, brothers, and sisters	Estate is divided among issue of deceased brothers and sisters
7. Grandparents, but no spouse, issue, parents, brothers, sisters, or issue of deceased brothers and sisters	All of the estate goes to grandparents
8. None of the above	Estate goes to the state

*Note, however, second and subsequent spouses who had no children by the decedent may be assigned a smaller share.

Characteristics of Intestacy Statutes

The provisions of intestacy statutes are not uniform. Their purpose, however, is to distribute property in a way that reflects the *presumed intent* of the deceased—that is, to distribute it to the persons most closely related to him. In general, such statutes first provide for the distribution of most or all of a person's estate to his surviving spouse, children, or grandchildren. If no such survivors exist, the statutes typically provide for the distribution of the estate to parents, siblings, or nieces and nephews. If no relatives at this level are living, the property may be distributed to surviving grandparents, uncles, aunts, or cousins. Generally, persons with the same degree of relationship to the deceased person take equal shares. If the deceased had no surviving relatives, the property **escheats** (goes) to the state.

Figure 2 shows an example of a distribution scheme under an intestacy statute.

Special Rules

Under intestacy statutes, a person must have a relationship to the deceased person through blood or marriage in order to inherit any part of his property. State law includes adopted children within the definition of "children," and treats adopted children in the same way as it treats biological children. (An adopted child would inherit from his adoptive parents, not from his biological parents.) Half-brothers and half sisters are usually treated in the same way as brothers and sisters related by whole blood. An illegitimate child may inherit from his mother, but as a general rule, illegitimate children do not inherit from their fathers unless paternity has been either acknowledged or established in a legal proceeding.

A person must be alive at the time the decedent dies to claim a share of the decedent's estate. An exception may be made for pretermitted children or other descendants who are born *after* the decedent's death. If a person who is entitled to a share of the decedent's estate survives the decedent but dies before receiving his share, his share in the decedent's estate becomes part of his own estate.

Simultaneous Death

A statute known as the Uniform Simultaneous Death Act provides that where two persons who would inherit from each other (such as husband and wife) die under circumstances that make it difficult or impossible to de-

termine who died first, each person's property is to be distributed as though he or she survived. This means, for example, that the husband's property will go to his relatives and the wife's property to her relatives.

Administration of Estates

When a person dies, an orderly procedure is needed to collect his property, settle his debts, and distribute any remaining property to those who will inherit it under his will or by intestate succession. This process occurs under the supervision of a probate court and is known as the **administration process** or the **probate process.** Summary (simple) procedures are sometimes available when an estate is relatively small—for example, when it has assets of less than $7,500.

The Probate Estate

The probate process operates only on the decedent's property that is considered to be part of his **probate estate.** The probate estate is that property belonging to the decedent at the time of his death other than property held in joint ownership with right of survivorship, proceeds of insurance policies payable to a trust or a third party, property held in a revocable trust during the decedent's lifetime in which a third party is the beneficiary, or retirement benefits, such as pensions, payable to a third party. Assets that pass by operation of law and assets that are transferred by other devices such as trusts or life insurance policies do not pass through probate.

Note that the decedent's probate estate and his *taxable estate* for purposes of federal estate tax are two different concepts. The taxable estate includes all property owned or controlled by the decedent at the time of his death. For example, if a person purchased a $1 million life insurance policy made payable to his spouse or children, the policy would be included in his taxable estate, but not in his probate estate.

Determining the Existence of a Will

The first step in the probate process is to determine whether the deceased left a will. This may require a search of the deceased person's personal papers and safe-deposit box. If a will is found, it must be *proved* to be admitted to probate. This involves the testimony of the persons who witnessed the will, if they are still alive. If the witnesses are no longer alive, the signatures of the witnesses and the testator will have to be established in some other way. In many states and under UPC section 2–504, a will may be proved by an affidavit (declaration under oath) sworn to and signed by the testator and the witnesses at the time the will was executed. This is called a **self-proving affidavit.** If a will is located and proved, it will be admitted to probate and govern many of the decisions that must be made in the administration of the estate.

Selecting a Personal Representative

Another early step in the administration of an estate is the selection of a personal representative to administer the estate. If the deceased left a will, it is likely that he designated his personal representative in the will. The personal representative under a will is also known as the **executor.** Almost anyone could serve as an executor. The testator may have chosen, for example, his spouse, a grown child, a close friend, an attorney, or the trust department of a bank.

If the decedent died intestate, or if the personal representative named in a will is unable to serve, the probate court will name a personal representative to administer the estate. In the case of an intestate estate, the personal representative is called an **administrator.** A preference is usually accorded to a surviving spouse, child, or other close relative. If no relative is available and qualified to serve, a creditor, bank, or other person may be appointed by the court.

Most states require that the personal representative *post a bond* in an amount in excess of the estimated value of the estate to ensure that her duties will be properly and faithfully performed. A person making a will often directs that his executor may serve without posting a bond, and this exemption may be accepted by the court.

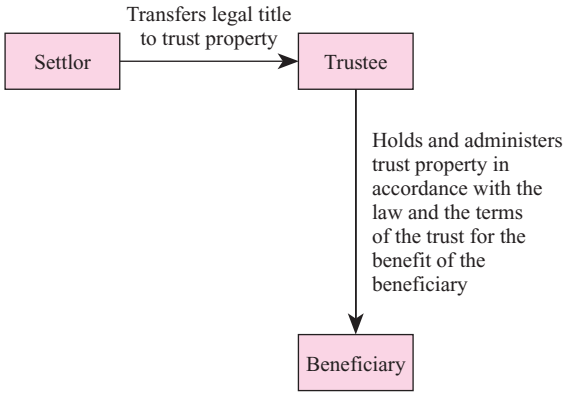
Responsibilities of the Personal Representative

The personal representative has a number of important tasks in the administration of the estate. She must see that an inventory is taken of the estate's assets and that the assets are appraised. Notice must then be given to creditors or potential claimants against the estate so that they can file and prove their claims within a specified time, normally five months. As a general rule, the surviving spouse of the deceased

person is entitled to be paid an allowance during the time the estate is being settled. This allowance has priority over other debts of the estate. The personal representative must see that any properly payable funeral or burial expenses are paid and that the creditors' claims are satisfied.

Both federal and state governments impose estate or inheritance taxes on estates of a certain size. The personal representative is responsible for filing estate tax returns. The federal tax is a tax on the deceased's estate, with provisions for deducting items such as debts, expenses of administration, and charitable gifts. In addition, an amount equal to the amount left to the surviving spouse may be deducted from the gross estate before the tax is computed. State inheritance taxes are imposed on the person who receives a gift or statutory share from an estate. It is common, however, for wills to provide that the estate will pay all taxes, including inheritance taxes, so that the beneficiaries will not have to do so. The personal representative must also make provisions for filing an income tax return and for paying any income tax due for the partial year prior to the decedent's death.

When the debts, expenses, and taxes have been taken care of, the remaining assets of the estate are distributed to the decedent's heirs (if there was no will) or to the beneficiaries of the decedent's will. Special rules apply when the estate is too small to satisfy all of the bequests made in a will or when some or all of the designated beneficiaries are no longer living.



When the personal representative has completed all of these duties, the probate court will close the estate and discharge the personal representative.

Trusts

Nature of a Trust

A **trust** is a legal relationship in which a person who has legal title to property has the duty to hold it for the use or benefit of another person. The person benefited by a trust is considered to have **equitable title** to the property, because it is being maintained for his benefit. This means that he is the real owner even though the trustee has the legal title in his or her name. A trust can be created in a number of ways. An owner of property may *declare* that he is holding certain property in trust. For example, a mother might state that she is holding 100 shares of General Motors stock in trust for her daughter. A trust may also arise *by operation of law.* For example, when a lawyer representing a client injured in an automobile accident receives a settlement payment from an insurance company, the lawyer holds the settlement payment as trustee for the client. Most commonly, however, trusts are created through *express instruments* whereby an owner of property transfers title to the property to a trustee who is to hold, manage, and invest the property for the benefit of either the original owner or a third person. For example, Long transfers certain stock to First Trust Bank with instructions to pay the income to his daughter during her lifetime and to distribute the stock to her children after her death.

Figure 3 *Trust*

Trust Terminology

A person who creates a trust is known as a **settlor** or **trustor.** The person who holds the property for the benefit of another person is called the **trustee.** The person for whose benefit the property is held in trust is the **beneficiary.** Figure 3 illustrates the relationship between these parties. A single person may occupy more than one of these positions; however, if there is only one beneficiary, he cannot be the sole trustee. The property held in trust is called the **corpus** or **res.** A distinction is made between the property in trust, which is the principal, and the income that is produced by the principal.

A trust that is established and effective during the settlor's lifetime is known as an **inter vivos trust.** A trust can also be established in a person's will. Such trusts take effect only at the death of the settlor. They are called **testamentary trusts.**

Why People Create Trusts

Bennett owns a portfolio of valuable stock. Her husband has predeceased her. She has two children and an elderly father for whom she would like to provide. Why might it be advantageous to Bennett to transfer the stock to a trust for the benefit of the members of her family?

First, there may be income tax or estate tax advantages in doing so, depending on the type of trust she establishes and the provisions of that trust. For example, she can establish an irrevocable trust for her children and remove the property transferred to her trust from her estate so that it is not taxable at her death. In addition, the trust property can be used for the benefit of others and may even pass to others after the settlor's death without the necessity of having a will. Many people prefer to pass their property by trust rather than by will because trusts afford more privacy: unlike a probated will, they do not become an item of public record. Trusts also afford greater opportunity for post-gift management than do outright gifts and bequests. If Bennett wants her children to enjoy the income of the trust property during their young adulthood without distributing unfettered ownership of the property to them before she considers them able to manage it properly, she can accomplish this through a trust provision. A trust can prevent the property from being squandered or spent too quickly. Trusts can be set up so that a beneficiary's interest cannot be reached by his creditors in many situations. Such trusts, called **spendthrift trusts,** will be discussed later.

Placing property in trust can operate to increase the amount of property held for the beneficiaries if the trustee makes good investment decisions. Another important consideration is that a trust can be used to provide for the needs of disabled beneficiaries who are not capable of managing funds.

Creation of Express Trusts

There are five basic requirements for the creation of a valid express trust, although special and somewhat less restrictive rules govern the establishment of charitable trusts. The requirements for forming an express trust are:

1. *Capacity.* The settlor must have had the **legal capacity** to convey the property to the trust. This means that the settlor must have had the capacity needed to make a valid contract if the trust is an *inter vivos* trust or the capacity to make a will if the trust is a testamentary trust. For example, a trust would fail under this requirement if at the time the trust was created, the settlor had not attained the age required by state law for the creation of valid wills and contracts (age 18 in most states).

2. *Intent and formalities.* The settlor must *intend* to create a trust at the present time. To impose enforceable duties on the trustee, the settlor must meet certain formalities. Under the laws of most states, for example, the trustee must accept the trust by signing the trust instrument. In the case of a trust of land, the trust must be in writing so as to meet the statute of frauds. If the trust is a testamentary trust, it must satisfy the formal requirements for wills.

3. *Conveyance of specific property.* The settlor must convey *specific property* to the trust. The property conveyed must be property that the settlor has the *right to convey.*

4. *Proper purpose.* The trust must be created for a *proper purpose.* It cannot be created for a reason that is contrary to public policy, such as the commission of a crime.

5. *Identity of the beneficiaries.* The *beneficiaries* of the trust must be described clearly enough so that their identities can be ascertained. Sometimes, beneficiaries may be members of a specific class, such as "my children."

Charitable Trusts

A distinction is made between private trusts and trusts created for charitable purposes. In a private trust, property is devoted to the benefit of specific persons, whereas in a charitable trust, property is devoted to a charitable organization or to some other purposes beneficial to society. While some of the rules governing private and charitable trusts are the same, a number of these rules are different. For example, when a private trust is created, the beneficiary must be known at the time or ascertainable within a certain time (established by a legal rule known as the **rule against perpetuities**). However, a charitable trust is valid even though no definitely ascertainable beneficiary is named and even though it is to continue for an indefinite or unlimited period.

Doctrine of Cy Pres A doctrine known as **cy pres** is applicable to charitable trusts when property is given in trust to be applied to a particular charitable purpose

that becomes impossible, impracticable, or illegal to carry out. Under the doctrine of *cy pres,* the trust will not fail if the settlor indicated a general intention to devote the property to charitable purposes. If the settlor has not specifically provided for a substitute beneficiary, the court will direct the application of the property to some charitable purpose that falls within the settlor's general charitable intention.

Totten Trusts

A **Totten trust** is a deposit of money in a bank or other financial institution in the name of the depositor *as trustee* for a named beneficiary. For example, Bliss deposits money in First Bank in trust for his daughter, Bessie. The Totten trust creates a revocable living trust. At Bliss's death, if he has not revoked this trust, the money in the account will belong to Bessie.

Powers and Duties of the Trustee

In most express trusts, the settlor names a specific person to act as trustee. If the settlor does not name a trustee, the court will appoint one. Similarly, a court will replace a trustee who resigns, is incompetent, or refuses to act.

The trust codes of most states contain provisions giving trustees broad management powers over trust property. These provisions can be limited or expanded by express provisions in the trust instrument. The trustee must use a *reasonable degree of skill, judgment, and care* in the exercise of his duties unless he holds himself out as having a greater degree of skill, in which case he will be held to a higher standard. Section 7–302 of the UPC provides that the trustee is held to the standard of a prudent person dealing with the property of another, and if he has special skills or is named trustee based on a representation of special skills, he is required to use those special skills. He *may not commingle* the property he holds in trust with his own property or with that of another trust.

A trustee owes a *duty of loyalty* (fiduciary duty) to the beneficiaries. This means that he must administer the trust for the benefit of the beneficiaries and avoid any conflict between his personal interests and the interest of the trust. For example, a trustee cannot do business with a trust that he administers without express permission in the trust agreement. He must not prefer one beneficiary's interest to another's, and he must account to the beneficiaries for all transactions. Unless the trust agreement provides otherwise, the trustee must make the trust productive. He may not delegate the performance of discretionary duties (such as the duty to select investments) to another, but he may delegate the performance of ministerial duties (such as the preparation of statements of account).

A trust may give the trustee discretion as to the amount of principal or income paid to a beneficiary. In such a case, the beneficiary cannot require the trustee to exercise his discretion in the manner desired by the beneficiary.

Allocating between Principal and Income One of the duties of the trustee is to distribute the principal and income of the trust in accordance with the terms of the trust instrument. Suppose Wheeler's will created a testamentary trust providing that his wife was to receive the income from the trust for life, and at her death, the trust property was to be distributed to his children. During the duration of the trust, the trust earns profits, such as interest or rents, and has expenses, such as taxes or repairs. How should the trustee allocate these items as between Wheeler's surviving spouse, who is an **income beneficiary,** and his children, who are **remaindermen?**

The terms of the trust and state law bind the trustee in making this determination. As a general rule, ordinary profits received from the investment of trust property are allocated to income. For example, interest on trust property or rents earned from leasing real property held in trust would be allocated to income. Ordinary expenses such as insurance premiums, the cost of ordinary maintenance and repairs of trust property, and property taxes, would be chargeable to income. The principal of the trust includes the trust property itself and any extraordinary receipts, such as proceeds or gains derived from the sale of trust property. Extraordinary expenses—for example, the cost of long-term permanent improvements to real property or expenses relating to the sale of property—would ordinarily be charged against principal.

Liability of Trustee

A trustee who breaches any of the duties of a trustee or whose conduct falls below the standard of care applicable to trustees may incur personal liability. For example, if the trustee invests unwisely and imprudently, the trustee may be personally liable to reimburse the trust estate for the shortfall. The language of the trust affects the trustee's liability and the level of care owed by the trustee. A settlor might, for example, include

language lowering the trustee's duty of care or relieving the trustee of some liability that he might otherwise incur. The following *Neuhaus* case discusses both trustee liability and the extent to which a trust instrument can limit the trustee's liability.

The trustee can also have liability to third persons who are injured by the operation of the trust. Because a trust is not in itself a legal entity that can be sued, a third party who has a claim (such as a tort claim or a claim for breach of contract) must file his claim against the trustee of the trust. The trustee's actual personal liability to a third party depends on the language of the trust and of any contracts he might enter on behalf of the trust as well as the extent to which the injury complained of by the third party was a result of the personal fault or omission of the trustee.

Neuhaus v. Richards *846 S.W2d 70 (Tex. Ct. App. 1992)*

In 1976, V. F. and Gertrude Neuhaus executed a Trust Indenture creating the Neuhaus Family Trusts, which established a number of separate individual trusts for the benefit of their children and grandchildren, Vernon and Lacey Neuhaus. The trusts were both managed by the same cotrustees, Grace Neuhaus Richards and Robert Schwarz. The initial corpus of both trusts consisted of stock in McAllen State Bank. However, in 1982, First City Bancorporation of Texas acquired all the stock of McAllen State Bank, and First City substituted its own stock for the McAllen State Bank Stock in the trusts. From 1985 through 1987, the First City stock declined in value, but the trustees refused to sell until the stock in Lacey Neuhaus's trust became virtually worthless, and they delayed selling the stock in Vernon Neuhaus's trust until significant losses had been sustained. The Neuhauses sued both trustees alleging a breach of fiduciary duties, including a failure to exercise judgment and care, willful misconduct, and conscious disregard for the rights and welfare of the beneficiaries, among other claims. The trial court granted a summary judgment against the Neuhauses, and the Neuhauses appealed.

Hinojosa, Justice The fundamental duties of a trustee include the use of the skill and prudence that an ordinary, capable, and careful person would use in the conduct of his own affairs and loyalty to the beneficiaries of the trust. In particular, one of the basic duties of a trustee is to make the assets of the trust productive while at the same time preserving the assets. Under these principles, it would appear in the present case that the trustees could be held liable for failing to sell the First City stock if their decision not to sell was imprudent. However, the settlor may within the trust instrument relieve the trustee of certain duties, restrictions, responsibilities, and liabilities imposed by statute. However, exculpatory clauses are strictly construed, and the trustee is relieved of liability only to the extent that the trust instrument clearly provides that he shall be excused.

In the present case, the trustees point to two supposedly exculpatory provisions in the present trust indenture: section V(k) and section V(v). Section V(k) provides that:

> All property transferred by gift to any trust and any property acquired by the Trustees . . . shall be deemed a proper investment, and the Trustees shall be under no obligation to dispose of or convert any such property.

The trustees suggest that section V(k) completely relieves them of any duty to sell the First City stock. However, we hold that this provision is ambiguous. Section V(k) leaves uncertain whether the trustees are still under a duty to prudently manage and, if need be, sell an investment that is otherwise deemed proper, and whether the obligation to dispose of assets includes the generalized duty to manage the trust prudently or merely relieves the trustees of any specific obligation to sell a particular kind or class of investments. Even if we were to accept the trustees' interpretation that this section generally relieved them of a duty to sell or of liability for failing to sell the First City stock, nevertheless, it could not have validly relieved them of all liability for failing to sell the stock. Under Texas law, an exculpatory provision in the trust instrument is not effective to relieve the trustee of liability for action taken in bad faith or for acting intentionally adverse or with reckless indifference to the interests of the beneficiary. Courts have held that the trust instrument may relieve the trustee of the duty to act as a prudent man in determining to retain unproductive property, but not of the duty to do so honestly, in good faith, and without willful misconduct or reckless indifference to the interests

of the beneficiaries. In other words, the trustee's determination to retain unproductive investments is generally protected as long as that determination was not made dishonestly, in bad faith, recklessly, or with the intent to harm the trust.

Turning to the second exculpatory provision relied upon by the trustees, section V(v) provides that "no Trustee shall be liable for negligence or error of judgment but shall be liable only for his willful misconduct or personal dishonesty." Thus, under this general exculpatory provision, the trustees are not held to the prudent person standard but may be liable only for willful misconduct or personal dishonesty. As we stated earlier, the Neuhauses alleged that in failing to sell the First City stock the trustees not only failed to act prudently but also that they acted out of willful misconduct. Because the trustees made no attempt by summary judgment evidence to negate these allegations of willful misconduct, summary judgment should not have been granted in their favor on the basis of exculpatory provisions of the trust indenture.

Reversed in favor of the Neuhauses and remanded for trial.

Spendthrift Trusts

Generally, the beneficiary of a trust may voluntarily assign his rights to the principal or income of the trust to another person. In addition, any distributions to the beneficiary are subject to the claims of his creditors. Sometimes, however, trusts contain provisions known as **spendthrift clauses,** which restrict the voluntary or involuntary transfer of a beneficiary's interest. Such clauses are generally enforced, and they preclude assignees or creditors from compelling a trustee to recognize their claims to the trust. The enforceability of such clauses is subject to four exceptions, however:

1. A person cannot put his own property beyond the claims of his own creditors. Thus, a spendthrift clause is not effective in a trust when the settlor makes himself a beneficiary.
2. Divorced spouses and minor children of the beneficiary can compel payment for alimony and child support.
3. Creditors of the beneficiary who have furnished necessaries can compel payment.
4. Once the trustee distributes property to a beneficiary, it can be subject to valid claims of others.

Termination and Modification of a Trust

Normally, a settlor cannot revoke or modify a trust unless he reserves the power to do so at the time he establishes the trust. However, a trust may be modified or terminated with the consent of the settlor and all of the beneficiaries. When the settlor is dead or otherwise unable to consent, a trust can be modified or terminated by consent of all the persons with a beneficial interest, but only when this would not frustrate a material purpose of the trust. Because trusts are under the supervisory jurisdiction of a court, the court can permit a deviation from the terms of a trust when unanticipated changes in circumstances threaten accomplishment of the settlor's purpose.

Implied and Constructive Trusts

Under exceptional circumstances in which the creation of a trust is necessary to effectuate a settlor's intent or avoid unjust enrichment, the law *implies* or imposes a trust even though no express trust exists or an express trust exists but has failed. One trust of this type is a **resulting trust,** which arises when there has been an incomplete disposition of trust property. For example, if Hess transferred property to Wickes as trustee to provide for the needs of Hess's grandfather and the grandfather died before the trust funds were exhausted, Wickes will be deemed to hold the property in a resulting trust for Hess or Hess's heirs. Similarly, if Hess had transferred the property to Wickes as trustee and the trust had failed because Hess did not meet one of the requirements of a valid trust, Wickes would not be permitted to keep the trust property as his own. A resulting trust would be implied.

A **constructive trust** is a trust created by operation of law to avoid fraud, injustice, or unjust enrichment. This type of trust imposes on the constructive trustee a duty to convey property he holds to another person on the ground that the constructive trustee would be unjustly enriched if he were allowed to retain it. For example, when a person procures the transfer of property by means of fraud or duress, he becomes a constructive trustee and is under an obligation to return the property to its original owner.

Ethical and Public Policy Concerns

1. What are some of the ethical implications a state legislature should take into account before adopting a living will statute or a durable power of attorney for health care statute?

2. Why should the law require so much formality to create a valid will? Would it be preferable for the law to lift some of the formalities surrounding wills and allow people to make valid wills orally, by informal letters, or by videotapes or audio recordings?

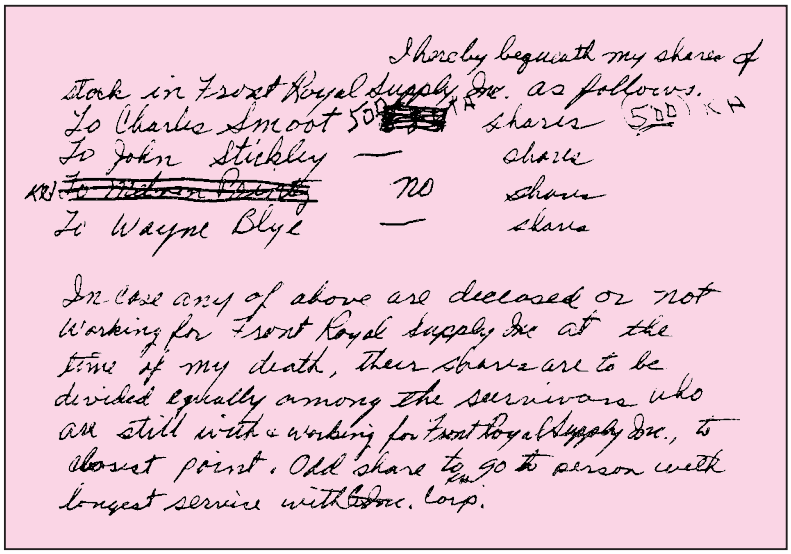
3. What is the ethical basis of a constructive trust?

Problems and Problem Cases

1. On March 23, 1994, Evelyn Foster died, leaving a house and nearly 400 acres of land in Mercer County along with personal property. She had executed a holographic will, which was offered for probate. The will stated in part:

> I—Evelyn Foster—being of sound Mind and Body—do hereby declare—In the event of my death—I herby [sic] will the farm-house + contents to go to Judy Foster Monk—any Monies shall be divided equally—after the funeral Expenses—between Greg Foster + Judy Foster Monk—also I do herby [sic] request that the Farm *not be sold!* Any personal items shall be equally divided—
> Sincerely—
> Evelyn Foster

Foster's son claims that Foster willed only a "farmhouse + contents" to his sister (Judy) and *not* the farm land. Is he correct?



2. Davidson died in a nursing home at the age of 90, leaving an estate in excess of $2 million. For a number of years before Davidson's death, Goodner had served as her lawyer. Goodner and his wife also ran personal errands for Davidson. In 1984, Goodner prepared a will for Davidson in which he was appointed her executor and was given, after other bequests, the residue and remainder of her property. Later, in 1985, Goodner prepared another will for Davidson in which he was named coexecutor and from which he was dropped as residual beneficiary in favor of Davidson's nephews, John and William Forrester. Over the next three years, Davidson gave Goodner and his wife gifts totaling $60,000. Following Davidson's death in 1989, her 1984 will was admitted to probate. William Forrester challenged the will on the ground of undue influence and Davidson's allegedly unsound mind. After the will contest was filed, Goodner found Davidson's 1985 will behind a dishwasher in her house. A petition to admit the 1985 will to probate was filed, and that will was contested by Forrester on the same grounds—undue influence and unsound mind. The probate court decided that the 1985 will revoked the 1984 will and it admitted the 1985 will to probate and appointed Goodner as executor. The court also found that Davidson was "in all respects competent, and was not acting under restraint or undue influence." Forrester appealed, seeking to invalidate both the 1984 and the 1985 wills on the ground of lack of testamentary capacity and to have the estate pass by intestacy. Will he prevail?

3. Roy and Icie Johnson established two revocable *inter vivos* trusts in 1966. The trusts provided that upon Roy and Icie's deaths, income from the trusts was to be paid in equal shares to their two sons, James and Robert, for life. Upon the death of the survivor of the sons, the trust was to be *"divided equally between all of my grandchildren, per stirpes."* James had two daughters, Barbara and Elizabeth. Robert had four children, David, Rosalyn, Catherine, and Elizabeth. James and Robert disclaimed their interest in the trust in 1979, and a dispute arose about how the trust should be distributed to the grandchildren. The trustee filed an action seeking instructions on how the trusts should be distributed. What should the court hold?

4. Kenneth Haag owned Front Royal Supply Co. Smoot had worked for Haag as the manager of the Front Royal store for a number of years. Stickley was the manager of the company's Winchester store, but had not worked for Haag as long as Smoot had. Blye was assistant manager of the Winchester store, and had worked for the company for a lesser amount of time than had Stickley. Printz was also an employee of Haag's, but was fired in 1984–85. On January 20, 1983, Haag executed a holographic will. The will contained a specific bequest of stock to his employees who were still with Front Royal at the time of his death. Read the will as shown in Figure 4.

In October 1985, Haag executed a holographic codicil. This codicil provided that "In case Chs. Smoot is deceased or any other receipitent [*sic*] their stare [*sic*] will go back in the estate." Haag died in 1986. His will was admitted to probate, and his former wife, Helen, was named executor. At the time of Haag's death, he owned 689 shares of Front Royal stock, the value of which was at least $254,000. A dispute arose between Mrs. Haag, as executor, and Stickley and Blye about whether they were entitled to any shares. Mrs. Haag maintained that

Figure 4 *Haag's Will*

I hereby bequeath my shares of stock in Front Royal Supply Inc. as follows.
To Charles Smoot 500 shares
To John Stickley — shares
To Wayne Blye — shares

In case any of above are deceased or not working for Front Royal Supply Inc at the time of my death, their shares are to be divided equally among the survivors who are still with & working for Front Royal Supply Inc., to closest point. Odd share to go to person with longest service with Corp.

the will should be interpreted to give 500 shares of stock to Smoot, and none to Stickley and Blye, with the remaining 189 shares going into the residuary of the estate. Stickley and Blye filed this action asking the court to construe and interpret the will in order to determine their rights to the shares of stock. The court determined that Smoot should get the first 500 shares, and the remaining 189 shares should be divided equally between Stickley and Blye, with the odd share going to the person with longer service. Was this ruling correct?

5. Crawshaw bequeathed the bulk of his estate to two residuary beneficiaries, the Salvation Army and Marymount College. Crawshaw's will provided for 15 percent of the residue to go to the Salvation Army outright and 85 percent to Marymount College in trust. The stated purpose of this trust was to provide loans to nursing and other students at Marymount. Marymount ceased operation on June 30, 1989. It sought to have the trust funds directed to Marymount Memorial Educational Trust Fund. The Salvation Army challenged this, arguing that Crawshaw did not intend to benefit students attending colleges other than Marymount. It asked that the court distribute the trust funds to the Salvation Army as the remaining beneficiary of Crawshaw's residuary estate. What should the court do?

6. Tai-Kin Wong was a successful 44-year-old businessman who until just before death had a history of good health. He had never married and he had no children. He was living with his girlfriend Xi Zhao, and he enjoyed a close and loving relationship with his large family. On New Year's Eve in 1992, he took ill and died in a hospital emergency room of unexplained causes. Sometime after his death, found in his office was a sealed envelope, decorated with stickers and containing a handwritten note which read, "All Tai-Kin Wong's Xi Zhao, my best half TKW 12-31-92." This document—containing no subject, no verb, no description of property, and no indication of its subject matter or purpose—was found by the trial court to be a holographic will, passing Tai's entire estate to Xi. Tai's father, Kok-Cheong Wong, challenged the alleged will. Was this a valid will?

7. Fickes, a resident of Washington, died in December 1943, leaving a will dated November 19, 1940. The will provided for the creation of a trust upon his death. The will also provided that upon the death of Fickes's last surviving child, one-half of the trust property was to be distributed to Renssalaer Polytechnic Institute and the other half of the trust property distributed "in equal portions" between Fickes's "grandchildren then living." At the time of death of Fickes's last surviving child, there were four biological grandchildren living. In addition, there were four adopted grandchildren living. Two of them, grandsons, had been adopted by Fickes's son while Fickes was still living. The other two, granddaughters, were adopted by Fickes's son in 1962 and 1965, long after Fickes's death. Were the granddaughters entitled to share in the trust distribution?

- *E. Waiver of Lien*

In the United States, a substantial portion of business transactions involves the extension of credit. The term *credit* has many meanings. In this chapter, it will be used to mean transactions in which goods are sold, services are rendered, or money is loaned in exchange for a promise to repay the debt at some future date.

In some of these transactions, a creditor is willing to rely on the debtor's promise to pay at a later time; in others, the creditor wants some further assurance or security that the debtor will make good on his promise to pay. This chapter will discuss the differences between secured and unsecured credit and will detail various mechanisms that are available to the creditor who wants to obtain security. These mechanisms include obtaining liens or security interests in personal or real property, sureties, and guarantors. Security interests in real property, sureties and guarantors, and common law liens on personal property will be covered in this chapter, and the Uniform Commercial Code (UCC or Code) rules concerning security interests in personal property will be covered in Chapter 28, Security Interests in Personal Property. The last chapter in Part 6 deals with bankruptcy law, which may come into play when a debtor is unable to fulfill his obligation to pay his debts when they are due.

Credit

Unsecured Credit

Many common transactions are based on unsecured credit. For example, a person may have a charge account at a department store or a MasterCard account. If the person buys a sweater and charges it to his charge account or MasterCard account, unsecured credit has been extended to him. He has received goods in return for his promise to pay for them later. Similarly, if a person goes to a dentist to have a tooth filled and the dentist sends her a bill payable by the end of the month, services have been rendered on the basis of unsecured credit. Consumers are not the only people who use unsecured credit. Many transactions between businesspeople utilize it. For example, a retailer buys merchandise or a manufacturer buys raw materials, promising to pay for the merchandise or materials within 30 days after receipt.

The unsecured credit transaction involves a maximum of risk to the creditor—the person who extends the credit. When goods are delivered, services are rendered, or money is loaned on unsecured credit, the creditor gives up all rights in the goods, services, or money. In return, the creditor gets a promise by the debtor to pay or to perform the promised act. If the debtor does not pay or keep the promise, the creditor's options are more limited than if he had obtained security to ensure the debtor's performance. One course of action is to bring a lawsuit against the debtor and obtain a judgment. The creditor might then have the sheriff execute the judgment on any property owned by the debtor that is subject to execution. The creditor might also try to **garnish** the wages or other moneys to which the debtor is entitled. However, the debtor might be **judgment-proof;** that is, the debtor may not have any property subject to execution or may not have a steady job. Under these circumstances, execution or garnishment would be of little aid to the creditor in collecting the judgment.

A businessperson may obtain credit insurance to stabilize the credit risk of doing business on an unsecured credit basis. However, he passes the costs of the insurance to the business, or of the unsecured credit losses that the business sustains, on to the consumer. The consumer pays a higher price for goods or services purchased, or a higher interest rate on any money borrowed, from a business that has high credit losses.

Secured Credit

To minimize his credit risk, a creditor may contract for security. The creditor may require the debtor to convey to the creditor a security interest or lien on the debtor's property. Suppose a person borrows $3,000 from a credit union. The credit union might require her to put up her car as security for the loan or might ask that some other person agree to be liable if she defaults. For example, if a student who does not have a regular job goes to a bank to borrow money, the bank might ask that the student's father or mother cosign the note for the loan.

When the creditor has security for the credit he extends and the debtor defaults, the creditor can go against the security to collect the obligation. Assume that a person borrows $18,000 from a bank to buy a new car and that the bank takes a security interest (lien) on the car. If the person fails to make his monthly payments, the bank has the right to repossess the car and have it sold so that it can recover its money. Similarly, if the borrower's father cosigned for the car loan and the borrower defaults, the bank can sue the father to collect the balance due on the loan.

Development of Security

Various types of security devices have been developed as social and economic need for them has arisen. The rights and liabilities of the parties to a secured transaction depend on the nature of the security—that is, on whether (1) the security pledged is the promise of another person to pay if the debtor does not, or (2) a security interest in goods, intangibles, or real estate is conveyed as security for the payment of a debt or obligation.

If personal credit is pledged, the other person may guarantee the payment of the debt—that is, become a guarantor—or the other person may join the debtor in the debtor's promise to pay, in which case the other person would become surety for the debt.

The oldest and simplest security device was the pledge. To have a pledge valid against third persons with an interest in the goods, such as subsequent purchasers or creditors, it was necessary that the property used as security be delivered to the pledgee or a pledge holder. Upon default by the pledger, the pledgee had the right to sell the property and apply the proceeds to the payment of the debt.

Situations arose in which it was desirable to leave the property used as security in the possession of the debtor. To accomplish this objective, the debtor would

give the creditor a bill of sale to the property, thus passing title to the creditor. The bill of sale would provide that if the debtor performed his promise, the bill of sale would become null and void, thus revesting title to the property in the debtor. A secret lien on the goods was created by this device, and the early courts held that such a transaction was a fraud on third-party claimants and void as to them. An undisclosed or secret lien is unfair to creditors who might extend credit to the debtor on the strength of property that they see in the debtor's possession but that in fact is subject to the prior claim of another creditor. Statutes were enacted providing for the recording or filing of the bill of sale, which was later designated as a chattel mortgage. These statutes were not uniform in their provisions. Most of them set up formal requirements for the execution of the chattel mortgage and also stated the effect of recording or filing on the rights of third-party claimants.

To avoid the requirements for the execution and filing of the chattel mortgage, sellers of goods would sell the goods on a "conditional sales contract" under which the seller retained title to the goods until their purchase price had been paid in full. Upon default by the buyer, the seller could (a) repossess the goods or (b) pass title and recover a judgment for the unpaid balance of the purchase price. Abuses of this security device gave rise to some regulatory statutes. About one-half of the states enacted statutes providing that the conditional sales contract was void as to third parties unless it was filed or recorded.

No satisfactory device was developed whereby inventory could be used as security. The inherent difficulty is that inventory is intended to be sold and turned into cash and the creditor is interested in protecting his interest in the cash rather than in maintaining a lien on the sold goods. Field warehousing was used under the pledge, and an after-acquired property clause in a chattel mortgage on a stock of goods held for resale partially fulfilled this need. One of the devices used was the trust receipt. This short-term marketing security arrangement had its origin in the export–import trade. It was later used extensively as a means of financing retailers of consumer goods having a high unit value.

Security Interests in Personal Property

Chapter 28, Security Interests in Personal Property, will discuss how a creditor can obtain a security interest in the personal property or fixtures of a debtor. It will also explain the rights to the debtor's property of the creditor, the debtor, and other creditors of the debtor. These security interests are covered by Article 9 of the Uniform Commercial Code, which sets out a comprehensive scheme for regulating security interests in personal property and fixtures. The Code abolishes the old formal distinctions between different types of security devices used to create security interests in personal property.

Security Interests in Real Property

Three types of contractual security devices have been developed by which real estate may be used as security: (1) the real estate mortgage, (2) the trust deed, and (3) the land contract. In addition to these contract security devices, all of the states have enacted statutes granting the right to mechanic's liens on real estate. Security interests in real property are covered later in this chapter.

Suretyship and Guaranty

Sureties and Guarantors

As a condition of making a loan, granting credit, or employing someone (particularly as a fiduciary), a creditor may demand that the debtor, contractor, or employee provide as security for his performance the liability of a third person as surety or guarantor. The purpose of the contract of suretyship or guaranty is to provide the creditor with additional protection against loss in the event of default by the debtor, contractor, or employee.

A **surety** is a person who is *liable for the payment of another person's debt or for the performance of another person's duty.* The surety joins with the person primarily liable in promising to make the payment or to perform the duty. For example, Kathleen Kelly, who is 17 years old, buys a used car on credit from Harry's Used Cars. She signs a promissory note, agreeing to pay $75 a month on the note until the note is paid in full. Harry's has Kathleen's father cosign the note; thus, her father is a surety. Similarly, the city of Chicago hires the B&B Construction Company to build a new sewage treatment plant. The city will probably require B&B to have a surety agree to be liable for B&B's performance of its contract. There are insurance companies that, for a fee, will agree to be a surety on the contract of a company such as B&B.

If the person who is primarily liable (the principal) defaults, the surety is liable to pay or perform. Upon

default, the creditor may ask the surety to pay even if he has not asked the principal debtor to pay. If the surety makes good on his contract of suretyship, he is entitled to be reimbursed by the principal. While a contract of surety does not have to be in writing to be enforceable, it normally is.

A guaranty contract is similar to a suretyship contract in that the promisor agrees to answer for the obligation of another. However, a guarantor does not join the principal in making a promise; rather, a guarantor makes a separate promise and agrees to be liable upon the happening of a certain event. For example, a father tells a merchant, "I will guarantee payment of my daughter Rachel's debt to you if she does not pay it," or "If Rachel becomes bankrupt, I will guarantee payment of her debt to you." While a surety is *primarily liable,* a guarantor is *secondarily liable* and can be held to his guarantee only after the principal defaults and cannot be held to his promise or payment. Generally, a guarantor's promise must be made in writing to be enforceable under the statute of frauds.

The rights and liabilities of the surety and the guarantor are substantially the same. No distinction will be made between them in this chapter except where the distinction is of basic importance. Moreover, most commercial contracts and promissory notes today that are to be signed by multiple parties provide for the parties to be "jointly and severally" liable, thus making the surety relationship the predominate one.

Creation of Principal and Surety Relation

The relationship of principal and surety, or that of principal and guarantor, is created by contract. The basic rules of contract law apply in determining the existence and nature of the relationship as well as the rights and duties of the parties.

Defenses of a Surety

Suppose Jeffrey's mother agrees to be a surety for Jeffrey on his purchase of a motorcycle. If the motorcycle was defectively made and Jeffrey refuses to make further payments on it, the dealer might try to collect the balance due from Jeffrey's mother. As a surety, Jeffrey's mother can use any defenses against the dealer that Jeffrey has if they go to the merits of the primary contract. Thus, if Jeffrey has a valid defense of breach of warranty against the dealer, his mother can use it as a basis for not paying the dealer.

Other defenses that go to the merits include (1) lack or failure of consideration, (2) inducement of the contract by fraud or duress, and (3) breach of contract by the other party. Certain defenses of the principal cannot be used by the surety. These defenses include lack of capacity, such as minority or insanity, and bankruptcy. Thus, if Jeffrey is only 17 years old, the fact that he is a minor cannot be used by Jeffrey's mother to defend against the dealer. This defense of Jeffrey's lack of capacity to contract does not go to the merits of the contract between Jeffrey and the dealer and cannot be used by Jeffrey's mother.

A surety contracts to be responsible for the performance of the principal's obligation. If the principal and the creditor change that obligation by agreement, the surety is relieved of responsibility unless the surety agrees to the change. This is because the surety's obligation cannot be changed without his consent.

For example, Fredericks cosigns a note for his friend Kato, which she has given to Credit Union to secure a loan. Suppose the note was originally for $2,500 and payable in 12 months with interest at 11 percent a year. Credit Union and Kato later agree that Kato will have 24 months to repay the note but that the interest will be 13 percent per year. Unless Fredericks consents to this change, he is discharged from his responsibility as surety. The obligation he agreed to assume was altered by the changes in the repayment period and the interest rate.

The most common kind of change affecting a surety is an extension of time to perform the contract. If the creditor merely allows the principal more time without the surety's consent, this does not relieve the surety of responsibility. The surety's consent is required only where there is an actual binding agreement between the creditor and the principal as to the extension of time.

In addition, the courts usually make a distinction between **accommodation sureties** and **compensated sureties.** An accommodation surety is a person who acts as a surety without compensation, such as a friend who cosigns a note as a favor. A compensated surety is a person, usually a professional such as a bonding company, who is paid for serving as a surety.

The courts are more protective of accommodation sureties than of compensated sureties. Accommodation sureties are relieved of liability unless they consent to an extension of time. Compensated sureties, on the other hand, must show that they will be harmed by an extension of time before they are relieved of responsibility because of a binding extension without their consent. A compensated surety must show that a change in

the contract was both material and prejudicial to him if he is to be relieved of his obligation as surety.

Creditor's Duties to Surety

The creditor is required to disclose any material facts about the risk involved to the surety. If he does not do so, the surety is relieved of liability. For example, a bank (creditor) knows that an employee, Arthur, has been guilty of criminal conduct in the past. If the bank applies to a bonding company to obtain a bond on Arthur, the bank must disclose this information about Arthur. Similarly, suppose the bank has an employee, Alison, covered by a bond and discovers that Alison is embezzling money. If the bank agrees to give Alison another chance but does not report her actions to the bonding company, the bonding company is relieved of responsibility for further wrongful acts by Alison.

If the debtor posts security for the performance of an obligation, the creditor must not surrender the security without the consent of the surety. If the creditor does so, the surety is relieved of liability to the extent of the value surrendered.

In the following *New Jersey Economic Development Authority* case, the court rejected a claim by sureties that the creditors had violated their duty to the sureties.

New Jersey Economic Development Authority v. Pavonia Restaurant, Inc.

725 A.2d 1133 (N. J. Super. Ct., App. Div. 1998)

In June 1992, the New Jersey Economic Development Authority (EDA) and the Banque Nationale de Paris loaned $1,470,000 to Pavonia Restaurant, Inc. Pavonia was established to open and operate a new restaurant known as "Hudson's," to be located in a newly constructed eight-story office building in downtown Jersey City. Repayment of the loan was individually guaranteed by a number of individuals who were mostly professional and local businesspeople and, with one exception, were also stockholders in Pavonia.

To acquire the funds necessary to make the loan, the EDA issued and sold Economic Growth Bonds to investors. In order to encourage investment in the bonds, at the request of Pavonia and the guarantors, the bank issued an irrevocable letter of credit pursuant to which it agreed to repay the bondholders in the event Pavonia defaulted.

On June 1, 1992, Pavonia executed a loan agreement, a promissory note, financing statements, and a security agreement pledging its leasehold improvements and restaurant equipment as security for repayment of the loan (the loan documents). On the same date, the guarantors executed a Personal Guaranty Agreement under which they each agreed individually to guarantee repayment of the loan to EDA and the Bank.

Because of a four-month delay in the opening of the restaurant, insufficient advertising, a high-priced menu, staffing problems, and the shareholders' failure to make the necessary capital contributions, Pavonia ran into financial difficulty and the loan went into default. Consequently, as of August 19, 1994, the arrearages due from Pavonia to the EDA equaled $24,207.71, and EDA and the Bank sought payment from the guarantors in accordance with their guarantees.

Thereafter, Pavonia and the guarantors requested EDA and the Bank to forebear enforcement of their rights under the loan agreement and guarantees. EDA and the Bank agreed and, on October 17, 1994, the parties entered into a "Loan Forbearance Agreement." The agreement essentially provided that EDA and the Bank would not accelerate the loan balance for a period of time if Pavonia and the guarantors paid the delinquent amounts due and advanced monthly payments through December 1, 1994, totaling $312,970.19. In the agreement Pavonia and the guarantors acknowledged that Pavonia had defaulted on the loan, that they had not cured the default, and that they had no defenses to EDA's and the Bank's claims under the loan documents or individual guarantees.

On February 1, 1995, Pavonia again defaulted, and EDA and the Bank accelerated the loan balance. In a letter dated June 22, 1995, their counsel made a demand upon the guarantors for full payment of the loan or possession of the assets Pavonia had pledged as collateral. When the guarantors failed to respond, on July 2, 1995, EDA and the Bank filed suit against Pavonia and the guarantors seeking possession of the pledged assets and judgment in the amount of the loan balance, interest, counsel fees, and costs.

EDA and the Bank moved for summary judgment. The guarantors opposed the motion and asserted defenses grounded in fraud, bad faith, and allegations that EDA and the Bank had failed to disclose material

facts at the inception of the loan that materially increased their risk under the guarantees rendering them unenforceable. Specifically, guarantors alleged that from the inception of the loan, EDA and the Bank knew and failed to disclose (1) that Pavonia's assets were insufficient to secure the loan and (2) that EDA and the Bank were relying principally, if not exclusively, upon the guarantees as the source of repayment of the loan.

Eichen, Judge The guarantors claim that EDA and the Bank placed sole reliance on their individual guarantees for repayment of the loan. The record does not support that assertion. Rather, it reflects that both EDA and the Bank and the guarantors anticipated that the revenues from the restaurant would support repayment of the loan. The information concerning the anticipated revenues, was, in fact, derived form Pavonia's accountant, Sobel & Company. Although the guarantors maintain that the loan review document concluded that "no reliance could be placed on the 'collateral or cash flow generating ability of the restaurant,' " the record clearly belies this assertion. The record discloses that EDA and the Bank believed, based on the projections made by Pavonia's accountant, that the restaurant would generate sufficient cash flow to repay the loan. As Lloyd Cox, vice president of the Bank, indicated, the Bank never would have included the loan to Pavonia in the composite bond issue if it did not believe that Pavonia would be successful. Despite the guarantors' attempts to make it appear as though plaintiffs knew Pavonia would be unable to repay the loan and therefore insisted on the guarantees, nothing in the record supports this proposition. The guarantors have not pointed to any evidence that even suggests EDA and the Bank had information about Pavonia's ability to repay the loan which the guarantors did not have. Indeed, everyone understood that opening a restaurant in a new location was inherently risky business. EDA and the Bank hoped that the restaurant's success would comport with the financial projections of Pavonia's accountant just as the guarantors did. The obvious fact is that the external factors impeded Pavonia's success, factors which were completely unrelated to EDA and the Bank's evaluation of the loan agreements. Although Pavonia was unsuccessful in establishing a viable restaurant business, its successor, Laico's of Journal Square, has been successful.

In sum, the guarantors have utterly failed to demonstrate what facts EDA and the Bank had, but guarantors lacked, that materially increased the risk beyond that which EDA and the Bank knew the guarantors intended to assume.

Impliedly recognizing that they could not prove their case under these theories the guarantors argue that their claims are viable under the principles of law contained in the *Restatement of Security: Suretyship* section 124 (1941) (the *Restatement*). That section provides in relevant part:

> Where before [a] surety has undertaken his obligation the creditor knows facts unknown to the surety that materially increase the risk beyond that which the creditor has reason to believe the surety intends to assume, and the creditor also has reason to believe that these facts are unknown to the surety and has a reasonable opportunity to communicate them to the surety, failure of the creditor to notify the surety of such facts is a defense to the surety.

The guarantors argue that EDA and the Bank violated these principles of law by failing to disclose facts to them that materially increased their risk under the guarantees, specifically, that unbeknownst to the Guarantors, EDA and the Bank were relying on their guarantees as the primary security for repayment of the loan and failed to disclose this fact to them. They maintain they would not have undertaken the risk if they had known the guarantees were the principal security for the loan.

Section 124 prescribed three conditions precedent to imposing a duty on a creditor to disclose facts it knows about the debtor to the surety: (1) the creditor must have reason to believe that those facts materially increase the risk beyond that which the surety intends to assume; (2) the creditor must have reason to believe that the facts are unknown to the surety; and (3) the creditor must have a reasonable opportunity to notify the surety of such facts.

However, the comments to section 124 of the *Restatement* explain that:

> [this rule] does not place any burden on the creditor to investigate for the surety's benefit. It does not require the creditor to take any unusual steps to assure himself that the surety is acquainted with facts which he may assume are known to both of them.
>
> . . . .
>
> Every surety by the nature of his obligation undertakes risks which are the inevitable concomitants of

the transactions involved. Circumstances of the transactions vary the risks which will be regarded as normal and comtemplated by the surety.

For the reasons previously stated in our rejection of the guarantors' claims of fraud and bad faith, we are satisfied that the guarantors failed to raise any factual issue applying the principles derived from the *Restatement.* Suffice it to say, EDA and the Bank were not in possession of any facts that the guarantors were not aware of; both parties hoped the restaurant would generate sufficient cash flow to repay the loan. Regrettably, it did not.

Judgment affirmed for EDA and the Bank.

Subrogation, Reimbursement, and Contribution

If the surety has to perform or pay the principal's obligation, then the surety acquires all of the rights that the creditor had against the principal. This is known as the surety's **right of subrogation.** The rights acquired could include the right to any collateral in the possession of the creditor, any judgment right the creditor had against the principal on the obligation, and the rights of a creditor in bankruptcy proceedings.

If the surety performs or pays the principal's obligation, she is entitled to recover her costs from the principal; this is known as the surety's **right to reimbursement.** For example, Amado cosigns a promissory note for $250 at the credit union for her friend Anders. Anders defaults on the note, and the credit union collects $250 from Amado on her suretyship obligation. Amado then not only gets the credit union's rights against Anders under the right of subrogation, but also the right to collect $250 from Anders under the right of reimbursement.

Suppose several persons (Tom, Dick, and Harry) are cosureties of their friend Sam. When Sam defaults, Tom pays the whole obligation. Tom is entitled to collect one-third from both Dick and Harry since he paid more than his prorated share. This is known as the cosurety's **right to contribution.** The relative shares of cosureties, as well as any limitations on their liability, are normally set out in the contract of suretyship.

Liens on Personal Property

Common Law Liens

Under the common—or judge-made—law, artisans, innkeepers, and common carriers (such as airlines and trucking companies) were entitled to liens to secure the reasonable value of the services they performed. An artisan such as a furniture upholsterer or an auto mechanic uses his labor or materials to improve personal property that belongs to someone else. The improvement becomes part of the property and belongs to the owner of the property. Therefore, the artisan who made the improvement is given a **lien** on the property until he is paid.

For example, the upholsterer who recovers a sofa for a customer is entitled to a lien on the sofa. The innkeeper and common carrier are in business to serve the public and are required by law to do so. Under the common law, the innkeeper, to secure payment for his reasonable charges for food and lodging, was allowed to claim a lien on the property that the guest brought to the hotel or inn. Similarly, the common carrier, such as a trucking company, was allowed to claim a lien on the goods carried for the reasonable charges for the service. The justification for such liens was that the innkeeper and common carrier were entitled to the protection of a lien because they were required by law to provide the service to anyone seeking it.

Statutory Liens

While common law liens are still generally recognized today, many states have incorporated this concept into statutes. Some of the state statutes have created additional liens, while others have modified the common law liens to some extent. The statutes commonly provide a procedure for foreclosing the lien. **Foreclosure** is the method by which the rights of the property owner are cut off so that the lienholder can realize her security interest. Typically, the statutes provide for a court to authorize the sale of the personal property subject to the lien so that the creditor can obtain the money to which she is entitled.

Carriers' liens and warehousemen's liens are provided for in Article 7, Documents of Title, of the Uni-

form Commercial Code. They are covered in this text in Chapter 33, Checks and Documents of Title.

Characteristics of Liens

The common law lien and most of the statutory liens are known as **possessory liens.** They give the artisan or other lienholder the right to keep possession of the debtor's property until the reasonable charges for services have been paid. For the lien to come into play, possession of the goods must have been entrusted to the artisan. Suppose a person takes a chair to an upholsterer to have it repaired. The upholsterer can keep possession of the chair until the person pays the reasonable value of the repair work. However, if the upholsterer comes to the person's home to make the repair, the upholsterer would not have a lien on the chair as the person did not give up possession of it.

The two essential elements of the lien are: (1) possession by the improver or the provider of services and (2) a debt created by the improvement or the provision of services concerning the goods. If the artisan or other lienholder gives up the goods voluntarily, he loses the lien. For example, if a person has a new engine put in his car and the mechanic gives the car back to him before he pays for the engine, the mechanic loses the lien on the car to secure the person's payment for the work and materials. However, if the person uses a spare set of keys to regain possession, or does so by fraud or another illegal act, the lien is not lost. Once the debt has been paid, the lien is terminated and the artisan or other lienholder no longer has the right to retain the goods. If the artisan keeps the goods after the debt has been paid, or keeps the goods without the right to a lien, he is liable for conversion or unlawful detention of goods.

Another important aspect of common law liens is that the work or service must have been performed at the request of the owner of the property. If the work or service is performed without the consent of the owner, no lien is created.

The *Aircraft Repair Services* case which follows involves a situation in which the owner of property subject to a repairman's lien sought damages for breach of contract when the lien was asserted.

Aircraft Repair Services v. Stambaugh's Air Service, Inc.
175 F.3d 314 (3rd Cir. 1999)

Aircraft Repair Services (ARS) owned a Boeing 727 jet aircraft that had been kept in storage for an extended period of time, and needed to have it inspected and repaired. Pursuant to a proposal submitted by Stambaugh's Air Service, ARS retained Stambaugh's for this purpose. After Stambaugh's completed the repairs, ARS intended to lease the aircraft to Kiwi Airlines. Stambaugh's worked on the aircraft for approximately four months. After a test flight, Stambaugh's notified ARS that the aircraft would be ready by October 9, 1996, and that ARS should prepare to pay Stambaugh's repair charges and take possession of the aircraft.

On October 28, 1996, Stambaugh's submitted an invoice for $444,861.58, which it contended represented a substantial discount based on ARS's promise to give Stambaugh's additional work. ARS responded with a request for an additional credit of $151,437.56, claiming that Stambaugh's had performed unauthorized work. Because ARS refused to pay the amount Stambaugh's had billed it, Stambaugh's asserted a repairman's lien over the aircraft, refused to release the aircraft to ARS, and stated its intention to put the aircraft up for sale in satisfaction of its lien. ARS proposed to place the amount Stambaugh's claimed in escrow pending resolution of the dispute if Stambaugh's would release the aircraft. Stambaugh's rejected this suggestion.

On December 12, 1996, ARS filed in the District Court a complaint seeking replevin and damages for breach of contract. It also requested an emergency hearing to obtain a writ of replevin. In its answer, Stambaugh's asserted its repairman's lien as a defense, and counterclaimed for the amounts owed for repair charges, which it alleged to be $625,000.91. On December 18, the District Court held a hearing on the request for a writ of replevin, which it granted on the condition that ARS post a replevin bond in the amount of $1.25 million. On January 17, 1997, ARS posted the bond and took possession of the aircraft. Because of remaining problems with the aircraft and its logbooks, ARS paid additional sums for further repairs.

At trial, ARS contended that, by overstating the amount due for repairs, Stambaugh's had breached the contract between the parties. It argued that it was entitled to recover contract damages for its loss of use of the aircraft from the time Stambaugh's asserted its lien on the aircraft until ARS recovered it. Stambaugh's responded that, since it had retained possession of the aircraft lawfully under its repairman's lien, it could not be held liable for breach of contract. The District Court agreed with ARS, and instructed the jury accordingly.

The jury determined that Stambaugh's was entitled to recover $323,086.14 for its repair work, an amount which ARS at trial conceded it owed. It also found, however, that Stambaugh's had breached its duties under the contract and awarded ARS $343,017.27, apparently representing damages for both loss of use and the additional required repairs.

Stambaugh's appealed, contending that ARS was not entitled to recover damages for loss of use for the period before ARS posted a replevin bond.

Becker, Chief Judge In Pennsylvania, a common law lien permits one who adds to the value of another person's chattel by labor, skill or material, at the other's request, to retain the chattel until he or she is paid for the value of the services rendered. As one court has explained: "A person in possession of property under a lien is owner of it against all the world and no one may disturb his possession, even the actual owner, until the claim is paid."

When a repairman asserts such a lien, the actual owner has two options: the owner may satisfy the lien and then sue for return of the alleged overcharge, or bring an action for replevin. In the latter case, the owner may recover the property by bringing an action of replevin and requesting a writ of seizure. The plaintiff may recover the property pending a final decision on its claim pursuant to a writ of seizure by posting a bond for twice the value of the chattel, or such other amount as the court deems appropriate. The repairman then loses his or her legal right to retain the chattel pending resolution of the replevin action.

The repairman's liability for damages arising out of the repair work itself is unaffected by the validity of the repairman's lien. As in this case, the actual owner is entitled to recover its costs for further repairs required as a result of inadequacies in the repairman's work. But the lienor is liable for the actual owner's loss-of-use damages for the period during which the lienor is in possession of the property before the actual owner posts a replevin bond only if the lien is found invalid. Under Pennsylvania law (and common law in general), a repairman's lien is invalid only if the lienor asserts his or her claim fraudulently or in bad faith. Accordingly, in a replevin action, ARS could not obtain damages for loss of use of the aircraft during the period prior to its payment of the replevin bond in the absence of proof of bad faith or fraud on Stambaugh's part.

ARS concedes that this is the law in a replevin case. Ordinarily, such a concession would render this case relatively straightforward. But ARS submits that this was a breach-of-contract case, not a replevin case. Accordingly, ARS contends that it should be entitled to recover those breach of contract damages not ordinarily available in a replevin action. We disagree, believing that Pennsylvania would view this as a distinction without a difference.

The Supreme Court of Wyoming reached a similar conclusion in a case remarkably like this one. In *Rocky Mountain Turbines, Inc. v. 660 Syndicate, Inc.* (Wyo. 1981), an airplane owner brought a replevin action against a mechanic to obtain possession of its aircraft and for damages for unlawful possession of the aircraft. As in this case, the defendant raised a lien as a defense. Unlike the situation in this case, however, the mechanic refused to release the airplane even after the owner offered to post a bond for twice the value of the airplane. Such refusal was illegal, because a defendant who raises a lien as a defense to a replevin action cannot legally retain possession of the property once the plaintiff posts bond. Accordingly, the court held that the defendant had to pay the plaintiff damages for the period of time after the plaintiff offered to post bond. Significantly, however, the court did not award damages for the period prior to the plaintiff's offering to post a bond. Since the plaintiff's claim of unlawful detention for the period prior to the offer of bond in *Rocky Mountain* was identical to ARD's *Rocky Mountain* supports our conclusion.

We also find it significant that the repairman's lien itself arises out of the contractual relationship between the parties. Accordingly, we do not think that Stambaugh's can have breached the contract by asserting a valid lien which arises from that very contract.

Possessory liens are fundamentally consensual in nature, arising from an agreement, either express or implied, between the owner of the goods and the artisan who renders services for those goods. That possessory liens arise exclusively in the context of express or implied consent is long established in the jurisprudence of this commonwealth. Whenever a workman or artisan, by his labor or skill, increases the value of personal property placed in his possession to be improved he has a lien upon it for his proper charges until paid, but in order to charge a chattel with this lien, the labor for which the lien is claimed must have been done at the request of the owner or under circumstances from which his assent can be reasonably implied. It does not extend to one not in privity with the owners.

Finally, considerations of policy suggest that a plaintiff should not be able to recover damages for loss of use of a chattel retained by the defendant under a repairman's lien. ARS's argument would essentially eviscerate repairman's liens. ARS contends that a repairman need only be in beach of contract before there can be liability flowing from the assertion of the lien. We think that, if we accepted this theory, whenever a repairman attempted to enforce the lien by retaining the good pending payment, the owner of the good would sue the repairman under a contract theory for its lost use of the good while the repairman retains it. But the repairman's lien would then become almost meaningless: What repairman would attempt to enforce the lien if, in doing so, it opened itself up to potential liability much greater than the value of its lien? If, in this case, ARS had declined to post a bond until the trial nearly a year later, Stambaugh's might be liable for damages of nearly one million dollars, when its own claim was at most $625,000.91.

Judgment awarding damages to ARS reversed and remanded.

Foreclosure of Lien

The right of a lienholder to possess goods does not automatically give the lienholder the right to sell the goods or to claim ownership if his charges are not paid. Commonly, there is a procedure provided by statute for selling property once it has been held for a certain period of time. The lienholder is required to give notice to the debtor and to advertise the proposed sale by posting or publishing notices. If there is no statutory procedure, the lienholder must first bring a lawsuit against the debtor. After obtaining a judgment for his charges, the lienholder can have the sheriff seize the property and have it sold at a judicial sale.

Security Interests in Real Property

There are three basic contract devices for using real estate as security for an obligation: (1) the real estate mortgage, (2) the deed of trust, and (3) the land contract. In addition, the states have enacted statutes giving mechanics such as carpenters and plumbers, and materialmen such as lumberyards, a right to a lien on real property into which their labor or materials have been incorporated.

Historical Developments of Mortgages

A **mortgage** is a security interest in real property or a deed to real property that is given by the owner (the **mortgagor**) as security for a debt owed to the creditor (the **mortgagee**). The real estate mortgage was used as a form of security in England as early as the middle of the 12th century, but our present-day mortgage law developed from the common law mortgage of the 15th century. The common law mortgage was a deed that conveyed the land to the mortgagee, with the title to the land to return to the mortgagor upon payment of the debt secured by the mortgage. The mortgagee was given possession of the land during the term of the mortgage. If the mortgagor defaulted on the debt, the mortgagee's title to the land became absolute. The land

was forfeited as a penalty, but the forfeiture did not discharge the debt. In addition to keeping the land, the mortgagee could sue on the debt, recover a judgment, and seek to collect the debt.

The early equity courts did not favor the imposition of penalties and would relieve mortgagors from such forfeitures, provided that the mortgagor's default was minor and was due to causes beyond his control. Gradually, the courts became more lenient in permitting redemptions and allowed the mortgagor to **redeem** (reclaim his property) if he tendered performance without unreasonable delay. Finally, the courts of equity recognized the mortgagor's right to redeem as an absolute right that would continue until the mortgagee asked the court of equity to decree that the mortgagor's right to redeem be foreclosed and cut off. Our present law regarding the foreclosure of mortgages developed from this practice.

Today, the mortgage is generally viewed as a lien on land rather than a conveyance of title to the land. There are still some states where the mortgagor goes through the process of giving the mortgagee some sort of legal title to the property. Even in these states, however, the mortgagee's title is minimal and the real ownership of the property remains in the mortgagor.

Form, Execution, and Recording

Because the real estate mortgage conveys an interest in real property, it must be executed with the same formality as a deed. Unless it is executed with the required formalities, it will not be eligible for recording in the local land records. Recordation of the mortgage does not affect its validity as between the mortgagor and the mortgagee. However, if it is not recorded, it will not be effective against subsequent purchasers of the property or creditors, including other mortgagees, who have no notice of the earlier mortgage. It is important to the mortgagee that the mortgage be recorded so that the world will be on notice of the mortgagee's interest in the property. See Figure 1 for an example of a mortgage.

Rights and Liabilities

The owner (mortgagor) of property subject to a mortgage can sell the interest in the property without the consent of the mortgagee. However, the sale does not affect the mortgagee's interest in the property or the mortgagee's claim against the mortgagor. In some cases, the mortgage may provide that if the property is sold, then any remaining balance becomes immediately due and payable. This is known as a "due on sale" clause.

Suppose Erica Smith owns a lot on a lake. She wants to build a cottage on the land, so she borrows $55,000 from First National Bank. She signs a note for $55,000 and gives the bank a $55,000 mortgage on the land and cottage as security for her repayment of the loan. Several years later, Smith sells her land and cottage to Melinda Mason. The mortgage she gave First National might make the unpaid balance due on the mortgage payable on sale. If it does not, Smith can sell the property with the mortgage on it. If Mason defaults on making the mortgage payments, the bank can foreclose on the mortgage. If at the foreclosure sale the property does not bring enough money to cover the costs, interest, and balance due on the mortgage, First National is entitled to a deficiency judgment against Smith. However, some courts are reluctant to give deficiency judgments where real property is used as security for a debt. If on foreclosure the property sells for more than the debt, Mason is entitled to the surplus.

A purchaser of mortgaged property may buy it **subject to** the mortgage or may **assume** the mortgage. If she buys subject to the mortgage and there is a default and foreclosure, the purchaser is not personally liable for any deficiency. The property is liable for the mortgage debt and can be sold to satisfy it in case of default; in addition, the original mortgagor remains liable for its payment. If the buyer assumes the mortgage, then she becomes personally liable for the debt and for any deficiency on default and foreclosure.

The creditor (mortgagee) may assign his interest in the mortgaged property. To do this, the mortgagee must assign the mortgage as well as the debt for which the mortgage is security. In most jurisdictions, the negotiation of the note carries with it the right to the security and the holder of the note is entitled to the benefits of the mortgage.

Foreclosure

Foreclosure is the process by which any rights of the mortgagor or the current property owner are cut off. Foreclosure proceedings are regulated by statute in the state in which the property is located. In many states, two or more alternative methods of foreclosure are available to the mortgagee or his assignee. The methods in common use today are (1) strict foreclosure, (2) action and sale, and (3) power of sale.

Figure 1 *A Mortgage*

MORTGAGE

THIS INDENTURE, made this 18th day of October, A.D. 2000, BETWEEN Raymond A. Dole and Deborah H. Dole, hereinafter called the Mortgagor, and First Federal Savings and Loan Association, hereinafter called the Mortgagee,

WITNESSETH, That the said Mortgagor, for and in consideration of the sum of One Dollar, to us in hand paid by the said Mortgagee, the receipt whereof is hereby acknowledged, have granted, bargained, and sold to the said Mortgagee, its heirs and assigns forever, the following described land situate, lying and being in the County of Genesee, State of Michigan, to wit:

All that certain plot, piece, or parcel of land located in the County of Genesee, State of Michigan and known and described as Lot number Thirty-nine (39) in William D. Green's subdivision of part of Lot numbered Twenty-two (22) in Square numbered Twelve Hundred Nineteen (1219), as per plot recorded in the Office of the Surveyor for the County of Genesee in Liber 30 at folio 32, together with the buildings and improvements thereon, and the said Mortgagor do hereby fully warrant the title to said land, and will defend the same against the lawful claims of all persons whomsoever.

PROVIDED ALWAYS, That if said Mortgagor, their heirs, legal representatives, or assigns shall pay unto the said Mortgagee, its legal representatives or assigns, a certain promissory note dated the 18th day of October, A.D. 2000, for the sum of Thirty-eight Thousand Dollars ($38,000.00), payable in monthly installments of Three Hundred Fifteen Dollars ($315.00) with interest at ten percent (10%) beginning on November 18, 2000, and signed by Raymond A. Dole and Deborah H. Dole and shall perform, comply with, and abide by this mortgage, and shall pay all taxes which may accrue on said land and all costs and expenses said Mortgagee may be put to in collecting said promissory note by foreclosure of this mortgage or otherwise, including a reasonable attorney's fee, then this mortgage and the estate hereby created shall cease and be null and void.

IN WITNESS WHEREOF, the said Mortgagor hereunto set their hands and seals the day and year first above written. Signed, sealed, and delivered in presence of us:

John R. Bacon) Raymond A. Dole
James A. Brown) Deborah H. Dole

ACKNOWLEDGMENT OF MORTGAGE
State of Michigan)
County of Genesee) ss

I, an officer authorized to take acknowledgments according to the laws of the State of Michigan, duly qualified and acting, HEREBY CERTIFY that Raymond A. Dole and Deborah H. Dole to me personally known, this day personally appeared and acknowledged before me that they executed the foregoing Mortgage, and I further certify that I know the said persons making said acknowledgment to be the individuals described in and who executed the said Mortgage.

A small number of states permit what is called **strict foreclosure.** The creditor keeps the property in satisfaction of the debt, and the owner's rights are cut off. This means that the creditor has no right to a deficiency and the debtor has no right to any surplus. Strict foreclosure is normally limited to situations where the amount of the debt exceeds the value of the property.

Foreclosure by **action and sale** is permitted in all states, and it is the only method of foreclosure permitted in some states. Although the state statutes are not uniform, they are alike in their basic requirements. In a foreclosure by action and sale, suit is brought in a court having jurisdiction. Any party having a property interest that would be cut off by the foreclosure must

be made a defendant, and if any such party has a defense, he must enter his appearance and set up his defense. After the case is tried, a judgment is entered and a sale of the property ordered. The proceeds of the sale are applied to the payment of the mortgage debt, and any surplus is paid over to the mortgagor. If there is a deficiency, a deficiency judgment is, as a general rule, entered against the mortgagor and such other persons as are liable on the debt. Deficiency judgments are generally not permitted where the property sold is the residence of the debtor.

The right to foreclose under a **power of sale** must be expressly conferred on the mortgagee by the terms of the mortgage. If the procedure for the exercise of the power is set out in the mortgage, that procedure must be followed. Several states have enacted statutes that set out the procedure to be followed in the exercise of a power of sale. No court action is required. As a general rule, notice of the default and sale must be given to the mortgagor. After the statutory period, the sale may be held. The sale must be advertised, and it must be at auction. The sale must be conducted fairly, and an effort must be made to sell the property at the highest price obtainable. The proceeds of the sale are applied to the payment of costs, interest, and the principal of the debt. Any surplus must be paid to the mortgagor. If there is a deficiency and the mortgagee wishes to recover a judgment for the deficiency, she must bring suit on the debt.

Right of Redemption

At common law and under existing statutes, the mortgagor or an assignee of the mortgagor has what is called an **equity of redemption** in the mortgaged real estate. This means that he has the absolute right to discharge the mortgage when due and to have title to the mortgaged property restored free and clear of the mortgage debt. Under the statutes of all states, the mortgagor or any party having an interest in the mortgaged property that will be cut off by the foreclosure may redeem the property after default and before the mortgagee forecloses the mortgage. In several states, the mortgagor or any other party in interest is given by statute what is known as a redemption period (usually six months or one year, beginning either after the foreclosure proceedings are started or after a foreclosure sale of the mortgaged property has been made) in which to pay the mortgaged debt, costs, and interest and to redeem the property.

As a general rule, if a party in interest wishes to redeem, he must, if the redemption period runs after the foreclosure sale, pay to the purchaser at the foreclosure sale the amount that the purchaser has paid plus interest up to the time of redemption. If the redemption period runs before the sale, the party in interest must pay the amount of the debt plus the costs and interest. The person who wishes to redeem from a mortgage foreclosure sale must redeem the entire mortgage interest; he cannot redeem a partial interest by paying a proportionate amount of the debt or by paying a proportionate amount of the price bid at the foreclosure sale.

Deed of Trust

States typically use either the mortgage or the **deed of trust** as the primary mechanism for holding a security interest in real property. There are three parties to a deed of trust: (1) the owner of the property who borrows the money (the debtor), (2) the trustee who holds legal title to the property put up as security, and (3) the lender who is the beneficiary of the trust. The trustee serves as a fiduciary for both the creditor and the debtor. The purpose of the deed of trust is to make it easy for the security to be liquidated. However, most states treat the deed of trust like a mortgage in giving the borrower a relatively long period of time to redeem the property, thereby defeating this rationale for the arrangement.

In a deed of trust transaction, the borrower deeds to the trustee the property that is to be put up as security. See Figure 2 for an example of a deed of trust. The trust agreement usually gives the trustee the right to foreclose or sell the property if the debtor fails to make a required payment on the debt. Normally, the trustee does not sell the property until the lender notifies him that the borrower is in default and demands that the property be sold. The trustee must notify the debtor that he is in default and that the land will be sold. The trustee advertises the property for sale. After the statutory period, the trustee will sell the property at a public or private sale. The proceeds are applied to the costs of the foreclosure, interest, and debt. If there is a surplus, it is paid to the borrower. If there is a deficiency, the lender has to sue the borrower on the debt and recover a judgment.

Land Contracts

The **land contract** is a device for securing the balance due the seller on the purchase price of real estate. Essentially, it is an installment contract for the purchase of land. The buyer agrees to pay the purchase price

Figure 2 *A Deed of Trust*

DEED OF TRUST

THIS DEED made this 14th day of August, 2000, by and between Harold R. Holmes, grantor, party of the first part, and Frederick B. Cannon, trustee, party of the second part, and Sarah A Miles, party of the third part,

WITNESSETH:

The party of the first part does hereby grant unto the party of the second part, the following described property located in the District of Columbia and known as Lot number One Hundred Fourteen (114) in James B. Nicholson's subdivision in Square numbered Twelve Hundred Forty-seven (1247), formerly Square numbered Seventy-seven (77), "Georgetown," as per plat recorded in the Office of the Surveyor for the District of Columbia in Liber Georgetown 2 at folio 34, in trust, however, to secure the balance only of the purchase price of the above described premises, evidenced by the following described obligation:

Promissory note executed by the party of the first part, payable to the party of the third part and dated August 14, 2000, in the principal sum of Sixty-four Thousand Dollars ($64,000.00) bearing interest at the rate of ten percent (10%) per annum until paid. Said principal and interest are payable in monthly installments of Seven Hundred Thirty-five Dollars ($735.00) on the 14th day of each and every month beginning September 14, 2000, and continuing every month thereafter, with the unpaid balance of said principal and interest due and payable in full on August 14, 2010.

IN WITNESS WHEREOF, the party of the first part has set his hand and seal this the day and year first above written.

Harold R. Holmes

(SEAL)

Acknowledgment

This Deed of Trust accepted this 14th day of August, 2000.

Frederick B. Cannon

Trustee

over a period of time. The seller agrees to convey title to the property to the buyer when the full price is paid. Usually, the buyer takes possession of the property, pays the taxes, insures the property, and assumes the other obligations of an owner. However, the seller keeps legal title and does not turn over the deed until the purchase price is paid.

If the buyer defaults, the seller usually has the right to declare a forfeiture and take over possession of the property. The buyer's rights to the property are cut off at that point. Most states give the buyer on a land contract a limited period of time to redeem his interest. Moreover, some states require the seller to go through a foreclosure proceeding. Generally, the procedure for declaring a forfeiture and recovering property sold on a land contract is simpler and less time-consuming than foreclosure of a mortgage. In most states, the procedure in case of default is set out by statute. If the buyer, after default, voluntarily surrenders possession to the seller, no court procedure is necessary; the seller's title will become absolute, and the buyer's equity will be cut off.

Purchases of farm property are commonly financed through the use of land contracts. See Figure 3 for an example of a land contract. As an interest in real estate, a land contract should be in writing and recorded in the local land records so as to protect the interests of both parties.

As can be seen in the following case, *Looney v. Farmers Home Administration,* some courts have invoked the equitable doctrine against forfeitures and have required that the seller on a land contract must foreclose on the property in order to avoid injustice to a defaulting buyer.

Figure 3 *A Land Contract*

LAND CONTRACT

THIS AGREEMENT, made this 15th day of September, A.D. 2000, between Sarah A. Collins, a single woman, hereinafter designated "Vendor," and Robert H. Bowen, a single man, hereinafter designated "Vendee," in the manner following: The Vendor hereby agrees to sell and the Vendee agrees to buy all that certain piece or parcel of land being in the Township of Fenton, County of Genesee and State of Michigan, and more particularly described as follows:

Part of the Northeast 1/4 of the Northwest 1/4 of Section 20, Township 5 North, Range 5 East, described as follows: Beginning at a point on the North line of said Section 20, which is West along said North line, 797.72 feet from the North 1/4 corner of said Section 20; thence continuing West along said North line, 522.72 feet; thence South 0 degrees, 18 minutes, 12 seconds East along the West 1/8 line of said Section, 1000.0 feet; thence East parallel to the North line of said Section, 522.72 feet; thence North 0 degrees, 18 minutes, 12 seconds West parallel to said West 1/8 line 1000.0 feet to the point of beginning, containing 12.0 acres of land, more or less, and known as 1135 Long Lake Road.

Subject to all easements, laws, ordinances, reservations, applying to this property.

For the sum of Sixty-four Thousand Nine Hundred Dollars ($64,900.00), payable as follows: Ten Thousand Dollars ($10,000.00), cash in hand, receipt of which is hereby acknowledged before the signing of this contract and the balance payable as follows: Three Hundred Dollars ($300.00) or more payable on the 1st day of November, 2000, and a like amount on the 1st day of each and every month thereafter until the full sum of both interest and principal has been paid in full. Interest at the rate of ten percent (10%) per annum, starting October 1, 2000, shall be deducted from each and every monthly payment and the balance applied on the principal. The entire balance, both principal and interest, to be paid in full on or before 5 years from date of closing. It is understood and agreed that the above monthly payment includes taxes and insurance that may become due and payable subsequent to the date of this contract; said amounts to be paid by Vendor and added to the principal balance.

Vendee also agrees to pay all taxes and assessments extraordinary as well as ordinary that may be levied thereon, including taxes for the year 2000, and also deferred payments on special assessments that shall become due and payable after the date thereof to be prorated to date.

The Vendee agrees to keep the buildings upon or to be placed upon the premises insured against damage by fire and wind, in such company and amount as is approved by the Vendor, for the benefit of all parties in interest; such policies shall be delivered to and held by the Vendor.

And Vendee agrees to keep the buildings and other improvements on the premises in good repair. In case the Vendee shall fail to pay taxes, effect insurance, or make necessary repairs, the Vendor may do any or all of these things and the amount paid therefore by the Vendor shall be deemed a part of the principal sum under this contract and become payable immediately with interest at the rate of ten percent (10%) per annum until paid.

The Vendor on receiving payment in full of the principal and interest, and of all other sums chargeable under the contract, agrees, at his own proper cost and expense, to execute and deliver to the Vendee, or to his assigns, upon surrender of this contract, a good and sufficient conveyance in fee simple of the above described premises, free and clear of all liens and encumbrances, except such as may have accrued thereon subsequent to the date of this contract by or through the acts or negligences of others than the Vendor, and at the option of the Vendor furnish the Vendee an abstract of title or a policy of title insurance in an amount equal to the purchase price under this contract. The Vendor hereby reserves the right to mortgage said premises at any time in an amount not in excess of the amount then due on this contract, and the Vendee agrees that the said mortgage shall be a first lien on the premises.

It is mutually agreed that the Vendee shall have possession of said premises from and after October 1, 2000.

If the Vendee shall fail to comply with the terms of this contract, the Vendor may take possession of the property and all the improvements on it and treat the Vendee as a tenant holding over without permission and remove him therefrom and retain any money paid hereon as stipulated damages for nonperformance of this contract. It is hereby expressly understood and declared that time is and shall be taken as of the very essence of this contract. Notice of said forfeiture may be given by depositing the notice in post office, addressed to Vendee at his last known address.

It is agreed that the stipulations contained in this contract are to apply to and bind the heirs, executors, administrators, and assigns of the respective parties to this contract.

In witness whereof, the said parties have set their hands and seals the day and year first above written.

Signed, sealed and delivered in presence of:

Looney v. Farmers Home Administration *794 F.2d 310 (7th Cir. 1986)*

On October 7, 1976, Lowry and Helen McCord entered into a land contract to purchase a 260-acre farm from John and Esther Looney for $250,000. The contract specified that this was to be amortized over a 20-year period at an annual interest rate of 7 percent. The McCords were to make annual payments of $23,280 on November 15 of each year until the purchase price and all accrued interest was paid. They also agreed to pay real estate taxes, insurance, and maintenance costs for the property.

Four years later, the McCords received an economic emergency loan of $183,000 from the Farmers Home Administration (FmHA). They signed a promissory note for the amount of the loan with interest at 11 percent and, as security, also granted the FmHA a second mortgage on the land subject to the land sales contract.

The McCords subsequently defaulted on their obligations to the Looneys. At the time of the default, the McCords had paid $123,280 to the Looneys but still owed $249,360.12 on the contract price. At the time, the property was worth $455,000. The Looneys brought suit against the McCords and the FmHA seeking to eject the McCords from the property and forfeiture of the contract. The FmHA objected to the proposed forfeiture and argued that the court should order foreclosure proceedings.

The district court denied the FmHA's motion for foreclosure. It held that the traditional presumption under Indiana law did not apply because the McCords had made only minimal payments on the contract and had not paid their fall taxes or insurance installments. Because $249,360.12 was still owed on an initial base price of $250,000, the court found the McCords's equity to be $639.88, only .26 percent of the principal. The court therefore found forfeiture appropriate, awarded the FmHA $639.88, and extinguished the FmHA's mortgage. The FmHA appealed.

Cudahy, Circuit Judge Under Indiana law a conditional land sales contract is considered in the nature of a secured transaction, "the provisions of which are subject to all proper and just remedies at law and in equity." *Skendzel v. Marshall.* Recognizing the common law maxim that "equity abhors forfeitures," the *Skendzel* court concluded that "judicial foreclosure of a land sales contract is in consonance with the notions of equity developed in American jurisprudence." Foreclosure generally protects the rights of all parties to a contract. Upon judicial sale the proceeds are first applied to the balance of the contract principal and interest owed the seller. Then, any junior lienholders take their share. Any surplus goes to the buyer.

Skendzel recognized, however, two instances where forfeiture was the appropriate remedy:

> In the case of an abandoning, absconding vendee, forfeiture is a logical and equitable remedy. Forfeiture would also be appropriate where the vendee has paid a minimal amount on the contract at the time of default and seeks to retain possession while the vendor is paying taxes, insurance, and other upkeep in order to preserve the premises.

The district court did not rely on the first *Skendzel* exception in finding forfeiture appropriate. No evidence in the record supports such a finding.

If forfeiture is justified, then, it is only because the second *Skendzel* exception is met. This requires that the vendee have paid only a minimum amount on the contract at the time of default. In this case, the district court concluded that "this is patently a situation contemplated by the court in *Skendzel* in which forfeiture is the logical and equitable remedy."

However, the buyers in *Skendzel* had in fact paid more than a minimum amount on the contract and the court cited no examples of what would "patently" constitute a "minimum amount." Rather, later Indiana cases have interpreted *Skendzel* as requiring a case by case analysis that examines the totality of circumstances surrounding the contract and its performance. Here, while $123,280 was paid to the Looneys, the court considered all but $639.88 to be interest rather than a part of the contract price. The court equated contract price with what was paid to reduce principal. But nothing in Indiana law compels the district

court's construction of payments on the contract. On the contrary, several Indiana courts have considered and given weight to both payments to reduce principal and those to reduce interest in determining whether a buyer falls within the second *Skendzel* exception.

Even where no principal is paid, a buyer's stake in the property may be sufficient to justify foreclosure.Here, two uncontested affidavits indicate the property to be worth over $200,000 more than the McCords owe the Looneys. With the evidence of appreciation, the court was incorrect to conclusively value the McCords' equity at only $639.88.

When the second *Skendzel* exception has been invoked it frequently has been because the vendee is contributing to a decline in the value of the security. There is no allegation or evidence of waste in this case. Even the Looneys admit that the buyers "had paid substantial monies pursuant to the terms of the contracts." The Looneys received $123,280 and the McCords paid the necessary real estate taxes, insurance premiums and upkeep expenses for over six years. The Looneys make no showing that foreclosure would not satisfy their interest and the court below made no such determination. While foreclosure would appear to satisfy all parties' needs, forfeiture leaves the FmHA with a $639.88 recovery on a $183,800 loan. In view of the "totality of circumstances" this result seems inequitable.

Judgment reversed in favor of Farmers Home Administration.

Concept Review

Security Interests in Real Property

Type of Security Instrument	Parties	Features
Mortgage	1. Mortgagor (property owner/debtor) 2. Mortgagee (creditor)	1. Mortgagee holds a security interest (and in some states, title) in real property as security for a debt. 2. If mortgagor defaults on her obligation, mortgagee must *foreclose* on property to realize on his security interest. 3. Mortgagor has a limited time after foreclosure to *redeem* her interest.
Deed of Trust	1. Owner/debtor 2. Lender/creditor 3. Trustee	1. Trustee holds legal title to the real property put up as security. 2. If debt is satisfied, the trustee conveys property back to owner/debtor. 3. If debt is not paid as agreed, creditor notifies trustee to sell the property. 4. While intended to make foreclosure easier, most states treat it like a mortgage for purposes of foreclosure.
Land Contract	1. Buyer 2. Seller	1. Seller agrees to convey title when full price is paid. 2. Buyer usually takes possession, pays property taxes and insurance, and maintains the property. 3. If buyer defaults, seller may declare a forfeiture and retake possession (most states) after buyer has limited time to redeem; some states require foreclosure.

Mechanic's and Materialman's Liens

Each state has a statute that permits persons who contract to furnish labor or materials to improve real estate to claim a lien on the property until they are paid. There are many differences among states as to exactly who can claim such a lien and the requirements that must be met to do so.

Rights of Subcontractors and Materialmen

A general contractor is a person who has contracted with the owner to build, remodel, or improve real property. A subcontractor is a person who has contracted with the general contractor to perform a stipulated portion of the general contract. A materialman is a person who has contracted to furnish certain materials needed to perform a designated general contract.

Two distinct systems—the New York system and the Pennsylvania system—are followed by the states in allowing mechanic's liens on real estate to subcontractors and materialmen. The New York system is based on the theory of subrogation, and the subcontractors or materialmen cannot recover more than is owed to the contractor at the time they file a lien or give notice of a lien to the owner. Under the Pennsylvania system, the subcontractors or materialmen have direct liens and are entitled to liens for the value of labor and materials furnished, irrespective of the amount due from the owner to the contractor. Under the New York system, the general contractor's failure to perform his contract or his abandonment of the work has a direct effect on the lien rights of subcontractors and materialmen, whereas under the Pennsylvania system, such breach or abandonment by the general contractor does not directly affect the lien rights of subcontractors and materialmen.

Basis for Mechanic's or Materialman's Lien

Some state statutes provide that no lien shall be claimed unless the contract for the improvement is in writing and embodies a statement of the materials to be furnished and a description of the land on which the improvement is to take place and of the work to be done. Other states permit the contract to be oral, but in no state is a licensee or volunteer entitled to a lien. No lien can be claimed unless the work is done or the materials are furnished in the performance of a contract to improve specific real property. A sale of materials without reference to the improvement of specific real property does not entitle the person furnishing the materials to a lien on real property that is, in fact, improved by the use of the materials at some time after the sale.

Unless the state statute specifically includes submaterialmen, they are not entitled to a lien. For example, if a lumber dealer contracts to furnish the lumber for the erection of a specific building and orders from a sawmill a carload of lumber that is needed to fulfill the contract, the sawmill will not be entitled to a lien on the building in which the lumber is used unless the state statute expressly provides that submaterialmen are entitled to a lien.

At times, the question has arisen as to whether materials have been furnished. Some courts have held that the materialman must prove that the material furnished was actually incorporated into the structure. Under this ruling, if material delivered on the job is diverted by the general contractor or others and not incorporated into the structure, the materialman will not be entitled to a lien. Other courts have held that the materialman is entitled to a lien if he can provide proof that the material was delivered on the job under a contract to furnish the material.

Requirements for Obtaining Lien

The requirements for obtaining a mechanic's or materialman's lien must be complied with strictly. Although there is no uniformity in the statutes as to the requirements for obtaining a lien, the statutes generally require the filing of a notice of lien with a county official such as the register of deeds or the county clerk, which notice sets forth the amount claimed, the name of the owner, the names of the contractor and the claimant, and a description of the property. Frequently, the notice of lien must be verified by an affidavit of the claimant. In some states, a copy of the notice must be served on the owner or be posted on the property.

The notice of lien must be filed within a stipulated time. The time varies from 30 to 90 days, but the favored time is 60 days after the last work performed or after the last materials furnished. Some statutes distinguish between labor claims, materialmen's claims, and claims of general contractors as to time of filing. The lien, when filed, must be foreclosed within a specified time, which generally varies from six months to two years.

Priorities and Foreclosure

The provisions for priorities vary widely, but most of the statutes provide that a mechanic's lien has priority over all liens attaching after the first work is performed or after the first materials are furnished. This statutory provision creates a hidden lien on the property, in that a mechanic's lien, filed within the allotted period of time after completion of the work, attaches as of the time the first work is done or the first material is furnished, but no notice of lien need be filed during this period. And if no notice of lien is filed during this period, third persons would have no means of knowing of the existence of a lien. There are no priorities among lien claimants under the majority of the statutes.

The following case, *In Re Skyline Properties,* illustrates a number of issues that can arise when a mechanic's claim that he has a lien on certain property because of work he did concerning it is challenged by another party claiming a competing interest in the property.

In Re Skyline Properties, Inc. Century National Bank and Trust Co. v. Skyline Properties, Inc. *134 B.R. 830 (Bankr. W.D.Pa. 1992)*

In 1987, Skyline Properties commenced development of an integrated, multifaceted resort encompassing approximately 1,000 acres to be known as Hunter's Station. David Mealy was engaged to perform excavating and grading work on the project and commenced visible work on April 20, 1987. Mealy's work included bulldozing new roads, constructing parking areas, digging footers and drainage ditches, grading a basement for a new building used as a tack shop, excavation of crawl spaces for new additions to an existing building subsequently used as a sales office, grading an area for a new horse barn, and the installation of drains and fencing on the property. The sales office was substantially complete and opened for business on June 4, 1987, while work continued on construction of the tack shop.

On June 5, 1987, Century National Bank extended $150,000 credit to Skyline, took as collateral a mortgage on several of the parcels in the development, and recorded the mortgage on June 5, 1987. Mealy completed his work on August 3, 1987, and filed a notice of a mechanics' lien claim on September 23, 1987. Pennsylvania law requires that claims for such liens be filed within four months after the completion of the work.

In October 1988, the bank filed a mortgage foreclosure action against Skyline's property that it held as security for the loan. In September 1989, Mealy obtained a judgment on his claim and scheduled a Sheriff's sale of the Skyline property. The sale was halted by the filing of a involuntary petition in bankruptcy. One of the issues in the bankruptcy proceeding was the relative priority of the claims of the bank and Mealy to the Skyline property.

Bemtz, Bankruptcy Judge A mechanics' lien for services which constitute alterations and repairs takes effect and has priority as of the date the mechanics' lien claim is filed. 49 Pa. Stat. Ann. Sec. 1508(b). In the case of services constituting erection and construction, the lien of a claim takes effect and has priority "as of the date of the visible commencement upon the ground of the work of erecting or constructing the improvement." 49 Pa.Stat. Ann. Sec. 1508(a).

This matter involves the following relevant dates:

Visible commencement of construction:	April 20, 1987
Bank's mortgage:	June 5, 1987
Mealy Claim filed:	September 23, 1987

Thus, if Mealy's work is erection and construction, Mealy's claim has priority over the Bank; if the work is alteration or repair, the Bank's mortgage takes priority.

Section 1201(10) of the Mechanic's Lien Law defines "erection and construction" as follows:

> "Erection and construction" means the erection and construction of a new improvement or of a substantial addition to an existing improvement or any adaption of an existing improvement rendering the same fit for a new or distinct use and effecting a material change in the interior or exterior thereof.

The Bank asserts that no buildings were erected or constructed in conjunction with Mealy's work and Mealy's lien is for alterations and repairs. Thus

the Bank asserts that Mealy's lien takes priority as of the date of filing of the Claim and not the date of visible commencement of the work.

The concern in determining whether the work is "erection and construction" or "alterations or repairs" is whether a substantial change to the existing structure has occurred such that any third party, such as the Bank, would be on notice that potential liens could exist. A change in the appearance or use of a building is sufficient to give such notice.

In the present case, the evidence reveals that a farmhouse on the property, formerly used as a residential dwelling, was converted into a sales office used to sell ownership interests in the development. Skyline converted an existing farmhouse into a sales office by essentially "gutting" the structure and constructing additions to the original dwelling. The appearance of the house was transformed into a commercial building and the use was altogether different. The addition to the building made it substantially larger than it had been as a private residence. The additions are substantial enough to be considered new construction. The work was substantially completed and the sales office open for business on June 4, 1987, one day *before* the Bank recorded its mortgage. Had the Bank, which was aware of the scope of the planned construction, viewed the property at the time it recorded its mortgage, it certainly would have known that potential liens could exist.

The tack shop was built on existing concrete blocks which had served as the foundation for a building that had previously fallen down or been removed. The tack shop has both a "new use" and a "new appearance" and constitutes erection and construction.

Grading and excavation is the type of work which is properly lienable as incident to the erection or construction of an improvement. Another way of stating the test utilized by the Pennsylvania courts in determining whether a certain type of work is lienable is whether the work is incident to the construction of an improvement. Mealy graded the area for four structures—the sales office, the tack shop, the horse barn and arena, and the guardhouse. Mealy dug footers and drainage ditches for the sales office and the guardhouse and installed drains for the tack shop. The work Mealy performed was incident to the construction of these improvements and also designed to enhance their value.

Mealy's lienable work, incident to the erection and construction of four structures, as opposed to merely alteration and repair, entitles Mealy to a claim which relates back in time to the date upon which work was commenced and therefore, is prior to the Bank's mortgage interest.

Order upholding Mealy's lien claim.

The procedure followed in the foreclosure of a mechanic's lien on real estate follows closely the procedure followed in a court foreclosure of a real estate mortgage. The rights acquired by the filing of a lien and the extent of the property covered by the lien are set out in some of the mechanic's lien statutes. In general, the lien attaches only to the interest that the person has in the property that has been improved at the time the notice is filed. Some statutes provide that the lien attaches to the building and to the city lot on which the building stands, or if the improvement is to farm property, the lien attaches to a specified amount of land.

Waiver of Lien

The question often arises as to the effect of an express provision in a contract for the improvement of real estate that no lien shall attach to the property for the cost of the improvement. In some states, there is a statute requiring the recording or filing of the contract and making such a provision ineffective if the statute is not complied with. In some states, courts have held that such a provision is effective against everyone; in other states, courts have held that the provision is ineffective against everyone except the contractor; and in still other states, courts have held that such a provision is ineffective as to subcontractors, materialmen, and laborers. Whether the parties to the contract have notice of the waiver of lien provision plays an important part in several states in determining their right to a lien.

It is common practice that before a person who is having improvements made to his property makes final payment, he requires the contractor to sign an

affidavit that all materialmen and subcontractors have been paid and to supply him with a release of lien signed by the subcontractors and materialmen.

Ethical and Public Policy Concerns

1. Suppose you operate an appliance store in an inner city neighborhood. Many of your potential customers do not have sufficient income to pay cash for goods such as television sets, VCRs, and stereo sets and they also have difficulty qualifying for credit cards or store charge accounts. You develop a "lease to buy" sales program whereby you offer those prospective customers the opportunity to lease a TV, VCR, or stereo on a weekly rental basis and after they have leased it for two years, they will be the owner of it. The total amount they would pay as rent for the item over the two years is about three times the retail cash price for the item. This element is not disclosed in your ads; rather, the focus is on the "opportunity to own" and the "low weekly payment." What ethical considerations are involved in your proposed sales program?

2. Suppose you own and operate a small loan business. A young man applies for a $1,000 loan. When you run a credit check on him, you find that he has had difficulty holding a job and has a terrible credit record. You conclude that he is a poor credit risk and inform him that you are willing to make the requested loan only if he can find someone who has a good credit rating to cosign a promissory note with him. The next day he comes by the office with a young woman who meets your criteria for a good credit rating and who indicates she is willing to cosign the note. Do you have any ethical obligation to share with the young woman the information you have about the young man's employment and credit history?

3. Suppose you have sold a farm to a young couple on a land contract that calls for them to pay off the purchase price over a 10-year period. After the couple has paid about a third of the purchase price, a serious drought damages their crop and they miss several payments, triggering your right to declare a default and reclaim possession of the property. Are there any ethical considerations involved in your taking such an action that you are otherwise legally entitled to take? If you proceed with a forfeiture action in court, what policy considerations should the court take into account in deciding whether to grant your request?

Problem and Problem Cases

1. Mr. and Mrs. Marshall went to Beneficial Finance to borrow money but were deemed by Beneficial's office manager, Puckett, to be bad credit risks. The Marshalls stated that their friend Garren would be willing to cosign a note for them if necessary. Puckett advised Garren not to cosign because the Marshalls were bad credit risks. This did not dissuade Garren from cosigning a note for $480 but it prompted him to ask Beneficial to take a lien or security interest in Marshall's custom-built Harley-Davidson motorcycle, then worth over $1,000. Beneficial took and perfected a security interest in the motorcycle. Marshall defaulted on the first payment. Beneficial gave notice of the default to Garren and advised him that it was looking to him for payment. Garren then discovered that Beneficial and Marshall had reached an agreement whereby Marshall would sell his motorcycle for $700; he was to receive $345 immediately, which was to be applied to the loan, and he promised to pay the balance of the loan from his pocket. Marshall paid Beneficial $89.50 and left town without giving the proceeds of the sale to Beneficial. Because Beneficial was unable to get the proceeds from Marshall, it brought suit against Garren on his obligation as surety. When Beneficial released the security for the loan (the motorcycle) without Garren's consent, was Garren relieved of his obligation as surety for repayment of the loan?

2. Rusty Jones, a used car dealer, applied to First Financial Federal Savings and Loan Association for a $50,000 line of credit to purchase an inventory of used cars. First Financial refused to make the loan to Jones alone but agreed to do so if Worth Camp, an attorney and friend of Jones, would cosign the note. Camp agreed to cosign as an accommodation maker or surety. The expectation of the parties was that the loans cosigned by Camp would be repaid from the proceeds of the car inventory. The original note for $25,000 was signed on August 2, 1994, and renewals were executed on January 25, 1995, September 11, 1995, and March 15, 1996, and the amount was eventually increased to $50,000. In August 1995, as Camp was considering whether to sign the September renewal note, he was advised by First Financial's loan officer that the interest on the loan had been paid. In fact, interest payments were four months delinquent. In addition, unknown to Camp, as the $50,000 credit limit was approached, First

Financial began making side, or personal, loans to Jones totaling about $25,000, which were also payable out of the used car inventory. Camp knew nothing of these loans and thought that Jone's used car business was making payments only on the loans he had cosigned. Jones defaulted on the $50,000 note cosigned by Camp and First Financial brought suit against Camp on his obligation as surety on the note. Was Camp relieved of his obligation as surety by First Financial's failure to disclose material facts to him?

3. Wieslaw Wik was the owner of a truck tractor on which Navistar Financial Corporation held a lien to secure a purchase loan agreement. On February 21, Wik was driving his truck tractor and pulling a trailer owned by the V. Seng Teaming Company. The tractor/trailer unit overturned in a ditch. Allen's Corner Garage and Towing Service was called by the Illinois State Police. Its crew removed the cargo from the trailer and hoisted the tractor and trailer out of the ditch and onto the highway. They then took the truck, trailer, and cargo to Allen's garage for storage. The uprighting and towing of semitrailer trucks is an intricate process and involves a good deal of specialized equipment. Allen's was licensed by the Interstate Commerce Commission and the Illinois Commerce Commission as a common carrier and owned over 50 specialized trucks and trailers for such operations. Wik defaulted on his loan agreement with Navistar and the right to possession passed to Navistar. One of its employees contacted Allen's and offered to pay the towing plus storage charges on the truck in exchange for possession of it. Allen's refused, saying it would not release the truck unless the charges for the truck, trailer, and cargo were all paid. Navistar then brought suit against Allen's to recover possession of the truck.

Subsequently, V. Seng Teaming Company paid $13,000 in towing and storage charges on the trailer and cargo and took possession of them. Navistar then reiterated its willingness to pay the towing charges but refused to pay any storage charges accruing after its initial offer. Was Allen's entitled to a common law lien for its towing and storage charges?

4. During May and June, John Shumate regularly parked his automobile on a vacant lot in downtown Philadelphia. At that time, no signs were posted prohibiting parking on the lot or indicating that vehicles parked there without authorization would be towed. On July 7, Shumate again left his car on the lot. When he returned two days later, the car was gone and the lot was posted with signs warning that parking was prohibited. Shumate learned that his car had been towed away by Ruffie's Towing Service and that the car was being held by Ruffie's at its place of business. Ruffie's refused to release the car until Shumate paid a towing fee of $44.50 plus storage charges of $4 per day. Shumate refused to pay the fee, and Ruffie's kept possession of the car. Did Ruffie's have a common law possessory lien on the car?

5. Betty Nelson signed a promissory note payable to Family Bank in return for a loan the bank had made to her. The note was secured by a deed of trust on a duplex owned by Nelson. When the note was signed, the duplex was rented to third parties. Nelson defaulted on the note and Family Bank filed a complaint to foreclose the trust deed. Nelson advised the bank that she and her son were occupying the duplex as their residence. Under Orgeon law, a lender can obtain a deficiency judgment in connection with the foreclosure of a commercial deed of trust; however, a deficiency judgment is not available in connection with the foreclosure of a noncommercial (residential) deed of trust. If Family Bank went forward with foreclosure of the deed of trust, could it obtain a deficiency judgment against Nelson if the sale of the property produced less than the amount of the debt?

6. Philip and Edith Beh purchased some property from Alfred M. Gromer and his wife. Sometime earlier, the Gromers had borrowed money from City Mortgage. They had signed a note and had given City Mortgage a second deed of trust on the property. There was also a first deed of trust on the property at the time the Behs purchased it. In the contract of sale between the Behs and the Gromers, the Behs promised to "assume" the second deed of trust of approximately $5,000 at 6 percent interest. The Behs later defaulted on the first deed of trust. Foreclosure was held on the first deed of trust, but the proceeds of the sale left nothing for City Mortgage on its second deed of trust. City Mortgage then brought a lawsuit against the Behs to collect the balance due on the second deed of trust. When the Behs "assumed" the second deed of trust, did they become personally liable for it?

7. Pope agreed to sell certain land to Pelz and retained a mortgage on the property to secure payment of the purchase price. The mortgage contained a clause providing that if Pelz defaulted, Pope had the "right to

enter upon the above-described premises and sell the same at public sale" to pay the balance of the purchase price, accounting to Pelz for any surplus realized on the sale. What type of foreclosure does this provision contemplate: (1) strict foreclosure, (2) action and sale, or (3) private power of sale?

8. In October 1992, Verda Miller sold her 107-acre farm for $30,000 to Donald Kimball, who was acting on behalf of his own closely held corporation, American Wonderlands. Under the agreement, Miller retained title and Kimball was given possession pending full payment of all installments of the purchase price. The contract provided that Kimball was to pay all real estate taxes. If he did not pay them, Miller could discharge them and either add the amounts to the unpaid principal or demand immediate payment of the delinquencies plus interest. Miller also had the right to declare a forfeiture of the contract and regain possession if the terms of the agreement were not met. In 1995, Miller had to pay the real estate taxes on the property in the amount of $672.78. She demanded payment of this amount plus interest from Kimball. She also served a notice of forfeiture on him that he had 30 days to pay. Kimball paid the taxes but refused to pay interest of $10.48. Miller made continued demands on Kimball for two months, then filed notice of forfeiture with the county recorder in August 1995. She also advised Kimball of this. Was Miller justified in declaring a forfeiture and taking back possession of the land?

9. Edwin Bull was the owner of an 80-foot fishing trawler named the *Bull Head* that had been leased for use in dismantling a bridge over the Illinois River at Pekin, Illinois. At the termination of the lease, the *Bull Head* was towed upriver to Morris, Illinois, not operating on its own power. At Morris, a tugboat owned by Iowa Marine Repair Corporation was used to remove the *Bull Head* from the tow and to move it to the south bank of the river where it was tied up. Several months later, the *Bull Head* was moved across the river by Iowa Marine and moored at a place on the north bank where it maintained its fleeting operations. The *Bull Head* remained there for several years and greatly deteriorated. Iowa Marine sent Bull a bill for switching, fleeting, and other services. Bull refused to pay and brought suit against Iowa Marine to recover possession of the boat. In turn, Iowa Marine claimed that it had a mechanic's lien on the *Bull Head* and that the boat should be sold to satisfy the lien. Illinois law provides that:

> any architect, contractor, subcontractor, materialman, or other person furnishing services, labor, or material for the purpose of, or in constructing, building, altering, repairing or ornamenting a boat, barge, or watercraft shall have a lien on such boat for the value of such services, labor, or material in the same manner as in this act provided for the purpose of building, altering, repairing, or ornamenting a house or other building.

Does Iowa Marine have a valid mechanic's lien on the boat for its switching, fleeting, and storage services?

10. Albert Sharkey was the owner of a commercial building that was leased to Consolidated Freightways for more than 10 years before the lease was terminated by Consolidated on October 25, 1992. Consolidated's lease with Sharkey provided that Consolidated would leave the property in as good condition as received. Consolidated was responsible for damaging 10 overhead doors and contacted Dewco Building Systems to repair the damage. Dewco ordered new doors from Overhead. Overhead specially ordered the doors and paid for them on delivery from the manufacturer. On March 18, 1993, Overhead submitted its bill to Dewco. Overhead was unable to collect since Dewco had gone out of business and filed for bankruptcy. Dewco had already collected $10,397 from Consolidated and owed $6,685 to Overhead. On May 10, 1993, Overhead filed a mechanic's lien against Sharkey's property and brought a lawsuit to enforce the lien. Iowa Code Section 572.2 provides that:

> Every person who shall furnish any material or labor for, or perform any labor, upon any building or land for improvement, alteration or repair thereof, including those engaged in the construction or repair of any work of internal or external improvement . . . by virtue of any contract with the owner, his agent, trustee, contractor, or subcontractor shall have a lien upon such building or improvement, and land belonging to the owner on which the same is situated . . . , to secure payment for material or labor furnished or labor performed.

Does Overhead have a valid claim for a mechanic's lien on Sharkey's property?

- *G. Constitutional Requirements in Regard to Repossession*

In many credit transactions the creditor, in order to protect his investment, takes a security interest, or lien, in personal property belonging to the debtor. The law covering security interests in personal property is set forth in Article 9 of the Uniform Commercial Code. Article 9, entitled Secured Transactions, applies to situations that consumers and businesspeople commonly face; for example, the financing of an automobile, the purchase of a refrigerator on a time-payment plan, or the financing of business inventory.

Article 9

If a creditor wants to obtain a security interest in the personal property of the debtor, he also wants to be sure that his interest is superior to the claims of other creditors. To do so, the creditor must carefully comply with Article 9. In Part 4 of this text, Sales, we pointed out that businesspersons sometimes leave out important terms in a contract or insert vague terms to be worked out later.

Such looseness is a luxury that is not permitted in secured transactions. If a debtor gets into financial difficulties and cannot meet her obligations, even a minor noncompliance with Article 9 may cause the creditor to lose his preferred claim to the personal property of the debtor. A creditor who loses his secured interest is only a general creditor if the debtor is declared bankrupt. As a general creditor in bankruptcy proceedings, he may have little chance of recovering the money owed by the debtor because of the relatively low priority of such claims. Chapter 29, Bankruptcy, covers this in detail.

Article 9 has not been adopted in exactly the same form in every state. The law of each state must be examined carefully to determine the procedure for obtaining a secured interest and the rights of creditors and debtors in that state. The general concepts are the same in every state, however, and these concepts are the basis of our discussion in this chapter.

In 1999, a revision of Article 9 became available for adoption by state legislatures which does not become effective until July 1, 2001, or later (depending on the date(s) of adoption). As of the publication of this edition, a minority of the states have adopted the 1999 revision to Article 9. Revised Article 9 retains the general concepts described in this chapter but it also provides numerous special rules for specific types of personal property, such as deposit accounts. As states adopt the revision, you should be alert to the fact that some of the rules described below may change.

Security Interests under the Code

Security Interests

Basic to a discussion of secured consumer and commercial transactions is the term **security interest.** A security interest is an interest in personal property or fixtures obtained by a creditor to secure payment or performance of an obligation [1–201(37)].[1] For example, when a person borrows money from a bank to buy a new car, the bank takes a security interest, or puts a lien, on the car until the loan is repaid. If the person defaults on the loan, the bank can repossess the car and have it sold to cover the unpaid balance. A security interest is a property interest in the collateral.

[1]The numbers in brackets refer to sections of the Uniform Commercial Code.

While one usually thinks of goods as being put up as collateral, the Code actually covers secured interests in a much broader grouping of personal property. The Code breaks down personal property into a number of different classifications that are important in determining how a creditor acquires an enforceable security interest in a particular collateral. The Code classifications are:

1. *Instruments.* This category includes checks, notes, drafts, stocks, bonds, and other evidences of money debts that are not themselves security agreements or leases and are ordinarily transferred by delivery with any necessary indorsement or assignment. [9–105(I)(i)].

2. *Documents of title.* This category includes bills of lading, dock warrants, dock receipts, and warehouse receipts.

3. *Accounts.* This category includes rights to payment for goods sold or leased or for services rendered that are not evidenced by instruments or chattel paper but are carried on open account. The category includes such rights to payment whether or not they have been earned by performance [9–106].

4. *Chattel paper.* This category includes written documents that evidence both an obligation to pay money and a security interest in specific goods [9–105]. A typical example of chattel paper is what is commonly known as a conditional sales contract. This is the type of contract that a consumer might sign when she buys a large appliance such as a refrigerator on a time-payment plan. Sellers use these obligations to help them finance their inventory.

5. *General intangibles.* Among the items in this catchall category are patents, copyrights, literary royalty rights, franchises, and money [9–106].

6. *Investment property.* This category includes securities and commodities ownership in various forms [9–115(1)]

7. *Goods.* Goods are divided into several classes; the same item of collateral may fall into different classes at different times, depending on its use.

a. Consumer goods. These goods are used or bought for use primarily for personal, family, or household purposes. They include automobiles, furniture, and appliances.

b. Equipment. This includes goods used or bought for use primarily in business, including farming and professions.

c. Farm products. These are crops, livestock, or supplies used or produced in farming operations as

long as they are still in the possession of a debtor engaged in farming.

d. *Inventory.* This includes goods held for sale or lease or for use under contracts of service as well as raw materials, work in process, and materials used or consumed in a business. [9–109].

e. *Fixtures*. These are goods so affixed to real property as to be considered a part of it [9–313(1)].

In different situations, an item such as a stove could be classified as inventory, equipment, consumer goods, or a fixture. In the hands of the manufacturer or an appliance store, the stove is "inventory" goods. If it is used in a restaurant, it is "equipment." If it was purchased by a consumer for use in her home, it is "consumer goods"or even a "fixture."

Obtaining a Security Interest

The goal of a creditor is to obtain a security interest in certain personal property that will be good against: (1) the debtor, (2) other creditors of the debtor, and (3) a person who might purchase the property from the debtor. In case the debtor defaults on the debt, the creditor wants to have a better right to claim the property than anyone else. Obtaining an enforceable security interest is a two-step process—attachment and perfection.

Attachment of the Security Interest

Attachment

A security interest is not legally enforceable against a debtor until it is attached to one or more particular items of the debtor's property. The **attachment** of the security interest takes place in a legal sense rather than in a physical sense. There are three basic requirements for a security interest to be attached to the goods of a debtor [9–203]. First is an *agreement* in which the debtor grants the creditor a security interest in particular property (collateral) in which the debtor has an interest. Second, the debtor must have *rights in the collateral.* Third, the creditor must give value to the debtor. The creditor must, for example, lend money or advance goods on credit to the debtor. Unless the debtor owes a debt to the creditor, there can be no security interest. The purpose of obtaining a security interest is to secure a debt.

The Security Agreement

The agreement in which a debtor grants a creditor a security interest in the debtor's property must generally be in writing and signed by the debtor. A written agreement is required in all cases except where the creditor has possession of the collateral [9–203]. Suppose Cole borrows $50 from Fox and gives Fox her wristwatch as a security for the loan. The agreement whereby Cole put up her watch as collateral does not have to be in writing to be enforceable. Because the creditor (Fox) is in possession of the collateral, an oral agreement is sufficient.

The security agreement must reasonably describe the collateral so that it can readily be identified. For example, it should list the year, make, and serial number of an automobile. The security agreement usually spells out the terms of the arrangement between the creditor and the debtor. Also, it normally contains a promise by the debtor to pay certain amounts of money in a certain way. The agreement specifies which events, such as nonpayment by the buyer, constitute a default. In addition, it may contain provisions that the creditor feels are necessary to protect his security interest. For example, the debtor may be required to keep the collateral insured, not to move it without the creditor's consent, or to periodically report sales of secured inventory goods. See Figure 1 for an example of a security agreement.

In the *Sears, Roebuck* case that follows, Sears was deemed to have obtained a valid security agreement

Sears Roebuck & Co. v. Silch *28 UCC Rep.2d 1995 (Mo. Ct. App. 1995)*

On May 19, 1990, Richard Silch purchased a camcorder at Sears Roebuck by charging it to his Sears charge account. Printed on the face of the sales ticket made at that time was the following:

This credit purchase is subject to the terms of my Sears Charge Agreement which is incorporated herein by reference and identified by the above account number. I grant Sears a security interest or lien in this merchandise, unless prohibited by law, until paid in full.

Silch's signature appeared immediately below that language on the sales ticket. The ticket also contained the brand name of the camcorder and a stock number.

Silch subsequently filed a Chapter 7 bankruptcy proceeding. Sears filed a petition to recover the camcorder from Silch, contending that it had a valid and enforceable security interest in the camcorder. The trial court ruled for Silch, holding that as a matter of law the sales ticket did not constitute a valid and enforceable security agreement. Sears appealed.

Garrison, Presiding Judge The parties agree that the controlling issue here is whether the sales ticket constituted a valid security agreement which resulted in Sears having an enforceable security interest in the camcorder. Section 9–203 provides, in pertinent part:

> (1) . . . a security interest is not enforceable against the debtor or third parties with respect to the collateral and does not attach unless
> (a) . . . the debtor has signed a security agreement which contains a description of the collateral . . .
> (b) value has been given; and
> (c) the debtor has rights in the collateral.
> (2) A security interest attaches when it becomes enforceable against the debtor with respect to the collateral. Attachment occurs as soon as all of the events specified in subsection (1) have taken place unless explicit agreement postpones the time of attaching.

In the instant case, there is no dispute that Sears delivered the camcorder to Silch who took possession of it as owner. There is no issue, therefore, with respect to the requirements of section 9–203 (1) (b) and (c). The issue is whether (a) was satisfied.

Section 9–105 defines a "security agreement" as "an agreement which provides for a security interest." In *Bradley v. K & E Investments, Inc.,* this court said that "although no precise words are required by the definition of *security agreement,* the definition indicates there must be some language in the agreement that actually conveys a security interest." In the instant case, the sales ticket signed by Silch stated that he granted "Sears a security interest or lien in this merchandise, unless prohibited by law, until paid in full."

Silch argues that the sales ticket does not set out the terms of the agreement, "parameters" or "consequences" of default, whether each item purchased stands only for its own debt or secures all debt to Sears, or the method of allocating payments on the account between different items purchased. He notes that whether the "Sears Charge Agreement" which was incorporated by reference in the sales ticket contained such information is unknown because it was not produced and there was no indication of its terms.

Silch cites no authority for the proposition that a valid security agreement under the UCC must contain all such information. *In re Hardage,* however, involved the validity of a similar sales ticket as a security agreement where the underlying Sears charge agreement was not produced. There, the debtor purchased personal property from Sears and signed a sales ticket which included the following: "I agree that Sears retains a security interest under the Uniform Commercial Code in the merchandise purchased until fully paid." The court, noting that no special words or form is required to show a possible security interest, held that the sales ticket was sufficient as a security agreement for the items purchased.

In the instant case, the sales ticket contained language expressly conveying a security interest. There being no issue about the signature of Silch on the sales ticket or the sufficiency of the description of the collateral, it complied with the requirements of a security agreement.

Judgment reversed in favor of Sears.

from its debtor even though the document constituting it was missing certain critical terms.

Future Advances

A security agreement may stipulate that it covers advances of credit to be made at some time in the future [9–204(3)]. Such later extensions of credit are known as **future advances.** Future advances would be involved where, for example, a bank grants a business a line of credit for $100,000 but initially advances only $20,000. When the business draws further against its line of credit, it has received a future advance and the bank is considered to have given additional "value" at that time. The security interest that the creditor obtained earlier also covers these later advances of money.

SECURITY AGREEMENT
ACE APPLIANCE

THIS AGREEMENT, executed between Ace Appliance, as Secured Party ("Seller"), and Buyer named above, as Debtor ("Buyer"): Seller agrees to sell and Buyer agrees to purchase, subject to the terms, conditions, and agreements stated in this agreement, the goods described below (the "Collateral"), Seller reserving and Buyer granting a purchase money security interest in the Collateral to secure the payment of the balance owed (Item 7) and all other present and future obligations of Buyer to Seller.

DESCRIPTION OF COLLATERAL

Quan.	Article	Unit Price		Total		TERMS	
1	Washer	545	—	545		(1) Cash Price	1040 00
1	Dryer	495	—	495		(2) Down Payment	100 00
						Trade-in	
						Unpaid Principal	
						(3) Balance Owed	940 00
						(4) Finance Charge	100 00
						Time Balance	
						(5) Owed	1040 00
						(6) Sales tax	40 00
						(7) Balance Owed	1080 00

Buyer agrees to pay Seller, without relief from valuation and appraisement laws, the balance owed (Item 7) of 1080 00 in 11 successive ~~weekly~~ monthly installments of $ 90 00 each and a final installment of $ 90 00, commencing on Jan. 1, 20 01 and continuing thereafter on the same day of each ~~week~~ month until paid, together with all deliquent charges, costs of repossession, collection, disposition, maintenance, and other like charges, allowed by law, and reasonable attorney's fees.

This sale is made subject to the terms, conditions, and agreements stated above on the reverse side. Buyer represents that the correct name and address of Buyer is as stated above, and that all statements made by buyer as to financial condition and credit information are true.

Buyer acknowledges delivery by Seller to Buyer of a copy of this agreement.

Buyer warrants and represents that the Collateral will be kept at Buyer's address unless otherwise specified as follows: _____

and will be used or is purchased for use primarily for: (check one) family or household purposes ☒; business use ☐; farming operations ☐. The Collateral will not be affixed to real estate unless checked here ☐. If the Collateral is to be affixed to real estate, a description of the real estate is as follows: _____

and the name of the record owner is _____

(*Continued*)

IN WITNESS WHEREOF, the parties have executed this agreement on this 1st day of Dec, 20 00
BUYER'S SIGNATURE (Ace Appliance) Seller (as Secured party) Cheryl Cole (as debtor) Frank Singer (as secured party)
By

TERMS, CONDITIONS, AND AGREEMENTS

1. The security interest of Seller shall extend to all replacements, proceeds (including tort claims and insurance), and accessories, and shall continue until full performance by Buyer of all conditions and obligations under this agreement.

2. Buyer shall maintain the Collateral in good repair, pay all taxes and other charges levied upon the Collateral when due, and shall defend the Collateral against any claims. Buyer shall not permit the Collateral to be removed from the place where kept without the prior written consent of Seller. Buyer shall give prompt witten notice to Seller of any transfer, pledge, assignment, or any other process or action taken or pending, voluntary or involuntary, whereby a third party is to obtain or is attempting to obtain possession of or any interest in the Collateral. Seller shall have the right to inspect the Collateral at all reasonable times. At its option, but without obligation to Buyer and without relieving Buyer from any default, Seller may discharge any taxes, liens, or other encumbrances levied or placed upon the Collateral for which Buyer agrees to reimburse Seller upon demand.

3. If the Collateral is damaged or destroyed in any manner, the entire balance remaining unpaid under this agreement (the "Agreement Balance") shall immediately become due and payable and Buyer shall first apply any insurance or other receipts compensating for such loss to the Agreement Balance. Buyer shall fully insure the Collateral, for the benefit of both Seller and Buyer, against loss of fire, theft, and other casualties by comprehensive extended coverage insurance in an amount equal to the balance owed under this agreement.

4. Buyer shall pay all amounts payable when due at the store of Seller from which this sale is made or at Seller's principal office in Gary, Indiana, and upon default shall pay the maximum delinquent charges permitted by law. Upon prepayment of the Agreement Balance, Seller shall allow the minimum discount permitted by law.

5. Time is of the essence of this agreement. Buyer agrees that the following shall constitute an event of default under this Security Agreement: (*a*) the failure of Buyer to perform any condition or obligation contained in this agreement; (*b*) when any statement, representation, or warranty made by Buyer shall be found to have been untrue in any material respect when made; or (*c*) if Seller in good faith believes that the prospect of payment or performance is impaired. Upon a default, Seller, at its option and without notice or demand to Buyer, shall be entitled to declare the Agreement Balance immediately due and payable, take immediate possession of the Collateral and enter the premises at which the Collateral is located for such purpose or to render the Collateral unusable. Upon request, Buyer shall assemble and make the Collateral available to Seller at a place to be designated by Seller which is reasonably convenient to both parties. Upon repossession, Seller may retain or dispose of any or all of the collateral in the manner prescribed by the Indiana Uniform Commercial Code and the proceeds of any such disposition shall be first applied in the following order: (*a*) to the reasonable expenses of retaking, holding, preparing for sale, selling, and the like; (*b*) to the reasonable attorney's fees and legal expenses incurred by Seller; and (*c*) to the satisfaction of the indebtedness secured by this security interest. Buyer convenants to release and hold harmless Seller from any and all claims arising out of the repossession of the Collateral. No waiver of any default or any failure or delay to exercise any right or remedy by Seller shall operate as a waiver of any other default, or of the same default in the future or as a waiver of any right or remedy with respect to the same or any other occurrence.

6. All rights and remedies of seller specified in this agreement are cumulative and are in addition to, and shall not exclude, any rights and remedies Seller may have by law.

7. Seller shall not be liable for any damages, including special or consequential damages, for failure to deliver the Collateral or for any delay in delivery of the Collateral to Buyer.

8. Buyer agrees that Seller may carry this agreement, together with any other agreements and accounts, with Buyer in one account upon its records and unless otherwise instructed in writing by Buyer, any payment of less than all amounts then due on all agreements and accounts shall be applied to any accrued delinquent charges, costs of collection and maintenance, and to the balances owing under all agreements or accounts in such oder as Seller in its discretion shall determine.

9. Buyer authorizes Seller to execute and file financing statements signed only by Seller covering the Collateral described.

10. Any notice required by this agreement shall be deemed sufficient when mailed to Seller (state Seller's address), or to Buyer at the address at which the Collateral is kept.

11. Buyer shall have the benefit of manufacturers' warranties, if any; however, Seller makes no express warranties (except a warranty of title) and no implied warranties, including any warranty of MERCHANTABILITY or FITNESS. Buyer agrees that there are no promises or agreements between the parties not contained in this agreement. Any modification or rescission of this agreement shall be ineffective unless in writing and signed by both Seller and Buyer.

12. ANY HOLDER OF THIS CONSUMER CREDIT CONTRACT IS SUBJECT TO ALL CLAIMS AND DEFENSES WHICH THE DEBTOR COULD ASSERT AGAINST THE SELLER OF GOODS OR SERVICES OBTAINED WITH THE PROCEEDS HEREOF. RECOVERY HEREUNDER BY THE DEBTOR SHALL NOT EXCEED AMOUNTS PAID BY THE DEBTOR HEREUNDER.

After-Acquired Property

A security agreement may be drafted to grant a creditor a security interest in the **after-acquired property** of the debtor. After-acquired property is property that the debtor does not currently own or have rights in but that he may acquire in the future. However, the security interest does not attach until the debtor actually obtains some rights to the new property [9–204].[2] For example, Dan's Diner borrows $25,000 from the bank and gives it a security interest in all of its present restaurant equipment as well as all of the restaurant equipment that it may "hereafter acquire." If Dan's owns only a stove at the time, then the bank has a security interest only in the stove. However, if a month later Dan's buys a refrigerator, the bank's security interest would "attach" to the refrigerator when Dan's acquires some rights to it.

A security interest in after-acquired property may not have priority over certain other creditors if the debtor acquires his new property subject to what is known as a **purchase money security interest.** When the seller of goods retains a security interest in goods until they are paid for, or when money is loaned for the purpose of acquiring certain goods and the lender takes a security interest in those goods, the security interest is a purchase money security interest. Later in this chapter, the section entitled Priority Rules discusses the rights of the holder of a purchase money security interest versus the rights of another creditor who filed earlier on after-acquired property of the debtor.

Proceeds

The creditor is commonly interested in having his security interest cover not only the collateral described in the agreement but also the **proceeds** on the disposal of the collateral by the debtor. For example, if a bank lends money to Dealer to enable Dealer to finance its inventory of new automobiles and the bank takes a security interest in the inventory, the bank wants its interest to continue in any cash proceeds obtained by Dealer when the automobiles are sold to customers. Under the 1972 amendments to Article 9, these proceeds are automatically covered unless the security agreement specifically excludes them [9–203(3)].

Assignment/Waiver of Defenses

In the past, installment sales contracts and security agreements commonly included a provision that the buyer would not assert against the assignee of a sales contract any claims or defenses that the buyer had against the seller. Such clauses made it easier for a retailer to assign its installment sales contracts, or security agreements, to a financial institution such as a bank. The bank knew that it could collect from the buyer without having to worry about any claims that the buyer had against the retailer, such as for breach of warranty. The waiver clauses were usually presented to the buyer on a take-it-or-leave-it basis.

Such clauses can operate to the disadvantage of the buyer. For example, Ellen Horn agrees to buy some storm windows from Ace Home Improvement Company. She signs an installment sales contract, or security agreement, promising to pay $50 a month for 24 months and giving the company a security interest in the windows. The contract contains a waiver of defenses clause. Ace assigns the contract to First Bank and goes out of business. If the storm windows were of a poorer quality than was called for by the contract, Horn would have a claim of breach of warranty against Ace. She would not have to pay Ace the full amount if it tried to collect from her. Under these circumstances, however, Horn has to pay the full amount to the bank; then she can try to collect from Ace for breach of warranty. Here, Horn might be out of luck.

Under the Uniform Commercial Code, an express or implied waiver of defenses is generally valid and enforceable by an assignee who takes his assignment for value, in good faith, and without notice of a claim or defense [9–206(1)]. The two exceptions to this rule are (1) the waiver is not effective as to any type of defense that could be asserted against a holder in due course of a negotiable instrument under Article 3 of the Uniform Commercial Code; (2) the waiver is not effective if a statute, administrative regulation, or court decision establishes a different rule for buyers of consumer goods [9–206(1)].

Some states have enacted comprehensive legislation to abolish waiver of defenses clauses in consumer

[2]The Code imposes an additional requirement as to security interests in after-acquired consumer goods. Security interests do not attach to consumer goods other than "accessions" unless the consumer acquires them within 10 days after the secured party gave value [9–204(2)].

contracts, and other states have limited their use. The Uniform Consumer Credit Code (UCCC), which has been adopted by a small number of states, gives the adopting states two alternatives regarding waiver of defenses clauses: Alternative A provides that an assignee of a consumer sales contract takes subject to all of the defenses that the buyer has against the seller arising out of the sale, regardless of whether the contract contains a waiver of defenses clause. Alternative B permits the enforcement of such clauses only by an assignee who is not related to the seller and who acquires the assignment of the contract in good faith and for value, gives the buyer notice of the assignment, and is not advised by the buyer in writing within three months that the buyer has any claims or defenses against the seller.

In addition, the Federal Trade Commission has promulgated a regulation that applies to situations in which a buyer signs a waiver of defenses clause as part of an installment sales contract. For a detailed discussion of this regulation, see Chapter 31, Negotiation and Holder in Due Course. The FTC regulation requires that a seller or financing agency insert in all consumer contracts and direct loan agreements a clause putting any holder of the contract on notice that the holder is subject to all of the claims and defenses that the buyer-debtor could assert against the seller of the goods or services covered by the contract. See, for example, the last paragraph of the sample security agreement in Figure 1.

Perfecting the Security Interest

Perfection

While attachment of a security interest to collateral owned by the debtor gives the creditor rights vis-à-vis the debtor, a creditor is also concerned about making sure that she has a better right to the collateral than any other creditor if the debtor defaults. In addition, a creditor may be concerned about protecting her interest in the collateral if the debtor sells it to someone else. The creditor gets protection against other creditors or purchasers of the collateral by perfecting her security interest. Perfection is not effective without an attachment of the security interest [9–303].

Under the Code, there are three main ways of perfecting a security interest:

1. By filing a public notice of the security interest.
2. By the creditor taking possession of the collateral.
3. In certain transactions, by mere attachment of the security interest; this is known as automatic perfection.

Perfection by Public Filing

The most common way of perfecting a security interest is to file a **financing statement** in the appropriate public office. The financing statement serves as constructive notice to the world that the creditor claims an interest in collateral that belongs to a certain named debtor. The financing statement usually consists of a multicopy form that is available from the office of the secretary of state (see Figure 2). However, the security agreement can be filed as the financing statement if it contains the required information and has been signed by the debtor.

To be sufficient, the financing statement must (1) contain the names of the debtor and of the secured party, or creditor; (2) be signed by the debtor; (3) give an address of the secured party from which additional information about the security interest can be obtained; (4) give a mailing address for the debtor; and (5) contain a statement listing the collateral or a description of the collateral. If the financing statement covers goods that are to become fixtures, a description of the real estate must be included.

Each state specifies by statute where the financing statement has to be filed. In all states, a financing statement that covers fixtures must be filed in the office where a mortgage on real estate would be filed [9–401]. To obtain maximum security, the secured party acquiring a security interest in property that is a fixture or is to become a fixture should double file—that is, file the security interest as a fixture and as a nonfixture.

In regard to collateral other than fixtures, the state may require only central filing, usually in the office of the secretary of state. However, most states require the local filing of local transactions, such as transactions in which the collateral is equipment used in farming operations; farm products; accounts, contract rights, or general intangibles arising from or relating to the sale of farm products by a farmer; or consumer goods.

A financing statement is effective for a period of five years from the date of filing, and it lapses then unless a continuation statement has been filed before that time.

Figure 2 *A Financing Statement*

UNIFORM COMMERCIAL CODE | **STATE OF INDIANA FINANCING STATEMENT** | **FORM UCC-1**

INSTRUCTIONS

1. Please type this form. Fold only along perforation for mailing.
2. Remove Secured Party and Debtor copies and send other three copies with interleaved carbon paper to the filing officer. Enclose filing fee of $1.00. (plus $ .50 if collateral is or to become a fixture).
3. When filing is to be with more than one office, Form UCC-2 may be placed over this set to avoid double typing.
4. If the space provided for any item(s) is inadequate, the item(s) may be continued on additional sheets, preferably 5"x 8" or sizes convenient to secured party in case of long schedules, indentures, etc. Only one sheet is required. Extra names of debtors may be continued below box "1" in space for description of property.
5. If the collateral is crops or goods which are or are to become fixtures, describe the goods and also the real estate with the name of the record owner if he is other than the debtor.
6. Persons filing a security agreement (as distinguished from a financing statement) are urged to complete this form with or without signature and send with security agreement.
7. If collateral is goods which are or are to become fixtures, use Form UCC-1a over this Form to avoid double typing, and enclose regular fee plus $ .50
8. The filing officer will return the third page of this Form as an acknowledgment. Secured party at a later time may use third page as a Termination Statement by dating and signing the termination legend on that page.

This Financing Statement is presented to Filing Officer for filing pursuant to the UCC: | **3. Maturity Date (if any):**

1. Debtor(s) (Last Name First) and Address(es)

2. Secured Party(ies) and Address(es)

For Filing Officer (Date, Time, Number, and Filing Office)

4. This financing statement covers the following types (or items) of property (also describe realty where collateral is crops or fixtures):

Assignee of Secured Party

This statement is filed without the debtor's signature to perfect a security interest in collateral (check ☐ if so)

☐ under a security agreement signed by debtor authorizing secured party to file this statement, or
☐ already subject to a security interest in another jurisdiction when it was brought into this state, or
☐ which is proceeds of the following described original collateral which was perfected:

Check ☐ if covered: ☐ Proceeds of Collateral are also covered. ☐ Products of Collateral are also covered. No. of additional Sheets presented:

Filed with: ☐ Secretary of State ☐ Recorder of _____ County

By: _____ Signature(s) of Debtor(s)

By: _____ Signature(s) of Secured Party(ies)

(1) Filing Officer Copy—Alphabetical
FORM UCC-1—INDIANA UNIFORM COMMERCIAL CODE

Approved by:
Secretary of State

An exception is made for real estate mortgages that are effective as fixture filings—they are effective until the mortgage is released or terminates [9–403].

A **continuation statement** may be filed within six months before the five-year expiration date. The continuation statement must be signed by the secured party, identify the original statement by file number, and state that the original statement is still effective. Successive continuation statements may be filed [9–403(3)].

When a consumer debtor completely fulfills all debts and obligations secured by a financing statement, she is entitled to a **termination statement** signed by the secured party or an assignee of record. Failure of the affected secured party to furnish a termination statement after proper demand subjects him to a fine of $100 plus damages for any loss caused to the debtor by such failure [9–404].

Possession by Secured Party as Public Notice

Public filing of a security interest is intended to put any interested members of the public on notice of the security interest. A potential creditor of the debtor, or a

potential buyer of the collateral, can check the records to see whether anyone else claims an interest in the debtor's collateral. The same objective can be reached if the debtor gives up possession of the collateral to the creditor or to a third person who holds the collateral for the creditor. If a debtor does not have possession of collateral that he claims to own, then a potential creditor or debtor is on notice that someone else may claim an interest in it. Thus, a security interest is perfected by change of possession of collateral from the debtor to the creditor/secured party or his agent [9–302(1)(a)]. For example, Simpson borrows $50 from a pawnbroker and leaves his guitar as collateral for the loan. The pawnbroker's security interest in the guitar is perfected by virtue of her possession of the guitar.

Generally, possession by the secured party is the means for perfecting a security interest in instruments such as checks or notes. [3] Possession of the collateral by the secured party is an alternative means, and often the most satisfactory means, of perfecting a security interest in chattel paper and negotiable documents of title. Possession is also a possible means for perfecting a security interest in inventory. This is sometimes done through the **field warehousing** arrangement, in which part of the debtor's inventory is fenced off and withdrawals from it are permitted only on the approval of the secured party or his on-the-scene representative.

Possession by the secured party is usually not a practical means for perfecting a security interest in equipment or consumer goods because the debtor normally wants to retain possession to make use of the equipment or goods. Of course, possession by the secured party is not possible at all with accounts or general intangibles. The person to whom the collateral is delivered holds it as bailee, and he owes the duties of a bailee to the parties in interest [9–207].

Perfection by possession by the secured party is illustrated in the case that follows below, *In Re 4-R Management.*

Perfection by Attachment/ Automatic Perfection

Perfection by mere attachment of the security interest, sometimes known as automatic perfection, is the only form of perfection that occurs without the giving of public notice. It occurs automatically when all the requirements of attachment are complete. This form of perfection is limited to certain classes of collateral; in addition, it may be only a temporary perfection in some situations.[4]

A creditor who sells goods to a consumer on credit, or who lends money to enable a consumer to buy goods, can obtain limited perfection of a security interest merely by attaching the security interest to the goods. A creditor under these circumstances has what is called a **purchase money security interest in consumer goods.** For example, an appliance store sells a television set to Margaret Morse on a conditional sales contract, or time-payment plan. The store does not have to file its purchase money security interest in the set. The security interest is considered perfected just by virtue of its attachment to the set in the hands of the consumer.

[3]Sections 9–304(4) and (5) permit a 21-day temporary perfection for these types of collateral and also for certificated securities and negotiable documents of title.

[4]Temporary perfection without filing or possession is automatically obtained for 21 days after attachment of the security interest in instruments and negotiable documents [9–304]. To get protection beyond the 21-day period, the secured party must perfect by filing or possession. During the 21-day period of temporary perfection, however, any holder in due course of commercial paper or any bona fide purchaser of a security or a negotiated document will prevail over the secured party relying on temporary perfection [9–309].

In Re 4-R Management *208 B.R. 232 (Bankr. N.D. Ala. 1997)*

On June 10, 1994, 4-R Management, by its officers, Chris and Lucretia Ryan, executed a promissory note to the First Bank of Eva. The Ryans signed the note both personally and as officers of 4-R Management. The Ryans also executed a security agreement dated June 10, 1994, pledging one "book coin collection" and various other items, including a tractor, bush hog, farm products, and cattle, as security for the note. The promissory note was incorporated by reference in the separate security agreement. The coin collection was the property of 4-R Management, and the bank took possession of the coins on June 10. In subsequent renewal notes, 4-R Management, in its corporate capacity, expressly granted the bank a security interest in the coin collection.

On November 8, 1995, 4-R Management filed a voluntary petition for relief under the Bankruptcy Code. Subsequently, the Bankruptcy Trustee sought to recover for the bankruptcy estate the coin collection being held by the bank as security. The question of whether the bank or the Bankruptcy Trustee had the better right to the coin collection turned on whether the bank had a perfected security interest in the collection.

Caddell, Bankruptcy Judge Section 9–203(1) of the Alabama Commercial Code, which governs the attachment and enforceability of security interests, provides that a security interest attaches and becomes enforceable when:

> (a) The collateral is in the possession of the secured party pursuant to agreement, or the debtor has signed a security agreement which contains a description of the collateral . . .; and
> (b) Value has been given; and
> (c) The debtor has rights in the collateral.

Additionally, in order for a secured party to enforce its security interest against the trustee in bankruptcy, the secured party must have perfected its security interest prior to the commencement of the case. Sections 9–304(1) and 9–305 provide that a security interest in money shall be perfected only by the secured party's taking possession. No filing is necessary.

Initially, the court finds that the bank clearly gave "value" for the coin collection by the extension of credit to 4-R Management in satisfaction of subsection 9–203(1)(b). The court further finds that 4-R Management had sufficient rights in the coins under subsection 9–203(1)(c) to grant a security interest in same as the undisputed owner of the collateral. That leaves as the only element in question whether the collateral is in the possession of the bank pursuant to an oral agreement or whether 4-R Management executed a security agreement describing the collateral within the meaning of subsection 9–203(1)(a).

A security interest is an interest in property that secures payment or performance of an obligation. Generally, a security agreement which contains a description of the collateral and which is signed by the debtor is essential to the creation of a security interest in collateral.

On July 28, 1995, 4-R Management, by and through the Ryans, executed a renewal note to pay off the original debt and expressly granted the bank a security interest in the coin collection in its corporate capacity. On April 26, 1996, 4-R Management executed a second renewal note in satisfaction of the 1995 note and expressly pledged the coins as security for the note. The court finds that the bank has an enforceable security interest in the coins by virtue of these express grants of a security interest by the debtor. The unambiguous language in the notes clearly reflected an intent of the parties that the collateral be given as security for the debt. The court finds that bank perfected its security interest by retaining possession of the coin collection pursuant to sections 9–304(1) and 9–305 of the Alabama Code.

Judgment for First Bank of Eva.

Perfection by attachment is not effective if the consumer goods are motor vehicles for which the state issues certificates of title and has only limited effectiveness if the goods are fixtures [9–302]. A later section of this chapter discusses the special rules covering these kinds of collateral.

There are also major limitations to the perfection by attachment principle. As discussed in the Priority section of this chapter, relying on attachment for perfection does not, in some instances, provide as much protection to the creditor as does public filing.

One potential concern for a creditor is that the use of the collateral will change from that anticipated when the security interest was obtained. It is important that the creditor properly perfect the security interest initially so that it will not be adversely affected by a subsequent change in use and will continue to have the benefit of its initial perfection.

Motor Vehicles

If state law requires a certificate of title for motor vehicles, then a creditor who takes a security interest in a motor vehicle (other than a creditor holding a security interest in inventory held for sale by a person in the business of selling goods of that kind) must have the security interest noted on the title [9–302]. Suppose a credit union lends Carlson money to buy a new car in a state that

requires certificates of title for cars. The credit union cannot rely on filing or on attachment of its security interest in the car to perfect that interest; rather, it must have its security interest noted on the certificate of title.

This requirement protects the would-be buyer of the car or another creditor who might extend credit based on Carlson's ownership of the car. By checking the certificate of title to Carlson's car, a potential buyer or creditor would learn about the credit union's security interest in the car. If no security interest is noted on the certificate of title, the buyer can buy—or the creditor can extend credit—with confidence that there are no undisclosed security interests that would be effective against him.

Fixtures

The Code also provides special rules for perfecting security interests in consumer goods that become fixtures by virtue of their attachment to or use with real property. A creditor with a security interest in consumer goods (including consumer goods that will become fixtures) obtains perfection merely by attachment of her security interest to a consumer good. However, as discussed in the Priority section of this chapter, a creditor who relies on attachment for perfection will not, in some instances, prevail against other creditors who hold an interest in the real estate to which the consumer good is attached unless a financing statement is filed with the real estate records to perfect the security interest [9–401(1)].

Removal of Collateral

Even where a creditor has a perfected security interest in the collateral of her debtor, she needs to be concerned about the possibility that the debtor can take the collateral from the state where the creditor has filed on

Concept Review

Obtaining an Enforceable Security Interest

Step	Purpose	Necessary Action
Attachment of Security Interest	To secure a debt. The debtor gives the creditor rights in the debtor's property to secure the debt owed by the creditor to the debtor.	1. Agreement by the debtor giving the creditor a security interest in specific property (collateral) in which the debtor has a legal interest. This can include after-acquired property and proceeds of the collateral. 2. The debtor must have a legal interest in the collateral. 3. The creditor must give value to the debtor (e.g., money or goods). Future advances are value when actually given to the debtor.
Perfection	To obtain protection against other creditors of the debtor and against purchasers of the collateral from the debtor.	1. *Public filing.* Filing a financing statement with the appropriate state or local office to put the world on notice that the creditor claims an interest in specific collateral belonging to the debtor; or in the case of a motor vehicle, noting the security interest on the certificate of title; or 2. *Possession by creditor.* The creditor may take possession of the collateral, thus putting other creditors and potential purchasers on notice that the creditor has an interest in the collateral (this is not practical for all kinds of collateral); or 3. *Perfection by attachment/Automatic Perfection.* Limited perfection merely by attachment of the security interest is obtained where (a) a creditor sells consumer goods to a consumer on credit or (b) a creditor loans money to a consumer to enable him to buy consumer goods.

it to another state where the creditor does not have her claim filed on the public record. Commonly, the security agreement between the creditor and the debtor provides where the collateral is to be kept and stipulates that it is not to be moved unless the debtor gives notice to and/or obtains the permission of the creditor. There is, however, no absolute assurance that the debtor will be faithful to such an agreement.

Under the Code, a secured creditor who has perfected his security interest generally has four months after the collateral is brought into the new state to perfect his security interest in that state. If the creditor does not reperfect within the four months, his security interest becomes unperfected and he could lose the collateral to a person who purchases it, or takes an interest in it, after it has been removed [9–103(1)]. If the creditor has not perfected his security interest by the time the collateral is removed, or within the time period that the creditor has to perfect his security interest in the former location of the collateral, then his interest is unperfected and he does not obtain the advantage of the four-month grace period.

The Code rules that govern the removal of collateral covered by a state certificate of title—such as an automobile—are more complicated. If an automobile covered by a certificate of title on which a security interest is noted is moved to another state, the perfected security interest is perfected for four months in the new state, or until the automobile is registered in the new state. If the secured party perfected its interest in the original state, and a new title is issued in the second state without notation of the security interest, then under certain circumstances a buyer of the automobile can take free of the original security interest. To qualify, the buyer must not be in the business of buying and selling automobiles and must (1) give value, (2) take delivery after issuance of the new title, and (3) buy without knowledge of the security interest [9–103(2)].[5]

Priority Rules

Importance of Determining Priority

Because several creditors may claim a security interest in the same collateral of a debtor, the Code establishes a set of rules for determining which of the conflicting security interests has priority. Determining which creditor has priority or the best claim takes on particular importance in bankruptcy situations, where, unless a creditor has a preferred secured interest in collateral that fully protects the obligation owed to him, the creditor may realize nothing or only a few cents on every dollar owed to him.

General Priority Rules

The basic rule established by the Code is that when more than one security interest in the same collateral has been filed or otherwise perfected, the first security interest to be filed or perfected has priority over any that are filed or perfected later. If only one security interest has been perfected, for example, by filing, then that security interest has priority. However, if none of the conflicting security interests has been perfected, then the first security interest to be attached to the collateral has priority [9–312(5)].

Thus, if Bank A filed a financing statement covering a retailer's inventory on February 1, 2000, and Bank B filed a financing statement covering that same inventory on March 1, 2000, Bank A would have priority over Bank B even though Bank B might have made its loan and attached its security interest to the inventory before Bank A did so. However, if Bank A neglected to perfect its security interest by filing and Bank B did perfect, then Bank B, as the holder of the only perfected security interest in the inventory, would prevail.

If both of the creditors neglected to perfect their security interest, then the first security interest that attached would have priority. For example, if Bank Y has a security agreement covering a dealer's equipment on June 1, 2000, and advances money to the dealer on that date, whereas Bank Z does not obtain a security agreement covering that equipment or advance money to the dealer until July 1, 2000, then Bank Y would have priority over Bank Z. In connection with the last situation, unperfected secured creditors do not enjoy a preferred position in bankruptcy proceedings, thus giving additional impetus to the desirability of filing or otherwise perfecting a security interest.

Purchase Money Security Interests in Inventory

There are several very important exceptions to the general priority rules: First, a *perfected purchase money security interest in inventory* has priority over

[5]Other rules are set out in the Code for accounts, general intangibles, chattel paper, and mobile goods removed to other states [9–103(3) and (4)].

a conflicting security interest in the same inventory *if the purchase money security interest is perfected at the time the debtor receives possession of the inventory* and if the purchase money secured party gives *notification in writing* to the prior secured creditor *before* the debtor receives the inventory [9–312(3)].

Assume that Bank A takes and perfects a security interest in all the present and after-acquired inventory of a debtor. Then, the debtor acquires some additional inventory from a wholesaler, who retains a security interest in the inventory until the debtor pays for it and perfects this security interest. The wholesaler has a purchase money security interest in inventory goods and has priority over the prior secured creditor (Bank A) if the wholesaler has perfected the security interest by the time the collateral reaches the debtor and if the wholesaler sends notice of her purchase money security interest to Bank A before shipping the goods. Thus, to protect itself, the wholesaler must check the public records to see whether any of the debtor's creditors are claiming an interest in the debtor's inventory. When the wholesaler discovers that some are claiming an interest, it should file its own security interest and give notice to the existing creditors.

As the following *General Electric Capital Commercial Automotive Finance* case illustrates, the subsequent seller of inventory can obtain a priority position if it files a financing statement and notifies the prior secured party in a timely fashion.

General Electric Capital Commercial Automotive Finance, Inc. v. Spartan Motors, Inc.

675 N.Y.S. 2d 626 (New York Sup. Ct., App. Div. 1998)

On September 28, 1983, a predecessor of General Electric Capital Commercial Automotive Finance (GECC) entered into an "Inventory Security Agreement" with Spartan Motors, in connection with its "floor plan" financing of the dealership's inventory. By assignment of that agreement, GECC acquired a blanket lien (otherwise known as a "dragnet" lien) on Spartan's inventory to secure a debt in excess of $1,000,000. "Inventory" was defined in the agreement as "[a]ll inventory, of whatever kind or nature, wherever located, now owned or hereafter acquired, and all returns, repossessions, exchanges, substitutions, replacements, attachments, parts, accessories and accessions thereto and thereof, and all other goods used or intended to be used in conjunction therewith, and all proceeds thereof (whether in the form of cash, instruments, chattel paper, general intangibles, accounts or otherwise)." This security agreement was duly filed in the office of the Dutchess County Clerk and with Secretary of State for New York State.

On July 19,1991, Spartan signed a new Wholesale Security Agreement with General Motors Acceptance Corporation (GMAC), in which the latter agreed to finance or "floor-plan" Spartan's inventory. According to its terms, Spartan agreed, inter alia, *as follows:*

> In the course of our business, we acquire new and used cars, trucks and chassis ('Vehicles') from manufacturers or distributors. We desire you to finance the acquisition of such vehicles and to pay the manufacturers or distributors therefore.
>
> We agree upon demand to pay to GMAC the amount it advances or is obligated to advance to the manufacturer or distributor for each vehicle with interest at the rate per annum designated by GMAC from time to time and then in force under the GMAC Wholesale Plan.
>
> We also agree that to secure collectively the payment by us of the amounts of all advances and obligations to advance made by GMAC to the manufacturer, distributor or other sellers, and the interest due thereon, GMAC is hereby granted a security interest in the vehicles and the proceeds of sale thereof ("Collateral") as more fully described herein.
>
> The collateral subject to this Wholesale Security Agreement is new vehicles held for sale or lease and used vehicles acquired from manufacturers or distributors and held for sale or lease
>
> We understand that we may sell and lease the vehicles at retail in the ordinary course of business. We further agree that as each vehicle is sold, or leased, we will faithfully and promptly remit to you the amount you advanced or have become obligated to advance on our behalf to the manufacturer, distributor or seller.

GMAC'S Security Agreement was duly filed. In addition, by certified letter dated July 17, 1991, GMAC officially notified GECC of its competing security interest in Spartan's inventory, as follows:

> This is to notify you that General Motors Acceptance Corporation holds or expects to acquire purchase money security interests in inventory collateral which will from time to time hereafter be delivered to Spartan Motors Ltd. of Poughkeepsie, New York, and in the proceeds thereof.
>
> Such inventory collateral consists, or will consist, of the types of collateral described in a financing statement, a true copy of which is annexed hereto and made a part hereof.

On May 7,1992, Spartan paid $121,500 of its own money to European Auto Wholesalers, Ltd. to acquire a 1992 600 SEL Mercedes-Benz. Six days later, on May 13, 1992, GMAC reimbursed Spartan and the vehicle was placed on GMAC's floor plan.

On July 7, 1992, Spartan paid $120,000 of its own money to the same seller to acquire a second 1992 600 SEL Mercedes. Two days later, on July 9, 1992, GMAC reimbursed Spartan for that amount and placed the second vehicle on its floor plan. The two vehicles remained unsold in Spartan's showroom.

A few months later, on or about October 2, 1992, GECC commenced an action against Spartan, seeking $1,180,999.98, representing money then due to GECC under its agreement with Spartan. Claims were also made against the principals of Spartan, upon their guarantees, as well as against GMAC and Mercedes-Benz of North America, Inc. (MBNA), to determine lien priority in the collateral.

After commencement of the litigation, Spartan filed a bankruptcy petition and ceased doing business. GECC, GMAC, and MBNA took possession of and liquidated their respective collateral pursuant to a prior agreement between the parties. Among the assets appropriated and sold by GMAC were two Mercedes-Benz automobiles, which were auctioned for $194,500. GECC settled its claims against all of the defendants except GMAC, which it accused of converting the two Mercedes-Benz vehicles in violation of GECC's earlier security interest.

The trial court granted GECC's motion for summary judgment, finding persuasive GECC's argument that a literal reading of GMAC's security agreement with Spartan, in conjunction with the wording of Uniform Commercial Code Section 9–107(b), required a holding that GMAC had a purchase-money secured interest only to the extent that it paid funds directly to "manufacturers, distributors and sellers" of Spartan's inventory in advance of the transfer of the merchandise to the car dealership. The court reasoned that because "[n]owhere in the contracts of adhesion signed by Spartan with GMAC is there an obligation by GMAC to reimburse Spartan for funds used to purchase automobiles," GECC's previously perfected security interest in all of Spartan's inventory should prevail. GMAC appealed.

Friedman, Judge A perfected purchase-money security interest provides an exception to the general first-in-time, first-in-right rule of conflicting security interest. Thus, a perfected purchase money security interest in inventory has priority over a conflicting prior security interest in the same inventory (see, UCC 9–312 [3]). However, the purported purchase-money security interest must fit within the Uniform Commercial Code definition to qualify for the exception.

Uniform Commercial Code Section 9–107 defines a "purchase money security interest" as a security interest:

> (a) taken or retained by the seller of the collateral to secure all or part of its price; or
>
> (b) taken by a person who by making advances or incurring an obligation gives value to enable the debtor to acquire rights in or the use of collateral if such value is in fact so used.

The issue here is therefore whether GMAC's payment as reimbursement to Spartan after it had acquired the two Mercedes-Benz vehicles on two different occasions qualifies as an "advance" or "obligation" that enabled Spartan to purchase the cars, such that GMAC acquired a purchase–money security interest in the vehicles. The arguments *against* finding a purchase-money security interest under these circumstances are basically twofold: Firstly, of the few courts to construe Uniform Commercial Code section 9–107 (b), many have been

reluctant to decide that a purchase-money security interest has been created where, as here, title to and possession of the merchandise have passed to the debtor before the loan is advanced. Secondly, the literal wording of the agreement between GMAC and Spartan appears to accord GMAC purchase-money secured status only when the finance company paid Spartan's "manufacturer, distributor or other seller" directly. As the Supreme Court noted, nothing in GMAC's contract with Spartan appears to contemplate any obligation on the part of the financier to "reimburse" the auto dealership for funds that the latter had already expended to purchase merchandise. These two interrelated arguments will be discussed *seriatim.*

(1) Whether after-advanced funds may qualify for purchase-money security status under Uniform Commercial Code section 9–107(b).

Research indicates that there is no judicial authority in New York construing the application of UCC 9–107(b) to a creditor's subsequent reimbursement of a debtor for an antecedent purchase of collateral.

One factor that courts have considered is simple temporal proximity—that is, whether the value is given by the creditor "more or less contemporaneously with the debtor's acquisition of the property."

The authorities are agreed that the critical inquiry, as in all contract matters, is into the intention of the parties. In determining whether a security interest exists, the intent of the parties controls, and that intent may best be determined by examining the language used and considering the conditions and circumstances confronting the parties when the contract was made. In assessing the relationship of the transactions, the test should be whether the availability of the loan was a factor in negotiating the sale, and/or whether the lender was committed at the time of the sale to advance the amount required to pay for the items purchased.

Applying these principles to the matter before us: (1) The record establishes that GMAC's reimbursements to Spartan following its two Mercedes-Benz purchases were only six and two days apart, respectively. (2) GECC does not dispute GMAC's contention that a postpurchase reimbursement arrangement was common in the trade, as well as routine in Spartan's course of dealing with GMAC and its other financiers, depending upon the circumstances of the purchase. For example, GMAC employee Philip Canterino, who handled GMAC's account with Spartan, has averred without contradiction by GECC that although it was customary for GMAC to prepay a car manufacturer before it delivered new vehicles to Spartan's showroom, in a case of the sort at issue here—where the vehicles were difficult to obtain from the manufacturer but were readily available from a distributor—it was not uncommon for GMAC to reimburse Spartan after the cars had been delivered to Spartan's showroom, upon Spartan's presentation of proof of clear title. In the language of Uniform Commercial Code UCC 9–107(b): GMAC was committed to give value to enable the car dealership to acquire rights in the collateral. The value so extended was intended to and in fact did enable Spartan to acquire the two Mercedes-Benzes, as GECC does not seriously suggest that without GMAC's backing Spartan could have afforded to purchase the expensive vehicles. Accordingly, the literal requirements of Uniform Commercial Code section 9–107 (b) are satisfied, notwithstanding the inverted purchase-loan. Because GMAC's loans were "closely allied" with Spartan's inventory acquisitions, GMAC enjoys a purchase-money security interest in the contested merchandise.

(2) Whether GMAC's lien is circumscribed by the precise language of its agreement with Spartan.

It is well established that the terms of a written security agreement may be amplified by "other circumstances including course of dealing or usage of trade or course of performance" (UCC 1–201 (3)). Here, GECC does not deny that, although the written terms of GMAC's contract with Spartan appeared to contemplate a single method of inventory financing (i.e., GMAC's payment to Spartan's sellers in advance of the purchase transaction), in fact it was not at all unusual for the parties to pursue the same end by somewhat different means (i.e., GMAC's posttransaction reimbursement to Spartan for its inventory purchases), as GMAC employee Canterino repeatedly explained.

Generally, the express terms of an agreement and a differing course of performance, course of

dealing, and/or usage of trade "shall be construed whenever reasonable as consistent with each other" (UCC 1–215 [4]; 2–208 [2]). Only when a consistent construction would be "unreasonable" must express terms control over course of performance, and course of performance prevail over course of dealing and usage of trade. GMAC's election on some occasions to fund Spartan's floor planning by reimbursing the car dealership for its purchases can hardly be considered inconsistent with its decision on other occasions to accomplish the same goal by following the strict wording of the contract and prepaying the supplier directly. Rather, it is only reasonable to consider these two methods of financing to be entirely compatible with one another. Here, GMAC's security agreement and its timely notice to GECC adequately specified the precise nature of the vehicular inventory to which its lien attached, such that GECC should have been alerted to GMAC's claim to the two Mercedes-Benzes; and, as discussed above, it is clear that GMAC and Spartan intended these vehicles to be covered by their financing agreement.

Accordingly, the Supreme Court erred when it found that, having financed the two vehicles at issue here by way of reimbursements—"the very opposite of an advance"—GMAC did not acquire a purchase-money security interest pursuant to Uniform Commercial Code 9–107(b). Rather, since GMAC has established—and GECC does not deny—that GMAC was "obligated" to give value to enable Spartan to acquire rights in the two Mercedes-Benzes, and the purchase and loan transactions were only days apart, it is clear that Spartan's purchase and GMAC's subsequent reimbursement were sufficiently "closely allied" to give GMAC a purchase-money security interest in the subject vehicles. Under these circumstances, we conclude, upon searching the records, that GMAC is entitled to retain the proceeds of the sale of the two contested vehicles and to summary judgment against GECC.

Judgment in favor of GECC reversed and summary judgment granted in favor of GMAC.

Purchase Money Security Interests in Noninventory Collateral

The second exception to the general priority rule is that a purchase money security interest in collateral other than inventory has priority over a conflicting security interest in the same collateral if the purchase money security interest is perfected at the time the debtor receives the collateral or within 10 days afterward [9–312(4)].

Assume that Bank B takes and perfects a security interest in all the present and after-acquired equipment belonging to a debtor. Then, a supplier sells some equipment to the debtor, reserving a security interest in the equipment until it is paid for. If the supplier perfects the purchase money security interest by filing at the time the debtor obtains the collateral or within 10 days thereafter, it has priority over Bank B. This is because its purchase money security interest in noninventory collateral prevails over a prior perfected security interest if the purchase money security interest is perfected at the time the debtor takes possession or within 10 days afterward.

Rationale for Protecting Purchase Money Security Interests

The preference given to purchase money security interests, provided that their holders comply with the statutory procedure in a timely manner, serves several ends. First, it prevents a single creditor from closing off all other sources of credit to a particular debtor and thus possibly preventing the debtor from obtaining additional inventory or equipment needed to maintain his business. Second, the preference makes it possible for a supplier to have first claim on inventory or equipment until it is paid for, at which time it may become subject to the after-acquired property clause of another creditor's security agreement. By requiring that the first perfected creditor be given notice of a purchase money security interest at the time the new inventory comes into the debtor's inventory, the Code serves to alert the first creditor to the fact that some of the inventory on which it may be relying for security is subject to a prior secured interest until it is paid for.

Buyers in the Ordinary Course of Business

A third exception to the general priority rule is that a **buyer in the ordinary course of business** (other than a person buying farm products from a person engaged in farming operations) takes free from a security interest created by his seller even though the security interest is perfected and even though the buyer knows of its existence [9–307(1)]. For example, a bank loans money to a dealership to finance that dealership's inventory of new automobiles and takes a security interest in the inventory, which it perfects by filing. Then, the dealership sells an automobile out of inventory to a customer. The customer takes the automobile free of the bank's security interest even though the dealership may be in default on its loan agreement and even if the customer knows about the bank's interest. As long as the customer is a buyer in the ordinary course of business, she is protected. The reasons for this rule are that a bank really expects to be paid from the proceeds of the dealership's automobile sales and that the rule is necessary to the smooth conduct of commerce. Customers would be very reluctant to buy goods if they could not be sure they were getting clear title to them from the merchants from whom they buy.

In the following case, *In Re Doughty's Appliance, Inc.,* buyers of home appliances and electronic equipment from a dealer obtained title free of security interests previously given by the dealer to his creditors.

In Re Doughty's Appliance, Inc. Mitchell, Trustee v. Transamerica Commercial Finance Corp. *236 B.R. 407 (Bankr. D. Ore 1999)*

Doughty's Appliance, Inc., was in the business of selling home appliances and electronic equipment at retail. Transamerica Commercial Finance Corporation and Amana Finance provided inventory floor financing to Doughty's inventory and proceeds with Uniform Commercial Code (UCC) financing statements filed in Oregon. After Doughty's defaulted in its payments to Transamerica and Amana on their inventory financing loans, Transamerica and Amana, during the period May 7, 1998, to May 12, 1998, repossessed their collateral. On May 29, 1998, Doughty's filed a voluntary Chapter 11 petition in bankruptcy. The case subsequently was converted to Chapter 7 bankruptcy on June 24, 1998.

The Bankruptcy Trustee filed an adversary complaint seeking a determination of the validity, priority and extent of Transamerica and Amana's liens on or interests in the repossessed collateral and in certain collateral items held in storage. In particular, the Trustee sought a determination of the rights of Transamerica and Amana as inventory financers vis-à-vis the rights of Doughty's customers for whom Sales Orders exist with respect to the repossessed collateral or in whose names inventory items were tagged.

Between July 25, 1997, and April 30, 1998, Doughty's sold to customers appliances which subsequently were repossessed by Transamerica and Amana. These sales were evidenced by Sales Orders, which include the name of the manufacturer, the SKU number (an industry standard model number), the stock number, and a description of each appliance sold, including its color. Doughty's sold consumer appliances and electronic equipment in high volumes from several stores, and customer Sales Orders would be filled either from inventory on the floor or from inventory ordered from the manufacturers whose product lines were carried by Doughty's. Doughty's inventory was turning over constantly from customer sales and orders to manufacturers to restock.

Transamerica and Amana contended that the Sales Orders did not identify the appliances sufficiently for purpose of section 9–307. The customer Sales Orders fell into three categories based upon the down payments made by the customers: those for which no down payment was made, those for which some down payment was made, and those for which the entire purchase price was paid. None of the collateral items were unique or unusual. Over time, Doughty's had acquired and sold significant quantities of each appliance model concerned in the adversary proceeding.

Dunn, U.S. Bankruptcy Judge Resolution of the dispute requires analysis of the interplay among various sections of the UCC, with particular emphasis on section 9–307.

1. *Customers Who Have Made No Down Payment.* At the Hearing, the parties both recognized that there was one category of Doughty's customers with respect to which their disputes were easily resolved. Those customers represented by Sales Orders who paid nothing for their purchases would have to pay the entire retail purchase price to Transamerica in order to receive their goods. Such payment would maximize the recovery to Transamerica upon disposition of its collateral. Accordingly, the parties are agreed that a notice will be sent to all such Doughty's customers setting a deadline for them to tender full payment in cash or cash equivalents for their merchandise. If full payment is not received by the deadline, Transamerica will be free to dispose of the merchandise covered by such customers' Sales Orders for its own account in a commercially reasonable manner.

2. *Sales Prior to Closure of the Financing Line.* Section 9–306(2) provides that ". . . a security interest continues in collateral notwithstanding sale, exchange or other disposition thereof unless the disposition was authorized by the secured party in the security agreement or otherwise . . . " The Inventory Security Agreements between Doughty's and Transamerica and Amana, respectively, each allowed "sales of inventory at retail in the ordinary course of [Doughty's] business."

The record indicates that at the time the financing line was closed all of the Doughty's customer Sales Orders in dispute in this proceeding were entered into in the ordinary course of Doughty's business. Transamerica and Amana do not contend otherwise, at least with respect to Sales Orders dated prior to the time the financing line was closed. Accordingly, I find that customer Sales Orders with respect to Transamerica collateral entered into prior to February 13, 1998, when the Transamerica inventory financing line was closed, were authorized by the security agreement between Transamerica and Doughty's. Likewise, I find that customer Sales Orders with respect to Amana collateral entered into prior to April 10, 1998, when the Amana inventory financing line was closed, were authorized by the security agreement between Doughty's merchandise free of the security interests of Transamerica and Amana, consistent with the provisions of section 9–306(2).

3. *Sales Subsequent to Line Closure.* The difficulty inherent in resolving the competing claims of parties such as Transamerica and Amana and the Doughty's retail customers concerned in this adversary proceeding is that the "villain" of this piece has left the stage—permanently. An insolvent Doughty's is in no position to make them whole, and it is up to the court to determine between two innocent parties who should bear the risk of loss.

White and Summers answer the risk of loss issue with the following example:

> Consider the case of Mrs. Jones who buys a washing machine from Big George's Appliance Store. Assume further that Bank has filed a financing statement which covers all of Big George's inventory and that the security interest is not discharged by sale. In these circumstances is it reasonable to expect Mrs. Jones to search the files, to ask Bank for a subordination? And if that is not reasonable, is it fair to permit Bank to assert its security interest in the washing machine after Mrs. Jones has paid full value? Of course, it is neither reasonable to expect her to investigate nor fair to subordinate her interest. Thus, we have 9–307(1) which renders the Bank's security interest subordinate to her interest as purchaser.

a. Section 9–307(1). Section 9–307(1)provides that:

> A buyer in ordinary course of business . . . other than a person buying farm products from a person engaged in farming operations takes free of a security interest created by his seller even though the security interest is perfected and even though the buyer knows of its existence.

As with section 9–306(2), Oregon has adopted a version of section 9–307(1) consistent with the model act (UCC).

Inventory financers, such as Transamerica and Amana, are loath to concede the priority of their secured position in inventory items to any other parties. The disputes in this case focus on whether the concerned customers of Doughty's qualify as buyers in the ordinary course of business.

b. Buyer in the Ordinary Course. The definition of a "buyer in the ordinary course of business" is set forth in section 1–201 (9):

> "Buyer in the ordinary course of business" means a person who in good faith and without knowledge that

the sale to him is in violation of the ownership rights or security interest of a third party in the goods buys in ordinary course from a person in the business of selling goods of that kind.

There is nothing in the records to indicate, and Transamerica and Amana do not argue, that the Doughty's customers concerned in this proceeding did not act in good faith. Transamerica and Amana do assert generally that 29 of the concerned transactions occurred after the Clackamas County Circuit Court entered its restraining order against Doughty's disposing of Transamerica and Amana's collateral and after it violated said order. In these circumstances, Transamerica and Amana argue that such transactions cannot be characterized as having been conducted in the ordinary course of Doughty's business.

However, there is nothing in the record to establish that any of the concerned Doughty's customers knew that a purchase of any product from Doughty's would be in violation of the ownership rights or security interests of Transamerica or Amana, or that any such purchase would be in violation of an order of the Clackamas County Circuit Court. Based upon the sales records, Doughty's customers purchased appliances during normal business hours from a retailer that held itself out to the public as specializing in sales of such items. Accordingly, I find that the Doughty's customers entered into purchase transactions in the ordinary course of Doughty's business in good faith and without knowledge that sales to them would be in violation of the ownership rights or security interest of Transamerica or Amana.

Judgment for Trustee for benefit of Doughty's customers with respect to sales orders or tagged inventory covering inventory repossessed by Transamerica or Amana or remaining in storage.

Artisan's and Mechanic's Liens

The Code also provides that certain liens arising by operation of law (such as an artisan's lien) have priority over a perfected security interest in the collateral [9–310]. For example, Marshall takes her automobile, on which a credit union has a perfected security interest, to Frank's Garage to have it repaired. Under common or statutory law, Frank's may have a lien on the car to secure payment for the repair work; such a lien permits Frank's to keep the car until it receives payment. If Marshall defaults on her loan to the credit union, refuses to pay Frank's for the repair work, and the car is sold to satisfy the liens, Frank's is entitled to its share of the proceeds before the credit union gets anything.

Liens on Consumer Goods Perfected by Attachment/Automatic Perfection

A retailer of consumer goods who relies on attachment of a security interest to perfect it prevails over other creditors of the debtor-buyer. However, the retailer does not prevail over someone who buys the collateral from the debtor if the buyer (1) has no knowledge of the security interest; (2) gives value for the goods; and (3) buys the goods for his personal, family, or household use [9–307(2)]. The retailer does not have priority over such a **bona fide purchaser** unless it filed its security interest.

For example, an appliance store sells a television set to Arthur for $750 on a conditional sales contract, reserving a security interest in the set until Arthur has paid for it. The store does not file a financing statement, but relies on attachment for perfection. Arthur later borrows money from a credit union and gives it a security interest in the television set. When Arthur defaults on his loans and the credit union tries to claim the set, the appliance store has a better claim to the set than does the credit union. The credit union then has the rights of an unsecured creditor against Arthur.

Now, suppose Arthur sells the television set for $500 to his neighbor Andrews. Andrews is not aware that Arthur still owes money on the set to the appliance store. Andrews buys it to use in her home. If Arthur defaults on his obligation to the store, it cannot recover the television set from Andrews. To be protected

against such a purchaser from its debtor, the appliance store must file a financing statement rather than relying on attachment for perfection.

Fixtures

A separate set of problems arise when the collateral is goods that become fixtures by being so related to particular real estate that an interest in them arise under real estate law. Determining the priorities among a secured party with an interest in the fixtures, subsequent purchasers of the real estate, and those persons who have a secured interest—such as a mortgage—on the real property can involve both real estate law and the Code. However, the Code does set out rules for determining when the holder of a perfected security interest in fixtures has priority over an encumbrancer or owner of the real estate. Some of the Code priority rules are as follows:

First, the holder of the secured interest in a fixture has priority if: (1) her interest is a purchase money security interest obtained prior to the time the goods become fixtures; (2) the security interest is perfected by "fixture filing"; that is, by filing in the recording office where a mortgage on the real estate would be filed prior to, or within 10 days of, the time when the goods become fixtures; and (3) the debtor has a recorded interest in the real estate or is in possession of it [9–313(4)(a)].

For example, Restaurant Supply sells Arnold Schwab, the operator of Arnie's Diner, a new gas stove on a conditional sales contract, reserving a security interest until the purchase price of the stove is paid. The stove, a replacement for an existing stove, is to be installed in a building owned by Arnold Schwab on which First National Bank holds a real estate mortgage. Restaurant Supply can ensure that its security interest in the stove has priority over any claims to it by First National Bank. To do this, Restaurant Supply must (1) enter into a security agreement with Schwab before the stove is delivered to him; and (2) perfect its security interest by fixture filing before the stove is hooked up by a plumber or within 10 days of that time.

Second, the secured party whose interest in fixtures is perfected has priority where: (1) the fixtures are removable factory or office machines or readily removable replacements of domestic appliances that are consumer goods; and (2) the security interest was perfected before the goods became fixtures [9–313(4)(c)]. For example, Harriet Hurd's dishwasher breaks down and she contracts with The Appliance Store to buy a new one on a time-payment plan. The mortgage on Hurd's house provides that it covers the real property along with all kitchen appliances, or their replacements. The Appliance Store's security interest in the dishwasher has priority over the interest of the holder of the mortgage if The Appliance Store perfects its security interest before the new dishwasher is installed in Hurd's home or within 10 days of that date. Perfection in consumer goods can, of course, be obtained merely by attaching the security interest through the signing of a valid security agreement.

Note that a creditor holding a security interest in consumer goods that become fixtures who relies on attachment for perfection (automatic perfection) prevails over other creditors with an interest in the real property *only* where the consumer goods are "readily removable replacements for domestic appliances."

Suppose a hardware store takes a security interest in some storm windows. Because the storm windows are likely to become fixtures through their use with the homeowner's home, the hardware store cannot rely merely on attachment to protect its security interest. It should file a financing statement to protect that security interest against other creditors of the homeowner with an interest in his home. This rule helps protect a person interested in buying the real property or a person considering lending money based on the real property. By checking the real estate records, the potential buyer or creditor would learn of the hardware store's security interest in the storm windows.

Once a secured party has filed his security interest as a fixture filing, he has priority over purchasers or encumbrancers whose interests are filed after that of the secured party [9–313(4)(b) and (d)].

Where the secured party has priority over all owners and encumbrancers of the real estate, he generally has the right on default to remove the collateral from the real estate. However, he must make reimbursement for the cost of any physical injury caused to the property by the removal [9–313(8)].

As the *Capital Federal* case indicates, a security interest in fixtures is just that—a security interest in the fixtures—and not a security interest in the entire real estate.

Capital Federal Savings & Loan Ass'n v. Hoger *880 P.2d 281 (Kan. Ct. App. 1994)*

Capital Federal Savings and Loan Association held a real estate mortgage on the home of Paul and Margaret Hoger that was recorded in Johnson County on August 15, 1984. In 1990, the Hogers purchased a new furnace and air conditioner from The Kansas City Power and Light Company (now known as Western Resources, Inc.). On March 2, 1990, the Hogers and KPL entered into an installment contract and the Hogers executed a promissory note to finance the purchase of the furnace and air conditioner. They were installed on March 20, and on March 23, 1990, KPL filed financing statements covering the furnace and air conditioner in Johnson County on March 23, 1990.

The Hogers defaulted on both the Capital Federal and the KPL/Western Resources loans. Capital Federal filed a mortgage foreclosure action on December 28, 1992, and named both the Hogers and Western Resources as defendants. Western Resources answered and counterclaimed for the $2,887.50 amount the Hogers still owed on their installment contract, claiming a first and prior right to the real estate mortgage proceeds. Capital Federal contended that it had a priority in the real estate foreclosure sale proceeds over Western Resource's purchase money security interest. The trial court awarded Western Resources the first priority in the foreclosure proceeds and Capital Federal appealed.

Briscoe, Chief Judge The parties do not dispute that the furnace and air conditioner purchased by the Hogers have become fixtures and that Western Resources obtained a priority interest of some type in those fixtures.

The real question is whether the UCC permits Western Resources to proceed against the foreclosure sale proceeds. Western Resources' remedy, as provided by the UCC, is as follows:

> When the secured party has priority over all owners and encumbrancers of the real estate, he may, on default, subject to the provisions of part 5, remove his collateral from the real estate but he must reimburse any encumbrancer or owner of the real estate who is not the debtor and who has not otherwise agreed for the cost of repair or physical injury, but not for any diminution in value of the real estate caused by the absence of the goods removed or by any necessity of replacing them. A person entitled to reimbursement may refuse permission to remove until the secured party gives adequate security for the performance of this obligation. Sec. 9–313(8).

Capital Federal argues repossession of the furnace and air conditioner or bringing its claim against the collateral to judgment under Sec. 9–501 were the only remedies available to Western Resources. Western Resources did not pursue an action pursuant to Sec. 9–501 and does not rely on Sec. 9–501 for its claim here. Instead, Western Resources relies upon Sec. 9–313(8) as the basis for its claim. Western Resources emphasizes that Sec. 9–313(8) states that a secured party "may" repossess the collateral and that use of this term implies that other remedies are available. Western Resources argues that once Capital Federal instituted the foreclosure proceedings, Western Resources was entitled to have its lien paid first from the proceeds of the sale.

Neither the language of Sec. 9–313(8) nor the comments answer the question with which we are presented. There are only a few authorities that address the issue, and there are no Kansas cases among those authorities.

A recent case, *Maplewood Bank v. Sears Roebuck,* contains facts similar to those here. Plaintiff bank held a first and prior mortgage and Sears later secured and held a priority interest in a number of kitchen fixtures. The fact that Sears was secured and held a priority interest in those fixtures was undisputed. When defendants defaulted on both obligations, the bank filed for foreclosure. Sears answered, seeking a declaration of priority and requesting that the court order the bank to pay Sears the amount due under its agreement. Sears' response was rejected and it eventually appealed, arguing it should be entitled to receive from the proceeds of a foreclosure sale the difference between the value of the realty with Sears' collateral and the value of the realty after that collateral had been removed. After reviewing the language of Sec. 9–313(8) as adopted in New Jersey, the court stated: "Sears has two options: removal of the fixtures or foregoing the removal of the fixtures." The court noted that the approach advocated by Sears had

only been adopted in Louisiana, where the legislature had added the following language to Sec. 9–313(8): "A secured party may also demand separate appraisal of the fixtures to fix his interest in the receipts of the sale thereof in any proceedings in which the real estate is sold pursuant to execution upon it by a mortgagee or any other encumbrancer."

The *Maplewood* court concluded:

> We decline to . . . legislat[e]. We prefer the approach followed in Louisiana where the legislature, upon its preference and initiative, provided the innovative remedy sought by Sears. To adopt Sears' argument in the absence of legislation would mean that a mortgagee's security interest could be impaired substantially without the Legislature pronouncing an intention to do so. Any modification of long established fundamental property rights of purchase money mortgagees must be done in some straightforward manner and may not be implied from the existing statute. The fact that fixtures may be custom made does not require any different result.

After reviewing the authorities, we find *Maplewood* persuasive. Clearly, the UCC does not grant Western Resources an interest in real estate beyond its interest in the furnace and air conditioner as fixtures. To allow it to proceed against the real estate beyond its interest in the fixtures on default by the Hogers would mean that the possibility of Western Resources recouping the amounts it claims would be tied not simply to the value of its collateral, but to the value of the real estate. As is the case here, Western Resources would be recovering the entire amount of its claim, despite the actual value of the fixtures. Even if the fixtures were approximately valued, the fixture creditor would benefit from the synergy of the fixture–real estate relationship. Although the law is such that a mortgagee may benefit by the addition of personal property to real estate (see Sec. 9–313 [7]), there is nothing in the UCC that indicates the interests of fixture creditors should be enhanced by the real estate to which personal property is affixed.

Judgment reversed in favor of Capital Federal.

Default and Foreclosure

Default

Usually, the creditor and debtor state in their agreement which events constitute a default by the buyer. The Code does not define what constitutes default. Defining default is left to the parties' agreement, subject to the Code requirement that the parties act in good faith in doing so. If the debtor defaults, the secured creditor has several options:

1. Forget the collateral, and sue the debtor on his note or promise to pay.
2. Repossess the collateral, and use strict foreclosure—in some cases—to keep the collateral in satisfaction of the remaining debt.
3. Repossess and sell on the collateral, and then, depending on the circumstances, either sue for any deficiency or return the surplus to the debtor.

Right to Possession

The agreement between the creditor and the debtor may authorize the creditor to repossess the collateral in case of default. If the debtor does default, the creditor is entitled under the Code to possession of the collateral. If through self-help the creditor can obtain possession peaceably, he may do so. However, if the collateral is in the possession of the debtor and cannot be obtained without disturbing the peace, then the creditor must take court action to repossess the collateral [9–503]. See the *Ivy v. General Motors Acceptance Corp.* case, which follows shortly, for a discussion of what constitutes repossession without breach of the peace.

If the collateral is intangible, such as accounts, chattel paper, instruments, or documents, *and performance has been rendered to the debtor,* the secured party may give notice and have payments made or performance rendered to her [9–502].

Concept Review

Priority Rules

Parties	Rule
Buyer of Collateral from Debtor versus Creditor with a Security Interest in the Collateral	1. A *buyer in ordinary course of business* (other than a person buying farm products from a person engaged in farming operations) takes *free* of a security interest created by his seller even though the security interest is *perfected* and even though the buyer knows of its existence. 2. A *bona fide purchaser* of collateral that is *consumer goods* from a debtor has priority over a creditor who holds a prior purchase money security interest in the collateral but did not file its security interest if the buyer (*a*) has no knowledge of the security interest, (*b*) gives value for the goods, and (*c*) buys them for her own personal, family, or household use. 3. Otherwise, buyers take subject to perfected or known security interests.
Secured Creditor versus Other Creditors	1. As to collateral *other than fixtures,* the general rule is that when more than one security interest in the same collateral has been filed (or otherwise perfected), the first security interest to be filed or perfected has priority over other security interests. 2. Exceptions to this general rule are: *a. Inventory.* A perfected purchase money security interest in inventory has priority over a conflicting security interest in the same inventory *if* the purchase money security interest is perfected at the time the debtor receives possession of the inventory *and* if the purchase money secured party gives notification in writing to the prior secured creditor *before* the debtor receives the inventory. *b. Noninventory.* A purchase money security interest in noninventory collateral prevails over a prior perfected security interest *if* the purchase money security interest is perfected at the time the debtor takes possession or within 10 days afterward. *c. Liens by operation of law.* Liens that arise by operation of law—such as artisan's liens—have priority over even perfected security interests in collateral if the artisan is in possession of the collateral—when the statute expressly provides otherwise. 3. If none of the conflicting security interests has been perfected, then the *first* security interest to be *attached* to the collateral has priority.
Secured Creditor versus Other Persons with an Interest in Real Property on which Fixture Is Located	1. As to collateral that will become a *fixture:* *a.* A creditor with a secured interest in a fixture has priority if (1) the interest is a purchase money security interest that was obtained prior to the time the goods became fixtures; (2) the security interest was perfected by fixture filing prior to, or within 10 days of, the time when the goods became fixtures; and (3) the debtor has a recorded interest in the real estate or is in possession of it. *b.* A creditor with a perfected secured interest in fixtures will have priority where: (1) the fixtures are removable factory or office machines or readily removable replacements of domestic appliances that are consumer goods; and (2) the security interest is perfected *prior* to the time the goods become fixtures.

Sale of the Collateral

The secured party may dispose of the collateral by sale or lease or in any manner calculated to produce the greatest benefit to all parties concerned. However, the method of disposal must be commercially reasonable [9–504]. Notice of the time and place of a public sale must be given to the debtor, as must notice of a private sale. If the creditor decides to sell the collateral at a public sale such as an auction, then the creditor must give the debtor accurate advance notice of the time and place of the public sale. Similarly, if the creditor proposes to make a private sale of the collateral, notice must be given to the debtor. This gives the debtor a chance to object to the proposed private sale if she considers it not to be commercially reasonable or to otherwise protect her interests [9–504].

Until the collateral is actually disposed of by the creditor, the buyer has the right to *redeem* it. This means that if the buyer tenders fulfillment of all obligations secured by the collateral as well as of the expenses incurred by the secured party in retaking, holding, and preparing the collateral for disposition, she can recover the collateral from the creditor [9–506].

Consumer Goods

If the creditor has a security interest in consumer goods and the debtor has paid 60 percent or more of the purchase price or debt (and has not agreed in writing to a strict foreclosure), the creditor must sell the repossessed collateral. If less than 60 percent of the purchase price or debt related to consumer goods has been paid, and as to any other security interest, the creditor may propose to the debtor that the seller keep the collateral in satisfaction of the debt. The consumer-debtor has 21 days to object in writing. If the consumer objects, the creditor must sell the collateral. Otherwise, the creditor may keep the collateral in satisfaction of the debt [9–505].

Distribution of Proceeds

The Code sets out the order in which any proceeds are to be distributed after the sale of collateral by the creditor. First, any expenses of repossessing, storing, and selling the collateral, including reasonable attorney's fees, are paid. Second, the proceeds are used to satisfy the debt of the creditor who conducts the sale. Third, any junior liens are paid. Finally, if any proceeds remain, the debtor is entitled to them. If the proceeds are not sufficient to satisfy the debt, then the creditor is usually entitled to a **deficiency judgment.** This means that the debtor remains personally liable for any debt remaining after the sale of the collateral [9–504].

For example, suppose a loan company lends Christy $5,000 to purchase a car and takes a security interest. After making several payments and reducing the debt to $4,800, Christy defaults. The loan company pays $50 to have the car repossessed and then has it sold at an auction, where it brings $4,500, thus incurring a sales commission of 10 percent ($450) and attorney's fees of $150. The repossession charges, sales commission, and attorney's fees, totaling $650, are paid first from the $4,500 proceeds. The remaining $3,850 is applied to the $4,800 debt, leaving a balance due of $950. Christy remains liable to the loan company for the $950.

Liability of Creditor

A creditor who holds a security interest in collateral must be careful to comply with the provisions of Article 9 of the Code. A creditor acting improperly in repossessing collateral or in its foreclosure and sale is liable to the parties injured. Thus, a creditor can be liable to a debtor if she acts improperly in repossessing or selling collateral [9–507]. This potential liability is illustrated in the case of *Ivy v. General Motors Acceptance Corp.,* which follows.

Ivy v. General Motors Acceptance Corp. *612 So.2d 1108 (Miss. Sup. Ct. 1992)*

Lester Ivy borrowed money from General Motors Acceptance Corp. (GMAC) to purchase a van, and GMAC acquired a security interest in the van. The security agreement contained a so-called insecurity clause that provided GMAC with the right to repossess the van immediately upon default; notice was not a prerequisite to repossession. Ivy defaulted on his obligation on the loan, and GMAC hired American Lenders Service of Jackson to repossess Ivy's van. About 6:30 A.M., Dax Freeman and Jonathan Baker of American

Lenders Service drove to Ivy's home. They drove on Ivy's gravel driveway, which is about a quarter-mile long, past a chicken house and the van parked near Ivy's mobile home. They quietly attempted to start the van, but their attempt failed. They then hitched the van to their tow truck and towed it away.

When Freeman and Baker reached the end of Ivy's driveway, Freeman stopped the tow truck and checked the van. At that point he saw someone running from the chicken house toward the mobile home. Ivy testified that prior to running toward the mobile home, he ran toward the tow truck "hollering and flagging for them to stop" but Freeman and Baker apparently did not see or hear Ivy at the time Freeman jumped back into the tow truck, drove off Ivy's property, and onto an adjacent road. Ivy decided to chase after Freeman and Baker because he thought they were stealing his van. He jumped into a pickup truck, passed Freeman and Baker, and—according to them—pulled in front of the tow truck, and slammed on his brakes. Freeman claimed he was forced to slam on his brakes but was unable to avoid a slight collision with the rear bumper of Ivy's truck. Ivy claimed that he stopped well ahead of the tow truck, affording Freeman plenty of time to stop, but that he revved the engine and "rammed him." Ivy claimed that his head hit the rear window of the truck as a result of the collision and that he sustained a "severe cervical sprain." However, Ivy's medical bill totaled only $20 and he did not miss any work.

When Ivy exited his truck, Freeman showed him some "official looking documents," advised him that he worked for American Lenders, and stated that they were repossessing his truck at GMAC's request. There was a dispute as to whether Ivy sought to have the sheriff called concerning the accident. Freeman allowed Ivy to retrieve some personal belongings from the van and gave Ivy a telephone number to call to get his van back; at that point, they all departed the scene.

Seven months later, on October 20, Ivy filed a complaint against GMAC and American Lenders contending that the repossession of his van was invalid because there was a breach of the peace and he had been caused "personal injuries." Ivy sought actual and punitive damages. At the conclusion of a jury trial, the jury awarded Ivy $5,000 in actual damages and $100,000 in punitive damages. The trial court judge set aside the punitive damage award and both parties appealed.

Prather, Judge GMAC contends that its agents did not breach the peace and, therefore, it should not have been liable for actual damages. Ivy, of course, disagrees.

Mississippi law authorizes a creditor or secured party to repossess collateral without judicial process if he or she can do so without breaching the peace. Sec. 9–503. The legislature did not define "breach of peace," but this Court has provided some indication. For example, this court has held that entering a private driveway to repossess collateral without use of force does not constitute a breach of peace. This Court has also held that a creditor, who repossesses collateral despite the fact that the debtor has withheld his or her consent or has strongly objected, did not breach the peace. And, courts in other jurisdictions have generally held that the use of trickery or deceit to peaceably repossess collateral does not constitute a breach of peace.

On the other hand, a Florida Court of Appeal opined that a debtor's "physical objection"—"even from a public street"—bars repossession. A Georgia Court of Appeal found a breach of peace in a case in which: (1) the creditor repossessed the debtor's automobile by blocking it with another automobile; (2) the creditor informed the debtor that he could just "walk his a—home"; and (3) the debtor "unequivocally protested" the manner of repossession. The Ohio Supreme Court opined that the use of intimidation or acts "fraught with the likelihood of violence" constitutes a breach of peace.

In sum, much of the litigation involving self-help repossession statutes involves the issue of whether a breach of peace has occurred. Disposition of this issue is not a simple task: Since physical violence will ordinarily result in a breach of peace, the secured party's right to repossession will end if repossession evokes physical violence, either on the part of the debtor or the secured party. At the other end from physical violence, a secured party may peaceably persuade the debtor to give up the collateral so that no breach of peace occurs. Between those two extreme situations—one in which violence occurs and the other in which the debtor peaceably gives up the collateral—lies the line which divides those cases in which the secured party may exercise self-help repossession and those in which he must resort to the courts. As with most dividing lines, the line between

the two extremes is sometimes hard to locate, and even if it is located, it sometimes moves.

Application of the foregoing principles to the evidence viewed in the light most favorable to the verdict leads this Court to conclude that a breach of peace did occur. This Court, therefore, affirms on this issue.

Judgment affirmed awarding actual damages and denying punitive damages.

McRae, Justice, concurring in part and dissenting in part The majority complains that Mississippi case law provides little guidance on determining whether a creditor or agent's conduct is so malicious, oppressive or fraudulent that an award of punitive damages is warranted. While it is true that this Court has not often confronted this issue, the principle is well settled throughout the jurisdictions that punitive damages are proper where creditors seize property in a manner that reflects malice, fraud, oppression, gross negligence, or reckless disregard of the rights of the chattel holder.

In *Kirkwood v. Hickman,* perhaps the only Mississippi case to directly address this question, the Court found that when a creditor commits a trespass to retrieve secured property in an "intentional and highhanded manner," punitive damages are in order even if the trespass involved no violence. What could possibly be more "highhanded" than going onto a debtor's property without permission, hooking the debtor's van to a tow truck, and hauling it away in plain view of the debtor with no explanation whatsoever? In such circumstances the debtor would naturally think his property was being stolen and would set about to recapture the property. If the conduct of GMAC and American Lenders does not qualify as "reckless disregard for the rights of the chattel holder," then I am at a loss to imagine what might fit the description.

Clearly, given Ivy's version of the events the jury was justified in concluding that the conduct of GMAC and American Lenders was oppressive, highhanded and recklessly unmindful of Ivy's rights.

This entire misadventure might have been avoided if the creditor had simply followed the replevin procedures set out in the Mississippi Code. While Mississippi still permits creditors to employ the remedy of self-help when retrieving their property from chattel holders, creditors follow that path at their peril. GMAC and American Lenders in this case took the law into their own hand, and so could be held fully responsible for the consequences. I would reverse the judgment not withstanding the verdict and reinstate the jury's award of punitive damages.

Constitutional Requirements in Regard to Repossession

In 1972, in *Fuentes v. Shevin,*[6] the U.S. Supreme Court held that state repossession statutes that authorize summary seizure of goods and chattels by state agents such as a sheriff, on an application by some private person who claims he is lawfully entitled to the property and posts a bond, are unconstitutional. This is because these statutes deny the current possessor of the property an opportunity to be heard in court before the property is taken from him. The Court did not accept the argument that because the possessors of the property in question had signed conditional sales contracts authorizing the sellers to take back or repossess the property on default, they had waived their rights to a hearing. This decision raised some speculation that the provisions of the Code permitting secured parties to repossess collateral, in some cases without even judicial process, might be constitutionally defective.

Then, in 1974, in *Mitchell v. W. T. Grant,*[7] the Supreme Court limited the *Fuentes* holding to a requirement that where only property rights are involved, there must be some opportunity for a judicial hearing prior to any final determination of the rights of the parties claiming an interest in the property in question. This decision permits property to be seized by state officials, following the filing of an application and the posting of a bond, so long as the person from whom the property is seized has a later opportunity in court to assert his rights to the property.

[6]407 U.S. 67 (1972).

[7]407 U.S. 600 (1974).

The repossession provisions of the Code have been attacked in court as lacking in due process. However, the courts to date have upheld the Code repossession provisions as they relate to private repossession without judicial process.[8] Where judicial process is used, the procedures must conform to the standards laid down in *Fuentes* and *Mitchell.*

Ethical and Public Policy Concerns

1. In the *Ivy v. GMAC* case presented in this chapter, a car was repossessed by towing it away from the debtor's residence early in the morning. In a recent case, an automobile was repossessed by forcing it off the road and then forcing the driver to drive it to the dealer-creditor. Are the repossession techniques used in these cases ethical?

2. Should creditors be able to obtain deficiency judgments against consumers who default on their obligations in connection with the time-purchase of consumer goods and where the proceeds on resale are not sufficient to satisfy the balance due? Or should the creditor have to look solely to the collateral for his security?

3. Suppose that you own an appliance business in a working-class neighborhood that makes most of its sales on credit. What considerations would you take into account in determining whether and when to foreclose or repossess items on which customers have fallen behind in making their payments? Should you be swayed by the personal circumstances of your debtor or look only to protecting your financial interests? For example, would you consider the value of the item to the debtor—such as whether it is a necessity for her life, such as a refrigerator, or a luxury? Would you consider the reason the person had fallen behind—that is, whether she had been ill or had recently lost her job?

Problems and Problem Cases

1. Symons, a full-time insurance salesperson, bought a set of drums and cymbals from Grinnel Brothers. A security agreement was executed between them but was never filed. Symons purchased the drums to supplement his income by playing with a band. He had done this before, and his income from his two jobs was about equal. He also played several other instruments. Symons became bankrupt, and the trustee tried to acquire the drums and cymbals as part of his bankruptcy estate. Grinnel's claimed that the drums and cymbals were consumer goods and thus it had a perfected security interest merely by attachment of the security interest. Were the drums and cymbals consumer goods?

2. Jacob Phillips and his wife, Charlene, jointly owned the Village Variety 5 & 10 Store in Bluefield, Virginia. In addition, Mrs. Phillips was a computer science teacher at the Wytheville Community College. On December 1, 1984, Mrs. Phillips entered into a retail installment sales contract with Holdren's, Inc., for the purchase of a Leading Edge color computer and a Panasonic printer. The contract, which was also a security agreement, provided for a total payment of $3,175.68, with monthly payments of $132.32 to begin on March 5, 1985. On December 1, 1984, Holdren's assigned the contract to Creditway of America. At the time of purchase, Mrs. Phillips advised Holdren's that she was purchasing the computer for professional use in her teaching assignments as well as for use in the variety store. One of the software programs purchased was a practical accounting program for business transactions. Mrs. Phillips also received a special discount price given by Holdren's to state instructors buying for their teaching use. She used the computer in the Village Variety 5 & 10 Store until it closed in April 1985. In June, the Phillipses filed a petition under Chapter 7 of the Bankruptcy Act. At the time, they owed $2,597.79 on the computer. No financing statement was ever filed. Creditway filed a motion in the bankruptcy proceeding, claiming that it had a valid lien on the computer and seeking to be permitted to repossess it. Does Creditway have a perfected security interest in the computer?

3. Ronald Allegretti purchased a bedroom set valued at $900 and a television set valued at $350 from Goldblatt Brothers, a furniture and appliance store, on a revolving credit account. Under the terms of the revolving credit agreement and the credit slip that was signed at the time of each purchase, Goldblatt's reserved a security interest in all goods sold on credit to Allegretti. Goldblatt's then assigned its interest in the extended credit agreement to General Electric Credit Corporation. Neither filed a financing statement. Allegretti subsequently filed a voluntary petition in bankruptcy, and one of the questions in

[8] See, for example, *Gibbs v. Titleman,* 502 F.2d 1107 (3rd Cir. 1974) and cases cited therein.

the bankruptcy action was whether Goldblatt's, and in turn General Electric Credit Corporation, held a perfectly security interest in the bedroom set and the television. Did the creditors hold a perfected secured interest in the bedroom set and the television set?

4. On October 28, 1983, Steve Gresham, doing business as Midway Cycle Sales, entered into a Wholesale Financing Agreement with ITT Commercial Finance Corporation. The agreement was to finance the purchase of new motorcycles from Suzuki Motor Corporation. ITT filed a financing statement with the Indiana secretary of state on December 16, 1983. The description of the collateral in which ITT asserted a security interest included "all inventory . . . replacements and proceeds." On January 9, 1984, Union Bank filed a financing statement with the Indiana secretary of state claiming it was engaged in "floor planning of new motorcycles" for Midway Cycle Sales. In August 1984, ITT began paying Suzuki invoices for Gresham. In July 1985, ITT sent a letter to Union Bank notifying it that it expected to acquire purchase money security interests in the inventory of Stephan Gresham d/b/a Midway Cycle Sales. In early 1986, Union Bank began loaning money to Gresham under its floor planning agreement with him. Actually, Gresham was "double floor planning"—that is, he was taking invoices for motorcycles that had been paid for by ITT to the Union Bank and claiming that he had paid for the motorcycles but had decided to floor plan them. When Union Bank advanced money to him, he used the money to make payments on the loans to ITT. He made no payments to Union Bank and did not pay off all of his loan to ITT. Midway Cycle Sales went bankrupt when Union Bank repossessed 22 new Suzuki motorcycles. ITT brought suit against Union Bank, claiming it had paid for the motorcycles and had a perfected security interest in the motorcycles that had priority over Union Bank's security interest in them. Did ITT's security interest have priority over Union Bank's security interest?

5. On November 18, Firestone & Company made a loan to Edmund Carroll, doing business as Kozy Kitchen. To secure the loan, a security agreement was executed, which listed the items of property included, and concluded as follows: "together with all property and articles now, and which may hereafter be, used or mixed with, added or attached to, and/or substituted for any of the described property." A financing statement that included all the items listed in the security agreement was filed with the town clerk on November 18 and with the secretary of state on November 22. On November 25, National Cash Register Company delivered a cash register to Carroll on a conditional sales contract. National Cash Register filed a financing statement on the cash register with the town clerk on December 20 and with the secretary of state on December 21. Carroll defaulted in his payments to both Firestone and National Cash Register. Firestone repossessed all of Carroll's fixtures and equipment covered by its security agreement, including the cash register, and then sold the cash register. National Cash Register claimed that it was the title owner of the cash register and brought suit against Firestone for conversion. Did Firestone or National Cash Register have the better right to the cash register?

6. On February 19, 1988, DBC Capital Fund, Inc., entered into an agreement with the owner of Devers Auto Sales under which it loaned money to Devers and DBC obtained a security interest in the automotive inventory maintained by Devers. This security interest was perfected by filing with the Secretary of State on February 25, 1988. On March 24, 1989, Cheryl Snodgrass purchased a 1984 Oldsmobile from Devers for $5,000 in cash. The automobile was taken from the inventory covered by DBC's security interest, although Snodgrass was not made aware of the financing agreement between Devers and DBC. When Snodgrass took possession of the Oldsmobile, Devers told her that the certificate of title would be mailed to her. In the meantime, she was issued a temporary registration. On April 28, 1989, Snodgrass was informed by letter that DBC had physical possession of the title and that DBC considered itself to have a valid lien on the automobile. In a later telephone conversation, DBC's attorney informed Snodgrass that DBC would not release the certificate of title until she paid DBC $4,200. On April 25, 1989, the temporary registration issued to Snodgrass by Devers had expired. Because she was not in possession of the certificate of title, she was unable to obtain proper licensing for the car and, therefore, could not use it. In an effort to obtain the certificate of title, Snodgrass brought suit against DBC. Does Snodgrass have a better right than DBC to the certificate of title?

7. Kahn applied for a home improvement loan to construct an in-ground swimming pool. Union National Bank approved the loan, and construction began on Kahn's land. State Bank held a valid mortgage on this land. After the pool was completed, Union National gave Kahn the money with which he paid the contractor. Union National then perfected its interest by filing.

State Bank later attempted to foreclose on its mortgage. Union National claimed the value of the pool. Is Union National entitled to recover the value of the pool?

8. Nancy Raffa purchased a new Cadillac and signed a "Retail Installment Contract" whereby she was to pay for the automobile over a period of 36 months. The contract was assigned to the Dania Bank by the automobile dealer. Raffa was periodically late with her monthly payments and was more than a month overdue on her 16th payment. The bank authorized a private investigator, whom it designated as a "collection agent," to repossess the Cadillac. One evening while Raffa and her husband were entertaining friends, the Cadillac was parked unlocked with keys in the ignition in the driveway of her home. The collection agent walked onto the premises, got in the car, and drove it away. The agreement Raffa signed provided that upon default "seller may, without notice or demand for performance, lawfully enter any premises where the motor vehicle may be found and take possession of it." Raffa paid off the remainder of the loan and recovered her Cadillac. Then she sued the bank for unlawfully repossessing her automobile. Does Raffa have a valid claim that her car was illegally repossessed?

9. Gibson, a collector of rare old Indian jewelry, took two of his pieces to Hagberg, a pawnbroker. The two pieces, a silver belt and a silver necklace, were worth $500 each. Hagberg loaned only $45 on the belt and $50 on the necklace. Gibson defaulted on both loans, and immediately and without notice, the necklace was sold for $240. A short time later, the belt was sold for $80. At the time of their sale, Gibson owed interest on the loans of $22. Gibson sued Hagberg to recover damages for improperly disposing of the collateral. Is Gibson entitled to damages because of Hagberg's actions in disposing of the collateral?

10.  *Video Case.* See "A Good Night's Sleep." Appliance Dealer needed additional working capital, so it obtained a loan from the bank, which took—and perfected by filing— a security interest in all present and after-acquired inventory and equipment of the store. Subsequently, Appliance Dealer obtained inventory on credit from Wholesaler, who retained and perfected a security interest in the inventory until Appliance Dealer paid for it. Appliance Dealer also purchased from Computer Retailer a computer for use in the store; the Computer Retailer took and perfected a security interest in the computer before it was delivered. Can the bank obtain a security interest in the inventory and computer even though Appliance Dealer did not own them at the time it borrowed the money from the bank and gave it a security interest?

Cook, a customer, buys a microwave oven and built-in range/oven on credit from Appliance Dealer; both items were among the inventory that Appliance Dealer had purchased from Wholesaler but it has not yet paid Wholesaler for either item. Appliance Dealer retained a security interest in the items it sold to Cook but it did not file a financing statement. Cook sold the microwave to her neighbor for about 60 percent of the price she agreed to pay Appliance Dealer. If Cook subsequently defaulted on her obligation to Appliance Dealer, could it recover the stove from Cook? Would your answer be different if the oven had been installed in a building on which Mortgage Company held a mortgage? Who would have the better right to the oven, Appliance Dealer or Mortgage Company? Does Appliance Dealer have the right to recover the microwave from Cook's neighbor?

If Appliance Dealer subsequently defaulted on its obligations to Bank, to Wholesaler, and to Computer Retailer, who would have the priority security interest in the appliances that remain in the Appliance Dealer's inventory, Bank or Wholesaler? Would any of them have the legal right to recover the microwave or the stove that was sold to Cook? Who would have the priority security interest in the computer, Bank or Computer Retailer?

11.  *Video Case.* See "TV Repair." Appliance Store acquired inventory on credit from TV Manufacturer, which retained and perfected a security interest in the TV sets until they were paid for. Appliance Store subsequently experienced financial difficulties and held a going-out-of-business sale. If TV Manufacturer had not been paid for the TV sets, would it have the legal right to recover them from individual customers who purchased them at the going-out-of-business sale?

Chapter Twenty-Nine

Bankruptcy

Chapter Outline

I. The Bankruptcy Act
- *A. Bankruptcy Proceedings*
- *B. Liquidations*
- *C. Reorganizations*
- *D. Family Farms*
- *E. Consumer Debt Adjustments*
- *F. The Bankruptcy Courts*

II. Chapter 7: Liquidation Proceedings
- *A. Petitions*
- *B. Involuntary Petitions*
- *C. Automatic Stay Provisions*
- *D. Order of Relief*
- *E. Meeting of Creditors and Election of Trustee*
- *F. Duties of the Trustee*
- *G. The Bankruptcy Estate*
- *H. Exemptions*
- *I. Avoidance of Liens*
- *J. Preferential Payments*
- *K. Preferential Liens*
- *L. Transactions in the Ordinary Course of Business*
- *M. Fraudulent Transfers*
- *N. Claims*
- *O. Allowable Claims*
- *P. Secured Claims*
- *Q. Priority Claims*
- *R. Distribution of the Debtor's Estate*

III. Discharge in Bankruptcy
- *A. Discharge*
- *B. Objections to Discharge*
- *C. Acts That Bar Discharge*
- *D. Nondischargeable Debts*
- *E. Reaffirmation Agreements*
- *F. Dismissal for Substantial Abuse*

IV. Chapter 11: Reorganizations
- *A. Reorganization Proceeding*
- *B. Use of Chapter 11*
- *C. Collective Bargaining Agreements*

V. Chapter 12: Family Farms
- *A. Relief for Family Farmers*

VI. Chapter 13: Consumer Debt Adjustments
- *A. Relief for Individuals*
- *B. Procedure*
- *C. Discharge*
- *D. Advantages of Chapter 13*

When an individual, a partnership, or a corporation is unable to pay its debts to creditors, problems can arise. Some creditors may demand security for past debts or start court actions on their claims in an effort to protect themselves. Such actions may adversely affect other creditors by depriving them of their fair share of the debtor's assets. Also, quick depletion of the debtor's assets may effectively prevent the debtor who needs additional time to pay off his debts from having an opportunity to do so.

At the same time, creditors need to be protected against the actions a debtor in financial difficulty might be tempted to take to their detriment. For example, the debtor might run off with his remaining assets or might use them to pay certain favored creditors, leaving nothing for the other creditors. Finally, a means is needed by which a debtor can get a fresh start financially and not continue to be saddled with debts beyond his ability to pay. This chapter focuses on the body of law and procedure that has developed

to deal with the competing interests when a debtor is unable to pay his debts in a timely manner.

The Bankruptcy Act

The Bankruptcy Act is a federal law that provides an organized procedure under the supervision of a federal court for dealing with insolvent debtors. Debtors are considered insolvent if they are unable or fail to pay their debts as they become due. The power of Congress to enact bankruptcy legislation is provided in the Constitution. Through the years, there have been many amendments to the Bankruptcy Act. Congress completely revised the act in 1978 and then passed significant amendments to it in 1984, 1986, and 1994.

The Bankruptcy Act has several major purposes. One is to ensure that the debtor's property is fairly distributed to the creditors and that some creditors do not obtain unfair advantage over the others. At the same time, the act protects all of the creditors against actions by the debtor that would unreasonably diminish the debtor's assets to which they are entitled. The act also provides the honest debtor with a measure of protection against the demands for payment by his creditors. Under some circumstances, the debtor is given additional time to pay the creditors, freeing him of those pressures creditors might otherwise exert. If the debtor makes a full and honest accounting of his assets and liabilities and deals fairly with his creditors, the debtor may have most—if not all—of the debts discharged so as to have a fresh start.

At one time, **bankruptcy** carried a strong stigma for the debtors who became involved in it. Today, this is less true. It is still desirable that a person conduct her financial affairs in a responsible manner. However, there is a greater understanding that such events as accidents, natural disasters, illness, divorce, and severe economic dislocations are often beyond the ability of individuals to control and may lead to financial difficulty and bankruptcy.

Bankruptcy Proceedings

The Bankruptcy Act covers a number of bankruptcy proceedings. In this chapter, our focus will be on:

1. Straight bankruptcy (liquidations).
2. Reorganizations.
3. Family farms.
4. Consumer debt adjustments.

The Bankruptcy Act also contains provisions regarding municipal bankruptcies, which are not covered in this chapter.

Liquidations

A liquidation proceeding, traditionally called **straight bankruptcy,** is brought under Chapter 7 of the Bankruptcy Act. The debtor must disclose all of the property she owns and surrender this bankruptcy estate to the **bankruptcy trustee.** The trustee separates out certain property that the debtor is permitted to keep and then administers, liquidates, and distributes the remainder of the bankrupt debtor's estate. There is a mechanism for determining the relative rights of the creditors, for recovering any preferential payments made to creditors, and for disallowing any preferential liens obtained by creditors. If the bankrupt person has been honest in his business transactions and in the bankruptcy proceedings, she is usually given a **discharge** (relieved) of her debts.

Reorganizations

Chapter 11 of the Bankruptcy Act provides a proceeding whereby a debtor can work out a plan to solve its financial problems under the supervision of a federal court. A reorganization plan is essentially a contract between a debtor and its creditors. The proceeding is intended for debtors, particularly businesses, whose financial problems may be solvable if they are given some time and guidance and if they are relieved of some pressure from creditors.

Family Farms

Historically, farmers have been accorded special attention in the Bankruptcy Code. Chapter 12 of the Bankruptcy Act provides a special proceeding whereby a debtor involved in a family farming operation can develop a plan to work out his financial difficulties. Generally, the debtor remains in possession of the farm and continues to operate it while the plan is developed and implemented.

Consumer Debt Adjustments

Under Chapter 13 of the Bankruptcy Act, individuals with regular incomes who are in financial difficulty can develop plans under court supervision to satisfy their creditors. Chapter 13 permits compositions (reductions) of debts and/or extensions of time to pay debts out of the debtor's future earnings.

The Bankruptcy Courts

Bankruptcy cases and proceedings are filed in federal district courts. The district courts have the authority to refer the cases and proceedings to bankruptcy judges, who are considered to be units of the district court. If a dispute falls within what is known as a **core proceeding,** the bankruptcy judge can hear and determine the controversy. Core proceedings include a broad list of matters related to the administration of a bankruptcy estate. However, if a dispute is not a core proceeding but rather involves a state law claim, then the bankruptcy judge can only hear the case and prepare draft findings and conclusions for review by the district court judge.

Certain proceedings affecting interstate commerce have to be heard by the district court judge if any party requests that this be done. Moreover, even the district courts are precluded from deciding certain state law claims that could not normally be brought in federal court, even if those claims are related to the bankruptcy matter. Bankruptcy judges are appointed by the president for terms of 14 years.

Chapter 7: Liquidation Proceedings

Petitions

All bankruptcy proceedings, including liquidation proceedings, are begun by the filing of a petition. The petition may be either a **voluntary petition** filed by the debtor or an **involuntary petition** filed by a creditor or creditors of the debtor. A voluntary petition in bankruptcy may be filed by an individual, a partnership, or a corporation. However, municipal, railroad, insurance, and banking corporations and savings or building and loan associations are not permitted to file for straight bankruptcy proceedings. A person filing a voluntary petition need not be insolvent—that is, her debts need not be greater than her assets. However, the person must be able to allege that she has debts. The primary purpose for filing a voluntary petition is to obtain a discharge from some or all of the debts.

Involuntary Petitions

An involuntary petition is a petition filed by creditors of a debtor. By filing it, they seek to have the debtor declared bankrupt and his assets distributed to the creditors. Involuntary petitions may be filed against many debtors. However, involuntary petitions in straight bankruptcy cannot be filed against (1) farmers; (2) ranchers; (3) nonprofit organizations; (4) municipal, railroad, insurance, and banking corporations; (5) credit unions; and (6) savings or building and loan associations.

If a debtor has 12 or more creditors, an involuntary petition to declare him bankrupt must be signed by at least 3 creditors. If there are fewer than 12 creditors, then an involuntary petition can be filed by a single creditor. The creditor or creditors must have valid claims against the debtor exceeding the value of any security they hold by $10,775 or more. To be forced into involuntary bankruptcy, the debtor must be generally not paying his debts as they become due—or have had a custodian for his property appointed within the previous 120 days.

If an involuntary petition is filed against a debtor engaged in business, the debtor may be permitted to continue to operate the business. However, the court may appoint an **interim trustee** if this is necessary to preserve the bankruptcy estate or to prevent loss of the estate. A creditor who suspects that a debtor may dismantle her business or dispose of its assets at less than fair value may apply to the court for protection.

Automatic Stay Provisions

The filing of a bankruptcy petition operates as an automatic stay, holding in abeyance various forms of creditor action against a debtor or her property. These actions include: (1) beginning or continuing judicial proceedings against the debtor; (2) actions to obtain possession of the debtor's property; (3) actions to create, perfect, or enforce a lien against the debtor's property; and (4) setoff of indebtedness owed to the debtor before commencement of the bankruptcy proceeding. A court may give a creditor relief from the stay if the creditor can show that the stay does not give her "adequate protection" and jeopardizes her interest in certain property. The relief to the creditor might take the form of periodic cash payments or the granting of a replacement lien or an additional lien on property.

Concerned that debtors were taking advantage of the automatic stay provisions to the substantial detriment of some creditors, such as creditors whose claims were secured by an interest in a single real estate asset, in 1994 Congress provided specific relief from the

automatic stay for such creditors. Debtors must either file a plan of reorganization that has a reasonable chance of being confirmed within a reasonable time or must be making monthly payments to each such secured creditor that are in an amount equal to interest at a current fair market rate on the value of the creditor's interest in the real estate.

The 1994 amendments also specifically provide that the automatic stay provisions are not applicable to actions to establish paternity, to establish or modify orders for alimony, support, or maintenance, or for the collection of alimony, maintenance, or support from property that is not the property of the bankruptcy estate.

Order of Relief

Once a bankruptcy petition has been filed, the first step is a court determination that relief should be ordered. If a voluntary petition is filed by the debtor, or if the debtor does not contest an involuntary petition, this step is automatic. If the debtor contests an involuntary petition, then a trial is held on the question of whether the court should order relief. The court orders relief only (1) if the debtor is generally not paying his debts as they become due, or (2) if within 120 days of the filing of the petition a custodian was appointed or took possession of the debtor's property. The court also appoints an interim trustee pending election of a trustee by the creditors.

Meeting of Creditors and Election of Trustee

The bankrupt person is required to file a list of her assets, liabilities, and creditors and a statement of her financial affairs. Then a meeting of the creditors is called by the court. Prior to the conclusion of the meeting of creditors, the U.S. Trustee is required to examine the debtor to make sure he is aware of: (1) the potential consequences of seeking a discharge in bankruptcy, including the effects on credit history; (2) the debtor's ability to file a petition under other chapters (such as 11, 12, or 13) of the bankruptcy act; (3) the effect of receiving a discharge of debts; and (4) the effect of reaffirming a debt (discussed later in this chapter).

The creditors may elect a creditors' committee. The creditors also elect a **trustee** who, if approved by the judge, takes over administration of the bankrupt's estate. The trustee represents the creditors in handling the estate. At the meeting, the creditors have a chance to ask the debtor questions about her assets, liabilities, and financial difficulties. These questions commonly focus on whether the debtor has concealed or improperly disposed of assets. (See Figure 1.)

Duties of the Trustee

The trustee takes possession of the debtor's property and has it appraised. The debtor must also turn over her records to the trustee. For a time, the trustee may operate the debtor's business. The trustee sets aside the items of property that a debtor is permitted to keep under state exemption statutes or federal law.

The trustee examines the claims filed by various creditors and objects to those that are improper in any way. The trustee separates the unsecured property from the secured and otherwise exempt property. He also sells the bankrupt's nonexempt property as soon as possible, consistent with the best interest of the creditors.

The trustee is required to keep an accurate account of all the property and money he receives and to promptly deposit moneys into the estate's accounts. At the final meeting of the creditors, the trustee presents a detailed statement of the administration of the bankruptcy estate.

The Bankruptcy Estate

The commencement of a Chapter 7 bankruptcy case by the filing of a voluntary or involuntary petition creates a bankruptcy estate. The estate is composed of all of the debtor's legal and equitable interests in property, including certain community property. Certain property is exempted (see "Exemptions" section below.) The estate also includes:

1. Profits, royalties, rents and revenue, along with the proceeds from the debtor's estate, received during the Chapter 7 proceeding.
2. Property received by the debtor in any of the following ways within 180 days of the filing of the Chapter 7 petition: *(a)* by bequest or inheritance; *(b)* as a settlement with a divorced spouse or as a result of a divorce decree; or *(c)* as proceeds of a life insurance policy.
3. Property recovered by the bankruptcy trustee because *(a)* creditor of the debtor received a voidable preferential transfer or *(b)* the debtor made a fraudulent transfer of her assets to another person. Preferential and fraudulent transfers are discussed later in this chapter.

B16A	United States Bankruptcy Court for the District of Maryland	ORDER AND NOTICE OF CHAPTER 7 BANKRUPTCY FILING, MEETING OF CREDITORS AND FIXING OF DATES (Individual or Joint Debtor No Asset Case)

A. GENERAL INFORMATION

Name of Debtor	Address of Debtor		
John B. Jones D/B/A THE BATH SHOP	195 MAIN STREET ANNAPOLIS, MD. 21401		
	Date Filed 01/24/2000	Case Number 9060300-SD	Soc. Sec. Nos./Tax ID Nos. 050-30-4701
Addressee: WICKER PRODUCTS, INC. 2000 SMITH PIKE ALMA, MI 48030	Address of the Clerk of the Bankruptcy Court United States Bankruptcy Court 101 W. Lombard Street Baltimore, MD 21201		
Name and Address of Attorney for Debtor MARC A. BURNS 215 WATER STREET BALTIMORE MD 21202	Name and Address of Trustee BRUCE A. SMITH 136 S. CHARLES STREET BALTIMORE MD 21201		

B. DATE, TIME AND LOCATION OF MEETING OF CREDITORS
February 28, 2000, 09:15 A.M., U.S. Trustee, Fallon Federal Bldg., Rm. G-13, 31 Hopkins Plaza, Baltimore, MD 21201

C. DISCHARGE OF DEBTS
Deadline to File a Complaint Objecting to the Discharge of the Debtor or Dischargeability of a Debt: April 30, 2000

D. BANKRUPTCY INFORMATION

THERE APPEAR TO BE NO ASSETS AT THIS TIME FROM WHICH PAYMENT MAY BE MADE TO CREDITORS. DO NOT FILE A PROOF OF CLAIM UNTIL YOU RECEIVE NOTICE TO DO SO.

FILING OF A BANKRUPTCY CASE. A bankruptcy petition has been filed in this court for the person or persons names above as the debtor, and an order for relief has been entered. You will not receive notice of all documents filed in this case. All documents which are filed with the court, including lists for the debtor's property and debts, are available for inspection at the office of the clerk of the bankruptcy court.

CREDITORS MAY NOT TAKE CERTAIN ACTIONS. Anyone to whom the debtor owes money or property is a creditor. Under the bankruptcy law, the debtor is granted certain protection against creditors. Common examples of prohibited actions are contacting the debtor to demand repayment, taking action against the debtor to collect money owed to creditors or to take property of the debtor, except as specifically permitted by the bankruptcy law, and starting or continuing foreclosure actions, repossessions, or wage deductions. If unauthorized actions are taken by a creditor against a debtor, the court may punish that creditor. A creditor who is considering taking action against the debtor or the property of the debtor should review 11 U.S.C. § 362 and may wish to seek legal advice. The staff of the clerk's office is not permitted to give legal advice to anyone.

MEETING OF CREDITORS. The debtor (both husband and wife in a joint case) shall appear at the meeting of creditors at the date and place set forth above in box 'B' for the purpose of being examined under oath. ATTENDANCE BY CREDITORS AT THE MEETING IS WELCOMED, BUT NOT REQUIRED. At the meeting the creditors may elect a trustee as permitted by law, elect a committee of creditors, examine the debtor, and transact such other business as may properly come before the meeting. The meeting may be continued or adjourned from time to time without further written notice to the creditors.

LIQUIDATION OF THE DEBTOR'S PROPERTY. A trustee has been appointed in this case to collect the debtor's property, if any, and turn it into money. At this time, however, it appears from the schedules of the debtor that there are no assets from which any dividend can be paid to creditors. If at a later date it appears that there are assets from which a dividend may be paid, creditors will be notified and given an opportunity to file claims.

EXEMPT PROPERTY. Under state and federal law, the debtor is permitted to keep certain money or property as exempt. If a creditor believes that an exemption of money or property is not authorized by law, the creditor may file an objection. Any objection must be filed no later than 30 days after the conclusion of the meeting of creditors.

DISCHARGE OF DEBTS. The debtor is seeking a discharge of debts. A discharge means that certain debts are made unenforceable. Creditors whose claims against the debtor are discharged may never take action to collect the discharged debts. If a creditor believes the debtor should not receive a discharge under 11 U.S.C. § 727 or a specific debt should not be discharged under 11 U.S.C. § 523(c) for some valid reason specified in the bankruptcy law, the creditor must take action to challenge the discharge. The deadline for challenging a discharge is set forth above in box 'C.' Creditors considering taking such action may wish to seek legal advice.

DO NOT FILE A PROOF OF CLAIM UNLESS YOU RECEIVE A COURT NOTICE TO DO SO

For the Court:

January 31, 2000	Michael Kostishak
Date	Clerk of the Bankruptcy Court

Exemptions

Even in a liquidation proceeding, the bankrupt is generally not required to give up all of his property; he is permitted to **exempt** certain items of property. Under the new Bankruptcy Act, the debtor may choose to keep certain items or property either exempted by state law, or exempt under federal law unless state law specifically forbids use of the federal exemptions. However, any such property concealed or fraudulently transferred by the debtor may not be retained.

The debtor must elect to use *either* the set of exemptions provided by the state or the set provided by the federal bankruptcy law; she may not pick and choose between them. A husband and wife involved in bankruptcy proceedings must both elect either the federal or the state exemptions; where they cannot agree, the federal exemptions are deemed elected.

The **exemptions** permit the bankrupt person to retain a minimum amount of the assets considered necessary to life and to his ability to continue to earn a living. They are part of the fresh start philosophy that is one of the purposes of the Bankruptcy Act. The general effect of the federal exemptions is to make a minimum exemption available to debtors in all states. States that wish to be more generous to debtors can provide more liberal exemptions.

The specific items that are exempt under state statutes vary from state to state. Some states provide fairly liberal exemptions and are considered "debtors havens." For example, in Florida none of the equity in the debtor's homestead can be used to pay off unsecured creditors, thus allowing even relatively well-off individuals to shield significant assets from creditors. Items that are commonly made exempt from sale to pay debts owed creditors include the family Bible; tools or books of the trade; life insurance policies; health aids, such as wheelchairs and hearing aids; personal and household goods; and jewelry, furniture, and motor vehicles worth up to a certain amount.

The case that follows, *In Re Griffin,* illustrates a claim by a debtor for an exemption under a state statute.

In Re Griffin *139 B. R. 415 (Bankr, W.D. Tex. 1992)*

Troy Griffin was a debtor in a Chapter 7 bankruptcy proceeding. He claimed that his 1985 Hobie Magnum sailboat was exempt from his creditors under a Texas statute that provided an exemption for "athletic and sporting" equipment. A creditor objected to the claim of exemption.

King, Bankruptcy Judge The question in this case is whether a sailboat may be claimed as exempt under the "athletic and sporting equipment" category of section 42,002(a)(8) of the Texas Property Code. This Court holds that a sailboat is not included within the Texas exemption for athletic and sporting equipment, and, therefore, the objection to the claim of exemption is sustained and the exemption is denied.

The exemption statutes in Texas were amended in May, 1991. Prior to the amendments, certain items of personal property were not exempt unless the property was reasonably necessary for the family or single adult. After the amendments, however, athletic and sporting equipment were no longer required to be reasonably necessary for the family to qualify as exempt property.

The most extensive discussion of the athletic and sporting equipment exemption is found in an unreported opinion by Judge Clark, *In Re Schwarzbach,* in which he determined that a 16-foot bass boat was not exempt as athletic or sporting equipment. *Schwarzbach* agreed with the analysis of an earlier case that "athletic and sporting equipment" is limited to small items for personal use. *Schwarzbach* also compared the language of two different exemptions and concluded that the Legislature contemplated an exemption for a boat only if the boat is used in a trade or profession. At the time *Schwarzbach* was decided, section 42.002(3)(B) allowed an exemption for "tools, equipment, books, and apparatus, including a boat, used in a trade or profession." Today, that section includes "boats and motor vehicles." In contrast, the current 42.002(a)(8) exemption for athletic and sporting equipment expressly includes bicycles, but not boats.

The purpose of exemption laws is to work a balance between protecting the debtor from destitution and allowing creditors to obtain payment on legitimate debts from the debtor's assets. This court agrees with *Schwarzbach* in holding that

"athletic and sporting equipment" under the Texas exemption statute should be limited to small items for individual use. Allowing exemption of a sailboat or ski boat as "athletic and sporting equipment" would permit debtors to take undue advantage of the exemption laws and shield assets which are not necessary to a fresh start from the just claims of creditors. As so aptly stated by *In Re Henricksen,* "Bankruptcy is intended to provide debtors with a fresh start, not with a fine finish."

Claim of exemption denied.

Eleven categories of property are exempt under the federal exemptions, which the debtor may elect in lieu of the state exemptions. The federal exemptions include:

1. The debtor's interest (not to exceed $16,150 in value) in real or personal property that the debtor or a dependent of the debtor uses as a residence.
2. The debtor's interest (not to exceed $2,575 in value) in one motor vehicle.
3. The debtor's interest (not to exceed $425 in value for any particular item) up to a total of $8,625 in household furnishings, household goods, wearing apparel, appliances, books, animals, crops, or musical instruments that are held primarily for the personal, family, or household use of the debtor or a dependent of the debtor.
4. The debtor's aggregate interest (not to exceed $1,075 in value) in jewelry held primarily for the personal, family, or household use of the debtor or a dependent of the debtor.
5. $850 in value of any other property of the debtor's choosing, plus up to $8,075 of any unused homestead exemption.
6. The debtor's aggregate interest (not to exceed $1,625 in value) in any implements, professional books, or tools of the trade.
7. Life insurance contracts.
8. Interest up to $8,625 in specified kinds of dividends or interest in certain kinds of life insurance policies.
9. Professionally prescribed health aids.
10. Social security, disability, alimony, and other benefits reasonably necessary for the support of the debtor or his dependents.
11. The debtor's right to receive certain insurance and liability payments.

The term **value** means "fair market value as of the date of the filing of the petition." In determining the debtor's interest in property, the amount of any liens against the property must be deducted.

Avoidance of Liens

The debtor is also permitted to **void** certain liens against exempt properties that impair her exemptions. Liens that can be voided on this basis are judicial liens or nonpossessionary, nonpurchase money security interests in: (1) household furnishings, household goods, wearing apparel, appliances, books, animals, crops, musical instruments, or jewelry that are held primarily for the personal, family, or household use of the debtor or a dependent of the debtor; (2) implements, professional books, or tools of the trade of the debtor or a dependent of the debtor; and (3) professionally prescribed health aids for the debtor or a dependent of the debtor. Debtors are also permitted to **redeem** exempt personal property from secured creditors by paying them the value of the collateral. Then, the creditor is an unsecured creditor as to any remaining debt owed by the debtor.

Preferential Payments

A major purpose of the Bankruptcy Act is to ensure equal treatment for the creditors of an insolvent debtor. The act also seeks to prevent an insolvent debtor from distributing her assets to a few favored creditors to the detriment of the other creditors. Thus, the trustee has the right to recover for the benefit of the bankruptcy estate all **preferential payments** in excess of $600 made by the bankrupt person.[1] A preferential payment is a payment made by an insolvent debtor within 90 days before the filing of the bankruptcy petition that enables a creditor to obtain a greater percentage of a preexisting debt than other similar creditors of the debtor. It is irrelevant whether the creditor knew that the debtor

[1] In the case of an individual debtor whose debts are primarily consumer debts, the trustee is not entitled to avoid preferences unless the aggregate value of the property is $600 or more.

was insolvent. A debtor is presumed to have been insolvent on and during the 90 days immediately preceding the filing of a petition.

For example, Fredericks has $1,000 in cash and no other assets. He owes $650 to his friend Roberts, $1,500 to a credit union, and $2,000 to a finance company. If Fredericks pays $650 to Roberts and then files for bankruptcy, he has made a preferential payment to Roberts. Roberts has had his debt paid in full, whereas only $350 is left to satisfy the $3,500 owed to the credit union and finance company. They stand to recover only 10 cents on each dollar that Fredericks owes them. The trustee has the right to get the $650 back from Roberts.

If the favored creditor is an insider—a relative of an individual debtor or an officer, director, or related party of a company—who had reasonable cause to believe the debtor was insolvent at the time the transfer was made, then a preferential payment made to that creditor up to one year prior to the filing of the petition can be recovered by the trustee.

The 1994 amendments to the Bankruptcy Act provided that the trustee may not recover as preferential payments any bona fide payments of debts to a spouse, former spouse, or child of the debtor for alimony, maintenance, or support pursuant to a separation agreement, divorce decree, or other court order.

Preferential Liens

Preferential liens are treated in a similar manner. A creditor might try to obtain an advantage over other creditors by obtaining a lien on the debtor's property to secure an existing debt. The creditor might seek to get the debtor's consent to a lien or to obtain a lien by legal process. Such liens are considered *preferential* and are invalid if they are obtained on property of an insolvent debtor within 90 days before the filing of a bankruptcy petition and if their purpose is to secure a preexisting debt. A preferential lien obtained by an insider up to one year prior to the filing of the bankruptcy petition can be avoided.

Transactions in the Ordinary Course of Business

The Bankruptcy Act provides several exceptions to the trustee's avoiding power that are designed to allow a debtor and his creditors to engage in ordinary business transactions. The exceptions include (1) transfers that are intended by the debtor and creditor to be a contemporaneous exchange for new value or (2) the creation of a security interest in new property where new value was given by the secured party to enable the debtor to obtain the property and where the new value was in fact used by the debtor to obtain the property and perfected within 20 days after the debtor took possession of the collateral.

For example, George Grocer is insolvent. He is permitted to purchase and pay cash for new inventory, such as produce or meat, without the payment being considered preferential. His assets have not been reduced. He has simply traded money for goods to be sold in his business. Similarly, he could buy a new display counter and give the seller a security interest in the counter until he has paid for it. This would not be considered a preferential lien. The seller of the counter has not gained an unfair advantage over other creditors, and Grocer's assets have not been reduced by the transaction. The unfair advantage comes where an existing creditor tries to take a lien or obtain a payment of more than his share of the debtor's assets. Then, the creditor has obtained a preference over other creditors, which is what the trustee is allowed to avoid.

The Bankruptcy Act also provides an exception for transfers made in payment of a debt incurred in the ordinary course of the business or financial affairs of the debtor and the transferee made in the ordinary course of business or financial affairs of the debtor and the transferee and made according to ordinary business terms. Thus, for example, a consumer could pay her monthly utility bills in a timely fashion without the creditor/utility being vulnerable to having the transfer of funds avoided by a trustee. The purpose of this exception is to leave undisturbed normal financial relations, and it is consistent with the general policy of the preference section of the Act to discourage *unusual action* by either a debtor or her creditors when the debtor is moving toward bankruptcy.

Exceptions to the trustee's avoidance power are also made for certain statutory liens, certain other perfected security interests, and cases filed by individual debtors whose debts are primarily consumer debts and the aggregate value of all property affected by the transfer is less than $600.

Fraudulent Transfers

If a debtor transfers property or incurs an obligation with *intent to hinder, delay, or defraud creditors,* the transfer is *voidable* by the trustee. Transfers of

property for less than reasonable value are similarly voidable. Suppose Kasper is in financial difficulty. She "sells" her $15,000 car to her mother for $100 so that her creditors cannot claim it. Kasper did not receive fair consideration for this transfer. The transfer could be declared void by a trustee if it was made within a year before the filing of a bankruptcy petition against Kasper. The provisions of law concerning **fraudulent transfers** are designed to prevent a debtor from concealing or disposing of his property in fraud of creditors. Such transfers may also subject the debtor to criminal penalties and prevent discharge of the debtor's unpaid liabilities.[2]

In the Trujillo case that follows, the Bankruptcy Court avoided the transfer of automobiles and a house as fraudulent.

[2]Bulk sales of a debtor's materials, supplies, merchandise, or other inventory of the business in bulk and not in the ordinary course of business have the potential to defraud creditors. See Chapter 19, Formation and Terms of Sales Contracts, page 395 for a discussion of Article 6: Bulk Transfers, and the rights it provides to creditors.

Trujillo v. Grimmett *215 B.R. 200 (U.S. Bankr. App., 9th Cir. 1997)*

In 1991 Joseph and Toni Trujillo bought a house in Las Vegas, Nevada. Subsequently, Joseph borrowed $20,000 of his wife's savings to invest in business ventures. On November 15, 1993, the Trujillos defaulted in payment on a promissory note to Richard Hart and then into a stipulated agreement with him that was entered as a judgment on August 8, 1994.

In May of 1994, purportedly as security to his wife for the $20,000 loan, Joseph transferred the title to his Cadillac automobile to his son, Gilbert. Joseph instructed Gilbert to hold the title in trust until the loan was repaid. Later the Trujillos transferred to Gilbert the titles of two more vehicles, a Pontiac and a Volkswagen, purportedly to obtain a group insurance rate. No consideration was given for the transfer of any of the vehicles, and the Trujillos retained possession and control of all three vehicles.

On August 22, 1994, the Trujillos deeded, by a quitclaim deed, their house to their daughter, Valerie Aquino. The transfer was purportedly made to obtain a loan with Aquino's credit because Joseph's outstanding debts prevented him from obtaining credit in his own name. No consideration was given to the Trujillos for the transfer of the house, and the Trujillos retained both possession and control of the house.

On May 16, 1995, within a year of transferring the vehicles and deeding the house, the Trujillos filed a petition for relief under Chapter 7 of the Bankruptcy Code. The Bankruptcy Trustee, Tom Grimmett, filed a complaint for fraudulent conveyance, requested denial of discharge against the Trujillos, and sought recovery of the fraudulently conveyed property from Gilbert and Aquino. The Bankruptcy Court held that the transfers were avoidable fraudulent transfers. The Trujillos appealed.

Hagan, Bankruptcy Judge Section 548(a)(2) sets forth the avoidance powers of a bankruptcy trustee as they relate to fraudulent transfers of a debtor's interest in property. It provides, in relevant part:

> (a) The trustee may avoid any transfer of an interest of the debtor in property, or any obligation incurred by the debtor, that was made or incurred on or within one year before the date of the filing of the petition, if the debtor voluntarily or involuntarily
>
> . . .
>
> (2)(A) received less than a reasonably equivalent value in exchange for such transfer or obligation; and (B)(i) was insolvent on the date that such transfer was made or such obligation was incurred, or became insolvent as result of such transfer or obligation . . .

To avoid a transfer under section 548 four elements must be satisfied: (1) the debtor must have an interest in the property, (2) the debtor must have been insolvent at the time of the transfer or become insolvent as a result of the transfer, (3) the transfer must have occurred within one year of the bankruptcy filing, and (4) the debtor must have received less than a reasonably equivalent value for the transfer.

The court found the Trujillos transferred property in which they had an interest for less than equivalent value and at a time when they were insolvent. The court further held pursuant to section 522(g) that the Trujillos were not entitled to exemptions for either the value of the cars or the equity in the house because the Debtors voluntarily conveyed them.

The Trujillos argue they retained an interest in the property because transferring bare legal title is insufficient to constitute a "transfer" under the Code. Section 101 defines "transfer" very broadly as:

> [E]very mode, direct or indirect, absolute or conditional, voluntary or involuntary, of disposing of or parting with property or with an interest in property, including retention of title as a security interest and foreclosure of the debtor's equity of redemption.

11 U.S.C. section 101(54). The legislative history confirms the broadness of the term "transfer": A transfer is a disposition of an interest in property. The definition is as broad as possible. Under this definition, any transfer of an interest in property is a transfer, including a transfer of possession, custody, or control even if there is no transfer to title, because possession, custody, and control are interests in property. By the making, and recording, of the quitclaim deed to the house and the transfer of the titles to the vehicles, transfers under section 548 clearly occurred.

The four elements of a fraudulent transfer have been met. The Trujillos had an interest in both the house and the vehicles prior to the transfers. The Trujillos quitclaimed the deed to the house to Valerie and recorded it; Valerie now has marketable title in the house. Joseph transferred title to the vehicles to Gilbert; Gilbert has title to and ownership of the vehicles under state law. The Trujillos were insolvent at the time they transferred the property by their own admission. The transfers occurred within one year of the filing of their chapter 7 petition. Lastly, the Trujillos received nothing for these transfers, fulfilling the "less than reasonably equivalent value" requirement of section 548(a)(2).

Judgment affirmed in favor of Bankruptcy Trustee.

Claims

If creditors wish to participate in the estate of a bankrupt debtor, they must file a **proof of claim** in the estate within a certain time, usually six months after the first meeting of creditors. Only unsecured creditors are required to file proofs of claims. However, a secured creditor whose secured claim exceeds the value of the collateral is an unsecured creditor to the extent of the deficiency. That creditor must file a proof of claim to support the recovery of the deficiency.

Allowable Claims

The fact that a proof of claim is filed does not ensure that a creditor can participate in the distribution of the assets of the bankruptcy estate. The claim must also be allowed. If the trustee has a valid defense to the claim, he can use the defense to disallow or reduce it. For example, if the claim is based on goods sold to the debtor and the seller breached a warranty, the trustee can assert the breach as a defense. All of the defenses available to the bankrupt person are available to the trustee.

Secured Claims

The trustee must also determine whether a creditor has a lien or secured interest to secure an allowable claim. If the debtor's property is subject to a secured claim of a creditor, that creditor has first claim to it. The property is available to satisfy claims of other creditors only to the extent that its value exceeds the amount of the debt secured.

Priority Claims

The Bankruptcy Act declares certain claims to have **priority** over other claims. The nine classes of priority claims are:

1. Expenses and fees incurred in administering the bankruptcy estate.
2. Unsecured claims in involuntary cases that arise in the ordinary course of the debtor's business after the filing of the petition but before the appointment of a trustee or the order of relief.
3. Unsecured claims of up to $4,300 per individual (including vacation, severance, and sick pay)

for employees' wages earned within 90 days before the petition was filed.

4. Contributions to employee benefit plans up to $4,300 per person (moreover, the claim for wages plus pension contribution is limited to $4,300 per person).
5. Unsecured claims (*a*) for grain or the proceeds of grain against a debtor who owns or operates a grain storage facility or (*b*) up to $4,300 by a U.S. fisherman against a debtor who operates a fish produce storage or processing facility and who has acquired fish or fish produce from the fisherman.
6. Claims of up to $1,950 each by individuals for deposits made in connection with the purchase, lease, or rental of property or the purchase of goods or services for personal use that were not delivered or provided.
7. Allowed for claims for debts to a spouse, former spouse, or child of the debtor for alimony to, maintenance for, or support of such spouse or child in connection with a separation agreement, divorce decree, or other court order (but not if assigned to someone else).
8. Certain taxes owed to governmental units.
9. Allowed unsecured claims based on a commitment by the debtor to a federal depository institution regulatory agency (such as the FDIC).

Distribution of the Debtor's Estate

The priority claims are paid *after* secured creditors realize on their collateral but *before* other unsecured creditors are paid. Payments are made to the nine priority classes, in order, to the extent there are funds available. Each class must be paid in full before the next class is entitled to receive anything. To the extent there are insufficient funds to satisfy all the creditors within a class, each class member receives a pro rata share of his claim.

Unsecured creditors include: (1) those creditors who had not taken any collateral to secure the debt owed to them; (2) secured creditors to the extent their debt was not satisfied by the collateral they held; and (3) priority claimholders to the extent their claims exceed the limits set for priority claims.

Unsecured creditors, to the extent any funds are available for them, share in proportion to their claims. Unsecured creditors frequently receive little or nothing on their claims. Secured claims, trustee's fees, and other priority claims often consume a large part of the bankruptcy estate.

Special rules are set out in the Bankruptcy Act for distribution of the property of a bankrupt stockbroker or commodities broker.

Discharge in Bankruptcy

Discharge

A bankrupt person who has not been guilty of certain dishonest acts and has fulfilled his duties as a bankrupt is entitled to a **discharge in bankruptcy.** A discharge relieves the bankrupt person of further responsibility for dischargeable debts and gives him a fresh start. A corporation or a partnership is not eligible for a discharge in bankruptcy. A bankrupt person may file a written waiver of his right to a discharge. An individual may not be granted a discharge if she obtained one within the previous six years.

Objections to Discharge

After the bankrupt has paid all of the required fees, the court gives creditors and others a chance to file objections to the discharge of the bankrupt. Objections may be filed by the trustee, a creditor, or the U.S. attorney. If objections are filed, the court holds a hearing to listen to them. At the hearing, the court must determine whether the bankrupt person has committed any act that is a bar to discharge. If the bankrupt has not committed such an act, the court grants the discharge. If the bankrupt has committed an act that is a bar to discharge, the discharge is denied. The discharge is also denied if the bankrupt fails to appear at the hearing on objections or if he refused earlier to submit to the questioning of the creditors.

Acts That Bar Discharge

Discharges in bankruptcy are intended for honest debtors. Therefore, the following acts bar a debtor from being discharged: (1) the unjustified falsifying, concealing, or destroying of records; (2) making false statements, presenting false claims, or withholding recorded information relating to the debtor's property or financial affairs; (3) transferring, removing, or concealing

Concept Review

Distribution of Debtor's Estate

Secured Creditors

Secured creditors proceed directly against the collateral. If debt is fully satisfied, they have no further interest; if debt is only partially satisfied, they are treated as general creditors for the balance.

Debtor's Estate Is Liquidated and Distributed

↓

Priority Creditors (9 classes)

- Distribution is made to 9 classes of priority claims in order.
- Each class must be fully paid before next class receives anything.
- If funds are not sufficient to satisfy everyone in a class, then each member of the class receives the same proportion of his claim.

1. Costs and expenses of administration.
2. If involuntary proceeding, expenses incurred in the ordinary course of business after petition filed but before appointment of trustee.
3. Claims for wages, salaries, and commissions earned within 90 days of petition; limited to $4,300 per person.
4. Contributions to employee benefit plans arising out of services performed within 180 days of petition; limit of $4,300 (including claims for wages, salaries, and commissions) per person.
5. Unsecured items (*a*) for grain or the proceeds of grain against a debtor who owns or operates a grain storage facility or (*b*) up to $4,300 by a U.S. fisherman against a debtor who operates a fish produce or processing facility and who has acquired fish or fish produce from the fisherman.
6. Claims of individuals, up to $1,950 per person, for deposits made on consumer goods or services that were not received.
7. Allowed-for claims for debts to a spouse, former spouse, or child of the debtor for alimony to, maintenance for, or support of such spouse or child in connection with a separation agreement, divorce decree, or other court order (if not assigned to someone else).
8. Government claims for certain taxes.
9. Allowed unsecured claims based on a commitment by the debtor to a federal depository institution regulatory agency.

↓

General Creditors

If funds are not sufficient to satisfy all general creditors, then they each receive the same proportion of their claims.

1. General unsecured creditors.
2. Secured creditors for the portion of their debt that was not satisfied by collateral.
3. Priority creditors for amounts beyond priority limits.

↓

Debtor

Debtor receives any remaining funds.

property in order to hinder, delay, or defraud creditors; (4) failing to account satisfactorily for any loss or deficiency of assets; and (5) failing to obey court orders or to answer questions approved by the court.

In the *Byrd* case, which follows, the court held that a debt owed to a bank was nondischargeable because it had been obtained on the basis of a materially false financial statement.

Byrd v. Bank of Mississippi *207 B.R. 131 (S.D. Miss. 1997)*

In January 1990 Dr. Anthony Byrd, a dentist, applied to the Bank of Mississippi for an unsecured loan in the amount of $20,000. Prior to this time the bank had no relationship with Dr. Byrd. The bank requested and received from Dr. Byrd a 1988 individual income tax return along with a statement of his financial condition prepared by his accountant. The bank also obtained a credit report. After considering all the information, the bank granted the loan. The promissory note was renewed on a number of occasions, beginning in July 1990. On each occasion the bank requested, and was provided, a current financial statement.

The financial statement dated June 30, 1989, showed Dr. Byrd having a net worth of approximately $649,000. Listed in the financial statements was an asset consisting of 60 acres of real property with a value of $30,000. In fact Dr. Byrd did not own the property, nor did he ever pay the property taxes on it. He later explained that he had listed it because he believed that it had passed to him on his father-in-law's death. The property was farmed by his brother-in-law. The statement also listed as an asset, a residence in Covington County, Mississippi, with an appraised value of $49,800. At the time the financial statement was submitted, the property had been sold to his brother on a conditional sale contract with a purchase price of $39,000; it also was encumbered with a deed of trust securing a $39,000 note to the Bank of Simpson County. However, neither the conditional sales contract nor the note and deed of trust was mentioned in the financial statement. Dr. Byrd later explained that this was an "oversight." The initial credit report obtained by the bank did not mention either of these elements, so the bank had no reason to disbelieve the assertion in the statement provided by Dr. Byrd.

The initial financial statement also listed as an asset a note receivable for $103,000 from Southern Outdoors, Inc., a company which the statement noted was 92 percent owned by Dr. Byrd. A subsequent statement listed the note receivable as $184,000. The last statement he submitted, omitted this loan; Dr. Byrd indicated that he had been told by his accountant that it should be considered as a capital contribution to Southern Outdoors rather than as an account receivable.

Dr. Byrd filed for bankruptcy under Chapter 7. The Bank of Mississippi commenced an adversary proceeding to have its claim arising out of the $20,000 promissory note declared nondischargeable on the grounds that it had been obtained on the basis of a materially false statement in writing concerning the debtor's financial statement which the bank had relied on in granting the loan. The Bankruptcy Court declared the debt owed by Dr. Byrd to the Bank of Mississippi to be nondischargeable on the grounds it had been obtained on the basis of a materially false financial statement. Dr. Byrd appealed.

Bramlette, District Judge Under the section of the Bankruptcy Code at issue here, an individual debtor is not discharged from any debt "for money, property, services, or an extension, renewal, or refinancing of credit, to the extent obtained by . . . use of a statement in writing (i) that is materially false; (ii) respecting the debtor's or an insider's financial condition; (iii) on which the creditor to whom the debtor is liable for such money, property, services or credit reasonably relied; and (iv) that the debtor caused to be made or published with intent to deceive . . . " 11 U.S.C. section 523(a)(2)(B).

To prevail on its claim of nondischargeability, the Bank of Mississippi was required to prove each of the following elements:

1. the existence of a statement in writing;
2. the writing must be materially false;
3. the writing must concern the debtor's financial condition;

4. the creditor must have reasonably relied on the statement; and
5. the statement must be made or published with the intent to deceive.

The bankruptcy court found that each of the financial statements provided to the bank were in writing and concerned the debtor's financial condition. While Dr. Byrd admitted that the financial statements did not accurately reflect his financial condition, he denied that they were materially false. He also contended that the bank did not reasonably rely on them, and that they were not made with the intent to deceive the bank. The bankruptcy court found against the debtor on each issue.

The debtor attempts to use a mathematical analysis to show that the financial statements were not materially false. He argues that even if the inaccuracies in his financial statements were corrected, he still would have come within the bank's net worth and income parameters, and therefore would have been granted the loan.

The Fifth Circuit Court of Appeals has stated that a materially false statement is one that 'paints a substantially untruthful picture of a financial condition by misrepresenting information of the type which would normally affect the decision to grant credit.' In determining whether a false statement is material, "a relevant although not dispositive inquiry is 'whether the lender would have made the loan had he known the debtor's true situation.' "

The bankruptcy court found that Dr. Byrd did not prove that the bank would have made the initial loan even if it had known his true financial situation. However, the court noted, even if he had proved that the bank would have loaned him the money regardless of the errors in his financial statement, that fact, while relevant, would not necessarily be dispositive of the "materially false" issue. The court concluded that the inclusion as an asset on the debtor's financial statement of 60 acres of real property valued at $30,000, which he has never owned, was a material misstatement; and that the representation that he owned a $49,000 residence free and clear, while it was subject to a deed of trust securing a debt of $39,000 and a conditional sales contract for $39,000, was a material omission.

Four financial statements were provided to the bank, one for the original loan and one for each of the three renewals. The debtor argued that the bankruptcy court should only consider whether the bank reasonably relied on the last financial statement provided. According to the debtor, by the time of the final renewal in July of 1991, the bank was aware of certain "red flags," i.e., the appearance on the July 1991 credit report of the note to the Bank of Simpson County, and the removal of the $184,000 note receivable from Southern Outdoors from the last financial statement; therefore, the bank's reliance on the last financial statement was not reasonable.

The bankruptcy court assumed for the sake of argument that the final financial statement did contain "red flags" that should have alerted the lender to possible inaccuracies in the financial statement. Nevertheless, the court concluded that where no additional money was obtained with each of the three renewals, it was the first and not the last financial statement provided to the bank that is relevant in determining the reasonableness of the bank's reliance.

The bankruptcy court below, held that since the note renewal did not represent a new debt incurred, it need consider only whether the Bank of Mississippi reasonably relied on the financial statement provided by Dr. Byrd in connection with the original note executed in January of 1990.

The bankruptcy court found that when Dr. Byrd originally approached the bank, he had no individual past loan or deposit relationship with the bank. In addition to the financial statement, Dr. Byrd provided the bank with his income tax return. The bank also obtained a credit report on Dr. Byrd prior to making the loan. The loan officer for the bank testified that neither the income tax return nor the credit report contained information that would appear to contradict Dr. Byrd's testimony.

Dr. Byrd argued that a title report on his real property would have revealed that he did not own the 60 acres in Smith County and that the Covington County residence was encumbered with a deed of trust. However, the loan officer testified that the bank does not obtain title reports when considering an unsecured loan. Dr. Byrd also argued that the existence of the $103,000 note receivable from a corporation in which he owned 92 percent of the stock

was inherently suspicious and should have been considered a "red flag."

The bankruptcy court found that it was reasonable for the bank not to require a title search on property listed on a financial statement in connection with an unsecured loan. Further, the court found that the bank was not unreasonable in relying on Dr. Byrd's professionally prepared financial statement as to the amount due him from the corporation. The bankruptcy court's finding of reasonable reliance is amply supported by the record.

At trial, Dr. Byrd denied that he intended to deceive the bank, explaining that he listed the 60 acres in Smith County as an asset because he thought he owned the property as a result of a conversation with his brother-in-law. However, Dr. Byrd admitted being aware that he has never paid any taxes or received a tax bill on the property. Dr. Byrd's explanation for omitting the conditional sales contract and the deed of trust on the Covington County property was that these items were somehow mistakenly omitted from the first financial statement, and that the subsequent financial statements were simply prepared by reference to the first.

The bankruptcy court found that Dr. Byrd was a highly educated man with an extensive background in business matters. Since graduation from dental school, he had been involved in several business ventures, including a roofing business and a fishing tackle store, and was a major stockholder in a corporation named Mississippi Marine Specialties. He also owned a city block in Mount Olive, Mississippi, which he used as rental property, and owned half of the office building in which the dental practice was located. The court found that he possessed an understanding of both the incidents of real property ownership and the significance of encumbrances on real property, and thus should be held to a higher standard.

The court also found that Dr. Byrd exhibited a reckless indifference to the accuracy of his June 30, 1999, financial statement which he provided to the bank to obtain the original $20,000 unsecured loan. Therefore, the court found, Dr. Byrd had the requisite intent to deceive at the time he furnished the statement. This finding is also well supported by the record.

In conclusion, this Court finds that the financial statements of the debtor contained materially false statements; that the debtor acted with reckless indifference to, if not actual knowledge of, the materially false statements; and that the Bank of Mississippi reasonably relied on these misstatements in making the loan; therefore, a judgment of nondischargeability pursuant to section 523(a)(2)(B) was warranted.

Judgment Affirmed in favor of Bank of Mississippi.

Nondischargeable Debts

Certain debts are not affected by the discharge of a bankrupt debtor. The Bankruptcy Act provides that a discharge in bankruptcy releases a debtor from all provable debts except those that:

1. Are due as a tax or fine to the United States or any state or local unit of government.
2. Result from liabilities for obtaining money by false pretenses or false representations.
3. Are due for willful or malicious injury to a person or his property.
4. Are due for alimony or child support.
5. Were created by the debtor's larceny or embezzlement or by the debtor's fraud while acting in a fiduciary capacity.
6. Are certain kinds of educational loans.
7. Were not scheduled in time for proof and allowance because the creditor holding the debt did not have notification of the proceeding even though the debtor was aware that he owed money to that creditor.
8. Secured claims in exempt assets.

The 1984 amendments established several additional grounds for nondischargeability relating to debts incurred in contemplation of bankruptcy—and the 1994 amendments made changes to them. Congress was concerned about debtors who ran up large expenditures on credit cards shortly before filing for bankruptcy relief. Cash advances in excess of $1,075 obtained by use of a credit card and a revolving line of credit at a credit union obtained within 60 days of filing a bankruptcy petition are presumed to be nondischargeable. Similarly, a debtor's purchase of more

than $1,075 in *luxury goods or services* on credit from a single creditor within 60 days of filing a petition is presumed to be nondischargeable.

There are also exceptions from dischargeability for debts: (1) reflected in a judgment arising out of a debtor's operation of a motor vehicle while legally intoxicated; (2) incurred to pay a tax to the United States that would be nondischargeable; and (3) incurred by a debtor in the course of a separation agreement or divorce decree *unless* the debtor does not have the ability to pay the debt from income or property not reasonably necessary for the support of the debtor or a dependent or discharging the debt would result in a benefit to the debtor that outweighs the detrimental consequences to a spouse, former spouse, or child of the debtor.

All of these nondischargeable debts are provable debts. The creditor who owns these claims can participate in the distribution of the bankrupt's estate. However, the creditor has an additional advantage: His right to recover the unpaid balance is not cut off by the bankrupt's discharge. All other provable debts are dischargeable; that is, the right to recover them is cut off by the bankrupt's discharge.

Reaffirmation Agreements

Sometimes, creditors put pressure on debtors to reaffirm, or to agree to pay, debts that have been discharged in bankruptcy. When the 1978 amendments to the Bankruptcy Act were under consideration, some individuals urged Congress to prohibit such agreements. They argued that reaffirmation agreements were inconsistent with the fresh start philosophy of the Bankruptcy Act. Congress did not agree to a total prohibition; instead, it set up a rather elaborate procedure for a creditor to go through to get a debt reaffirmed. Essentially, the agreement must be made *before* the discharge is granted and must contain a clear statement that advises the debtor (1) that the agreement may be rescinded at any time prior to discharge or within 60 days after filing with the court and (2) the agreement contains a clear and conspicuous statement advising the debtor that the reaffirmation is not required by the bankruptcy law and any other law or agreement. The agreement must be filed with the court accompanied by a statement from the debtor's attorney that (1) it represents a voluntary agreement by the debtor, (2) that it does not impose an undue hardship on the debtor, and (3) the attorney fully apprised the debtor of the legal affect and consequences of the agreement and of any default under such an agreement. Court approval is not required for the reaffirmation of loans secured by real property. Also, a debtor may voluntarily pay any dischargeable obligation without entering into a reaffirmation agreement.

Dismissal for Substantial Abuse

As it considered the 1984 amendments to the Bankruptcy Act, Congress was concerned that too many individuals with an ability to pay their debts over time pursuant to a Chapter 13 plan were filing petitions to obtain Chapter 7 discharges of liability. The consumer finance industry urged Congress to preclude Chapter 7 petitions where a debtor had the prospect of future disposable income to satisfy more than 50 percent of his prepetition unsecured debts. Although Congress rejected this approach, it did authorize Bankruptcy Courts to dismiss cases that they determined were a **substantial abuse** of the bankruptcy process. This provision appears to cover situations in which a debtor has acted in bad faith or has the present or future ability to pay a significant portion of her current debts. The case that follows, *In Re Huckfeldt,* illustrates a situation in which the court concluded that a petition in bankruptcy had been filed in bad faith.

In Re Huckfeldt *39 F.3d 829 (8th Cir. 1994)*

During their 12 years of marriage, Roger and Georgianne Huckfeldt accumulated over $250,000 in debts while Roger completed college, medical school, and six years of residency in surgery and while Georgianne completed college and law school. These debts included $166,000 in student loans to Huckfeldt and $47,000 jointly borrowed from Georgianne's parents. The Huckfeldts divorced on March 26, 1992. The divorce decree ordered Roger to pay his student loans, one-half of the debt to Georgianne's parents, and other enumerated debts totaling some $241,000. The decree also ordered Roger to hold Georgianne harmless for these debts but otherwise denied Georgianne's request for maintenance.

On June 4, 1992, six months before Roger would complete his residency in surgery, he filed a voluntary Chapter 7 petition, listing assets of $1,250 and liabilities of $546,857. After filing the petition, Roger accepted a fellowship at Oregon Health Sciences University, a one- or two-year position paying $45,000 per year, substantially less than the income he could likely earn during the pendency of his Chapter 7 proceeding. Following Roger's petition, creditors of the debts assigned to him in the divorce decree began pursuing Georgianne for repayment. She filed for bankruptcy protection in March 1993.

In September 1992, Georgianne and her parents filed a motion to dismiss Roger's Chapter 7 petition on the ground that it was filed in bad faith. They alleged that Roger had threatened to file for bankruptcy during the divorce proceeding and had commenced the bankruptcy proceeding in defiance of the divorce decree for the purpose of shifting responsibility for assigned debts to Georgianne. They also alleged that Roger had deliberately taken steps to reduce his annual income to avoid payment of his debts through the Chapter 7 liquidation.

After a hearing, the bankruptcy court granted the motion to dismiss the proceeding on the grounds it was filed in bad faith, finding, among other things, that Roger could be earning $110,000 to $120,000 after expenses. The district court affirmed the decision, and Roger appealed to the court of appeals.

Loken, Circuit Judge After finding that Roger could be earning $110,000 to $120,000 per year, after all expenses except income tax, the bankruptcy court stated:

> It is the purpose of the bankruptcy system to provide a fresh start for the honest but unfortunate debtor. It is not the purpose of the bankruptcy system to eliminate the obligations of a party who is capable of paying the same. The Court believes debtor filed this bankruptcy petition in bad faith and with the deliberate intention of unloading debt, particularly that to his spouse, which he could shortly begin to repay. Further this Court believes it was the intent of the debtor to leave his ex-spouse with all the debts and obligations incurred over the 12 years and force her into a bankruptcy situation also . . . Accordingly the court concludes that his case was filed in bad faith and concludes that good faith is a requirement for the filing of a bankruptcy petition no matter what the chapter.

Huckfeldt filed a Chapter 7 petition to frustrate the divorce court decree and to push his ex-wife into bankruptcy. He then manipulated his immediate earnings to ensure the Chapter 7 proceeding would achieve these noneconomic motives. That conduct meets the standard for bad faith. Indeed, such conduct has long been considered unworthy of bankruptcy protection.

The petition in this case was not filed for the purpose of a just liquidation by composition with creditors but to defeat the wife from a right of possession in and to the real estate which was to be awarded to her under the divorce proceedings. This violates the purpose and intent of the statute and, as said by the Supreme Court of the United States, under that situation, the proceedings will be halted at the outset. Huckfeldt is not an "honest but unfortunate debtor" entitled to the equitable relief of a Chapter 7 liquidation.

Judgment against Roger Huckfeldt affirmed.

Chapter 11: Reorganizations

Reorganization Proceeding

Sometimes, creditors benefit more from the continuation of a bankrupt debtor's business than from the liquidation of the debtor's property. Chapter 11 of the Bankruptcy Act provides a proceeding whereby, under the supervision of the Bankruptcy Court, the debtor's financial affairs can be reorganized rather than liquidated. Chapter 11 proceedings are available to individuals and to virtually all business enterprises, including individual proprietorships, partnerships, and corporations (except banks, savings and loan associations, insurance companies, commodities brokers, and stockbrokers).

Petitions for reorganization proceedings can be filed voluntarily by the debtor or involuntarily by its creditors. Once a petition for a reorganization proceeding is filed and relief is ordered, the court usually appoints (1) a committee of creditors holding unsecured claims, (2) a committee of equity security holders (shareholders),

and (3) a trustee. The trustee may be given the responsibility for running the debtor's business. He is also usually responsible for developing a plan for handling the various claims of creditors and the various interests of persons such as shareholders.

The reorganization plan is essentially a contract between a debtor and its creditors. This contract may involve recapitalizing a debtor corporation and/or giving creditors some equity, or shares, in the corporation in exchange for part or all of the debt owed to them. The plan must (1) divide the creditors into classes; (2) set forth how each creditor will be satisfied; (3) state which claims, or classes of claims, are impaired or adversely affected by the plan; and (4) provide the same treatment to each creditor in a particular class, unless the creditors in that class consent to different treatment.

The plan is then submitted to the creditors for approval. Approval generally requires that creditors holding two-thirds in amount and one-half in number of each class of claims impaired by the plan must accept it. Once approved, the plan goes before the court for confirmation. If the plan is confirmed, the debtor is responsible for carrying it out.

The *Official Committee of Equity Security Holders* shows that until a plan is confirmed, the bankruptcy court has no authority to distribute a portion of the bankruptcy assets to a portion of the unsecured creditors.

Official Committee of Equity Security Holders v. Mabey

832 F.2d 299 (4th Cir. 1987)

The A. H. Robins Company is a publicly held company that filed a voluntary petition for relief under Chapter 11 of the Bankruptcy Code. Robins sought refuge in Chapter 11 because of a multitude of civil actions filed against it by women who alleged they were injured by use of the Dalkon Shield intrauterine device that it manufactured and sold as a birth control device. Approximately 325,000 notices of claim against Robins were received by the Bankruptcy Court.

In 1985, the court appointed the Official Committee of Equity Security Holders to represent the interest of Robins's public shareholders. In April 1987, Robins filed a proposed plan of reorganization but no action was taken on the proposed plan because of a merger proposal submitted by Rorer Group, Inc. Under this plan, Dalkon Shield claimants would be compensated out of a $1.75 billion fund, all other creditors would be paid in full, and Robins's stockholders would receive stock of the merged corporation. However, at the time of other critical activity in the bankruptcy proceeding, no revised plan incorporating the merger proposal had been filed or approved.

Earlier, in August 1986, the court had appointed Ralph Mabey as an examiner to evaluate and suggest proposed elements of a plan of reorganization. On Mabey's suggestion, a proposed order was put before the district court supervising the proceeding that would require Robins to establish a $15 million emergency treatment fund "for the purpose of assisting in providing tubal reconstructive surgery or in-vitro fertilization to eligible Dalkon Shield claimants." The purpose of the emergency fund was to assist those claimants who asserted that they had become infertile as a consequence of their use of the product. A program was proposed for administering the fund and for making the medical decisions required.

On May 21, 1987, the district court ordered that the emergency treatment fund be created, and the action was challenged by the committee representing the equity security holders.

Chapman, Circuit Judge The May 21, 1987, order of the district court approving the Emergency Treatment Fund makes no mention of its authority to establish such a fund prior to the allowance of the claims of the women who would benefit from the fund, and prior to the confirmation of a plan of reorganization of Robins. In its order denying the Equity Committee's Motion for a Stay Pending Appeal of the May 21 order, the district court relied on the "expansive equity power" of the court to justify its action.

While one may understand and sympathize with the district court's concern for the Dalkon Shield claimants who may desire reconstructive surgery or in-vitro fertilization, the creation of the Emergency Treatment Fund at this stage of the Chapter 11

bankruptcy proceedings violates the clear language and intent of the Bankruptcy Code, and such action may not be justified as an exercise of the court's equitable powers.

The Bankruptcy Code does not permit a distribution to unsecured creditors in a Chapter 11 proceeding except under and pursuant to a plan of reorganization that has been properly presented and approved. Sections 1122–1129 of the Bankruptcy Code set forth the required contents of the reorganization plan, the classification of claims, the requirements of disclosure of the contents of the plan, the method for accepting the plan, the hearing required on confirmation of the plan, and the requirements for confirmation. The clear language of these statutes does not authorize the payment in part or full, or the advance of monies to or for the benefit of unsecured claimants prior to the approval of the plan of reorganization. The creation of the Emergency Treatment Fund has no authority to support it in the Bankruptcy Code and violates the clear policy of Chapter 11 reorganizations by allowing piecemeal pre-confirmation payments to certain unsecured creditors. Such action also violates Bankruptcy Rule 3021 which allows distribution to creditors only after the allowance of claims and the confirmation of a plan.

Judgment reversed in favor of Official Committee of Equity Security Holders.

Use of Chapter 11

During the 1980s, attempts by a number of corporations to seek refuge in Chapter 11 as a means of escaping problems they were facing received considerable public attention. Some of the most visible cases involved efforts to obtain some protection against massive product liability claims and judgments for damages for breach of contract and to escape from collective bargaining agreements. Thus, for example, Johns-Manville Corporation filed under Chapter 11 because of the claims against it arising out of its production and sale of asbestos years earlier, while A. H. Robins Company, as illustrated in the preceding case, was concerned about a surfeit of claims arising out of its sale of the Dalkon Shield, an intrauterine birth control device. And, in 1987, Texaco, Inc., faced with a $10.3 billion judgment in favor of Pennzoil in a breach of contract action, filed a petition for reorganizational relief under Chapter 11. Companies such as LTV and Allegheny Industries sought changes in retirement and pension plans, and other companies such as Eastern Airlines sought refuge in Chapter 11 while embroiled in labor disputes.

As the 1990s began, a number of companies that were the subject of highly leveraged buyouts (LBOs) financed with so-called junk bonds, including a number of retailers, resorted to Chapter 11 to seek restructuring and relief from their creditors. Similarly, companies such as Pan Am and TWA that were hurt by economic slowdown and increase in fuel prices filed Chapter 11 petitions.

In recent years, Chapter 11 has been the subject of significant criticism and calls for its revision. Critics point out that many of the Chapter 11 cases are permitted to drag on for years, thus depleting the assets of the debtor through payments to trustees and lawyers involved in administration and diminishing the assets available to creditors.

Collective Bargaining Agreements

Collective bargaining contracts pose special problems. Prior to the 1984 amendments, there was concern that some companies would use Chapter 11 reorganizations as a vehicle to avoid executed collective bargaining agreements. The concern was heightened by the Supreme Court's 1984 decision in *NLRB v. Bildisco and Bildisco.* In that case, the Supreme Court held that a reorganizing debtor did not have to engage in collective bargaining before modifying or rejecting portions of a collective bargaining agreement and that such unilateral alterations by a debtor did not violate the National Labor Relations Act.

Congress then acted to try to prevent the misuse of bankruptcy proceedings for collective bargaining purposes. The act's 1984 amendments adopt a rigorous multistep process that must be complied with in determining whether a labor contract can be rejected or modified as part of a reorganization. Among other things that must be done before a debtor or trustee can seek to avoid a collective bargaining agreement are the submission of a proposal to the employees'

representative that details the "necessary" modifications to the collective bargaining agreement and ensures that "all creditors, the debtor and all affected parties are fairly treated." Then, before the bankruptcy court can authorize a rejection of the original collective bargaining agreement, it must review the proposal and find that (1) the employees' representative refused to accept it without good cause, and (2) the balance of equities clearly favors the rejection of the original collective bargaining agreement.

The following case, *In Re Maxwell Newspapers, Inc.,* shows the scrutiny that the court gives the action of a debtor seeking to avoid a collective bargaining agreement.

In Re Maxwell Newspapers, Inc.
New York Typographical Union No. 6 v. Maxwell Newspapers, Inc.
981 F.2d 85 (2nd Cir. 1992)

In July 1974, the New York Typographical Union No. 6 agreed in a collective bargaining agreement with the Daily News, *a daily newspaper in New York City, to automation of the typesetting function in return for a guarantee of lifetime employment for its members then working at the newspaper. Between 1982 and 1992, the* Daily News *lost approximately $100 million and its owner, Maxwell Newspapers, Inc., had filed for relief under Chapter 11. Maxwell sought a buyer for the* Daily News *with sufficient resources to satisfy not only its creditors and employees but also to modernize its printing plant so that it could compete in the New York metropolitan market.*

In September 1992, Mortimer Zuckerman, through his affiliate New DN Company, entered negotiations with the Daily News *to buy its assets. These negotiations included a so-called stand-alone plan of reorganization that was conditioned on union support. One crucial component of the plan was concessions by Local No. 6 with respect to the July 1974 collective bargaining agreement that guaranteed the printers lifetime employment.*

On October 1, 1992, Maxwell, in tandem with Zuckerman, proposed to the union that the collective bargaining agreement be modified to eliminate: (1) any obligation of Maxwell to require the purchaser of the assets of the Daily News *to employ any member of the union, (2) any obligation of Maxwell to continue to employ any member of the union if Maxwell ceased publication or sold the* Daily News *pursuant to the bankruptcy proceeding, and (3) any obligation to arbitrate any controversy regarding these matters. Maxwell also provided documentation of the impact of the union's collective bargaining agreement on the financial stability of the* Daily News *and asserted that it had sought in vain prospective purchasers who would honor the labor agreement.*

The union made a counterproposal on October 14 in which it expressed a willingness to forgo the lifetime job guarantees. The union proposed a progressive reduction in the number of shifts worked conditioned on a cash buyout for each union member, three years' contribution to the pension and welfare funds, and an early retirement enhancement. Negotiations, including a series of counteroffers, continued until October 21, when Zuckerman, on the eve of a October 22 hearing in the bankruptcy case, made a final offer. He offered a reduced number of guaranteed shifts and jobs that fell to 15 jobs a year after a new printing plant was opened. The jobs would then be guaranteed for 13 years and he proposed to make a one-time contribution of $1 million to the pension and welfare funds.

The union rejected Zuckerman's final offer to modify the collective bargaining agreement, and negotiations broke down. Maxwell asked the bankruptcy court to reject the contract with Local No. 6 and to approve the proposed sale of the Daily News *to Zuckerman. The bankruptcy court granted the motions, and the union appealed. The district court reversed the bankruptcy court concerning the rejection of the collective bargaining agreement, holding that the union had "good cause" to reject Zuckerman's final offer.*

Cardamone, Circuit Judge We first analyze whether the union in fact had "good cause" to refuse Zuckerman's final offer. Section 1113 of the Bankruptcy code controls the rejection of collective bargaining agreements in Chapter 11 proceedings. The statute puts in place "safeguards designed to insure

that employers did not use Chapter 11 as medicine to rid themselves of corporate indigestion." Employers may only propose those necessary modifications in the employees benefits and protections that are "necessary to permit" the effective reorganization of the debtor. A debtor may sell the assets of the business unencumbered by a collective bargaining agreement if that agreement has been rejected pursuant to section 1113. This statute requires unions to face those changed circumstances that occur when a company becomes insolvent, and it requires all affected parties to compromise in the face of financial hardship. At the same time, section 1113 also imposes requirements on the debtor to prevent it from using bankruptcy as a judicial hammer to break the union. Rejection of a collective bargaining agreement is permitted only if the debtor fulfills the requirements of section 1113(b)(1), the union fails to reject the debtor's proposal with good cause, and the balance of equities clearly favors rejection.

More importantly, the statute imposes the obligation on the parties to negotiate in good faith. This obligation is properly analyzed under section 1113(c)(2), which permits rejection of a labor agreement only when the union has rejected the debtor's proposal without good cause.

The district court reasoned that the statute covers not only the contents of an employer's proposed modification of a labor contract, but also how the offer is made. It ruled because the offer was made on October 21—on the eve of the bankruptcy hearing—and on a take-it-or-leave-it basis, the union had no meaningful opportunity to consider and make a counter-proposal.

What "good cause" means is difficult to answer in the abstract apart from the moorings of a given case. A more constructive and perhaps more answerable inquiry is why this term is in the statute. We think good cause serves as an incentive to the debtor trying to have its labor contract modified to propose in good faith only those changes necessary to its successful reorganization, while protecting it from the union's refusal to accept the changes without a good reason.

To that end, the entire thrust of section 1113 is to ensure that well-informed and good faith negotiations occur in the market place, not as part of the judicial process. Reorganization proceedings are designed to encourage such a negotiated voluntary modification. Knowing that it cannot turn down an employer's proposal without good cause gives the union an incentive to compromise on modifications of the collective bargaining agreement, so as to prevent its complete rejection. Because the employer has the burden of proving its proposals are necessary, the union is protected from an employer whose proposals may be offered in bad faith.

The bankruptcy court found that the debtor measures its workforce by calculating "full time equivalents" (FTEs) derived from dividing payroll expenses by five, which is the number of days in a week worked by a full-time employee. The bankruptcy judge further found that from September 1990 to August 1992, FTEs for debtor's employees declined as follows: for managers 58 percent, guild members 34 percent, drivers 46 percent, pressmen 47 percent, mailers 45 percent, paperhandlers 54 percent, machinists and electricians 21 percent, engravers and stereotypers 27 percent. In stark contrast, the Local 6 typographers workforce declined only 13 percent, and these employees are by far the highest hourly paid employees of the debtor. No other employees or unions suffered so small an FTE cut as Local No. 6.

Moreover, unsecured creditors, the court observed, are estimated to obtain only 13 to 18 cents on the dollar and the value of stockholders' equity is nearly worthless. Yet, the bankruptcy judge declared, the union did not offer an alternative that focused on the needs of its employer's organization, but instead adhered to its position that Local 6's excess employees had to be given an incentive to induce them to leave. Neither the debtor or purchaser could fund this demand.

We reverse the district court's ruling not only on the contents of the rejection order but also concerning the manner in which Zuckerman made his final offer to the union. First, Local No. 6 did not complain that it had too little time to respond to the employer's proposal on October 21. In addition, parties to collective bargaining agreements routinely negotiate for many hours under imperative deadlines. In that negotiating universe, 10 hours is ample time to consider and respond to a proposal. Consequently, the bankruptcy court correctly concluded that Local No. 6 rejected the employer's proposal without good cause.

Judgment reversed in favor of Maxwell Newspapers, Inc.

Chapter 12: Family Farms

Relief for Family Farmers

Historically, farmers have been accorded special treatment in the Bankruptcy Code. In the 1978 act, as in earlier versions, small farmers were exempted from involuntary proceedings. Thus, a small farmer who filed a voluntary Chapter 11 or 13 petition could not have the proceeding converted into a Chapter 7 liquidation over his objection so long as he complied with the act's requirements in a timely fashion. Additional protection was also accorded through the provision allowing states to opt out of the federal exemption scheme and to provide their own exemptions. A number of states used this flexibility to provide generous exemptions for farmers so they would be able to keep their tools and implements.

Despite these provisions, the serious stress on the agricultural sector in the mid-1980s led Congress in 1986 to further amend the Bankruptcy Act by adding a new Chapter 12 targeted to the financial problems of the family farm. During the 1970s and 1980s, farmland prices appreciated and many farmers borrowed heavily to expand their productive capacity, creating a large debt load in the agricultural sector. When land values subsequently dropped and excess production in the world kept farm product prices low, many farmers faced extreme financial difficulty.

Chapter 12 is modeled after Chapter 13, which is discussed next. It is available only for family farmers with regular income. To qualify, a farmer and spouse must have not less than 80 percent of their total noncontingent, liquidated debts arising out of their farming operations. The aggregate debt must be less than $1.5 million and at least 50 percent of an individual's or couple's income during the year preceding the filing of the petition must have come from the farming operation. A corporation or partnership can also qualify, provided that more than 50 percent of the stock or equity is held by one family or its relatives and they conduct the farming operation. Again, 80 percent of the debt must arise from the farming operation; the aggregate debt ceiling is $1.5 million.

The debtor is usually permitted to remain in possession to operate the farm. Although the debtor in possession has many of the rights of a Chapter 11 trustee, a trustee is appointed under Chapter 12 and the debtor is subject to his supervision. The trustee is permitted to sell unnecessary assets, including farmland and equipment, without the consent of secured creditors and before a plan is approved. However, the secured creditor's interest attaches to the proceeds of the sale.

The debtor is required to file a plan within 90 days of the filing of the Chapter 12 petition—although the bankruptcy court has the discretion to extend the time. A hearing is held on the proposed plan, and it can be confirmed over the objection of creditors. The debtor may release to any secured party the collateral that secures the claim to obtain confirmation without the acceptance by that creditor.

Unsecured creditors are required to receive at least liquidation value under the Chapter 12 plan. If an unsecured creditor or the trustee objects to the plan, the court may still confirm the plan despite the objection so long as it calls for full payment of the unsecured creditor's claim or it provides that the debtor's disposable income for the duration of the plan is applied to making payments on it. A debtor who fulfills his plan, or is excused from full performance because of subsequent hardship, is entitled to a discharge.

Chapter 13: Consumer Debt Adjustments

Relief for Individuals

Chapter 13 of the Bankruptcy Act, entitled Adjustments of Debts for Individuals, gives individuals who do not want to be declared bankrupt an opportunity to pay their debts in installments under the protection of a federal court. Under Chapter 13, the debtor has this opportunity free of such problems as garnishments and attachments of her property by creditors. Only individuals with regular incomes (including sole proprietors of businesses) who owe individually (or with their spouse) liquidated, unsecured debts of less than $269,250 and secured debts of less than $807,750 are eligible to file under Chapter 13. Under the pre-1978 Bankruptcy Act, Chapter 13 proceedings were known as "wage earner plans." The 1978 amendments expanded the coverage of these proceedings.

Procedure

Chapter 13 proceedings are initiated only by the voluntary petition of a debtor filed in the Bankruptcy Court.

Creditors of the debtor may not file an involuntary petition for a Chapter 13 proceeding. The debtor in the petition states that he is insolvent or unable to pay his debts as they mature and that he desires to effect a composition or an extension, or both, out of future earnings or income. A **composition of debts** is an arrangement whereby the amount the person owes is reduced, whereas an **extension** provides the person a longer period of time in which to pay his debts. Commonly, the debtor files at the same time a list of his creditors as well as a list of his assets, liabilities, and executory contracts.

Following the filing of the petition, the court calls a meeting of creditors, at which time proofs of claims are received and allowed or disallowed. The debtor is examined, and she submits a plan of payment. The plan is submitted to the secured creditors for acceptance. If they accept the plan and if the court is satisfied that the plan is proposed in good faith, meets the legal requirements, and is in the interest of the creditors, the court approves the plan. The court then appoints a trustee to carry out the plan. The plan must provide for payments over three years or less, unless the court approves a longer period of up to five years.

No plan may be approved if the trustee or an unsecured creditor objects, unless the plan provides for the objecting creditor to be paid the present value of what he is owed or provides for the debtor to commit all of his projected disposable income for a three-year period to pay his creditors.

In the case that follows, *In the Matter of Kelly,* a proposed plan was rejected on the grounds it had not been proposed in good faith.

In the Matter of Kelly *217 B.R. 273 (Bankr. D. Neb. 1997)*

Paul Kelly was a graduate student at the University of Nebraska, who had been working on his Ph.D. since 1991. He expected to complete it in 1999. He was also working as a clerk in a liquor store approximately 32 hours per week and earned $5.85 per hour. His monthly expenses were $743.00, and his monthly take-home pay was $761.00. Kelly borrowed money through student loans to enable him to pay tuition, fees, books, and other school-related expenses and expected to continue to do so until he finished his Ph.D.

On July 26, 1994, the U.S. District Court in Minnesota entered a judgment in the amount of $30,000 against Kelly and in favor of Capitol Indemnity Corporation. The judgment was based on a misappropriation of funds by Kelly from a bank insured by Capitol. The court's order provided that the judgment was not dischargeable in bankruptcy.

Kelly filed a Chapter 13 petition. In his Chapter 13 plan, Kelly proposed to pay a total of $7,080 by paying off $118 per month, $100 of which would come from student loans. In the proceeding, Kelly testified that among other things, he was currently qualified to teach at the college or university level and could earn about $20,000 but he preferred to work part-time as a clerk while he completed graduate school. Capitol objected to the proposed plan on the grounds it was not proposed in good faith. Capitol contended that Kelly should not be allowed to languish in graduate school, remain underemployed, and obtain the benefit of a Chapter 13 discharge. Capitol asserted that Kelly was attempting to discharge a debt that was nondischargeable under Chapter 7, proposed to make payments primarily from his student loans, and would be paying a dividend to unsecured creditors of only 8 1/2 percent. These factors, Capitol contended, demonstrated that the plan had not been proposed in good faith and that it should not be confirmed.

Minahan, Bankruptcy Judge Capitol objects to confirmation of the proposed Chapter 13 plan on three grounds:

1. The debtor is not an individual with regular income as required by 11 U.S.C. section 109(e);
2. The plan is not feasible; and
3. The plan was not proposed in good faith.

The Eighth Circuit Court of Appeals provided a non-exclusive list of factors to be considered in determining whether a Chapter 13 plan is filed in good faith. *United States v. Estus* (1982). The factors listed in *Estus* are: (1) the amount of the proposed payments and the amount of the debtor's surplus; (2) the debtor's employment history, ability to earn and the likelihood of future increases in income; (3) the probable or expected duration of the plan;

(4) the accuracy of the plan's statements of the debts, expenses and percentage repayment of unsecured debt and whether any inaccuracies are an attempt to mislead the court; (5) the extent of preferential treatment between classes of creditors; (6) the extent to which secured claims are modified; (7) the type of debt sought to be discharged and whether any such debt is nondischargeable in Chapter 7; (8) the existence of special circumstances such as inordinate medical expenses; (9) the frequency with which the debtor has sought relief under the Bankruptcy Reform Act; (10) the motivation and sincerity of the debtor in seeking Chapter 13 relief; and (11) the burden which the plan's administration would place upon the trustee.

Section 1325(b) of the Bankruptcy Code was added in 1984, which subsumes most of the *Estus* factors; however, in determining whether a Chapter 13 plan is filed in good faith, the eighth circuit has stated that the totality of the circumstances analysis adopted in *Estus* remains in place.

Capitol's assertion that the debtor is not eligible for Chapter 13 relief because he does not receive regular income is without merit. The debtor has regular income from his employment as a clerk. This income is sufficiently stable and regular to enable the debtor to make payments under a Chapter 13 plan. The debtor has regular income and is eligible for relief under Chapter 13.

Capitol's objections regarding feasibility and good faith are addressed together. Capitol essentially asserts that the plan is not feasible because plan payments are funded from student loans. Without the student loans, it will not be feasible for the debtor to make the proposed plan payments. Capitol contends that the debtor should not be allowed to languish in graduate school, remain underemployed, and obtain the benefit of a Chapter 13 discharge. Capitol asserts that the fact the debtor is attempting to discharge a debt that is nondischargeable under Chapter 7, proposes to make payments primarily from his student loans, and is paying a dividend to unsecured creditors of only 8 1/2 percent are all factors which demonstrate that the plan has not been proposed in good faith.

I conclude that the debtor's plan has not been proposed in good faith. Total payments are $7,080 under the Chapter 13 plan. After payment of secured and priority claims, unsecured claims will be paid pro rata yielding a dividend of only 8 1/2 percent. The plan does not provide for the repayment of student loans which may become payable during the life of the plan. The debtor failed to list over $38,500 in student loans on his bankruptcy schedules until the Chapter 13 Trustee objected to confirmation of the original plan. Over half of the unsecured debt is owed to Capitol and Capitol asserts that this debt would be excepted from discharge in Chapter 7 under section 523(a)(4). The debtor stated in a deposition that he is currently qualified to teach at the college or university level and could earn about $20,000 annually. However, he has elected to work part time as a clerk while he attends graduate school. The debtor proposes to fund his plan primarily with student loans. Without these student loan funds, the debtor's disposable income is only $18.00 per month. From these facts, I conclude that the debtor's plan is not proposed in good faith.

Because the plan has not been proposed in good faith, it should not be confirmed. Although the debtor is arguably utilizing all his disposable income to make payments under the proposed Chapter 13 plan, it is simply not equitable for the debtor to voluntarily remain underemployed, to obtain the benefit of an advanced college degree, and to discharge his obligations to creditors upon payment of a nominal dividend.

Objection of Capitol Indemnity Corporation to confirmation of law sustained.

Under the 1984 amendments, a Chapter 13 debtor must begin making the installment payments proposed in her plan within 30 days after the plan is filed. The interim payments must continue to be made until the plan is confirmed or denied. If the plan is denied, the money, less any administrative expenses, is returned to the debtor by the trustee. The interim payments give the trustee an opportunity to observe the debtor's performance and thus to be in a better position to make a recommendation about whether the plan should be approved.

Once approved, a plan may be subsequently modified on petition of a debtor or a creditor where there is a material change in the debtor's circumstances.

Concept Review

Comparison of Major Forms of Bankruptcy Proceedings

Purpose	Chapter 7 Liquidation	Chapter 11 Reorganization	Chapter 12 Adjustments of Debts	Chapter 13 Adjustments of Debts
Eligible Debtors	Individuals, and partnerships, and corporations *except* municipal corporations, railroads, insurance companies, banks, and savings and loan associations. Farmers and ranchers are eligible only if they petition voluntarily.	Generally, same as Chapter 7 except a railroad may be a debtor, and a stockholder and commodity broker may not be a debtor under Chapter 11	Family farmer with regular income, at least 50 percent of which comes from farming, and less than $1.5 million in debts, at least 80 percent of which is farm related.	Individual with regular income with liquidated unsecured debts less than $269,250 and secured debts of less than $807,750.
Initiation of Proceeding	Petition by debtor (voluntary). Petition by creditors (involuntary).	Petition by debtor (voluntary). Petition by creditors (involuntary).	Petition by debtor.	Petition by debtor.
Basic Procedure	1. Appointment of trustee. 2. Debtor retains exempt property. 3. Nonexempt property is sold and proceeds distributed based on priority of claims. 4. Dischargeable debts are terminated.	1. Appointment of trustee and committees of creditors and equity security holders. 2. Debtor submits reorganization plan. 3. If plan is approved and implemented, debts are discharged.	1. Trustee is appointed but debtor usually remains in possession of farm. 2. Debtor submits a plan in which unsecured creditors must receive at least liquidation value. 3. If plan is approved and fulfilled, debtor is entitled to a discharge.	1. Debtor indicates in petition that he is seeking a composition of debts or an extension. 2. If plan is approved after submitted to creditors, then trustee is appointed. 3. If plan is approved and fulfilled, debts covered by plan are discharged.
Advantages	After liquidation and distribution of assets, most or all debts may be discharged and debtor gets a fresh start.	Debtor remains in business and debts are liquidated through implementation of approved reorganization plan.	Debtor generally remains in possession and has opportunity to work out of financial difficulty over period of time (usually three years) through implementation of approved plan.	Debtor has opportunity to work out of financial difficulty over period of time (usually three years) through implementation of approved plan.

Suppose Curtis Brown has a monthly take-home pay of $1,000 and a few assets. He owes $1,500 to the credit union, borrowed for the purchase of furniture; he is supposed to repay the credit union $75 per month. He owes $1,800 to the finance company on the purchase of a used car; he is supposed to repay the company $90 a month. He has also run up charges of $1,200 on a MasterCard account, primarily for emergency repairs to his car; he must pay $60 per month to MasterCard. His rent is $350 per month, and food and other living expenses

run him another $425 per month. Curtis was laid off from his job for a month and fell behind on his payments to his creditors. He then filed a Chapter 13 petition. In his plan, he might, for example, offer to repay the credit union $50 a month, the finance company $60 a month, and MasterCard $40 a month—with the payments spread over three years rather than the shorter time for which they are currently scheduled.

Discharge

When the debtor has completed her performance of the plan, the court issues an order that discharges her from the debts covered by the plan. The debtor may also be discharged even though she did not complete her payments within the three years if the court is satisfied that the failure is due to circumstances for which the debtor cannot justly be held accountable. An active Chapter 13 proceeding stays, or holds in abeyance, any straight bankruptcy proceedings and any actions by creditors to collect consumer debts. However, if the Chapter 13 proceeding is dismissed (for example, because the debtor fails to file an acceptable plan or defaults on an accepted plan), straight bankruptcy proceedings may begin.

Advantages of Chapter 13

A debtor may choose to file under Chapter 13 to avoid the stigma of bankruptcy or to retain more of his property than is exempt from bankruptcy under state or federal law. Nonexempt property would have to be surrendered to the Trustee in a Chapter 7 liquidation proceeding. Chapter 13 can provide some financial discipline to a debtor as well as an opportunity to get his financial affairs back in good shape. It also gives him relief from the pressures of individual creditors so long as he makes the payments called for by the plan. The debtor's creditors may benefit by recovering a greater percentage of the debt owed to them than would be obtainable in straight bankruptcy.

Ethical and Public Policy Concerns

1. If a person receives a discharge of debts in bankruptcy, should the person feel an ethical obligation to reaffirm or to repay the debts that were discharged?

2. Is it ethical for a person facing the prospect of seeking relief under the bankruptcy laws to try to convert nonexempt property into exempt property on the eve of the filing of his petition? Does the relative economic condition of the debtor have any bearing on your response to this question?

3. As you have learned in this chapter, during the past decade corporations have filed petitions under Chapter 11 in order to deal with a variety of problems, including the threat of massive product liability claims and the desire of the company to get out of labor contracts. Is it ethical for a company to use Chapter 11 to try to get out of, or to modify, labor contracts or pension agreements that it now deems unfavorable to its interests? Is it ethical for a company to seek the shelter of Chapter 11 when faced with claims for product liability? Is the decision of the appeals court in *Official Committee of Equity Security Holders v. Mabey* to disallow the proposed emergency treatment fund good public policy?

4. As was discussed in this chapter, the federal bankruptcy law makes special provision for small farmers, and some states are particularly generous in the exemptions they make available to farmers. Is this special treatment of farmers justifiable as sound and fair public policy?

Problems and Problem Cases

1. Gilbert and Kimberly Barnes filed a voluntary Chapter 7 petition in the U.S. Bankruptcy Court for the District of Maryland. Subsequently they moved to avoid a nonpurchase money lien held by ITT Financial Services on their exempt "household goods." Among the goods that the Barneses were claiming as "household goods" were a videocassette recorder (VCR), a 12-gauge pump shotgun, a 20-gauge shotgun, a 30-06 rifle, and a .22 pistol. ITT contended that the VCR and the firearms were not household goods that they could exempt. Under Maryland law, household goods are items of personal property reasonably necessary for the day-to-day existence of people in the context of their homes. Should the court consider the VCR and firearms to be "household goods"?

2. Gary Johnson filed a Chapter 13 bankruptcy petition. Acting on the advice of his lawyer shortly before filing the petition, Johnson sold an interest in real estate and used the proceeds to buy a life insurance policy with a face value of $31,460 and a cash value of $12,118. His wife was named as the beneficiary. Johnson claimed that the policy was exempt under South Dakota law, which provides for an exemption of up to

$20,000 for the proceeds of a life insurance policy payable directly to the insured, his surviving spouse, or his family. A creditor objected to the exemption but made no showing of fraudulent intent on Johnson's part. Should the exemption be allowed?

3. William Kranich, Jr., was the sole shareholder in the DuVal Financial Corporation (DFC). On November 10, 1991, Kranich filed a voluntary petition for relief under Chapter 7; on January 6, 1992, DFC also filed a voluntary petition under Chapter 7. Prior to the commencement of the Chapter 7 proceedings, Kranich conveyed his personal residence in Clearwater, Florida, to DFC. The transfer was wholly without consideration. Shortly thereafter, DFC transferred the property to William Kranich III and June Elizabeth Kranich, Kranich's son and daughter, as tenants in common. This transfer was also without consideration. The bankruptcy trustee brought suit to recover the property from the son and daughter on the grounds that the transfer was fraudulent. Could the trustee recover the property on the grounds that its transfer, without consideration, was fraudulent?

4. David Hott was a college graduate with a degree in business administration who was employed as an insurance agent. He and his wife graduated from college in 1996. At the time he graduated, Hott had outstanding student loans of $14,500 for which he was given a grace period before he had to repay them. Hott became unemployed. Bills began to accumulate and a number of his outstanding bills were near the credit limits on his accounts. About that time, he received a promotional brochure by mail from Signal Consumer Discount Company, offering the opportunity to borrow several thousand dollars. The Hotts decided it appeared to be an attractive vehicle for them to use to consolidate their debts. Hott went to the Signal office and filled out a credit application. He did not list the student loan as a current debt. He later claimed that someone in the office told him he didn't have to list it if he owned an automobile but there was significant doubt about the credibility of this claim. Had he listed it, he would not have met the debt–income ratio required by Signal and it would not have made the loan. As it was, Signal agreed to make the loan on the condition Hott pay off a car debt in order to reduce his debt–income ratio and Hott agreed to do so. On March 30, 1997, Signal loaned the Hotts $3,458.01. On June 24, 1998, the Hotts filed for bankruptcy. Signal objected to discharge of the balance remaining on its loan on the ground it had been obtained through the use of a materially false financial statement. Was discharge of the debt barred on the ground it had been obtained through the use of a materially false financial statement?

5. Paul George Conrad filed a voluntary petition in bankruptcy listing $37,354 in liabilities and $25 in assets. Conrad's obligations consisted of a loan executed in connection with a business venture, Double Dip Ice Cream Company; signature loans; revolving credit card accounts; and a student loan of $4,125.79 owed to the U.S. Department of Health, Education, and Welfare. Conrad had used the GI Bill of Rights to study at five different colleges and had also obtained three federally guaranteed long-term, low-interest student loans. After receiving his bachelor's degree, he had been employed as a teacher. He was terminated as a full-time teacher earlier in the year, and since that time he had been on call as a substitute teacher, for which he was paid $33 a day when he was called. He had not sought other full-time employment. He lived at home with his 75-year-old mother. He did not have a car of his own and used his mother's van. Several months after filing for bankruptcy, Conrad obtain a $5,000 loan, with his mother as a guarantor on the note. He used the proceeds only to make the monthly payments on the note.

Section 523(a) of the Bankruptcy Code provides that a bankruptcy discharge will not extend:

> (8) to a governmental unit, or a nonprofit institution of higher education, for an educational loan, unless . . . (B) excepting such debt from discharge under this paragraph will impose an undue hardship on the debtor.

Conrad sought to have his educational loan discharged and based his claim of hardship on two asserted facts: (1) that he had to support and provide for his elderly mother and (2) that he was unable to obtain employment because of his physical appearance. Is Conrad's student loan dischargeable in bankruptcy?

6. On December 19, Brian Scholz was involved in an automobile collision with a person insured by The Travelers Insurance Company. At the time, Scholz was cited for, and pled no contest to, a criminal charge of driving under the influence of alcohol arising out of the accident. The Travelers paid its insured $4,303.68 and was subrogated to the rights of its insured against Scholz. Subsequently, The Travelers filed a civil action against Scholz to recover the amount it had paid, and a default judgment was entered against Scholz. Eleven months later, Scholz sought relief from the bankruptcy court by filing a voluntary petition under Chapter 7. One of the questions in the bankruptcy proceeding was

whether the debt owing to The Travelers was nondischargeable. Is the debt dischargeable?

7. Tom Page was employed by Airo Supply Company as its only bookkeeper. Over a three-year period, he appropriated $14,775.77 of Airo Supply's money to his own use. Airo Supply discovered the embezzlement and obtained a civil judgment against Page for $14,775.77. Page then filed a voluntary petition in bankruptcy. Is the judgment he owes to Airo Supply dischargeable?

8. John and Christine Newsom were noncommissioned officers in the U.S. Air Force who each earned $1,408 net a month. In October 1986, they filed a voluntary petition in bankruptcy under Chapter 7. At the time, they had three secured debts totaling $21,956, $21,820 of which stemmed from the purchase of a 1986 Ford Bronco and a 1985 Pontiac Trans Am. They proposed to surrender the Bronco and a secured television set to the trustee, leaving only the secured debt, $10,000, owing on the Pontiac. Their unsecured debts totaled $20,911: $6,611 from bank card use, $12,764 from retail credit, and $1,350 from credit union loans. Of the unsecured debt, $11,563 was incurred in 1986. The Newsoms filed an income and expense schedule showing that their monthly expenses totaled $2,232, including $100 for recreation and $150 for cigarettes and "walking around money." This left a surplus of $276 a month. The Bankruptcy Court, on its own motion, issued an order to the Newsoms to show why their petition should not be dismissed pursuant to the substantial abuse provision of the Bankruptcy Code. Should the Chapter 7 petition be dismissed as a substantial abuse of the provisions of the Bankruptcy Act?

9. Royal Composing Room, Inc., is an advertising typography company, and one of the last unionized shops in an industry that was subjected to considerable stress as computer technology replaced the Linotype machine. Royal was a party to a collective bargaining agreement with Typographical Union No. 6. Royal was a profitable company until 1982, when its gross revenues declined by $2 million; over the next four years, it sustained operating losses. Confronted with these difficulties, in 1983 Royal began to cut expenses by sharply cutting the compensation of its principal executives, freezing the salaries of salespeople and middle management foremen, eliminating company automobiles, and moving to a smaller location to save rent. At the start of 1986, Royal lost its largest customer, Doyle Dane Bernbach, Inc., and sought to convince the union, which theretofore had not made any sacrifices or concessions, to forgo a 3 percent wage increase agreed to earlier. When the union refused, Royal filed a petition for reorganization under Chapter 11 and sought to reject its collective bargaining agreement. Under section 1113(b) of the Bankruptcy Code, before it could reject the collective bargaining agreement, Royal was required to make a proposal to the union "which provides for those necessary modifications in the employees' benefits and protections that are necessary to permit the reorganization of the debtor and assures that all creditors, the debtor and all of the affected parties are treated fairly and equally." Royal held a meeting with officials of the union and offered a proposal that included a reduction of benefits, changes in work rules, the elimination of the scheduled wage increase, and the elimination of the union's right to arbitration as the way to change the contract. The union rejected the proposal and did not negotiate. Should the bankruptcy court approve the rejection of the collective bargaining agreement?

10. Winifred Doersam was the borrower on three student loans made to her by First Federal Savings and Loan and guaranteed by the state of Ohio Student Loan Commission (OSLC) totaling $10,000 to finance her graduate education at the University of Dayton. Doersam also signed as the cosigner for a $5,000 student loan for her daughter, also made by First Federal and guaranteed by OSLC. With the use of the loans, she was able to obtain a position as a systems analyst with NCR Corporation, which required her to obtain a master's degree in order to retain her position at an annual salary of $24,000. Approximately six weeks before her graduation, and before the first payment on her student loans was due, Doersam filed a petition and plan under Chapter 13. In her plan, she proposed to pay $375 a month to her unsecured creditors over a 36-month period. Doersam's total unsecured debt was $18,418, 81 percent of which was comprised of the outstanding student loans. Her schedules provided for payment of rent of $300 per month and food of $400 per month. Her listed dependents included her 23-year-old daughter and her 1-year-old granddaughter. At the time, her daughter was employed in the Ohio Work Program, a program designed to help welfare recipients, for which she was paid a small salary. The OLSC objected to the plan proposed by Doersam on the grounds that it was filed in bad faith. Should the bankruptcy court refuse to confirm the plan on the grounds it was not filed in good faith?

- *A. Payable on Demand*
- *B. Payable at a Definite Time*

X. Payable to Order or Bearer

XI. Special Terms
- *A. Additional Terms*
- *B. Ambiguous Terms*

As commerce and trade developed, people moved beyond exclusive reliance on barter to the use of money and then to the use of substitutes for money. The term *commercial paper* encompasses substitutes in common usage today such as checks, promissory notes, and certificates of deposit.

History discloses that every civilization that engaged to an appreciable extent in commerce used some form of commercial paper. Probably the oldest commercial paper used in the carrying on of trade is the promissory note. Archaeologists found a promissory note made payable to bearer that dated from about 2100 B.C. The merchants of Europe used commercial paper—which, under the law merchant, was negotiable—in the 13th and 14th centuries. Commercial paper does not appear to have been used in England until about A.D. 1600.

This chapter and the three following chapters outline and discuss the body of law that governs commercial paper. Of particular interest are those kinds of commercial paper having the attribute of *negotiability*—that is, they can generally be transferred from party to party and accepted as a substitute for money. This chapter discusses the nature and benefits of negotiable instruments and then outlines the requirements an instrument must meet to qualify as a negotiable instrument. Subsequent chapters discuss transfer and negotiation of instruments, the rights and liabilities of parties to negotiable instruments, and the special rules applicable to checks.

Nature of Negotiable Instruments

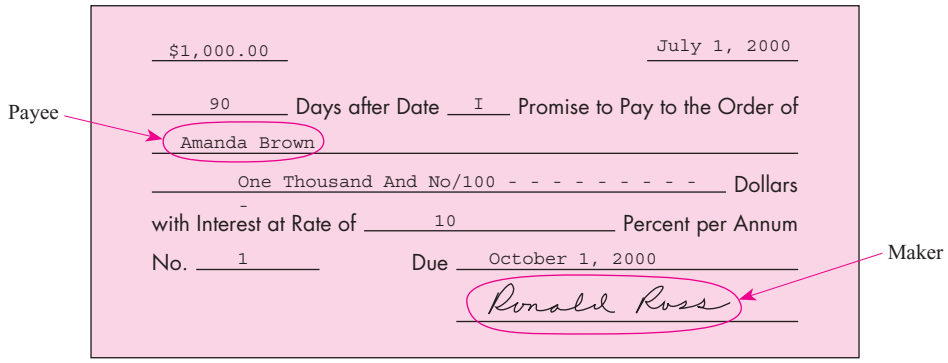
When a person buys a television set and gives the merchant a check drawn on his checking account, that person uses a form of negotiable commercial paper. Similarly, a person who goes to a bank or a credit union to borrow money might sign a promissory note agreeing to pay the money back in 90 days. Again, the bank and borrower use a form of negotiable commercial paper.

Commercial paper is basically a *contract for the payment of money.* It may serve as a substitute for money payable immediately, such as a check. Or, it can be used as a means of extending credit. When a television set is bought by giving the merchant a check, the check is a substitute for money. If a credit union loans a borrower money now in exchange for the borrower's promise to repay it later, the promissory note signed by the borrower is a means of extending credit.

Uniform Commercial Code

The law of commercial paper is covered in Article 3 (Negotiable Instruments) and Article 4 (Bank Deposits and Collections) of the Uniform Commercial Code. Other negotiable documents, such as investment securities and documents of title, are treated in other articles of the Code. The original Code Articles 3 and 4, adopted initially in the 1960s, generally followed the basic, centuries-old rules governing the use of commercial paper; but at the same time they adopted modern terminology and coordinated, clarified, and simplified the law. However, business practices continued to evolve and new technological developments have changed the way that banks process checks. Accordingly, in 1990, a joint effort by the American Law Institute and the National Conference of Commissioners on Uniform State Laws produced a Revised Article 3 and related amendments to Articles 1 and 4. The purpose was to clarify Articles 3 and 4, to bring them into better harmony with current business practice, and to acknowledge recent technological developments.

Because virtually all of the states (except New York) have adopted the 1990 revision to Article 3 and the related amendments to Article 4, we use them as the basis for this edition of the textbook. The reader should ascertain whether the state in which she lives has adopted the revised article/amendments and also should keep in mind that instruments may be interpreted under the version of the Code that was in effect when the instruments were issued. Moreover, for the period between the first adoption of the revised article/amendments by a state (Arkansas) and the adoption by the last state, the "uniform law" concerning negotiable instruments will be anything but uniform.



For the student of negotiable instruments law, this is an interesting—but also a particularly difficult—time to study this area of the law. Revised Article 3 and the related amendments introduce new concepts, change definitions and the wording of key elements, and delete numerous provisions from the original version of Article 3. As a result, in drafting this chapter and the three chapters that follow, the authors have relied heavily on tracking the language of the revised article and on statements by the drafters as to their intent. Further complicating the picture is the fact that, in a number of respects, the revision is more complex than the original version. Moreover, while more than 30 years of case law had helped flesh out the meaning of the original Article 3, the revision has diminished some of the value of that case law. Virtually all of the cases to date arose under the original version of Article 3 and are of mixed—and sometimes very limited—value in trying to assess how courts will decide issues under the revision.

Just as these factors posed a challenge to the authors of this edition of the textbook, they will pose a challenge to you and your instructor as you work your way through the material on negotiable instruments. More questions are likely to be left up in the air than is true in other, more settled areas of the law. It will take a number of years, considerable experience, and new case law to clarify the updated law of negotiable instruments.

Negotiable Instruments

The two basic types of negotiable instruments are *promises to pay money* and *orders to pay money.* Promissory notes and certificates of deposit issued by banks are promises to pay someone money. Checks and drafts are orders to another person to pay money to a third person. A check, which is a type of draft, is an order directed to a certain kind of person, namely a bank, to pay money from a person's account to a third person.

Figure 1 *Promissory Note*

Negotiability

Negotiable instruments are a special kind of commercial paper that can pass readily through our financial system and is accepted in place of money. This gives negotiable instruments many advantages.

For example, Searle, the owner of a clothing store in New York, contracts with Amado, a swimsuit manufacturer in Los Angeles, for $10,000 worth of swimsuits. If negotiable instruments did not exist, Searle would have to send or carry $10,000 across the country, which would be both inconvenient and risky. If someone stole the money along the way, Searle would lose the $10,000 unless he could locate the thief. By using a check in which Searle orders his bank to pay $10,000 from his account to Amado, or to someone designated by Amado, Searle makes the payment in a far more convenient manner. He sends only a single piece of paper to Amado. If the check is properly prepared and sent, sending the check is less risky than sending money. Even if someone steals the check along the way, Searle's bank may not pay it to anyone but Amado or someone authorized by Amado. And, because the check gives Amado the right either to collect the $10,000 or to transfer the right to collect it to someone else, the check is a practical substitute for cash to Amado as well as to Searle.

In this chapter and in the three following chapters, we discuss the requirements necessary for a contract for the payment of money to qualify as a negotiable instrument. We also explain the features that not only distinguish a negotiable instrument from a simple contract but also led to the widespread use of negotiable instruments as a substitute for money.

Kinds of Negotiable Instruments

Promissory Notes

The promissory note is the simplest form of commercial paper; it is simply a promise to pay money. A **promissory note** is a two-party instrument in which one person (known as the **maker**) makes an unconditional promise in writing to pay another person (the **payee**), a person specified by that person, or the bearer of the instrument, a fixed amount of money, with or without interest, either on demand or at a specified, future time [3–104].[1]

The promissory note, shown in Figures 1 and 2, is a credit instrument; it is used in a wide variety of transactions in which credit is extended. For example, if a person purchases an automobile using money borrowed from a bank, the bank has the person sign a promissory note for the unpaid balance of the purchase price. Similarly, if a person borrows money to purchase a house, the lender who makes the loan and takes a mortgage on the house has the person sign a promissory note for the amount due on the loan. The note probably states that it is secured by a mortgage. The terms of payment on the note should correspond with the terms of the sales contract for the purchase of the house.

[1]The numbers in brackets refer to the sections of the 1990 Revised Article 3 (and the conforming amendments to Articles 1 and 4) of the Uniform Commercial Code.

Figure 2 *Promissory Note (Consumer Loan Note)*

The National BANK OF WASHINGTON

CONSUMER LOAN NOTE

#

Date November 21, , 20 00

The words I and me mean all borrowers who signed this note. The word bank means The National Bank of Washington.

Promise to Pay

30 months from today, I promise to pay to the order of The National Bank of Washington Seventy-Eight Hundred Seventy Five and no/100 - - - - - - - - - - - dollars ($ 7,875.00).

Payee

Responsibility

Although this note may be signed below by more than one person, I understand that we are each as individuals responsible for paying back the full amount.

Breakdown of Loan

This is what I will pay:

Amount of loan	1.$ 6,800.00
Credit Life Insurance (optional)	2.$ 100.00
Other (describe)	3.$ -0-
Amount Financed (Add 1 and 2 and 3)	4.$ 6,900
FINANCE CHARGE	5.$ 975.00
Total of Payments (Add 4 and 5)	$ 7,875.00
ANNUAL PERCENTAGE RATE	10.5%

Repayment

This is how I will repay:
I will repay the amount of this note in 30 equal uninterrupted monthly installments of $ 262.50 each on the 1st day of each month starting on the 1st day of December, 20 00 and ending on May 1, 2002

Prepayment

I have the right to prepay the whole outstanding amount of this note at any time. If I do, or if this loan is refinanced—that is, replaced by a new note—you will refund the unearned finance charge, figured by the rule of 78—a commonly used formula for figuring rebates on installment loans.

Late Charge

Any installment not paid within ten days of its due date shall be subject to a late charge of 5% of the payment, not to exceed $5.00 for any such late installment.

Security

To protect the National Bank of Washington, I give what is known as a security interest in my auto and/or other: (Describe) Ford Thunderbird # Serial #115117-12-

See the security agreement.

Credit Life Insurance

Credit life insurance is not required to obtain this loan. The bank need not provide it and I do not need to buy it unless I sign immediately below. The cost of credit life insurance is $ 100.00 for the term of the loan.

Signed: A. J. Smith

Date: November 21, 2000

Default

If for any reason I fail to make any payment on time, I shall be in default. The bank can then demand immediate payment of the entire remaining unpaid balance of this loan, without giving anyone further notice. If I have not paid the full amount of the loan when the final payment is due, the bank will charge me interest on the unpaid balance at six percent (6%) per year.

Right of Offset

If this loan becomes past due, the bank will have the right to pay this loan from any deposit or security I have at this bank without telling me ahead of time. Even if the bank gives me an extension of time to pay this loan, I still must repay the entire loan.

Collection Fees

If this note is placed with an attorney for collection, then I agree to pay an attorney's fee of fifteen percent (15%) of the unpaid balance. This fee will be added to the unpaid balance of the loan.

Co-borrowers

If I am signing this note as a co-borrower, I agree to be equally responsible with the borrower for this loan. The bank does not have to notify me that this note has not been paid. The bank can change the terms of payment and release any security without notifying or releasing me from responsibility for this loan.

Copy Received

I received a completely filled in copy of this note. If I have signed for Credit Life Insurance, I received a copy of the Credit Life Insurance certificate.

Certificates of Deposit

The certificate of deposit given by a bank or a savings and loan association when a deposit of money is made is a type of note, namely a note of a bank. A **certificate of deposit** is an instrument containing (1) an acknowledgment by a bank that it has received a deposit of money and (2) a promise by the bank to repay the sum of money [3–104(j)]. Figure 3 is an example of a certificate of deposit.

Figure 3 *Certificate of Deposit*

Source: Citizens First National Bank of Bloomington.

Most banks no longer issue certificates of deposit (CD) in paper form. Rather, the bank maintains an electronic deposit and provides the customer with a statement indicating the amount of principal held on a CD basis and the terms of the CD, such as the maturity and interest rate. In these instances, the certificate of deposit is not in negotiable instrument form.

Drafts

A **draft** is a form of commercial paper that involves an *order* to pay money rather than a promise to pay money [3–104(e)]. The most common example of a draft is a check. A draft has three parties to it: one person (known as the **drawer**) orders a second person (the **drawee**) to pay a certain sum of money to a third person (the **payee**), to a person specified by that person, or to bearer.

Drafts other than checks are used in a variety of commercial transactions. If Brown owes Ames money, Ames may draw a draft for the amount of the debt, naming Brown as drawee and herself or her bank as payee, and send the draft to Brown's bank for payment. Alternatively, Ames might send a draft providing for payment on a certain day in the future to Brown for "acceptance." Brown could "accept" the draft by signing his name to it, thereby obligating himself to pay the amount specified in the draft on that day in the future to Ames or to someone specified by Ames.

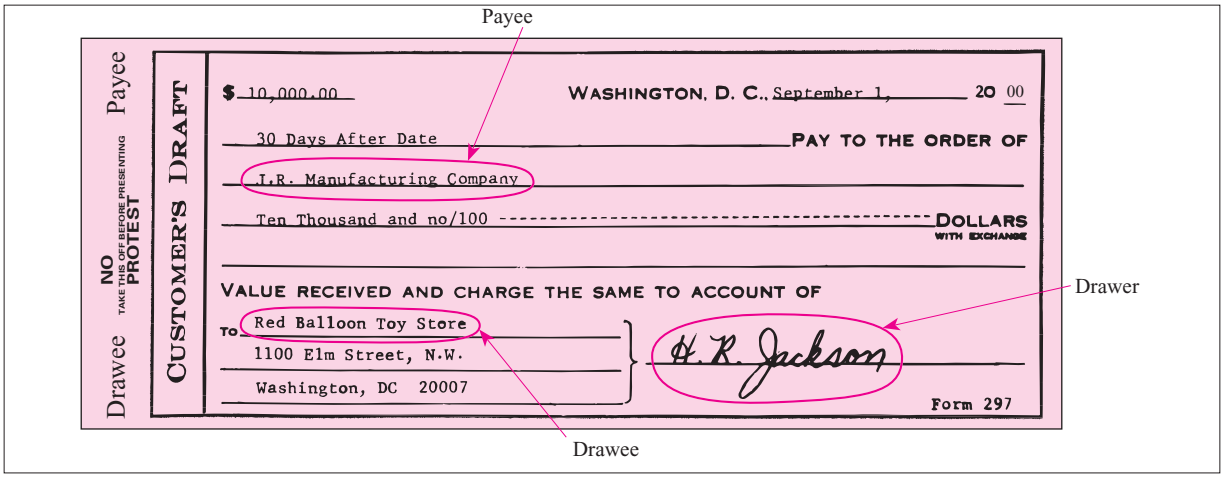
In freight shipments in which the terms are "cash on delivery," the seller commonly ships the goods to the buyer on an "order bill of lading" consigned to himself at the place of delivery. The seller then indorses the bill of lading and attaches a draft naming the buyer as drawee. He then sends the bill of lading and the draft through banking channels to the buyer's bank. A bank in the buyer's locale presents the draft to the buyer's bank for payment, and when the former bank receives payment, delivers the bill of lading to the buyer. Through this commercial transaction, the buyer gets the goods and the seller gets his money.

When credit is extended, the same procedure is followed, but the seller uses a time draft—a draft payable at some future time (see Figure 4). In such a transaction, the buyer "accepts" the draft (instead of paying it) and obligates herself to pay the amount of the draft when due. In these cases, the *drawee* (now called the **acceptor**) should date her signature so that the date at which payment is due is clear to all [3–409(c)].

Checks

A **check** is a *draft payable on demand* and drawn on a bank (i.e., a bank is the drawee or person to whom the order to pay is addressed). Checks are the most widely used form of commercial paper. The issuer of a check orders the bank at which she maintains an account to pay a specified person, or someone designated by that person, a fixed amount of money from the account. For example, Elizabeth Brown has a checking account at the National Bank of Washington. She goes to Sears Roebuck and agrees to buy a washing machine priced at $459.95. If she writes a check to pay for it, she is the drawer of the check, the National Bank of Washington is the drawee, and Sears is the payee. By writing the check, Elizabeth is ordering her bank to pay $459.95 from her account to

Figure 4 *Draft*



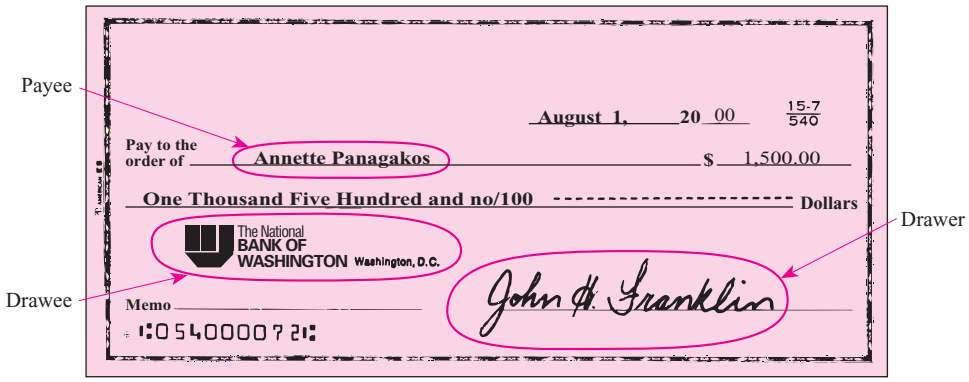


Figure 5 *Check*

Source: The National Bank of Washington.

Sears or to Sears's order—that is, to whomever Sears asks the bank to pay the money (see Figure 5).

An instrument may qualify as a "check" and be governed by Article 3 even though it is described on its face by another term, such as "money order." The Code definition of a "check" includes a "cashier's check" and a "teller's check." A **cashier's check** is a draft on which the drawer and drawee are the same bank (or branches of the same bank); a **teller's check** is a draft drawn by a bank (as drawer) on another bank or payable at or through a bank [3–104(g) and (h)]. For example, a check drawn by a credit union on its account at a federally insured bank would be a teller's check.

Benefits of Negotiable Instruments

Rights of an Assignee of a Contract

As we noted in Chapter 17, Rights of Third Parties, the assignee of a contract can obtain no greater rights than the assignor had at the time of the assignment. For example, Frank Farmer and Neam's Market enter into a contract providing that Farmer will sell Neam's a

dozen crates of fresh eggs a week for a year and that Neam's will pay Farmer $4,000 at the end of the year. If at the end of the year Farmer assigns to Bill Sanders his rights under the contract—including the right to collect the money from Neam's—then Sanders has whatever rights Farmer had at that time. If Farmer has delivered all the eggs to Neam's as he promised, then Farmer would be entitled to $4,000 and Sanders would obtain that right from him. However, if Farmer has not delivered all the eggs that he had promised to deliver, or if the eggs he delivered were not fresh, then Neam's might have a valid defense or reason to refuse to pay the full $4,000. In that case, Sanders would have only what rights Farmer had and also would be subject to the defense Neam's has against full payment.

Taking an assignment of a contract involves assuming certain risks. The assignee (Sanders) may not be aware of the nature and extent of any defenses that the party liable on the contract (Neam's) might have against the assignor (Farmer). An assignee who does not know what rights he is getting, or which risks he is assuming, may be reluctant to take an assignment of the contract.

Rights of a Holder of a Negotiable Instrument

The object of a negotiable instrument is to have it accepted readily as a substitute for money. In order to accept it readily, a person must be able to take it free of many of the risks assumed by the assignee of a regular contract. Under the law of negotiable instruments, this is possible if two conditions are met: (1) the contract for the payment of money must meet the formal requirements to qualify as a negotiable instrument; and (2) the person who acquires the instrument must qualify as a holder in due course. Basically, a *holder in due course* is a person who has good title to the instrument, paid value for it, acquired it in good faith, and had no notice of certain claims or defenses against payment. In addition, the instrument cannot bear facial irregularities (evidence of forgery or alteration or questions concerning its authenticity).

The next section of this chapter discusses the formal requirements for a negotiable instrument. Chapter 31, Negotiation and Holder in Due Course, outlines the requirements that a person must meet to qualify as a holder in due course.

A holder in due course of a negotiable instrument takes the instrument free of all defenses and claims to the instrument except those that concern its validity. For example, a holder in due course of a note given in payment for goods may enforce the obligation in spite of the buyer's claim that the seller breached a warranty. However, if the maker of a note wrote it under duress, such as a threat of force, or was a minor, then even a holder in due course is subject to the defenses of duress or infancy to the extent other law (1) would nullify the obligation for duress or (2) would permit infancy as a defense to a simple contract. The person who holds the note could not obtain the payment from the maker but would have to recover from the person from whom he got the note.

The Federal Trade Commission (FTC) has adopted a regulation that alters the rights of a holder in due course in consumer purchase transactions. This regulation allows a consumer who gives a negotiable instrument to use additional defenses (breach of warranty or fraudulent inducement) against payment of the instrument against even a holder in due course. Similarly, some states have enacted the Uniform Consumer Credit Code (UCCC), which produces a similar result. Chapter 31, Negotiation and Holder in Due Course, discusses the rights of a holder in due course, as well as the FTC rule.

Formal Requirements for Negotiability

Basic Requirements

An instrument such as a check or a note must meet certain formal requirements to be a negotiable instrument. If the instrument does not meet these requirements, it is non-negotiable; that is, it is treated as a simple contract and not as a negotiable instrument. A primary purpose for these formal requirements is to ensure the willingness of prospective purchasers of the instrument, particularly financial institutions such as banks, to accept it as a substitute for money.

For an instrument to be negotiable, it must:

1. Be in writing.
2. Be signed by the issuer (the *maker* in the case of a person undertaking to pay or the *drawer* in the case of a person giving an order or instruction to pay).
3. Contain an unconditional promise or order to pay a fixed amount of money, with or without interest or other charges described in the promise or order.

4. Be payable to order or to bearer at the time it is issued or first comes into possession of a holder.
5. Be payable on demand or at a definite time.
6. Not state any other undertaking or instruction by the person promising or ordering to do any act in addition to the payment of money (but it may contain (*a*) an undertaking or promise relative to collateral to secure payment, (*b*) an authorization for confession of judgment, or (*c*) a waiver of benefit of any law intended for the advantage or protection of an obligor) [3–103; 3–104].

In addition, an instrument that otherwise qualifies as a check can be negotiable even if it is not explicitly payable to order or to bearer [3–104(c)]. As explained later, this means that a check that reads "pay John Doe" could be negotiable even though the normal form for a check is "pay to the order of _____."

A promise or order other than a check is not a negotiable instrument if at the time it is issued or first comes into the possession of a holder it contains a conspicuous statement that the promise or order is not negotiable or is not an instrument governed by Article 3 [3–104(d)]. For example, if a promissory note contained the legend "NON-NEGOTIABLE," it would not qualify as a negotiable instrument even if it otherwise met the formal requirements for one.

Importance of Form

Whether or not an instrument satisfies these formal requirements is important only for the purpose of determining whether an instrument is negotiable or nonnegotiable. Negotiability should not be confused with validity or collectibility. If an instrument is negotiable, the law of negotiable instruments in the Code controls in determining the rights and liabilities of the parties to the instrument. If an instrument is non-negotiable, the general rules of contract law control. The purpose of determining negotiability is to ascertain whether a possessor of the instrument can become a holder in due course.

An instrument that meets all of the formal requirements is a negotiable instrument even though it is void, voidable, unenforceable, or uncollectible for other reasons. Negotiability is a matter of form and nothing else. Suppose a person gives an instrument in payment of a gambling debt in a state that has a statute declaring that any instrument or promise given in payment of a gambling debt is void. The instrument is a negotiable instrument if it is negotiable in form even though it is absolutely void. Also, an instrument that is negotiable in form is a negotiable instrument even though it is issued by a minor. The instrument is voidable at the option of the minor if state law makes infancy a defense to a simple contract, but it is negotiable.

In Writing

To be negotiable, an instrument must be in writing. An instrument that is handwritten, typed, or printed is considered to be in writing [1–201(46)]. The writing does not have to be on any particular material; all that is required is that the instrument be in writing. A person could create a negotiable instrument in pencil on a piece of wrapping paper. It would be poor business practice to do so, but the instrument would meet the statutory requirement that it be in writing.

Signed

To qualify as a negotiable instrument, an instrument in the form of a note must be signed by the person undertaking to pay (the maker) and an instrument in the form of a draft must be signed by the person giving the instruction to pay (the drawer) [3–103]. An instrument has been signed if the maker or drawer has put a name or other symbol on it with the intention of validating it [3–401(b)]. Normally, the maker or drawer signs an instrument by writing his name on it; however, this is not required. A person or company may authorize an agent to sign instruments for it. A typed or rubber-stamped signature is sufficient if it was put on the instrument to validate it. A person who cannot write her name might make an X or some other symbol and have it witnessed by someone else.

Unconditional Promise or Order

Requirement of a Promise or Order

If an instrument is promissory in nature, such as a note or a certificate of deposit, it must contain an unconditional promise to pay or it cannot be negotiable.

Merely acknowledging a debt is not sufficient [3–103(9)]. For example, the statement "I owe you $100" does not constitute a promise to pay. An IOU in this form is not a negotiable instrument.

If an instrument is an order to pay, such as a check or a draft, it must contain an unconditional order. A simple request to pay as a favor is not sufficient; however, a politely phrased demand, such as "please pay," can meet the requirement. Checks commonly use the language "Pay to the order of." This satisfies the requirement that the check contain an order to pay. The order is the word "pay," not the word "order." The word "order" has another function—that of designating the instrument as payable "to order" or "to bearer" for purposes of negotiability.

In the *Ford Motor Credit* case which follows, documents entitled "certified money orders" were held to not be negotiable because they did not contain an unconditional promise or order to pay.

Ford Motor Credit Co. v. All Ways Inc., *546 N.W.2d 807 (Neb. Sup. Ct. 1996)*

All Ways, Inc., and its president, Gary L. Ross, signed two retail installment contracts for the purchase of a Lincoln passenger car and a Ford truck from Seward County Ford Lincoln Mercury, Inc. The two contracts were secured by liens on the vehicles. Seward Country Ford Lincoln Mercury assigned its interests in the contracts to Ford Motor Credit.

On October 27, 1993, All Ways and Ross tendered to Ford two "certified money orders" as payment in full for the two vehicles. The two documents were made out to Ford for $20,500 and $25,200. The documents stated that the sums were to be paid:

> On Demand, Money of account of the United States, as required by law at Section 20 of Coinage Act of 1792 from the time of official determination of said money; OR, in UCC 1–201(24) Credit Money.

The documents stated they were:

> REDEEMABLE AT FULL FACE VALUE WHEN PRESENTED[;] To: O.M.B. [;] W.D. McCALL[;] P.O. BOX 500-284[;] VICTORIA, TEXAS POSTAL ZONE 77901.

Upon receiving the documents, Ford applied the purported payments to the defendants' accounts and deposited the documents in a bank. The documents were returned by the bank as non-negotiable because there were no bank routing numbers on the documents, and no bank was identified through which to charge. Without routing numbers, a bank would have no obligation to take them for collection or make payment on the documents.

Ford informed All Ways and Ross that the documents were not acceptable and that they would need to pay Ford in U.S. legal tender. However, no payments were forthcoming and the account was in default. Ford brought suit to compel All Ways and Ross to either return the vehicles to Ford or to pay $35,810. The trial court held that the documents tendered by All Ways and Ross did not order the payment of money and contained stipulations not contemplated by the Nebraska Uniform Commercial Code and awarded judgment to Ford. All Ways and Ross appealed.

Per Curiam Whether the documents tendered by All Ways and Ross were negotiable instruments is governed by Nebraska's Uniform Commercial Code.

A negotiable instrument is an unconditional promise or order to pay a fixed amount of money. Revised section 3–104(a). The tendered documents are not within the definition of a negotiable instrument. The documents purport to provide the creditor an unspecified "Credit Money" when presented to a post office box. This cannot be construed as an unconditional promise or order to pay a fixed sum of money.

Judgment affirmed for Ford Motor Credit.

Promise or Order Must Be Unconditional

An instrument is not negotiable unless the promise or order is unconditional. For example, a note that provides, "I promise to pay to the order of Karl Adams $100 if he replaces the roof on my garage," is not negotiable because it is payable on a condition.

To be negotiable, an instrument must be written so that a person can tell from reading the instrument alone what the obligations of the parties are. If a note contains the statement, "Payment is subject to the terms of a mortgage dated November 20, 2000," it is not negotiable. To determine the rights of the parties on the note, one would have to examine another document—the mortgage.

However, a reference to another document for a statement of rights with respect to collateral, prepayment, or acceleration does not destroy the negotiability of a note [3–106(b)]. For example, a note could contain this statement: "This note is secured by a mortgage dated August 30, 2001" without affecting its negotiability. In this case, the mortgage does not affect rights and duties of the parties to the note. It would not be necessary to examine the mortgage document to determine the rights of the parties to the note; the parties need only examine the note.

The negotiability of an instrument is not affected by a statement of the consideration for which the instrument was given or by a statement of the transaction that gave rise to the instrument. For example, a negotiable instrument may state that it was given in payment of last month's rent or that it was given in payment of the purchase price of goods. The statement does not affect the negotiability of the instrument.

A check may reference the account to be debited without making the check non-negotiable. For example, a check could contain the notation, "payroll account" or "petty cash." Similarly, the account number that appears on personal checks does not make the instrument payable only out of a specific fund. Under original Article 3, a check (other than a governmental check) that stated that it was payable only out of a specific fund or account was treated as a conditional order and thus was not negotiable. Revised Article 3 changed this rule so that limiting payment to a particular fund or source does not make the promise or order conditional [3–106(b)].

Revised Article 3 also addresses the negotiability of traveler's checks that commonly require, as a condition to payment, a countersignature of a person whose specimen signature appears on the draft. Under the revision, the condition does not prevent the instrument from meeting the "unconditional promise or order" requirement [3–106(c)]. However, if the person whose specimen signature appears on the instrument fails to countersign it, the failure to sign becomes a defense to the obligation of the issuer to pay. This concept will be discussed in the following chapter.

A conditional *indorsement* does not destroy the negotiability of an otherwise negotiable instrument. The Code determines negotiability at *issuance,* so that indorsements do not affect the underlying negotiability of the instrument. We discuss conditional indorsements in Chapter 31, Negotiation and Holder in Due Course.

Fixed Amount of Money

Fixed Amount

The promise or order in an instrument must be to pay a fixed amount of money, with or without interest or other charges described in the promise or order. The requirement of a "fixed amount" applies only to principal; the amount of any interest payable is that described in the instrument. Interest may be stated in an instrument as a fixed or variable amount of money or it may be expressed as a fixed or variable rate or rates. If a variable rate of interest is prescribed, the amount of interest is calculated by reference to the formula or index referenced in the instrument. For example, a note might provide for interest at "three percent (3.00%) over Chase Manhattan Prime Rate to be adjusted monthly." If the description of interest in the instrument does not allow the amount of interest to be ascertained, then interest is payable at the judgment rate in effect at the place of payment at the time interest first accrues [3–112]. The judgment rate is the rate of interest courts impose on losing parties until they pay the winning parties.

Under the original version of Article 3, a promise or order had to be to pay a "sum certain." Generally, to meet this requirement, a person had to be able to compute from the information in the instrument the amount required to discharge—or pay off—the instrument at any given time. Among other things, this

caused problems when applied to variable rate instruments that came into common commercial usage in the United States after the original Article 3 was drafted. Some state courts held that instruments providing for variable interest rates ascertainable through reference to indexes outside the instrument were not negotiable; other courts sought to interpret the Code to accommodate this new commercial practice. As noted above, the negotiability of instruments that provide for variable interest rates has now been resolved in Revised Article 3.

Payable in Money

The amount specified in the instrument must be payable in money, which is a medium of exchange authorized or adopted by a domestic or foreign government and includes a monetary unit of account established by an intergovernmental organization or by agreement between two or more nations [1–201(24)]. Unless the instrument otherwise provides, an instrument that states the amount payable in foreign money may be paid in the foreign money or in an equivalent dollar amount [3–107]. If the person obligated to pay off an instrument can do something other than pay money, the instrument is not negotiable. For example, if a note reads, "I promise to pay to the order of Sarah Smith, at my option, $40 or five bushels of apples, John Jones," the note is not negotiable.

Payable on Demand or at a Definite Time

To be negotiable, the promise or order must be payable either on demand or at a specified time in the future. This is so that the time when the instrument is payable can be determined with some certainty. An instrument that is payable on the happening of some uncertain event is not negotiable. Thus, a note payable "when my son graduates from college" is not negotiable, even though the son does graduate subsequently.

Payable on Demand

A promise or order is "payable on demand" if (1) it states that it is payable on "demand" or "sight" (or otherwise at the will of the holder of the instrument) or (2) does not state any time for payment [3–108(a)]. For example, if the maker forgets to state when a note is payable, it is payable immediately at the request of the holder of the note.

An instrument may be antedated or postdated, and normally an instrument payable on demand is not payable before the date of the instrument [3–113(a)]. Revised Article 3 makes an important exception for checks: a payor bank (a bank that is the drawee of a draft) may pay a postdated check before the stated date *unless* the drawer has notified the bank of postdating pursuant to a procedure set out in the Code [3–113(a); 4–401(c)] that is similar to the process involved in stopping payment on a check.

Payable at a Definite Time

A promise or order is "payable at a definite time" if it is payable at a fixed date or dates or at a time or times readily ascertainable at the time the promise or order is issued [3–108(b)]. Thus, a note dated March 25, 2000, might be made payable at a fixed time after a stated date, such as "30 days after date."

Under the Code, an instrument that names a fixed date or time for payment—without losing its negotiable character—also may contain a clause permitting the time for payment to be accelerated at the option of the maker. Similarly, an instrument may allow an extension of time at the option of the holder or allow a maker or acceptor to extend payment to a further definite time. Or, the due date of a note might be triggered by the happening of an event, such as the filing of a petition in bankruptcy against the maker. The Code permits these clauses so long as one can determine the time for payment with certainty [3–108].

A promise or order also is "payable at a definite time" if it is payable on elapse of a definite period of time after "sight" or "acceptance." A draft payable at a specified time—such as "15 days after sight"—is, in effect, payable at a fixed time after the draft is presented to the drawee for acceptance.

If an instrument is undated, its "date" is the date it is issued by the maker or drawer [3–113(b)].

In the *Schiffer* case, which follows, a promissory note that was not payable either on demand or at a definite time was held to be non-negotiable.

Schiffer v. United Grocers, Inc. *38 989 P.2d 10(Ore. Sup. Ct. 1999)*

In 1989, Dwaine Schiffer and John Gast located property in White City on which to build a grocery store. The property was owned by John and R. J. Batzer. Schiffer, Gast, and the Batzers then formed a partnership, White City Development ("White City"), for the purpose of constructing and operating a grocery store on the property. In order to finance the construction of the store, Schiffer and Gast approached United Grocers, Inc., with the following proposal: United Grocers would lease the property from White City and, in turn, sublease the property to Schiffer and Gast. The financial strength of United Grocers, as prime lessee of the property, would enable Schiffer and Gast to secure financing for the construction of the grocery store.

Under the lease between White City and United Grocers, White City agreed to pay United Grocers $68,802, which represented the cost of "lease guarantee" insurance that United Grocers was to purchase, and by which United Grocers would be indemnified if Schiffer and Gast defaulted on the sublease.

On March 17, 1989, United Grocers and the partners of White City (Schiffer, Gast, and the Batzers) executed the prime lease. On the same day, White City's partners signed and executed a promissory note in favor of United Grocers in the amount of $68,802. The note provided, in part:

> We jointly and severally, promise to pay to the order of [defendant], at Portland, Oregon, the sum of SIXTY-EIGHT THOUSAND EIGHT HUNDRED TWO AND NO/100 DOLLARS due and *payable at such time as United Grocers under a Lease Agreement dated March 17, 1989 is granted possession of the subject property* pursuant to the terms of said Lease Agreement. [emphasis added]

Due to an oversight, United Grocers failed to collect, and White City failed to remit, the $68,802 due under the lease and promissory note; consequently, United Grocers never purchased the lease guarantee insurance.

Schiffer and Gast operated the grocery store until the business failed in July 1993. Following the failure of the store, Schiffer and Gast entered into a "Surrender Agreement" with United Grocers. That agreement addressed Schiffer's and Gast's defaults under the sublease and various equipment and inventory loans on open account with United Grocers. The agreement further provided:

> United agrees to release . . . Gast from all claims, demands, and causes of action arising out of the parties' prior course of dealings and under all open accounts, loans, security agreements, and promissory notes with United.

Subsequently, Schiffer and the Batzers sought a declaratory judgment that their obligations under the promissory note had been extinguished. One of the questions in the litigation was whether the promissory note was a negotiable instrument.

Kulongski, Justice The promissory note that underlies the present action could be deemed to be a negotiable instrument. Before proceeding further, therefore, we must answer the threshold question whether the common law of contract or the applicable version of Article 3 of the Uniform Commercial Code (UCC) controls the outcome of this case. As explained below, we conclude that the common law of contract controls this case because the promissory note in question is not a negotiable instrument under the version of the UCC in effect when the note was made.

To be a negotiable instrument subject to *former* ORS chapter 73, a note calling for the payment of money, such as the one under consideration here, had to be payable either on demand or at a definite time. *Former* ORS 73.1080 provided the applicable definition of "on demand":

> Instruments payable on demand include those payable at sight or on presentation and those in which no time for payment is stated.

We conclude that the promissory note here is not payable on demand. The note, on its face, is not payable at sight or on presentation. The note designates the time for payment as "due and payable at such time as United Grocers under a Lease Agreement dated March 17, 1989, is granted possession of the subject property."

Former ORS 73.1090 defined "payable at a definite time":

(1) An instrument is payable at a definite time if by its terms it is payable:
(a) On or before a stated date or at a fixed period after a stated date; or
(b) At a fixed period after sight; or
(c) At a definite time subject to any acceleration; or
(d) At a definite time subject to extension at the option of the holder, or to extension to a further definite time at the option of the maker or acceptor or automatically upon or after a specified act or event.

(2) An instrument which by its terms is otherwise payable only upon an act or event uncertain as to time of occurrence is not payable at a definite time even though the act or event has occurred.

None of the conditions in *former* ORS 73.1090(1)(a) to (d) applied to the promissory note. Therefore, the note is not "payable at a definite time." Moreover, under *former* ORS 73.1090(2), the note did not become "payable at a definite time" after the grant of possession of the property. Because the promissory note is neither payable on demand nor payable at a definite time, it is not a negotiable instrument under *former* ORS 73.1040(1). Because *former* ORS chapter 73 does not apply, the common law of contract controls the outcome of this case.

Note: Although this case was decided under the original version of Article 3, the same result would be expected under Revised Article 3.

Payable to Order or Bearer

Except for checks, to be negotiable an instrument must be "payable to order or to bearer." A note that provides, "I promise to pay to the order of Sarah Smith" or "I promise to pay to Sarah Smith or bearer" is negotiable. However, one that provides "I promise to pay to Sarah Smith" is not. The words "to the order of" or "to bearer" show that the drawer of a draft, or the maker of a note, intends to issue a negotiable instrument. The drawer or maker is not restricting payment of the instrument to just Sarah Smith but is willing to pay someone else designated by Sarah Smith. This is the essence of negotiability.

In the original version of Article 3, an order in the form of a check also had to be "payable to order or bearer" to qualify as a negotiable instrument. However, the drafters of Revised Article 3 created an exception for instruments that otherwise meet the requirements for a negotiable instrument as well as the definition of a check [3–104(c)]. Under the revised article, a check that reads "Pay John Doe" could qualify as a negotiable instrument. As a result, the Code treats checks, which are payment instruments, as negotiable instruments whether or not they contain the words "to the order of." The drafters explained that most checks are preprinted with these words but that occasionally the drawer may strike out the words before issuing the check and that a few check forms have been in use that do not contain these words. In these instances, the drafters preferred not to limit the rights of holders of such checks who may pay money or give credit for a check without being aware that it is not in the conventional form for a negotiable instrument.

A promise or order is considered to be payable "to order" if it is payable (1) to the order of an identified person or (2) to an identified person or that person's order [3–109(b)]. Examples would include: "Pay to the order of Sandy Smith" and "Pay to Sandy Smith or order." The most common forms of a promise or order being payable to bearer use the words "pay to bearer," "pay to the order of bearer," "pay to cash," or "pay to the order of cash" [3–109(a)]. A check sent with the payee line blank is payable to bearer. However, it is also considered an incomplete instrument, the rules concerning which will be discussed in the following two chapters.

The original payee of a draft or a note can transfer the right to receive payment to someone else. By making the instrument payable "to the order of " or "to bearer," the drawer or maker is giving the payee the chance to negotiate the instrument to another person and to cut off certain defenses that the drawer or maker may have against payment of the instrument.

An instrument that is payable to the order of a specific person is known as "order paper." Order paper can be negotiated or transferred only by indorsement. An instrument payable "to bearer" or "to cash" is known as "bearer paper"; it can be negoti-

ated or transferred by delivery of possession without indorsement [3–201(b)]. The rules governing negotiation of instruments will be detailed in the next chapter.

An instrument can be made payable to two or more payees. For example, a check could be drawn payable "to the order of John Jones and Henry Smith." Then, both Jones and Smith have to be involved in negotiating it or enforcing its payment. An instrument also can be made payable to alternative persons—for example, "to the order of Susan Clark or Betsy Brown." In this case, either Clark or Brown could negotiate it or enforce its payment [3–110(d)].

A number of recent cases have addressed the use of the puncuation mark the virgule (/) to separate the names of the payees. The following *Purina Mills* case illustrates how the courts typically have applied the UCC to such situations.

Purina Mills, Inc. v. Security Bank & Trust *547 N.W.2d 336 (Mich. Ct. App. 1996)*

From February 10, 1992, to June 17, 1992, K-R Summers & Sons Livestock drew 10 checks totaling over $21,000 on its account at Security Bank & Trust. The checks were made payable to "International Livestock/Purina Mills." International Livestock indorsed the checks and presented them to Mid America Bank in Wisconsin. Mid America honored the checks and presented them to Security Bank & Trust as the drawee bank, which also honored the checks without Purina Mills's indorsement. Purina Mills filed a lawsuit to recover the amount of the checks from Security Bank & Trust. Security Bank & Trust filed a motion for summary judgment, which the trial court granted. Purina Mills appealed.

Reilly, Judge Whether the virgule separating the names of two or more payees on an instrument indicates that the instrument is payable to all parties listed, or to the parties in the alternative, is an issue of first impression in Michigan.

Courts in other jurisdictions that have decided this issue have concluded that its use indicates that the instrument is payable in the alternative.

We agree with these authorities that a check drawn to payees whose names are separated by a virgule allows payment to the payees alternatively. A virgule is defined as "an oblique stroke (/) used between two words to show that an appropriate one may be chosen to complete the sense of the text." The Random House Dictionary, Revised Edition (1975). Thus the virgule is used to separate alternatives. According to UCC Section 3–110(d), "[i]f an instrument is payable to two or more persons alternatively, it is payable to any of them and may be negotiated, discharged, or enforced by any of them in possession of the instrument." The banks properly honored the checks that were presented with the indorsement of one of the payees.

Judgment affirmed for Security Bank & Trust.

Special Terms

Additional Terms

Generally, if an instrument is to qualify as a negotiable instrument, the person promising or ordering payment may not state undertakings or instructions in addition to the payment of money [3–104(a)(3). However, the instrument may include clauses concerning (1) giving, maintaining, or protecting collateral to secure payment, (2) an authorization to confess judgment or to realize on or dispose of collateral, and (3) waiving the benefit of any law intended for the protection or benefit of any person obligated on the instrument.

Thus, a term authorizing the confession of judgment on an instrument when it is due does not affect the negotiability of the instrument. A confession of judgment clause authorizes the creditor to go into court if the debtor defaults and, with the debtor's acquiescence, to have a judgment entered against the debtor. However, some states prohibit confessions of judgment.

Banks and other businesses often use forms of commercial paper that meet their particular needs. These forms may include certain other terms that do not affect

the negotiability of an instrument. For example, a note may designate a place of payment without affecting the instrument's negotiability. Where the instrument does not specify a place of payment, the Code sets out rules for ascertaining where payment is to be made [3–111].

Ambiguous Terms

Occasionally, a person may write or receive a check on which the amount written in figures differs from the amount written in words. Or a note may have conflicting terms or an ambiguous term. Where a conflict or an ambiguous term exists, there are general rules of interpretation that are applied to resolve the conflict or ambiguity: Typewritten terms prevail over printed terms, handwritten terms prevail over printed and typewritten terms, and where words and numbers conflict, the words control the numbers [3–114].

The following *Galatia Community State Bank v. Kindy* case involves a check on which there was a difference between the numbers on the check placed there by a check-writing machine and those written by hand.

Galatia Community State Bank v. Kindy *307 Ark. 467 (Ark. Sup. Ct. 1991)*

Galatia Community State Bank honored a check it took for collection for $5,550, which was the amount imprinted by a check-writing machine in the center underlined section of the check commonly used for stating the amount in words. The imprint looked like this:

Registered

No. 497345 **5550 DOL'S 00 CTS

*The impression made by the check-writing machine could be felt on the front and back of the check, and "**5550 DOL'S 00 CTS" was imprinted in red ink. In the box on the right-hand side of the check commonly used for numbers, "6,550.00" appeared in handwriting. The check was in partial payment of the purchase price of two engines that Eugene Kindy was buying from the payee on the check, Tony Hicks. Kindy postdated the check by a month and deliberately placed two different amounts on the check because he thought the bank would check with him before paying it. Kindy wanted to be sure that the engines had been delivered to Canada before he paid the $6,550 balance of the purchase price.*

After the check was deposited in the Galatia Bank and Hicks was given $5,550, an employee of the bank altered the "6" by hand to read "5." Because Kindy had stopped payment on the check, the drawee bank refused to pay it to Galatia Bank. Galatia Bank then brought suit against Kindy as the drawer of the check. One of the issues in the lawsuit was how the check should be constructed. The trial court found that the rules on construction provided in the Code were not helpful because they were contradictory. The trial court held in favor of Kindy, and Galatia Bank appealed.

Newbern, Justice The trial court reviewed Code section 3–118(b) and (c) (1987) which has since been superseded by section 3–114 (1991) but which was in effect at the time in question in this case. The statute provided in relevant part:

> 3–118. Ambiguous terms and rules of construction. The following rules apply to every instrument:
>
> * * * * *
>
> (b) Handwritten terms control typewritten and printed terms, and typewritten control printed.
>
> (c) Words control figures except that if the words are ambiguous figures control.

The frustration expressed by the trial court with respect to section 3–118 which stated the applicable rules of construction for negotiable instruments is understandable.

The $5550.00 amount imprinted by the check writing machine upon the line customarily used for words is expressed in figures and not in words. One question is whether imprinted numbers located where words are customarily placed on a check control figures placed where figures are customarily placed. Another question is whether handwritten figures control printing.

We find both questions satisfactorily answered in *St. Paul Fire & Marine Ins. Co. v. Bank of Salem.* In that case, there was a conflict between an amount imprinted by a check imprinting machine and numbers expressed in typewritten figures. The court recognized the imprinted amount was not expressed in words but held "the purposes of the UCC are best served by considering an amount imprinted by a check writing machine as 'words' for the purpose of resolving an ambiguity between an amount and an amount entered upon the line usually used to express the amount in figures." The court quoted from a pre-UCC case, *United States Fidelity and Guaranty Co. v. First National Bank of South Carolina* (1964), as follows:

> A prime purpose, as we see it, of making a sum payable when expressed in words controlling over the sum payable expressed in figures is the very fact that words are much more difficult to alter. The perforated imprinting by a check-writing machine, while fully expressing the sum payable in figures, is even more difficult to successfully alter than a sum payable in written words.

Because a check imprinting machine's purpose is to protect against alterations, the amount shown on the imprint should control whether the number is in words or figures.

Turning to the question of whether typewriting controls printing, the court in *United States Fidelity and Guaranty Co.* stated:

> As the section makes clear, in the event of an ambiguity between printed terms and typewritten terms, the latter would control. We do not consider the impression made by the check imprinter to be "printed terms" under this section.
>
> A conflict between the two amounts on a check would be resolved by section 3–118 which states that words control figures. Arguably, the amount imprinted by the check writing machine upon the line customarily expressing the amount in words, is expressed in figures . . . We think, however, that the purposes of the UCC are best served by considering an amount imprinted by a check writing machine as "words" for the purpose of resolving an ambiguity between that amount and an amount entered upon the line usually used to express the amount in figures.

Although the court did not say specifically that it regarded the portion written by the check writing machine as the equivalent of handwriting, that is the clear effect of the decision.

In *United States v. Hibernia National Bank,* a typed numerical amount was located in the place customarily used for words. The amount conflicted with the amount located in the place customarily used for figures. The court found the typed amount controlling despite the fact it was not expressed in words.

Judgment for Kindy reversed on other grounds.

Note: Although, as the court notes, this case was decided under the original version of Article 3, the dilemma posed, and the conclusion reached by the court on the construction of the check, would likely be the same under Revised Article 3.

Ethical and Public Policy Concerns

1. The Uniform Commercial Code currently provides that in the case of ambiguity or conflict between the words and numbers on a negotiable instrument, the words control the numbers. A group of banks argue that in an era of computers, they encode checks based on the amount stated in figures and that the Code should be changed to provide for the dominance of figures over words. What policy considerations are involved in deciding whether or not the bank's position should be adopted in the Code?

Problems and Problem Cases

1. Is the following instrument a note, a check, or a draft? Why? If it is not a check, how would you have to change it to make it a check?

> To: Arthur Adams January 1, 2001
> TEN DAYS AFTER DATE PAY TO THE ORDER OF:
> Bernie Brown
> THE SUM OF: Ten thousand and no/100 DOLLARS
> SIGNED: Carl Clark

Concept Review

Requirements for Negotiability

Requirement	Basic Rules
Must Be in Writing	1. The instrument may be handwritten, typed, or printed.
Must Be Signed by the Maker or Drawer	1. Person issuing the instrument must sign with intent of validating his or her obligation. 2. Person issuing may affix the signature in a variety of ways—for example, by word, mark, or rubber stamp. 3. Agent or authorized representative may supply the "signature."
Must Contain a Promise or Order to Pay	1. Promise must be more than acknowledgment of a debt. 2. Order requirement is met if the drawer issues an instruction to "pay."
Promise or Order Must Be Unconditional	1. Entire obligation must be found in the instrument itself and not in another document or documents. 2. Payment cannot be conditioned on the occurrence of an event.
Must Call for Payment of a Fixed Amount of Money	1. Must be able to ascertain the principal from the face of the instrument. 2. May contain a clause providing for payment of interest or other charges such as collection or attorney's fees.
Must Be Payable in Money	1. Obligation must be payable in a medium of exchange authorized or adopted by a government or by an international organization or agreement between two or more nations. 2. Maker or drawer cannot have the option to pay in something other than money.
Must Be Payable on Demand or at a Definite Time	1. Requirement is met if instrument says it is payable on demand or, if no time for payment is stated, it is payable on demand. 2. Requirement is met if it is payable on a stated date, at a fixed time after a stated date, or a fixed time "after sight." 3. Instrument may contain an acceleration clause or a clause allowing maker or holder to extend the payment date.
Generally Must Be Payable to Bearer or to Order	1. Bearer requirement is met if instrument is payable "to bearer" or "to cash." 2. Order requirement is met if instrument is payable "to the order of" a specified person or persons. 3. Exception from requirement is made for instruments meeting both the definition of a check and all the other requirements for a negotiable instrument.
May Not State Any Other Undertaking or Instruction by the Person Promising or Ordering Payment to Do Any Act in Addition to the Payment of Money	1. However, it may contain (*a*) an undertaking or power to give, maintain, or protect collateral to secure payment, (*b*) an authorization or power to the holder to confess judgment or realize on or dispose of collateral, or (*c*) a waiver of the benefit of any law intended for the advantage or protection of an obligor on the instrument.

2. Frank agrees to build a garage for Sarah for $15,000. Sarah offers either to sign a contract showing her obligation to pay Frank $15,000 or to sign a negotiable promissory note for $15,000 payable to the order of Frank. Would you advise Frank to ask for the contract or the promissory note? Explain.

3. Wiley, Tate & Irby, buyers and sellers of used cars, sold several autos to Houston Auto Sales. Houston wrote out the order for payment on the outside of several envelopes. He signed them and they were drawn on his bank, Peoples Bank & Trust Co., to be paid on the demand of Wiley, Tate & Irby. Can the envelopes qualify as negotiable instruments?

4. Is the following a negotiable instrument?

> IOU, A. Gay, the sum of seventeen and 5/100 dollars for value received.
> John R. Rooke

5. Is the following a negotiable instrument?

> Subject to Approval of Title
> Pay to the Order of Vernon Butterfield
> $1,997.90.
> The Culver Company
> By A. M. Culver

6. A promissory note provides as follows:

> FOR VALUE RECEIVED, the undersigned promises to pay to the order of J. MONTE WILLIAMSON. . . the principal sum of Four Thousand Dollars ($4,000) payable as set forth in that certain agreement dated March 15, 2000, an executed copy of which is attached hereto and made a part thereof by this reference.

Is the note negotiable?

7. Olde Town Investment Corporation borrowed $18,000 from VMC Mortgage Company and signed a promissory note secured by a deed of trust on land it owned. The note provided for interest at "three percent (3.00%) over Chase Manhattan Prime to be adjusted monthly." Is a note providing for a variable amount of interest, not ascertainable from the face of the note, a negotiable instrument?

8. Nation-Wide Check Corporation sold money orders to drugstores. The money orders contained the words, "Payable to," followed by a blank. Can the money order qualify as a negotiable instrument?

9. In November 1986 Anthony P. Rivizzigno, Judith P. Rivizzigno and Frank D'Agostino, executed a note payable to Jefferson National Bank in the amount of $75,000 (Note). As security for repayment of the Note, Judith Rivizzigno gave Jefferson National Bank a mortgage on real property she owned. The Note provided for monthly payments to be made on the first of each month, beginning on January 1, 1987, and continuing through December 1, 2001. The Note was on a standard printed form that provided for monthly payments to be made at a variable interest rate. An "X" was checked in a box in front of printed language in the Note stating: "PAYABLE IN FULL ON DEMAND, IF THE LENDER DEMANDS PAYMENT." Added to the text of the Note there was typewritten: "Notwithstanding the maturity date [of December 1, 2001], the bank may demand the entire amount of unpaid principal and accumulated interest be paid at any time after December 1, 1991." The makers failed to make the monthly payment due October 1, 1993, or any payments thereafter. The holder of the note brought suit to enforce it. One of the questions in the lawsuit was whether the note was a note for a specific time or a demand note; in New York, demand notes are subject to a six-year statute of limitations. How should the court interpret the note?

10. Emmett McDonald, acting as the personal representative of the estate of Marion Cahill, wrote a check payable to himself, individually, on the estate checking account in the Commercial Bank & Trust Company. The instrument contained an obvious variance between the numbers and the written words that indicated the amount of the check. It said: "Pay to the order of Emmett E. McDonald $10075.00 Ten hundred seventy five . . . Dollars." The bank paid the $10,075 sum stated by the numerals to McDonald, who absconded with the funds. Yates, the successor representative, sued the bank on behalf of the estate to recover the $9,000 difference between that amount and the $1,075 that was written out. Did the bank pay the correct amount on the check?

"Negotiable instruments" discusses the nature and benefits of negotiable instruments. It also outlines the requirements an instrument must meet to qualify as a negotiable instrument and thus possess the qualities that allow it to be accepted as a substitute for money.

This chapter focuses on negotiation—the process by which rights to a negotiable instrument pass from one person to another. Commonly, this involves an indorsement and transfer of the instrument. This chapter also develops the requirements that a transferee of a negotiable instrument must meet to qualify as a holder in due course and thus attain special rights under negotiable instruments law. These rights, which put a holder in due course in an enhanced position compared to an assignee of a contract, are discussed in some detail.

Negotiation

Nature of Negotiation

Under Revised Article 3, **negotiation** is the transfer of possession (whether voluntary or involuntary) of a negotiable instrument by a person (other than the issuer) to another person who becomes its *holder* [3–201]. A person is a **holder** if she is in possession of an instrument (1) that is payable to bearer or (2) made payable to an identified person and she is that identified person [1–201(20)].[1]

For example, when an employer gives an employee, Susan Adams, a paycheck payable "to the order of Susan Adams," she is the holder of the check because she is in possession of an instrument payable to an identified person (Susan Adams) and she is that person. When she indorses (writes her name) on the back of the check and exchanges it for cash and merchandise at Ace Grocery, she has negotiated the check to the grocery store and the store is now the holder because it is in possession by transfer of a check and unless she specifies the grocery store by name, the check now is payable to bearer. Similarly, if Susan Adams indorsed the check "Pay to the Order of Ace Grocery, Susan Adams" and transferred it to the grocery store, it would be a holder through the negotiation of the order check to it. The grocery store would be in possession of an instrument payable to an identified person (Ace Grocery) and is the person identified in the check.

In certain circumstances, Revised Article 3 allows a person to become a holder by negotiation even though the transfer of possession is involuntary. For example, if a negotiable instrument is payable to bearer and is stolen by Tom Thief or found by Fred Finder, Thief or Finder becomes the holder when he obtains possession. The involuntary transfer of possession of a bearer instrument results in a negotiation to Thief or Finder.

Formal Requirements for Negotiation

The formal requirements for negotiation are very simple. If an instrument is payable to the order of a specific payee, it is called **order paper** and it can be negotiated by transfer of possession of the instrument after indorsement by the person specified [3–201(b)].

For example, if Rachel's father gives her a check payable "to the order of Rachel Stern," then Rachel can negotiate the check by indorsing her name on the back of the check and giving it to the person to whom she wants to transfer it. Note that the check is order paper, not because the word *order* appears on the check but rather because it named a specific payee, Rachel Stern.

If an instrument is payable "to bearer" or "to cash," it is called **bearer paper** and negotiating it is even simpler. An instrument payable to bearer may be negotiated by transfer of possession alone [3–201(b)]. Thus, if someone gives you a check that is made payable "to the order of cash," you can negotiate it simply by giving it to the person to whom you wish to transfer it. No indorsement is necessary to negotiate an instrument payable to bearer. However, the person who takes the instrument may ask for an indorsement for her protection. By indorsing the check, you agree to be liable for its payment to that person if it is not paid by the drawee bank when it is presented for payment. This liability will be discussed in Chapter 32, Liability of Parties.

Nature of Indorsement

An indorsement is made by adding the signature of the holder of the instrument to the instrument, usually on the back of it, either alone or with other words. **Indorsement** is defined to mean "a signature (other than that of a maker, drawer or acceptor) that alone or accompanied by other words, is made on an instrument for purpose of (i) negotiating the instrument, (ii) restricting payment of the instrument, or (iii) incurring indorser's liability on the instrument" [3–204(a)]. The negotiation and restriction of payment aspects of indorsements will be discussed below; indorser's liability will be covered in the next chapter.

The signature constituting an indorsement can be supplied or written either by the holder or by someone who is authorized to sign on behalf of the holder. For example, a check payable to "H&H Meat Market" might be indorsed "H&H Meat Market by Jane Frank, President," if Jane is authorized to do this on behalf of the market.

Wrong or Misspelled Name

When indorsing an instrument, the holder should spell his name in the same way as it appears on the

[1]The numbers in parentheses refer to sections of the Uniform Commercial Code (UCC), which is reproduced in the appendix.

instrument. If the holder's name is misspelled or wrong, then legally the indorsement can be made either in his name or in the name that is on the instrument. However, any person who pays the instrument or otherwise gives value for it may require the indorser to sign both names [3–204(d)].

Suppose Joan Ash is issued a check payable to the order of "Joanne Ashe." She may indorse the check as either "Joan Ash" or "Joanne Ashe." However, if she takes the check to a bank to cash, the bank may require her to sign both "Joanne Ashe" and "Joan Ash."

Checks Deposited without Indorsement

Occasionally, when a customer deposits a check to her account with a bank, she may forget to indorse the check. It is common practice for depositary banks to receive unindorsed checks under what are known as "lock-box" arrangements with customers who receive a high volume of checks. Normally, a check payable to the order of an identified person would require the indorsement of that person in order for a negotiation to the depositary bank to take place and for it to become a holder. Under the original Article 3, the depositary bank, in most cases, had the right to supply the customer's indorsement. Instead of actually signing the customer's name to the check as the indorsement, the bank might just stamp on it that it was deposited by the customer or credited to her account. Banks did not have the right to put the customer's indorsement on a check that the customer has deposited if the check specifically required the payee's signature. Insurance and government checks commonly require the payee's signature.

The revision to Article 3 and the conforming amendments to Articles 1 and 4 address the situation where a check is deposited in a depositary bank without indorsement differently. The depositary bank becomes a holder of an item delivered to it for collection, whether or not it is indorsed by the customer, if the customer at the time of delivery qualified as a holder [4–205]. Concomitantly, the depositary bank warrants to other collecting banks, the payor bank (drawee), and the drawer that it paid the amount of the item to the customer or deposited the amount to the customer's account.

Transfer of Order Instrument

Except for the special provisions concerning depositary banks, if an order instrument is transferred without indorsement, the instrument has not been negotiated and the transferee cannot qualify as a holder. For example, Sue Brown gives a check payable "to the order of Susan Brown" to a drugstore in payment for some cosmetics. Until Sue indorses the check, she has not "negotiated" it and the druggist could not qualify as a "holder" of the check.

Transfer of an instrument, whether or not the transfer is a negotiation, vests in the transferee, such as the drugstore, any right of Sue, the transferor, to enforce the instrument. However, the transferee cannot obtain the rights of a holder in due course (discussed later in this chapter) if he is engaged in any fraud or illegality affecting the instrument. Unless otherwise agreed, if an instrument is transferred for value but without a required indorsement, the transferee has the right to obtain the unqualified indorsement of the transferor; however, the "negotiation" takes place only when the transferor applies her indorsement [3–203(c)].

The *Town of Freeport* case, which follows, illustrates these principles.

Town of Freeport v. Ring *727 A.2d 901 (Maine Sup. Jud. Ct. 1999)*

Thorton Ring was the owner of real property located on Main Street in Freeport, Maine. In August 1994, the Town sent Ring a letter noting that his 1993–1994 real estate taxes were unpaid and notified him of the Town's intent to file a lien on the property if payment was not received within 30 days. The taxes remained unpaid and a tax lien was filed on the property. On January 26, 1996, because a portion of the taxes still remained unpaid, the Town sent a Notice of Impending Foreclosure of the Tax Lien Certificate to Ring by certified mail, advising him that the tax lien would be deemed to be foreclosed on February 27, 1996. Ring subsequently was in default for his 1994–1995 taxes and similar notices were sent.

In January of 1997, Ring delivered to the Town a check in the amount of $11,347.09. The check was issued by Advest, Inc., and made payable to the order of Thornton D. Ring. The back of the check was inscribed as follows:

Payable to Town of Freeport
Property Taxes
2 Main St[.]

The check was accompanied by a letter, signed by Ring and dated January 20, 1997, which reads, "I have paid $11,347.09 of real estate taxes and request the appropriate action to redeem the corresponding property." On February 3, 1997, Ring received a letter from the Town which explained that the Town was returning the check because the 1994 tax lien on the property had matured in 1996.

The Town filed suit seeking a declaratory judgment that it had good title to the Main Street property. One of the issues was whether the delivery of the check by Ring constituted payment of his outstanding taxes.

Clifford, Justice With respect to a check that is made payable to the order of a specific person, negotiation occurs, and the person receiving the check becomes a holder of a negotiable instrument, if possession of the check is transferred and the check is indorsed by the transferor. An indorsement is a signature of someone other than the maker, or some other designation identifying the indorser, that is made on an instrument for the purpose of negotiating the instrument. *Kelly v. Central Bank & Trust Co.* (writing on back of check which reads "For deposit only" to an account other than the payee's and without payee's signature is not an effective indorsement). If negotiation occurs and the holder qualifies as a holder in due course, the holder can demand payment of the instrument subject only to real defenses.

The check Ring sent to the Town was issued by Advest, Inc., payable to the order of Thornton D. Ring. Because it was payable to Ring's order, the check could only be negotiated by Ring through indorsement and transfer of possession. Ring's signature, however, does not appear on the back of the check. The words that do appear on the back of the check—"Payable to Town of Freeport[/]Property Taxes[/]2 Main St[.]"—do not identify Ring. The words only indicate to whom the instrument should have been payable had the check been properly indorsed. Thus, the writing is an incomplete attempt to create a special indorsement. A special indorsement is an indorsement that identifies a person to whom the indorser is making the check payable.

The statement included within the letter accompanying the check does not serve as a valid indorsement either. In determining whether an instrument is properly indorsed, any papers affixed to the instrument are considered part of the instrument. See section 3–204(1). This language specifically references only "affixed" documents. Courts interpreting this language have concluded that a signature on a separate, unattached piece of paper is not an indorsement of the instrument. Ring does not dispute that there is no evidence on record to suggest that the letter was physically attached to the check.

Relying on sections 3–203(3) and 3–203(2), Ring also contends that even in the absence of an indorsement, the check should have been accepted as payment of his outstanding taxes because the Town (1) had a statutory right to demand an indorsement of the check, or (2) was entitled to enforce the instrument without the indorsement. Section 3–203(3) provides that

> if an instrument is transferred for value and the transferee does not become a holder because of lack of indorsement by the transferor, the transferee has a specifically enforceable right to the unqualified indorsement of the transferor. . . . " Section 3–203(2) provides "Transfer of an instrument, whether or not the transfer is a negotiation, vests in the transferee any right of the transferor to enforce the instrument.

Even if the Town could demand an indorsement pursuant to section 3–203(3), negotiation does not occur until the indorsement is made. See section 3–203(3). Thus, at the time the check was received, the Town had a right to demand an indorsement, but could not go to the bank to demand payment of the check. Pursuant to section 3–203(2), the bank also had the right to enforce the

instrument as the transferee of an instrument from a holder. That right, however, could be enforced only through a judicial proceeding. Such contingent rights to receive payment are not sufficient to redeem property subject to a municipal tax lien. Checks are meant to be the functional equivalent of cash when they are properly issued and negotiated. If the Town has to institute a judicial proceeding to receive the cash equivalent of the check, the check has not served its purpose. The unindorsed check presented to the Town is not the type of payment the redemption option of the tax lien statute contemplates.

Judgment for Town affirmed.

Indorsements

Effects of an Indorsement

There are three functions to an indorsement. First, an indorsement is necessary in order for the negotiation of an instrument that is payable to the order of a specified person. Thus, if a check is payable "to the order of James Lee, " James must indorse the check before it can be negotiated. Second, the form of the indorsement that the indorser uses also affects future attempts to negotiate the instrument. For example, if James indorses it "Pay to the order of Sarah Hill," Sarah must indorse it before it can be negotiated further.

Third, an indorsement generally makes a person liable on the instrument. By indorsing an instrument, a person incurs an obligation to pay the instrument if the person primarily liable on it (for example, the maker of a note) does not pay it. We discuss the contractual liability of indorsers in Chapter 32. In this chapter, we discuss the effect of an indorsement on further negotiation of an instrument.

Kinds of Indorsements

There are three basic kinds of indorsements: (1) special, (2) blank, and (3) restrictive. In addition, an indorsement may be "qualified."

Special Indorsement A **special indorsement** contains the signature of the indorser along with words indicating to whom, or to whose order, the instrument is payable. For example, if a check is drawn "Pay to the Order of Marcia Morse" and Marcia indorses it "Pay to the Order of Sam Smith, Marcia Morse," or "Pay to Sam Smith, Marcia Morse," it has been indorsed with a special indorsement. An instrument that is indorsed with a special indorsement remains "order paper." It can be negotiated only with the indorsement of the person specified [3–205(a)]. In this example, Sam Smith must indorse the check before he can negotiate it to someone else.

Blank Indorsement If an indorser merely signs his name and does not specify to whom the instrument is payable, he has indorsed the instrument **in blank.** For example, if a check drawn "Pay to the Order of Natalie Owens" is indorsed "Natalie Owens" by Natalie, Natalie has indorsed it in blank. An instrument indorsed in blank is payable to the bearer (person in possession of it) and from that act is "bearer paper." As such, the bearer negotiates it by transfer alone and no further indorsement is necessary for negotiation [3–205(b)].

If Natalie indorsed the check in blank and gave it to Kevin Foley, Kevin would have the right to convert the blank indorsement into a special indorsement [3–205(c)]. He could do this by writing the words "Pay to the Order of Kevin Foley" above Natalie's indorsement. Then Kevin would have to indorse the check before it could be further negotiated.

If Kevin took the check indorsed in blank to a bank and presented it for payment or for collection, the bank normally would ask him to indorse the check. It asks not because it needs his indorsement for the check to be negotiated to it; the check indorsed in blank can be negotiated merely by delivering it to the bank cashier. Rather, the bank asks for his indorsement because it wants to make him liable on the check if it is not paid when the bank sends it to the drawee bank for payment. Chapter 32, Liability of Parties, discusses the liability of indorsers.

Restrictive Indorsement A **restrictive indorsement** is one that specifies the purpose of the indorsement or specifies the use to be made of the instrument. Among the more common restrictive indorsements are:

1. Indorsements for deposit. For example, "For Deposit Only" or "For Deposit to My Account at First National Bank."

2. Indorsements for collection, which are commonly put on by banks involved in the collection process. For example, "Pay any bank, banker, or trust company" or "For collection only."
3. Indorsements indicating that the indorsement is for the benefit of someone other than the person to whom it is payable. For example, "Pay to Arthur Attorney in Trust for Mark Minor."

Generally, the person who takes an instrument with a restrictive indorsement must pay or apply any money or other value he gives for the instrument consistently with the indorsement. In the case of a check indorsed "for deposit" or "for collection," any person other than a bank who purchases the check is considered to have **converted** the check unless (1) the indorser received the amount paid for it or (2) the bank applied the amount of the check consistently with the indorsement (e.g., deposited it to the indorser's account). Similarly, a depositary bank (a bank that takes an item for collection) or payor bank (the drawee bank) that takes an instrument for deposit or for immediate payment over the counter that has been indorsed "for deposit" or "for collection" will be liable for conversion unless the indorser received the amount paid for the instrument or the proceeds or the bank applied the amount consistently with the indorsement [3–206(c)].[2]

By way of illustration, assume that Robert Franks has indorsed his paycheck "For Deposit to My Account No. 4068933 at Bank One." While on his way to the bank he loses the check, and Fred Finder finds it. If Finder tries to cash the check at a check-cashing service, the service must ensure that any value it gives for the check either is deposited to Franks' account at Bank One or is received by Franks. If it gives the money to Finder, it will be liable to Franks for converting his check. This principle is illustrated in *Lehigh Presbytery,* which involves a bank that failed to apply value given for checks consistently with restrictive indorsements on the checks.

[2]Otherwise, a payor bank as well as an intermediary bank may disregard the indorsement and is not liable if the proceeds of the instrument are not received by the indorser or applied consistently with the indorsement [3–206(c)(4)].

Lehigh Presbytery v. Merchants Bancorp. Inc.

17 UCC Rep. 2d 163 (Penn. Super. Ct. 1991)

Mary Ann Hunsberger was hired by the Lehigh Presbytery as a secretary/bookkeeper. In this capacity, she was responsible for opening the Presbytery's mail, affixing a rubber-stamp indorsement to checks received by the Presbytery, and depositing the checks into the Presbytery's account at Merchants Bancorp, Inc. Over a period of more than five years, Hunsberger deposited into her own account 153 of these checks. Each check was indorsed: "For Deposit Only To The Credit of Presbytery of Lehigh, Ernest Hutcheson, Treas." The bank credited the checks to Hunsberger's account, despite the rubber stamp restrictive indorsement, because it relied solely on the account number handwritten on the deposit slips submitted by Hunsberger with the checks at the time of deposit. Hunsberger obtained the deposit slips in the lobby of the bank, wrote the proper account title, "Lehigh Presbytery," but inserted her own account number rather than the account number of her employer.

When Lehigh Presbytery discovered the diversionary scheme, it sued the bank to recover the funds credited to Hunsberger's account. The primary issue in the case was whether the bank was bound to follow the restrictive indorsements on the 153 checks that it instead had deposited to the personal account of Hunsberger. The trial court ruled in favor of the bank and Lehigh Presbytery appealed.

McEwen, Judge UCC Section 3–205 provides:

> An indorsement is restrictive which either:
>
> * * * * *
>
> (3) includes the words "for collection," "for deposit," "pay any bank," or like terms signifying a purpose of deposit or collection; or
>
> * * * * *

It is undisputed that the indorsement stamped on each check by Ms. Hunsberger is a restrictive indorsement within the meaning of section 3–205.

Section 3–206 of the UCC addresses the effect of such an indorsement and provides, in pertinent part:

> (c) Conditional or specified purpose indorsement.—Except for an intermediary bank, any transferee under

> an indorsement which is conditional or includes the words "for collection," "for deposit," "Pay any bank," or like terms (section 3–205(1) and (3) (relating to restrictive indorsements) must pay or apply any value given by him for or on the security of the instrument consistently with the indorsement and to the extent he does he becomes a holder for value.

Thus, the UCC mandates application of the value of the checks consistently with the indorsement, i.e., for deposit to Lehigh Presbytery's account.

Courts considering the significance of a restrictive indorsement have consistently concluded that the UCC imposes an unwaivable obligation upon the bank to follow the indorsement. New York State's highest court has held that "[t]he presence of a restriction imposes upon the depositary bank an obligation not to accept that item other than in accord with the restriction. By disregarding the restriction, it not only subjects itself to liability for any losses resulting from its actions, but it also passes up what may be the best opportunity to prevent the fraud."

Judgment reversed in favor of Lehigh Presbytery.

Note: Although this case was decided under the original version of Article 3, the same result would be expected under Revised Article 3.

Some indorsements indicate payment to the indorsee as an agent, trustee, or fiduciary. A person who takes an instrument containing such an indorsement from the indorsee may pay the proceeds to the indorsee without regard to whether the indorsee violates a fiduciary duty to the indorser *unless* he is on *notice* of any breach of fiduciary duty that the indorser may be committing [3–206(d)]. A person would have such notice if he took the instrument in any transaction that benefited the indorsee personally [3–307]. Suppose a person takes a check indorsed to "Arthur Attorney in Trust for Mark Minor." The money given for the check should be put in Mark Minor's trust account. A person would not be justified in taking the check in exchange for a television set that he knew Attorney was acquiring for his own—rather than Minor's—use.

There are two other kinds of indorsements that the original Article 3 treated as restrictive indorsements but that the revised Article 3 no longer considers as restrictive indorsements. They are:

1. Indorsements purporting to prohibit further negotiation. For example, "Pay to Carl Clark Only."
2. Conditional indorsements, which indicate that they are effective only if the payee satisfies a certain condition. For example, "Pay to Bernard Builder Only if He Completes Construction on My House by November 1, 2000."

Under Revised Article 3, any indorsement that purports to limit payment to a particular person, or to prohibit further transfer or negotiation of the instrument, is not effective to prevent further transfer or negotiation [3–206(a)]. Thus, if a note is indorsed "Pay to Carl Clark Only" and given to Clark, he may negotiate the note to subsequent holders who may ignore the restriction on the indorsement.

Indorsements that state a condition to the right of the indorsee to receive payment do not affect the right of the indorsee to enforce the instrument. Any person who pays the instrument or takes it for value or for collection may disregard the condition. Moreover, the rights and liabilities of the person are not affected by whether the condition has been fulfilled [3–206(b)].

Qualified Indorsement A **qualified indorsement** is one where the indorser disclaims her liability to make the instrument good if the maker or drawer defaults on it. Words such as "Without Recourse" are used to qualify an indorsement. They can be used with either a blank indorsement or a special indorsement and thus make it a qualified blank indorsement or a qualified special indorsement. The use of a qualified indorsement does not change the negotiable nature of the instrument. Its effect is to eliminate the contractual liability of the particular indorser. Chapter 32, Liability of Parties, will discuss this liability in detail.

Rescission of Indorsement

Negotiation is effective to transfer an instrument even if the negotiation is (1) made by a minor, a corporation exceeding its powers, or any other person without contractual capacity; (2) obtained by fraud, duress, or mistake of any kind; (3) made in breach of duty; or (4) part

Concept Review

Indorsements
(Assume a check is payable "To The Order of Mark Smith.")

Type	Example	Consequences
Blank	Mark Smith	1. Satisfies the indorsement requirement for the negotiation of order paper. 2. The instrument becomes bearer paper and can be negotiated by delivery alone. 3. The indorser becomes obligated on the instrument. (See Chapter 32, Liability of Parties.)
Special	Pay to the Order of Joan Brown, Mark Smith	1. Satisfies the indorsement requirement for the negotiation of order paper. 2. The instrument remains order paper and Joan Brown's indorsement is required for further negotiation. 3. The indorser becomes obligated on the instrument. (See Chapter 32.)
Restrictive	For deposit only to my account in First American Bank, Mark Smith	1. Satisfies the indorsement requirement for the negotiation of order paper. 2. The person who pays value for the instrument is obligated to pay it consistent with the indorsement (i.e., to pay it into Mark Smith's account at First American Bank). 3. The indorser becomes obligated on the instrument. (See Chapter 32.)
Qualified	Mark Smith (without recourse)	1. Satisfies the indorsement requirement for negotiation of order paper. 2. Eliminates the indorser's obligation. (See Chapter 32.)

of an illegal transaction. A negotiation made under the preceding circumstances is subject to **rescission** before the instrument has been negotiated to a transferee who can qualify as a holder in due course or a person paying the instrument in good faith and without knowledge of the factual basis for rescission or other remedy [3–202]. The situation in such instances is analogous to a sale of goods where the sale has been induced by fraud or misrepresentation. In such a case, the seller may rescind the sale and recover the goods, provided that the seller acts before the goods are resold to a bona fide purchaser for value.

Holder in Due Course

A person who qualifies as a holder in due course of a negotiable instrument gets special rights. Normally, the transferee of an instrument—like the assignee of a contract—gets only those rights in the instrument that are held by the person from whom he got the instrument. But a holder in due course can get better rights. A holder in due course takes a negotiable instrument free of all **personal defenses, claims to the instrument,** and **claims in recoupment** either of the obligor or of a third party. A holder in due course does not take free of the **real defenses,** which go to the validity of the instrument or of claims that develop after he becomes a holder. We develop the differences between "personal" and "real defenses" in more detail later in this chapter and also explain claims to the instrument and claims in recoupment. The following example illustrates the advantage that a holder in due course of a negotiable instrument may have.

Assume that Carl Carpenter contracts with Helen Hawkins to build her a garage for $18,500, payable on October 1 when he expects to complete the garage. Assume further that Carpenter assigns his right to the

$18,500 to First National Bank in order to obtain money for materials. If the bank tries to collect the money from Hawkins on October 1 but Carpenter has not finished building the garage, then Hawkins may assert the fact that the garage is not complete as a defense to paying the bank. As assignee of a simple contract, the bank has only those rights that its assignor, Carpenter, has and is subject to all claims and defenses that Hawkins has against Carpenter.

Now assume that instead of simply signing a contract with Hawkins, Carpenter had Homeowner give him a negotiable promissory note in the amount of $18,500 payable to the order of Carpenter on October 1 and that Carpenter then negotiated the note to the bank. If the bank is able to qualify as a holder in due course, it may collect the $18,500 from Hawkins on October 1 even though she might have a personal defense against payment of the note because Carpenter had not completed the work on the garage. Hawkins cannot assert that personal defense against a holder in due course. She would have to pay the note to the bank and then independently seek to recover from Carpenter for breach of their agreement. The bank's improved position is due to its status as a holder in due course of a negotiable instrument. If the instrument in question was not negotiable, or if the bank could not qualify as a holder in due course, then it would be in the same position as the assignee of a simple contract and would be subject to Homeowner's personal defense.

We turn now to a discussion of the requirements that must be met for the possessor of a negotiable instrument to qualify as a holder in due course.

General Requirements

In order to become a **holder in due course,** a person who takes a negotiable instrument must be a *holder,* and take the instrument for *value,* in *good faith, without notice* that it is *overdue* or has been *dishonored* or notice that there is any uncured default with respect to payment of another instrument issued as part of the same series, *without notice* that the instrument *contains an unauthorized signature or has been altered, without notice of any claim of a property or possessory interest in it,* and *without notice* that any party has any *defense against it* or *claim in recoupment to it* [3–302].

In addition, the revision to Article 3 requires "that the instrument when issued or negotiated to the holder does not bear such *apparent evidence of forgery or alteration* or is not otherwise so *irregular* or *incomplete* as to call into question its authenticity" [3–302(a)(1)].

If a person who takes a negotiable instrument does not meet these requirements, he is not a holder in due course. Then the person is in the same position as an assignee of a contract.

Holder

To be a **holder** of a negotiable instrument, a person must have possession of an instrument that is either payable to "bearer" or that is payable to him. For example, if Teresa Gonzales is given a check by her grandmother that is made payable "to the order of Teresa Gonzales," Teresa is a holder of the check because it is made out to her. If Teresa indorses the check "Pay to the order of Ames Hardware, Teresa Gonzales" and gives it to Ames Hardware in payment for some merchandise, then Ames Hardware is the holder of the check. Ames Hardware is a holder because it is in possession of a check that is indorsed to its order. If Ames Hardware indorses the check "Ames Hardware" and deposits it in its account at First National Bank, the bank becomes the holder. The bank is in possession of an instrument that is indorsed in blank and thus is payable to bearer.

It is important that all indorsements on the instrument at the time it is payable to the order of someone are *authorized indorsements.* With limited exceptions (discussed later), a forged indorsement is not an effective indorsement and prevents a person from becoming a holder.

To be a holder, a person must have a complete chain of authorized indorsements. Suppose the Internal Revenue Service mails to Robert Washington an income tax refund check payable to him. Tom Turner steals the check from Washington's mailbox, signs (indorses) "Robert Washington" on the back of the check, and cashes it at a shoe store. The shoe store is not a holder of the check because its transferor, Turner, was not a holder and because it needs Washington's signature to have a good chain of authorized indorsements. Robert Washington has to indorse the check in order for there to be a valid chain of indorsements. Turner's signature is not effective for this purpose because Washington did not authorize him to sign Washington's name to the check [1–201(20); 3–403(a); 3–416(a)(2)].

The *Golden Years Nursing Home* case illustrates that a party in possession of a check indorsed in blank is a holder of the instrument.

Golden Years Nursing Home, Inc. v. Gabbard

682 N.E. 2d 731 (Ohio Ct. App. 1996)

From 1972 until 1991, Nancy Gabbard, the office manager for the Golden Years Nursing Home, received at the nursing home Social Security checks drawn on the United States Treasury and made payable either to individual patients or to "Golden Years Nursing Home for [an individual patient]." From 1986 until 1991, Gabbard engaged in an embezzling scheme whereby she would have certain patients indorse their own checks in blank, that is, each patient would sign his own name on the back of the check placing no restrictions on the manner in which the check could subsequently be negotiated. Gabbard would then cash the checks and either keep the cash or deposit the funds into her personal bank account.

In 1992, after Gabbard's scheme was discovered, Golden Years brought suit against Gabbard and also against the Star Bank Corporation where the checks had been cashed. The patients had in other documents assigned their interests in the checks to Golden Years, and the claim against the bank alleged that it had converted Golden Years' property by cashing checks with forged indorsements. One of the issues in the lawsuit was whether the checks had been properly negotiated to Star Bank. The trial court granted summary judgment to Golden Years, finding that the bank was not a holder in due course because the checks contained "forged indorsements." Star Bank appealed.

Per Curiam The Star Bank argues that the genuine indorsement of the individual payee designated on face of an instrument cannot constitute an unauthorized signature or a forged indorsement. Under the circumstances presented in this case, we agree.

Under the Ohio Uniform Commercial Code, the term "unauthorized signature" "includes both a forgery and a signature made by an agent exceeding his actual or apparent authority," i.e., it occurs in the context of an agency relationship. Golden Years does not argue that the patients forged their own signatures as that term is commonly understood. Rather, it contends that the signatures constitute unauthorized indorsements and, thus, were also forged indorsements because "for purposes of a [section 3–419] conversion action, a forged indorsement and an unauthorized indorsement are synonymous." In addition, Golden Years does not argue that the patients were agents of the nursing home who signed the checks without actual or apparent authority. Rather, Golden Years contends that because the patients had assigned their beneficial interest in the checks to Golden Years, any signature other than Golden Years' corporate stamp was "unauthorized."

We note that Golden Years use of the term "unauthorized signature" does not fall within the scope of the UCC definition of that term, i.e., "made without actual, implied or apparent authority." More important, assuming that the patients had assigned their interest in the checks to Golden Years, any separate agreement between the patient-payees and Golden Years would not affect the negotiability of patients' checks bearing the patients' genuine indorsements.

UCC section 3–119(2) provides that a "separate agreement does not affect the negotiability of an instrument." Negotiability "is always to be determined by what appears on the face of the instrument alone. . . . " A separate writing may affect the terms of an instrument but the Official Comment makes clear that the inquiry is controlled by what *the instrument itself* states or reflects, not, what the collateral agreement says.

If an instrument is payable to order it is negotiated by delivery with any necessary indorsement. (UCC 3–202). "However, once a payee indorses the check in blank, it becomes bearer paper which can be "negotiated by delivery alone." (UCC 3–204). "Negotiation is the transfer of an instrument in such form that the transferee becomes a holder." (UCC 3–202). Thus, in this case, Gabbard became a holder of the checks when the checks, indorsed in blank by the patient-payees, were delivered to her. When Star Bank accepted the checks that were indorsed with the genuine signatures of the payees, the checks bore no indication that they had been assigned to Golden Years. Star Bank cashed the checks in good faith without notice of any defenses and thus became a holder in due course.

This analysis does not change even if Gabbard presented the checks to the payees for their indorsement with the intent to embezzle the funds eventually:

> Assuming that the stolen bearer instrument does not bear a restrictive indorsement, the thief will himself be a holder and whether or not he is a holder, he can constitute his transferee a holder simply by transfer. If his transferee then cashes the check and so gives value in good faith and without notice of any defense, that transferee will be a holder in due course under 3–302, free of all claims to the instrument on the part of any person and free of all defenses to it.

Judgment for Star Bank.

Note: Ohio's adoption of Revised Articles 3 and 4 was not effective until Aug 19, 1994, after the events that gave rise to this action. However, the same result would be expected under Revised Articles 3 and 4.

Value

To qualify as a holder in due course of a negotiable instrument, a person must give **value** for it. Value is not identical to simple consideration. Under the provisions of the Revised Article 3, a holder takes for value if: (1) the agreed-upon promise of performance has been performed—for example, if the instrument was given in exchange for a promise to deliver a refrigerator and the refrigerator has been delivered; (2) he acquires a security interest in, or a lien on, the instrument; (3) he takes the instrument in payment of, or as security for, an antecedent claim; (4) he gives a negotiable instrument for it; or (5) he makes an irrevocable commitment to a third person [3–303]. Thus, a person who gets a check as a gift or merely makes an executory promise in return for a check has not given value for it and cannot qualify as a holder in due course.

A bank or any person who discounts an instrument in the *regular course of trade* has given value for it. In this context the discount essentially is a means for increasing the return or the rate of interest on the instrument. Likewise, if a loan is made and an instrument is pledged as security for the repayment of the loan, the secured party has given value for the instrument to the amount of the loan. If Axe, who owes Bell a past-due debt, indorses and delivers to Bell, in payment of the debt or as security for its repayment, an instrument issued to Axe, Bell has given value for the instrument. If a bank allows a customer to draw against a check deposited for collection, it has given value to the extent of the credit drawn against.

If the promise of performance that is the consideration for an instrument has been partially performed, the holder may assert rights as a holder in due course of the instrument only to the fraction of the amount payable under the instrument equal to the partial performance divided by the value of the promised performance [3–302(d)]. For example, Arthur Wells agrees to purchase a note payable to the order of Helda Parks. The note is for the sum of $5,000. Wells pays Parks $1,000 on the negotiation of the note to him and agrees to pay the balance of $4,000 in 10 days. Initially, Wells is a holder in due course for one-fifth of the amount of the note. If he later pays the $4,000 due he may become a holder in due course for the full amount.

Good Faith

To qualify as a holder in due course of a negotiable instrument, a person must take it in **good faith,** which means that the person obtained it honestly and in the observance of reasonable commercial standards of fair dealing [3–103(a)(4)]. If a person obtains a check by trickery or with knowledge that it has been stolen, the person has not obtained the check in good faith and cannot be a holder in due course. A person who pays too little for an instrument, perhaps because she suspects that something may be wrong with the way it was obtained, may have trouble meeting the good faith test. Suppose a finance company works closely with a door-to-door sales company that engages in shoddy practices. If the finance company buys the consumers' notes from the sales company, it will not be able to meet the good faith test and qualify as a holder in due course of the notes.

In the *Triffin* case, which follows, the holder was able to establish that he had taken the instrument in good faith.

Triffin v. Dillabough *670 A.2d 684 (Penn. Super. Ct. 1996)*

On December 11, 1990, two American Express money orders in the amounts of $550 and $650, respectively, which were payable to Stacey Anne Dillabough, were presented to Chuckie Enterprise, Inc. (Chuckie's), a check-cashing operation in Philadelphia. The money orders were duly indorsed, and photo identifications were provided by the payee; whereupon, Chuckie's paid the face amounts minus a 2 percent fee.

The two money orders had been stolen from the premises of an American Express agent. When stolen, the money orders were signed with the preprinted signature of the Chairman of American Express, but were blank as to payee, date, sender, and amount. When presented to Chuckie's, however, they had been completed by persons unknown.

The money orders were passed through the usual banking channels and were presented for payment at United Bank of Grand Junction, Colorado. American Express, having noted on its "fraud log" that the money orders were stolen, returned the money orders marked "Reported Lost or Stolen—Do Not Redeposit." American Express refused to pay the amounts of the money orders.

The back of the money orders contained the following legend:

IMPORTANT
DO NOT CASH FOR STRANGERS
This money order will not be paid if it has been altered or stolen or if an indorsement is missing or forged. Be sure you have effective recourse against your customer.

_____
PAYEE'S INDORSEMENT

Triffin, a commercial discounter, purchased the dishonored money orders for cash from Chuckie's and took an assignment of all of Chuckie's rights, claims, and interests in the money orders. Triffin brought suit against Dillabough and American Express demanding payment of their stolen money orders. Judgment was entered against Dillabough by default, and the trial court entered a verdict in favor of American Express. Triffin appealed.

Wieand, Judge The issue in this appeal is whether blank money orders, which were stolen prior to being sold and subsequently completed without authorization, are negotiable instruments, and, if so, whether a holder in due course has a right to payment on the instrument despite a lack of initial consideration and the absence of delivery.

Under section 3–407, a holder in due course may in all cases enforce the instrument according to its original tenor, and when an incomplete instrument has been completed, he may enforce it as completed. A holder in due course is a "holder who takes the instrument: (1) for value; (2) in good faith; and (3) without notice that it is overdue or has been dishonored or of any defense against or claim to it on the part of any person. Good faith is "honesty in fact in the conduct or transaction concerned."

It is not disputed that if Chuckie's, as Triffin's assignor, was a holder in due course, then Triffin also stands in the shoes of a holder in due course. The trial court made no specific determination that Chuckie's was a holder in due course, but, after hearing the evidence, the court did express its belief that Chuckie's had acted in good faith when it paid value for the money orders. American Express asserts that the legend printed on the reverse side of each instrument, together with the circumstances surrounding the transactions, created a heightened duty of inquiry upon Chuckie's for the purpose of establishing "good faith" and served as notice of voidability sufficient to present notice of a defense.

The evidence showed that Charles Giunta, president of Chuckie Enterprise, a check cashing business operated by Giunta since 1989, followed his

customary procedures during the underlying transactions. He required and obtained photo identification from Dillabough. He recognized her as a previous customer. The instruments were complete and regular on their face when presented; and Chuckie's paid the face amount of the money orders, minus its regular fee. The surname of the sender on the Dillabough instruments was not decipherable. Giunta testified that he was familiar with money orders and that he had no reason to believe the money orders in question would not be paid when presented. The evidence also shows that Giunta cashed the money orders presented by Dillabough within 30 days of the completed date on the money orders.

American Express disputes that Chuckie's attained holder in due course status because, under the circumstances, Chuckie's failed to ascertain information about the senders on the instruments and should have contacted American Express to determine if the money orders were properly payable before cashing them.

Contrary to American Express's position, we hold that the circumstances surrounding the subject transactions were not of a sufficiently suspicious nature as to require heightened inquiry by Chuckie's in order to establish the "good faith" element necessary for holder in due course status. Chuckie's required Dillabough to produce proper photo identification. Chuckie's also recognized the customer from prior transactions. The mere illegibility of the sender's surname did not suggest that lack of further inquiry arose from a suspicion that inquiry would disclose a vice or defect in the title.

American Express also argues that because the instruments state "[t]his money order will not be paid if it has been altered or stolen," Chuckie's should have inquired of American Express as to whether the money orders were properly payable. Given the general rule in Pennsylvania that there is no affirmative duty to inquire, we find no reason that the legend established such a duty, nor will we find that the mere presence of the legend would raise suspicion as to a vice or defect in the title. Therefore, we hold that Chuckie's was a holder in due course of the two American Express money orders which were stolen from American Express and completed without authorization by persons unknown. Triffin, by assignment, holds the same rights in the instruments as was previously held by Chuckie's.

Judgment in favor of American Express reversed.

Note: While Pennsylvania has adopted Revised Article 3, all of the transactions at issue in this case were completed prior to the effective date of the amendments and the court applied and cited the original version of Article 3. However, the same result would be expected if the court was applying Revised Article 3. The requirement under Revised Article 3 is that in order to be accorded the rights of a holder in due course, the person claiming that status must have taken the instrument in good faith. The expanded definition of good faith includes observance of reasonable commercial standards of fair dealing. [See Revised Sections 3–302 and 3–103(a)(4).]

Overdue or Dishonored

In order to qualify as a holder in due course, a person must take a negotiable instrument before he has notice that it either is **overdue** or has been **dishonored.** The reason for this is that one should perform obligations when they are due. If a negotiable instrument is not paid when it is due, the Code considers the person taking it to be on notice that there may be defenses to the payment of it.

Overdue Instruments If a negotiable instrument is payable on demand, it is overdue: (1) the day after demand for payment has been made in a proper manner and form; (2) 90 days after its date if it is a check; and (3) if it is an instrument other than a check, when it has been outstanding for an unreasonably long period of time in light of the nature of the instrument and trade practice [3–304(a)]. Thus, a check becomes stale after 90 days. For other kinds of instruments, one must consider trade practices and the facts of the particular case. In a farming community, the normal period for loans to farmers may be six months. A demand note might be outstanding for six or seven months before it is considered overdue. On the other hand, a demand note issued in an industrial city where the normal period of such loans is 30 to 60 days would be considered overdue in a much shorter period of time.

If a negotiable instrument due on a certain date is not paid by that date, normally then it will be overdue at the beginning of the next day after the due date. For example, if a promissory note dated January 1 is payable "30 days after date," it is due on January 31. If it is not paid by January 31, it is overdue beginning on February 1.

As to instruments payable at a definite time, Revised Article 3 sets out the following rules: (1) if the principal is not payable in installments and the due date has not been accelerated, the instrument is overdue on the day after the due date; (2) if the principal is due in installments and a due date has not been accelerated, the instrument is overdue upon default for nonpayment of an installment and remains overdue until the default is cured; (3) if a due date for the principal has been accelerated, the instrument is overdue on the day after the accelerated due date; and (4) unless the due date of the principal has been accelerated, an instrument does not become overdue if there is a default in payment of interest but no default in payment of principal [3–304(b)].

Dishonored Instruments To be a holder in due course, a person not only must take a negotiable instrument before he has notice that it is overdue but also must take it before it has been dishonored. A negotiable instrument has been *dishonored* when the holder has *presented* it for payment (or acceptance) and payment (or acceptance) has been refused.

For example, Susan writes a check on her account at First National Bank that is payable "to the order of Sven Sorensen." Sven takes the check to First National Bank to cash it but the bank refuses to pay it because Susan has insufficient funds in her account to cover it. The check has been dishonored. If Sven then takes Susan's check to Harry's Hardware and uses it to pay for some paint, Harry's cannot be a holder in due course of the check if it is on notice that the check has been dishonored. Harry's would have such notice if First National had stamped the check "Payment Refused NSF" (not sufficient funds).

Similarly, suppose Carol Carson signs a 30-day note payable to Ace Appliance for $500 and gives it to Ace as payment for a stereo set. When Ace asks Carol for payment, she refuses to pay because the stereo does not work properly. If Ace negotiates the note to First National Bank, First National cannot be a holder in due course if it knows about Carol's refusal to pay.

Notice of Unauthorized Signature or Alteration

A holder who has notice that an instrument contains an unauthorized signature or has been altered cannot qualify as a holder in due course of the instrument. For example, Frank makes out a check in the amount of $5 payable to George Grocer and gives it to his daughter, Jane, to take to the grocery store to purchase some groceries. The groceries Frank wants cost $20 and Jane changes the check to read $25, giving it to Grocer in exchange for the groceries and $5 in cash. Grocer cannot qualify as a holder in due course if he sees Jane make the alteration to the check or otherwise is on notice of it. [See 3–302(a)(1).]

Notice of Claims

If a person taking a negotiable instrument is *on notice of an adverse claim* to the instrument by someone else (for example, that a third person is the rightful owner of the instrument) or that someone earlier sought to rescind a prior negotiation of the instrument, the current holder cannot qualify as a holder in due course. For example, a U.S. Treasury check is payable to Susan Samuels. Samuels loses the check and it is found by Robert Burns. Burns takes the check to a hardware store, signs "Susan Samuels" on the back of the check in the view of a clerk, and seeks to use it in payment of merchandise. The hardware store cannot be a holder in due course because it is on notice of a potential claim to the instrument by Susan Samuels.

Notice of Breach of Fiduciary Duty One situation in which the Code considers a person to be on notice of a claim is if she is taking a negotiable instrument from a fiduciary, such as a trustee. If a negotiable instrument is payable to a person as a trustee or an attorney for someone, then any attempt by that person to negotiate it for his own behalf or for his use (or benefit) or to deposit it in an account other than that of the fiduciary puts the person on notice that the beneficiary of the trust may have a claim [3–307].

For example, a check is drawn "Pay to the order of Arthur Adams, Trustee for Mary Minor." Adams takes the check to Credit Union, indorses his name to it, and uses it to pay off the balance on a loan Adams had from Credit Union. Credit Union cannot be a holder in due course because it should know that the negotiation of the check is in violation of the fiduciary duty Adams owes to Mary Minor. Ace should know this because Adams is negotiating the check for his own benefit, not Mary's.

Notice of Defenses and Claims in Recoupment

To qualify as a holder in due course, a person must also acquire a negotiable instrument without notice that any party to it has any **defenses** or **claims in recoupment.**

Potential defenses include infancy, duress, fraud, and failure of consideration. Thus, if a person knows that a signature on the instrument was obtained by fraud, misrepresentation, or duress, the person cannot be a holder in due course.

A *claim in recoupment* is a claim of the obligor against the original payee of the instrument. The claim must arise from the transaction that gave rise to the instrument. An example of a claim in recoupment would be as follows: Buyer purchases a used automobile from Dealer for $8,000, giving the dealer a note for $8,000 payable in one year. Because the automobile is not as warranted, Buyer has a breach of warranty claim that could be asserted against Dealer as counterclaim or "claim in recoupment" to offset the amount owing on the note.

The following *Parkhill* case, illustrates the factors a court may consider in determining whether a person should be on notice of possible defenses or adverse claims by a party to a negotiable instrument and thus not able to claim the status of a holder in due course.

In Re Nusor: Parkhill v. Nusor *13 UCC Rep. 2d 773 (Bankr. App., 9th Cir. 1991)*

In the fall of 1987, Irene Nusor was behind in her mortgage payments. She received advertisements from Best Financial Consultants offering attractive refinancing opportunities. On October 14, 1987, she attended a meeting with Best representatives at a McDonald's restaurant who told her that Best would arrange for a complete refinancing of her home in the amount of $98,000, pay off the two existing lienholders, and provide Nusor with an additional $5,000 in spending money. In consideration for these services, Nusor was told that she would owe Best only $4,000.

Nusor agreed to the arrangement and proceeded to sign a fee agreement and a promissory note entitled "Installment Note" that was blank at the time and Best representatives later completed. As completed, it provided that Best would loan her a total sum of $14,986.61 payable in full in 60 days (on December 23, 1987) with an annual interest rate of 18 percent. Where the note provided for the name of the promisor to be filled in, the following words had been typed in: "I, the undersigned, Irene Vazquez Nusor, a married woman, as her sole and separate property." The note was payable to "Best Financial Consultants, a California Sole Proprietorship, or order." The note also contained the following statement: "This note is a junior [sic] *to a first deed of trust of record." On November 13, 1987, Nusor went to a second meeting with Best representatives and signed a "short form deed of trust and assignment of rents." The deed indicated that it secured a promissory note in the amount of $14,986.61.*

On December 2, 1987, Best assigned the note to Robin Parkhill for the discounted price of $13,812.19. Over the term of the note, Parkhill's total anticipated return was $1,624.02, representing the equivalent of an annual interest rate of over 203 percent. Parkhill, who responded to a newspaper ad placed by Best, bought the note without actual notice of the misrepresentations made to Nusor by Best. Nusor received only a single payment of $5,997.25 from Best to one of her lienholders; Best never refinanced Nusor's home or fulfilled its other promises. In June 1988, Nusor filed a Chapter 13 Bankruptcy Petition. One of the questions in the Bankruptcy Proceeding was the status of the promissory note that Parkhill claimed Nusor owed to her. A key issue was whether Parkhill was a holder in due course of a negotiable promissory note and thus not subject to the defenses of fraud in the inducement and failure of consideration that Nusor had against Best. The trial court held in favor of Nusor and Parkhill appealed.

Volinn, Bankruptcy Judge Whether Parkhill is a holder in due course turns on Parkhill satisfying the requirements of Code Section 3–302. Nusor argues that Parkhill fails to meet this standard because of the note's clumsy draftsmanship and its exceptional rate of return (i.e., the maturation of the discounted note 21 days from the date of the assignment) gave Parkhill at least constructive notice of Nusor's defenses. Nusor states that these "irregularities . . . would certainly cause a reasonably prudent person to question the note's validity and thereby be placed on

notice." We agree and hold that Parkhill was not a holder in due course.

Code section 3–304(1) sets forth the conditions under which "irregularities" in the instrument puts the holder on notice:

> (1) The purchaser has *notice of a claim or defense* if (a) the instrument is so incomplete, bears such visible evidence of forgery or alteration, or *is otherwise so irregular as to call into question its validity, terms or ownership* or to create an ambiguity as to the party to pay; (emphasis added.)

The term "notice" is further defined in section 1–201(25)(c), which provides that one has notice of a fact when "[f]rom all the facts and circumstances known to him at the time in question he or she has *reason to know* that it exists." (Emphasis added.)

In this case, Parkhill did not seek interest income in the usual manner. She answered a newspaper advertisement. Presumably, after communicating with Best, she calculated the rate of return. The content of the Installment Note, particularly its extraordinarily favorable terms, clearly indicated that this was an unusual type of commercial transaction. For the discounted price of $13,812.19, Parkhill was assigned a note designed to provide her in 21 days (on December 23, 1987) the face value of the Installment Note ($14,986.61) plus 18% per annum interest that would accrue over the term of the note. Thus, Parkhill's total anticipated return was $1,624.02. This amount represents the equivalent of an annual rate of return of over 203%, a return far in excess of the reasonable expectations of any investor who in good faith seeks a favorable rate of return. In addition, we find it significant that Parkhill made no inquiry about the note's origins notwithstanding its manifestly unusual terms. See *Stewart v. Thornton* (holder in due course protection cannot be used to shield one who simply refuses to investigate when the facts known to him suggest an irregularity concerning the commercial paper he purchases).

The imprecise form of the Installment Note, combined with its exorbitant rate of return, were sufficient to divest Parkhill of holder in due course status and to subject her to Nusor's defenses against the note's enforceability. Accordingly, we hold that Parkhill is not a holder in due course and is therefore subject to Nusor's defenses of fraud in the inducement and failure of consideration.

Judgment in favor of Nusor affirmed.

Note: Although this case was decided under the original Article 3, the same result would be anticipated under Revised Article 3. And, as noted below, Revised Article 3 explicitly provides that a person cannot become a holder in due course of an instrument that is so irregular as to call into question its authenticity [3–302(a)(1)].

Irregular and Incomplete Instruments

A person cannot be a holder in due course of a negotiable instrument if, when she takes it, the instrument is irregular or some important or material term is blank. If the negotiable instrument contains a facial irregularity, such as an obvious alteration in the amount, then it is considered to be **irregular paper.** If you take an irregular instrument, you are considered to be on notice of any possible defenses to it. For example, Kevin writes a check for "one dollar" payable to Karen. Karen inserts the word "hundred" in the amount, changes the figure "$1" to "$100," and gives the check to a druggist in exchange for a purchase of goods. If the alterations in the amount should be obvious to the druggist, perhaps because there are erasures, different handwritings, or different inks, then the druggist cannot be a holder in due course. She would have taken irregular paper and would be on notice that there might be defenses to it. These defenses include Kevin's defense that he is liable for only $1 because that is the amount for which he made the check.

Similarly, if someone receives a check that has been signed but the space where the amount of the check is to be written is blank, then the person cannot be a holder in due course of that check. The fact that a material term is blank means that the instrument is **incomplete** and should put the person on notice that the drawer may have a defense to payment of it. To be

material, the omitted term must be one that affects the legal obligation of the parties to the negotiable instrument. Material terms include the amount of the instrument and the name of the payee. If a negotiable instrument is unauthorizedly completed after the obligor signed it but before a person acquires it, the person can qualify as a holder in due course if she had no notice about the unauthorized completion. A person has notice if she knows or should know of the unauthorized completion.

Payee as Holder in Due Course

The original Article 3 provided explicitly that a *payee* could be a holder in due course if he complied with all the requirements for a holder in due course. Revised Article 3 drops the explicit statement; the drafters stated that they intended no change in the law but that they were concerned that the explicit provision suggested that use of holder-in-due-course status by payees was the normal situation. It is not the normal situation, because a payee usually will have notice or knowledge of any defenses to the instrument and will know whether it is overdue or has been dishonored; consequently, the payee is unlikely to qualify as a holder in due course. For example, Drew draws a check on First Bank as drawee, payable to the order of Parks, but leaves the amount blank. Drew delivers the check to Axe, his agent, and instructs Axe to fill in $300 as the amount. Axe, however, fills in $500 as the amount, and Parks gives Axe $500 for the check. Axe then gives Drew $300 and absconds with the extra $200. In such a case, Parks, as payee, is a holder in due course of the check because he has taken it for value, in good faith, and without notice of defenses.

Similarly, assume that Jarvis owes Fields $200. Jarvis agrees to sell Kirk a used television set for $200; Jarvis assures Kirk it is in working condition. In fact, the set is broken. Jarvis asks Kirk to make her check for $200 payable to Fields and then delivers the check to Fields in payment of the debt. Fields, as the payee, can be a holder in due course of the check if he is not aware of the misrepresentation that Jarvis made to Kirk in order to obtain the check.

Shelter Rule

The transferee of an instrument—whether or not the transfer is a negotiation—obtains those rights that the transferor had, including (1) the transferor's right to enforce the instrument and (2) any right as a holder in due course [3–203(b)]. This means that any person who can trace his title to an instrument back to a holder in due course receives rights similar of a holder in due course even if he cannot meet the requirements himself. This is known as the **shelter rule** in Article 3. For example, Archer makes a note payable to Bryant. Bryant negotiates the note to Carlyle, who qualifies as a holder in due course. Carlyle then negotiates the note to Darby, who cannot qualify as a holder in due course because she knows the note is overdue. Because Darby can trace her title back to a holder in due course (Carlyle), Darby has rights like a holder in due course when she seeks payment of the note from Archer.

There is, however, a limitation on the shelter rule. A transferee who has himself been a party to any fraud or illegality affecting the instrument cannot improve his position by taking, directly or indirectly, from a later holder in due course [3–203(b)]. For example, Archer, through fraudulent representations, induced Bryant to execute a negotiable note payable to Archer and then negotiated the instrument to Carlyle, who took as a holder in due course. If Archer thereafter took the note for value from Carlyle, Archer could not acquire Carlyle's rights as a holder in due course. Archer was a party to the fraud that induced the note, and, accordingly, cannot improve his position by negotiating the instrument and then reacquiring it.

Rights of a Holder in Due Course

Claims and Defenses Generally

Revised Article 3 establishes four categories of claims and defenses. They are:

1. *Real defenses*—which go to the validity of the instrument.
2. *Personal defenses*—which generally arise out of the transaction that gave rise to the instrument.
3. *Claims to an instrument*—which generally concern property or possessory rights in an instrument or its proceeds.
4. *Claims in recoupment*—which also arise out of the transaction that gave rise to the instrument.

These defenses and claims are discussed in some detail beginning on p. 684.

Concept Review

Requirements for a Holder in Due Course

Requirement	Rule
1. Must be a *holder*	A holder is a person in possession of an instrument payable to bearer or payable to an identified person and he is that person.
2. Must take *for value*	A holder has given value: *a.* To the extent the agreed-on consideration has been paid or performed. *b.* To the extent a security interest or lien has been obtained in the negotiable instrument. *c.* By taking the negotiable instrument in payment of—or as security for—an antecedent claim. *d.* By giving a negotiable instrument for it. *e.* By making an irrevocable commitment to a third person.
3. Must take in *good faith*	Good faith means honesty in fact and the observance of reasonable commercial standards of fair dealing.
4. Must take *without notice* that the instrument is *overdue*	An instrument payable on demand is overdue the day after demand for payment has been duly made. A check is overdue 90 days after its date. If it is an instrument other than a check and payable on demand, when it has been outstanding for an unreasonably long period of time in light of nature of the instrument and trade practice. If it is an instrument due on a certain date, then it is overdue at the beginning of the next day after the due date.
5. Must take *without notice* that the instrument has been *dishonored.*	An instrument has been dishonored when the holder has presented it for payment (or acceptance) and payment (or acceptance) has been refused.
6. Must take *without notice* of any *uncured default* with respect to payment of another instrument issued as part of the same series.	If there is a series of notes, holder must take without notice that there is an uncured default as to any other notes in the series.
7. Must take *without notice* that the instrument contains an *unauthorized signature* or has been *altered.*	Notice of unauthorized signature or alteration—that is, a change in a material term—prevents holder from obtaining HDC status.
8. Must take *without notice* of any *claim of a property or possessory interest* in it.	Claims of property or possessory interest include: *a.* Claim by someone that she is the rightful owner of the instrument. *b.* Person seeking to rescind a prior negotiation of the instrument. *c.* Claim by a beneficiary that a fiduciary negotiated the instrument for his own benefit.
9. Must take *without notice* that any party has a *defense* against it.	Defenses include real defenses that go to the validity of the instrument and personal defenses that commonly are defenses to a simple contract.
10. Must take *without notice* of a *claim in recoupment* to it.	A claim in recoupment is a claim of the obligor on the instrument against the original payee that arises from the transaction that gave rise to the instrument.
11. The instrument must not bear *apparent evidence of forgery or alteration* or be *irregular* or *incomplete.*	The instrument must not contain obvious reasons to question its authenticity.

Importance of Being a Holder in Due Course

In the preceding chapter, we explained that one advantage of negotiable instruments over other kinds of contracts is that they are accepted as substitutes for money. People are willing to accept them as substitutes for money because, generally, they can take them free of claims or defenses to payment between the original parties to the instrument. On the other hand, a person who takes an assignment of a simple contract gets only the same rights as the person had who assigned the contract.

There are two qualifications to the ability of a person who acquires a negotiable instrument to be free of claims or defenses between the original parties. First, the person in possession of a negotiable instrument must be a *person entitled to enforce the instrument* as well as a *holder in due course* (or must be a holder who has the rights of a holder in due course through the shelter rule). If the person is neither, then she is subject to all claims or defenses to payment that any party to it has. Second, the only claims or defenses that the holder in due course has to worry about are so-called real defenses—those that affect the validity of the instrument—or claims that arose after she became a holder. For example, if the maker or drawer did not have legal capacity because she was a minor, the maker or drawer has a real defense. The holder in due course does not have to worry about other defenses and claims that do not go to the validity of the instrument—the so-called personal defenses. For example, in the *Triffin v. Dillabough* case, which appeared earlier in this chapter, the holder in due course of a money order that had been stolen was entitled to enforce it against the issuer.

Real Defenses

There are some claims and defenses to payment of an instrument that go to the validity of the instrument. These claims and defenses are known as **real defenses.** They can be used as reasons against payment of a negotiable instrument to any holder, including a holder in due course (or a person who has the rights of a holder in due course). Real defenses include:

1. *Minority or infancy* that under state law makes the instrument void or voidable. For example, if Mark Miller, age 17, signs a promissory note as maker, he can use his lack of capacity to contract as a defense against paying it even to a holder in due course.

2. *Incapacity* that under state law makes the instrument void. For example, if a person has been declared mentally incompetent by a court, then the person has a real defense if state law declares all contracts entered into by the person after the adjudication of incompetency to be void.

3. *Duress* that voids or nullifies the obligation of a party liable to pay the instrument. For example, if Harold points a gun at his grandmother and forces her to execute a promissory note, the grandmother can use duress as a defense against paying it even to a holder in due course.

4. *Illegality* that under state law renders the obligation void. For example, in some states, checks and notes given in payment of gambling debts are void.

5. *Fraud in the essence (or fraud in the factum).* This occurs where a person signs a negotiable instrument without knowing or having a reasonable opportunity to know that it is a negotiable instrument or of its essential terms. For example, Amy Jones is an illiterate person who lives alone. She signs a document that is actually a promissory note but is told that it is a grant of permission for a television set to be left in her house on a trial basis. Amy has a real defense against payment of the note even to a holder in due course. Fraud in the essence is distinguished from fraud in the inducement, discussed below, which is only a personal defense.

6. *Discharge in bankruptcy.* For example, if the maker of a promissory note has had the debt discharged in a bankruptcy proceeding, she no longer is liable on it and has a real defense against payment [3–305(a)(1)].

Real defenses can be asserted even against a holder in due course of a negotiable instrument because it is more desirable to protect people who have signed negotiable instruments in these situations than it is to protect persons who have taken negotiable instruments in the ordinary course of business.

The *Kedzie & 103rd Currency Exchange* case, which follows, involves the question of whether a drawer who issued a check to an unlicensed plumber has a real defense of illegality that can be asserted against a holder in due course. It also highlights the difficult public policy issue inherent in section 3–305.

Kedzie & 103rd Currency Exchange, Inc. v. Hodge

21 UCC Rep. 2d 682 (Ill. Sup. Ct. 1993)

Pursuant to a written "work order," Fred Fentress agreed to install a "flood control system" at the home of Eric and Beulah Hodge of Chicago for $900. In partial payment for the work, Beulah Hodge drafted a personal check payable to "Fred Fentress—A-OK Plumbing" for $500 from the Hodges' joint account at Citicorp Savings.

The system's components were not delivered to the Hodges' home as scheduled. And when Fentress failed to appear on the date set for installation, Eric Hodge telephoned Fentress to advise him the contract was "canceled." Hodge also told Fentress that he would order Citicorp Savings not to pay the check Fentress had been given. Later that day Citicorp received a stop-payment order from Hodge.

Fentress presented the check at the Kedzie & 103rd Street Currency Exchange, indorsing it as "sole owner" of A-OK Plumbing and obtained payment. However, when the Currency Exchange later presented the check for payment at Citicorp Savings, payment was refused in accordance with the stop-payment order.

The Currency Exchange, alleging that it was a holder in due course, then sued Beulah Hodge as the drawer of the check, and Fentress. Hodge moved to dismiss the action against her on the grounds that under section 3–305 she had a defense against payment that could be asserted against a holder in due course, namely that the transaction was illegal because Fentress was not a licensed plumber as required by Illinois law. The circuit court granted the motion and the appeals court affirmed. Currency Exchange then appealed to the Illinois Supreme Court.

Freeman, Justice The Illinois Plumbing License Law requires that all plumbing, including "installation . . . or extension of" drains be performed by plumbers licensed under the Act. The affidavits establish that Fentress was not licensed either by the City of Chicago or the State of Illinois. That failure is a violation of the Illinois Plumbing License Law and is punishable as a misdemeanor. No counter affidavit was supplied.

No material fact remains to be resolved. The question is simply whether Hodge is entitled, as a matter of law, to a judgment of dismissal in view of the defense asserted under section 3–305. Section 3–305 provides, in relevant part:

> [A] holder in due course . . . takes the instrument free from . . .
>
> (2) all defenses of any party to the instrument with whom the holder has not dealt except . . .
>
> (b) . . . illegality of the transaction, as renders the obligation of the party a nullity.

The concern is whether noncompliance by Fentress with the Illinois Plumbing License Law gives rise to "illegality of the transaction" with respect to the contract for plumbing services as to bar the claim of the Currency Exchange, a holder in due course of the check initially given to Fentress.

The issue of "illegality" arises under a variety of statutes. In view of the diverse constructions to which statutory enactments are given, "illegality" is, accordingly, a matter "left to the local law." Even so, it is only when an obligation is made "entirely null and void" under "local law" that "illegality" exists as one of the "real defenses" under section 3–305 to defeat the claim of a holder in due course. In effect, the obligation must be no obligation at all. If it is "merely voidable" at the election of the obligor, the defense is unavailable.

Historically, this court has recognized "illegality" to arise only in view of legislative declaration affecting both the underlying contract or transaction and the instrument exchanged upon it. A contract or transaction which is void must certainly negate the obligation to pay arising from it as between the contracting parties. But, unless an instrument memorializing the obligation is also made void, an innocent third party who has no knowledge of the circumstances of the initial contract or transaction may yet claim payment of it against the drawer or maker.

Thus, "illegality" has been held to defeat the claims of holders in due course in cases involving contracts of a gaming nature or for retirement of gambling debts. Owing to a deep-seated hostility toward

nongovernmental sanctioned gambling, our legislature has declared that any instrument associated with such activity is void, independent of the status of who may possess it. The absence of a similar legislative declaration as for an instrument given upon a usurious contract must account, in part, for a conclusion that usury has not been held to give rise to "illegality" as a defense against a holder in due course.

Several other jurisdictions also find reason to draw a distinction between the voidness of a negotiable instrument and the underlying contract or obligation upon which it is exchanged. A plaintiff is precluded from recovering on a suit involving an illegal contract because the plaintiff is a wrongdoer. But a holder in due course is an innocent third party.

In adopting the UCC and, in particular section 3–305, our legislature chose to confer on a holder in due course of a negotiable instrument considerable protection against claims by persons to it. Our legislature also continues to declare certain obligations void because of the circumstances of the agreements from which they arise and without regard to the status of who may claim ownership. The selective negation of obligations reflects a legislative aim to declare what will and will not give rise to "illegality" in cases now governed by the UCC. As legislative direction indicates which obligations are always void, legislative silence indicates when the protection afforded a holder in due course must be honored.

We therefore reaffirm today the view this court has consistently recognized in cases predating the UCC. Unless the instrument arising from a contract or transaction is, itself, made void by statute, the "illegality" defense under section 3–305 is not available to bar the claim of a holder in due course.

Judgment for Hodge reversed.

Bilandic, Justice, dissenting I would affirm the trial court's dismissal of the Currency Exchange's complaint. The majority here incorporates into section 3–305 of the UCC an additional requirement that must be met before the defense of illegality can be met to defeat the claim of an alleged holder in due course. That additional requirement is not found anywhere in the plain language of section 3–305, however.

With respect to the defenses of duress and illegality, the comments to section 3–305 state, in pertinent part, that "[t]hey are primarily a matter of local concern and local policy. All such matters are therefore left to the local law. If under that law the effect of the duress or the illegality is such to make the *obligation* entirely null and void, the defense may be asserted against a holder in due course.

The plain language of section 3–305 and the comments to the section make it clear that where the illegality of a transaction renders the *obligation* of the maker of an instrument a nullity, the illegal transaction can be raised as a defense by the maker of the instrument, even against a holder in due course. Section 3–305 does not state that illegality is a defense only where the *instrument* arising from a contract or transaction has been expressly declared void by the legislature due to the illegality of the transaction. Had the legislature intended for illegality to be a defense only where it had expressly declared an instrument void due to the illegality of the underlying transaction, it could easily have done so.

The only inquiry necessary to resolve the issue presented in this case then is whether the contract between Hodge and Fentress is void on the grounds of illegality. An examination of the statute providing for the licensing of plumbers, the public policy behind the statute, and the Illinois case law concerning contracts made in contravention of professional licensing laws establishes that the contract between Hodge and Fentress is illegal and void.

Courts in other states have ruled that the defense of illegality of the contract may be asserted against a holder in due course without requiring that a negotiable instrument in question be expressly declared void by statute. In *Wilson v. Steele* (Cal. 1989), the court held that a contract made by an unlicensed home contractor was void and illegal and that this defense could be asserted against a holder in due course. In *Columbus Check Cashiers, Inc. v. Stiles* (Ohio 1990), the court likewise held that a check given as consideration for a contract between a homeowner and an unlicensed home contractor is illegal and void and that the defense of illegality could be asserted against the holder in due course.

In *Columbus Check Cashiers* and *Wilson,* as in the instant case, the subject matter of the contract, performance by an unlicensed individual was prohibited by law. Accordingly, the courts held the contract was illegal and void and that this defense could be asserted against a holder in due course.

More importantly, the courts in these two cases did not require that a statute expressly declare the note in question void in order for the defense of illegality to be available. Such a requirement is likewise not a part of Illinois version of section 3–305. In contrast, under New Jersey law, which the majority here purports to follow, the comments to that state's version of section 3–305 expressly state that "[i]n New Jersey, a holder in due course takes free and clear of the defense of illegality, *unless the statute which declares the act illegal also indicates that payment thereunder is void.*" (Emphasis added.)

The majority asserts that to bar recovery by Currency Exchange in this case would be unfair because the Currency Exchange is an innocent third party which had no knowledge of the circumstances of the contract between Hodge and Fentress. However, section 3–305 clearly provides that the general policy favoring free negotiability is not absolute. There is a competing policy disfavoring certain transactions, such as those involving infancy, duress, illegality or misrepresentation as to the true nature of an instrument (i.e. fraud in the factum). Pursuant to section 3–305, the Currency Exchange takes a check subject to these and certain other real defenses. The Illinois legislature has provided that, by definition, a holder in due course is one who does not have notice of *any* of the real defenses listed in section 3–305. By statute, the innocence of the holder in due course cannot defeat *any* of the real defenses listed in section 3–305, including illegality. Accordingly, the argument that the Currency Exchange could not have known that the underlying transaction was illegal is simply misplaced. Such reasoning would lead to the conclusion that all of the defenses listed in section 3–305 should be unavailable to defeat the claim of a holder in due course, a conclusion obviously contrary to the provisions of section 3–305.

For the above reasons, I dissent. I would affirm the judgment of the appellate court which affirmed the circuit court's dismissal of the Currency Exchange's action against Hodge.

Note: Although this case was decided under the original version of Article 3, the same result would be anticipated under Revised Article 3.

In addition to the real defenses discussed above, there are several other reasons why a person otherwise liable to pay an instrument would have a defense against payment that would be effective even against a holder in due course. They include:

1. *Forgery.* For example, if a maker's signature has been put on the instrument without his authorization and without his negligence, the maker has a defense against payment of the note.

2. *Alteration of a completed instrument.* This is a partial defense against a holder in due course (or a person having the rights of a holder in due course) and a complete defense against a nonholder in due course. A holder in due course can enforce an altered instrument against the maker or drawer according to its original tenor (terms).

3. *Discharge.* If a person takes an instrument with knowledge that the obligation of any party obligated on the instrument has been discharged, the person takes subject to the discharge even if the person is a holder in due course.

Personal Defenses

Personal defenses are legal reasons for avoiding or reducing liability of a person who is liable on a negotiable instrument. Generally, personal defenses arise out of the transaction in which the negotiable instrument was issued and are based on negotiable instruments law or contract law. A holder in due course of a negotiable instrument (or one who can claim the rights of one) is not subject to any personal defenses or claims that may exist between the original parties to the instrument. Personal defenses include:

1. *Lack or failure of consideration.* For example, a promissory note for $100 was given to someone without intent to make a gift and without receiving anything in return [3–303(b)].

2. *Breach of contract, including breach of warranty.* For example, a check was given in payment for repairs to an automobile but the repair work was defective.

3. *Fraud in the inducement of any underlying contract.* For example, an art dealer sells a lithograph to

Cheryl, telling her that it is a Picasso, and takes Cheryl's check for $500 in payment. The art dealer knows that the lithograph is not a genuine Picasso but a forgery. Cheryl has been induced to make the purchase and to give her check by the art dealer's fraudulent representation. Because of this fraud, Cheryl has a personal defense against having to honor her check to the art dealer.

4. *Incapacity to the extent that state law makes the obligation voidable, as opposed to void.* For example, where state law makes the contract of a person of limited mental capacity but who has not been adjudicated incompetent voidable, the person has a personal defense to payment.

5. *Illegality that makes a contract voidable, as opposed to void.* For example, where the payee of a check given for certain professional services was required to have a license from the state but did not have one.

6. *Duress, to the extent it is not so severe as to make the obligation void but rather only voidable.* For example, if the instrument was signed under a threat to prosecute the maker's son if it was not signed, the maker might have a personal defense.

7. *Unauthorized completion or alteration of the instrument.* For example, the instrument was completed in an unauthorized manner, or was altered after it left the maker's or drawer's possession.

8. *Nonissuance of the instrument, conditional issuance, and issuance for a special purpose.* For example, the person in possession of the instrument obtained it by theft or by finding it, rather than through an intentional delivery of the instrument to him [3–105(b)].

9. *Failure to countersign a traveler's check* [3–106(c)].

10. *Modification of the obligation by a separate agreement* [3–117].

11. *Payment that violates a restrictive indorsement* [3–206(f)].

12. *Breach of warranty when a draft is accepted* (discussed in following chapter) [3–417(b)].

The following example illustrates the limited extent to which a maker or drawer can use personal defenses as a reason for not paying a negotiable instrument he signed. Suppose Trent Tucker bought a used truck from Honest Harry's and gave Harry a 60-day promissory note for $2,750 in payment for the truck. Honest Harry's "guaranteed" the truck to be in "good working condition," but in fact the truck had a cracked engine block. If Harry tries to collect the $2,750 from Trent, Trent could claim breach of warranty as a reason for not paying Harry the full $2,750 because Harry is not a holder in due course. However, if Harry negotiated the note to First National Bank and the bank was a holder in due course, the situation would be changed. If the bank tried to collect the $2,750 from Trent, Trent would have to pay the bank. Trent cannot use his defense or claim of breach of warranty as a reason for not paying the bank, which qualified as a holder in due course. It is a personal defense. Trent must pay the bank the $2,750 and then pursue his breach of warranty claim against Harry.

The rule that a holder in due course takes a negotiable instrument free of any personal defenses or claims to it has been modified to some extent, particularly in relation to instruments given by consumers. These modifications will be discussed in the next section of this chapter.

Claims to the Instrument

For purposes of Revised Article 3, the term *claims* to an instrument can include:

1. A claim to ownership of the instrument by one who asserts that he is the owner and was wrongfully deprived of possession.
2. A claim of a lien on the instrument.
3. A claim for rescission of an indorsement.

A holder in due course takes free of claims that arose before he became a holder but is subject to those arising when or after she becomes a holder in due course. For example, if a holder impairs the collateral given for an obligation, he may be creating a defense for an obligor.

Claims in Recoupment

A *claim in recoupment* is not actually a defense to an instrument but rather an *offset to liability.* For example, Ann Adams purchases a new automobile from Dealership, giving it a note for the balance of the purchase price beyond her down payment. After accepting delivery, she discovers a breach of warranty that the dealer fails to remedy. If Dealer has sold the note to a bank that subsequently seeks payment on the note from Adams, she has a claim in recoupment for breach

of warranty. If the bank is a holder in due course, the claim in recoupment cannot be asserted against it. However, if the bank is not a holder in due course, then Adams can assert the claim in recoupment to reduce the amount owing on the instrument at the time the action is brought against her on the note. Her claim could serve only to reduce the amount owing and not as a basis for a net recovery from the bank. However, if Dealer was the person bringing an action to collect the note, Adams could assert the breach of warranty claim as a counterclaim and potentially might recover from Dealer any difference between the claim and the damages due for breach of warranty.

The obligor may assert a claim up to the amount of the instrument if the holder is the original payee but cannot assert claims in recoupment against a holder in due course. In addition, the obligor may assert a claim against a transferee who does not qualify as a holder in due course, but only to reduce the amount owing on the instrument at the time it brought the claim in recoupment.

Changes in the Holder in Due Course Rule

Consumer Disadvantages

The rule that a holder in due course of a negotiable instrument is not subject to personal defenses between

Concept Review

Claims and Defenses against Payment of Negotiable Instruments

Claim or Defense	Examples
Real Defense Valid against all holders, including holders in due course and holders who have the rights of holders in due course.	1. Minority that under state law makes the contract void or voidable. 2. Other lack of capacity that makes the contract void. 3. Duress that makes the contract void. 4. Illegality that makes the contract void. 5. Fraud in the essence (fraud in the factum). 6. Discharge in bankruptcy.
Personal Defense Valid against plain holders of instruments—but not against holders in due course or holders who have the rights of in due course holders through the shelter rule.	1. Lack or failure of consideration. 2. Breach of contract (including breach of warranty). 3. Fraud in the inducement. 4. Lack of capacity that makes the contract voidable (except minority). 5. Illegality that makes the contract voidable. 6. Duress that makes the contract voidable. 7. Unauthorized completion of an incomplete instrument, or material alteration of the instrument. 8. Nonissuance of the instrument. 9. Failure to countersign a traveler's check. 10. Modification of the obligation by a separate agreement. 11. Payment that violates a restrictive indorsement. 12. Breach of warranty when a draft is accepted.
Claim to an Instrument	1. Claim of ownership by someone who claims to be the owner and that he was wrongfully deprived of possession. 2. Claim of a lien on the instrument. 3. Claim for rescission of an indorsement.
Claims in Recoupment	1. Breach of warranty in the sale of goods for which the instrument was issued.

the original parties to it makes negotiable instruments a readily accepted substitute for money. This rule can also result in serious disadvantages to consumers. Consumers sometimes buy goods or services on credit and give the seller a negotiable instrument such as a promissory note. They often do this without knowing the consequences of their signing a negotiable instrument. If the goods or services are defective or not delivered, the consumer would like to withhold payment of the note until the seller corrects the problem or makes the delivery. Where the note is still held by the seller, the consumer can do this because any defenses of breach of warranty or nonperformance are good against the seller.

However, the seller may have negotiated the note at a discount to a third party such as a bank. If the bank qualifies as a holder in due course, the consumer must pay the note in full to the bank. The consumer's personal defenses are not valid against a holder in due course. The consumer must pay the holder in due course and then try to get her money back from the seller. This may be difficult if the seller cannot be found or will not accept responsibility. The consumer would be in a much stronger position if she could just withhold payment, even against the bank, until the goods or services are delivered or the performance is corrected.

State Consumer Protection Legislation

Some state legislatures and courts have limited the holder in due course rule, particularly as it affects consumers. State legislation limiting the doctrine typically amended state laws dealing with consumer credit transactions. For example, some state laws prohibit a seller from taking a negotiable instrument other than a check from a consumer in payment for consumer goods and services. Other states require promissory notes given by consumers in payment for goods and services to carry the words *consumer paper.* Holders of instruments with the legend "consumer paper" are not eligible to be holders in due course.[3] [3–106(d)]

Federal Trade Commission Regulation

The Federal Trade Commission (FTC) has promulgated a regulation designed to protect consumers against operation of the holder in due course rule. The FTC rule applies to persons who sell to consumers on credit and have the consumer sign a note or an installment sale contract or arrange third-party financing of the purchase. The seller must ensure that the note or the contract contains the following clause:

NOTICE: ANY HOLDER OF THIS CONSUMER CREDIT CONTRACT IS SUBJECT TO ALL CLAIMS AND DEFENSES WHICH THE DEBTOR COULD ASSERT AGAINST THE SELLER OF THE GOODS OR SERVICES OBTAINED PURSUANT HERETO OR WITH THE PROCEEDS HEREOF. RECOVERY HEREUNDER BY THE DEBTOR SHALL NOT EXCEED AMOUNTS PAID BY THE DEBTOR HEREUNDER.

The effect of the notice is to make a potential holder of the note or contract subject to all claims and defenses of the consumer. This is illustrated in *Music Acceptance Corp.,* which follows. If the note or contract does not include the clause required by the FTC rule, the consumer does not gain any rights that he would not otherwise have under state law, and a subsequent holder may qualify as a holder in due course. However, the FTC does have the right to seek a fine of as much as $10,000 against the seller who failed to include the clause.

[3]Revised Article 3 expressly deals with these state variations in section 3–106(d) and Official Comments 3 to 3–106 and Comments 3 to 3–305. Section 3–106(d) permits instruments containing legends or statements required by statutory or administrative law that preserve the obligator's right to assert claims or defenses against subsequent holders as within Article 3 except that no holder can be a holder in due course.

Music Acceptance Corp. v. Lofing *39 Cal. Rptr. 159 (Cal. Ct. App. 1995)*

Dan Lofing purchased a Steinway grand piano from Sherman Clay & Co., Steinway & Sons' Sacramento dealer, and received financing through Sherman Clay's finance company, Music Acceptance Corporation (MAC). The consumer note for $19,650.94 prepared by MAC and signed by Lofing included the following in bold-face type:

NOTICE

ANY HOLDER OF THIS CONSUMER CREDIT CONTRACT IS SUBJECT TO ALL CLAIMS AND DEFENSES WHICH THE DEBTOR COULD ASSERT AGAINST THE SELLER OF GOODS OR SERVICES OBTAINED PURSUANT HEREIN OR WITH THE PROCEEDS HEREOF. RECOVERY HEREUNDER SHALL NOT EXCEED AMOUNTS PAID BY THE DEBTOR HEREUNDER.

Lofing received a warranty from Steinway that provided the company "will promptly repair or replace without charge any part of this piano which is found to have a defect in material or workmanship within five years" from the date of sale.

Lofing became disenchanted with the piano after experiencing a variety of problems with it. There was a significant deterioration in the action and tonal quality of the piano which the Sherman Clay piano technician was unable to remedy despite lengthy and repeated efforts. A Steinway representative who was called in to inspect the piano concluded that it was in "terrible condition" and expressed surprise that it had ever left the factory. He concluded that the piano would have to be completely rebuilt at the factory.

Because the piano was impossible to play and was ruining his technique. Lofing stopped making payments on the piano. To mitigate his damages, Lofing sold the piano for $7,000 and purchased a Kawai piano from another dealer. He brought suit against Sherman Clay, Steinway, and MAC for, among other things, breach of warranty. One of the issues in the litigation was whether the Notice in the note allowed him to assert the breach of warranty as a grounds for not continuing to pay off the note to MAC.

Sparks, Associate Justice The FTC adopted a rule which makes it an unfair or deceptive act or practice for a seller to take or receive a consumer credit application which does not contain the following provision in large bold-face type:

NOTICE

ANY HOLDER OF THIS CONSUMER CREDIT CONTRACT IS SUBJECT TO ALL CLAIMS AND DEFENSES WHICH THE DEBTOR COULD ASSERT AGAINST THE SELLER OF GOODS OR SERVICES OBTAINED PURSUANT HEREIN OR WITH THE PROCEEDS HEREOF. RECOVERY HEREUNDER SHALL NOT EXCEED AMOUNTS PAID BY THE DEBTOR HEREUNDER.

This notice is identical to that included in Lofing's sales contract.

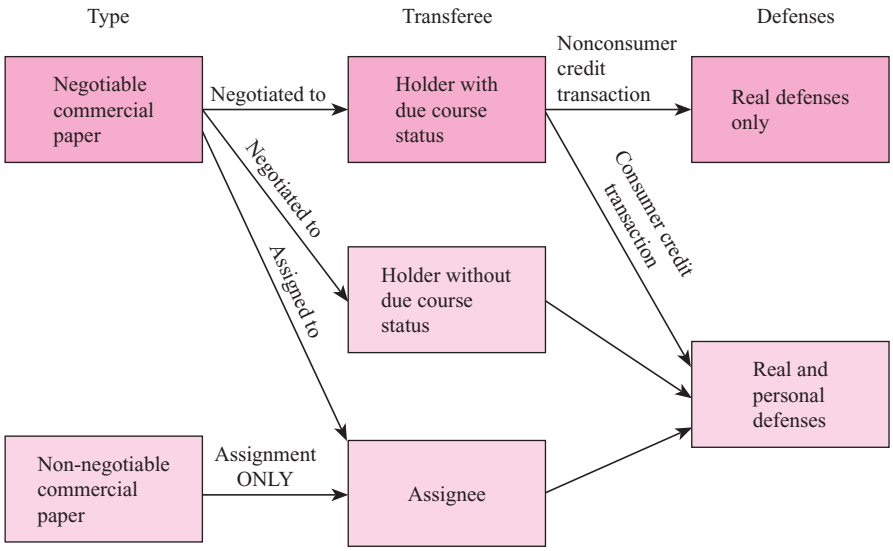
The FTC enacted this rule because it believed it was "an unfair practice for a seller to employ procedures in the course of arranging the financing of a consumer deal which separate[d] the buyer's duty to pay for goods or services from the seller's reciprocal duty to perform as promised." The FTC explained: "Our primary concern . . . has been the distribution or allocation of costs occasioned by seller misconduct in credit sale transactions. These costs arise from breaches of contract, breaches of warranty, misrepresentation, and even fraud. The current commercial system which enables sellers and creditors to divorce a consumer's obligation to pay for goods and services from the seller's obligation to perform as promised, allocates all of these costs to the consumer/buyer."

In its "Guidelines on Trade Regulation Rule Concerning Preservation of Consumers' Claims and Defenses," the FTC explained further:

> [The] dramatic increase in consumer credit over the past thirty years has caused certain problems. Evolving doctrines and principles of contract law have not kept pace with changing social needs. One such legal doctrine which has worked to deprive consumers of the protection needed in credit sales is the so-called "holder in due course doctrine." Under this doctrine, the obligation to pay for goods or services is not conditioned upon the seller's corresponding duty to keep his promises.
>
> Typically, the circumstances are as follows: A consumer relying in good faith on what the seller has represented to be a product's characteristics, service warranty, etc., makes a purchase on credit terms. The consumer then finds the product unsatisfactory; it fails to measure up to the claims made on its behalf by the seller, or the seller refuses to provide promised maintenance. The consumer, therefore, seeks relief from his debt obligations only to find that no relief is possible. His debt obligation, he is told, is not to the seller but to a third party whose claim to payment is legally unrelated to any promise made about the product.
>
> The seller may, prior to the sale, have arranged to have the debt instrument held by someone other than himself; he may have sold the debt instrument at a discount after the purchase.
>
> From the consumer's point of view, the timing and means by which the transfer was effected are irrelevant. He has been left without ready recourse. He must pay the full amount of his obligation. He has a product that yields less than its promised value. And

he has been robbed of the only realistic leverage he possessed that might have forced the seller to provide satisfaction—his power to withhold payment.

As one court noted, before this rule was adopted "[t]he reciprocal duties of the buyer and seller which were mutually dependent under ordinary contract law became independent of one another. Thus, the buyer's duty to pay the creditor was not excused upon the seller's failure to perform. In abrogating the holder in due course rule in consumer credit transactions, the FTC preserved the consumer's claims and defenses against the creditor-assignee. The FTC rule was therefore designed to reallocate the cost of seller misconduct to the creditor. The commission felt the creditor was in a better position to absorb the loss or recover the cost from the guilty party—the seller."



MAC contends the FTC rule is inapplicable here. MAC cites comments in the FTC guidelines discussing possible limitations on the rule. Specifically, the FTC points out that because the regulation's definition of "Financing a Sale" expressly refers to the Truth-in-Lending Act, it "thus incorporate[s] the limitations contained in these laws. As a result, even with respect to transactions involving a sale of consumer goods or services, a purchase involving an expenditure of more than $25,000 is not affected by the Rule." MAC argues that since the cash price of the piano, including sales tax, was $25,650.94, the transaction is exempt from these requirements.

MAC's argument is unavailing as it is based on the guideline's unfortunate use of the phrase "expenditure of more than $25,000." As Lofing points out, the exemption referred to in the Truth-in-Lending Act does not speak of expenditures of more than $25,000, but of transactions in which the "total amount financed exceeds $25,000." Here, because Lofing traded in his piano, the total amount financed was $19,650.94, well below the exemption level.

More importantly, it is irrelevant whether the FTC rule applies. Even if such a notice was not required to be given, the fact remains that it was: Lofing's contract included the precise language mandated by the FTC rule. Put simply, Lofing is in the same position whether we apply the FTC rule or the language of his particular contract. The jury's finding that Sherman Clay breached its warranties mandates that the judgment in favor of MAC and against Lofing be reversed.

Judgment in favor of Lofing.

Figure 1 *The Transfer of Commercial Paper*

Source: "Charting the Way Through the Transfer of Commercial Paper," Janell Kurtz and Wayne Wells, *Journal of Legal Studies Education* 13 (1995), p. 191.

Ethical and Public Policy Concerns

1. If you are in the business of buying commercial paper—such as consumer notes—from businesses such as home improvement companies, how much of an ethical obligation, if any, do you have to look into the sales practices and performance records of the companies to whom the consumers have made the notes payable?

2. Suppose you have given a check in payment of a gambling debt in a state that makes such obligations void. Are there any ethical considerations involved as to whether you should assert the real defense of illegality against payment of the check to a holder in due course?

3. The *Kedzie & 103rd Currency Exchange, Inc. v. Hodge* case presents the public policy question of whether instruments issued in connection with transactions that are unenforceable between the original parties because of illegality can be enforced against holders in due course. If you were a legislator in Illinois who was confronting this question following the decision in this case, what position would you take? Why?

Problems and Problem Cases

1. Stone & Webster drew three checks in the total amount of $64,755.44 payable to the order of Westinghouse Electric Corporation. An employee of Stone & Webster obtained possession of the checks, forged Westinghouse's indorsement to them, and cashed them at the First National Bank & Trust Company and put the proceeds to his own use. The first two checks were indorsed in typewriting, "For Deposit Only: Westinghouse Electric Corporation By: Mr. O. D. Costine, Treasury Representative," followed by the ink signature "O. D. Costine." The third check was indorsed in typewriting, "Westinghouse Electric Corporation by: [Sgd.] O. D. Costine, Treasury Representative." Were the checks negotiated to the bank?

2. Franzese, the payee of a check, indorsed it in blank and gave it to Howard Finger. Howard indorsed the check and included the account number for Finger Funding, Ltd., under his signature. Anita Finger then presented the check for payment to Fidelity New York FSB, and the check was deposited in her account. Franzese argued that Howard's indorsement was restrictive because it included his account number. Franzese sued Fidelity, claiming that Fidelity should not have deposited the check in Anita's account. Was the indorsement by Howard Finger a restrictive indorsement?

3. Reliable Janitorial Service, Inc., maintained a bank account with AmSouth Bank. Rosa Pennington was employed by Reliable as a bookkeeper/office manager. She deposited checks made payable to Reliable but did not have authority to write checks on Reliable's account. Beginning in January Pennington obtained counter deposit slips from AmSouth. She wrote on the deposit slips that the depositor was "Reliable Janitorial Services, Inc.," but in the space for the account number, Pennington wrote the account number for her own personal account with AmSouth. She stamped the checks that were made payable to "Reliable Janitorial Service, Inc." with the indorsement "For Deposit Only, Reliable Carpet Cleaning, Inc." Over an 11-month period, Pennington was able to deposit 169 checks so indorsed. AmSouth credited the deposits to Pennington, not Reliable. Pennington spent all the funds that she diverted to her account. When Reliable discovered the fraud, it brought suit against AmSouth for conversion and sought to have its account credited with the improperly paid checks. Was AmSouth Bank liable to Reliable for the value of the restrictively indorsed checks that it paid inconsistently with the indorsement?

4. Reggie Bluiett worked at the Silver Slipper Gambling Hall and Saloon. She received her weekly paycheck made out to her from the Silver Slipper. She indorsed the check in blank and left it on her dresser at home. Fred Watkins broke into Bluiett's house and stole the check. Watkins took the check to the local auto store, where he bought two tires at a cost of $71.21. He obtained the balance of the check in cash. Could the auto store qualify as a holder in due course?

5. Michael Bozorg owned a store and customarily kept blank, signed checks at the cash register to pay vendors. Ebrahimpour held a check written on Bozorg's account. Bozorg stated that the check given to Ebrahimpour was completed, without Bozorg's authorization, by "Max" Rawashdeh, a former employee of Bozorg's who had been fired for misconduct and who was a close friend of Ebrahimpour. Ebrahimpour

sued Bozorg for collection on the check, claiming that he was a holder in due course and thus entitled to the amount of the instrument. Bozorg argued that he had neither completed the check nor authorized its completion by his employee, and that the check was not issued for value. Ebrahimpour claimed that the check represented a "loan" of $9,500 and payment for $80 worth of chicken wings. Is Ebrahimpour a holder in due course entitled to enforce the check?

6. Charles Alcombrack was appointed guardian for his son, Chad Alcombrack, who was seven years old and the beneficiary of his grandfather's life insurance policy. The insurance company issued a check for $30,588.39 made payable to "Charles Alcombrack, Guardian of the Estate of Chad Stephen Alcombrack, a Minor." The attorney for the son's estate directed the father to take the check, along with the letters of guardianship issued to the father, to the bank and open up a guardianship savings and checking account. Instead, the father took the check, without the letters of guardianship, to the Olympic Bank and opened a personal checking and a personal savings account. Despite the fact that the check was payable to the father in his guardianship capacity, the bank allowed the father to place the entire amount in his newly opened personal accounts. The father used all but $320.60 of the trust money for his personal benefit. A new guardian, J. David Smith, was appointed for Chad. Smith brought suit against the Olympic Bank, on Chad's behalf, to recover the amount of the check. Was the bank a holder in due course of the check?

7. Two smooth-talking salesmen for Rich Plan of New Orleans called on Leona and George Henne at their home. They sold the Hennes a home food plan. One of the salesmen suggested that the Hennes sign a blank promissory note. The Hennes refused. The salesman then wrote in ink "$100" as the amount and "4" as the number of installments in which the note was to be paid, and the Hennes signed the note. Several days later, the Hennes received a payment book from Nationwide Acceptance. The payment book showed that a total of $843.38 was due, payable in 36 monthly installments. Rich Plan had erased the "$100" and "4" on the note and typed in the figures "$843.38" and "36." The erasures were cleverly done but were visible to the naked eye. Rich Plan then negotiated the Hennes' note to Nationwide Acceptance. The Hennes refused to pay the note. Nationwide claimed that it was a holder in due course and was entitled to receive payment. Was Nationwide Acceptance a holder in due course?

8. A representative of Gracious Living, Inc., called on the Hutchinsons and identified himself as a "demonstrator" of water-softening equipment. After explaining the cost of the equipment, he told the Hutchinsons that Gracious Living would install it for a four-month trial. In return, the Hutchinsons were to give him a list of their friends and neighbors and permit a demonstration in their house. They were to receive a bonus if sales were made to any of their friends and neighbors. The Hutchinsons claimed that the man "asked them to sign a form that he could show to his boss to prove he had made the demonstration and also as a bond to cover the unit while it was on the Hutchinson's property." They signed the form. Later, the Hutchinsons received a payment book from the Reading Trust Company. They then realized that they had been tricked into signing a contract and a note. Hutchinson was a high school graduate, and his wife had completed her junior year in high school. Both could read and write the English language. Reading Trust had obtained the note from Gracious Living. It had no notice of Gracious Living's business practice and was a holder in due course. The Hutchinsons refused to pay the note, and Reading Trust sued them to collect on it. Did the Hutchinsons have a real defense that they could use against the Reading Trust Company even though it was a holder in due course?

9. James Azar, a resident of Bismarck, North Dakota, traveled to the Shooting Star Casino in Mahnomen, Minnesota. The Casino is located on the reservation land of the White Earth Band of Chippewa Indians, which owns and operates the Casino. While Azar was at the Casino he gambled and lost approximately $14,000 playing blackjack. Casino personnel twice approached Azar after he incurred the losses and offered him, on credit, $2,000 in blackjack chips. After Azar gambled and lost each $2,000 advance, Azar was asked to issue checks to the Casino for payment of the chips. Both the checks were returned to the Casino by Azar's bank marked "insufficient funds." The Casino then assigned its interest in the checks to CBA Credit Services, which in turn brought suit against Azar for the amount of the checks.

Under Minnesota law, gambling debts are, in general, void and of no effect as between the parties to the debt. However, there are exceptions for legalized gam-

bling, one of which is "gaming pursuant to the Indian Gaming Regulatory Act [IGRA]." Under the IGRA, blackjack is lawful on Indian lands only if it is conducted in conformance with a Tribal-State compact entered into between the Indian tribe and the State of Minnesota. The Compact between the State and the Chippewa Tribe provides in pertinent part:

> All gaming shall be conducted on a cash basis. Except as herein provided, no person shall be extended credit for gaming by any gaming facility operated within the Band, and no operator shall permit any person or organization to offer such credit for a fee. This section shall not restrict the right of the Band or any other person to offer check cashing or to install or accept bank card or credit card transactions in the same manner as would be normally permitted at any retail business within the State.

Can CBA enforce payment of the checks based on gambling debts?

10. DVD *Video Case.* See "TV Repair." Arnold takes his old TV set to an appliance store for repair and purchases a new TV from the store. He signs a promissory note, which provides for installment payments, for the balance due on the new set. The note contains the notice that the FTC requires be included in consumer credit instruments. Arnold discovers that the TV is defective after making the first payment on the note to the appliance store. The appliance store assigns the promissory note to Acme Finance Company, which notifies Arnold of its interest in the note and that he should make his payments on the note to it. Arnold advises Acme Finance that he will not make any further payments on the promissory note until the TV is repaired. If Arnold has a valid claim for breach of warranty of merchantability of the TV set, can he assert this as a defense against paying the note to the appliance store and/or to Acme Finance?

- B. *Discharge by Payment*
- C. *Discharge by Cancellation*
- D. *Altered Instruments; Discharge by Alteration*
- E. *Discharge of Indorsers and Accommodation Parties*

Thus far in Part 7, Commercial Paper, the focus has been on the nature of, and requirements for, negotiable instruments as well as the rights that an owner of an instrument can obtain and how to obtain them. Another important aspect to negotiable instruments concerns how a person becomes liable on a negotiable instrument and the nature of the liability incurred.

When a person signs a promissory note, he expects to be liable for paying the note on the day it is due. Similarly, when a person signs a check and mails it off to pay a bill, she expects that the drawee bank will pay it from funds in her checking account and that if her account contains insufficient funds to cover it, she will have to make it good out of other funds she has. These liabilities concerning instruments are commonly understood.

However, there are a number of other ways in which a person can become liable on a negotiable instrument. For example, a person who indorses a paycheck assumes liability on it; and a bank that cashes a check with a forged indorsement on it is liable for conversion of the check. This chapter and the following chapter discuss the liabilities of the various parties to a negotiable instrument. These two chapters also explain what happens when an instrument is not paid when it is supposed to be paid. For example, a check should not be paid if the drawer's account contains insufficient funds or if the check has been forged. In addition, this chapter discusses the ways in which liability on an instrument can be discharged.

Liability in General

Liability on negotiable instruments flows from signatures on the instruments as well as actions taken concerning them. It can arise from the fact that a person has signed a negotiable instrument or has authorized someone else to sign it. The liability depends on the capacity in which the person signs the instrument. Liability also arises from (1) transfer or presentment of an instrument, (2) negligence relating to the issuance, alteration, or indorsement of the instrument, (3) improper payment, or (4) conversion.

Contractual Liability

When a person signs a negotiable instrument, whether as maker, drawer, indorser, or in some other capacity, she generally becomes contractually liable on the instrument. As mentioned above, this contractual liability depends on the capacity in which the person signed the instrument. The terms of the contract of the parties to a negotiable instrument are not set out in the text of the instrument. Rather, Article 3 of the Uniform Commercial Code supplies the terms, which are as much a part of the instrument as if they were part of its text.

Primary and Secondary Liability

A party to a negotiable instrument may be either *primarily liable* or *secondarily liable* for payment of it. A person who is primarily liable has agreed to pay the negotiable instrument. For example, the maker of a promissory note is the person who is primarily liable on the note. A person who is secondarily liable is like a guarantor on a contract; Article 3 requires a secondary party to pay the negotiable instrument only if a person who is primarily liable defaults on that obligation. Chapter 27, Introduction to Credit and Secured Transactions, discusses guarantors.

Obligation of a Maker

The **maker** of a promissory note is primarily liable for payment of it. The maker makes an unconditional promise to pay a fixed amount of money and is responsible for making good on that promise. The obligation of the maker is to pay the negotiable instrument according to its terms at the time he issues it or, if it is not issued, then according to its terms at the time it first came into possession of a holder [3–412].[1] If the material terms of the note are not complete when the maker signs it, then the maker's obligation is to pay the note as it is completed, provided that the terms filled in are as authorized. If the instrument is incomplete when the maker signs it and it is completed in an unauthorized manner, then the maker's liability will depend on whether the person seeking to enforce the instrument can qualify as a holder in due course.

The obligation of the maker is owed to (1) a *person entitled to enforce the instrument* or (2) any indorser who paid the instrument pursuant to her indorser's liability (discussed below). A person entitled to enforce an instrument includes: (1) the holder of the instrument; (2) a nonholder in possession of the instrument who has the rights of a holder; and (3) a person not in possession of the instrument who has the right to enforce the instrument under section 3–309, which deals with lost, destroyed, or stolen instruments.

Revised Article 3 provides that the *drawer of a cashier's check* has the same obligation as the maker or issuer of a note. Thus, it treats the bank drawer of a draft drawn on a bank the same as a note for purposes of the issuer's liability rather than treating the issuer as a drawer of a draft [3–412].

Obligation of a Drawee or an Acceptor

The **acceptor** of a draft is obligated to pay the draft according to the terms at the time of its acceptance. As was discussed in Chapter 30, acceptance is the drawee's signed engagement to honor the draft as presented—and is commonly indicated by the signature of the acceptor on the instrument itself. The acceptor's obligation extends to (1) a person entitled to enforce the draft, (2) the drawer, and (3) an indorser who paid the instrument pursuant to her indorser's liability [3–413].

If the certification of a check or other acceptance of a draft states the amount certified or accepted, the obligation of the acceptor is that amount. If the certification or acceptance does not state an amount, if the amount of the instrument is subsequently raised and then the in-

[1]The numbers in brackets refer to sections of the Uniform Commercial Code (UCC), which is reproduced in the appendix.

strument is negotiated to a holder in due course, the obligation of the acceptor is the amount of the instrument at the time a holder in due course takes it [3–413(b)].

At the time a payee receives possession of a check or other draft, the payee gets the drawer's contract to pay the instrument if the drawee—bank or buyer of goods—does not pay. (This liability is discussed elsewhere in this chapter.) *Issuance* of the check or draft, however, does not obligate the *drawee* to pay it. Like other Article 3 contracts discussed in this chapter, the drawee does not have liability on the instrument until it *signs* the instrument.

The drawer or a holder of the check may ask the drawee bank to accept or certify the check. The drawee bank certifies the check by signing its name to the check and, with that act, accepts liability as acceptor. The drawee bank debits, or takes the money out of, the drawer's account and holds the money to pay the check. If the drawee bank certifies the check, it becomes primarily, or absolutely, liable for paying the check as it reads at the time of its acceptance [3–413], and its acceptance discharges the drawer and indorsers who indorsed before the acceptance. Similarly, when a trade draft is presented for acceptance or payment, and the named drawee accepts it, then the drawee accepts the obligation set forth in the instrument and the drawer and earlier indorsers are discharged.

A drawee has no liability on a check or other draft unless it certifies or accepts the check or draft—that is, agrees to be liable on it. However, a drawee bank that refuses to pay a check when it is presented for payment may be liable to the drawer for wrongfully refusing payment, assuming the drawer had sufficient funds in his checking account to cover it. The next chapter discusses this liability of a drawee bank.

Obligation of a Drawer

The **drawer**'s obligation is that if the drawee dishonors an unaccepted check (or draft), the drawer will pay the check (or draft) according to its terms at the time he issued it or, if it was not issued, according to its terms at the time it first came into possession of a holder. If the draft was not complete when issued but was completed as authorized, then the obligation is to pay it as completed. If any completion is not authorized, then the obligation will depend on whether the person seeking to enforce the instrument can qualify as a holder in due course. A person entitled to enforce the draft or an indorser who paid the draft pursuant to his indorser's liability may enforce the drawer's obligation [3–414(b)].

For example, Janis draws a check on her account at First National Bank payable to the order of Collbert. If First National does not pay the check when Collbert presents it for payment, then Janis is liable to Collbert on the basis of her drawer's obligation.

If a draft is accepted by a bank—for example, if the drawee bank certifies a check—the drawer is discharged of her drawer's obligation. If someone other than a bank accepts a draft, then the obligation of the drawer to pay the draft, if the draft is dishonored, is the same as an indorser (discussed next) [3–414(c) and (d)].

The *First American Bank of Virginia* case that follows illustrates circumstances under which a drawer might be liable on its drawer's contractual obligation.

First American Bank of Virginia v. Litchfield Company of South Carolina, Inc.

353 S.E.2d 143 (S.C. Ct.App. 1987)

On February 9, 1983, Litchfield Company drew a check payable to Jensen Farley Pictures, Inc., in the amount of $13,711.11, on its account with Bankers Trust of South Carolina. Litchfield sent the check to Jensen Farley, which negotiated the check on September 16 to First American Bank of Virginia with whom it had a checking account. First American gave Jensen Farley immediate credit on the check and forwarded it to Bankers Trust for payment. Unknown to First American, Litchfield had given Bankers Trust an oral stop-payment order on the check. On September 19, Jensen Farley withdrew most of the balance in its First American account; it subsequently filed for bankruptcy. On September 21, Bankers Trust returned the Litchfield check to First American marked "payment stopped."

First American then sued Litchfield, claiming that as drawer of the check, it was liable to First American, a holder in due course of the check. The trial court awarded First American Bank judgment for $9,369.37 (representing the amount it had been unable to recover from Jensen Farley), and Litchfield appealed.

Bell, Judge The drawer of a check engages that upon dishonor he will pay the amount of the draft to a holder in due course. Section 3–413(2). The drawer has the right to stop payment, but remains liable on the instrument to a holder in due course. Section 4–403 and comment 8; section 3–413(2). Since Litchfield has conceded First American was a holder in due course, Litchfield remains liable on the instrument unless it can establish a valid defense or set off.

Litchfield argues that its liability was discharged by First American's failure to give timely notice the check had been dishonored. This defense is unavailing for two reasons.

First, failure to give notice of dishonor discharges a drawer only to the extent he is deprived of funds maintained with the drawee bank to cover the check because the drawee bank became insolvent during the delay. Sections 3–501(2)(b) and 3–502(1)(b). A drawer is not otherwise discharged. In this case, Litchfield was not deprived of any funds in its account with Bankers Trust nor did Bankers Trust become insolvent during the delay.

Second, notice of dishonor is excused when the party to be charged has himself countermanded payment. Section 3–511(2)(b). Since Litchfield ordered payment stopped, it was not entitled to notice of dishonor.

Litchfield argues strenuously that it is unfair to apply section 3–511(2)(b) to the drawer of a check who has no means of knowing whether the check has been negotiated to a holder. This reasoning misses the mark. The maker of an outstanding negotiable instrument is presumed to know the instrument is subject to transfer to a holder in due course. The drawer is often without actual knowledge that his check has been negotiated, but that ignorance in no way diminishes the rights of a holder in due course. To hold otherwise would, as a practical matter, destroy the negotiability of a check.

Judgment for First American affirmed.

Note: Although this case was decided under the original Article 3 and Revised Article 3 restates the obligation of a drawer, a similar result would be anticipated under Revised Article 3. [See Revised 3-414(f), 3-503(a), and 3-504(a)(v)].

Obligation of an Indorser

A person who indorses a negotiable instrument usually is secondarily liable. Unless the indorser qualifies or otherwise disclaims liability, the **indorser**'s obligation on dishonor of the instrument is to pay the amount due on the instrument according to its terms at the time he indorsed it or if he indorsed it when incomplete, then according to its terms when completed, provided that it is completed as authorized. The indorser owes the obligation to a person entitled to enforce the instrument or to any subsequent indorser who had to pay it [3–415].

The indorser can avoid this liability only by qualifying his indorsement, such as "without recourse," on the instrument when he indorses it [3–415(b)].

Indorsers are liable to each other in the chronological order in which they indorse, from the last indorser back to the first. For example, Mark Maker gives a promissory note to Paul Payee. Payee indorses it and negotiates it to Fred First, who indorses it and negotiates it to Shirley Second. If Maker does not pay the note when Second takes it to him for payment, then Second can require First to pay it to her. First is secondarily liable on the basis of his indorsement. First, in turn, can require Payee to pay him because Payee also became secondarily liable when he indorsed it. Then, Payee is left to try to collect the note from Maker. Second also could have skipped over First and proceeded directly against Payee on his indorsement. First has no liability to Payee, however, because First indorsed after Payee indorsed the note.

If a bank accepts a draft (for example, by certifying a check) after an indorsement is made, the acceptance discharges the liability of the indorser [3–415(d)]. If notice of dishonor is required and proper notice is not given to the indorser, she is discharged of liability [3–415(c)]. And, where no one presents a check or gives it to a depositary bank for collection within 30 days after the date of an indorsement, the indorser's liability is discharged [3–415(e)].

Obligation of an Accommodation Party

An **accommodation party** is a person who signs a negotiable instrument for the purpose of lending her credit to another party to the instrument but is not a direct beneficiary of the value given for the instrument.

For example, a bank might be reluctant to lend money to—and take a note from—Payee because of his shaky financial condition. However, the bank may be willing to lend money to Payee if he signs the note and has a relative or a friend also sign the note as an accommodation maker.

The obligation of an accommodation party depends on the capacity in which the party signs the instrument [3–419]. If Maker has his brother Sam sign a note as an accommodation maker, then Sam has the same contractual liability as a maker. Sam is primarily liable on the note. The bank may ask Sam to pay the note before asking Maker to pay. However, if Sam pays the note to the bank, he has the right to recover his payment from Maker, the person on whose behalf he signed.

Similarly, if a person signs a check as an accommodation indorser, his contractual liability is that of an indorser. If the accommodation indorser has to make good on that liability, he can collect in turn from the person on whose behalf he signed.

Signing an Instrument

No person is contractually liable on a negotiable instrument unless she or her authorized agent has signed it and the signature is binding on the represented person. A signature can be any name, word, or mark used in place of a written signature [3–401]. As discussed earlier, the capacity in which a person signs an instrument determines his liability on the instrument.

Signature by an Authorized Agent

An authorized agent can sign a negotiable instrument. If Sandra Smith authorized her attorney to sign checks as her agent, then she is liable on any checks properly signed by the attorney as her agent. All negotiable instruments signed by corporations have to be signed by an agent of the corporation who is authorized to sign negotiable instruments.

If a person purporting to act as a representative signs an instrument by signing either the name of the represented person or the name of the signer, that signature binds the represented person to the same extent she would be bound if the signature were on a simple contract. If the represented person has authorized the signature of the representative, it is the "authorized signature of the represented person" and the represented person is liable on the instrument, whether or not identified in the instrument. This brings the Code in line with the general principle of agency law that binds an undisclosed principal on a simple contract. For example, if Principal authorizes Agent to borrow money on Principal's behalf and Agent signs her name to a note without disclosing that the signature was on behalf of Principal, Agent is liable on the note. In addition, if the person entitled to enforce the note can show that Principal authorized Agent to sign on his behalf, then Principal is liable on the note as well.

When a representative signs an authorized signature to an instrument, then the representative is not bound provided the signature shows "unambiguously" that the signature was made on behalf of the represented person who is named in the instrument [3–402(b)(1)]. For example, if a note is signed "XYZ, Inc. by Flanigan, Treasurer," Flanigan is not liable on the instrument in his own right but XYZ, Inc., is liable.

If an authorized representative signs his name as the representative of a drawer of a check without noting his representative status but the check is payable from an account of the represented person who is identified on the check, the signer is not liable on the check as long as his signature was authorized [3–402(c)]. The rationale for this provision is that because most checks today identify the person on whose account the check is drawn, no one is deceived into thinking that the person signing the check is meant to be liable.

Except for the check situation noted above, a representative is personally liable to a holder in due course that took the instrument without notice that the representative was not intended to be liable if (1) the form of the signature does not show unambiguously that the signature was made in a representative capacity or (2) the instrument does not identify the represented person. As to persons other than a holder in due course without notice of the representative nature of the signature, the representative is liable *unless* she can prove that the original parties did not intend her to be liable on the instrument [3–402(b)(2)].

Thus, if an agent or a representative signs a negotiable instrument on behalf of someone else, the agent should indicate clearly that he is signing as the representative of someone else. For example, Kim Darby, the president of Swimwear, Inc., is authorized to sign negotiable instruments for the company. If Swimwear borrows money from the bank and the bank asks her to sign a 90-day promissory note, Darby should sign it either "Swimwear, Inc., by Kim Darby, President" or "Kim Darby, President, for Swimwear, Inc." If Kim Darby signed the promissory note merely "Kim

Darby," she could be personally liable on the note. Similarly, if Clara Carson authorizes Arthur Anderson, an attorney, to sign checks for her, Anderson should make sure either that the checks identify Clara Carson as the account involved or should sign them "Clara Carson by Arthur Anderson, Agent." Otherwise, he risks being personally liable on them.

The liability of an authorized representative is discussed in the case that follows, *Mestco Distributors, Inc., v. Stamps.*

Mestco Distributors, Inc. v. Stamps *17 U.C.C. Rep.2d 174 (Tex.Ct. App. 1992)*

On seven separate occasions between May 1985 and December 1986, Mestco Distributors, Inc., loaned funds for business operations to Innovative Timber Specialties, Inc. (ITS), in which Mestco was a shareholder. The seven notes were signed as follows:

Promissory note 1—May 17, 1985, signed:
I.T.S. Inc.
by Ralph W. Stamps
Secty. Treas

Promissory note 2—June 25, 1985, signed:
Ralph W. Stamps

Promissory note 3—December 23, 1985, signed:
Innovative Timber Specialties Inc.
by Secty-Treas
Ralph W. Stamps

Promissory note 4—July 16, 1986, signed:
Ralph W. Stamps
Secty-Treas. I.T.S. Inc.

Promissory note 5—August 6, 1986, signed:
Innovative Timber Specialties Inc.
by Ralph W. Stamps

Promissory note 6—December 9, 1986, signed:
Ralph W. Stamps

Promissory note 7—December 31, 1986, signed:
Ralph W. Stamps
Innovative Timber Specialties Inc.
by: Secretary

The notes were not paid and Mestco sued Stamps, seeking to hold him personally liable for paying the seven notes. The trial court held in favor of Stamps and Mestco appealed.

Ellis, Judge Mestco argues that none of the promissory notes meet the requirements of section 3–403, and, therefore, Stamps was required to present evidence to overcome the presumption of individual liability as to all seven notes. We disagree.

Section 3–403(c) provides that a signature is established as being in a representative capacity *if it has the name of an organization preceded or followed by an authorized individual's name and office.* Four of the promissory notes meet these requirements (May 17, 1985; December 23, 1985; July 16, 1986; December 31, 1986). Clearly, these notes listed the names of the organization followed or preceded by Ralph Stamps's name and his office, designated as Secretary or Secty-Treas. Accordingly, there was evidence to support the trial court's finding that these four notes were executed in a representative capacity.

Three of the promissory notes clearly did not meet the requirements of section 3–403. Two notes were signed solely with Ralph Stamps's name and one note was signed "Innovative Timber Specialties Inc. by Ralph W. Stamps." As Mestco correctly

points out, if a signature is not shown to be in a representative capacity pursuant to section 3–403(c), the signer/maker, in a dispute between the immediate parties, has the burden to offer proof that he signed only in a representative capacity.

Although there is no evidence in the present case that Stamps actually told Mestco that he was signing the notes in a representative capacity, there was evidence of prior dealings between the parties as well as circumstances that communicated to Mestco that Stamps was executing the notes in a representative capacity.

The evidence before the court was as follows. Henry Mest was president and owner of Mestco Distributors, Inc. He was in business for 30 years in La Marque, Texas. Stamps and Mest knew each other for more than 30 years. Stamps approached Mest regarding investing in ITS after its original formation in 1982. They each became shareholders in ITS, neither being majority shareholders. Both became officers and Mest became a director. The chief operating officer and president resigned in 1985 and Mest took over. In 1985 Mest went to ITS's job site once or twice a week and was fully aware of what was going on with the business.

Stamps managed ITS from 1985 to 1986 per an agreement with Mest. Stamps would also let Mestco know of ITS's financial need. Mestco and Stamps both from time to time loaned money to ITS as needed. In 1986, both Mestco and Stamps repaid in equal amounts a loan made to ITS in the amount of $150,000. Mestco received at least seven notes in addition to the notes the subject of this suit. These notes were later written off by Mestco as bad debts. The seven promissory notes involved in the present suit were prepared at Mest's direction. The payment of each of the notes was a promise of ITS's named in the subject notes and there was no understanding that the loans represented loans to Stamps individually. The funding of the notes was to ITS directly and the funds were often deposited to ITS's bank account by Mestco's accountant. Also the notes were carried on Mestco's books as notes receivable from ITS and not as notes receivable from Stamps. Further, the notes were charged-off by Mestco in 1986 and 1987.

Accordingly, there was sufficient evidence showing that Mestco knew the notes were executed in a representative capacity and not by Stamps individually, and past dealings supported that Stamps executed in a representative capacity.

Judgment for Stamps affirmed.

Note: Although this case was decided under the original version of Article 3, the same result would likely be reached under Revised Article 3.

Unauthorized Signature

If someone signs a person's name to a negotiable instrument without that person's authorization or approval, the signature does not bind the person whose name appears. However, the signature is effective as the signature of the unauthorized signer in favor of any person who in good faith pays the instrument or takes it for value [3–403(a)]. For example, if Tom Thorne steals Ben Brown's checkbook and signs Brown's name to a check, Brown is not liable on the check because Brown had not authorized Thorne to sign Brown's name. Thorne can be liable on the check, however, because he did sign it, even though he did not sign it in his own name. Thorne's forgery of Brown's signature operates as Thorne's signature. Thus, if Thorne cashed the check at the bank, Thorne would be liable to it or if he negotiated it to a store for value, he would be liable to the store to make it good.

Even though a signature is not "authorized" when it is put on an instrument initially, it can be ratified later by the person represented [3–403(a)]. It also should be noted that if more than one person must sign to constitute the authorized signature of an organization, the signature of the organization is unauthorized if one of the required signatures is lacking [3–403(b)]. Corporate and other accounts sometimes require multiple signatures as a matter of maintaining sound financial control.

Contractual Liability in Operation

To bring the contractual liability of the various parties to a negotiable instrument into play, it generally is necessary that the instrument be *presented for payment.* In addition, to hold the parties that are secondarily liable

on the instrument to their contractual liability, it generally is necessary that the instrument be *presented for payment* and *dishonored.*

Presentment of a Note

The maker of a note is primarily liable to pay it when it is due. Normally, the holder takes the note to the maker at the time it is due and asks the maker to pay it. Sometimes, the note may provide for payment to be made at a bank or the maker sends the payment to the holder at the due date. The party to whom the holder presents the instrument, without dishonoring the instrument, may (1) require the exhibition of the instrument, (2) ask for reasonable identification of the person making presentment, (3) ask for evidence of his authority to make it if he is making it for another person, or (4) return the instrument for lack of any necessary indorsement, (5) ask that a receipt be signed for any payment made, and (6) surrender the instrument if full payment is made [3–501].

Dishonor of a note occurs if the maker does not pay the amount due when: (1) it is presented in the case of (*a*) a demand note or (*b*) a note payable at or through a bank on a definite date that is presented on or after that date, or (2) if it is not paid on the date payable in the case of a note payable on a definite date but not payable at or through a bank [3–502]. If the maker or payor dishonors the note, the holder can seek payment from any persons who indorsed the note before the holder took it. The basis for going after the indorsers is that they are secondarily liable. To hold the indorsers to their contractual obligation, the holder must give them notice of the dishonor. The notice can be either written or oral [3–503].

For example, Susan Strong borrows $1,000 from Jack Jones and gives him a promissory note for $1,000 at 9 percent annual interest payable in 90 days. Jones indorses the note "Pay to the order of Ralph Smith" and negotiates the note to Ralph Smith. At the end of the 90 days, Smith takes the note to Strong and presents it for payment. If Strong pays Smith the $1,000 and accrued interest, she can have Smith mark it "paid" and give it back to her. If Strong does not pay the note to Smith when he presents it for payment, then she has dishonored the note. Smith should give notice of the dishonor to Jones and advise him that he intends to hold Jones secondarily liable on his indorsement. Smith may collect payment of the note from Jones. Jones, after making the note good to Smith, can try to collect the note from Strong on the ground that she defaulted on the contract she made as maker of the note. Of course, Smith also could sue Strong on the basis of her maker's obligation.

Presentment of a Check or a Draft

The holder should present a check or draft to the drawee. The presentment can be either for payment or for acceptance (certification) of the check or draft. Under Revised Article 3, the presentment may be made by any commercially reasonable means, including a written, oral, or electronic communication [3–501]. The drawee is not obligated on a check or draft unless it accepts (certifies) it [3–408]. An acceptance of a draft is the drawee's signed commitment to honor the draft as presented. The acceptance must be written on the draft, and it may consist of the drawee's signature alone [3–409].

A drawer who writes a check issues an order to the drawee to pay a certain amount out of the drawer's account to the payee (or to someone authorized by the payee). This order is not an assignment of the funds in the drawer's account [3–408]. The drawee bank does not have an obligation to the payee to pay the check unless it certifies the check. However, the drawee bank usually does have a separate contractual obligation (apart from Article 3) to the drawer to pay any properly payable checks for which funds are available in the drawer's account.

For example, Janet Payne has $100 in a checking account at First National Bank and writes a check for $10 drawn on First National and payable to Ralph Smith. The writing of the check is the issuance of an order by Payne to First National to pay $10 from her account to Smith or to whomever Smith requests it to be paid. First National owes no obligation to Smith to pay the $10 unless it has certified the check. However, if Smith presents the check for payment and First National refuses to pay it even though there are sufficient funds in Payne's account, then First National is liable to Payne for breaching its contractual obligation to her to pay items properly payable from existing funds in her account. Chapter 33, Checks and Documents of Title, discusses the liability of a bank for wrongful dishonor of checks in more detail.

If the drawee bank does not pay or certify a check when it is properly presented for payment or acceptance (certification), the drawee bank has dishonored the check [3–502]. Similarly, if a draft is not paid on the date it is due (or accepted by the drawee on the due

date for acceptance), it has been dishonored. The holder of the draft or check then can proceed against either the drawer or any indorsers on their liability. To do so, the holder must give them notice of the dishonor [3–503]. Notice of dishonor, like presentment, can be by any commercially reasonable means, including oral, written, or electronic communication. Under certain circumstances, set out in section 3–504, presentment or notice of dishonor may be excused.

Suppose Matthews draws a check for $100 on her account at a bank payable to the order of Williams. Williams indorses the check "Pay to the order of Clark, Williams" and negotiates it to Clark. When Clark takes the check to the bank, it refuses to pay the check because there are insufficient funds in Matthews's account to cover the check. The check has been presented and dishonored. Clark has two options: He can proceed against Williams on Williams's secondary liability as an indorser (because by putting an unqualified indorsement on the check, Williams is obligated to make the check good if it was not honored by the drawee). Or, he can proceed against Matthews on Matthews's obligation as drawer because in drawing the check, Matthews must pay any person entitled to enforce the check if it is dishonored. Because Clark dealt with Williams, Clark is probably more likely to return the check to Williams for payment. Williams then has to go against Matthews on Matthews's liability as drawer.

Time of Presentment

If an instrument is payable at a definite time, the holder should present it for payment on the due date. In the case of a demand instrument, the nature of the instrument, trade or bank usage, and the facts of the particular case determine a reasonable time for presentment for acceptance or payment. In a farming community, for example, a reasonable time to present a promissory note that is payable on demand may be six months or within a short time after the crops are ready for sale, because the holder commonly expects payment from the proceeds of the crops.

Warranty Liability

Whether or not a person signs a negotiable instrument, a person who transfers such an instrument or presents it for payment or acceptance may incur liability on the basis of certain implied warranties. These warranties are (1) **transfer warranties,** which persons who transfer negotiable instruments make to their transferees; and (2) **presentment warranties,** which persons who present negotiable instruments for payment or acceptance (certification) make to those who pay or accept.

Transfer Warranties

A person who transfers a negotiable instrument to someone else and for consideration makes five warranties to his immediate transferee. If the transfer is by indorsement, the transferor makes these warranties to all subsequent transferees. The five transfer warranties are:

1. The warrantor is a person entitled to enforce the instrument. (In essence the transferor warrants that there are no unauthorized or missing indorsements that prevent the transferor from making the transferee a person entitled to enforce the instrument.)

2. All signatures on the instrument are authentic or authorized.

3. The instrument has not been altered.

4. The instrument is not subject to a defense or a claim in recoupment that any party can assert against the warrantor.

5. The warrantor has no knowledge of any insolvency proceedings commenced with respect to the maker or acceptor or, in the case of an unaccepted draft, the drawer [3–416(a)]. Note that this is not a warranty against difficulty in collection or insolvency—the warranty stops with the warrantor's knowledge.

Revised Article 3 provides that in the event of a breach of a transfer warranty, a beneficiary of the transfer warranties who took the instrument in good faith may recover from the warrantor an amount equal to the loss suffered as a result of the breach. However, the damages recoverable may not be more than the amount of the instrument plus expenses and loss of interest incurred as a result of the breach [3–416(b)].

Transferors of instruments other than checks may disclaim the transfer warranties. Unless the warrantor receives notice of a claim for breach of warranty within 30 days after the claimant has reason to know of the breach and the identity of the warrantor, the delay in giving notice of the claim may discharge the warrantor's liability to the extent of any loss the warrantor

Concept Review

Transfer Warranties

The five transfer warranties made by a person who transfers a negotiable instrument to someone else for consideration are:

1. The warrantor is entitled to enforce the instrument.
2. All signatures on the instrument are authentic or authorized.
3. The instrument has not been altered.
4. The instrument is not subject to a defense or a claim in recoupment that any party can assert against the warrantor.
5. The warrantor has no knowledge of any insolvency proceedings commenced with respect to the maker or acceptor or, in the case of an unaccepted draft, the drawer.

Who	What Warranties	To Whom
Nonindorsing Transferor	Makes all five transfer warranties	To his immediate transferee only
Indorsing Transferor	Makes all five transfer warranties	To his immediate transferee and all subsequent transferees

suffers from the delay, such as the opportunity to proceed against the transferor [3–416(c)].

Although contractual liability often furnishes a sufficient basis for suing a transferor when the party primarily obligated does not pay, warranties are still important. First, they apply even when the transferor did not indorse. Second, unlike contractual liability, they do not depend on presentment, dishonor, and notice, but may be utilized before presentment has been made or after the time for giving notice has expired. Third, a holder may find it easier to return the instrument to a transferor on the ground of breach of warranty than to prove her status as a holder in due course against a maker or drawer.

Presentment Warranties

Persons who present negotiable instruments for payment or drafts for acceptance also make warranties, but their warranties differ from those transferors make. If an unaccepted draft (such as a check) is presented to the drawee for payment or acceptance and the drawee pays or accepts the draft, then the person obtaining payment or acceptance warrants to the drawee making payment or accepting the draft in good faith that:

1. The warrantor is, or was, at the time the warrantor transferred the draft, a person entitled to enforce the draft or authorized to obtain payment or acceptance of the draft on behalf of a person entitled to enforce the draft.

2. The draft has not been altered.

3. The warrantor has no knowledge that the signature of the drawer of the draft has not been authorized [3–417(a)].

These warranties also are made by any prior transferor of the instrument at the time the person transfers the instrument; the warranties run to the drawee who makes payment or accepts the draft in good faith. Such a drawee would include a drawee bank paying a check presented to it for payment directly or through the bank collection process.

The effect of the third presentment warranty is to leave with the drawee the risk that the drawer's signature is unauthorized, unless the person presenting the draft for payment, or a prior transferor, had knowledge of any lack of authorization.

A drawee who makes payment may recover as damages for any breach of a presentment warranty an amount equal to the amount paid by the drawee less the amount the drawee received or is entitled to receive from the drawer because of the payment. In addition, the drawee is entitled to compensation for expenses and loss of interest resulting from the breach

[3–417(b)]. The drawee's right to recover damages for breach of warranty is not affected by any failure on the part of the drawee to exercise ordinary care in making payment.

If a drawee asserts a claim for breach of a presentment warranty based on an unauthorized indorsement of the draft or an alteration of the draft, the warrantor may defend by showing that the indorsement is effective under the *impostor* or *fictitious payee* rules (discussed later in this chapter) or that the drawer's negligence precludes him from asserting against the drawee the unauthorized indorsement or alteration (also discussed below) [3–417(c)].

If (1) a *dishonored draft* is presented for payment to the drawer or an indorser or (2) any other instrument (such as a note) is presented for payment to a party obligated to pay the instrument and the presenter receives payment, the presenter makes the following presentment warranty:

> The person obtaining payment is a person entitled to enforce the instrument or authorized to obtain payment on behalf of a person entitled to enforce the instrument [3–417(d)].

On breach of this warranty, the person making the payment may recover from the warrantor an amount equal to the amount paid plus expenses and loss of interest resulting from the breach.

With respect to checks, the party presenting the check for payment cannot disclaim the presentment warranties [3–417(e)]. Unless the payor or drawee provides notice of a claim for breach of a presentment warranty to the warrantor within 30 days after the claimant has reason to know of the breach and the identity of the warrantor, the warrantor is discharged to the extent of any loss caused by the delay in giving notice of the claim of breach.

Payment or Acceptance by Mistake

A longstanding general rule of negotiable instruments law is that payment or acceptance is final in favor of a holder in due course or payee who changes his position in reliance on the payment or acceptance. Revised Article 3 retains this concept by making payment final in favor of a person who took the instrument in good faith and for value. However, payment is not final—and may be recovered from—a person who does not meet these criteria where the drawee acted on the mistaken belief that (1) payment of a draft or check has not been stopped, and (2) the signature of the purported drawer of the draft was authorized [3–418(a)]. In some jurisdictions, the drawee's mistaken belief that the account held available funds also could serve as a basis for recovery of the payment [3–418(b)].

As a result, this means that if the drawee bank mistakenly paid a check over a stop-payment order, paid a check with a forged or unauthorized drawer's signature on it, or paid despite the lack of sufficient funds in the drawer's account to cover the check, the bank cannot recover if it paid the check to a presenter who had taken the instrument in good faith and for

Concept Review

Presentment Warranties

If an unaccepted draft (such as a check) is presented for payment or acceptance and the drawee pays or accepts the draft, then the person obtaining payment or acceptance and prior transferors warrant to the drawee:

1. The warrantor is a person entitled to enforce payment or authorized to obtain payment or acceptance on behalf of a person entitled to enforce the draft.
2. The draft has not been altered.
3. The warrantor has no knowledge that the signature of the drawer of the draft has not been authorized.

If (*a*) a dishonored draft is presented for payment to the drawer or indorser or (*b*) any other instrument (such as a note) is presented for payment to a party obligated to pay the instrument and the presenter receives payment, the presenter (as well as a prior transferor of the instrument) makes the following warranty to the person making payment in good faith:

> The person obtaining payment is a person entitled to enforce the instrument or authorized to obtain payment on behalf of a person entitled to enforce the instrument.

value. In that case, the drawee bank would have to pursue someone else, such as the forger or unauthorized signer, or seller whose goods proved to be defective. On the other hand, if the presenter had not taken in good faith or for value, the bank could, in these enumerated instances, recover from the presenter the payment it made by mistake.

The *Fergang v. Morgan Guaranty* case, which follows, illustrates the operation of presentment and transfer warranties.

Fergang v. Morgan Guaranty Trust Co. of New York

665 N.Y.S. 2d 785 (New York Sup. Ct. 1997)

Melvin Fergang drew a check on his account at Morgan Guaranty Trust in the amount of $101,000 and payable to Ronald Burk. Burk was selling his home to Fergang's daughter and the check apparently was intended to facilitate that transaction. The check containing a forged indorsement in Burk's name was presented to and paid by Chemical Bank. Morgan Guaranty Trust settled with Chemical Bank and charged the item against Fergang's account. The identity of the forger was unclear, but the case involved an allegation that Fergang's daughter had received the proceeds of the check.

Fergang brought suit against Morgan Guaranty Trust seeking to have his account recredited because the check had been paid based on a forged indorsement of the payee. Morgan Guaranty Trust in turn commenced a third-party action against Chemical Bank for its violation of transfer and presentment warranties.

Phelan, Justice The relationship between the bank and its depositor being that of debtor and creditor, the bank cannot charge an account of the depositor with moneys paid out without authority. There is a high standard of contractual responsibility imposed on banks in paying money chargeable against their depositors' accounts. A bank must, in paying out a deposit, comply with its agreement with the depositor; and in the absence either of prior or subsequent negligence or misleading conduct on the part of the depositor, the bank cannot charge him with any payments except such as are made in conformity with his genuine orders. Payments otherwise made cannot be charged against the depositor regardless of the care exercised and the precaution taken by the bank. Indeed, it is settled that a depositor-drawer of a check on which the payee's indorsement is forged may prevent a drawee bank which pays the check from charging the payment to his account, or may require a bank so charging the account to recredit it. However, as mentioned above, a depositor who has been negligent may lose such right of recovery. UCC section 3–406.

UCC 4–401 permits a bank to charge a customer's account only on items that are "properly payable." A check which has been cashed on the forged indorsement of the payee is *not* "properly payable" under the Code. A forged endorsement operates as an "unauthorized" signature [UCC 1–201(43)] and such is wholly inoperative as that of the person whose name is signed [UCC 3–404(1)]. A drawee bank that charged its customer's account on such a check is liable to its customer for the full amount of the check.

Chemical, joined by Morgan, claims that since the check was intended as a loan or gift to his daughter, which was achieved, Fergang suffered no loss and hence has no valid claim against Morgan. This claim lacks merit. Whether Fergang intended a gift or loan to his daughter is irrelevant. Fergang did not make the check payable to his daughter but rather to Ronald Burk. Since Burk never received the proceeds, Fergang's intentions that the check proceeds go to Burk in furtherance of his daughter's purchase of Burk's house were not met. Indeed, Fergang's daughter cannot be found to have received either a gift or loan for use as intended by Fergang.

Fergang suffered a loss. A drawer suffers a loss when the true payee never actually received the proceeds of the original certified check for the purpose intended by the drawer.

A drawee bank remains answerable to the drawer for the amount of a check paid upon a forged indorsement of the payee's name. Fergang has established his cause of action as a matter of law based upon unrefuted facts and is entitled to summary judgment. Therefore, this court hereby grants summary judgment to Fergang against Morgan for the face

amount of the check. Morgan, as drawee, is liable to Fergang for the funds paid from his account based upon the fact the payee's indorsement was forged.

Under well-established principles of law, the risk of loss on a forged indorsement falls upon Chemical, the first collecting bank in the transaction and the bank best positioned to discover the forgery. Chemical breached its warranty that it had good title to the item under UCC 4–207(1)(a) when it transferred and presented the forged check to Morgan; and Chemical's liability is absolute. Since the check had a forged indorsement, Chemical neither had good title or other authorization to obtain payment or acceptance on behalf of one who has good title, because a forger does not have good title. Therefore, Chemical, the collecting bank, breached the warranty of good title when it presented the check with a forged indorsement to the payer bank. Thus, Morgan is entitled to recover against Chemical on breach of warranty which arose under UCC 4–207(1) which, in turn, includes recovery of its attorney's fees incurred as a result of said breach pursuant to UCC 4–207(3).

In so holding, the court notes that originally, Chemical denied any basis for indemnification. Thus, it is particularly fitting that such collecting bank be liable for attorney's fees where the payor bank, as here, is forced to litigate the collecting bank's obligation to indemnify despite the collecting bank's clear breach of warranty.

Judgement in favor of Fergang against Morgan Guaranty Trust and in favor of Morgan Guaranty Trust against Chemical Bank.

Operation of Warranties

Following are three scenarios that show how the transfer and presentment warranties shift the liability back to a wrongdoer or to the person who dealt immediately with a wrongdoer and thus was in the best position to avert the wrongdoing.

Scenario 1 Arthur makes a promissory note for $200 payable to the order of Betts. Carlson steals the note from Betts, indorses her name on the back, and gives it to Davidson in exchange for a television set. Davidson negotiates the note for value to Earle, who presents the note to Arthur for payment. Assume that Arthur refuses to pay the note because Betts has advised him that it has been stolen and that he is the person entitled to enforce the instrument. Earle then can proceed to recover the face amount of the note from Davidson on the grounds that as a transferor Davidson has warranted that he is a person entitled to enforce the note and that all signatures were authentic. Davidson, in turn, can proceed against Carlson on the same basis—if he can find Carlson. If he cannot, then Davidson must bear the loss caused by Carlson's wrongdoing. Davidson was in the best position to ascertain whether Carlson was the owner of the note and whether the indorsement of Betts was genuine. Of course, even though Arthur does not have to pay the note to Earle, Arthur remains liable for his underlying obligation to Betts.

Scenario 2 Anderson draws a check for $10 on her checking account at First Bank payable to the order of Brown. Brown cleverly raises the check to $110, indorses it, and negotiates it to Carroll. Carroll then presents the check for payment to First Bank, which pays her $110 and charges Anderson's account for $110. Anderson then asks the bank to recredit her account for the altered check, and it does so. The bank can proceed against Carroll for breach of the presentment warranty that the instrument had not been altered, which she made to the bank when she presented the check for payment. Carroll in turn can proceed against Brown for breach of her transfer warranty that the check had not been altered—if she can find her. Unless she was negligent in drawing the check, Article 3 limits Anderson's liability to $10 because her obligation is to pay the amount in the instrument at the time she issued it.

Scenario 3 Bates steals Albers's checkbook and forges Albers's signature to a check for $100 payable to "cash," which he uses to buy $100 worth of groceries from a grocer. The grocer presents the check to Albers's bank. The bank pays the amount of the check to the grocer and charges Albers's account. Albers then demands that the bank recredit his account. The bank can recover against the grocer only if the grocer knew that Albers's signature had been forged. Otherwise, the bank must look for Bates. The bank had the responsibility to recognize the true signature of its

drawer, Albers, and not to pay the check that contained an unauthorized signature. The bank may be able to resist recrediting Albers's account if it can show he was negligent. The next section of this chapter discusses negligence.

Other Liability Rules

Normally, a bank may not charge against (debit from) the drawer's account a check that has a forged payee's indorsement. Similarly, a maker does not have to pay a note to the person who currently possesses the note if the payee's signature has been forged. If a check or note has been altered—for example, by raising the amount—the drawer or maker usually is liable only for the instrument in the amount for which he originally issued it. However, there are a number of exceptions to these usual rules. These exceptions, as well as liability based on conversion of an instrument, are discussed below.

Negligence

A person can be so negligent in writing or signing a negotiable instrument that she in effect invites an alteration or an unauthorized signature on it. If a person has been negligent, Article 3 precludes her from using the alteration or lack of authorization as a reason for not paying a person that in good faith pays the instrument or takes it for value [3–406]. For example, Mary Maker makes out a note for $10 in such a way that someone could alter it to read $10,000. Someone alters the note and negotiates it to Katherine Smith, who can qualify as a holder in due course. Smith can collect $10,000 from Maker. Maker's negligence precludes her from claiming alteration as a defense to paying it. Maker then has to find the person who "raised" her note and try to collect the $9,990 from him.

Where the person asserting the preclusion failed to exercise ordinary care in taking or paying the instrument and that failure substantially contributed to the loss, Article 3 allocates the loss between the two parties based on their comparative negligence [3–406(b)]. Thus, if a drawer was so negligent in drafting a check that he made it possible for the check to be altered and the bank that paid the check, in the exercise of ordinary care, should have noticed the alteration, then any loss occasioned by the fact that the person who made the alteration could not be found would be split by the drawer and the bank based on their comparative fault.

Impostor Rule

Article 3 establishes special rules for negotiable instruments made payable to impostors and fictitious persons. An impostor is a person who poses as someone else and convinces a drawer to make a check payable to the person being impersonated—or to an organization the person purports to be authorized to represent. When this happens, the Code makes any indorsement "substantially similar" to that of the named payee effective [3–404(a)]. Where the impostor has impersonated a person authorized to act for a payee, such as claiming to be Jack Jones, the president of Jones Enterprises, the impostor has the power to negotiate a check to Jones Enterprises.

An example of a situation involving the impostor rule would be the following: Arthur steals Paulsen's automobile and finds the certificate of title in the automobile. Then, representing himself as Paulsen, he sells the automobile to Berger Used Car Company. The car dealership draws its check payable to Paulsen for the agreed purchase price of the automobile and delivers the check to Arthur. Any person can negotiate the check by indorsing it in the name of Paulsen.

The rationale for the impostor rule is to put the responsibility for determining the true identity of the payee on the drawer or maker of a negotiable instrument. The drawer is in a better position to do this than some later holder of the check who may be entirely innocent. The impostor rule allows that later holder to have good title to the check by making the payee's signature valid although it is not the signature of the person with whom the drawer or maker thought he was dealing. It forces the drawer or maker to find the wrongdoer who tricked him into signing the negotiable instrument or to bear the loss himself.

Fictitious Payee Rule

A fictitious payee commonly arises in the following situation: A dishonest employee draws a check payable to someone who does not exist—or to a real person who does business with the employer but to whom the dishonest employee does not intend to send the check. If the employee has the authority to do so, he may sign the check himself. If he does not have such authority, he gives the check to his employer for signature and represents that the employer owes money to the person named as the payee of the check. The dishonest employee then takes the check, indorses it in the name of

the payee, presents it for payment, and pockets the money. The employee may be in a position to cover up the wrongdoing by intercepting the canceled checks or juggling the company's books.

The Code allows any indorsement in the name of the fictitious payee to be effective as the payee's indorsement in favor of any person that pays the instrument in good faith or takes it for value or for collection [3–404(b) and (c)]. For example, Anderson, an accountant in charge of accounts payable at Moore Corporation, prepares a false invoice naming Parks, Inc., a supplier of Moore Corporation, as having supplied Moore Corporation with goods, and draws a check payable to Parks, Inc., for the amount of the invoice. Anderson then presents the check to Temple, Treasurer of Moore Corporation, together with other checks with invoices attached. Temple signs all of these checks and returns them to Anderson for mailing. Anderson then withdraws the check payable to Parks, Inc. Anyone, including Anderson, can negotiate the check by indorsing it in the name of Parks, Inc.

The rationale for the fictitious payee rule is similar to that for the impostor rule. If someone has a dishonest employee or agent who is responsible for the forgery of some checks, the employer of the wrongdoer should bear the immediate loss of those checks rather than some other innocent party. In turn, the employer must locate the unfaithful employee or agent and try to recover from him.

The *C & N Contractors* case, which follows, illustrates the operation of the fictitious payee rule. As you read the case, determine how the contractor might have prevented the loss it suffered.

C & N Contractors v. Community Bancshares, Inc.

616 So.2d 1357 (Ala. Sup. Ct. 1994)

C & N Contractors is a construction and general contracting company in Gardendale, Alabama, that performs work at job sites throughout the southeastern United States. Mary Bivens was employed by C & N and performed general administrative duties for it.

Each Wednesday morning, the foreman at each job site telephoned Bivens and gave her the names of the employees working on the job site and the number of hours they had worked. Bivens then conveyed this information to Automatic Data Processing (ADP), whose offices are in Atlanta, Georgia. ADP prepared payroll checks based on the information given by Bivens and sent the checks to the offices of C & N in Gardendale for authorized signatures. Bivens was not an authorized signatory. After the checks were signed, Bivens sent the checks to the job site foreman for delivery to the employees.

In 1991, Bivens began conveying false information to ADP about employees and hours worked. On the basis of this false information, ADP prepared payroll checks payable to persons who were actual employees but had not worked the hours Bivens had indicated. After obtaining authorized signatures from C & N, Bivens intercepted the checks, forged the indorsement of the payees, and either cashed the checks at Community Bancshares or deposited them into her account at Community Bancshares, often presenting numerous checks at one time. Bivens continued this practice for almost a year, forging over 100 checks, until Jimmy Nation, vice president of C & N, discovered the embezzlement after noticing payroll checks payable to employees who had not recently performed services for the corporation. Bivens subsequently admitted forging the indorsements.

C & N brought suit against Community Bancshares for conversion when it cashed or accepted for deposit the numerous payroll checks containing forged payee indorsements. The trial court awarded summary judgment to Community Bancshares, and C & N Contractors appealed.

Almon, Justice With regard to the claim of conversion, the circuit court, in its summary judgment, held that under the "padded payroll" rule of section 3–405(1)(c) the forged indorsement of Bivens was effective and that, therefore, the loss caused by the forged indorsements fell on C & N. Section 3–405 provides in pertinent part:

> (1) An indorsement by any person in the name of a named payee is effective if:

> (c) An agent or employee of the maker or drawer has supplied him with the name of the payee intending the latter to have no interest in the instrument.

A forged indorsement is ordinarily ineffective to pass title to an instrument to a collecting bank or, generally, to authorize a drawee bank to pay the instrument. Section 3–405(1) creates a limited exception to these general rules.

Although section 3–405(1) does not explicitly impose liability on the drawer for the loss caused by the payment of a forged instrument, it has the general legal effect of shifting liability to the drawer from the party who took from the forger. By making effective an otherwise ineffective indorsement in the special circumstances provided in section 3–405 (1)(a), (b) and (c), section 3–405(1) generally precludes the liability of a drawee bank to a drawer under section 4–401 and the liability of a collecting bank to a drawee/payor bank under section 4–207.

Under section 4–207, each party who obtains payment from the drawee and each prior transferor warrants to the party who pays the check that he has good title to the instrument. This warranty is breached when the check has a forged or unauthorized signature. If in good faith and in accordance with commercially reasonable standards, a depositary or collecting bank accepts a check with a forged indorsement and then presents it for payment to the drawee/payor bank and if the drawee/payor bank pays the check, the drawee/payor bank is generally liable to the drawer under section 4–401 because it did not properly pay the check to the drawer's order.

After recrediting the drawer's account, the drawee/payor bank may seek indemnification against the collecting bank that made presentment under section 4–207, alleging breach of warranty of good title. Liability on the basis of breach of warranty travels backward through the chain of collection and is ultimately placed on the party who took the check from the forger. Thus, when a depositary bank accepts a forged instrument, it is generally liable for the amount of the check paid by the payor. The rationale for this system of allocating liability is that the party who took from the forger should be liable for the loss because that party is in the best position to prevent such fraud by checking the authenticity of indorsements.

Section 3–405(1) is a narrow exception to this general system of allocating loss. Because this section makes an indorsement on a forged signature effective, the drawee/payor bank is authorized to pay the instrument and is generally not liable, therefore, to the drawer under section 4–401. Further, because this section makes an indorsement on a forged signature effective, title to the instrument passes, as though there had been no forgery, and a collecting bank is entitled to payment from parties liable on the instrument. Thus, no conversion action by the drawer against either the drawee or the depositary bank will lie where section 3–405 controls. The official comment to section 3–405 states the rationale for allocating liability to the drawer in the circumstances covered by section 3–405(1):

> The principle followed is that the loss should fall upon the employer as a risk of his business enterprise rather than upon the subsequent holder or drawee. The reasons are that the employer is normally in a better position to prevent such forgeries by reasonable care in the supervision of his employees, or, if he is not, is at least in a better position to cover the loss by fidelity insurance; and that the cost of such insurance is properly a cost of the business rather than of the holder or drawee.

The circuit court held, and Community Bancshares argues, that under section 3–405(1)(c) Community Bancshares is not liable in the circumstances of this case because Bivens, an employee of C & N, supplied her employer with the names of the payees of the payroll checks with the intent that the payees would take no interest in them. Community Bancshares argues that this is a "padded payroll" case and that by virtue of section 3–405(1)(c) the loss falls on the drawer of the checks, C & N.

We conclude that the circuit court correctly held an action for conversion will not be because there is no genuine issue of material fact regarding the application of section 3–405(1)(c) in the circumstances of this case.

Judgment affirmed for Community Bancshares.

Note: This case was decided under the original version of Article 3. Although Revised Article 3 changes the wording of the "fictitious payee rule" and sets it out in section 3–404 of Revised Article 3, the result would be the same under the revision.

Comparative Negligence Rule Concerning Impostors and Fictitious Payees

Revised Article 3 also establishes a comparative negligence rule if (1) the person, in a situation covered by the impostor or fictitious payee rule, pays the instrument or takes it for value or collection without exercising ordinary care in paying or taking the instrument, and (2) that failure substantially contributes to the loss resulting from payment of the instrument. In these instances, the person bearing the loss may recover an allocable share of the loss from the person who did not exercise ordinary care [3–404(d)].

Fraudulent Indorsements by Employees

Revised Article 3 specifically addresses employer responsibility for fraudulent indorsements by employees and adopts the principle that the risk of loss for such indorsements by employees who are entrusted with responsibilities for instruments (primarily checks) should fall on the employer rather than on the bank that takes the check or pays it [3–405]. As to any person who in good faith pays an instrument or takes it for value, a fraudulent indorsement by a responsible employee is effective as the indorsement of the payee if it is made in the name of the payee or in a substantially similar name [3–405(b)]. If the person taking or paying the instrument failed to exercise ordinary care and that failure substantially contributed to loss resulting from the fraud, the comparative negligence doctrine guides the allocation of the loss.

A fraudulent indorsement includes a forged indorsement purporting to be that of the employer on an instrument payable to the employer; it also includes a forged indorsement purporting to be that of the payee of an instrument on which the employer is drawer or maker [3–405(a)(2)]. "Responsibility" with respect to instruments means the authority to (1) sign or indorse instruments on behalf of the employer, (2) process instruments received by the employer, (3) prepare or process instruments for issue in the name of the employer, (4) control the disposition of instruments to be issued in the name of the employer, or (5) otherwise act with respect to instruments in a responsible capacity. "Responsibility" does not cover those who simply have access to instruments as they are stored, transported, or that are in incoming or outgoing mail [3–405(a)(3)].

Conversion

Conversion of an instrument is an unauthorized assumption and exercise of ownership over it. A negotiable instrument can be converted in a number of ways. For example, it might be presented for payment or acceptance, and the person to whom it is presented might refuse to pay or accept and refuse to return it. An instrument also is converted if a person pays an instrument to a person not entitled to payment—for example, if it contains a forged indorsement.

Revised Article 3 modifies and then expands the previous treatment of conversion and provides that the law applicable to conversion of personal property applies to instruments. It also specifically provides that conversion occurs if (1) an instrument lacks an indorsement necessary for negotiation and (2) it is (*a*) purchased, (*b*) taken for collection, or (*c*) paid by a drawee to a person not entitled to payment. An action for conversion may not be brought by (1) the maker, drawer, or acceptor of the instrument or (2) a payee or an indorsee who did not receive delivery of the instrument either directly or through delivery to an agent or copayee [3–420].

Thus, if a bank pays a check that contains a forged indorsement, the bank has converted the check by wrongfully paying it. The bank then becomes liable for the face amount of the check to the person whose indorsement was forged [3–420]. For example, Arthur Able draws a check for $50 on his account at First Bank, payable to the order of Bernard Barker. Carol Collins steals the check, forges Barker's indorsement on it, and cashes it at First Bank. First Bank has converted Barker's property, because it had no right to pay the check without Barker's valid indorsement. First Bank must pay Barker $50, and then it can try to locate Collins to get the $50 back from her.

As is true under the original version of Article 3, if a check contains a restrictive indorsement (such as "for deposit" or "for collection") that shows a purpose of having the check collected for the benefit of a particular account, then any person who purchases the check or any depositary bank or payor bank that takes it for immediate payment converts the check unless the indorser receives the proceeds or the bank applies them consistent with the indorsement [3–206]. This principle is illustrated in *Kelly v. Central Bank & Trust.*

Kelly v. Central Bank & Trust Co. of Denver *794 P.2d 1037 (Colo. Ct. App. 1990)*

A number of investors, including Kelly, invested in a Cayman Islands entity, Tradecom, Ltd., a business involved in precious metals arbitrage. Their investments, in the form of cashier's checks, were payable to Tradecom and delivered to Arvey Down, Tradecom's agent. Down indorsed the checks and deposited them at the Central Bank & Trust Company of Denver into a checking account.

Most of the 934 checks, which were worth $11,227,473, were indorsed:

Tradecom Limited For deposit only 072 575

Other checks, totaling $576,850, were indorsed:

For deposit only 072 575

This included one check for $57,000, which apparently was deposited without indorsement and was indorsed by Central Bank's officer:

For deposit only 072 575 Tradecom
by Mark E. Thompson Commercial Loan officer

The referenced account, No. 072 575, was not that of Tradecom (which had no accounts at Central Bank) but rather was that of Equity Trading Corporation, a company owned and managed by Down, also purportedly an agent of Tradecom.

The investors subsequently lost most of their investments in Tradecom and they sued Central Bank for, among other things, conversion. They alleged that: (1) neither Down nor Equity Trading was an agent of Tradecom and that the check indorsements were unauthorized and ineffective; (2) over the course of 13 months, the bank negligently or recklessly permitted Down to divert the checks payable to Tradecom into Equity Trading's checking account; and (3) Central Bank did not follow reasonable commercial standards. Central Bank moved for summary judgment and in support of its motion submitted an executed power of attorney that indicated Down had the authority to indorse checks on behalf of Tradecom. The trial court awarded summary judgment to the Central Bank and the investors appealed.

Tursi, Judge Because there was no triable issue of fact concerning Down's agency and authority to indorse and deposit the cashier's checks, and because proof of a forged or unauthorized indorsement is a necessary predicate to Central Bank's liability, the investors could not prevail as to the 11 million dollars of checks that contained an indorsement which included the "Tradecom Limited" name. Consequently, with respect to the checks indorsed with Tradecom's name, we conclude that the trial court properly granted summary judgment for Central Bank.

The trial court erred, however, in granting Central Bank summary judgment on the $57,000 check indorsed by Central Bank's commercial loan officer. In order for Central Bank to have become a holder under this indorsement, and thus have obtained title, Central Bank would have had to have been authorized to provide Tradecom's indorsement under section 4–205(1). This, however, was impossible since Tradecom was not Central Bank's "customer." Consequently, this indorsement is unauthorized as a matter of law, and summary judgment should not have been ordered for Central Bank on this check.

The investors also contend that the trial court erred in granting summary judgment for Central Bank on the remaining $519,850 of cashier's checks lacking any signature and merely indorsed "For deposit only 072 575." We agree.

Under section 3–419(1)(c), a check is converted when it is paid on a forged indorsement. In this context, a collecting or paying bank "pays" a check when it credits its customer's account with the proceeds of a check collected from the drawee bank. If such a payment occurs on a check with no indorsement or a missing indorsement, it is the legal equivalent of payment on a forged indorsement.

The term "indorsement" is generally understood to mean the indorser's writing of his or her signature on the instrument or the affixing of the indorser's name or some designation identifying the indorser on the instrument. A check simply inscribed "For deposit only" to an account other than payee's account

and without the payee's signature is not an effective "indorsement." If the instrument is order paper and the depository bank does not, or cannot, supply the missing indorsement of its customer, the absence of the indorsement can be fatal to negotiation and transfer of title. One such situation is when the depository bank's customer and the payee are not the same person. In this case, the depository bank is unauthorized to, and cannot, supply the missing indorsement of the payee since the payee is not the bank's "customer" under section 4–205. In this situation, the depository bank does not become a holder of the checks and does not obtain good title to them. Payment of such proceeds to its depositor subjects the depository bank to liability for conversion.

In this case it was undisputed that Down, or someone in his employ, deposited $519,850 worth of cashier's checks at Central Bank bearing the simple inscription "For Deposit only 072 575." These checks, which bore no signature indorsement of the payee, Tradecom, or anyone else, were paid and credited to account 072 575. This was not an account of Tradecom, which was not a customer of Central Bank. Under these circumstances, Central Bank was not a holder of these checks by negotiation. It obtained no title to these checks. It is, consequently, subject to conversion liability under section 3–419(1)(c) for making payment on the equivalent of a forged indorsement.

Judgment for Central Bank reversed in part.

Note: Although this case was decided under original Article 3, the same result would be expected under Revised Article 3.

Discharge of Negotiable Instruments

Discharge of Liability

The obligation of a party to pay an instrument is discharged (1) if he meets the requirements set out in Revised Article 3 or (2) by any act or agreement that would discharge an obligation to pay money on a simple contract. Discharge of an obligation is not effective against a person who has the rights of a holder in due course of the instrument and took the instrument without notice of the discharge [3–601].

The most common ways that an obligor is discharged from his liability are:

1. Payment of the instrument.
2. Cancellation of the instrument.
3. Alteration of the instrument.
4. Modification of the principal's obligation that causes loss to a surety or impairs the collateral.
5. Unexcused delay in presentment or notice of dishonor with respect to a check (discussed earlier in this chapter).
6. Acceptance of a draft [3-414(c) or (d); 3-415(d)]; as noted earlier in the chapter, a drawer is discharged of liability of a draft that is accepted by a bank (e.g., if a check is certified by a bank) because at that point the holder is looking to the bank to make the instrument good.

Discharge by Payment

Generally, payment in full discharges liability on an instrument to the extent payment is (1) by or on behalf of a party obligated to pay the instrument and (2) to a person entitled to enforce the instrument. For example, Arthur makes a note of $100 payable to the order of Bryan. Bryan indorses the note "Pay to the order of my account no. 16154 at First Bank, Bryan." Bryan then gives the note to his employee, Clark, to take to the bank. Clark takes the note to Arthur, who pays Clark the $100. Clark then runs off with the money. Arthur is not discharged of his primary liability on the note because he did not make his payment consistent with the restrictive indorsement. To be discharged, Arthur has to pay the $100 into Bryan's account at First Bank.

To the extent of payment, the obligation of a party to pay the instrument is discharged even though payment is made with knowledge of a claim to the instrument by some other person. However, the obligation is not discharged if: (1) there is a claim enforceable against the person making payment and payment is

made with knowledge of the fact that payment is prohibited by an injunction or similar legal process, or (2) in the case of an instrument other than a cashier's, certified, or teller's check, the person making the payment had accepted from the person making the claim indemnity against loss for refusing to make payment to the person entitled to enforce payment. The obligation also is not discharged if he knows the instrument is a stolen instrument and pays someone he knows is in wrongful possession of the instrument [3–602].

Discharge by Cancellation

A person entitled to enforce a negotiable instrument may discharge the liability of the parties to the instrument by canceling or renouncing it. If the holder mutilates or destroys a negotiable instrument with the intent that it no longer evidences an obligation to pay money, the holder has canceled it [3–604]. For example, a grandfather lends $1,000 to his grandson for college expenses. The grandson gives his grandfather a promissory note for $1,000. If the grandfather later tears up the note with the intent that the grandson no longer owes him $1,000, the grandfather has canceled the note.

An accidental destruction or mutilation of a negotiable instrument is not a cancellation and does not discharge the parties to it. If an instrument is lost, mutilated accidentally, or destroyed, the person entitled to enforce it still can enforce the instrument. In such a case, the person must prove that the instrument existed and that she was its holder when it was lost, mutilated, or destroyed.

Altered Instruments; Discharge by Alteration

A person paying a fraudulently altered instrument, or taking it for value, in good faith and without notice of the alteration, may enforce the instrument (1) according to its original terms or (2) in the case of an incomplete instrument later completed in an unauthorized manner, according to its terms as completed [3–407(c)]. An alteration occurs if there is (1) an unauthorized change that modifies the obligation of a party to the instrument or (2) an unauthorized addition of words or numbers or other change to an incomplete instrument that changes the obligation of any party [3–407]. A change that does not affect the obligation of one of the parties, such as dotting an *i* or correcting the grammar, is not considered to be an alteration.

Two examples illustrate the situations in which Revised Article 3 allows fraudulently altered instruments to be enforced. First, assume the amount due on a note is fraudulently raised from $10 to $10,000. The contract of the maker has been changed: the maker promised to pay $10, but after the change has been made, he would be promising to pay much more. If the note is negotiated to or paid by a person who was without notice of the alteration, that person can enforce the note against the maker only according to its original terms. It would pursue the alterer or the person taking from the alterer for the balance on a presentment or transfer warranty [3–417; 3–416]. If the maker's negligence substantially contributed to the alteration, then the maker would be responsible for as much as the entire $10,000 [3–407(c); 3–406].

Second, assume Swanson draws a check payable to Frank's Nursery, leaving the amount blank. He gives it to his gardener with instructions to purchase some fertilizer at Frank's and to fill in the purchase price of the fertilizer when it is known. The gardener fills in the check for $100 and gives it to Frank's in exchange for the fertilizer ($7.25) and the difference in cash ($92.75). The gardener then leaves town with the cash. If Frank's had no knowledge of the unauthorized completion, it could enforce the check for $100 against Swanson. A similar situation is illustrated in *American Federal Bank, FSB v. Parker.*

American Federal Bank, FSB v Parker *392 SE.2d 798 (S.C. Ct. App. 1990)*

Thomas Kirkman was involved in the horse business and was a friend of John Roundtree, a loan officer for American Federal Bank. Kirkman and Roundtree conceived a business arrangement in which Kirkman would locate buyers for horses and the buyers could seek financing from American Federal. Roundtree gave Kirkman blank promissory notes and security agreements from American Federal. Kirkman was to locate the potential purchaser, take care of the paperwork, and bring the documents to the bank for approval of the purchaser's loan.

Kirkman entered into a purchase agreement with Gene Parker, a horse dealer, to copurchase for $35,000 a horse named Wills Hightime that Kirkman represented he owned. Parker signed the American Federal promissory note in blank and also executed in blank a security agreement that authorized the bank to disburse the funds to the seller of the collateral. Kirkman told Parker he would cosign the note and fill in the details of the transaction with the bank. While Kirkman did not cosign the note, he did complete it for $85,000 as opposed to $35,000. Kirkman took the note with Parker's signature to Roundtree at American Federal and received two checks from the bank payable to him in the amounts of $35,000 and $50,000. Kirkman took the $35,000 and gave it to the real owner of the horse. Parker then received the horse.

Parker began making payments to the bank and called on Kirkman to assist in making the payments pursuant to their agreement. However, Kirkman skipped town, taking the additional $50,000 with him. Parker repaid the $35,000 but refused to pay any more. He argued that he agreed to borrow only $35,000 and the other $50,000 was unauthorized by him. American Federal Bank filed suit to recover the balance due on the note. The trial court held in favor of the bank and Parker appealed.

Cureton, Judge Parker executed a promissory note in blank. Under the Uniform Commercial Code, the maker of a note agrees to pay the instrument according to its tenor at the time of engagement "or as completed pursuant to section 3–115 on incomplete instruments." Under section 3–115(2) if the completion of an instrument is unauthorized the rules as to material alteration apply. Under section 3–407(1)(b) the completion of an incomplete instrument otherwise than as authorized is considered an alteration. However, under section 3–407(3) a subsequent holder in due course may enforce an incomplete instrument as completed. Official comment 4 indicates that where blanks are filled or an incomplete instrument is otherwise completed, the loss is placed upon the party who left the instrument incomplete and the holder is permitted to enforce it according to its completed form.

We agree with the trial court that the bank was entitled to the directed verdicts. The responsibility for the situation rests with Parker. He and Kirkman negotiated their deal. Parker signed a blank promissory note. He relied upon Kirkman to cosign the note and fill it in for $35,000. Parker's negligence substantially contributed to the material alteration as a matter of law.

Parker argues that it was not reasonable commercial practice for American Federal to give Kirkman possession of blank promissory notes. After the fact, Parker argues the bank should have contacted him or checked to be sure everything was correct before disbursing the proceeds of the loan to Kirkman. There is no evidence in the record to establish the bank had any reason to inquire into the facial validity of the note. The note was complete when presented to the bank and there were no obvious alterations on it.

The record establishes American Federal took the note in good faith and without notice of any defense to it by Parker. American Federal gave value for the note when it disbursed the funds to Kirkman. As a holder in due course, American Federal may enforce the note against Parker as completed. Sections 3–302; 3–407(3).

Judgment for American Federal affirmed.

Note: Although this case was decided under the original version of Article 3, the same result would be reached under Revised Article 3 so long as the court found Kirkman's completion (alteration) to be fraudulent.

In any other case, a fraudulent alteration **discharges** any party whose obligation is affected by the alteration *unless* (1) the party assents or (2) is precluded from asserting the alteration (e.g. because of the party's negligence). Assume that Anderson signs a promissory note for $100 payable to Bond. Bond indorses the note "Pay to the order of Connolly, Bond" and negotiates it to Connolly. Connolly changes the $100 to read $100,000. Connolly's change is unauthorized and fraudulent. As a result, Anderson is discharged from her liability as maker of the note and Bond is discharged from her liability as indorser. Neither of them has to pay Connolly. The obligations of both Anderson and Bond were changed because the amount for which they are liable was altered.

No other alteration—that is, one that is not fraudulent—discharges any party and a holder may enforce the in-

strument according to its *original* terms. Thus, there would no discharge if a blank is filled in the honest belief that it is authorized or if a change is made, without any fraudulent intent, to give the maker on a note the benefit of a lower interest rate.

Discharge of Indorsers and Accommodation Parties

If a person entitled to enforce an instrument agrees, with or without consideration, to a material modification of the obligation of a party to the instrument, including an extension of the due date, then any accommodation party or indorser who has a right of recourse against the person whose obligation is modified is discharged *to the extent the modification causes a loss to the indorser or accommodation party.* Similarly, if collateral secures the obligation of a party to an instrument and a person entitled to enforce the instrument impairs the value of the collateral, the obligation of the indorser or accommodation party having the right of recourse against the obligor is discharged to the extent of the impairment. These discharges are not effective unless the person agreeing to the modification or causing the impairment knows of the accommodation or has notice of it. Also, no discharge occurs if the obligor assented to the event or conduct, or if the obligor has waived the discharge [3–605].

For example, Frank goes to Credit Union to borrow $4,000 to purchase a used automobile. The credit union has Frank sign a promissory note and takes a security interest in the automobile (i.e., takes it as collateral for the loan). It also asks Frank's brother, Bob, to sign the note as an accommodation maker. Subsequently, Frank tells the credit union he wants to sell the automobile and it releases its security interest. Because release of the collateral adversely affects Bob's obligation as accommodation maker, he is discharged from his obligation as accommodation maker in the amount of the value of the automobile.

Ethical and Public Policy Concerns

1. Suppose you have taken a promissory note for $1,000 as payment for some carpentry work you did for a friend. You have some reason to believe that the maker is having some financial difficulty and may not be able to pay the note when it is due. You discuss the possible sale of the note to a local physician as an investment and she agrees to buy it. Would it be ethical for you to indorse the note with a qualified indorsement ("without recourse")?

2. In Problem case 10, a creditor made a mistake and returned a note marked "canceled" to the maker without collecting all of the interest due on it. Suppose instead that the maker/borrower realized that Crown Financial had made an error in not including in the subsequent note the interest due on the original note. Should the maker/borrower feel compelled by ethical considerations to pay the interest, even if not legally required to do so?

Problems and Problem Cases

1. Durbin bought some cattle through Woodrow, a livestock agent. In payment for the cattle, Durbin made three checks totaling $48,772 payable to Woodrow. When the checks were presented to the drawee bank for payment, the bank refused to pay the checks because Durbin did not have sufficient funds on deposit to cover them. The checks were returned unpaid to Woodrow by the drawee bank marked "Drawn on Uncollected Funds." Woodrow then brought suit against Durbin to collect the full amount of the checks. When these checks were dishonored by the drawee bank, did the payee have the right to hold the drawer of the checks liable for payment of them?

2. Frederick Dowie was the president and sole stockholder of Fred Dowie Enterprises, Inc., a catering company. He obtained the opportunity to operate the concession stands at the Living History Farms during the pope's visit to Des Moines, Iowa. With high expectations, Dowie ordered 325,000 hot dog buns from Colonial Baking Company. Before the buns were delivered, he presented to Colonial Baking a postdated check in the amount of $28,640. The check showed the name of the corporation and its address in the upper left-hand corner. The signature on the check read "Frederick J. Dowie," and there were no other words of explanation. Unfortunately, only 300 buns were sold. Following a dispute over the ownership and responsibility for the remaining buns, Dowie stopped payment on the check. Colonial Baking then sued Dowie in his personal capacity as signer of the check. Is Dowie personally liable for the check?

3. Gish operated a retail business under the name of Gish's General Store. He agreed to sell his business to Kenneth Smith and Barry Gill in exchange for two houses to be built for Gish by Smith and Gill. The transaction was to be consummated on completion of the houses. In the interim, Smith and Gill were to familiarize themselves with the business by assisting in its operation. However, without Gish's knowledge, Smith and Gill opened a checking account at Springhill Bank in the name of Gish's General Store. They then stole a number of checks from Gish's cash register, indorsed them with Gish's signature stamped "For deposit only, Gish's General Store," and deposited them to the account at Springfield Bank. Subsequently, Smith and Gill withdrew the money from the account and disappeared. Several of the checks were returned to Springfield Bank because the drawers had stopped payment on them. Springfield Bank then brought suit against Gish to recover the amount of the dishonored checks, claiming that he was liable as indorser of the checks because of the stamped indorsement. Was Gish liable as indorser of the dishonored checks?

4. First National Bank certified Smith's check in the amount of $29. After certification, Smith altered the check so that it read $2,900. He presented the check to a merchant in payment for goods. The merchant then submitted the check to the bank for payment. The bank refused, saying it had certified the instrument for only $29. Can the merchant recover the $2,900 from the bank?

5. A check was drawn on First National Bank and made payable to Howard. It came into the possession of Carson, who forged Howard's indorsement and cashed it at Merchant's Bank. Merchant's Bank then indorsed it and collected payment from First National. Assuming that Carson is nowhere to be found, who bears the loss caused by Carson's forgery?

6. Mrs. Gordon Neely hired Louise Bradshaw as the bookkeeper for a Midas Muffler shop the Neelys owned and operated as a corporation, J. Gordon Neely Enterprises, Inc. (Neely). Bradshaw's duties included preparing company checks for Mrs. Neely's signature and reconciling the checking account when the company received a bank statement and canceled checks each month. Bradshaw prepared several checks payable to herself and containing a large space to the left of the amount written on the designated line. When Mrs. Neely signed the checks, she was aware of the large gaps. Subsequently, Bradshaw altered the checks by adding a digit or two to the left of the original amount and then cashed them at American National Bank, the drawee bank. Several months later, the Neelys hired a new accountant, who discovered the altered checks. Neely brought suit against American National Bank to have its account recredited for the altered checks, claiming that American was liable for paying out on altered instruments. The bank contended that Neely's negligence substantially contributed to alterations of the instruments and thus Neely was precluded from asserting the alteration against the bank. Between Neely and American National Bank, who should bear the loss caused by Bradshaw's fraud?

7. Clarice Rich was employed by the New York City Board of Education as a clerk. It was her duty to prepare requisitions for checks to be issued by the board, to prepare the checks, to have them signed by authorized personnel, and to send the checks to the recipients. In some instances, however, she retained them. Also, on a number of occasions she prepared duplicate requisitions and checks, which, when signed, she likewise retained. She then forged the indorsement of the named payees on the checks she had retained and cashed the checks at Chemical Bank, where the Board of Education maintained its account. After the board discovered the forgeries, it demanded that Chemical Bank credit its account for the amount of the forged checks. Is Chemical Bank required to credit the board's account as requested?

8. DVD *Video case.* See "Cafeteria Conversion." Steve, an individual with a gambling and substance abuse problem, works in the accounts payable department of a company. He issues checks drawn on his employer's account that are made payable to suppliers who do business with his employer but who are not currently owed money. Then he forges the signature of the named payees, obtains payment of the checks from the drawee bank, and uses the funds to support his habits. Because Steve's responsibilities include reconciling the bank statements, his forgery scheme is not discovered for a considerable period of time. When it is discovered, is the drawee bank required to recredit the employer's account for the forged checks that were paid from it?

9. Stockton's housekeeper stole some of his checks, forged his name as drawer, and cashed them at Gristedes Supermarket where Stockton maintained check-cashing privileges. The checks were presented to

Stockton's bank and honored by it. Over the course of 18 months, the scheme netted the housekeeper in excess of $147,000 on approximately 285 forged checks. Stockton brought suit against Gristedes Supermarket for conversion, seeking to recover the value of the checks it accepted and for which it obtained payment from the drawee bank. Was Gristedes Supermarket liable to Stockton for conversion for accepting and obtaining payment of the stolen and forged checks?

10. Charles Peterson, a farmer and rancher, was indebted to Crown Financial Corporation on a $4,450,000 promissory note that was due on December 29, 1992. Shortly before the note was due, Crown sent Peterson a statement of interest due on the note ($499,658.85). Petersen paid the interest and executed a new note in the amount of $4,450,000 that was to mature in December 1995. The old note was then marked "canceled" and returned to Peterson. In 1995, Crown billed Peterson for $363,800 in interest that had been due on the first note but apparently not included in the statement. Peterson claimed that the interest had been forgiven and that he was not obligated to pay it. Was Peterson still obligated to pay interest on the note that had been returned to him marked "canceled"?

- *G. Warranties of Transferor of Document of Title*

For most people, a checking account provides the majority of their contact with negotiable instruments. This chapter focuses on the relationship between the drawer with a checking account and the drawer's bank, known as the drawee bank. It addresses such common questions as: What happens when a bank refuses to pay a check even though the depositor has sufficient funds in her account? Does the bank have the right to create an overdraft in a depositor's account by paying an otherwise properly payable check? What are the depositor's rights and the bank's obligation when the depositor stops payment on a check? What is the difference between a certified check and a cashier's check? What are the depositor's responsibilities when she receives her monthly statement and canceled checks? The second half of the chapter discusses the Code rules that apply to negotiable documents of title such as warehouse receipts and bills of lading.

The Drawer–Drawee Relationship

There are two sources that govern the relationship between the depositor and the drawee bank: the deposit agreement and Articles 3 and 4 of the Code. Article 4, which governs Bank Deposits and Collections, allows the depositor and drawee bank (which Article 4 calls the "payor bank") to vary Article 4's provisions with a few important exceptions. The deposit agreement cannot

disclaim the bank's responsibility for its own lack of good faith or failure to exercise ordinary care or limit the measure of damages for the lack or failure; however, the parties may determine by agreement the standards by which to measure the bank's responsibility so long as the standards are not manifestly unreasonable [4–103].

The deposit agreement establishes many important relationships between the depositor and drawee/payor bank. The first of these is their relationship as creditor and debtor, respectively, so that when a person deposits money in an account at the bank, the law no longer considers him the owner of the money. Instead, he is a creditor of the bank to the extent of his deposits and the bank becomes his debtor. Also, when the depositor deposits a check to a checking account, the bank also becomes his agent for collection of the check. The bank as the person's agent owes a duty to him to follow his reasonable instructions concerning payment of checks and other items from his account and a duty of ordinary care in collecting checks and other items deposited to the account.

Bank's Duty to Pay

When a bank receives a properly drawn and payable check on a person's account and there are sufficient funds to cover the check, the bank is under a duty to pay it. If the person has sufficient funds in the account and the bank refuses to pay, or dishonors, the check, the bank is liable for the actual damages proximately caused by its wrongful dishonor as well as consequential damages [4–402]. Actual damages may include charges imposed by retailers for returned checks as well as damages for arrest or prosecution of the customer. Consequential damages include injury to the depositor's credit rating that results from the dishonor.

For example, Donald Dodson writes a check for $1,500 to Ames Auto Sales in payment for a used car. At the time that Ames Auto presents the check for payment at Dodson's bank, First National Bank, Dodson has $1,800 in his account. However, a teller mistakenly refuses to pay the check and stamps it NSF (not sufficient funds). Ames Auto then goes to the local prosecutor and signs a complaint against Dodson for writing a bad check. As a result, Dodson is arrested. Dodson can recover from First National the damages that he sustained because the bank wrongfully dishonored his check, including the damages involved in his arrest, such as his attorney's fees.

In the *Buckley* case that follows, the bank is potentially liable for consequential damages sustained by the drawer because it wrongfully dishonored a customer's checks. In reading the case, you should keep in mind that Revised Article 3 deletes any reference to "mistake" by the bank as contained in the original provision; thus, the proof and measure of damages no longer turns on whether the bank can establish that it dishonored a check by "mistake."

Buckley v. Trenton Savings Fund Society *524 A.2d 886 (N.J. Super. Ct. 1987)*

Buckley maintained a checking account at the Trenton Savings Fund Society. In 1981, he separated from his wife, Linda, and entered into a consent agreement with her in which he agreed to pay her $150 per week for food and support for her and their children. On January 13, 1984, Buckley wrote a check for $150 and gave it to his wife. The next Saturday, she presented it for payment at one of Trenton Savings' branches but payment was refused even though Buckley had $900 in the account at the time. The following Monday, she took it to another branch where payment was refused again. The bank told Linda that it would not cash the check for her because Linda did not have an account at the bank. Subsequently, the bank agreed to cash checks for Linda, but on March 4, 1984, the bank again refused to pay one of Buckley's checks that she presented for payment. Linda was known to the bank because it held a mortgage on the home that she and Buckley jointly owned.

Shortly after Trenton Bank's failure to cash the two checks, Buckley received an irate call from Linda. He also received calls from his parents, his sister, and his best friend inquiring as to why he was not making the support payments. In addition, his children inquired "why daddy wouldn't give them food money." Buckley incurred severe emotional distress over the matter. He brought suit against Trenton Savings for wrongful dishonor and sought compensatory damages, as well as punitive damages, for the mental anguish he sustained. The trial court entered judgment for Buckley based on a jury verdict for $25,000 as compensatory damages, and the bank appealed.

Stern, Judge The bank contends that the jury should not have been permitted to award damages for emotional distress under the facts of this case. A bank's liability for wrongful dishonor of a customer's check is defined in section 4–402 of the Uniform Commercial Code:

> A payor bank is liable to its customer for damages proximately caused by the wrongful dishonor of an item. When the dishonor occurs through mistake, liability is limited to actual damages proved. If so proximately caused and proved, damages may include damages for an arrest or prosecution of the customer or other consequential damages. Whether any consequential damages are proximately caused by the wrongful dishonor is a question of fact to be determined in each case.

The UCC does not indicate the theory or basis for a bank's liability for wrongful dishonor. As explained in the UCC official comment to section 4–402, "The liability of the drawee for dishonor has sometimes been stated as one for breach of contract, sometimes as for negligence or other breach of a tort duty, and sometimes as for defamation." The drafters of the UCC did not intend to exclude the possibility of mental distress damages upon a wrongful dishonor by a bank. Since section 4–402 is silent on any restriction of damages when the dishonor is grounded on an action other than mistake, it implies that these damages are not precluded by the Code. Thus, out-of-state courts interpreting section 4–402 have concluded that mental suffering is compensable under this section.

The Legislature adopted section 4–402 as promulgated in the Uniform Commercial Code without substantive change. The section expressly limits recovery for "actual damages" when the dishonor results from "mistake" but otherwise expressly permits recovery of "consequential damages" proximately caused. As White and Summers explains:

> When wrongful dishonors occur not "through mistake" but willfully, the court may impose damages greater than "actual damages."

* * * * *

Might one argue that "actual damages" excludes recovery for mental distress? We think not. In the first place, the drafters went to great efforts to assure that customers can recover for arrest and prosecution. It is inconsistent to allow recovery for embarrassment and mental distress deriving from arrest and prosecution and to deny similar recovery in other cases. Moreover, cases under the predecessor to 4–402, the American Association Statute, held that "actual damages" includes damages for mental distress. Thus we believe . . . that the Code drafters intended to allow recovery for mental distress and other intangible injury.

In this case the judge's instructions failed to delineate the distinction between mistake and intentional mistake and an intentional breach or willful, wanton or reckless conduct. As a result, the matter must be remanded for a new trial and for a determination of damages based on appropriate instructions.

We preclude an award of punitive damages. Punitive damages are not generally recoverable for breach of contract, at least when the breach of contract does not also constitute a tort for which punitive damages are recoverable.

Reversed and remanded for new trial.

Note: This case was decided under the original version of Article 3, under which courts found that the Code appeared to allow a different measure of damages if the dishonor was other than by mistake. Revised Article 3 eliminates any distinction turning on mistake and provides that the depositor may recover actual damages, including consequential damages, proximately caused by a dishonor.

Bank's Right to Charge to Customer's Account

The drawee bank has the right to charge any properly payable check to the account of the customer or drawer. The bank has this right even though payment of the check creates an overdraft in the account [4–401]. If an account is overdrawn, the customer owes the bank the amount of the overdraft and the bank may take that amount out of the next deposit that the customer makes or from another account that the depositor maintains with the bank. Alternatively, the bank might seek to collect the amount directly from the customer. If there is more than one customer who can

draw from an account, only that customer—or those customers—who sign the item or who benefit from the proceeds of an overdraft are liable for the overdraft.

Stale Checks The bank does not owe a duty to its customer to pay any checks out of the account that are more than six months old. Such checks are called **stale checks**. However, the bank acting in good faith may pay a check that is more than six months old and charge it to the drawer-depositor's account [4–404].

Altered and Incomplete Items If the bank in good faith pays a check drawn by the drawer-depositor but subsequently altered, it may charge the customer's account with the amount of the check as originally drawn. Also, if an incomplete check of a customer gets into circulation, is completed, and is presented to the drawee bank for payment, and the bank pays the check, the bank can charge the amount as completed to the customer's account even though it knows that the check has been completed, unless it has notice that the completion was improper [4–401(d)]. The respective rights, obligations, and liabilities of drawee banks and their drawer-customers concerning forged and altered checks are discussed in more detail later in this chapter.

Limitations on Bank's Right or Duty Article 4 recognizes that the bank's right or duty to pay a check or to charge the depositor's account for the check (including exercising its right to set off an amount due to it by the depositor) may be terminated, suspended, or modified by the depositor's order to stop payment (which is discussed in the next section of this chapter). In addition, it may be stopped by events external to the relationship between the depositor and the bank. These external events include the filing of a bankruptcy petition by the depositor or by the depositor's creditors, and the garnishment of the account by a creditor of the depositor. The bank must receive the stop-payment order from its depositor or the notice of the bankruptcy filing or garnishment before the bank has certified the check, paid it in cash, settled with another bank for the amount of the item without a right to revoke the settlement, or otherwise become accountable for the amount of the check under Article 4, or the cut-off hour on the banking day after the check is received if the bank established a cut-off hour [4–303]. These restrictions on the bank's right or duty to pay are discussed in later sections of this chapter.

Postdated Checks Under original Articles 3 and 4, a postdated check was not properly payable by the drawee bank until the date on the check. The recent amendments to Article 4 change this. Under the revision, an otherwise properly payable postdated check that is presented for payment before the date on the check may be paid and charged to the customer's account *unless* the customer has given notice of it to the bank. The customer must give notice of the postdating in a way that describes the check with reasonable certainty. It is effective for the same time periods as Article 4 provides for stop-payment orders (discussed below). The customer must give notice to the bank at such time and in such a manner as to give the bank an opportunity to act on it before the bank takes any action with respect to paying the check. If the bank charges the customer's account for a postdated check before the date stated in the notice given to the bank, the bank is liable for damages for any loss that results. Such damages might include those associated with the dishonor of subsequent items [3–113(a); 4–401(c)].

There are a variety of reasons why a person might want to postdate a check. For example, a person might have a mortgage payment due on the first of the month at a bank located in another state. To make sure that the check arrives on time, the customer may send the payment by mail several days before the due date. However, if the person is depending on a deposit of her next monthly paycheck on the first of the month to cover the mortgage payment, she might postdate the check to the first of the following month. Under the original version of Articles 3 and 4, the bank could not properly pay the check until the first of the month. However, under the revisions it could be properly paid by the bank before that date if presented earlier. To avoid the risk that the bank would dishonor the check for insufficient funds if presented before the first, the customer should notify the drawee bank in a manner similar to that required for stop payment of checks.

Stop-Payment Order

A stop-payment order is a request made by a customer of a drawee bank instructing it not to pay or certify a specified check. As the drawer's agent in the payment of checks, the drawee bank must follow the reasonable orders of the drawer-customer about payments made on the drawer's behalf. Any person authorized to draw a check may stop payment of it. Thus, any

person authorized to sign a check on the account may stop payment even if she did not sign the check in question [4–403(a)].

To be effective, a payor bank must receive the stop-payment order in time to give the bank a reasonable opportunity to act on the order. This means that the bank must receive the stop-payment order before it has paid or certified the check. In addition, the stop-payment order must come soon enough to give the bank time to instruct its tellers and other employees that they should not pay or certify the check [4–403(a)]. The stop-payment order also must describe the check with "reasonable certainty" so as to provide the bank's employees the ability to recognize it as the check corresponding to the stop-payment order.

The customer may give a stop-payment order orally to the bank, but it is valid for only 14 days unless the customer confirms it in writing during that time. A written stop-payment order is valid for six months and the customer can extend it for an additional six months by giving the bank instructions in writing to continue the order [4–403(b)]. (See Figure 1.)

Sometimes the information given the bank by the customer concerning the check on which payment is to be stopped is incorrect. For example, there may be an error in the payee's name, the amount of the check, or the number of the check. The question then arises whether the customer has accorded the bank a reasonable opportunity to act on his request. A common issue is whether the stop-payment order must have the dollar amount correct to the penny. Banks often take the position that the stop-payment order must be correct to the penny because they program and rely on computers to focus on the customer's account number and the amount of the check in question to avoid paying an item subject to a stop-payment order. The amendments to Article 4 do not resolve this question. In the Official Comments, the drafters indicate that "in describing an item, the customer, in the absence of a contrary agreement, must meet the standard of what information allows the bank under the technology then existing to identify the check with reasonable certainty." In the Stop-Payment Order in Figure 1, the bank takes a more lenient approach than some: it asks for the range of number or low and high dollar of the check the customer does not want the bank to pay.

Bank's Liability for Payment after Stop-Payment Order

While a stop-payment order is in effect, the drawee bank is liable to the drawer of a check that it pays for any loss that the drawer suffers by reason of such payment. However, the drawer-customer has the burden of establishing the fact and amount of the loss. To show a loss, the drawer must establish that the drawee bank paid a person against whom the drawer had a valid defense to payment. To the extent that the drawer has

such a defense, he has suffered a loss due to the drawee's failure to honor the stop-payment order.

For example, Brown buys what is represented to be a new car from Foster Ford and gives Foster Ford his check for $16,280 drawn on First Bank. Brown then discovers that the car is in fact a used demonstrator model and calls First Bank, ordering it to stop payment on the check. If Foster Ford presents the check for payment the following day and First Bank pays the check despite the stop-payment order, Brown can require the bank to recredit his account. (The depositor-drawer bases her claim to recredit on the fact that the bank did not follow her final instruction—the instruction not to pay the check.) Brown had a valid defense of misrepresentation that she could have asserted against Foster Ford if it had sued her on the check. Foster Ford would have been required to sue on the check or on Brown's contractual obligation to pay for the car.

Assume, instead, that Foster Ford negotiated the check to Smith and that Smith qualified as a holder in due course. Then, if the bank paid the check to Smith over the stop-payment order, Brown would not be able to have her account recredited, because Brown would not be able to show that she sustained any loss. If the bank had refused to pay the check, so that Smith came against Brown on her drawer's liability, Brown could not use her personal defense of misrepresentation of the prior use of the car as a reason for not paying Smith. Brown's only recourse would be to pursue Foster Ford on her misrepresentation claim.

The bank may ask the customer to sign a form in which the bank tries to disclaim or limit its liability for the stop-payment order, or, as in Figure 1, for damages if it fails to obey the stop-payment order. As explained at the beginning of this chapter, the bank cannot disclaim its responsibility for its failure to act in good faith or to exercise ordinary care in paying a check over a stop-payment order [4–103].

If a bank pays a check after it has received a stop-payment order and has to reimburse its customer for the improperly paid check, it acquires all the rights of its customer against the person to whom it originally made payment, including rights arising from the transaction on which the check was based [4–407]. In the previous example involving Brown and Foster Ford, assume that Brown was able to have her account recredited because First Bank had paid the check to Foster Ford over her stop-payment order. Then, the bank would have any rights that Brown had against Foster Ford for the misrepresentation.

If a person stops payment on a check and the bank honors the stop-payment order, the person may still be liable to the holder of the check. Suppose Peters writes a check for $450 to Ace Auto Repair in payment for repairs to her automobile. While driving the car home, she concludes that the car was not repaired properly. She calls her bank and stops payment on the check. Ace Auto negotiated the check to Sam's Auto Parts, which took the check as a holder in due course. When Sam's takes the check to Peters's bank, the bank refuses to pay because of the stop-payment order. Sam's then comes after Peters on her drawer's liability. All Peters has is a personal defense against payment, which is not good against a holder in due course. So, Peters must pay Sam's the $450 and pursue her claim separately against Ace. If Ace were still the holder of the check, however, the situation would be different. Peters could use her personal defense concerning the faulty work against Ace to reduce or possibly to cancel her obligation to pay the check.

In the *First National Bank* case, which follows, the drawer was liable to a holder in due course of a check on which she had stopped payment.

First National Bank v. Jones *839 P.2d 535 (Kansas Ct. App. 1992)*

Brenda Jones, who did business as Country Kitchen, purchased some cookware from an itinerant salesman, giving him a check in the amount of $200 for the purchase price. The salesman cashed the check at the First National Bank before noon on May 22, the day of the sale. Jones later became concerned about the lack of documentation from the salesman, thinking that the cookware might be stolen, and placed a stop-payment order with her bank, The State Bank of Conway Springs, at 3:30 that afternoon. State Bank refused to honor the check when it was presented for payment through banking channels. First National Bank, claiming to be a holder in due course, then brought suit against Jones to recover the $200 value of the check. The trial court found in favor of the bank and Jones appealed.

Gernon, Presiding Judge As noted, the trial court concluded that First Bank was a holder in due course. UCC section 3–302 defined "holder in due course" and provided in part:

> (1) A holder in due course is a holder who takes the instrument
> (a) for value; and
> (b) in good faith; and
> (c) without notice that it is overdue or has been dishonored or of any defense against or claim to it on the part of any person.

UCC section 3–305 defined the rights of a holder in due course and provided:

> To the extent that a holder is a holder in due course he takes the instrument free from
>
> (1) all claims to it on the part of any person; and
> (2) all defenses of any party to the instrument with whom the holder has not dealt except
> (a) infancy, to the extent that it is a defense to a simple contract; and
> (b) such other incapacity, or duress, or illegality of the transaction, as renders the obligation of the party a nullity; and
> (c) such misrepresentation as has induced the party to sign the instrument with neither knowledge nor reasonable opportunity to obtain knowledge of its character or its essential terms; and
> (d) discharge in insolvency proceedings;
> (e) any other discharge of which the holder has notice when he takes the instrument; and
> (f) such payment as is effectual to extinguish all claims in accordance with the provisions of section 58–2321 of the Kansas Statutes Annotated, or acts amendatory thereof.

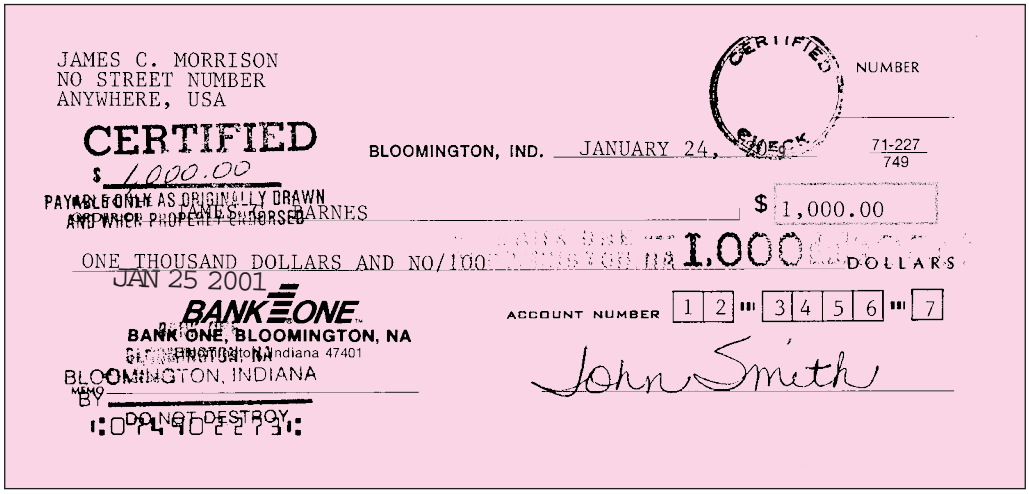
Regarding the right to stop payment on a check, the official UCC comment regarding section 4–403 indicates:

> The payment can be stopped but the drawer remains liable on the instrument to the holder in due course (Sections 3–305, 3–413) and the drawee, if he pays, becomes subrogated to the rights of the holder in due course against the drawer. Section 4–407.

Here, the record supports the trial court's conclusion that First National Bank was a holder in due course. In addition, Jones has not alleged that any injury resulted from the transaction with the salesman. At trial, she did not indicate any dissatisfaction with the cookware, but only stated some apprehension that the cookware might be stolen. Regardless of any claim she might have against the seller of the cookware, her liability as the maker of a negotiable instrument under these circumstances has not changed. She presented no evidence establishing a defense against a holder in due course pursuant to section 3–305. As a result, we agree with the trial court's conclusion that Jones is liable to First National Bank for the value of the check.

Judgment for First National Bank.

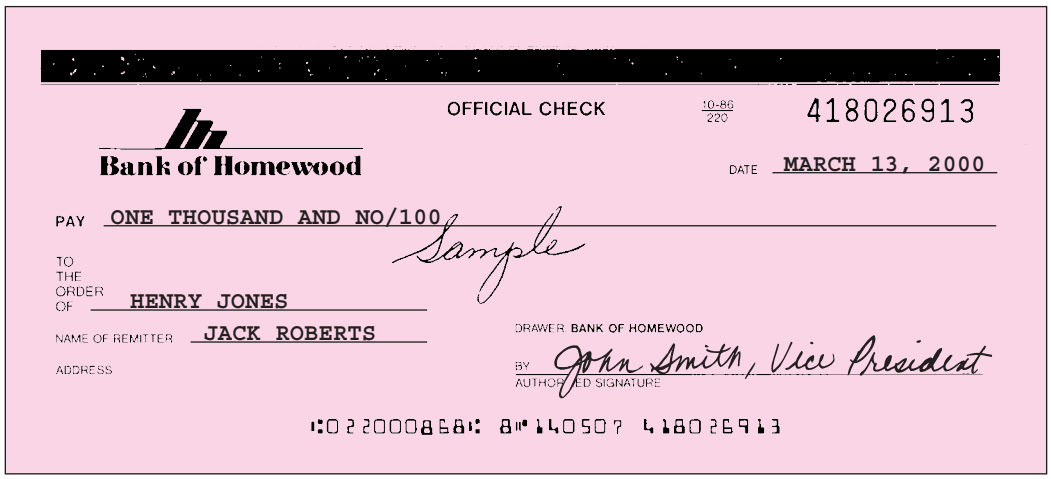
Certified Check



Normally, a drawee bank is not obligated to certify a check. When a drawee bank does certify a check, it substitutes its undertaking (promise) to pay the check for the drawer's undertaking and becomes obligated to pay the check. At the time the bank certifies a check, the bank usually debits the customer's account for the amount of the certified check and shifts the money to a special account at the bank. It also adds its signature to the check to show that it has accepted primary liability for paying it. The bank's signature is an essential part of the certification: the bank's signature must appear on the check [3–409]. If the holder of a check chooses to have it certified, rather than seeking to have it paid at that time, the holder has made a conscious decision to look to the certifying bank for payment and no longer may rely on the drawer or the indorsers to pay it. See Figure 2 for an example of a certified check.

If the drawee bank certifies a check, then the drawer and any persons who previously indorsed the check are discharged of their liability on the check [3–414(c); 3–415(d)].

Cashier's Check



A cashier's check differs from a certified check. A check on which a bank is both the drawer and the drawee is a cashier's check. The bank is primarily li-

Figure 2 *Certified Check*

able on the cashier's check. See Figure 3 for an example of a cashier's check. A teller's check is similar to a cashier's check. It is a check on which one bank is the drawer and another bank is the drawee. An example of a teller's check is a check drawn by a credit union on its account at a bank.

Death or Incompetence of Customer

Under the general principles of agency law, the death or incompetence of the principal terminates the agent's authority to act for the principal. However, slightly

different rules apply to the authority of a bank to pay checks out of the account of a deceased or incompetent person. The bank has the right to pay the checks of an incompetent person until it has notice that a court has determined that the person is incompetent. Once the bank learns of this fact, it loses its authority to pay that person's checks—because the depositor is not competent to issue instructions to pay.

Similarly, a bank has the right to pay the checks of a deceased customer until it has notice of the customer's death. Even if a bank knows of a customer's death, for a period of 10 days after the customer's death it can pay checks written by the customer prior to his death. However, the deceased person's heirs or other persons claiming an interest in the account can order the bank to stop payment [4–405].

Forged and Altered Checks

Bank's Right to Charge Account

A check that bears a forged signature of the drawer or payee is generally not properly payable from the customer's account because the bank is not following the instructions of the depositor precisely as he gave them. The bank is expected to be familiar with the authorized signature of its depositor. If it pays such a check, Article 4 will treat the transaction as one in which the bank paid out its own funds, rather than the depositor's funds.

Similarly, a check that was altered after the drawer made it out—for example, by increasing the amount of the check—is generally not properly payable from the customer's account. However, as noted earlier, if the drawer is negligent and contributes to the forgery or alteration, he may be barred from claiming it as the reason that a particular check should not be charged to his account.

For example, Barton makes a check for $1 in a way that makes it possible for someone to easily alter it to read $101, and it is so altered. If the drawee bank pays the check to a holder in good faith, it can charge the $101 to Barton's account if Barton's negligence contributed to the alteration. Similarly, if a company uses a mechanical check writer to write checks, it must use reasonable care to see that unauthorized persons do not have access to blank checks and to the check writer.

If the alteration is obvious, the bank should note that fact and refuse to pay the check when it is presented for payment. Occasionally, the alteration is so skillful that the bank cannot detect it. In that case, the bank is allowed to charge to the account the amount for which the check originally was written.

The bank has a duty to exercise "ordinary care" in the processing of negotiable instruments; it must observe the reasonable commercial standards prevailing among other banks in the area in which it does business. In the case of banks that take checks for collection or payment using automated means, it is important to note that reasonable commercial standards do not require the bank to examine every item *if* the failure to examine does not violate the bank's prescribed procedures and those procedures do not vary unreasonably from general banking practice or are not disapproved by the Code [3–107(a)(7); 4–103(c)]. For example, the bank's practice may be to examine those checks for more than $1,000 and a sample of smaller checks. Thus, if it did not examine a particular check in the amount of $250 for evidence of alteration or forgery, its action would be commercially reasonable so long as (1) it followed its own protocol, (2) that protocol was not a great variance from general banking usage, and (3) the procedure followed was not specifically disallowed in the Code.

In a case where both a bank and its customer fail to use ordinary care, a comparative negligence standard is used [4–406(e)].

Customer's Duty to Report Forgeries and Alterations

A bank must send a monthly (or quarterly) statement listing the transactions in an account, and it commonly returns the canceled checks to the customer. Revised Article 3 recognizes the modern bank practice of truncating (or retaining) checks and permits the bank to supply only a statement showing the item number, amount, and date of payment [4–406(a)]. When the bank does not return the paid items to the customer, the bank must either retain the items or maintain the capacity to furnish legible copies of the items for seven years after their receipt. The customer may request an item and the bank has a reasonable time to provide either the item or a legible copy of it [4–406(b)].

If the bank sends or makes available a statement of account or items, the customer must exercise reasonable promptness to examine the statement or items to determine whether payment was not authorized

because of an alteration of any item or because a signature of the customer was not authorized. If, based on the statement or items provided, the customer should discover the unauthorized payment, the customer must notify the bank of the relevant facts promptly [4–406(c)].

These principles are illustrated in the *Peak* case that follows.

Peak v. Tuscaloosa Commerce Bank *707 So.2d 59 (La. Ct. App. 1997)*

Thelma Peak maintained a checking account at the Tuscaloosa Commerce Bank. Between February 1994 and September 1994, Ms. Peak's grandson, Bryan Peak ("Bryan"), forged her signature on checks totaling $17,608.58 from her checking account at the Bank. Bryan accomplished these forgeries while living with his grandmother while he looked for a job. Ms. Peak permitted Bryan to pick up her mail, which allowed him to intercept her bank statements. Bryan would then remove all the cancelled checks he had forged and alter the bank statements to show only the items Ms. Peak had written. Bryan would also alter the balance so the statement did not reflect his forged checks. The altered statement was then placed back in the envelope, resealed, and given to Ms. Peak with the rest of her mail.

Before her grandson began writing checks on her account, Ms. Peak's balance stayed close to $20,000. She made a deposit every month, and generally wrote only five or six checks each month for utilities and church donations. These checks usually totaled less than $100 each month. When Bryan began forging checks, Ms. Peak's account activity increased substantially, because there were many more checks for significantly higher amounts written each month. All of the checks Bryan wrote were for more than $100, the highest being $1,250, and many of the checks were payable to him.

Ms. Peak was unaware there was a problem with her account until September 20, 1994, when a bank representative telephoned her to advise her that her account was overdrawn. Some time after this call, Ms. Peak contacted the Bank and indicated that various forged items had been presented and paid on her account over a period of time from February 1994 through September 1994. This was the first notice Ms. Peak gave to the Bank that forged items had been paid from her account.

Ms. Peak requested reimbursement from the Bank; however, the Bank refused on the basis Ms. Peak had not notified the Bank of the forgeries within the time period required by the Bank's deposit agreement. On August 31, 1995, Ms. Peak filed suit against the Bank, claiming it should reimburse her because the Bank was negligent and had breached its fiduciary duty to her by honoring and paying the forged instruments drawn on her account. The Bank answered the suit, denying liability on the basis it had fulfilled its statutory duty to her by mailing accurate monthly statements to Ms. Peak each month. The Bank argued Ms. Peak did not examine the statements carefully and notify it of the forgeries within the required time period; therefore, the Bank was not required to reimburse her.

The Bank filed a motion for summary judgment which the court granted. Ms. Peak appealed.

Carter, Judge A bank depositor owes to the bank the duty of exercising reasonable care to verify returned vouchers by the record kept by the depositor of the checks he has issued for the purpose of detecting forgeries or alterations. A statute describing the customer's duty to discover and report an unauthorized signature is UCC revised section 4–406, which states in pertinent part:

> (c) If a bank sends or makes available a statement of account or items pursuant to Subsection (a), the customer must exercise reasonable promptness in examining the statement or the items to determine whether any payment was not authorized because of an alteration of an item or because a purported signature by or on behalf of the customer was not authorized. If, based on the statement or items provided, the customer should reasonably have discovered the unauthorized payment, the customer must promptly notify the bank of the relevant facts.
>
> (d) If the bank proves that the customer failed, with respect to an item, to comply with the duties imposed on the customer by Subsection (c), the customer is precluded from asserting against the bank:
>
> (1) the customer's unauthorized signature or any alteration on the item, if the bank also proves that it suffered a loss by reason of the failure; and

(2) the customer's unauthorized signature or alteration by the same wrongdoer on any other item paid in good faith by the bank if the payment was made before the bank received notice from the customer of the unauthorized signature or alteration and after the customer had been afforded a reasonable period of time, not exceeding thirty days, in which to examine the item or statement of account and notify the bank.

(e) If Subsection (d) applies and the customer proves that the bank failed to exercise ordinary care in paying the item and that the failure substantially contributed to loss, the loss is allocated between the customer precluded and the bank asserting the preclusion according to the extent to which the failure of the customer to comply with Subsection (c) and the failure of the bank to exercise ordinary care contributed to the loss. If the customer proves that the bank did not pay the item in good faith, the preclusion under Subsection (d) does not apply.

According to the affidavit of Higdon [the Bank's Vice-President and cashier], the Bank made available to Ms. Peak statements of her account which reflected all charges and deposits made in connection with her account, as well as her original checks and other debit items affecting her account. The Bank mailed these items to Ms. Peak at the address she furnished to the Bank. Also, the Bank was not notified, nor was it aware of the existence, of any forged items for payment against Ms. Peak's account prior to September 20, 1994, the date the overdraft was created.

In the Bank's motion for summary judgment, the Bank introduced the deposit agreement, which clearly established the rights and obligations concerning the checking account. The deposit agreement contained provisions regarding the respective rights and duties of the parties in the event of suspected forged instruments. Specifically, it provided as follows:

> ACCOUNT STATEMENTS. You are responsible for promptly examining your statement each statement period and reporting any irregularities to us. The periodic statement will be considered correct for all purposes and we will not be liable for any payment made and charged to your Account unless you notify us in writing within certain time limits after the statement and checks are made available to you. *We will not be liable for any check that is altered or any signature that is forged unless you notify us within thirty (30) calendar days after the statement and the altered or forged items(s) are made available.* Also, we will not be liable for any subsequent items paid, in good faith, containing an unauthorized signature or alteration by the same wrongdoer unless you notify us within ten (10) calendar days after the statement and the first altered or forged items were made available. . . . (emphasis added.)

It is well settled under our law that parties may contract for any object which is lawful, possible, determined or determinable. Section 1–102(3). Once the contract has been established, it becomes the law between the parties.

Considering the affidavit of Higdon, it is clear that the Bank fulfilled its general obligations precisely as agreed in the deposit agreement and in accordance with statutory law.

More importantly, the Bank's evidence established negligence on the part of Ms. Peak, in that she failed to notify the Bank of the forgeries or alterations within the 30-day time period from which they were made available. Accordingly, our review of the evidence indicates the Bank carried its burden of proof with regard to proving the customer's negligence and its own ordinary care.

Once the Bank established the facts as previously set forth, it was incumbent upon Ms. Peak to come forward with depositions, affidavits, or other evidence that would indicate the forgeries were so clear that the Bank should have discovered the forgeries in a cursory examination of the checks and/or the statements were such clever alterations that Ms. Peak could not have discovered the bank statements had been altered. Unfortunately, plaintiff failed to introduce the altered statements, or any other evidence of this type.

Ms. Peak's opposition to the summary judgment established the fact she did not compare her check register with her bank statement on an item-by-item basis, but rather she merely checked to see if the balances matched. Her opposition further established she gave her grandson permission to pick up her mail, which allowed him access to her bank statements. Our review of the evidence indicates Ms. Peak did not negate the fact she was negligent in untimely reporting the forged items.

Judgment for Tuscaloosa Commerce Bank affirmed.

Multiple Forgeries or Alterations Revised Article 3 provides a special rule to govern the situation in which the same wrongdoer makes a series of unauthorized drawer's signatures or alterations. The customer generally cannot hold the bank responsible for paying, in good faith, any such checks after the statement of account or item that contained the first unauthorized customer's signature or an alteration was available to the customer for a reasonable period, not exceeding 30 calendar days. This rule holds (1) if the customer did not notify the bank of the unauthorized signature or alteration, and (2) the bank proves it suffered a loss because of the customer's failure to examine his statement and notify the bank [4–406(d)]. Unless the customer has notified the bank about the forgeries or alterations that he should have discovered by reviewing the statement or item, the customer generally bears responsibility for any subsequent forgeries or alterations by the same wrongdoer.

Suppose that Allen employs Farnum as an accountant and that over a period of three months, Farnum forges Allen's signature to 10 checks and cashes them. One of the forged checks is included in the checks returned to Allen at the end of the first month. Within 30 calendar days after the return of these checks, Farnum forges two more checks and cashes them. Allen does not examine the returned checks until three months after the checks that included the first forged check were returned to her. The bank would be responsible for the first forged check and for the two checks forged and cashed within the 30-day period after it sent the first statement and the canceled checks (unless the bank proves that it suffered a loss because of the customer's failure to examine the checks and notify it more promptly). It would not be liable for the seven forged checks cashed after the expiration of the 30-day period.

Regardless of which party may have been negligent, a customer must discover and report to the bank any unauthorized customer's signature or any alteration within one year from the time after the statement or items are made available to him. If the customer does not do so, he cannot require the bank to recredit his account for such items. [4–406(f)].

Check Collection and Funds Availability

Check Collection

As Chapter 30, Negotiable Instruments, describes, checks and other drafts collected through the banking system usually have at least three parties—the drawer, the drawee bank, and the payee. If the payee deposits the check at the same bank as the drawee bank, the latter will take a series of steps necessary to reflect the deposit as a credit to the payee's account and to decide whether to pay the check from the drawer's account. In connection with its handling of the deposit for the payee's benefit, it will make one ledger entry showing the deposit as a credit to the payee's account. In connection with its decision to pay, the bank's employees and computers will perform several steps commonly referred to as the process of posting. Original Article 4 contained special rules describing the process of posting and the legal effect. The amendments to Article 4 deleted these special rules because automated check processing limited the legal significance of particular acts in posting [4–109, 4–213(a), and 4–303(a)]. These steps need not be taken in any particular order, but they customarily include determining whether there are sufficient funds to pay, debiting the drawer's account for the amount of the check, and placing the check into a folder for later return to the drawer (to satisfy its obligations under the "bank statement" rule) [4–406]. Banks in those states that have not enacted the amendments to Article 4 will also compare the drawer's signature on the check with that on the deposit agreement as part of this process.

If the payee deposits the check at a bank other than the drawee bank, the depositary bank, acting as the agent of the payee, will make the ledger entry showing the deposit as a credit to the payee's account. The next step of the collection process depends on where the depositary bank is located. If the drawee and depositary banks are in the same town or county, the depositary bank will indorse the check and deliver (present) it to the drawee bank for payment. It may deliver it by courier or through a local association of banks known as a "clearing house" [4–104(1)(d)]. Under article 4, the drawee-payor bank must settle for the check before midnight of the banking day of its receipt of the check, which means that it must give the depositary bank funds or a credit equal to the amount of the check. Once it settles for the check, the drawee-payor bank has until midnight of the banking day after the banking day of receipt to pay the check or to return the check or send notice of dishonor. This deadline for the drawee-payor bank's action on the check is known as the bank's "midnight deadline" [4–104(1)(h)]. The drawee-payor bank's failure to settle by midnight of the banking day of receipt, or its failure to pay or return the check, or send notice of dishonor, results in the drawee-payor bank's becoming

"accountable" for the amount of the check, which means it must pay the amount of the check [4–302(a)].

If the drawee and depositary banks are located in different counties, or in different states, the depositary bank will use an additional commercial bank, and one or more of the regional Federal Reserve Banks, in the collection of the check. In these cases, the depositary bank will send the check on to the drawee-payor bank through these "collecting banks." Each bank in the sequence must use ordinary care in presenting the check or sending it for presentment, and in sending notice of dishonor or returning the check after learning that the check has not been paid [4–202(a)]. The depositary and collecting banks have until their respective midnight deadlines—or, in some cases, a further reasonable time—to take the action required of them in the sequence of collection steps.

If the drawee-payor bank dishonors the check prior to its midnight deadline or shortly after the midnight deadline under circumstances specified in "Regulation CC" of the Federal Reserve Board (described in the next section of this chapter), it will send the check back to the depositary bank. Until September 1, 1988, the drawee-payor bank customarily sent the dishonored check back to the collecting bank from which it received the check, and the collecting bank sent it back to the bank from which it had received it, and through any other bank that handled the check in the "forward collection" process until the check again reached the depositary bank. The provisions of Article 4 still describe this sequence as the "return collection" process, although Regulation CC imposes new responsibilities on the payor bank and on any other "returning bank." Each bank in the return sequence adjusts its accounts to reflect the return and has until its midnight deadline to send the check back to the bank from which it originally had received the check. After September 1, 1988 (or in states that previously had adopted "direct return" [Original 4–212(b)], the drawee-payor bank may return the check directly to the depositary bank—skipping all of the collecting banks and the delay represented by the midnight deadlines that each bank otherwise would have had.

Direct return also increases the likelihood that the depositary bank will know whether the check has been dishonored by the day on which Regulation CC requires the depositary bank to allow the payee to write checks or otherwise make withdrawals against the deposit. The next section of this chapter discusses this aspect of Regulation CC in more detail.

On receipt of the dishonored check, the depositary bank will return the check or otherwise notify its depositor (the payee) of the dishonor and will debit or charge back her account for the check it did not collect. The depositary bank may charge back the deposit even if it previously had allowed the payee-depositor to withdraw against the credit given for the deposit.

When the depositor receives the notice of dishonor and returned check it will take one of several steps, depending on whether it received the check directly from the drawer or took it by indorsement from another person. If the depositor was not the original payee of the check, it usually will prefer to return the check—giving notice of dishonor unless already given by the drawee bank or another collecting bank—to the person who negotiated the check to her, the prior indorser. Recall that an indorser is obligated to pay the check following dishonor and notice of dishonor [3–415].

If the depositor received the check directly from the drawer, for example as payee, the depositor normally will demand payment from the drawer. Recall that the drawer is obligated to pay the check upon dishonor [3–414]; alternatively, the payee may seek to enforce the underlying obligation for which the drawer originally issued the check, such as the purchase of groceries or an automobile.

Funds Availability

When a bank takes a check for deposit to a customer's account, it typically places a hold on the funds represented by the deposited check because it runs a number of risks in allowing a customer to withdraw deposits that it has not collected from the drawee bank. The risks that the check may be returned include: (1) there may be insufficient funds in the drawer's account or the account may have been closed; (2) the check may contain a forged drawer's or indorser's signature, or there may have been a material alteration of the check; (3) the possibility that the drawer is kiting checks or playing two accounts off against each other; or (4) a stop-payment order may have been placed against the check. These are real concerns to a depositary bank, and it has a significant interest in protecting itself against these possibilities.

Until recently, the risks run by a depositary bank were complicated by a very slow process used by drawee-payor banks in returning a dishonored check or notifying the bank of the dishonor. Moreover, depositary banks did not get direct notice from drawee-payor banks when they paid checks. Accordingly, banks often restricted the depositor's use of the deposit by placing relatively long holds on checks deposited

with them for collection; these sometimes ran 15 to 20 days for items drawn on other than local banks.

The extensive use of holds, and a growing public sentiment that they were excessive and often unfair, led to the passage by Congress in 1987 of the Expedited Funds Availability Act. In the act, Congress set out mandatory schedules limiting check holds and specifying when funds are to be made available to customers by depositary institutions. The act also delegated to the Federal Reserve Board the authority to speed up the check-processing system. The regulations adopted by the Board to speed up check processing supersede the provisions of Article 4 of the UCC (Bank Deposits and Collections) in a number of respects but will not be covered in this text.

The key elements of the mandatory funds availability schedules, which are set out in Federal Reserve Board Regulation CC, are:

1. Local checks (those drawn on banks in the same Federal Reserve check region as the depositary bank) must be made available for the depositor to draw against by the second business day following deposit.

2. Nonlocal checks (those drawn on banks located in the United States but outside the Federal Reserve check processing region in which the depositary bank is located) must be made available by the fifth business day following deposit.

3. Certain items must be made available by the next day after the day of deposit. These include:

a. Cash deposits where the deposit is made in person to an employee of the depositary bank (i.e., not at an ATM).
b. Electronic payments.
c. Checks drawn on the U.S. Treasury.
d. U.S. Postal Service money orders.
e. Checks drawn on a Federal Reserve Bank or Federal Home Loan Bank.
f. Checks drawn by a state or a unit of local government (under certain conditions).
g. Cashier's, certified, or teller's checks.
h. Checks drawn on the depositary bank.
i. The lesser of $100 or the aggregate deposit on any one banking day.

4. If the next-day items are not deposited in person with an employee of the depositary institution but rather are deposited in an ATM machine or by mail, then the deposit does not have to be made available for withdrawal until the second business day after deposit.

5. Generally, the depositary bank must begin accruing interest to a depositor's interest-bearing account from the day it receives credit for cash and check deposits to an interest-bearing account.

There are six major exceptions to the mandatory availability schedules set out above that are designed to safeguard depositary banks against higher risk situations. The exceptions are:

1. *New account exception.* The depositary bank may suspend the availability rules for new accounts and can limit the next-day and second-day availability to the first $5,000 deposited.

2. *Large deposit exception.* The hold periods can be extended to the extent the aggregate deposit on any banking day exceeds $5,000.

3. *Redeposited check exception.* The hold period can be extended where a check has been returned one or more times.

4. *Repeated overdraft exception.* A longer hold period may be required for deposits to accounts that have been overdrawn repeatedly.

5. *Reasonable cause exception.* The scheduled availability may be extended where the bank has reasonable cause to believe the check is uncollectible.

6. *Emergency conditions exception.* The scheduled availability may be extended under certain emergency conditions such as a communications interruption or a computer failure.

Banks are required to disclose their funds availability policy to all of their customers; they may provide different policies to different classes or categories of customers.

Electronic Banking

With the development of computer technology, many banks are encouraging their customers to transfer funds electronically by using computers rather than paper drafts and checks. A bank customer may use a specially coded card at terminals provided by the bank to make deposits to an account, to transfer money from one checking or savings account to another, to pay bills, or to withdraw cash from an account. These new forms of transferring money have raised questions about the legal rules that apply to them, and the questions are only beginning to be resolved.

Electronic Funds Transfer Act

The consumer who used electronic funds transfer systems (EFTs), the so-called cash machines or electronic tellers, in the early years often experienced problems in identifying and resolving mechanical errors resulting from malfunctioning EFTs. In response to these problems, Congress passed the Electronic Funds Transfer Act in 1978 to provide "a basic framework, establishing the rights, liabilities, and responsibilities of participants in electronic funds transfer systems" and especially to provide "individual consumer rights."

The four basic EFT systems are automated teller machines; point-of-sale terminals, which allow consumers to use their EFT cards like checks at retail establishments; preauthorized payments, such as automatic paycheck deposits or mortgage or utility payments; and telephone transfers between accounts or to pay specific bills by phone.

Similar to the Truth in Lending Act and the Fair Credit Billing Act (FCBA) discussed in Chapter 47, the EFT Act requires disclosure of the terms and conditions of electronic fund transfers at the time the consumer contracts for the EFT service. Among the nine disclosures required are the following: the consumer's liability for unauthorized electronic fund transfers (those resulting from loss or theft), the nature of the EFT services under the consumer's account, any pertinent dollar or frequency limitations, any charges for the right to make EFTs, the consumer's right to stop payment of a preauthorized transfer, the financial institution's liability to the consumer for failure to make or stop payments, and the consumer's right to receive documentation of transfers both at the point or time of transfer and periodically. The act also requires 21 days' notice prior to the effective date of any change in the terms or conditions of the consumer's account that pertains to the required disclosures.

The EFT Act does differ from the Fair Credit Billing Act in a number of important respects. For example, under the EFT Act, the operators of EFT systems have a maximum of 10 working days to investigate errors or provisionally recredit the consumer's account, whereas issuers of credit cards have a maximum of 60 days under the FCBA. The liability of the consumer also is different if an EFT card is lost or stolen than it is if a credit card is lost or stolen.

The *Kruser* case illustrates the application of the EFT Act's provisions that require a customer to provide timely notification of any unauthorized use of his card in order to limit his liability for the unauthorized use of the card.

Kruser v. Bank of America NT & SA *281 Cal.Rptr. 463 (Cal. Ct. App. 1991)*

Lawrence and Georgene Kruser maintained a joint checking account with the Bank of America. The bank issued each of them a "Versatel" card and separate personal identification numbers that would allow access to funds in their account from automatic teller machines. The Krusers also received with their cards a "Disclosure Booklet" that provided to the Krusers a summary of consumer liability, the bank's business hours, and the address and telephone number by which they could notify the bank in the event they believed an unauthorized transfer had been made.

The Krusers believed Mr. Kruser's card had been destroyed in September 1986. The December 1986 account statement mailed to the Krusers by the bank reflected a $20 unauthorized withdrawal of funds by someone using Mr. Kruser's card at an automatic teller machine. The Krusers reported this unauthorized transaction to the bank when they discovered it in August or September 1987.

Mrs. Kruser underwent surgery in late 1986 or early 1987 and remained hospitalized for 11 days. She then spent a period of six or seven months recuperating at home. During this time, she reviewed the statements the Krusers received from the bank.

In September 1987, the Krusers received bank statements for July and August 1987 that reflected 47 unauthorized withdrawals totaling $9,020 made from an automatic teller machine, again by someone using Mr. Kruser's card. They notified the bank of these withdrawals within a few days of receiving the statements. The bank refused to credit the Kruser's account with the amount of the unauthorized withdrawals. The Krusers sued the bank claiming damages for the unauthorized withdrawals from their account. The trial court ruled in favor of the bank on the grounds that the Krusers had failed to comply with the note and reporting requirements of the Electronic Funds Transfer Act (EFTA). The Krusers appealed.

Stone, Associate Justice The ultimate issue we address is whether, as a matter of law, the unauthorized $20 withdrawal which appeared on the December 1986 statement barred the Krusers from recovery for the losses incurred in July and August 1987. Resolution of the issue requires the interpretation of the EFTA and section 205.6 of Regulation E, one of the regulations prescribed by the Board of Governors of the Federal Reserve System in order to carry out the EFTA.

Section 205.6 of Regulation E mirrors [the EFTA] and in particular provides:

> (b) Limitations on the amount of liability. The amount of a consumer's liability for an unauthorized electronic fund transfer or a series of related unauthorized transfers shall not exceed $50 or the amount of unauthorized transfers that occur before notice to the financial institution . . . whichever is less, unless one of the following exceptions apply:
>
> * * * * *
>
> (2) If the consumer fails to report within 60 days of transmittal of the periodic statement any unauthorized electronic fund transfer that appears on the statement, the consumer's liability shall not exceed the sum of (i) The lesser of $50 or the amount of unauthorized electronic fund transfers that appear on the periodic statement during the 60-day period and (ii) The amount of unauthorized electronic fund transfers that occur after the close of the 60 days and before notice to the financial institution and that the financial institution establishes would not have occurred but for the failure of the consumer to notify the financial institution within that time.
>
> * * * * *
>
> (4) If a delay in notifying the financial statements was due to extenuating circumstances, such as extended travel or hospitalization, the time periods specified above shall be extended to a reasonable time.

The trial court concluded the Bank was entitled to judgment as a matter of law because the unauthorized withdrawals of July and August 1987 occurred more than 60 days after the Krusers received a statement which reflected an unauthorized transfer in December 1986. The court relied upon section 205.6(b)(2) of Regulation E.

The Krusers contend the December withdrawal of $20 was so isolated in time and minimal in an amount that it cannot be considered in connection with the July and August withdrawals. They assert the court's interpretation of section 205.6(b)(2) of Regulation E would have absurd results which would be inconsistent with the primary objective of the EFTA—to protect the consumer. They argue that if a consumer receives a bank statement which reflects an unauthorized minimal electronic transfer and fails to report the transaction to the bank within 60 days of transmission of the bank statement, unauthorized transfers many years later, perhaps totaling thousands of dollars, would remain the responsibility of the consumer.

The result the Krusers fear is avoided by the requirement that the bank establish the subsequent unauthorized transfers could have been prevented had the consumer notified the bank of the first unauthorized transfer. Here, although the unauthorized transfer of $20 occurred approximately seven months before the unauthorized transfers totaling $9,020, it is undisputed that all transfers were made by using Mr. Kruser's card which the Krusers believed had been destroyed prior to December 1986. According to the declaration of Yvonne Maloon, the Bank's Versatel risk manager, the Bank could have and would have canceled Mr. Kruser's card had it been timely notified of the December unauthorized transfer. In that event Mr. Kruser's card could not have been used to accomplish the unauthorized transactions in July and August.

In the alternative, the Krusers contend the facts establish that Mrs. Kruser, who was solely responsible for reconciling the bank statements, was severely ill and was also caring for a terminally ill relative when the December withdrawal occurred. Therefore they claim they were entitled to an extension of time within which to notify the bank.

The evidence the Krusers rely upon indicates in late 1986 or early 1987 Mrs. Kruser underwent surgery and remained in the hospital for 11 days. She left her house infrequently during the first six or seven months of 1987 during which she was recuperating. Mrs. Kruser admits, however, she received and reviewed bank statements during her recuperation. Therefore, we need not consider whether Mrs. Kruser's illness created circumstances which might have excused her failure to notice the unauthorized withdrawal pursuant to the applicable sections. She in fact did review the statements in question.

Judgment for Bank of America affirmed.

Documents of Title

Introduction

Storing or shipping goods, giving a warehouse receipt or bill of lading representing the goods, and transferring such a receipt or bill of lading as representing the goods are practices of ancient origin. The warehouseman or the common carrier is a bailee of the goods who contracts to store or transport the goods and to deliver them to the owner or to act otherwise in accordance with the lawful directions of the owner. The warehouse receipt or the bill of lading may be either negotiable or non-negotiable. To be negotiable, a warehouse receipt, bill of lading, or other document of title must provide that the goods are to be delivered to the bearer or to the order of a named person [7–104(1)]. The primary differences between the law of negotiable instruments and the law of negotiable documents of title are based on the differences between the obligation to pay money and the obligation to deliver specific goods.

Warehouse Receipts

A warehouse receipt, to be valid, need not be in any particular form, but if it does not embody within its written or printed form each of the following, the warehouseman is liable for damages caused by the omission to a person injured as a result of it: (1) the location of the warehouse where the goods are stored; (2) the date of issue; (3) the consecutive number of the receipt; (4) whether the goods are to be delivered to the bearer or to the order of a named person; (5) the rate of storage and handling charges; (6) a description of the goods or of the packages containing them; (7) the signature of the warehouseman or his agent; (8) whether the warehouseman is the owner of the goods, solely, jointly, or in common with others; and (9) a statement of the amount of the advances made and of the liabilities incurred for which the warehouseman claims a lien or security interest. Other terms may be inserted [7–202].

A warehouseman is liable to a purchaser for value in good faith of a warehouse receipt for nonreceipt or misdescription of goods. The receipt may conspicuously qualify the description by a statement such as "contents, condition, and quantity unknown" [7–203].

Because a warehouseman is a bailee of the goods, he owes to the holder of the warehouse receipt the duties of a mutual benefit bailee and must exercise reasonable care [7–204]. Chapter 23, Personal Property and Bailments, discusses the duties of a bailee in detail. The warehouseman may terminate the relation by notification where, for example, the goods are about to deteriorate or where they constitute a threat to other goods in the warehouse [7–206]. Unless the warehouse receipt provides otherwise, the warehouseman must keep separate the goods covered by each receipt; however, different lots of fungible goods such as grain may be mingled [7–207].

A warehouseman has a lien against the bailor on the goods covered by his receipt for his storage and other charges incurred in handling the goods [7–209]. The Code sets out a detailed procedure for enforcing this lien [7–210].

Bills of Lading

In many respects, the rights and liabilities of the parties to a negotiable bill of lading are the same as the rights and liabilities of the parties to a negotiable warehouse receipt. The contract of the issuer of a bill of lading is to transport goods, whereas the contract of the issuer of a warehouse receipt is to store goods. Like the issuer of a warehouse receipt, the issuer of a bill of lading is liable for nonreceipt or misdescription of the goods, but he may protect himself from liability where he does not know the contents of packages by marking the bill of lading "contents or condition of packages unknown" or similar language. Such terms are ineffective when the goods are loaded by an issuer who is a common carrier unless the goods are concealed by packages [7–301].

Duty of Care

A carrier who issues a bill of lading, or a warehouse operator who issues a warehouse receipt, must exercise the same degree of care in relation to the goods as a reasonably careful person would exercise under similar circumstances. Liability for damages not caused by the negligence of the carrier may be imposed on him by a special law or rule of law. Under tariff rules, a common carrier may limit her liability to a shipper's declaration of value, provided that the rates are dependent on value [7–309]. In the case that follows, *Calvin Klein Ltd.,* a court enforced a $50 per shipment limitation that had been part of a long series of shipping contracts where the customer had the opportunity to declare a higher value and failed to do so.

Calvin Klein Ltd. v. Trylon Trucking Corp. *892 F.2d 191 (2d. Cir. 1989)*

Trylon Trucking Corporation is a New Jersey trucking firm that engaged in the business of transporting goods from New York City's airports for delivery to its customers' facilities. For three years prior to 1986, Calvin Klein, a New York clothing company, used the services of Trylon involving hundreds of shipments. Calvin Klein, through its customs broker, would contact Trylon to pick up the shipment from the airport for delivery to Calvin Klein's facility. After completing the delivery carriage, Trylon would forward to Calvin Klein an invoice, which contained a limitation of liability provision as follows:

> In consideration of the rate charged, the shipper agrees that the carrier shall not be liable for more than $50.00 on any shipment accepted for delivery to one consignee unless a greater value is declared, in writing, upon receipt at time of shipment and charge for such greater value paid, or agreed to be paid, by the shipper.

A shipment of 2,833 blouses from Hong Kong arrived at John F. Kennedy International Airport for Calvin Klein on March 27, 1986. Calvin Klein arranged for Trylon to pick up the shipment and deliver it to Calvin Klein's New Jersey warehouse. On April 2, Trylon dispatched its driver, J. Jefferson, to pick up this shipment. Jefferson signed a receipt for the shipment from Calvin Klein's broker. Later, on April 2, the parties discovered that Jefferson had stolen Trylon's truck and its shipment. The shipment was never recovered.

Calvin Klein sent a claim letter to Trylon for the full value of the lost blouses. When it did not receive a response from Trylon, Calvin Klein filed suit against Trylon, seeking to recover $150,000, the alleged value of the blouses. In the pleadings before the court, the parties agreed that Trylon was liable to Calvin Klein for the loss of the shipment and that it had been grossly negligent in the hiring and supervision of Jefferson. They also agreed that "the terms and conditions of Trylon's carriage were that liability for loss or damage to cargo is limited to $50 in accordance with the provision in Trylon's invoice forms." Calvin Klein conceded that it was aware of the limitation of liability and that it did not declare a value on the blouses at the time of shipment.

Trylon contended that its liability was limited to $50 in accordance with the provision in its invoice forms. Calvin Klein argued that the limitation clause was not enforceable for two reasons: (1) no agreement existed between it and Trylon as to the limitation of liability; and (2) even if an agreement existed, public policy would prevent its enforcement because of Trylon's gross negligence. The district court held that Calvin Klein had not assented to the limitation clause for this shipment and awarded damages to Calvin Klein of $101,542.62. Trylon appealed.

Miner, Circuit Judge A common carrier is strictly liable for the loss of goods in its custody. Where the loss is not due to excepted causes [that is, act of God or public enemy, inherent nature of goods, or shipper's fault], it is immaterial whether the carrier was negligent or not. Even in the case of loss from theft by third parties, liability may be imposed upon a negligent common carrier. A shipper and a common carrier may contract to limit the carrier's liability in cases of loss to an amount agreed to by the parties, so long as the language of the limitation is clear, the shipper is aware of the terms of the limitation, and the shipper can change the terms by indicating the true value of the goods being shipped. Section 7–309(2). Such a limitation agreement is generally valid and enforceable despite carrier negligence. The limitation of liability provision involved here clearly provides that, at the time of delivery, the shipper may increase the limitation by written notice of the value of the goods to be delivered and by payment of a commensurately higher fee.

The parties stipulated to the fact that the $50 limitation of liability was a term and condition of carriage and that Calvin Klein was aware of that limitation. This stipulated fact removes the first issue, namely whether an agreement existed as to a liability limitation between the parties. Calvin Klein's argument that it never previously acknowledged this limitation by accepting only $50 in settlement of a larger loss does not alter this explicit stipulation. The district court erred in not accepting the limitation of liability as stipulated.

The remaining issue concerns the enforceability of the limitation clause in the light of Trylon's conceded gross negligence.

Since carriers are strictly liable for loss of shipments in their custody and are insurers of those goods, the degree of carrier negligence is immaterial. The common carrier must exercise reasonable care in relation to the shipment in its custody. Section 7–309(2). Carriers can contract with their shipping customers on the amount of liability each party will bear for the loss of a shipment, regardless of the amount of carrier negligence. Unlike a merchant acquiring a burglar alarm, the shipper can calculate the specific amount of its potential damages in advance, declare the value of the shipment based on that calculation, can pay a commensurately higher rate to carry the goods, in effect buying additional insurance from the common carrier.

In this case Calvin Klein and Trylon were business entities with an ongoing commercial relationship involving numerous carriages of Calvin Klein goods by Trylon. Where such entities deal with each other in a commercial setting, and no special relationship exists between the parties, clear limitations between them will be enforced. Here, each carriage was under the same terms and conditions as the last, including a limitation of Trylon's liability. This is not a case in which the shipper was dealing with the common carrier for the first time or contracting under new or changed conditions. Calvin Klein was aware of the terms and was free to adjust the limitation upon a written declaration of the value of a given shipment, but failed to do so with the shipment at issue here. Since Calvin Klein failed to adjust the limitation, the limitation applies here, and no public policy that dictates otherwise can be identified.

Calvin Klein also argues that the limitation is so low as to be void. The amount is immaterial because Calvin Klein had the opportunity to negotiate the amount of coverage by declaring the value of the shipment. Commercial entities can easily negotiate the degree of risk each party will bear and which party will bear the cost of insurance. Calvin Klein had the opportunity to declare a higher value and we find all of its arguments relating to the unreasonableness of the limitation to be without merit.

District court judgment reversed with instructions to enter judgment for Calvin Klein for $50.

Negotiation of Document of Title

A negotiable document of title and a negotiable instrument are negotiated in substantially the same manner. If the document of title provides for the delivery of the goods to bearer, it may be negotiated by delivery. If it provides for delivery of the goods to the order of a named person, it must be indorsed by that person and delivered. If an order document of title is indorsed in blank, it may be negotiated by delivery unless it bears a special indorsement following the blank indorsement, in which event it must be indorsed by the special indorsee and delivered [7–501].

A person taking a negotiable document of title takes as a bona fide holder if she takes in good faith and in the regular course of business. The bona fide holder of a negotiable document of title has substantially the same advantages over a holder who is not a bona fide holder or over a holder of a non-negotiable document of title as does a holder in due course of a negotiable instrument over a holder who is not a holder in due course or over a holder of a non-negotiable instrument.

Rights Acquired by Negotiation

A person who acquires a negotiable document of title by due negotiation acquires (1) title to the document, (2) title to the goods, (3) the right to the goods delivered to the bailee after the issuance of the document, and (4) the direct obligation of the issuer to hold or deliver the goods according to the terms of the document [7–502(1)].

Under the broad general principle that a person cannot transfer title to goods he does not own, a thief—or the owner of goods subject to a perfected security interest—cannot, by warehousing or shipping the goods on a negotiable document of title and then negotiating the document of title, transfer to the purchaser of the document of title a better title than he has [7–503].

Warranties of Transferor of Document of Title

The transferor of a negotiable document of title warrants to his immediate transferee, in addition to any warranty of goods, only that the document is genuine,

that he has no knowledge of any facts that would impair its validity or worth, and that his negotiation or transfer is rightful and fully effective with respect to the title to the document and the goods it represents [7–507].

Ethical and Public Policy Concerns

1. Suppose you take your car to a garage to have it repainted. When you go to pick it up, you are not happy with the quality of the work, but the garage owner refuses to release the car to you unless you pay him in full for the work. You give him a check in the amount requested, and on the way home stop at your bank and request that the bank stop payment on the check you have just written, an action you decided to take when you were writing out the check. Have you acted ethically?

2. Some banks take the position that because they process checks with the use of computers, a customer seeking to stop payment on a check must provide them with the amount of the check with every digit correct in order for the bank to be able to stop payment. What policy considerations are involved in deciding whether the bank's position should establish the minimum information required for a bank to have a "reasonable opportunity" to respond to the customer's request?

3. Suppose that you own and operate a warehouse. A local liquor store owner occasionally uses your facilities to store shipments of wine from France until he has room for the wine in his store. You are aware that from time to time your warehouse employees "borrow" a bottle from the crates of wine being stored in your warehouse. After a number of crates with a total of four bottles missing are delivered to the liquor store, the store owner queries you about the missing bottles and you tell him that they must have been broken in transit to your warehouse. Have you acted ethically?

Problems and Problem Cases

1. Skov sold fish to hotels and restaurants. He acquired his fish under an agreement whereby the supplier stored the fish that Skov had purchased for future delivery and no payment was made until such delivery. Following delivery of one shipment, Skov gave his supplier a check drawn on First National Bank. The bank erroneously refused to honor the check and the supplier canceled the agreement. Can Skov recover damages from the bank for the loss of this agreement?

2. Fitting wrote a check for $800 and gave it to the payee. She then had second thoughts about the check. She contacted the bank at which she had her checking account about the possibility of stopping payment on the check. A bank employee told her that she could not file a stop payment order until the bank opened the next morning. The next morning, Fitting did not file a stop payment order. Instead, she withdrew money from her account so that less than $800 remained in it. She believed that the bank would not pay the $800 check if there were not sufficient funds in the account to cover it. However, the bank paid the check and created an overdraft in Fitting's account. The bank then sued Fitting to recover the amount of the overdraft. Can a bank pay a customer's check even if this creates an overdraft in the customer's checking account?

3. On November 15 Midgen, the drawer of a check, issued a written stop-payment order to Chase Manhattan Bank, the drawee on the check. Midgen provided the correct payee, check date, and account and check number. However, he incorrectly stated the amount of the check to be $759.92. In fact, the amount was $754.92. Chase Manhattan paid the check on December 7. Should the $5 difference in the amount relieve Chase Manhattan of liability for paying the check over the stop-payment order?

4. In November 1991 Marc Gardner, the president of M. G. Sales, Inc., made out two checks on its account at Chemical Bank. The checks were both in the amount of $6,000 and were payable to, signed by, and indorsed by Gardner. Apparently, he lost both checks. Consequently, on November 16, 1991, he went to Chemical Bank and obtained two stop-payment orders, which, by their terms, were valid for six months. In January and February 1993 the checks were deposited into an account at another branch of Chemical Bank and the proceeds were credited to that account. M. G. Sales then brought an action against Chemical Bank for paying the checks despite the earlier stop-payment order and the fact the check was more than six months old and thus "stale." Is M.G. Sales entitled to have its account recredited?

5. CMD *Video case.* See "Sour Grapes." Jelly Manufacturer orders some grapes by phone from Grape Grower in California on a COD basis. When the grapes

arrive, Jelly Manufacturer pays for them by check before discovering that they had spoiled en route because they had been shipped in a nonrefrigerated truck. After calling Grape Grower to complain, Jelly Manufacturer calls its bank and places a stop-payment order on the check. The bank's computer fails to catch the check and the check is paid to Grape Grower. Does Jelly Manufacturer have any recourse against the bank for paying the check over the stop-payment order?

6. John Doe had a checking account at Highland National Bank in New York. Two days after John Doe died in Florida, but before Highland National knew of his death, John's sister appeared at the bank. She had a check signed by John Doe but with the amount and name of the payee left blank. She told the bank that her brother wanted to close his account. She asked how much was in the account, filled the check in for that amount, and made the check payable to herself. The bank checked her identification and verified the signature of John Doe. Then it paid the check to the sister. The executor of John Doe's estate sued Highland National Bank to recover the amount of money that was in John's account on the day he died. The executor claimed that the bank had no authority to pay checks from John Doe's account after his death. May a bank pay checks drawn on the account of a deceased customer?

7. In December, Whalley Company hired Nancy Cherauka as its bookkeeper. Her duties included preparing checks, taking deposits to the bank, and reconciling the monthly checking account statements. She was not authorized to sign or cash checks. Between the following January 24 and May 31, Cherauka forged 49 checks on the Whalley account at National City Bank. Each month, National City Bank sent Whalley a statement and the canceled checks (including the forgeries) it had paid the previous month. The president of Whalley looked at the statement to see the balance in the account but he did not look at the individual checks. Then he gave the statement and checks to the bookkeeper. The January 24 forged check was sent to Whalley on February 3. In June, Whalley discovered that Cherauka was forging checks and fired her. It then brought a lawsuit against National City Bank to force it to recredit Whalley's account with the total amount of the 49 checks. Whalley claimed that the checks were not properly payable from the account. Is National City required to recredit Whalley's account?

8. On August 16, Frederick Ognibene went to the ATM area at a Citibank branch and activated one of the machines with his Citibank card, provided his personal identification code, and withdrew $20. When he approached the machine a person was using the customer service telephone located between two ATM machines and appeared to be telling customer service that one of the machines was malfunctioning. As Ognibene was making his withdrawal, the person said into the telephone, "I'll see if his card works in my machine." He then asked Ognibene if he could use his card to see if the other machine was working. Ognibene handed his card to him and saw him insert it into the adjoining machine at least two times while saying into the telephone, "Yes, it seems to be working." When Ognibene received his Citibank statement, it showed that two withdrawals of $200 each from his account were made at 5:42 P.M. and 5:43 P.M., respectively, on August 16. His own $20 withdrawal was made at 5:41 P.M. At the time, Ognibene was unaware that any withdrawals from his account were being made from the adjoining machine. Ognibene sought to have his account recredited for $400, claiming that the withdrawals had been unauthorized. Citibank had been aware for some time of a scam being perpetrated against its customers by persons who observed the customer inserting his personal identification number into an ATM and then obtaining access to the customer's ATM card in the same manner as Ognibene's card was obtained. After learning about the scam, Citibank posted signs in ATM areas containing a red circle approximately 2 1/2 inches in diameter in which was written "Do Not Let Your Citicard Be Used For Any Transaction But Your Own." Was Citibank required under the Electronic Fund Transfer Act to recredit Ognibene's account on the grounds that the withdrawal of the $400 was unauthorized?

9. Griswold and Bateman Warehouse Company stored 337 cases of Chivas Regal Scotch Whiskey for Joseph H. Reinfeld, Inc., in its bonded warehouse. The warehouse receipt issued to Reinfeld limited Griswold and Bateman's liability for negligence to 250 times the monthly storage rate, a total of $1,925. When Reinfeld sent its truck to pick up the whiskey, 40 cases were missing. Reinfeld then brought suit seeking the wholesale market value of the whiskey, $6,417.60. Reinfeld presented evidence of the delivery of the whiskey, the demand for its return, and the failure of Griswold and Bateman to return it. Reinfeld claimed that the burden was on Griswold and Bateman to explain the disappearance of the whiskey.

Griswold and Bateman admitted that it had been negligent, but sought to limit its liability to $1,925. Is Griswold and Bateman's liability limited to $1,925?

10. Everlens Mitchell entered into a written contract with All American Van & Storage to transport and store her household goods. She was to pay the storage charges on a monthly basis. As security, she granted All American a warehouseman's lien. All American had the right to sell the property if the charges remained unpaid for three months and if, in the opinion of the company, such action was necessary to protect the accrued charges. Mitchell fell eight months behind on her payments. On October 20, she received notice that if the unpaid charges, totaling $804.30, were not paid by October 31, her goods would be sold on November 7. Mitchell advised All American that she had a claim pending with the Social Security Administration and would soon receive a large sum of money. This was confirmed to All American by several government officials. However, All American sold Mitchell's property on November 7 for $925.50. At the end of the month, Mitchell received a $5,500 disability payment. She sued All American for improperly selling her goods. The trial court awarded judgment to All American. Should the decision be reversed on appeal?

11. On October 15, Young delivered 207 bags of rice to Atteberry's warehouse and received a non-negotiable receipt. Young then transferred the receipt to Brock for a valuable consideration, and Brock notified Atteberry of the transfer on November 3. Prior to November 3, however, Young had procured a negotiable receipt for the rice along with some other rice he had deposited with Atteberry. Brock presented his non-negotiable receipt to Atteberry and demanded delivery of the rice. Atteberry contended that no rice was being held at the warehouse on Brock's account. Who is correct?

Third-Party Relations of the Principal and the Agent

Chapter Thirty-Four

The Agency Relationship

Chapter Outline

I. Creation of an Agency and Related Subjects
- *A. Formation*
- *B. Capacity*
- *C. Nondelegable Obligations*

II. Agency Concepts, Definitions, and Types
- *A. Authority*
- *B. General and Special Agents*
- *C. Gratuitous Agents*
- *D. Subagents*
- *E. Employees and Independent Contractors*

III. Duties of Agent to Principal
- *A. Agent's Duty of Loyalty*
  - *1. Conflicts of Interest*
  - *2. Confidentiality*
- *B. Agent's Duty to Obey Instructions*
- *C. Agent's Duty to Act with Care and Skill*
- *D. Agent's Duty to Notify the Principal*
- *E. Agent's Duties to Account*

IV. Duties of Principal to Agent
- *A. Duty to Compensate Agent*
- *B. Duties of Reimbursement and Indemnity*

V. Termination of an Agency
- *A. Termination by Act of the Parties*
- *B. Termination by Operation of Law*
- *C. Termination of Agency Powers Given as Security*
- *D. Effect of Termination on Agent's Authority*
  - *1. Notice to Third Parties*

Often, businesses are legally bound by the actions of their employees or other representatives. For example, corporations frequently are liable on contracts their employees make or for torts their employees commit. We take such liability for granted, but why should we? A corporation is an artificial legal person distinct from the officers, employees, and other representatives who contract on its behalf and who may commit torts while on the job. Similarly, a sole proprietor is distinct from the people he may employ. How can these and other business actors be bound on contracts they did not make or for torts they did not commit? The reason is the law of **agency.**

Agency is a two-party relationship in which one party (the **agent**) is authorized to act on behalf of, and under the control of, the other party (the **principal**). Examples include hiring a salesperson to sell goods, retaining an attorney, and engaging a real estate broker to sell a house. Agency law's most important social function has been to stimulate commercial activity. It does so by enabling businesses to increase the number of transactions they can complete within a given time. Without agency, for instance, a sole proprietor's ability to engage in trade would be limited by the need to make each of her purchase or sale contracts in person. As artificial persons, moreover, corporations can act only through their agents.

Agency law divides into two rough categories. The first involves legal relations between the principal and the agent. These include the rules governing formation of an agency, the duties the principal and the agent owe each other, and the ways an agency can be terminated. These topics are the main concern of this chapter. Chapter 35 discusses the principal's and the agent's relations with third parties. Here, our main concerns are the principal's and the agent's liability on contracts the agent makes and for torts the agent commits.

Creation of an Agency and Related Subjects

Formation

An agency is created by the manifested agreement of two parties that one party (the agent) will act for the benefit of the other (the principal) under the principal's direction.[1] As the term *manifested* suggests, the test for an agency's existence is *objective.* If the parties' behavior and the surrounding facts and circumstances indicate an agreement that one person is to act for the benefit and under the control of another, the relationship exists. If the facts establish an agency, neither party need know about the agency's existence or subjectively desire that it exist. In fact, an agency may be present even where the parties expressly say that they do not intend to create it, or intend to create some other legal relationship instead.

Often, parties create an agency by a written contract. But an agency contract may be oral unless state law provides otherwise.[2] Some states, for example, require written evidence of contracts to pay an agent a commission for the sale of real estate. More important, the agency relation need not be contractual at all. Thus, consideration is not necessary to form an agency. As the following *Warren* case illustrates, courts sometimes imply an agency from the parties' behavior and the surrounding circumstances without discussing the need for a contract or for consideration.

Capacity

A principal or agent who lacks the necessary mental capacity when the agency is formed ordinarily can release himself from the agency at his option. Examples include those who are minors or are mentally incapacitated when the agency is created. Of course, incapacity may occur at other times as well; we discuss such situations later in this chapter and in Chapter 35.

As you have seen, corporations can and must appoint agents. In a partnership, each partner normally acts as the agent of the partnership in transacting partnership business,[3] and partnerships can appoint nonpartner agents as well. In addition, corporations, partnerships, and other business organizations themselves can act as agents.

Nondelegable Obligations

Certain duties or acts must be performed personally and cannot be delegated to an agent. Examples include making statements under oath, voting in public elections, and signing a will. The same is true for service contracts in which the principal's personal performance is crucial—for example, certain contracts by lawyers, doctors, artists, and entertainers.

[1]Sometimes it is said that an agency may also be created by *ratification, estoppel,* or *operation of law.* Usually, however, ratification and estoppel are regarded as ways of binding the principal to an agent's actions, not as ways of forming an agency in the first place. Ratification is discussed in Chapter 35, and estoppel resembles the concept of apparent authority discussed later in this chapter and in Chapter 35. It is unusual for an agency to be created by operation of law. An example might be a statute designating a state's secretary of state as an out-of-state motorist's "agent" for purposes of receiving a summons and a complaint in a lawsuit against the motorist.

[2]Usually, the state law in question is the statute of frauds, which is discussed in Chapter 16. Also, it sometimes is said that if the contract the agent is to form must be in writing, the agency agreement likewise must be written. However, it is doubtful whether this "equal dignity rule" enjoys widespread acceptance.

[3]Chapter 37 discusses how agency law operates in the partnership context.

Warren v. United States *613 F.2d 591 (5th Cir. 1980)*

For two years, Bobby and Modell Warren took their cotton crops to certain cotton gins that ginned and baled the cotton. After being so instructed by the Warrens, the gins obtained bids for the cotton from prospective buyers and the Warrens told the gins which bids to accept. Then the gins sold the cotton to the designated buyers, collecting the proceeds. At the Warrens' instruction, the gins deferred payment of the proceeds to the Warrens until the year after the year in which each sale was made.

The Warrens did not report the proceeds as taxable income for the year when the gins received the proceeds, instead including the proceeds in the return for the following year. After an IRS audit, the Warrens

were compelled to treat the proceeds as taxable income for the year when the proceeds were received, and to pay accordingly. The Warrens eventually won a refund action in federal district court. The government appealed, arguing that the gins were agents of the Warrens. Because receipt of proceeds by an agent is receipt by the principal, this would mean that the proceeds were taxable income for the year when they were received by the gins.

Johnson, Circuit Judge The relationship between the Warrens and the gins for the purpose of selling the cotton was indisputably that of principal and agent. The Warrens instructed the gins to solicit bids, the Warrens decided whether to accept the highest price offered, and the Warrens determined whether or not to instruct the gins to hold the proceeds from the sale until the following year. The gins' role in the sale of the cotton was to adhere to the Warrens' instructions. The Warrens were the owners of the cotton held for sale; the Warrens were in complete control of its disposition.

This case is distinguishable from those cases where it was recognized that proceeds from the sale of a crop by a farmer, pursuant to a bona fide arm's-length contract between the buyer and seller calling for payment in the taxable year following delivery, are includable in gross income for the taxable year in which payment is received. In the case at bar the bona fide arm's-length agreement was not between the buyer and seller but rather between the seller and his agent. The income was received by the Warrens' agents in the year of the sale. The fact that the Warrens restricted their access to the sales proceeds does not change the tax status of the money received.

Judgment reversed in favor of the government.

Agency Concepts, Definitions, and Types

Agency law includes various concepts, definitions, and distinctions. These matters often determine the rights, duties, and liabilities of the principal, the agent, and third parties. In addition, they sometimes are important outside agency law. Because these basic topics are so crucial in so many different situations, we outline them together here.

Authority

Although agency law lets people multiply their dealings by employing agents, a principal is not liable for any deal his agent concludes. Normally, an agent can bind his principal only when the agent has **authority** to do so. Authority is an agent's ability to affect his principal's legal relations. It comes in two main forms: **actual authority** and **apparent authority.** Each is based on the principal's manifested consent that the agent may act for and bind the principal. For actual authority this consent must be communicated to the *agent,* while for apparent authority it must be communicated to the *third party.*

Actual authority comes in two forms: **express authority** and **implied authority.** Express authority is created by the principal's *actual words* (whether written or oral). Thus, an agent has express authority to bind her principal in a certain fashion only when the principal has made a fairly precise statement to that effect. However, it is often impractical for a principal to specify the agent's authority fully and exactly. To avoid unnecessarily restricting an agent's ability to represent her principal, agency law also gives agents implied authority to bind their principals. An agent generally has implied authority to do whatever it is reasonable to assume that the principal wanted him to do, given the principal's express statements and the surrounding circumstances. Relevant factors include the principal's express statements, the nature of the agency, the acts reasonably necessary to carry on the agency business, and the acts customarily done when conducting that business.

Sometimes an agent who lacks actual authority may still *appear* to have such authority, and third parties may reasonably rely on this appearance of authority. To protect third parties in such situations, agency law lets agents bind the principal on the basis of their apparent authority. Apparent authority arises

when the principal's behavior causes a third party to reasonably believe that the agent is authorized to act in a certain way. Apparent authority depends on what the principal communicates to the third party—either directly or through the agent. A principal might clothe an agent with apparent authority by making direct statements to the third party, telling an agent to do so, or allowing an agent to behave in a way that creates an appearance of authority. Communications to the agent are irrelevant unless they become known to the third party or affect the agent's behavior. Also, agents cannot give themselves apparent authority, and apparent authority does not exist where an agent creates an appearance of authority without the principal's consent. Finally, the third party must *reasonably* believe in the agent's authority. Trade customs and business practices can help courts determine whether such a belief was reasonable.

Authority is important in a number of agency contexts. Chapter 35 examines its most important agency application—determining a principal's liability on contracts made by his agent. As the following *Stieger* case illustrates, moreover, authority is used outside agency law as well.

Stieger v. Chevy Chase Savings Bank *666 A.2d 479 (D.C. Ct. App. 1995)*

Paul Stieger gave his Chevy Chase Bank credit card to a Ms. Garrett during a business trip. He told her to use the card only for a car rental and for hotel lodging. After Stieger returned from the trip, he found that Garrett had made 15 unauthorized uses of his card. For 13 of these purchases, Garrett signed Stieger's name to the charge slip; for the other two, she signed her own name.

Stieger eventually obtained a $3,200 judgment against Garrett but was able to collect only $750 on that judgment. After Chevy Chase refused to cancel Garrett's unauthorized charges, Stieger sued for a declaration that he should not be liable for those charges. The trial court ruled in Chevy Chase's favor on all 15 charges, and an appellate court ruled in the bank's favor on the 13 charges Garrett signed in Stieger's name. Stieger appealed this ruling.

Pryor, Senior Judge The Truth-in-Lending Act was enacted to protect credit cardholders from unauthorized use by those able to obtain possession of a card from its original owner. The act limits its liability for the cardholder to a maximum of $50 for charges made by third parties that are "unauthorized." However, the act does not limit liability for third-party charges that are made with "actual, implied or apparent authority." Since actual and implied authority are not alleged in this case, the issue is whether Garrett had apparent authority to use the card.

Apparent authority arises when a principal places an agent in a position which causes a third person to reasonably believe that the principal had consented to the exercise of authority the agent purports to hold. Where a credit cardholder voluntarily permits the use of his credit card by another person, the cardholder has authorized the use of that card and is thereby responsible for any charges as a result of that use, even if he requested that the other person not charge over a certain amount or make charges only for specified purposes. Nearly every jurisdiction that has addressed a factual situation where a cardholder voluntarily and knowingly allows another to use his card and that person subsequently misuses the card, has determined that the agent had apparent authority and therefore was not an unauthorized user.

Stieger argues that he had the right to expect Garrett to use the card only for the charges he authorized, and that he cannot be liable for [Garrett's] acting beyond the scope of her authority. Stieger also asserts that Garrett could not reasonably present herself as Paul Stieger, and that a merchant should be required to give greater scrutiny to the person using the card. [However,] Stieger placed Garrett, by voluntarily giving her the card, in such a position as to mislead third persons into believing that [she was] clothed with authority which in fact she [did] not possess. To a merchant, voluntary relinquishment combined with the matching of a signature is generally a reasonable indication of apparent authority to use the

credit card. However, the same cannot be said of the two charges where Garrett signed her own name. It is an unreasonable extension of apparent authority for a merchant to accept charges, where the signatures do not match, without any additional factors to mislead the merchant into believing that the person presenting the card is the agent of the cardholder.

Lower court decision in Chevy Chase's favor on 13 of the 15 charges affirmed.

General and Special Agents

Although it may be falling out of favor with courts, the blurred distinction between general agents and special agents still has some importance. A **general agent** is continuously employed to conduct a series of transactions, while a **special agent** is employed to conduct a single transaction or a small, simple group of transactions. Thus, a continuously employed general manager, construction project supervisor, or purchasing agent normally is a general agent; and a person employed to buy or sell a few objects on a one-shot basis usually is a special agent. In addition to being employed on a continuous basis, general agents often serve for longer periods, perform more acts, and deal with more parties than do special agents.

Gratuitous Agents

An agent who receives no compensation for his services is called a **gratuitous agent.** Gratuitous agents have the same power to bind their principals as do paid agents with the same authority. However, the fact that an agent is gratuitous sometimes lowers the duties principal and agent owe each other and also may increase the parties' ability to terminate the agency without incurring liability.

Subagents

A **subagent** basically is an agent of an agent. More precisely, a subagent is a person appointed by an agent to perform tasks that the agent has undertaken to perform for his principal. For example, if you retain an accounting firm as your agent, the accountant actually handling your affairs is the firm's agent and your subagent. For a subagency to exist, an agent must have the authority to make the subagent *his agent* for conducting the principal's business. Sometimes, however, a party appointed by an agent is not a subagent because the appointing agent only had authority to appoint agents *for the principal.* For instance, sales agents appointed by a corporation's sales manager probably are agents of the corporation, not agents of the sales manager.

When an agent appoints a true subagent, the agent becomes a principal with respect to the subagent, his agent. Thus, the legal relations between agent and subagent closely parallel the legal relations between principal and agent. But a subagent is also the *original principal's* agent. Here, though, the normal rules governing principals and agents do not always apply. We occasionally refer to such situations in the pages ahead.

Employees and Independent Contractors

Many legal questions depend on whether an agent or some other party who contracts with the principal is classed as an **employee** (or servant) or as an **independent contractor.**[4] No sharp line separates employees from independent contractors; the following *Circle C* case lists some factors considered in making such determinations. The most important of these factors is the principal's *right to control the physical details of the work.* Employees typically are subject to such control. Independent contractors, on the other hand, generally contract with the principal to produce some result, and determine for themselves how that result will be accomplished.

Although many employees perform physical labor or are paid on an hourly basis, corporate officers usually are employees as well. Professionals such as brokers, accountants, and attorneys often are independent contractors, although they sometimes are employees. Consider

[4]When are employees and independent contractors agents? Although there is little consensus on this question, this text follows the *Restatement (Second)* position. According to the *Restatement,* employees always are agents, while independent contractors may or may not be agents. An independent contractor is an agent when the tests for the existence of an agency—most important, sufficient control by the principal—are met. See *Restatement (Second) of Agency* §§ 2, 14N, 25, and the Introductory Note following § 218 (1959).

the difference between a corporation represented by an attorney engaged in her own practice and a corporation that maintains a staff of salaried in-house counsel. Finally, franchisees usually are independent contractors.

As Chapter 35 makes clear, the employee–independent contractor distinction often is crucial in determining the principal's liability for an agent's torts. The distinction also helps define the coverage of some employment laws discussed in Chapter 50. Unemployment compensation, the Fair Labor Standards Act (the subject of *Circle C*), and workers' compensation are clear examples.

Reich v. Circle C Investments, Inc. *998 F.2d 324 (5th Cir. 1993)*

Circle C Investments operated two nightclubs featuring topless dancers. The secretary of labor sued to compel Circle C to observe the minimum-wage, maximum-hours, and record-keeping provisions of the Fair Labor Standards Act (FLSA). Following a bench trial, the district court concluded that because the dancers were employees, the FLSA applied to Circle C's nightclubs. Thus, the court enjoined Circle C from further violating the FLSA, and also restrained it from withholding $539,630 in back wages. Circle C appealed.

Reavley, Circuit Judge To determine employee status under the FLSA, we focus on whether the alleged employee, as a matter of economic reality, is economically dependent upon the business to which she renders her services. Our focal inquiry is whether the individual is, as a matter of economic reality, in business for herself. We consider five factors: (1) the degree of control exercised by the alleged employer, (2) the relative investments of the worker and the alleged employer, (3) the degree to which the worker's opportunity for profit and loss is determined by the alleged employer, (4) the skill and initiative required in performing the job, and (5) the permanency of the relationship. These factors are merely aids in determining the underlying question of dependency, and no single factor is determinative.

Degree of Control

The dancers are required to comply with weekly work schedules. Circle C instructs the dancers to charge at least $10 for table dances and $20 for couch dances. The dancers supply their own costumes, but the costumes must meet standards set by Circle C. The dancers can express a preference for a certain type of music, but they do not have the final say. Dancers were expected to mingle with customers when not dancing. Circle C has promulgated many other rules. Circle C enforces [all] these rules by fining infringers. The record fully supports the district court's finding of significant control.

Relative Investment of Worker and Alleged Employer

A dancer's investment is limited to her costumes and a padlock. (One dancer testified that she spends $600 per month on costumes, while another testified that she spends approximately $40 per month.) [However,] a dancer's investment is relatively minor [compared] to the considerable investment Circle C has in operating a nightclub.

Degree to Which Employee's Profit and Loss Determined by Employer

A dancer's initiative, hustle, and costume significantly contribute to the amount of her tips. But Circle C has a significant role in drawing customers to its nightclubs. Circle C is responsible for advertising, location, business hours, maintenance, aesthetics, and beverages and food. Given its control over determinants of customer volume, Circle C exercises a high degree of control over a dancer's opportunity for "profit." The dancers are far more akin to wage earners toiling for a living, than to entrepreneurs seeking a return on their capital investments.

Skill and Initiative Required

The dancers do not need long training or highly developed skills to dance at a Circle C nightclub. The ability to develop and maintain rapport with customers is not the type of "initiative" [relevant here]. A dancer's initiative is essentially limited to decisions involving her costumes and dance routines.

The dancers do not exhibit the skill or initiative indicative of persons in business for themselves.

Permanency of the Relationship

The parties agree, and the district court found, that most dancers have short-term relationships with Circle C.

On balance, the five factors favor employee status. A dancer has no specialized skills and her only real investment is in her costumes. Circle C exercises significant control over a dancer's behavior and opportunity for "profit." The transient nature of the work force is not enough to remove the dancers from the protections of the FLSA. Here, the economic reality is that the dancers are not in business for themselves but are dependent upon finding employment in the business of others.

District court decision on the FLSA's applicability affirmed; case vacated and remanded on other issues.

Duties of Agent to Principal

If an agency is created by contract, the agent must perform according to its terms. Regardless of whether the relationship is contractual, agency law also establishes certain *fiduciary duties* that the agent owes the principal.[5] These duties supplement the duties created by an agency contract. They exist because agency is a relationship of trust and confidence. (Often, however, the parties may eliminate or modify fiduciary duties by agreement.) The principal's many remedies for an agent's breach of her fiduciary duties are beyond the scope of this text.

[5]Despite certain exceptions noted later, a gratuitous agent usually has the same fiduciary duties as a paid agent. But this is true only so long as a gratuitous agent continues to act as an agent. In other words, a gratuitous agent need not perform as promised, he normally can terminate the agency without incurring liability, and his fiduciary duties cease once the agency ends. However, a gratuitous agent *is* liable for failing to perform as promised when his promise causes the principal to rely upon him to undertake certain acts, and the principal suffers losses because she refrained from performing those acts herself.

A subagent owes the agent (his principal) all the duties agents owe their principals. A subagent who knows of the original principal's existence also owes that principal all the duties agents owe their principals, except for duties arising solely from the original principal's contract with the agent. Finally, the agent who appointed the subagent generally is liable to the original principal when the principal is harmed by the subagent's conduct.

Agent's Duty of Loyalty

Because agency is a relationship of trust and confidence, an agent has a **duty of loyalty** to his principal. Thus, an agent must subordinate his personal concerns by: (1) avoiding conflicts of interest with the principal, and (2) not disclosing confidential information received from the principal.

Conflicts of Interest An agent whose interests conflict with the principal's interests may be unable to represent his principal effectively. When conducting the principal's business, therefore, an agent is forbidden to *deal with himself.* For example, an agent authorized to sell property cannot sell that property to himself. Many courts extend the rule to include transactions with the agent's relatives or business associates or with business organizations in which the agent has an interest. However, an agent may engage in self-dealing transactions if the principal consents. For this consent to be effective, the agent must disclose all relevant facts to the principal before dealing with the principal on his own behalf.

Unless the principal agrees otherwise, an agent also is forbidden to *compete with the principal* regarding the agency business so long as he remains an agent. Thus, an agent employed to purchase specific property may not buy it himself if the principal still desires it. Furthermore, an agent ordinarily may not solicit customers for a planned competing business while still employed by the principal.

Finally, an agent who is authorized to make a certain transaction cannot *act on behalf of the other party* to the transaction unless the principal know-

ingly consents. Thus, one ordinarily cannot act as agent for both parties to a transaction without first disclosing the double role to, and obtaining the consent of, both principals. Here, the agent must disclose to each principal all the factors reasonably affecting that principal's decision. Occasionally, though, an agent who acts as a middleman may serve both parties to a transaction without notifying either. For instance, an agent may simultaneously be employed as a "finder" by a firm seeking suitable businesses to acquire and a firm looking for prospective buyers, so long as neither principal expects the agent to advise it or negotiate for it.

Confidentiality Unless otherwise agreed, an agent may not *use or disclose confidential information* acquired through the agency. Confidential information means facts that are valuable to the principal because they are not widely known or that would harm the principal's business if they became widely known. Examples include the principal's business plans, financial condition, contract bids, technological discoveries, manufacturing methods, customer files, and other trade secrets.[6] In the absence of an agreement to the contrary,[7] an agent may compete with her principal after termination of the agency. But as the following *ABKCO* case illustrates, the duty not to use or disclose confidential information continues.[8] The former agent may, however, utilize general knowledge and skills acquired during the agency.

[6]Liability for misappropriation of trade secrets is discussed in Chapter 8.
[7]Agreements not to compete are discussed in Chapter 15.
[8]On the patent and trade secrets problems that arise when an employee or a former employee tries to utilize ideas, discoveries, or inventions found or created during the course of her employment, see Chapter 8.

ABKCO Music Inc. v. Harrisongs Music, Ltd. *722 F.2d 988 (2d Cir. 1983)*

In 1963, a song called "He's So Fine" was a huge hit in the United States and Great Britain. In February 1971, Bright Tunes Music Corporation, the copyright holder of "He's So Fine," sued ex-Beatle George Harrison and Harrisongs, Music, Ltd. in federal district court. Bright Tunes claimed that the Harrison composition "My Sweet Lord" infringed its copyright to "He's So Fine." At this time, Harrison's business affairs were handled by ABKCO Music, Inc., and Allen B. Klein, its president. Shortly after the suit began, Klein unsuccessfully tried to settle it by having ABKCO purchase Bright Tunes.

Shortly thereafter, Bright Tunes went into receivership, and it did not resume the suit until 1973. At this time, coincidentally, ABKCO's management contract with Harrison expired. In late 1975 and early 1976, however, Klein continued his efforts to have ABKCO purchase Bright Tunes. As part of these efforts, he gave Bright Tunes three schedules summarizing Harrison's royalty income from "My Sweet Lord," information he possessed because of his previous service to Harrison. Throughout the 1973–76 period, Harrison's attorneys had been trying to settle the copyright infringement suit with Bright Tunes. Because Klein's activities not only gave Bright Tunes information about the economic potential of its suit but also gave it an economic alternative to settling with Harrison, Klein may have impeded Harrison's efforts to settle.

When the copyright infringement suit finally came to trial in 1976, the court found that Harrison had infringed Bright Tunes' copyright. The issue of damages was scheduled for trial at a later date and this trial was delayed for some time. In 1978, ABKCO purchased the "He's So Fine" copyright and all rights to the infringement suit from Bright Tunes. This made ABKCO the plaintiff in the 1979 trial for damages on the infringement suit. At trial, Harrison counterclaimed for damages resulting from Klein's and ABKCO's alleged breaches of the duty of loyalty. Finding a breach of duty, the district judge issued a complex order reducing ABKCO's recovery. ABKCO appealed.

Pierce, Circuit Judge The relationship between Harrison and ABKCO prior to termination of the management agreement in 1973 was that of principal and agent. An agent has a duty not to use confidential knowledge acquired in his employment in competition with his principal. This duty exists as

well after the employment as during its continuance. On the other hand, use of information based on general business knowledge is not covered by the rule, and the former agent is permitted to compete with his former principal in reliance on such publicly available information. The principal issue before us, then, is whether Klein (hence, ABKCO) improperly used confidential information, gained as Harrison's former agent, in negotiating for the purchase of Bright Tunes' stock in 1975–76.

One aspect of this inquiry concerns the nature of the schedules of "My Sweet Lord" earnings which Klein furnished to Bright Tunes in connection with the 1975–76 negotiations. It appears that at least some of [this] information was confidential. The evidence is not at all convincing that the information was publicly available.

Another aspect of the breach of duty issue concerns the timing and nature of Klein's entry into the negotiation picture and the manner in which he became a plaintiff in this action. We find this case analogous to those where an employee, with the use of information acquired through his former employment, completes for his own benefit a transaction originally undertaken on the former employer's behalf. Klein had commenced a purchase transaction with Bright Tunes in 1971 on behalf of Harrison, which he pursued on his own account after termination of his fiduciary relationship with Harrison. Klein pursued the later discussions armed with the intimate knowledge not only of Harrison's business affairs, but of the value of this lawsuit. Taking all of these circumstances together, we agree that Klein's conduct during the period 1975–78 did not meet the standard required of him as a former fiduciary.

District court decision in Harrison's favor on the breach of duty issue affirmed.

Agent's Duty to Obey Instructions

Because an agent acts under the principal's control and for the principal's benefit, she has a duty to *obey the principal's reasonable instructions* for carrying out the agency business. However, a gratuitous agent need not obey his principal's order to continue to act as an agent. Also, agents generally have no duty to obey orders to behave illegally or unethically. Thus, a sales agent need not follow directions to misrepresent the quality of the principal's goods, and professionals such as attorneys and accountants are not obligated to obey directions that conflict with the ethical rules of their professions.

Agent's Duty to Act with Care and Skill

A paid agent must *possess and exercise the degree of care and skill* that is standard in the locality for the kind of work the agent performs. A gratuitous agent need only exercise the care and skill required of nonagents who perform similar gratuitous undertakings. Paid agents who represent that they possess a higher than customary level of skill may be held to a correspondingly higher standard of performance. Similarly, an agent's duty may change if the principal and the agent agree that the agent must possess and exercise greater or lesser than customary care and skill.

Agent's Duty to Notify the Principal

An agent must promptly communicate to the principal matters within the agent's knowledge that are reasonably relevant or material to the agency business and that he knows or should know are of concern to the principal. The basis for the duty to notify is the principal's interest in being informed of matters that are important to the agency business.

However, there is no duty to notify where the agent receives privileged or confidential information. For example, an attorney may acquire confidential information from a client and thus be obligated not to disclose it to a second client. If the attorney cannot properly represent the second client without revealing this information, he should refuse to represent that client.

The following *Olsen* case involves both the agent's duty to notify and his duty not to act on behalf of the other party.

Olsen v. Vail Associates Real Estate, Inc. *935 P.2d 975 (Colo. Sup. Ct. 1997)*

Following the death of J. Perry Olsen, his ranch (the estate property) was put on the market through an open listing. Initially, the listing included an adjacent parcel of land (the children's property) owned by Olsen's children. In March 1989, Vail Associates Real Estate, Inc. introduced the children to Magnus Lindholm, who was interested in buying both properties. Eventually, the Olsen children decided not to include the children's property in the sale and withdrew that parcel from the negotiations. Lindholm felt that ownership of the estate property alone was not sufficient to ensure control over the development of the area in which both properties were located. Lindholm's attorney therefore suggested that he explore the purchase of the only other parcel of land in the area, a ranch owned by Del Rickstrew (the Rickstrew property), because that property had the primary access roads to both the estate property and the children's property.

In December 1989, Lindholm asked Vail Associates to inquire whether the Rickstrew property was available for purchase. However, Rickstrew refused to negotiate through Vail Associates or any other real estate agent and demanded to negotiate personally with Lindholm. On January 5, 1990, Lindholm and Rickstrew commenced preliminary negotiations. During this time, Vail Associates performed certain tasks to facilitate the arrangement, such as introducing the parties, providing a model contract, and delivering a sealed package of unknown content to Rickstrew. However, Vail Associates did not directly participate in the discussions or negotiations between Rickstrew and Lindholm.

On January 13, 1990, Lindholm agreed to purchase the Rickstrew property, contingent upon a closing on the sale of the estate property. Although aware that negotiations were taking place, Vail Associates did not inform the Olsens that Lindholm was attempting to purchase the Rickstrew property. On January 18, 1990, Lindholm signed contracts to purchase both the estate property and the Rickstrew property. On March 20, 1990, the parties closed on the estate property, at which time the Olsen children received their asking price, and Vail Associates received its commission. The closing on the Rickstrew property occurred in June 1990; Vail Associates did not receive a commission for that sale. Lindholm paid $6,000 per acre for the Rickstrew property and $400 per acre for the estate property.

Upon learning of the sale of the Rickstrew property and the price Lindholm had paid for that property, the Olsens sued Vail Associates, alleging a breach of fiduciary duty. After a bench trial, the trial court entered judgment for Vail Associates and against the Olsens. The court of appeals affirmed the trial court's judgment. The Olsens appealed to the Colorado Supreme Court.

Scott, Justice A real estate broker owes a fiduciary duty of good faith and loyalty to its principal, the seller. To discharge its duty, a real estate broker or agent must disclose all facts relative to the subject matter of the agency relationship that may be material to the decision the principal is about to make. The Olsens contend that Vail Associates breached the fiduciary duty it owed to them by not revealing that Lindholm was negotiating to purchase the Rickstrew property and the ultimate sale price of that property.

A breach of fiduciary duty occurs if the broker, as agent, conceals from the seller, as principal, material information, i.e., information that bears upon the transaction in question. An agent is required to disclose to the principal any facts which might reasonably affect the principal's decision. Thus, the question presented here is whether the information known to and withheld by Vail Associates would, if disclosed, have assumed actual significance in the deliberations of the Olsens in regard to the sale of the estate property or significantly altered the total mix of information available to them. The trial court concluded that, although Vail Associates knew that Lindholm was negotiating to purchase the Rickstrew property, it was not aware of any specific facts—e.g., that a contract had actually been entered into, its details, or the sale price—until after Lindholm and the Olsens had entered into a contract for the sale of the estate property.

It was not knowledge of Lindholm's negotiations for the Rickstrew property that would have been valuable to the Olsens, but rather the actual price offered or paid for that property. The Olsens'

attorney testified that, in the past, other potential buyers' negotiations with Rickstrew had not caused the Olsens to alter their position in regard to the estate property and that only the fact of a contract for the sale of the Rickstrew property and the price to be paid under such contract would have been material to the deliberations of the Olsens in their dealings with Lindholm. The Olsens' attorney further testified that it was widely assumed that, for purposes of access, any potential purchaser of the estate property, including Lindholm, would also attempt to purchase the Rickstrew property. Therefore, we do not consider failure to disclose the fact of preliminary negotiations between Lindholm and Rickstrew to be material to the Olsens.

The Olsens testified and the trial court recognized that the per-acre price of the Rickstrew property would have been valuable information to the Olsens in their dealings with Lindholm. Counsel for Vail Associates conceded at oral argument before this court that if Vail Associates had known of the sale price of the Rickstrew property prior to the signing of the contract for the sale of the estate property, it would have had a duty to disclose such information. However, the trial court determined that Vail Associates did not have this information prior to the signing of the sale contract for the estate property and therefore could not have disclosed it to the Olsens. Although Vail Associates did not disclose this [price] information even after it learned of it, the Olsens failed to demonstrate how knowledge of the sale price after the contract for the estate property was signed would have in any way affected their decisionmaking as it related to the transaction. We therefore conclude that the trial court's determination that any omission by Vail Associates was not material is amply supported in the record and should not be disturbed on review.

The Olsens also assert that Vail Associates breached its fiduciary duty by engaging in a dual agency. In the context of residential real estate transactions, it is a widely accepted rule of agency law that a real estate broker stands in an agency relationship with the seller. However, no such agency relationship generally exists between the selling broker and the buyer in a residential real estate transaction, nor is any such agency created solely on the basis of the selling broker's contacts with the purchaser and efforts expended to find the purchaser a home. Under Colorado law, a real estate broker or salesperson is expressly prohibited from engaging in a dual agency—i.e., representing both the seller and the buyer in the same real estate transaction—unless the parties know of and consent to the arrangement. Nothing, however, precludes a real estate broker from representing different principals in different transactions. Vail Associates did not engage in a dual agency relationship as to the sale of the estate property.

Moreover, although not directly pertinent to the question of a dual agency, we agree that Vail Associates did not act as agents for Lindholm in the sale of the Rickstrew property. First, the record reveals that, in connection with the sale of the estate property, Vail Associates only had contact with Lindholm which was necessary to facilitate the sale. Indeed, even Vail Associates' contact with Lindholm regarding the Rickstrew property was made in an effort to sell the estate property. Second, Vail Associates was not involved directly with Lindholm's attempt to purchase the Rickstrew property because Mr. Rickstrew had specifically refused to deal with real estate brokers. Vail Associates performed only certain ministerial tasks, such as contacting Rickstrew, introducing him to Lindholm, and assembling a "discussion draft contract," and had done so only because it knew that Lindholm would not purchase the estate property without simultaneously purchasing the Rickstrew property. Finally, while Vail Associates received a substantial commission for the sale of the estate property, it received no commission for the sale of the Rickstrew property.

Judgment in favor of Vail Associates affirmed.

Agent's Duties to Account

An agent's duties of loyalty and care require that she give the principal any money or property received in the course of the agency business. This includes profits resulting from the agent's breach of the duty of loyalty, or other duties. It also includes incidental benefits received through the agency business. Examples include bribes, kickbacks, and gifts from parties with whom the agent deals on the principal's behalf.

However, the principal and the agent may agree that the agent can retain certain benefits received during the agency. Courts may imply such an agreement when it is customary for agents to retain tips or accept entertainment while doing the principal's business.

Another type of **duty to account** concerns agents whose business involves collections, receipts, or expenditures. Such agents must keep accurate records and accounts of all transactions and disclose these to the principal once the principal makes a reasonable demand for them. Also, an agent who obtains or holds property for the principal usually may not commingle that property with her own property. For example, an agent ordinarily cannot deposit the principal's funds in her own name or in her own bank account.

Duties of Principal to Agent

If an agency is formed by contract, the contract normally states the duties the principal owes the agent. In addition, the law implies certain duties from the existence of an agency relationship, however formed. The most important of these duties are the principal's obligations to **compensate** the agent, to **reimburse** the agent for money spent in the principal's service, and to **indemnify** the agent for losses suffered in conducting the principal's business.[9] These duties generally can be eliminated or modified by agreement between the parties. The agent's various remedies for breach of these duties are beyond the scope of this text.

Duty to Compensate Agent

If the agency contract states the compensation the agent is to receive, it usually controls questions about the agent's pay. In other cases, the relationship of the parties and the surrounding circumstances determine whether and in what amount the agent is to be compensated. If there is no contract provision on compensation, for example, a principal generally is not required to pay for undertakings that she did not request, services to which she did not consent, and tasks that typically are undertaken without pay. Also, a principal usually need not compensate an agent who has materially breached the agency contract or has committed a serious breach of a fiduciary duty. Where compensation is due but its amount is not expressly stated, the amount is the market price or the customary price for the agent's services or, if neither is available, their reasonable value.

Sometimes an agent's compensation depends on the accomplishment of a specific result. For instance, a plaintiff's attorney may be retained on a contingent fee basis (being paid a certain percentage of the recovery if the suit succeeds or is settled), or a real estate broker may be entitled to a fee only if a suitable buyer is found. In such cases, the agent is not entitled to compensation unless he achieves the result within the time stated or, if no time is stated, within a reasonable time. This is true no matter how much effort or money the agent expends. However, the principal must cooperate with the agent in achieving the result and must not do anything to frustrate the agent's efforts. Otherwise, the agent is entitled to compensation despite the failure to perform as specified.

Duties of Reimbursement and Indemnity

If an agent makes expressly or impliedly authorized expenditures while acting on the principal's behalf, the agent normally is entitled to **reimbursement** for those expenditures. Unless otherwise agreed, for example, an agent requested to make overnight trips as part of his agency duties can recover reasonable transportation and hotel expenses.

A principal's duty of reimbursement overlaps with her duty of **indemnity.** Agency law implies a promise by the principal to indemnify an agent for losses that result from the agent's authorized activities. These include authorized payments made on the principal's behalf and payments on contracts on which the agent was

[9] Although there is no duty to compensate a gratuitous agent, the principal still owes such an agent the other two duties in the absence of an agreement to the contrary. An agent's duties to a subagent are the same as a principal's duties to an agent. If there is no agreement to the contrary, however, the original principal has no contractual liability to a subagent. For example, such a principal normally is not obligated to compensate a subagent. But a principal must reimburse and indemnify subagents as he would agents.

A principal may also have other duties besides the three listed, including the duties to provide the agent with an opportunity for service, not interfere with the agent's work, keep accounts, act in a manner not harmful to the agent's reputation or self-esteem, and (in the case of employees) maintain a safe workplace. The last duty has been greatly altered, if not superseded, by workers' compensation systems and the Occupational Safety and Health Act, which are discussed in Chapter 50.

authorized to become liable. A principal may also have to indemnify an agent if the agent's authorized acts constitute a breach of contract or a tort for which the agent is required to pay damages to a third party.

So long as the principal did not benefit from such behavior, however, he is *not* required to indemnify an agent for losses resulting: (1) from unauthorized acts, or (2) solely from the agent's negligence or other fault. Even where the principal directed the agent to commit a tortious act, moreover, there is no duty to indemnify if the agent knew the act was tortious. But the principal must indemnify the agent for tort damages resulting from authorized conduct that the agent did not believe was tortious. For example, if a principal directs his agent to repossess goods located on another's property and the agent, believing her acts legal, becomes liable for conversion or trespass, the principal must indemnify the agent for the damages the agent pays.

Termination of an Agency

An agency can terminate in many ways.[10] These fall under two general headings: (1) termination by act of the parties, and (2) termination by operation of law.

Termination by Act of the Parties

Termination by act of the parties occurs:

1. *At a time or upon the happening of an event stated in the agreement.* If no such time or event is stated, the agency terminates after a reasonable time.

2. *When a specified result has been accomplished, if the agency was created to accomplish a specified result.* For example, if an agency's only objective is to sell certain property, the agency terminates when the property is sold.

3. *By mutual agreement of the parties,* at any time.

4. *At the option of either party.* This is called **revocation** when done by the principal and **renunciation** when done by the agent. Revocation or renunciation occurs when either party manifests to the other that he does not wish the agency to continue. This includes conduct inconsistent with the agency's continuance. For example, an agent may learn that his principal has hired another agent to perform the same job.

A party can revoke or renounce even if this violates the agency agreement. However, although either party has the *power* to terminate in such cases, there is no *right* to do so. This means that where one party terminates in violation of the agreement, she need not perform any further, but she may be liable for damages to the other party. However, a gratuitous agency normally is terminable by either party without liability. Also, the terminating party is not liable where the revocation or renunciation is justified by the other party's serious breach of a fiduciary duty.

Termination by Operation of Law

Termination by operation of law usually involves situations where it is reasonable to believe that the principal would not wish the agent to act further, or where accomplishment of the agency objectives has become impossible or illegal. Although courts may recognize exceptions in certain cases, an agency relationship usually is terminated by:

1. *The death of the principal.* This normally is true even where the agent has no notice of the principal's death.

2. *The death of the agent.*

3. *The principal's permanent loss of capacity.* This is a *permanent* loss of capacity occurring *after* creation of the agency—most often, due to the principal's insanity. The principal's permanent incapacity ends the agency even without notice to the agent. The *Trepanier* case below presents one approach to a related problem: the principal's *temporary* incapacity.

4. *The agent's loss of capacity to perform the agency business.* The scope of this basis for termination is unclear. As Chapter 35 states, an agent who becomes insane or otherwise incapacitated after the agency is formed still can bind his principal to contracts with third parties. Thus, it probably makes little sense to treat the agency as terminated in such cases. As a result, termination under this heading may be limited to such situations as the loss of a license needed to perform agency duties.

5. *Changes in the value of the agency property or subject matter* (e.g., a significant decline in the value of land to be sold by an agent).

[10] The rules stated below generally apply to the termination of a subagent's authority as well. In general, a subagency terminates when relations between either the principal and the agent or the agent and the subagent are terminated in any of the ways to be described.

6. *Changes in business conditions* (e.g., a much lower supply and a much increased price for goods to be purchased by an agent).

7. *The loss or destruction of the agency property or subject matter or the termination of the principal's interest therein* (e.g., where a house to be sold by a real estate broker burns down or is taken by a mortgage holder to satisfy a debt owed by the principal).

8. *Changes in the law that make the agency business illegal* (e.g., where drugs to be sold by an agent are banned by the government).

9. *The principal's bankruptcy*—as to transactions the agent should realize the principal no longer desires. For example, consider the likely effect of the principal's bankruptcy on an agency to purchase antiques for the principal's home versus its likely effect on an agency to purchase necessities of life for the principal.

10. *The agent's bankruptcy*—where the agent's financial condition affects his ability to serve the principal. This could occur where an agent is employed to purchase goods on his own credit for the principal.

11. *Impossibility of performance by the agent.* This covers various events, some of which fall within the categories just stated. The *Restatement*'s definition of impossibility, for example, includes: (*a*) destruction of the agency subject matter, (*b*) termination of the principal's interest in the agency subject matter (as, for example, by the principal's bankruptcy), and (*c*) changes in the law or in other circumstances that make it impossible for the agent to accomplish the agency's aims.

12. *A serious breach of the agent's duty of loyalty.*

13. *The outbreak of war*—where this leads the agent to the reasonable belief that his services are no longer desired. An example might be the outbreak of war between the principal's country and the agent's country.

Termination of Agency Powers Given as Security

An agency power given as security for a duty owed by the principal, sometimes called an *agency coupled with an interest,* is an exception to some of the termination rules just discussed. Here, the agent has an interest in the subject matter of the agency that is distinct from the principal's interest and that is not exercised for the principal's benefit. This interest exists to benefit the agent or a third person by securing performance of an obligation owed by the principal. A common example is a secured loan agreement authorizing a lender (the agent) to sell property used as security if the debtor (the principal) defaults. For instance, suppose that Allen lends Peters $100,000 and Peters gives Allen a lien or security interest on Peters's land to secure the loan. The agreement might authorize Allen to act as Peters's "agent" to sell the land if Peters fails to repay the loan.

Because the power given the "agent" in such cases is not for the principal's benefit, it sometimes is said that an agency coupled with an interest is not truly an agency. In any event, courts distinguish it from genuine agency relations in which the agent is compensated from the profits or proceeds of property held for the principal's benefit. For example, if an agent is promised a commission for selling the principal's property, the relationship is not an agency coupled with an interest. Here, the power exercised by the agent (selling the principal's property) benefits the principal.

Why is the agency coupled with an interest important? The main reason is that it is not terminated by: (1) the principal's revocation, (2) the principal's or the agent's loss of capacity, (3) the agent's death, and (4) (usually) the principal's death. However, unless an agency coupled with an interest is held for the benefit of a third party, the agent can voluntarily surrender it. Of course, an agency coupled with an interest terminates when the principal performs her obligation.

Trepanier v. Bankers Life & Casualty Co. *706 A.2d 943 (Vt. Sup. Ct. 1997)*

On March 2, 1993, Bankers Life & Casualty Co. proposed in a letter addressed to Gaston Trepanier that he accept a lump sum settlement of $20,000 in exchange for release from a disability income policy that paid him a $400-a-month benefit. The letter stated that should Mr. Trepanier decide "to accept our offer," he could "jot a note at the bottom of this letter and return it." According to Mrs. Clemence Trepanier, she discussed the idea with her husband, who decided to accept the offer and directed her to write a note on the bottom of the March letter as directed. She did so on April 6, and placed the letter in an envelope, intending to

send it the following day. On April 7, Mr. Trepanier was hospitalized and the letter was not mailed. Mr. Trepanier fell into a coma on April 8. On April 12, Mrs. Trepanier tried to accept the offer by mailing the letter to Bankers Life. On April 14, Mr. Trepanier died. Bankers Life subsequently revoked its offer and issued a final disability payment.

Clemence Trepanier then filed a breach-of-contract action against Bankers Life on behalf of her husband's estate, alleging that a valid contract had been formed when she accepted the $20,000 offer on her husband's behalf. Mrs. Trepanier moved for partial summary judgment on the issue of whether a binding contract had been formed. In response, Bankers Life filed a cross-motion for summary judgment, arguing that Clemence Trepanier's authority to act as agent for her husband terminated when he lapsed into a coma on April 8, four days before she mailed the acceptance. The trial court denied Clemence's motion and entered a summary judgment in favor of Bankers Life. Clemence appealed, and the case found its way to the Supreme Court of Vermont.

By the Court The sole issue on appeal is whether Mrs. Trepanier's agency terminated when Mr. Trepanier lapsed into a coma on April 8. The general rule is that an agency terminates with the death or permanent incapacity of the principal. Mrs. Trepanier argues that her power of agency was coupled with an interest, an exception to the general rule which allows the agency to survive the death or permanent incapacity of the principal. We need not decide whether Mrs. Trepanier's agency fits within this exception, however, for an individual in a comatose state is generally not considered to be permanently incapacitated under general agency principles. The rule has been stated as follows: "A comatose person is mentally incompetent while his coma continues and . . . when an agent under a power of attorney acts during the mental incapacity of a principal who has not been adjudicated incompetent and for whom no court-appointed committee or conservator has been designated, the act is at most voidable, and not void." This rule is predicated on the view that comatose individuals are only temporarily incapacitated, as they may recover, and acts by individuals temporarily incapacitated are at most voidable. With respect to such voidable contracts, the power to affirm or disaffirm rests solely with the principal or an authorized representative, which can include the estate of the principal. The contract here was not voided by Mr. Trepanier, and there is no claim or evidence that he would have done so prior to his death.

We hold, therefore, that the trial court erred in concluding as a matter of law that Mrs. Trepanier's agency terminated when Mr. Trepanier lapsed into a coma, and in entering summary judgment on this basis.

Summary judgment in favor of Bankers Trust reversed; case remanded to the trial court.

Effect of Termination on Agent's Authority

Sometimes former agents continue to act on their ex-principals' behalf even though the agency has ended. Do such "agents" still have authority to bind their former principals? As Figure 1 states, once an agency terminates by any of the means just described, the agent's *express* and *implied* authority end as well.

Third parties who are unaware of the termination, however, may reasonably believe that an ex-agent still has authority. To protect third parties who rely on such a reasonable appearance of authority, an agent's *apparent authority* often persists after termination. Thus, a former agent may be able to bind the principal under his apparent authority even though the agency has ended. But as Figure 1 also states, apparent authority ends where the termination was caused by: (1) the principal's death, (2) the principal's loss of capacity, or (3) impossibility.[11] Note from the previous discussion that certain other bases for termination may also end the agent's apparent authority because they fit within the broad category of impossibility.

Notice to Third Parties Apparent authority also ends when the third party receives appropriate notice of the termination. In general, any facts known to the third party that reasonably indicate the agency's termination constitute suitable notice. Some bases for termination

[11] *Restatement (Second) of Agency* § 124A, comment a; and § 133 (1959).

Figure 1 *Termination of an Agent's Authority after Termination of the Agency*

Type of Termination	Actual Authority	Apparent Authority
By Acts of the Parties	Ceases	Persists unless appropriate notice or notification to third party
By Operation of Law	Ceases	Ceases if termination by principal's death or loss of capacity, or by impossibility; persists in other cases unless appropriate notice or notification to third party

by operation of law (e.g., changed business conditions) may provide such notice.

To protect themselves against unwanted liability, however, prudent principals may want to notify third parties themselves. The required type of notification varies with the third party in question.

1. *For third parties who have previously dealt with the agent or who have begun to deal with the agent,* ***actual notification*** *is necessary.* This can be accomplished by: (1) a direct personal statement to the third party; or (2) a writing delivered to the third party personally, to his place of business, or to some other place reasonably believed to be appropriate.

2. *For all other parties,* ***constructive notification*** *suffices.* Usually, these other parties are aware of the agency but did no business with the agent. Constructive notification normally can be accomplished by advertising the agency's termination in a newspaper of general circulation in the place where the agency business regularly was carried on. If no suitable publication exists, notification by other means reasonably likely to inform third parties—for example, posting a notice in public places—may be enough.

Ethical and Public Policy Concerns

1. Under one of the agent's duties to account, an agent might be required to return to the principal gifts from third parties with whom the agent deals on the principal's behalf. Where the gift is a genuine token of appreciation, the principal may be getting a windfall. What can justify this result?

2. A well-known ethical theory called utilitarianism generally asserts that the moral worth of actions should be judged by their tendency to promote net aggregate satisfaction. Some people regard the maximization of social wealth as a reasonable measuring rod for net aggregate satisfaction. Under a wealth-maximization criterion, does the rule forbidding ex-agents from using or disclosing confidential information make sense? How might the rule promote wealth-maximization? How might it hinder wealth-maximization?

What other ethical considerations might justify the rule against the disclosure of confidential information by an ex-agent? Are they utilitarian in the sense defined above?

Problems and Problem Cases

1. When does it make a difference whether or not an agent is a gratuitous agent? Go through the chapter and identify as many special rules for gratuitous agents as you can.

2. VIP Tours, Inc. arranged tours of central Florida's attractions. Cynthia Hoogland conducted 29 such tours for VIP between July 1980 and March 1981. Both Hoogland and VIP considered Hoogland an independent contractor. She worked for VIP only when it needed her services, and could reject particular assignments. She was also free to work for other tour services, and did so.

Once Hoogland accepted a job from VIP, she was told where to report and was given instructions about the job. She also had to use a VIP-furnished vehicle and wear a uniform with the VIP logo when conducting tours. Aside from ensuring that she departed on time, however, VIP did not tell her how long to stay or what kind of tour to conduct at each tourist attraction. Finally, Hoogland was paid on a per tour basis.

Hoogland later filed a claim for unemployment compensation benefits with the Florida Division of Labor and Employment Security. The Division concluded that she was entitled to these benefits because

she was VIP Tours' employee. Was Hoogland an employee or an independent contractor?

3. Tadlock was a tenant on Lest's farm. Without any authorization from Lest, Tadlock ordered a new irrigation pump for the farm from Killinger. Tadlock told Killinger that he was Lest's tenant and that he had authority to purchase a new pump on Lest's behalf. Killinger then installed a new pump and billed Lest for $2,048. Lest denied liability on this bill, claiming that Tadlock's purchase was unauthorized. Tadlock did not have actual authority to purchase the pump, but was his statement to Killinger enough to give him *apparent* authority to make the purchase?

4. *Video Case.* Jack runs a video card shop. Linda, who knows little or nothing about baseball or baseball cards, agreed to run the shop for Jack while he went out for dinner. Jack told Linda that she could sell any card for the price marked on the card. Then, he pointed to a case containing the more expensive cards, and said that he might negotiate the price on those cards if customers would wait until he returned. Shortly after Jack left, Linda sold a small boy an Ernie Banks rookie card for $12. The card bore a price sticker which stated: "1200." The boy apparently was unaware of the card's true value and did not try to negotiate its price. Did Linda have express, implied, or apparent authority to sell the card for $12? In any event, on what bases might Jack sue her for his losses?

5. *Video Case.* See "Martin Manufacturing." Martin, the president of Martin Manufacturing, fires a purchasing agent named Mitch because Mitch has been taking kickbacks from suppliers. Martin also withholds Mitch's last paycheck until Martin can determine how much Mitch's misbehavior has cost him.

Has Mitch breached any fiduciary duty or duties to Martin? If so, which ones? Will Mitch be required to give Martin the amount of any kickbacks he has received? Can Martin fire Mitch without incurring liability under these circumstances? Finally, is Martin justified in withholding Mitch's paycheck?

6. Ronald Chernow is in the business of auditing telephone bills for customers. In October of 1982, Chernow hired Angelo Reyes as an auditor. The employment lasted until July of 1983, when Reyes either quit or was fired. Prior to leaving Chernow's employment and without his knowledge, Reyes took various steps to form and operate a business that competed with Chernow's business. Most important, he obtained three auditing contracts and performed work under those contracts during that period. He also solicited a fourth account, but did no work for that firm until after ceasing to work for Chernow. None of these businesses was an existing customer of Chernow. Reyes's soliciting and auditing activities did not take place during his regular working hours, which he devoted to Chernow's business. Is Reyes liable to Chernow for breach of an agent's duty of loyalty?

7. In July of 1987, Marsha Levin bought her daughter a round-trip plane ticket from New York City to Paris from Kasmir World Travel, Inc. Upon arriving in Paris, Mrs. Levin's daughter was denied entry and was placed on the next return flight to the United States because she did not have a visa. The apparent reason for the visa requirement was the French government's effort to deal with terrorist activities directed at Americans abroad. Neither Mrs. Levin nor her daughter was aware of the requirement; indeed, a few years earlier Mrs. Levin had traveled to France without being required to present a visa. Did Kasmir breach its duty to notify the Levins about matters relevant to the agency business?

8. In February 1989, Thomas Fix arranged for a Florida vacation package for himself and his sister with Travel Help, a travel agency. The travel agent selected an Eastern Airlines package that included Eastern vouchers for a rental car, Howard Johnson's Fountain Park, and Sea World. Aware of the labor and other problems Eastern was experiencing at that time, Fix's sister contacted the agent several times requesting that all the arrangements be made with another airline. The agent assured her that the flights could be changed and that the vouchers would be honored. After Eastern went into bankruptcy on March 9, 1989, the agent arranged for Fix and his sister to be transported to Florida on a different airline. After they arrived, however, the providers of the voucher bookings refused to honor Eastern's vouchers. Did the agent breach a duty to Fix (and his sister)? If so, which one? You can assume that the travel agent was acting for both Fix and his sister, and that the communications to the agent by Fix's sister were communications to an agent by his principal.

9. Southeastern Agri-Systems, Inc., was an agent for Otto Niederer. James Stanford was Agri-Systems' president and sole employee. Niederer instructed Stanford to accept payment for the sale of some equipment

owned by Niederer, to deduct his commission from the payment, and to wire the remainder to Niederer. Instead, Stanford diverted the funds to his own purposes and refused to pay Niederer the amount due. When sued individually for breach of the agent's duty to obey, Stanford argued that Niederer had employed Agri-Systems as its agent, that he was merely an employee of Agri-Systems, and that he thus owed no duty to Niederer. Is Stanford correct?

10. Wormhoudt Lumber Company employed Jon Cloyd to find construction jobs that would utilize Wormhoudt's materials. Cloyd would find property owners seeking to build, and link them up with construction contractors. Cloyd computed costs for materials and labor, including a profit for the contractor; if the contractor and the owner were satisfied with the terms, they would make a contract between themselves. If the contractor bought his materials from Wormhoudt and paid it within 30 days of the billing, it would get a 10 percent discount. Cloyd persuaded several contractors to split the 10 percent discount with him, in exchange for being recommended by him. Has Cloyd breached his duty to account?

11. Stanley Mazur owned an Oldsmobile Cutlass and a small Subaru pickup truck. He asked his insurance agent, Ken Curtis, to arrange "full coverage" on the truck similar to the coverage on his Cutlass. Although the policy on the Cutlass included personal injury protection, Curtis negligently failed to include such protection in the policy he obtained for the Subaru. Later, Mazur suffered personal injury from an accident in which he was involved while driving the Subaru. Because the policy did not cover such injury, he was unable to recover for it from the insurer, the Selected Risks Insurance Company.

Mazur recovered against Curtis for Curtis's failure to procure the requested coverage. Curtis then sued to have Selected indemnify him for this loss. Is Selected required to indemnify Curtis? Why or why not? Assume that Curtis was acting as an agent for Selected as well as for Mazur.

12. DVD *Video Case.* See "Martin Manufacturing." Immediately after being fired by Martin Manufacturing in Problem 5 of this chapter, Mitch decides to squeeze one last bit of profit from his relationship with Martin. He calls a supplier with whom he has dealt on many occasions and orders several cases of fasteners on Martin's behalf. Later, he resells the fasteners himself, pocketing the price. Is Martin liable to the supplier for the fasteners? In any event, what should Martin do in order to protect itself in cases like this one?

13. Brenda Smith was injured by a falling ceiling in a building owned by the Cynfax Corporation. She retained Floyd Goldsman as her attorney, and Goldsman sued Cynfax on her behalf. On February 4, 1992, Cynfax's insurer, the Cumberland Mutual Fire Insurance Company, made Smith a $7,000 settlement offer through Goldsman. Goldsman immediately tried to inform Smith of the offer, but learned that she had died on February 2. Later, Goldsman accepted Cumberland's offer to Smith. Did he have authority to do so? In answering this question, consider whether we have an agency coupled with an interest here, and why it would matter if we did.

Chapter Thirty-Five

Third-Party Relations of the Principal and the Agent

Chapter Outline

I. Contract Liability of the Principal
- A. *Express Authority*
- B. *Implied Authority*
  - 1. *Examples of Implied Authority*
- C. *Apparent Authority*
- D. *Other Factors Affecting a Principal's Contract Liability*
  - 1. *Agent's Notification and Knowledge*
  - 2. *Incapacity of Principal and Agent*
- E. *Ratification*
  - 1. *Conduct Amounting to Ratification*
  - 2. *Additional Requirements*
  - 3. *Intervening Events*
- F. *Contracts Made by Subagents*

II. Contract Liability of the Agent
- A. *The Nature of the Principal*
  - 1. *Disclosed Principal*
  - 2. *Partially Disclosed Principal*
  - 3. *Undisclosed Principal*
  - 4. *Two Other Kinds of Principals*
- B. *Liability of Agent by Agreement*
- C. *Agent's Liability on Unauthorized Contracts*

III. Contract Suits against Principal and Agent

IV. Tort Liability of the Principal
- A. Respondeat Superior *Liability*
  - 1. *Scope of Employment*
- B. *Direct Liability*
- C. *Liability for Torts of Independent Contractors*
- D. *Liability for Agent's Misrepresentations*

V. Tort Liability of the Agent

VI. Tort Suits against Principal and Agent

By letting principals contract through their agents and thereby multiply their dealings, agency law stimulates business activity. For this process to succeed, there must be rules for determining when the principal and the agent are liable on the agent's contracts. Principals need to predict and control their liability on agreements their agents make. Also, third parties need assurance that such agreements really bind the principal. Furthermore, both agents and third parties have an interest in knowing when an agent is bound on these contracts. The first half of this chapter discusses the principal's and the agent's contract liability.

While acting on the principal's behalf, agents sometimes harm third parties. Normally, this makes the agent liable to the injured party in tort. Sometimes, moreover, a principal is liable for his agent's torts. Because tort judgments can be expensive, the rules for determining the principal's and the agent's tort liability are of great concern to principals, their agents, and third parties. Thus, we examine these subjects in this chapter's second half.

Contract Liability of the Principal

A principal normally is liable on a contract made by his agent if the agent had **express, implied,** or **apparent authority** to make the contract. Occasionally, however, a principal's contract liability may be affected by other factors. Even where the agent lacked authority to contract, moreover, a principal may bind herself by later **ratifying** the agent's contract.

Express Authority

As discussed in Chapter 34, **express authority** is created by a principal's *words* to his agent, whether written or oral. Thus, an agent has express authority to bind her principal to a contract if the principal clearly told the agent that she could make that contract on the principal's behalf. For example, suppose that Payne instructs his agent Andrews to contract to sell a specific antique chair for $400 or more. If Andrews contracts to sell the chair to Tucker for $425, Payne is liable to Tucker on the basis of Andrews's express authority. However, Andrews would not have express authority to sell the chair for $375, or to sell a different chair.

Implied Authority

Often it is difficult for a principal to specify his agent's authority completely and precisely. Thus, agents can also bind their principals on the basis of the agent's **implied authority.** As Chapter 34 states, an agent generally has implied authority to do whatever it is reasonable to assume that his principal wanted him to do, in light of the principal's express statements and the surrounding circumstances. Relevant factors include the principal's express statements, the nature of the agency, the acts reasonably necessary to carry on the agency business, the acts customarily done when conducting that business, and the relations between principal and agent.

Implied authority usually derives from a grant of express authority by the principal. On occasion, however, implied authority may exist even though there is no relevant grant of express authority. Here, courts generally derive implied authority from the nature of the agency business, the relations between principal and agent, customs in the trade, and other facts and circumstances. For example, there may be implied authority to make a certain contract if the agent has made similar past contracts with the principal's knowledge and without his objection.

No matter what its source, an agent's implied authority cannot conflict with the principal's express statements. Thus, there is no implied authority to contract where a principal has limited her agent's authority by express statement or clear implication and the contract would conflict with that limitation. But as we will see, apparent authority may still exist in such cases.

Examples of Implied Authority Courts have created general rules or presumptions for determining the implied authority of certain agents in certain situations. For example:

1. An agent hired to *manage a business* normally has implied authority to make contracts that are reasonably necessary for conducting the business or that are customary in the business. These include contracts for obtaining equipment and supplies, making repairs, employing employees, and selling goods or services. As the following *Hausam* case suggests, however, a manager ordinarily has no power to borrow money or issue negotiable instruments in the principal's name unless the principal is a banking or financial concern regularly performing such activities.

2. An agent given *full control over real property* has implied authority to contract for repairs and insurance and may rent the property if this is customary. But such an agent may not sell the property or allow any third-party liens or other interests to be taken on it.

3. Agents appointed to *sell the principal's goods* may have implied authority to make customary warranties on those goods. In states that still recognize the distinction, the general agent described in Chapter 34 is more likely to have such authority than a special agent.

Apparent Authority

As Chapter 34 stated, **apparent authority** arises when the principal's behavior causes a third party to form a reasonable belief that the agent is authorized to act in a certain way. In other words, apparent authority is based on: (1) communications by the principal to the third party (2) that create a reasonable appearance of authority in the agent. Background factors such as

trade customs and established business practices often determine whether it is reasonable for the third party to believe that the agent has authority.

Principals can give their agents apparent authority through the statements they make, or tell their agents to make, to third parties; and through the actions they knowingly allow their agents to take. Thus, a principal might create apparent authority by telling a third party that the agent has certain authority, or by directing the agent to do the same. A principal might also create apparent authority by appointing his agent to a position that customarily involves the authority to make certain contracts. For instance, if Peter makes Albert his sales manager, and if that position customarily involves the power to sell the firm's goods, Albert would have apparent authority to contract to sell those products. Here, Peter's behavior in appointing Albert to the position of sales manager, as reasonably interpreted in light of business customs, gives Albert apparent authority. However, because agents cannot give themselves apparent authority, there would be no such authority if, without Peter's knowledge or permission, Albert falsely told third parties that he had been promoted to sales manager.

Apparent authority protects third parties who reasonably rely on the principal's manifestations that the agent has authority. It assumes special importance in cases where the principal has told the agent not to make certain contracts that the agent ordinarily would have actual authority to make, but the third party knows nothing about this limitation and has no reason to know about it. For example, a sales agent often can bind his principal to warranties that the principal has forbidden the agent to make, if those warranties are customary in the trade. In states that still recognize the distinction, general agents are more likely to have this kind of apparent authority than are special agents. Suppose that Perry employs Arthur as general sales agent for his manufacturing business. Certain warranties customarily accompany the products Perry sells, and agents like Arthur ordinarily are empowered to give these warranties. But Perry tells Arthur not to make any such warranties to buyers, thus cutting off Arthur's express and implied authority. Despite Perry's orders, however, Arthur makes the usual warranties in a sale to Thomas, who is familiar with customs in the trade. If Thomas did not know about the limitation on Arthur's authority, Perry is bound by Arthur's warranties.

Hausam v. Schnabl *887 P.2d 1076 (Idaho Ct. App. 1994)*

John Schnabl ran RW Logging as a sole proprietorship. When John experienced health problems early in 1989, he placed his son Wade in charge of the business. John told Wade that he had authority to hire and fire employees, to seek logging contracts, to assign jobs, and to pay himself whatever he wanted. However, John did not explicitly give Wade the authority to borrow money on the business's behalf.

Nonetheless, Wade borrowed $20,000 for RW in January 1990. He signed a promissory note obligating the business to pay the lender, Neal Hausam, $28,000 on or before July 31, 1990. After Hausam forwarded the money to RW early in 1990, Wade stopped managing the business and it ceased operations early in 1991. Never having been repaid, Hausam sued John and Wade on the loan obligation. After Hausam obtained a default judgment against Wade, the court dismissed his claim against John. Among other things, the court held that Wade was not authorized to borrow money on RW's behalf. Hausam appealed.

Walters, Chief Judge Both express and implied authority are forms of actual authority. Express authority refers to that authority which the principal has explicitly granted the agent. Implied authority is necessary, usual, and proper to accomplish or perform express authority. Apparent authority is created when the principal voluntarily places an agent in such a position that a person of ordinary prudence, conversant with the business usages and the nature of a particular business, is justified in believing that the agent is acting pursuant to existing authority.

In the instant case, there clearly was express authority for Wade to operate his father's business. However, there was not express authority for Wade to borrow money. Therefore, Wade's authority to borrow money, if it existed, must have arisen from either implied or apparent authority.

Hausam asserts that included in the express authority to run a business is the implied authority to acquire the money necessary to operate that business. However, the trial court found that although John had placed Wade in charge of the day-to-day operations of the business, there was no evidence that the authority to borrow money was necessary to those functions. John's uncontradicted testimony was that the business did not need to borrow money at the time Wade obtained the loan from Hausam. John testified that even if the company had been in need of money, he would not have borrowed it from a "stranger." There was no implied authority for Wade to borrow money on behalf of the business.

The apparent authority of the agent is determined by the acts of the principal, not by the acts of the agent. The declarations of an agent, standing alone, are insufficient to prove the grant of power exercised by the agent and to bind the principal to third parties. To establish apparent authority, the principal must do something to lead the third party to believe that the agent has authority. In the instant case, John placed Wade in charge of the day-to-day operations of RW Logging. It cannot be said that such an action could lead Hausam to believe that Wade had authority to borrow money on behalf of RW. An agent with actual authority for one purpose does not thereby become an apparent agent for all other types of transactions.

Trial court judgment in John's favor affirmed on the question of John's contract liability on the loan. However, the court found John liable to Hausam in quasi-contract.

Other Factors Affecting a Principal's Contract Liability

Agent's Notification and Knowledge Sometimes the general agency rules regarding *notification* and *knowledge* affect a principal's contract liability. If a third party gives proper notification to an agent with actual or apparent authority to receive it, the principal is bound as if the notification had been given directly to him. For example, where a contract between Phillips and Thomas made by Phillips's agent Anderson contains a clause allowing Thomas to cancel if she notifies Phillips, she can cancel by notifying Anderson if Anderson has actual or apparent authority to receive the notification. Similarly, notification to a third party by an agent with the necessary authority is considered notification by the principal.

In certain circumstances, an agent's knowledge of facts is imputed to the principal. This means that the principal's rights and liabilities are what they would have been if the principal had known what the agent knew. Generally, an agent's knowledge is imputed to a principal when it is relevant to activities that the agent is authorized to undertake, or when the agent is under a duty to disclose the knowledge to the principal. Suppose that Ames contracts with Timmons on Pike's behalf, knowing that Timmons is completely mistaken about a matter material to the contract. Even though Pike knew nothing about Timmons's unilateral mistake, Timmons probably can avoid his contract with Pike.[1]

Incapacity of Principal or Agent As we saw in Chapter 34, a principal who lacks capacity at the time an agency is formed usually may avoid the agency, and a principal's permanent loss of capacity after the agency's formation terminates the agency. Where the agency continues to exist, is a principal of limited mental capacity such as a minor or an insane person bound on contracts made by an agent? Subject to the exceptions discussed in Chapter 14, such contracts are voidable at the principal's option. These contracts normally would be voidable if made by the principal himself, and it is difficult to see why acting through an agent should increase the principal's capacity.

Like the principal, an agent can avoid the agency agreement if she lacks capacity at the time it is formed. Where the agency survives, however, the agent's incapacity usually does *not* affect the contract liability of a principal who has capacity. Just as an agent cannot increase the principal's capacity, neither can she diminish it. However, the principal may sometimes escape liability where an agent's incapacity is so extreme that the agent cannot receive or convey ideas, or cannot follow the principal's instructions.

[1] Unilateral mistake is discussed in Chapter 13.

Ratification

Ratification is a process whereby a principal binds himself to an unauthorized act done by an agent, or by a person purporting to act as an agent. Usually, the act in question is a contract. Ratification relates back to the time when the contract was made. It binds the principal as if the agent had possessed authority at that time.

Conduct Amounting to Ratification Ratification can be express or implied. An *express ratification* occurs when the principal communicates an intent to ratify by words, whether written or oral. *Implied ratification* arises when the principal's behavior evidences an intent to ratify. Examples include the principal's part performance of a contract made by an agent, or the principal's acceptance of benefits under such a contract. Sometimes even a principal's silence, acquiescence, or failure to repudiate the transaction may constitute ratification. This can occur where the principal would be expected to object if he did not consent to the contract, the principal's silence leads the third party to believe that he does consent, and the principal is aware of all relevant facts.

Additional Requirements Even if a principal's words or behavior indicate an intent to ratify, other requirements must be met before ratification occurs. These requirements have been variously stated; the following list is typical.

1. The act ratified must be one that was *valid* at the time it was performed. For example, an agent's illegal contract cannot be made binding by the principal's subsequent ratification. However, a contract that was voidable when made due to the principal's incapacity may be ratified by a principal who has later attained or regained capacity.

2. The principal must have been *in existence* at the time the agent acted. However, as discussed in Chapter 41, corporations may bind themselves to their promoters' preincorporation contracts by adopting such contracts.

3. When the contract or other act occurred, the agent must have indicated to the third party that she was acting for a principal and not for herself. But the agent need not have disclosed the principal's identity.

4. The principal must be *legally competent* at the time of ratification. For instance, an insane principal cannot ratify.

5. As the following *Huppman* case makes clear, the principal must have *knowledge of all material facts* regarding the prior act or contract at the time it is ratified. Here, an agent's knowledge is not imputed to the principal.

6. The principal must ratify the *entire* act or contract. He cannot ratify the beneficial parts of a contract and reject those that are detrimental.

7. In ratifying, the principal must use the *same formalities* required to give the agent authority to execute the transaction. As Chapter 34 stated, few formalities normally are needed to give an agent authority. But where the original agency contract requires a writing, ratification likewise must be written.

Intervening Events Certain events occurring after an agent's contract but before the principal's ratification may cut off the principal's power to ratify. These include: (1) the third party's *withdrawal* from the contract; (2) the third party's *death or loss of capacity;* (3) the principal's *failure to ratify within a reasonable time* (assuming that the principal's silence did not already work a ratification); and (4) *changed circumstances* (especially where the change places a greater burden on the third party than he assumed when the contract was made).

Huppman v. Tighe *642 A.2d 309 (Md. Ct. App. 1994)*

In April 1987, Harry Tighe opened an investment account with Legg Mason Wood Walker, Inc., a Baltimore investment firm. Tighe's authorization was required for all investments. When Tighe received his first monthly statement from Legg Mason in May 1987, however, he saw that his Legg Mason broker, L. Reed Huppman, had made an unauthorized $220,500 purchase constituting 8,820 units of Mid-Atlantic Centers (MAC), a limited partnership that invested in shopping centers. Tighe immediately telephoned Huppman, profanely asking him what right he had to purchase the MAC units without Tighe's permission. Later, Huppman came to Tighe's home to explain the situation. According to Huppman's later testimony, he persuaded Tighe to hold

the MAC investment to see how well it performed. According to Tighe, he held on to the MAC units only because Huppman convinced him that they were not readily marketable. In reality, however, the units probably were marketable.

Despite this unauthorized purchase, Tighe did not close out his Legg Mason account or complain to Huppman's superiors, but instead continued to buy securities through Huppman for nearly two years. Over roughly that same period, he received over $52,000 in distributions from MAC, which were deposited in his Legg Mason account. In May 1989, Tighe finally complained to a Legg Mason compliance officer about the deal. Even then, however, he did not say that he wanted MAC removed from his account.

In 1990, Tighe sued Legg Mason and Huppman under various theories for damages resulting from Huppman's MAC purchase. After a jury trial, Tighe won a $234,426 judgment. After Legg Mason and Huppman unsuccessfully moved for judgment notwithstanding the verdict, they appealed that ruling. One of their arguments was that by his subsequent behavior, Tighe had ratified the unauthorized purchase of MAC units.

Davis, Judge If there exists any legally competent evidence, however slight, from which the jury could have found as it did, a judgment notwithstanding the verdict would be improper. A principal will be bound by the unauthorized acts of his agent if the transaction is ratified. A principal who, with knowledge of the material facts surrounding his agent's unauthorized act, receives and retains the benefits of the unauthorized act has ratified the act.

We affirm the trial court's ruling because the record provides sufficient evidence for a jury to have found that Tighe was not made aware of the material facts of the unauthorized transaction. Tighe's testimony reasonably infers that Huppman was intentionally misleading Tighe into believing that he could not get his money returned immediately because there was no market into which to sell the MAC investment. Thus, Tighe would have no choice but to hold on to the MAC investment until Legg Mason and Huppman could sell it. In contrast, Legg Mason's and Huppman's brief [admits at one point]: "The evidence . . . indicated that had Tighe unequivocally repudiated the transaction, Legg Mason would have been able to resell the units at full price and minimize its loss." If Huppman could have expeditiously sold the MAC investment, he kept this information from Tighe. Thus Tighe did not have all of the material facts undergirding the unauthorized transaction and thus could not have ratified the purchase.

Trial court judgment in Tighe's favor affirmed.

Contracts Made by Subagents

The rules governing a principal's liability for her agent's contracts generally apply to contracts made by her subagents. If an agent has authorized his subagent to make a certain contract and this authorization is within the authority granted the agent by his principal, the principal is bound to the subagent's contract.[2] Suppose that Peters employs the Ajax Company to sell her personal property while she is out of the country, with the understanding that one of Ajax's agents will handle the sale from start to finish. If Ajax authorizes its agent Sampson (Peters's subagent) to contract to sell the property and Sampson does so, Peters is bound to the contract.

[2]Also, a subagent contracting within the authority conferred by her principal (the agent) binds the *agent* in an appropriate case. In addition, both the principal and the agent probably can ratify the contracts of subagents.

Contract Liability of the Agent

When are *agents* liable on contracts they make on their principals' behalf? For the most part, this question depends on a different set of variables than the variables determining the principal's liability.[3] The most important of these variables is the *nature of the principal.* Thus, this section first examines the liability of agents who contract for several different kinds of principals. Then it discusses two ways that an agent can be bound after contracting for any type of principal.

[3] The rules stated here generally should govern the contract liability of subagents as well as agents. See *Restatement (Second) of Agency* § 361 (1959).

Figure 1 *Agent's Contractual Liability: The Basic Rules*

Type of Principal	Does Third Party Know or Have Reason to Know about P's Existence?	Does Third Party Know or Have Reason to Know P's Identity?	Result
Disclosed	Yes	Yes	A not liable unless A agrees to be liable or A lacks authority
Partially Disclosed	Yes	No	A liable
Undisclosed	No	No	A liable

The Nature of the Principal

Disclosed Principal A principal is **disclosed** if a third party knows or has reason to know: (1) that the agent is acting for a principal, and (2) the principal's identity. Unless he agrees otherwise, an agent who represents a disclosed principal is *not liable* on authorized contracts made for such a principal. Suppose that Adkins, a sales agent for Parker, calls on Thompson and presents a business card clearly identifying her as Parker's agent. If Adkins contracts to sell Parker's goods to Thompson with authority to do so, Adkins is not bound because Parker is a disclosed principal. This rule usually is consistent with the third party's intentions; for example, Thompson probably intended to contract only with Parker.

Partially Disclosed Principal A principal is **partially disclosed** if the third party: (1) knows or has reason to know that the agent is acting for *a* principal, but (2) lacks knowledge or reason to know the principal's *identity.* This can occur where an agent simply neglects to disclose his principal's identity. Also, a principal may tell her agent to keep her identity secret to preserve her bargaining position.

Among the factors affecting anyone's decision to contract are the integrity, reliability, and creditworthiness of the other party to the contract. Where the principal is partially disclosed, the third party ordinarily cannot judge these matters. As a result, he usually depends on the agent's reliability to some degree. For this reason, and to give the third party additional protection, an agent is liable on contracts made for a partially disclosed principal unless the parties agree otherwise.

Undisclosed Principal A principal is **undisclosed** where the third party lacks knowledge or reason to know both the principal's existence *and* the principal's identity. This can occur where a principal judges that he will get a better deal if his existence and identity remain secret, or where the agent neglects to make adequate disclosure.

A third party who deals with an agent for an undisclosed principal obviously cannot assess the principal's reliability, integrity, and creditworthiness. Indeed, here the third party reasonably believes that the *agent* is the other party to the contract. Thus, an agent is liable on contracts made for an undisclosed principal.

Two Other Kinds of Principals Unless there is an agreement to the contrary, an agent who purports to act for a **legally nonexistent** principal such as an unincorporated association is personally liable. This is true even where the third party knows that the principal is nonexistent.

As you saw earlier, a principal who lacks contractual capacity due to insanity or infancy can avoid contracts made by his agent. In this case, the *agent* also escapes liability unless: (1) she misrepresents the capacity of her principal, or (2) she has reason to believe that the third party is unaware of the principal's incapacity and she fails to disclose this. Also, unless the parties agree otherwise, an agent is liable on contracts made for a *wholly incompetent* principal such as a person who has been adjudicated insane.

The *Zumbrota Livestock* case, which follows, involves a familiar problem: whether the disclosure of a corporate principal on company checks and other documents suffices to make that principal a disclosed principal, and thus relieves its officers from personal liability.

Zumbrota Livestock Auction Market v. Hines-Thurn Feedlot, Inc.

1997 Minn. App. LEXIS 1000 (Minn. Ct. App. 1997)

Hines & Thurn Feedlot Inc. was incorporated in January 1990, with James Thurn and Deryl Hines as its sole officers. Since that time, the corporation did business under the name "Thurn-Hines Livestock." Both names appear on the corporation's invoices, bank account, and checks. The corporation began purchasing livestock from Zumbrota Livestock Auction Market in the summer or fall of 1994. In October of 1995, Thurn-Hines made three livestock purchases from Zumbrota, and Zumbrota sent invoices to "Thurn-Hines Lvstk" or "Thurn Hines Livst." The corporation sent Zumbrota three checks for these purchases totalling $544,646.65. Printed on each check was:

THURN-HINES LIVESTOCK
HINES-THURN FEEDLOT INC.
BOX 55, EDGEWOOD, IA 52042

The checks all were signed by Jean Offerman, an employee of the corporation, but did not indicate the capacity in which Offerman signed.

The corporation stopped payment on the three checks on October 31, 1995, allegedly because a check it received from another cattle company had bounced. After Thurn and Hines made two partial payments on the debt to Zumbrota, Zumbrota sued them for the balance. It then moved for summary judgment, arguing that Thurn and Hines were liable individually as agents for an undisclosed principal. After the district court granted Zumbrota's motion for summary judgment, Thurn and Hines appealed.

Willis, Judge A trial court may grant summary judgment only if there is no genuine issue as to any material fact and either party is entitled to judgment as a matter of law. On appeal from summary judgment, the reviewing court evaluates: (1) whether any genuine issues of material fact exist, and (2) whether the district court erred in applying the law.

A corporate officer generally is not liable for corporate debts because, as an agent for a disclosed principal, he or she is not a party to contracts between the corporation and its creditors. An agent, however, is a party to the agreement and liable on contracts when the agent acts for a partially disclosed principal or on his own for an undisclosed principal.

Thomas Webster, vice president of Zumbrota, stated that he knew the business enterprise only as "Thurn & Hines." Thurn and Hines claim that they held themselves out as representatives of the corporation in all business dealings with Zumbrota.

The trial court concluded as a matter of law that Thurn and Hines are individually liable to Zumbrota Livestock as agents for an undisclosed principal. The court relied on [a case] where a defendant who did not tell the plaintiffs they were dealing with a corporation was held personally liable on contracts between the parties. The district court concluded that this case is factually similar because Zumbrota did not have actual knowledge of the corporate status of the debtor. But the *Restatement of Agency* defines disclosed, partially disclosed, and undisclosed principals in terms of *notice*, rather than actual knowledge. Notice is defined as follows: "A person has notice of a fact if he knows the fact, has reason to know it, should know it, or has been given notification of it." In addition, "[a] person is given notification of a fact by another if the latter . . . informs him of the fact by adequate or specified means or of other facts from which he has reason to know or should know the facts." *Restatement (Second) of Agency* § 9 (1958).

The facts here are similar to those in *Paynesville Farmers Union Oil Co. v. Ever Ready Oil Co.* (1985), where this court affirmed a finding that a corporation was a disclosed principal. The court concluded that the defendants' payments by corporate checks during the five-year period immediately preceding the corporation's bankruptcy gave the plaintiff notice that the defendants had incorporated the business with which the plaintiff was dealing. The trial court attempted to distinguish *Paynesville* on the ground that the checks in that case identified the signer as a corporate officer, but that fact does not appear in the *Paynesville* opinion.

The trial court further noted that Thurn and Hines did not object to the fact that Zumbrota's invoices were directed to "Thurn-Hines." To avoid personal liability, however, a corporate officer need not expressly notify a creditor that the business is incorporated if the creditor has notice of that fact. There is evidence that during the year or so Hines & Thurn Feedlot Inc. did business with Zumbrota, it paid all its bills by checks bearing the corporate name. There is, therefore, a fact question as to whether Zumbrota had notice that it was dealing with a corporation, and the district court erred in determining on summary judgment that Thurn and Hines acted as agents for an undisclosed principal.

Summary judgment for Zumbrota reversed; case remanded to the trial court.

Liability of Agent by Agreement

An agent may bind herself to contracts she makes for a principal by *expressly agreeing* to be liable. This is true regardless of the principal's nature. An agent may expressly bind herself by: (1) making the contract in her own name rather than in the principal's name, (2) joining the principal as an obligor on the contract, or (3) acting as surety or guarantor for the principal.

Problems of contract interpretation can arise when it is claimed that an agent has expressly promised to be bound. The two most important factors affecting the agent's liability are the wording of the contract and the way the agent has signed it. An agent who wishes to avoid liability should make no express promises in her own name and should try to ensure that the agreement obligates only the principal. In addition, the agent should use a signature form that clearly identifies the principal and indicates the agent's representative capacity—for example, "Parker, by Adkins," or "Adkins, for Parker." Simply adding the word "agent" when signing her name ("Adkins, Agent") or signing without any indication of her status ("Adkins") could subject the agent to liability. Sometimes, the body of the agreement suggests one result and the signature form another. Here, and generally, oral evidence or other extrinsic evidence of the parties' understanding may help resolve the uncertainty.[4]

Agent's Liability on Unauthorized Contracts

An agent also may be liable to a third party if he contracts for the principal while lacking authority to do so. Here, the principal is not bound, and it is arguably unfair to leave the third party without any recovery. Thus, an agent normally is bound on the theory that he made an implied warranty of his authority to contract.[5] This liability exists regardless of whether the agent is otherwise bound to the third party.

To illustrate, suppose that Allen is a salesperson for Prine, a seller of furs. Allen has actual authority to receive offers for the sale of Prine's furs but not to make sale contracts, which must be approved by Prine himself. Prine has long followed this practice, and it is customary in the markets where his agents work. Representing himself as Prine's agent but saying nothing about his authority, Allen contracts to sell Prine's furs to Thatcher on Prine's behalf. Thatcher, who should have known better, honestly believes that Allen has authority to contract to sell Prine's furs. Prine is not liable on Allen's contract because Allen lacked actual or apparent authority to bind him. But Allen is liable to Thatcher for breaching his implied warranty of authority.

However, an agent is *not* liable for making an unauthorized contract if:

1. The third party *actually knows* that the agent lacks authority. However, note from the previous example that the agent still is liable where the third party had *reason to know* that authority was lacking.

2. The principal subsequently *ratifies* the contract. Here, the principal is bound, and there is arguably little reason to bind the agent.

3. The agent adequately *notifies* the third party that he does not warrant his authority to contract.

Is the *Reed* case, which follows, best regarded as proceeding under the first exception just stated, or the third? In any event, do you agree with the result?

[4] However, the introduction of such evidence may be blocked by the parol evidence rule. See Chapter 16.

[5] An agent who intentionally misrepresents his authority may also be liable to the third party in tort. In addition, some states may allow tort liability for negligent misrepresentations. Where the third party has a tort suit, he may often elect to recover damages or to rescind the contract.

Reed v. National Foundation Life Insurance Co.

1996 Tenn. App. LEXIS 807 (Tenn. Ct. App. 1996)

On January 7, 1994, Mark Bradshaw, an agent for the National Foundation Life Insurance Company (NFLIC), tried to sell a health insurance policy to Bobby Reed. Reed testified that he was "informed by Mark Bradshaw that my health insurance coverage would become effective upon the signing of certain insurance forms and the payment of the first monthly premium." Reed further testified that "I did not read the insurance forms because I was assured by Mark Bradshaw that I had full coverage."

On the same day, Reed signed: (1) an application for health insurance, (2) an Applicant's Statement, and (3) a Telephone Contact Authorization and Agreement. The Applicant's Statement contains this provision:

> I understand that the agent cannot change, alter or amend any NFLIC information requirement. I also understand that the agent cannot change, alter or amend the policy. I further understand that the agent has no authority to make any representations about the conditions under which NFLIC will issue a policy or make a policy effective.

The application for the policy contains this provision:

> I understand that the insurance applied for shall be subject to the provisions and conditions of the policy, and that the policy shall not be effective until the policy has been actually issued, with first premium paid and delivered to the insurer while the health of all persons named in this application remains as stated herein . . . I further understand that losses due to Pre-existing Conditions, diseases, or bodily injuries occurring prior to the Effective Date of the Policy are not covered . . . unless otherwise provided.

The Telephone Contact Authorization and Agreement informed the plaintiff that he would be contacted by telephone and that the application process might take as long as two weeks. Reed did not read any of these three documents.

The NFLIC received Reed's application on January 12, 1994. On January 19, it called Reed's telephone number and was informed that he had suffered a heart attack on January 15. The NFLIC thereupon notified Reed that it was postponing consideration of his application because his health condition had changed since the application was submitted. No policy was ever issued. Assume for the sake of argument that Reed had paid the first monthly premium.

Reed then sued Bradshaw, arguing that he had impliedly warranted that he possessed authority to contractually bind the NFLIC upon the happening of certain events, and that he breached that warranty. After the trial court denied Bradshaw's motion for summary judgment, he appealed.

Inman, Senior Judge Reed's theory of recovery against agent Bradshaw is apparently based on the principle that an agent purporting to make an unauthorized contract on behalf of his principal may be liable to a third party on the ground that he warrants his authority to enter into the contract. It is well settled that one who purports as agent to enter into a contract, upon which the principal is not bound because of the fact that the agent has contracted without authority or in excess of his authority, is personally liable for the damage thus occasioned by the other contracting party. However, as is here determinative, it is essential to any such third party's right of action that the third party purporting to hold the agent liable must have acted without knowledge, or imputed knowledge, of the agent's lack of authority. The *Restatement (Second) of Agency* section 329 provides: "A person who purports to make a contract, conveyance or representation on behalf of another who has full capacity but whom he has no power to bind, thereby becomes subject to liability to the other party thereto upon an implied warranty of authority, unless he has manifested that he does not make such warranty or the other party knows that the agent is not so authorized." Thus, if the agent, in accordance with the prior course of business between them, sends a notification of such lack of warranty, or if a statement of the same purport is conspicuously placed upon the memorandum of the contract, the fact that the third person does not read the notification is immaterial.

The documents signed by Reed acknowledging the lack of authority of agent Bradshaw are a

complete refutation of his purported cause of action against the agent. He cannot assert a claim against the agent while acknowledging that he was aware that the agent had no authority in the premises. The motion of the agent for summary judgment is therefore well-taken.

Summary judgment for Reed reversed and his case dismissed.

Contract Suits against Principal and Agent

Figure 2 sketches the most important situations in which the principal, the agent, or both are liable due to the agent's contracts. As it suggests, a third party usually has someone to sue if neither the principal nor the agent performs.

Without ratification, a principal is not liable on contracts made by an agent who lacks authority. Here, though, the agent usually is bound under an implied warranty of authority. In addition, the agent is bound on the contract where the principal was partially disclosed, undisclosed, or legally nonexistent.[6] Authorized contracts for a disclosed principal do not bind an agent unless he has agreed to be bound. But here the agent's actual or apparent authority binds the principal.

As Figure 2 further illustrates, in certain situations both principal and agent are liable on a contract made by the agent. This can occur where an agent with appropriate authority contracts on behalf of a partially disclosed or undisclosed principal. Also, an agent can bind himself by express agreement in situations where the principal also is bound. In such cases, which party ultimately is responsible to the third person? The complicated rules governing this question are beyond the scope of this text.

[6]Note, however, that it is impossible for an agent for an undisclosed principal to have apparent authority. Apparent authority exists when the principal's communications to the third party cause that party to reasonably believe that the agent has authority to contract for another. This cannot occur when the principal is undisclosed.

Tort Liability of the Principal

Besides contracting on the principal's behalf, an agent may also commit torts. A principal's liability for those torts involves four distinct subjects, which we consider in turn.[7]

Respondeat Superior Liability

Under the doctrine of ***respondeat superior*** (let the master answer), a principal who is an **employer** is liable for torts committed by agents: (1) who are **employees** and (2) who commit the tort while acting within the **scope of their employment.** *Respondeat superior* makes the principal liable both for an employee's negligence and for her intentional torts.

[7] In addition to the various forms of tort liability discussed in this section, a principal can also ratify an agent's torts. Furthermore, the *Restatement* says that the rules governing a principal's liability for an agent's torts generally control a principal's liability for the torts of subagents. *Restatement (Second) of Agency* § 255 (1959).

Figure 2 *Contract Liability of Principal and Agent: The Major Possibilities*

	Agent's Authority		
Principal	**Actual**	**Apparent**	**None**
Disclosed	P liable: A not liable unless agreement	P liable; A not liable unless agreement	P not liable; A usually liable
Partially Disclosed	P liable; A liable	P liable; A liable	P not liable; A liable
Undisclosed	P liable; A liable	Impossible	P not liable; A liable

Chapter 34 outlined the main factors courts consider when determining whether an agent is an employee. The most important of these factors is a principal's right to control the physical details of an agent's work.

Respondeat superior is a rule of *imputed* or *vicarious* liability because it bases an employer's liability on his relationship with the employee rather than his own fault. This imputation of liability reflects the following beliefs: (1) that the economic burdens of employee torts can best be borne by employers, (2) that employers often can protect themselves against such burdens by self-insuring or purchasing insurance, and (3) that the resulting costs frequently can be passed on to consumers, thus "socializing" the economic risk posed by employee torts. *Respondeat superior* also motivates employers to ensure that their employees avoid tortious behavior. Because they typically control the physical details of the work, employers are fairly well positioned to do so.

Scope of Employment *Respondeat superior*'s scope-of-employment requirement has been stated in many ways and is notoriously ambiguous. In the past, for example, some courts considering this question asked whether the employee was on a "frolic" of his own, or merely made a "detour" from his assigned activity. According to the *Restatement,* [8] an employee's conduct is within the scope of his employment if it meets *each* of the following four tests:

1. It was of the *kind* that the employee was employed to perform. To meet this test, an employee's conduct need only be of the same general nature as work expressly authorized or be incidental to its performance. The following *Haddon* case discusses this requirement at length.

2. It occurred substantially within the authorized *time* period. This is simply the employee's assigned time of work. Beyond this, there is an extra period of time during which the employment may continue. For instance, a security guard whose regular quitting time is 5:00 probably meets the time test if he unjustifiably injures an intruder at 5:15. Doing the same thing three hours later, however, would put the guard outside the scope of employment.

3. It occurred substantially within the *location* authorized by the employer. This includes locations not unreasonably distant from the authorized location. For example, a salesperson told to limit her activities to New York City probably would satisfy the location requirement while pursuing the employer's business in suburbs just outside the city limits but not while pursuing the same business in Philadelphia. Generally, the smaller the authorized area of activity, the smaller the departure from that area needed to put the employee outside the scope of employment. For example, consider the different physical distance limitations that should apply to a factory worker and a traveling salesperson.

4. It was motivated *at least in part* by the *purpose* of serving the employer. This test is met where the employee's conduct was motivated *to any appreciable extent* by the desire to serve the employer. Thus, an employee's tort may be within the scope of employment even if the motives for committing it were partly personal. For example, suppose that a delivery employee is behind schedule and for that reason has an accident while speeding to make a delivery in his employer's truck. The employee would be within the scope of employment even if another reason for his speeding was to impress a friend who was riding with him.

Strictly speaking, the following *Haddon* case does not involve *respondeat superior.* But *Haddon* does involve something similar—a federal law under which the U.S. government is made liable for certain torts committed by its employees within the scope of their employment. More importantly, the case says quite a bit about the first element of the *Restatement*'s scope-of-employment test.

[8] *Restatement (Second) of Agency* § 228(1) (1959). This section adds that if an employee intentionally uses force on another, this must have been "not unexpectable" by the employer to be within the scope of employment.

Haddon v. United States *68 F.3d 1420 (D.C. Cir. 1995)*

Jeffrey Freeburger, a White House electrician, allegedly told Sean Haddon, a White House assistant chef, that he would "beat the shit out of" Haddon unless Haddon withdrew an equal employment opportunity claim that he had filed against the White House's chief usher. Haddon's EEO claim did not involve Freeburger in any way.

Haddon sued Freeburger for, among other things, assault and intentional infliction of emotional distress. As permitted by the Federal Employees Liability Reform and Tort Compensation Act of 1988 (the Westfall Act), Freeburger moved to substitute the federal government for himself as the sole defendant in the case. This required that Freeburger had been acting within the scope of his employment when he committed the alleged torts. The federal district court held that Freeburger indeed had been acting within the scope of his employment. Haddon's resulting suit against the federal government was governed by the Federal Tort Claims Act, which requires that the plaintiff exhaust his administrative remedies before suing. Because Haddon had not done so, the court dismissed his claim. Haddon appealed. His main argument was that because Freeburger did not *act within the scope of employment when he made the alleged threat, Freeburger should be reinstated as the sole defendant.*

Tatel, Circuit Judge According to the *Restatement (Second) of Agency,* the conduct of an employee is within the scope of employment if, but only if: (1) it is of the kind he is employed to perform; (2) it occurs substantially within the authorized time and space limits; (3) it is actuated, at least in part, by a purpose to serve the employer; and (4) if force is intentionally used by the employee against another, the use of force is not unexpected by the employer. Because the complaint states that the threat occurred during the workday on White House premises and contains no allegation that Freeburger used any force, only the first and third criteria are at issue.

Finding that Freeburger's alleged threat was connected to a "job-related controversy,"—Haddon's EEO complaint—the district court concluded that Freeburger acted within the scope of his employment. Although the existence of a job-related controversy may support a determination that an employee was at least partially motivated to further the employer's interests (the third prong of the *Restatement* test), it cannot support a conclusion that the employee's conduct was of the kind he was employed to perform (the first prong). The plaintiff must satisfy both criteria to establish that an employee acted within the scope of employment.

To qualify as conduct of the kind he was employed to perform, Freeburger's actions must have either been of the same general nature as that authorized, or incidental to the conduct authorized. The White House employed Freeburger to work as an electrician, not to threaten kitchen staff. Freeburger's alleged conduct was thus not of the same general nature as the work he was hired to perform. Conduct is incidental to an employee's duties if it is a direct outgrowth of the employee's instructions or job assignment. It is not enough that an employee's job provides an opportunity to commit an intentional tort. In *Johnson v. Weinberg,* the D.C. Court of Appeals ruled that a laundromat could be liable for injuries inflicted when an employee responsible for removing clothes from washing machines shot a customer during a dispute over missing shirts. [On the other hand,] in *Boykin v. District of Columbia* the court held the District not liable to an elementary school student who alleged that the city's coordinator of programs for deaf and blind children sexually assaulted her in a school cafeteria. The coordinator's action was not a direct outgrowth of his authorized duties [because he] was not performing his [assigned] responsibilities during the encounter with the student.

Freeburger's alleged tort did not arise directly out of his instructions or job assignment as a White House electrician. Unlike the shooting in *Johnson,* his threat did not stem from a dispute over the performance of his work. He [also] was not performing his assigned duties at the time of the incident. His threat related to an EEO complaint not involving him in any way. This case is thus closer to the assault in *Boykin.* Freeburger's action was therefore not within the scope of his employment.

District court decision in Freeburger's and the government's favor reversed. Haddon's suit against Freeburger can proceed.

Direct Liability

As the following *Victory Tabernacle* case makes clear, a principal's **direct liability** for an agent's torts differs considerably from *respondeat superior* liability. Here, the principal himself is at fault, and there is no need to impute liability to him. Also, no scope-of-employment requirement exists in direct liability cases, and the agent

need not be an employee. Of course, a principal might incur both direct liability and *respondeat superior* liability in cases where due to the principal's fault, an employee commits a tort within the scope of her employment.

A principal is directly liable for an agent's tortious conduct if the principal directs that conduct and intends that it occur. In such cases, the *agent*'s behavior might be intentional, reckless, or negligent. For instance, if Petty tells his agent Able to beat up Tabler and Able does so, Petty is directly liable to Tabler. Petty also would be liable for harm to third parties that results from his telling Able to do construction work in a negligent, substandard fashion.

The typical direct liability case, however, involves harm caused by the principal's negligence regarding the agent. Examples of direct liability for negligence include: (1) giving the agent improper or unclear instructions; (2) failing to make and enforce appropriate regulations to govern the agent's conduct; (3) hiring an unsuitable agent; (4) failing to discharge an unsuitable agent; (5) furnishing an agent with improper tools, instruments, or materials; and (6) carelessly supervising an agent. Today, suits for negligent hiring are common; the following case is an example.

J. v. Victory Tabernacle Baptist Church *372 S.E.2d 391 (Va. Sup. Ct. 1988)*

A woman sued the Victory Tabernacle Baptist Church, alleging that due to its negligence her 10-year-old daughter had been repeatedly raped and sexually assaulted by a church employee. The plaintiff's complaint claimed that when the church hired the employee, it knew or should have known that he had recently been convicted of aggravated sexual assault on a young girl, that he was on probation for this offense, and that a condition of his probation was that he not be involved with children. Despite all this, the complaint continued, the employee's duties allowed him freely to come into contact with children, including the plaintiff's daughter, and he was given keys enabling him to lock and unlock all the church's doors.

The complaint alleged (among other things) negligent hiring on the church's part. The church filed a demurrer to the complaint, and the trial court sustained the demurrer. The plaintiff appealed this decision, and the case reached the Virginia Supreme Court.

Thomas, Justice We decide only whether the allegations of negligent hiring state a cause of action in Virginia. Victory Baptist argues that the trial court properly sustained the demurrer on [this] question because plaintiff failed to allege that the harm to the victim was caused by negligence on the part of the employee. According to this argument, the negligent hiring cause of action requires that the negligently hired individual negligently injured the plaintiff. We disagree. The very thing that allegedly should have been foreseen in this case is that the employee would commit a violent act upon a child. To say that a negligently hired employee who acts willfully or criminally thus relieves his employer of liability for negligent hiring when willful or criminal conduct is precisely what the employer should have foreseen would rob the tort of vitality.

Victory Baptist also argues that the [plaintiff's] allegations do not establish a sufficient nexus among the employer's breach of duty, the employee's conduct, and the employee's employment. In oral argument, counsel explained that there were no allegations that the employee was engaged in the church's business when the child was injured—no allegation, for example, that the employee was on duty for the church at the time the girl was raped. Counsel then made clear that what he was complaining about was that there were no allegations to bring the employee's conduct within the scope of his employment.

This argument demonstrates that Victory Baptist is confusing the doctrine of *respondeat superior* with the tort of negligent hiring. This distinction was succinctly stated in a recent law review article:

> Under *respondeat superior,* an employer is vicariously liable for an employee's tortious acts committed within the scope of employment. In contrast, negligent hiring is a doctrine of primary liability; the

> employer is principally liable for negligently placing an unfit person in an employment situation involving an unreasonable risk of harm to others. Negligent hiring, therefore, enables plaintiffs to recover in situations where *respondeat superior*'s scope of employment limitation previously protected employers from liability.
>
> Thus, Victory Baptist's contention is misplaced.
>
> In our opinion, the [complaint] was fully sufficient to state a claim of negligent hiring, and thus it was error for the trial court to sustain the demurrer on that issue.
>
> ***Judgment for the church on the negligent hiring claim reversed. Case remanded for trial consistent with the Supreme Court's opinion.***

Liability for Torts of Independent Contractors

A principal ordinarily is *not* liable for torts committed by **independent contractors.** As compared with employees, independent contractors are more likely to have the size and resources to insure against tort liability and to pass on the resulting costs themselves. Sometimes, therefore, the risk still can be socialized if only the independent contractor is held responsible. Because the principal does not control the manner in which an independent contractor's work is performed, moreover, he has less ability to prevent a contractor's torts than an employer has to prevent an employee's torts. Thus, imposing liability on principals for the torts of independent contractors may do little to eliminate the contractor's torts.

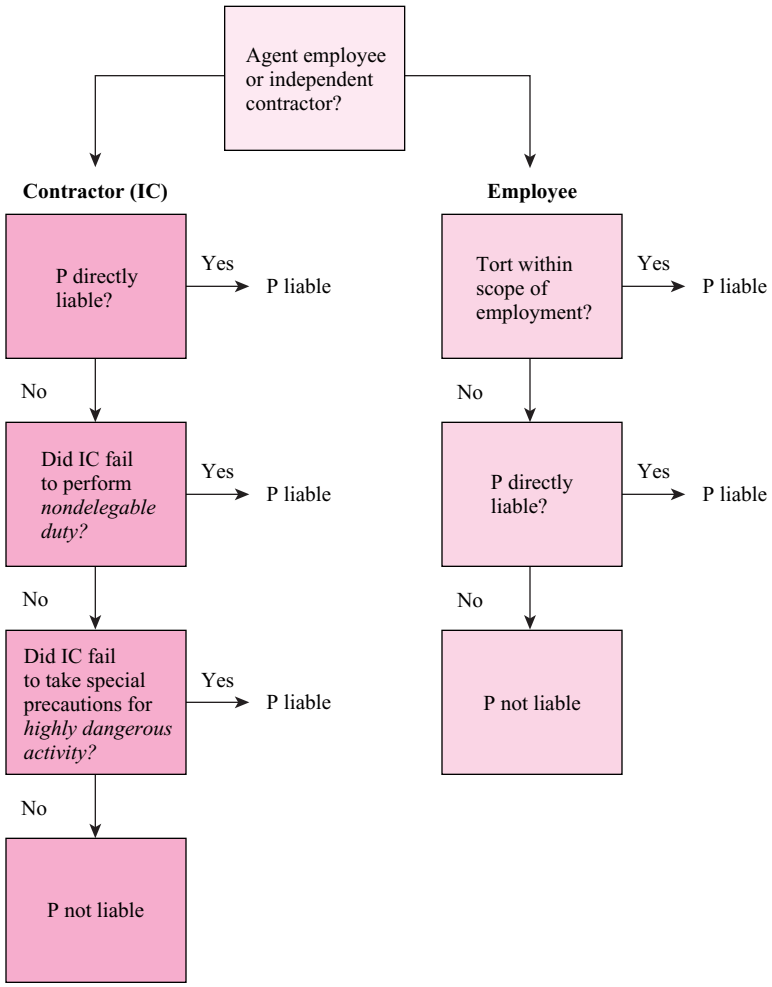
However, the rule that principals are not liable for torts committed by independent contractors has exceptions. For example:

1. A principal can be *directly* liable for tortious behavior connected with the retention of an independent contractor. One example is the hiring of a dangerously incompetent independent contractor.

2. A principal is liable for harm resulting from the independent contractor's failure to perform a *nondelegable duty.* A nondelegable duty is a duty whose proper performance is so important that a principal cannot avoid liability by contracting it away. Examples include a carrier's duty to transport its passengers safely, a municipality's duty to keep its streets in repair, a railroad's duty to maintain safe crossings, and a landlord's duties to make repairs and to use care in doing so. Thus, a landlord who retains an independent contractor to repair the stairs in an apartment building is liable for injuries caused by the contractor's failure to repair the stairs properly.

3. A principal is liable for an independent contractor's negligent failure to take the special precautions needed to conduct certain *highly dangerous* or *inherently dangerous* activities.[9] Examples of such activities include excavations in publicly traveled areas, the clearing of land by fire, the construction of a dam, and the demolition of a building. For example, a contractor engaged in demolishing a building presumably has duties to warn pedestrians and to keep them at a safe distance. If injury results from the independent contractor's failure to meet these duties, the principal is liable.

Liability for Agent's Misrepresentations



Special rules apply when a third party sues a principal for **misrepresentations** made by her agent.[10] In most cases where the principal is liable under these rules, the third party can elect to recover in tort, or to rescind the transaction.

A principal is *directly* liable for misrepresentations made by her agent during authorized transactions if she *intended* that the agent make the misrepresentations. In some states, a principal also may be directly liable if she *negligently* allows the agent to make misrepresentations. Even where a principal is not directly at fault, she may be liable for an agent's misrepresentations if the agent had *actual or apparent authority to make true statements on the subject.* Suppose that an agent authorized to sell farmland falsely states that a stream on

[9] The range of activities considered "highly dangerous" or "inherently dangerous" is probably greater than the range of activities considered "ultrahazardous" or "abnormally dangerous" for strict liability purposes. On the latter activities, see Chapter 7.

[10] On fraud and misrepresentation in the tort and contract contexts, see Chapters 6 and 13.

Figure 3 *The Principal's Tort Liability*

Note: The figure does not include liability for the agent's misrepresentations.

the land has never flooded the property when in fact it does so almost every year, and that this statement induces a third party to buy the land. The principal is directly liable if she intended that the agent make this false statement. Even if the principal is personally blameless, she is liable if the agent had actual or apparent authority to make true statements about the stream.

After contemplating their potential liability under the rules just discussed, both honest and dishonest principals may try to escape liability for an agent's misrepresentations by including an *exculpatory clause* in contracts the agent makes with third parties. Such clauses typically state that the agent only has authority to make the representations contained in the contract and that only those representations bind the principal. Exculpatory clauses do not protect a principal who intends or expects that an agent will make false statements. Otherwise, though, they insulate the principal from *tort* liability if the agent misrepresents. But the third party still may rescind the transaction, because it would be unjust to let the principal benefit from the transaction while disclaiming responsibility for it.

Concept Review

An Outline of the Principal's Tort Liability

Respondeat Superior	1. Agent must be an employee, *and* 2. Employee must act within scope of employment while committing tort
Direct Liability	1. Principal intends and directs agent's intentional tort, recklessness, or negligence, *or* 2. Principal is negligent regarding agent
Torts of Independent Contractors	1. Principal generally is *not* liable 2. Exceptions for direct liability, highly dangerous activities, and nondelegable duties
Misrepresentation	1. Direct liability 2. Vicarious liability where agent had authority to make true statements on the subject of the misrepresentation 3. An exculpatory clause may eliminate the principal's tort liability, but the third party still can rescind
Torts of Subagents	The preceding rules govern the principal's liability, but their application varies

Tort Liability of the Agent

Agents are usually liable for their own torts.[11] Normally, they are not absolved from liability just because they acted at the principal's command. However, there are exceptions to this generalization.

1. An agent can escape liability if she is *exercising a privilege of the principal.* Suppose that Tingle grants Parkham a right-of-way to transport his farm products over a private road crossing Tingle's land. Parkham's agent Adams would not be liable in trespass for driving across Tingle's land to transport farm products if she did so at Parkham's command. However, an agent must not exceed the scope of the privilege and must act for the purpose for which the privilege was given. Thus, Adams would not be protected if she took her Jeep on a midnight joyride across Tingle's land. Also, the privilege given the agent must be delegable in the first place. If Tingle had given the easement to Parkham exclusively, Adams would not be privileged to drive across Tingle's land.

2. A principal who is *privileged to take certain actions in defense of his person or property* may often authorize an agent to do the same. In such cases, the agent escapes liability if the principal could have done so. For example, a properly authorized agent may use force to protect the life or property of his principal if the principal could have done the same.

3. An agent who makes *misrepresentations* while conducting the principal's business is not liable in tort unless he either *knew or had reason to know* their falsity. Suppose Parker authorizes Arnold to sell his house, falsely telling Arnold that the house is fully insulated. Arnold does not know that the statement is false and could not discover its falsity through a reasonable inspection. If Arnold tells Thomas that the house is fully insulated and Thomas relies on this statement in purchasing the house, Parker is directly liable to Thomas, but Arnold is not liable.

4. An agent is not liable for injuries to third persons caused by *defective tools or instrumentalities* furnished by the principal unless the agent had actual knowledge or reason to know of the defect.

[11] The rules stated in the previous section generally govern an agent's liability for torts committed by his subagents. *Restatement (Second) of Agency* § 362 (1959).

Tort Suits Against Principal and Agent

Both principal and agent sometimes are liable for an agent's torts. Here, the parties are *jointly and severally* liable. This means that a third party may join the principal and the agent in one suit and get a judgment against each, or may sue either or both individually and get a judgment against either or both. However, once a third party actually collects in full from either the principal or the agent, no further recovery is possible.

In some cases, therefore, either the principal or the agent has to satisfy the judgment alone despite the other party's liability. Here, the other party sometimes is required to *indemnify* the party who has satisfied the judgment. As discussed in Chapter 34, for example, sometimes a principal is required to indemnify an agent for tort liability the agent incurs. On the other hand, some torts committed by agents may involve a breach of duty to their principal, and the principal may be able to recover from an agent on this basis.

Ethical and Public Policy Concerns

1. One of the justifications for *respondeat superior* is that employers are in a relatively good position to absorb the liability of employee torts, to insure against such liability, and to pass on the resulting costs. What are the advantages and disadvantages of applying this reasoning to make principals liable for all torts committed by *independent contractors* within the scope of their employment?

2. If the purposes underlying *respondeat superior* are sound ones, why limit the doctrine to employee torts committed within the scope of employment? In other words, why not make employers liable for *all* torts committed by their employees?

Problems and Problem Cases

1. The Capital Dredge and Dock Corporation sued the city of Detroit for damages associated with certain construction work it had been performing for the city. One of the city's defenses was that Capital had released the city from liability on some of Capital's present claims during earlier, related litigation between Capital and the city. The releases were part of a settlement document signed by Capital Dredge's attorney, Alteri. Capital Dredge had held Alteri out as having authority to represent it in the relevant litigation, and this included authority to negotiate a settlement. However, unknown to the city, Capital Dredge also had specifically told Alteri not to compromise some of the claims he later settled. Under these circumstances, could Alteri have had implied authority to settle the claims in question? Could he have had apparent authority to do so?

2. Rosia Adams, a warehouse employee at a school board warehouse, was injured when she slipped on a wet floor at the warehouse. The floor was wet because it had been mopped to clean up a spill from a defective Coca-Cola vending machine leased to the school district by a local Coca-Cola bottling company (Coke). The written lease for the machine required the school board to indemnify Coke for injuries like those suffered by Adams. The lease was signed by a warehouse inventory clerk. His job was simply to receive and inventory goods delivered to the school board's warehouse.

Adams sued Coke and got a judgment against it. Coke filed a third-party suit against the school board, arguing that the lease obligated the school board to compensate Coke for Adams's injuries. Based on the facts just presented, did the warehouse clerk have express, implied, or apparent authority to bind the school board to this particular term in the lease?

3. Roma Funk, who co-owned a piece of land along with her seven brothers and sisters, contracted to sell the land to her neighbors. It was unclear whether Funk had authority to sell the land on behalf of her siblings. For certain, there was no writing giving her such authority. Funk's siblings eventually backed out of the deal, and the buyers sued for specific performance. They argued that Funk's siblings had ratified her contract by failing to come forward and repudiate it. Can a contract ever be ratified in this way? Regardless of your answer to this question, there is a reason why Funk's siblings could not have ratified this particular contract. What is it? Assume that in this state an agent who executes an agreement conveying an interest in land on behalf of his principal must be authorized in writing.

4. Sally Leiner was the sole shareholder, director, and president of Ecco Bella, Inc., a New Jersey Corporation. On various occasions, African Bio-Botanica, Inc. sold Leiner and/or Ecco Bella merchandise. African gave little thought to the party with whom it was dealing. Initially, its records listed Sally Leiner as the customer; later, this was changed to Ecco Bella, but without any indication that Ecco Bella was a corporation. The checks with which Leiner paid for her orders and her firm's stationery bore the name Ecco Bella, but likewise did not indicate that the firm was a corporation.

Eventually, Leiner did not pay for a shipment from African, and African sued her personally for damages in a New Jersey trial court. Leiner's defense was that only the corporation, and not herself personally, was liable. Is Leiner correct?

5. A sales representative of Wired Music, Inc. sold Frank Pierson, president of the Great River Steamboat Company, a five-year Muzak Program Service for a riverboat and restaurant owned by Great River. Pierson signed a form contract drafted by Wired Music in the following manner:

By /s/ Frank C. Pierson, Pres.
Title

The Great River Steamboat Co.
~~Port of St. Louis Investments, Inc.~~
For the Corporation

In signing, Pierson crossed out "Port of St. Louis Investments, Inc.," which had been incorrectly listed as the name of the corporation, and inserted the proper name. The contract included the following clause arguably making Pierson a surety or guarantor for Great River: "The individual signing this agreement for the subscriber guarantees that all of the above provisions shall be complied with."

Great River made approximately four payments under the contract and then ceased to pay. Wired Music brought an action for contract damages against Pierson personally. Is Pierson liable?

6. Twelve people joined together to sponsor and promote a group of Little League baseball teams called the Golden Spike Little League. They arranged to purchase $3,900 in equipment for the league from a local sporting goods store. When the store sued the 12 individuals for refusing to pay the $3,900, they defended by arguing that they were agents for a disclosed principal, the league. Did this defense work?

7. Dale F. Everett did business as the Dale F. Everett Company, Inc. (the Company). He also formed a retail business known as The Clubhouse, which had no legal status aside from its registration as a trade name for the Company. Everett contracted with James Smith for $8,424 of advertising time. Everett signed his contract with Smith as follows: "THE CLUBHOUSE, Client, By Dale F. Everett." Smith later sent billing statements for the ads to "The Clubhouse, Inc." Everett never paid Smith the $8,424, and Smith sued Everett personally. Is Everett personally liable on the contract with Smith?

8. Redford had been a backhoe operator for five years. Although he had worked for other sign companies, he had spent 90 percent of his time during the past three years working for Tube Art Display, Inc. Redford generally dug holes exactly as directed by the sign company employing him. He did, however, pay his own business taxes, and he did not participate in any of the fringe benefits available to Tube Art employees.

Tube Art obtained a permit to install a sign in the parking lot of a combination commercial and apartment building. Telling Redford how to proceed, Tube Art's service manager laid out the exact location of a 4×4-foot square on the asphalt surface with yellow paint and directed that the hole be 6 feet deep. After Redford began the job, he struck a small natural gas pipeline with the backhoe. He examined the pipe, and, finding no indication of a leak or break, concluded that the line was not in use and left the worksite. Later, an explosion and fire occurred in the building serviced by the line. As a result, a business owned by Massey was destroyed. Massey sued Tube Art for Redford's negligence under the doctrine of *respondeat superior.* Will Massey recover? Assume that Redford was negligent.

9. John Hondzinski delivered newspapers in his own car for a newspaper called the *News Herald.* Under the contract between Hondzinski and the *News Herald,* Hondzinski was obligated to pick up and promptly deliver newspapers provided by the *News Herald,* but the means and the routes for doing so were within Hondzinski's control. While making deliveries for the *News Herald* one day, Hondzinski negligently allowed his car to collide with a car driven by Peter Janice. Janice sued the *News Herald* for Hondzinski's negligence. Can Janice recover against the *News Herald* under the doctrine of *respondeat superior?* Why or why not?

10. A. J. Gatzke, a district manager for the Walgreen Company, spent several weeks in Duluth, Minnesota, supervising the opening of a new Walgreen restaurant there. He remained at the restaurant approximately 17 hours a day, and he was on call 24 hours a day. While in Duluth, he lived at the Edgewater Motel at Walgreen's expense. After some heavy drinking late one night, Gatzke returned to his motel room and began filling out an expense account required by his employer. Shortly after Gatzke went to bed, a fire broke out in his motel room. Gatzke escaped, but fire damage to the motel totaled over $330,000. Assume that the fire was caused by Gatzke's dumping a burning cigarette or match in a wastebasket near the desk at which he worked.

Edgewater sued Walgreen for Gatzke's negligence. Under the *Restatement* test in the text, did Gatzke act within the scope of his employment when he negligently started the fire? Consider all four elements of the test.

11. Rocky Mountain Highs, Inc. ran jeep tours for tourists in the San Juan Mountains of southwest Colorado. Assume that this is a somewhat dangerous activity requiring at least some driving skill and considerable alertness. Rocky Mountain hired Ed Doper to take people on tours. The deal was that Ed would work when he felt like it, use his own 4 × 4, and pick his own routes. Indeed, Rocky Mountain really didn't supervise Ed much at all. Unfortunately, Ed was well known around town as an abuser of hallucinogenic drugs. Rocky Mountain knew this, but took Ed on anyway because it badly needed drivers.

One day, Ed took six people (and himself) to their deaths by driving over the side of a narrow four-wheel-drive road and falling 1,000 feet. The accident happened because Ed was on his own personal LSD-induced Rocky Mountain High. The survivors of the six decedents sued Rocky Mountain for the deaths, using both *respondeat superior* and direct liability. What was the result under each theory? Why?

12. The State of Indiana hired Mogul Construction Company to repair a 10-mile stretch of highway. Part of the job was to repair a bridge over a river. Mogul subcontracted this job to Wonder Construction Company. Assume that the repair of a bridge is a fairly dangerous activity that requires special precautions to keep automobile accidents from occurring. One of those precautions was to devise safe procedures for getting automobiles over the bridge while still getting the repair work done. Mogul did not tell Wonder exactly how to proceed or supervise how it did the job. Instead, the job was Wonder's to do as it saw fit.

Unfortunately, Wonder's standards of fitness evidently weren't too high. One night, 10 cars went off the bridge and into the river because the signs Wonder used to direct them around the construction work were all screwed up. Because Wonder had too few assets, the various negligence plaintiffs sued Mogul as well. Will Mogul be liable under *respondeat superior* here? Under what other theory might Mogul be liable? For each question, say why you gave the answer you did.

13. Paula hires Albert to sell her house. She tells Albert to tell potential buyers that the house is fully insulated, when she knows full well that this is a lie. Albert, who has no reason to doubt Paula and cannot inspect the house, sincerely tells Tom that the house is fully insulated. As a result, Tom buys the house. The written sale contract, however, does not claim that the house is fully insulated, and it also contains an exculpatory clause saying that Paula is not bound by Albert's representations, unless they also appear in the written contract. Paula drafted this contract herself with full knowledge that Albert would be making false statements about the insulation.

After Tom discovers that the house is not fully insulated, he sues Paula for Albert's misrepresentations. Tom sues Albert too. Assume that the presence or absence of insulation is material (important to a reasonable contracting party). Will either suit be successful? Why?

14. DVD *Video Case.* See "Martin Manufacturing." Martin, the president of Martin Manufacturing, was talking with Arnold, a new traveling salesperson, about Arnold's first week on the road. Arnold told Martin that he had hit one of Martin's customers in the customer's store. The blow came after Arnold and the customer got into an argument, during which the customer ordered Arnold out of his store. In striking the customer, Arnold was motivated at least in part by a feeling that no Martin employee should have to endure such disrespect.

Then, Arnold also told Martin that he had gotten into an accident while driving a company van. The accident occurred after Arnold negligently ran a stop sign while thinking about the fight. The driver of the other car was seriously injured in the accident.

Assuming that Arnold is an employee, is Martin liable to the customer for any battery Arnold committed, and to the driver of the car for Arnold's negligence?

- *A. Partner's Transferable Interest*
  - *1. Transfer*
  - *2. Charging Order*
- *B. Effect of Partnership Agreement*
  - *1. Joint Venturers and Mining Partners*

In this chapter, you begin your study of business organizations. Early in this chapter, you will preview the basic characteristics of the most important forms of business and learn how to select an appropriate form for a business venture. Following that introduction, you will begin your in-depth study of partnerships, learning their characteristics and the formalities for their creation.

Choosing a Form of Business

One of the most important decisions made by a person beginning a business is choosing a **form of business.** This decision is important because the business

owner's liability and control of the business vary greatly among the many forms of business. In addition, some business forms offer significant tax advantages to their owners.

Although other forms of business exist, usually a person starting a business will wish to organize the business as a sole proprietorship, partnership, limited liability partnership, limited partnership, corporation, or limited liability company.

Sole Proprietorship

A **sole proprietorship** has only one owner. The sole proprietorship is merely an extension of its only owner, the **sole proprietor.**

As the only owner, the sole proprietor has the right to make all the management decisions of the business. In addition, all the profits of the business are his. A sole proprietor assumes great liability: He is personally liable for all the obligations of the business. All the debts of the business, including debts on contracts signed only in the name of the business, are his debts. If the assets of the business are insufficient to pay the claims of its creditors, the creditors may require the sole proprietor to pay the claims using his individual, nonbusiness assets such as money from his bank account and the proceeds from the sale of his house. A sole proprietor may lose everything if his business becomes insolvent. Hence, the sole proprietorship is a risky form of business for its owner.

Despite this risk, there are two reasons why a person may organize a business as a sole proprietorship. First, the sole proprietorship is formed very easily and inexpensively. No formalities are necessary. Second, few people consider the business form decision. They merely begin their businesses. Thus, by default, a person going into business by herself automatically creates a sole proprietorship when she fails to choose another business form. These two reasons explain why the sole proprietorship is the most common form of business in the United States.

Because the sole proprietorship is merely an extension of its owner, it has no life apart from its owner. Therefore, while the business of a sole proprietorship may be freely sold to someone else, legally the sole proprietorship as a form of business cannot be transferred to another person. The buyer of the business must create his own form of business to continue the business.

A sole proprietorship is not a legal entity. It cannot sue or be sued. Instead, creditors must sue the owner. The sole proprietor—in his own name—must sue those who harm the business.

A sole proprietor may hire employees for the business, but they are employees of the sole proprietor. Under the law of agency, the sole proprietor is responsible for her employees' authorized contracts and for the torts they commit in the course of their employment. Also, a sole proprietorship is not a tax-paying entity for federal income tax purposes. All of the income of a sole proprietorship is income to its owner and must be reported on the sole proprietor's individual federal income tax return. Likewise, any business losses are deductible without limit on the sole proprietor's individual tax return. This loss-deduction advantage explains why some wealthier taxpayers use the sole proprietorship for selected business investments—when losses are expected in the early years of the business, yet the risk of liability is low. Such an investor may form a sole proprietorship and hire a professional manager to operate the business.

Many sole proprietorships have trade names. For example, Caryl Stanley may operate her bagel shop under the name Caryl's Bagel Shop. Caryl would be required to file the trade name under a state statute requiring the registration of fictitious business names. If she were sued by a creditor, the creditor would address his complaint to "Caryl Stanley, doing business as Caryl's Bagel Shop."

Partnership

A **partnership** has two or more owners, called **partners.** The partners have the right to make all the management decisions for the business. In addition, all the profits of the business are shared by the partners.

The partners assume personal liability for all the obligations of the business. All the debts of the business are the debts of all the partners. Likewise, partners are liable for the torts committed in the course of business by their partners or by partnership employees. If the assets of the business are insufficient to pay the claims of its creditors, the creditors may require one or more of the partners to pay the claims using their individual, nonbusiness assets. Thus, a partner may have to pay more than his share of partnership liabilities.

Like the sole proprietorship, the partnership is not a tax-paying entity for federal income tax purposes. All of the income of the partnership is income to its partners and must be reported on the individual partner's federal income tax return whether or not it is distributed

to the partners. Likewise, any business losses are deductible without limit on the partner's individual tax return.

The partnership has a life apart from its owners. When a partner dies or otherwise leaves the business, the partnership usually continues. A partner's ownership interest in a partnership is not freely transferable: A purchaser of the partner's interest is not a partner of the partnership, unless the other partners agree to admit the purchaser as a partner.

Why would persons organize a business as a partnership? Formation of a partnership requires no formalities and may be formed by default. A partnership is created automatically when two or more persons own a business together without selecting another form. Also, each partner's right to manage the business and the deductibility of partnership losses on individual tax returns are attractive features.

Limited Liability Partnership

Reacting to the large personal liability sometimes imposed on accountants and lawyers for the professional malpractice of their partners, Texas enacted in 1991 the first statute permitting the formation of **limited liability partnerships (LLP).** An LLP is identical to a partnership except that an LLP partner has no liability for most LLP obligations; however, an LLP partner retains unlimited liability for his *own* wrongful acts, such as his malpractice liability to a client.

LLP partners may elect to have the LLP taxed like a partnership or a corporation. If an LLP is taxed like a corporation, it pays federal income tax on its income, but the partners pay federal income tax only on the compensation paid and the partnership profits distributed to the partners.

The formation of an LLP requires filing a form with the secretary of state; some states require LLPs to maintain adequate professional insurance or have a high net worth.

The LLP is an especially good form of business for professionals such as consultants and auditors, allowing them management flexibility while insulating them mostly from personal liability. The LLP is the preferred form of business for professionals who do not incorporate.

Limited Partnership

A **limited partnership** has one or more general partners and one or more limited partners. General partners have rights and liabilities similar to partners in a partnership. They manage the business of the limited partnership and have unlimited liability for the obligations of the limited partnership. Typically, however, the only general partner is a corporation, thereby protecting the human managers from unlimited liability.

Limited partners usually have no liability for the obligations of the limited partnership once they have paid their capital contributions to the limited partnership. Limited partners have no right to manage the business and may lose their limited liability for the business's obligations if they do manage the business.

Like an LLP, a limited partnership may elect to be taxed either as a partnership or as a corporation. If a limited partnership is taxed like a partnership, general partners report their shares of the limited partnership's income and losses on their individual federal income tax returns. For general partners, losses of the business are deductible without limit. A limited partner must pay federal income tax on his share of the profits of the business, but he may deduct his share of losses only to the extent of his investment in the business. As a passive investor, a limited partner may use the losses only to offset income from other passive investments.

If a limited partnership is taxed like a corporation, the limited partnership pays federal income tax on its net income. The partners pay federal income tax only on compensation paid and profits distributed to them.

A limited partnership may have a life apart from its owners. When a limited partner dies or otherwise leaves the business, the limited partnership is not dissolved. When a general partner dies or withdraws, however, the limited partnership may be dissolved in the absence of a contrary agreement. A general or limited partner's rights may not be wholly transferred to another person unless the other partners agree to admit the new person as a partner.

Unlike a sole proprietorship or partnership, a limited partnership may be created only by complying with a state statute permitting limited partnerships. Thus, no limited partnership may be created by default.

There are three main reasons why persons organize a business as a limited partnership. First, by using a corporate general partner, no human will have unlimited liability for the debts of the business. Second, if the limited partnership is taxed like a partnership, losses of the business are deductible on the owners' federal income tax returns. Third, investors may contribute capital to the business yet avoid unlimited liability and the obligation to manage the business. Thus,

the limited partnership has the ability to attract large amounts of capital, much more than the sole proprietorship, which has only one owner, or the partnership, whose partners' fear of unlimited liability restricts the size of the business. Hence, for a business needing millions of dollars of capital and expecting to lose money in its early years, the limited partnership is a particularly good form of business.

Limited Liability Limited Partnership

The **limited liability limited partnership (LLLP)** is a recent creation. It is created when the partners in a limited partnership elect limited liability status by making a filing with the secretary of state. The LLLP is designed to give the same limited liability advantages to general partners in a limited partnership as have been granted to partners who manage an LLP or a limited liability company (LLC). The LLC is explained below.

The LLLP is identical to a limited partnership in its management and the rights and duties of its partners. However, by electing LLLP status, both the limited partners and the general partners in a limited partnership will have no liability for most obligations of the LLLP. Nonetheless, a general partner will have unlimited liability for any wrongs he commits while acting for the LLLP.

Corporation

A **corporation** is owned by shareholders who elect a board of directors to manage the business. The board of directors often selects officers to run the day-to-day affairs of the business. Consequently, ownership and management of a corporation may be completely separate: No shareholder has the right to manage, and no officer or director needs to be a shareholder.

Shareholders have limited liability for the obligations of the corporation, even if a shareholder is elected as a director or selected as an officer. Directors and officers have no liability for the contracts they or the corporation's employees negotiate in the name of the corporation. While managers have liability for their own misconduct, they have no liability for corporate torts committed by other corporate managers or employees. Therefore, shareholders, officers, and directors have limited liability for the obligations of the business.

The usual corporation is a tax-paying entity for federal income tax purposes. The corporation pays taxes on its profits. Shareholders do not report their shares of corporation profits on their individual federal income tax returns. Instead, only when the corporation distributes its profits to the shareholders in the form of dividends or the shareholders sell their investments at a profit do the shareholders report income on their individual returns. This creates a double-tax possibility, as profits are taxed once at the corporation level and again at the shareholder level when dividends are paid.

Also, shareholders do not deduct corporate losses on their individual returns. They may, however, deduct their investment losses after they have sold their shares of the corporation.

There is one important exception to these corporate tax rules. The shareholders may elect to have the corporation and its shareholders taxed under Subchapter S of the Internal Revenue Code. By electing **S Corporation** status, the corporation and its shareholders are taxed nearly entirely like a partnership: Income and losses of the business are reported on the shareholders' individual federal income tax returns. A corporation electing S Corporation status may have no more than 75 shareholders, have only one class of shares, and be owned only by individuals and trusts.

A corporation has a life separate from its owners and its managers. When a shareholder or manager dies or otherwise leaves the business, the corporation is not dissolved. A shareholder may sell his shares of the corporation to other persons without limitation unless there is a contrary agreement. The purchaser becomes a shareholder with all the rights of the selling shareholder.

There are several reasons why persons organize a business as a corporation. First, no human has unlimited liability for the debts of the business. As a result, businesses in the riskiest industries—such as manufacturing—incorporate. Second, because investors may contribute capital to the business, avoid unlimited liability, escape the obligation to manage the business, and easily liquidate their investments by selling their shares, the corporation has the ability to attract large amounts of capital, even more than the limited partnership, whose partnership interests are not as freely transferable. Thus, the corporation has the capacity to raise the largest amount of capital.

The S Corporation has an additional advantage: Losses of the business are deductible on individual federal income tax returns. However, because the S Corporation is limited to 75 shareholders, its ability to

raise capital is severely limited. Also, while legally permitted to sell their shares, S corporation shareholders may be unable to find investors willing to buy their shares or may be restricted from selling their shares pursuant to an agreement between the shareholders.

Professional Corporation

All states permit professionals such as accountants, physicians, and dentists to incorporate their professional practices. The **professional corporation** is identical to a business corporation in most respects. It is formed only by a filing with the secretary of state, and it is managed by a board of directors, unless a statute permits it to be managed like a partnership. The rigid management structure makes the professional corporation inappropriate for some smaller professional practices.

While professional shareholders have no personal liability for the obligations of the professional corporation, such as a building lease, they retain unlimited liability to their clients for their professional malpractice. A professional will have no personal liability, however, for the malpractice of a fellow shareholder or associate.

Only professionals holding the same type of license to practice a profession may be shareholders of a professional corporation. For example, only physicians licensed to practice medicine may be shareholders of a professional corporation that practices medicine.

Professional corporation shareholders may elect for the corporation to be taxed like a corporation, or they may elect S Corporation tax treatment.

Fewer and fewer professionals incorporate each year. All of the liability and taxation advantages of the professional corporation have been assumed by the LLP. In addition, most professionals like the flexible management structure of the LLP better.

Limited Liability Company

A **limited liability company (LLC)** is a business form intended to combine the nontax advantages of corporations with the favorable tax treatment of partnerships. An LLC is owned by members, who may manage the LLC themselves or elect the manager or managers who will operate the business. Members have limited liability for the obligations of the LLC.

Some states permit professionals to organize as LLCs. Professionals in a professional LLC have unlimited liability, however, for their own malpractice. Like an LLP or LLLP, members of an LLC may elect to have the LLC taxed like a partnership or a corporation.

There is a lack of free transferability of the members' ownership interests: Transfer of membership interests is prohibited without the consent of all the members or a provision in the LLC agreement permitting transfer. However, the death, retirement, or bankruptcy of any member usually does not dissolve or cause the liquidation of the LLC, unless all the members agree otherwise.

What are the advantages of the LLC? The LLC has the limited liability advantage and the management advantage of the corporation. The LLC and its members receive the same federal tax treatment as the S Corporation and its shareholders, yet the LLC has no limit on the number or type of owners, as does an S Corporation.

See Figure 1 for a summary of the general characteristics of business forms.

Franchising

Franchising is an agreement by which a **franchisee** has the right to sell goods or services under a marketing plan prescribed in substantial part by a **franchisor.** Thus, when a franchisee purchases a franchise, the franchisee buys a *business opportunity,* which the franchisee may choose to operate as any form of business. For example, if you obtain a McDonald's restaurant franchise for the south side of Santa Fe, you will probably choose to operate the business as a corporation.

Franchising has advantages for both the franchisee and the franchisor. The franchisee receives the franchisor's assistance in setting up the business and training employees. In addition, the franchisee may benefit from the franchisor's national advertising and strong trademark and goodwill. For example, a McDonald's franchisee obtains instant visibility and credibility from displaying the McDonald's golden arches. In return for this assistance, the franchisee usually pays a substantial purchase price plus a fee based on income, sales, or the purchase price of specified supplies. For example, an ice-cream restaurant franchise may pay its franchisor 15 percent of the price it pays for its ice-cream mix. The fee is collected for the franchisor by an authorized supplier of the mix.

The franchisor also benefits. Instead of making a high investment in several business locations, the franchisor shifts most of the investment risk to the franchisees. Yet the franchisor receives income from the

franchisees' operation of their businesses. And while the franchisor's profits are tied to the franchisees' success, the franchisees typically have a sizable investment in the franchises and have a strong incentive to succeed. Also, the franchisor can adopt standards to ensure it selects high-quality franchisees with superior financial strength. Using franchising allows a franchisor to exploit its trademark and goodwill yet also protect itself by requiring franchisees to adopt uniform image and marketing practices.

Nature of Franchisor/Franchisee Relationship Because a franchisor may exercise some control over parts of a franchisee's business, there is a risk that the franchisor may be liable for the torts and contracts of the franchisee. Most franchising agreements provide that the franchisee is not an agent or partner of the franchisor. Some courts refuse to accept this characterization of the relationship, especially when the degree and type of control by the franchisor suggest an agency relationship. For example, when a franchisor has the right to control a franchisee's prices, the franchisor may be responsible for any resulting antitrust violation resulting from the franchisee's pricing decisions.

Franchisee Protection In response to abuses by franchisors, the courts, the Federal Trade Commission, and the state legislatures have created rules that protect franchisees. The typical franchising agreement gives a franchisor wide latitude to terminate a franchisee. Some courts have invalidated such termination power or required that terminations be made in good faith. The Federal Trade Commission has issued a franchise disclosure rule and guidelines requiring franchisors to disclose their financial fees and charges, the franchisees' obligations to purchase supplies, and territorial restrictions on the franchisees. In addition, most of the states require disclosure and termination protection for franchisees.

Partnerships

The basic concept of partnership is as ancient as the history of collective human activity. Partnerships were known in ancient Babylonia, ancient Greece, and the Roman Empire. Hammurabi's Code of 2300 B.C. regulated partnerships. The definition of a partnership in the 6th-century Justinian Code of the Roman Empire does not differ materially from that in our laws today. The partnership was likewise known in Asian countries, including China. During the Middle Ages, much trade between nations was carried on by partnerships.

By the close of the 17th century, the partnership was recognized in the English common law. When the United States became an independent nation and adopted the English common law in 1776, the English law of partnerships became a part of American law. In the early part of the 19th century, the partnership became the most important form of association in the United States.

Today, the American common law of partnership has been largely replaced by statutory law. Every state has a statute on partnership law. The Revised Uniform Partnership Act (RUPA) of 1994, with the 1997 amendments, is a model partnership statute that is the product of the National Conference of Commissioners on Uniform State Laws, a group of practicing lawyers, judges, and law professors. The aims of the RUPA are to codify partnership law in one document, to make that law more nearly consistent with itself, and to attain uniformity throughout the country.

In recent years, the RUPA has supplanted the Uniform Partnership Act (UPA) of 1914 as the dominant source of partnership law in the United States. As of April 2000, 25 states plus the District of Columbia, Puerto Rico, and the Virgin Islands have adopted the RUPA. The RUPA is the framework of your study of partnerships and limited liability partnerships. (See Figure 2.) You can check whether your state has adopted the RUPA at the following website: www.nccusl.org/.

Creation of Partnership

No formalities are necessary to create a partnership. Two or more persons may become partners in accordance with a written partnership contract (articles of partnership), they may agree orally to be partners, or they may become partners merely by arranging their affairs as if they were partners. If partners conduct business under a trade name, they must file the name with the secretary of state in compliance with state statutes requiring the registration of fictitious business names.

When people decide to become partners, they should employ a lawyer to prepare a written partnership agreement. Although a partnership agreement is not required to form a partnership, it is highly desirable for the same reasons that written contracts are

Figure 2 *Principal Characteristics of Partnerships under the RUPA*

1. A partnership may be created with no formalities. Two or more people merely need to agree to own and conduct a business together in order to create a partnership.
2. Partners have unlimited liability for the obligations of the business.
3. Each partner, merely by being an owner of the business, has a right to manage the business of the partnership. He is an agent of the partnership and may make the partnership liable for contracts, torts, and crimes. Because partners are liable for all obligations of the partnership, in effect each partner is an agent of the other partners. Each partner may hire agents, and every partner is liable for the agents' authorized contracts and for torts that the agents commit in the course of their employments.
4. A partnership is not an employer of the partners, for most purposes. As a result, for example, a partner who leaves a partnership is not entitled to unemployment benefits.
5. Partners are fiduciaries of the partnership. They must act in the best interests of the partnership, not in their individual best interests.
6. The profits or losses of the business are shared by the partners, who report their shares of the profits or losses on their individual federal income tax returns, because the partnership does not pay federal income taxes. Nonetheless, a partnership does keep its own financial records and must file an information return with the Internal Revenue Service.*
7. A partnership may own property in its own name.
8. A partnership may sue or be sued in its own name. The partners may also be sued on a partnership obligation.
9. A partner may sue her partners during the operation of the partnership.
10. A partner's ownership interest in a partnership is not freely transferable. A purchaser of a partner's interest does not become a partner, but is entitled to receive only the partner's share of the partnership's profits.
11. Generally, a partnership has a life apart from its owners. If a partner dies, the partnership usually continues.

*The federal income tax return filed by a partnership is merely an information return in which the partnership indicates its gross income and deductions and the names and addresses of its partners (IRC Sec. 6031). The information return allows the Internal Revenue Service to determine whether the partners accurately report partnership income on their individual returns.

generally preferred. In addition, the statute of frauds requires a writing for a partnership having a term exceeding one year.

More importantly, when partners do not define their relationship as partners, the default rules of the RUPA determine the rights of the partners vis-à-vis each other. While the RUPA rules are sensible and meet the needs of many partners, they may not meet the specific interests of other partners. Thus, having a written partnership agreement will allow the partners to define their rights and duties appropriately for them.

When there is no written partnership agreement, a dispute may arise over whether persons who are associated in some enterprise are partners. For example, someone may assert that she is a partner and, therefore, claim a share of the value of a successful enterprise. More frequently, an unpaid creditor may seek to hold a person liable for a debt incurred by another person in the same enterprise. To determine whether there is a partnership in the absence of an express agreement, the courts use the definition of partnership in the RUPA.

RUPA Definition of Partnership

The RUPA defines a partnership as an "association of two or more persons to carry on as co-owners a business for profit." If the definition is satisfied, then the courts will treat those involved as partners. A relationship may meet the RUPA definition of partnership even when a person does not believe he is a partner, and occasionally, even if the parties agree that they are not partners.

Association of Two or More Persons As an association, a partnership is a *voluntary and consensual relationship.* It cannot be imposed on a person; a person must agree expressly or impliedly to have a person associate with her. For example, a partner cannot force her partners to accept her daughter into the partnership.

No person can be a partner with herself—a partnership must have *at least two partners.* A person may be a partner with her spouse.

Nearly everyone or everything may be a partner. An individual, trust, partnership, limited partnership, corporation, or other association may be a partner.

Carrying On a Business Any trade, occupation, or profession may qualify as a business. Carrying on a business usually requires a series of transactions conducted over a period of time. For example, a group of farmers that buys supplies in quantity to get lower prices is not carrying on a business but only part of one. If the group buys harvesting equipment with which it intends to harvest crops for others for a fee for many years, it is carrying on a business.

Co-Ownership Partners must *co-own the business* in which they associate. There is no requirement that the capital contributions or the assets of the business be co-owned.

Also, by itself, co-ownership of assets does not establish a partnership. For example, two persons who own a building as joint tenants are not necessarily partners. To be partners, they must co-own a business.

The two most important factors in establishing co-ownership of the business are the sharing of profits and the sharing of management of the business. The RUPA declares that a person's **sharing the profits** of a business is presumptive evidence that she is a partner in the business. This means that persons sharing profits are partners, unless other evidence exists to disprove they are partners. The rationale for this rule is that a person ordinarily would not be sharing the profits of a business unless she were a co-owner. This rule brings under partnership law many persons who fail to realize that they are partners. For example, two college students who purchase college basketball tickets, resell them, and split the profits are partners.

Sharing the gross revenues of a business does not create a presumption of partnership. The profits, not the gross receipts, must be shared. For example, a broker who receives a commission on a sale of land is not a partner of the seller of that land.

Although sharing profits usually is presumptive proof of a partnership, the RUPA provides that no presumption of partnership is made when a share of profits is received in payment

1. of a debt.
2. of interest on a loan.
3. of wages to an employee or services to an independent contractor.
4. of rent.
5. of an annuity or other retirement or health benefit to a beneficiary or representative of a deceased partner.
6. for the sale of the goodwill of a business or other property.

These exceptions reflect the normal expectations of the parties that no partnership exists in such situations.

Sharing management of a business is additional evidence tending to prove the existence of a partnership. However, by itself, participation in management is not conclusive proof of the existence of a partnership. For example, a creditor may be granted considerable control in a business, such as a veto power over partnership decisions and the right of consultation, without becoming a partner. Also, a sole proprietor may hire someone to manage his business, yet the manager will not be a partner of the sole proprietor.

However, when the parties claim that they share profits for one of the six reasons above, the sharing of management may overcome the presumption that they are not partners. When the parties arrange their affairs in a manner that otherwise establishes an objective intent to create a partnership, the courts find that a partnership exists. For example, when a nonmanagerial employee initially shares profits as a form of employment compensation, the employee is not a partner of his employer. But when the employer and employee modify their relationship by having the employee exercise the managerial control of a partner and fail to reaffirm that the manager is merely an employee, a partnership may exist.

Creditors occupy a privileged position. Many cases have permitted creditors to share profits and to exercise considerable control over a business without becoming partners. Creditor control is often justified on the grounds that it is merely reasonable protection for the creditor's risk.

For Profit The owners of an enterprise must *intend to make a profit* to create a partnership. If the enterprise suffers losses, yet the owners intend to make a profit, a partnership may result. When an endeavor is carried on by several people for charitable or other nonprofit objectives, it is not a partnership. For example, Alex and Geri operate a restaurant booth at a county fair each year to raise money for a Boy Scout troop. Their relationship is not a partnership but merely an association. (Nonetheless, like partners, they may be individually liable for the debts of the enterprise.)

Intent Frequently, courts say that there must be intent to form a partnership. This rule is more correctly stated as follows: *The parties must intend to create a*

relationship that the law recognizes as a partnership. A partnership may exist even if the parties entered it inadvertently, without considering whether they had created a partnership. A written agreement to the effect that the parties do not intend to form a partnership is not conclusive if their actions provide evidence of their intent to form a relationship that meets the RUPA partnership test.

There are several important consequences of being a partner. See Figure 3 for a summary of the most important consequences.

Figure 3 *Important Consequences of Being a Partner*

1. You share ownership of the business. For example, you want to bring an employee into your business, which is worth $250,000. If you and the employee conduct your affairs like partners, your employee will own half of your business.
2. You share the profits of the business.
3. You share management of the business. Your partner must be allowed to participate in management decisions.
4. Your partner is an agent of the partnership. You are liable for your partner's torts and contracts made in the ordinary course of business.
5. You owe fiduciary duties to your partnership and your partner, such as the duties not to compete with the business, not to self-deal, and not to disclose confidential matters.
6. You have unlimited personal liability for all the obligations of the partnership.

Creation of Joint Ventures

Courts frequently distinguish **joint ventures** from partnerships. A joint venture may be found when a court is reluctant to call an arrangement a partnership because the purpose of the arrangement is not to establish an ongoing business involving many transactions; instead, it is limited to a single project. For example, an agreement to buy, develop, and resell for profit a particular piece of real estate is likely to be viewed as a joint venture rather than a partnership. In all other respects, joint ventures are created just as partnerships are created. The joint venturers may have a formal written agreement. In its absence, a court applies the RUPA definition of partnership—modified so as not to require the carrying on of a business—to determine whether a joint venture has been created.

The legal implications of the distinction between a partnership and a joint venture are not entirely clear. Generally, partnership law applies to joint ventures. For example, all of the participants in a joint venture are personally liable for its debts, and joint venturers owe each other the fiduciary duties imposed on partners. Joint ventures are treated as partnerships for federal income tax purposes. The most significant difference between joint venturers and partners is that joint venturers are usually held to have *less implied and apparent authority* than partners, because of the limited scope of the enterprise.

The following *Fitchie* case applies partnership law to the question of whether a joint venture has been created by players of the Illinois state lottery.

Fitchie v. Yirko *570 N.E. 2d 892 (Ill. App. Ct. 1991)*

Phyllis Huisel operated a coffee shop called the Hitching-A-Ride, from which she sold tickets for the Illinois state lottery. A regular customer, Rick Yurko, frequently purchased lottery tickets from Phyllis. In mid-February 1990, Yurko purchased $100 dollars worth of $1 Fortune Hunt lottery tickets. The lottery tickets were the scratch-off variety, which revealed instant winners when the lottery player scratched off a film covering the tickets. Yurko asked Phyllis to help him scratch off the tickets, but she suggested that Judy Fitchie, one of her employees, should scratch off the tickets because Judy was luckier than Phyllis. Yurko placed several tickets in front of Judy and Frances Vincent, another customer at the coffee shop, and invited them to help him scratch them off. Yurko stated that if they would help him scratch off the lottery tickets, they would be his partners and would share in any winnings.

After playing for some time, Judy uncovered three television sets and announced that she had a winner. The ticket scratched by Judy gave the owner a chance to compete for a $100,000 prize. The owner of the ticket

was required to complete the back of ticket, indicating the name, address, and phone number of the owner. Completed tickets were to be mailed to the Illinois Department of the Lottery; six tickets would be drawn and their owners would appear on the lottery television show.

Judy placed the ticket near Phyllis, and Yurko urged Phyllis to fill it out. Phyllis did not want to appear on television. Yurko indicated he would appear on television, and after discussion, Phyllis, Judy, Frances, and Yurko agreed that Yurko would be their representative and go on television. Yurko then printed on the back of the ticket "F.J.P. Rick Yurko." F.J.P. represented the first initials of Frances, Judy, and Phyllis. When Yurko started filling out the ticket, he told Phyllis that he was going to put all their initials and his name on the ticket and that they would be partners no matter what they might win.

The ticket was mailed to the Lottery and was one of six drawn for the lottery television show. Yurko appeared on the show and won the $100,000 prize. Thereafter, Yurko claimed all the $100,000 for himself. Phyllis, Judy, and Frances sued Yurko to recover shares of the winnings. The trial court held that they were partners or joint venturers entitled to an equal share of the winnings. Yurko appealed to the Appellate Court of Illinois.

Bowman, Justice The evidence indicates that the arrangement between Yurko, Phyllis, Judy, and Frances constituted a joint venture. A joint venture is essentially a partnership carried on for a single enterprise.

A joint venture is an association of two or more persons to carry out a single enterprise for profit. Whether a joint venture exists is a question of the intent of the parties. The elements to be considered in determining the parties' intent are: an agreement to carry on an enterprise; a demonstration of intent by the parties to be joint venturers; a joint interest, as reflected in the contribution of property, finances, effort, skill, or knowledge by each party; a measure of proprietorship or joint control over the enterprise; and a provision for sharing of profits and losses. A formal agreement is not essential to establish a joint venture. Rather, the existence of a joint venture may be inferred from facts and circumstances demonstrating that the parties, in fact, undertook a joint enterprise.

The parties entered into an agreement and showed their intent to be joint venturers when they started playing the lottery together. Yurko invited the women, both verbally and by placing tickets in front of them, to play the lottery with him. Yurko told them that if they would help him scratch tickets they would be his partners and would share in any prize winnings. They expressed agreement with Yurko's proposal when they began scratching off the tickets.

Both Judy and Frances uncovered tickets that were good for small cash prizes or more tickets. None of the players tried to claim any of those prizes as their own. Rather, the tickets were turned in for more tickets, and the players kept on scratching. After the winning ticket was revealed, there was discussion amongst all the parties as to who would appear on the television show. Together, not individually, they decided that Yurko would be the one to go. Yurko impliedly acknowledged a joint effort when he printed the women's initials right alongside his own name on the back of the winning ticket, again amidst talk that he and the women were partners.

A joint interest in the effort to win the lottery is also found in the evidence. It is undisputed that Yurko paid for the tickets. Frances and Judy expended their time and energy and put forth effort to scratch the tickets. While Phyllis's part in this is not altogether clear, Phyllis scratched off a couple of tickets, and it is evident the other parties considered her part of the enterprise.

Finally, with regard to provision for sharing of profits, Yurko told the women they would share in anything that was won if they helped scratch the tickets. Yurko also wrote the women's initials next to his own on the line provided on the lottery ticket for the ticket holder's name. This evidence proves that the joint venturers planned to share equally in any lottery prize ultimately won.

We acknowledge the informality of the arrangement between Yurko and the women. Nonetheless, the parties should be bound by the terms of their agreement to jointly carry out an enterprise for profit.

Judgment for Fitchie, Huisel, and Vincent affirmed.

Creation of Mining Partnerships

Although similar to an ordinary partnership or a joint venture, a mining partnership is recognized as a distinct relationship in a number of states. Persons who cooperate in the working of either a mine or an oil or gas well are treated as mining partners if there is (1) joint ownership of a mineral interest, (2) joint operation of the property, and (3) sharing of profits and losses. Joint operation requires more than merely financing the development of a mineral interest, but it does not require active physical participation in operations; it may be proved by furnishing labor, supplies, services, or advice. The delegation of sole operating responsibility to one of the participants does not bar treatment as a mining partnership.

Creation of Limited Liability Partnerships

Unlike an ordinary partnership, a limited liability partnership (LLP) may not be created merely by partners conducting a business together. The partners must expressly agree to create an LLP by complying with a limited liability partnership statute. The formation of an LLP requires filing a form with the secretary of state, paying an annual fee, and adding the words "Registered Limited Liability Partnership," "Limited Liability Partnership," or the acronym "RLLP" or "LLP" to the partnership's name. Some states also require an LLP to maintain a minimum level of professional liability insurance or net worth.

Purported Partners

Two persons may not be partners, yet in the eyes of a third person they may **appear** to be partners. If the third person deals with one of the apparent partners, he may be harmed and seek to recover damages from both of the apparent partners. The question, then, is whether the third person may collect damages from both of the apparent partners.

For example, Thomas thinks that Wilson, a wealthy person, is a partner of Porter, a poor person. Thomas decides to do business with Porter on the grounds that if Porter does not perform as agreed, he can recover damages from Wilson. If Thomas is wrong and Wilson is not Porter's partner, Thomas ordinarily has no recourse against Wilson. RUPA Section 308(e) states that "persons who are not partners as to each other are not liable as partners to other persons." However, if Thomas can prove that Wilson misled him to believe that Wilson and Porter were partners, he may sue Wilson for damages suffered when Porter failed to perform as agreed. This is an application of the doctrine of **purported partners.**

The liability of a purported partner is based on substantial, detrimental reliance on the appearance of partnership. A person will be a purported partner and have liability when three elements are met:

1. A person purports to be or consents to being represented as a partner of another person or partnership.
2. A third party relies on the representation.
3. The third party transacts with the actual or purported partnership.

The third party may hold liable the persons who purported to be partners or consented to being represented as the partner of the actual or purported partnership.

Purporting to Be a Partner

A person may purport to be a partner by referring to himself as another person's partner. Or he might appear frequently in the office of a purported partner and confer with him. Perhaps he and another person share office space, have one door to an office with both of their names on it, have one telephone number, and share a secretary who answers the phone giving the names of both persons.

More difficult is determining when a person *consents* to being represented as another's partner. Mere knowledge that one is being held out as a partner is not consent. But a person's silence in response to a statement that the person is another's partner is consent.

For example, suppose Chavez tells Eaton that Gold is a partner in Birt's new retail shoe business. In fact, Gold is not Birt's partner. Later, Gold learns of the conversation between Chavez and Eaton. Gold does not have to seek out Chavez and Eaton to tell them that he is not Birt's partner in order to avoid being held liable as a partner for Birt's business debts. Had Chavez made the statement to Eaton in Gold's presence, however, Gold must deny the partnership relation or he will be held liable for Eaton's subsequent reliance on Gold's silence.

Note also that if a public representation is made that a person is a partner, the purported partner is liable to any person who relies on the representation, even if the purported partner is not aware of the reliance.

Reliance Resulting in a Transaction with the Partnership

A purported partner is liable only to those persons who rely on the representation and enter into a transaction with the actual or purported partnership. This means that purported partnership is determined on a case-by-case basis. The third party must in fact rely on the appearance of partnership. For example, when Trump transacts with Doby based on Crabb's representation that Doby and Crabb are partners, Trump is able to hold both Doby and Crabb liable. If however, Trump had dealt with Doby believing Doby was in business by herself and later discovers that Crabb had purported to be Doby's partner, only Doby would be liable to Trump, because there was no reliance on Crabb's purporting to be Doby's partner when Trump transacted with Doby.

Effect of Purported Partnership

Once persons are proved to be purported partners, a person who purported to be the others' partner or who consented to being represented as the others' partner is liable as though he were a partner of those persons. He is liable on contracts entered into by third parties on their belief that he was a partner. He is liable for torts committed during the course of relationships entered by third parties who believed he was a partner. In addition, a partnership that represents that a person is a partner endows the purported partner with the apparent authority to make contracts for the partnership.

Although two persons are purported partners to a person who knows of the representation and who relies on it, the purported partners are not partners in fact and do not share the profits, management, or value of the business of the purported partnership. Purported partnership is merely a device to allow creditors to sue persons who mislead the creditors into believing that a partnership exists.

In the following *Palmer* case, the court found that there was a factual dispute whether the two lawyers were purported partners under the RUPA.

Palmer v. Claydon *1999 Conn. Super. LEXIS 2661 (Conn. Super. Ct. 1999)*

Linda Palmer sued John Claydon, an attorney, for legal malpractice in connection with legal services he provided her in several land transactions. Palmer also sued George Lawler. Lawler was not a partner of Claydon, did not provide any services to Palmer, and did not participate in Claydon's services provided to Palmer. Palmer alleged, however, that Lawler was liable for Claydon's malpractice because he was a purported partner of Claydon. Lawler asked the court to grant him summary judgment.

Hodgson, Justice Lawler asserts as a first ground that he was not a law partner of Claydon and did not hold himself out to be. He states that he and Claydon were never partners but that they shared space and expenses. He states that he and Claydon "never shared clients, nor employed each other to represent our clients" and did not commingle their funds received from the practice of law nor share profits or losses from the practice of law.

Palmer asserts that the two attorneys held themselves out to be a partnership by identifying their practice as "Claydon & Lawler" on a sign at their law office and on their stationery and in their telephone directory listing. She further avers that Claydon introduced Lawler to her as his law partner; and that Lawler, in a telephone conversation with her, identified himself as Claydon's law partner. The plaintiff further avers in her affidavit that she relied on the status of the entity as a partnership:

> I relied upon Attorney Claydon's and Attorney Lawler's representations that they did business as a law partnership. I believed that I would have the benefits of working with a partnership, including adequate resources and legal coverage for the real estate transactions.

Lawler states that "the only way in which Palmer can hold Lawler liable in this action is if she can prevail that there was a partnership between Lawler and Claydon." The court does not agree with this

statement. While Palmer does not allege that there was an actual partnership, she alleges that Claydon and Lawler held themselves out as partners and that she relied on that representation.

Pursuant to Conn. Gen. Stat. 34–329(a), a party who purports, by words or conduct, to be a partner or consents to being represented by another as a partner in a partnership is liable to persons who rely on the representation in entering "into a transaction with the actual or purported partnership" either to the same extent as a partner for partnership liability or "jointly and severally" with any other person consenting to the representation that a partnership existed, depending on the situation.

The affidavits submitted plainly establish that there are disputed issues of material fact concerning (a) whether defendant Lawler held himself out as a participant in a partnership or allowed that impression to be created by defendant Claydon and (b) whether Palmer relied on the representation that a partnership existed. The existence of these disputed issues of material fact precludes summary judgment on the first ground raised by Lawler.

Lawler has failed to establish entitlement to summary judgment on this ground; however, he asserts a separate and distinct ground based on Palmer's release of Claydon. Lawler claims that even if he is assumed to have held himself out as a partner of Claydon, the release and withdrawal of Palmer's claims against Claydon serves to release him from liability.

In the absence of any express provision in the Act limiting the effect of releases of purported partners, the common law principles apply. The release of Claydon, about which there is no genuine dispute of material fact, as a matter of law releases Lawler from the vicarious liability imposed on him by Conn. Gen. Stat. 34–329(a).

Motion for summary judgment granted to Lawler.

Partnership Capital

When a partnership or limited liability partnership is formed, partners contribute cash or other property to the partnership. The partners' contribution is called **partnership capital.** To supplement beginning capital, other property may be contributed to the partnership as needed, such as by the partners permitting the partnership to retain some of its profits. Partnership capital is the equity of the business.

Loans made by partners to a partnership are not partnership capital but instead are liabilities of the business. Partners who make loans to a partnership are both owners and creditors.

Partnership Property

A partnership or limited liability partnership may own all or only a part of the property it uses. For example, it may own the business and perhaps a small amount of working capital in the form of cash or a checking account, yet own no other assets. All other tangible and intangible property used by the partnership may be individually or jointly owned by one or more of the partners or rented by the partnership from third parties. A determination of what is partnership property becomes essential when the partnership is dissolved and the assets are being distributed and when third persons claim that partnership property has been sold to them.

The RUPA provides that all property actually acquired by a partnership by transfer or otherwise is partnership property and, therefore, belongs to the partnership as an entity rather than to the partners. The RUPA has several rules that help determine when property is acquired by a partnership.

Property belongs to the partnership if the property is transferred (1) to the partnership in its name, (2) to any partner acting as a partner by a transfer document that names the partnership, or (3) to any partner by a transfer document indicating the partner's status as a partner or that a partnership exists. In addition, property acquired with partnership funds is presumed to be partnership property.

The presumption is very strong that property purchased with partnership funds and used in the partnership belongs to the partnership. On the other hand, property used by the partnership is presumed to belong to an individual partner when the property is purchased by a partner with her owns funds and in her own name with no indication in the transfer document of the

partner's status as a partner or the existence of a partnership. However, in both situations, other factors such as an agreement among the partners may rebut the RUPA presumption of ownership.

The intent of the partners controls whether the partnership or an individual partner owns the property. It is best to have a written record of the partners' intent as to ownership of all property used by the partnership, such as a partnership agreement and partnership accounting records.

Examples

A tax accountant discovers that a partnership is using a building to which a partner, Jacob Smith, holds title. The partnership pays rent monthly to Smith, but the partnership pays for all maintenance and repairs on the building. The accountant wants to know whether the partnership or Smith should be paying real property taxes on the building. Smith is the owner and should be paying taxes on it because his partners' intent to allow Smith to retain ownership is evidenced by the partnership's paying rent to Smith.

Changing the facts, suppose the partnership pays no rent to Smith, the partnership maintains and repairs the building, and the partnership pays real property taxes on the building, but the title is in Smith's name. Who owns the building? The property belongs to the partnership, because all the objective criteria of ownership point toward partnership ownership, especially the payment of taxes. Therefore, when the partnership is liquidated, the building will be sold along with other partnership assets, and the proceeds of its sale will be distributed to partnership creditors and to all of the partners.

In the following *Holmes* case, the court held that land held in a partner's name was partnership property.

Holmes v. Holmes *849 P.2d 1140 (Ore. Ct. App. 1993)*

From 1957 to 1960, Steve Holmes and his father-in-law, Bill Foss, owned a construction business, Foss & Holmes Construction. Steve continued the business after Bill's death. In 1975, Steve's son Mike joined Foss & Holmes, which was operated as a partnership.

Steve also owned a ranch from which he generated hay sales of $30,000 to $50,000 per year. In 1984 and 1985, irrigation equipment was purchased for the ranch; for tax reasons, title to the irrigation equipment was placed in Mike's name. Beginning in 1984, Steve and Mike's joint books show that the funds of the ranch and Foss & Holmes were commingled. Money and assets were shifted from the two businesses' various bank accounts as necessary to achieve tax advantages and to protect property from Steve's creditors. Ranch activities and Foss & Holmes activities were reported to and considered together by Mike and Steve's accountant for tax purposes. Mike and Steve reported their income for tax purposes not necessarily to reflect their actual distribution of income between them but to minimize their overall tax liability.

In 1985, Mike signed loan agreements with the Bank of Eastern Oregon, the proceeds of which were used by Foss & Holmes and the ranch. In 1986, Steve obtained an FHA loan to pay off the loans by Bank of Eastern Oregon. In 1987, Steve learned of a special, low-interest FHA loan available for the purchase of property from a parent. Solely to obtain the benefits of the low-interest loan, Steve deeded the ranch to Mike. No money changed hands. Mike never paid Steve for the ranch. The transfer was not treated as a sale on Steve's and Mike's books. Mike did not claim ranch income as his own after the transfer. There were no changes in ranch operations. Steve continued to operate the ranch, and the money from hay sales was used to repay loans for both Foss & Holmes and the ranch.

Eventually, a dispute arose between Steve and Mike regarding Mike's compensation and liability arising out of ranch operations. To resolve the festering dispute, Steve brought a legal action against Mike to dissolve their partnership and distribute its assets. Steve argued that he and Mike were partners in the operation of not only Foss & Holmes but also the ranch. Steve testified that the ranch was a partnership asset that should be sold to pay claims against the partnership. Mike countered that he and Steve were not partners in the ranch; Mike testified that although they never intended to give title to the ranch to him, he nonetheless owned it as compensation for money owed him by Steve. The trial court held that the ranch was partnership property; Mike appealed.

Rossman, Presiding Judge In view of the fact that the trial court has observed the witnesses' demeanor, its findings are entitled to substantial weight, particularly when the facts are in dispute and the credibility of the witnesses is an important factor. The trial court said that it was impressed by the testimony of Steve, who outlined the affairs of the parties without embellishment and with a genuine desire to get the matter concluded. The trial court was not impressed with Mike's testimony, and expressed its belief that Mike was so motivated by greed that his entire testimony was suspect.

We find that Steve and Mike were partners in the operation of the ranch, and that Steve contributed the ranch to the partnership. The fact that Steve later transferred the ranch to Mike did not end the partnership or remove the ranch as a partnership asset, if Steve and Mike intended that it would remain a partnership asset.

> It is well established that title to the real property of a partnership may reside in one of the members rather than in the entity and that the locus of the title does not necessarily affect either the entity's rights in the property or the entity's existence. *Fenton v. State Ind. Acc. Com.* (1953).

We find that the purpose of the transfer of the ranch from Steve to Mike was to lessen the partnership's overall expenses, and that there never was an intention to remove it from the partnership. We agree with the trial court that the ranch continued to be a partnership asset.

Judgment for Steve Holmes affirmed.

Partners' Partnership Interest

As an owner of a partnership or LLP, a partner has an ownership interest in the partnership. A partner's ownership interest is called a **partnership interest,** which embodies all a partner's rights in a partnership:

1. The partner's transferable interest.
2. The partner's management and other rights.

The first right is discussed in this section. Partners' management and other rights are discussed in Chapter 37, Operation of Partnerships and Related Forms.

Note that a partner has no individual ownership rights in partnership property. The RUPA gives ownership of partnership property to the partnership only. Partners do, however, have the right to *use* partnership property for partnership purposes.

Partner's Transferable Interest

Like a shareholder owning stock in a corporation, a partner owns his partnership interest. The only part of the partnership interest, however, that may be transferred to another person is the partner's **transferable interest:** the partner's share of profits and losses and his right to receive partnership distributions. The transferable interest may be transferred or sold to any other person. It may also be used as collateral to secure a partner's debt.

Transfer The sale or transfer of a partner's transferable interest is a voluntary act of the partner. It entitles the buyer or transferee to receive the partner's distributions from the partnership, such as a share of profits. Although the transferee is the owner of the transferable interest, the transferee does not become a partner of the partnership. The transferee has no right to inspect the partnership's books and records or to manage the partnership. The transferee's only other right is to ask a court to dissolve and wind up the partnership, but only if the partnership is at will (i.e., has no term or objective). If the partnership dissolves and is wound up, the transferee will obtain the partner's claim against the partnership's assets.

By itself a partner's transfer of his transferable interest does not dissociate the partner from the partnership or effect a dissolution; the transferring partner remains a partner and may continue to manage the partnership.

The nontransferring partners may vote to expel the transferring partner from the partnership by their unanimous agreement (unless the partner merely granted a lien in the transferable interest to the partner's creditor), even if the term or objective of the partnership has not yet been met.

The following *Connors* case illustrates that a transferee of a partner's transferable interest has the right to receive profits but has no liability to partnership creditors on account of the transfer.

Connors v. Middle Fork Corp. *790 F.Supp. 6 (D.D.C. 1992)*

In 1983, Odell Rogers, John Lockhart, and Caleb Cooley formed MFC Partnership, a partnership formed under the laws of Kentucky. In 1984, Odell Rogers made a gift of his 41 percent interest in MFC to his three sons: 4-year-old Shannon Rogers, 19-year-old James Rogers, and 20-year-old Arthur Rogers. Odell made the gift for the purpose of providing income to his sons to pay their college expenses. The Rogers sons received income from MFC, which was reported on both the partnership's and the sons' individual federal income tax returns. The sons were identified as partners on MFC's unaudited balance sheet of December 31, 1985. In addition, MFC's 1986 income statement listed the sons as partners.

In 1987, MFC incurred liability to an employee pension fund under the federal Employee Retirement Income Security Act (ERISA). Joseph Connors, a trustee for the fund, contended that the Rogers sons were partners of MFC and therefore were personally liable to the fund on MFC's ERISA liability. The Rogers sons asked the trial court to grant a summary judgment for the sons on the grounds that they were merely assignees of their father's partnership interest and had no liability for MFC's obligations.

Revercomb, District Judge Under the Uniform Partnership Act, the receipt of profits from a business is *prima facie* evidence that one is a partner in the business. One may rebut this presumption by showing that one falls within a statutorily protected relationship. The Rogers sons argue that the 1984 transfer to them was no more than an assignment of Odell Rogers's partnership interest. An assignment of a partnership interest merely entitles the assignee to receive the assignor's profits from the firm but does not entitle the assignee to interfere otherwise in the management of the firm. Assignees are not partners and cannot be held personally liable for the firm's obligations.

Although the sharing of profits and losses is *prima facie* evidence of a partnership, the issue of control is the more important criterion in determining the existence of a partnership. Both Arthur and James Rogers did none of the acts which usually denote management or control of a partnership: request information about the firm's finances, attend its meetings or vote, attempt to withdraw its money, represent the firm to third parties, or even speak with the other partners about the firm. Neither James nor Arthur knew where the offices of MFC Partnership were located. Neither Arthur nor James was employed by MFC.

Connors notes that the Rogers sons on one occasion received "management fees" totalling $3,000, without any further showing of what these "fees" were paid for. The Court regards such evidence as no more than a mere scintilla upon which a jury could not reasonably find for Connors.

Thus, there can be *no* doubt that the transfer conveyed *less* than full partnership status. Connors has failed to carry his burden of proof of showing sufficient indicia of partnership. It follows that the Rogers sons are not jointly or severally liable to the pension fund as partners.

Motion for summary judgment granted in favor of the Rogers sons.

Charging Order A partner's personal creditor with a judgment against the partner may ask a court to issue a **charging order**—that is, an order charging all or part of the partner's transferable partnership interest with payment of the unsatisfied amount of the judgment. Unlike assignment, a charging order is obtained without the partner's consent. As with assignment, however, the partner remains a partner and may manage the partnership. The charging-order creditor is a lien creditor and is entitled to receive only the partner's share of the partnership distributions. If the distributions are insufficient to pay the debt, the creditor may ask the court to order foreclosure and to sell the partner's interest to satisfy the charging order.

Neither the issuance of a charging order nor the purchase of a transferable interest at a foreclosure sale dissociates the transferring partner from the partnership.

But the purchaser of a transferable interest at the foreclosure sale becomes a transferee and therefore may ask a court to dissolve and wind up a partnership at will. The other partners may eliminate this potential threat to the continuation of the partnership by **redeeming the charging order.** To redeem a charging order, the other partners must pay the creditor the amount due on the judgment against the partner. If the other partners so choose, however, they may expel the partner suffering the charging order by their unanimous agreement, even if the term or objective of the partnership has not been met.

Effect of Partnership Agreement

The partners may believe that a partner's transferring her transferable partnership interest or suffering a charging order threatens the partnership. For example, they may believe that a partner may be less motivated to work for the partnership if the partner has transferred her partnership interest to a personal creditor, because she will not receive distributions from the partnership.

Consequently, the partners may restrict the transfer of a partner's transferable interest or impose negative consequences on a partner who transfers her transferable interest or suffers a charging order. For example, the partnership agreement may require a partner to offer to sell her partnership interest to the partnership prior to transferring it any other person. Or the partnership agreement may effect a dissociation of any partner who suffers a charging order and fails to redeem the charging order within 30 days.

Note that any transfer restriction must not unreasonably limit the ability of a partner to transfer her property interest. For example, a transfer restriction that bans the transfer of a partner's interest would be unreasonable and therefore unenforceable against a partner. In addition, a transfer restriction will not be enforceable against a transferee who does not have notice of the restriction.

Joint Venturers and Mining Partners Transfers of interests in joint ventures are treated in the same way as transfers of partnership interests. However, a mining partner's interest is *freely transferable.* The transferee becomes a partner with all the rights of ownership and management, and the transferor loses all of his partnership rights. The other mining partners cannot object to the transfer, and their consent to a transfer is not required.

Ethical and Public Policy Concerns

1. A person who carefully considers which business form to use for his one-person business can achieve nearly any combination of characteristics desirable to him. For example, by incorporating and electing S Corporation status, a person can limit his personal liability, deduct business losses on his individual federal income tax return, yet control the business by electing himself to the board of directors. Why should a careful planner obtain such advantages, while a person who merely begins his business without selecting a form has unlimited liability as a sole proprietor? Is the business of the careful planner more valuable to our society than the business of the person who does not choose a business form?

2. Why should all the partners in a partnership be individually liable for all the obligations of the partnership, while shareholders and managers of a corporation have no liability beyond their capital contributions? Is the corporate form of business or the business conducted by corporations more important to society than the partnership form or the business conducted by partnerships? Would benefits that businesses provide to society be reduced if limited liability were not extended to shareholders and managers of corporations?

3. What are the ethical underpinnings of purported partnership? Why should a person be held liable for the business debts of another person when he does not benefit from the business? Could the person who relied on the appearance of partnership have protected himself by making inquiries? Should he be required to make such inquiries?

Problems and Problem Cases

1. DVD *Video Case.* See "The Reunion." When friends reunite at a wedding, they reveal their plans for future business ventures. Al and Amy, an unmarried couple, propose opening a Thai restaurant. Al is a dentist, and Amy is director of public relations for a

publishing company. Amy will quit her job eventually to manage the restaurant. They will hire a chef whose restaurant is about to close.

Carl is a successful real estate agent who wants to open his own real estate firm.

Bob has tried several business ventures, but all have failed, including a venture to manufacture ski racks for motorcycles.

Dave and Donna, the newly married couple, plan to quit their jobs, move to Wyoming, and open a software development business. They want the business to have few investors. They have lined up potential clients who will finance their initial efforts in return for software customization.

What business forms should they use for their business ventures? What additional questions do you want to ask to help you determine the best business forms for their ventures?

2. Hamel, Lamb, and Adams were partners in the operation of the Breakers Hotel. Without Hamel's knowledge, Lamb and Adams sold 10 percent of their interest in the hotel business and its profits to Tamir and agreed that Tamir would be a partner of the business. Hamel had not agreed to give Lamb and Adams authority to make such an agreement. Is Tamir a partner in the hotel business?

3. OWLP, a Hawaii limited partnership, owned the Outrigger West Hotel. OWLP and Hawaii Hotels Operating Company (HHOC) agreed that OWLP and HHOC would jointly operate the hotel and share its revenues, allocating 73 percent to OWLP and 27 percent to HHOC. The agreement provided that revenues would be collected from the hotel and allocated daily according to the percentages above. However, the allocation percentages were changed six times during a four-year period to permit each party to recover out-of-pocket expenses and to provide a return of 98 percent of the net income to OWLP and of 2 percent of the net income to HHOC. Thus, any amount recovered by each party according to the predetermined percentage in excess of its expenses would be its profit. Losses were shared pro rata like the profits. Are OWLP and HHOC partners?

4. John Williams was an assistant manager of a restaurant operated by Pizzaville, Inc. He was promoted to manager and later designated a managing partner with business cards describing him so. William's compensation was a salary of $270 per week plus 70 percent of the restaurant's gross sales less the cost of food purchases and employees' wages. Pizzaville fired Williams. Williams sued Pizzaville to receive a portion of the value of the restaurant business on the ground that he was a partner with Pizzaville. Was Williams a partner?

5. CMD *Video Case.* See "The Partnership." Art, Ben, and Diedre are partners of Alphabet Builders, a partnership in the construction business. They meet at a restaurant with a prospective new partner, Don, who says he will decide whether to enter the partnership after discussing the matter with his wife. During the meeting, they are approached by John, with whom the partnership has been attempting to do business. Art introduces Don to John, stating, "We're celebrating Don's joining Alphabet Builders." Don and John shake hands, and John says, "Congratulations! Alphabet Builders has a very good reputation. In fact, I'm about to become one of your new clients. I signed the contract this morning." Don says nothing in response to John's statement. Subsequently, however, Don decides not to join Alphabet Builders. Nonetheless, when Alphabet Builders breaches its contract with John, John sues Don on the contract. Is Don liable to John?

6. The parents of Michael Milano sought medical care from The Freed Group, including Dr. Jay Freed, Dr. Mitchell Kleinberg, and Dr. Stephanie Citerman. The three doctors were not, however, partners in fact. For several months after his birth, Michael was examined by all three doctors. His parents received a bill from the Freed group in which all three names were prominently displayed. When Dr. Freed and Dr. Kleinberg examined Michael, they misdiagnosed a serious medical condition. On behalf of Michael, his parents sued all three doctors, including Dr. Citerman, even though she had not committed malpractice herself. Was Dr. Citerman held liable to Michael?

7. Padgett Carroll and Walter Fulton operated as a partnership a trucking business under the name of C & F Trucking. Carroll contributed a semi truck, which Fulton drove for the business. Carroll used $4,600 of his personal funds to purchase a used 42-foot trailer for C & F Trucking. The seller's invoice listed C & F Trucking as the purchaser of the trailer. The trailer's certificate of title listed C & F Trucking as the owner. Fulton's personal financial problems forced him to file for bankruptcy. May Fulton claim ownership of the trailer among his assets?

8. Claude Gauldin and Joe Corn formed a partnership to raise cattle and hogs on land owned by Corn. Partnership funds were used to build two buildings on the land for use by the partnership. Gauldin and Corn did not discuss who owned the buildings. Gauldin knew when the buildings were constructed that they would be permanent improvements to the land and would become part of it. The partnership paid no rent for the land, and there was no agreement to consider the use of the land as a contribution by Corn. The taxes on the land were paid by Corn, as was the cost of upkeep. When Corn left the partnership, Gauldin claimed that the buildings were partnership assets and that he was entitled to half of their fair market value. Was Gauldin correct?

- A. *Torts*
  - 1. *Intentional Torts*
  - 2. *Partners' Remedies*
- B. *Tort Liability and Limited Liability Partnerships*
- C. *Crimes*

V. Lawsuits by and against Partnerships and Partners
- A. *Limited Liability Partnerships*

Two relationships are important during the operation of a partnership or limited liability partnership (LLP) business: (1) the relation of the partners to each other and the partnership; and (2) the relation of the partners to third parties who are affected by the business of the partnership. Partners owe duties to each other and the partnership. Partners have the ability to make the partnership liable to third parties for contracts and torts.

Duties of Partners to the Partnership and Each Other

The relation between partners and the partnership is a fiduciary relation of the highest order. It is one of mutual trust, confidence, and honesty. Therefore, under the Revised Uniform Partnership Act (RUPA) part-

ners owe to the partnership and each other the highest degree of *loyalty.* In addition, partners must act consistently with the obligation of *good faith and fair dealing.* The duties partners owe each other are the same in ordinary partnerships and in limited liability partnerships.

Having Interest Adverse to Partnership

Unless there is a contrary agreement, a partner's sole compensation from partnership affairs is a share of partnership profits. Therefore, a partner may not deal with the partnership when the partner has an interest adverse to the partnership or acts on behalf of another person with any adverse interest. For example, a partner may not profit personally by receiving an undisclosed kickback from a partnership supplier. In addition, a partner may not profit secretly when she makes a contract with her partnership, such as selling a building she owns to her partnership without disclosing her ownership or her profit to her partners.

When a partner receives a secret profit, she has a conflict of interests, and there is a risk that she may prefer her own interests over those of the partnership. Therefore, the law permits a partner to profit personally from partnership transactions only if she deals in good faith, makes a full disclosure of all material facts affecting the transaction, and obtains approval from her partners. The remedy for a breach of this duty not to make a secret profit is a return of the profit that she made in the transaction with the partnership.

Competing against the Partnership

A partner may not compete against his partnership unless he obtains consent from the other partners. For example, a partner of a retail clothing store may not open a clothing store nearby. However, he may open a grocery store and not breach his fiduciary duty. The partnership has the remedy of recovering the profits of the partner's competing venture.

Duty to Serve

The duty to serve requires a partner to undertake his share of responsibility for running the day-to-day operations of the partnership business. The basis of this duty is the expectation that all partners will work. Sometimes, this duty is termed the duty to devote full time to the partnership.

Partners may agree to relieve a partner of the duty to serve. So-called *silent partners* merely contribute capital to the partnership. Silent partners do not have the duty to serve, but they have the same liability for partnership debts as any other partner.

The remedies for breach of the duty to serve include assessing the partner for the cost of hiring a person to do his work and paying the other partners additional compensation.

Duty of Care

In transacting partnership business, each partner owes a **duty of care.** A partner is not liable to her partnership for losses resulting from honest errors in judgment, but a partner is liable for losses resulting from her gross negligence, reckless conduct, intentional misconduct, or knowing violation of the law. She must make an **investigation** before making a decision so that she has an adequate basis for making the decision. The decision she makes must be one she has **grounds to believe is in the best interests of the partnership.**

In the partnership agreement, the partners may reduce or increase the duty of care owed to the partnership. They may not, however, eliminate the duty of care. It is common for partnership agreements to excuse partners from liability if they act in good faith and with the honest belief that their actions are in the best interests of the partnership. Such a provision would protect from liability an honestly motivated partner who was reckless or grossly negligent.

Duty to Act within Actual Authority

A partner has the duty not to exceed the authority granted him by the partnership agreement or, if there is no agreement, the authority normally held by partners in his position. He is responsible to the partnership for losses resulting from unauthorized transactions negotiated in the name of the partnership. For example, suppose partners agree that no partner shall purchase supplies from Jasper Supply Company, which is unaware of the limitation on the partners' authority. When one partner purchases supplies from Jasper and the partnership suffers a loss because the supplies are of low quality, the wrongdoing partner must bear the loss caused by her breach of the partnership agreement.

Duty to Account

Partners have a duty to account for their use or disposal of partnership funds and partnership property, as well as their receipt of any property, benefit, or profit, without the consent of the other partners. Partnership property should be used for partnership purposes, not for a partner's personal use. In addition, a partner may not misappropriate a business opportunity in which the partnership had an interest or expectancy.

For example, when a partner of a firm that leases residential property to college students allows his daughter to live in a partnership-owned apartment, the partner must collect rent for the partnership from his daughter or risk breaching the duty to account.

Each partner owes a duty to keep a reasonable record of all business transacted by him for the partnership and to make such records available to the person keeping the partnership books. The books must be kept at the partnership's chief executive office. Every partner must at all times have access to them and may inspect and copy them.

Closely related to the duty to account is the right of a partner to be **indemnified** for payments made from personal funds and for personal liabilities incurred during the ordinary conduct of the business. For example, a partner uses her own truck to pick up some partnership supplies, which she pays for with her personal check. The partner is entitled to be reimbursed for the cost of the supplies and for her cost of picking up the supplies, including fuel.

Other Duties

A partner must maintain the **confidentiality** of partnership information such as a trade secret or a customer list. This means a partner should not disclose to third parties confidential information of the partnership unless disclosure benefits the partnership.

On the other hand, each partner owes a duty to disclose to the other partners all information that is material to the partnership business. She also owes a duty to inform the partners of notices she has received that affect the rights of the partnership. For example, Gordon Gekko, a partner of a stock brokerage firm, learns that National Motors Corporation is projecting a loss for the current year. The projection reduces the value of National stock, which the firm has been recommending that its customers buy. Gekko has a duty to disclose the projection to his partners to allow them to advise customers of the brokerage.

In the following *Lund* case, the court considered whether one partner breached the duty to disclose material information and whether the other partner breached the duty not to compete against the partnership.

Lund v. Albrecht *936 F.2d 459 (9th Cir. 1991)*

In 1971, Bill Lund and Don Albrecht formed a partnership, Terramics Associates, that was involved in real estate acquisitions, development, and sales. Among the real estate properties was a 190-acre parcel known as Parcel D. In 1983, Lund and Albrecht agreed to terminate their partnership, with Albrecht purchasing Lund's interest in the partnership. On April 6, 1984, Albrecht sent a letter to Lund outlining the possible methods of terminating their relationship. Termination negotiations continued until June 4, 1984, when Lund and Albrecht signed a formal written agreement detailing all aspects of Albrecht's purchase of Lund's partnership interest.

Prior to signing the June 4 agreement, during May 1984, Albrecht received four offers for Parcel D ranging from $9.95 million to $12 million. These offers valued Parcel D at $2 to $4 million higher than the price placed on Parcel D during the negotiations leading to the June 4 agreement. Lund was not aware of these offers, and Albrecht did not inform Lund of the offers. In January 1985, Parcel D sold for $12.8 million.

After discovering Albrecht's failure to disclose the May 1984 offers, Lund sued Albrecht for breach of fiduciary duty. Albrecht filed a counterclaim against Lund, alleging Lund had failed to disclose that he had competed with the partnership by having a general partnership interest in Wilshire Redevelopment Company. The trial court held that Albrecht had breached his fiduciary duty to Lund; the court also found that Lund had disclosed his interest in the competing business to Albrecht. The trial court awarded Lund damages and interest of almost $2.2 million. Albrecht appealed.

Hug, Circuit Judge The district court concluded that Albrecht owed fiduciary obligations to Lund at least through June 4, 1984. The rule in California is that upon consummation of the sale of a partnership interest, the selling partner's interest and participation in the partnership are terminated. In California, consummation occurs, and a partner's fiduciary duty ends, when the parties have formed and signed a contract to purchase the partnership interest.

If the partnership existed until June 4, 1984, Albrecht's non-disclosure of the offers for Parcel D was a breach of fiduciary duty. However, if the partnership terminated on April 11, as Albrecht contends, then Albrecht's non-disclosure to Lund is not a breach of fiduciary duty.

After reviewing the April 6 letter, we agree that it does not constitute an agreement between Lund and Albrecht to terminate the partnership. The April 6 letter was merely an outline of what the parties had discussed. It was an agreement about the alternative methods of terminating their partnership.

The June 4 agreement was a complete, detailed, 10-page agreement prepared by the parties' attorneys dealing with the complexities of the multiple properties held by the partnership. It dealt with the entities to be transferred, the entities not affected, on-going indebtedness relating to the entities, assumption of liability, indemnification, representations, warranties, and a myriad of other important legal provisions governing the obligations of the parties. It was signed not only by Albrecht and Lund, but also by their spouses, a vital legal consideration in California, a community property state. The opening sentence of the agreement stated, "This Agreement is made and entered into as of this 4th day of June, 1984."

The district court correctly concluded that the June 4 agreement was the actual agreement for the sale and transfer of partnership assets. Albrecht breached his fiduciary duty, and the district court applied a constructive trust as an appropriate remedy for Lund, a victim of Albrecht's breach of fiduciary duty. The district court awarded Lund a 50 percent interest in Albrecht's excess profits from Parcel D. Such a measure of damages is justified because Lund is entitled to recover a money judgment for all losses occasioned by Albrecht's breach of fiduciary duty, regardless of whether such losses were anticipated. A breaching co-partner is required to account for all profits or benefits, even if the other co-partner has not suffered a loss.

In his counterclaim, Albrecht alleged that Lund had breached his fiduciary duties by failing to disclose his ownership as a general partner in the Wilshire properties, which were competing with the Albrecht/Lund partnership. The district court found that Albrecht was aware of Lund's involvement with Wilshire prior to signing the June 4 agreement. Further, the June 4 agreement specifically mentioned the Wilshire properties and provided that Albrecht waived and released any claim he might have had against Lund arising from Lund's participation in Wilshire.

Albrecht argues that he did not know that the June 4 agreement would serve as a release with regard to his counterclaim against Lund. Nonetheless, the express terms of the June 4 agreement acknowledged that Lund was an "owner of record" of Wilshire, that Albrecht "disclaims any interest" in Wilshire, that Wilshire belongs to Lund, and that Albrecht would make no claim against Lund with respect to Wilshire. The objective language of the June 4 agreement, not Albrecht's undisclosed subjective intention regarding the June 4 agreement, is what is legally binding upon the parties. Therefore, we hold that Albrecht had released all claims he had with regard to Wilshire in the June 4 agreement.

Judgment for Lund affirmed.

Joint Ventures and Mining Partnerships

The fiduciary duties of partners also exist in joint ventures and mining partnerships, although there are a few special rules regarding their enforcement. For example, a joint venturer may seek an accounting to settle claims between the joint venturers, or he may sue his joint venturers to recover joint property or to be indemnified for expenditures that he has made on behalf of the joint venture. A mining partner's remedy against his partners is an accounting; however, a mining partner has a lien against his partners' shares in the mining partnership for his expenditures on behalf of the mining partnership. The lien can be enforced against purchasers of his partners' shares.

Concept Review

Partner's Duties

1. Duty not to have an interest adverse to the partnership while transacting for the partnership.
2. Duty not to compete with the partnership.
3. Duty to serve the partnership.
4. Duty to exercise care.
5. Duty to act within the actual authority possessed by the partner.
6. Duty to account for the use and disposal of partnership funds and property.
7. Duty to indemnify other partners for payments they made from their personal funds and for liabilities they incurred on behalf of the partnership.
8. Duty to maintain the confidentiality of partnership information.
9. Duty to disclose to the other partners information material to the partnership business.
10. Duty to inform partners of notices he has received.

Compensation of Partners

A partner's compensation for working for a partnership or limited liability partnership is a share of the profits of the business. The RUPA continues the UPA rule that a partner is not entitled to a salary or wages, even if he spends a disproportionate amount of time conducting the business of the partnership.

Profits and Losses

Unless there is an agreement to the contrary, partners share partnership profits equally, according to the number of partners, and not according to their capital contributions or the amount of time that each devotes to the partnership. For example, a partnership has two partners, Juarez, who contributes $85,000 of capital to the partnership and does 35 percent of the work, and Easton, who contributes $15,000 and does 65 percent of the work. If they have made no agreement how to share profits, when the partnership makes a $50,000 profit in the first year, each partner receives $25,000, half of the profits.

Losses When the partnership agreement is silent on how to share losses, losses are shared in the same proportion that profits are shared. The basis of this rule is the presumption that partners want to share benefits and detriments in the same proportions. Nonetheless, the presumption does not work in reverse. If a partnership agreement specifies how losses are shared but does not specify how profits are shared, profits are shared equally by the partners, not as losses are shared.

Examples For example, when there is no agreement regarding how profits or losses are shared, profits are shared equally, and because losses are shared like profits, losses are shared equally as well. When two partners agree to share profits 70–30 and make no agreement on losses, both profits and losses are shared 70–30.

However, when two partners make no agreement how to share profits but agree to share losses 60–40, losses are shared in that proportion but profits are shared equally.

Partners may agree to split profits on one basis and losses on another basis for many reasons, including their making different capital and personal service

contributions or a partner's having higher outside income than the other partners, which better enables him to use a partnership loss as a tax deduction.

Effect of Agreement on Creditors' Rights Each partner has unlimited personal liability to partnership creditors. Loss-sharing agreements between partners do not bind partnership creditors unless the creditors agree to be bound. For example, two partners agree to share losses 60–40, the same proportion in which they contributed capital to the partnership. After the partnership assets have been distributed to the creditors, $50,000 is still owed to them. The creditors may collect the entire $50,000 from the partner who agreed to assume only 60 percent of the losses. That partner may, however, collect $20,000—40 percent of the amount—from the other partner.

In the following *Warren* case, the court held that the partners' oral agreement regarding partners' compensation bound the partners.

Warren v. Warren *784 S.W.2d 247 (Mo. App. 1989)*

In 1969, brothers Harold and Ray Warren formed a partnership to operate a funeral home in Columbia, Missouri. In 1970, they created a second partnership, The Warren Yard and Tree Service. The brothers based their partnerships solely on oral agreements, never putting them in writing. They adopted a system under which each partner drew from the partnerships' funds a reasonable compensation for his actual services rendered to the two businesses.

After a few years, Harold—a licensed embalmer and funeral director—spent an increasing amount of his time in the funeral home, performing all the lab work and specialized mortuary services. By 1978, Harold spent nearly all his time at the funeral home. Ray—licensed only as a funeral director—devoted most of his time to the tree service partnership, spending only a few hours each week assisting with funerals. Consequently, during the term of their partnership, Harold drew large sums of compensation from the funeral home partnership and only about $400 from the tree service partnership. Ray drew his primary compensation from the tree service partnership and a smaller compensation from the funeral home partnership. Because the funeral home was the more profitable business, Harold's total compensation exceeded Ray's by a considerable amount.

In 1983, Ray sued Harold, claiming that he was entitled to receive compensation equal to Harold for the entire 14-year term of the funeral home partnership. Ray asked the trial court to order Harold to pay Ray an amount that would equalize their 14-year compensation. The trial court held that Ray was not entitled to additional compensation, and Ray appealed.

Nugent, Chief Judge Ray Warren first asserts that the trial court erred in finding that an oral agreement bound each partner to draw compensation commensurate with his services. The Warren brothers adopted a compensation system abstruse as to a method of payment but clear as to intent and business customs. There was an agreement between Ray and Harold under which Ray would run the tree service, Harold the funeral home, and each would draw compensation commensurate with his input of services. For nearly 15 years, Ray knew of and did not protest the perquisites afforded his brother by the funeral home partnership, such as use of an apartment above the funeral home and of a car.

Section 18 of the Uniform Partnership Act enunciates the rules determining the rights and duties of a partner: "The rights and duties of the partners in relation to the partnership shall be determined, subject to any agreement between them, by the following rules: . . . (f) No partner is entitled to remuneration for acting in the partnership business." The oral agreement between the brothers negates the statute's proscription of compensation to partners. Missouri law recognizes the validity of oral and implied agreements between partners. Indeed, for more than a century, Missouri has recognized that, in the presence of an agreement linking compensation to a partner's efforts, partners providing services vital to the enterprise, or those devoting much

of their time to the partnership's commonweal, deserve compensation often far in excess of that owed partners providing less important services or those giving only a little time to the business.

Harold provided the expert services vital to the partnership. His skills in the mortuary business far exceeded Ray's. The brothers agreed that Harold would run the funeral home and Ray, the tree service. Thus, implicitly if not expressly, they acknowledged each other's expertise, and, accordingly, each concentrated his efforts in the area of his own ability.

Moreover, Ray derived substantial financial benefit from the funeral home, to which he contributed but minimal efforts. Concomitantly, Harold succeeded in continuing to operate the business despite the effective withdrawal of Ray. Thus, Harold became entitled to suitable compensation for his efforts.

Judgment for Harold Warren affirmed.

Concept Review

Partners' Share of Profits and Losses

Profits	Partners share profits equally, unless the partners agree otherwise
Losses	Partners share losses the same way they share profits, unless the partners agree to share profits in a different manner.
Tax Effects for Partnership or LLP	A partner's share of partnership profits is income to the partner, on which the partner pays federal income tax. A partner's share of partnership losses may be deducted on the partner's individual federal income tax return.
Tax Effects for LLP, if it elects to be taxed as a corporation	LLP pays federal income tax on its net profits. Partners pay federal income tax only on salary paid and profits distributed to the partners.

Management Powers of Partners

Individual Authority of Partners

In a partnership or limited liability partnership, every partner is a general manager of the business. This power is expressed in the RUPA, which states that a partnership is bound by the act of every partner for apparently carrying on in the ordinary course the business of the partnership or business of the kind carried on by the partnership. Such authority is implied from the nature of the business. It permits a partner to bind the partnership and his partners for acts within the ordinary course of business. The scope of this **implied authority** is determined with reference to what is usual business for partnerships of the same general type.

Implied authority of a partner may not contradict a partner's **express authority,** which is created by agreement of the partners. An agreement among the partners can expand, restrict, or even completely eliminate the implied authority of a partner. For example, the partners in a newspaper publishing business may agree that one partner shall have the authority to purchase a magazine business for the partnership and that another partner shall not have the authority to sell advertising space in the newspaper. The partners may agree also that all partners must consent to borrow money for the partnership. The partners' implied authority to be general managers is modified in accordance with these express agreements.

Express authority may be stated orally or in writing, or it may be obtained by acquiescence. Regardless of the method of agreement, all of the partners must agree to the modification of implied authority. Partners may give everyone notice of a partner's authority or limitation on a partner's authority by filing a **Statement of Partnership Authority** or **Statement of Denial** with the secretary of state or the real estate recording office. Together, a partner's express and implied authority constitute her **actual authority.**

Apparent Authority **Apparent authority** exists because it reasonably appears to a third party that a partner has authority to do an act. Often, the implied authority and apparent authority of a partner are coincident. However, when a partner's implied authority is restricted or eliminated, the partnership risks the possibility that **apparent authority** to do a denied act will remain. To prevent apparent authority from continuing when there is a limitation of a partner's actual authority, third persons with whom the partner deals must have knowledge of the limitation of his actual authority or have received notification of the limitation, such as receiving an e-mail or fax or otherwise having the limitation brought to their attention. Filing a Statement of Partnership Authority or Statement of Denial may help notify third parties of a partner's limited authority. Just as a principal must notify third persons of limitations of an agent's authority, so must a partnership notify its customers, suppliers, and others of express limitations of the actual authority of partners.

Suppose that Carroll, Melton, and Ramirez are partners and that they agree that Carroll will be the only purchasing agent for the partnership. This agreement must be communicated to third parties selling goods to the partnership, or Melton and Ramirez will have apparent authority to bind the partnership on purchase contracts. Melton and Ramirez do not have express authority to purchase goods, because they have agreed to such a restriction on their authority. They do not have implied authority to purchase, because implied authority may not contradict express authority.

Ratification A partnership may ratify the unauthorized acts of partners. Essentially, **ratification** occurs when the partners accept an act of a partner who had no actual or apparent authority to do the act when it was done.

For example, suppose Cabrillo and Boeglin are partners in an accounting firm. They agree that only Cabrillo has authority to make contracts to perform audits of clients, an agreement known by Mantron Company. Nonetheless, Boeglin and Mantron contract for the partnership to audit Mantron's financial statements. At this point, the partnership is not liable on the contract, because Boeglin has no express, implied, or apparent authority to make the contract. But suppose Boeglin takes the contract to Cabrillo, who reads it and says, "OK, we'll do this audit." Cabrillo, as the partner with express authority to make audit contracts, has ratified the contract and thereby bound the partnership to the contract.

Special Transactions

The validity of some partner's actions is affected by special partnership rules that reflect a concern for protecting important property and the credit standing of partners. This concern is especially evident in the rules for conveying the partnership's real property and for borrowing money in the name of the partnership.

Power to Convey Partnership Real Property

To bind the partnership, an individual partner's conveyance of a partnership's real property must be expressly, impliedly, or apparently authorized or be ratified by the partnership. For example, the partners may expressly agree that a partner may sell the partnership's real property.

The more difficult determination is whether a partner has *implied* and *apparent* authority to convey real property. A partner has implied and apparent authority to sell real property if a partnership sells real property in the usual course of the partnership business. Such would be the case with the partner of a real estate investment partnership that buys and sells land as its regular business. By contrast, a partner has no implied or apparent authority to sell the building in which the partnership's retail business is conducted. Here, unanimous agreement of the partners is required, since the sale of the building may affect the ability of the firm to continue. In addition, a partner has no implied or apparent authority to sell land held for investment not in the usual course of business. A sale of such land would be authorized only if the partners concurred.

When title to partnership real property is recorded in the name of the partners and not the partnership, those partners in whose name title is recorded have apparent authority to convey title to a bona fide purchaser unaware of the partnership's interest in the real

property. However, purchasers are deemed to have knowledge of a limitation on a partner's authority to convey real property that is contained in a Statement of Partnership Authority or Statement of Denial that is filed in the real estate recording office.

Borrowing Money Partnership law restricts the ability of a partner to borrow money in the name of a partnership. Essentially, a partner must possess express, implied, or apparent authority to borrow. Express authority presents few problems. Finding implied and apparent authority to borrow is more difficult.

Although the RUPA does not explicitly recognize the distinction, a number of courts have distinguished between trading and nontrading partnerships for purposes of determining whether a partner has implied or apparent authority to borrow money on behalf of the partnership. A **trading partnership** has an inventory; that is, its regular business is buying and selling merchandise, such as retailing, wholesaling, importing, or exporting. For example, a toy store and a clothing store are trading partnerships. Since there is a time lag between the date they pay for their inventory and the date they sell inventory to their customers, these firms ordinarily need to borrow to avoid cash flow problems. Therefore, a partner of a trading partnership has implied and apparent authority to borrow money for the partnership.

A **nontrading partnership** has no substantial inventory and is usually engaged in providing services—for example, accounting services or real estate brokerage. Such partnerships have no normal borrowing needs. Therefore, a partner of a nontrading partnership has no implied or apparent authority to borrow money for the partnership.

The distinction between trading and nontrading partnerships is not always clear. Businesses such as general contracting, manufacturing, and dairy farming, although not exclusively devoted to buying and selling inventory, have been held to be trading partnerships. The rationale for their inclusion in this category is that borrowing is necessary in the ordinary course of business to augment their working capital.

This suggests why the distinction between trading partnerships and nontrading partnerships is useless or misleading. There is no necessary connection between borrowing money and buying and selling. The more important inquiry should be whether a partner's borrowing is in the ordinary course of business. When borrowing is in the ordinary course of business, a partner has implied and apparent authority to borrow money. If borrowing is not in the ordinary course of business, then no individual partner has implied or apparent authority to borrow money.

If a court finds that a partner has authority to borrow money, the partnership is liable for his borrowings on behalf of the partnership. There is a limit, however, to a partner's capacity to borrow. A partner may have authority to borrow, yet borrow beyond the ordinary needs of the business. A partnership will not be liable for any loan whose amount exceeds the ordinary needs of the business, unless otherwise agreed by the partners.

The power to borrow money on the firm's credit will ordinarily carry with it the power to grant the lender a lien or security interest in firm assets to secure the repayment of the borrowed money. Security interests are a normal part of business loan transactions.

Issuing Negotiable Instruments A partner who has the authority to borrow money also has authority to issue negotiable instruments such as promissory notes for that purpose. When a partnership has a checking account and a partner's name appears on the signature card filed with the bank, the partner has express authority to draw checks. A partner whose name is not on the signature card filed with the bank has apparent authority to issue checks, but only in respect to a third person who has no knowledge or notification of the limitation on the partner's authority.

Negotiating Instruments A partnership receives many negotiable instruments during the course of its business. For example, an accounting firm's clients often pay fees by check. Even though borrowing money and issuing negotiable instruments may be beyond a partner's implied and apparent authority, a partner usually has implied and apparent authority to transfer or negotiate instruments on behalf of the partnership.

For example, when a partnership has a bank account, a partner has implied and apparent authority to indorse and deposit in the account checks drawn payable to the partnership. As a general rule, a partner also has implied and apparent authority to indorse and cash checks drawn payable to the order of the partnership. Likewise, partners have implied authority to indorse drafts and notes payable to the order of the partnership and to sell them at a discount.

Admissions and Notice A partnership is bound by admissions or representations made by a partner con-

cerning partnership affairs that are within her express, implied, or apparent authority. Likewise, notice to a partner is considered to be received by the partnership. Also, a partner's knowledge of material information relating to partnership affairs is **imputed** to the partnership. These rules reflect the reality that a partnership speaks, sees, and hears through its partners.

Disagreement among Partners: Ordinary Course of Business

Usually, partners will discuss management decisions among themselves before taking action, even when doing so is not required by a partnership agreement and even when a partner has the implied authority to take the action by herself. When partners discuss a prospective action, they will usually vote on what action to take. Each partner has one vote, regardless of the relative sizes of their partnership interests or their shares of the profits. On matters in the ordinary course of business, the vote of a majority of the partners controls ordinary business decisions and, thereby, limits the actual authority of the partners. Nonetheless, the apparent authority of the partners to bind the partnership on contracts in the ordinary course of business is unaffected by the majority vote of partners, unless the limitation on the partners' actual authority is communicated to third parties.

Effect of Partnership Agreement

The partners may modify the rules of management by their unanimous agreement. They may agree that a partner will relinquish his management right, thus removing the partner's express and implied authority to manage the partnership. They may grant sole authority to manage the business to one or more partners. Such removals or delegations of management powers will not, however, eliminate a partner's apparent authority to bind the partnership for his acts within the usual course of business unless a third party has knowledge or notification of the limitation.

A partnership agreement may create classes of partners, some of which will have the power to veto certain actions. Some classes of partners may be given greater voting rights. Unequal voting rights are often found in very large partnerships, such as an accounting firm with several hundred partners.

In the following *NBN Broadcasting* case, a partnership agreement that was designed to prevent and resolve conflicts between the two partners eventually caused serious disagreements, illustrating the necessity for careful drafting of partnership agreements.

NBN Broadcasting, Inc. v. Sheridan Broadcasting Networks, Inc.

105 F.3d 72 (2d Cir. 1997)

NBN Broadcasting, Inc., and Sheridan Broadcasting Networks, Inc., operated competing radio networks. In 1991, NBN and Sheridan agreed to form American Urban Radio Network (AURN), a Pennsylvania partnership that combined NBN's and Sheridan's networks into a single radio network. Sheridan owned 51 percent of the partnership; NBN owned 49 percent. They agreed to maintain NBN's offices in New York and Sheridan's offices in Pittsburgh to allow direct oversight and input by AURN's cochairmen and co-CEOs, Sydney Small (chairman of NBN) and Ronald R. Davenport (chairman of Sheridan). As the only partners, NBN and Sheridan wanted equal rights in management of the partnership. The partners' equal right to manage AURN was modified by the partnership agreement in sections 5.2 and 5.3. Section 5.2 created a five-member Management Committee comprising two members selected by NBN and two by Sheridan; a seat on the Management Committee was to be vacant and would be filled only when the Management Committee was deadlocked. Section 5.2 also provided:

> The Management Committee shall be responsible for the following functions of the partnership and contractual arrangements relating thereto:
> (i) Sales and marketing;
> (ii) Promotions and public relations;
> (iii) Affiliate relations and compensation;
> (iv) Network programming;

(v) Personnel administration; and
(vi) Budgeting, accounting, and finance.

Section 5.3 provides:

(a) In the event that three of the four members of the Management Committee are unable to reach agreement on any issue or issues relating to items (i) through (v) above and remain so unable for a period of thirty days, then Ronald R. Davenport, Chairman of Sheridan, shall have the right to fill the vacant seat on the Management Committee for the purpose of reaching an agreement, and only until an agreement is reached, on such issue or issues.

Section 5.3 did not authorize appointment of a fifth member of the Management Committee when there was a deadlock regarding budgeting, accounting, or finance or any matter other than those listed in Section 5.2(i) through (v). As to budgeting, accounting, and finance and matters not listed in Section 5.2(i) through (v), NBN and Sheridan were equal partners, and all decisions on such matters required their agreement.

At a Management Committee meeting on September 14, 1995, Davenport proposed that AURN open an expensive new office in Washington, D.C., hire Skip Finley as chief operating officer, and employ Richard Boland. When NBN's representatives opposed opening the new office and hiring Finley and Boland, Davenport scheduled a meeting solely to appoint a fifth member to break the deadlock. On September 15, NBN asked a Pennsylvania state trial court to grant a preliminary injunction and a permanent injunction against Sheridan's opening a new AURN office in Washington and hiring Finley and Boland, on the grounds that the proposals related to budgeting, accounting, and finance and were, therefore, not subject to the deadlock voting provision. On October 13, the state trial court denied NBN's motion for a preliminary injunction. The state trial court held that Sheridan had the right to invoke the deadlock provision to "make additions to personnel" by hiring Finley and Boland. The trial court did not rule on NBN's request for a permanent injunction.

At an October 16 Management Committee meeting, Davenport appointed a fifth member of the committee. By a 3–2 vote, the Management Committee voted to hire Finley and Boland, with NBN's representatives opposing. At that meeting, Davenport also proposed to relocate AURN's New York offices from NBN's office space in New York to other office space in the New York area; to transfer to Pittsburgh from New York AURN's traffic, billing, and collection functions; and to require Finley to make cuts in AURN's New York–based marketing and research personnel. NBN's representatives opposed the proposals, and Davenport scheduled a meeting on November 28 to break the deadlock.

Sensing that the Pennsylvania state trial court would dismiss its request for a permanent injunction and hoping to litigate the issues at a later time, NBN sought to withdraw its motion for a permanent injunction. On November 28, 1995, while the state trial court judge was considering NBN's request to withdraw its lawsuit, a meeting of AURN's Management Committee was held. Davenport again invoked the deadlock provision and appointed his son as fifth member of the Management Committee. By a 3–2 vote, the Management Committee agreed to relocate AURN's New York offices from NBN's office space, to transfer AURN functions to Pittsburgh from New York, and to authorize Finley to make cuts in AURN's New York–based marketing and research personnel. Davenport also proposed to promote Finley to chief executive officer and Boland to vice president of administration. NBN Chairman Small objected, and Davenport scheduled another meeting to break the deadlock.

On November 29 and 30, the state trial court, wanting to put "a final end to this unnecessary litigation," ordered the discontinuance of NBN's lawsuit with prejudice, meaning that NBN could appeal the ruling to an appellate court but would not be permitted to have another trial court litigate the same issues. NBN chose not to appeal the decision of the Pennsylvania state trial court.

After the November 28 meeting, Sheridan located new office space for AURN in New York and entered a new lease with a minimum annual liability of $900,000, yet Sheridan never revealed the location of the space to NBN or sought NBN approval of the relocation or new lease. On January 18, 1996, at the next Management Committee meeting, Davenport again appointed his son as the fifth member. By a 3–2 vote, with NBN's representatives opposing, the Management Committee appointed Finley as CEO and Boland as vice president of administration.

On January 31, 1996, NBN filed a federal lawsuit seeking an injunction against Sheridan's alleged violations of the equal management rights of the partners by hiring Finley and Boland, interfering with AURN's personnel and customer relations, and relocating AURN's New York offices. Sheridan asked the federal district court to dismiss the suit on the grounds of res judicata; that is, Sheridan argued that NBN was raising legal issues that the Pennsylvania state trial court had already considered or that NBN should have brought to the Pennsylvania trial court. Thus, Sheridan argued, because the Pennsylvania trial court had already dismissed NBN's request for an injunction with prejudice, the federal district court should not reconsider these issues. The federal district court agreed with Sheridan and dismissed NBN's lawsuit. NBN appealed to the federal court of appeal.

Pollack, Judge A discontinuance with prejudice is deemed a final adjudication on the merits for res judicata purposes on the claims asserted or which could have been asserted in the suit. Any issue concerning the relocation of the New York Office could not have been raised in the State Court suit commenced on September 15, 1995, or until the voting deadlock thereon on November 28, 1995. The NBN claim on the relocation of the New York Office was a claim based on new conduct that could have only arisen long after the filing of NBN's State Court suit. Since a plaintiff has no obligation to expand its suit in order to add a claim that it could not have asserted at the time the suit was commenced, a later suit based on subsequent conduct is not barred by res judicata.

The res judicata effect is limited to those claims that had arisen at the time that NBN brought the State Court Action. They did not include the relocation of the New York office, which had not yet even been brought to an initial vote. There was no submission to the State Court of NBN's equal right to decide whether the New York Office should be moved from its existing location as part of NBN's premises.

The doctrine of res judicata embraces all claims of NBN, excluding those claims relating to the relocation of the New York Office, which were passed on by the Management Committee prior to the filing of NBN's State Court action; the claims asserted therein and the dismissal thereof on the grounds of res judicata is affirmed.

Judgment for Sheridan affirmed in part; judgment in part reversed in favor of NBN. Remanded to the district court.

Unanimous Partners' Agreement Required

Some partnership actions are so important that one partner should not be able to do them by himself. To make clear that no single partner has implied or apparent authority to do certain acts, in the absence of a contrary agreement, the UPA requires unanimity for several actions. The RUPA, however, deletes such a list. Instead, the RUPA requires that any partnership act not in the ordinary course of business be approved by all partners, absent a contrary agreement of the partners.

For example, a decision to build a new executive offices complex must be approved by all partners. Similarly, the decision of a small accounting partnership in Sacramento to open a second office in San Jose would require unanimity. When other actions, such as submitting a partnership claim to arbitration, are in the ordinary course of business, any partner has authority to do the actions.

Many larger partnerships by agreement of the partners have modified the RUPA unanimity rule for actions outside the ordinary course of business. Getting the agreement of a thousand or more partners is nearly impossible. Partnership agreements for large partnerships may require 80 percent approval for most matters outside the ordinary course of business. In addition, for some matters outside the ordinary course of business, a partnership agreement may entrust the decision to a committee of managing partners. For example, managing partners may have the authority to make investment decisions outside the ordinary course of business.

Joint Ventures and Mining Partnerships

Most of the authority rules of partnerships apply to joint ventures and mining partnerships. These business organizations are in essence partnerships with limited purposes. Therefore, their members have less

implied and apparent authority than do partners. Joint venturers have considerable apparent authority if third persons are unaware of the limited scope of the joint venture. A mining partner has no implied authority to borrow money or issue negotiable instruments. As with partners, joint venturers and mining partners may by agreement expand or restrict each other's agency powers.

Liability for Torts and Crimes

Torts

The standards and principles of agency law's *respondeat superior* are applied in determining the liability of the partnership and of the other partners for the torts of a partner and other partnership employees. In addition, the partnership and the other partners are liable jointly and severally for the torts of a partner committed within the ordinary course of partnership business or within the authority of that partner. Finally, when a partner commits a breach of trust, the partnership and all of the partners are liable. For example, all of the partners in a stock brokerage firm are liable for a partner's embezzlement of a customer's securities and funds.

Intentional Torts While a partnership and its partners are usually liable for a partner's negligence, they usually have no liability for a partner's intentional torts. The reason for this rule is that intentional torts are not usually within the ordinary scope of business or within the ordinary authority of a partner.

A few intentional torts impose liability on a partnership and its partners. For example, a partner who repossesses consumer goods from debtors of the partnership may trespass on consumer property or batter a consumer. Such activities have been held to be in the ordinary course of business. Also, a partner who authorizes a partner to commit an intentional tort is liable for such torts.

Partners' Remedies When a partnership and the other partners are held liable for a partner's tort, they may recover the amount of their vicarious liability from the wrongdoing partner. This rule places ultimate liability on the wrongdoing partner without affecting the ability of tort victims to obtain recovery from the partnership or the other partners.

Tort Liability and Limited Liability Partnerships

State legislatures created the limited liability partnership (LLP) as a means of reducing the personal liability of professional partners, such as accountants. Consequently, an innocent partner of an LLP has no liability for the professional malpractice of his partners. LLP statutes grant partners broad protection, eliminating an innocent partner's liability for errors, omissions, negligence, incompetence, or malfeasance of his partners or employees.

Under the RUPA, the protection afforded LLP partners is even broader. LLP partners have no liability for other debts of the business, such as a supplier's bill, lease obligations, and bank loans.

That is the limit of protection, however. The LLP itself is liable for the tort of a wrongdoing partner or employee under the doctrine of *respondeat superior.* In addition, a wrongdoing partner is liable for his own malpractice or negligence. Also, the partner supervising the work of the wrongdoing partner has unlimited liability for the wrongdoing partner's tort. Thus, the LLP's assets, the wrongdoing partner's personal assets, and the supervising partner's personal assets are at risk.

Crimes

When a partner commits a crime in the course and scope of transacting partnership business, rarely are his partners criminally liable. But when the partners have participated in the criminal act or authorized its commission, they are liable. They may also be liable when they know of a partner's criminal tendencies yet place him in a position in which he may commit a crime.

Until recent times, a partnership could not be held liable for a crime in most states because it was not viewed as a legal entity. However, modern criminal codes usually define a partnership as a "person" that may commit a crime when a partner, acting within the scope of his authority, engages in a criminal act.

Lawsuits by and against Partnerships and Partners

Under the RUPA, a partnership may sue in its own name. Since suing someone is usually an ordinary business decision, ordinarily any partner has authority to initiate a lawsuit.

The RUPA also permits a partnership to be sued in its own name. Partners may also be sued individually on partnership obligations. Partners are jointly and severally liable for partnership obligations, whether based in contract or tort. This means that in addition to suing the partnership, a creditor may sue all of the partners (jointly) or sue fewer than all the partners (severally). If a creditor sues the partnership and all of the partners, the judgment may be satisfied from the assets of the partnership and, if partnership assets are exhausted, from the assets of the partners. If the partnership and fewer than all the partners are sued severally, the judgment may be satisfied only from the assets of the partnership and the assets of the partners sued. Again, partners cannot be required to pay until partnership assets have been exhausted.

When fewer than all the partners are sued and made to pay a partnership obligation, the partners paying may seek **indemnification** and **contribution** from the other partners for their shares of the liability.

Limited Liability Partnerships

For LLP partners, only the LLP is liable on a contractual obligation, and only the LLP may be sued on such a claim. For tort obligations, the LLP is liable as well as the partner who committed the tort. LLP partners who had no role in the commission of the tort have no liability.

In the following *Ross & Hardies* case, a court held a partnership liable for the fraud of its partner.

Thomas v. Ross & Hardies *9 F. Supp. 2d 547 (D.Ct. Md. 1998)*

Michael Clott had been convicted of violations of the federal racketeering statute, transportation of stolen securities, and bank and mail fraud. Clott was released from prison on supervised release in May 1994. A condition of Clott's supervised release was his agreement not to engage in the financial securities business in Maryland. In the fall of 1994, Clott retained the services of a law firm partnership, Ross & Hardies. Its partner, Steven Kersner, was the partner primarily assigned to Clott's account. Clott retained Kersner and Ross & Hardies to provide Clott's company, Capital Financial Group, Inc., a legal framework in which Clott could conduct business in the finance, securities, mortgage, and investment banking industries in Maryland.

In September 1994 acting through Capital, Clott created what was known as the 7.5% Program. The 7.5% Program was a mortgage loan program marketed to minority homeowners. The minority homeowners would mortgage their homes for the maximum amount possible. The homeowners would then turn the proceeds of the mortgages over to another firm controlled by Clott, Phoenix Financial Service, Inc., which would then either pay off each mortgage in full or would purchase it from the mortgage company. In exchange for doing this, the company would grant the homeowners a line of credit with a 7.5% interest rate. The rate would stay at 7.5% regardless of increases in the market rate. The homeowners were free to access the line of credit whenever they wished.

Several homeowners, including Lionel and Hazel Thomas, participated in the 7.5% Program. They alleged that the Program was a fraud. While the homeowners did take out mortgages and turned proceeds over to Clott, the money was never used to pay off the mortgages and the homeowners never had access to lines of credit. Instead, the complaint alleged that Clott diverted the money and the homeowners were left with a significant mortgage on their property. The scheme fell apart sometime during the summer of 1995, and both Clott and Kersner pled guilty to felony charges brought by the United States Attorney. Both are in jail.

The homeowners sued Kersner and his partnership, Ross and Hardies, for their role in the fraud. The homeowners alleged that Kersner helped pitch the Program to legitimate mortgage lenders as early as December 1994, and allowed Clott to use the Ross & Hardies office in Washington, D.C., to conduct Capital's business. They alleged that Kersner and John Fornaciaria, another Ross & Hardies partner, prepared paperwork and affidavits for Clott that falsely represented the nature of Clott's involvement with Phoenix. Kersner allegedly wrote false letters under the Ross & Hardies letterhead concerning Clott's sentencing. These acts were done even though Kersner and Fornaciaria knew that they were misleading as to Clott's involvement in the business and that Clott's activities were fraudulent in nature.

The homeowners also alleged that Kersner played a key role in perpetuating the scheme by meeting and assuring the victim homeowners. For example, Kersner helped resolve a problem that arose when Clott "whited-out" a limited indorsement on a check from a cautious homeowner. Homeowners who were potential Program participants met with Kersner in Ross & Hardies's D.C. office and talked with him by phone, during which time Kersner assured them that the Program was legitimate and had Ross & Hardies's backing. In addition, the homeowners alleged that Kersner aided Clott in fraudulently transferring the loan proceeds to various bank accounts, opening empty accounts in the names of the participants to deceive them into believing that lines of credit had been established, preparing false documents to make it appear that the mortgages had been paid off, making monthly payments on some of the mortgages to conceal the fact that they had not been paid in full, telling lenders to contact Kersner with questions and not call the homeowners, and forging and altering certain checks.

The Thomases and the other homeowners sued Ross & Hardies, under the Racketeering Influenced Corrupt Organization Act (RICO). RICO provides a private cause of action for persons injured by a violation of RICO section 1962(c). Section 1962(c) makes it unlawful for:

> any person employed by or associated with any enterprise engaged in, or the activities of which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity or collection of unlawful debt.

Ross & Hardies asked the court to dismiss the lawsuit against the partnership on the grounds that under RICO it was not liable for the fraudulent conduct of its partner.

Memorandum A difficult question facing the Court is whether there is partnership liability under RICO. The Court has concluded that the facts set forth by the complaint are sufficient to state a claim against Kersner for RICO violations. Kersner, however, is not a defendant to this action. Instead, it is his former law firm, Ross and Hardies, that the Thomases chose to sue. The Court must determine whether the Thomases can state a claim against a partnership law firm for the alleged RICO violations of one of the partnership's members. The Court's primary concern is that it not allow a plaintiff to use partnership liability to reach a party that Congress did not wish to hold liable under RICO.

Under basic agency law, a principal is liable for torts committed by its agent if the agent acts with apparent authority. This is true even if the agent's act of fraud is committed solely to benefit the agent. The general rule of partnership liability is that a partner is an agent for the partnership, and a partnership is liable for the wrongful acts of its partners committed in the ordinary course of the business of the partnership. See Revised Uniform Partnership Act sections 301, 305 (1994); Md. Code Ann. Corps. & Ass'ns. section 9–305 (Supp. 1997). With fraud claims, it is especially appropriate to hold a partnership liable when it benefited from the fraudulent acts of its partner.

Holding a partnership liable for the RICO violations of its partner under doctrines of agency and partnership liability serves Congress's goal of deterring individuals from controlling organizations through a pattern of racketeering activity. Imposing liability under vicarious liability (or in this case partnership liability) is consistent with RICO's compensatory goal. Holding a partnership liable when it benefits from the acts of its partners will prevent the partnership from being unjustly enriched and will help serve Congress's goal of compensating victims of racketeering activities.

The Thomases' allegation is that Kersner violated RICO while providing services to Clott and Capital. Kersner's alleged acts of transferring money, making fraudulent representations to victims, and pitching the Program to potential lenders are acts that fall within the scope of the work of a large law firm representing a corporate client. Capital was a paying client of Ross & Hardies, and the firm benefited from Kersner's representation of that client, including the alleged RICO violations. Holding Ross & Hardies liable for the RICO violations of Kersner would provide the firm, and other law firms, with a powerful incentive to take steps to prevent future violations and will assist in providing compensation to the victims of the racketeering activity.

According to the complaint, Clott and Kersner used Capital to run the 7.5% Program scheme, whereby they persuaded homeowners to mortgage their homes and turn over the proceeds to Phoenix. Kersner allegedly helped direct the recruitment of homeowners and mortgage lenders, and also helped direct the fraudulent transfers of the mortgage proceeds. These were the key acts of the scheme, and if the allegations are true then Kersner may be liable for directing an enterprise through a pattern of racketeering activity. The acts, if committed, were within the scope of Ross & Hardies's business as a large law firm serving the needs of corporate clients. As a result, Ross & Hardies may be held liable under section 1962(c) following traditional doctrines of partnership liability.

Ross & Hardies's motion to dismiss the Thomases' complaint is denied. The case proceeds to trial.

Ethical and Public Policy Concerns

1. Should the law require partners to owe each other fiduciary duties? Does a partner's breach of his fiduciary duty harm only the partners, or is society at large also harmed? Should partners be allowed to agree that they do not owe fiduciary duties to each other?

2. Why should a partner have greater implied authority than an agent who is a general manager of another's business? Is there a greater risk that an agent will do something imprudent with a business that belongs entirely to someone else than that a partner will do something imprudent with a business that belongs in part to that partner?

3. Is it fair that a partner is liable for the contracts of his partners? Is it fair that a partner is liable for the torts of his partners? Should a partnership be entirely a beneficial relationship for the partners, by which the partners reap the benefits of their relationship with each other but suffer none of the detriments?

Problems and Problem Cases

1. Walter Levy and Henry Disharoon formed a partnership to purchase a jet airplane and to operate a charter airline business. Disharoon located a jet and informed Levy that the price was $963,000. After Levy approved the purchase, Disharoon contracted to buy the jet for $860,000. The partnership borrowed $975,000 to pay for the jet. Disharoon paid the seller $860,000 and deposited in Disharoon's personal bank account the $103,000 difference between the actual purchase price and the purchase price represented to Levy. Has Disharoon breached a fiduciary duty?

2. Larry Rose, Paul G. Veale, Sr., Paul G. Veale, Jr., Gary Gibson, and James Parker offered professional accounting services as partners under the firm name of Paul G. Veale and Co. Their written partnership agreement expressed the general duties of the partners, but it recognized that Veale, Sr., and Rose had outside investments and a number of other business commitments. All of the partners were allowed to pursue other business activities so long as the activities did not conflict with the partnership practice of public accounting or materially interfere with the partners' duties to the partnership. While a partner, Larry Rose performed accounting services for Right Away Foods and Ed Payne. He was paid personally by those clients. Rose was an officer and shareholder of Right Away. In addition, Rose used the partnership's employees and computers to service those clients. Has Rose breached a fiduciary duty owed to his partners?

3. Russel Daub, Daniel Smith, and Frederick Stehlik formed a partnership. No formal partnership agreement was executed. During 1980, profits were distributed monthly, with Daub receiving $3,000 per month, Smith $1,500, and Stehlik $1,500. In the latter months of 1980, Stehlik received $1,700 per month, but the 1980 partnership tax return indicated that profits were divided 50 percent to Daub and 25 percent each to Smith and Stehlik. During 1981, profits were distributed 50 percent to Daub and 25 percent each to Smith and Stehlik. The 1981 partnership tax return showed the 50–25–25 profit ratio at the beginning of the year, but it showed a year-end ratio of one-third to each partner. In 1982, profits were distributed 50–25–25. When the partnership was dissolved and liquidated, Smith and Stehlik argued that each was entitled to one-

third of the profits and one-third of the value of the partnership. Are they correct?

4. Two brothers, Sydney and Ashley Altman, operated several partnerships in Pennsylvania. They shared equally in the management of the partnerships. They agreed that each would receive identical salaries and that each was permitted to charge an equal amount of personal expenses to the partnerships. After Sydney moved to Florida, Sydney commuted to Pennsylvania every week to work for two to three days. After a year passed, Sydney told Ashley that he was considering retiring and remaining in Florida permanently. They tried to reach an agreement on Ashley's purchase of Sydney's partnership interests but were unable to do so. Ashley continued to manage the businesses by himself for nearly four years. During that time, Ashley paid himself salaries in excess of what the brothers had agreed. Has Ashley received excessive compensation as a partner?

5. Dean Wilkerson and Walter Helms formed DWA of Tennessee, Inc., a furniture manufacturer. Shortly thereafter they created H&W Partnership, a general partnership, for the purpose of purchasing DWA's furniture manufacturing facility and leasing it back to DWA. DWA failed to pay a $438,000 debt for the purchase of leather from Lackawanna Leather Co. Through Wilkerson, DWA issued to Lackawanna a promissory note to pay the debt. A few days before the note was due, Wilkerson requested an extension of time for payment. Lackawanna agreed if H&W was included on the note as a maker. Wilkerson then signed the new note on behalf of DWA and H&W. Did Wilkerson have the authority to sign the note on behalf of H&W?

6. Holland lent Dalton Waldrop $12,500 to buy well-drilling equipment that was described in the loan agreement between Holland and Dalton. A year later, Dalton formed a well-drilling partnership with his brother Thomas. They used the equipment Dalton had purchased with the money borrowed from Holland. Are the partnership and Thomas liable on the Holland loan?

7. DVD *Video Case.* See "The Partnership." Art is a partner of Alphabet Builders, a partnership in the construction business. The three partners of Alphabet Builders have agreed that the partnership may not borrow money unless all the partners approve the borrowing. In the name of the partnership but without the consent of his partners, Art borrows money from a bank. Art tells the bank that the partnership will use the money for general purposes. Art indorses the loan check in the name of the partnership but deposits the money in his personal account. Art uses the money to purchase commodities futures. Art loses money on the futures and is unable to repay the loan. The bank sues Alphabet Builders and its partners. Are Alphabet Builders and its partners liable to the bank on the loan? Does Art have any liability to his partners?

8. L. G. Patel and S. L. Patel, husband and wife, owned the City Center Motel in Eureka, California. The Patels formed a partnership with their son, Raj, to own and operate the motel. The partnership agreement required Raj's approval of any sale of the motel building. Real estate records were not changed, however, and the motel building remained recorded only in the names of L. G. and S. L. Patel. L. G. and S. L. contracted to sell the motel building to P. V. and Kirit Patel, who were unaware of Raj's interest as a partner. When Raj was informed of the contract to sell the motel building, he refused to grant his approval. Is the contract enforceable against the partnership?

9. Alvin Meyer was a resident of 100 Central Park South, an apartment building in Manhattan, New York, owned by a partnership, Park South Associates. Meyer sued the partnership and one of its partners, Donald Trump, on three grounds: for violation of the lease between Meyer and the partnership, for breach of the warranty of habitability, and for the tort of intentional infliction of emotional distress caused by the partnership's harassment of Meyer. Meyer did not allege in his complaint that Park South Associates was insolvent or otherwise unable to pay its obligations. Trump asked the trial court to dismiss the suit against him on the grounds that he personally could not be sued on partnership obligations unless it was insolvent or otherwise unable to pay its obligations. Did the court agree with Trump?

10. Florence and Michael Acri were married and also partners in the Acri Cafe, which they jointly managed. For the first 15 years of their marriage, Michael had been in and out of sanitaria for the treatment of mental disorders. Although he had beaten Florence when they had marital problems, he had not attacked anyone else. Michael and Florence separated, and Michael assumed full control and management of the cafe. A few months after the Acris' separation, Stephen Vrabel and a friend went into the Acri Cafe. Without provocation, Michael shot and killed Vrabel's companion and seriously injured Vrabel while they were seated and drinking at the cafe's bar. Was Florence liable for Vrabel's injuries?

Chapter Thirty-Eight

Partners' Dissociation and Partnerships' Dissolution and Winding Up

Chapter Outline

I. Dissociation
- *A. Nonwrongful Dissociation*
- *B. Wrongful Dissociation*
  - *1. Consequences of Wrongful Dissociation*
- *C. Acts Not Causing Dissociation*
- *D. Effect of Partnership Agreement*

II. Dissolution and Winding Up the Partnership Business

- *D. Buyout of Dissociated Partners*

IV. Partners Joining an Existing Partnership
- *A. Liability of New Partners*
  - *1. Effect of LLP Statutes*

This chapter is about the death of partnerships. Four terms are important in this connection: dissociation, dissolution, winding up, and termination. Dissociation is a change in the relation of the partners, as when a partner dies. Dissolution is the commencement of the winding up process. Winding up is the orderly liquidation of the partnership assets and the distribution of the proceeds to those having claims against the partnership. Termination, the end of the partnership's existence, automatically follows winding up. A partner in a limited liability partnership dissociates from the LLP and the LLP is dissolved, wound up, and terminated in the same manner as an ordinary partnership.

Dissociation

Dissociation is defined in the Revised Uniform Partnership Act (RUPA) as a change in the relation of the partners caused by any partner ceasing to be associated in the carrying on of the business. A dissociation may be caused by a partner's retirement, death, expulsion,

or bankruptcy filing, among other things. Whatever the cause of dissociation, however, it is characterized by a partner's *ceasing to take part in the carrying on of the partnership's business.*

Dissociation is the starting place for the dissolution, winding up (liquidation), and termination of a partnership. Although winding up does not always follow dissociation, it often does. Winding up usually has a severe effect on a business: It usually ends the business, because the assets of the business are sold and the proceeds of the sale are distributed to creditors and partners.

A partner has the *power* to dissociate from the partnership *at any time,* such as by withdrawing from the partnership. A partner does not, however, always have the *right* to dissociate.

When a partner's dissociation does not violate the partnership agreement and otherwise is nonwrongful, the partner has the right to dissociate from the partnership: Such a dissociation is **nonwrongful.** When a partner's dissociation violates the partnership agreement or otherwise is wrongful, the partner has the power—but not the right—to dissociate from the partnership: Such a dissociation is **wrongful.** The consequences that follow a nonwrongful dissocation may differ from those that follow a wrongful dissociation.

Nonwrongful Dissociation

A dissociation is nonwrongful when the dissociation does not violate the partnership agreement and is not otherwise wrongful. The following events are nonwrongful dissociations:

1. Death of a partner.

2. Withdrawal of a partner at any time from a partnership at will. A partnership at will is a partnership whose partnership agreement does not specify any term or undertaking to be accomplished.

3. In a partnership for a term or completion of an undertaking, withdrawal of a partner within 90 days after another partner's death, adjudicated incapacity, or bankruptcy filing. This dissociation is deemed nonwrongful to protect a partner who may think her interests are impaired by the premature departure of an important partner.

4. Withdrawal of a partner in accordance with the partnership agreement. For example, a partnership agreement allows the partners to retire at age 55. A partner who retires at age 60 has dissociated from the partnership nonwrongfully.

5. Automatic dissociation by the occurrence of an event agreed to in the partnership agreement. For example, a partnership may require a partner to retire at age 70.

6. Expulsion of a partner in accordance with the partnership agreement. For example, the removal of a partner who has been convicted of a crime causes a dissociation from the partnership if the partnership agreement allows removal on such grounds.

7. Expulsion of a partner who has transferred his transferable partnership interest or suffered a charging order against his transferable interest. Under the RUPA, such an expulsion must be approved by all the other partners, absent a contrary partnership agreement.

8. Expulsion of a partner with whom it is unlawful for the partnership to carry on its business. Under the RUPA, this expulsion must be approved by all the other partners, absent a contrary agreement.

9. A partner's assigning his assets for the benefit of creditors or consenting to the appointment of a custodian over his assets.

10. Appointment of a guardian over a partner or a judicial determination that a partner is incapable of performing as a partner. For example, a court rules that a partner who has suffered a stroke and has permanent brain damage is unable to continue as a partner of a consulting partnership.

In addition, there are a few special rules for dissociations of nonhuman partners, such as corporations.

Wrongful Dissociation

A partner wrongfully dissociates from a partnership when she dissociates in violation of the partnership agreement or in any other wrongful way. The following are wrongful dissociations:

1. Withdrawal of a partner that breaches an express provision in the partnership agreement.

2. Withdrawal of a partner before the end of the partnership's term or completion of its undertaking, unless the partner withdraws within 90 days after another partner's death, adjudicated incapacity, or bankruptcy filing.

3. A partner's filing a bankruptcy petition or being subject to an order for relief in a bankruptcy proceeding.

4. Expulsion of a partner by a court at the request of the partnership or another partner. The grounds for judicial dissociation are when

a. A partner's wrongful conduct adversely and materially affects the partnership business,

b. A partner wilfully and persistently breaches the partnership agreement or her fiduciary duties, or

c. A partner's conduct makes it not reasonably practicable to conduct partnership business with the partner.

For example, a partner may persistently and substantially use partnership property for his own benefit. Or three partners may refuse to allow two other partners to manage the partnership's business. The harmed partners may seek judicial dissociation. For the expelled, wrongdoing partners, the dissociation is wrongful.

In addition, there are a few wrongful dissociations that apply only to nonhuman partners, such as a corporation.

Consequences of Wrongful Dissociation A partner who wrongfully dissociates from a partnership has no right to demand that the partnership be dissolved and its business wound up. In addition, should the other partners choose to wind up the business, the wrongfully dissociated partner has no right to perform the winding up. Nonetheless, a wrongfully dissociated partner is entitled to his share of the value of his partnership interest, minus the damages he caused the partnership. Damages may include the cost of obtaining new financing and the harm to the partnership goodwill caused by the loss of a valuable partner. Moreover, the wrongfully dissociated partner is not entitled to receive the buyout price until the term of the partnership has expired.

Acts Not Causing Dissociation

Many events that you think may cause a dissociation in fact do not. For example, a partner's transfer of his transferable partnership interest, by itself, does not cause a dissociation from the partnership, and neither does a creditor's obtaining a charging order. Also, the addition of a partner to a partnership is not a dissociation, because no one ceases to be associated in the business.

Mere disagreements, even irreconcilable differences, between partners are expectable, and therefore by themselves are not grounds for dissociation. If the disagreements threaten the economic viability of the partnership, however, a court may order a dissolution, as will be discussed below.

Effect of Partnership Agreement

The dissociations listed in the RUPA are merely default rules. The partners may limit or expand the definition of dissociation and those dissociations that are wrongful, and they may change the effects of nonwrongful and wrongful dissociations. For example, the partners may require dissociation if a partner transfers his transferable partnership interest, if a partner does not redeem a charging order within 15 days of the order, or if a partner fails to make a capital contribution required by the partnership agreement. The partnership agreement may also reduce the number of partners that must approve the expulsion of a partner, such as a two-thirds vote, and expand the grounds for expulsion. If one partner is very powerful, the partnership agreement might allow that partner to dissociate at any time without penalty.

Dissolution and Winding Up the Partnership Business

When a partner dissociates from a partnership, the next step may be dissolution and **winding up** of the partnership's business. This involves the orderly liquidation—or sale—of the assets of the business. Liquidation may be accomplished asset by asset; that is, each asset may be sold separately. It may also be accomplished by a sale of the business as a whole. Or it may be accomplished by a means somewhere between these two extremes.

Winding up does not always require the sale of the assets or the business. When a partnership has valuable assets, the partners may wish to receive the assets rather than the proceeds from their sale. Such *distributions-in-kind* are rarely permitted.

During winding up, the partners continue as fiduciaries to each other, especially in negotiating sales or making distributions of partnership assets to members of the partnership. Nonetheless, there is a termination of the fiduciary duties unrelated to winding up. For example, a partner who is not winding up the business may compete with his partnership during winding up.

Events Causing Dissolution and Winding Up

Recognizing that a partnership business is worth more as a going concern, the RUPA contemplates that the partnership business will usually continue after a

Concept Review

Causes of Dissociation and Acts Not Causing Dissociation

Causes of Dissociation	**Wrongful Dissociations** 1. Withdrawal of a partner that breaches an express provision in the partnership agreement. 2. Withdrawal of a partner before the end of the partnership's term or completion of its undertaking, unless the partner withdraws within 90 days after another partner's death, adjudicated incapacity, or bankruptcy filing. 3. A partner's filing a bankruptcy petition or being subject to an order for relief in a bankruptcy proceeding. 4. Judicial expulsion of a partner on the grounds that a partner's wrongful conduct adversely and materially affects the partnership business. 5. Judicial expulsion of a partner on the grounds that a partner has wilfully and persistently breached the partnership agreement or her fiduciary duties. 6. Judicial expulsion of a partner on the grounds that a partner's conduct makes it not reasonably practicable to conduct partnership business with the partner. **Nonwrongful Dissociations** 1. Death of a partner. 2. Withdrawal of a partner at any time from a partnership at will. 3. In a partnership for a term or completion of an undertaking, withdrawal of a partner within 90 days after another partner's death, adjudicated incapacity, or bankruptcy filing. 4. Withdrawal of a partner in accordance with the partnership agreement. 5. Automatic dissociation by the occurrence of an event agreed to in the partnership agreement. 6. Expulsion of a partner in accordance with the partnership agreement. 7. Expulsion of a partner who has transferred his transferable partnership interest or suffered a charging order against his transferable interest. 8. Expulsion of a partner with whom it is unlawful for the partnership to carry on its business. 9. A partner's assigning his assets for the benefit of creditors or consenting to the appointment of a custodian over his assets. 10. Appointment of a guardian over a partner or a judicial determination that a partner is incapable of performing as a partner.
Acts Not Causing Dissociation	1. A partner's transfer of his transferable partnership interest. 2. A creditor's obtaining a charging order. 3. Addition of a partner to a partnership. 4. Disagreements among the partners.

partner's dissociation. Many dissociations, such as one caused by a partner's death, will not automatically result in the dissolution and winding up of a partnership.

Nonetheless, the RUPA provides that a partnership will be dissolved and wound up in the following situations:

1. When the partnership's term has expired.

2. When the partnership has completed the undertaking for which it was created.

3. When all the partners agree to wind up the business.

4. When an event occurs that the partnership agreement states will cause a winding up of the partnership.

5. For a partnership at will, when any partner expressly withdraws from the partnership, other than a partner who is deceased, was expelled, is the subject of an order for relief in a bankruptcy proceeding, assigned his assets for the benefit of creditors, had a custodian appointed over his assets, or was automatically dissociated by the occurrence of an event agreed to in the partnership agreement.

6. For a partnership for a term or completion of an undertaking, when at least half the remaining partners vote to dissolve and wind up the partnership within 90 days after a partner dies, wrongfully dissociates, assigns his property for the benefit of his creditors, or consents to the appointment of a custodian over his property.

7. When the business of the partnership is unlawful.

8. Upon the request by a partner, when a court determines that the economic purpose of the partnership is likely to be unreasonably frustrated, a partner's conduct makes it not reasonably practicable to carry on the business with that partner, or it is not reasonably practicable to conform with the partnership agreement.

9. Upon the request of a transferee of a partner's transferable interest in a partnership at will or a partnership whose term or undertaking has been completed, when a court determines that it is equitable to wind up the partnership business.

Effect of Partnership Agreement The above causes of winding up are the RUPA's default rules, which except for the last three may be changed by the partnership agreement. For example, the partnership agreement may provide that at any time two-thirds of the partners may cause a winding up or that upon the death of a partner no partner has the right to force a winding up. Partners will frequently want to limit the events that cause dissolution and winding up, because they believe the business will be worth more as a going concern than by being liquidated.

In addition, if dissolution has occurred, the partners may agree to avoid winding up and to continue the business. To avoid winding up after dissolution has occurred, all the partners who have not wrongfully dissociated must consent to continuing the business. That means that any partner who has not wrongfully dissociated may force winding up if dissolution has occurred.

Joint Ventures and Mining Partnerships

The partnership rules of dissociation and dissolution apply to joint ventures. Mining partnerships are difficult to dissolve, because of the free transferability of mining partnership interests. The death of a mining partner does not effect a dissolution. In addition, a mining partner may sell his interest to another person and dissociate from the carrying on of the mining partnership business without causing a dissolution.

In the following *Horizon* case, the court considered grounds for dissolution that were contained in the RUPA and a partnership agreement, and whether a partner could be held liable for damages caused by a dissolution. The case points out the importance of careful drafting of partnership agreements.

Horizon/CMS Healthcare Corp. v. Southern Oaks Health Care, Inc.
732 So. 2d 1156 (Fla. Ct. App. 1999)

Horizon/CMS Healthcare Corporation is a large, publicly traded provider of both nursing home facilities and management for nursing home facilities. In 1993, it decided to expand into Kissimmee, Florida, by entering partnerships with Southern Oaks Health Care, Inc., which already operated the Southern Oaks Health Care Center in the area and held the rights to open another 120-bed facility. They agreed that Horizon would manage both the Southern Oaks facility and the new facility. Southern Oaks and Horizon entered into several partnership contracts having terms of 20 years.

In 1996, Southern Oaks filed suit against Horizon alleging that Horizon had breached the 20-year agreements. Horizon also sued Southern Oaks and asked the trial court to dissolve the partnerships on the grounds that the partners had irreconcilable differences regarding how profits would be calculated and divided. The trial court found largely in favor of Southern Oaks, concluding that Horizon breached its obligations under two different partnership agreements. The court ordered the dissolution of the partnerships, finding that the partners were incapable of continuing to operate in business together. The court also ruled that neither partner was entitled to damages as a result of the dissolution.

Southern Oaks appealed to the Florida Court of Appeals, asking the court to award damages because Horizon unilaterally and wrongfully sought dissolution of the partnerships. Southern Oaks asked for a damage award equal to the loss of the partnerships' 17 remaining years' future profits.

Goshorn, Justice Southern Oaks argues Horizon wrongfully caused the dissolution because the basis for dissolution cited by the court is not one of the grounds for which the parties contracted. The pertinent partnership contracts provided in section 7.3 "Causes of Dissolution":

> In addition to the causes for dissolution set forth in Section 7.2(c), the Partnership shall be dissolved in the event that: (a) the Partners mutually agree to terminate the Partnership; (b) the Partnership ceases to maintain any interest (which term shall include, but not be limited to, a security interest) in the Facility; (c) the Partnership, by its terms as set forth in this Agreement, is terminated; (d) upon thirty (30) days' prior written notice to the other Partner, either Partner elects to dissolve the Partnership on account of an Irreconcilable Difference which arises and cannot, after good faith efforts, be resolved; (e) the Partners determine, based on the opinion of Partnership counsel, that the Partnership cannot legally remain in existence or continue its business operations without material detriment; (f) the Transferring Partner sells its Partnership Interest to the Purchasing Partner; (g) pursuant to a court decree; or (h) on the date specified in Section 2.4.

The term "irreconcilable difference" used in the above quote is defined in the contracts as

> A reasonable and good faith difference of opinion between the Partners where either (i) the existence of the difference of opinion has a material and adverse impact on the conduct of the Partnerships' Business, or (ii) such difference is as to (x) the quality of services which is or should be provided at the long-term care facilities owned by the Partnership, (y) the adoption of a budget for a future fiscal year, or (z) any matter requiring unanimous approval of the Partners under the terms of this Agreement.

Southern Oaks argues that what Horizon relied on at trial as showing irreconcilable differences—the decisions of how profits were to be determined and divided—were not "good faith differences of opinion," nor did they have "a material and adverse impact on the conduct of the Partnerships' Business." Horizon's refusal to pay Southern Oaks according to the terms of the contracts was not an "irreconcilable difference" as defined by the contract, Southern Oaks asserts, pointing out that Horizon's acts were held to be breaches of the contracts. Because there was no contract basis for dissolution, Horizon's assertion of dissolution was wrongful, Southern Oaks concludes.

Southern Oaks contends further that not only were there no contractual grounds for dissolution, dissolution was also wrongful under the Florida Statutes. Southern Oaks argues that pursuant to section 620.8602, Horizon had the power to dissociate from the partnership, but, in the absence of contract grounds for the dissociation, Horizon wrongfully dissociated. It asserts that it is entitled to lost future profits under Florida's partnership law, relying on subsection 620.8602(3), Florida Statutes.

We find Southern Oaks' argument without merit. First, the trial court's finding that the parties are incapable of continuing to operate in business together is a finding of "irreconcilable differences," a permissible reason for dissolving the partnerships under the express terms of the partnership agreements. Thus, dissolution was not "wrongful," assuming there can be "wrongful" dissolutions, and Southern Oaks was not entitled to damages for lost future profits. Additionally, the partnership contracts also permit dissolution by "judicial decree." Although neither party cites this provision, it appears that pursuant thereto, the parties agreed that dissolution would be proper if done by a trial court for whatever reason the court found sufficient to warrant dissolution.

Second, even assuming the partnership was dissolved for a reason not provided for in the partnership agreements, damages were properly denied. Under RUPA, it is clear that wrongful dissociation triggers liability for lost future profits. See section 620.8602(3) ("A partner who wrongfully dissociates is liable to the partnership and to the other partners for damages caused by the dissociation. The liability is in addition to any other obligation of the partner to the partnership or to the other partners."). However, RUPA does not contain a similar provision for dissolution; RUPA does not refer to the dissolutions as rightful or wrongful. Section 620.8801, "Events causing dissolution and winding up of partnership business," outlines the events causing dissolution without any provision for liability for damages.

Under subsection 620.8801(5), the statute recognizes judicial dissolution:

> A partnership is dissolved, and its business must be wound up, only upon the occurrence of any of the following events:
>
> . . .
>
> (5) On application by a partner, a judicial determination that:
>
> (a) The economic purpose of the partnership is likely to be unreasonably frustrated;
>
> (b) Another partner has engaged in conduct relating to the partnership business which makes it not reasonably practicable to carry on the business in partnership with such partner; or
>
> (c) It is not otherwise reasonably practicable to carry on the partnership business in conformity with the partnership agreement; . . .

Paragraph (5)(c) provides the basis for the trial court's dissolution in this case. While "reasonably practicable" is not defined in RUPA, the term is broad enough to encompass the inability of partners to continue working together, which is what the court found.

Certainly the law predating RUPA allowed for recovery of lost profits upon the wrongful dissolution of a partnership. However, RUPA brought significant changes to partnership law, among which was the adoption of the term "dissociation." In RUPA, dissociation appears to have taken the place of "dissolution" as that word was used pre-RUPA. "Dissolution" under RUPA has a different meaning. It follows that the pre-RUPA cases providing for future damages upon wrongful dissolution are no longer applicable to a partnership dissolution. In other words a "wrongful dissolution" referred to in the pre-RUPA case law is now, under RUPA, known as " wrongful dissociation." Simply stated, only when a partner dissociates and the dissociation is wrongful can the remaining partners sue for damages.

Southern Oaks' attempt to bring the instant dissolution under the statute applicable to dissociation is rejected. The trial court ordered dissolution of the partnership, not the dissociation of Horizon for wrongful conduct. There no longer appears to be "wrongful" dissolution—either dissolution is provided for by contract or statute or the dissolution was improper and the dissolution order should be reversed. In the instant case, because the dissolution either came within the terms of the partnership agreements or paragraph 620.8801(5)(c) (judicial dissolution where it is not reasonably practicable to carry on the partnership business), Southern Oaks' claim for lost future profits is without merit.

Judgment for Horizon affirmed.

Performing Winding Up

For the well-planned partnership, the partnership agreement will indicate who may perform the process of winding up for the partnership, what is the power of the persons performing winding up, and what their compensation is for performing the service.

In the absence of a partnership agreement, the RUPA provides that any partner who has not wrongfully dissociated from the partnership may perform the winding up. A winding up partner is entitled to reasonable compensation for her winding up services, in addition to her usual share of profits.

Partner's Authority during Winding Up

Express and Implied Authority During winding up, a partner has the express authority to act as the partners have agreed. The implied authority of a winding up partner is the power to do those acts *appropriate for winding up* the partnership business. That is, he has the power to bind the partnership in any transaction necessary to the liquidation of the assets. He may collect money due, sue to enforce partnership rights, prepare assets for sale, sell partnership assets, pay partnership creditors, and do whatever else is appropriate to wind up the business. He may maintain and preserve assets or enhance them for sale, for example, by painting a building or by paying a debt to prevent foreclosure on partnership land. A winding up partner may temporarily continue the business when the effect is to preserve the value of the partnership.

Performing Executory Contracts The implied authority of a winding up partner includes the power to perform executory contracts (made before dissolution but not yet performed). A partner may not enter into *new* contracts unless the contracts aid the liquidation of the partnership's assets. For example, a partner may

fulfill a contract to deliver coal if the contract was made before dissolution. She may not make a new contract to deliver coal unless doing so disposes of coal that the partnership owns or has contracted to purchase.

Borrowing Money Usually, the implied authority of a winding up partner includes no power to borrow money in the name of the partnership. Nonetheless, when a partner can preserve the assets of the partnership or enhance them for sale by borrowing money, he has implied authority to engage in new borrowing. For example, a partnership may have a valuable machine repossessed and sold far below its value at a foreclosure sale unless it can refinance a loan. A partner may borrow the money needed to refinance the loan, thereby preserving the asset. A partner may also borrow money to perform executory contracts.

Apparent Authority Winding up partners have apparent authority to conduct business as they did before dissolution, when notice of dissolution is not given to those persons who knew of the partnership prior to its dissolution. For example, a construction partnership dissolves and begins winding up but does not notify anyone of its dissolution. After dissolution, a partner makes a contract with a customer to remodel the customer's building. The partner would have no implied authority to make the contract, because the contract is new business and does not help liquidate assets. Nonetheless, the contract may be within the partner's apparent authority, because to persons unaware of the dissolution, it appears that a partner may continue to make contracts that have been in the ordinary course of business.

To eliminate the apparent authority of a winding up partner to conduct business in the ordinary way, the partnership must ensure that one of the following occurs:

1. A third party knows or has reason to know that the partnership has been dissolved.

2. A third party has received notification of the dissolution by delivery of a communication to the third party's place of business. For example, an e-mail message is sent to a creditor of the partnership.

3. The dissolution has come to the attention of the third party. For example, a partnership creditor was told of the dissolution by another creditor.

4. A partner has filed a Statement of Dissolution with the secretary of state, which limits the partners' authority during winding up. A third party is deemed to have notice of a limitation on a partner's authority 90 days after the filing of a Statement of Dissolution.

To be safe, a dissolved partnership should eliminate its partners' apparent authority to conduct business in the ordinary way by directly informing parties with whom it has previously conducted business, such as by e-mail, fax, or a phone call. The partnership should be able to identify such parties from its records. As for parties that may know about the partnership but with whom the partnership has not done business, the partnership should post notice of the dissolution at its place of business and in newspapers of general circulation in its area, increasing the chance that third parties will know of the dissolution. Also, the partnership should file a Statement of Dissolution: 90 days after its filing, no one should be able to rely on the apparent authority of a partner to conduct any business that is not appropriate to winding up. The partnership agreement of a well-planned partnership will require the partnership to take these steps when dissolution occurs.

Disputes among Winding Up Partners When more than one partner has the right to wind up the partnership, the partners may disagree concerning which steps should be taken during winding up. For decisions in the ordinary course of winding up, the decision of a majority of the partners controls. When the decision is an extraordinary one, such as continuing the business for an extended period of time, unanimous partner approval is required.

In the following case, *Paciaroni v. Crane,* the court found that the business of the partnership to train and race a horse should continue during winding up. The drafters of the RUPA expressly noted that this case is a model for continuing a business during winding up.

Paciaroni v. Crane *408 A.2d 946 (Del. Ct. Ch. 1979)*

Black Ace, a harness racehorse of exceptional speed, was the fourth best pacer in the United States in 1979. He was owned by a partnership: Richard Paciaroni owned 50 percent; James Cassidy, 25 percent; and James Crane, 25 percent. Crane, a professional trainer, was in charge of the daily supervision

of Black Ace, including training. It was understood that all of the partners would be consulted on the races in which Black Ace would be entered, the selection of drivers, and other major decisions; however, the recommendations of Crane were always followed by the other partners because of his superior knowledge of harness racing.

In 1979, Black Ace won $96,969 through mid-August. Seven other races remained in 1979, including the prestigious Little Brown Jug and the Messenger at Roosevelt Raceway. The purse for these races was $600,000.

A disagreement among the partners arose when Black Ace developed a ringbone condition and Crane followed the advice of a veterinarian not selected by Paciaroni and Cassidy. The ringbone condition disappeared, but later Black Ace became uncontrollable by his driver, and in a subsequent race he fell and failed to finish the race. Soon thereafter, Paciaroni and Cassidy sent a telegram to Crane dissolving the partnership and directing him to deliver Black Ace to another trainer they had selected. Crane refused to relinquish control of Black Ace, so Paciaroni and Cassidy sued him in August 1979, asking the court to appoint a receiver who would race Black Ace in the remaining 1979 stakes races and then sell the horse. Crane objected to allowing anyone other than himself to enter the horse in races. Before the trial court issued the following decision, Black Ace had entered three additional races and won $40,000.

Brown, Vice Chancellor It is generally accepted that once dissolution occurs, the partnership continues only to the extent necessary to close out affairs and complete transactions begun but not then finished. It is not generally contemplated that new business will be generated or that new contractual commitments will be made. This, in principle, would work against permitting Black Ace to participate in the remaining few races for which he is eligible.

However, in Delaware, there have been exceptions to this. Where, because of the nature of the partnership business, a better price upon final liquidation is likely to be obtained by the temporary continuation of the business, it is permissible, during the winding up process, to have the business continue to the degree necessary to preserve or enhance its value upon liquidation, provided that such continuation is done in good faith with the intent to bring affairs to a conclusion as soon as reasonably possible. And one way to accomplish this is through an application to the Court for a winding up, which carries with it the power of the Court to appoint a receiver for that purpose.

The business purpose of the partnership was to own and race Black Ace for profit. The horse was bred to race. He has the ability to be competitive with the top pacers in the country. He is currently "racing fit" according to the evidence. He has at best only seven more races to go over a period of the next six weeks, after which time there are established horse sales at which he can be disposed of to the highest bidder. The purse for these remaining stake races is substantial. The fact that he could possibly sustain a disabling injury during this six-week period appears to be no greater than it was when the season commenced. Admittedly, an injury could occur at any time. But this is a fact of racing life which all owners and trainers are forced to accept. And the remaining stake races are races in which all three partners originally intended that he would compete, if able.

Under these circumstances, I conclude that the winding up of the partnership affairs should include the right to race Black Ace in some or all of the remaining 1979 stakes races for which he is now eligible. The final question, then, is who shall be in charge of racing him.

On this point, I rule in favor of Paciaroni and Cassidy. They may, on behalf of the partnership, continue to race the horse through their new trainer, subject, however, to the conditions hereafter set forth. Crane does have a monetary interest in the partnership assets that must be protected if Paciaroni and Cassidy are to be permitted to test the whims of providence in the name of the partnership during the next six weeks. Accordingly, I make the following ruling:

1. Paciaroni and Cassidy shall first post security in the sum of $100,000 so as to secure to Crane his share of the value of Black Ace.

2. If Paciaroni and Cassidy are unable or unwilling to meet this condition, then they shall forgo the right to act as liquidating partners. In that event, each party, within seven days, shall submit to the

Court the names of two persons who they believe to be qualified, and who they know to be willing, to act as receiver for the winding up of partnership affairs.

3. In the event that no suitable person can be found to act as receiver, or in the event that the Court should deem it unwise to appoint any person from the names so submitted, then the Court reserves the power to terminate any further racing by Black Ace and to require that he simply be maintained and cared for until such time as he can be sold as a part of the final liquidation of the partnership.

Judgment for Paciaroni and Cassidy.

Concept Review

Partner's Authority during Winding Up

Express Authority	To do anything the partners agree a partner may perform.
Implied Authority	To do those acts appropriate to winding up the partnership business. • Preserve the partnership business or property as a going concern for a reasonable time. • Prosecute and defend lawsuits. • Settle disputes by mediation or arbitration. • Settle and close the partnership business. • Dispose of and transfer the partnership's property. • Discharge the partnership's liabilities.
Apparent Authority	To conduct business in the ordinary way, unless appropriate action is taken to notify third parties of the partnership's dissolution. To eliminate most apparent authority, the partnership should: • Send notification by e-mail, fax, or phone to partnership creditors at their places of business. • Post notice of dissolution and winding up at the partnership's place of business, in newspapers, and on its webpage. • File a Statement of Dissolution with the Secretary of State.

Distribution of Dissolved Partnership's Assets

After the partnership's assets have been sold during winding up, the proceeds are distributed to those persons who have claims against the partnership. Not only creditors but also partners have claims against the proceeds. As you might expect, the claims of creditors must be satisfied first, yet a partner who is also a creditor of the partnership is entitled to the same priority as other creditors of the partnership. Thus a partner who has loaned money to the partnership is paid when other creditors of the partnership are paid.

After the claims of creditors have been paid, the remaining proceeds from the sale of partnership assets will be distributed to the partners according to the net amounts in their capital accounts. A partner's capital account is credited (increased) for any capital contributions the partner has made to the partnership plus the partner's share of partnership profits, including profits from the sale of partnership assets during winding up. The partner's capital account is charged (decreased) for the partner's share of partnership losses, including losses from the sale of partnership assets during winding up, and any distributions made to the partners, such as a distribution of profits or a return of capital. The net amount in the partner's account is distributed to the partner.

If the net amount in a partner's capital account is negative, the partner is obligated to contribute to the partnership an amount equal to the excess of charges over credits in the partner's account. Some partners may have a positive capital account balance and other partners may have a negative capital account balance. This means that during winding up, some partners may be required to contribute to enable the partnership to pay the claim of another partner.

In many partnerships that have been unprofitable, all the partners will have negative capital accounts. This means that the partnership assets have been exhausted and yet some of the partnership creditors have not been paid their claims. If partnership creditors cannot be paid from the partnership assets, the creditors may proceed against the partners, including a partner who may have already received a portion of partnership assets on account of her being a creditor also.

Since partners have liability for all the obligations of a partnership, if one partner fails to contribute the amount equal to her negative capital account balance, the other partners are obligated to contribute to the partnership in the proportions in which they share the losses of the partnership. The partner who fails to contribute as required is liable, however, to the partners who pay the defaulting partner's contribution.

The RUPA eliminates the old UPA's concept of marshaling of assets. While partnership creditors still have a priority over a partner's creditors with regard to partnership assets, partnership and partners' creditors share pro rata in the assets of individual partners.

Asset Distributions in a Limited Liability Partnership

The asset distribution rules are modified for a limited liability partnership, because in an LLP most partners have no liability for partnership obligations. If the LLP has been profitable, each partner will receive the net amount in her capital account. If creditors' claims exceed the LLP's assets, however, an LLP partner is not ordinarily required to contribute an amount equal to the negative balance in her account, and the creditors may not sue the partner to force the partner to pay the debt. This result is necessary to protect the limited liability of innocent partners who did not commit a wrong against the creditors.

If, however, a partner has committed malpractice or another wrong for which LLP statutes do not provide protection from liability, that wrongdoing partner must contribute to the partnership an amount equal to her share of the unpaid liability. Creditors may sue such a partner when the partnership fails to pay the liability. If more than one partner has liability, they must contribute to the partnership in proportion in which they share liability. If one is unable to pay, the other liable partners must contribute the shortfall. The partners who are not liable for the obligation cannot be forced to pay the debt.

Termination

After the assets of a partnership have been distributed, **termination** of the partnership occurs automatically.

When the Business Is Continued

Dissolution and winding up need not follow a partner's dissociation from a partnership. The partners may choose not to seek dissolution and winding up, or the partnership agreement may provide that the business may be continued by the remaining partners.

When there is no winding up and the business is continued, the claims of creditors against the partnership and the partners may be affected, because old partners are no longer with the business and new partners may enter the business.

Successor's Liability for Predecessor's Obligations

When the business of a partnership is continued after dissociation, creditors of the partnership are creditors of the person or partnership continuing the business. In addition, the original partners remain liable for obligations incurred prior to dissociation unless there is agreement with the creditors to the contrary. Thus, partners may not usually escape liability by forming a new partnership or a corporation to carry on the business of the partnership.

Dissociated Partner's Liability for Obligations Incurred while a Partner

Dissociated partners remain liable to partnership creditors for partnership liabilities incurred while they were

partners; however, a dissociated partner's liability may be eliminated by the process of **novation.** Novation occurs when the following two conditions are met:

1. The continuing partners release a dissociated partner from liability on a partnership debt, and
2. A partnership creditor releases the dissociated partner from liability on the same obligation.

Continuing partners are required to indemnify dissociated partners from liability on partnership obligations. To complete the requirements for novation, a dissociated partner must also secure his release by the partnership's creditors. A creditor's agreement to release an outgoing partner from liability may be express, but usually it is implied. *Implied* novation may be proved by a creditor's knowledge of a partner's withdrawal and his continued extension of credit to the partnership. In addition, a *material modification* in the nature or time of payment of an obligation operates as a novation for an outgoing partner, when the creditor has knowledge of the partner's dissociation.

When former partners release a dissociated partner from liability but creditors do not, there is not a novation. As a result, creditors may enforce a partnership liability against a dissociated partner. However, the outgoing partner may recover from his former partners who have indemnified him from liability.

Dissociated Partner's Liability for Obligations Incurred after Leaving the Partnership

Ordinarily, a dissociated partner has no liability for partnership obligations incurred after he leaves the partnership. Nonetheless, a third party may believe that a dissociated partner is still a partner of the continuing partnership and transact with the partnership while holding that belief. In such a context, a dissociated partner could be liable to the third party even though the dissociated partner will not benefit from the transaction between the partnership and the third party.

The RUPA makes a dissociated partner liable as a partner to a party that entered into a transaction with the continuing partnership, unless:

1. The other party did not reasonably believe the dissociated partner was still a partner.
2. The other party knew or should have known or has received notification of the partner's dissociation.
3. The transaction was entered into more than 90 days after the filing of a Statement of Dissociation with the secretary of state, or
4. The transaction was entered into more than two years after the partner has dissociated.

Moreover, although a dissociated partner's right to manage the partnership has terminated upon his dissociation, unless one of the above can be proved the dissociated partner retains his apparent authority to bind the partnership on matters in the ordinary course of business.

This means that when dissociation occurs, a partnership should take steps similar to those it took to reduce the apparent authority of a winding up partner: that is, the partnership should directly inform parties with whom it has previously conducted business, such as by e-mail, fax, or a phone call, that the partner has dissociated. It should also post notice of the dissociation at its place of business and in newspapers of general circulation in its area. Finally, the partnership should cause the filing of a Statement of Dissociation, limiting the authority of the dissociated partner and notifying the public that the partner is no longer a partner. Taking these steps will reduce the risk that the dissociated partner will be liable for future obligations of the partnership, and it will help eliminate the apparent authority of the dissociated partner to act on behalf of the partnership. The partnership agreement of a well-planned partnership will require that these steps be taken by the partnership immediately upon the dissociation of a partner.

In the following case, *In Re Labrum & Doak,* the court considered both the UPA and RUPA rules regarding liability of dissociated partners.

In Re Labrum & Doak, LLP *237 B.R. 275 (Bank. Ct. E. Pa. 1999)*

Labrum & Doak, LLP, was a law partnership that began in 1904 in Pennsylvania. In 1997, its partners dissolved the partnership. The partnership entered reorganization under Chapter 11 of the federal Bankruptcy Code in January 1998. A reorganization plan was confirmed in December 1998, which authorized the reorganization administrator to bring a deficiency proceeding against the partners of Labrum & Doak, seeking to hold individual partners liable on obligations of the partnership.

John Seehousen, Jonathan Herbst, and James Hilly were former partners of Labrum & Doak. Seehousen withdrew from the partnership in 1992, Herbst resigned from the partnership in early 1996, and James Hilly resigned in late 1995. They argued that because of their dissociations from Labrum & Doak, they were not liable for partnership obligations—in particular, liability for the malpractice of other partners—that were incurred after their resignations. The bankruptcy court was asked to rule on the matter.

Scholl, Justice A very difficult issue is presented in ascertaining whether withdrawing former partners of the Debtor partnership are liable for all of the Debtor's deficiency, even those obligations which arose after their withdrawal. The determination of this issue requires interpretation of several principles of general partnership law.

We note that Pennsylvania Uniform Partnership Act (PAUPA) does not address the effect of dissociation on future liabilities. PAUPA was modeled after the Uniform Partnership Act of 1914. The UPA also does not address the effects of dissociation. At the most, the UPA, section 36, suggests that dissolution does not have any effect on the existing liability of any given partner. Accordingly, under these strictures, Seehousen, Herbst, and Hilly would be liable for the deficiencies incurred regardless of the fact that some of the deficiency claims at issue arose after their dissociation from the Debtor partnership.

The reasoning behind this conclusion is as follows. A partner may be discharged from any existing liability upon dissolution by an agreement to that effect between himself, the partnership creditor, and the person or partnership continuing the business. UPA section 36(2). None of the partners submitted into evidence, nor testified of the existence of, any such agreement. As a result, we can only conclude that no such agreement existed, and that therefore Seehousen, Herbst, and Hilly are liable for all of the deficiencies at hand.

Conscious of these consequences, the drafters of the Revised Uniform Partnership Act (RUPA) tried to clarify the effects of dissociation of partners from a partnership. For this reason, RUPA section 703, which corresponds somewhat to the UPA, section 36, provides as follows:

> SECTION 703. DISSOCIATED PARTNER'S LIABILITY TO OTHER PERSONS.
>
> (a) A partner's dissociation does not of itself discharge the partner's liability for a partnership obligation incurred before dissociation. A dissociated partner is not liable for a partnership obligation incurred after dissociation, except as otherwise provided in subsection (b).
>
> (b) A partner who dissociates without resulting in a dissolution and winding up of the partnership business is liable as a partner to the other party in a transaction entered into by the partnership, or a surviving partnership under Article 9, within two years after the partner's dissociation, only if at the time of entering into the transaction the other party:
>
> (1) reasonably believed that the dissociated partner was then a partner;
>
> (2) did not have notice of the partner's dissociation; and,
>
> (3) is not deemed to have had knowledge under Section 303(e) or notice under Section 704 (c).

However, as of this date, RUPA has been only adopted in nineteen jurisdictions. Pennsylvania is not one of them. Moreover, assuming arguendo that RUPA did indeed apply in this jurisdiction, we would be forced to arrive at the same conclusion. Section 703(b) of RUPA simply states that a dissociated partner is not liable for partnership obligations incurred after dissociation, only if at the time the partnership enters into a given transaction with a third party, the party in question had notice of the dissociation. See RUPA, section 703(b)(2).

Although Pennsylvania case law is scarce on these issues, it is important to note that dated, but viable and therefore controlling, Pennsylvania cases arrived at similar conclusions when facing analogous problems.

In the instant factual setting the Defendant Partners presented no evidence of their having provided any notice of their dissociation from the Debtor to any of the Debtor's creditors. Moreover, no evidence was submitted to support the conclusion that any of these parties were discharged from any liability by an agreement to that effect between themselves, the partnership creditors, and/or the Debtor. Accordingly, they remain liable for all of the deficiencies at issue, even those which arose after they withdrew as partners from the Debtor.

Judgment for the bankruptcy reorganization administrator.

Buyout of Dissociated Partners

When the partnership is continued, the partnership is required to purchase the dissociated partner's partnership interest. In well-planned partnerships, the purchase price and timing of the buyout will be included in the partnership agreement. For example, the partnership agreement may require the payment of an amount equal to the current value of the partnership multiplied by the partner's proportionate share of profits or capital. The partnership agreement may specify how to value the partnership, such as average annual profits plus partners' salaries for the last three years multiplied by seven. The agreement may also permit deductions against the value of the partnership interest if the dissociated partner acted wrongly. The agreement will state when the buyout is effected; for example, it may require the payment in a lump sum 30 days after dissociation, or it may allow the partnership to pay the amount in monthly installments over the course of two years.

In the absence of a partnership agreement, the RUPA spells outs the amount and timing of the buyout of the dissociated partner's interest. The buyout price is the greater of the amount that would have been in the dissociated partner's capital account had the partnership liquidated all its assets on the dissociation date *or* the amount in the capital account had it sold the entire business as a going concern on that date. If the partner has wrongfully dissociated from the partnership, the buyout price is reduced by any damages caused by the wrongfully dissociated partner, such as the reduction in the goodwill of the business caused by the loss of a valuable partner.

When there is no partnership agreement on the issue, the RUPA requires the partnership to pay the dissociated partner in cash within 120 days after he has demanded payment in writing. The buyout amount must include interest from the date of dissociation. If the dissociated partner and the partnership cannot agree on the buyout price, the partnership must, within 120 days of the written demand for payment, pay in cash to the partner the partnership's estimate of the buyout price, plus interest. The partner may challenge the sufficiency of the buyout price tendered by the partnership by asking a court to determine the buyout price.

In the following case, *Creel v. Lilly,* the court applied the partners' buyout agreement and noted the RUPA's bias in favor of continuing the business of the partnership.

Creel v. Lilly *729 A.2d 385 (Md. Ct. App. 1999)*

In 1993, Joseph Creel began a retail business selling NASCAR racing memorabilia. His business was originally located in a section of his wife Anne's florist shop, but after about a year and a half he decided to raise capital from partners so that he could expand and move into his own space. On September 20, 1994, Mr. Creel entered into a partnership agreement—apparently prepared without the assistance of a lawyer—with Arnold Lilly and Roy Altizer to form a general partnership called "Joe's Racing." The partnership agreement covered such matters as the partnership's purpose, location, operations, and termination of the business upon a partner's death.

The three-man partnership operated a retail store in the St. Charles Towne Center Mall in Waldorf, Maryland. For their initial investment in Joe's Racing, Lilly and Altizer each paid $6,666 in capital contributions, with Mr. Creel contributing his inventory and supplies valued at $15,000. Pursuant to the partnership agreement, Lilly and Altizer each paid $3,333 to Mr. Creel "for the use and rights to the business known as Joe's Racing Collectables."

Joe's Racing had been in existence for almost nine months when Mr. Creel died on June 14, 1995. Mrs. Creel was appointed personal representative of his estate. The store's landlord agreed to shorten the lease by one month so that it expired on August 31, 1995. Rent for June, July, and August was paid by Lilly and Altizer.

Lilly and Altizer attempted to wind up the partnership, but were frustrated by Mrs. Creel's control of the partnership's bank checking account, the balance of which she refused to remit to Lilly and Altizer. The lease on the store premises occupied by the partnership expired on August 31, 1995, and on that date Lilly conducted an inventory of all merchandise in the store. Based on that inventory, an accountant computed the value of the partnership business; Mrs. Creel was invited to review the books and records and retain her own

accountant or appraiser if she questioned Lilly's or Altizer's figures. She declined to do so. After August 1995, Lilly and Altizer ceased doing business as Joe's Racing, but continued the business together under the name Good Ole Boys Racing.

Mrs. Creel sued Lilly and Altizer asserting that, instead of winding up the affairs of Joe's Racing in accordance with her demand, Lilly and Altizer had continued the partnership business under a new name, using the assets of the partnership. Lilly and Altizer, as general partners of Joe's Racing, sued Mrs. Creel seeking to recover the $18,115.93 that was in the partnership's checking account and asking the court to determine the value of Mr. Creel's partnership interest.

The trial court refused to force Lilly and Altizer to sell all the assets of the partnership at a liquidation sale and required them to pay the Estate the value of Mr. Creel's partnership interest, $21,631. The court ordered that Mrs. Creel could withdraw the $18,115.93 in the checking account and that Lilly and Altizer should pay Mrs. Creel the difference between the amount of those funds and $21,631.00. The Court of Special Appeals affirmed the judgment of the trial court. Mrs. Creel appealed to the Maryland Court of Appeals.

Chasanow, Justice The Uniform Partnership Act (UPA), which has governed partnerships in this State for the past 80 years, has been repealed since this litigation commenced. The Act that now governs Maryland partnerships is the Revised Uniform Partnership Act (RUPA), which was adopted in July 1998 with a phase-in period. Therefore, until December 31, 2002, both UPA and RUPA will coexist.

Historically, under many courts and commentators' interpretation of UPA, when a partner died and the partnership automatically dissolved because there was no consent by the estate to continue the business nor was there a written agreement allowing for continuation, the estate had the right to compel liquidation of the partnership assets. Reducing all of the partnership assets to cash through a liquidation was seen as the only way to obtain the true value of the business. However, while winding up has often traditionally been regarded as synonymous with liquidation, this "fire sale" of assets has been viewed by many courts and commentators as a harsh and destructive measure. Consequently, to avoid the drastic result of a forced liquidation, many courts have adopted judicial alternatives to this potentially harmful measure.

RUPA's underlying philosophy differs radically from UPA's. RUPA adopts the "entity" theory of partnership as opposed to the "aggregate" theory that the UPA espouses. Under the aggregate theory, a partnership is characterized by the collection of its individual members, with the result being that if one of the partners dies or withdraws, the partnership ceases to exist. On the other hand, RUPA's entity theory allows for the partnership to continue even with the departure of a member because it views the partnership as "an entity distinct from its partners." This adoption of the entity theory, which permits continuity of the partnership upon changes in partner identity, allows for several significant changes in RUPA. Of particular importance to the instant case is that under RUPA "a partnership no longer automatically dissolves due to a change in its membership, but rather the existing partnership may be continued if the remaining partners elect to buy out the dissociating partner." In contrast to UPA, RUPA's "buyout" option does not have to be expressly included in a written partnership agreement in order for it to be exercised; however, the surviving partners must still actively choose to exercise the option, as "continuation is not automatic as with a corporation." This major RUPA innovation therefore delineates two possible paths for a partnership to follow when a partner dies or withdraws: "one leads to the winding up and termination of the partnership and the other to continuation of the partnership and purchase of the departing partner's share." Critically, under RUPA the estate of the deceased partner no longer has to consent in order for the business to be continued nor does the estate have the right to compel liquidation.

In applying the law to the facts of this case, we want to clarify that while UPA is the governing act, our holding is also consistent with RUPA and its underlying policies. The legislature's recent adoption of RUPA indicates that it views with disfavor the compelled liquidation of businesses and that it has elected to follow the trend in partnership law to allow the continuation of business without disruption, in either the original or successor form, if the surviving partners choose to do so through buying out the deceased partner's share.

In this appeal, however, we would arrive at the same holding regardless of whether UPA or RUPA governs. Although our holding departs from the general UPA rule that the representative of the deceased partner's estate has a right to demand liquidation of the partnership, as we discuss in this subsection, infra, our position of "no forced sale" hardly represents a radical departure from traditional partnership law. The cases, many of which arose early in UPA's existence, illustrate the lengths other courts have gone to in order to avoid a compelled liquidation and adopt an alternative method for ascertaining the true value of a partnership.

Because a partnership is governed by any agreement between or among the partners, we must begin our analysis of the compelled liquidation issue by examining the Joe's Racing partnership agreement. We reiterate that both UPA and RUPA only apply when there is either no partnership agreement governing the partnership's affairs, the agreement is silent on a particular point, or the agreement contains provisions contrary to law. Thus, when conflicts between partners arise, courts must first look to the partnership agreement to resolve the issue. The agreement, whatever its form, is the heart of the partnership.

The pertinent paragraph and subsections of the Joe's Racing partnership agreement are as follows:

> 7. TERMINATION
>
> (a) That, at the termination of this partnership a full and accurate inventory shall be prepared, and the assets, liabilities, and income, both in gross and net, shall be ascertained: the remaining debts or profits will be distributed according to the percentages shown above in the 6(e).
>
> . . .
>
> (d) Upon the death or illness of a partner, his share will go to his estate. If his estate wishes to sell his interest, they must offer it to the remaining partners first.

Even though the partnership agreement uses the word "termination," paragraph 7(a) is really discussing the dissolution of the partnership and the attendant winding up process that ultimately led to termination. Paragraph 7(a) requires that the assets, liabilities, and income be "ascertained," but it in no way mandates that this must be accomplished by a forced sale of the partnership assets. Indeed, a liquidation or sale of assets is not mentioned anywhere in 7(a).

In this case, the winding up method outlined in 7(a) was followed exactly by the surviving partners: a full and accurate inventory was prepared on August 31, 1995; this information was given to an accountant, who ascertained the assets, liabilities, and income of the partnership; and finally, the remaining debt or profit was distributed according to the percentages listed in 6(e).

Paragraph 6(e) of the partnership agreement states "that the net profits or net losses be divided as follows:

Joseph Creel 28%

Arnold Lilly 24%

Joseph Cudmore 24%

Roy Altizer 24%"

As determined by the trial court, the interest of Joseph Cudmore, who never signed the partnership agreement, reverted to Joseph Creel, who was entitled to a 52 percent share.

Thus, when we look to the intention of the parties as reflected in 7(a) of the partnership agreement, the trial judge could conclude that the partners did not anticipate that a "fire sale" of the partnership assets would be necessary to ascertain the true value of Joe's Racing. Paragraph 7(a) details the preferred winding up procedure to be followed, to include an inventory, valuation, and distribution of debt or profit to the partners.

Moreover, paragraph 7(d), which discusses what happens to a partner's share of the business upon his death, also makes no mention of a sale or liquidation as being essential in order to determine the deceased partner's proportionate interest of the partnership. On the contrary, 7(d) appears to be a crude attempt to draft a "continuation clause" in the form of a buyout option by providing that the deceased partner's share of the partnership goes to his estate, and if the estate wishes to sell this interest it must first be offered to the remaining partners. In contrast to consenting to the continuation of the business, Mrs. Creel made it plain that she wanted the business dissolved and the affairs of the company wound up; however, this does not mean a liquidation was required. Particularly in light of Maryland's recent adoption of RUPA, paragraph 7(d) of the partnership agreement can be interpreted to mean that because Mrs. Creel did not wish to remain

in business with Lilly and Altizer, they had the option to buy out her deceased husband's interest.

Therefore, the trial judge could have concluded that Lilly and Altizer exercised this 7(d) buyout option, and subsequently began a new partnership, when they followed the winding up procedure dictated by 7(a) and presented the Creel estate with its share of Joe's Racing.

We now explore the "true value of the partnership" issue and whether liquidation is the only way to obtain it.

In accordance with the partnership agreement, Lilly and Altizer provided Mrs. Creel with an accounting, which was based on the valuation performed by the accountant they hired. Mrs. Creel contends that this accounting did not reflect the true value of Joe's Racing, and as a result the estate did not receive its proportionate share of the partnership.

We disagree as to Mrs. Creel's argument that the accountant's valuation was in error and that the trial court subsequently arrived at an incorrect distribution of Mr. Creel's interest in the partnership. Mrs. Creel maintains that the only way to ascertain the true value of her deceased husband's interest in Joe's Racing is to liquidate all of its assets but we agree with the trial court, which held: "The surviving parties under the Code and existing case law had to account for the inventory and pay to the Estate its appropriate share, but not sell off the assets in a liquidation sale." In making his findings, the trial judge looked to paragraph 7(a) of the partnership agreement. The court held:

> The partnership assets are $ 44,589.44. The Court accepts the valuation prepared by Mr. Johnson [the accountant] as the correct statement of value. The Court determines the debts to creditors to be the accounting fees due Mr. Johnson in the amount of $875.00. The debts owed to partners are: (1) $495.00 to Mrs. Creel; (2) $2,187.00 to Mr. Lilly; and (3) $900.00 to Mr. Altizer. The capital contributions are determined to be $15,000.00 to Mr. Creel and $6,666 each to Mr. Altizer and Mr. Lilly. The Estate is also due 52% of the balance of the $11,800.00 or $ 6,136.00. The total due to the Estate, therefore, is declared to be $21,631.00 ($15,000.00 + $495.00 + $6,136.00).

Finally, Mrs. Creel contends that the accountant's valuation improperly considered only the book value of the business and not its market value. "Book value" refers to the assets of the business, less its liabilities plus partner contributions or "equity." "Market value" includes the value of such intangibles as goodwill, the value of the business as an ongoing concern, and established vendor and supplier lines, among other factors. Again, we concur with the trial court's findings as to the valuation of Joe's Racing.

In making no finding of goodwill value, for example, the trial court likely considered the fact that Joe's Racing had only been operating a little over a year before the partnership was formed, and after Lilly and Altizer became partners with Mr. Creel the business was only in existence for nine months before Mr. Creel died. On these facts, it is reasonable for the trial court to conclude that a small business selling NASCAR memorabilia, which had been operating for barely two years, did not possess any goodwill value.

Our goal in this case, and in cases of a similar nature, is to prevent the disruption and loss that are attendant on a forced sale, while at the same time preserving the right of the deceased partner's estate to be paid his or her fair share of the partnership. With our holding, we believe this delicate balance has been achieved.

Judgment for Lilly and Altizer affirmed.

Partners Joining an Existing Partnership

Frequently, a partnership will admit new partners. For example, many of you hope to be admitted to a well-established consulting or accounting partnership after you graduate and have practiced for several years. The terms under which a new partner is admitted to a partnership are usually clearly stated in the partnership agreement and in the partner's admission agreement. The terms usually include the procedure for admission as well as the new partner's capital contribution, compensation including salary and

share of profits, and power to manage the business. In the absence of a partnership agreement, the RUPA sets the rules for the partner's admission and rights and duties upon admission.

Liability of New Partners

An important question is what level of liability a new partner should have for obligations of the new partnership. It makes sense for a new partner to be fully liable for all partnership obligations incurred *after* he becomes a partner, for he clearly benefits from the partnership during that time. This is the RUPA rule.

What should be his liability for partnership obligations incurred *before* he became a partner? The RUPA states that a new partner has no liability for partnership obligations incurred before he became a partner. However, many partnership agreements modify this rule by requiring a partner to assume liability for all the obligations of the business as a condition of being admitted to the partnership.

Effect of LLP Statutes If a new partner enters an LLP, however, the RUPA provides that the partner has no liability for the obligations of the LLP, whether incurred before or after his admission, unless the new partner has committed malpractice or other wrong for which he is personally responsible. LLP partnership agreements should not change this rule.

Ethical and Public Policy Concerns

1. Why should a partnership give notice of the dissolution of a partnership? Why is the partnership liable to creditors who transact ordinary business with the partnership without notice of the dissolution? Is fairness promoted by such a rule? Is economic efficiency promoted by such a rule?

2. Is it fair that a wrongfully dissociated partner may receive a buyout price from which are deducted damages caused to the partnership's goodwill? What is goodwill? How much goodwill does the business lose when a dissociated partner leaves the partnership? Is more goodwill lost when a partner dissociates wrongfully than when he dissociates nonwrongfully? Do partners expect wrongful dissociations? Do the expectations of the partners provide a rationale to deny goodwill to a wrongfully dissociated partner?

3. Do you think it is right that a partner who enters an existing partnership has no liability for obligations incurred prior to her becoming a partner? What argument can you make that the incoming partner should have unlimited liability? Shouldn't a new partner know the financial position of the partnership—including its liabilities—prior to entering the partnership? Why should preexisting creditors bear the risk rather than incoming partners?

Problems and Problem Cases

1. James Rhue and John Dawson formed a partnership to acquire and develop a shopping center. Rhue did the day-to-day management of the business, and Dawson contributed most of the capital and promised to obtain bank financing for the project. Rhue found two adjacent shopping centers, which could be purchased and renovated for $11.8 million. To help obtain bank financing, Dawson obtained an appraisal of the project value of the renovated shopping centers, $15.6 million, which would return a profit of $1.9 million to each partner. Seven days later, Dawson pressured Rhue into signing a partnership agreement with a buyout clause that allowed Dawson to buyout Rhue merely by paying back Rhue's capital contribution, which was a minimal amount. Rhue was unaware that the buyout clause was in the agreement, because previous drafts of the agreement did not contain the clause and Dawson did not give Rhue time to read the agreement before signing. Later, when Rhue and Dawson had a disagreement, Dawson locked Rhue out of the partnership's office and invoked the buyout clause. Has Dawson wrongfully dissolved the partnership?

2. Hilolani Acres Joint Venture was a partnership of 42 partners, including Benjamin Aiu. Four of the partners were designated managing partners. The partnership agreement stated that the purpose of the partnership was "dealing with" the Hilolani Acres, a housing development in Hawaii. The partnership agreement also provided for continuation of the business of the partnership in the event of a withdrawal of partners from the partnership. In 1971, three of the managing partners withdrew from the partnership; in addition, title to Hilolani Acres was transferred to Great Hawaiian Mortgage Corporation, which would manage the development of Hilolani Acres for the partnership; Great Hawaiian received 35 percent of the profits from

Hilolani Acres, the remainder going to the partnership. The nonmanaging partners claimed that these acts dissolved the partnership, and they sought to wind it up. Were they right?

3. Kenneth Flynn and Rick Haddad were partners owning a beachfront lot with a small inn on it. Title to the lot was in both partners' names. Flynn gave Haddad a deed to Flynn's interest in the property, which was effective only upon Flynn's nonpayment of a loan. When the inn was destroyed by fire, the partners began construction of a new inn, but construction was stopped because it violated local zoning laws. The effect of halting construction was also to eliminate the market of potential buyers of the property. Haddad decided to sever his relationship with Flynn and, consequently, filed the deed to the property that had earlier been executed by Flynn, although Flynn had already repaid the loan. Has the partnership been dissolved? Should the property be sold during winding up, or should Haddad receive title to it and be required to pay Flynn his share of the value of the property?

4. Brothers Eugene and Marlowe Mehl operated a family farm as a partnership. Each partner was active in the partnership until Marlowe suffered a stroke. Eleven years later, the partnership was dissolved, and Eugene by himself wound up the partnership's affairs. Was Eugene entitled to wages as compensation for winding up the partnership?

5. Junior Nestle and Eric Ellis owned Red Rocks Meat and Deli, a partnership, which they operated in a building that they leased from Wester & Company. Nestle left the partnership, and Wester received notice that Nestle was no longer a partner. Wester did not object to the change in partners or request that Nestle remain liable. A year later, Wester and Ellis modified the lease to include adjacent space and to increase the rent. Four months later, Ellis failed to pay the rent; Wester sued Nestle. Was Nestle liable to Wester?

6. Robert Weiss was a partner in the Hillman Group, which operated a hotel in Tampa, Florida. Weiss was the manager of the hotel and received 50 percent of its profits. The hotel became unprofitable because of Weiss's mismanagement. The partners were asked to make an additional capital contribution to the partnership, but Weiss failed to contribute as required by the partnership agreement. Pursuant to the partnership agreement, Weiss was expelled from the partnership. The partners continuing the partnership agreed to relieve Weiss from liability on the partnership's obligations. Did the partners' agreement relieve Weiss from liability to partnership creditors on obligations incurred prior to his explusion?

7. Longview Estates, a partnership, issued a promissory note to Conklin Farms in which Longview promised to pay $9 million plus 9 percent interest. Three years later, Doris Liebowitz was admitted as a new partner of Longview. After she entered the partnership, interest continued to accrue on the promissory note. Two years after Liebowitz was admitted to the partnership, the partnership defaulted on the note. Conklin Farms sued Liebowitz. Is Liebowitz liable for the $9 million principal amount of the note? Is she liable for the interest on the loan that accrued while she was a partner?

8. As partners, Joseph Kalichman and Joseph Klein owned and managed an apartment building in the Bronx. The partnership borrowed $189,000 from National Savings Bank of Albany. Joseph Klein died; his interest in the partnership passed to his sons, Jack and Frank, who received Joseph Klein's share of the partnership income. Jack and Frank did not, however, share in the management of the partnership business. The partnership defaulted on the loan from National Savings Bank, which sued Jack and Frank. Are Jack and Frank liable to National Savings Bank?

9. DVD *Video Case.* See "The Partnership." Art retires from Alphabet Builders, a partnership with Ben and Diedre. Zack agrees to replace Art in the partnership. Zack signs an agreement with Art assuming Art's liability for all partnership obligations. After Art leaves the partnership, Alphabet Builders falls behind in payments to its creditors, including the following:

a. The bank from which Art obtained a loan in the name of the partnership prior to his leaving the partnership. Art pocketed the bank loan and used it for his personal investment in commodities futures. Art did not disclose the loan to his partners or to Zack.

b. The creditor who leases office equipment to Alphabet Builders. The lease agreement predates the time Art left the partnership.

c. Subcontractors owed money on contracts entered into after Art left and Zack entered the partnership.

What is Art's liability on these obligations? What is Zack's liability on these obligations? What other facts do you need to help you answer these questions?

10. NFL Associates was a partnership of three partners: Herb Friedman, Strelsa Lee Langness, and the

O Street Carpet Shop, Inc. When the partnership was created, O Street Carpet contributed a contract worth $9,000, Langness contributed $14,000 in cash, and Friedman contributed his legal services, which were not valued. The partners used part of Langness's contribution to make an $8,000 payment to O Street Carpet. They used the remaining $6,000 to purchase investment property and to provide working capital for the partnership. Later, O Street Carpet contributed an additional $4,005 in capital. The partners agreed that Friedman would receive 10 percent of the profits and that each of the other two partners would receive 45 percent of the profits. They also agreed that Langness would receive payments of $116.66 each month. During the term of the partnership, Langness received monthly checks from the partnership totaling $6,300.30. Langness did not pay income tax on these monthly payments, and the partnership did not take expense deductions for the payments. When the partnership was dissolved and wound up, the partnership assets were sold for $52,001.20. Partnership creditors were owed $3,176.79. Who received what amounts from the proceeds of the sale of partnership assets?

11. Ralph Neitzert and his brother were the only partners of Jolly Jug Liquors, a retail liquor store. The partners signed a contract to lease refrigeration equipment from Colo-Tex Leasing, Inc. A month later, Ralph sold his interest in the partnership to his sister. Ralph did not notify Colo-Tex that he sold his interest to his sister. A year later, when the partnership breached the lease, Colo-Tex sued Ralph, his brother, and his sister. Is Ralph liable to Colo-Tex?

While the taxation advantages of the partnership form of business may attract investors to a partnership, the partners' unlimited liability for partnership debts scares away some investors. State legislatures and the Internal Revenue Service have cooperated to permit the creation of three business forms that offer taxation advantages similar to the partnership, yet extend limited liability to the owners of the business. These forms are the limited partnership, the limited liability limited partnership, and the limited liability company.

Limited Partnerships

The partnership form—with managerial control and unlimited liability for all partners—is not acceptable

for all business arrangements. Often, business managers want an infusion of capital into a business yet are reluctant to surrender managerial control to those contributing capital. Investors wish to contribute capital to a business and share in its profits yet limit their liability to the amount of their investment and be relieved of the obligation to manage the business.

The **limited partnership** serves these needs. The limited partnership has two classes of owners: **general partners,** who contribute capital to the business, manage it, share in its profits, and possess unlimited liability for its obligations; and **limited partners,** who contribute capital and share profits, but possess no management powers and have liability limited to their investments in the business.

In 1822, New York and Connecticut were the first states to recognize the limited partnership. Today, every state has a statute permitting the creation of limited partnerships, although Louisiana calls them partnerships *in commendam.*

The Uniform Limited Partnership Acts

The National Conference of Commissioners on Uniform State Laws—a body of lawyers, judges, and legal scholars—drafted the Uniform Limited Partnership Act (ULPA) in 1916. In 1976, the commissioners drafted the Revised Uniform Limited Partnership Act (RULPA), which more clearly and comprehensively states the law of limited partnership. The RULPA was amended in several significant ways in 1985. Every state except Louisiana has adopted the RULPA. The RULPA as amended in 1985, which has been adopted by 38 states, forms the foundation of the discussion in this chapter. The Revised Uniform Partnership Act (RUPA) applies to limited partnerships in the absence of an applicable provision in the RULPA. As shown in Figure 1, many characteristics of a limited partnership under the RULPA are similar to those of a partnership under the RUPA.

The RULPA is currently being revised to make it more nearly consistent with the RUPA. You can stay abreast of the revision process at: www.nccusl.org/.

Use of Limited Partnerships

The limited partnership form is used primarily in tax shelter ventures and activities such as real estate investment, oil and gas drilling, and professional sports. When the limited partnership elects to be taxed as a partnership, it operates as a tax shelter by allowing partners to reduce their personal federal income tax liability by deducting limited partnership losses on their individual income tax returns. General partners, however, receive a greater tax shelter advantage than do limited

Figure 1 *Principal Characteristics of Limited Partnerships*

1. A limited partnership may be *created only in accordance with a statute.*
2. A limited partnership has two types of partners: *general partners* and *limited partners.* It must have one or more of each type.
3. All partners, limited and general, *share the profits* of the business.
4. Each general partner has *unlimited liability* for the obligations of the business. Each limited partner has liability *limited to his capital contribution* to the business.
5. Each general partner has a *right to manage* the business, and she is an agent of the limited partnership. A limited partner has *no right to manage* the business or to act as its agent, but he does have the right to vote on fundamental matters. If a limited partner does manage the business, he may incur unlimited liability for partnership obligations.
6. General partners, as agents, are *fiduciaries* of the business. Limited partners are not fiduciaries.
7. A partner's interest in a limited partnership *is not freely transferable.* An assignee of a general or limited partnership interest is not a partner, but is entitled only to the assigning partner's share of capital and profits, absent a contrary agreement.
8. Withdrawal of a general partner may *dissolve* a limited partnership absent a contrary agreement of the partners. The withdrawal of a limited partner does not usually dissolve a limited partnership.
9. Usually, a limited partnership is taxed like a partnership and, therefore, *pays no federal income taxes.* Its partners report their shares of the profits and losses on their individual federal income tax returns. A limited partnership files an *information return* with the Internal Revenue Service, notifying the IRS of each partner's share of the year's profit or loss. However, a limited partnership may elect to be taxed like a corporation.

partners. Losses of the business allocated to a general partner offset his income from any other sources. Losses of the business allocated to limited partners may be used to offset only income from other *passive* investments and only to the extent limited partners are *at risk,* that is, to the extent of their capital contributions to the limited partnership. If a limited partner has sold her limited partnership interest or the limited partnership has terminated, her loss offsets any income.

Creation of Limited Partnerships

A limited partnership may be created only by complying with the applicable state statute. Yet the statutory requirements of the RULPA are minimal. A **certificate of limited partnership** must be executed and filed with the secretary of state. The certificate must be signed by all general partners. A limited partnership begins its existence at the time the certificate is filed with the office of the secretary of state or at any later time specified in the certificate. Figure 2 lists the contents of the certificate of limited partnership.

The certificate is not required to state the names of the limited partners, the partners' capital contributions, the partners' shares of profits and other distributions, or the acts that cause a dissolution of the limited partnership. Nonetheless, the partners will usually include those and other matters in the certificate or in a separate **limited partnership agreement.**

Figure 2 *Contents of Certificate of Limited Partnership*

The following must be in the certificate:

1. The name of the limited partnership, which must contain the words *limited partnership.* The name may not include the surname of a limited partner, unless it is the same as the surname of a general partner or unless the business of the limited partnership has been carried on under that name prior to the admission of the limited partner.
2. The name and address of each general partner. Each general partner must sign the certificate.
3. The latest date the limited partnership will dissolve.
4. The name and address of an agent for service of process. Designating an agent for service of process in the certificate eases a creditor's obligation to notify a limited partnership that it is being sued by the creditor.

Any *person* may be a general or limited partner. Persons include a natural person, partnership, limited partnership, trust, estate, association, or corporation. Hence, as commonly occurs, a corporation may be the sole general partner of a limited partnership.

The RULPA permits partners to make capital contributions of cash, property, services rendered, a promissory note, or a binding promise to contribute cash, property, or services.

Defective Compliance with Limited Partnership Statute

The RULPA requires at least *substantial compliance* with the previously listed requirements to create a limited partnership. If the persons attempting to create a limited partnership do not substantially comply with the RULPA, a limited partnership does not exist; therefore, a limited partner may lose her limited liability and become liable as a general partner. A lack of substantial compliance might result from failing to file a certificate of limited partnership or from filing a defective certificate. A defective certificate might, for example, misstate the name of the limited partnership.

Infrequently, a person will believe that she is a limited partner but discover later that she has been designated a general partner or that the general partners have not filed a certificate of limited partnership. In such circumstances and others, she may be liable as a general partner unless she in good faith believes she is a limited partner and upon discovering she is not a limited partner she either:

1. Causes a proper certificate of limited partnership (or an amendment thereto) to be filed with the secretary of state, or
2. Withdraws from future equity participation in the firm by filing a certificate declaring such withdrawal with the secretary of state.

However, such a person remains liable as a general partner to third parties who previously believed in good faith that the person was a general partner.

A limited partnership must keep its filed certificate current. Current filings allow creditors to discover

current facts, not merely those facts that existed when the original certificate was filed. For example, a certificate amendment must be filed when a general partner is admitted or withdraws.

In the following *Briargate Condominium* case, the court considered the liability of new investors who believed they were limited partners although a limited partnership certificate had not been filed.

Briargate Condominium Assoc. v. Carpenter *976 F.2d 868 (4th Cir. 1992)*

In 1984, Judith Carpenter invested in Briargate Homes, a business that purchased several condominium units in the Briargate Condominium complex. Although Carpenter believed that Briargate was a limited partnership and that she was a limited partner, in fact Briargate Homes was a partnership and she was a general partner. No attempt had been made to achieve actual or substantial compliance with the North Carolina limited partnership statute.

Carpenter never signed the partnership agreement or saw copies of the partnership's K-1 tax returns, which clearly identified her as a general partner. However, deductions for partnership losses that Carpenter claimed on her individual income tax returns were allowable only if she was a general partner. In early 1987, Carpenter or her attorneys had possession of documents explicitly stating that Briargate Homes was a general partnership and that her interest was one of a general partner. In June and December 1987, Carpenter received additional documents identifying Briargate Homes as a general partnership. Carpenter was an experienced businesswoman, served on the board of directors of a bank, and had ready access to legal and other professional advice.

As an owner of condominiums, the partnership was liable to the Briargate Condominium Association for assessments for maintenance, repair, and replacement of common areas in the complex. In late 1987 and early 1988, the partnership failed to pay the Association assessed fees of $85,106. The Association sued the partnership and its partners.

On February 5, 1988, Carpenter notified the other partners and the Association that she was withdrawing from any equity participation and renouncing any interest in the profits of the partnership.

At the trial, Carpenter contended that because she believed she was a limited partner, she should not be liable to the Association for the fees. The district court found that because Carpenter had not promptly withdrawn from the partnership upon discovering she was a general partner, she was liable for the full amount of the debt. Carpenter appealed.

Hamilton, Circuit Judge Carpenter's defense is grounded in the Revised Uniform Partnership Act sec. 304, which provides:

> (a) Except as provided in subsection (b), a person who makes a contribution to a business enterprise and erroneously but in good faith believes that he has become a limited partner in the enterprise is not a general partner in the enterprise and is not bound by its obligations, . . . if, on ascertaining the mistake, he:
> (1) Causes an appropriate certificate of limited partnership to be executed and filed; or
> (2) Withdraws from future equity participation in the enterprise.
> (b) A person who makes a contribution of the kind described in subsection (a) is liable as a general partner to any third party who transacts business with the enterprise (i) before the person withdraws from the enterprise, or (ii) before the person gives notice to the partnership of his withdrawal from future equity participation, but only if the third party actually believed in good faith that the person was a general partner at the time of the transaction.

First, the person must have a good faith belief that he has become a limited partner. Second, the person must on ascertaining the mistake take one of two courses of action. He may file an appropriate certificate of limited partnership. Under this option, the person may continue in the business with limited liability. In the alternative, the person may give notice and withdraw completely from future equity participation in the business. If the two elements are met, then the person is liable *only* as a limited partner, effectively cutting off all

personal liability of a general partner, unless subsection (b) applies.

Subsection (b) sets forth the *only* circumstances under which a person who meets the requirements of subsection (a) may incur liability like a general partner. Personal liability to third parties arises when the third party transacts business with the enterprise before the person files a proper certificate or withdraws. Imposition of liability is limited, however, by the requirement that at the time he transacts business, the third party actually believed in good faith that the person was a general partner at the time of the transaction. Reliance of the third party in the resources of the general partner is absolutely essential before liability may be imposed for transactions occurring before withdrawal.

Unlike its predecessor statute, RULPA sec. 304 does not specify how quickly a proper certificate or notice of withdrawal must be filed after a person ascertains he is not a limited partner. The current statute deletes the word "promptly" contained in the prior statute. The present statute also added the language in subsection (b) regarding reliance. This difference between the old and new statutes reflects a shift in emphasis away from the speed with which withdrawal is effected to an emphasis on protection of reliance by third parties. The key to liability is reliance by the third party on a person's apparent status as a general partner.

Given this interpretation of the statute, we believe the judgment of the district must be vacated, and the case remanded to the district court for additional findings. First, the district court must determine whether or not Carpenter held a good faith belief that she was a limited partner at the time she initially joined and contributed to the partnership. The district court did conclude that by at least mid-1987, Carpenter could not have held a good faith belief she was a limited partner, but the key date is the date of the contribution to the enterprise. Should the district court conclude that Carpenter did not have a good faith belief that she was a limited partner at the time of the initial contribution, then the statute affords her no relief.

Second, assuming Carpenter demonstrates a good faith belief at the time she invested, then her notice of withdrawal effectively cut off liability for any fees accrued after such notice. To hold Carpenter liable for fees accrued prior to the notice, the district court must determine if and when the Association actually believed in good faith that Carpenter was a general partner. Carpenter may be held liable only for those assessments made in reliance on the belief that the Association could look to assets of Carpenter as a general partner to satisfy the debt.

Carpenter points to statements indicating that agents of the Association apparently believed they were dealing with a limited partnership and were totally unaware of Carpenter's interest in the partnership until the time of her notice withdrawing from any equity participation and renouncing any interest in the profits of the partnership. We decline, however, to rule on the issue. It does not appear that this issue received much attention at trial. The district court should, on remand, review the record and may take additional evidence if necessary to aid its fact-finding on this issue.

Judgment for the Association vacated; remanded to the district court.

Foreign Limited Partnerships

A limited partnership is **domestic** in the state in which it is organized; it is **foreign** in every other state. The RULPA makes it clear that the laws of the domestic state apply to the internal affairs of the limited partnership, allowing a limited partner protection regardless of where business is conducted.

Nonetheless, to be privileged to do business in a foreign state, a limited partnership must *register* to do business in that state. To register, a limited partnership must file an **application for registration** with the secretary of state of the foreign state. The application must include the name and address of the limited partnership, the names and addresses of the general partners, the name and address of an agent for service of process, and the address of the office where the names, addresses, and capital contributions of the limited partners are kept. The application must be accompanied by the payment of a fee. The secretary of

state reviews the application and, if all requirements are met, issues a **certificate of registration.**

There are few penalties for failing to register as a foreign limited partnership. Although the RULPA does not impose fines for a failure to register, a few states have amended it to do so. In addition, an unregistered foreign limited partnership may not use the foreign state's courts to sue to enforce any right or contract. Once it registers, a limited partnership may use the state's courts, even when it sues to enforce a contract that was made before it registered.

Failure to register does not invalidate any contracts made in the foreign state or prevent a limited partnership from defending itself in a suit brought in the state's courts. The failure to register, by itself, does not make a limited partner liable as a general partner.

Rights and Liabilities of Partners in Limited Partnerships

The partners of a limited partnership have many rights and liabilities. Some are identical to those of partners in an ordinary partnership, but others are special to limited partnerships. Some are common to both general and limited partners, while others are not shared.

Rights and Liabilities Shared by General and Limited Partners

Capital Contributions A partner is obligated to contribute as capital the cash, property, or other services that he promised to contribute. This obligation may be enforced by the limited partnership or by any of its creditors, illustrated by the *Builders Steel* case, which follows this section.

Share of Profits and Losses Under the RULPA, profits and losses are shared on the basis of the value of each partner's capital contribution unless there is a written agreement to the contrary. For example, if 2 general partners contribute $1,000 each and 20 limited partners contribute $20,000 each, and the profit is $40,200, each general partner's share of the profits is $100 and each limited partner's share is $2,000.

Because most limited partnerships are tax shelters, partnership agreements often provide for limited partners to take all the losses of the business, up to the limit of their capital contributions.

Voting Rights The partnership agreement may require that certain transactions be approved by general partners, by limited partners, or by all the partners. The agreement may give each general partner more votes than it grants limited partners, or vice versa. The RULPA makes it clear that limited partners have no inherent right to vote on any matter as a class. They may receive such a right only by agreement of the partners.

Admission of New Partners No new partner may be admitted unless each partner has consented to the admission. New partners may be admitted by unanimous written consent of the partners or in accordance with the limited partnership agreement.

Partnership Interest Each partner in a limited partnership owns a partnership interest. It is his personal property. He may sell or assign it to others, such as his personal creditors. Or his personal creditor may obtain a charging order against it. Generally, a buyer or assignee—or a creditor with a charging order—is entitled to receive only the partner's share of distributions.

Nonetheless, when the limited partnership agreement so provides or all the partners consent, a buyer or assignee of a limited or a general partnership interest may become a limited partner. The new limited partner then assumes all the rights and liabilities of a limited partner, except for liabilities unknown to her at the time she became a partner.

A partner's assignment of his partnership interest terminates his status as a partner. The assignment does not, however, relieve him of liability for illegal distributions or for false filings with the secretary of state. When a court grants a charging order to a creditor, however, the partner remains a partner.

Right to Withdraw Partners in a limited partnership have the power to withdraw from the partnership and receive the fair value of their partnership interests. Fair value includes the going concern value of the partnership business—that is, its goodwill.

A general partner may withdraw from a limited partnership at any time; if a general partner's withdrawal breaches the limited partnership agreement, the value of her interest is reduced by the damages suffered by the limited partnership. A limited partner may withdraw after giving six months' prior notice to each general partner.

When a partner withdraws from a limited partnership, the partner may receive a return of his capital contribution. However, the return of capital may not impair the limited partnership's ability to pay its creditors. After the withdrawal of capital, the fair value of partnership assets must at least equal the limited partnership's liabilities to creditors.

Builders Steel Co. v. Hycore Inc. *877 P.2d 1168 (Okla. Ct. App. 1994)*

Max A. Heidenreich, as general partner, formed a limited partnership, Brookside Realty, Ltd. (BRL), for the purpose of purchasing and developing a commercial and retail center to be known as Brookside Center. BRL's limited partners included Gilbert Grubbs, Ray Phillips, Jack Herrold, Donald Herrold, and Ron Main. The limited partnership certificate stated the limited partners' contributions as follows: Grubbs agreed to contribute $20,000 cash, assume personal liability of $225,000, render no services, and be liable for a future assessment of $145,000; Phillips agreed to contribute $5,000 cash, assume personal liability of $127,500, render no services, and be liable for a future assessment of $72,500; the Herrolds and Main each agreed to contribute $5,000 cash, assume personal liability of $63,750, render no services, and be liable for a future assessment of $36,250.

Builders Steel was one of the suppliers that sold materials on credit to BRL for the construction of the Brookside Center. When Builders Steel was not paid in full, Heidenreich, as the general partner, sought to escape personal liability under the federal bankruptcy code, but was denied discharge on the grounds that he defrauded the creditors. Nonetheless, Builders Steel sued the limited partners of BRL. Because the limited partners had not paid all the assessments required by the limited partnership certificate, Builders Steel claimed that as a creditor of BRL, Builders Steel was entitled to require the payment of those assessments to the extent of BRL's indebtedness to Builders Steel. The trial court granted the limited partners' motion for summary judgment that they were not liable to Builders Steel. Builders Steel appealed.

Brightmire, Judge Builders Steel contends that it has a right under Oklahoma law, as a creditor of the partnership, to require payment of the assessments by the limited partners. They cite 54 O.S.1991 section 329(C):

> Unless otherwise provided in the partnership agreement, the obligation of a partner to make a contribution or return money or other property paid or distributed in violation of this act may be compromised only by consent of all the partners. Notwithstanding the compromise, a creditor of a limited partnership who extends credit or otherwise acts in reliance on that obligation after the partner signs a writing which reflects this obligation and before the amendment or cancellation thereof to reflect the compromise, may enforce the original obligation.

In this regard, Builders Steel attached to its response a copy of the certificate of limited partnership filed with the Oklahoma Secretary of State which does in fact list specific future assessments owed by each of the limited partners, and copies of correspondence from Max Heidenreich to various limited partners discussing the assessments.

The limited partners, however, argue that paragraph 5 of the first amendment to the Certificate of Limited Partnership is a disclaimer and therefore eliminates any basis for Builders Steel's reliance on the limited partners' future liability to the partnership. Paragraph 5, as amended, provides:

> Future assessments indicated above may be called only for limited purposes specifically authorized by the general partner and pursuant to the terms of the Partnership Agreement. No other creditor may rely on the above information as a representation of future assessments for the purpose of any claim.

The trouble is this argument overlooks the notice limitation of 54 O.S.1991 section 316:

> The fact that a certificate of limited partnership is on file in the Office of the Secretary of State is notice that the partnership is a limited partnership and the persons designated therein as general partners are general partners, *but it is not notice of any other fact.*

We conclude, therefore, that the trial court was not justified in basing a summary judgment on a finding that no further obligations are due to the limited partnership from the limited partners.

Judgment reversed in favor of Builders Steel.

Other Rights of General Partners

A general partner has the same right to manage and the same agency powers as a partner in an ordinary partnership. He has the express authority to act as the partners have agreed he should and the implied authority to do what is in the usual course of business. In addition, he may have apparent authority to bind the partnership to contracts when his implied authority is limited yet no notice of the limitation has been given to third parties.

A general partner has no right to compensation beyond his share of the profits, absent an agreement to the contrary. Since most limited partnerships are tax shelters that are designed to lose money during their early years of operation, most limited partnership agreements provide for the payment of salaries to general partners.

Other Liabilities of General Partners

A general partner has unlimited liability to creditors of his limited partnership. In addition, a general partner is in a position of trust when he manages the business, and therefore owes fiduciary duties to the limited partnership and the limited partners (e.g., he may not profit secretly from limited partnership transactions or compete with the limited partnership).

Other Rights of Limited Partners

Limited partners have the right to be informed about partnership affairs. The RULPA obligates the general partners to provide financial information and tax returns to the limited partners on demand. In addition, a limited partner may inspect and copy a list of the partners, information concerning contributions by partners, the certificate of limited partnership, tax returns, and partnership agreements.

A limited partner may sue to enforce a limited partnership right of action against a person who has harmed the limited partnership. This right of action is called a **derivative suit** or a derivative action because it derives from the limited partnership. Any recovery obtained by the limited partner goes to the limited partnership, since it is the entity that was harmed. In addition, when a limited partnership is sued and the general partners fail to assert a defense, a limited partner may appear on behalf of the limited partnership and assert the defense.

Other Liabilities of Limited Partners

Once a limited partner has contributed all of his promised capital contribution, generally he has no further liability for partnership losses or obligations. In return for limited liability, however, a limited partner gives up the right to participate in the management of a limited partnership. When a limited partner engages in management activities, he may lose his limited liability.

Limited Partner Engaged in Management A limited partner who participates in the control of the business may be liable to creditors of the limited partnership. Under the RULPA, a limited partner who participates in control is liable only to those persons who transact with the limited partnership reasonably believing, based on the limited partner's conduct, that the limited partner is a general partner. Thus, three elements must be met in order for a limited partner to be liable as a general partner due to his participation in management:

1. The limited partner must participate in the control of the limited partnership.
2. That participation must lead a person to believe reasonably that the limited partner is a general partner.
3. That person must transact with the limited partnership while holding that belief.

For example, Larry Link is a limited partner whom the general partners have allowed to make management decisions. A creditor of the partnership observes Link's management of the partnership, with the result that the creditor extends $10,000 credit to the limited partnership believing that Link is a general partner. Link is liable on the $10,000 debt to the creditor.

It is sometimes difficult to determine whether a limited partner's acts amount to control of the limited partnership. Control is best defined as participation in the firm's day-to-day management decisions as contrasted with isolated involvement with major decisions. For example, a limited partner of a real estate investment partnership participates in control if she regularly decides which real estate the limited partnership should purchase. A limited partner who only once vetoed a loan agreement with a bank is not participating in control.

The RULPA lists the kinds of management activities that limited partners may perform without becoming personally liable for partnership debts. Therefore, a limited partner may perform these acts and still retain his limited liability. The list of such activities appears in Figure 3.

For most well-planned limited partnerships, the general partner is a corporation. Usually, the only shareholders, directors, and officers of the corporate general partner are the individuals who manage the limited partnership. Sometimes, these individuals are limited partners as well. These individuals will not have the liability of a general partner, because the RULPA permits limited partners to be officers, directors, or shareholders of a general partner (see item 1 of Figure 3).

In the following *Alzado* case, the court held that a limited partner had not exercised sufficient control over the limited partnership to render the limited partner liable as a general partner.

Figure 3 *Activities Not Constituting Control by a Limited Partner*

1. Being an *agent,* an *employee,* or a *contractor* for the limited partnership or a general partner; or being an officer, director, or shareholder of a general partner that is a corporation.
2. Being a *consultant* or *adviser* to a general partner.
3. Acting as a *surety* for the limited partnership or guaranteeing or assuming specific obligations of the limited partnership. However, a limited partner who specifically assumes liability on a partnership obligation is liable on that obligation.
4. Pursuing a derivative suit on behalf of the limited partnership.
5. Requesting or attending a meeting of partners.
6. Proposing or voting on such partnership matters as dissolution, sale of substantially all the assets, changes in the nature of the business, admissions and removals of general or limited partners, and amendments to the partnership agreement.
7. Winding up the limited partnership as permitted by the RULPA.

Alzado v. Blinder, Robinson & Co. *752 P.2d 544 (Colo. Sup. Ct. 1988)*

In 1979, Blinder, Robinson & Co. as limited partner and Combat Promotions, Inc., as general partner created Combat Associates to promote an eight-round exhibition boxing match between Muhammad Ali and Lyle Alzado, the pro football player. Combat Promotions was owned entirely by Alzado, his accountant, and his professional agent. Alzado was also vice president of Combat Promotions. Combat Associates agreed to pay Alzado $100,000 for his participation in the match.

Few tickets were sold, and the match proved to be a financial debacle. Alzado received no payments for participating in the boxing match. Alzado sued Blinder, Robinson, claiming that because of its conduct, Blinder, Robinson must be deemed a general partner of Combat Associates and, therefore, liable to Alzado under the agreement between Alzado and the limited partnership for Alzado's participation in the match. The trial court agreed with Alzado, but Blinder, Robinson appealed to the court of appeals, which held that Blinder, Robinson had no liability to Alzado. Alzado appealed to the Supreme Court of Colorado.

Kirshbaum, Justice A limited partner may become liable to partnership creditors as a general partner if the limited partner assumes control of partnership business. RULPA Section 303 provides

that a limited partner does not participate in the control of partnership business solely by doing one or more of the following:

> (a) Being a contractor for or an agent or employee of the limited partnership or of a general partner;
> (b) Being an officer, director, or shareholder of a corporate general partner;
> (c) Consulting with and advising a general partner with respect to the business of the limited partnership . . . .

Any determination of whether a limited partner's conduct amounts to control over the business affairs of the partnership must be determined by consideration of several factors, including the purpose of the partnership, the administrative activities undertaken, the manner in which the entity actually functioned, and the nature and frequency of the limited partner's purported activities.

The record here reflects that Blinder, Robinson used its Denver office as a ticket outlet, gave two parties to promote the exhibition match, and provided a meeting room for many of Combat Associates' meetings. Meyer Blinder, president of Blinder, Robinson, personally appeared on a television talk show and gave television interviews to promote the match. Blinder, Robinson made no investment, accounting or other financial decisions for the partnership; all such fiscal decisions were made by officers or employees of Combat Promotions, the general partner. The evidence established at most that Blinder, Robinson engaged in a few promotional activities. It does not establish that it took part in the management or control of the business affairs of the partnership.

Alzado finally asserts that Blinder, Robinson fostered the appearance of being in control of Combat Associates, that such actions rendered Blinder, Robinson liable as a general partner and that this conduct allowed third parties to believe that Blinder, Robinson was in fact a general partner. The evidence does not support this argument. Certainly, as Vice President of Combat Promotions, Alzado had no misconception concerning the function and role of Blinder, Robinson as a limited partner only.

Judgment for Blinder, Robinson affirmed.

Limited Partner's Name in Firm Name Including a limited partner's *surname* in the name of a limited partnership may mislead a creditor to believe that a limited partner is a general partner. Under the RULPA, a limited partner who *knowingly* permits her name to be included in the firm name is liable to creditors who have *no actual knowledge* that she is a limited partner, unless a general partner has the same surname as that of the limited partner or the business of the limited partnership was conducted under that name prior to the limited partner's admission to the limited partnership.

Dissolution and Winding Up of a Limited Partnership

Dissolution

A limited partnership may be dissolved and its affairs wound up. There are five causes of dissolution:

1. Expiration of the term specified in the certificate of limited partnership. For example, the certificate may provide that a limited partnership has a 20-year term.

2. Upon the happening of events specified in writing in the partnership agreement. For example, a written partnership agreement may provide for dissolution of a limited partnership after it has accomplished its objective of building a shopping mall.

3. By the written consent of all the partners.

4. Upon the withdrawal of a *general* partner, with few exceptions. Such a withdrawal includes retirement, death, bankruptcy, assignment of a general partnership interest, removal by the other partners, and adjudicated insanity. For a general partner that is not a natural person, such as a partnership or a corporation, its own dissolution is a withdrawal causing a dissolution of the limited partnership. The RULPA specifically permits a limited partnership to avoid dissolution after the withdrawal of a general partner if a written partnership agreement permits the business to be conducted by the remaining general partners or if all of the partners agree in writing to continue the business.

5. By court order, when it is *not reasonably practicable* to carry on the business in conformity with the limited partnership agreement. Judicial dissolution has frequently been granted when general partners continually violate their fiduciary duties, such as by secretly profiting from self-dealing with the limited partnership.

The RULPA requires a limited partnership to file a **certificate of cancellation** upon its dissolution and the commencement of winding up. The certificate of cancellation cancels the certificate of limited partnership. However, the failure to file a certificate of cancellation does not prevent a dissolution.

Winding Up

Winding up is the orderly liquidation of the limited partnership's assets and payment of the proceeds to creditors and other claimants. Dissolution requires the winding up of a limited partnership's affairs. The only way to prevent winding up is to prevent dissolution, such as by an agreement of the partners that an event shall not cause a dissolution.

General partners who have *not wrongfully dissolved* a limited partnership may perform the winding up. Wrongful dissolution includes a dissolution in violation of the limited partnership agreement or wrongful conduct that leads to a judicial dissolution, such as a general partner's breach of his fiduciary duties. Limited partners may wind up if there are no surviving general partners. In addition, any partner may *ask a court* to perform a winding up.

The winding up partner has express authority to act as the partners have agreed he should act. More importantly, he has the implied authority to do those acts that are reasonably necessary to liquidate the assets. He possesses the apparent authority to do all of the acts that he was able to do before dissolution, unless appropriate notice is given to persons who dealt with the partnership or knew of its existence.

Distribution of Assets After the assets have been sold during winding up, the proceeds of the sale of assets are distributed to those persons having claims against the limited partnership. Figure 4 states the RULPA rule for distribution of limited partnership assets.

Figure 4 *Order of Distribution of Limited Partnership Assets during Winding Up*

1. To firm *creditors,* including partners who are creditors, except for unpaid distributions to partners.
2. To partners for *unpaid distributions,* including the return of capital to previously withdrawn partners.
3. To partners to the extent of their *capital contributions.*
4. To partners in the proportion in which they share distributions. Hence, the partners share the proceeds that remain after all other claimants have been paid.

Continuation of the Business Usually, the assets of a limited partnership are sold individually during winding up. However, all the assets of the business of the limited partnership could be sold to someone who desires to continue the business. For example, some of the partners may wish to continue the business despite dissolution. The continuing partners are required to pay the outgoing partners the fair value of their partnership interests, including goodwill.

Events Not Causing Dissolution The death, bankruptcy, insanity, or withdrawal of a *limited* partner does not result in dissolution unless the certificate of limited partnership compels dissolution. Also, the *addition* of a partner—general or limited—does not cause a dissolution.

Limited Liability Limited Partnerships

The newest form of business organization is the **limited liability limited partnership (LLLP).** The LLLP is identical to a limited partnership, except that all its partners, both general partners and limited partners, have no liability for the obligations of the limited partnership. However, a partner who has committed a tort or other wrong against another person in the course of acting for the limited partnership is personally liable for that tort or wrong.

An LLLP is created like a limited partnership, but it must make an additional filing with the secretary of state to qualify as an LLLP. In addition, its name must

include the term "limited liability limited partnership," "LLLP," or "L.L.L.P."

In all other respects, an LLLP is identical to a limited partnership. It is managed, taxed, and dissolved the same way as a limited partnership. An LLLP's general and limited partners have the same rights as in a limited partnership.

Limited Liability Companies

The limited liability company (LLC) is the product of attempts by state legislators to create a new business organization that combines the nontax advantages of the corporation and the favorable tax status of the partnership. Wyoming, in 1977, passed the first LLC statute. Every state and the District of Columbia have adopted an LLC statute. The National Commissioners on Uniform State Laws has adopted the **Uniform Limited Liability Company Act of 1996 (ULLCA).** The ULLCA provides default rules that govern an LLC in the absence of a contrary agreement of its owners. The ULLCA treats LLCs and their owners similar to the way the RUPA treats partnerships and their partners.

Tax Treatment of LLCs

An LLC may elect to be taxed like a partnership or a corporation for federal income tax purposes. LLC members usually elect for the LLC to be recognized as a partnership for federal income tax purposes. As a result, the LLC pays no federal income tax. Instead, all income and losses of the LLC are reported by the LLC's owners on their individual income tax returns. Typically, the LLC is a tax shelter for wealthy investors, allowing such investors to reduce their taxable income by deducting LLC losses on their federal income tax returns to the extent they are *at risk,* that is, their capital contributions to the LLC. Moreover, passive investors in an LLC, like limited partners in a limited partnership, may use their shares of LLC losses to offset only income from other *passive* investments.

Formation of LLCs

To create an LLC, one or more persons must file **articles of organization** with the secretary of state. The articles must include the name of the LLC, its duration, and the name and address of its registered agent. The name of the LLC must include the words "limited liability company," "limited company," or an abbreviation such as "LLC" or "L.L.C.," indicating that the liability of its owners is limited.

Although not required, an LLC will typically have an **operating agreement,** which is an agreement of the owners as to how the LLC will be operated.

Many states also require an LLC to file an annual report with the secretary of state. The annual report may include financial information such as the capital accounts of the owners and the LLC's balance sheet.

Owners of LLCs

Owners of LLCs are called **members.** An individual, partnership, corporation, and even another LLC may be a member of an LLC.

A member has no personal liability for LLC obligations except for her own wrongs. A member must, however, make capital contributions to the LLC as she has agreed.

LLC statutes allow LLCs to restrict the members' ability to sell their interests in the LLC. An LLC interest is the personal property of the member and may be transferred as stated in the operating agreement; however, the transferee has no right to become a member or participate in management unless the other members consent to the transfer. The transferee who does not become a member is entitled only to the transferring member's share of profits. A member who sells his LCC interest has terminated his interest in the LLC.

A member is entitled to withdraw from the LLC and receive either the value of his interest or a return of his capital contribution. Such a distribution of assets to a member may be executed only if the LLC's assets exceed its liabilities after the distribution.

LLC as an Entity

The LLC is an entity separate from its owners. It may sue and be sued in its own name. It can buy, hold, and sell property. It can make contracts and incur liabilities.

Because the LLC is an entity liable for its own obligations, the members have no individual liability on LLC obligations. However, a court will pierce the veil between the LLC and its members and impose personal liability on the members when the LLC is used to defraud creditors. For example, suppose the members provide very little capital to an LLC that is engaging in a highly risky business. As a result, the business is unsuccessful and unable to pay its creditors. A court will usually require the members to pay the obligations of the business.

In the following *Swing-N-Slide* case, the court refused to allow corporate officers to use an LLC to evade a fiduciary duty that would have otherwise existed.

Barbieri v. Swing-N-Slide Corp. *1997 Del. Ch. Lexis 9 (Del. Ch. Ct. 1997)*

Richard C. Mueller, president, chief executive officer, and a director of Swing-N-Slide Corp. (SNS), and several officers of SNS were the sole members of a limited liability company, Greengrass Management, LLC. Mueller and the officers formed Greengrass Management solely to act as one of two general partners of a partnership, Greengrass Holdings (Holdings). Holdings's only purpose was to make a public tender offer to purchase SNS's common shares from SNS shareholders. The terms of the tender offer were negotiated by and agreed to by SNS and Holdings: Holdings would pay $6.50 per share in cash for up to 60 percent of SNS's shares tendered by shareholders; Holdings also had the right to buy SNS shares from SNS at $4.80 per share if the management of SNS changed.

Robert Barbieri, a shareholder of SNS, sued SNS, Mueller, the officers who were members of Greengrass Management, and Greengrass Management, LLC, on the grounds that the parties had breached a fiduciary duty to SNS's shareholders because the director and officers had a conflict of interest during the tender offer negotiations. Greengrass Management moved to dismiss the action on the grounds that it owed no fiduciary duty to SNS shareholders because it was not an officer, director, or majority shareholder of SNS.

Steele, Vice Chancellor The underlying theory advanced in support of Barbieri's claim against Greengrass Management is succinctly stated as follows: Because defendant Mueller, a Swing-N-Slide director and president and chief executive officer, and other Swing-N-Slide officers are the owners of Greengrass Management, Greengrass Management owes fiduciary duties to the Swing-N-Slide shareholders. I address only the narrow issue whether Greengrass Management owes fiduciary obligations to SNS and its shareholders.

I start with the basic proposition that directors and officers of a corporation owe fiduciary duties to the corporation and its shareholders. In this instance, it is alleged that Mueller, a director and officer, and the senior management officers of SNS organized Greengrass Management. Those persons forming Greengrass Management therefore owed fiduciary duties to SNS. Unfortunately, none of the cases cited by either party answer the necessary question: Must their fiduciary obligations be imputed to the entity they formed? Surprisingly, I do not find any case within this jurisdiction addressing this issue.

I conclude, however, that the fiduciary duties of the SNS director and officers must be imputed to the limited liability company they formed. Accepting Barbieri's allegation as true, the complaints support the following: A single director and the management officers of SNS together formed a limited liability company. It is not suggested that there are other persons or entities involved in the LLC. Nor is it suggested that Greengrass Management was formed for or has carried out any other objective than one related to the SNS tender offer. I therefore fairly conclude that persons in positions owing fiduciary responsibility to SNS and its shareholders together formed a separate entity for purposes solely related to that company. Neither Mueller nor the others would escape their fiduciary obligations to SNS had they not formed Greengrass Management. To allow them to use this State's laws allowing the formation of the limited liability company as a vehicle to avoid those very duties would be unconscionable. Therefore, where, as here, the allegations of the complaint support the conclusion that an entity was formed and controlled by fiduciaries for purposes solely related to the entity to which those persons owed fiduciary duties, the entity may be considered to take on the same fiduciary obligations.

Judgment for Barbieri.

Management of LLCs

Members of an LLC share management power in proportion to their capital contributions to the LLC. If there is no member vote restricting the actual authority of a member, however, members have considerable implied and apparent authority to bind the LLC on transactions in the ordinary course of business.

The members may agree to entrust management to managers selected by the members. Managers of an LLC are comparable to directors of a corporation.

The members or managers who manage the LLC are fiduciaries of the LLC. They must manage the LLC in the best interest of the LLC and not prefer their individual interests over the interests of the LLC.

Dissociation of Members and Dissolution of LLCs

Under the ULLCA, members of an LLC dissociate from an LLC in ways similar to those by which a partner dissociates from a partnership under the RUPA. Therefore, a member's dissociation, such as by death or withdrawal, does not ordinarily dissolve the LLC or cause it to wind up its business. Usually, the LLC will continue, and the LLC is required to purchase the interest of a dissociated member. As in a partnership, members of an LLC will usually have an operating agreement that modifies the ULLCA's default rules for dissociation, winding up, and purchase of a member's interest, in order to meet the specific needs of the members.

In the following *Five Star Concrete* case, the court examined the rights of a dissociated member of an LLC.

Five Star Concrete, L.L.C. v. Klink, Inc. *693 N.E.2d 583 (Ind. Ct. App. 1998)*

On June 14, 1994, Klink, Inc., and four other corporations engaged in supplying ready-mix concrete formed Five Star, L.L.C., a limited liability company, in order to furnish concrete to large construction projects. Klink contributed $38,500.00, 12.5 percent of the initial total capitalization, and was issued 12.5 ownership units.

On October 13, 1995, Klink withdrew its membership in Five Star. The remaining Five Star members decided to purchase Klink's ownership units and to continue the business. On October 23, 1995, Five Star members agreed that Klink would receive $61,047.22 for the value of its "units." Indiana's LLC law permitted an LLC member to withdraw from a limited liability company at any time by giving thirty days written notice to the other members. None of the members, however, objected to Klink's failure to give adequate notice.

After Five Star's fiscal year ended December 31, 1995, Klink was allocated $31,889.02 of income, representing its share of the LLC's profits for the approximate ten-month period of 1995 when Klink was a member. The allocation did not result in a monetary distribution to Klink. Instead, the allocation was made only for the purpose of determining Klink's tax liability. After receiving notification of the allocation, Klink filed a complaint against Five Star claiming that it was entitled to a distribution of cash in the sum of $31,889.02.

Klink moved for summary judgment on its claim, and Five Star responded with its own motion for summary judgment, asserting that Klink had already been paid for its entire interest. Following a hearing, the trial court granted Klink's motion, finding that Klink had a legal right to receive a distribution of $31,889.02. The court also denied Five Star's motion for summary judgment. Five Star appealed both rulings to the Indiana Court of Appeals.

Staton, Justice When reviewing an entry of summary judgment, we stand in the shoes of the trial court. We do not weigh evidence, but will consider the facts in the light most favorable to the nonmoving party. We must separately consider each motion to determine whether there is a genuine issue of material fact and whether the moving party is entitled to judgment as a matter of law.

Five Star first contends that the trial court improperly entered summary judgment in favor of Klink on the basis that Klink had the legal right to an actual distribution of $31,889.02, the amount allocated for taxation purposes. At the outset, we recognize that LLCs offer the same limited liability as the corporate form of business organization, but they are treated by federal and state taxing bodies in the same way as partnerships, that is, income "passes through" the entity and is taxed to the member, an owner of an interest in the company.

Here, there is no dispute that the allocation, Klink's portion of Five Star's income, was proper. Five Star was being taxed as a "pass-through" entity, and the allocation was required by tax law as well as by the Operating Agreement. However, Klink insists that when there is an allocation to a dissociating member there is a corresponding obligation to make a cash distribution of income equal to the allocation. We do not agree.

Nowhere does the Act provide that allocation of income to members for income tax purposes creates an automatic legal right to receive a distribution in the amount of that income, even when a member is withdrawing from the LLC. Indeed, there are times that such a distribution would be unlawful.

A distribution may not be made if after giving effect to the distribution:

> (1) the limited liability company would not be able to pay its debts as the debts become due in the usual course of business; or (2) the limited liability company's total assets would be less than the sum of its total liabilities plus, unless the operating agreement permits otherwise, the amount that would be needed if the affairs of the limited liability company were to be wound up at the time of the distribution to satisfy any preferential rights that are superior to the rights of members receiving the distribution. IND. CODE section 23–18–5–6 (1993).

The Operating Agreement is also silent regarding the timing and amount of distributions; thus, under the Act, these decisions are to be made by the majority of the members. The evidence construed in favor of Five Star shows that Five Star made a distribution to all members in July of 1995; Klink's share was approximately $12,500.00. However, neither this distribution nor any other was made based upon the amount of income allocated to a member. Further, since that date no distributions were made to any members.

Conduit treatment under income tax law means that allocations occur regardless of the magnitude or timing of distributions. We conclude that the allocation of profits for tax reporting purposes did not provide Klink with a legal right under either the Act or the Operating Agreement to receive a distribution in the same amount. Summary judgment in favor of Klink was improvidently granted.

It does not follow, however, that Klink's interest in Five Star's profits for the ten-month period of 1995 should be ignored. Here, the member's share of Five Star's profits and losses is part of the total economic interest transferred in the buy-sell agreement. However, in this case, we cannot value that interest as a matter of law. This brings us to Five Star's next argument.

The minutes of the October 23, 1995, meeting memorializing the Five Star members' buy-sell agreement states that Klink would receive $61,047.22 for the value of its "units." Five Star contends that it is entitled to summary judgment because, when Klink sold its "units" to Five Star for $61,047.22, Klink divested itself of its entire economic interest, including its right to profits. Klink counters that the use of the term "units" proves that it sold less than all its interests for that amount.

Pursuant to the Operating Agreement, "unit" refers to "an interest in the Company representing a contribution to capital." This supports Klink's argument that it sold less than all of its economic rights in Five Star when it accepted the $61,047.22. However, as Five Star points out, under the same Operating Agreement, the members' interests are represented by the units held by each member. Thus, each unit generally entitled the members to one vote and to a proportionate share of the LLC's net income, gains, losses, deductions and credits. "Units," as used in the minutes, could reasonably denote either all or only part of Klink's economic interests in Five Star.

The minutes signed by all Five Star members purport to show agreement of the parties; however, mutual assent is necessary to the formation of every contract. The designated evidence supports an inference that the parties entered into the contract with materially different meanings attached to the word "unit." The trial court recognized the factual dispute and properly denied Five Star's motion for summary judgment.

Finally, Five Star maintains that the valuation method chosen by the parties demonstrates that Klink actually received the fair market value of its entire interest. Here, the parties determined fair market value by examining Five Star's September 30, 1995, balance sheet. Liabilities of $104,495.42 were subtracted from assets valued at $592,873.16, leaving $488,377.74. That amount was then multiplied by 12.5 percent, Klink's percentage of ownership, resulting in the agreed sum of $61,047.22. Five Star claims that, because it used an accrual basis of accounting, its September 30 balance sheets reflected the value of all accounts as of that date. It then maintains that, by using this valuation method, Klink received the amount upon which its complaint is based.

Valuing the interest of a member is a "complex task," more of a business matter than a legal one. There is no best method for valuation and much

depends on the nature of the business. The "book value" formula, used in this case, has the advantage of varying the value of the LLC as the balance sheet of the LLC changes; however, some assets are valued at their depreciated value rather than their actual fair market value. We do not agree with Five Star that resolution of this matter is appropriately decided as a matter of law. Five Star is not entitled to summary judgment on this ground.

In conclusion, Five Star has not shown that it was entitled to summary judgment, and we affirm the trial court's denial of its motion. Klink had no legal right to an actual distribution of $31,889.02, allotted for tax purposes. Thus, we reverse the entry of summary judgment in Klink's favor and remand for proceedings consistent with this opinion. Upon remand, the buy out provision in the Operating Agreement may become relevant. It provides that, if Five Star elects to purchase the interest of a "Former Member" and no pre-determined purchase price of a "unit" had been established within a two-year period:

> the fair market value shall be determined by a certified public accountant selected by the selling Member and a certified public accountant selected by the Company or purchasing Member, although all Members may select the same accountant. If the two accountants cannot agree as to the fair market value, the value shall be determined by a majority vote of said accountants and a third certified public accountant selected by said accountants.

Affirmed in part and reversed in part; remanded to the trial court.

Ethical and Public Policy Concerns

1. Is it fair that a limited partner has limited liability for the obligations of a limited partnership? Is it fair that a general partner has unlimited liability while a limited partner has limited liability?

2. Limited partners have a limited right to deduct limited partnership losses on their individual federal income tax returns, while general partners are not restricted. Is this fair? Are the general partners' investments or activities more socially desirable than the limited partners' investments or activities?

3. By having a corporation as the sole general partner of a limited partnership, no human will have unlimited liability for the obligations of the limited partnership. Is this fair? Does this produce a socially desirable result?

4. Why would anyone want to form a limited partnership when an LLLP or LLC has the same tax benefits as the limited partnership and less liability for its members than the limited partnership, yet permits complete flexibility in determining who will manage the business? Have the states gone too far in serving the interests of businesses by allowing the creation of LLLPs and LLCs? Are businesses the only ones that benefit from the creation of LLLPs and LLCs?

Problems and Problem Cases

1. Brookwood Fund was a limited partnership formed to trade investment securities. The original certificate of limited partnership filed in April 1987 listed Kenneth Stein as the "General Partner" and Barbara Stein as the "Original Limited Partner." Between May and August 1987, additional limited partners were added to Brookwood. The new limited partners did not participate in the management of Brookwood. However, an amended certificate of limited partnership reflecting the new limited partners was not filed. What should the new limited partners do to protect themselves from having the liability of general partners?

2. John Fulton and Victoria Rinaldi signed a contract to purchase waterfront real estate in the name of a limited partnership that had not yet been formed. The purchase was funded in part by a mortgage loan. The limited partnership agreement obligated each of the seven limited partners to pay $10,400 if the limited partnership could not meet its mortgage payments. Later the limited partnership agreement increased each limited partner's obligation to $18,000. At this time, a certificate of limited partnership, which included the revised limited partnership agreement, was filed with the secretary of state. The limited partners were not notified of the liability change, how-

ever. Subsequently, the limited partnership defaulted on the mortgage. The limited partnership's creditors sued the limited partners, who claimed no liability on the grounds that the limited partnership never existed. Were the limited partners correct?

3. Virginia Partners, Ltd., a limited partnership organized in Florida, was in the business of drilling oil wells. When Virginia Partners injected acid into an oil well in Kentucky, a bystander, Robert Day, was injured by acid that sprayed on him from a ruptured hose. Virginia Partners had failed to register as a foreign limited partnership in Kentucky. Are the limited partners of Virginia Partners liable to Day for his injuries?

4. Palmetto Federal Savings & Loan Association made real estate loans to Beacon Reef Limited Partnership. When Beacon Reef defaulted on the loans, Palmetto Federal sued Beacon Reef. Beacon Reef's general partners decided not to raise the defense that Palmetto Federal charged a usurious rate on the loan. May Howard Wulsin, the only limited partner, on behalf of Beacon Reef, assert the defense of usury against Palmetto Federal?

5. Horne-Long Associates was a limited partnership with one general partner and 18 limited partners. Horne-Long breached a contract with Northampton Valley Construction. The limited partnership agreement stated that the general partner could require the limited partners to make additional contributions to meet the obligations of the limited partnership. Was Northampton correct when it argued that this provision made the limited partners liable as general partners on the grounds that the general partner should have required the limited partners to contribute?

6. Seven Hills Associates, a limited partnership, owned and operated an office building. Raphael Silver was the only general partner. The building obtained its heat and utilities from equipment located in an adjacent building owned by a corporation controlled by Silver. One limited partner believed that the limited partnership's expenses were higher because of the utility arrangement. Is the limited partner permitted to bring an action in the name of Seven Hills Associates against Silver?

7. Carol Humphreys was an employee at Medical Towers, Ltd. (MTL), a limited partnership. Diva Corporation was the sole general and managing partner of MTL. David Lawson was the president and sole shareholder of Diva Corporation. Effectively, Lawson was the general manager of MTL, controlling all aspects of the business; in addition, Lawson was a limited partner of MTL. Humphreys believed that Lawson was the general partner of MTL. Lawson never told her that he was not the general partner of MTL. Humphreys was initially employed as Lawson's assistant. After her promotion to business manager, Humphreys was continually sexually harassed by MTL employees Roger Bailey and Drew Crispin. Humphreys sued Lawson. Is Lawson liable for the sexual harassment of Bailey and Crispin?

8. The Securities Group 1980, a limited partnership, was created to provide tax deferral advantages for its limited partners. To offset a potential adverse tax consequence when the tax laws changed, the general partners arranged a sale of the limited partnership interests to a new partnership owned by the Securities Group's general partners. The limited partners received cash and promissory notes worth 105 percent of the net asset value of Securities Group. At that time, Securities Group was indebted to various creditors. The new partnership subsequently became insolvent, with the result that the Securities Group creditors were unpaid. Are the Securities Group creditors able to collect from the former limited partners of Securities Group?

9. OKC Corporation adopted a plan to become a limited partnership. Under the plan, the shareholders became limited partners in OKC Limited Partnership. They did not receive actual possession of their limited partnership interests. Instead, the limited partnership interests were deposited in MBank of Dallas, which then issued depositary receipts to the limited partners. The depositary receipts were traded on the Pacific Stock Exchange. Some of the limited partners sold their depositary receipts to other investors. In 1987, a committee of receipt holders attempted to replace the general partners, an action within the powers of the limited partners under the limited partnership agreement. The general partners opposed the action and claimed that only the original limited partners who were still receipt holders could vote to replace the general partners. Were the general partners correct?

10. Excel Associates was a New York limited partnership. Lipkin was Excel's only individual general partner. Tribute Music Inc. was the only other general

partner. Chalpin, the only limited partner, was also the president and sole shareholder and director of Tribute Music. Chalpin hired Bernabe Gonzales to be the superintendent of Excel's apartment building in Long Beach, Long Island, New York. Later, Chalpin hired Gonzales to renovate the building. Chalpin signed all Excel's checks paying Gonzales. Chalpin did not name Tribute Music on the checks or indicate that he was signing in a representative capacity. Chalpin terminated Gonzales's employment with Excel. Gonzales sued Excel for breach of an employment contract. Gonzales also claimed that Chalpin was liable on the breached contract. On what grounds did Gonzales base his argument for Chalpin's liability?

VII. Piercing the Corporate Veil
   A. Nonprofit Corporations

The modern corporation has facilitated the rapid economic development of the last 150 years by permitting businesses to attain economies of scale. Businesses organized as corporations can attain such economies because they have a greater capacity to raise capital than do other business forms. This capital-raising advantage is ensured by corporation law, which allows persons to invest their money in a corporation and become owners without imposing unlimited liability or management responsibilities on themselves. Many people are willing to invest their savings in a large, risky business if they have limited liability and no management responsibilities. Far fewer are willing to invest in a partnership or other business form in which owners have unlimited liability and management duties.

History of Corporations

Although modern corporation law emerged only in the last 150 years, ancestors of the modern corporation existed in the times of Hammurabi, ancient Greece, and the Roman Empire. As early as 1248 in France, privileges of incorporation were given to mercantile ventures to encourage investment for the benefit of society. In England, the corporate form was used extensively before the 16th century.

The famous British trading companies—such as the Massachusetts Bay Company—were the forerunners of the modern corporation. The British government gave these companies monopolies in trade and granted them powers to govern in the areas they colonized.

Figure 1 *Principal Characteristics of Corporations*

1. *Creation.* A corporation may be created only by *permission of a government.*
2. *Legal status.* A corporation is a legal person and a legal entity independent of its owners (*shareholders*) and its managers (officers and the *board of directors*). Its life is unaffected by the retirement or death of its shareholders, officers, and directors. A corporation is a person under the Constitution of the United States.
3. *Powers.* A corporation may *acquire, hold, and convey property* in its own name. A corporation may *sue and be sued* in its own name. Harm to a corporation is not harm to the shareholders; therefore, with few exceptions, a shareholder may not sue to enforce a claim of the corporation.
4. *Management.* Shareholders elect a board of directors, which manages the corporation. The board of directors may delegate management duties to officers. A shareholder has *no right or duty to manage* the business of a corporation, unless he is elected to the board of directors or is appointed an officer. The directors and officers need not be shareholders.
5. *Owners' liability.* The shareholders have *limited liability.* With few exceptions, they are not liable for the debts of a corporation after they have paid their promised capital contributions to the corporation.
6. *Transferability of owner's interest.* Generally, the ownership interest in a corporation is *freely transferable.* A shareholder may sell her shares to whomever she wants whenever she wants. The purchaser becomes a shareholder with the same rights that the seller had.
7. *Taxation.* A corporation pays *federal income taxes* on its income. Shareholders have personal income from the corporation only when the corporation makes a distribution of its income to them. For example, a shareholder would have personal income from the corporation when the corporation pays him a dividend. This creates a *double-taxation* possibility: The corporation pays income tax on its profits, and when the corporation distributes the after-tax profits as dividends, the shareholders pay tax on the dividends.

They were permitted to operate as corporations because of the benefits they would confer on the British empire, such as the development of natural resources. Although these trading companies were among the few corporations of the time whose owners were granted limited liability, they sought corporate status primarily because the government granted them monopolies and governmental powers.

American Corporation Law

Beginning in 1776, corporation law in the United States evolved independently of English corporation law. Early American corporations received **special charters** from state legislatures. These charters were granted one at a time by special action of the legislatures; few special charters were granted.

In the late 18th century, general incorporation statutes emerged in the United States. Initially, these statutes permitted incorporation only for limited purposes beneficial to the public, such as operating toll bridges and water systems. Incorporation was still viewed as a privilege, and many restrictions were placed on corporations: incorporation was permitted for only short periods of time; maximum limits on capitalization were low; and ownership of real and personal property was often restricted.

During the last 150 years, such restrictive provisions have disappeared in most states. Today, modern incorporation statutes are mostly enabling, granting the persons who control a corporation great flexibility in establishing, financing, and operating it.

See Figure 1 for a statement of the characteristics of corporations.

Classifications of Corporations

Corporations may be divided into three classes: (1) corporations **for profit,** (2) corporations **not for profit,** and (3) **government-owned** corporations. State corporation statutes establish procedures for the incorporation of each of these classes and for their operation. In addition, a large body of common law applies to all corporations.

Most business corporations are **for-profit corporations.** For-profit corporations issue stock to their shareholders, who invest in the corporation with the expectation that they will earn a profit on their investment. That profit may take the form of dividends paid by the corporation or increased market value of their shares.

Nearly all for-profit corporations are incorporated under the **general incorporation law** of a state. All of the states require professionals who wish to incorporate, such as physicians, dentists, lawyers, and accountants, to incorporate under **professional corporation acts.** In addition, for-profit corporations that especially affect the public interest, such as banks, insurance companies, and savings and loan associations, are usually required to incorporate under special statutes.

For-profit corporations range from huge international organizations such as General Motors Corporation to small, one-owner businesses. GM is an example of a **publicly held corporation** because its shares are generally available to public investors. The publicly held corporation tends to be managed by professional managers who own small percentages of the corporation. Nearly all the shareholders of the typical publicly held corporation are merely investors who are not concerned in the management of the corporation.

Corporations with very few shareholders whose shares are not available to the general public are called **close corporations.** In the typical close corporation, the controlling shareholders are the only managers of the business.

Usually, close corporations and publicly held corporations are subject to the same rules under state corporation law. Many states, however, allow close corporations greater latitude in the operation of their internal affairs than is granted to public corporations. For example, the shareholders of a close corporation may be permitted to dispense with the board of directors and manage the close corporation as if it were a partnership.

A Subchapter S corporation, or **S Corporation,** is a special type of close corporation. It is treated nearly like a partnership for federal tax purposes. Its shareholders report the earnings or losses of the business on their individual federal income tax returns. This means that an S Corporation's profits are taxed only once—at the shareholder level, eliminating the double-taxation penalty of incorporation. All shareholders must consent to an S corporation election. The Internal Revenue Code requires an S corporation to have only one class of shares and 75 or fewer shareholders. Shareholders may be only individuals or trusts.

Not-for-profit corporations do not issue stock and do not expect to make a profit. Instead, they provide services to their members under a plan that eliminates any profit motive. These corporations have **members** rather than shareholders, and none of the surplus revenue from their operations may be distributed to their members. Since they generally pay no income tax, nonprofit corporations can reinvest a larger share of their incomes in the business than can for-profit corporations. Examples of nonprofit corporations are charities, churches, fraternal organizations, community arts councils, cooperative grocery stores, and cooperative farmers' feed and supplies stores.

Some corporations are owned by governments and perform governmental and business functions. A municipality (city) is one type of **government-owned corporation.** Other types are created to furnish more specific services—for example, school corporations and water companies. Others—such as the Tennessee Valley Authority and the Federal Deposit Insurance Corporation—operate much like for-profit corporations except that at least some of their directors are appointed by governmental officials, and some or all of their financing frequently comes from government. The TVA and the FDIC are chartered by Congress, but government-owned corporations may also be authorized by states. Government-operated businesses seek corporate status to free themselves from governmental operating procedures, which are more cumbersome than business operating procedures.

Regulation of For-Profit Corporations

To become a corporation, a business must **incorporate** by complying with an incorporation statute. Incorporation is a fairly simple process usually requiring little more than paying a fee and filing a document with a designated government official—usually the secretary of state of the state of incorporation. Incorporation of for-profit businesses has been entrusted primarily to the governments of the 50 states.

State Incorporation Statutes

State incorporation statutes set out the basic rules regarding the relationship between the corporation, its

shareholders, and its managers. For example, an incorporation statute sets the requirements for a business to incorporate, the procedures for shareholders' election of directors, and the duties directors and officers owe to the corporation. Although a corporation may do business in several states, usually the relationship between the corporation, its shareholders, and its managers is regulated only by the state of incorporation.

The American Bar Association's Committee on Corporate Laws has prepared a *model* statute for adoption by state legislatures. The purpose of the model statute is to improve the rationality of corporation law. It is called the **Model Business Corporation Act (MBCA).**

The revised MBCA is the basis of corporation law in most states. Your study of statutory corporation law in this book concentrates on the revised MBCA. Delaware and several other major commercial and industrial states such as New York and California do not follow the MBCA. Therefore, selected provisions of the Delaware and other acts will be addressed.

Several states have special provisions or statutes that are applicable only to close corporations. The ABA's Committee on Corporate Laws has adopted the *Statutory Close Corporation Supplement to the Model Business Corporation Act.* The Supplement is designed to provide a rational, statutory solution to the special problems facing close corporations.

State Common Law of Corporations

Although nearly all of corporation law is statutory law, including the courts' interpretation of the statutes, there is a substantial body of common law of corporations (judge-made law). Most of this common law deals with creditor and shareholder rights. For example, the law of piercing the corporate veil, which you will study later in this chapter, is common law protecting creditors of corporations.

Regulation of Nonprofit Corporations

Nonprofit corporations are regulated primarily by the states. Nonprofit corporations may be created only by complying with a nonprofit incorporation statute. Incorporation under state law requires delivering articles of incorporation to the secretary of state. The existence of a nonprofit corporation begins when the secretary of state files the articles. Most states have statutes based on the revised **Model Nonprofit Corporation Act (MNCA).** Because of constitutional protection of freedom of religion, many states have special statutes regulating nonprofit religious organizations.

The law applied to nonprofit corporations is substantially similar to for-profit corporation law. At various points in the corporations chapters of this book, you will study the law of nonprofit corporations and examine how this form of business and its laws differ from the for-profit corporation and its laws. The Model Nonprofit Corporation Act will be the basis of your study of nonprofit corporation law.

Regulation of Foreign and Alien Corporations

A corporation may be incorporated in one state yet do business in many other states in which it is not incorporated. The corporation's contacts with other persons in those states may permit the states to regulate the corporation's transactions with their citizens, to subject the corporation to suits in their courts, or to tax the corporation. The circumstances under which states may impose their laws on a business incorporated in another state is determined by the law of foreign corporations.

A corporation is a **domestic corporation** in the state that has granted its charter; it is a **foreign corporation** in all the other states in which it does business. For example, a corporation organized in Delaware and doing business in Florida is domestic in Delaware and foreign in Florida. Note that a corporation domiciled in one country is an **alien corporation** in other countries in which it does business. Many of the rules that apply to foreign corporations apply as well to alien corporations.

Generally, a state may impose its laws on a foreign corporation if such imposition does not violate the Constitution of the United States, notably the Due Process Clause of the Fourteenth Amendment and the Commerce Clause.

Due Process Clause

The Due Process Clause requires that a foreign corporation have sufficient contacts with a state before a state may exercise jurisdiction over the corporation. The leading case in this area is the *International Shoe* case.[1] In that case, the Supreme Court ruled that a foreign corporation must have "certain minimum contacts" with the state such that asserting jurisdiction over the corporation does not offend "traditional notions of fair play and substantial justice." The Supreme Court justified its holding with a **benefit theory:** When a foreign corporation avails itself of the protection of a state's laws, it should suffer any reasonable burden that the state imposes as a consequence of such benefit. In other words, a foreign corporation should be required to pay for the benefits that it receives from the state.

Commerce Clause

Under the commerce clause, the power to regulate interstate commerce is given to the federal government. The states have no power to exclude or to discriminate against foreign corporations that are engaged solely in *interstate* commerce. Nevertheless, a state may require a foreign corporation doing interstate business in the state to comply with its laws if the application of these laws does not unduly burden interstate commerce. When a foreign corporation enters interstate commerce to do *intrastate* business in a state, the state may regulate the corporation's activities, provided again that the regulation does not unduly burden interstate commerce.

A state statute does not unduly burden interstate commerce if (1) the statute serves a legitimate state interest, (2) the state has chosen the least burdensome means of promoting that interest, and (3) that legitimate state interest outweighs the statute's burden on interstate commerce. Because conducting intrastate business increases a corporation's contact with a state, it is easier to prove that the state has a legitimate interest and that there is no undue burden on interstate commerce when the corporation is conducting intrastate business.

Doing Business To aid their determination of whether a state may constitutionally impose its laws on a foreign corporation, courts have traditionally used the concept of **doing business.** Courts have generally held that a foreign corporation is subject to the laws of a state when it is doing business in the state. The activities that constitute doing business differ, however, depending on the purpose of the determination. There are four such purposes: (1) to determine whether a corporation is subject to a lawsuit in a state's courts, (2) to determine whether the corporation's activities are subject to taxation, (3) to determine whether the corporation must qualify to carry on its activities in the state, and (4) to determine whether the state may regulate the internal affairs of the corporation.

Subjecting Foreign Corporations to Suit

The Supreme Court of the United States has held that a foreign corporation may be brought into a state's court in connection with its activities within the state, provided that the state does not violate the corporation's due process rights under the Fourteenth Amendment of the Constitution and its rights under the commerce clause.

The *International Shoe* minimum contacts test must be met. Subjecting the corporation to suit cannot offend "traditional notions of fair play and substantial justice." A court must weigh the corporation's contacts within the state against the inconvenience to the corporation of requiring it to defend a suit within the state. The burden on the corporation must be reasonable in relation to the benefit that it receives from conducting activities in the state.

Under the minimum contacts test, even an isolated event may be sufficient to confer jurisdiction on a state's courts. For example, driving a truck from Arizona through New Mexico toward a final destination in Florida provides sufficient contacts with New Mexico to permit a suit in New Mexico's courts against the foreign corporation for its driver's negligently causing an accident within New Mexico.

Most of the states have passed **long-arm statutes** to permit their courts to exercise jurisdiction under the decision of the *International Shoe* case. These statutes frequently specify several kinds of corporate activities that make foreign corporations subject to suit within the state, such as the commission of a tort, the making of a contract, or the ownership of property. Most of the long-arm statutes grant jurisdiction over causes of action growing out of any transaction within the state.

The following *Sculptchair* case applied the Florida long-arm statute to an alien corporation.

[1] *International Shoe Co. v. State of Washington,* 326 U.S. 310 (1945).

Sculptchair, Inc. v. Century Arts, Ltd. *94 F.3d 623 (11th Cir. 1996)*

Sculptchair, Inc., a Florida corporation, owned a patent for a type of chair cover that it marketed under the Sculptchair trademark. In February 1991, Sculptchair signed a contract with Century Arts, Ltd., a Canadian corporation, granting to Century Arts an exclusive license to manufacture, use, sell, and lease the chair covers under the Sculptchair name in Canada. In return, Century Arts paid Sculptchair a monthly fee. Canadian residents Mary Bien and Phyllis Rich were the only officers, directors, and shareholders of Century Arts.

Almost immediately, Century Arts experienced financial difficulties and ceased making payments to Sculptchair in early 1992. In April 1992, Sculptchair terminated the contract with Century Arts; shortly thereafter, Century Arts was dissolved. Mary Bien and Phyllis Rich then formed a new corporation, Chair Decor, Inc., a Canadian corporation that also marketed chair covers. Mary Bien and Phyllis Rich were the only officers, directors, and shareholders of Chair Decor. In her spare time, Phyllis Rich's daughter, Deena Rich, who attended a Florida college, sold Chair Decor's products in Florida for a commission.

In May 1994, Sculptchair believed that Chair Decor was infringing Sculptchair's chair cover patent and trademark. Sculptchair sued Chair Decor in a trial court in Florida for patent and trademark infringement and breach of contract. Chair Decor asked the district court to dismiss the suit on the grounds that the court in Florida had no jurisdiction over Chair Decor, a Canadian corporation. The district court agreed with Chair Decor and dismissed the case. Sculptchair appealed.

Gibson, Circuit Judge We must determine whether the Florida long-arm statute provides a basis for personal jurisdiction over Chair Decor. Florida's long-arm statute, Fla. Stat. ch. 48.193, provides in relevant part:

> (1) Any person, whether or not a citizen or resident of this state, who personally or through an agent does any of the acts enumerated in this subsection thereby submits himself . . . to the jurisdiction of the courts of this state for any cause of action arising from the doing of any of the following acts:
>
> (a) Operating, conducting, engaging in, or carrying on a business or business venture in this state or having an office or agency in this state.
>
> (g) Breaching a contract in this state by failing to perform acts required by the contract to be performed in this state.

To establish that a defendant was carrying on a business or business venture in the state, either itself or through an agent, the activities of the defendant must be considered collectively and show a general course of business activity in the State for pecuniary benefit. Deena Rich admittedly operated as an independent contractor and sporadic sales representative for Chair Decor in her spare time while attending school in Florida. While most of her sales were based strictly on word of mouth, Deena Rich admitted that she had circulated a price list to 10 or so individuals describing Chair Decor's product line and bearing the number of a local telephone answering machine. She also traveled to four or five Florida businesses and gave them product presentations. When a potential customer would leave a message, she would forward the order to Chair Decor in Canada where it would be filled. Deena Rich maintained no regular office, maintained no inventory, and received no regular salary, her salary consisting solely of commissions. Deena Rich's total sales efforts amounted to three to five transactions grossing an estimated $3,000. Although her sales efforts were sporadic at best and the revenue generated therefrom was relatively insignificant, we are left with the inescapable conclusion that her marketing efforts, viewed collectively, qualify as a general course of business activity in Florida for pecuniary benefit.

Because there is no evidence that Chair Decor ever directly manufactured, sold, leased, or solicited orders for chair covers or any other products in Florida, the question whether Chair Decor was ever carrying on a business or business activity in Florida necessarily hinges on whether Deena Rich's activities may be attributed to Chair Decor as its agent in Florida. The facts in this case indicate that Deena Rich was acting as an independent contractor as opposed to an agent. There is no evidence whatsoever that Chair Decor exercised any type of

meaningful control over the means employed by Deena Rich to market the product line. In fact, she set her own hours and chose her own marketing methods, relying principally on word of mouth. Deena Rich herself characterized her own position as that of an independent contractor, and we agree. As a result, we conclude that Chair Decor was not carrying on a business or business venture in Florida through the acts of Deena Rich.

Sculptchair next seeks to invoke section 48.193(1)(g), which provides for personal jurisdiction over persons breaching a contract within Florida by failing to perform acts required by the contract to be performed in Florida. Specifically, it claims that Chair Decor breached Paragraph Eleven of the exclusive licensing agreement by marketing similar chair covers.

This argument overlooks the salient fact that Chair Decor was not a party to that particular contract. As the very first clause of the agreement states, "THIS AGREEMENT is made between SCULPTCHAIR, INC. and CENTURY ARTS, LIMITED." Nonetheless, Sculptchair contends that Chair Decor should be bound by the terms of Century Arts' contract as its corporate successor in interest under Florida's "mere continuation of business doctrine." We agree. The concept of continuation of business arises where the successor corporation is merely a continuation or reincarnation of the predecessor corporation under a different name. A "mere continuation of business" will be found where one corporation is absorbed by another, as evidenced by an identity of assets, location, management, personnel, and stockholders. There is an unmistakable identity of officers, directors, shareholders, and location in this particular case. Once Century Arts had been dissolved, its officers/directors/shareholders formed Chair Decor to market the same type of product out of the same address but without the contractual obligations of its predecessor corporation. Chair Decor assumed Century Arts' modus operandi and apparently remained in contact with its former clients. Because these facts indicate that Chair Decor is nothing more than Century Arts operating under a new name, we hold Chair Decor to the continuing contractual obligations undertaken by its corporate predecessor in interest. As such, we conclude that Sculptchair has met its burden of proving personal jurisdiction over Chair Decor.

Judgment reversed in favor of Sculptchair.

Taxation

A state may tax a foreign corporation if such taxation does not violate the due process clause or the commerce clause. Generally, a state's imposition of a tax must serve a legitimate state interest and be reasonable in relation to a foreign corporation's contacts with the state. For example, a North Carolina corporation's property located in Pennsylvania is subject to property tax in Pennsylvania. The corporation enjoys Pennsylvania's protection of private property. It may be required to pay its share of the cost of such protection.

Greater contacts are needed to subject a corporation to state income and sales taxation in a state than are needed to subject it to property taxation. A state tax does not violate the commerce clause when the tax (1) is applied to an activity with a substantial connection with the taxing state, (2) is fairly apportioned, (3) does not discriminate against interstate commerce, and (4) is fairly related to the services provided by the state.

For example, New Jersey has been permitted to tax a portion of the entire net income of a corporation for the privilege of doing business, employing or owning capital or property, or maintaining an office in New Jersey when the portion of entire net income taxed is determined by an average of three ratios: in-state property to total property, in-state to total receipts, and in-state to total wages, salaries, and other employee compensation.[2] However, Pennsylvania could not assess a flat tax on the operation of all trucks on Pennsylvania highways. The flat tax imposed a disproportionate burden on interstate trucks as compared with intrastate trucks because interstate trucks traveled fewer miles per year on Pennsylvania highways.[3] A state may tax an interstate sale by a foreign corporation to an in-state consumer if the seller has a physical presence in the state, such as a retail outlet.[4]

[2] *Amerada Hess Corp. v. Director of Taxation,* 490 U.S. 66 (1989).
[3] *American Trucking Assns., Inc. v. Scheiner,* 483 U.S. 266 (1987).
[4] *Quill Corp. v. North Dakota,* 504 U.S. 298 (1992).

State taxation of interstate Internet transactions has become a potential source for state revenue. Recently, however, the federal Congress placed a three-year moratorium on new Internet taxes.

Qualifying to Do Business

A state may require that foreign corporations **qualify** to conduct **intrastate** business in the state. The level of doing business that constitutes intrastate business for qualification purposes has been difficult to define. To help clarify the confusion in this area, the MBCA lists several activities that do *not* require qualification. For example, soliciting—by mail or through employees—orders that require acceptance outside the state is not doing intrastate business requiring qualification. Selling through independent contractors or owning real or personal property does not require qualification.

Also classified as not doing business for qualification purposes is conducting an **isolated transaction** that is completed within 30 days and is not one in the course of repeated transactions of a like nature. This isolated transaction safe harbor allows a tree grower to bring Christmas trees into a state in order to sell them to one retailer. However, a Christmas tree retailer who comes into a state for 29 days before Christmas and sells to consumers from a street corner is required to qualify. Although both merchants have consummated their transactions within 30 days, the grower has engaged in only one transaction, but the retailer has engaged in a series of transactions.

Maintaining an office to conduct intrastate business, selling personal property not in interstate commerce, entering into contracts relating to local business or sales, or owning or using real estate for general corporate purposes does constitute doing intrastate business. Passive ownership of real estate for investment, however, is not doing intrastate business.

Maintaining a stock of goods within a state from which to fill orders, even if the orders are taken or accepted outside the state, is doing intrastate business requiring qualification. Performing service activities such as machinery repair and construction work may be doing intrastate business.

Qualification Requirements To qualify to do intrastate business in a state, a foreign corporation must apply for a **certificate of authority** from the secretary of state, pay an application fee, maintain a registered office and a registered agent in the state, file an annual report with the secretary of state, and pay an annual fee.

Doing intrastate business without qualifying usually subjects a foreign corporation to a fine, in some states as much as $10,000. The MBCA disables the corporation to use the state's courts to bring a lawsuit until it obtains a certificate of authority. The corporation may defend itself in the state's courts, however, even if it has no certificate of authority.

In the following *Gosch* case, the Texas court of appeals allowed a Delaware corporation to sue in a Texas court even though the corporation had not obtained a certificate of authority.

Gosch v. B & D Shrimp, Inc. *830 S.W.2d 652 (Tex. Ct. App. 1992)*

B & D Shrimp, Inc., a Delaware corporation, entered a contract in Texas with Donald Gosch and Jesse Bach. The contract required Gosch and Bach to purchase a commercial shrimp boat from Shrimp, Inc. Gosch and Bach paid $5,000 down and received immediate possession of the boat; Gosch and Bach would get marketable title to the shrimp boat after transferring a cabin cruiser to Shrimp, Inc., and paying 15 percent of the cash proceeds generated from the shrimp boat's daily shrimp catches for the next calendar year. When Gosch and Bach defaulted on its obligation, Shrimp, Inc., sued Gosch. After the trial court found Gosch liable to Shrimp, Inc., Gosch asked the trial court to set aside its judgment on the grounds that Shrimp, Inc., had not obtained a certificate of authority to do business from the Texas secretary of state and, therefore, was not allowed to use Texas's courts to enforce the contract. The trial court denied Gosch's request, and Gosch appealed.

O'Connor, Justice The Texas Business Corporation Act prohibits a foreign corporation from maintaining any action in this State until it has obtained a certificate of authority to do business. Shrimp, Inc., argues that it was not necessary for it to obtain a certificate. A corporation is not considered to be transacting business in Texas if it conducts an isolated transaction that is completed within 30 days

and the transaction is not in the course of a number of repeated transactions that are similar. Shrimp, Inc., contends that it fell within this exception to the statute requiring a certificate of authority. We disagree. Here, it is implicit in the agreement that the transaction could not be completed within 30 days. The transfer of title would not occur until, in addition to two other conditions, 15 percent of the cash proceeds generated from the daily shrimp catches for the *next calendar year* were paid.

Shrimp, Inc., also contends it was within the trial court's discretion to disregard Gosch's plea. We agree. Here, Gosch did not raise the issue of Shrimp, Inc.'s authority until 20 days after the judgment was signed, in a motion to set aside the judgment. By waiting until after the trial, Gosch waived the issue of Shrimp, Inc.'s capacity to prosecute the suit. Even if Gosch had not waived the issue, at the hearing on the motion to set aside the judgment, Shrimp, Inc., filed a certificate of authority. The trial court did not abuse its discretion in overruling the motion to set aside the judgment.

Judgment for B & D Shrimp, Inc., affirmed.

Regulation of a Corporation's Internal Affairs

Regulation of the internal affairs of a corporation—that is, the relation between the corporation and its directors, officers, and shareholders—is usually exercised only by the state of incorporation. Nonetheless, a foreign corporation may conduct most of its business in a state other than the one in which it is incorporated. Such a corporation is called a **pseudo-foreign corporation** in the state in which it conducts most of its business.

A few states subject pseudo-foreign corporations to extensive regulation of their internal affairs, regulation similar to that imposed on their domestic corporations. California's statute requires corporations that have more than 50 percent of their business and ownership in California to elect directors by cumulative voting, to hold annual directors' elections, and to comply with California's dividend payment restrictions. Foreign corporations raise many constitutional objections to the California statute, including violations of the Commerce Clause and the Due Process Clause.

Regulation of Foreign Nonprofit Corporations

The Model Nonprofit Corporation Act and other laws impose the same requirements and penalties on nonprofit corporations as are imposed on for-profit corporations. For example, the MNCA requires a foreign nonprofit corporation to qualify to do intrastate business in a state. The failure to qualify prevents the foreign nonprofit corporation from using the state's courts to bring lawsuits and subjects it to fines for each day it transacts intrastate business without a certificate of authority.

Piercing the Corporate Veil

A corporation is a legal entity separate from its shareholders. Corporation law erects an imaginary wall between a corporation and its shareholders that protects shareholders from liability for a corporation's actions. Once shareholders have made their promised capital contributions to the corporation, they have no further financial liability. This means that contracts of a corporation are not contracts of its shareholders, and debts of a corporation are not debts of its shareholders.

Nonetheless, in order *to promote justice and to prevent inequity,* courts will sometimes ignore the separateness of a corporation and its shareholders by **piercing the corporate veil.** The primary consequence of piercing the corporate veil is that a corporation's shareholders may lose their limited liability.

Two requirements must exist for a court to pierce the corporate veil: (1) **domination** of a corporation by its shareholders; and (2) use of that domination for an **improper purpose.**

As an entity separate from its shareholders, a corporation should act for itself, not for its shareholders. If the shareholders cause the corporation to act to its detriment and to the personal benefit of shareholders, *domination*—the first requirement for piercing the corporate veil—is proved. For example, shareholders' directing a corporation to pay a shareholder's personal

expenses is domination. Domination is also proved if the shareholders cause the corporation to fail to observe corporate formalities (such as failing to hold shareholder and director meetings or to maintain separate accounting records). Some courts say that shareholder domination makes the corporation the *alter ego* (other self) of the shareholders. Other courts say that domination makes the corporation an *instrumentality* of the shareholders.

To prove domination, it is not sufficient, or even necessary, to show that there is only one shareholder. Many one-shareholder corporations will never have their veils pierced. However, nearly all corporations whose veils are pierced are close corporations, since domination is more easily accomplished in a close corporation than in a publicly held one.

In addition to domination, there must be an *improper use* of the corporation. The improper use may be any of three types: defrauding creditors, circumventing a statute, or evading an existing obligation.

Shareholders must organize a corporation with sufficient capital to meet the initial capital needs of the business. Inadequate capitalization, called **thin capitalization,** is proved when capitalization is very small in relation to the nature of the business of the corporation and the risks the business necessarily entails.

Thin capitalization defrauds creditors of a corporation. An example of thin capitalization is forming a business with a high debt-to-equity ratio, such as a $10-million-asset business with only $1,000 of equity capital, with the shareholders sometimes contributing the remainder of the needed capital as secured creditors. By doing so, the shareholders elevate a portion of their bankruptcy repayment priority to a level above that of general creditors, thereby reducing the shareholders' risk. The high debt-to-equity ratio harms nonshareholder-creditors by failing to provide an equity cushion sufficient to protect their claims. In such a situation, either the shareholders will be liable for the corporation's debts or the shareholders' loans to the corporation will be subordinated to the claims of other creditors. As a result, the nonshareholder-creditors are repaid all of their claims prior to the shareholder-creditors receiving payment from the corporation.

Transfers of corporate assets to shareholders for less than fair market value (called **looting**) also defraud creditors. For example, shareholder-managers loot a corporation by paying themselves excessively high salaries or by having the corporation pay their personal credit card bills. When such payments leave insufficient assets in the corporation to pay creditors' claims, a court will hold the shareholders liable to the creditors.

Frequently, the same shareholders may own two corporations that transact with each other. The shareholders may cause one corporation to loot the other. When such looting occurs between corporations of common ownership, courts pierce the veils of these corporations. This makes each corporation liable to the creditors of the other corporation. For example, a shareholder-manager operates two corporations from the same office. Corporation 1 transfers inventory to Corporation 2, but it receives less than fair market value for the inventory. Also, both corporations employ the same workers, but all of the wages are paid by Corporation 1. In such a situation, the veils of the corporations will be pierced, allowing the creditors of Corporation 1 to satisfy their claims against the assets of Corporation 2.

Looting may occur also when one corporation (called the **parent corporation**) owns at least a majority of the shares of another corporation (called the **subsidiary corporation**). Ordinarily, the parent is liable for its own obligations and the subsidiary is liable for its own obligations, but the parent is not liable for its subsidiary's debts and the subsidiary is not liable for the parent's debts. Nonetheless, because a parent corporation is able to elect the directors of its subsidiary and therefore can control the management of the subsidiary, the parent may cause its subsidiary to transact with the parent in a manner that benefits the parent but harms the subsidiary.

For example, a parent corporation may direct its subsidiary to sell its assets to the parent for less than fair value. Because the subsidiary has given more assets to the parent than it has received from the parent, creditors of the subsidiary have been defrauded. Consequently, a court will pierce the veil between the parent and its subsidiary and hold the parent liable to the creditors of the subsidiary.

Affiliated corporations must not commingle their assets. Each corporation must have its own books of accounts. Transactions between affiliated corporations must be recorded on the books of both corporations, and such transactions must be executed at fair value.

A corporation should not engage in a course of conduct that is prohibited by a statute. For example, a city ordinance prohibits retail businesses from being open on consecutive Sundays. To avoid the statute, a retail corporation forms a subsidiary owned entirely by the

retail corporation; on alternate weeks, it leases its building and inventory to the subsidiary. A court will pierce the veil because the purpose of creating the subsidiary corporation is to circumvent the statutory prohibition. Consequently, both the parent and the subsidiary will be liable for violating the statute.

Sometimes, a corporation will attempt to escape liability on a contract by reincorporating or by forming a subsidiary corporation. The new corporation will claim that it is not bound by the contract, even though it is doing the same business as was done by the old corporation. In such a situation, courts pierce the corporate veil and hold the new corporation liable on the contract.

For example, to avoid an onerous labor union contract, a corporation creates a wholly owned subsidiary and sells its entire business to the subsidiary. The subsidiary will claim that it is not a party to the labor contract and may hire nonunion labor. A court will pierce the veil between the two corporations because the subsidiary was created only to avoid the union contract.

Nonprofit Corporations

Like a for-profit corporation, a nonprofit corporation is an entity separate and distinct from its members. A member is not personally liable for a nonprofit corporation's acts or liabilities merely by being a member. However, a court may pierce the veil of a nonprofit corporation if it is used to defraud creditors, circumvent a statute, or evade an existing obligation, the same grounds on which a for-profit corporation's veil may be pierced.

For a summary of the law of piercing the corporate veil, see Figure 2.

In the *Bingham* case, which follows, the court considered a full range of reasons to pierce a corporation's veil.

Bingham v. Goldberg, Marchesano, Kohlman, Inc. *637 A.2d 81 (D.C. App 1994)*

In the summer 1983, Joan Bingham, Mortimer Zuckerman, and Anne Peretz formed a corporation, PFP, Inc., to explore the feasibility of publishing a weekly newspaper in Washington, D.C. The newspaper would be named The Washington Weekly. *Initially, they contributed $50,000 to the corporation. At the organization meeting, Bingham, Zuckerman, and Peretz were named initial directors, Bingham was elected president, and James Glassman was appointed vice president, treasurer, secretary, and acting publisher. In December 1983, after it was determined that such a newspaper would be feasible, further contributions were made to PFP. Bingham contributed $427,500, Anne Peretz invested $125,500, the Peretz Family Investments put in $100,000, Zuckerman contributed $100,000, and Martin Peretz added $7,000.*

In late 1983, PFP hired Goldberg, Marchesano, Kohlman, Inc. (GMK), to assist with advertising and marketing The Washington Weekly. *Glassman signed the contract for PFP. The contract provided for continuing the relationship on a month-to-month basis.*

In April 1984, in order to raise additional capital for the newspaper, a limited partnership, Washington Weekly Limited (WWL), was formed. The sole general partner of WWL was PFP. Bingham signed the limited partnership agreement as president of the general partner, PFP. When WWL was formed, PFP contributed capital of $1,022,727 to the limited partnership, including all ownership of the newspaper The Washington Weekly. *None of PFP's liabilities were transferred to WWL. PFP retained cash assets of $79,000. PFP also expected to receive management fees from WWL in exchange for its managing WWL as the general partner.*

GMK provided advertising and marketing services to The Washington Weekly *until September 1984. PFP made payments of more than $77,000 to GMK after the limited partnership was formed, but was delinquent in other payments to GMK. In late August, GMK contacted PFP about the late payments. In response, James Rice,* The Washington Weekly*'s general manager, sent a letter to GMK terminating the monthly retainer agreement with GMK. The letter included Bingham's signature and listed her as publisher. In late September, Bingham wrote to Goldberg confirming the termination of the monthly retainer agreement and concluding, "We really appreciated all your good advice." Between February and September 1984, PFP paid GMK over $79,000, but still owed over $46,000.*

Subsequently, The Washington Weekly *was unprofitable and the decision was made to cease its publication. The assets of PFP were insufficient to pay the remaining $46,000 debt owed to GMK. GMK then sued Bingham, claiming that she was personally liable to GMK. The trial court found Bingham liable to GMK, and Bingham appealed.*

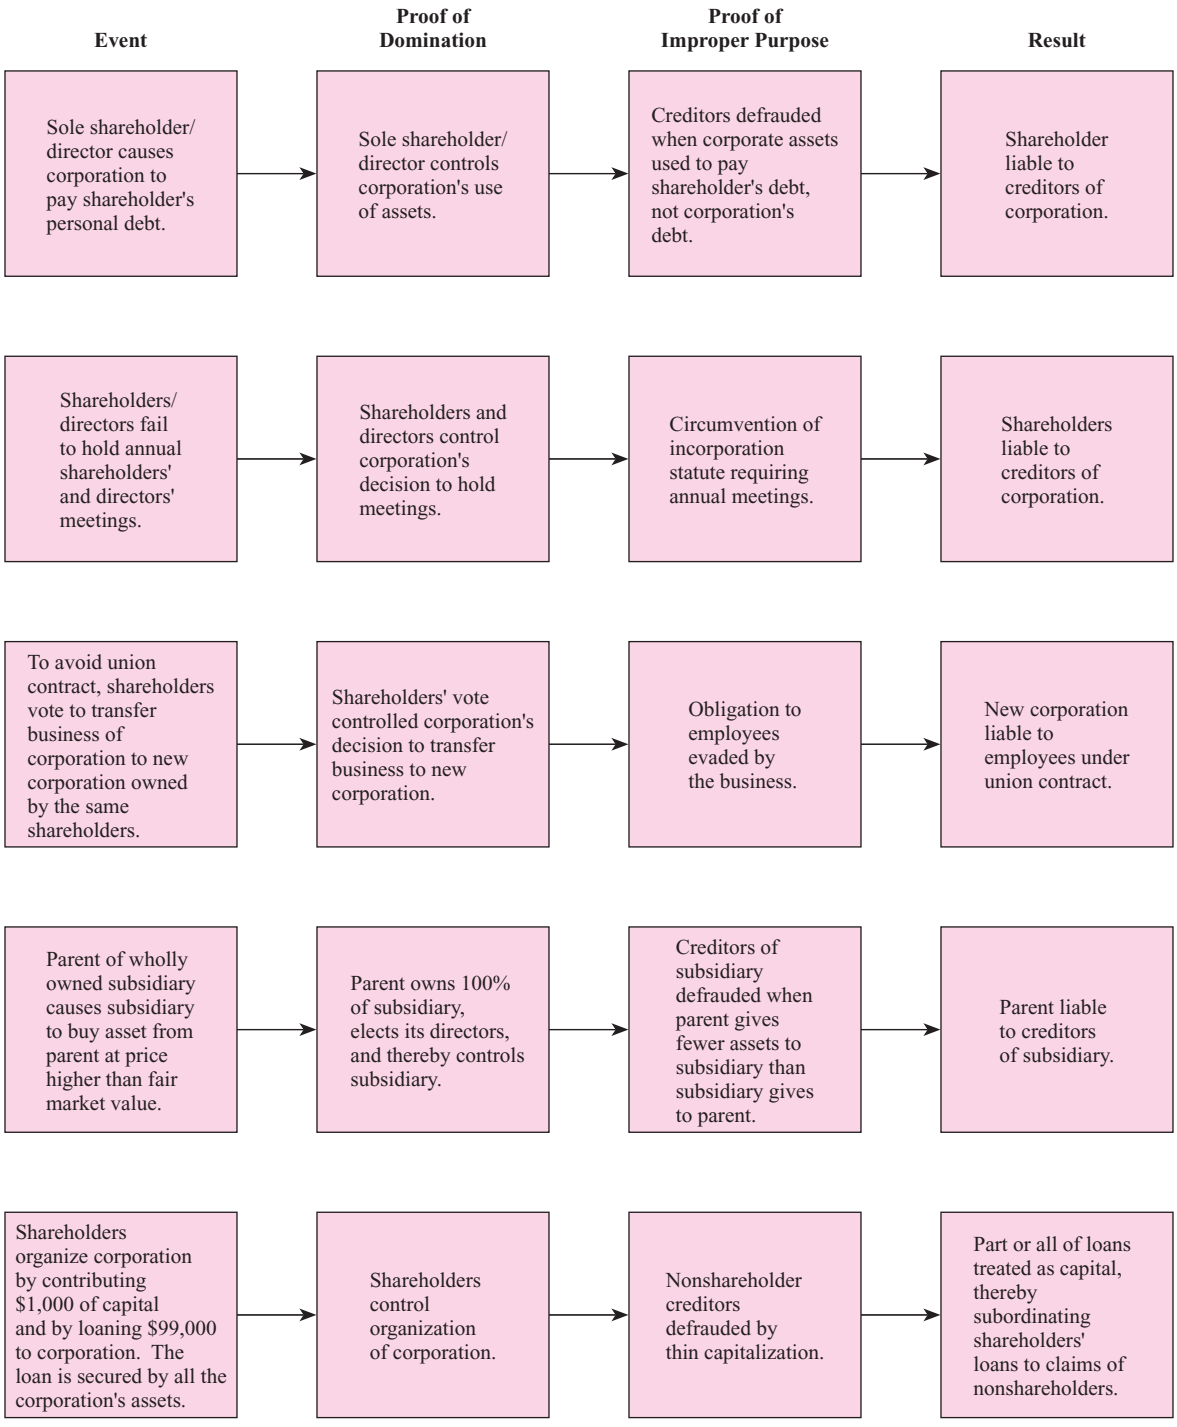
Wagner, Associate Judge GMK contends that Bingham used the corporation as an alter-ego and so dominated its affairs that she should be subject to personal liability for the debt owed by PFP to GMK. The general rule has been that the corporate entity will be respected and that its obligations will not be imposed upon a particular individual unless a party seeking to disregard the corporate entity has proved that there is (1) unity of ownership and interest, and (2) use of the corporate form to perpetrate fraud or wrong. We have recognized a modification to this rule which rejects the requirement that fraud must be shown. Instead, considerations of justice and equity may justify piercing the corporate veil. Whether there is sufficient showing of a unity of ownership and interest will depend upon such factors as (1) whether corporate formalities have been disregarded, (2) whether corporate funds and assets have been extensively intermingled with personal assets, (3) inadequate initial capitalization, and (4) fraudulent use of the corporation to protect personal business from the claims of creditors.

When the evidence is viewed against these standards, there is no basis to conclude that there was a unity of ownership and interest. The record contains numerous documents evidencing the corporation's observance of corporate formalities. Among them are copies of the articles, the D.C. Certificate of Incorporation, the Resolution for Bank Accounts, minutes of meetings of the Board of Directors and of shareholders, consent to postponement of meeting, corporate by-laws, and stock certificates. Final decisionmaking authority rested with the Board of Directors of the corporation, and it was the Board's decision to terminate publication of the paper.

There is also no evidence that Bingham's personal funds were commingled with the corporation's assets or that the corporation made a preferential payment to her. What the evidence shows is that, in addition to her capital contribution to the corporation, Bingham loaned the corporation $300,000 and that she later forgave the debt. Contrary to GMK's assertion, there is no evidence that Bingham actually seized the corporation's computer equipment, although there is evidence that she had a security interest in it. Thus, we do not agree with GMK that there was either a commingling of assets or a preferential payment.

Finally, there is no basis to conclude that the corporation was undercapitalized initially or that the transfer of assets to PFP was undertaken as a fraud on creditors. On the contrary, cash in excess of $1 million was invested into the corporation initially. We find no attempt to defraud creditors in the formation of WWL and PFP's purchase of a general partnership interest in the partnership. Thus, the basic elements for disregarding the corporate entity are absent here. The trial court's ruling imposing personal liability upon Bingham cannot be premised upon piercing the corporate veil.

Judgment reversed in favor of Bingham.



Ethical and Public Policy Concerns

1. Do you think it is right that shareholders of corporations have no liability for the obligations of their corporation once they have paid their promised capital contribution? What benefits does society receive from extending such a privilege to shareholders? What detriments does society suffer?

2. Should businesses be permitted to incorporate in a state that has a business incorporation law that extends the greatest freedom to managers of the business? Who benefits from businesses incorporating in such states? Who is harmed? Can the persons who are harmed protect themselves?

3. When a corporation engages in interstate business, should its managers attempt to reduce the risk that foreign states' courts will have jurisdiction over the

Figure 2 *Examples of Piercing the Corporate Veil*

corporation? Should the managers attempt to avoid taxation by foreign states? Should they try to avoid qualification requirements? Is it enough that the corporation complies exactly with the laws of the foreign states, or should the corporation attempt to return to the state—such as through taxes and qualification fees—an amount appropriate to the benefits it receives from customers in the foreign state? Is the corporation the only person benefiting from its doing business in a foreign state? What risk may arise if a state aggressively regulates foreign corporations?

4. Why should courts and corporation statutes require corporations to be adequately capitalized? Who is harmed by thin capitalization? Is it possible for creditors harmed by thin capitalization to protect themselves by examining the financial position of the corporation prior to extending credit to the corporation? Why should a court protect creditors who knowingly or carelessly extend credit to thinly capitalized corporations? Should a court treat a corporation's *contract* creditors differently from its *tort* creditors? Are a thinly capitalized corporation's *contract* creditors better able to protect themselves than are the corporation's *tort* victims?

Problems and Problem cases

1. In September 1991, Jerry Tanner was working as a machinist on a construction project in Multnomah County, Oregon. Needing to repair broken equipment, he went to a local NAPA auto parts store and bought a product called Epoxy Mending Putty packaged under the Balkamp and NAPA labels. Following the directions on the epoxy's label, he rubbed the epoxy in his hands. The packaging did not warn about skin sensitivity, toxicity of epoxy resin, or the need to use gloves or a barrier cream when using the product. Tanner immediately reacted adversely to the epoxy. His condition spread to other parts of his body. As a result, he was disabled; he had trouble walking and performing other daily functions. Balkamp, Inc., supplied the epoxy to the NAPA store. Balkamp is affiliated with NAPA and sells only to NAPA stores. The epoxy was manufactured in 1984 by Hermetite UK. Hermetite was incorporated and had its operations in England. Hermetite UK sold some of this batch to Hermetite US, which marketed the epoxy in the United States. Balkamp bought the epoxy from Hermetite US. Tanner sued Hermetite UK in an Oregon trial court. Does the Oregon trial court have jurisdiction over Hermetite UK?

2. Debra Hervish, a resident of Florida, purchased 14 pieces of furniture from Growables, Inc., a furniture store incorporated and doing business in Florida. Planning to move to Louisiana, she asked Growables to ship the furniture to Louisiana. Growables hired Ryder Truck Lines to ship the furniture to Louisiana. When the furniture arrived in Louisiana, Hervish found that every piece was damaged. Hervish sued Growables in a Louisiana trial court. Does the Louisiana trial court have jurisdiction over Growables?

3. A Hawaiian statute imposed a 20 percent wholesale excise tax on liquor sold in Hawaii. To encourage the development of Hawaiian liquor, the statute exempted from taxation Okolehao, a brandy distilled from the root of the ti plant, a native Hawaiian shrub. Bacchus Imports, a liquor wholesaler, claimed that the excise tax violated the commerce clause. Was Bacchus correct?

4. Universal Printing, a business incorporated in Missouri, makes a bid on a proposed printing contract that is to be performed in Florida. Universal is the low bidder and is awarded the contract. A competitor argues that Universal may not obtain the contract because Universal had not qualified to do business in Florida when the bid was submitted. Is submitting a bid for a contract "doing business" requiring qualification?

5. The National Steeplechase and Hunt Association (NSHA) was a New York corporation that sanctioned, regulated, and supervised steeplechase races. NSHA sanctioned three steeplechase races in Kentucky. Each sanctioned event lasted no more than four days each year. NSHA promulgated steeplechase rules; approved the racecourses, race officials, and the financial responsibility of the sponsoring organization; received entries for each event by telephone or mail; assembled the information on the events; and prepared a booklet and identification badges for each meet. All these functions were performed in NSHA's New York office. The NSHA had no employees or offices in Kentucky. All communications were conducted by telephone or mail. NSHA leased fences and jumps to the sponsoring organization; the NSHA driver did not assist the local organization in setting up the equipment. Was NSHA required to qualify to do business in Kentucky?

6. Montana Merchandising, Inc. (MMI), is the sole shareholder of ECA Environmental Management Services, Inc. For over a year, ECA has held no shareholders or board of directors meetings. Every ECA director is also a director of MMI. MMI manages ECA's bank accounts. MMI regularly transfers ECA's funds into MMI's accounts without compensation. MMI has financed ECA's operations by lending $1,500,000 to ECA, a debt that is secured by all of ECA's assets. Has MMI risked being liable for ECA's liabilities?

7. Eric Dahlbeck incorporated Viking Construction, Inc., with an initial capital of $3,000. Dahlbeck also made a $7,000 loan to Viking. Viking had as assets 65 lots of land held for development, which lots cost $430,000. Viking became unable to pay its creditors, who sought to pierce the corporate veil and hold Dahlbeck liable. Were the creditors successful?

8. New York law required that every taxicab company carry $10,000 of accident liability insurance for each cab in its fleet. The purpose of the law was to ensure that passengers and pedestrians injured by cabs operated by these companies would be adequately compensated for their injuries. Carlton organized 10 corporations, each owning and operating two taxicabs in New York City. Each of these corporations carried $20,000 of liability insurance. Carlton was the principal shareholder of each corporation. The vehicles, the only freely transferable assets of these corporations, were collateral for claims of secured creditors. The 10 corporations were operated more or less as a unit with respect to supplies, repairs, and employees. Walkovszky was severely injured when he was run down by one of the taxicabs. He sued Carlton personally, alleging that the multiple corporate structure amounted to fraud upon those who might be injured by the taxicabs. Should the court pierce the corporate veil to reach Carlton individually?

9. Castleberry, Branscum, and Byboth each owned one-third of the shares of a furniture-moving business, Texan Transfer, Inc. Branscum formed Elite Moving Company, a business that competed with Texan Transfer. Castleberry objected and sued to claim part ownership of Elite Moving. Branscum threatened Castleberry that he would not receive any return on his investment in Texan Transfer unless he abandoned his claim of ownership of Elite Moving. Consequently, Castleberry sold his shares back to Texan Transfer for a $42,000 promissory note. Gradually, Elite Moving took over more and more of the business of Texan Transfer. Texan Transfer allowed Elite Moving to use its employees and trucks. Elite Moving advertised for business, while Texan Transfer did not. Elite Moving prospered, while Texan Transfer's business declined. As a result, Castleberry was paid only $1,000 of the $42,000 promissory note. Did Castleberry have any grounds to hold Branscum liable for the unpaid portion of the note?

10. Two brothers are officers and controlling shareholders of a waste management corporation that has a waste disposal contract with a county government. The corporation overcharges the county government by overstating the amount of waste disposed. The brothers are found guilty of theft and fined $6,000. The corporation is also charged with the same crime. Is it possible for the corporation also to be found guilty of the same crime committed by the brothers?

X. Financing Nonprofit Corporations

A person desiring to incorporate a business must comply with the applicable corporation law. Failing to comply can create various problems. For example, a person may make a contract on behalf of the corporation before it is incorporated. Is the corporation liable on this contract? Is the person who made

the contract on behalf of the prospective corporation liable on the contract? Do the people who thought that they were shareholders of a corporation have limited liability, or do they have unlimited liability as partners of a partnership?

Promoters and Preincorporation Transactions

A **promoter** of a corporation incorporates a business, organizes its initial management, and raises its initial capital. Typically, a promoter discovers a business or an idea to be developed, finds people who are willing to invest in the business, negotiates the contracts necessary for the initial operation of the proposed venture, incorporates the business, and helps management start the operation of the business. Consequently, a promoter may engage in many acts prior to the incorporation of the business. As a result, the promoter may have liability on the contracts he negotiates on behalf of the prospective corporation. In addition, the corporation may *not* be liable on the contracts the promoter makes on its behalf.

Corporation's Liability on Preincorporation Contracts

A nonexistent corporation has no liability on contracts made by a promoter prior to its incorporation. This is because the corporation does not exist.

Even when the corporation comes into existence, it does not automatically become liable on a preincorporation contract made by a promoter on its behalf. It cannot be held liable as a principal whose agent made the contracts because the promoter was not its agent and the corporation was not in existence when the contracts were made.

The only way a corporation may become bound on a promoter's preincorporation contracts is by the corporation's **adoption** of the promoter's contracts. Adoption is similar to the agency concept of ratification, which is covered in Chapter 35. For a corporation to adopt a promoter's contract, the corporation must accept the contract with knowledge of all its material facts.

Acceptance may be express or implied. The corporation's knowing receipt of the benefits of the contract is sufficient for acceptance. For example, a promoter makes a preincorporation contract with a genetic engineer, requiring the engineer to work for a prospective corporation for 10 years. After incorporation, the promoter presents the contract to the board of directors. Although the board takes no formal action to accept the contract, the board allows the engineer to work for the corporation for one year as the contract provides and pays him the salary required by the contract. The board's actions constitute an acceptance of the contract, binding the corporation to the contract for its 10-year term. The *Crye-Leike* case is another example of a corporation adopting a preincorporation contract.

Promoter's Liability on Preincorporation Contracts

A promoter and her copromoters are jointly and severally liable on preincorporation contracts the promoter negotiates in the name of the nonexistent corporation. This liability exists even when the promoters' names do not appear on the contract. Promoters are also jointly and severally liable for torts committed by their copromoters prior to incorporation.

A promoter retains liability on a preincorporation contract until **novation** occurs. For novation to occur, the corporation and the third party must agree to release the promoter from liability and to substitute the corporation for the promoter as the party liable on the contract. Usually, novation will occur by express or implied agreement of all the parties.

If the corporation is not formed, a promoter remains liable on a preincorporation contract unless the third party releases the promoter from liability. In addition, the mere formation of the corporation does not release a promoter from liability. A promoter remains liable on a preincorporation contract even after the corporation's adoption of the contract, since adoption does not automatically release the promoter. The corporation cannot by itself relieve the promoter of liability to the third party; the third party must also agree, expressly or impliedly, to release the promoter from liability.

A few courts have held that a promoter is not liable on preincorporation contracts if the third party *knew of the nonexistence* of the corporation yet insisted that the promoter sign the contract on behalf of the nonexistent corporation. Other courts have found that the promoter is not liable if the third party clearly stated that he would *look only to the prospective corporation* for performance.

Recently, courts have held that the Model Business Corporation Act (MBCA) permits a promoter to escape liability for preincorporation contracts when the promoter has made some effort to incorporate the business

and believes the corporation is in existence. The MBCA rule is discussed below in the section titled, Defective Attempts to Incorporate. The *Sivers* case, which follows that section, is an example of the application of the MBCA promoter liability rule.

Obtaining a Binding Preincorporation Contract

While it may be desirable for the promoter to escape liability on a preincorporation contract, there is one disadvantage: Only when the promoter is liable on the preincorporation contract is the other party liable on the contract. This means that when the promoter is not liable on the contract, the other party to the contract may rescind the contract at any time prior to adoption by the corporation. Once the corporation has adopted the contract, the corporation and the third party are liable on it, and the contract cannot be rescinded without the consent of both parties.

To maintain the enforceability of a preincorporation contract prior to adoption, a promoter may want to be liable on a preincorporation contract at least until the corporation comes into existence and adopts the contract. To limit his liability, however, the promoter may wish to have his liability cease automatically upon adoption. The promoter should ensure that the contract has an **automatic novation clause.** For example, a preincorporation contract may read that "the promoter's liability on this contract shall terminate upon the corporation's adoption of this contract."

Instead of using automatic novation clauses, today most well-advised promoters incorporate the business prior to making any contracts for the corporation. By doing so, only the corporation and the third party—and not the promoter—have liability on the contract.

Crye-Leike Realtors, Inc. v. WDM, Inc.
1998 Tenn. App. LEXIS 641 (Ct. App. Tenn. 1998)

On November 10, 1993, George Richert and Colman Borowsky executed a real estate brokerage agreement under which Richert appointed Borowsky, a real estate broker with Crye-Leike Realtors, Inc., as his sole and exclusive real estate broker to obtain commercial space for Richert's business. Although the term of the agreement was 12 months, it could be terminated by either party upon 30 days' written notice. Both parties understood that Richert would form a new corporation that would actually lease the property. Richert represented that he would be the chief executive officer of the new company and that he would have the authority to execute agreements on its behalf. Because the corporation was not yet in existence, however, Richert signed the agreement in his individual capacity. Borowsky signed the agreement on behalf of Crye-Leike.

In late November or early December, Borowsky first learned that Richert's new company would be named WDM, Inc. Richert formed WDM, Inc., on December 7, 1993. Initially, Richert and two other people owned all of WDM's stock. They later sold the stock to a subsidiary of Derlan Industries. Richert became WDM's president and chief executive officer.

Sometime in December 1993, Borowsky showed Richert a potential space at Interstate Industrial Park in Memphis. Borowsky prepared a written offer to lease the space and submitted it to the landlord, Belz Enterprises. The offer was made on behalf of WDM, Inc., and Richert signed the offer as WDM's president. Borowsky believed that a lease agreement with Belz was "a done deal." When the deal was not consummated as planned, however, Borowsky became concerned that Richert and WDM were "bailing out" on him. At some point, Borowsky began to suspect that Richert was instead dealing with another real estate broker, a violation of the contract signed by Richert and Borowsky.

On February 22, 1994, Richert, on behalf of WDM and with the assistance of a broker other than Borowsky, executed a lease agreement for space in the Bellbrook Business Park. Neither Borowsky nor Crye-Leike received a commission from the lease transaction. By letter dated February 23, 1994, Richert terminated his agreement with Crye-Leike and Borowsky. Richert wrote the letter on WDM stationery, and he signed the letter on behalf of WDM as its president and chief executive officer.

Crye-Leike brought an action for breach of contract against WDM. The trial court granted WDM's motion for summary judgment on the grounds that WDM was not bound on the contract with Crye-Leike because it had not adopted or ratified the contract. Crye-Leike appealed.

Farmer, Justice A corporation may become liable on a preincorporation contract executed by its promoter if the corporation subsequently ratifies or adopts the contract. Ratification is the express or implied adoption and confirmation by the corporation of a contract entered into on the corporation's behalf by a promoter who purported to have the authority to act as the corporation's agent. In order for a ratification to occur, the corporation, having full knowledge of the facts, must accept the benefits of the promoter's contract. Moreover, the corporation, either by the circumstances or by its affirmative election, must indicate an intention to adopt the contract as its own.

After it was incorporated, WDM began to receive the benefits of Richert's contract with Crye-Leike. Borowsky continued to search for suitable property for WDM to conduct its business. These efforts included contacting various landlords and other brokers, showing different properties to WDM, and preparing an offer to lease space on behalf of WDM. The corporation also had full knowledge of the facts in this case because Richert, WDM's president and chief executive officer, had full knowledge of the contract executed by Richert and of Borowsky's subsequent efforts to find suitable space for WDM. Finally, the corporation intended to adopt the contract. Pursuant to the contract, in January 1994 Borowsky submitted an offer to Belz Enterprises on behalf of WDM for the lease of industrial space. Richert signed the offer on behalf of WDM, Inc., as the corporation's president. This evidence supports Crye-Leike's claim that WDM ratified or adopted the contract after its incorporation and that, in actuality, Borowsky was representing WDM, and not Richert.

WDM and Richert contend that Richert's knowledge of the facts could not be imputed to WDM and that, upon becoming a corporate officer, Richert could not ratify his prior actions as a promoter. This argument is without merit. Although, as a general rule, the knowledge of a single promoter cannot be imputed to the corporation, exceptions to this rule have been found where the promoters become directors and stockholders in the corporation or are the sole or controlling stockholders. Moreover, WDM was aware of the pertinent facts in this case. During all times relevant hereto, Richert had authority to act on the corporation's behalf and to bind the corporation.

We also reject the contention that WDM could not ratify or adopt the contract with Crye-Leike because Richert signed the contract in his individual capacity and not on behalf of the corporation. WDM accepted the benefits of the contract between Richert and Crye-Leike. These benefits consisted of Borowsky's continued efforts to locate suitable space for WDM to conduct its business. WDM never sought to reject the contract or the benefits it received thereunder. When Borowsky submitted a lease proposal to Belz Enterprises, Richert signed the proposal on behalf of WDM as the corporation's president. Even when Richert sent the letter to Borowsky notifying him that the agreement was being terminated, Richert used WDM stationery and signed the letter as WDM's president and chief executive officer. We conclude that this is sufficient evidence of WDM's ratification of the contract, despite the fact that Richert signed the contract in his individual capacity rather than in his capacity as an officer of the to be formed corporation.

Judgment reversed in favor of Crye-Leike; remanded for trial.

Preincorporation Share Subscriptions

Promoters sometimes use **preincorporation share subscriptions** to ensure that the corporation will have adequate capital when it begins its business. Under the terms of a share subscription, a prospective shareholder offers to buy a specific number of the corporation's shares at a stated price. Under the Model Business Corporation Act (MBCA), a prospective shareholder may not revoke a preincorporation subscription for a six-month period, in the absence of a contrary provision in the subscription. Generally, corporate acceptance of preincorporation subscriptions occurs by action of the board of directors after incorporation.

Promoters have no liability on preincorporation share subscriptions. They have a duty, however, to make a good faith effort to bring the corporation into existence. When a corporation fails to accept a preincorporation subscription or becomes insolvent, the promoter is not liable to the disappointed subscriber, in the absence of fraud or other wrongdoing by the promoter.

Today, most promoters incorporate the business and obtain promises to buy shares from prospective

shareholders. These promises, which may take the form of postincorporation subscriptions, are discussed later in this chapter.

Relation of Promoter and Prospective Corporation

A promoter of a nonexistent corporation is not an agent of the prospective corporation but nonetheless owes fiduciary duties to it. A promoter is not an agent of prospective investors in the business because they did not appoint him and they have no power to control him.

Although not an agent of the proposed corporation or its investors, a promoter owes a **fiduciary duty** to the corporation and to its prospective investors. A promoter owes such parties a duty of full disclosure and honesty. For example, a promoter breaches this duty when she diverts money received from prospective shareholders to pay her expenses, unless the shareholders agree to such payment. The fiduciary duty also prevents a promoter from diverting a business opportunity from the corporation and giving it to himself instead. In addition, the promoter may not purchase shares of the corporation at a price lower than that paid by the public shareholders.

A promoter may not profit personally by transacting secretly with the corporation in his personal capacity. The promoter's failure to disclose her interest in the transaction and the material facts permits the corporation to rescind the transaction or to recover the promoter's secret profit. On the other hand, the promoter's full disclosure of her interest and the material facts of the transaction to an independent board of directors that approves the transaction prevents the corporation from recovering the promoter's profit. Note, however, that when a promoter is a director, approval of the transaction by the board of directors is not sufficient; the transaction must be intrinsically fair to the corporation.

Liability of Corporation to Promoter

Valuable as the services of a promoter may be to a prospective corporation and to society, a corporation is generally not required to compensate a promoter for her promotional services, or even her expenses, unless the corporation has agreed expressly to compensate the promoter. The justification for this rule is that the promoter is self-appointed and acts for a corporation that is not in existence.

Nonetheless, a corporation may choose to reimburse the promoter for her reasonable expenses and to pay her the value of her services to the corporation. Corporations often compensate their promoters with shares. The MBCA permits the issuance of shares for a promoter's preincorporation services.

To ensure that she is compensated for her services, a promoter may tie herself to a person or property that the corporation needs to succeed. For example, a promoter may purchase the invention that the corporation was formed to exploit. Another way to ensure compensation is by the promoter's dominating the board of directors during the early months of its life. By doing so, the promoter may direct the corporation to compensate her.

Concept Review

Preincorporation Contracts

Promoter Liability	A promoter is liable on a preincorporation contract unless either: 1. The third party knows of the nonexistence of the corporation and insists that the promoter sign in the name of the corporation, or 2. The third party knows of the nonexistence of corporation and agrees only to look to prospective corporation for performance, or 3. Novation occurs either: *a.* By agreement of the corporation and the third party, or *b.* By use of an automatic novation clause.
Corporation Liability	A corporation is *not* liable on a preincorporation contract until the board of directors adopts the contract.
Third-Party Liability	A third party is liable on a preincorporation contract if either the promoter or the corporation is liable on the contract.

Incorporation

Anyone seeking to incorporate a business must decide where to do so. If the business of a proposed corporation is to be primarily *intrastate,* it is usually cheaper to incorporate in the state where the corporation's business is to be conducted. For the business that is primarily *interstate,* however, the business may benefit by incorporating in a state different from the state in which it has its principal place of business.

Incorporation fees and taxes, annual fees, and other fees such as those on the transfer of shares or the dissolution of the corporation vary considerably from state to state. Delaware has been a popular state in which to incorporate because its fees tend to be low.

Promoters frequently choose to incorporate in a state whose corporation statute and court decisions grant managers broad management discretion. For example, it is easier to pay a large dividend and to effect a merger in Delaware than in many other states.

Steps in Incorporation

There are only a few requirements for incorporation. It is a fairly simple process and can be accomplished inexpensively in most cases. The steps prescribed by the incorporation statutes of the different states vary, but they generally include the following, which appear in the MBCA:

1. Preparation of articles of incorporation.
2. Signing and authenticating the articles by one or more incorporators.
3. Filing the articles with the secretary of state, accompanied by the payment of specified fees.
4. Receipt of a copy of the articles of incorporation stamped "Filed" by the secretary of state, accompanied by a fee receipt. (Some states retain the old MBCA rule requiring receipt of a certificate of incorporation issued by the secretary of state.)
5. Holding an organization meeting for the purpose of adopting bylaws, electing officers, and transacting other business.

Articles of Incorporation The basic governing document of the corporation is the **articles of incorporation** (sometimes called the charter). The articles are similar to a constitution. They state many of the rights and responsibilities of the corporation, its management, and its shareholders. Figure 1 lists the contents of the articles.

The corporation must have a name that is distinguishable from the name of any other corporation incorporated or qualified to do business in the state. The name must include the word *corporation, incorporated, company,* or *limited,* or the abbreviation *corp., inc., co.,* or *ltd.*

The MBCA does not require the inclusion of a statement of purpose in the articles. When a purpose is stated, it is sufficient to state, alone or together with specific purposes, that the corporation may engage in "any lawful activity."

The MBCA permits a corporation to have perpetual existence. If desired, the articles of incorporation may provide for a shorter duration.

Most of the state corporation statutes require the articles to recite the initial capitalization of the business. Usually, the statutes require that there be a minimum amount of initial capital, such as $1,000. Since such a small amount of capital is rarely enough to protect creditors adequately, the MBCA dispenses with the need to recite a minimum amount of capital.

The articles may contain additional provisions not inconsistent with law for managing the corporation, regulating the internal affairs of the corporation, and

Figure 1 *Contents of Articles of Incorporation (pursuant to MBCA)*

The following *must* be in the articles:

1. The name of the corporation.
2. The number of shares that the corporation has authority to issue.
3. The address of the initial registered office of the corporation and the name of its registered agent.
4. The name and address of each incorporator.

The following *may* be included in the articles:

1. The names and addresses of the individuals who are to serve as the initial directors.
2. The purpose of the corporation.
3. The duration of the corporation.
4. The par value of shares of the corporation.
5. Additional provisions not inconsistent with law for managing the corporation, regulating the internal affairs of the corporation, and establishing the powers of the corporation and its directors and shareholders.

establishing the powers of the corporation and its directors and shareholders. For example, these additional provisions may contain the procedures for electing directors, the quorum requirements for shareholders' and directors' meetings, and the dividend rights of shareholders.

The MBCA specifies that one or more persons, including corporations, partnerships, and unincorporated associations, may serve as the **incorporators.** Incorporators have no function beyond lending their names and signatures to the process of bringing the corporation into existence. No special liability attaches to a person merely because she serves as an incorporator.

Filing Articles of Incorporation The articles of incorporation must be delivered to the office of the secretary of state, and a filing fee must be paid. The office of the secretary of state reviews the articles of incorporation that are delivered to it. If the articles contain everything that is required, the secretary of state stamps the articles "Filed" and returns a copy of the stamped articles to the corporation along with a receipt for payment of incorporation fees. Some states require a duplicate filing of the articles with an office—usually the county recorder's office—in the county in which the corporation has its principal place of business.

The existence of the corporation begins when the articles are filed by the secretary of state. Filing of the articles is conclusive proof of the existence of the corporation.

Because the articles of incorporation embody the basic contract between a corporation and its shareholders, shareholders must approve most changes in the articles. For example, when the articles are amended to increase the number of authorized shares, shareholder approval is required.

Internet Incorporation Services Several Internet businesses provide incorporation assistance to new businesses, many for a modest fee. While such services do not facilitate the drafting of articles meeting the special needs of a business, at least they reduce the cost and burden of incorporating. Using the word "incorporation," you can use an Internet search engine to find a list of Internet incorporation sites.

The Organization Meeting After the articles of incorporation have been filed by the secretary of state, an organization meeting is held. Usually, it is the first formal meeting of the directors. Frequently, only bylaws are adopted and officers elected. The function of the bylaws is to supplement the articles of incorporation by defining more precisely the powers, rights, and responsibilities of the corporation, its managers, and its shareholders and by stating other rules under which the corporation and its activities will be governed. Its common contents are listed in Figure 2.

The MBCA gives the incorporators or the initial directors the power to adopt the initial bylaws. The board of directors holds the power to repeal and to amend the bylaws, unless the articles reserve this power to the shareholders. Under the MBCA, the shareholders, as the ultimate owners of the corporation, always retain the power to amend the bylaws, even if the directors also have such power. To be valid, bylaws must be consistent with the law and with the articles of incorporation.

If the organization meeting is the first meeting of the board of directors, the board may adopt a corporate seal for use on corporate documents, approve the form of share certificates, accept share subscriptions, authorize the issuance of shares, adopt preincorporation contracts, authorize reimbursement for promoters' expenses, and fix the salaries of officers.

Filing Annual Report To retain its status as a corporation in good standing, a corporation must file an annual report with the secretary of state of the state of incorporation and pay an annual franchise fee or tax. The amount of annual franchise tax varies greatly from

Figure 2 *Contents of the Bylaws*

1. The authority of the officers and the directors, specifying what they may or may not do.
2. The time and place at which the annual shareholders' meetings will be held.
3. The procedure for calling special meetings of shareholders.
4. The procedures for shareholders' and directors' meetings, including whether more than a majority is required for approval of specified actions.
5. Provisions for special committees of the board, defining their membership and the scope of their activities.
6. The procedures for the maintenance of share records.
7. The machinery for the transfer of shares.
8. The procedures and standards for the declaration and payment of dividends.

state to state. While the annual report includes very little information and repeats information already filed in the articles of incorporation, failure to file an annual report or pay the annual fee or tax may result in a dissolution of the corporation and an imposition of monetary penalties.

Close Corporation Elections

Close corporations face problems that normally do not affect publicly held corporations. In recognition of these problems, nearly half of the states have statutes that attend to the special needs of close corporations. For example, some corporation statutes allow a close corporation to be managed by its shareholders.

To take advantage of these close corporation statutes, most statutes require that a corporation make an *election* to be treated as a close corporation. The Statutory Close Corporation Supplement to the MBCA permits a corporation with *fewer than 50 shareholders* to elect to become a close corporation. The Close Corporation Supplement requires the articles of incorporation to state that the corporation is a statutory close corporation.

There is no penalty for a corporation's failure to make a close corporation election. The only consequence of a failure to meet the requirements is that the close corporation statutory provisions are inapplicable. Instead, statutory corporation law will treat the corporation as it treats any other general corporation.

Note, however, that even when a corporation fails to meet the statutory requirements for treatment as a close corporation, a court may decide to apply special *common law* rules applicable only to close corporations.

Defective Attempts to Incorporate

When business managers attempt to incorporate a business, sometimes they fail to comply with all the conditions for incorporation. For example, the incorporators may not have filed articles of incorporation or the directors may not have held an organization meeting. These are examples of **defective attempts to incorporate.**

One possible consequence of defective incorporation is to make the managers and the purported shareholders *personally liable* for the obligations of the defectively formed corporation. For example, an employee of an insolvent corporation drives the corporation's truck over a pedestrian. If the pedestrian proves that the corporation was defectively formed, he may be able to recover damages for his injuries from the managers and the shareholders.

A second possible consequence of defective incorporation is that a party to a contract involving the purported corporation may claim nonexistence of the corporation in order to avoid a contract made in the name of the corporation. For example, a person makes an ill-advised contract with a corporation. If the person proves that the corporation was defectively formed, he may escape liability on the contract because he made a contract with a nonexistent person, the defectively formed corporation. As an alternative, the defectively formed corporation may escape liability on the contract on the grounds that its nonexistence makes it impossible for it to have liability.

The courts have tried to determine when these two consequences should arise by making a distinction between de jure corporations, de facto corporations, corporations by estoppel, and corporations so defectively formed that they are treated as being nonexistent.

De Jure Corporation

A de jure corporation is formed when the promoters substantially comply with each of the **mandatory conditions precedent** to the incorporation of the business. Mandatory provisions are distinguished from directory provisions by statutory language and the purpose of the provision. Mandatory provisions are those that the corporation statute states "shall" or "must" be done or those that are necessary to protect the public interest. Directory provisions are those that "may" be done and that are unnecessary to protect the public interest.

For example, statutes provide that the incorporators shall file the articles of incorporation with the secretary of state. This is a mandatory provision, not only because of the use of the word *shall* but also because of the importance of the filing in protecting the public interest. Other mandatory provisions include conducting an organization meeting. Directory provisions include minor matters such as the inclusion of the incorporators' addresses in the articles of incorporation.

If a corporation has complied with each mandatory provision, it is a de jure corporation and is treated as a corporation for all purposes. The validity of a de jure corporation cannot be attacked, except in a few states in which the state, in a *quo warranto* proceeding, may

attack the corporation for noncompliance with a condition subsequent to incorporation, such as a failure to file an annual report with the secretary of state.

De Facto Corporation

A de facto corporation exists when the incorporators fail in some material respect to comply with all of the mandatory provisions of the incorporation statute yet comply with most mandatory provisions. There are three requirements for a de facto corporation:

1. There is a valid statute under which the corporation could be organized.
2. The promoters or managers make an honest attempt to organize under the statute. This requires substantial compliance with the mandatory provisions taken as a whole.
3. The promoters or managers exercise corporate powers. That is, they act as if they were acting for a corporation.

Generally, failing to file the articles of incorporation with the secretary of state will prevent the creation of a de facto corporation. However, a de facto corporation will exist despite the lack of an organization meeting or the failure to make a duplicate filing of the articles with a county recorder.

A de facto corporation is treated as a corporation against either an attack by a third party or an attempt of the business itself to deny that it is a corporation. The state, however, may attack the claimed corporate status of the business in a *quo warranto* action.

Corporation by Estoppel

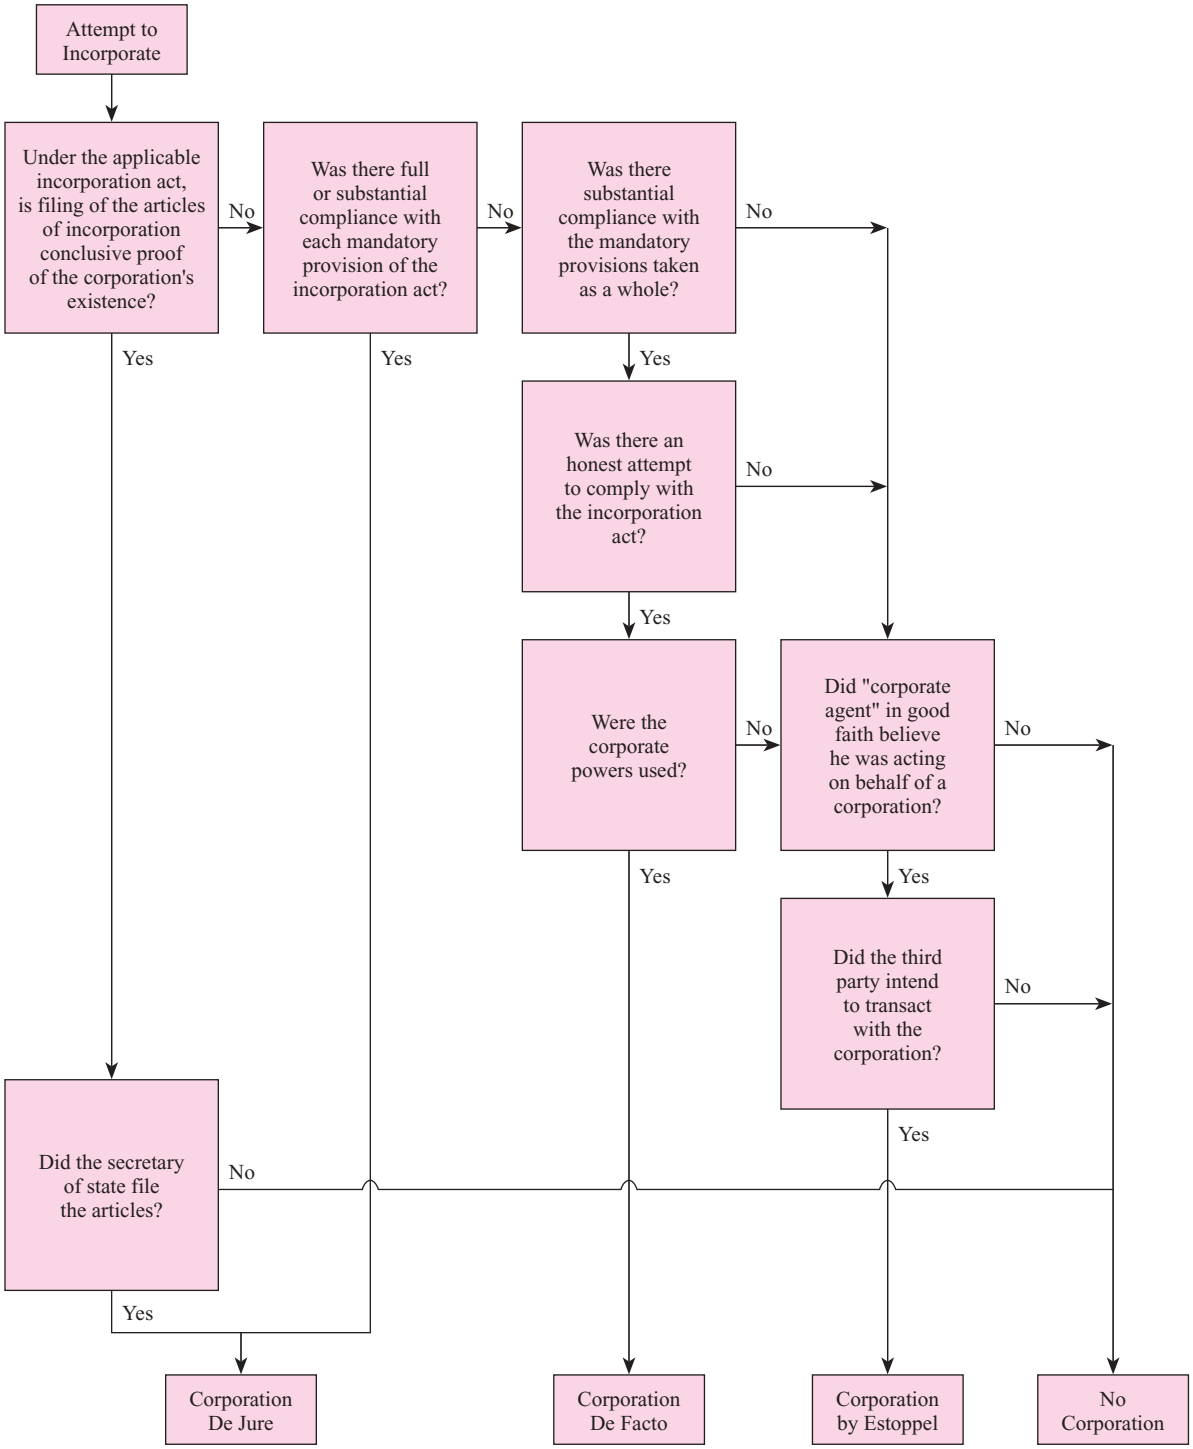
When people hold themselves out as representing a corporation or believe themselves to be dealing with a corporation, a court will estop those people from denying the existence of a corporation. This is called **corporation by estoppel.** For example, a manager states that a business has been incorporated and induces a third person to contract with the purported corporation. The manager will not be permitted to use a failure to incorporate as a defense to the contract because he has misled others to believe reasonably that a corporation exists.

Under the doctrine of estoppel, each contract must be considered individually to determine whether either party to the contract is estopped from denying the corporation's existence.

Liability for Defective Incorporation

If people attempt to organize a corporation but their efforts are so defective that not even a corporation by estoppel is found to exist, the courts have generally held such persons to be partners with unlimited liability for the contracts and torts of the business. However, most courts impose the unlimited *contractual* liability of a partner only on those who are *actively engaged in the management* of the business or who are responsible for the defects in its organization. *Tort* liability, however, is generally imposed on everyone—the managers and the purported shareholders of the defectively formed corporation.

Modern Approaches to the Defective Incorporation Problem



As you can see, the law of defective incorporation is confusing. It becomes even more confusing when you consider that many of the defective incorporation cases look like promoter liability cases, and vice versa. A court may have difficulty deciding whether to apply the law of promoter liability or the law of defective incorporation to preincorporation contracts. It is not surprising, therefore, that modern corporation statutes have attempted to eliminate this confusion by adopting simple rules for determining the existence of a corporation and the liability of its promoters, managers, and shareholders.

The MBCA states that incorporation occurs when the articles are filed by the secretary of state. The **filing** of the articles is **conclusive proof** of the existence of the corporation, except in a proceeding brought by the state. Consequently, the incorporators may omit even a mandatory provision, yet create a corporation, provided that the secretary of state has filed the articles of incorporation. Conversely, courts have held that a failure to obtain a filing of the articles is conclusive proof of the nonexistence of the corporation, on the grounds that the MBCA eliminates the concepts of de facto corporation and corporation by estoppel.

Figure 3 summarizes the preceding discussion.

Liability for Defective Incorporation under the MBCA The MBCA imposes joint and several liability on those persons who purport to act on behalf of a corporation and know that there has been no incorporation. Thus, managers and shareholders who

Figure 3 *Defective Attempts to Incorporate*

both (1) *participate* in the operational decisions of the business and (2) *know* that the corporation does not exist are liable for the purported corporation's contracts and torts.

The MBCA releases from liability shareholders and others who either (1) take no part in the management of the defectively formed corporation *or* (2) mistakenly believe that the corporation is in existence. Consequently, *passive* shareholders have no liability for the obligations of a defectively formed corporation even when they know that the corporation has not been formed. Likewise, managers of a defectively formed corporation have no liability when they believe that the corporation exists.

In the following case, a promoter who mistakenly thought the corporation was in existence was not liable on a preincorporation contract he made on behalf of the corporation.

Sivers v. R & F Capital Corp. *858 P.2d 895 (Ore. Ct. App. 1995)*

Dennis Sivers owned a warehouse in Milwaukee, Oregon. On January 12, 1990, purporting to act on behalf of R & F Capital Corporation in the position of chairman, Roy Rose signed a contract to lease the warehouse from Sivers. R & F was not yet incorporated when Rose signed the lease on behalf of R & F; R & F did not come into existence until February 9, 1990. Later in 1990, R & F breached the lease, and Sivers sued Rose claiming that Rose was personally liable on the lease. Rose asked the trial court for a directed verdict, but the trial court denied Rose's motion. Rose appealed to the Oregon Court of Appeals.

Warren, Judge Ore. Rev. Stat. 60.054 provides:

> All persons purporting to act as or on behalf of a corporation, knowing there was no corporation, are jointly and severally liable for liabilities created while so acting.

This provision was adopted in 1987 as part of SB 303 and is virtually identical to section 2.04 of the Revised Model Business Corporation Act (RMBCA). Section 2.04 is a codification of the judicial exceptions to the general rule that those who prematurely act as, or on behalf of, a corporation are personally liable on all transactions entered into or liabilities incurred before incorporation.

In proposing adoption of section 2.04 of the RMBCA in Oregon, the Task Force of the Oregon State Bar Business Law Section, which authored SB 303, wrote:

> The Bill protects participants who act honestly but subject to the mistaken belief that the articles have been filed. This section is consistent with the Revised Uniform Limited Partnership Act, which provides that limited partners who contribute capital to a partnership with a mistaken belief that a limited partnership certificate has been filed are protected from liability.

The wording of Ore. Rev. Stat. 60.054 and the drafters' comments clearly indicate that the test for imposition of personal liability is one of actual knowledge.

Sivers argues that there are facts from which the jury could find that Rose knew that R & F was not incorporated when he signed the lease. We disagree.

Rose testified that he was a businessman who created financing packages to buy companies. His highest net worth at one point was $56 million. He had been involved in setting up many corporations. However, he had no specific experience with incorporating, because his attorneys handled those aspects of his business. For example, he did not know when a corporation formally began its existence, although he understood that documents need to be filed with the state and a copy would be returned upon incorporation.

With respect to R & F, Rose had no participation in its daily operation, other than attending board meetings and signing documents as "chairman." He entrusted Flaherty, a director of R & F, with those daily duties. Rose did not read the articles of incorporation of R & F until he was sued. He recalled that the document was given to him and he signed it in December 1989.

Rose and another R & F director testified that Flaherty was entrusted to incorporate R & F in December of 1989, but failed to do that. They both believed that R & F was incorporated in December of 1989. Rose also testified that he started investing based on that belief, and that he would not have signed any document on behalf of a corporation if he had known that it was not incorporated.

Sivers does not argue that there is direct evidence that Rose knew that the corporation had not been formed when he signed the lease. To support his argument that there was circumstantial evidence, he points to Rose's vast experience as a businessman, his failure to read the articles of incorporation, and his complete lack of responsibility for filing necessary corporate documents with the Secretary of State. His reliance on those facts is misplaced. At most they show Rose should have inquired into R & F's status and should have known that the corporation was not formed. They do not rise to the level of knowledge required by Ore. Rev. Stat. 60.054. Sivers would have us require a test of constructive knowledge. However, had the legislature intended to adopt such a test, it would not have used the unmodified term "knowing."

A more fundamental argument Sivers raises is that, although Rose testified that he believed that R & F was incorporated at the time he signed the lease, the jury could disbelieve him and affirmatively find that he had the requisite actual knowledge. That argument goes too far. Although a jury may disbelieve a witness based on demeanor, bias, motives, interest, or inconsistent statements, there must be evidence, direct or circumstantial, from which the jury can *reasonably* find that a defendant possesses the requisite knowledge. In this case, Rose maintained throughout the trial that he honestly believed that R & F was incorporated when he signed the lease. Sivers produced nothing to contradict that. The trial court should have granted Rose's motion for a directed verdict.

Judgment reversed in favor of Rose.

Incorporation of Nonprofit Corporations

Nonprofit corporations are incorporated in substantially the same manner as for-profit corporations. One or more persons serve as incorporators and deliver articles of incorporation to the secretary of state for filing. A nonprofit corporation's articles must include the name and address of the corporation and state its registered agent. Unlike a for-profit corporation, a nonprofit corporation must state that it is either a public benefit corporation, a mutual benefit corporation, or a religious corporation. A public benefit corporation is incorporated primarily for the benefit of the public—for example, a community arts council that promotes the arts. A mutual benefit corporation is designed to benefit its members—for example, a golf country club. An example of a religious corporation is a church.

A nonprofit corporation's articles must also state whether it will have members. While it is typical for nonprofit corporations to have members, the Model Nonprofit Corporation Act (MNCA) does not require a nonprofit corporation to have members. An example of a nonprofit corporation having no members is a public benefit corporation established to promote business development in a city, whose directors are appointed by the city's mayor.

A nonprofit corporation's articles may include the purpose of the corporation, its initial directors, and any matter regarding the rights and duties of the corporation and its directors and members. Each incorporator and director named in the articles must sign the articles.

A nonprofit corporation's existence begins when the secretary of state files the articles. After incorporation, the initial directors or incorporators hold an organization meeting to adopt bylaws and conduct other business.

Liability for Preincorporation Transactions

Nonprofit corporation status normally protects the members and managers from personal liability. However, when a nonprofit corporation is not formed or is defectively formed, promoters and others who transact for the nonexistent nonprofit corporation have the same liability as promoters and others who transact for a nonexistent for-profit corporation. The MNCA states the same rule as the MBCA: Persons who act on behalf of a corporation knowing there is no corporation are jointly and severally liable for all liabilities created while so acting.

Similarly, promoters have no authority to make contracts for a nonexistent nonprofit corporation. The corporation becomes liable on preincorporation contracts when its board of directors adopts the contracts.

Financing For–Profit Corporations

Any business needs money to operate and to grow. One advantage of incorporation is the large number of sources of funds that are available to businesses that incorporate. One such source is the sale of corporate **securities,** including shares, debentures, bonds, and long-term notes payable.

In addition to obtaining funds from the sale of securities, a corporation may be financed by other sources. A bank may lend money to the corporation in exchange for the corporation's short-term promissory notes, called commercial paper. Earnings provide a source of funds once the corporation is operating profitably. In addition, the corporation may use normal short-term financing, such as accounts receivable financing and inventory financing.

In this section, you will study only one source of corporate funds—a corporation's sale of securities. A corporate security may be either (1) a share in the corporation or (2) an obligation of the corporation. These two kinds of securities are called equity securities and debt securities.

Equity Securities

Every business corporation issues equity securities, which are commonly called stock or **shares.** The issuance of shares creates an ownership relationship: the holders of the shares—called stockholders or **shareholders**—are the owners of the corporation.

Modern statutes permit corporations to issue several classes of shares and to determine the rights of the various classes. Subject to minimum guarantees contained in the state business corporation law, the shareholders' rights are a matter of contract and appear in the articles of incorporation, in the bylaws, in a shareholder agreement, and on the share certificates.

Common Shares Common shares (or common stock) are a type of equity security. Ordinarily, the owners of common shares—called **common shareholders**—have the exclusive right to elect the directors, who manage the corporation.

The common shareholders often occupy a position inferior to that of other investors, notably creditors and preferred shareholders. The claims of common shareholders are subordinate to the claims of creditors and other classes of shareholders when liabilities and dividends are paid and when assets are distributed upon liquidation.

In return for this subordination, however, the common shareholders have an exclusive claim to the corporate earnings and assets that exceed the claims of creditors and other shareholders. Therefore, the common shareholders bear the major risks of the corporate venture, yet stand to profit the most if it is successful.

Preferred Shares Shares that have preferences with regard to assets or dividends over other classes of shares are called preferred shares (or preferred stock). **Preferred shareholders** are customarily given liquidation and dividend preferences over common shareholders. A corporation may have several classes of preferred shares. In such a situation, one class of preferred shares may be given preferences over another class of preferred shares. Under the MBCA, the preferences of preferred shareholders must be set out in the articles of incorporation.

The **liquidation preference** of preferred shares is usually a stated dollar amount. During a liquidation, this amount must be paid to each preferred shareholder before any common shareholder or other shareholder subordinated to the preferred class may receive his share of the corporation's assets.

Dividend preferences may vary greatly. For example, the dividends may be cumulative or noncumulative. Dividends on **cumulative** preferred shares, if not paid in any year, accumulate until paid. The entire accumulation must be paid before any dividends may be paid to common shareholders. Dividends on **noncumulative** preferred shares do not accumulate if unpaid. For such shares, only the current year's dividends must be paid to preferred shareholders prior to the payment of dividends to common shareholders.

Participating preferred shares have priority up to a stated amount or percentage of the dividends to be paid by the corporation. Then, the preferred shareholders participate with the common shareholders in additional dividends paid.

Some close corporations attempt to create preferred shares with a **mandatory dividend** right. These mandatory dividend provisions have generally been held illegal as unduly restricting the powers of the board of directors. Today, a few courts and some special close corporation statutes permit mandatory dividends.

A **redemption** provision in the articles allows a corporation at its option to repurchase preferred

shareholders' shares at a price stated in the articles, despite the shareholders' unwillingness to sell. Some statutes permit the articles to give the shareholders the right to force the corporation to redeem preferred shares.

Preferred shares may be **convertible** into another class of shares, usually common shares. A **conversion** right allows a preferred shareholder to exchange her preferred shares for another class of shares, usually common shares. The conversion rate or price is stated in the articles.

Preferred shares have **voting rights** unless the articles provide otherwise. Usually, most voting rights are taken from preferred shares, except for important matters such as voting for a merger or a change in preferred shareholders' dividend rights. Rarely are preferred shareholders given the right to vote for directors, except in the event of a corporation's default in the payment of dividends.

Authorized, Issued, and Outstanding Shares

Authorized shares are shares that a corporation is permitted to issue by its articles of incorporation. A corporation may not issue more shares than are authorized. **Issued** shares are shares that have been sold to shareholders. **Outstanding** shares are shares that are currently held by shareholders. The distinctions between these terms are important. For example, a corporation pays cash, property, and share dividends only on outstanding shares. Only outstanding shares may be voted at a shareholders' meeting.

Canceled Shares Sometimes, a corporation will purchase its own shares. A corporation may cancel repurchased shares. Canceled shares do not exist: they are neither authorized, issued, nor outstanding. Since canceled shares do not exist, they cannot be reissued.

Shares Restored to Unissued Status Repurchased shares may be restored to unissued status instead of being canceled. If this is done, the shares are merely authorized and they may be reissued at a later time.

Treasury Shares If repurchased shares are neither canceled nor restored to unissued status, they are called **treasury shares.** Such shares are authorized and issued, but not outstanding. They may be sold by the corporation at a later time. The corporation may not vote them at shareholders' meetings, and it may not pay a cash or property dividend on them.

The MBCA abolishes the concept of treasury shares. It provides that repurchased shares are restored to unissued status and may be reissued, unless the articles of incorporation require cancellation.

Options, Warrants, and Rights

Equity securities include options to purchase common shares and preferred shares. The MBCA expressly permits the board of directors to issue **options** for the purchase of the corporation's shares. Share options are often issued to top-level managers as an incentive to increase the profitability of the corporation. An increase in profitability should increase the market value of the corporation's shares, resulting in increased compensation to the employees who own and exercise share options.

Warrants are options evidenced by certificates. They are sometimes part of a package of securities sold as a unit. For example, they may be sold along with notes, bonds, or even shares. Underwriters may receive warrants as part of their compensation for aiding a corporation in selling its shares to the public.

Rights are short-term certificated options that are usually transferable. Rights are used to give present security holders an option to subscribe to a proportional quantity of the same or a different security of the corporation. They are most often issued in connection with a **preemptive right** requirement, which obligates a corporation to offer each existing shareholder the opportunity to buy the corporation's newly issued shares in the same proportion as the shareholder's current ownership of the corporation's shares.

Debt Securities

Corporations have inherent power to borrow money necessary for their operations by issuing debt securities. Debt securities create a debtor–creditor relationship between the corporation and the security holder. With the typical debt security, the corporation is obligated to pay interest periodically and to pay the amount of the debt (the principal) on the maturity date. Debt securities include debentures, bonds, and notes payable.

Debentures are long-term, unsecured debt securities. Typically, a debenture has a term of 10 to 30 years. Debentures usually have indentures. An indenture is a contract that states the rights of the debenture holders. For example, an indenture defines what acts constitute

default by the corporation and what rights the debenture holders have upon default. It may place restrictions on the corporation's right to issue other debt securities.

Bonds are long-term, secured debt securities that usually have indentures. They are identical to debentures except that bonds are secured by collateral. The collateral for bonds may be real property such as a building, or personal property such as a commercial airplane. If the debt is not paid, the bondholders may force the sale of the collateral and take the proceeds of the sale.

Generally, **notes** have a shorter duration than debentures or bonds. They seldom have terms exceeding five years. Notes may be secured or unsecured.

It is not uncommon for notes or debentures to be **convertible** into other securities, usually preferred or common shares. The right to convert belongs to the holder of the convertible note or debenture. This conversion right permits an investor to receive interest as a debt holder and, after conversion, to share in the increased value of the corporation as a shareholder.

Consideration for Shares

The board of directors has the power to issue shares on behalf of the corporation. The board must decide at what *price* and for what *type of consideration* it will issue the shares. Corporation statutes restrict the discretion of the board in accepting specified kinds of consideration and in determining the value of the shares it issues.

Quality of Consideration for Shares

Not all kinds of consideration in contract law are acceptable as legal consideration for shares in corporation law. To protect creditors and other shareholders, the statutes require legal consideration to have *real value.* Modern statutes, however, place few limits on the type of consideration that may be received for shares. The MBCA permits shares to be issued in return for any tangible or intangible *property* or *benefit to the corporation,* including cash, promissory notes, services performed for the corporation, contracts for services *to be performed* for the corporation, and securities of the corporation or another corporation. The rationale for the MBCA rule is a recognition that future services and promises of future services have value that is as real as that of tangible property. Consequently, for example, a corporation may issue common shares to its president in exchange for the president's commitment to work for the corporation for three years or in exchange for bonds of the corporation or debentures issued by another corporation. In addition, the MBCA permits corporations to issue shares to their promoters in consideration for their promoters' preincorporation services. This rule acknowledges that a corporation benefits from a promoter's preincorporation services.

Several states' constitutions place stricter limits on permissible consideration for shares. They provide that shares may be issued only for money paid to the corporation, labor done for the corporation, or property actually received by the corporation. Such a rule prohibits a corporation from issuing its shares for a promise to pay money or a promise to provide services to the corporation in the future.

Quantity of Consideration for Shares

The board is required to issue shares for an adequate dollar amount of consideration. Whether shares have been issued for an adequate amount of consideration depends in part on the *par value* of the shares. The more important concern, however, is whether the shares have been issued for *fair value.*

Par Value Par value is an arbitrary dollar amount that may be assigned to the shares by the articles of incorporation. Par value does not reflect the fair market value of the shares, but par value is the minimum amount of consideration for which the shares may be issued.

Shares issued for less than par value are called **discount shares.** The board of directors is liable to the corporation for issuing shares for less than par value. A shareholder who purchases shares from the corporation for less than par value is liable to the corporation for the difference between the par value and the amount she paid.

Fair Value It is not always enough, however, for the board to issue shares for their par value. Many times, shares are worth more than their par value. In addition, many shares today do not have a par value. In fact, the MBCA purports to eliminate the concept of par value as it affects the issuance of shares. In all cases, the

board must exercise care to ensure that the corporation receives the *fair value* of the shares it issues. If there are no par value problems, the board's judgment as to the amount of consideration that is received for the shares is *conclusive* when the board acts in good faith, exercises the care of ordinarily prudent directors, and acts in the best interests of the corporation.

Disputes may arise concerning the value of property that the corporation receives for its shares. The board's valuation of the consideration is conclusive if it acts in good faith with the care of prudent directors and in a manner it reasonably believes to be in the best interests of the corporation. When the board impermissibly overvalues the consideration for shares, the shareholder receives **watered shares.** Both the board and the shareholder are liable to the corporation when there is a watered shares problem.

When a shareholder pays less than the amount of consideration determined by the board of directors, the corporation or its creditors may sue the shareholder to recover the deficit. When a shareholder has paid the proper amount of consideration, the shares are said to be *fully paid and nonassessable.*

In the *Haft* case, which follows, the court held that shares were validly issued for services rendered to the corporation.

Haft v. Dart Group Corp. *841 F.Supp. 549 (D. Del. 1993)*

Herbert Haft owned 57 percent of the outstanding shares of Dart Group Corporation; he was also chairman of the board and chief executive officer of Dart. Dart was a family corporation holding a majority interest in several other corporations, including Crown Books Corporation, a Dart subsidiary operating a chain of retail book stores.

On February 28, 1987, Herbert's son Robert Haft assumed the positions of president and chief executive officer of Crown. For the following two years, Robert Haft served as president and CEO. On June 7, 1989, Crown's board of directors authorized the issuance of 100,000 common shares to Robert Haft for a total price of $203,750. The terms of the issuance were contained in an incentive stock agreement, and the issuance was effected on August 30, 1989. The incentive stock agreement acknowledged payment by Robert Haft "in sum of $203,750, in the form of an unsecured, noninterest-bearing promissory note due January 2, 2004, in full payment of the shares." Crown issued Stock Certificate No. 5464 to Robert Haft, representing 100,000 shares of Crown common stock.

In 1993, relations between Herbert and Robert Haft soured when a Wall Street Journal *article, based on an interview with Robert Haft, referred to Robert Haft as "de facto chief executive" of Dart. Herbert resolved to oust Robert from his positions as president and CEO of Crown. On June 30, 1993, Robert Haft was removed as president and CEO of Crown; Herbert Haft was elected in his place. On August 4, Crown sought to cancel Robert Haft's purchase of the 100,000 common shares on the grounds that Robert Haft did not pay legal consideration for the shares. Robert Haft then sued Dart and Crown for breach of the incentive stock agreement. The trial court considered whether Robert Haft had paid legal consideration for the shares.*

Schwartz, District Judge Article IX of the Delaware Constitution requires certain types of consideration for stock: "No corporation shall issue stock, except for money paid, labor done or personal property, or real estate or leases thereof actually acquired by such corporation."

The Incentive Stock Agreement between Crown and Haft provides that "the Corporation hereby acknowledges payment by Haft of the sum of $203,750, in the form of a noninterest-bearing promissory note due January 2, 2004, in full payment of the Shares." Crown notes that, in Delaware, "a promissory note, being a mere unsecured promise to pay, is not property actually acquired by the corporation" and thus not valid consideration. That Haft tendered such a note, however, does not end the inquiry. Haft alleges other, potentially valid forms of consideration which may be sufficient to support the stock issuance by themselves. The question becomes, then, whether Haft's past services can constitute valid consideration for the issuance of his shares under the agreement.

A corporation may compensate its officers and agents for services rendered. Such compensation

may include stock option, stock incentive, and other compensation plans. In addition, the General Corporation Law confers broad discretion upon a corporation, through its directors, when it contracts to issue stock, stock options, and other rights in stock. Most significantly, in the absence of actual fraud in the transaction, the judgment of the directors as to the value of such consideration shall be conclusive.

The Incentive Stock Agreement provides for the issuance of shares "in recognition of Robert M. Haft's contribution to the Corporation," in other words, in recognition of his past services rendered. Past services constitute valid consideration as "labor done." Haft had performed some services for Crown prior to the issuance of his shares. Because this consideration exists, the judgment of Crown's directors as to its value is conclusive in the absence of actual fraud. In order to establish actual fraud, however, Crown must make two showings: first, Crown must offer evidence of "gross overvaluation," which would establish constructive fraud; and second, Crown must allege other facts which, considered in connection with the "gross overvaluation," may be grounds for inferring actual fraud. A showing of no more than excessive valuation is insufficient to overcome the conclusiveness of the directors' judgment.

Crown, asserting the defense of lack of consideration, bears the burden of proving that defense. Crown has neither pleaded facts nor placed any evidence in the record which would suggest actual fraud in the formation of the Incentive Stock Agreement. Summary judgment on the applicability of this defense must therefore be granted Haft.

Motion for summary judgment granted to Haft.

Accounting for Consideration Received The consideration received by a corporation for its equity securities appears in the equity or capital accounts in the shareholders' equity section of the corporation's balance sheet. The **stated capital** account records the product of the number of shares outstanding multiplied by the par value of each share. When the shares are sold for more than par value, the excess or surplus consideration received by the corporation is **capital surplus.**

Under the MBCA, the terms *stated capital* and *capital surplus* have been eliminated. All consideration received for shares is lumped under one accounting entry for that class of shares, such as common equity.

Resales of Shares The par value of shares is important *only when the shares are issued* by the corporation. Since treasury shares are issued but not outstanding, the corporation does not issue treasury shares when it resells them. Therefore, the board may sell treasury shares for less than par, provided that it sells the shares for an amount equal to their fair value.

Because par value and fair value are designed to ensure only that the corporation receives adequate consideration for its shares, a shareholder may buy shares from another shareholder for less than par value or fair value and incur no liability. However, if the purchasing shareholder *knows* that the selling shareholder bought the shares from the corporation for less than par value, the purchasing shareholder is liable to the corporation for the difference between the par value and the amount paid by the selling shareholder.

Share Subscriptions

Under the terms of a **share subscription,** a prospective shareholder promises to buy a specific number of shares of a corporation at a stated price. If the subscription is accepted by the corporation and the subscriber has paid for the shares, the subscriber is a shareholder of the corporation, even if the shares have not been issued. Under the MBCA, subscriptions need not be in writing to be enforceable. Usually, however, subscriptions are written.

Promoters use written share subscriptions in the course of selling shares of a proposed corporation to ensure that equity capital will be provided once the corporation comes into existence. These are called **preincorporation subscriptions,** which were covered in this chapter's discussion of promoters. Preincorporation subscriptions are not contracts binding on the corporation and the shareholders until the corporation comes into existence and its board of directors accepts the share subscriptions.

Close corporations may use share subscriptions when they seek to sell additional shares after incorporation.

These are examples of **postincorporation subscriptions,** subscription agreements made *after* incorporation. A postincorporation subscription is a contract between the corporation and the subscriber at the time the subscription agreement is made.

A subscription may provide for payment of the price of the shares on a specified day, in installments, or upon the demand of the board of directors. The board may not discriminate when it demands payment: It must demand payment from all the subscribers of a class of shares or from none of them.

A share certificate may not be issued to a share subscriber until the price of the shares has been fully paid. If the subscriber fails to pay as agreed, the corporation may sue the subscriber for the amount owed.

Issuance of Shares

Uniform Commercial Code (UCC) Article 8 regulates the issuance of securities. Under Article 8, a corporation has a duty to issue only the number of shares authorized by its articles. Overissued shares are void.

When a person is entitled to overissued shares, the corporation may not issue the shares. However, the person has two remedies. The corporation must obtain identical shares and deliver them to the person entitled to issuance or the corporation must reimburse the person for the value paid for the shares plus interest.

The directors may incur liability, including criminal liability, for an overissuance of shares. To prevent overissuance through error in the issuance or transfer of their shares, corporations often employ a bank or a trust company as a registrar.

A share certificate is evidence that a person has been issued shares, owns the shares, and is a shareholder. The certificate states the corporation's name, the shareholder's name, and the number and class of shares. A person can be a shareholder without receiving a share certificate, such as a holder of a share subscription. Under the MBCA, a corporation is not required to issue share certificates.

Transfer of Shares

Because share certificates are evidence of the ownership of shares, their transfer is evidence of the transfer of the ownership of shares. UCC Article 8 covers the registration and transfer of shares, as represented by certificates.

Share certificates are issued in *registered* form; that is, they are registered with the corporation in the name of a specific person. The indorsement of a share certificate on its back by its registered owner and the delivery of the certificate to another person transfers ownership of the shares to the other person. The transfer of a share certificate without naming a transferee creates a *street certificate.* The transfer of a street certificate may be made by delivery without indorsement. Any holder of a street certificate is presumed to be the owner of the shares it represents. Therefore, a transferee should ask the corporation to reregister the shares in his name.

Under the UCC, a corporation owes a duty to register the transfer of any registered shares presented to it for registration, provided that the shares have been properly indorsed. If the corporation refuses to make the transfer, it is liable to the transferee for either conversion or specific performance.

When an owner of shares claims that his certificate has been lost, destroyed, or stolen, the corporation must issue a new certificate to the owner if the corporation has not received notice that the shares have been acquired by a bona fide purchaser, the owner files with the corporation a sufficient indemnity bond, and the owner meets any other reasonable requirements of the corporation. A **bona fide purchaser** is a purchaser of the shares for value in good faith with no notice of any adverse claim against the shares.

If, after the issuance of the new certificated shares, a bona fide purchaser of the original shares presents them for registration, the corporation must register the transfer, unless overissuance would result. In addition, the corporation may recover the new certificated shares from the original owner.

Restrictions on Transferability of Shares

Historically, a shareholder has been free to sell her shares to whomever she wants whenever she wants. The courts have been reluctant to allow restrictions on the free transferability of shares, even if the shareholder agreed to a restriction on the transfer of her shares. Gradually, the courts and the legislatures have recognized that there are good reasons to permit the use of some restrictions on the transfer of shares. Today, modern corporation statutes allow most transfer restrictions, especially for close corporations.

Types of Restrictions on Transfer There are four categories of transfer restrictions that may be used to

accomplish the objectives addressed above: (1) rights of first refusal and option agreements, (2) buy-and-sell agreements, (3) consent restraints, and (4) provisions disqualifying purchasers.

A **right of first refusal** grants to the corporation or the other shareholders the right to match the offer that a selling shareholder receives for her shares. An **option agreement** grants the corporation or the other shareholders an option to buy the selling shareholder's shares at a price determined by the agreement. An option agreement will usually state a formula used to calculate the price of the shares.

A **buy-and-sell agreement** compels a shareholder to sell his shares to the corporation or to the other shareholders at the price stated in the agreement. It also obligates the corporation or the other shareholders to buy the selling shareholder's shares at that price. The price of the shares is usually determined by a stated formula.

A **consent restraint** requires a selling shareholder to obtain the consent of the corporation or the other shareholders before she may sell her shares. A **provision disqualifying purchasers** may be used in rare situations to exclude unwanted persons from the corporation. For example, a transfer restriction may prohibit the shareholders from selling to a competitor of the business.

Uses of Transfer Restrictions A corporation and its shareholders may use transfer restrictions to maintain the balance of shareholder power in the corporation. For example, four persons may own 25 shares each in a corporation. No single person can control such a corporation. If one of the four can buy 26 additional shares from the other shareholders, he will acquire control. The shareholders may therefore agree that each shareholder is entitled or required to buy an equal amount of any shares sold by any selling shareholder. The right of first refusal, option agreement, or buy-and-sell agreement may serve this purpose.

A buy-and-sell agreement is the preferred transfer restriction for nearly every context in well-planned close corporations, because certainty is obtained by both sides being obligated, one required to buy and the other to sell. For example, a buy-and-sell agreement may be used to guarantee a shareholder a market for his shares. In a close corporation, there may be no ready market for the shares of the corporation. To ensure that a shareholder can obtain the value of her investment upon her retirement or death, the shareholders or the corporation may be required to buy a shareholder's shares upon the occurrence of a specific event such as death or retirement.

A buy-and-sell agreement may also be used to determine who should be required to sell and who should be required to buy shares when there is a severe disagreement between shareholders that threatens the profitability of the corporation. It could also be worded to require majority shareholders to buy the shares of minority shareholders when a lucrative merger offer for the corporation is rejected by the majority but favored by the minority. The agreement could set the buyout price as the price offered in the merger.

If minority shareholders are afraid of being frozen in a close corporation that will never go public and give shareholders a chance to sell their shares on the market and get a return on investment, a buy-and-sell agreement could require the corporation to repurchase the minority's shares if the corporation has not gone public after a specified number of years.

In a close corporation, the shareholders may want only themselves or other approved persons as shareholders. A buy-and-sell agreement or right of first refusal may be used to prevent unwanted persons from becoming shareholders.

A provision disqualifying purchasers may be used in limited situations only, such as when the purchaser is a competitor of the business or has a criminal background.

A consent restraint is used to preserve a close corporation or Subchapter S taxation election. Close corporation statutes and Subchapter S of the Internal Revenue Code limit the number of shareholders that a close corporation or S Corporation may have. A transfer restriction may prohibit the shareholders from selling shares if, as a result of the sale, there would be too many shareholders to preserve a close corporation or S Corporation election. A consent restraint is also used to preserve an exemption from registration of a securities offering. Under the Securities Act of 1933 and the state securities acts, an offering of securities is exempt from registration if the offering is to a limited number of investors, usually 35. A transfer restriction may require a selling shareholder to obtain permission from the corporation's legal counsel, which permission will be granted upon proof that the shareholder's sale of the shares does not cause the corporation to lose its registration exemption.

Legality of Transfer Restrictions Corporation statutes permit the use of option agreements, rights of first refusal, and buy-and-sell agreements with virtually

no restrictions. The MBCA authorizes transfer restrictions for any reasonable purpose. The reasonableness of a restraint is judged in light of the character and needs of the corporation.

Consent restraints and provisions disqualifying purchasers may be used if they are not *manifestly unreasonable.* The MBCA makes per se reasonable any consent restraint that maintains a corporation's status when that status is dependent on the number or identity of shareholders, as with close corporation or S Corporation status. The MBCA also makes per se reasonable any restriction that preserves registration exemptions under the Securities Act of 1933 and state securities laws.

Enforceability To be enforceable against a shareholder, a transfer restriction must be contained in the articles of incorporation, the bylaws, an agreement among the shareholders, or an agreement between the corporation and the shareholders. In addition, the shareholder must either agree to the restriction or purchase the shares with notice of the restriction. Under the MBCA, a purchaser of the shares has notice of a restriction if it is noted conspicuously on the face or the back of a share certificate or if it is a restriction of which he has knowledge.

In the following *Stufft* case, the court considered whether a right of first refusal was invoked by the corporation's decision to sell all its assets and to dissolve.

Stufft v. Stufft *916 P.2d 104 (Mont. Sup. Ct. 1996)*

Stufft Farms, Inc., was a Montana corporation that owned and operated a family farm. Esther Stufft owned 17,077 shares of the corporation, Carmen Stufft 17,018 shares, Carol Stufft Larson 20 shares, Dorene Stufft Badgett 20 shares, and David Stufft 20 shares. To maintain control of the corporation in the hands of the Stufft family, the bylaws of the corporation included a right of first refusal share transfer restriction. Article XII, entitled Restrictions on Transfer of Shares, reads in relevant part:

> No shareholder shall have the right or power to pledge, sell or otherwise dispose of, except by will, any share or shares of this company, without first offering the said share or shares for sale to the company and shareholders at the then book value.

On December 27, 1994, the board of directors of Stufft Farms adopted a resolution to dissolve and liquidate the corporation. Neil Johnson emerged as a possible purchaser of the corporation's assets, but tax considerations caused the shareholders to consider selling their shares instead of the corporation's assets. On February 24, 1995, Johnson offered to buy all of Stufft Farms's shares; the offer was contingent on all shareholders selling their shares to Johnson. All the shareholders, except David Stufft, agreed to accept Johnson's offer. On March 9, 1995, David Stufft attempted to invoke Article XII of the bylaws and to exercise his right of first refusal to buy the other shareholders' shares. David Stufft argued that the other shareholders' acceptance of Johnson's offer to buy their stock triggered Article XII, giving him a right of first refusal to purchase their stock at book value. The other shareholders refused David Stufft's demand to sell to them at book value, and instead, they offered to sell their shares to David Stufft at the same price Johnson offered. David Stufft rejected their offer, and the other shareholders elected not to sell their shares to anyone. On March 27, 1995, the board of directors approved the sale of Stufft Farms's assets to Johnson. David Stufft sued the other shareholders and Stufft Farms to void the asset sale to Johnson on the grounds that his rights under Article XII made him the equitable owner of all the shares. He argued that only he should have been entitled to vote all the shares of stock and, therefore, the agreement to sell the corporation's assets to Johnson was void. The district court dismissed David Stufft's suit, and he appealed to the Supreme Court of Montana.

Turnage, Chief Justice David Stufft argues that his right of first refusal was triggered by the other stockholders' acceptance of Johnson's February 24, 1995, offer to purchase all of the corporation's outstanding stock, and again by the March 10, 1995 offer of the majority stockholders to sell their stock to him at the price at which the stock had been offered to Johnson, a price not shown or claimed to be book value. He maintains that the right of first refusal is triggered by a willingness, a desire, or an attempt by stockholders to dispose of their stock, citing *Weintz v. Bumgarner* (Mont. Sup. Ct. 1967).

A critical distinction between *Weintz* and the present case is that in *Weintz,* not only was there a willingness to sell on the part of the property owners, but actual agreements were reached to sell the various interests in the subject property. In the present case, no agreements were reached to sell the stock at issue.

Johnson's offer to purchase the stock in Stufft Farms, Inc., was an offer to purchase *all* of the stock in the corporation. Johnson's offer was not accepted by shareholder David Stufft. Because of the contingent nature of Johnson's offer, when Stufft elected not to sell, Johnson's offer to buy was withdrawn. Therefore, no agreement was reached. The corporation did not accept Johnson's offer.

Similarly, the other shareholders' March 10 offer to sell stock to David Stufft on the same terms as those offered by Johnson was counteroffer to David Stufft's March 9 offer to purchase the stock at book value. David Stufft's offer was not accepted. The counteroffer was not accepted.

Stufft's right of first refusal to purchase Stufft Farms, Inc., stock was not triggered, because the other shareholders did not "pledge, sell or otherwise dispose of" their shares of stock. The other stockholders still own their stock in the corporation.

Stufft also contends that the other shareholders and Johnson are attempting to circumvent his right of first refusal. The District Court noted:

> The court is very aware of the purpose of corporate restrictive stock transfer bylaws and in particular those of a closely held family corporation. The purpose of such restrictions is to facilitate keeping the corporation closely held and to restrict the transfer of stock beyond family members. Such restrictive agreements and bylaws are specifically allowed under Montana law. However, neither the state statute nor restrictive agreements were intended to prohibit liquidation of a corporation and the sale of its assets.

We agree. The wording of Article XII does not suggest that it applies to an intended sale of the entire corporation or its assets. We conclude that David Stufft's right of first refusal was not violated.

Judgment for the other shareholders affirmed.

Statutory Solution to Close Corporation Share Transfer Problems Although transfer restrictions are important to close corporations, many close corporation shareholders fail to address the share transferability problem. Therefore, a few states provide statutory resolution of the close corporation transferability problem. In these states, statutes offer solutions to the transferability problem that are similar to the solutions that the shareholders would have provided had they thought about the problem. Not all transferability problems are settled by the Close Corporation Supplement, however. For example, there is no statutory buy-and-sell provision.

Financing Nonprofit Corporations

Nonprofit corporations are financed differently from for-profit corporations. This is especially true of a public benefit corporation such as a public television station, which obtains annual financing from government sources, private foundations, members, and public contributors. A religious corporation such as a church receives weekly offerings from its congregation and may occasionally conduct capital drives to obtain additional funding from its members. A mutual benefit corporation, such as a fraternal or social organization like an Elks Club or golf country club, obtains initial funding from its original members to build facilities and assesses its members annually and monthly to pay operating expenses. In addition, nonprofit corporations have the power to obtain debt financing, such as borrowing from a bank or issuing notes and debentures.

A nonprofit corporation may admit members whether or not they pay consideration for their membership. There is no statutory limit on the number of members a nonprofit corporation may admit, although the articles may place a limit on the number of members. Social clubs typically limit the number of members. Members must be admitted in compliance with procedures stated in the articles or the bylaws.

Generally, memberships in a nonpublic corporation are not freely transferable. No member of a public benefit corporation or religious corporation may transfer her membership or any rights she possesses as a member. A member of a mutual benefit corporation may transfer her membership and rights only if the

articles or bylaws permit. When transfer rights are permitted, restrictions on transfer are valid only if approved by the members, including the affected member.

Ethical and Public Policy Concerns

1. Suppose that a promoter of a prospective business, Promoter 1, chooses to incorporate the business prior to making any contracts for the prospective business. Because incorporation is a fairly simple process, Promoter 1 has done little more than Promoter 2, who makes preincorporation contracts. Yet Promoter 1 will not ordinarily have liability on contracts signed in the name of the corporation, while Promoter 2 will have liability. Does this distinction seem fair to both promoters? Is it fair to other parties to the contract? Would your answers change if Promoter 1 incorporated the business with the minimum amount of capital required by the incorporation statute and then negotiated contracts obligating the business in amounts exceeding $100,000?

2. Under the Model Business Corporation Act, investors who believe that they have contributed capital to a corporation have no personal liability for the debts of the corporation even if it has been defectively formed. Why should such investors not be held liable as partners? Is it fair that the defectively formed corporation's creditors cannot sue the investors? Should it matter whether the investors are involved in the operation of the defectively formed corporation? Should it matter whether the creditors believed there was no corporation and thought the investors were partners? Should it matter whether the creditors are contract creditors (who could have checked into the status of the corporation and its investors prior to contracting with the business) or tort creditors (who have little ability to investigate the corporation and its investors prior to being injured by the person acting on behalf of the defectively formed corporation)?

3. Why should the law impose limits on the use of share transfer restrictions? Who may be harmed if there are no legal limits? Is it possible for those who would be harmed to be protected in ways other than by limiting the use of share transfer restrictions?

Problems and Problem Cases

1. Joe Smith, Steve Smith, and Joe Bitter planned to open a bar in a college town. In the name of Gomer's, Inc., a corporation not yet formed, all three signed an offer to purchase a building in which to operate the bar. After Gomer's, Inc., was incorporated, the Smiths as corporate officers signed a contract to purchase the building in the name of Gomer's, Inc. Differences developed between the Smiths and Bitter. As shareholders and officers, the Smiths took control of the corporation, including the building. Bitter sued the Smiths arguing that the Smiths and Bitter collectively as individuals owned the building, not the corporation they formed. Was Bitter correct?

2. Garry Fox met with Coopers & Lybrand to request a tax opinion and other accounting services. Fox told Coopers that he was acting on behalf of a corporation that he was in the process of forming, to be named G. Fox and Partners, Inc. Coopers knew that the corporation was not in existence. Fox and Coopers had no agreement regarding Fox's personal liability for payment of the fee for the services. G. Fox and Partners, Inc., was incorporated, and a few weeks later Coopers completed its work. The corporation did not pay for the work, so Coopers sued Fox. Is Fox liable to Coopers?

3. Stuart Lakes Club, Inc., a New York corporation, was a private game club owning 75 acres of land, two lakes, and a clubhouse. The board of directors adopted a bylaw provision that stated, "When any member ceases to be a member of the Club, either by death, resignation, or otherwise, his share shall be considered void and the certificate returned to the Treasurer for cancellation." The purpose of the bylaw provision was to make the last surviving member of the club its sole owner and therefore the beneficial owner of the club's valuable land and clubhouse. Has the board of directors adopted an enforceable bylaw?

4. Warthan and Knettel owned an insurance agency in St. Cloud, Minnesota. Koltes, McMahill, and Ketlin owned an insurance agency in Minnetonka, Minnesota. They agreed to transfer their businesses to a newly formed corporation, to be named Midwest Consolidated Insurance Agencies, Inc. (MCIA), equally owned by the St. Cloud and the Minnetonka groups. Articles of incorporation for MCIA were filed with the Minnesota secretary of state. The two groups had difficulties combining their operations. No shares of stock were issued, and no formal shareholder or directors' meetings were held. Although bylaws were drafted, they were never approved. Has MCIA's existence begun?

5. On August 30, the secretary of state filed the articles of incorporation of AC&C Wreckers, Inc. AC&C

failed, however, to submit a copy of its articles for filing with the county recorder and to publish the articles of incorporation in a newspaper, as required by the state's corporation law. Nonetheless, AC&C transacted business as a corporation and had its own assets. The following February, an AC&C employee was injured on the job. He sued AC&C's majority shareholder—Collins—alleging that Collins was liable because AC&C was not properly incorporated. Is Collins liable to the employee?

6. Eastern Oklahoma Television Corporation was incorporated to operate KTEN, a television station. To assist the station's start-up, Bill Hoover, an owner and operator of a radio station, pledged his radio station as collateral for KTEN's obligations, personally guaranteed the new corporation's obligations for the purchase of equipment, designed the television studio, planned operations, and hired and trained personnel. Hoover also became a director of the corporation. By action of the board of directors, the corporation issued some of the common shares to Hoover in consideration for his experience in broadcasting, his standing with the Federal Communications Commission, and his personal guarantee of the station's debt. Has Hoover paid a proper type of consideration for the shares?

7. Kirk's Auto Electric, Inc., issued 11 shares of common stock to Billy Bone, 10 shares to Andre Bone, and 5 shares to Joe Bone. In exchange, the Bones gave the corporation unsecured interest-bearing promissory notes payable on demand. No payments were ever made on the notes. Have the Bones paid proper consideration for the shares?

8.  *Video Case.* See "The Stock Option." An employee of FAMCO purchases common shares of FAMCO through its fringe benefit plan. Transfer of the shares purchased under the plan is restricted in two ways. First, when employment terminates for any reason, FAMCO has an option to purchase the shares at book value. Second, if an employee attempts to sell the shares while employed, FAMCO has a right of first refusal to purchase the shares at the sale price. FAMCO informs an employee that for the good of the company, she must sell her shares to FAMCO. She believes that she will be terminated unless she sells the shares to FAMCO, but nonetheless she sells the shares on the open market at a price much greater than book value. Can FAMCO invalidate the employee's sale of the shares?

9. Bruce Bowman received 1,500 shares of Ling and Company Class A common shares. The shares were the subject of an option agreement contained in the articles of incorporation requiring Bowman to offer the shares to the corporation before selling them to any other person. On the front of Bowman's share certificate, in small print, it was stated that transfer of the shares was subject to the provisions of the articles, that a copy of the articles could be obtained from Ling or from the secretary of state, and that the back of the share certificate stated which sections of the articles contained the content of the option agreement. On the back of the share certificate, in small print, the reference to the restriction was again made, and specific reference was given to Article 4 of the articles of incorporation, in which the restriction was contained. Bowman borrowed money from Trinity Savings and Loan. When Bowman defaulted on the loan, Trinity attempted to sell the shares, but Ling objected, invoking the option agreement. Is the option agreement enforceable against Trinity?

10. Alice Marr owned 800 of the 11,340 shares outstanding of Gloucester Ice & Storage Co., a closely held corporation with no ready market for its shares. When Marr died, Thomas Goode, the administrator of her will, demanded that Gloucester or its majority shareholder purchase Marr's shares. No provision restricting the transfer of shares or requiring the corporation or remaining shareholders to purchase shares on the death of a shareholder appeared in the corporation's articles of incorporation, bylaws, or agreement among shareholders. Is Gloucester or its majority shareholder required to purchase Marr's shares at fair market value?

Chapter Forty-Two

Management of Corporations

Chapter Outline

I. Corporate Objectives

II. Corporate Powers
- A. *Purpose Clauses in Articles of Incorporation*
  - 1. *The* Ultra Vires *Doctrine*

III. Powers of Nonprofit Corporations

IV. The Board of Directors
- A. *Board Authority under Corporation Statutes*
- B. *Committees of the Board*
- C. *Powers, Rights, and Liabilities of Directors as Individuals*
- D. *Election of Directors*
  - 1. *The Proxy Solicitation Process*
  - 2. *Management Solicitation of Proxies*
- E. *Vacancies on the Board*
- F. *Removal of Directors*

V. Directors' Meetings

VI. Officers of the Corporation

VII. Managing Close Corporations

VIII. Managing Nonprofit Corporations

IX. Directors' and Officers' Duties to the Corporation

- C. *Insurance*
- D. *Nonprofit Corporations*

Although shareholders own a corporation, they traditionally have possessed no right to manage the business of the corporation. Instead, shareholders elect individuals to a *board of directors,* to which management is entrusted. Often, the board delegates much of its management responsibilities to *officers.*

This chapter explains the legal aspects of the board's and officers' management of the corporation. Their management of the corporation must be consistent with the objectives and powers of the corporation, and they owe duties to the corporation to manage it prudently and in the best interests of the corporation and the shareholders as a whole.

Corporate Objectives

The traditional objective of the business corporation has been to *enhance corporate profits and shareholder gain.* According to this objective, the managers of a corporation must seek the accomplishment of the profit objective to the exclusion of all inconsistent goals. Interests other than profit maximization may be considered, provided that they do not hinder the ultimate profit objective.

Nonetheless, some courts have permitted corporations to take *socially responsible actions* that are *beyond the profit maximization requirement.* In addition, every state recognizes corporate powers that are not economically inspired. For example, corporations may make contributions to colleges, political campaigns, child abuse prevention centers, literary associations, and employee benefit plans, regardless of economic benefit to the corporations. Also, every state expressly recognizes the right of shareholders to choose freely the extent to which profit maximization captures all of their interests and all of their sense of responsibility.

In the following *Revlon* case, the court held that the board of directors acted improperly by failing to maximize shareholder profit.

Revlon Inc. v. MacAndrews & Forbes Holdings, Inc. *506 A.2d 173 (Del. Sup. Ct. 1986)*

In 1985, Pantry Pride, Inc., informed Revlon, Inc., of its intent to acquire Revlon. Pantry Pride planned to "bust up" Revlon after the acquisition by selling its various lines of businesses individually. Revlon's board of directors rejected Pantry Pride's plan. Nonetheless, Pantry Pride made a hostile takeover bid for Revlon's shares at $47.50 per share.

In response to Pantry Pride's bid, Revlon's board sought to reduce the number of shares Pantry Pride could acquire by repurchasing some of its shares in exchange for new Senior Notes. The contract with the new Senior Noteholders protected the noteholders with covenants limiting Revlon's ability to incur more debt, sell assets, or pay dividends. The covenants, however, could be waived by the board's independent directors.

When this defense failed to deter Pantry Pride, the board recognized that a takeover was inevitable. Consequently, the board agreed to a friendly acquisition by Forstmann Little & Co. for $56 per share. Realizing the inevitability of a bust-up, Revlon's board agreed to break up its assets by selling its cosmetic division; Forstmann planned to sell two other divisions after the purchase.

In addition, Revlon's independent directors agreed to waive the Senior Note covenants. As a result, the value of the Senior Notes dropped 12 percent. Angry Senior Noteholders threatened to sue Revlon's directors. Concerned about their personal liability to the Senior Noteholders, the Revlon directors amended their agreement with Forstmann. Forstmann increased its offer to $57.25 per share and agreed to support the value of the Senior Notes. In return, Revlon gave Forstmann a lock-up option, promising to sell two valuable divisions to Forstmann at nearly $200 million below their market value if Pantry Pride was successful in taking over Revlon.

Pantry Pride sued Revlon to invalidate the lock-up option as beyond the objectives of the corporation. The trial court enjoined Revlon's directors from making concessions to Forstmann. Revlon appealed to the Supreme Court of Delaware.

Moore, Justice The lock-up with Forstmann had as its emphasis shoring up the market value of the Senior Notes. The directors made support of the Senior Notes an integral part of the company's dealings with Forstmann, even though their primary responsibility at this stage was to the shareholders.

The original threat posed by Pantry Pride—the break-up of the company—had become a reality that even the directors embraced. Selective dealing to fend off a hostile bidder was no longer a proper objective. Instead, obtaining the highest price for the benefit of the shareholders should have been the central theme guiding director action.

The Revlon board argued that it acted in good faith in protecting the Senior Noteholders because Delaware law permits consideration of other corporate constituencies. Although such considerations may be permissible, there are fundamental limitations upon that prerogative. A board may have regard for various constituencies, provided there are

rationally related benefits accruing to the shareholders. However, such concern for non-shareholder interests is inappropriate when an auction among active bidders is in progress, and the object no longer is to protect or maintain the corporate enterprise but to sell it to the highest bidder.

Revlon also contended that it had contractual obligations to the Senior Noteholders. However, any such duties are limited to the principle that one may not interfere with contractual relationships by improper actions. Here the rights of the Senior Noteholders were fixed by agreement, and there is nothing to suggest that any of those terms were violated. The Senior Notes covenants specifically contemplated a waiver.

In granting an asset option lock-up to Forstmann, the directors allowed considerations other than the maximization of shareholder profit to affect their judgment to the ultimate detriment of shareholders. No such defensive measure can be sustained.

Judgment for Pantry Pride affirmed.

The decision in *Revlon* prodded most of the states to enact **corporate constituency statutes,** which broaden the legal objectives of corporations. Such statutes permit or require directors to take into account the interests of constituencies other than shareholders, including employees, suppliers, and customers. These statutes direct the board to act in the best interests of the corporation, not just the interests of the shareholders, and to maximize corporate profits *over the long term.* The new laws promote the view that a corporation is a collection of interests working together for the purpose of producing goods and services at a profit, and that the goal of corporate profit maximization over the long term is not necessarily the same as the goal of stock price maximization over the short term.

Corporate Powers

The actions of management are limited not only by the objectives of business corporations but also by the *powers* granted to business corporations. Such limitations may appear in the state statute, the articles of incorporation, and the bylaws.

The primary source of a corporation's powers is the corporation statute of the state in which it is incorporated. Some state corporation statutes expressly specify the powers of corporations. These powers include making gifts for charitable and educational purposes, lending money to corporate officers and directors, and purchasing and disposing of the corporation's shares. Other state corporation statutes limit the powers of corporations, such as prohibiting the acquisition of agricultural land by corporations.

Modern statutes attempt to authorize corporations to engage in any activity. The Model Business Corporation Act (MBCA) states that a corporation has the power to do *anything that an individual may do.*

Purpose Clauses in Articles of Incorporation

Most corporations state their purposes in the articles of incorporation. The purpose is usually phrased in broad terms, even if the corporation has been formed with only one type of business in mind. Most corporations have purpose clauses stating that they may engage in any lawful business.

Under the MBCA, the inclusion of a purpose clause in the articles is optional. Any corporation incorporated under the MBCA has the purpose of engaging in any lawful business, unless the articles state a narrower purpose.

The *Ultra Vires* Doctrine Historically, an act of a corporation beyond its powers was a nullity, as it was *ultra vires,* which is Latin for "beyond the powers." Therefore, any act not permitted by the corporation statute or by the corporation's articles of incorporation was void due to lack of capacity.

This lack of capacity or power of the corporation was a defense to a contract assertable either by the corporation or by the other party that dealt with the corporation. Often, *ultra vires* was merely a convenient justification for reneging on an agreement that was no longer considered desirable. This misuse of the doctrine has led to its near abandonment.

Today, the *ultra vires* doctrine is of small importance for two reasons. First, nearly all corporations

have broad purpose clauses, thereby preventing any *ultra vires* problem. Second, the MBCA and most other statutes do not permit a corporation or the other party to an agreement to avoid an obligation on the ground that the corporate action is *ultra vires.*

Under the MBCA, *ultra vires* may be asserted by only three types of persons: (1) by a shareholder seeking to enjoin a corporation from executing a proposed action that is *ultra vires,* (2) by the corporation suing its management for damages caused by exceeding the corporation's powers, and (3) by the state's attorney general, who may have the power to enjoin an *ultra vires* act or to dissolve a corporation that exceeds its powers.

Powers of Nonprofit Corporations

Nonprofit corporations, like for-profit corporations, have the power to transact business granted by the incorporation statute, the articles, and the bylaws. The Model Nonprofit Corporation Act (MNCA), like the MBCA, grants nonprofit corporations the power to engage in any lawful activity and to do anything an individual may do. Thus, a nonprofit corporation may sue and be sued, purchase, hold, and sell real property, lend and borrow money, and make charitable and other donations, among its many powers.

Commonly, a nonprofit corporation's articles will limit its powers pursuant to a purpose clause. For example, a nonprofit corporation established to operate a junior baseball league may limit its powers to that business and matters reasonably connected to it. When a nonprofit corporation limits its powers, a risk arises that the corporation may commit an *ultra vires* act. The MNCA adopts the same rules for *ultra vires* contracts as does the MBCA: Generally, neither the corporation nor the other party may use *ultra vires* as a defense to a contract.

The Board of Directors

Traditionally, the **board of directors** has had the authority and the duty to manage the corporation. Yet in a large publicly held corporation, it is impossible for the board to manage the corporation on a day-to-day basis, because many of the directors are high-level executives in other corporations and devote most of their time to their other business interests. Therefore, the MBCA permits a corporation to be managed *under the direction of* the board of directors. Consequently, the board of directors delegates major responsibility for management to committees of the board such as an executive committee, to individual board members such as the chairman of the board, and to the officers of the corporation, especially the chief executive officer (CEO). In theory, the board supervises the actions of its committees, the chairman, and the officers to ensure that the board's policies are being carried out and that the delegatees are managing the corporation prudently.

Board Authority under Corporation Statutes

A corporation's board of directors has the authority to do almost everything within the powers of the corporation. The board's authority includes not only the general power to manage or direct the corporation in the ordinary course of its business but also the power to issue shares of stock and to set the price of shares. Among its other powers, the board may repurchase shares, declare dividends, adopt and amend bylaws, elect and remove officers, and fill vacancies on the board.

Some corporate actions require *board initiative* and shareholder approval. That is, board approval is necessary to *propose such actions to the shareholders,* who then must approve the action. Board initiative is required for important changes in the corporation, such as amendment of the articles of incorporation, merger of the corporation, the sale of all or substantially all of the corporation's assets, and voluntary dissolution.

Committees of the Board

Most publicly held corporations have committees of the board of directors. These committees, which have fewer members than the board has, can more efficiently handle management decisions and exercise board powers than can a large board. Only directors may serve on board committees.

Although many board powers may be delegated to committees of the board, some decisions are so important that corporation statutes require their *approval by the board as a whole.* Under the MBCA, the powers that may not be delegated concern important corporate actions such as declaring dividends, filling vacancies on the board or its committees, adopting and amending bylaws, approving issuances of shares, and approving repurchases of the corporation's shares.

The most common board committee is the **executive committee.** It is usually given authority to act for the board on most matters when the board is not in session. Generally, it consists of the inside directors and perhaps one or two outside directors who can attend a meeting on short notice. An inside director is an officer of the corporation who devotes substantially full time to the corporation. Outside directors have no such affiliation with the corporation.

Audit committees recommend independent public accountants and supervise the public accountants' audit of the corporate financial records. Nearly all publicly held firms have audit committees comprising independent directors.

Nominating committees choose management's slate of directors that is to be submitted to shareholders at the annual election of directors. Nominating committees also often plan generally for management succession. Nominating committees wholly or largely comprise outside directors.

Compensation committees review and approve the salaries, bonuses, stock options, and other benefits of high-level corporate executives. Although compensation committees usually comprise directors who have no affiliation with the executives or directors whose compensation is being approved, compensation committees may also set the compensation of their members. Directors of a typical corporation receive annual compensation between $30,000 to $60,000.

A **shareholder litigation committee** is given the task of determining whether a corporation should sue someone who has allegedly harmed the corporation. Usually, this committee of disinterested directors is formed when a shareholder asks the board of directors to cause the corporation to sue some or all of the directors for mismanaging the corporation.

Powers, Rights, and Liabilities of Directors as Individuals

A director is not an agent of the corporation *merely* by being a director. The directors may manage the corporation only when they act as a board, unless the board of directors grants agency powers to the directors individually.

A director has the *right to inspect* corporate books and records that contain corporate information essential to the director's performance of her duties. The director's right of inspection is denied when the director has an interest adverse to the corporation, as in the case of a director who plans to sell a corporation's trade secrets to a competitor.

Normally, a director does not have any personal liability for the contracts and torts of the corporation.

Election of Directors

Generally, any individual may serve as a director of a corporation. A director need not even be a shareholder. Nonetheless, a corporation is permitted to specify qualifications for directors in the articles of incorporation.

A corporation must have the number of directors required by the state corporation law. The MBCA and several state corporation statutes require a minimum of one director, recognizing that in close corporations with a single shareholder-manager, additional board members are superfluous. Several statutes, including the New York statute, require at least three directors, unless there are fewer than three shareholders, in which case the corporation may have no fewer directors than it has shareholders.

A corporation may have more than the minimum number of directors required by the corporation statute. The articles of incorporation or bylaws will state the number of directors of the corporation. Most large publicly held corporations have boards with more than 10 members.

Directors are elected by the shareholders at the annual shareholder meeting. Usually, each shareholder is permitted to vote for as many nominees as there are directors to be elected. The shareholder may cast as many votes for each nominee as he has shares. The top votegetters among the nominees are elected as directors. This voting process, called **straight voting,** permits a holder of more than 50 percent of the shares of a corporation to dominate the corporation by electing a board of directors that will manage the corporation as he wants it to be managed.

To avoid domination by a large shareholder, some corporations allow class voting or cumulative voting. **Class voting** may give certain classes of shareholders the right to elect a specified number of directors. **Cumulative voting** permits shareholders to multiply the number of their shares by the number of directors to be elected and to cast the resulting total of votes for one or more directors. As a result, cumulative voting may permit minority shareholders to obtain representation on the board of directors.

Directors usually hold office for only one year, but they may have longer terms. The MBCA permits

staggered terms for directors. A corporation having a board of nine or more members may establish either two or three approximately equal classes of directors, with only one class of directors coming up for election at each annual shareholders' meeting. If there are two classes of directors, the directors serve two-year terms; if there are three classes, they serve three-year terms.

The original purpose of staggered terms was to permit continuity of management. Staggered terms also frustrate the ability of minority shareholders to use cumulative voting to elect their representatives to the board of directors.

The Proxy Solicitation Process Most individual investors purchase corporate shares in the public market to increase their wealth, not to elect or to influence the directors of corporations. Nearly all institutional investors—such as pension funds, mutual funds, and bank trust departments—have the same profit motive. Generally, they are passive investors with little interest in exercising their shareholder right to elect directors by attending shareholder meetings.

Once public ownership of the corporation's shares exceeds 50 percent, the corporation cannot conduct any business at its shareholder meetings unless some of the shares of these passive investors are voted. This is because the corporation will have a shareholder quorum requirement, which usually requires that 50 percent or more of the shares be voted for a shareholder vote to be valid. Since passive investors rarely attend shareholder meetings, the management of the corporation must solicit **proxies** if it wishes to have a valid shareholder vote. Shareholders who will not attend a shareholder meeting must be asked to appoint someone else to vote their shares for them. This is done by furnishing each such shareholder with a proxy form to sign. The proxy designates a person who may vote the shares for the shareholder.

Management Solicitation of Proxies To ensure its perpetuation in office and the approval of other matters submitted for a shareholder vote, the corporation's management solicits proxies from shareholders for directors' elections and other important matters on which shareholders vote, such as mergers. The management designates an officer, a director, or some other person to vote the proxies received. The person who is designated to vote for the shareholder is also called a proxy. Typically, the chief executive officer (CEO) of the corporation, the president, or the chairman of the board of directors names the person who serves as the proxy.

Usually, the proxies are merely signed and returned by the public shareholders, including the institutional shareholders. Passive investors follow the **Wall Street rule:** Either support management or sell the shares. As a result, management almost always receives enough votes from its proxy solicitation to ensure the reelection of directors and the approval of other matters submitted to the shareholders, even when other parties solicit proxies in opposition to management.

Management's solicitation of proxies may produce a result quite different from the theory of corporate management that directors serve as representatives of the shareholders. The CEO usually nominates directors of his choice, and they are almost always elected. The directors appoint officers chosen by the CEO. The CEO's nominees for director are not unduly critical of his programs or of his methods for carrying them out. This is particularly true if a large proportion of the directors are officers of the company and thus are more likely to be dominated by the CEO. In such situations, the board of directors may not function effectively as a representative of the shareholders in supervising and evaluating the CEO and the other officers of the corporation. The board members and the other officers are subordinates of the CEO, even though the CEO is not a major shareholder of the corporation.

Proposals for improving corporate governance in public-issue corporations seek to develop a board that is capable of functioning independently of the CEO by changing the composition or operation of the board of directors. Some corporate governance critics propose that a federal agency such as the Securities and Exchange Commission (SEC) appoint one or more directors to serve as watchdogs of the public interest. Other critics would require that shareholders elect at least a majority of directors without prior ties to the corporation, thus excluding shareholders, suppliers, and customers from the board. The New York Stock Exchange requires a minimum of two directors independent of management for its listed companies.

Other proposals recommend changing the method by which directors are nominated for election. One proposal would encourage shareholders to make nominations for directors. Supporters of this proposal argue that in addition to reducing the influence of the CEO, it would also broaden the range of backgrounds represented on the board. The SEC recommends that

publicly held corporations establish a nominating committee composed of outside directors. Many publicly held corporations have nomination committees.

Mostly due to SEC and public pressures for changes in corporate governance, current boards of directors operate significantly differently from the boards of the 1960s and the early 1970s. Boards supervise officers more closely. More directors are outside rather than inside directors. Boards meet more frequently, and more important, they have working committees that assume specific responsibilities. In addition, today's directors *perceive* themselves as being more nearly independent of the CEO. As a consequence, they *are* more nearly independent of the CEO.

In the following case, *Grimes v. Donald,* the court considered whether a board of directors abdicated its duty to direct the corporation by delegating unlimited power to the CEO.

Grimes v. Donald *673 A.2d 1207 (Del. Sup. Ct. 1996)*

James Donald was the chief executive officer of DSC Communications, a Delaware corporation headquartered in Plano, Texas. In 1990, DSC's board of directors entered an employment agreement with Donald that ran until his 75th birthday. The employment agreement provided that Donald "shall be responsible for the general management of the affairs of the company and report to the Board." Donald's employment could be terminated by death, disability, for cause, and without cause. The agreement provided, however, that Donald could declare a "Constructive Termination Without Cause" by DSC, if there was "unreasonable interference, in the good faith judgment of Donald, by the Board or a substantial stockholder of DSC, in Donald's carrying out of his duties and responsibilities." When there was termination without cause, the employment agreement provided that Donald was entitled to payment of his annual base salary ($650,000) for the remainder of the contract, his annual incentive award ($300,000), and other benefits. The total amount of payments and benefits for the term of the contract was about $20,000,000.

C. L. Grimes, a DSC shareholder, sued Donald on behalf of the corporation asking the court to invalidate the employment agreement between Donald and DSC on the grounds that the agreement illegally delegates the duties and responsibilities of DSC's board of directors to Donald. The Delaware Chancery Court dismissed the case, and Grimes appealed to the Supreme Court of Delaware.

Veasey, Chief Justice Grimes claims that the potentially severe financial penalties which DSC would incur in the event that the Board attempts to interfere in Donald's management will inhibit and deter the Board from exercising its duties. We disagree.

Grimes has pleaded, at most, that Donald would be entitled to $20 million in the event of a Constructive Termination. In light of the financial size of DSC, this amount would not constitute a *de facto* abdication.

Directors may not delegate duties which lie at the heart of the management of the corporation. A court cannot give legal sanction to agreements which have the effect of removing from directors in a very substantial way their duty to use their own best judgment on management matters. The Donald agreement does not formally preclude the DSC board from exercising its statutory powers and fulfilling its fiduciary duty.

With certain exceptions, an informed decision to delegate a task is as much an exercise of business judgment as any other. Likewise, business decisions are not an abdication of directorial authority merely because they limit a board's freedom of future action. A board which has decided to manufacture bricks has less freedom to decide to make bottles. In a world of scarcity, a decision to do one thing will commit a board to a certain course of action and make it costly and difficult to change course and do another. This is an inevitable fact of life and is not an abdication of directorial duty.

If the market for senior management, in the business judgment of the board, demands significant severance packages, boards will inevitably limit their future range of action by entering into employment agreements. Large severance payments will deter boards, to some extent, from dismissing senior officers. If an independent and informed board, acting in good faith, determines that the services of a

particular individual warrant large amounts of money, whether in the form of current salary or severance provisions, the board has made a business judgment. That judgment normally will receive the protection of the business judgment rule unless the facts show that such amounts, compared with services to be received in exchange, constitute waste or could not otherwise be the product of a valid exercise of business judgment.

The Board of DSC retains the ultimate freedom to direct the strategy and affairs of DSC. If Donald disagrees with the Board, DSC may or may not be required to pay a substantial amount of money in order to pursue its chosen course of action. So far, we have only a rather unusual contract, but not a case of abdication.

Judgment for Donald affirmed.

Vacancies on the Board

The MBCA permits the directors to fill vacancies on the board. A majority vote of the remaining directors is sufficient to select persons to serve out unexpired terms, even though the remaining directors are less than a quorum.

Removal of Directors

Modern corporation statutes permit shareholders to remove directors *with or without cause.* The rationale for the modern rule is that the shareholders should have the power to judge the fitness of directors at any time.

However, most corporations have provisions in their articles authorizing the shareholders to remove directors *only for cause.* Cause for removal would include mismanagement or conflicts of interest. Before removal for cause, the director must be given notice and an opportunity for a hearing.

A director elected by a class of shareholders may be removed only by that class of shareholders, thereby protecting the voting rights of the class. A director elected by cumulative voting may not be removed if the votes cast against her removal would have been sufficient to elect her to the board, thereby protecting the voting rights of minority shareholders.

The court in the following *Goode* case validated the shareholders' removal of a director at a meeting that was originally called as a board of directors' meeting.

Goode v. Goode *29 Va. Cir. 409 (Va. Cir. Ct. 1992)*

Deborah Goode, Thomas Goode, Cynthia Mann, and Hodges Mann were the only shareholders of Star Telecommunications, Inc., a Virginia corporation. They were also the only directors of the corporation. Each shareholder owned 25 shares of the corporation. The Goodes were married to one another, as were the Manns.

In the summer of 1991, the Goodes had marital difficulties that led to their separation. On October 3, 1991, Star Telecommunications' corporate counsel gave notice of a directors' meeting for October 11, 1991, the stated purpose of which was to remove Mrs. Goode from her position as director. The Manns and Goodes met at the office of the corporate counsel. The corporate attorney and Mrs. Goode's divorce attorney were also present. A vote was taken to remove Mrs. Goode as a director of the corporation. Mr. and Mrs. Mann voted in favor of the motion, Mrs. Goode voted against the motion, and Mr. Goode abstained. Mrs. Goode objected to her removal, and she sued to invalidate her removal on the grounds that before the meeting her husband and the Manns had conspired to divest her of involvement in the business affairs of the corporation, without cause. She also contends that her removal was not valid because of a lack of a majority vote.

Ledbetter, Judge The first step of an analysis of this dispute is to determine the nature of the October 11, 1991, meeting. The notice called for a meeting of the board of directors. Corporate counsel wrote a

letter to Mrs. Goode's divorce attorney informing him of "a directors' meeting." The transcript of the meeting is entitled meeting of "stockholders and board of directors." At the beginning of the meeting, Mrs. Goode's divorce attorney asked what kind of meeting was being held. Mr. Goode said, "This is a stockholders' meeting." When Mrs. Goode's divorce attorney pointed out that the notice was for a directors' meeting, Mr. Mann interjected, "It's a directors' meeting." The point was never clarified.

The court is of the opinion that the meeting, in reality, was both a meeting of the shareholders and a meeting of the directors, jointly, for the special purpose stated in the notice. All shareholders and all directors (being the same people, of course) were present, all of them participated, all of them were aware of the purpose for which the meeting was called, all of them voted (except Mr. Goode, who abstained) on the action taken at the meeting. Mrs. Goode's protest of the vote count—i.e., the result of the action taken—was not an objection to the meeting itself.

At common law, shareholders of a corporation could remove directors but only for cause. Under Virginia statute, the shareholders' right to remove directors has been expanded so that the right may be exercised with or without cause.

Directors of stock corporations have no authority to remove fellow directors. The bylaw of Star Telecommunications that allowed removal of a director for cause "by action of the board" is inconsistent with law, and, thus, a nullity.

As we have seen, the persons in attendance at the meeting owned all the outstanding stock of the corporation. They attended the meeting fully informed of its purpose, and they participated from beginning to end. Because the business being conducted required action of shareholders rather than directors, for the reasons explained above, their vote was a vote of shareholders.

To hold otherwise would elevate form over substance and would invite ridiculous results in closely-held corporations. Where a small group of people own all the stock and serve as officers and directors and attend a meeting fully informed of the agenda, it would be absurd to predicate the validity of their votes on whether the meeting was properly labelled and whether each vote was accurately identified as an action of the "shareholders," "directors," or whatever. So long as they are all the same people and were not surprised by the actions taken, what real difference does it make what they may have thought they were wearing at the time a vote was taken?

Therefore, the court holds that the action taken at the meeting on October 11, 1991, to remove Mrs. Goode from the board of directors was an action taken by shareholders, all of whom were present and participating with advance knowledge of the meeting's purpose. Because shareholders may remove directors at will pursuant to statute and the corporation bylaws, the action was appropriate without the need to show just cause.

Most of the parties' arguments about the vote tally (two in favor of removal, one opposed, one abstention) missed the point. Shareholders do not vote per capita. Each outstanding share is entitled to one vote on each matter voted on (with some exceptions not pertinent here). It follows that the actual vote count on the motion to remove Mrs. Goode was: 100 total shares outstanding, all represented at the meeting; 50 shares for the motion; 25 shares opposed to the motion; and 25 shares abstaining.

Fifty out of 100 shares is not a majority. However, only 75 shares were voted. If, as here, a quorum exists, an action is approved if the votes cast favoring the action exceed the votes cast opposing the action. In this case, the 50 shares voted in favor of removal clearly exceeded the 25 votes cast opposing the removal. Hence, the motion carried and the action was approved. Mrs. Goode was properly removed from the board of directors by a vote of the shareholders.

It does not matter that the other shareholders discussed and agreed beforehand that Mrs. Goode should be removed; no "deceptive voting practices" or fraud were involved as a matter of law; the shareholders did not breach a duty to Mrs. Goode in removing her as a director; and the possibility that a "less harmful course of action" may have been available is immaterial. Regardless of the truth of the allegations, no cause of action has been stated for which monetary damages may be recovered.

Judgment for Thomas Goode, Cynthia Mann, and Hodges Mann.

Directors' Meetings

Traditionally, directors could act only when they were properly convened as a board. They could not vote by proxy or informally, as by telephone. This rule was based on a belief in the value of consultation and collective judgment.

Today, the corporation laws of a majority of the states and the MBCA specifically permit action by the directors without a meeting if all of the directors consent in writing to the action taken. Such authorization is useful for dealing with routine matters or for formally approving an action based on an earlier policy decision made after full discussion.

The MBCA also permits a board to meet by telephone or television hookup. This section permits a meeting of directors who may otherwise be unable to convene. The only requirement is that the directors be able to hear one another simultaneously.

Directors are entitled to reasonable notice of all *special meetings,* but not of regularly scheduled meetings. The MBCA does not require the notice for a special meeting to state the purpose of the meeting. A director's attendance at a meeting waives any required notice, unless at the beginning of the meeting the director objects to the lack of notice.

For the directors to act, a *quorum* of the directors must be present. The quorum requirement ensures that the decision of the board will represent the views of a substantial portion of the directors. A quorum is usually a *majority* of the number of directors.

Each director has *one vote.* If a quorum is present, a vote of a majority of the directors present is an act of the board, unless the articles or the bylaws require the vote of a greater number of directors. Such *supermajority voting provisions* are common in close corporations but not in publicly held corporations. The use of supermajority voting provisions by close corporations is covered later in this chapter.

Officers of the Corporation

The board of directors has the authority to appoint the officers of the corporation. Many corporation statutes provide that the officers of a corporation shall be the *president,* one or more *vice presidents,* a *secretary,* and a *treasurer.* Usually, any two or more offices may be held by the same person, except for the offices of president and secretary.

The MBCA requires only that there be an officer performing the duties normally granted to a corporate secretary. Under the MBCA, one person may hold several offices, including the offices of president and secretary.

The officers are agents of the corporation. As agents, officers have *express authority* conferred on them by the bylaws or the board of directors. In addition, officers have *implied authority* to do the things that are reasonably necessary to accomplish their express duties. Also, officers have *apparent authority* when the corporation leads third parties to believe reasonably that the officers have authority to act for the corporation. Like any principal, the corporation may *ratify* the unauthorized acts of its officers. This may be done expressly by a resolution of the board of directors or impliedly by the board's acceptance of the benefits of the officer's acts.

The most perplexing issue with regard to the authority of officers is whether an officer has *inherent authority* merely by virtue of the title of his office. Courts have held that certain official titles confer authority on officers, but such powers are much more restricted than you might expect.

Traditionally, a *president* possesses no power to bind the corporation by virtue of the office. Instead, she serves merely as the presiding officer at shareholder meetings and directors' meetings. A president with an additional title such as *general manager* or *chief executive officer* has broad implied authority to make contracts and to do other acts in the ordinary business of the corporation.

A *vice president* has no authority by virtue of that office. An executive who is vice president of a specified department, however, such as a vice president of marketing, will have the authority to transact the normal corporate business falling within the function of the department.

The *secretary* usually keeps the minutes of directors' and shareholder meetings, maintains other corporate records, retains custody of the corporate seal, and certifies corporate records as being authentic. Although the secretary has no authority to make contracts for the corporation by virtue of that office, the corporation is bound by documents certified by the secretary.

The *treasurer* has custody of the corporation's funds. He is the proper officer to receive payments to the corporation and to disburse corporate funds for authorized purposes. The treasurer binds the corporation by his receipts, checks, and indorsements, but he does not by virtue of that office alone have authority to borrow money, to issue negotiable instruments, or to make other contracts on behalf of the corporation.

Like any agent, a corporate officer ordinarily has *no liability on contracts* that he makes on behalf of his principal, the corporation, if he signs for the corporation and not in his personal capacity.

Officers serve the corporation at the pleasure of the board of directors, which may remove an officer at any time with or without cause. An officer who has been removed without cause has no recourse against the corporation, unless the removal violates an employment contract between the officer and the corporation.

Managing Close Corporations

Many of the management formalities that you have studied in this chapter are appropriate for publicly held corporations yet inappropriate for close corporations. Close corporations tend to be more loosely managed than public corporations. For example, they may have few board meetings. Each shareholder may want to be *involved in management* of the close corporation. If a shareholder is not involved in management, he may want to protect his interest by placing *restrictions on the managerial discretion* of those who do manage the corporation.

Modern close corporation statutes permit close corporations to dispense with most, if not all, management formalities. The Statutory Close Corporation Supplement to the MBCA permits a close corporation to *dispense with a board of directors* and to be *managed by the shareholders.* The California General Corporation Law permits the close corporation to be managed *as if it were a partnership.*

Because a minority shareholder of a close corporation may be dominated by the shareholders who control the board of directors, close corporation shareholders have resorted to two devices: **supermajority voting** requirements for board actions and **restrictions on the managerial discretion** of the board of directors.

Any corporation may require that board action be possible only with the approval of more than a majority of the directors, such as three-fourths or unanimous approval. A supermajority vote is often required to terminate the employment contract of an employee-shareholder, to reduce the level of dividends, and to change the corporation's line of business. Supermajority votes are rarely required for ordinary business matters, such as deciding with which suppliers the corporation should deal.

Traditionally, shareholders could not restrict the managerial discretion of directors. This rule recognized the traditional roles of the board as manager and of the shareholders as passive owners. Modern close corporation statutes permit shareholders to intrude into the sanctity of the boardroom. The Statutory Close Corporation Supplement grants the shareholders *unlimited* power to restrict the discretion of the board of directors. For example, the shareholders may agree that the directors may not terminate or reduce the salaries of employee-shareholders and may not lower or eliminate dividends. And, as was stated above, close corporation statutes even permit the shareholders to dispense with a board of directors altogether and to manage the close corporation as if it were a partnership.

Of course, any article or bylaw protecting the rights of minority shareholders must not be changeable, unless the minority shareholders consent.

Managing Nonprofit Corporations

A nonprofit corporation is managed under the direction of a board of directors. The board of directors must have at least three directors. All corporate powers are exercised by or under the authority of the board of directors. Any person may serve as a director; however, the Model Nonprofit Corporation Act has an optional provision stating that no more than 49 percent of directors of a public service corporation may be financially interested in the business of the public service corporation. An interested person is, for example, the musical director of a city's symphony orchestra who receives a salary from the nonprofit corporation operating the orchestra.

If a nonprofit corporation has members, typically the members elect the directors. However, the articles may provide for the directors to be appointed or elected by other persons. Directors serve for one year, unless the articles or bylaws provide otherwise. Directors who are elected may not serve terms longer than five years, but appointed directors may serve longer terms.

Directors may be elected by straight or cumulative voting and by class voting. Members may elect directors in person or by proxy. Directors may be removed at any time with or without cause by the members or other persons who elected or appointed the directors. When a director engages in fraudulent or dishonest conduct or breaches a fiduciary duty, members holding at least 10 percent of the voting power may petition a court to remove the wrongdoing director. Generally,

a vacancy may be filled by the members or the board of directors; however, if a removed director was elected by a class of members or appointed by another person, only the class or person electing or appointing the director may fill the vacancy.

The board is permitted to set directors' compensation. Typically, directors of public benefit corporations and religious corporations are volunteers and receive no compensation.

Directors of a nonprofit corporation usually act at a meeting at which all directors may simultaneously hear each other, such as a meeting in person or by telephone conference call. The board may also act without a meeting if all directors consent in writing to the action. The board has the power to do most actions that are within the powers of the corporation, although some actions, such as mergers and amendments of the articles, require member action also. Ordinarily, an individual director has no authority to transact for a nonprofit corporation.

The board of directors of a nonprofit corporation may delegate some of its authority to committees of the board and to officers. A nonprofit corporation is not required to have officers, except for an officer performing the duties of corporate secretary. If a corporation chooses to have more officers, one person may hold more than one office. The board may remove an officer at any time with or without cause.

Officers have the authority granted them by the bylaws or by board resolution. However, a nonprofit corporation is bound by a contract signed by both the presiding officer of the board and the president, when the other party had no knowledge that the signing officers had no authority. The corporation is also bound to a contract signed by either the presiding officer or the president which is also signed by either a vice president, the secretary, the treasurer, or the executive director.

Directors' and Officers' Duties to the Corporation

Directors and officers are in positions of trust; they are entrusted with property belonging to the corporation and with power to act for the corporation. Therefore, directors and officers owe **fiduciary duties** to the corporation. They are the duties to act within the authority of the position and within the objectives and powers of the corporation, to act with due care in conducting the affairs of the corporation, and to act with loyalty to the corporation.

Acting within Authority

An officer or director has a duty to **act within the authority** conferred on her by the articles of incorporation, the bylaws, and the board of directors. The directors and officers must act within the scope of the powers of the corporation. An officer or a director may be liable to the corporation if it is damaged by an act exceeding that person's or the corporation's authority.

Duty of Care

Directors and officers are liable for losses to the corporation resulting from their lack of *care or diligence.* The MBCA expressly states the standard of care that must be exercised by directors and officers. MBCA section 8.30 states:

> (a) A director shall discharge his duties as a director, including his duties as a member of a committee:
> (1) in good faith;
> (2) with the care an ordinarily prudent person in a like position would exercise under similar circumstances; and
> (3) in a manner he reasonably believes to be in the best interests of the corporation.

Managers need merely meet the standard of the **ordinarily prudent person in the same circumstances,** a standard focusing on the basic manager attributes of common sense, practical wisdom, and informed judgment. The duty of care does not hold directors and officers to the standard of a prudent businessperson, a person of some undefined level of business skill. A director or officer's performance is evaluated at the time of the decision, thereby preventing the application of hindsight in judging her performance.

The MBCA duty of care test requires that a director or officer make a **reasonable investigation** and **honestly believe** that her decision is in the **best interests of the corporation.** For example, the board of directors decides to purchase an existing manufacturing business for $15 million without inquiring into the value of the business or examining its past financial performance. Although the directors may believe that they made a prudent decision, they have no reasonable basis for that belief. Therefore, if the plant is worth only $5 million, the directors will be liable to the corporation for its damages—$10 million—for breaching the duty of care.

The Business Judgment Rule The directors' and officers' duty of care is sometimes expressed as the **business judgment rule:** Absent bad faith, fraud, or breach of fiduciary duty, the judgment of the board of

directors is conclusive. When directors and officers have complied with the business judgment rule, they are protected from liability to the corporation for their harmful decisions. The business judgment rule precludes the courts from substituting their business judgment for that of the corporation's managers. The business judgment rule recognizes that the directors and officers—not the shareholders and the courts—are best able to make business judgments and should not ordinarily be vulnerable to second-guessing. Shareholders and the courts are ill-equipped to make better business decisions than those made by the officers and directors of a corporation, who have more business experience and are more familiar with the needs, strengths, and limitations of the corporation.

Three requirements must be met for the business judgment rule to protect managers from liability:

1. The managers must make an **informed decision.** They must take the steps necessary to become informed about the relevant facts by making a **reasonable investigation** before making a decision. These steps may include merely listening to a proposal, reviewing written materials, or making inquiries. Managers may rely on information collected and presented by other persons. In essence, the informed-decision component means that managers should do their homework if they want the protection of the business judgment rule.
2. The managers may have **no conflicts of interest.** The managers may not benefit personally— other than as shareholders—when they transact on behalf of the corporation.
3. The managers must have a **rational basis** for believing that the decision is in the best interests of the corporation. The rational basis element requires only that the managers' decision have a *logical connection to the facts* revealed by a reasonable investigation or that the decision *not be manifestly unreasonable.* Some courts have held that the managers' wrongdoing must amount to *gross negligence* for the directors to lose the protection of the business judgment rule.

If the business judgment rule does not apply because one or more of its elements are missing, a court may *substitute its judgment* for that of the managers.

Nonetheless, courts rarely refuse to apply the business judgment rule. As a result, the rule has been criticized frequently as providing too much protection for the managers of corporations. In one famous case, the court applied the business judgment rule to protect a 1965 decision made by the board of directors of the Chicago Cubs not to install lights and not to hold night baseball games at Wrigley Field.[1] Yet the business judgment rule is so flexible that it protected the decision of the Cubs' board of directors to install lights in 1988.

The *Trans Union* case[2] is one of the few cases that have held directors liable for failing to comply with the business judgment rule. The Supreme Court of Delaware found that the business judgment rule was not satisfied by the board's approval of an acquisition of the corporation for $55 per share. The board approved the acquisition after only two hours' consideration. The board received no documentation to support the adequacy of the $55 price. Instead, it relied entirely on a 20-minute *oral* report of the chairman of the board. No written summary of the acquisition was presented to the board. The directors failed to obtain an investment banker's report, prepared after careful consideration, that the acquisition price was fair.

In addition, the court held that the mere fact that the acquisition price exceeded the market price by $17 per share did not legitimize the board's decision. The board had frequently made statements prior to the acquisition that the market had undervalued the shares, yet the board took no steps to determine the intrinsic value of the shares. Consequently, the court found that at a minimum, the directors had been grossly negligent.

In the following *Omnibank* case, the court considered whether a bank loan officer complied with the business judgment rule.

[1] *Shlensky v. Wrigley,* 237 N.E.2d 776 (Ill. Ct. App. 1968).
[2] *Smith v. Van Gorkom,* 488 A.2d 858 (Del. Sup. Ct. 1985).

Omnibank of Mantee v. United Southern Bank *607 So.2d 76 (Miss. Sup. Ct. 1992)*

James R. Gray was president and managing officer of the Peoples Bank and Trust Company in Olive Branch, Mississippi, a branch bank owned by United Southern Bank (USB). Gray had complete charge of the day-to-day banking business of Peoples Bank. He had discretionary loan authority, subject to USB's limits for all senior loan officers: $75,000 for unsecured loans and $150,000 for secured loans.

Frank Piecara was an established customer of Peoples Bank. Piecara was president of Mirage Construction, Inc., which was obligated on a subcontract to provide earthwork and roadwork for Rogers Construction Company at the Picacho Pumping Plant in Arizona. Gray directed Peoples Bank to make loans in the amount of $536,000 to a trust managed by Piecara. The loan proceeds were used to provide working capital for Mirage. In addition, Gray directed Peoples Bank to issue a $300,000 irrevocable letter of credit to Rogers Construction for the purpose of securing Mirage's performance as Rogers's subcontractor. Gray called USB's senior vice president, Edward P. Peacock III, to request authorization of the letter of credit. Gray and Peacock each had $150,000 authority to make secured loans, which they combined to issue the letter of credit. As security for the loans and letter of credit, Gray obtained a security interest in Mirage's accounts receivable and contract rights, in particular the payments Rogers might make to Mirage under the subcontract. Gray did not perfect the security interest in the subcontract. Gray did not notify Rogers or the owner of the Picacho Pumping Plant of the security interest or require Rogers or the owner to remit subcontract payments directly to Peoples Bank.

Piecara and Mirage defaulted on the loans and letter of credit, with USB suffering a loss of almost $600,000. USB sued Gray alleging his breach of a fiduciary duty. The trial court found Gray liable to USB. Gray appealed to the Mississippi Supreme Court.

Robertson, Justice The law devolves upon those in the upper echelons of a corporate entity certain duties owing to the entity, over and above those of an ordinary agent or employee. The question is whether Gray is one of those so burdened. We doubt a definitional line may be drawn with precision or permanence. For the moment, we are prepared to accept that

> "Officer" means (a) the chief executive, operating, financial, legal and accounting officers of a corporation; (b) to the extent not encompassed by the foregoing, the chairman of the board of directors . . ., president, treasurer, and secretary, and a *vice-president or vice-chairman who is in charge of a principal business unit, division,* or function . . . and (c) any other individual designated by the corporation as an officer.
>
> American Law Institute, *Principles of Corporate Governance: Analysis and Recommendations,* section 1.27.

His title aside, Gray served USB as the chief operating official at Peoples Bank where he had substantial discretionary authority. We think a banking office such as the Peoples Bank branch is one of USB's principal business units. Gray was the man in charge. He presided over a branch worth over twenty million dollars, had substantial loan authority, and had considerable autonomy in directing the day-to-day operations of the branch. The trial court was correct in treating Gray as an officer of USB.

By law, officer Gray owed USB two principal duties: a duty of care and a duty of loyalty and fair dealing. These duties differ in nature and content, though they doubtless intersect and overlap. There is a bit of lore born no doubt of thought of failed banks and helpless widows that we ought demand more of bank officers than one who runs a foundry or a pest control company.

We begin with the duty of care. A director or officer has a duty to the corporation to perform the director's or officer's functions in good faith, in a manner he or she reasonably believes to be in the best interests of the corporation, and with the care that an ordinarily prudent person would reasonably be expected to exercise in a like position and under similar circumstances. The duty includes the obligation to make, or cause to make, an inquiry when, but only when, the circumstances would alert a reasonable director or officer to the need therefor. The extent of such inquiry shall be such as the director or officer reasonably believes to be necessary.

We long ago recognized this duty in a banking setting and said an officer who "very negligently" makes unreasonably risky loans may on his borrowers' default be held personally to make good the bank's loss.

The duty of care is subject to a well-settled common law, known as the business judgment rule. That rule has recently been stated with care:

> A director or officer who makes a business judgment in good faith fulfills the duty . . . [of care] if the director or officer:
>
> (1) is not interested . . . in the subject of the business judgment;
>
> (2) is informed with respect to the subject of the business judgment to the extent the director or officer reasonably believes to be appropriate under the circumstances; and

(3) rationally believes that the business judgment is in the best interests of the corporation.
Principles of Corporate Governance, section 4.01. *See* MBCA section 8.42.

Gray's defaults in the Piecara loans are apparent. To be sure, there is nothing improper about a banker securing a credit by taking a security interest in contract rights or assignment of accounts. On the other hand, there are risks associated with the receivables form of collateral not associated with more tangible security, and a prudent loan officer must reasonably assess and control these risks. These risks are exacerbated where, as here, the subcontract is to be performed some 1,500 miles away.

Gray made no inquiry of the financial responsibility of Rogers or the owner of the Picacho Pumping Plant. A prudent loan officer taking such collateral will give notice of his bank's interest to the prime contractor and the owner and demand that all payments due under the subcontract be routed through the bank. Gray did none of this, nor did he monitor performance of the subcontract and have Piecara remit as his company was paid. Gray failed to perfect the security interest. Moreover, it appears clear the value of the collateral was far below what prudently should have been required for credit of this size. We accept the trial court's holding that Gray breached his duty of care to USB in handling the Piecara loans.

Gray's argument in reply is laced with implied references to the business judgment rule. He insists he acted in subjective good faith at all times, and of this there is little doubt. The trial court found Gray had no "interest" in any of the credits at issue. Gray insists he reasonably believed the debtors would respond to their obligations in a reasonably timely fashion. Gray insists he thought the risks reasonable and, where unsecured, backed by adequate financial statements. Reports of these loans, their terms, and periodic status were routinely available to USB, which offered nothing but praise until a state bank examiner's probe in January 1985.

These are not irrelevancies. They are evidence that Gray may have acted with reasonable business judgment. Most assuredly, the duty of care holds no truck with Monday morning quarterbacking, and the business judgment rule stands to prevent this. A loan officer is no guarantor of the success of each credit extension. The prudence of the practice is judged objectively in the circumstances then existing and reasonably knowable by the officer.

The defense ultimately founders. The trial court impliedly found unreasonable Gray's belief regarding the extent to which he should have informed himself at the time regarding these debtors. Further, the court impliedly found there was no rational basis for a belief that his handling of these matters was in USB's best interest.

Judgment for United Southern Bank affirmed.

Changes in the Duty of Care

In response to the *Trans Union* case and insurance companies' increasing unwillingness to insure directors and officers for breaches of their duty of care (and the resulting exodus of outside directors from corporate boards of directors), many state legislatures changed the wording of the duty of care, typically imposing liability only for willful or wanton misconduct or for gross negligence.

For example, Ohio protects directors from monetary liability except when clear and convincing evidence demonstrates the directors' deliberate intent to injure the corporation or the directors' reckless disregard for its welfare. Delaware corporation law and the MBCA allow corporations to amend their articles to reduce or eliminate directors' liability for monetary damages for breaches of the duty of care.

Board Opposition to Acquisition of Control of a Corporation

In the last 30 years, many outsiders have attempted to acquire control of publicly held corporations. Typically, these outsiders (called **raiders**) will make a **tender offer** for the shares of a corporation (called the **target**). A tender offer is an offer to the shareholders to buy their shares at a price above the current market price. The raider hopes to acquire a majority of the shares, which will give it control of the target corporation.

Most tender offers are opposed by the target corporation's management. The defenses to tender offers are many and varied, and they carry colorful names, such as the Pac-Man defense, the white knight, greenmail, the poison pill, and the lock-up option. See Figure 1 for definitions of these defenses.

Figure 1 *Tender Offer Defenses*

Greenmail

The target's repurchase of its shares from the raider at a substantial profit to the raider, upon the condition that the raider sign a standstill agreement in which it promises not to buy additional shares of the target for a stated period of time.

White Knight

A friendly tender offeror whom management prefers over the original tender offeror — called a black knight. The white knight rescues the corporation from the black knight (the raider) by offering more money for the corporation's shares. In the *Revlon* case that appears earlier in this chapter, Forstmann was a white knight for Revlon.

Pac-Man

The target corporation turns the tables on the tender offeror or raider (which is often another publicly held corporation) by making a tender offer for the raider's shares. As a result, two tender offerors are trying to buy each other's shares. This is similar to the Pac-Man video game, in which Pac-Man and his enemies chase each other.

Golden Parachutes

Justified as an incentive to attract high-quality business managers, a golden parachute requires a corporation to make a large severance payment to a top-level executive such as the CEO when there is a change in control of the corporation. Payments to an individual executive may approach $100 million. The golden parachute arguably is an effective tender offer defense because the severance payment increases the raider's acquisition cost, but in the face of billion dollar takeovers, it is doubtful that such payments are large enough to deter a raider. The severance agreement in *Grimes v. Donald* (which appears earlier in this chapter) requiring payment upon interference with the CEO's judgment was a golden parachute.

Lock-Up Option

Used in conjunction with a white knight to ensure the success of the white knight's bid. The target and the white knight agree that the white knight will buy a highly valuable asset of the target at a very attractive price for the white knight (usually a below-market price) if the raider succeeds in taking over the target. For example, in the *Revlon* case, Revlon gave a lock-up option to Forstmann to reduce the amount of profit that Pantry Pride would make had it completed its takeover of Revlon.

Friendly Shareholders

Establishing employee stock option plans (ESOPs), by which employees of the corporation purchase the corporation's shares, and selling the corporation shares to other shareholders likely to be loyal to management, such as employee pension funds and people in the community in which the corporation conducts its business, may create a significant percentage of friendly shareholders that are not likely to tender their shares to a raider who may be perceived as hostile to the continuation of the corporation's business in the local community. Thus, building and maintaining a base of friendly shareholders make it easier to defeat a raider.

Poison Pill

Also called a shareholders' rights plan. There are many types, but the typical poison pill involves the target's issuance of a new class of preferred shares to its common shareholders. The preferred shares have rights (share options) attached to them. These rights allow the target's shareholders to purchase shares of the raider or shares of the target at less than fair market value. The poison pill deters hostile takeover attempts by threatening the raider and its shareholders with severe dilutions in the value of the shares they hold.

When takeover defenses are successful, shareholders of the target may lose the opportunity to sell their shares at a price up to twice the market price of the shares prior to the announcement of the hostile bid. Frequently, the loss of this opportunity upsets shareholders, who then decide to sue the directors who have opposed the tender offer. Shareholders contend that the directors have opposed the tender offer only to preserve their corporate jobs. Shareholders also argue that the target corporation's interests would have been better served if the tender offer had succeeded.

Generally, courts have refused to find directors liable for opposing a tender offer because the business judgment rule applies to a board's decision to oppose a tender offer.

Nonetheless, the business judgment rule will not apply when the directors make a decision to oppose the tender offer before they have carefully studied it. In addition, if the directors' actions indicate that they

opposed the tender offer in order to preserve their jobs, they will be liable to the corporation.

Court decisions have seemingly modified the business judgment rule as it is applied in the tender offer context. For example, in *Unocal Corp. v. Mesa Petroleum Co.,*[3] the Supreme Court of Delaware upheld the application of the business judgment rule to a board's decision to block a hostile tender offer by making a tender offer for its own shares that excluded the raider.[4] But in so ruling, the court held that the board may use only those defense tactics that are *reasonable* compared to the takeover threat. The board may consider a variety of concerns, including the inadequacy of the price offered, nature and timing of the offer, questions of illegality, the impact on constituencies other than shareholders (i.e., creditors, customers, employees, and perhaps even the community generally), the risk of nonconsummation, and the quality of securities being offered in the exchange.

In *Unocal,* the threat was a two-tier, highly coercive tender offer. In the typical two-tier offer, the raider first offers cash for a majority of the shares. After acquiring a majority of the shares, the offeror initiates the second tier, in which the remaining shareholders are forced to sell their shares for a package of securities less attractive than the first tier. Because shareholders fear that they will be forced to take the less attractive second-tier securities if they fail to tender during the first tier, shareholders—including those who oppose the offer—are coerced into tendering during the first tier. *Unocal* and later cases specifically authorize the use of defenses to defeat a coercive two-tier tender offer.

[3]493 A.2d 946 (Del. Sup. Ct. 1985).

[4]Discriminatory tender offers are now illegal pursuant to Securities Act Rule 13e-4.

Since its decision in *Unocal,* the Supreme Court of Delaware has applied this modified business judgment rule to validate a poison pill tender offer defense tactic in *Moran v. Household Int'l, Inc.*[5] and to invalidate a lock-up option tender offer defense in the *Revlon* case, which appears earlier in this chapter. These cases confirmed the *Unocal* holding that the board of directors must show that:

1. It had reasonable grounds to believe that a danger to corporate policy and effectiveness was posed by the takeover attempt.
2. It acted primarily to protect the corporation and its shareholders from that danger.
3. The defense tactic was reasonable in relation to the threat posed to the corporation.

Such a standard appeared to impose a higher standard on directors than the rational basis requirement of the business judgment rule, which historically has been interpreted to require only that a decision of a board not be manifestly unreasonable. In addition, the *Revlon* case required the board to establish an auction market for the company and to sell it to the highest bidder when the directors have abandoned the long-term business objectives of the company by embracing a bust-up of the company.

In the following *Paramount v. Time* case, the Supreme Court of Delaware expanded board discretion in fighting hostile takeovers, holding that a board may oppose a hostile takeover provided the board had a *preexisting, deliberately conceived corporate plan* justifying its opposition. The existence of such a plan enabled Time's board to meet the reasonable-tactic element of the *Unocal* test.

[5]500 A.2d 346 (Del. Sup. Ct. 1985).

Paramount Communications, Inc. v. Time, Inc. *571 A.2d 1140 (Del. Sup. Ct. 1989)*

Since 1983, Time, Inc., had considered expanding its business beyond publishing magazines and books, owning Home Box Office and Cinemax, and operating television stations. In 1988, Time's board approved in principle a strategic plan for Time's acquisition of an entertainment company. The board gave management permission to negotiate a merger with Warner Communications, Inc. The board's consensus was that a merger of Time and Warner was feasible, but only if Time controlled the resulting corporation, preserving the editorial integrity of Time's magazines. The board concluded that Warner was the superior candidate because Warner could make movies and TV shows for HBO, Warner had an international distribution system, Warner was a giant in the music business, Time and Warner would control half of New York City's cable TV system, and the Time network could promote Warner's movies.

Negotiations with Warner broke down when Warner refused to agree to Time's dominating the combined companies. Time continued to seek expansion, but informal discussions with other companies terminated when it was suggested the other companies purchase Time or control the resulting board. In January 1989, Warner and Time resumed negotiations, and on March 4, 1989, they agreed to a combination by which Warner shareholders would own 62 percent of the resulting corporation, to be named Time-Warner. To retain the editorial integrity of Time, the merger agreement provided for a board committee dominated by Time representatives.

On June 7, 1989, Paramount Communications, Inc., announced a cash tender offer for all of Time's shares at $175 per share. (The day before, Time shares traded at $126 per share.) Time's financial advisers informed the outside directors that Time's auction value was materially higher than $175 per share. The board concluded that Paramount's $175 offer was inadequate. Also, the board viewed the Paramount offer as a threat to Time's control of its own destiny and retention of the Time editorial policy; the board found that a combination with Warner offered greater potential for Time.

In addition, concerned that shareholders would not comprehend the long-term benefits of the merger with Warner, on June 16, 1989, Time's board recast its acquisition with Warner into a two-tier acquisition, in which it would make a tender offer to buy 51 percent of Warner's shares for cash immediately and later buy the remaining 49 percent for cash and securities. The tender offer would eliminate the need for Time to obtain shareholder approval of the transaction.

On June 23, 1989, Paramount raised its offer to $200 per Time share. Three days later, Time's board rejected the offer as a threat to Time's survival and its editorial integrity; the board viewed the Warner acquisition as offering greater long-term value for the shareholders. Time shareholders and Paramount then sued Time and its board to enjoin Time's acquisition of Warner. The trial court held for Time. Paramount and Time shareholders appealed to the Supreme Court of Delaware.

Horsey, Justice Our decision does not require us to pass on the wisdom of the board's decision. That is not a court's task. Our task is simply to determine whether there is sufficient evidence to support the initial Time-Warner agreement as the product of a proper exercise of business judgment.

We have purposely detailed the evidence of the Time board's deliberative approach, beginning in 1983–84, to expand itself. Time's decision in 1988 to combine with Warner was made only after what could be fairly characterized as an exhaustive appraisal of Time's future as a corporation. Time's board was convinced that Warner would provide the best fit for Time to achieve its strategic objectives. The record attests to the zealousness of Time's executives, fully supported by their directors, in seeing to the preservation of Time's perceived editorial integrity in journalism. The Time board's decision to expand the business of the company through its March 4 merger with Warner was entitled to the protection of the business judgment rule.

The revised June 16 agreement was defense-motivated and designed to avoid the potentially disruptive effect that Paramount's offer would have had on consummation of the proposed merger were it put to a shareholder vote. Thus, we decline to apply the traditional business judgment rule to the revised transaction and instead analyze the Time board's June 16 decision under *Unocal.*

In *Unocal,* we held that before the business judgment rule is applied to a board's adoption of a defensive measure, the burden will lie with the board to prove (a) reasonable grounds for believing that a danger to corporate policy and effectiveness existed; and (b) that the defensive measure adopted was reasonable in relation to the threat posed.

Paramount argues a hostile tender offer can pose only two types of threats: the threat of coercion that results from a two-tier offer promising unequal treatment for nontendering shareholders; and the threat of inadequate value from an all-shares, all-cash offer at a price below what a target board in good faith deems to be the present value of its shares.

Paramount would have us hold that only if the value of Paramount's offer were determined to be clearly inferior to the value created by management's plan to merge with Warner could the offer be viewed—objectively—as a threat.

Paramount's position represents a fundamental misconception of our standard of review under *Unocal* principally because it would involve the court in substituting its judgment as to what is a "better" deal for that of a corporation's board of directors. The usefulness of *Unocal* as an analytical tool is precisely its

flexibility in the face of a variety of fact scenarios. Thus, directors may consider, when evaluating the threat posed by a takeover bid, the inadequacy of the price offered, nature and timing of the offer, questions of illegality, the impact on constituencies other than shareholders, the risk of nonconsummation, and the quality of securities being offered in the exchange.

The Time board reasonably determined that inadequate value was not the only threat that Paramount's all-cash, all-shares offer could present. Time's board concluded that Paramount's offer posed other threats. One concern was that Time shareholders might elect to tender into Paramount's cash offer in ignorance or a mistaken belief of the strategic benefit which a business combination with Warner might produce.

Paramount also contends that Time's board had not duly investigated Paramount's offer. We find that Time explored the available entertainment companies, including Paramount, before determining that Warner provided the best strategic "fit." In addition, Time's board rejected Paramount's offer because Paramount did not serve Time's objectives or meet Time's needs. Time's board was adequately informed of the potential benefits of a transaction with Paramount. Time's failure to negotiate cannot be fairly found to have been uninformed. The evidence supporting this finding is materially enhanced by the fact that 12 of Time's 16 board members were outside independent directors.

We turn to the second part of the *Unocal* analysis. The obvious requisite to determining the reasonableness of a defensive action is a clear identification of the nature of the threat. This requires an evaluation of the importance of the corporate objective threatened; alternative methods of protecting that objective; impacts of the defensive action; and other relevant factors.

The fiduciary duty to manage a corporate enterprise includes the selection of a time frame for achievement of corporate goals. Directors are not obliged to abandon a deliberately conceived corporate plan for a short-term shareholder profit unless there is clearly no basis to sustain the corporate strategy. Time's responsive action to Paramount's tender offer was not aimed at "cramming down" on its shareholders a management-sponsored alternative, but rather had as its goal the carrying forward of a preexisting transaction in an altered form. Thus, the response was reasonably related to the threat. The revised agreement did not preclude Paramount from making an offer for the combined Time-Warner company or from changing the conditions of its offer so as not to make the offer dependent upon the nullification of the Time-Warner agreement. Thus, the response was proportionate.

Judgment for Time affirmed.

Duties of Loyalty

Directors and officers owe a duty of **utmost loyalty and fidelity** to the corporation. Judge Benjamin Cardozo stated this duty of trust. He declared that a director:

> owes loyalty and allegiance to the corporation—a loyalty that is undivided and an allegiance that is influenced by no consideration other than the welfare of the corporation. Any adverse interest of a director will be subjected to a scrutiny rigid and uncompromising. He may not profit at the expense of his corporation and in conflict with its rights; he may not for personal gain divert unto himself the opportunities which in equity and fairness belong to his corporation.[6]

Directors and officers owe the corporation the same duties of loyalty that agents owe their principals, though many of these duties have special names in corporation law. The most important of these duties of loyalty are the duties not to *self-deal,* not to *usurp a corporate opportunity,* not to *oppress minority shareholders,* and not to *trade on inside information.*

Interested Person Transactions

A director or officer is an interested person when a director or officer deals with his corporation. The director or officer has a **conflict of interest** and may prefer his own interests over those of the corporation. The director's or officer's interest may be *direct,* such as his interest in selling his land to the corporation, or it may be *indirect,* such as his interest in having another business of which he is an owner, director, or officer supply goods to the corporation. When a director has a conflict of interest, the director's transaction with the corporation may be voided or rescinded.

[6] *Meinhard v. Salmon,* 164 N.E.2d 545, 546 (N.Y. Ct. App. 1928).

Under the MBCA, an interested person transaction will not be voided merely on the grounds of a director's conflict of interest when *any one* of the following is true:

1. The transaction has been approved by a majority of informed, disinterested directors,
2. The transaction has been approved by a majority of the shares held by informed, disinterested shareholders, or
3. The transaction is fair to the corporation.

Nonetheless, even when disinterested directors' or shareholders' approval has been obtained, courts will void a conflict-of-interest transaction that is unfair to the corporation. Therefore, every corporate transaction in which a director has a conflict of interest must be fair to the corporation. If the transaction is fair, the interested director is excused from liability to the corporation. A transaction is fair if reasonable persons in an *arm's-length bargain* would have bound the corporation to it. This standard is often called the **intrinsic fairness standard.**

The function of disinterested director or disinterested shareholder approval of a conflict-of-interest transaction is merely to shift the burden of proving unfairness. Under the MBCA, the burden of proving fairness lies initially on the interested director. The burden of proof shifts to the corporation that is suing the interested officer or director if the transaction was approved by the board of directors or the shareholders. Nonetheless, when disinterested directors approve an interested person transaction, substantial deference is given to the decision in accordance with the business judgment rule, especially when the disinterested directors compose a majority of the board.

Generally, *unanimous* approval of an interested person transaction by informed shareholders *conclusively* releases an interested director or officer from liability even if the transaction is unfair to the corporation. The rationale for this rule is that fully informed shareholders should know what is best for themselves and their corporation.

Loans to Directors Under early corporation law, *loans* by the corporation *to directors or officers* were illegal, on the grounds that such loans might result in the looting of corporate assets. The MBCA allows loans to directors only after certain procedures have been followed. Either the shareholders must approve the loan, or the directors, after finding that the loan benefits the corporation, must approve it.

Parent–Subsidiary Transactions Self-dealing is a concern when a parent corporation *dominates* a subsidiary corporation. Often, the subsidiary's directors will be directors or officers of the parent also. When persons with dual directorships approve transactions between the parent and the subsidiary, the opportunity for *overreaching* arises. There may be *no arm's-length bargaining* between the two corporations. Hence, such transactions must meet the *intrinsic fairness* test.

Usurpation of a Corporate Opportunity

Directors and officers may steal not only assets of their corporations (such as computer hardware and software) but also *opportunities* that their corporations could have exploited. Both types of theft are equally wrongful. As fiduciaries, directors and officers are liable to their corporation for **usurping corporate opportunities.**

The opportunity must come to the director or officer *in her corporate capacity.* Clearly, opportunities received at the corporate offices are received by the manager in her corporate capacity. In addition, courts hold that CEOs and other high-level officers are nearly always acting in their corporate capacities, even when they are away from their corporate offices.

The opportunity must have a *relation or connection* to an *existing or prospective* corporate activity. Some courts apply the *line of business test,* considering how closely related the opportunity is to the lines of business in which the corporation is engaged. Other courts use the *interest or expectancy test,* requiring the opportunity to relate to property in which the corporation has an existing interest or in which it has an expectancy growing out of an existing right.

The corporation must be *able financially* to take advantage of the opportunity. Managers are required to make a good faith effort to obtain external financing for the corporation, but they are not required to use their personal funds to enable the corporation to take advantage of the opportunity.

A director or officer is free to exploit an opportunity that has been rejected by the corporation.

In the following case, *Guth v. Loft,* the court found that an opportunity to become the manufacturer of Pepsi-Cola syrup was usurped by the president of a corporation that manufactured beverage syrups and operated soda fountains.

Guth v. Loft, Inc. *5 A. 2d 503 (Del. Sup. Ct. 1939)*

Loft, Inc., manufactured and sold candies, syrups, and beverages and operated 115 retail candy and soda fountain stores. Loft sold Coca-Cola at all of its stores, but it did not manufacture Coca-Cola syrup. Instead, it purchased its 30,000-gallon annual requirement of syrup and mixed it with carbonated water at its various soda fountains.

In May 1931, Charles Guth, the president and general manager of Loft, became dissatisfied with the price of Coca-Cola syrup and suggested to Loft's vice president that Loft buy Pepsi-Cola syrup from National Pepsi-Cola Company, the owner of the secret formula and trademark for Pepsi-Cola. The vice president said he was investigating the purchase of Pepsi syrup.

Before being employed by Loft, Guth had been asked by the controlling shareholder of National Pepsi, Megargel, to acquire the assets of National Pepsi. Guth refused at that time. However, a few months after Guth had suggested that Loft purchase Pepsi syrup, Megargel again contacted Guth about buying National Pepsi's secret formula and trademark for only $10,000. This time, Guth agreed to the purchase, and Guth and Megargel organized a new corporation, Pepsi-Cola Company, to acquire the Pepsi-Cola secret formula and trademark from National Pepsi. Eventually, Guth and his family's corporation owned a majority of the shares of Pepsi-Cola Company.

Very little of Megargel's or Guth's funds were used to develop the business of Pepsi-Cola. Instead, without the knowledge or consent of Loft's board of directors, Guth used Loft's working capital, credit, plant and equipment, and executives and employees to produce Pepsi-Cola syrup. In addition, Guth's domination of Loft's board of directors ensured that Loft would become Pepsi-Cola's chief customer.

By 1935, the value of Pepsi-Cola's business was several million dollars. Loft sued Guth, asking the court to order Guth to transfer to Loft his shares of Pepsi-Cola Company and to pay Loft the dividends he had received from Pepsi-Cola Company. The trial court found that Guth had usurped a corporate opportunity and ordered Guth to transfer the shares and to pay Loft the dividends. Guth appealed.

Layton, Chief Justice Public policy demands of a corporate officer or director the most scrupulous observance of his duty to refrain from doing anything that would deprive the corporation of profit or advantage. The rule that requires an undivided and unselfish loyalty to the corporation demands that there shall be no conflict between duty and self-interest.

The real issue is whether the opportunity to secure a very substantial stock interest in a corporation to be formed for the purpose of exploiting a cola beverage on a wholesale scale was so closely associated with the existing business activities of Loft, and so essential thereto, as to bring the transaction within that class of cases where the acquisition of the property would throw the corporate officer purchasing it into competition with his company.

Guth suggests a doubt whether Loft would have been able to finance the project. The answer to this suggestion is two-fold. Loft's net asset position was amply sufficient to finance the enterprise, and its plant, equipment, executives, personnel and facilities were adequate. The second answer is that Loft's resources were found to be sufficient, for Guth made use of no other resources to any important extent.

Guth asserts that Loft's primary business was the manufacturing and selling of candy in its own chain of retail stores, and that it never had the idea of turning a subsidiary product into a highly advertised, nationwide specialty. It is contended that the Pepsi-Cola opportunity was not in the line of Loft's activities, which essentially were of a retail nature.

Loft, however, had many wholesale activities. Its wholesale business in 1931 amounted to over $800,000. It was a large company by any standard, with assets exceeding $9 million, excluding goodwill. It had an enormous plant. It paid enormous rentals. Guth, himself, said that Loft's success depended upon the fullest utilization of its large plant facilities. Moreover, it was a manufacturer of syrups and, with the exception of cola syrup, it supplied its own extensive needs. Guth, president of Loft, was an able and experienced man in that field. Loft, then, through its own personnel, possessed the technical knowledge, the practical business experience,

and the resources necessary for the development of the Pepsi-Cola enterprise. Conceding that the essential of an opportunity is reasonably within the scope of a corporation's activities, latitude should be allowed for development and expansion. To deny this would be to deny the history of industrial development.

We cannot agree that Loft had no concern or expectancy in the opportunity. Loft had a practical and essential concern with respect to some cola syrup with an established formula and trademark. A cola beverage has come to be a business necessity for soft drink establishments; and it was essential to the success of Loft to serve at its soda fountains an acceptable five-cent cola drink in order to attract into its stores the great multitude of people who have formed the habit of drinking cola beverages.

When Guth determined to discontinue the sale of Coca-Cola in the Loft stores, it became, by his own act, a matter of urgent necessity for Loft to acquire a constant supply of some satisfactory cola syrup, secure against probable attack, as a replacement; and when the Pepsi-Cola opportunity presented itself, Guth having already considered the availability of the syrup, it became impressed with a Loft interest and expectancy arising out of the circumstances and the urgent and practical need created by him as the directing head of Loft.

The fiduciary relation demands something more than the morals of the marketplace. Guth did not offer the Pepsi-Cola opportunity to Loft, but captured it for himself. He invested little or no money of his own in the venture, but commandeered for his own benefit and advantage the money, resources, and facilities of his corporation and the services of his officials. He thrust upon Loft the hazard, while he reaped the benefit. In such a manner he acquired for himself 91 percent of the capital stock of Pepsi-Cola, now worth many millions. A genius in his line he may be, but the law makes no distinction between the wrongdoing genius and the one less endowed.

Judgment for Loft affirmed.

Oppression of Minority Shareholders

Directors and officers owe a duty to manage a corporation in the best interests of the corporation and the shareholders as a whole. When, however, a group of shareholders has been isolated for beneficial treatment to the detriment of another isolated group of shareholders, the disadvantaged group may complain of **oppression.**

For example, oppression may occur when directors of a close corporation who are also the majority shareholders pay themselves high salaries yet refuse to pay dividends or to hire minority shareholders as employees of the corporation. Since there is no market for the shares of a close corporation (apart from selling to the other shareholders), these oppressed minority shareholders have investments that provide them no return. They receive no dividends or salaries, and they can sell their shares only to the other shareholders, who are usually unwilling to pay the true value of the shares.

Generally, courts treat oppression of minority shareholders the same way courts treat director self-dealing: The transaction must be intrinsically fair to the corporation and the minority shareholders.

A special form of oppression is the **freeze-out.** A freeze-out is usually accomplished by merging a corporation with a newly formed corporation under terms by which the minority shareholders do not receive shares of the new corporation but instead receive only cash or other securities. The minority shareholders are thereby *frozen out as shareholders.*

Going private is a special term for a freeze-out of shareholders of *publicly owned corporations.* Some public corporations discover that the burdens of public ownership—such as the periodic disclosure requirements of the SEC—exceed the benefits of being public. Many of these publicly owned companies choose to freeze out their minority shareholders to avoid such burdens.

Freeze-Out Methods The two easiest ways to freeze out minority shareholders are the freeze-out merger and the reverse share split. With the freeze-out merger, the majority shareholders form a new corporation owned only by the majority shareholders. Articles of merger are drafted that will merge the old corporation into the new corporation. Under the merger terms,

only shareholders of the new corporation will survive as shareholders of the surviving new corporation; the shareholders of the old corporation will receive cash only. Since the majority shareholders control both corporations, the articles of merger will be approved. The freeze-out merger was used in the *Coggins* case, which follows at the end of this section.

Using a reverse share split to freeze out the minority shareholders is simpler. Here the articles are amended to reduce the number of outstanding shares by a multiplier, say 1/50,000, that will result in the majority shareholder having whole shares but the minority shareholders having only fractional shares. The articles amendment will be approved since the majority shareholder controls the corporation. After the reverse share split, corporation law permits the corporation to repurchase any fractional shares, even if the shareholders don't consent. The corporation buys the minority shareholders' fractional shares for cash, leaving only the majority shareholder owning the corporation.

Legal Standard Often, going private transactions appear abusive because the corporation goes public at a high price and goes private at a much lower price. Some courts have adopted a fairness test and a business purpose test for freeze-outs. Most states apply the **total fairness test** to freeze-outs. In the freeze-out context, total fairness has two basic aspects: *fair dealing* and *fair price.* Fair dealing requires disclosing material information to directors and shareholders and providing an opportunity for negotiation. A determination of fair value requires the consideration of all the factors relevant to the value of the shares, except speculative projections.

Some states apply the **business purpose test** to freeze-outs. This test requires that the freeze-out accomplish some legitimate business purpose and not serve the special interests of the majority shareholders or the managers.

Other states place no restrictions on freeze-outs provided a shareholder has a **right of appraisal,** which permits a shareholder to require the corporation to purchase his shares at a fair price.

In addition, the SEC requires a *publicly held* company to make a statement on the fairness of its proposed going private transaction and to discuss in detail the material facts on which the statement is based.

In the *Coggins* case, the court required that a freeze-out of minority shareholders of the New England Patriots football team meet both the business purpose and intrinsic fairness tests. The court held that freezing out the minority shareholders merely to allow the corporation to repay the majority shareholder's personal debts was not a proper business purpose.

Coggins v. New England Patriots Football Club, Inc.

492 N.E.2d 1112 (Mass. Sup. Jud. Ct. 1986)

In 1959, the New England Patriots Football Club, Inc. (Old Patriots), was formed with one class of voting shares and one class of nonvoting shares. Each of the original 10 voting shareholders, including William H. Sullivan, purchased 10,000 voting shares for $2.50 per share. The 120,000 nonvoting shares were sold for $5 per share to the general public in order to generate loyalty to the Patriots football team. In 1974, Sullivan was ousted as president of Old Patriots. In November 1975, Sullivan succeeded in regaining control of Old Patriots by purchasing all 100,000 voting shares for $102 per share. He again became a director and president of Old Patriots.

To finance his purchase of the voting shares, Sullivan borrowed $5,350,000 from two banks. The banks insisted that Sullivan reorganize Old Patriots so that its income could be used to repay the loans made to Sullivan and its assets used to secure the loans. To make the use of Old Patriots' income and assets legal, it was necessary to freeze out the nonvoting shareholders. In November 1976, Sullivan organized a new corporation called the New Patriots Football Club, Inc. (New Patriots). Sullivan was the sole shareholder of New Patriots. In December 1976, the shareholders of Old Patriots approved a merger of Old Patriots and New Patriots. Under the terms of the merger, Old Patriots went out of business, New Patriots assumed the business of Old Patriots, Sullivan became the only owner of New Patriots, and the nonvoting shareholders of Old Patriots received $15 for each share they owned.

David A. Coggins, a Patriots fan from the time of its formation and owner of 10 Old Patriots nonvoting shares, objected to the merger and refused to accept the $15 per share payment for his shares. Coggins sued Sullivan and Old Patriots to obtain rescission of the merger. The trial judge found the merger to be illegal and ordered the payment of damages to Coggins and all other Old Patriots shareholders who voted against the merger and had not accepted the $15 per share merger payment. Sullivan and Old Patriots appealed to the Massachusetts Supreme Judicial Court.

Liacos, Justice When the director's duty of loyalty to the corporation is in conflict with his self-interest, the court will vigorously scrutinize the situation. The dangers of self-dealing and abuse of fiduciary duty are greatest in freeze-out situations like the Patriots merger, when a controlling shareholder and corporate director chooses to eliminate public ownership. Because the danger of abuse of fiduciary duty is especially great in a freeze-out merger, the court must be satisfied that the freeze-out was for the advancement of a legitimate corporate purpose. If satisfied that elimination of public ownership is in furtherance of a business purpose, the court should then proceed to determine if the transaction was fair by examining the totality of the circumstances. Consequently, Sullivan and Old Patriots bear the burden of proving, first, that the merger was for a legitimate business purpose, and second, that, considering the totality of circumstances, it was fair to the minority.

Sullivan and Old Patriots have failed to demonstrate that the merger served any valid corporate objective unrelated to the personal interests of Sullivan, the majority shareholder. The sole reason for the merger was to effectuate a restructuring of Old Patriots that would enable the repayment of the personal indebtedness incurred by Sullivan. Under the approach we set forth above, there is no need to consider further the elements of fairness of a transaction that is not related to a valid corporate purpose.

Judgment for Coggins affirmed as modified.

Trading on Inside Information

Officers and directors have *confidential access* to nonpublic information about the corporation. Sometimes, directors and officers purchase their corporation's securities with knowledge of confidential information. Often, disclosure of previously nonpublic, **inside information** affects the value of the corporation's securities. Therefore, directors and officers may make a profit when the prices of the securities increase after the inside information has been disclosed publicly. Shareholders of the corporation claim that they have been harmed by such activity, either because the directors and officers misused confidential information that should have been used only for corporate purposes or because the directors and officers had an unfair informational advantage over the shareholders.

In this century, there has been a judicial trend toward finding a duty of directors and officers to disclose information that they have received confidentially from the corporation before they buy or sell the corporation's securities. As will be discussed fully in Chapter 44, Securities Regulation, the illegality of insider trading is already federal law under the Securities Exchange Act; however, it remains only a minority rule under state corporation law.

Director's Right to Dissent

A director who assents to an action of the board of directors may be held liable for the board's exceeding its authority or its failing to meet its duty of due care or loyalty. A director who attends a board meeting is deemed to have assented to any action taken at the meeting, unless he dissents.

Under the MBCA, to register his **dissent** to a board action, and thereby to protect himself from liability, the director must **not vote in favor** of the action and **must make his position clear** to the other board members. His position is made clear either by requesting that his dissent appear in the minutes or by giving written notice of his dissent to the chairman of the board at the meeting or to the secretary immediately after the meeting. These procedures ensure that the dissenting director will attempt to dissuade the board from approving an imprudent action.

Generally, directors are not liable for failing to attend meetings. However, a director is liable for *continually failing* to attend meetings, with the result that the director is unable to prevent the board from harming the corporation by its self-dealing.

Duties of Directors and Officers of Nonprofit Corporations

Directors and officers of nonprofit corporations owe fiduciary duties to their corporations that are similar to the duties owed by managers of for-profit corporations. Directors and officers owe a duty of care and duties of loyalty to the nonprofit corporation. They must act in good faith, with the care of an ordinarily prudent person, and with a reasonable belief that they are acting in the best interests of the corporation. In addition, a director should not have a conflict of interest in any transaction of the nonprofit corporation. As with for-profit corporations, conflict-of-interest transactions must meet the intrinsic fairness standard. Finally, a nonprofit corporation may not lend money to a director.

Liability concerns of directors of nonprofit corporations, especially public benefit corporations in which directors typically receive no compensation, have made it difficult for some nonprofit corporations to find and retain directors. Therefore, the Model Nonprofit Corporation Act permits nonprofit corporations to limit or eliminate the liability of directors for breach of the duty of care. The articles may not limit or eliminate a director's liability for failing to act in good faith, engaging in intentional misconduct, breaching the duty of loyalty, or having a conflict of interest.

Corporate and Management Liability for Torts and Crimes

When directors, officers, and other employees of the corporation commit torts and crimes while conducting corporate affairs, the issue arises concerning who has liability. Should the individuals committing the torts and crimes be held liable, the corporation, or both?

Liability of the Corporation

For **torts,** the vicarious liability rule of *respondeat superior* applies to corporations. The only issue is whether an employee acted within the scope of her employment, which encompasses not only acts the employee is authorized to commit but may also include acts that the employee is expressly instructed to avoid. Generally, under the doctrine of *respondent superior,* a corporation is liable for an employee's tort that is reasonably connected to the authorized conduct of the employee.

The traditional view was that a corporation could not be guilty of a **crime** because criminal guilt required intent. A corporation, not having a mind, could form no intent. Other courts held that a corporation was not a person for purposes of criminal liability.

Today, few courts have difficulty holding corporations liable for crimes. Modern criminal statutes either expressly provide that corporations may commit crimes or define the term *person* to include corporations. In addition, some criminal statutes designed to protect the public welfare do not require intent as an element of some crimes, thereby removing the grounds used by early courts to justify relieving corporations of criminal liability.

Courts are especially likely to impose criminal liability on a corporation when the criminal act is requested, authorized, or performed by:

1. The board of directors,
2. An officer,
3. Another person having responsibility for formulating company policy, or
4. A high-level administrator having supervisory responsibility over the subject matter of the offense and acting within the scope of his employment.

In addition, courts hold a corporation liable for crimes of its agent or employee committed within the scope of his authority, even if a higher corporate official has no knowledge of the act and has not ratified it.

Directors' and Officers' Liability for Torts and Crimes

A person is always *liable for his own torts and crimes,* even when committed on behalf of his principal. Every person in our society is expected to exercise independent

judgment and not merely to follow orders. Therefore, directors and officers are personally liable when they commit torts or crimes during the performance of their corporate duties.

A director or officer is usually not liable for the torts of employees of the corporation, since the corporation, not the director or the officer, is the principal. He will have **tort** liability, however, if he *authorizes* the tort or *participates* in its commission. A director or officer has **criminal** liability if she *requests, authorizes, conspires,* or *aids and abets* the commission of a crime by an employee.

In the *USX* case, which follows, the court considered the liability of the sole officers and directors of a corporation that illegally dumped toxic waste.

United States v. USX Corporation *68 F.3d 811 (3rd Cir. 1995)*

Atlantic Disposal Service, Inc. (ADS), was in the business of hauling waste from commercial and industrial firms. Alvin White and Charles Carite were the sole shareholders, directors, and officers of ADS, each owning 50 percent of the shares. One of ADS's clients was a plant operated by USX Corporation in Camden, New Jersey. In 1976, the local county dump refused to accept ADS's truckload of 55-gallon drums of toxic liquid waste from USX; ADS then arranged to dispose of the drums on a one-acre wooded parcel in Tabernacle, New Jersey, owned by an ADS employee. In 1982, health department investigators discovered 193 barrels and containers at the Tabernacle site. Sampling by the Environmental Protection Agency revealed a release of hazardous substances to the soil and groundwater. After the EPA cleaned the site, it brought an action in a federal district court to recover the cost from ADS, White, and Carite under section 107(a)(4) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). Section 107(a)(4) imposes liability on any person—commonly referred to as a "transporter"—who accepts hazardous substances for transport to a disposal facility selected by that person, from which there is a release of a hazardous substance. ADS was held liable as a transporter based on its employees' transportation of the drums of toxic waste to the Tabernacle site. White and Carite were held liable on the grounds they exercised control over ADS in 1976 when the drums were dumped at the Tabernacle site. ADS, White, and Carite appealed to the court of appeals.

Vanaskie, Judge Congress enacted CERCLA to facilitate cleanup of potentially dangerous hazardous waste sites, with a view to the preservation of the environment and human health. *Tippins, Inc. v. USX* (1994). One of the principal purposes of CERCLA is to force polluters to pay for costs associated with remedying their pollution.

Liability of a "transporter" is established by showing that a person accepted hazardous substances for transport and either selected the disposal facility or had substantial input into deciding where the hazardous substance should be disposed. The United States presented the testimony of the ADS mechanic who leased the Tabernacle site and who had been paid by ADS to accept the drummed liquid waste for storage. The United States also presented the testimony of the ADS mechanic's former wife, who said that she witnessed the dumping of barrels from ADS trucks on the Tabernacle site. The ADS dispatcher at the time said that he had sent drummed liquid to the Tabernacle site. At least one of the drums found at the sight had attached to it USX shipping documents, and other drums bore the name USX. Accordingly, the judgment that ADS is liable for cleanup costs is affirmed.

The appeal from the judgment against White and Carite presents an issue of first impression in this Court: what standard of liability did Congress intend to establish under CERCLA for principal shareholders and officers of a closely-held corporation that transports hazardous substances?

In *Tippins,* we held that section 107(a)(4) imposed liability on a waste transportation corporation not only if it ultimately selects the disposal facility, but also when it actively participates in the disposal decision to the extent of having had substantial input into which facility was ultimately chosen. This "active participation" standard advances the objectives of CERCLA by recognizing the reality that transporters often play an influential role in the decision to dispose of waste at a given facility.

The express terms of section 107(a)(4) limit liability to those persons who accept hazardous substances for transport and have a substantial input into the selection of the disposal facility. Thus, section 107(a)(4) plainly imposes liability on corporate

officers and shareholders if they participate in the liability-creating conduct.

The United States contends that Congress also intended to impose liability on those who control the affairs of a responsible corporation, irrespective of whether those in control actually participate in the liability-creating conduct. According to the United States, the courts have generally construed CERCLA as permitting recovery from those corporate officers who participated in the management of or exercised control over a corporate entity. Extending liability to those controlling a corporation, according to the United States, is consistent with CERCLA's goal of placing the ultimate responsibility for cleanup on those responsible for problems caused by the disposal of chemical poisons.

CERCLA, of course, is to be construed liberally to effectuate its goals. Liberal construction, however, may not be employed as a means for filling in the blanks so as to discern a congressional intent to impose liability under nearly every conceivable scenario. In light of the established principle of limited liability that protects corporate officers or employees who do not actually participate in liability-creating conduct, there must be some basis in the statute itself, beyond its general purpose, to support the conclusion that Congress intended to impose liability on those who control the corporation's day-to-day activities.

Congress could have specified that majority shareholders or officers of corporations engaged in the waste hauling business are personally responsible for releases of hazardous substances from disposal facilities selected by their companies. On the contrary, the sparse legislative history indicates that Congress anticipated that issues of liability not resolved by CERCLA shall be governed by evolving principles of common law. Under these circumstances, it is appropriate to limit liability to those persons who are clearly made liable by the language Congress used—those who actively participate in the process of accepting hazardous substances for transport and have a substantial role in the selection of the disposal site.

Contrary to the assertion of White and Carite, however, liability under section 107(a)(4) is not limited to those who personally participated in the transportation of hazardous wastes. It is not necessary that the officer personally accept the waste for transport. Nor is it necessary that the officer participate in the selection of the disposal facility. Liability may be imposed where the officer is aware of the acceptance of materials for transport and of his company's substantial participation in the selection of the disposal facility. An officer who has authority to control disposal decisions should not escape liability when she has actual knowledge that a subordinate has selected a disposal site and, effectively, acquiesces in the subordinate's actions.

Although there was indeed substantial evidence that White and Carite were actively involved in the day-to-day affairs of ADS at the time of the disposal of waste drums at the Tabernacle site, there was also countervailing evidence that White and Carite were not "hands on" managers during the relevant time period. Moreover, White disavowed knowledge of disposal of drums at the Tabernacle site. Corroboration for White's assertion may be inferred from the fact that during the relevant time frame he supervised the sales and administrative staff and did not have active involvement in the operational aspects of the business.

Tony Carite, the younger brother of Charles Carite, testified that Charles Carite had few specific responsibilities in the day-to-day business. Tony Carite was the operations manager of ADS. The ADS dispatcher and truck drivers at the time of the dumping testified that they reported directly to Tony Carite and had little, if any, involvement with Charles Carite.

Under these circumstances, the United States was not entitled to summary judgment against White and Carite.

Judgment against ADS affirmed; judgment reversed in favor of White and Carite.

Insurance and Indemnification

The extensive potential liability of directors deters many persons from becoming directors. They fear that their liability for their actions as directors may far exceed their fees as directors. To encourage persons to become directors, corporations **indemnify** them for their outlays associated with defending lawsuits brought against them and paying judgments and settlement amounts. In addition, or as an alternative,

corporations purchase **insurance** that will make such payments for the directors. Indemnification and insurance are provided for officers, also.

Mandatory Indemnification of Directors

Under the MBCA, a director is entitled to *mandatory indemnification* of her reasonable litigation expenses when she is sued and *wins completely* (is *wholly successful*). The greatest part of such expenses is attorney's fees. Because indemnification is mandatory in this context, when the corporation refuses to indemnify a director who has won completely, she may ask a court to order the corporation to indemnify her.

Permissible Indemnification of Directors

Under the MBCA, a director who loses a lawsuit *may* be indemnified by the corporation. This is called *permissible indemnification,* because the corporation is permitted to indemnify the director but is not required to do so.

The corporation must establish that the director acted in *good faith* and reasonably believed that she acted in the *best interests* of the corporation. When a director seeks indemnification for a *criminal* fine, the corporation must establish a third requirement—that the director had no reasonable cause to believe that her conduct was unlawful. Finally, any permissible indemnification must be approved by someone independent of the director receiving indemnification—a disinterested board of directors, disinterested shareholders, or independent legal counsel. Permissible indemnification may cover not only the director's reasonable expenses but also fines and damages that the director has been ordered to pay.

A corporation may not elect to indemnify a director who was found to have received a *financial benefit* to which he was not entitled. Such a rule tends to prevent indemnification of directors who acted from self-interest. If a director received no financial benefit but was held liable to his corporation or paid an amount to the corporation as part of a *settlement,* the director may be indemnified only for his reasonable expenses, not for the amount that he paid to the corporation. The purpose of these rules is to avoid the circularity of having the director pay damages to the corporation and then having the corporation indemnify the director for the same amount of money.

Advances A director may not be able to afford to make payments to her lawyer prior to the end of a lawsuit. More important, a lawyer may refuse to defend a director who cannot pay legal fees. Therefore, the MBCA permits a corporation to make advances to a director to allow the director to afford a lawyer, if the director affirms that she meets the requirements for permissible indemnification and she promises to repay the advances if she is found not entitled to indemnification.

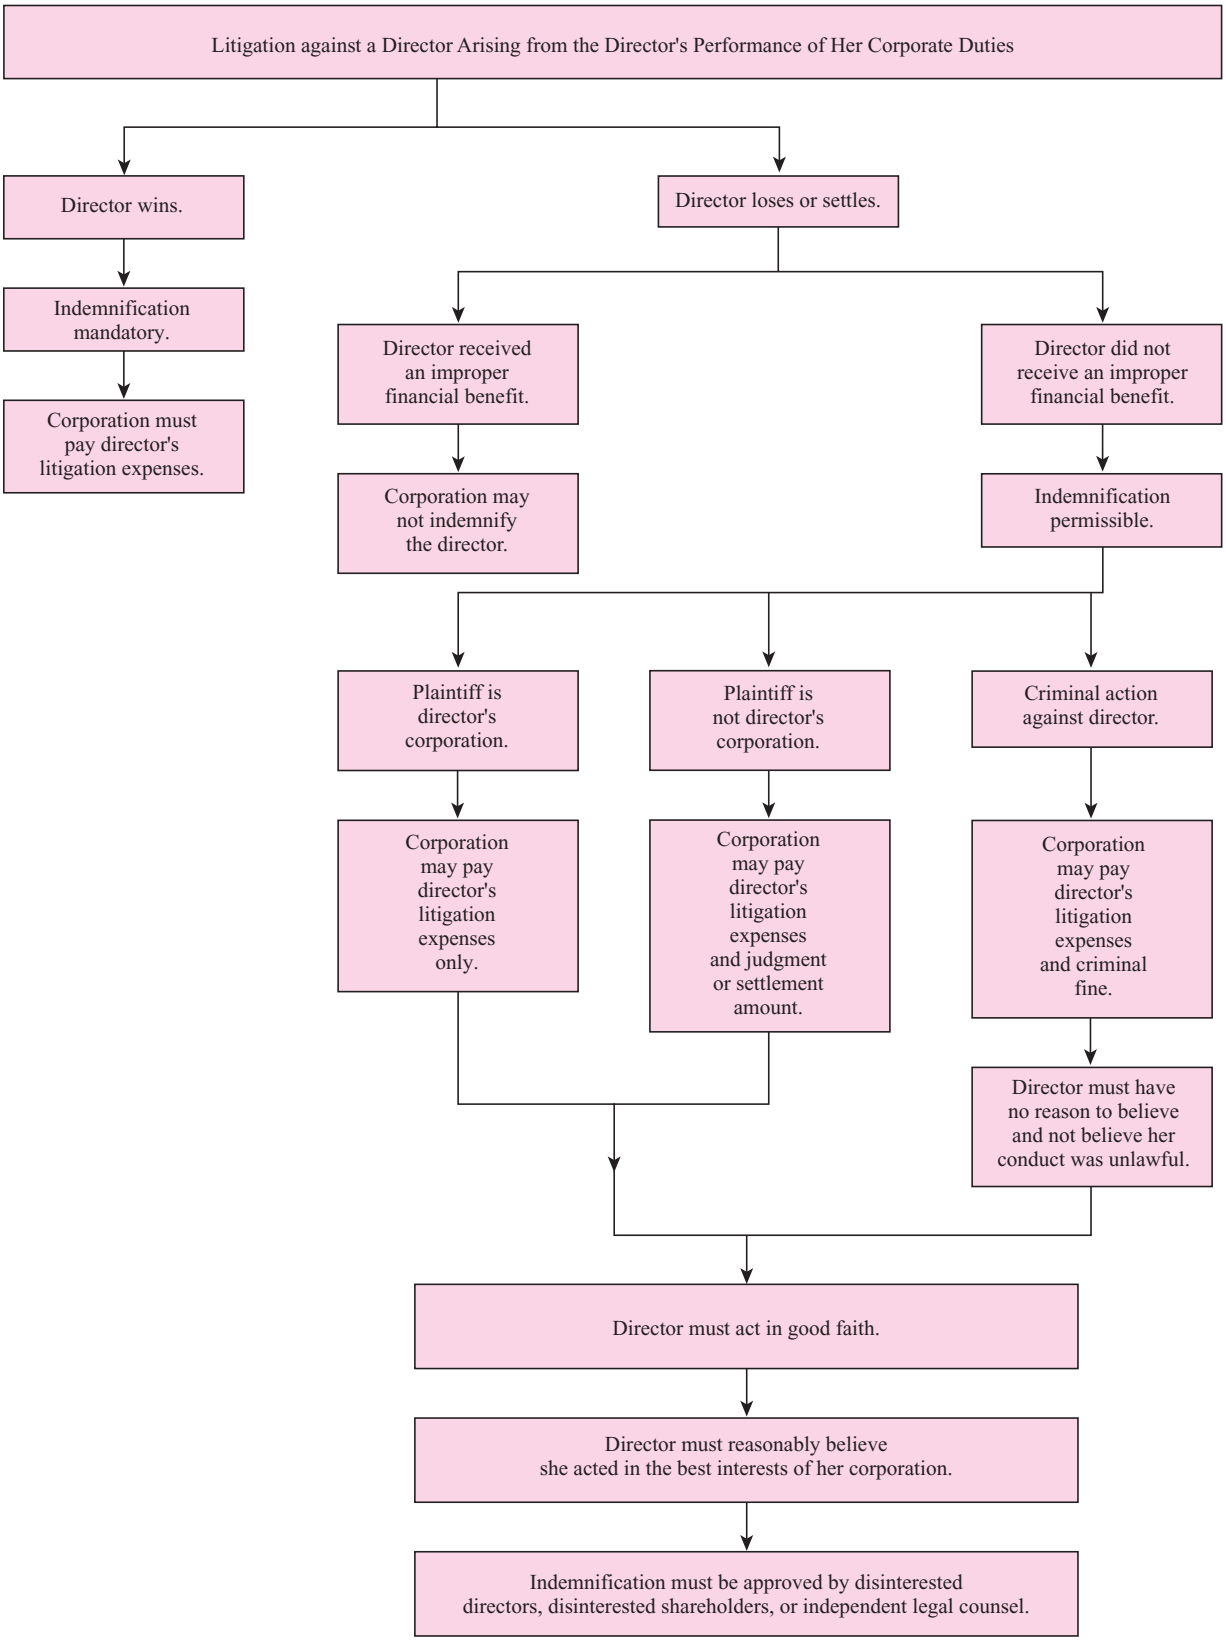
Court-Ordered Indemnification A court may order a corporation to indemnify a director if it determines that the director meets the standard for *mandatory* indemnification or if the director is *fairly and reasonably* entitled to indemnification in view of all the relevant circumstances.

Indemnification of Nondirectors Under the MBCA, officers and employees who are not directors are entitled to the same mandatory indemnification rights as directors.

Insurance

The MBCA does not limit the ability of a corporation to purchase insurance on behalf of its directors, officers, and employees. Insurance companies, however, are unwilling to insure all risks. In addition, some risks are *legally uninsurable as against public policy.* Therefore, liability for misconduct such as self-dealing, usurpation, and securities fraud is uninsurable.

Nonprofit Corporations



A nonprofit corporation may obtain insurance and indemnify its officers and directors for liabilities incurred in the course of their performance of their official duties. The MNCA requires indemnification when the director or officer wins the lawsuit completely. A corporation is permitted to indemnify an officer or director who is found liable if he acted in good faith and reasonably believed he acted in the best interests of the corporation.

See Figure 2 for a review of indemnification of directors under the MBCA.

Ethical and Public Policy Concerns

1. Do you agree that the primary objective of a corporation should be to maximize profits for its shareholders? What other objectives should a corporation have

Figure 2 *Indemnification of Directors under the MBCA*

in addition to or instead of maximizing profits? Should the board of directors engage in an activity that maximizes profits but harms the community in which the corporation is located? Is it possible for a board to maximize profits and to be socially responsible to the community in which the corporation is located?

2. Should corporation law absolutely prevent CEO domination of a corporation or merely allow shareholders to restrict CEO power if shareholders choose? Why do shareholders invest in a corporation in which the CEO dominates the corporation? Why don't shareholders elect directors who control the CEO?

3. Should corporation law allow a board of directors great discretion in fighting hostile takeovers of a corporation? Is your answer affected by whether the raider is able to manage the corporation better than current management? Is your answer affected by whether the raider intends to move the operations of the target to another community? What other factors might affect your view of the law we have concerning takeover defenses? Suppose the raider plans to break up the corporation and to sell the divisible parts of the corporation's business to other corporations. Is board opposition to such a hostile bid more justifiable? Does society benefit from such a bust-up takeover?

Problems and Problem Cases

1. The board of directors of Pine Belt Producers Cooperative, Inc., authorized any two of its three officers to withdraw funds from its account at First National Bank of Ruston. The board also authorized its president, Claude O'Bryan, to borrow up to $80,000 in the name of Pine Belt. O'Bryan obtained a $57,000 loan for Pine Belt from the bank in the form of a check payable to Pine Belt. O'Bryan indorsed the check in the name of Pine Belt and gave the check back to the bank for the purpose of paying a personal debt of the vice president of Pine Belt. Pine Belt later claimed that the bank acted improperly by honoring the check because it was indorsed by O'Bryan only. Pine Belt also claimed the bank acted improperly by allowing corporate funds to be used to pay a noncorporate debt. The bank defended by arguing that O'Bryan had authority to indorse checks payable to Pine Belt and to direct how Pine Belt's funds would be used. Who won?

2. Jacob Lehman and Shlomo Piontkowski were surgeons who practiced together in a professional corporation. They were the only directors and only shareholders, Lehman owning six shares and Piontkowski owning four shares. Each was an employee of the corporation. Piontkowski's employment contract granted to the board of directors of the corporation the power to terminate his employment for "personal misconduct of such a material nature as to be professionally detrimental to the corporation." From 1977 to 1979, Lehman and Piontkowski disagreed on the distribution of the corporation's income. Dissatisfied with his share of the income, Piontkowski canceled surgery, informed his patients that he was on vacation, and planned to open his own office nearby. At a special shareholder meeting, Lehman proposed that Piontkowski be removed as a director and voted his six shares to oust Piontkowski. Piontkowski did not vote his four shares. Lehman then nominated himself as sole director, voted his shares to elect himself sole director, and adjourned the shareholder meeting. Lehman then called the special directors' meeting to order and, as the sole director, dismissed Piontkowski as an employee. Has Piontkowski been properly removed as a director and employee?

3. Lillian Pritchard was a director of Pritchard & Baird Corporation, a business founded by her husband. After the death of her husband, her sons took control of the corporation. For two years, they looted the assets of the corporation through theft and improper payments. The corporation's financial statements revealed the improper payments to the sons, but Mrs. Pritchard did not read the financial statements. She did not know what her sons were doing to the corporation or that what they were doing was unlawful. When Mrs. Pritchard was sued for failing to protect the assets of the corporation, she argued that she was a figurehead director, a simple housewife who served as a director as an accommodation to her husband and sons. Was Mrs. Pritchard held liable?

4. The Chicago National League Ball Club, Inc. (Chicago Cubs), operated Wrigley Field, the Cubs' home park. Through the 1965 baseball season, the Cubs were the only major league baseball team that played no home games at night because Wrigley Field had no lights for nighttime baseball. Philip K. Wrigley, director and president of the corporation, refused to install lights because of his personal opinion that baseball was a daytime sport and that installing lights and scheduling

night baseball games would result in the deterioration of the surrounding neighborhood. The other directors assented to this policy. From 1961 to 1965, the Cubs suffered losses from their baseball operations. The Chicago White Sox, whose weekday games were generally played at night, drew many more fans than did the Cubs. A shareholder sued the board of directors to force them to install lights at Wrigley Field and to schedule night games. What did the court rule?

5. Paul Brane, Kenneth Richison, Ralph Dawes, and John Thompson were directors of LaFontaine Grain Co-op, a grain elevator cooperative. Co-op hired Eldon Richison as its manager with authority to buy and sell grain, which accounted for 90 percent of its business. After Co-op suffered a substantial loss in 1979, its independent accountant recommended to the directors that Co-op hedge its grain positions to protect itself from future losses. The directors authorized Eldon Richison to hedge for Co-op, but he was inexperienced in hedging. Moreover, the board failed to attain knowledge of the basic fundamentals of hedging to be able to direct hedging activities and supervise Eldon Richison. He hedged only $20,050 in 1980, whereas Co-op had $7,300,000 in grain sales. Co-op lost over $400,000 in 1980, due primarily to the failure to hedge. Did the directors have liability to Co-op?

6. Paramount Communications, Inc., was the target of an unsolicited $90 per share takeover bid by QVC Network, Inc. To thwart QVC's bid, Paramount's board of directors adopted defense tactics to facilitate a friendly takeover by Viacom, Inc. at a price of $85 per share. Paramount agreed to grant Viacom a lock-up option to purchase almost 20 percent of Paramount's shares at a bargain price. In addition, Paramount promised to pay Viacom a termination fee of $100,000,000, which was about 10 percent of Paramount's assets, if Paramount terminated the merger because of a competing transaction or if its shareholders voted against the merger. Has Paramount's board of directors acted legally?

7. Micom Holding Company was owned entirely by the Edwin Walhof family. Micom Holding owned 93 percent of the shares of Micom Corporation. To freeze out the 7 percent minority shareholders of Micom Corporation, Walhof decided to merge Micom Corporation and Micom Holding Company. Under the merger terms, Micom Holding Company was the surviving corporation, the Walhof family were the only surviving shareholders, and the minority shareholders received $10 per share. What standards must the freeze-out merger meet to be legal?

8. Lindenhurst Drugs, Inc., was owned equally by Allen Becker, Burton Steinberg, and Marvin Steinberg. Each was also an officer and director. The corporation operated a drugstore in leased space in the Linden Plaza Shopping Center. Burton was the manager of the drugstore. In 1979, wanting more retail space to expand their product lines, Becker and the Steinbergs offered to purchase the Ben Franklin store franchise in the Linden Plaza Shopping Center. Their offer was rejected, but the corporation still had an interest in buying the Ben Franklin store. In 1981, the Linden Plaza Shopping Center notified the corporation that its lease would not be renewed at the end of the year. Becker did not immediately inform the Steinbergs of the termination notice. He did nothing to find a new space for the store. Instead, Becker purchased the Ben Franklin store in the name of his own corporation and leased space for the Ben Franklin store from Linden Plaza Shopping Center. Has Becker done anything wrong?

9. Butch Stanko was an officer and shareholder of Cattle King Packing Company, Inc., which operated a meatpacking plant in Adams County, Colorado. Gary Waderich was a general sales manager primarily responsible for commercial sales of meat food products and for the daily operation of Cattle King. Stanko set company policies and practices to circumvent the Federal Meat Inspection Act (FMIA), which policies and practices he instructed Waderich and other employees to follow. When Stanko returned to his home in Scottsbluff, Nebraska, he monitored operations by phone and visits to the plant to make certain that the policies and practices that he had established were being followed. For example, spoiled meat rejected by a buyer and returned to Cattle King was in bags that were puffy with gas caused by the spoilage. On instructions by Waderich, an employee reworked the meat by poking the bags to release the gas, and the meat was reshipped to the same buyer. Were Waderich, Stanko, and Cattle King guilty of criminal violations of the FMIA?

10. Shareholders collectively owning 80 percent of the shares of the Bank of New Mexico Holding Company made a shareholders' buy-sell agreement. Those shareholders included directors of the corporation. One of the agreeing shareholders sued the other shareholders, including the directors, to obtain a determination of the price of the shares under the agreement. The corporation reimbursed the legal expenses of the directors who, as shareholders, were defendants in the litigation. Did the corporation act properly in indemnifying the directors?

XI. Dissolution and Termination of Corporations
- *A. Winding Up and Termination*
- *B. Dissolution of Nonprofit Corporations*

The *shareholders* are the ultimate owners of a corporation, but a shareholder has *no right to manage* the corporation. Instead, a corporation is managed by its board of directors and its officers for the benefit of its shareholders.

The shareholders' role in a corporation is limited to electing and removing directors, approving certain important matters, and ensuring that the actions of the corporation's managers are consistent with the applicable state corporation statute, the articles of incorporation, and the bylaws.

Shareholders also assume a few responsibilities. For example, all shareholders are required to pay the promised consideration for shares. Shareholders are

liable for receiving dividends beyond the lawful amount. In addition, controlling shareholders may owe special duties to minority shareholders.

Close corporation shareholders enjoy rights and owe duties beyond the rights and duties of shareholders of publicly owned corporations. In addition, some courts have found close corporation shareholders to be fiduciaries of each other.

This chapter's study of the rights and responsibilities of shareholders begins with an examination of shareholders' meetings and voting rights.

Shareholders' Meetings

The general corporation statutes of most states and the Model Business Corporation Act (MBCA) provide that an **annual meeting of shareholders** shall be held. The purpose of an annual shareholders' meeting is to elect new directors and to conduct other necessary business. Often, the shareholders are asked to approve the corporation's independent auditors and to vote on shareholders' proposals.

Special meetings of shareholders may be held whenever a corporate matter arises that requires immediate shareholders' action, such as the approval of a merger that cannot wait until the next annual shareholders' meeting. Under the MBCA, a special shareholders' meeting may be called by the board of directors or by a person authorized to do so by the bylaws, usually the president or the chairman of the board. In addition, the holders of at least 10 percent of the shares entitled to vote at the meeting may call a special meeting.

Notice of Meetings

To permit shareholders to arrange their schedules for attendance at shareholders' meetings, the MBCA requires the corporation to give shareholders **notice** of annual and special meetings of shareholders. Notice of a *special meeting* must list the purpose of the meeting. Under the MBCA, notice of an *annual meeting* need not include the purpose of the meeting unless shareholders will be asked to approve extraordinary corporate changes—for example, amendments to the articles of incorporation and mergers.

Notice need be given only to shareholders entitled to vote who are **shareholders of record** on a date fixed by the board of directors. Shareholders of record are those whose names appear on the share-transfer book of the corporation. Usually, only shareholders of record are entitled to vote at shareholders' meetings.

Conduct of Meetings

To conduct business at a shareholders' meeting, a **quorum** of the outstanding shares must be represented at the meeting. If the approval of more than one class of shares is required, a quorum of each class of shares must be present. A quorum is a majority of shares outstanding, unless a greater percentage is established in the articles. The president or the chairman of the board usually presides at shareholders' meetings. Minutes of shareholders' meetings are usually kept by the secretary.

A majority of the votes cast at the shareholders' meeting will decide issues that are put to a vote. If the approval of more than one class of shares is required, a majority of the votes cast by each class must favor the issue. The articles may require a greater than majority vote. Ordinarily, a shareholder is entitled to cast as many votes as he has shares.

Shareholders have a right of *full participation* in shareholders' meetings. This includes the right to offer resolutions, to speak for and against proposed resolutions, and to ask questions of the officers of the corporation.

Typical shareholder resolutions are aimed at protecting or enhancing the interests of minority shareholders and promoting current social issues. Proposals have included limiting corporate charitable contributions, restricting the production of nuclear power, banning the manufacture of weapons, and requiring the protection of the environment.

Shareholder Action without a Meeting

Generally, shareholders can act only at a properly called meeting. However, the MBCA permits shareholders to act without a meeting if *all of the shareholders entitled to vote consent in writing* to the action.

Shareholders' Election of Directors

Straight Voting

The most important shareholder voting right exercised at a shareholder meeting is the right to elect the directors. Normally, directors are elected by a single class of shareholders in **straight voting,** in which each share has one vote for each new director to be elected. With straight voting, a shareholder may vote

for as many nominees as there are directors to be elected; a shareholder may cast for each such nominee as many votes as she has shares. For example, in a director election in which 15 people have been nominated for 5 director positions, a shareholder with 100 shares can vote for up to 5 nominees and can cast up to 100 votes for each of those 5 nominees.

Under straight voting, the nominees with the most votes are elected. Consequently, straight voting allows a majority shareholder to elect the entire board of directors. Thus, minority shareholders are unable to elect any representatives to the board without the cooperation of the majority shareholder.

Straight voting is also a problem in close corporations in which a few shareholders own equal numbers of shares. In such corporations, no shareholder individually controls the corporation, yet if the holders of a majority of the shares act together, those holders will elect all of the directors and control the corporation. Such control may be exercised to the detriment of the other shareholders.

Two alternatives to straight voting aid minority shareholders' attempts to gain representation on the board and prevent harmful coalitions in close corporations: cumulative voting and class voting.

Cumulative Voting

With cumulative voting, a corporation allows a shareholder to cumulate her votes by multiplying the number of directors to be elected by the shareholder's number of shares. A shareholder may then allocate her votes among the nominees as she chooses. She may vote for only as many nominees as there are directors to be elected, but she may vote for fewer nominees. For example, she may choose to cast all of her votes for only one nominee.

See Figure 1 for a further explanation of the mechanics of cumulative voting.

Figure 1 *Cumulative Voting Formula*

The formula for determining the minimum number of shares required to elect a desired number of directors under cumulative voting is:

$$X = \frac{S \times R}{D + 1} + 1$$

X = Number of shares needed to elect the desired number of directors
S = Total number of shares voting at the shareholders' meeting
R = Number of director representatives desired
D = Total number of directors to be elected at the meeting

Example: Sarah Smiles wants to elect two of the five directors of Oates Corporation. One thousand shares will be voted. In this case:

$S = 1{,}000$
$R = 2$
$D = 5$

Therefore:

$$X = 334.33$$

Fractions are ignored; thus, Sarah will need to hold at least 334 shares to be able to elect two directors.

Cumulative Voting

A corporation may have several classes of shares. The two most common classes are *common shares* and *preferred shares,* but a corporation may have several classes of common shares and several classes of preferred shares. Many close corporations have two or more classes of common shares with different voting rights. Each class may be entitled to elect one or more directors, in order to balance power in a corporation.

For example, suppose a corporation has four directors and 100 shares held by four share holders—each of whom owns 25 shares. With straight voting and no classes of shares, no shareholder owns enough shares to elect himself as a director, because 51 shares are necessary to elect a director. Suppose, however, that the corporation has four classes of shares, each with the right to elect one of the directors. Each class of shares is issued to only one shareholder. Now, as the sole owner of a class of shares entitling the class to elect one director, each shareholder can elect himself to the board.

Using classes of shares is the cleanest way to allocate the power to elect directors among shareholders, as well as allocate equity ownership of the corporation. To protect such allocations, however, the articles should require approval of every class of shares to change the rights of any class or to create a new class of shares.

Shareholder Control Devices

While cumulative voting and class voting are two useful methods by which shareholders can allocate or acquire voting control of a corporation, there are other devices that may also be used for these purposes: voting trusts; shareholder voting agreements; and proxies, especially irrevocable proxies.

Voting Trusts With a **voting trust,** shareholders transfer their shares to one or more voting trustees and receive voting trust certificates in exchange. The shareholders retain many of their rights, including the right to receive dividends, but the voting trustees vote for directors and other matters submitted to shareholders.

The purpose of a voting trust is to control the corporation through the concentration of shareholder voting power in the voting trustees, who often are participating shareholders. If several minority shareholders collectively own a majority of the shares of a corporation, they may create a voting trust and thereby control the corporation. You may ask why shareholders need a voting trust when they are in apparent agreement on how to vote their shares. The reason is that they may have disputes in the future that could prevent the shareholders from agreeing how to vote. The voting trust ensures that the shareholder group will control the corporation despite the emergence of differences.

The MBCA limits the duration of voting trusts to 10 years, though the participating shareholders may agree to extend the term for another 10 years. Also, a voting trust must be made public, with copies of the voting trust document available for inspection at the corporation's offices.

Shareholder Voting Agreements As an alternative to a voting trust, shareholders may merely agree how they will vote their shares. For example, shareholders collectively owning a majority of the shares may agree to vote for each other as directors, resulting in each being elected to the board of directors.

A shareholder voting agreement must be written; only shareholders signing the agreement are bound by it. When a shareholder refuses to vote as agreed, courts specifically enforce the agreement.

Shareholder voting agreements have two advantages over voting trusts. First, their duration may be *perpetual.* Second, they may be kept secret from the other shareholders; they usually do not have to be filed in the corporation's offices.

Proxies A shareholder may appoint a **proxy** to vote his shares. If several minority shareholders collectively own a majority of the shares of a corporation, they may appoint a proxy to vote their shares and thereby control the corporation. The ordinary proxy has only a limited duration—11 months under the MBCA—unless a longer term is specified. Also, the ordinary proxy is *revocable* at any time. As a result, there is no guarantee that control agreements accomplished through the use of revocable proxies will survive future shareholder disputes.

However, a proxy is *irrevocable* if it is coupled with an interest. A proxy is coupled with an interest when, among other things, the person holding the proxy is a party to a shareholder voting agreement or a buy-and-sell agreement. The principal use of irrevocable proxies is in conjunction with shareholder voting agreements.

In the *Eliason* case, which follows, the court considered the legality of a shareholder voting agreement and whether a proxy is irrevocable. Note that for Louise Eliason to win on the bigger issue, she had to argue that the proxy given to her by her father had been revoked.

Eliason v. Englehart *733 A.2d 944 (Del. Sup. Ct. 1999)*

Brosius-Eliason Co. is a building and materials company whose stock is owned by three families. The Eliason family owns a majority of the 9,900 shares outstanding, with James Eliason (3,928 shares) and his sister Sarah Englehart (1,260 shares) holding the controlling block. The Brosius family owns a total of 3,690 shares, and Frank Hewlett owns the remaining 1,062 shares. On July 31, 1997, James Eliason executed a proxy giving his daughter, Louise Eliason, authority to vote his shares. Two weeks later, James and his sister Sarah entered into a voting agreement that assured Eliason family control over the company. The agreement provided, among other things, that James and Sarah would (1) grant each other irrevocable proxies to vote their shares in accordance with the agreement and (2) not sell or transfer their stock without the prior consent of the other. The second clause—requiring consent to sell or transfer the shares—made the proxies coupled with an interest. Immediately after signing the voting agreement, James (acting through Louise) and Sarah executed written consents to remove the incumbent board and elect new board members.

Over the next few months, Louise started asserting her family's control over the company by proposing a buyout of the Brosius family stock and a reorganization of the business. Sarah disagreed with Louise. On February 6, 1998, Sarah joined with the two other families, removed the incumbent directors, and replaced them with representatives from each of the three families.

Louise responded by suing to invalidate the election of the new directors. The trial court held that the rightful directors were the new directors elected in 1998. The court reasoned that the 1998 election was effective if Sarah's votes counted toward the majority, and Sarah's votes could be counted if she was not bound by her voting agreement with James. The issue was whether the 1997 proxy James gave to Louise was irrevocable. The trial court held that it was irrevocable and that Louise held James's voting power. Since the proxy predated the voting agreement by two weeks, the trial court concluded that James had no power to vote his shares by the time he contracted with Sarah. Therefore, the trial court concluded that James's voting agreement with Sarah failed for lack of consideration given by James.

Louise appealed to the Supreme Court of Delaware. To win the case, she had to argue that the proxy her father, James, gave to her was revocable. If it was revocable, then James could revoke it at any time. Louise argued that James revoked the proxy by entering the voting agreement with his sister Sarah. Thus, Louise argued that both James and Sarah gave voting rights to each other in the voting agreement, supplying the necessary consideration to make the agreement enforceable. In the following decision, the Delaware Supreme Court agreed with Louise.

Per Curiam A proxy is evidence of an agent's authority to vote shares owned by another. To be effective as a proxy, a document must identify the shares that are to be voted by the agent and include some indication of authenticity, such as the stockholder's signature or a facsimile of the signature. Proxies are revocable unless they satisfy the requirements of 8 Delaware Code section 212(e):

> A duly executed proxy shall be irrevocable if it states that it is irrevocable and if, and only as long as, it is coupled with an interest sufficient in law to support an irrevocable power. . . .

The parties agree that the proxy James gave to Louise meets the statutory requirement that it be coupled with an interest. The question is whether it "states that it is irrevocable." The disputed proxy provides, in relevant part:

> PROXY
>
> KNOW ALL MEN BY THESE PRESENTS:
>
> That James T. Eliason, III, as the record owner of 3,928 shares of the issued and outstanding shares of voting stock of Brosius-Eliason Co., a Delaware corporation ("BEC"), for good and valuable consideration the legal sufficiency of which is hereby acknowledged by the undersigned, do hereby constitute and appoint Louise R. Eliason as attorney and agent for him . . . to vote as his proxy (i) at all annual and special meetings of the shareholders of BEC, . . . and (ii) on all consents or dissents by shareholders of BEC . . . and any other matter, as fully as he could act, giving to said proxy, agent and attorney, full power of substitution and revocation. This proxy shall terminate on July 31, 1999.
>
> Date: 7/31, 1997 /s/ James T. Eliason III
>
> On this 31 day of July, 1997, before me a Notary Public in and for said County and State, personally appeared James T. Eliason, III, known to me to be the person whose name is subscribed to the within Irrevocable Proxy and acknowledged to me that he executed the same.
>
> /s/ Notary Public

The word "irrevocable" appears only in the acknowledgment. Thus, the question becomes whether the acknowledgment may be construed to be part of the proxy for purposes of section 212(e). We conclude that section 212(e) requires that the word "irrevocable" appear somewhere in the proxy, but an acknowledgment is not part of the proxy.

Generally, proxies are revocable. If a proxy is to be irrevocable, section 212(e) requires, among other things, that it state that it is irrevocable. The purpose of this requirement is apparent—to distinguish between revocable and irrevocable proxies and to put interested parties (the stockholder, proxy holder and corporation) on notice that the proxy is irrevocable. The statutory language is simple and direct. A proxy must state that it is irrevocable, which means that the word "irrevocable," or perhaps a synonym, must appear in the proxy.

The problem is that section 212 does not specify whether an acknowledgment of the stockholder's signature is considered part of the proxy. From our review of acknowledgments, generally, we conclude that it is not. An acknowledgment is a means by which the signature on an instrument may be authenticated. There is no requirement that proxies be acknowledged, but even if there were, the acknowledgment ordinarily forms no part of the substance of the instrument. A proper acknowledgment does not validate an otherwise invalid instrument. Since an acknowledgment does not affect the substance of the instrument being acknowledged, we conclude that it cannot be used to satisfy the statutory requirement that a proxy state that it is irrevocable.

This conclusion recognizes the restricted function of an acknowledgment and also promotes the statutory goal of providing notice to interested parties. The acknowledgment normally appears after the signature line on an instrument. In this case, the acknowledgment was on the same page as the proxy, but it could have been on the following page. In either event, the location of the acknowledgment, combined with its lack of substantive impact, creates a real risk that the party signing the document will never read it.

We hold that the proxy James gave to his daughter, Louise, failed to satisfy the requirements of section 212(e), and, therefore, is revocable.

Judgment reversed in favor of Louise Eliason. Remanded to the trial court.

Fundamental Corporate Changes

Other matters besides the election of directors require shareholder action, some because they make fundamental changes in the structure or business of the corporation.

Because the articles of incorporation embody the basic contract between a corporation and its shareholders, shareholders must approve most **amendments of the articles of incorporation.** For example, when the articles are amended to increase the number of authorized shares or reduce the dividend rights of preferred shareholders, shareholder approval is needed.

A **merger** is a transaction in which one corporation merges into a second corporation. Usually, the first corporation dissolves; the second corporation takes all the business and assets of both corporations and becomes liable for the debts of both corporations. Usually, the shareholders of the dissolved corporation become shareholders of the surviving corporation. Ordinarily, both corporations' shareholders must approve a merger.

Corporation law allows great flexibility in the terms of a merger. For example, a merger may freeze out minority shareholders by paying them cash only while allowing majority shareholders to remain as shareholders of the surviving corporation, as was addressed in Chapter 42.

A **consolidation** is similar to a merger except that both old corporations go out of existence and a new corporation takes the business, assets, and liabilities of the old corporations. Both corporations' shareholders must approve the consolidation. Modern corporate practice makes consolidations obsolete, since it is usually desirable to have one of the old corporations survive. The MBCA does not recognize consolidations. However, the effect of a consolidation can be achieved by creating a new corporation and merging the two old corporations into it.

A **share exchange** is a transaction by which one corporation becomes the owner of all of the outstanding shares of a second corporation through a *compulsory* exchange of shares: The shareholders of the second corporation are compelled to exchange their shares for shares of the first corporation. The second corporation remains in existence and becomes a wholly owned subsidiary of the first corporation. Only the selling shareholders must approve the share exchange.

A **sale of all or substantially all of the assets** of the business other than in the regular course of business must be approved by the shareholders of the selling corporation, since it drastically changes the shareholders' investment. Thus, a corporation's sale of all its real property and equipment is a sale of substantially all its assets, even though the corporation continues its business by leasing the assets back from the purchaser. However, a corporation that sells its building, but retains its machinery with the intent of

continuing operations at another location, has not sold all or substantially all of its assets.

A **dissolution** is the first step in the termination of the corporation's business. The typical dissolution requires shareholder approval. Dissolution of corporations is covered more fully at the end of this chapter.

The articles of incorporation and the bylaws may require or permit other matters to be submitted for shareholder approval. For example, loans to officers, self-dealing transactions, and indemnifications of managers for litigation expenses may be approved by shareholders. Also, many of the states require shareholder approval of share option plans for high-level executive officers, but the MBCA does not.

Procedures Required

Similar procedures must be met to effect each of the above fundamental changes. The procedures include approval of the board of directors, notice to all of the shareholders whether or not they are entitled to vote, and majority approval of the votes held by shareholders entitled to vote under the statute, articles, or bylaws. Majority approval will be insufficient if a corporation has a supermajority shareholder voting requirement, such as one requiring two-thirds approval.

If there are two or more classes of shares, the articles may provide that matters voted on by shareholders must be approved by each class substantially affected by the proposed transaction. For example, a merger may have to be approved by a majority of the preferred shareholders and a majority of the common shareholders. As an alternative, the articles may require only the approval of the shareholders as a whole.

Under the MBCA, voting by classes is required for mergers, share exchanges, and amendments of the articles if these would substantially affect the rights of the classes. For example, the approval of preferred shareholders is required if a merger would change the dividend rights of preferred shareholders.

In many states, no approval of shareholders of the *surviving corporation* is required for a merger *if* the merger does not fundamentally alter the character of the business or substantially reduce the shareholders' voting or dividend rights.

Also, many statutes, including the MBCA, permit a merger between a parent corporation and its subsidiary without the approval of the shareholders of either corporation. Instead, the board of directors of the parent approves the merger and sends a copy of the merger plan to the subsidiary's shareholders. This simplified merger is called a **short-form merger.** It is available only if the parent owns a high percentage of the subsidiary's shares—90 percent under the MBCA and the Delaware statute.

Dissenters' Rights

Many times, shareholders approve a corporate action by less than a unanimous vote, indicating that some shareholders oppose the action. For the most part, the dissenting shareholders have little recourse. Their choice is to remain shareholders or to sell their shares. For close corporation shareholders, there is no choice—the dissenting close corporation shareholder has no ready market for her shares, so she will remain a shareholder.

Some corporate transactions, however, so materially change a shareholder's investment in the corporation or have such an adverse effect on the value of a shareholder's shares that it has been deemed unfair to require the dissenting shareholder either to remain a shareholder (because there is no fair market for the shares) or to suffer a loss in value when he sells his shares on a market that has been adversely affected by the news of the corporate action. Corporate law has therefore responded by creating **dissenters' rights** (a right of appraisal) for shareholders who disagree with specified fundamental corporate transactions. Dissenters' rights require the corporation to pay dissenting shareholders the *fair value* of their shares.

Under the MBCA, the dissenters' rights cover mergers, short-form mergers, share exchanges, significant amendments of the articles of incorporation, and sales of all or substantially all the assets other than in the ordinary course of business. Some statutes cover consolidations also.

A dissenting shareholder seeking payment of the fair value of his shares must have the *right to vote* on the action to which he objects; however, a shareholder of a subsidiary in a short-form merger has dissenters' rights despite his lack of voting power. In addition, the shareholder must *not vote in favor* of the transaction. The shareholder may either vote against the action or abstain from voting.

Many states' statutes exclude from dissenters' rights shares that are traded on a recognized securities exchange such as the New York Stock Exchange. Instead,

these statutes expect a shareholder to sell his shares on the stock exchange if he dissents to the corporate action. The MBCA has no such exclusion, on the grounds that the market price may be adversely affected by the news of the proposed or consummated corporate action to which the shareholder objects.

Generally, a shareholder must notify the corporation of his intent to seek payment before the shareholders have voted on the action. Next, the corporation informs a dissenting shareholder how to demand payment. After the dissenting shareholder demands payment, the corporation and the shareholder negotiate a mutually acceptable price. If they cannot agree, a court will determine the fair value of the shares and order the corporation to pay that amount.

To determine fair value, most judges use the **Delaware Block Method,** a weighted average of several valuation techniques—such as market value, comparisons with other similar companies, capitalization of earnings, and book value. Ironically, the Supreme Court of Delaware has abandoned the Delaware Block Method, recognizing the need for courts to value shares by methods generally considered acceptable to the financial community. The following *Cede & Co.* case further elaborates on the modern Delaware method of appraising shares.

Cede & Co. v. Cinerama, Inc. *684 A.2d 289 (Del. Sup. Ct. 1996)*

Technicolor, Inc., was a Delaware corporation engaged in a number of businesses, including videocassette duplicating (one of the largest facilities in the world), photographic film processing for professionals, and motion picture licensing. In May 1981, Technicolor's CEO and chairman, Morton Kamerman, proposed—and its board of directors approved—an ambitious venture to develop a nationwide network of one-hour consumer film processing stores. Unfortunately, execution of the venture fell behind schedule, and Technicolor suffered severe fiscal problems, reporting an 80 percent decline in net income.

In late summer 1982, Ronald Perelman, controlling shareholder of MacAndrews & Forbes Group, Inc. (MAF), identified Technicolor as an attractive takeover target. Negotiations between Perelman and Kamerman resulted in MAF and Technicolor's agreement to MAF's two-step acquisition of Technicolor. The first step was an all-cash tender offer of $23 per share for all of Technicolor's outstanding shares; if not all Technicolor shareholders tendered their shares to MAF, the second step was a merger of MAF and Technicolor, by which all remaining Technicolor shareholders would receive $23 per share and Technicolor would merge with MAF. By December 3, 1982, MAF had acquired 82 percent of Technicolor's shares under the first step of the acquisition. Immediately, as controlling shareholder, MAF began looking for buyers of Technicolor's less profitable divisions, including the one-hour consumer film processing business. On January 24, 1983, Technicolor's shareholders approved the second step.

Several Technicolor shareholders, including Cinerama, Inc., which owned 201,200 shares, dissented from the merger and sought to have the Delaware Court of Chancery appraise their shares under their statutory dissenters' rights. Cinerama argued that the chancery court should value Technicolor with regard to the strategies that had been conceived and implemented by MAF and Perelman as of the merger date (the Perelman Plan). Technicolor argued that the court of chancery should consider Technicolor without regard to the Perelman Plan and only as Technicolor existed prior to October 29, 1982, with the strategies implemented by Kamerman (the Kamerman Plan). The dispute was whether the trial court should value Perelman's Technicolor—a company whose business plans and strategies focused on the processing and duplication of film and videotape and expected to generate $50 million in cash during 1983 from the sale of unwanted or unprofitable business; or Kamerman's Technicolor—a company that had diversified away from a concentration on film processing and videotape duplication for the professional market toward consumer-oriented businesses. The chancery court valued Technicolor as of October 29, 1982, holding that the value added by the Perelman Plan was excluded from the appraisal because it was value arising from the merger or its expectations. Cinerama appealed to the Delaware Supreme Court.

Holland, Justice The Delaware appraisal statute provides that the Court of Chancery:

> shall appraise the shares, determining their fair value exclusive of any element of value arising from the accomplishment or expectation of the merger or consolidation. In determining such fair value, the Court shall take into account all relevant factors. Del. Code section 262(h).

In *Weinberger v. UOP* (1983), the Delaware Supreme Court reconciled the dual mandates of section 262(h), which direct the court to determine fair value based on all relevant factors, but to exclude any element of value arising from the accomplishment or expectation of the merger. In making that reconciliation, the *Weinberger* court said:

> Only the speculative elements of value that may arise from the "accomplishment or expectation" of the merger are excluded. We take this to be a very narrow exception to the appraisal process, designed to eliminate use of pro forma data and projections of a speculative variety relating to the completion of a merger. But elements of future value, including the nature of the enterprise, which are known or susceptible of proof as of the date of the merger and not the product of speculation, may be considered. Fair value also includes any damages, resulting from the taking, which the stockholders sustain as a class. If that was not the case, then the obligation to consider "all relevant factors" in the valuation process would be eroded.

The underlying assumption in an appraisal valuation is that the dissenting shareholders would be willing to maintain their investment position had the merger not occurred. Accordingly, the Court of Chancery's task in an appraisal proceeding is to value what has been taken from the shareholder, i.e., the proportionate interest in the going concern. To that end, the corporation must be valued as an operating entity. We conclude that the Court of Chancery did not adhere to this principle.

The Court of Chancery determined that Perelman had a fixed view of how Technicolor's assets would be sold before the merger and had begun to implement it prior to January 24, 1983. Consequently, the Court of Chancery found that the Perelman Plan for Technicolor was the operative reality on the date of the merger. Nevertheless, the Court of Chancery held that Cinerama was not entitled to an appraisal of Technicolor as it was actually functioning on the date of the merger pursuant to the Perelman Plan. The Court of Chancery reasoned that valuing Technicolor as a going concern, under the Perelman Plan, on the date of the merger, would be tantamount to awarding Cinerama a proportionate share of a control premium, which the Court of Chancery deemed economically undesirable. Thus, the Court of Chancery concluded that value added by a majority acquiror is not a part of the going concern in which a dissenting shareholder has a legal right to participate.

In a two-step merger, to the extent that value has been added following a change in majority control before cash-out, it is still value attributable to the going concern, i.e., the extant "nature of the enterprise," on the date of the merger. Consequently, value added to the going concern by the majority acquiror during the transient period of a two-step merger, accrues to the benefit of all shareholders and must be included in the appraisal process on the date of the merger.

By failing to accord Cinerama the full proportionate value of its shares in the going concern on the date of the merger, the Court of Chancery imposed a penalty upon Cinerama for lack of control. Consequently, the Court of Chancery permitted MAF to reap a windfall from the appraisal process by cashing out a dissenting shareholder for less than the fair value of its interest in Technicolor as a going concern on the date of the merger.

Technicolor must be viewed and valued as an on-going enterprise, and occupying a particular market position in the light of future prospects. All elements of future value, including the nature of the enterprise, which are known or susceptible of proof as of the date of the merger and not the product of speculation, may and should be considered.

This appraisal action will be remanded to the Court of Chancery for a recalculation of Technicolor's fair value on the date of the merger. It is within the Court of Chancery's discretion to select one of the parties' valuation models as its general framework, or fashion its own. Its choice of framework does not require it to adopt any one expert's model, methodology, or mathematical calculation in toto.

Judgment reversed in favor of Cinerama; remanded to the Court of Chancery for appraisal of the shares.

Shareholders' Inspection and Information Rights

Inspecting a corporation's books and records is sometimes essential to the exercise of a shareholder's rights. For example, a shareholder may be able to decide how to vote in a director election only after examining corporate financial records that reveal whether the present directors are managing the corporation profitably. Also, a close corporation shareholder may need to look at the books to determine the value of his shares.

Many corporate managers are resistant to shareholders' inspecting the corporation's books and records, charging that shareholders are nuisances or that shareholders often have improper purposes for making such an inspection. Sometimes, management objects solely on the ground that it desires secrecy.

Most of the state corporation statutes specifically grant shareholders inspection rights. The purpose of these statutes is to facilitate the shareholder's inspection of the books and records of corporations whose managements resist or delay proper requests by shareholders. A shareholder's lawyer or accountant may assist the shareholder's exercise of his inspection rights.

The MBCA grants shareholders an **absolute right of inspection** of an alphabetical listing of the shareholders entitled to notice of a meeting, including the number of shares owned. Access to a shareholder list allows a shareholder to contact other shareholders about important matters such as shareholder proposals.

The MBCA also grants an absolute right of inspection of, among other things, the articles, bylaws, and minutes of shareholder meetings within the past three years.

Shareholders have a **qualified right to inspect** other records, however. To inspect accounting records, board and committee minutes, and shareholder minutes more than three years old, a shareholder must make the demand in *good faith* and have a *proper purpose.* Proper purposes include inspecting the books of account to determine the value of shares or the propriety of dividends. On the other hand, learning business secrets and aiding a competitor are clearly improper purposes.

In the following *Agri-Mark* case, the court held that only shareholders of record are entitled to enforce inspection rights in a stock corporation.

Shaw v. Agri-Mark, Inc. *663 A.2d 464 (Del. Sup. Ct 1995)*

Agri-Mark, Inc., is a cooperative stock corporation organized under the Delaware General Corporation Law. It was formed to process and market milk and other dairy products for its members, dairy farmers in New England and New York. Members agree to sell all their milk to Agri-Mark, which agrees to sell the milk to the public. Agri-Mark's equity consists of contributions from its members and retained earnings; the members are not, however, shareholders of the corporation. The only shareholders are the directors. Each director is issued one share for one dollar; when a director's term expires, he must resell the share to the corporation for one dollar. Only directors are permitted to vote at shareholder meetings. Agri-Mark is managed by the board of directors, who are elected by the regional delegates who represent a region of the area served by Agri-Mark. The delegates, in turn, are elected by members in that region.

Members Karen Shaw and Forrest Foster, dairy farmers in Vermont, brought an action to compel Agri-Mark to allow them to inspect Agri-Mark's members list and the compensation of Agri-Mark's five highest paid executives. The trial court found Shaw and Foster entitled to inspect the records even though they were not shareholders, on the grounds that they were equity owners and had averred a proper purpose to inspect the records. Agri-Mark appealed the decision.

Walsh, Justice It is well established that, as a matter of common law, a stockholder of a Delaware corporation possessed a qualified right to inspect or examine the stock ledger, as well as the books and records of the corporation. The common law right of inspection was not absolute.

In order to enforce inspection rights, the stockholder demanding inspection had to show that the inspection was for proper purposes. In addition to the common law right of inspection, the right has been codified in some form in Delaware since the turn of the century. The stockholder's right to inspect the stock ledger is currently codified at Del. Code section 220:

> (a) As used in this section, "stockholder" means a stockholder of record.
>
> (b) Any stockholder, in person or by attorney or other agent, shall have the right to inspect for any proper purpose the corporation's stock ledger, a list of its stockholders, and its other books and records. A proper purpose shall mean a purpose reasonably related to such person's interest as a stockholder.

Establishing oneself as a stockholder of record is a mandatory condition precedent to the right to make a demand for inspection. In this regard, the corporation may look to its stock ledger as the sole evidence in identifying those shareholders of record who are entitled to inspection. It is obvious that the only persons who are integrated with a corporation as stockholders are those persons who are stockholders of record on the stock books of the corporation. To hold otherwise would lead to corporate chaos.

This Court has yet to decide whether a member of a Delaware non-stock corporation has a right to inspection of the corporation's books and records. We need not reach the issue here because we decide only the case before us. Agri-Mark is a *stock* corporation, and the rights of its members must be evaluated from this perspective.

Both at common law and under the specific statutory provisions, the right of inspection is essentially a right of stockholders, being an incident of stock ownership. As such, the right of inspection of a *stock* corporation's books and records under Delaware common law is exclusively reserved to the stockholders of the corporation.

Shaw and Foster's argument that they should be recognized as stockholders of Agri-Mark since they are the real owners of the cooperative is unconvincing. While Shaw and Foster may assert certain rights arising out of the fiduciary relationship between themselves as equity owners and those who manage the affairs of the corporation, those rights do not extend to or include the attributes of record stockholders. Our corporate law has traditionally limited the right of stockholders to stockholders of record. We continue to recognize the long-established rule that a corporation may rely on its stock ledger in determining which stockholders are eligible to vote or exercise the important rights of a stockholder.

In this case, Shaw and Foster are not stockholders of Agri-Mark, let alone shareholders of record. Agri-Mark has issued one share of stock to each member of its board of directors. As the only stockholders of Agri-Mark, the directors exclusively enjoy the rights incident to their share ownership. In contrast, Shaw and Foster, as members of a stock corporation, do not enjoy any of the rights exclusively reserved for stockholders under either Delaware common law or the Delaware General Corporation Law. Just as a beneficial owner must recognize the risks inherent in choosing to register his or her shares in a "street name" and thereby cede the rights of share ownership to the record owner of stock, so too have Shaw and Foster ceded the rights of stock ownership to the actual stockholders of Agri-Mark. We hold, therefore, that a member of a Delaware *stock* corporation must be a stockholder of record to be entitled to inspect the books and records of the corporation under our common law.

Judgment reversed in favor of Agri-Mark.

Shareholders also have the right to receive from the corporation **information** that is important to their voting and investing decisions. The MBCA requires a corporation to furnish its shareholders *financial statements,* including a balance sheet, an income statement, and a statement of changes in shareholders' equity. The Securities Exchange Act of 1934 also requires publicly held companies to furnish such statements, as well as other information that is important to shareholders' voting and investing decisions.

Preemptive Right

The market price of a shareholder's shares will be reduced if a corporation issues additional shares at a price less than the market price. In addition, a shareholder's proportionate voting, dividend, and liquidation rights may be adversely affected by the issuance of additional shares. For example, if a corporation's only four shareholders each own 100 shares worth $10 per share, then each shareholder has shares worth $1,000, a 25 percent interest in any dividends declared, 25 percent of the voting power, and a claim against 25 percent of the corporation's assets after creditors' claims have been satisfied. If the corporation subsequently issues 100 shares to another person for only $5 per share, the value of each shareholder's shares falls to $900 and his dividend, voting, and liquidation rights are reduced to 20 percent. In a worst-case scenario, the corporation issues 201 shares to one of the existing shareholders, giving that shareholder majority control of the corporation and reducing the other shareholders' interests to less than 17 percent each. As a result, the minority shareholders will be dominated by the majority shareholder and will receive a greatly reduced share of the corporation's dividends.

Such harmful effects of an issuance could have been prevented if the corporation had been required to offer each existing shareholder a percentage of the new shares equal to her current proportionate ownership. If, for example, in the situation described above, the corporation had offered 50 shares to each shareholder, each shareholder could have remained a 25 percent owner of the corporation; her interests in the corporation would not have been reduced, and her total wealth would not have been decreased.

Corporation law recognizes the importance of giving a shareholder the option of maintaining the value of his shares and retaining his proportionate interest in the corporation. This is the shareholder's **preemptive right,** an option to subscribe to a new issuance of shares in proportion to the shareholder's current interest in the corporation.

The MBCA adopts a comprehensive scheme for determining preemptive rights. It provides that the preemptive right does not exist except to the extent provided by the articles. The MBCA permits the corporation to state expressly when the preemptive right arises.

When the preemptive right exists, the corporation must notify a shareholder of her option to buy shares, the number of shares that she is entitled to buy, the price of the shares, and when the option must be exercised. Usually, the shareholder is issued a **right,** a written option that she may exercise herself or sell to a person who wishes to buy the shares.

Distributions to Shareholders

During the life of a corporation, shareholders may receive distributions of the corporation's assets. Most people are familiar with one type of distribution—dividends—but there are other important types of distributions to shareholders, including payments to shareholders upon the corporation's repurchase of its shares.

There is one crucial similarity among all the types of distributions to shareholders: Corporate assets are transferred to shareholders. Consequently, an asset transfer to shareholders may harm the corporation's creditors and others with claims against the corporation's assets. For example, a distribution of assets may impair a corporation's ability to pay its creditors. In addition, a distribution to one class of shareholders may harm another class of shareholders that has a liquidation priority over the class of shareholders receiving the distribution. The existence of these potential harms compels corporation law to restrict the ability of corporations to make distributions to shareholders.

Dividends

One important objective of a business corporation is to make a profit. Shareholders invest in a corporation primarily to share in the expected profit either through appreciation of the value of their shares or through dividends. There are two types of dividends: *cash or property dividends* and *share dividends.* Only cash or property dividends are distributions of the corporation's assets. Share dividends are *not* distributions.

Cash or Property Dividends Dividends are usually paid in cash. However, other assets of the corporation—such as airline discount coupons or shares of another corporation—may also be distributed as dividends. Cash or property dividends are declared by the board of directors and paid by the corporation on the date stated by the directors. Once declared, dividends

are *debts* of the corporation and shareholders may sue to force payment of the dividends. The board's dividend declaration, including the amount of dividend and whether to declare a dividend, is protected by the business judgment rule.

Preferred shares nearly always have a set dividend rate stated in the articles of incorporation. Even so, unless the preferred dividend is mandatory, the board has discretion to determine whether to pay a preferred dividend and what amount to pay. Most preferred shares are *cumulative preferred shares,* on which unpaid dividends cumulate. The entire accumulation must be paid before common shareholders may receive any dividend. Even when preferred shares are noncumulative, the current dividend must be paid to preferred shareholders before any dividend may be paid to common shareholders.

The following *Dodge v. Ford* case is one of the few cases in which a court ordered the payment of a dividend to common shareholders. The court found that Henry Ford had the wrong motives for causing Ford Motor Company to refuse to pay a dividend.

Dodge v. Ford Motor Co. *170 N.W. 668 (Mich. Sup Ct. 1919)*

In 1916, brothers John and Horace Dodge owned 10 percent of the common shares of the Ford Motor Company. Henry Ford owned 58 percent of the outstanding common shares and controlled the corporation and its board of directors. Starting in 1911, the corporation paid a regular annual dividend of $1.2 million, which was 60 percent of its capital stock of $2 million but only about 1 percent of its total equity of $114 million. In addition, from 1911 to 1915, the corporation paid special dividends totaling $41 million.

The policy of the corporation was to reduce the selling price of its cars each year. In June 1915, the board and officers agreed to increase production by constructing new plants for $10 million, acquiring land for $3 million, and erecting an $11 million smelter. To finance the planned expansion, the board decided not to reduce the selling price of cars beginning in August 1915 and to accumulate a large surplus.

A year later, the board reduced the selling price of cars by $80 per car. The corporation was able to produce 600,000 cars annually, all of which, and more, could have been sold for $440 instead of the new $360 price, a forgone revenue of $48 million. At the same time, the corporation announced a new dividend policy of paying no special dividend. Instead, it would reinvest all earnings except the regular dividend of $1.2 million.

Henry Ford announced his justification for the new dividend policy in a press release: "My ambition is to employ still more men, to spread the benefits of this industrial system to the greatest possible number, to help them build up their lives and their homes." The corporation had a $112 million surplus, expected profits of $60 million, total liabilities of $18 million, $52.5 million in cash on hand, and municipal bonds worth $1.3 million.

The Dodge brothers sued the corporation and the directors to force them to declare a special dividend. The trial court ordered the board to declare a dividend of $19.3 million. Ford Motor Company appealed.

Ostrander, Chief Justice It is a well-recognized principle of law that the directors of a corporation, and they alone, have the power to declare a dividend of the earnings of the corporation, and to determine its amount. Courts will not interfere in the management of the directors unless it is clearly made to appear that they are guilty of fraud or misappropriation of the corporate funds, or they refuse to declare a dividend when the corporation has a surplus of net profits which it can, without detriment to the business, divide among its stockholders, and when a refusal to do so would amount to such an abuse of discretion as would constitute a fraud, or breach of that good faith that they are bound to exercise towards the shareholders.

The testimony of Mr. Ford convinces this court that he has to some extent the attitude towards shareholders of one who has dispensed and distributed to them large gains and that they should be content to take what he chooses to give. His testimony creates the impression that he thinks the Ford Motor Company has made too much money, has had too large profits, and that, although large profits might be still earned, a sharing of them with the public, by reducing the price of the output of the company, ought to be undertaken. We have no

doubt that certain sentiments, philanthropic and altruistic, creditable to Mr. Ford, had large influence in determining the policy to be pursued by the Ford Motor Company.

There should be no confusion of the duties that Mr. Ford conceives that he and the shareholders owe to the general public and the duties that in law he and his co-directors owe to protesting, minority shareholders. A business corporation is organized and carried on primarily for the profit of the shareholders. The powers of the directors are to be employed for that end.

We are not, however, persuaded that we should interfere with the proposed expansion of the Ford Motor Company. In view of the fact that the selling price of products may be increased at any time, the ultimate results of the larger business cannot be certainly estimated. The judges are not business experts. It is recognized that plans must often be made for a long future, for expected competition, for a continuing as well as an immediately profitable venture. We are not satisfied that the alleged motives of the directors, in so far as they are reflected in the conduct of the business, menace the interests of shareholders.

Assuming the general plan and policy of expansion were for the best ultimate interest of the company and therefore of its shareholders, what does it amount to in justification of a refusal to declare and pay a special dividend? The Ford Motor Company was able to estimate with nicety its income and profit. It could sell more cars than it could make. The profit upon each car depended upon the selling price. That being fixed, the yearly income and profit was determinable, and, within slight variations, was certain.

There was appropriated for the smelter $11 million. Assuming that the plans required an expenditure sooner or later of $10 million for duplication of the plant, and for land $3 million, the total is $24 million. The company was a cash business. If the total cost of proposed expenditures had been withdrawn in cash from the cash surplus on hand August 1, 1916, there would have remained $30 million.

The directors of Ford Motor Company say, and it is true, that a considerable cash balance must be at all times carried by such a concern. But there was a large daily, weekly, monthly receipt of cash. The output was practically continuous and was continuously, and within a few days, turned into cash. Moreover, the contemplated expenditures were not to be immediately made. The large sum appropriated for the smelter plant was payable over a considerable period of time. So that, without going further, it would appear that, accepting and approving the plan of the directors, it was their duty to distribute on and near the 1st of August 1916, a very large sum of money to stockholders.

Judgment for the Dodge brothers affirmed.

To protect the claims of the corporation's creditors, all of the corporation statutes limit the extent to which dividends may be paid. The MBCA imposes two limits: (1) the *solvency test* and (2) the *balance sheet test.*

Solvency Test A dividend may not make a corporation insolvent; that is, unable to pay its debts as they come due in the usual course of business. This means that a corporation may pay a dividend to the extent it has *excess solvency*—that is, liquidity that it does not need to pay its currently maturing obligations. This requirement protects creditors, who are concerned primarily with the corporation's ability to pay debts as they mature.

Balance Sheet Test After the dividend has been paid, the corporation's assets must be sufficient to cover its liabilities and the liquidation preference of shareholders having a priority in liquidation over the shareholders receiving the dividend. This means that a corporation may pay a dividend to the extent it has *excess assets*—that is, assets it does not need to cover its liabilities and the liquidation preferences of shareholders having a priority in liquidation over the shareholders receiving the dividends. This requirement protects not only creditors but also preferred shareholders. It prevents a corporation from paying to common shareholders a dividend that will impair the liquidation rights of preferred shareholders.

Example Batt Company has $27,000 in excess liquidity that it does not need to pay its currently maturing obligations. It has assets of $200,000 and liabilities of $160,000. It has one class of common shareholders. Its one class of preferred shareholders has a liquidation

preference of $15,000. Examining these facts, we find that Batt's excess solvency is $27,000, but its excess assets are only $25,000 ($200,000 − 160,000 − 15,000). Therefore, Batt's shareholders may receive a maximum cash or property dividend of $25,000, which will eliminate all of Batt's excess assets and leave Batt with $2,000 of excess solvency.

Share Dividends and Share Splits Corporations sometimes distribute additional shares of the corporation to their shareholders. Often, this is done in order to give shareholders something instead of a cash dividend so that the cash can be retained and reinvested in the business. Such an action may be called either a **share dividend** or a **share split.**

A **share dividend** of a *specified percentage of outstanding shares* is declared by the board of directors. For example, the board may declare a 10 percent share dividend. As a result, each shareholder will receive 10 percent more shares than she currently owns. A share dividend is paid on outstanding shares only. Unlike a cash or property dividend, a share dividend may be revoked by the board after it has been declared.

A **share split** results in shareholders receiving a specified number of shares in exchange for each share that they currently own. For example, shares may be split two for one. Each shareholder will now have two shares for each share that he previously owned. A holder of 50 shares will now have 100 shares instead of 50.
