Preface to the Second Edition

Firstly, we would like to thank everyone for the overwhelming support given to the first edition of this book.

In the last two years there have been a lot of changes in various laws and regulations for the preparation and presentation of financial statements. The Companies Act, 2013 has been introduced from 1st April, 2013. The new Companies Act demands thorough knowledge of Accounting Standards.

In this book we have discussed all relevant Accounting Standards in details with proper examples. In the 'Branch Accounting' chapter, the treatment of foreign exchange loss/gain has been incorporated as per latest Accounting Standard.

In this edition, we have incorporated various suggestions provided by the students and the subject experts from all over the country.

After teaching financial accounting to various professional, undergraduate and postgraduate classes for the past three decades, we are convinced that there is a need for a book with balanced text and problems. Multiple-choice questions have been included at the end of each chapter to help students test conceptual clarity. In addition, scores of unsolved problems have been provided, with guide to answers.

Utmost care has been taken to make it an error free book. However, if you still find any error(s) please email us at ***pmhanif@gmail.com***. All suggestions are welcome.

We specially thank Mr. S. Rangarajan for typesetting and formatting this book, and bearing with us.

Our students have always been our source of inspiration and happiness. Curiously, they never cease to raise good points and we have tried to incorporate their points in this book.

Publisher's Note

We value your views, comments and suggestion and hence look forward to your communication at *info.india@mheducation.com*. Please feel free to report piracy issues, if any.

Preface to the First Edition

In today's competitive world of real business, financial accounting has assumed critical importance. Financial accounting is not an end itself, but is intended to provide information that is useful in making business decisions. In Financial Accounting, we have attempted to provide comprehensive and balanced coverage of the various accounting concepts including framework for the preparation and presentation of Financial Statements, and Indian Accounting Standards issued by the Council of The Institute of Chartered Accountants of India. Since accounting standards are mandatory in nature, it is necessary that the topics in this title should be discussed with reference to the relevant Accounting Standards. In this title, we have implemented, where necessary, ***relevant accounting standards*** for non-corporate entities. We hope this will help accounting information become comparable, leading to better analysis and comparison of performances.

From our experience of teaching accountancy to undergraduate students of commerce, we found that it is extremely important to reinforce the theoretical principles with actual practice. For this purpose, we have included about 850 fully solved problems interspersed within the text. In addition, nearly 550 unsolved problems have been graded with different levels of difficulty. While selecting problems to be included in the book, we kept in mind two important factors: First, that the problems clearly illustrate the concepts and procedures discussed earlier. Second, they serve as practice exercises for preparation of various university and professional examinations in accountancy. For the latter case, a number of problems that we have chosen have actually appeared in different examinations in the recent past. We hope the addition of such a large number of problems would enable students acquire a clear and thorough understanding of the principles, procedures and practices of accountancy, and also acquaint them with the nature and type of problems they are likely to encounter in their examinations and later in their professional career.

In our endeavour to make the book more oriented towards students and fully meet their requirements, some important topics have been dealt in greater depth. Based on our teaching experience and interaction with students, we identified topics that students find difficult to understand and have given such topics more elaborate treatment. These topics have also been profusely illustrated with solved problems. Some of these topics include: Inventories, Depreciation, Partnership (seven full chapters have been devoted to this important topic). Specialised areas like Lease Accounting, Farm Accounting, Hire Purchase have also been discussed in sufficient detail.

We have taken sufficient care to ensure that the book meets the needs of a variety of students. Undergraduate students of commerce (both B Com (Pass) and B Com (Hons), those appearing for professional examinations of the Institute of Chartered Accountants of India (ICAI), Institute of Cost and Works Accountants of India (ICWAI), Institute of Company Secretaries (ICSI) and Institute of Chartered Financial Analysts of India (ICFAI), and M Com students would benefit equally.

A number of colleagues and friends in the profession helped us in the preparation of this book. We would like to express our gratitude to all of them. Mr. S. Rangarajan took special interest in the typesetting and formatting of the book. Much of the attractiveness of the presentation and layout of the book is due to his untiring efforts.

While we have taken all possible care to see that the book has no errors, we would be grateful if any mistakes or lacunae are pointed out. Suggestion for further improvement would be more than welcome from both fellow teachers and students.

Introduction to Accounting

Meaning of Accounting

Accounting is an *art* of recording, classifying, summarising and reporting of transactions with the aim of showing the financial health of an entity — a business unit, a club, a charitable organisation, etc., one which has its incomes and expenses. Accounting may be *defined* as a body of principles and conventions as well as an established general process for capturing financial information related to an entity's resources and their use in meeting the entity's goals. It is a field of specialisation critical to the functioning of all types of organisations.

In a popular sense, accounting has been referred to as "the language of business" because of its role in maintaining and processing all relevant financial information that an entity requires for its managing and reporting purposes. The terms '***book-keeping***' and '***accounting***' are often used synonymously. Book-keeping is an activity concerned with the recording of financial data related to the business operations in a significant and an orderly manner. Accounting is based on a careful and efficient book-keeping system. In fact, the process of accounting begins where that of book-keeping ends.

The *distinction* between the two is that whereas book-keeping is the systematic recording of financial and economic transactions, accounting is the analysis and interpretation of book-keeping records. Accounting, therefore, includes not only maintenance of accounting records but also of the preparation of financial and economic information which involves the measurement of transactions and other events pertaining to a business. To operate a business profitably and to stay solvent, the profitability and solvency of a business should be measured at regular intervals. For that, it is essential to know whether a business unit is earning sufficient profits or incurring losses as also whether it has sufficient money to pay-off debts. Accounting provides all these information which enable the management to guide the business on a profitable and solvent course. Since accounting is the art of measuring, describing and interpreting financial and economic activities of a business, it is necessary, for an accounting system, to record, classify and summarise each day's data concerning financial activities.

Accounting deals with numbers and measurable quantities. It accumulates, measures and communicates numbers and measurable quantities of economic information about an enterprise. Accumulation refers to recording and classifying data in journals and ledgers. Measurement refers to the quantification of business transactions that have occurred, or that may occur. Communication refers to relevant and reliable information to users of accounting information.

Distinction between Bookkeeping and Accounting

Bookkeeping should not be confused with accounting. Persons with little knowledge of accounting may fail to understand the difference between bookkeeping and accounting. Therefore, it is useful to make a distinction between the two. Accounting is a broad subject. It calls for a greater understanding of records obtained from bookkeeping and an ability to analyse and interpret the information provided by bookkeeping records. Bookkeeping is a small part of the field of accounting and probably the simplest part, just like arithmetic is a small part of the broad discipline of mathematics. The main distinction between the two is that where bookkeeping is the recording phase, accounting is concerned with the summarising phase of an accounting system. Therefore, the process of accounting begins where the bookkeeping process ends. Accounting includes not only the maintenance of accounting records, but also the preparation of the following two financial statements :

1. Trading, and Profit and Loss Account. (How well did the business do during an accounting period ?)
2. Balance Sheet. (How does the business stand on the last day of the accounting period ?)

The distinction between Bookkeeping and Accounting are as under :

	Bookkeeping		**Accounting**
1.	It is the recording phase of an accounting system.	1.	It is the summarising phase of an accounting system.
2.	It is the basis of accounting.	2.	It is the basis for business language.
3.	Persons responsible for bookkeeping are called book- keepers.	3.	Persons responsible for accounting are called accountants.
4.	It does not require any special skill.	4.	It requires special skill and knowledge.
5.	Personal judgement of the book-keeper is not required.	5.	Personal judgement of the accountant is essential.
6.	Financial statements are not prepared from bookkeeping records.	6.	Financial statements are prepared from accounting records.
7.	It does not give the complete picture of the financial condition of the business unit.	7.	It gives the complete picture of the financial condition of the business unit.
8.	It does not help in complying with legal formalities.	8.	Legal formalities can be complied with the help of accounting.
9.	It does not provide any information for taking managerial decisions.	9.	It provides information for taking managerial decisions.
10.	It has no branch.	10.	It has several branches, e.g., financial accounting, cost accounting, management accounting, etc.

Functions of Accounting

According to Moonitz, the functions of accounting are :

(i) to manage the resources held by specific entities;
(ii) to reflect the claims against and the interests in those entities;
(iii) to measure the changes in those resources, claims and interests;
(iv) to assign the changes to specifiable periods of time; and,
(v) to express the above in terms of money as a common denominator.

Characteristics of Accounting

Modern accounting possesses the following basic characteristics :

(i) Accounting involves recording of economic activities which accompany the complexity and uncertainty of business. Therefore, while preparing timely accounting statements, estimates and professional judgements must be made.
(ii) Accounting statements are prepared on :(a) *cash basis of accounting*, which recognises an event as a transaction only when cash is received or paid, or (b) *accrual basis of accounting*, which recognises revenues earned and expenses incurred as transactions.
(iii) Accounting is historical in nature — it is the recording of past happenings.

Objectives of Accounting

These include providing reliable information about :

(i) changes in financial position resulting from the income-producing efforts of an enterprise;
(ii) earnings of an enterprise, presented in a manner that emphasizes sources and trends of earnings;
(iii) economic resources and obligations of an enterprise;
(iv) changes in net financial resources which result from the financial and investment activities of an enterprise; and,
(v) any additional information, in the form of disclosures, which is relevant to statement users in assessing a particular enterprise's prospects.

Advantages of Accounting

(i) It provides information useful for making economic decisions.
(ii) It serves primarily those users who have limited authority, ability or resources to obtain information and who rely on financial statements as their principal sources of information about an enterprise's economic activities.
(iii) It provides information useful to investors and creditors for predicting, comparing and evaluating potential cash flows in terms of amount, timing and related uncertainty.
(iv) It supplies information useful in judging the management's ability to utilise enterprise resources effectively in acheiving primary enterprise goals.
(v) It provides factual and interpretative information about transactions and other events which are useful for predicting, comparing and evaluating the enterprise's earning power.

Limitations of Accounting

(i) Accounting is historical in nature, it does not reflect the current financial position or worth of a business.
(ii) The Profit and Loss Account tends to match current revenues with historical costs (expenses) rather than current costs.
(iii) Accounting statements do not show the impact of inflation.
(iv) The Profit and Loss Account does not reflect those increases in net asset values which are not considered to be realised.
(v) Accounting principles are not static or unchanging—alternative accounting procedures are often equally acceptable. Therefore, accounting statements do not always present comparable data.

Evolution of Accounting

No social study has ever been static—it has always evolved. Necessarily, the present-day shape and contents of accounting are a product of history.

The origin of accounting as a social study can be traced back to very ancient days. Indeed, it is as old as the beginning of the use of money itself. Even under the barter system, some primitive form of accounting existed. For, otherwise, how could loss and gain have been calculated? The object of gain has always been the driving force of any exchange and this gave birth to the need for accounting.

But, till the 13th century, the mode of keeping accounts was primitive. Books of business were no more than mere note book transactions. A French merchant wrote in his book: 'Lent 10 gold coins to a man last year, I forgot his name'. In Europe, calculations were made largely in Roman numerals, and sums were very often wrong. Long divisions were regarded as something of a mystery, and the use of zero was not clearly comprehended.

Is it surprising, therefore, that a system of accounting, as we know, could not have been developed? However, it did develop in the fifteenth century and its genesis can be traced to Double Entry Bookkeeping which is said to have been fashioned by ***Fra Luca Pacioli*** (about 1445 – 1520), the multi-talented mathematician and philosopher of Venice. His treatise ***Summa De Arithmatica, Geometrica, Preportioni at Preportionalita*** was published in 1494. (However, ***Pacioli*** is not regarded as the inventor of the system; he is said to have just collated the different aspects of it in a comprehensive tract).

Of course, for a considerable time, the Double Entry System remained ignored in Europe; the people thereof continued following what is called *Stewardship Accounting*, the method of keeping accounts of household expenses followed by stewards. (In our country, it may be called the *munim* system of accounting. For it was the *munims* who kept accounts of big households).

When, with the advent of joint stock companies, ownership was separated from the management, the idea of financial accounting based on the Double Entry Principle came to be recognised and was valued as a principle of action. The shareholders' and others' interests were to be safeguarded; they were to be acquainted with the performance of the companies. The need was statutorily recognised, and there emerged as an information system for the investors and others such statements as Balance Sheet, Profit and Loss Account, etc. By and by, the dimension of this financial information system expanded and it came to be all-pervasive.

Since business and other concerns operate in the social setting, evolution of accounting could not come to a halt just at providing information to the investors and managers alone. Social cost as well as social benefit had to be assessed. This brought into being social accounting, an important adjunct to the system of measuring and assessing. *Economic activities*, which in economic parlance, are described as 'activities performed for making a living', and which again, in money-economy are nothing other than money-earning and money-spending activities.

Subfields of Accounting

1. Financial Accounting

Financial accounting is that part of accounting which is mainly concerned with the historical, custodial and stewardship aspects of external reporting to shareholders, government and other users of accounting information outside the business entity.

Financial accounting emphasizes the stewardship aspects of accounting rather than the control or decision-making aspects of accounting. It is the recording and processing of financial data affecting the business unit, which relates to the past and is generally for one year. The end-product of financial accounting is the Profit and Loss Account for the period ended (which shows the profit earned or losses incurred) and the Balance Sheet as on the last day of the accounting period (which shows the financial position). The preparation of the financial accounting is based on generally accepted accounting principles enunciated by the accounting profession and is heavily constrained by legal regulations and accounting standards.

2. Cost Accounting

Cost Accounting is primarily concerned with the cost to produce goods and services. Cost accounting applies the principles of accounting in such a manner that it is possible to have a detailed recording and analysis of expenditures incurred in connection with the operation of any business, e.g., manufacturing, administration or selling, or the production of an article so that it is able to measure performance and control activities.

Cost accounting is made up of the following :

(1) Mechanics of cost keeping, i.e., routines followed in reducing and classifying expenditures.
(2) Analysis of costs to measure managerial efficiency.
(3) Installation and supervision of cost systems.

3. Management Accounting

Any form of accounting which enables a business unit to be conducted more efficiently can be regarded as management accounting. Management accounting is that part of accounting which is concerned, mainly with internal reporting to the managers of a business unit. It relates to planning, control and decision-making which is useful to the management in the discharge of its functions. Thus, it emphasizes the control of decision-making aspects of accounting, which is tailor-made to suit the needs of the management of a specific enterprise, rather than stewardship aspects of accounting. Management accounting is 'forward-looking' and generally includes cost accounting and budgeting. The preparation of management accounting is not based on generally accepted accounting principles and is relatively free of constraints imposed by legal regulations and accounting standards. Therefore, management accounting is the presentation of accounting information in such a way as to assist management in the creation of policy and the day-to-day operation of an undertaking. The technique of accounting is of extensive importance as it works in the most nearly universal medium available for the expression of facts so that facts of great diversity can be presented in the same picture. It is not the presentation of these pictures that is the function of management but the use of them.

4. Social Accounting

Social accounting is a branch of accounting which attempts to measure the social benefits that an organisation provides and the social costs that an organisation imposes. Social accounting is not a new method of keeping books of account, but a concept based on evaluating the costs and benefits relating to socially responsible actions by business enterprises. Both social cost and social benefit arise from externalities. Externalities are the benefits or costs which are not received or borne by the business unit responsible for them. Social costs as well as social benefits are a function of social perception of what is bad or good about business activity.

5. Human Resource Accounting

Human resource accounting is the accounting for the human resource of an enterprise. It is the process of identifying and measuring data about human resources and communicating this information to interested parties. Human resource accounting is, therefore, accounting for people as organisational resource. It is an act of identifying, measuring and evaluating the worth of human resources of an enterprise in a systematic manner to the organisation and to society as a whole, and recording these in a significant manner in the financial statement for presenting the information to the various users and to communicate their worth with changes over the period as also results obtained from their utilisation to those users.

6. National Accounting

National accounting is the accounting of the transactions of a national economy, as distinct from those of entities in sectors of the economy, i.e., business enterprises and public authorities. National accounting is not based on generally accepted accounting principles. It has been developed by economists and statisticians and, therefore, data for national accounting must be collected from non-accounting sources.

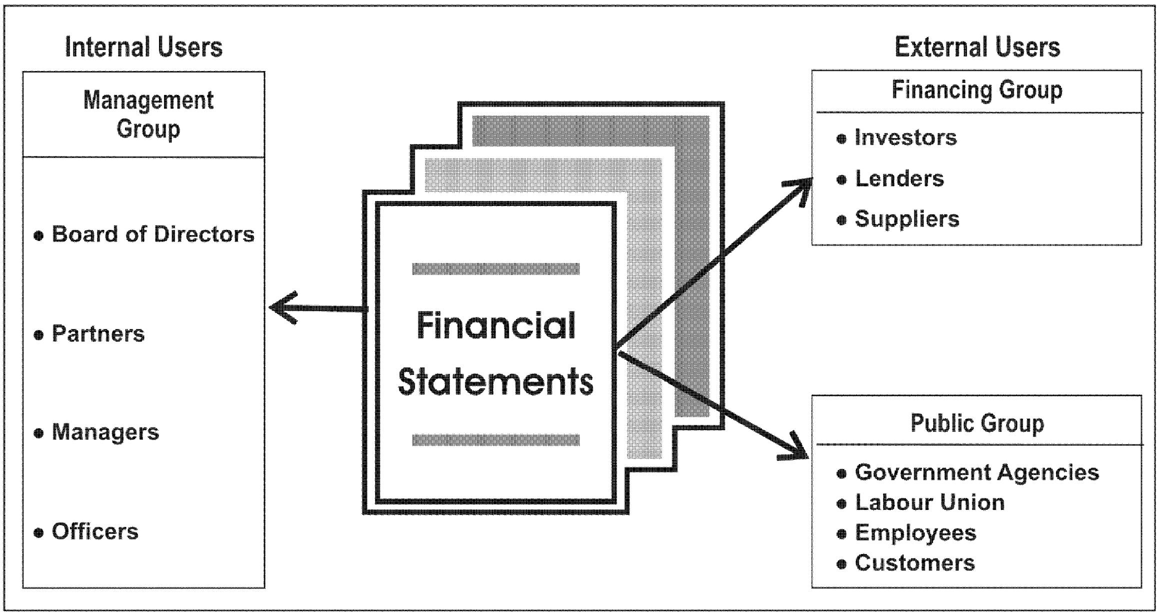
Distinction between Financial Accounting and Management Accounting

	Financial Accounting		Management Accounting
1.	It is primarily for external purposes.	1.	It is primarily for internal purposes.
2.	It records what has happened based on past transactions in a true and fair manner.	2.	It provides information which is used to take decisions about the future.
3.	It is heavily constrained by legal regulation and accounting standard.	3.	It is relatively free of constraints imposed by legal regulation and accounting standards.
4.	It must comply with statute and generally accepted accounting principles.	4.	It is tailored to suit the needs of the users.
5.	It emphasizes on the type of expenses.	5.	It emphasizes on the products, processes and departments.
6.	It emphasizes the stewardship aspect of accounting.	6.	It emphasizes the control or decision-making aspects of accounting.
7.	It provides an overall view of the business enterprise.	7.	It gives a detailed analysis of all aspects of the business unit.

Users of Accounting Information

Accounting information is needed by two sets of people—internal and external. Internal users are associated with management of the concern for which information is sought to be gathered and surveyed. For example, the directors or the partners, managers and officers.

The external users consist of several explicit groups : (1) investors; (2) lenders; (3) suppliers; (4) customers; (5) government agencies; (6) the public; and, (7) employees.



Investors : They supply the risk capital to the business unit. Ownership is separated from management in joint stock companies, hence, investors need to know how their money is being spent by the managers.

Financial information helps them to decide about (a) making investments, (b) quantum of investment, and (c) holding on to the equities they own.

Lenders : Accounting information provides them with reasonable assurance as to the payment of interest and repayment of the principal.

Suppliers : They normally sell on credit and they must have reasonable assurance that their credit will be honoured. Financial information helps them to decide about the credibility of the firm, and whether they should continue supplying on credit.

Customers : They are a composite group, consisting of (a) producers at every stage of processing, (b) wholesalers and retailers and (c) the final consumers. Producer at the next stage of processing must be assured of the input which they obtain from the concern in question. The wholesalers and retailers must also be sure about the uninterrupted supply of materials. Otherwise, they will be hesitant to stock it. The ultimate consumer is interested in the continuous availability of the product. Should he come to think that the availability may be disrupted or stopped, he will shift his preference for another variety or brand. In all these kindred decisions, accounting information has a significant role to play.

Government agencies : Any economy of the day is, in a way, controlled and regulated by the political authorities, i.e., the government. Consequently, government agencies rely on the financial information for permitting expansion or contraction of business, for import and export of products and/or materials, for allocation of essential resources for regulating labour or taxation, etc.

Public : For members of the public the financial information is of the nature of a health examination report — it tells them about employment opportunities and general growth in the individual concern and the economy as a whole.

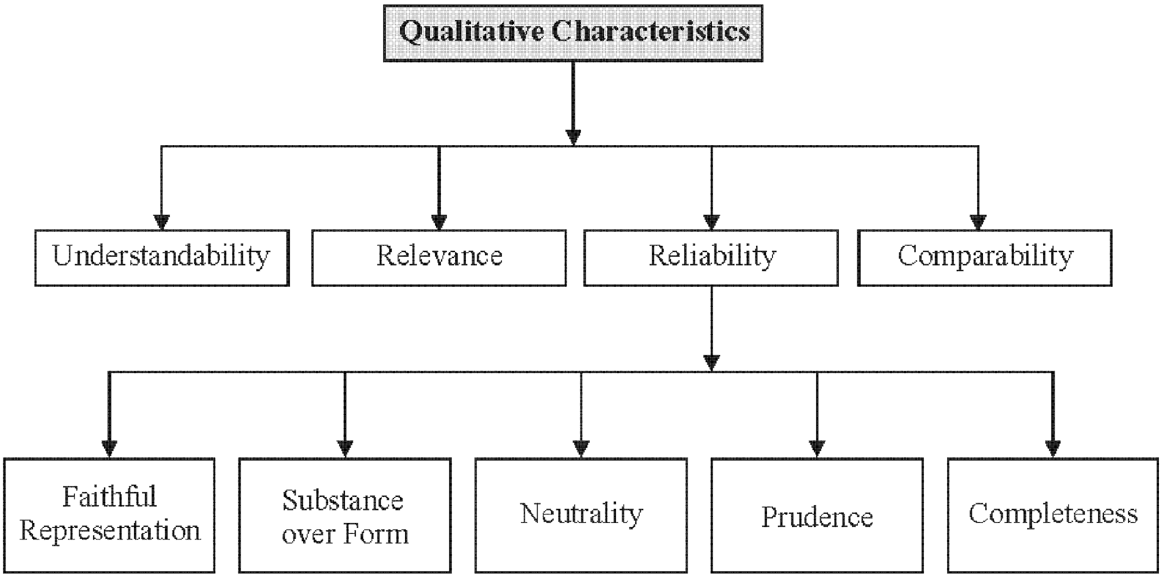
Employees : The employees of the concern are interested in the financial information because both, their present and future are tied up with the company's fortunes.

Thus, financial information serves diverse interests. Hence, the information should be gathered and disseminated in a way that benefits each interest. Information should not be biased and should not supress facts or suggest anything false.

Qualitative Characteristics of Financial Statements

Accounting information must possess some qualitative characteristics. These are the attributes that make the information provided in the financial statements useful to users. The ***four*** main qualitative characteristics are:

(1) Understandability;
(2) Relevance;
(3) Reliability; and
(4) Comparability.



Understandability

Understandability is the quality of accounting information that enables users to perceive its significance, i.e., to understand the content and significance of accounting statements and reports. If a user cannot understand the accounting information given to him, it is not useful, even though it may be relevant to whatever decision he wants to make. To have the characteristics of understandability, accounting information must be presented in a manner that users can understand, i.e., it must be expressed in terminology that is understandable to theusers. Now-a-days, business activities and transactions have become increasingly complex. It may not always be possible to describe complex transactions in simple terms. It is, therefore, necessary that the users of the accounting information must attain a minimum level of competence in understanding the terminology used in accounting statements. It is assumed that the users have a basic knowledge of business accounting, and they will spend some time and effort in studying the accounting statements. However, the accountant has a basic responsibility to describe business transactions clearly and concisely.

Relevance

Accounting information must be relevant to the user. Information is relevant if it meets the needs of the user in decision-making. Relevance is *defined* in terms of the ability to affect a decision-maker's course of action, because whether a particular set of accounting information is relevant or not depends on the specific decision-maker's objectives. Thus, for information to be relevant, it must have some bearing on the decision being made. Relevant accounting information should be capable of making a *difference* in a decision by helping users of accounting information to form predictions about the outcomes of past, present and future events. The decision *not* to modify or correct previous actions is a very important one. Financial information which does not have relevance to users is worse than no information at all, i.e., any information does not connote utility if it is not relevant to the purpose. To be relevant, it should be capable of monetary computation.

Reliability

Accounting information should be reliable. Reliability is the characteristic of accounting information which gives the user confidence and trust that the reported information is a reasonable representation of the actual items or events that have occurred. To be reliable, the accounting information should be error-free and neutral — an accountant's bias must not colour his information. The other subsidiary qualities which make information reliable are as follows :

Faithful representation : Information must faithfully represent the effects of transactions and other events. If the information is to represent faithfully the transactions and other events that it purports to represent, it is necessary that they are accounted for and presented in accordance with their substance and economic reality and not merely their legal form.

For example, X Ltd has purchased a building for their sales office. The rights and beneficial interest in the property have been transferred but the documentation and legal formalities are pending. It is to be shown in the financial statement as own property though legally it has not been transferred in the name of X Ltd.

Substance over Form : The accounting treatment and presentation in financial statements of transactions and events should be governed by their substance and not merely by the legal form. In accounting, substance should normally take *precedence* over form in deciding how a particular transaction should be recorded. The legal form of a transaction is frequently descriptive of its economic substance. However, the form occasionally misrepresents the characteristics that are relevant to users. If the substance can be reliably determined, the accountant should describe the transaction in terms of the substance rather than the form. Accounting for hire-purchase transactions, for example, is based on the above concept, i.e., it looks at the substance of the transaction rather than its legal form. The hire-purchaser can record the asset at its cash down price, while paying for it by instalments over an agreed period of time.

Neutrality : Judgement is required in arriving at many items in the financial statements. Judgement is involved in valuing stock, determining the amount of doubtful debts, etc. Neutrality means that these judgements are made without any bias.

Prudence : Caution must be exercised while preparing financial statements and estimating the outcome of uncertain events. For example, collectability of receivable, the warranty claims that may occur etc. However, this does not mean, that the approach should be over cautious. The aim should be to report most likely outcome, with a reasonable element of caution. The financial statements must not be prepared on the most optimistic basis.

Completeness : The information in the financial statements must be complete within the bounds of materiality and cost.

Comparability

Usefulness is enhanced if accounting information can be compared with similar information for the ***same organisation*** at different times, and for ***different organisations*** at the same time. Comparability enhances the value of accounting information by enabling the users to discern and detect similarities and the dissimilarities among different concerns as also in respect of the same concern over time. Absoluteness of the information is not of much use — it is the comparability that lends itself to proper decision-making. Whether one is doing well or not is not the enquiry; the enquiry should be whether one is doing better or more (or worse) than others or than in other periods. To achieve comparability, consistency and disclosure of accounting policies are necessary.

Key Points

- Accounting is a service activity. Its function is to provide quantitative information primarily financial in nature, about economic entities that is intended to be useful in making economic decisions in making reasoned choices among alternative courses of action. Accounting includes several branches, e.g., financial accounting, managerial accounting and government accounting.
- The **objectives of accounting** are :
  (i) To keep a systematic record of financial transactions that affect the business enterprise.
  (ii) To ascertain the profits earned or losses incurred by a business unit during a particular accounting period.
  (iii) To ascertain the financial position of the business unit at the end of the accounting period.
  (iv) To exercise control over business assets and properties.
  (v) To facilitate business decision-making.
- Book-keeping is an activity concerned with the recording of financial data related to business operations in a significant and orderly manner. Book-keeping is the record-making phase of accounting. Accounting is based on a careful and efficient book-keeping system.
- Accounting information is a *statement* which provides quantitative information about the effect of transactions and other events on an accounting entity. Accounting information is used for predicting, comparing and evaluating the earning power and financial position of a business enterprise. It also serves the needs of the users who rely on accounting statements as their principal source of information for decision-making.
- Accounting information is required by two sets of people—internal and external. Internal users are associated with management of the concern for which information is sought to be gathered and surveyed. For example, the directors or the partners, managers and officers.The external users consist of several explicit groups : (1) investors; (2) lenders; (3) suppliers; (4) customers; (5) government agencies; (6) the public; and, (7) employees.
- Accounting information must possess some qualitative characteristics. These are the attributes that make the information provided in financial statements useful to users. The four main qualitative characteristics are : (i) Reliability; (ii) Relevance; (iii) Understandability; and (iv) Comparability.

THEORETICAL QUESTIONS

1. Define accounting and discuss its functions.
2. What are the characteristics of modern accounting ?
   State the advantages and limitations of accounting ?
3. What are the objectives of accounting ?
4. Who are the users of accounting information ?
   Why do they need information ?
5. What are the qualitative characteristics of accounting information ?

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each sentence or answer each question below.

1. Which of the following is / are a sub-field(s) of accounting ?
   A financial accounting
   B cost accounting
   C management accounting
   D all the above
2. Which of the following is not an internal user of financial statement ?
   A board of directors
   B managers
   C officers
   D lenders

3. Accounting information must possess some qualitative characteristics. For example,
   (i) reliability
   (ii) relevance
   (iii) understandability
   Which of the above is / are correct ?
   A (i) and (ii) only
   B (i) only
   C (ii) and (iii) only
   D all the above
4. Which of the following is not an external user ?
   A investor
   B government agencies
   C partners
   D labour union
5. Which of the following is true ?
   A Accounting is the recording phase of past happening
   B Accounting reflects the current financial position or worth of a business
   C Accounting statements always present comparable data
   D Accounting statements show the impact of data
6. Which of the following is true ?
   A Human resources accounting is the accounting for the human resources of an enterprise that are included in the financial statements
   B Social responsibility accounting is the reporting of cost and benefits relating to socially responsible actions by business enterprises
   C Cost accounting is a division of financial accounting
   D Financial accounting is not concerned with external reporting

7. Which of the following is an advantage of accounting ?
   A accounting provides information useful for making economic decisions
   B accounting provides comparable data for comparison
   C accounting proivides information useful for predicting uncertainty
   D accounting information is useful in judging managements' ability
8. Which of the following is not a limitation of accounting ?
   A accounting information is historical in nature
   B accounting information does not show the impact of inflation
   C accounting reflects those increases in net assets that are realised
   D accounting information must possess some qualitative characteristics
9. Which of the following is not true ?
   A Financial accounting is primarily for external user
   B Management accounting is primarily for internal user
   C Financial accounting provides an overall view of the business enterprise
   D Cost accounting does not give a detailed analysis of all aspects of the business unit
10. Which of the following is not true ?
   A Financial accounting emphasises on the type of expenses and revenues
   B Cost accounting emphasises on the products, processes and department
   C Management accounting emphasises on the stewardship aspect of accounting
   D Management accounting is tailored to suit the needs of the users

Double Entry System

Introduction

Double entry is an almost universally used system of business record keeping. It is a system of recording business transactions which recognises that each transaction has a dual aspect. It is so named because the principles of double entry book-keeping are based upon every transaction having two aspects or two parts, i.e., two accounts are always affected by each transaction. Under this system, each transaction is seen as a flow of value from one account to another. The receiving account is debited with the amount and the giving account is credited. Therefore, every debit has an equal and offsetting credit.

If only two accounts are affected (as in the purchase of building for cash), one account, Building is debited and the other account, Cash is credited for the same amount. If more than two accounts are affected by a transaction, the sum of the debit entries must be equal to the sum of the credit entries.

Features of Double Entry System

(1) This method records both aspects of each transaction.
(2) Under this system, equal debit and credit entries are made for every transaction in two different accounts.
(3) Under this system, all transactions are recorded fully.
(4) Under this system, it is possible to prepare a Trial Balance and check the arithmetical accuracy of the books of account because it records all transactions in full.
(5) Under this system, profit / loss can be found out by showing in detail the expenses and incomes.
(6) Under this system, Balance Sheet can be prepared in detail.

Advantages of the Double Entry System

(1) A complete record of all the transactions relating to a business unit are maintained systematically.
(2) The financial position of the firm can be ascertained.
(3) The arithmetical accuracy of the books of account can be ensured.
(4) Location and rectification of errors are possible.
(5) The system can be applied to any form of organisation.
(6) Consistency can be maintained in the books of account, which help make a comparative study of current year's figures with those of the previous year(s).

(7) The profits earned or losses suffered for an accounting period can be ascertained.
(8) Amount due to suppliers and due from customers can be easily ascertained.
(9) The amount of cash balance available at any point of time can be ascertained.
(10) It helps take managerial decisions.
(11) Greater control over the affairs of the business can be exercised and, thereby, frauds and misappropriations can be minimised.
(12) The business transactions do not get mixed up with private transactions of the owner(s).

Disadvantages of the Double Entry System

(1) This system adopts money as its basic unit of measurement. But money is an inelastic yardstick for measurement.
(2) Many important events cannot be recorded in the books of account simply because they cannot be expressed in monetary terms.
(3) Transactions are all historical records and not future probabilities.
(4) If any transaction is not recorded at all in the books of account, it may remain undiscovered.
(5) If the amount of a transaction is wrongly recorded in the books of original entry, it is difficult to detect the error.
(6) A compensating error may also remain undetected.
(7) This system requires personal judgement of the accountant.
(8) This system is not suitable for small businesses where the owner(s) can directly control the affairs of the business.

Accounting Equation

The accounting equation is the basis for double entry system of accounting. Total assts of the business unit are provided by the creditors/lenders and the owners. Therefore, at any point of time, the total assets of the business are equal to total liabilities. Liabilities to the outsiders are known as liabilities but liability to the owners, in accounting, is referred to as 'capital'.

The relationship that exists among assets, liabilities and the capital can be expressed in the form of an accounting equation which is as follows :

$$\text{Total Assets} = \text{Total Liabilities}$$
OR
$$\text{Total Assets} = \text{Liabilities} + \text{Capital}$$
OR
$$\text{Total Assets} - \text{Liabilities} = \text{Capital}$$

Assets and liabilities are two independent variables and capital is the dependent variable, for it is the difference between assets and liabilities. A transaction may affect either both sides of the equation by the same amount or on one side of the equation only, by both increasing or decreasing it by equal amounts and thus netting to zero. An increase in an asset, without a corresponding increase in liability or a corresponding decrease in another asset, must represent an increase in capital. Conversely, an increase in liability without a corresponding increase in asset, or a corresponding decrease in another liability, will indicate a decrease in capital.

Concept of Debit, Credit and Duality

The rules of Debit and Credit are as follows :

1. **Debit** : Any ***increase*** on the ***left hand side*** of the equation
2. **Credit** : Any ***decrease*** on the ***left hand side*** of the equation.
3. **Debit** : Any ***decrease*** on the ***right hand side*** of the equation
4. **Credit** : Any ***increase*** on the ***right hand side*** of the equation.

Illustration 1

(a) If the liabilities of a business is ₹ 75,000 and the capital is ₹ 85,000. Find out the total assets.
(b) A business has assets of ₹ 54,321 and owner's equity is ₹ 34,215. What is the amount of liability?
(c) Cash ₹ 10,000; Stock ₹ 15,000; Building ₹ 10,000; Machinery ₹ 1,80,000; Debtors of ₹ 45,000 and Creditors ₹ 27,500. Ascertain the capital.

Solution

(a) Total Assets – Liabilities = Capital
or, Total Asset = Capital + Liabilities
∴ Total Assets = ₹ (85,000 + 75,000) = ₹ **1,60,000**.

(b) Assets – Liabilities = Capital (Owner's equity)
or Assets – Capital = Liabilities
Therefore, liabilities = ₹ (54,321 – 34,215) = ₹ **20,106**.

(c) Assets – Liabilities = Capital
or Capital = (Cash + Stock + Building + Machinery + Debtors) – Creditors
(₹ 10,000 + ₹ 15,000 + ₹ 10,000 + ₹ 1,80,000 + ₹ 45,000) – ₹ 27,500
= ₹ 2,60,000 – ₹ 27,500 = ₹ **2,32,500**.

Illustration 2

Calculate as directed using accounting equation :

(a) If the total assets of a business are ₹ 1,50,000 and capital is ₹ 75,000, calculate creditors.
(b) If the capital of a business is ₹ 80,000 and the liabilities are ₹ 60,000, calculate the total assets of the business.
(c) Calculate total assets if (i) Capital is ₹ 50,000; (ii) Creditors ₹ 30,000; (iii) Revenue during the period ₹ 52,000; and (iv) Expenses during the same period are ₹ 38,000.

Solution

(a) Total Assets – Liabilities = Capital
or Liabilities = Total Assets – Capital
or Creditors = Total Assets – Capital
= ₹ 1,50,000 – ₹ 75,000
= ₹ **75,000**.

(b) Total Assets – Liabilities = Capital
or Total Assets = Capital + Liabilities
= ₹ 80,000 + ₹ 60,000
= ₹ **1,40,000**.

(c) Total Assets – Liabilities = Capital + Profit
or Total Assets = Capital + Profit + Liabilities
= ₹ 50,000 + ₹ (52,000 – 38,000) + ₹ 30,000 = ₹ 50,000 + ₹ 14,000 + ₹ 30,0000 = ₹ **94,000**.

Illustration 3

From the following information calculate total assets of the business : Capital ₹ 40,000; Creditors ₹ 30,000; Revenue earned during the period ₹ 75,000; Expenses incurred during the period ₹ 20,000. Value of stocks unsold ₹ 20,000.

Solution

Total Assets – Liabilities = Capital + Profit
or Total Assets = Capital + Liabilities + Profit
or Total Assets = Capital + Creditors + Profit
= ₹ 40,000 + ₹ 30,000 + ₹ 55,000 (₹ 75,000 – ₹ 20,000)
= ₹ 1,25,000 (includes ₹ 20,000 closing stock).

Illustration 4

Prabhas Senapati has the following assets and liabilities as on 31st December, 2009. Ascertain his capital.

Cash ₹ 2,500; Bank ₹ 4,750; Debtors ₹ 1,800; Creditors ₹ 2,200; Plant and Machinery ₹ 8,000; Building ₹ 20,000; Furniture ₹ 2,400; Bills Receivable ₹ 5,650; Bills Payable ₹ 2,350.

Solution

Assets – Liabilities = Capital
or Capital = Assets – Liabilities
or Capital = (Cash + Bank + Debtors + Plant and Machinery + Building + Furniture + Bills Receivable)
– (Creditors + Bills Payable)
= ₹ (2,500 + 4,750 + 1,800 + 8,000 + 20,000 + 2,400 + 5,650) – ₹ (2,200 + 2,350)
= ₹ (45,100 – 4,550) = ₹ 40,550.

Illustration 5

Show the accounting equations on the basis of the following transactions.

(i) Raghunath commenced business with cash ₹ 80,000.
(ii) Purchased goods on credit ₹ 20,000.
(iii) Withdrew cash for private use ₹ 2,000.
(iv) Sold goods on credit (cost-price ₹ 15,000) ₹ 20,000.
(v) Purchased furniture ₹ 1,500.

Solution

Accounting Equation : Total Assets – Liabilities = Capital

(i) Raghunath commenced business with cash ₹ 80,000

Here business is getting ₹ 80,000 in the form of cash and owes Raghunath ₹ 80,000. Therefore, in the form of accounting equation it can be shown as follows :

	Assets	–	Liabilities	=	Capital
Cash	80,000	–	0	=	80,000

(ii) Purchased goods on credit ₹ 20,000

Here stock of the business will be increased by ₹ 20,000 and liabilities in the form of creditor will be increased by the same amount. Therefore, the new equation will be :

	Assets	–	Liabilities	=	Capital
Cash	80,000	–	0	=	80,000
Stock	20,000	–	Creditors 20,000	=	0
	1,00,000	–	20,000	=	80,000

(iii) Withdrew cash for private use ₹ 2,000

Here cash will be reduced by ₹ 2,000 and capital will also be reduced by ₹ 2,000. Therefore, the new equation will be :

	Assets	–	Liabilities	=	Capital
Cash	78,000	–	0	=	78,000
Stock	20,000	–	Creditors 20,000	=	0
	98,000	–	20,000	=	78,000

(iv) Sold goods on credit ₹ 20,000 (cost price ₹ 15,000)

Here stock will be reduced by ₹ 15,000 and asset in the form of debtors will be increased by ₹ 20,000. Capital will be increased by ₹ 5,000 profit (₹ 20,000 – ₹ 15,000). The new equation will be :

	Assets	–	Liabilities	=	Capital
Cash	78,000		0	=	*83,000
Stock	5,000		Creditors 20,000		
Debtors	20,000				
	1,03,000	–	20,000	=	83,000

* It includes profit of ₹ 5,000 (₹ 20,000 – ₹ 15,000).

(v) Purchased furniture ₹ 1,500

Here cash will be reduced by ₹ 1,500 and furniture will appear in the equation as an asset. The new equation will be :

	Assets	–	Liabilities	=	Capital
Cash	76,500		0	=	83,000
Stock	5,000		Creditors 20,000		
Debtors	20,000				
Furniture	1,500				
	1,03,000	–	20,000	=	83,000

Illustration 6

Show the accounting equations on the basis of the following transactions.

(i) D. Mahapatra commenced business with cash ₹ 50,000.
(ii) Purchased goods for cash ₹ 8,000.
(iii) Sold goods costing ₹ 6,000 for ₹ 9,000.
(iv) Purchased furniture ₹ 20,000.
(v) Took a loan of ₹ 10,000 from bank.
(vi) Paid salary ₹ 4,000 and insurance ₹ 2,000.
(vii) Received rent ₹ 3,000 and interest ₹ 1,500.

(viii) Paid ₹ 800 as premium of life insurance policy.
(ix) Purchased a bicycle for the owners' son ₹ 1,200.
(x) Depreciate furniture by ₹ 300.

Solution

Accounting Equation : Total Assets = Total Liabilities OR Total Assets = Capital + Liabilities OR Total Assets – Liabilities = Capital

(i) D. Mahapatra commenced business with cash ₹ 50,000

Here business is getting ₹ 50,000 in the form of cash and owes Mahapatra ₹ 50,000. Therefore, in the form of accounting equation it can be shown as follows :

	Assets	–	Liabilities	=	Capital
Cash	50,000	–	0	=	50,000

(ii) Purchased goods for cash ₹ 8,000

Here stock of the business will be increased by ₹ 8,000 and cash will be reduced by ₹ 8,000. Therefore, the new equation will be :

	Assets	–	Liabilities	=	Capital
Cash	42,000	–	0	=	42,000
Stock	8,000	–	0	=	8,000
	50,000	–	0	=	50,000

(iii) Sold goods costing ₹ 6,000 for ₹ 9,000

Here stock will be reduced by ₹ 6,000 and cash will be increased by ₹ 9,000. Capital will be increased by ₹ 3,000 profit (₹ 9,000 – ₹ 6,000). The new equation will be :

	Assets	–	Liabilities	=	Capital
Cash	51,000	–	0	=	51,000
Stock	2,000	–	0	=	2,000
	53,000	–	0	=	53,000

(iv) Purchased furniture ₹ 20,000

Here cash will be reduced by ₹ 20,000 and furniture will appear in the equation as an asset. The new equation will be :

	Assets	–	Liabilities	=	Capital
Cash	31,000	–	0	=	31,000
Stock	2,000	–	0	=	2,000
Furniture	20,000	–	0	=	20,000
	53,000	–	0	=	53,000

(v) Took a loan of ₹ 10,000 from bank

Here cash will be increased by ₹ 10,000 and liabilities in the form of loan will be increased by the same amount. Therefore, the new equation will be :

	Assets	–	Liabilities	=	Capital
Cash	41,000	–	Loan 10,000	=	31,000
Stock	2,000	–	0	=	2,000
Furniture	20,000	–	0	=	20,000
	63,000	–	10,000	=	53,000

(vi) Paid salary ₹ 4,000 and insurance ₹ 2,000

Here cash will be reduced by ₹ 6,000 and profit will be reduced by ₹ 6,000, i.e., capital will be reduced by ₹ 6,000. The new equation will be :

	Assets	–	Liabilities	=	Capital
Cash	35,000	–	Loan 10,000	=	25,000
Stock	2,000	–	0	=	2,000
Furniture	20,000	–	0	=	20,000
	57,000	–	10,000	=	47,000

(vii) Received rent ₹ 3,000 and interest ₹ 1,500

Here cash will be increased by ₹ 4,500 and capital will be increased by the same amount in the form of profit. Therefore, the new equation will be :

	Assets	–	Liabilities	=	Capital
Cash	39,500	–	Loan 10,000	=	29,500
Stock	2,000	–	0	=	2,000
Furniture	20,000	–	0	=	20,000
	61,500	–	10,000	=	51,500

(viii) Paid ₹ 800 as premium of life insurance policy

Here cash will be reduced by ₹ 800 and capital will be reduced by ₹ 800 by way of drawing. Therefore, the new equation will be :

	Assets	–	Liabilities	=	Capital
Cash	38,700	–	Loan 10,000	=	28,700
Stock	2,000	–	0	=	2,000
Furniture	20,000	–	0	=	20,000
	60,700	–	10,000	=	50,700

(ix) Purchased a bicycle for the owner's son ₹ 1,200

Here cash will be reduced by ₹ 1,200 and capital will be reduced by ₹ 1,200 by way of drawing. Therefore, the new equation will be :

	Assets	–	Liabilities	=	Capital
Cash	37,500	–	Loan 10,000	=	27,500
Stock	2,000	–	0	=	2,000
Furniture	20,000	–	0	=	20,000
	59,500	–	10,000	=	49,500

(x) Depreciate furniture by ₹ 300

Here furniture will be reduced by ₹ 300 and capital will be reduced by ₹ 300 by way of loss due to depreciation. Therefore, the new equation will be:

	Assets	–	Liabilities	=	Capital
Cash	37,500	–	Loan 10,000	=	27,500
Stock	2,000	–	0	=	2,000
Furniture	19,700	–	0	=	19,700
	59,200	–	10,000	=	49,200

Elements of Financial Statements

The elements directly related to the measurement of financial position in the Balance Sheet are : ***assets***, ***liabilities*** and ***equity***.

The elements directly related to the measurement of performance in the Statement of Profit and Loss are : ***income*** and ***expenses***.

These definitions applied together with the recognition criteria, helps to understand how and when the financial effect of transactions should be recognised in the financial statements.

Definitions

(a) An ***asset*** is a resource controlled by the enterprise as a result of past events from which future economic benefits are expected to flow to the enterprise.

(b) A ***liability*** is a present obligation of the enterprise arising from past events, the settlement of which is expected to result in an outflow from the enterprise of resources embodying economic benefits.

(c) ***Equity*** is the residual interest in the assets of the enterprise after deducting all its liabilities.

(d) ***Income*** is increase in economic benefits during the accounting period in the form of inflows or enhancements of assets or decrease in liabilities, that in turn increases the equity other than those relating to contribution from equity participants.

(e) ***Expenses*** are decrease in economic benefits during the accounting period in the form of outflows or depletions of assets or incurrence of liabilities that result in decreases in equity, other than those relating to distributions to equity participants.

Assets

Assets are those resources that the business owns. They refer to some property or legal right owned by a business enterprise which can be measured in terms of money.

An asset has the following ***three*** essential characteristics :

(1) It has the potential to provide future economic benefits to the enterprise.
(2) It is a result of past transactions or events.
(3) The enterprise has the control over it.

Liability

Liability is a present obligation expressed in terms of money, which arises from transactions or other events that have already occurred. It involves an enterprise in a probable future transfer of cash, goods or services or the foregoing of a future cash receipt.

Obligations may arise from normal business practice, custom and a desire to maintain good business relations.

Recognition of the Elements of Financial Statements

An item that meets the definition of an element (given above) should be recognised if :

(a) it is possible that any future economic benefit associated with the item will flow to or from the enterprise; and
(b) the item has a cost or value that can be measured with reliability.

In the ***first criterion***, the concept of probability is used to refer to the degree of uncertainty. Assessments of the degree of uncertainty attaching to the flow of future economic benefits are made on the basis of the evidence available when the financial statements are prepared.

The ***second criterion*** for the recognition of an item is that it possesses a cost or value that can be measured with reliability. When, however, a reasonable estimate cannot be made, the item is not recognised in the Balance Sheet or Statement of Profit and Loss.

Recognition of Assets

An asset is recognised in the Balance Sheet when it is probable that the future economic benefits associated with it will flow to the enterprise and the asset has a cost or value that can be measured reliably.

If there is any doubt about the flow of benefits to the enterprise beyond current accounting period, the expenditure incurred will not be recognised as an asset.

Recognition of Liabilities

A liability is recognised in the Balance Sheet when it is probable that an outflow of resources embodying economic benefits will result from the settlement of a present obligation and the amount at which the settlement will take place can be measured reliably.

Recognition of Income

Income is recognised in the Statement of Profit and Loss when an increase in future economic benefits related to an increase in an asset or a decrease of a liability has arisen that can be measured reliably.

Recognition of Expenses

Expenses are recognised in the Statement of Profit and Loss when a decrease in future economic benefits related to a decrease in an asset or an increase of a liability has arisen that can be measured reliably.

An expense is recognised immediately in the Statement of Profit and Loss when an expenditure produced no future economic benefits. An expense is also recognised to the extent that future economic benefits from an expenditure do not qualify, or cease to qualify, for recognition in the Balance Sheet as an asset.

Measurement of Elements of Financial Statements

After deciding that an item is to be recognised in the financial statements, the next step is to decide the basis for its measurement.

The framework refers to ***four*** measurement bases that are frequently used in reporting. These are :

1. Historical Cost
2. Current Cost
3. Realisable (Settlement) Value
4. Present Value

In measuring assets and liabilities, the historical cost is most commonly used. This is usually combined with other measurement bases. For example, inventories are usually carried at lower of cost and net realisable value (NRV) and pension liabilities are carried at their present value.

Concept of Capital and Capital Maintenance

Concept of Capital

The framework refers to two concepts of capital :

(a) Financial concept of Capital

(b) Physical concept of Capital

Under financial concept of capital, capital is synonymous with the net assets or equity of the enterprise.

Under physical concept of capital, capital is regarded as the productive capacity of the enterprise.

Determination of Profit

Under the financial concept of capital a profit is earned if financial amount of the net assets at the end of the period is greater than at the beginning of the period after deducting any distributions to and contributions from owners.

Under physical concept of capital, a profit is earned if physical productive capacity of the enterprise at the end of the period exceeds the physical productive capacity at the beginning of the period, after deducting any distributions to and contributions from owners.

Capital Maintenance

It is assumed that, an enterprise has maintained its capital if it has more capital at the end of the accounting year than that at the beginning of the year. The main point in capital maintenance is to decide which concept to be adopted.

Financial capital maintenance is measured either in nominal monetary units or units of constant purchasing power.

Physical capital maintenance concept requires the adoption of the current cost basis of measurement — an appreciation of what it would cost to ***replace assets at current prices***.

The main difference between two concepts of capital maintenance is the treatment of the effects of changes in the prices of assets and liabilities of the enterprises.

Key Points

- Double entry is an almost universally used system of business record keeping. It is a system of recording business transactions which recognises that each transaction has a dual aspect. It is so named because the principles of double entry book-keeping are based upon every transaction having two aspects or two parts, i.e., two accounts are always affected by each transaction.
- The relationship that exists among assets, liabilities and the capital can be expressed in the form of an accounting equation which is as follows :

Total Assets = Total Liabilities OR Total Assets = Liabilities + Capital OR Total Assets – Liabilities = Capital

Key Points (Contd.)

- Liability is a present obligation expressed in terms of money, which arises from transactions or other events that have already occurred. It involves an enterprise in a probable future transfer of cash, goods or services or the foregoing of a future cash receipt.

THEORETICAL QUESTIONS

1. What do you mean by double entry system ?
2. What are the features of double entry system ?
3. What are the advantages and disadvantages of double entry system ?
4. What is accounting equation ?
5. What are the elements of financial statements ?

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each sentence or answer each question below.

1. Which of the following equations is correct ?
   A total assets – liabilities = capital – profit
   B total assets – liabilities = capital + profit
   C total assets + profit = capital + liabilities
   D total assets + liabilities = capital – profit
2. Robin introduces his car into his business. Which parts of the business accounting equation will change?
   A capital and liability
   B liabilities and assets
   C capital and profit
   D assets and capital
3. Which of the following equation is wrong ?
   A net assets = proprietor's fund
   B net assets = capital + profit + drawings
   C net assets = capital + profit – drawings
   D fixed assets + net current assets = capital + profit – drawings
4. Which of the following is a correct version of the 'fundamental accounting equation' ?
   A assets = capital less liability
   B assets = liabilities
   C assets plus liabilities = capital
   D assets = capital + liabilities
5. Consider the following statements :
   (i) 'Double entry book-keeping' means that two sets of records are maintained.
   (ii) In double entry book-keeping we have a basic check on the accuracy of the entries as the total value of the debit entries and total value of the credit entries should be equal.
   Are the statements true or false ?

	Statement (i)	Statement (ii)
A	True	True
B	True	False
C	False	True
D	False	False

6. A business borrowed ₹ 60,000 from its bank, and used the cash to buy a new computer. How is accounting equation Affected by these transactions ?

	Assets	Liabilities
A	unchanged	decreased
B	unchange	dincreased
C	increased	increased
D	increased	decreased

PRACTICAL QUESTIONS

1. (a) If the capital of the firm is ₹ 1,50,000 and creditor is ₹ 50,000. Find out the total assets.
   (b) A business has total assets of ₹ 85,000 and capital is ₹ 35,000. What is the amount of liability ?
   (c) Plant and machinery ₹ 1,00,000; Land and Building ₹ 2,00,000; Stock ₹ 50,000; Cash in hand ₹ 10,000; Cash at Bank ₹ 40,000; Sundry Debtors ₹ 50,000 and Sundry Creditors ₹ 1,00,000. Ascertain the capital.
2. Show accounting equations on the basis of the following transactions.
   (a) Ganguly commenced business with ₹ 1,00,000.
   (b) Purchased machinery for ₹ 30,000.
   (c) Purchased goods for ₹ 40,000.
   (d) Sold all goods for cash ₹ 60,000.
3. Show the accounting equations on the basis of the following transactions.
   (a) Commenced business with cash ₹ 40,000.
   (b) Deposited ₹ 10,000 in SBI.
   (c) Purchased machine from Amar & Sons ₹ 30,000.
   (d) Purchased goods from Bijoy Bros. ₹ 30,000.
   (e) Purchased goods for cash ₹ 18,000.
   (f) Half of the goods purchased from Bijoy Bros are sold at a profit of 40% on cost price for cash. The remaining half were sold on credit to Chitra Suppliers at a profit of 50% on selling price.
   (g) Paid ₹ 15,000 cash and ₹ 7,000 by cheque to Amar & Sons.
   (h) Owner withdraw ₹ 1,000 for personal expenses.
4. Dinesh starts business with cash ₹ 50,000 and furniture ₹ 20,000. The details of his transactions are given below:
   (i) Purchased goods on credit from Eknath ₹ 60,000 at 10% discount.
   (ii) Goods costing ₹ 20,000 are sold for ₹ 35,000.
   (iii) Goods costing ₹ 10,000 are sold to Fakir & Co. for ₹ 18,000.
   (iv) Fakir returned 1/5th of the goods.
   (v) Received commission ₹ 6,000.
   (vi) Paid ₹ 14,000 to Eknath and accepted a Bills Payable of 3 months for the balance amount.
   (vii) Paid salary ₹ 3,000 to Gumasta.
   (viii) Depreciate furniture by 10%.

   You are required to prepare accounting equations for Dinesh.
5. Gopinath started business with cash ₹ 30,000 and goods ₹ 10,000. His other transactions are given below. You are required to show the accounting equations.
   (i) Purchased goods from Hanuman Bhai ₹ 30,000.
   (ii) Paid ₹ 10,000 to Hanuman Bhai.
   (iii) Sold goods costing ₹ 12,000 for ₹ 19,000 to Inderjeet & Co.
   (iv) Goods costing ₹ 3,000 are destroyed during cyclone and could be sold for ₹ 1,000 only.
   (v) Paid wages ₹ 1,000.
   (vi) Goods costing ₹ 1,000 are distributed as relief during the cyclone.
   (vii) Goods costing ₹ 400 (market price ₹ 500) are taken for household use.
   (viii) Goods costing ₹ 3,000 are used for construction of a room.
   (ix) Goods costing ₹ 5,000 are sold for ₹ 20,000.
   (x) Goods worth ₹ 2,000 are destroyed in fire.

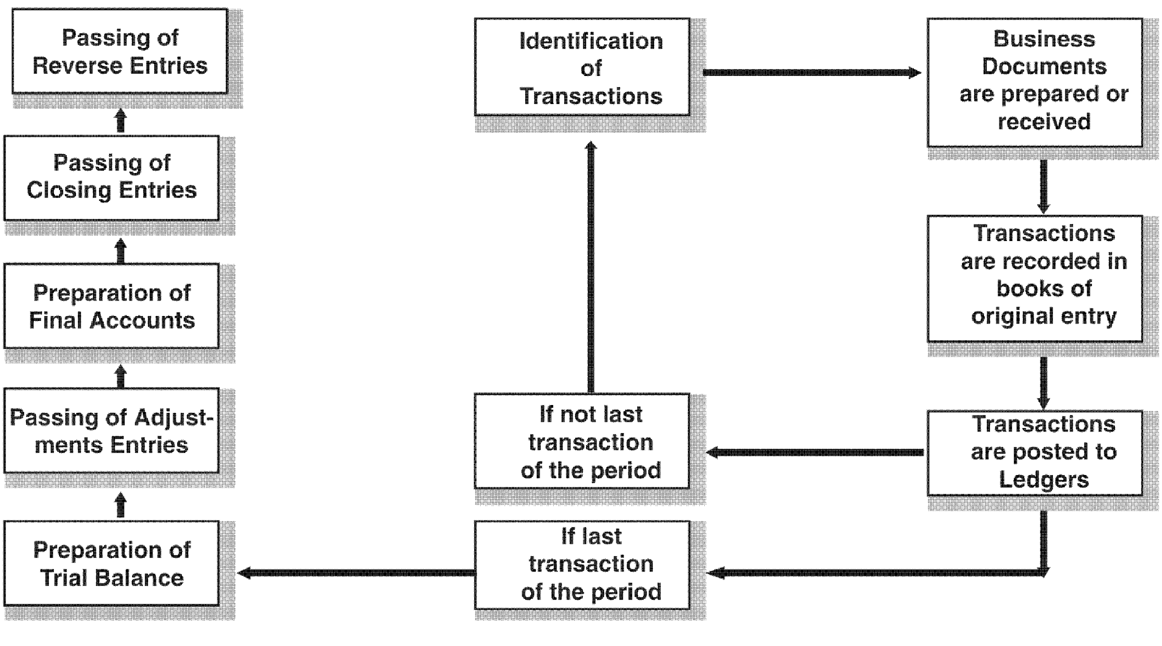
Accounting Cycle

Accounting Cycle

Accounting Cycle refers to the sequence of accounting procedures used to record, classify and summarise the business transactions. It begins with the identification of business transactions and ends with the reverse entries for prepaid and outstanding expenses. A business enterprise has numerous transactions every day during an accounting period. Unless the transactions are analysed and recorded individually, it is not possible to determine the impact of each transaction in the financial statements. The purpose of accounting is to ascertain the cumulative effect of the transactions. For accounting, the following steps are followed.



Source Documents

Source documents are basically external documents or documents relating to external activities, which are the first input to the accounting system. These source documents come into the company through a variety of departments, in particular, and most obviously the sales and purchasing departments, and they head towards the accounting department for processing.

Source documents include the following :

1. Sales order : A customer place order in writing or signs an order for goods and services he wishes to buy.

2. Purchase order : A business makes an order from another business for the purchase of goods or services.

3. Invoices and credit notes : These are discussed further below.

4. Petty cash voucher : It is prepared for petty cash expenses.

5. Credit card sales voucher : When goods are sold against credit card, a credit card sales voucher is prepared by the seller and signed by the customer. Credit card sales are entered in the cash book as cash sales.

Invoices

An invoice relates to a sales order or a purchase order. When a business sells goods or services on credit to a customer, it sends out an invoice. It shows the goods sold, with descriptions, quantities, prices and trade discounts. The details in the invoice should match with the details on the sales order. It may include additional charges — for insurance, carriage and container. It also shows the total amount due from the customer.

When a business buys goods or services on credit it receives an invoice from the supplier. The details in the invoice should match with the details on the purchase order. An invoice is often prepared on multi-part stationery or carbon copied. The top copy is sent to customer and other copies are used by the different departments within the business.

A specimen of an invoice is given below :

INVOICE

No- 786/2015 Date : 19th Feb, 2015

	Less : Trade Discount 20%		50,000	2,00,000	
E & O E					

Credit Note

In all businesses goods are returned for different reasons. They may have been damaged in transit, the wrong size or make may have been supplied; or the goods were found to be faulty. When goods are returned by the customers, a document is prepared called "credit note" and sent it to customer to intimate him that his account has been credited.

Credit notes are similar in style and layout to invoices, but they are usually smaller and printed in red.

A credit note is also sent to the customer in the following cases :

1. When allowances is granted for defective goods.
2. When containers are returned by the customers.
3. When excessive charge was made by mistake.

A specimen of credit note is given below :

CREDIT NOTE No. 99

Kirloskar Electric Co. Ltd.
Bombay-Pune Highway
Pune
Maharashtra

Date : 19th November, 2015

To
Shyam Trading Corporation
10, Asaf Ali Road
New Delhi 110 011

We have credited your account as follows :

Goods Returned	₹
1 piece Electric Motor 15 HP	25,000
1 piece Pump	10,000
	35,000

For Kirloskar Electric Co. Ltd.

Voucher

The ***voucher*** is a document which provides the authorisation to pay and specifies the accounts to be debited and credited. It is prepared for each expenditure, regardless of whether the expenditure covers services, merchandise for resale or assets for use in the business. A voucher, as illustrated on page 3.3, is attached to each incoming invoice and given an identification number.

The voucher has space for listing the data from the invoice. Space is also provided for approval of signatures for each step in the verification and approval of the liability. It contains written evidence that :

1. All expenditures have been incurred on the basis of proper authorisation, for example, against purchase order.
2. The goods and services have been received in full.
3. The payment has been made only for the goods and services received.

Features of a Voucher

The form of a voucher will vary from organisation to organisation. Regardless of the specific form of the vouchers, the following features are usually present :

1. A separate voucher for every incoming invoice.
2. Consecutive numbering of vouchers.
3. Name and address of creditor listed on voucher.
4. Description of liability.
5. Amount due and terms of payment.
6. Approval of signature for : (a) verification of invoice; (b) recording in accounts; (c) payment of liability.
7. Cheque number and date of cheque listed on voucher.

Preparing a Voucher

A clerk prepares a voucher by filling in the appropriate blanks with data taken from the invoice, such as the invoice date, invoice number and amount, and creditor's name and address.

The voucher with invoice attached is then sent to the employees responsible for verifying and comparing prices, quantities and terms with those specified in the purchase order. After verification, the voucher and supporting documents are sent to an employee of the accounting department, who indicates on the voucher the accounts to be debited and credited. The voucher is now ready to be recorded. But before recording, it is submitted to accounts officer for final approval. After receiving this executive approval, the voucher is entered in the books of original entry.

The specimen of a voucher is given below :

Capital Electronics

Illustrative Example 1

The following is a typical business transaction :

(a) The purchase of goods on credit.
(b) Allowance to credit customers upon the return of faulty goods.
(c) Refund from petty cash to an employee of an amount spent on entertaining a client.
(d) Credit card sales

For each transaction, identify clearly the original document(s) for the data.:

Solution

(a) The supplier's invoice would be the original document.
(b) The usual documentation is a credit note. Occasionally, however, a customer may himself issue a debit note.
(c) The original documents for the data would be receipts and a petty cash voucher.
(d) The original document would be the credit card sales voucher.

Meaning of Transaction

A transaction is a particular type of external event, which can be expressed in terms of money and brings change in the financial position of a business unit. A transaction involves transfer of something of value between two or more entities. A transaction may be an exchange in which each party receives as well as sacrifices value. In other words, in every transaction, there is a movement of value from one source to another. For example, when goods are purchased for cash, there is a movement of goods from the seller to the buyer and a movement of cash from the buyer to the seller.

A transaction can also be a non-reciprocal transfer in which a business unit incurs a liability (penalty imposed by a local authority) or transfer an asset to another entity (payment of income tax) or receives an asset (subsidy received from Government) or cancellation of a liability (provision for workmen's compensation) without directly receiving (or giving) value in exchange.

Transactions may be external (between a business entity and a second party, for example, goods sold on credit to X) or internal (not involving second party, for instance, depreciation charged on the machinery).

Meaning of Event

Event is an occurrence, happening, change or incident, which may or may not bring any change in the financial position of a business unit. It may be an internal event that occurs within a business unit, such as using new materials in production, death of the general manager or threat by a labour union to call a strike. It may be an external event that involves interaction between a business unit and its environment, for example, a change in the price of a product that the business unit buys or sells, or an improvement in technology by a competitor.

Illustration 1

State with reasons whether the following events are transactions or not to Mr. X (Proprietor) :

(i) Mr. X started business with capital (brought in cash) ₹ 40,000.
(ii) Paid salaries to staff ₹ 5,000.
(iii) Purchased machinery for ₹ 20,000 in cash.
(iv) Placed an order with Sen & Co. for goods for ₹ 5,000.
(v) Opened a bank account by depositing ₹ 4,000.
(vi) Received pass book from bank.
(vii) Appointed Mr. B. Sen as manager on a salary of ₹ 4,000 per month.
(viii) Received interest from bank ₹ 500.
(ix) Received a price list from B.
(x) Received free samples ₹ 1,000.
(xi) Gave lift to a supplier in the business car.
(xii) Sent peon to post office to bring the V.P.P. of ₹ 600.

Solution

Here, each event is to be considered from the view point of Mr. X's business. Those events which can be measured in terms of money and will change the financial position of the business of Mr. X, should be regarded as transaction.

(i) It is a transaction, because it changes the financial position of Mr. X's business. Cash will increase by ₹ 40,000 and Capital will increase by ₹ 40,000.
(ii) It is a transaction, because it changes the financial position of Mr. X's business. Cash will decrease by ₹ 5,000 and Salaries (expenses) will increase by ₹ 5,000.
(iii) It is a transaction, because it changes the financial position of Mr. X's business. Machinery comes in and cash goes out.
(iv) It is not a transaction, because it does not change the financial position of the business.
(v) It is a transaction, because it changes the financial position of the business. Bank balance will increase by ₹ 4,000 and cash will decrease by ₹ 4,000.
(vi) It is not a transaction, because it does not change the financial position of the business of Mr. X.
(vii) It is also not a transaction, because it does not change the financial position of the business of Mr. X.
(viii) It is a transaction, because it changes the financial position of Mr. X's business. Bank interest will increase by ₹ 500 and cash will increase by the same amount.
(ix) It is not a transaction, because it does not change the financial position of the business of Mr. X.
(x) It is not a transaction.
(xi) It is not a transaction because it does not change the financial position of the business of Mr. X.
(xii) It is not a transaction because it does not change the financial position of the business of Mr. X.

Classification of Transaction

Cash transaction: A transaction which involves immediate cash/cheque receipt or payment is called a Cash Transaction. For example, goods sold to X for cash ₹ 5,000. In a cash transaction, the name of the party to whom goods are sold or from whom goods are purchased, is not recorded. This is because, it serves no purpose.

Credit transaction: An external transaction not involving immediate cash receipt or payment is called a Credit Transaction. For example, Purchase of goods on credit from Y. In a credit transaction, delivery of goods and receipt/payment of money takes place on two different dates.

In a credit transaction, the name of the party is recorded to ascertain how much is owed to or from him.

External transaction: A transaction which involves the business entity and a second party is called an External Transaction. For example, goods sold to Ram for ₹ 2,000 on credit.

Internal transaction: A transcation which does not involve a second party is called Internal Transaction. For example, depreciation charged on machinery.

Rules for Determining Cash or Credit Transaction

Students sometimes experience a little difficulty deciding whether a transaction is for cash or on credit. The following rules will help :

(1) Cash purchases, cash sales and all transactions where the word 'paid'is mentioned are to be treated as cash transactions. For example, salary paid, goods sold for cash and so on.

(2) When a personal name or the name of a firm is mentioned in the transaction, it will be treated as credit transaction. For example, goods sold to X for ₹ 500.

(3) When both cash and personal name are mentioned in the transaction, it will be treated as a cash transaction. For example, goods sold to Y for cash ₹ 1,000.

Illustration 2

State whether the following are cash transactions or credit transactions :

1. Sachin commenced business with ₹ 1,00,000.
2. Paid rent in advance ₹ 5,000.
3. Purchased a typewriter for ₹ 7,000 from Sen & Co.
4. Bought furniture from M/s. Modern Furniture for cash ₹ 3,000.
5. Purchased goods from Sohan Brothers for cash ₹ 30,000.
6. Sold goods to Shyam for ₹ 25,000.
7. Bought goods from Ramesh ₹ 20,000.
8. Paid rent ₹ 1,000.
9. Paid salary to staff ₹ 4,000.
10. Received cash from Shyam ₹ 20,000.
11. Paid Romesh ₹ 19,000.

Solution

1. It is a cash transaction.
2. It is a cash transaction.
3. It is a credit transaction.
4. It is a cash transaction.
5. It is a cash transaction.
6. It is a credit transaction.
7. It is a credit transaction.
8. It is a cash transaction.
9. It is a cash transaction.
10. It is a cash transaction.
11. It is a cash transaction.

Illustration 3

State whether the following are external transactions or internal transactions:

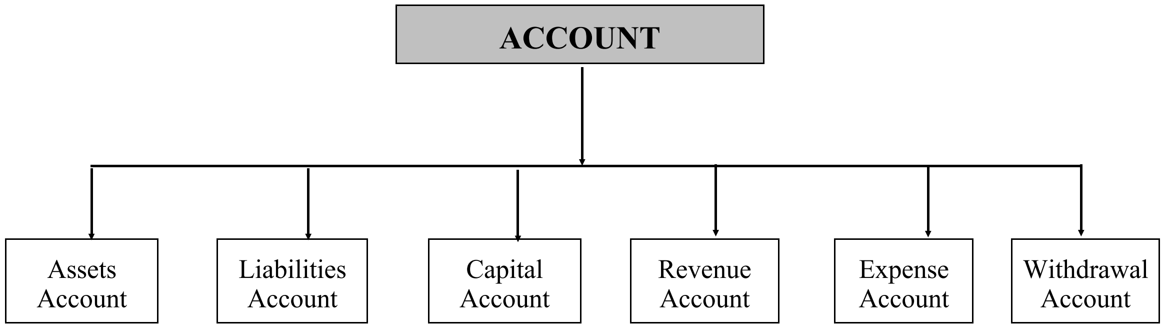
1. Purchased a computer from HCL on credit for ₹ 60,000.
2. Goods destroyed by fire ₹ 1,000 (not insured).
3. Purchased an electronic typewriter for cash ₹ 20,000.
4. Charged depreciation on furniture ₹ 400 and ₹ 200 on typewriter.

Solution

1. It is an external transaction.
2. It is an internal transaction.
3. It is an external transaction.
4. It is an internal transaction.

Classification of Accounts

Modern Classification of Accounts



According to modern approach, accounts are classified into six categories : (1) Assets Account; (2) Liabilities Account; (3) Capital Account; (4) Revenue Account; (5) Expense Account; and (6) Withdrawal Account.

Assets Account : These accounts are accounts of assets and properties such as land, building, plant, machinery, patents, cash investments, inventory, etc.

Liabilities Account : These accounts are accounts of lenders, creditors for goods, creditors for expenses, etc.

Capital Account : It is the account of the proprietor / partner who invested money in the business.

Revenue Account : These are accounts of incomes and gains. Examples are : sales, discount received, interest received, etc. These accounts accumulate data required for preparation of Trading, Profit and Loss Account.

Expense Account : These are accounts of expenses and losses. Examples are : purchases, wages paid, depreciation, rent, rates and taxes, etc. Like Revenue Account, these accounts accumulate data required for preparation of Trading, Profit and Loss Account.

Withdrawal Account : It is the account related to drawings by the proprietor / partners.

Rules for Debit and Credit

Sl. No.	Types of Account	Account to be debited	Account to be credited
1.	Assets Account	Increase ↑	Decrease ↓
2.	Liabilities Account	Decrease ↓	Increase ↑
3.	Capital Account	Decrease ↓	Increase ↑
4.	Revenue Account	Decrease ↓	Increase ↑
5.	Expense Account	Increase ↑	Decrease ↓
6.	Withdrawal Account	Increase ↑	Decrease ↓

Illustration 4

Analyse the following transactions, state the nature of accounts and state which account will be debited and which account will be credited.

(1) Kabir started his business with a cash of ₹ 50,000.
(2) Borrowed from Naresh ₹ 30,000.
(3) Purchased furniture for ₹ 20,000 in cash from Modern Furniture House.
(4) Purchased furniture from Bombay Safe for ₹ 40,000.
(5) Purchased goods for cash ₹ 15,000.
(6) Purchased goods from Romen ₹ 30,000.
(7) Sold goods for Cash to Karim ₹ 25,000.
(8) Sold goods to Shyam on Credit ₹ 30,000.

(9) Received cash from Shyam ₹ 20,000.
(10) Paid cash to Romen ₹ 20,000.
(11) Deposited cash into bank ₹ 15,000 for opening an account.
(12) Withdrew cash for personal use ₹ 1,000.
(13) Withdrew from bank for office use ₹ 5,000.
(14) Withdrew from bank for personal use ₹ 2,000.
(15) Received a cheque from Shyam ₹ 5,000.
(16) Deposited Shyam's cheque next day.
(17) Paid Romen by cheque ₹ 5,000.
(18) Paid salary to staff ₹ 10,000.
(19) Paid rent by cheque ₹ 5,000.
(20) Paid interest on loan ₹ 4,000.

Solution **Analysis of Transactions**

Transactions	Accounts involved	Nature of Account	Debit (₹)	Credit (₹)	Reason
1. Kabir started his business with a cash of ₹ 50,000.	Cash Capital	Asset Capital	50,000	 50,000	Increased Increased
2. Borrowed from Naresh ₹ 30,000.	Cash Loan from Naresh	Asset Liability	30,000	 30,000	Increased Increased
3. Purchased furniture for ₹ 20,000 in cash from Modern Furniture House.	Furniture Cash	Asset Asset	20,000	 20,000	Increased Decreased
4. Purchased furniture from Bombay Safe for ₹ 40,000.	Furniture Bombay Safe	Asset Liability	40,000	 40,000	Increased Increased
5. Purchased goods for cash ₹ 15,000.	Purchases Cash	Expense Asset	15,000	 15,000	Increased Decreased
6. Purchased goods from Romen ₹ 30,000.	Purchases Romen	Expense Liability	30,000	 30,000	Increased Increased
7. Sold goods for Cash to Karim ₹ 25,000.	Cash Sales	Asset Revenue	25,000	 25,000	Increased Increased
8. Sold goods to Shyam on Credit ₹ 30,000.	Shyam Sales	Asset Revenue	30,000	 30,000	Increased Increased
9. Received cash from Shyam ₹ 20,000.	Cash Shyam	Asset Asset	20,000	 20,000	Increased Decreased
10. Paid cash to Romen ₹ 20,000.	Romen Cash	Liability Asset	20,000	 20,000	Decreased Decreased
11. Deposited cash into bank ₹ 15,000 for opening an account.	Bank Cash	Asset Asset	15,000	 15,000	Increased Decreased
12. Withdrew cash for personal use ₹ 1,000.	Drawings Cash	Withdrawal Asset	1,000	 1,000	Increased Decreased
13. Withdrew from bank for office use ₹ 5,000.	Cash Bank	Asset Asset	5,000	 5,000	Increased Decreased
14. Withdrew from bank for personal use ₹ 2,000.	Drawings Bank	Withdrawal Asset	2,000	 2,000	Increased Decreased
15. Received a cheque from Shyam ₹ 5,000.	Cash Shyam	Asset Asset	5,000	 5,000	Increased Decreased
16. Deposited Shyam's cheque next day.	Bank Cash	Asset Asset	5,000	 5,000	Increased Decreased
17. Paid Romen by cheque ₹ 5,000.	Romen Bank	Liability Asset	5,000	 5,000	Decreased Decreased
18. Paid salary to staff ₹ 10,000.	Salary Cash	Expense Asset	10,000	 10,000	Increased Decreased
19. Paid rent by cheque ₹ 5,000.	Rent Bank	Expense Asset	5,000	 5,000	Increased Decreased
20. Paid interest on loan ₹ 4,000.	Interest Cash	Expense Asset	4,000	 4,000	Increased Decreased

Traditional Classification of Accounts

This is a very old system of classifying accounts. Nowadays, in advanced countries this system of classification of accounts is hardly used. Under this system, accounts are classified into four types.

1. Personal Accounts : These accounts show the transactions with the customers, suppliers, money lenders, the bank and the owner. A business may have many credit transactions with the above persons or organisations. A separate account is to be prepared for each of them. Persons or organisations with whom the business has credit transactions are either debtors or creditors. If they have to give some money to the firm, they are called debtors. Conversely, if the firm is to pay them some money they are known as creditors. The main purpose of preparing personal accounts is to ascertain the balances due to or due from persons or organisations.

2. Real Accounts : These accounts are accounts of assets and properties such as land, building, plant, machinery, patent, cash, investment, inventory, etc. When a machinery is purchased for cash, the two accounts involved are machinery and cash — both are Real Accounts. But if the same machine is purchased from Z & Co. on credit, the two accounts involved will be those of Machinery and Z & Co., the former being a Real Account and the latter being a Personal Account.

3. Nominal Accounts : These are the accounts of incomes, expenses, gains and losses. Examples are : Wages paid, discount allowed or received, purchases, sales, etc. These accounts generally accumulate the data required for the preparation of income statement, i.e., the Trading and Profit and Loss Account.

4. Valuation Accounts : Value is a measure, in terms of money, of the usefulness or desirability of an asset. Valuation is the process of attaching a monetary value to some asset (or liability). It is an adjustment usually made to an asset account, in order to allow for, or provide for, a fall in value as a result of, e.g., depreciation or doubtful debts. Where fixed assets are maintained in the books of accounts at original cost, to reflect the actual book value of the assets, a provision for depreciation account on the credit is maintained. In the Balance Sheet, it is shown as a deduction from the original cost of the asset.

Similarly, if the Debtors' personal accounts are retained at total amount due, a valuation account on the credit — provision for doubtful debts is required. In the Balance Sheet, it is shown as a deduction from Sundry Debtors Account to reflect estimated realisable value.

Illustration 5

Following accounts are being maintained in the books of Sri Pratap Sathpathy & Co. Classify them under Personal, Real and Nominal headings.

(i) Cash; (ii) Bank; (iii) Commission; (iv) Salaries; (v) Discount; (vi) Bills Receivable; (vii) Sohan Lal; (viii) Behera Brothers; (ix) Depreciation; (x) Bad Debt.

Solution

(i) Cash — **Real Account**; (ii) Bank — **Personal Account**; (iii) Commission — **Nominal Account**; (iv) Salaries — **Nominal Account**; (v) Discount — **Nominal Account**; (vi) Bills Receivable — **Real Account**; (vii) Sohan Lal — **Personal Account**; (viii) Behera Brothers — **Personal Account**; (ix) Depreciation — **Nominal Account**; (x) Bad Debt — **Nominal Account**.

Illustration 6

The following accounts are maintained in the books of Ghanashyam. Classify these under : Personal, Real and Nominal headings : (i) Interest; (ii) Cash; (iii) Bank; (iv) Mohan Lal; (v) Saraswati Pustak Bhandar; (vi) Vidyapuri; (vii) Motor Vehicles; (viii) Goodwill; (ix) Depreciation; (x) Commission.

Solution

(i) Interest — **Nominal Account**; (ii) Cash — **Real Account**; (iii) Bank — **Personal Account**; (iv) Mohan Lal — **Personal Account**; (v) Saraswati Pustak Bhandar — **Personal Account**; (vi) Vidyapuri — **Personal Account**; (vii) Motor Vehicles — **Real Account**; (viii) Goodwill — **Real Account**; (ix) Depreciation — **Nominal Account**; (x) Commission — **Nominal Account**.

Illustration 7

Classify the following into Real, Nominal, Personal and Valuation Accounts :

(i) Plant and Machinery; (ii) Purchases ; (iii) Investment; (iv) Bank; (v) Provision for Bad and Doubtful Debt; (vi) Tata Iron and Steel Co. Ltd.; (vii) Rent; (viii) Land and Building; (ix) Carriage Outwards; (x) Capital; (xi) Leasehold property; (xii) Trademark; (xiii) Returns outwards; (xiv) Import duty; (xv) Provision for depreciation.

Solution

(i) Plant and Machinery — **Real Account**; (ii) Purchases — **Nominal Account**; (iii) Investment — **Real Account;** (iv) Bank **— Personal Account**; (v) Provision for Bad and Doubtful Debt — **Valuation Account**; (vi) Tata Iron and Steel Co. Ltd **— Personal Account**; (vii) Rent — **Nominal Account**; (viii) Land and Building — **Real Account**; (ix) Carriage Outwards — **Nominal Account**; (x) Capital — **Personal Account**; (xi) Leasehold Property — **Real Account**; (xii) Trade Mark — **Real Account**; (xiii) Returns Outwards — **Nominal Account**; (xiv) Import Duty — **Nominal Account**; (xv) Provision for Depreciation — **Valuation Account**.

It has already been stated that each transaction involves two or more accounts. After ascertaining the accounts involved, our next problem is to decide which account should be debited and which account should be credited.

Rules for Debit and Credit (Traditional)

Debit and credit are simply additions to or subtraction from an account. In accounting, debit refers to the left hand side of any account and credit refers to the right side. Asset, expenses and losses accounts normally have debit balances; liability, income and capital accounts normally have credit balances.

The term debit is derived from the latin base *debere* (to owe) which contracts to the form 'Dr.' used in journal entries to refer to debits. Credit comes from the word *credere* (that which one believes in, including persons, like a creditor), which contracts to the form 'Cr.' used in journal entries for a credit.

1. Personal Accounts : Debit the account of the person who receives something and credit the account of the person who gives something.

2. Real Accounts : Debit the account of the asset/property which comes into the business or addition to an asset, and credit the account which goes out of the business. When furniture is purchased for cash, furniture account is debited (which comes into the business) and cash account is credited (which goes out of the business).

3. Nominal Accounts : Debit the accounts of expenses and losses, and credit the accounts of incomes and gains. When wages are paid, wages account is debited (expenses) and cash account is credited (asset goes out).

4. Valuation Account : Debit the account when the account is to be reduced and credit the account when the account is to be increased.

Rules for Debit and Credit at a Glance

Types of Account	Account to be debited	Account to be credited
1. Personal Account	Receiver	Giver
2. Real Account	What comes in	What goes out
3. Nominal Account	Expense and Loss	Income and Gain
4. Valuation Account	When account to be decreased	When account to be increased

Illustration 8

From the following transactions, state the nature of accounts and state which account will be debited and which account will be credited :

1. Mr. A started business with ₹ 50,000 in cash.
2. Purchased goods for cash ₹ 10,000.
3. Sold goods for cash ₹ 15,000.
4. Purchased goods from X for cash ₹ 5,000.
5. Sold goods to B for ₹ 6,000.
6. Purchased furniture for ₹ 4,000.
7. Purchased plant for ₹ 10,000.
8. Paid wages ₹ 400.

Solution

1. Mr. A started business with ₹ 50,000 — Here, accounts involved are (i) Cash Account and (ii) Capital Account.

(i) Cash Account ⟶ Real ⟶ Debit (Incomings)
(ii) Capital Account ⟶ Personal ⟶ Credit (Giver)

2. Purchased goods for cash ₹ 10,000 — Here, accounts involved are (i) Purchases Account and (ii) Cash Account

(i) Purchases Account ⟶ Nominal ⟶ Debit (Expenses)
(ii) Cash Account ⟶ Real ⟶ Credit (Outgoings)

3. Sold goods for cash ₹ 15,000 — Here, accounts involved are (i) Cash Account and (ii) Sales Account

(i) Cash Account ⟶ Real ⟶ Debit (Incomings)
(ii) Sales Account ⟶ Nominal ⟶ Credit (Income)

4. Purchased goods from X for cash ₹ 5,000 — Here, accounts involved are (i) Purchases Account and (ii) Cash Account
(i) Purchases Account → Nominal → Debit (Expenses)
(ii) Cash Account → Real → Credit (Outgoings)

5. Sold goods to B for ₹ 6,000 — Here, accounts involved are (i) B Account and (ii) Sales Account
(i) B Account → Personal → Debit (Receiver)
(ii) Sales Account → Nominal → Credit (Income)

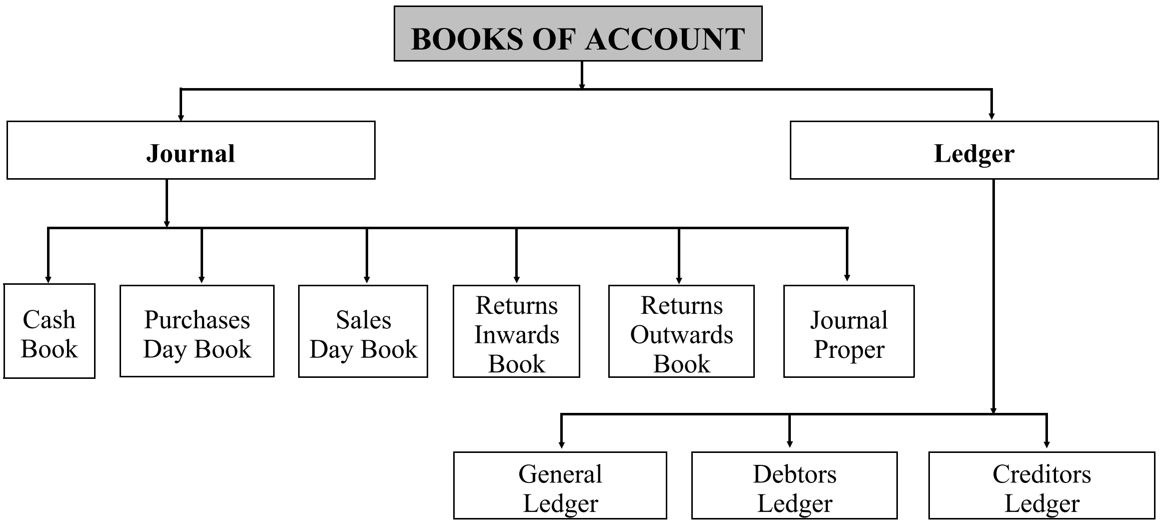
6. Purchased furniture for ₹ 4,000 — Here, accounts involved are (i) Furniture Account and (ii) Cash Account
(i) Furniture Account → Real → Debit (Incomings)
(ii) Cash Account → Real → Credit (Outgoings)

7. Purchased plant for ₹ 10,000 — Here, accounts involved are (i) Plant Account and (ii) Cash Account
(i) Plant Account → Real → Debit (Incomings)
(ii) Cash Account → Real → Credit (Outgoings)

8. Paid wages ₹ 400 — Here, accounts involved are (i) Wages Account and (ii) Cash Account
(i) Wages Account → Nominal → Debit (Expenses)
(ii) Cash Account → Real → Credit (Outgoings)

Journal and Ledger

Nowadays, many businesses use computers for maintaining accounting records and data may be stored on floppy disks rather than in journals and ledgers. However, an understanding of accounting concepts is most easily acquired by the study of manual accounting system. For this reason, we shall use standard written accounting forms, such as journal and ledger, as the model for a study of basic accounting concepts.



The Journal and its Nature

The first book in which the transactions of a business unit are recorded is called a Journal. Here, business transactions are recorded in chronological order, i.e. in the order in which they occur. Each record in a journal is called an entry. As a journal is the first book in which entries are recorded, a journal is also known as a book of original entry.

A journal entry is an analysis of the effects of a transaction on the accounts, usually accompanied by an explanation (properly called as a narration). Therefore, a journal is a tool for analysing and describing the impact of various transactions upon a business unit. Before a journal entry is passed, it is necessary to decide for each transaction, what are the accounts involved. It is also necessary that the accounts to be debited or credited are identified.

Ruling of a Journal

In its usual form, a Journal is divided by vertical lines into five columns in which to enter, in respect of each transactions : (a) Date; (b) Particulars; (c) Ledger folio; (d) Amount (debit); (e) Amount (credit).

Journal **Dr.** **Cr.**

Date	Particulars	L.F.	Amount	Amount
(a)	(b)	(c)	(d)	(e)

(a) The date : The year is written at the top of the date column of each page of the journal. Thereafter, on the next line of the date column, the month and day of the first entry are written. Unless the month or year changes or until a new page is begun, neither the month nor the year is repeated on the page.

(b) Particulars : The particulars column is the column for account titles and description. The name of the account to be debited is entered at the extreme left of the particulars column next to the date column. The symbol 'Dr.' is written at the right end of the particulars column on the same line of the account debited. The amount of the account debited is entered in the left hand money column. The name of the account to be credited is entered on the next line with a prefix 'To' and is indented to the right of the date column. The amount of the account credited is entered in the right hand money column. A short explanation of the transaction known as narration begins on the line immediately below the account credited. The narration should be adequate to explain the transaction and may include any data needed to identify the transaction. It should be noted that the narration is particularly important for non-routine transactions where their nature is, otherwise, not apparent. The narration always appears within parentheses and is begun with the word "Being" — which means what it is. Finally, a thin line is drawn all through the particulars column to indicate that the entry of a transaction has been completed.

(c) Ledger folio (L.F.) : The ledger folio column to the right of the particulars columns is not filled in when transactions are recorded in the journal. When the debits and credits are posted in the ledger accounts, the page number of the ledger in which these accounts are appearing are listed in this column.

(d) Amount (Debit) : The debit amount is recorded in the amount (Dr.) column opposite the title of the account debited. The unit of measurement, i.e. ₹ is recorded at the top of this column on each page and this is not repeated.

(e) Amount (Credit) : The credit amount is recorded in the amount (Cr.) column opposite the title of the account credited. Like the amount (Dr.) column, ₹ is recorded at the top of this column on each page.

Example of a Journal Entry :

This can be illustrated by means of an example. We suppose, on 1.1.2015, a trader sells goods for cash ₹ 1,000. Here, the accounts involved are—Cash Account and Sales Account. Cash Account is to be debited and the Sales Account is to be credited.

Again, we suppose that on 2.1.2015 goods worth ₹ 500 were purchased for cash. Here, Purchases Account is to be debited and Cash Account is to be credited. The entries in the Journal will be as under :

Journal **Dr.** **Cr.**

	Date	Particulars		L.F.	Amount	Amount
	2015					
Debit Account	Jan, 1	Cash Account	Dr.		1,000	
Credit Account		To Sales Account				1,000
Narration		(Being goods sold for cash)				
Month and year not repeated	2	Purchases Account	Dr.		500	
		To Cash Account				500
		(Being goods purchased for cash)				

In connection with the journal, the following points are to be remembered :

1. ***For each transaction, the exact accounts should be debited and credited. For that, the two accounts involved must be identified to pass a proper journal entry.***
2. ***Sometimes, a journal entry may have more than one debit or more than one credit. This type of journal entry is called compound journal entry. Regardless of how many debits or credits are contained in a compound journal entry, all the debits are entered before any credits are entered. The aggregate amount of debits should be equal to the aggregate amount of credits.***

> ***3. For a business, journal entries generally extend to several pages. Therefore, the total are cast at the end of each page, against the debit and credit columns, the following words are written in the particular column, which indicates carried forward (of the amount on the next page) 'Total c/f'.***
>
> ***The debits and credits totals of the page are then written on the next page in the amount columns; and opposite to that on the left, the following words are written in the particulars column to indicate brought forward (of the amount of the previous page) 'Total b/f'. This process is repeated on every page and on the last page, 'Grand Total' is cast.***

Simple and Compound Journal Entries

A journal entry which contains only one debit entry and one credit entry is called a ***Simple Journal Entry***.

Example of a simple journal entry is given below :

Journal **Dr.** **Cr.**

Date	Particulars		L.F.	Amount	Amount
2015 May 5	Cash A/c To Capital A/c (Being cash brought in as capital ₹ 50,000)	Dr.		50,000	 50,000

A journal entry which contains more than one debit entry or more than one credit entry or both is called a ***Compound Journal Entry***. It should be noted that total amount debited must be equal to total amount credited. In fact, a compound journal entry is nothing but a combination of two or more simple journal entries.

Example of a compound journal entry is given below :

Journal **Dr.** **Cr.**

Date	Particulars		L.F.	Amount	Amount
2015 May 5	Building A/c Furniture A/c Cash A/c To Capital A/c (Being different assets brought in as capital)	Dr. Dr. Dr.		1,00,000 80,000 20,000	 2,00,000

> **Key Points to Remember**
>
> ***1. Unless instructed to the contrary, assume that all transactions for the purchase or the sale of goods are on credit when a personal name or the name of a firm is mentioned in the question.***
> ***2. No need to mention the name of buyer or seller in the case of cash purchase or a cash sale, as money is simply exchanged for goods handed over.***
> ***3. Cash purchases, cash sales and all transactions where the word 'paid' is mentioned are obviously cash transactions.***
> ***4. When goods are purchased or sold for cash, the name of the supplier or customer is immaterial. Therefore, it is to be ignored at the time of recording transaction.***
> ***5. Return of goods by customer (sales returns) is recorded in the Returns Inwards Account or Sales Returns Account.***
> ***6. Return of goods to supplier (purchase returns) is recorded in the Returns Outwards Account or Purchase Returns Account.***

Illustration 9

2015

January 1 Mr. Peter commences business as a computer merchant, trading under the name of 'Computer Point' with a capital of ₹ 4,00,000 brought in cash.

3 He buys on credit from Hindusthan Computers Ltd., 10 computers @ ₹ 30,000 each.

15 He receives an invoice from Janata Transport Corporation for ₹ 5,000 in respect of carriage of computers from Bangalore.

20 He opens a bank account by depositing ₹ 3,50,000.

25 He sells 6 computers on credit to ABC Computers @ ₹ 35,000 each.

29 He pays by cheque the amount for carriage.
31 He receives cash ₹ 2,00,000 from ABC Computers.
31 He issues a cheque to Hindusthan Computers Ltd. for ₹ 3,00,000.

You are required to pass necessary Journal entries in the books of Computer Point.

Explanation: In this illustration, there are eight distinct transactions to be recorded:

1. The commencement of business : At the very beginning, it must be clearly understood that we are concerned only with the transactions of Computer Point. From the accounting point of view, the business and its proprietor are two distinct entities. If Mr. Peter takes any computer for his personal use, his account will be debited with the cost (represented by Drawings Account). Similarly, if he introduces capital in the business, his account will be credited (being giver) with the amount of capital.

Here, Mr. Peter introduces ₹ 4,00,000 as capital (in effect lending this sum to the business). In the books of Computer Point, Cash Account will be debited because Cash (Real Account)—***comes in*** and Peter's Capital Account will be credited because Peter's Capital Account (Personal Account)—***giver***.

2. Purchase of computers on credit : Mr. Peter's business is the purchase and sale of computers. Therefore, for recording this transaction, Purchases Account will be debited (Nominal Account—***expenses***) and Hindusthan Computers Ltd. will be credited (Personal Account—***giver***).

In this respect, we must mention that if the computer is used for the purpose of maintaining accounts of the business, Office Equipment Account will be debited in place of Purchases Account.

3. Carriage of the computers : Janata Transport Corporation performs the service of transporting computers from Bangalore. To record this transaction, Carriage Inward Account will be debited and Personal Account of Janata Transport Corporation will be credited. Here, students should note that carriage paid for bringing the purchased goods to the business godown is treated as 'Carriage Inward', whereas carriage paid to deliver the sold goods is treated as 'Carriage Outward'.

4. Opening of Bank Account : Here, Bank is receiving money from the business. Bank Account will be debited (Personal Account—***receiver***) and Cash Account will be credited (Real Account—***goes out***).

5. Sale of computers on credit : ABC Computers Account will be debited (Personal Account—***receiver***) and Sales Account will be credited (Nominal Account—***income***).

6. Payment to Janata Transport Corporation : Janata Transport Corporation receives cheque in settlement of its account for carriage. So, Janata Transport Corporation Account will be debited (Personal Account—***receiver***) and Bank Account will be credited (Personal Account—***giver***).

(Note that this transaction will not affect Carriage Inward Account).

7. Cash received from ABC Computers : To record this transaction, Cash Account will be debited (Real Account—***comes in***) and ABC Computer Account will be credited (Personal Account—***giver***).

8. Payment to Hindusthan Computers : This transaction is similar to above (6). Therefore Hindusthan Computer Ltd. will be debited (Personal Account—***receiver***) and Bank Account will be credited (Personal Account—***giver***).

Solution

	Grand Total			17,70,000	17,70,000

Subdivision of Journal

The journal is inadequate as the sole book of the original entry when the transactions are numerous. The nature of operations and the volume of transactions in the particular business determine the number and type of journals needed. A medium size business generally maintains the following types of journals :

1. Cash Book — to record cash transactions;
2. Sales Day Book — to record credit sales;
3. Purchases Day Book — to record credit purchases;
4. Sales Return Day Book — to record sales returns;
5. Purchases Return Day Book — to record purchases returns;
6. Bills Receivable Book — to record bills receivable;
7. Bills Payable Book — to record bills payable;
8. Petty Cash Book — to record petty cash payments; and,
9. Journal Proper — to record residuary transactions. It is also used for rectifying errors.

The Ledger

The ledger is the principal book of accounts where similar transactions relating to a particular person or thing are recorded. The journal is used to record the transactions in the chronological order. The owner of a business is not interested to know the effect of individual transaction on the financial statements, what he wants is the accumulated effect of each 'Chart of Accounts'. Chart of accounts is an index to all accounts contained in a double entry system. It allocates to each account a number and arranges accounts in logical subdivisions. For example, if he wants to know the total purchases for an accounting period, he will only see the ''Purchase Account''.

It is not possible to ascertain from the journal the total amount of purchases made. In the journal, record of purchases made at different dates can also be against cash or credit. Therefore, similar transactions should be sorted out and consolidated at one place to ascertain their net effect. This kind of processing is possible where different accounts are prepared in the ledger. Again, for example, to ascertain the cash position of a business, one is to look at the Cash Account; one can not know cash position with the help of a journal. Likewise, to ascertain net sales for the account period, one is to look at the Sales Account, which incorporates all information with regard to cash sales, credit sales, and the like.

Therefore, an account represents a detailed record of changes that have occured in a particular asset, liability, expense, loss, gain or capital during an accounting period.

Can Ledger suffice without a Journal ?

The owner of a business is not interested to know the effects of individual transactions on the financial statements (Trading, Profit and Loss Account and Balance Sheet), what he wants is the accumulated effect of each "Account". For example, if he wants to know the total purchases for an accounting period, he will only see the "Purchases Account". It is not possible to ascertain from the journal the total amount of purchases made. In the journal, record of purchases are made at different dates, which can also be against cash or credit. Therefore, similar transactions should be sorted out and consolidated at one place to ascertain their net effect. This kind of processing is possible where different accounts are prepared in the ledger.

The ledger is regarded as a principal book of account for the following reasons :

1. The ledger helps us preparing the trial balance to ensure the arithmatical accuracy of the books of account.
2. The ledger assists us in preparing the Trading, Profit and Loss Account and the Balance Sheet.
3. Amounts due to creditors or due from debtors can be ascertained through ledger.
4. Ledger reduces the possibility of errors, improves the probability of locating errors that do occur.

From the above, it is clear that ledger is the principal book of account but journal entry cannot be avoided for the following reasons :

1. It is a first or primary record in which transactions are analysed before they are posted to ledger.
2. A journal is the record which shows the complete story of a transaction in one entry.
3. It shows all necessary information regarding a transaction. The Ledger Account cannot provide detailed information of a transaction.
4. It provides an explanation of the transaction.
5. It provides a date-wise record of all the transactions.
6. It provides an individual source of quick reference in the future in response to queries.

Subdivisions of Ledger

While the number of transactions relating to a business is small, all the accounts may be maintained in one single ledger. However, after a business has reached a certain size, the number of transactions which require recording will become so large that the operation of one ledger will become both cumbersome and difficult to implement. As a business expands the volume of transactions will require the employment of more than one person to maintain the accounts, and some kind of division of the ledger is needed if both are to be able to work at the same time.

There are no hard and fast rules, but the generally accepted division of ledger is as follows :

1. Sales Ledger / Debtors' Ledger : It contains the personal accounts of all those to whom goods have been sold on credit. The total of the balances on this ledger will give "Sundry Debtors" for the Trial Balance and the Balance Sheet. The accounts concerned are arranged in alphabetical order and the number of accounts involved may require more than one "Sales Ledger" to contain the surnames within 'A — D'; 'E — J'; 'K — P'; and so on.

2. Bought Ledger / Creditors' Ledger : It contains the personal accounts of all those who supplied goods on credit. The total of the balances on this ledger will give "Sundry Creditors" for the Trial Balance and the Balance Sheet. Again, the accounts are arranged in alphabetical order and subdivision 'A — H'; 'I — Z' may be necessary.

3. General Ledger : It contains all the real accounts such as Building, Plant and Machinery, Office Equipments, Furniture and Fixtures and so on.

4. Nominal Ledger : It contains all those accounts which are normally looked upon as expenses (e.g., wages, salaries, rent, rates and taxes, insurance, carriage, discount allowed and so on). Accounts dealing with income (such as commission received, rent received and discount received) are also maintained in this ledger. In the category of nominal accounts we also include purchases, sales, return inwards, return outwards, depreciation, provision for bad debts, etc.

5. Private Ledger : In some cases, accounts of a confidential nature, such as capital or drawings or salaries of senior staff, may be kept in a separate private ledger.

6. Cash Book : It contains two ledger accounts — cash and bank.

It should be noted that some organisations are not maintaining nominal ledger, general ledger and private ledger separately. They are combined in a single 'general ledger'.

Standard Form of Ledger Account

'T' accounts are simplified representation of ledger accounts and is widely used. A 'T' account is divided into two sides, the left hand side represents the debit side and the right hand side represents the credit side. Each side of the ledger has columns of varying sizes for the following :

(a) Date; (b) Particulars; (c) Folio; and (d) Amount.

A specimen 'T' form account is as under :

Dr. **Title of Account** **(Account No ...)** **Cr.**

Date	Particulars	Folio	₹	Date	Particulars	Folio	₹

Running Balance form of Ledger Account

An alternative ruling of a ledger, which is generally adopted by commercial banks and some other business houses, is that the entire ledger is divided into six columns as under :

(a) Date; (b) Particulars; (c) Folio; (d); Dr. Amount; (e) Cr. Amount; and (f) Balance.

The specimen of such ruling is as under :

Bank Account **(Account No ...)**

Date	Particulars	Folio	Dr. Amount	Cr. Amount	Balance
2015			₹	₹	₹
June 1	To Balance b/d		—	—	5,000 (Dr.)
	To Sales		10,000	—	15,000 (Dr.)
5	By Salary		—	4,000	11,000 (Dr.)

The *Date* column shows the date of the transaction, which is not necessarily the same as the date on which entry is made in the account.

The *Particulars* column is used for writing the name of the accounts debited or credited.

The *Folio* column is used to list the page number of the journal in which the transaction is recorded, thus making it possible to trace ledger entries back to their source (a journal).

The *Dr. Amount* column is used for writing the amount of the account debited. Similarly *Cr. Amount* column is used for writing the amount of the account credited.

The *Balance* column is used for writing the new balance each time the account is debited or credited. Thus, the current balance of the account can always be observed at a glance.

Sequence and Numbering of Ledger Accounts

Ledger accounts are generally arranged in some logical manner, such as assets first, followed by liabilities, owner's equity, revenues and expenses. Again among assets, fixed assets are first followed by current assets and so on. The number of accounts required by a business will depend upon its size, the nature of its operations, and the policy of the management. An identification number is assigned to each account in the ledger to facilitate their location. A Chart of Accounts is a list of account titles and account numbers being used by a given business. Its main purpose is to guide those who are engaged in accounting and recording work.

Account Title	Account Number
Fixed Assets (1 — 15)	
Goodwill	01
Land	02
Building	03
Current Assets (16 — 25)	
Stock in trade	16
Sundry Debtors	17
Bills Receivable	18
Cash at bank	19
Liabilities (26 — 50)	
Bills Payable	26

Posting

The process of transferring of the debits and credits from the journal to the ledger accounts is called posting. Each amount entered in the debit column of the journal is posted by entering it on the debit side/column of an account in the ledger, and each amount entered in the credit column of the journal is posted by entering it on the credit side/column of an account in the ledger. Posting from journal to the ledger accounts are necessary in order to know how transactions have changed the account balances.

The Mechanics of Posting

The following procedures are followed for posting :

1. Locate in the ledger the 1st account named in the journal.
2. Enter on the debit side of the ledger in particulars column, the name of the account credited with a prefix ‘To’.
3. Enter the date of the transaction in the date column.
4. Enter in the debit column of the ledger account, the amount of debit as shown in the journal.
5. Enter in the folio column of the ledger, the number of the journal page from which the entry is being posted.
6. Enter in the folio column of the journal, the number of the ledger page in which the posting has been done.
7. Locate in the ledger the second account named in the journal.
8. Enter in the credit side of the ledger in particulars column, the name of the account debited with a prefix ‘By’.
9. Enter the date of the transaction in the date column.
10. Enter in the credit column of the ledger account the amount of credit as shown in the journal.
11. Enter in the folio column of the ledger, the number of the journal page from which the entry is being posted.
12. Enter in the folio column of the journal, the number of the ledger page in which posting has been done.

Balancing Ledger Accounts

Balance is the sum necessary to equalise the debit and credit totals of an account. Periodically, all the accounts in a ledger are balanced to ascertain the cumulative effect of entries on the accounts. The *balance* is an accounting term which means the difference between the two sides of an account, or the total of an account containing only debits and credits. A computerised system will usually print the balance of the account after each transaction, but in a manual system we must calculate the balance.

Where the total of the debit side exceeds the total of the credit side, the account is said to have a *debit balance*.

Where the total of the credit side exceeds the total of the debit side, the account is said to have a *credit balance*. Therefore, balancing is the process of bringing two sets of related figures into agreement.

The following steps are followed for balancing the accounts :

1. On a rough sheet of paper take the total of the two sides of the account concerned.
2. Compute the difference of the total of two sides.
3. If the debit side total is more, put the difference on the credit side amount column, by writing the words in particulars column 'By Balance c/d'. If the credit side total is more, put the difference on the debit side amount column by writing the words in particulars column 'To Balance c/d'.
4. After putting the difference in the appropriate side of the account, add both the sides of the account. Draw a thin line above and below the total.
5. Bring down the debit balance on the debit side by writing the words in particulars column 'To Balance b/d'. Similarly bring down the credit balance on the credit side by writing the words in the particulars column 'By Balance b/d'.

Illustration 10

Pass necessary journal entries and post them in the appropriate Ledger Accounts of P. Basak for the month of January 2015:

1 Started business with ₹ 2,00,000 in the bank and ₹ 40,000 cash;
1 Bought shop fittings ₹ 40,000 and a van ₹ 60,000 both paid by cheque;
2 Paid rent by cheque ₹ 5,000;
3 Bought goods for resale on credit from Zakir & Co ₹ 50,000;
5 Cash sales ₹ 5,000;
8 Paid wages of assistant in cash ₹ 1,000;
10 Paid insurance by cheque ₹ 500;
12 Cash sales ₹ 8,000;
15 Paid wages of assistant in cash ₹ 1,000; Goods returned to Zakir & Co ₹ 6,000;
17 Paid Zakir & Co ₹ 30,000 by cheque;
19 Bought goods for resale on credit from Rao & Co ₹ 25,000;
19 Cash sales ₹ 7,000;
22 Paid wages of assistant in cash ₹ 1,000;
24 Bought stationery, paid in cash ₹ 500;
25 Cash sales ₹ 15,000;
27 Paid Rao & Co ₹ 14,000 by cheque;
29 Paid wages of assistant in cash ₹ 1,000;
31 Paid ₹ 20,000 into the bank.

Illustration 13

The following data is given by Mr. Singh, the owner, with a request to compile only the two personal accounts of Mr. Herbert and Mr. Robert, in his ledger, for the month of April 2015.

1	Mr. Singh owes Mr. Robert ₹ 15,000; Mr. Herbert owes Mr. Singh ₹ 20,000.
4	Mr. Robert sold goods worth ₹ 60,000 @ 10% trade discount to Mr. Singh.
5	Mr. Singh sold to Mr. Herbert goods prices at ₹ 30,000.
17	Record a purchase of ₹ 25,000 net from Robert, which were sold to Herbert at a profit of ₹ 15,000.
18	Mr. Singh rejected 10% of Mr. Robert's goods of 4th April.
19	Mr. Singh issued a cash memo for ₹ 10,000 to Mr. Herbert who came personally for this consignment of goods, urgently needed by him.
22	Mr. Herbert cleared half his total dues to Mr. Singh, enjoying a $^1/_2$% cash discount (of the payment received ₹ 20,000 was by cheque).
26	Robert's total dues (less ₹ 10,000 held back) were cleared by cheque, enjoying a cash discount of ₹ 1,000 on the payment made.
29	Close Herbert's Account to record the fact that all but ₹ 5,000 was cleared by him, by a cheque, because he was declared bankrupt.
30	Balance Robert's Account.

Solution

In the books of Mr. Singh

Dr. **Mr. Herbert Account** **Cr.**

		94,000			94,000
			1.5.2015	By Balance b/d	10,000

Working Notes:

(1) Sale of ₹ 10,000 on 19th April is a cash sales, therefore, it will not be recorded in the Personal Account of Mr. Herbert; and

(2) On 22nd April, Mr. Herbert owes Mr. Singh ₹ 90,000, amount paid by Mr. Herbert $^1/_2$ of ₹ 90,000 less $^1/_2$% discount, i.e. ₹ 45,000 – ₹ 225 = ₹ 44,775. Out of this amount, ₹ 20,000 paid by cheque and the balance of ₹ 24,775 in cash.

The following balances appeared in the books of Jane Seymour on 1st March, 2015 :

		₹
Cash Book (Bank Balance, Debit)		8,500
General Ledger :		
	Sales Account	89,000
	Purchases Account	42,000
	Returns Inward Account	5,000
Sales Ledger :		
	D Jones	4,000
	N Cross	3,000
	P White Limited	2,500

Purchases Ledger :

J Freemen	18,000
Value Supplies Limited	14,000

During the month of March 2015, the following transactions took place :

			₹
1. *Purchases of goods on credit for resale :*			
March	4	Value Supplies Limited	26,000
	20	J Freemen	6,000
2. *Sales on Credit :*			
March	9	D Jones	5,000
	21	N Cross	8,000
3. *Returns Inward :*			
March	15	D Jones	600
4. *Payment received by cheque :*			
March	8	N Cross in full settlement of account at 1st March less 10% discount	2,700
5. *Payment made by cheque :*			
March	3	Value Supplies Limited	14,000

From the above information open the accounts which would appear in Jane's Ledger, and show the Cash Book (Bank Column).

Record the above transactions for the month of March, 2015 (entries in subsidiary books are not required). Balance the accounts as at 31st March, 2015.

Purchases Day Book

All credit purchases of goods are primarily recorded in this book. On receiving the goods and the invoice, the receiving department compare both with the copy of the order placed by the purchase department. If everything is found in order, the goods are sent to the stores. On the basis of the invoice received from the supplier, necessary record is made in the Purchases Day Book.

Specimen of an Inward Invoice:

INVOICE

No- 786/2015
Date : 19th Feb, 2015

M.K. & Co Ltd.
40, Jawaharlal Nehru Road
Calcutta 700016

Customer's Name P.C. Chandra & Sons
P/16 C.I.T. Road
Calcutta 700017

Qty.	Description	Rate	Amount	Total (₹)	Remarks

E. & O. E.

It is clear from the specimen that an invoice contains the following details:

1. Names and addresses of both the parties to the contract of sale.

2. An exact description of the goods, including the quantity, rate and total value of the goods.
3. The terms and conditions of sale (on the overleaf).

E.&O.E. means Errors and Omissions Excepted. The supplier reserves the right to correct any errors in the invoice.

The ruling of the Purchases Day Book is given below :

Purchases Day Book

Date	Particulars	Inward Invoice No.	L.F.	Details ₹	Total ₹

(i) In the 'Date' column, the date on which the invoice is received is entered.
(ii) In the 'Particulars' column, the names of the suppliers are recorded. A brief description of each type of article purchased are also written in this column.
(iii) In the 'Invoice No.' column, the serial number of the Inward Invoice is written.
(iv) In the 'L.F.' column, the page number of creditors' account in the Creditors' Ledger is written.
(v) In the 'Details' column, the value of the goods purchased and amount of trade discount received are written.
(vi) In the 'Total' column, the actual amount payable to the creditors is written.

Illustration 15

From the following particulars given below, write up the Purchases Day Book of M/s Universal Electric Co, which deals in electric goods:

Jan. 5 Purchased on Credit from Bajaj Electric Co.—10 Electric Iron @ ₹ 70 each; 5 Electric Stoves @ ₹ 60 each;
Jan. 19 Purchased on Credit from Capital Electric Co.—30 Electric Heaters @ ₹ 100 each; 20 Electric Kettles @ ₹ 60 each;
Jan. 25 Purchased from Paul Electric Co. on Credit—10 Toasters @ 120 each; 5 Electric Heaters @ ₹ 60 each;
Jan. 30 Purchased from Bombay Electric Stores on Credit—20 Electric Shavers @ ₹ 200 each; 5 Electric Fans @ ₹ 400 each.

Solution

Purchases Day Book

Date	Particulars	Inward Invoice No.	L.F.	Details ₹	Total ₹
Jan. 5	**Bajaj Electric Co.**				
	10 Electric Iron @ ₹ 70 each			700	
	5 Electric Stoves @ ₹ 60 each			300	1,000
Jan. 19	**Capital Electric Co.**				
	30 Electric Heaters @ ₹ 100 each			3,000	
	20 Electric Kettles @ ₹ 60 each			1,200	4,200
Jan. 25	**Pal Electric Co.**				
	10 Toasters @ ₹ 120 each			1,200	
	5 Electric Heaters @ ₹ 60 each			300	1,500
Jan. 30	**Bombay Electric Stores**				
	20 Electric Shavers @ ₹ 200 each			4,000	
	5 Electric Fans @ ₹ 400 each			2,000	6,000
					12,700

These figures are credited to Supplier's Individual Account..

This total of the book is posted periodically to the Debit of Purchases Account.

Trade Discount

Trade Discount is a reduction made in the catalogue price of an article to enable the retailer to earn a profit. Generally, it is recorded in the Purchases Book and Sales Book but it does not enter in the ledger accounts. In the ledger, only net amount of purchase and sale are entered. Observe the following illustration :

Illustration 16

Draw up a properly ruled Purchases Day Book from the following particulars:

Jan. 1 Purchased from Electronic Corporation Ltd. on credit: 50 Black & White T.V. @ ₹ 3,000 each, less 10 % Trade Discount. 10 Colour T.V. @ ₹ 6,000 each, less 10% Trade Discount.

9 Purchased from Pico Electronics Co. Ltd. on credit: 10 Pieces of Taperecorder @ ₹ 1,000 each, less 10% Trade Discount. 10 Pieces of Two-in-one @ ₹ 1,500 each, less 10% Trade Discount.

19 Purchased from Calcutta Gramophone Mart on credit: 100 pieces of Gramophone records @ ₹ 30 each, less Trade Discount @ 5%.

29 Purchased from Bharat Stationers on credit for office use —10 dozen of carbon papers @ ₹ 35 per dozen; 10 dozen of ball pens @ ₹ 25 per dozen.

Solution **Purchases Day Book**

Date	Particulars	Inward Invoice No.	L.F.	Details ₹	Total ₹
Jan. 1	**Electronic Corporation Ltd.**				
	50 Black & White T.V. @ ₹ 3,000 each			1,50,000	
	10 Colour T.V. @ ₹ 6,000 each			60,000	
				2,10,000	
	Less: Trade Discount @ 10%			21,000	1,89,000
Jan. 9	**Pico Electronics Co. Ltd.**				
	10 pieces of Taperecorder @ ₹ 1,000 each			10,000	
	10 pieces of Two-in-one @ ₹ 1,500 each			15,000	
				25,000	
	Less: Trade Discount @ 10%			2,500	22,500
Jan. 19	**Calcutta Gramophone Mart**				
	100 pieces of gramophone records @ ₹ 30 each			3,000	
	Less: Trade Discount @ 5%			150	2,850
					2,14,350

Tutorial Note : It should be noted that credit purchase of stationery will not be recorded in the Purchases Day Book. It is to be recorded in the Journal Proper.

Illustration 17

Record the following transactions in a suitably ruled Purchases Day Book.

Mar. 1 Purchased goods from M/s A. & Co., 20 bales of cotton @ ₹ 1,000 per bale, less trade discount @ 5% and cash discount @ 6%.

Mar. 12 Purchased from Madura Coats 1,500 mtrs of fabrics @ ₹ 2 per mtr, less trade discount @ 10%.

Mar. 25 Purchased from Silk House, 20 bales of silk pcs @ ₹ 3,000 per bale, less trade discount @ 5%.

Mar. 30 Purchased furniture from Bombay Safe for ₹ 5,000.

Solution **Purchases Day Book**

Date	Particulars	Inward Invoice No.	L.F.	Details ₹	Total ₹
March 1	**M/s A & Co.**				
	20 bales of cotton @ ₹ 1,000 per bale			20,000	
	Less: Trade Discount @ 5%			1,000	19,000
March 12	**Madura Coats**				
	1,500 metres of cotton fabrics @ ₹ 2 per metre			3,000	
	Less: Trade Discount @ 10%			300	2,700
March 25	**Silk House**				
	20 bales of silk pieces @ ₹ 3,000 per bale			60,000	
	Less: Trade Discount @ 5%			3,000	57,000
					78,700

Tutorial Note : Purchase of furniture from Bombay Safe will be recorded in the Journal Proper. Similarly, cash discount will be recorded in Cash Book when payment will be made within a specified time.

Posting the Purchases Day Book into the Ledger

After the transactions are entered in the Purchases Day Book, posting those into the ledger involves the following steps:

Step 1 At the end of the day, each entry is posted to the credit side of the appropriate individual account in the Creditors' Ledger, to keep the accounts upto date.

Step 2 At the end of the month, the aggregate of the 'total column' is posted to the General Ledger by passing the following entry :

Purchases Account Dr.
To Sundry Creditors Account (Control Account)

Illustration 18

From the information of illustration 3, show ledger posting.

Sales Day Book

In this book, all credit sales are recorded. It should be remembered that Sales Day Book records only those goods which are sold on credit and the goods in question must be those, which the firm generally deals in.

Procedure for Writing up the Sales Day Book

When goods are sold on credit, an outward invoice is prepared for every credit sale and are checked as to quality, quantity and price of the goods before they are despatched to the customers. The duplicate copy of the invoice remains with the firm and the original copy is sent to the customer. Sales Day Book is written up on the basis of duplicate outward invoice.

Specimen of an Outward Invoice is given below:

INVOICE

No- P-29
Date : 9th June, 2015

F.G. Cable Co. Ltd.
31, Jawaharlal Nehru Road
Calcutta 700016

Customer's Name West Bengal State Electricity Board
Block- CG, Sale Lake
Calcutta - 700091

Qty.	Description	Rate	Amount	Total (₹)	Remarks

E. & O. E.

The invoice contains the following details:

1. The names and addresses of both the parties to the contract.
2. An exact description of the goods, including the quantity, rate and total value of the goods sold.
3. The terms and conditions of sales (on the overleaf).

E. &.O. E. means Errors and Omissions Excepted. The maker reserves the right to correct any error in the invoice.

The ruling of the Sales Day Book is given below :

Sales Day Book

Date	Particulars	Outward Invoice No.	L.F.	Details ₹	Total ₹

1. In the 'Date' column, the date on which the invoice is prepared is entered.
2. In the 'Particulars' column, the names of the customers are recorded. A brief description of each type of article sold is also written in this column.
3. In the 'Outward Invoice No.' column, the serial number of Outward Invoice is written.
4. In the 'L.F.' column, the page number of the Debtors' Account in the Debtors' Ledger is written.
5. In the 'Details' column, the value of the goods sold and amount of trade discount is written.
6. In the 'Total' column, the actual amount receivable from debtors is written.

Illustration 19

From the following transactions write up the Sales Day Book of M/s X & Co. :

Jan. 1 Sold to Premier Traders 100 bags of sugar @ ₹ 650 per bag, less trade discount @ 5%.
Jan. 10 Sold to R & Co. 10 bags of milk powder @ ₹ 500 per bag, less trade discount @ 10%.
Jan. 20 Sold to Tea King (P) Ltd. 10 chests C.T.C. Tea @ ₹ 2,000 per chest, less trade discount @ 10%.
Jan. 29 Sold old office furniture on credit to Modern Furniture for ₹ 2,500.

Solution

Sales Day Book

Date	Particulars	Outward Invoice No.	L.F.	Details ₹	Total ₹
Jan. 1	**Premier Traders**				
	100 bags of sugar @ 650 per bag			65,000	
	Less: Trade Discount @ 5%			3,250	61,750
Jan. 10	**R. & Co.**				
	10 bags of milk powder @ ₹ 500 per bag			5,000	
	Less: Trade Discount @ 10%			500	4,500
Jan. 20	**Tea King (P) Ltd**				
	10 chests of CTC tea @ ₹ 2,000 per chest			20,000	
	Less: Trade Discount @ 10%			2,000	18,000
					84,250

These figures are debited to Customer's Individual Account..

This total of the book is posted periodically to the Credit of Salees Account.

Tutorial Note : Sale of old furniture to be passed through Journal Proper.

Sales Book With Sales Tax Column

Sales Tax is a tax levied at the point of sale. It is based on the selling price of goods or services. It is the duty of the seller to realise sales tax from customers and deposit it to the Government. Sales tax is calculated at a fixed percentage on the net price of the goods, i.e, after trade discount. Generally a separate column is provided in the Sales Day Book for sales tax. Periodically, the total of sales tax column is credited to Sales Tax Account. When actual payment is made to the Government, the Sales Tax Account is debited and Cash/Bank Account is credited and any balance of Sales Tax Account at the end of the year is shown in the Balance Sheet as a liability.

Illustration 20

Enter the following transactions in Sales Day Book :

Apr. 1 Sold to Indian Coffee House 50 chests of coffee @ ₹ 600 per chest, less Trade Discount 5%, Excise Duty to be charged @ 10%.

Apr. 5 Sold to Subodh Bros. 100 kg. of Tea @ ₹ 30 per kg. less 5% Trade Discount. Excise Duty 5% extra.

Apr. 15 Sold to Dhar Bros. 20 bags of milk powder @ ₹ 1,000 per bag, less 2% Trade Discount. Excise Duty @10%.

Apr. 28 Sold to Robin & Co. 10 chests of tea @ ₹ 600 per chest, less 10% Trade Discount. Excise Duty 5% extra.

Sales Tax is charged @ 8% on all sales.

Solution

Sales Day Book

Date	Particulars	Gross Amount	Trade Discount	Excise Duty	Net Price	S.T. 8%	Total Amount
		₹	₹	₹	₹	₹	₹
April 1	**Indian Coffee House** 50 chests of coffee @ ₹ 600 per chest — 5% T.D.; 10% E.D.	30,000	1,500	3,000	31,500	2,520	34,020
April 5	**Subodh Bros.** 100 kg.. of Tea @ ₹ 30 per kg. — 5% T.D.; 5% E.D.	3,000	150	150	3,000	240	3,240

April 28	**Robin & Co.** 10 chests of Tea @ ₹ 600 per chest — 10% T.D.; 5% E.D.	6,000	600	300	5,700	456	6,156
		59,000	2,650	5,450	61,800	4,944	66,744

Tutorial Note: (1) Excise duty is calculated on list price. (2) Sales Tax is calculated on net price.

Posting the Sales Day Book into the Ledger

After the transactions are entered in the Sales Day Book, posting those into the ledger involves the following steps:

Step 1 At the end of the day, each entry is posted to the debit side of the appropriate individual account in the Debtors' Ledger, to keep the accounts upto date.

Step 2 At the end of the month, the total is posted to the General Ledger by passing the following entry:

Sundry Debtors Account (Control Account) Dr.
To Sales Account
To Sales Tax Payable Account

Illustration 21

Enter the following transactions in Sales Day Book and post them into ledger:

May 1 Sold to Allied Radio Stores 5 pieces of Radio @ ₹ 1,000 each, less Trade Discount 5%.

May 8 Sold to J.D. Electronics Co. 5 pieces of Colour T.V. @ 6,000 each, less 5% Trade Discount.

May 20 Sold to Anandamela Stores, 10 pieces of Car-stereo @ ₹ 900 each, less 5% Trade Discount.

All sales are subject to 10% Sales Tax.

Purchases Returns Book

It may be necessary to return some goods that the firm has bought on credit for a variety of reasons such as defective or excess quantity of goods supplied, etc. All returns of goods are recorded primarily in the Purchases Returns Book.

When a firm returns some goods to its supplier, it prepares a 'Debit Note' and sends it along with the goods returned. The supplier, in turn, will prepare a 'Credit Note'. The original copy of the credit note will be sent to the firm. Entries in the Purchases Returns Book are made on the basis of original 'Credit Note' received from the supplier. On receipt, all credit notes should be numbered consecutively and should be filed properly for future reference. Purchases Returns Book is prepared in the same way as Purchases Day Book, except that it should, in addition, include a brief description of the reason for the return in the remarks column.

The specimen of the Purchases Returns Book is given below :

Purchases Returns Book

Date	Particulars	Credit Note No.	L.F.	₹	Remarks

Posting the Purchases Returns into the Ledger

After transactions are entered in the Purchases Returns Book, Posting to the ledger involves the following steps:

Step 1 At the end of the day, each entry is posted to the debit side of the appropriate individual account in the Creditors' Ledger, to keep the accounts upto date.

Step 2 At the end of the month, the total of the amount column is posted to the General Ledger passing the following entry:

Sundry Creditors Account (Control Account) Dr.
To Purchases Returns Account

Debit Note

It is a commercial document notifying a person that a debit has been made to his accounts. For example, if the goods are sold on credit and a part of that is returned, a debit note might be issued for the value of the goods returned.

Credit Note

It is a document evidencing that a credit entry has been made to a debtors' account. For example, if a customer returns a part of the goods previously sold on credit, or credit rate may be issued.

Illustration 22

From the following information, write up a Purchases Returns Book of M/s. Agarwal & Sons and post them into Ledger:

May 1 Returned to Uptron Television Co. Ltd. 4 colour T.V. @ ₹ 6,000 each.
May 15 Returned to Philips (India) Ltd. 2 pieces of Two-in-one @ ₹ 2,500 each.
May 19 Returned to Bajaj Electricals Ltd. 2 pieces of Electric heater @ ₹100 each.
May 29 Returned to BPL-India Ltd. 3 pieces of VCR @ ₹ 10,000 each.

Sales Returns Book

Goods may be returned by the customers for a variety of reasons such as wrong quantity and/or quality. All goods returned by the customers are primaily recorded in this book.

When goods are returned by the customer, a 'Credit Note' is made out in his name. A Credit Note is prepared in duplicate. The original being sent to the customer for his information and record. The duplicate is preserved in the file for future reference. Duplicate credit note provides information for recording in the Sales Returns Book.

The specimen ruling of the Sales Returns Book is given below :

Sales Returns Book

Date	Particulars	Credit Note No.	L.F.	₹	Remarks

Like Purchases Returns Book, Sales Returns Book is also prepared in the same way as Sales Day Book except that it should, in addition, include a brief description of the reasons for the retum in the remarks column.

Posting the Sales Returns into the Ledger

After transactions are entered in the Sales Returns Book, posting to the ledger involves the following steps:

Step 1 At the end of the day, each entry is posted to the credit side of the appropriate individual account in the Debtors' Ledger, to keep the accounts upto date.

Step 2 At the end of the month, the total of the amount column is posted into the General Ledger, by passing the following entry:

Sales Return Account (Control Account) Dr.
To Sundry Debtors Account

Illustration 23

From the following information, write-up a Sales Returns Book of Allied Electronics Co. Ltd. and post them into ledger:

Apr 1 Returned by Sur-O-Bani 4 pieces of Philips radio costing ₹ 1,500 each.
Apr 9 Returned by Capital Electronics 3 pieces of VCP costing ₹ 9,000 each.

Journal Proper or General Journal

Journal Proper is used for making the original record of those transactions, because of their importance or rareness of occurrence which do not find a place in any of the aforesaid books of original entry.

Entries recorded in the Journal Proper may be classified as follows:

(1) Opening entries; (2) Closing entries; (3) Transfer entries; (4) Rectification of Errors entries; (5) Adjusting entries; (6) Credit purchase of assets; (7) Credit sale of worn-out or obsolete assets; (8) Credit purchase of stationery. The specimen ruling of the Journal Proper is given below :

Journal Proper **Dr.** **Cr.**

Date	Particulars	L.F.	₹	₹
(1)	(2)	(3)	(4)	(5)

(1) Date—This column records the date of transaction.
(2) Particulars—This column records the name of the accounts debited or credited. The account debited is written first, adjacent to the line of date and the account credited is written below with the prefix 'To'. In this column, the narration is also recorded.
(3) L.F.—This column records the page number of ledger in which this account has been posted.
(4) Dr. column—It records the debit amount.
(5) Cr. column—It records the credit amount.

1. Opening Entries

Opening entries are used at the beginning of the financial year to open the books by recording the assets, liabilities and capital, appearing in the Balance Sheet of the previous year. The rule to be applied is :

Assets Account Dr.
  To Liabilities Account
  To Capital Account

Illustration 24

Balance Sheet of A. B. & Co. as at 31st December, 2014

Liabilities	₹	Assets	₹
Capital	1,50,000	Land and Building	80,000
Sundry Creditors	30,000	Plant and Machinery	30,000
Outstanding Salaries	20,000	Furniture	20,000
		Stock-in-trade	20,000
		Cash in hand	20,000
		Cash at bank	30,000
	2,00,000		2,00,000

You are required to pass Opening entry.

Solution **Journal Proper** **Dr.** **Cr.**

Date	Particulars		L.F.	₹	₹
2015 Jan.1	Land and Building A/c	Dr.		80,000	
	Plant and Machinery A/c	Dr.		30,000	
	Furniture A/c	Dr.		20,000	
	Stock-in-trade A/c	Dr.		20,000	
	Cash at bank A/c	Dr.		30,000	

	Cash in hand A/c Dr. To Sundry Creditors A/c To Outstanding Salaries A/c To Capital A/c (Being last year's balances brought forward)		20,000	 30,000 20,000 1,50,000

(It may, however, be mentioned that some accountants do not pass this opening entry but bring forward balances from preceding year directly to the ledger of the new financial year.)

2. Closing Entries

Closing entries are used at the end of accounting year for closing off accounts relating to expenses and revenues. These accounts are closed off by transferring their balances to the Trading and Profit and Loss Accounts. Since records must not be made in the ledger without journal entries, closing entries are passed in the Journal Proper first and then posted to the ledger. For example: let there be a debit balance in the purchase account of ₹ 75,000 at the end of the accounting year 2014. Now at the time of preparation of Final Accounts we will have to close off the Purchases Account as follows:

Journal Proper (Closing Entry) **Dr.** **Cr.**

Date	Particulars	L.F.	₹	₹
2014 Dec.31	Trading A/c Dr. To Purchases A/c (Being transfer of Purchases Account to Trading Account for determining gross profit)		75,000	 75,000

Dr. **Purchases Account (After Closure)** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
Jan. to Dec.	To Sundry Creditors A/c	75,000	Dec. 31, 2014	By Trading A/c	75,000

Dr. **Trading Account for the year ended 31st December, 2014** **Cr.**

To Purchases	75,000		

Illustration 25

At the end of his financial year, December 31, 2014, a trader's books show the following balances in the Nominal Accounts:

Purchases ₹ 10,050; Sales ₹ 15,668; Selling expenses ₹ 1,644; Returns Outwards ₹ 233; Returns Inwards ₹ 355; Establishment expenses ₹ 878; Discounts (Cr) ₹ 109; Discounts (Dr) ₹ 87; Office Expenses ₹ 1,448.

Besides, the Closing Stock Account in the Stock Ledger shows a balance of ₹ 644; but the actual year-end stock on counting was valued at ₹ 499. Draft the closing Journal entries relating to the compilation of Trading and Profit and Loss Accounts.

Solution **Journal Proper** **Dr.** **Cr.**

Date	Particulars	L.F.	₹	₹
2014 Dec. 31	Trading A/c Dr. To Purchases A/c To Returns Inwards A/c (Being transferred to Trading Account to determine gross profit)		10,405	 10,050 355
	Sales A/c Dr. Returns Outwards A/c Dr. Closing Stock A/c Dr. To Trading A/c (Being transferred to Trading Account to determine gross profit)		15,668 233 499	 16,400
	Trading A/c Dr. To Profit & Loss A/c (Being gross profit transferred to Profit and Loss Account)		5,995	 5,995
	Profit & Loss A/c Dr. To Selling Expenses A/c To Establishment Expenses A/c To Discount Allowed A/c To Office Expenses A/c (Being transferred to Profit and Loss Account for determining net profit)		4,057	 1,644 878 87 1,448
	Discount Received A/c Dr. To Profit & Loss A/c (Being transferred to Profit and Loss Account for determining net profit)		109	 109
	Profit & Loss A/c Dr. To Capital A/c (Being net profit transferred to Capital Account)		2,047	 2,047

3. Transfer Entries

Transfer entries are passed in the Journal Proper for transferring an item, entered in one account, to another account. For example, let ₹ 20,000 to be transferred to general reserve out of profit for the year ended on 31st December 2014; the entry should be passed through Journal Proper.

Journal Proper **Dr.** **Cr.**

Date	Particulars	L.F.	₹	₹
2014 Dec.31	Profit & Loss A/c Dr. To General Reserve A/c (Being the amount transferred to General Reserve)		20,000	20,000

4. Rectification Entries

Mistake which has been made in passing an entry should be corrected by passing another entry in the Journal Proper and the practice of erasures should not be tolerated. *[For details see Chapter, 'Rectification of Errors'.]*

5. Adjustment Entries

Adjustment entry is an amendment to an accounting figure which is basically correct but which needs to allow for some circumstances not recorded in the bookkeeping system. Adjustment in accounts are very common. In an accrual system of accounting, adjustment entries are made to the Trial Balance at Balance Sheet date in provisions and reserves, prepaid and outstanding expenses; and, income received in advance and accrued income. Adjustment entries are passed before they are transferred to the Trading and Profit and Loss Account and Balance Sheet. This is because, adjustment entries always have a dual effect. They affect either the Trading Account or the Profit and Loss Account but definitely the Balance Sheet.

Illustration 26

For each of the following transactions, show Adjustment Entries for the purpose of preparing Final Accounts:

(i) Outstanding rent ₹ 4,500
(ii) Salary due to an employee but not received by him ₹ 1,500
(iii) Insurance premium paid in advance ₹ 1,200
(iv) Rent paid to landlord in advance ₹ 1,200
(v) Closing stock valued at ₹ 3,900
(vi) Interest due on loan but not paid. Loan of ₹ 15,000 was taken at 9% p.a., 9 months before the end of the year.

Solution **Journal Proper** **Dr.** **Cr.**

Date	Particulars	L F	₹	₹
(i)	Rent A/c Dr. To Outstanding Rent A/c (Being the adjustment of outstanding rent)		4,500	4,500
(ii)	Salaries A/c Dr. To Outstanding Salaries A/c (Being the adjustment for salaries due but not paid)		1,500	1,500
(iii)	Prepaid Insurance A/c Dr. To Insurance Premium A/c (Being the adjustment of insurance premium paid in advance)		1,200	1,200
(iv)	Rent Paid in Advance A/c Dr. To Rent A/c (Being the adjustment of rent paid in advance)		1,200	1,200
(v)	Closing Stock A/c (Note 1) Dr. To Purchases A/c (Being the adjustment of closing stock)		3,900	3,900
	Alternatively, Closing Stock A/c Dr. To Trading A/c (Being the adjustment of closing stock)		3,900	3,900
(vI)	Interest on Loan A/c (Note 2) Dr. To Outstanding Interest A/c (Being the adjustment of outstanding interest for 9 months @ 9% p.a. on ₹ 15,000)		1,013	1,013

Working Notes :

(1) Closing stock represents a part of purchased goods not yet sold. Therefore, for adjustment, Purchases Account will be credited and closing stock Account will be debited.
Alternatively, closing stock can be debited and Trading Account can be credited.

(2) Interest on loan = ₹ 15,000 x 9/100 x 9 / 12 = ₹ 1,012.50 or ₹ 1,013 (rounded off).

Illustration 27

How would you deal with the following in accounting of a going concern ?

(i) Rent amounting to ₹ 5,000 paid in advance for the next financial year and the total rent paid ₹ 20,000.

(ii) Outstanding wages for the current year amounted to ₹ 15,000.

(iii) ₹ 2,000 is due from Sri Basu, a debtor, is unrealisable from him.

Pass Journal Entries and show Profit and Loss Account relating to the entries stated above.

Solution **Journal Proper** **Dr.** **Cr.**

Date	Particulars	L F	₹	₹
(i)	Rent Paid in Advance A/c Dr.		5,000	
	To Rent A/c			5,000
	(Being the adjustment of rent paid in advance)			
(ii)	Wages A/c Dr.		15,000	
	To Outstanding Wages A/c			15,000
	(Being the adjustment of wages due but not paid)			
(iii)	Bad Debts A/c Dr.		2,000	
	To Debtors A/c			2,000
	(Being the amount unrealisable from Sri Basu written off as bad debt)			

Dr. **Profit and Loss Account (includes . . .)** **Cr.**

Particulars	₹	Particulars	₹
To Rent A/c (Note 1)	15,000		
To Bad Debts A/c	2,000		

Working Note :

(1) Total rent paid ₹ 20,000, out of which ₹ 5,000 paid as advance rent.
Therefore, only ₹ 15,000 (₹ 20,000 – ₹ 5,000) will be debited to Profit and Loss Account.

Illustration 28

Before you prepare Final Accounts for the year ended 31st March 2015 pass necessary Journal entries in respect of the following: (i) Commission earned but not received ₹ 1,200; (ii) Closing stock as at 31st March, 2015 ₹ 20,000; (iii) To carry forward one-fifth of an Insurance Premium paid at ₹ 2,780; (iv) Unpaid salary for ₹ 340 is to be provided for in the accounts; (v) Commission due to manager @ 6% on net profit after charging such commission. The profit before charging such Commission was ₹ 26,500.

Solution **Journal Proper** **Dr.** **Cr.**

Date	Particulars	L.F.	₹	₹
2015	Accrued Commission A/c Dr.		1,200	
March 31	To Commission Received A/c			1,200
	(Being commission earned but not yet received, now adjusted)			
	Closing Stock A/c Dr.		20,000	
	To Trading A/c			20,000
	(Being closing stock transferred to Trading A/c)			
	Prepaid Insurance Premium A/c Dr.		556	
	To Insurance Premium A/c			556
	(Being 1/5th of insurance premium c/f to next period)			
	Salary A/c Dr.		340	
	To Outstanding Salary A/c			340
	(Being outstanding salary provided)			
	Commission A/c Dr.		1,500	
	To Commission Payable to Manager A/c			1,500
	(Being commission payable to manager @ 6% on net profit after charging such commission)			

6. Purchases of Assets on Credit

When assets are purchased on credit, these are originally recorded in Journal Proper by passing the following entry:

Assets Account Dr.

To Creditors for Assets Account

7. Sale of Worn-out or Obsolete Assets (on Credit)

When obsolete assets are sold on credit, these are originally recorded in Journal Proper. The entries will depend upon the Book Value of the old assets and the actual price realised at the time of sale of such assets.

Example : On 29th May, 2015 B. Ltd. sold a machine valued on the book at ₹ 20,000 to Ideal Machinery Co. Pass necessary journal entry when the machine was sold for ₹ 15,000.

Journal Proper of B. Limited **Dr.** **Cr.**

Date	Particulars		L.F.	₹	₹
20010 May 29	Ideal Machinery Co. A/c	Dr.		15,000	
	Loss on Sale of Machinery A/c	Dr.		5,000	
	To Machinery A/c				20,000
	(Being obsolete machine was sold for ₹ 15,000)				

8. Purchase of Stationery (Credit)

When stationeries are purchased on credit, these are originally recorded in Journal Proper by passing the following entry :

Stationery Account Dr.

To Creditors for Stationery Account

Key Points

- Accounting Cycle refers to the sequence of accounting procedures used to record, classify and summarise the business transactions. It begins with the identification of business transactions and ends with the reverse entries for prepaid and outstanding expenses.
- Source documents are basically external documents or documents relating to external activities, which are the first input to the accounting system.
- An invoice relates to a sales order or a purchase order. When a business sells goods or services on credit to a customer, it sends out an invoice. It shows the goods sold, with descriptions, quantities, prices and trade discounts. The details in the invoice should match with the details on the sales order. It may include additional charges — for insurance, carriage and container. It also shows the total amount due from the customer.
- When goods are returned by the customers, a document is prepared called "credit note" and sent it to customer to intimate him that his account has been credited.
- The voucher is a document which provides the authorisation to pay and specifies the accounts to be debited and credited.
- A transaction is a particular type of external event, which can be expressed in terms of money and brings change in the financial position of a business unit. A transaction involves transfer of something of value between two or more entities.
- Event is an occurrence, happening, change or incident, which may or may not bring any change in the financial position of a business unit.
- A journal entry is an analysis of the effects of a transaction on the accounts, usually accompanied by an explanation (properly called as a narration).
- The ledger is the principal book of accounts where similar transactions relating to a particular person or thing are recorded.

THEORETICAL QUESTIONS

1. What do you mean by accounting cycle ?
2. What is a voucher ? What are the features of a voucher ? How a voucher is prepared ?
3. What do you mean by source document ? Give examples.
4. What do you understand by an account? Explain the nature of different kinds of accounts.
5. Explain the rules for debit and credit. Give a suitable example for each type of account.

6. Define the term Journal and explain its present day use.
7. Define ledger. Give its ruling and explain its utility in accountancy.
8. Distinguish between Journal and Ledger.
9. 'Ledger is the principal book of accounts in a business'. Do you agree with this statement ? Give reasons.
10. How are Ledger Accounts balanced ? Explain clearly.
11. What are the books of original entry? Explain their utilities.
12. Explain the nature of use of the following books of original entry:
    (i) Purchases Day Book;
    (ii) Sales Day Book;
    (iii) Journal Proper; and
    (iv) Sales Returns Book.
13. In which Book of Original Entry, will you record each of the following transactions ?
    (i) An allowance of ₹ 50 was offered for an early payment of cash of ₹ 1,050.
    (ii) A second hand motor car was purchased on credit, from Ross Bros. for ₹ 10,000.
    (iii) Goods, the payment of which is due after 2 months, were sold to M/s Bell & Co. for ₹ 1,000.
    (iv) Accounting for the partial recovery from Mr C, of an amount of ₹ 2,000 earlier written off as bad debt.
    (v) Credit purchase of stationery worth ₹ 5,000, by a stationery dealer from Mr Dubey.
    (vi) Rectifying the error of a credit purchase of goods worth ₹ 10,000 recorded as a credit sale to Mr Lily, discovered two months later.
    (vii) A cheque of ₹ 1,000, which was received from a debtor in full settlement for a claim of ₹ 1,100, is dishonoured.

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each sentence or answer each question below.

1. The first book in which the transactions of a business unit are recorded is called
   A a journal
   B a ledger
   C a trial balance
   D none of the above
2. Journal records all transactions in
   A alphabetical order
   B random manner
   C chronological order
   D none of the above
3. Journal is a
   A memorandum record
   B primary record
   C secondary record
   D none of the above
4. A journal records
   A only debit part of a transaction
   B only credit part of a transaction
   C both debit part and credit part of a transaction without narration
   D both debit part and credit part of a transaction with narration
5. In its usual form, a journal is divided by vertical lines into five columns in the following order
   A (i) Date; (ii) Ledger Folio; (iii) Particulars; (iv) Debit Amount; (v) Credit Amount
   B (i) Date; (ii) Particulars; (iii) Journal Folio; (iv) Debit Amount; (v) Credit Amount.
   C (i) Date; (ii) Particulars; (iii) Ledger Folio; (iv) Credit Amount; (v) Debit Amount
   D (i) Date; (ii) Particulars; (iii) Ledger Folio; (iv) Debit Amount; (v) Credit Amount
6. Compound journal entry contains
   A more than one debit entry only
   B more than one credit entry only
   C more than one debit entry or more than one credit entry or both
   D no narration

7. How is the distribution of goods as free samples recorded in the journal ?

	Debit	*Credit*
A	Trading Account	Sales Account
B	Advertisement Account	Profit and Loss Account
C	Advertisement Account	Purchases Account
D	Purchases Account	Advertisement Account

8. Cash sale of old asset (without profit or loss) is recorded in the journal by passing the following entry

	Debit	*Credit*
A	Cash Account	Sales Account
B	Buyer's Account	Asset Account
C	Assets Account	Cash Account
D	Cash Account	Asset Account

9. How is bad debt recovered recorded in the journal ?

	Debit	*Credit*
A	Bad Debt Account	Cash Account
B	Bad Debt Account	Bad Debt Recovery Account
C	Cash Account	Bad Debt Recovery Account
D	Bad Debt Recovery Account	Cash Account

10. A debit entry in the Purchases Account is matched by a credit entry in ITC Ltd Account. What do these entries record?
    A Purchase of goods for cash from ITC Ltd.
    B Purchase of goods on credit from ITC Ltd.
    C Purchase Return to ITC Ltd.

PRACTICAL QUESTION

Transaction

1. State which of the following events may be recorded as a transaction in the books of Sri Agarwal, a trader. Give reasons.
   (a) Agarwal sent a price list of his merchandise to Biswarup, a trader.
   (b) He received an order for supply of goods worth ₹ 1,000 from Biswarup.
   (c) He delivered on credit goods for ₹ 1,000 to Biswarup.
   (d) He despatched a letter of appointment to Chittarup appointing him as a book-keeper on a monthly salary of ₹ 2,000.
   (e) Out of goods supplied to Biswarup those for ₹ 100 were returned.
   (f) His book-keeper, Chittarup left the service after defalcating ₹ 500 from the cash box.
2. State whether the following are transactions :
   (a) Purchased machinery worth ₹ 70,000.
   (b) Appointed Sandeep as accountant.
   (c) Furniture has been depreciated by ₹ 1,000.
   (d) Paid rent ₹ 6,000.
   (e) Rent paid for the month of April ₹ 10,000.
   (f) Decided to purchase shares of ITC Ltd.
   (g) Sold old newspapers for ₹ 200.
   (h) Sold a machinery for ₹ 4,000 on credit to Sri Raja Roy.
   (i) Goods lost by fire ₹ 10,000.
   (j) Submitted a tender for a work of ₹ 10,000.
   (k) Received an order for supply of goods to Roy & Co. ₹ 25,000.
   (l) Took a loan from Swapan ₹ 10,000.
   (m) Deposited cash into bank ₹ 2,000.
   (n) Supplied goods to Dutta Bros. ₹ 5,000 as per their order.
   (o) Distributed free samples ₹ 4,000.
   (p) Received free samples ₹ 2,000.
   (q) Appointed Subhas as Manager in the scale of ₹ 5,000 – 200 – 8,000.
   (r) Sent a fax message to a supplier.
3. State whether the following are cash or credit transactions :
   (a) Paid salary ₹ 1,000.
   (b) Received from X ₹ 2,600.

(c) Paid rent ₹ 500.
(d) Paid electric bill ₹ 750.
(e) Sold goods to Y ₹ 4,000.
(f) Paid rent by cheque for ₹ 1,000.
(g) Dividend accrued ₹ 700.
(h) Purchased goods from Mukherjee Bros. for ₹ 1,000.
(i) Bought an almirah from Raj & Raj for ₹ 2,000.
(j) Purchased goods for ₹ 2,800 from Uma Sankar in cash.
(k) Paid Salary ₹ 18,000.
(l) Purchased a furniture for ₹ 3,000 from Furniture House in cash.
(m) Purchased books from Banerjee & Co. for ₹ 1,000.
(n) Sold goods to Ruma for ₹ 5,000.
(o) Received from Poddar a loan of ₹ 2,000.

4. State with reasons whether the following transactions are cash transactions or credit transactions:
(a) Started business with cash ₹ 20,000.
(b) Purchased goods from Bhuban for ₹ 3,000 in cash.
(c) Purchased goods from Rajat for ₹ 1,000.
(d) Sold goods to Arif for ₹ 6,000.
(e) Paid salaries ₹ 3,000.
(f) Purchased stationery for ₹ 100 from Tuhin.
(g) Purchased an almirah for ₹ 4,000 from Indra.
(h) Electric bill due ₹ 900.
(i) Purchased a machine from Raja for ₹ 20,000.
(j) Outstanding wages ₹ 1,000.
(k) Paid electric bill for ₹ 1,440.
(l) Received a cheque of ₹ 1,000 from Balrampur Chini Ltd. for dividend.
(m) Purchased goods worth ₹ 2,400 from Ghosh on credit.
(n) Received a cheque amounting to ₹ 5,000 from Robin.
(o) Cheque deposited into Bank on the following day.
(p) Sold old newspapers to Tuhin Kumar for ₹ 850.

5. State whether the following are cash or credit transactions :
(1) Sold goods for cash ₹ 10,000.
(2) Sold goods to Ram for cash ₹ 15,000.
(3) Sold goods to Shyam ₹ 2,000.
(4) Paid salary by cheque ₹ 12,000.
(5) Purchased office equipments from Raj & Raj ₹ 30,000.
(6) Purchased a plant from L&T Ltd. ₹ 1,00,000.
(7) Sold an old plant to GEC Ltd. ₹ 20,000.
(8) Paid for advertisement in cash ₹ 10,000.
(9) Sold shares of LML Ltd. to Rajan ₹ 6,000 for cash.
(10) Purchased shares of ITC Ltd. from Sajjan ₹ 14,000 in cash.

Classification of Accounts

6. Classify the following into Real, Nominal, Personal and Valuation Accounts:
(1) Land; (2) Investments; (3) Building; (4) Interest Received; (5) Salary; (6) Excise Duty; (7) Bank Overdraft; (8) Debtors; (9) Creditors; (10) Purchases Returns; (11) Provision for Doubtfu l Debts; (12) Discount allowed; (13) Bad debts; (14) Carriage inward; (15) Customs duty; (16) Return inward; (17) Return outward; (18) Postage; (19) Maintenance; (20) Insurance premium; (21) Repairs; (22) Commission; (23) Bad debts recovery; (24) Bills receivable; (25) Bills payable; (26) Drawings; (27) Capital; (28) Prepaid insurance; (29) Outstanding salary; (30) Leasehold premises; (31) Freehold premises; (32) Motor vehicles; (33) Horses and carts; (34) Commission received in advance; (35) Reserves; (36) Purchases; (37) Sales; (38) Stock; (39) Depreciation; (40) Freight; (41) Wages; (42) Goodwill; (43) Patents; (44) Technical knowhow; (45) Royalty; (46) Subscription; (47) Stock of stationery; (48) Stationery consumed; (49) 10% Govt. Bonds; (50) Miscellaneous expenses.

7. Classify the following into assets, liability, capital, withdrawal, revenue, expense.
(1) Plant and machinery; (2) Bank loan; (3) Sales; (4) Rent; (5) Discount received; (6) Carriage inwards; (7) Carriage outwards; (8) Purchases; (9) Interest paid on bank loan; (10) Capital; (11) Drawings; (12) Wages; (13) Cash in hand; (14) Goodwill; (15) Patents; (16) Vehicles; (17) Returns; (18) Furniture and fixture; (19) Freehold

premises; (20) Leasehold premises; (21) Investments; (22) Govt. security; (23) Stock of goods; (24) Outstanding expenses; (25) Prepaid expenses; (26) Advance incomes; (27) Accrued incomes; (28) Bills payable; (29) Bills receivable; (30) Commission paid.

8. From the following transactions find out the nature of account and also state which account should be debited and which account should be credited : (a) Rent paid; (b) Salaries paid; (c) Received from Suresh the proprietor; (d) Furniture purchased on credit from Gopal; (e) Purchased goods on credit from Ramesh.

9. For transactions given below one of the accounts involved is given. State the other account and state whether the account mentioned by you will be debited or credited.

(a)	Started business with a capital of ₹ 30,000.	Cash
(b)	Bought furniture from Modern Furniture Stores ₹ 1,000.	Furniture
(c)	Bought goods from Deepak & Sons ₹ 9,000.	Purchases
(d)	Sold goods to Dalip Singh ₹ 10,000.	Sales
(e)	Cash sales ₹ 5,000.	Sales
(f)	Sold to Bombay Stores for cash ₹ 3,000.	Sales
(g)	Returned goods to Deepak & Sons ₹ 2,000.	Deepak & Sons
(h)	Opened a bank account with ₹ 10,000.	Bank

JOURNAL AND LEDGER

10. Journalise the following transactions :

2015			₹
April	2	Cash deposited into bank	20,000
	5	Withdrawn from bank for personal use	6,000
	12	Cash paid to Rahim	2,000
	14	Cash received from Ranabir	6,000
	15	Purchased furniture on credit from Roy Traders	11,000
	25	Paid Salary to Jivan	2,000
	27	Received interest on bank deposit	500
	28	Loan arranged from Basak	12,000
	30	Paid for Carriage	1,000

11. Pass Journal entries for the following transactions in the books of A :

2015			₹
January	1	Started business with cash	5,000
	2	Purchased furniture in cash	500
	3	Opened a bank Account	1,000
	4	Goods purchased in cash	2,000
	5	Goods sold in cash	1,500
	8	Goods purchased on credit from Roy	3,000
	10	Paid Salary	800
	15	Paid rent by cheque	500
	18	Goods sold on Credit to Bose	1,800
	20	Cash paid to Roy	2,500
	21	Cash collected from Bose	1,500
	25	Cash deposited into Bank	1,600
	28	Cash drawn for household purposes	500
	30	Cheque drawn for office purposes	1,000

12. On 1st January, 2015, Prasanna started a business with a capital of ₹ 10,000 in cash and ₹ 5,000 in stock. His transactions during the month were as follows. Journalise the following transactions:

2015			₹
January	1	Bought goods from Raja	1,500
	2	Purchased furniture in cash from Billu	1,200
	4	Purchased office equipments	425
	9	Sold goods to Bikash	1,560
	12	Sold goods to Samir in cash	925
	15	Paid to Jolly as advance	90
	21	Sold goods to Suresh in cash	430
	22	Bought office furniture from Radha in cash	800

13. Write up the following transactions in the ledger of Mr J Reddy for the month of July, 2015.
    1. Started business with ₹ 80,000 in bank and ₹ 30,000 in cash.
    2. Paid rent by cheque ₹ 3,000; Bought goods on credit from : Barnali Sengupta & Co ₹ 15,000;
    3. Sold goods for cash ₹ 3,000 and on credit to P Sengupta & Co ₹ 5,000;
    4. Paid insurance by cheque ₹ 250 and bought stationery for ₹ 100 in cash;
    5. Paid wages in cash ₹ 500; sold goods for cash ₹ 700;
    8. Paid cash into bank ₹ 1,000 and returned goods to Barnali Sengupta & Co ₹ 3,000;
    9. Paid by cheque to Barnali Sengupta & Co. ₹ 10,000;
    11. Sold goods on credit to G Basu ₹ 8,000;
    12. Paid wages in cash ₹ 500 and sold goods for cash ₹ 2,000;
    15. Cash paid into bank ₹ 1,500; goods returned by P Sengupta & Co ₹ 1,000; bought shop furniture, paid by cheque ₹ 500;
    17. Cheque received from P Sengupta & Co ₹ 4,000;
    19. Paid wages in cash ₹ 500 and cash sales ₹ 2,000;
    21. Bought goods on credit from Barnali Sengupta & Co ₹ 6,000;
    22. Goods sold for cash ₹ 5,000 and on credit to P Sengupta & Co ₹ 10,000;
    26. Cash paid into bank ₹ 4,000 and bought postage stamps for ₹ 50;
    27. Paid telephone bill ₹ 500 and electricity ₹ 400 by cheque;
    30. Paid wages in cash ₹ 500.
14. On 1.1.2015, Sri Pranab Chatterjee commenced a business with a Capital of ₹ 30,000. His transactions for the month of January, 2015 were as under :

			₹
January	1	Bought goods for cash	1,000
	2	Purchased furniture for cash	300
		Purchased a small machine for cash	2,500
		Purchased goods from Naresh	1,800
	3	Goods sold for cash	6,000
	4	Sold goods on credit to Sohan	1,400
	5	Goods purchased from Mohan	700
	6	Goods sold to Krishna Kant	2,000
	7	Paid to Naresh on account	600
	8	Returned goods to Mohan	50
	9	Goods returned by Sohan	80
	10	Received from Krishna Kant	1,970
		and Discount allowed	30
	11	Paid to Naresh	1,175
		Discount allowed by him	25
	15	Sold goods to M.K.Mahajan	1,500
	18	Gave away as charity — in cash	210
		in goods	130
	25	Purchased a Plant	10,000
	27	Paid Sundry Expenses	125
	28	Received from M.K.Mahajan	1,460
		and Discount allowed	40
	29	Sohan paid on account	300
	31	Salaries paid	250
		Rent paid	100
		Withdrawn by the proprietor for personal use	400
		Received interest	310

Journalise the above transactions in the books of Sri Pranab Chatterjee.

15. Enter the following transactions in the four subsidiary books for the month of October, 2014 required for the proprietor Mr Raj. (Note – all the details are required in columnar form and narrations should not be written). Thereafter, complete the monthly totalling of the books.

1 Mr A sold goods worth ₹ 50,000 @ 10% discount.
3. Mr Otter bought of Mr Raj, four cases of goods, each valued at ₹ 7,000, less 3,000 trade discount.
6 Mr Sam supplied goods valued ₹ 25,000 as per invoice prepared.
18 Mr Raj bought from Mr Taj, four cases each costing ₹ 10,000, ₹ 5,000, ₹ 6,500 and ₹ 7,400 respectively.
24 One case sold earlier, was rejected by Mr Otter.
24 Twenty percent of the consignment of the 10th of October, was ejected for the wrong size.

8 Ten percent of the goods of Mr A were rejected.

10 Record invoice for ₹ 30,000 less ₹ 3,000, received from Mr Andrews.

15 Goods bought of Sam were despatched to Mr Amour at 50% above cost.

25 Recorded a Debit Note for ₹ 2,000 and a Credit Note for ₹ 4,000 issued to Mr Hardy and Mr Jack respectively.

30 Despatched a consignment worth ₹ 65,000 to Mr Sail and sent the invoice (clearly specifying the credit period of one month), by Registered Post.

30 Recorded a Sales Return for ₹ 1,400 from Ratan, against a sale order of ₹ 45,000 executed last month.

16. Mr J Hines is a wholesale grocer. Some of the transactions recorded in his book during May, 2015 :

May 1 Credit sales to N Brooks : 1 doz. cases of soup @ ₹ 100 per case; 1 doz. cases of baked beans @ ₹ 90 percase; 1 doz. cases of salad cream @ ₹ 25 per case;
May 5 N Brooks returned half doz. cases of soup @ ₹ 100 per case. A Credit Note was sent.
May 14 Credit sales to J Beagley : Half doz. cases of baked beans @ ₹ 90 per case.
May 21 Credit sales to G Boothroyd : 2 doz. cases of tomato ketchup @ ₹ 160 per case.
May 23 G Boothroyd returned 1 case of tomato ketchup as damaged. A Credit Note was sent.

During May, the customers of J Hines made to him the following payments by cheque :

May 14 N Brooks settled the balance owing on his account, less 2.5% cash discount.
May 31 G Boothroyd paid ₹ 1,000 on account.

You are required to : (i) Enter the above transactions in the books of prime entry of J Hines; (ii) Post the entries to appropriate Ledger Accounts and the cheque payments to the Cash Book and Ledger Accounts.

17 The Purchase Book of a firm is given below :

Date	Particulars	Inward Invoice No.	L.F.	Details ₹	Total ₹
2015 Mar. 5	M/s. Shah & Co., Madras	116		10,204	
Mar. 10	Mr. Kirtikumar, Delhi	117		7,985	
Mar. 18	M/s. Kamani Bros., Bombay	118		16,010	
Mar. 24	M/s. Kapoor & Sons, Nasik	119		4,050	
Mar. 28	M/s. Suresh & Co., Calcutta	120		5,000	43,249

(a) Explain briefly the advantages of maintaining the above record.
(b) Name the other three records, which could be maintained on similar lines.
(c) Show the posting necessary from the above record for March 2015.

18. Give the journal entries for :
(i) Cash withdrawal of interest on capital @ 8% earned by partner B on his capital investment of ₹ 50,000 for the year.
(ii) Transfer of the year's net profit shares of ₹ 5,000 and ₹ 3,000 appropriated to partners Karl and Steale respectively, who maintain their personal accounts on the fixed capital method.

19. Give journal entries for :
(a) An initial total investment of ₹ 80,000 by Mr. B in his business, in the form of ₹ 30,000 worth of machinery, ₹ 20,000 for vehicles and the balance equally distributed between the cash account and the bank account.

The Trial Balance

Meaning of Trial Balance

Before using the account balances to prepare Final Accounts, an attempt is made to prove that the total of accounts with debit balances is in fact equal to the total of accounts with credit balances. This proof of the equality of debit and credit balances is called a ***Trial Balance***.

A Trial balance is a five-column schedule listing the names and balances of all the accounts in the ledger and cash book, listed in the order in which they appear in the ledger. Last two columns are used for listing the balances of different accounts. The debit balances are listed in the left-hand column and the credit balances in the right-hand column. The total of two columns should agree. The different columns of the Trial Balance are:

(i) Serial number, (ii) Heads of Account, (iii) Ledger folio (L.F.), (iv) Debit balance, and (v) Credit balance.

A Trial Balance taken from the ledger balances of Sachin and Co is given below :

Trial Balance of Sachin and Co. as at 31st March, 2015

Serial Number	Heads of Account	L F	Debit Balance (₹)	Credit Balance (₹)
1.	Land and Building		6,00,000	
2.	Plant and Machinery		6,00,000	
3.	Furnitures and Fixtures		50,000	
4.	Purchases / Sales		5,00,000	8,00,000
5.	Wages and Salaries		1,50,000	
6.	Rent, Rates and Taxes		10,000	
7.	Cash in Hand		50,000	
8.	Creditors			60,000
9.	Loan from Bank			4,00,000
10.	Capital			7,00,000
	Total		19,60,000	19,60,000

Total of debit balances
and credit balances are equal

Key Points to Remember

1. ***The heading should show the date on which the Trial Balance is prepared.***
2. ***The heading should also contain the name of the organisation / person for whom the Trial Balance is prepared.***
3. ***The debit balances are listed in the left hand column and the credit balances are in the right hand column.***
4. ***The debit and credit columns of the Trial Balance should agree if all transactions are correctly recorded in the ledger accounts and if the balances of the accounts have also been struck correctly.***
5. ***A Trial Balance essentially proves the arithmatical accuracy of the books of account.***
6. ***A Trial Balance is prepared at regular intervals, for example on a monthly, half yearly or yearly basis, as desired.***
7. ***The Trial Balance is not part of the ledger, but is merely a statement of debit and credit balances in the ledger at a particular date.***
8. ***The order of accounts does not matter.***

Characteristics of a Trial Balance

1. It is a list of balances of all ledger accounts and cash book.
2. It is not a part of the double entry system of book-keeping. It is just a working paper.
3. It can be prepared any time during the accounting period.
4. It serves as an instrument for carrying out the job of checking and testing.
5. Arithmatical accuracy of posting of entries from journal to ledger can be ensured.
6. Some errors are not revealed by the Trial Balance, for example, errors of principle.

Objectives of Drawing up a Trial Balance

1. It ensures that all transactions have been recorded with identical debit and credit amounts and the balance of each account has been computed correctly.
2. It facilitates the preparation of the Trading, Profit and Loss Accounts and the Balance Sheet by making available the balances of all the accounts at one place.
3. It also ensures that the balance of each account, whether debit or credit, has been transferred properly to the respective columns of the trial balance and that the Trial Balance has been correctly added.
4. Some of the errors in the books of account can be detected by the Trial Balance and they can be rectified before the preparation of the final accounts.

Defects of a Trial Balance

A Trial Balance in which the credit and debit accounts match does not prove that :

1. All transactions have been correctly analysed and recorded in the proper accounts. If, for example, the wages paid for the installation of plant had been erroneously recorded by debiting the wages account in place of the plant account, the Trial Balance would still agree.
2. All transactions have been recorded in the books of original entry. If, for example, a sales invoice were to be completely omitted from being recorded in the sales day book, the error would not be disclosed in the Trial Balance.

We can say that a Trial Balance should not be regarded as conclusive proof of the correctness of the books of account.

Construction of a Trial Balance

The Trial Balance is generally prepared on a loose sheet that may have five columns :

(a) Serial Nos.; (b) Heads of Account; (c) Ledger Folio (L.F.); (d) Debit Balance; and (e) Credit Balance. For the preparation of a Trial Balance, the following steps are followed:

Step 1 Calculate the balances of the cash book and all ledger accounts.
Step 2 Write down the heading—'Trial Balance of ... as at ...' at the top of the loose sheet.
Step 3 Write down : (a) Serial numbers of the accounts in the 1st column; (b) Names of the accounts in the 2nd column; (c) L.F. number in the 3rd column; and (d) the balances in the respective columns.
Step 4 Add both the debit and credit columns to see whether they agree.

Errors Disclosed by a Trial Balance

The disagreement of a Trial Balance indicates the presence of one or more of the following errors in the books of account.

1. Omission to Post an Amount in the Ledger The two sides of a Trial Balance will not agree, when a transaction has been correctly recorded in the books of original entry but has not been posted in the ledger. If a cash receipt of ₹ 500 from X has been properly recorded in the cash book, but has not been posted on the credit side of X Account, the credit side of the Trial Balance will fall short by ₹ 500.

2. Debit or Credit Entries are not Posted at all or Posted Twice If only one side of the transaction is recorded, the Trial Balance will not agree. If stationery purchased on credit from X for ₹ 300 has been properly recorded in the Stationery Account but not in the account of X, the Trial Balance will fail to agree. Similarly, if X Account is correctly credited but Stationery Account has been wrongly debited twice, the Trial Balance will not agree.

3. Debits are Wrongly Posted as Credits and Vice Versa A Trial Balance will be in disagreement when a transaction is recorded on the wrong side of an account. If a cash receipt of ₹ 1,000 as interest is properly debited in the cash book but has been recorded on the debit side of the interest account by mistake, the credit side of the Trial Balance will fall short by ₹ 2,000.

4. Wrong Totalling of Subsidiary Books If the total of any subsidiary books has been cast wrongly, it will cause a disagreement in the Trial Balance. If the sales day book is wrongly totalled as ₹ 1,800 (instead of ₹ 1,700), sales account will be credited by ₹ 1,800 but the debtor's account will be debited by ₹ 1,700, in which case the Trial Balance will fail to agree.

5. Difference in Amount between the Entries If different values of an item are posted in two different accounts, the Trial Balance will not agree. A cash receipt of ₹ 2,000 from X is correctly recorded in the cash book but the account of X is incorrectly credited by ₹ 200, the credit side of the Trial Balance would fall short by ₹ 1,800.

6. Error in the Computation of an Account Balance If the balance of an account is not correctly computed, the balance of the ledger will not show the true position and will cause disagreement of the Trial Balance.

7. Omission of Account Balance If the balance of an account is not listed in the Trial Balance at all, it will fail to agree.

8. Balance of an Account Wrongly Recorded in the Trial Balance If the balance of an account is wrongly recorded in the Trial Balance, it will not agree. For example, if the actual balance of purchase account is ₹ 1,000 but has been recorded in the Trial Balance as ₹ 100, the debit side of the Trial Balance will fall short by ₹ 900.

9. Errors in Extraction of the Trial Balance The Trial Balance will not tally if any or both the columns are wrongly totalled.

Errors Not Disclosed by a Trial Balance

1. Errors of Omission If a particular transaction is omitted altogether from the books of original entry, it will not disturb the agreement of the Trial Balance. If a sum of ₹ 100 paid to X, is not recorded either in the Cash Book or in the account of X, only the total of the Trial Balance will fall short by ₹ 100, but the debit and credit columns will show no difference.

2. Errors of Principle These errors arise because of an incorrect application of the principles of accounting, for instance, failure to differentiate between capital and revenue expenditure. The existence of this type of error is not disclosed by the Trial Balance. Examples are : (a) Wages paid for installation of machinery being debited to Wages Account; and, (b) Repairs of the building debited to Building Account and the like.

3. Compensating Errors These are a group of errors, the total effect of which is not reflected in the Trial Balance. These errors are of a neutralizing nature, i.e., one error is compensated by another error or by errors of an opposite nature. For example, an extra debit in Salary Account for ₹ 100 may be compensated by an extra credit of ₹ 100 in Sales Account.

4. Recording Wrong Amount in the Books of Original Entry If a transaction is wrongly recorded in the books of original entry and is subsequently carried through the ledgers, it will not cause disagreement in the Trial Balance. For example, if stationery purchased for cash ₹ 175 is recorded in the cash book as ₹ 751 and posted to Stationery Account in the ledger as ₹ 751, the Trial Balance will still agree.

5. Recording Both Aspects of a Transaction more than once in the Books of Account The Trial Balance will agree if both aspects of a transaction are recorded twice in the books of original entry. For example, if a credit purchase of ₹ 4,000 from Tata Chemicals Ltd. is entered in the purchase day book twice, the error will not cause a disagreement in the totals of the Trial Balance.

6. Errors in Recording a Transaction on the Correct Side of a Wrong Account If a transaction is recorded on the correct side of a wrong account, it will not cause a disagreement in the Trial Balance. For example, if ₹ 500 cash paid to Ram, is wrongly debited to Raman Account, it will not affect the agreement of the Trial Balance.

Steps to Detect Errors Through a Trial Balance

The following steps should be taken to locate the error or combination of errors that is causing a Trial Balance to disagree :

Step 1 Check whether the debit and credit columns have been added correctly by adding these columns in opposite directions, i.e. from bottom to top or from top to bottom.

Step 2 If the errors remain undetected, divide the exact difference between the totals of two columns by 9. If it is totally divisible by 9, this will mean that there is either a transposition error or a slide error. A ***transposition error*** is committed when a digit of an amount is placed wrongly, for example, if Plant Account has a balance of ₹ 5,760, but has been written as ₹ 5,670 in the Trial Balance, the resulting error is ₹ 90, which is divisible by 9. A ***slide error*** is committed when the decimal point is placed incorrectly, for example, ₹ 6,250 is copied as ₹, 62.50. The resulting error is ₹ 6,187.50 which is also divisible by 9.

Step 3 Divide the difference by 2, and scan the columns for an identical amount. If a debit balance has been entered in the credit column, or vice-versa, it will cause a difference which is twice this amount. If a debit balance of ₹ 250 in the Plant Account has been entered in the credit column of the Trial Balance, it will cause a difference of ₹ 500 in the Trial Balance total.

Step 4 Check from the ledger if any account shows a balance equal to the difference in the Trial Balance.

Step 5 Re-check the opening balances of all the accounts from the previous Balance Sheet.

Step 6 Cross check the amount in the Trial Balance with the balances in the ledger. Make sure that all the balances have been placed in the correct column of the Trial Balance.

Step 7 Re-compute the balances of each ledger account.

Step 8 If the errors remain undetected, check the postings from the journal and other books of original entry to the ledger accounts. Put tick marks with a coloured pencil in the journal and in the ledger after checking each figure. After completing the operation, look through the journal and the ledger for any unticked amount.

Step 9 If the errors still remain undetected, repeat the above steps with the help of other members of the staff, who are not in charge of maintaining the books of account.

Suspense Account

A Suspense Account is a Ledger Account in which entries are made on a temporary basis when the correct account cannot be immediately identified. This may be so because further information has to become available or while preparing the accounts, the accountant is unsure of how to proceed with it. It is opened in the following cases: (i) to balance a disagreed Trial Balance; (ii) to post doubtful items; and (iii) to record incomplete transactions.

(i) To Balance a Disagreed Trial Balance : Sometimes, a Trial Balance does not tally despite all efforts; but one cannot wait indefinitely as accounts must be closed at the end of a financial year. In such a case, the amount of difference is entered in the lighter column against Suspense Account. The point to note is that no double entry will be possible. Later, when the mistakes are detected, the rectifying entries are passed.

(ii) To Post Doubtful Items : Sometimes, an item cannot be posted to the correct account for one reason or another. For instance, you may receive a remittance of ₹ 1,500 but you may not know who has sent it. You then pass the following entry :

Journal **Dr.** **Cr.**

Date	Particulars	₹	₹
	Cash A/c Dr. To Suspense A/c (Being the remittance received from unknown sender)	1,500	 1,500

Later, you get the information that Ram, Shyam & Co has sent this amount. Then you should pass the following entry:

Journal **Dr.** **Cr.**

Date	Particulars	₹	₹
	Suspense A/c Dr. To Ram, Shyam & Co. A/c (Being credit given to the sender for a remittance which had been credited previously to Suspense Account)	1,500	 1,500

(iii) To Record Incomplete Transactions : Sometimes a Suspense Account is opened to record a balance that has not yet been finalised because a particular deal has not been concluded. For example, an advance of ₹ 10,000 received from X for the goods to be delivered in the future, subject to availability. A Suspense Account can include many transactions of this nature, without involving any error.

Preparation of The Trial Balance from Given Ledger Balances

For the purpose of preparing the Trial Balance from a given list of ledger balances, the following rules should be followed:

1. The balances of all accounts relating to:
   (a) Assets; (b) Expenses; (c) Losses; (d) Drawings; and (e) Debtors, should be placed in the ***Debit*** column of the Trial Balance.
2. The balances of all accounts relating to:
   (a) Liabilities; (b) Income and Revenue; (c) Gain; and (d) Creditors, should be placed in the ***Credit*** column of the Trial Balance.

Some Important Items

Closing Stock

Generally, closing stock does not appear in the Trial Balance because a separate account for this is not opened in the general ledger. It represents the balance of goods unsold out of opening stock and purchases. When goods are purchased, Purchases Account is debited and Cash/Creditors Account is credited (Closing Stock Account is not coming into picture). At the end of the year, if the following adjustment entry is passed, then closing stock will appear in the Trial Balance.

Closing Stock Account Dr.
To Purchases Account

Cost of Goods Sold

Cost of Goods Sold = Opening Stock + Purchases – Closing Stock.

Cost of Goods Sold will appear in the Trial Balance if the following entry is passed :

Cost of Goods Sold Account	Dr.		
Closing Stock Account	Dr.		
To Opening Stock Account			
To Purchases Account			

Illustrative Example

Opening Stock ₹ 5,000; Purchases ₹ 30,000; Closing Stock ₹ 10,000.

Cost of Goods Sold = ₹ 5,000 + 30,000 – 10,000 = ₹ 25,000.

Journal entry will be :

Cost of Goods Sold Account	Dr.	₹ 25,000	
Closing Stock Account	Dr.	₹ 10,000	
To Opening Stock Account			5,000
To Purchases Account			30,000

In the Trial Balance Cost of Goods Sold will be shown as a debit balance ₹ 25,000 and Closing Stock will be shown as debit balance ₹ 10,000.

Note : Cost of Goods Sold will be debited to Trading Account and Closing Stock will be shown in the Balance Sheet as a current asset.

Carriage Inwards and Carriage Outwards

Carriage paid for purchase of goods is called carriage inwards whereas carriage paid for sale of goods is called carriage outwards. Both are ***expenses***. Therefore, both carriage inward and carriage outward will be shown in the debit column of the Trial Balance.

Returns Inwards and Returns Outwards

Goods returned by customer is called the Returns Inwards. When goods are returned by the customer, Returns Inwards Account is debited and Customer Account is credited. Returns Inwards Account always will show a debit balance. Therefore, in the Trial Balance it will be shown in the debit column.

Goods returned to suppliers is called Returns Outwards. When goods are returned to supplier, Suppliers (Creditors) Account is debited and Returns Outwards Account is credited. Returns Outwards Account will always show a credit balance. Therefore, in the Trial Balance it will be shown in the credit column.

Illustration 3

From the following list of balances, prepare a Trial Balance as on 30.6.2015 :

		₹			₹
1.	Opening Stock	18,000	13.	Plant and Machinery	7,500
2.	Wages	10,000	14.	Loose Tools	1,800
3.	Sales	1,20,000	15.	Lighting	2,300
4.	Bank Loan	4,400	16.	Creditors	8,000
5.	Coal and Coke	3,000	17.	Capital	40,000
6.	Purchases	75,000	18.	Miscellaneous Receipts	600
7.	Repairs	2,000	19.	Office Salaries	2,500
8.	Carriage	1,500	20.	Office Furniture	600
9.	Income Tax	1,500	21.	Patents	1,000
10.	Debtors	20,000	22.	Goodwill	15,000
11.	Leasehold Premises	6,000	23.	Cash at Bank	5,100
12.	Cash in Hand	200	24.	Closing Stock	6,000

Solution **Trial Balance as at 30th June, 2015**

Sl. No.	Heads of Account	L.F.	Debit Balance (₹)	Credit Balance (₹)
1.	Opening Stock		18,000	
2.	Wages		10,000	
3.	Sales			1,20,000

4.	Bank Loan			4,400
5.	Coke and Coal		3,000	
6.	Purchases		75,000	
7.	Repairs		2,000	
8.	Carriage		1,500	
9.	Income Tax		1,500	
10.	Debtors		20,000	
11.	Leasehold Premises		6,000	
12.	Cash in hand		200	
13.	Plant and Machinery		7,500	
14.	Loose Tools		1,800	
15.	Lighting		2,300	
16.	Creditors			8,000
17.	Capital			40,000
18.	Miscellaneous Receipts			600
19.	Office Salaries		2,500	
20.	Office Furniture		600	
21.	Patents		1,000	
22.	Goodwill		15,000	
23.	Cash at Bank		5,100	
	TOTAL		1,73,000	1,73,000

Correction of Trial Balance

Illustration 4

The clerk of a businessman wrongly prepared the following Trial Balance. You are required to draw up a Trial Balance correctly stating reasons in brief:

Sl. No.	Heads of Account	L.F.	Debit Balance (₹)	Credit Balance (₹)
1.	Capital			60,000
2.	Stock at Commencement		5,000	
3.	Discount Allowed			500
4.	Commission Received			700
5.	Fixed Assets			60,000
6.	Sales		85,000	
7.	Purchases			45,000
8.	Return Outward			1,000
9.	Return Inward		2,000	
10.	Carriage Inward			600
11.	Carriage Outward			700
12.	Wages & Salary		25,000	
13.	Bills Receivable		7,000	
14.	Debtors		9,000	
15.	Bills Payable			7,000
16.	Rent		3,000	
17.	Interest Paid			2,000
18.	Cash		800	
19.	Creditors		6,900	
20.	Stock at the End		33,800	
	TOTAL		1,77,500	1,77,500

Solution **Trial Balance as at ...**

Sl. No.	Heads of Account	L.F.	Debit Balance (₹)	Credit Balance (₹)
1.	Capital			60,000
2.	Stock at Commencement		5,000	
3.	Discount Allowed		500	

4.	Commission Received			700
5.	Fixed Assets		60,000	
6.	Sales			85,000
7.	Purchases		45,000	
8.	Return Outward			1,000
9.	Return Inward		2,000	
10.	Carriage Inward		600	
11.	Carriage Outward		700	
12.	Wages & Salary		25,000	
13.	Bills Receivable		7,000	
14.	Debtors		9,000	
15.	Bills Payable			7,000
16.	Rent		3,000	
17.	Interest Paid		2,000	
18.	Cash		800	
19.	Creditors			6,900
	TOTAL		1,60,600	1,60,600

Reasons

1. Discount Allowed is an expense, so its balance will be a debit balance.
2. Fixed Assets always reflect debit balance because assets coming in are debited.
3. Sales are income, so its balance will be a credit balance.
4. Purchases are expenses, so its balance will be a debit balance.
5. Carriage Inwards is an expense, so its balance will be a debit balance.
6. Carriage Outwards is an expense, so its balance will be a debit balance.
7. Interest Paid is an expense, so its balance will be a debit balance.
8. Creditor is a liability, so its balance will be a credit balance.
9. Closing Stock is not an account, so it cannot have any balance and consequently, it cannot find a place in the Trial Balance. Only when closing stock is adjusted against purchases, it appears in the Trial Balance.

Illustration 5

The total of the debit side of the Trial Balance of a large boot and shoe repairing company as at 31st December, 2014 is ₹ 1,66,590 and that of the credit side is ₹ 42,470.

After several checkings and re-checkings the following mistakes are discovered :

Name of Accounts	Correct Figure (as it should be)	Figure as it appears in the Trial Balance
Opening Stock	14,900	14,800
Repairs	61,780	61,780
		(But appear on the debit side)
Rent & Rates	2,160	2,400
Sundry Creditors	6,070	5,900
Sundry Debtors	8,060	8,310

Ascertain the correct total of the Trial Balance.

Solution Ascertainment of Correct Total of Trial Balance as at 31st December, 2014

Debit Side	₹	Credit Side	₹
Total as per Trial Balance	1,66,590	Total as per Trial Balance	42,470
Less: Wrong amount of Opening Stock	14,800	Add: Repairs (Note 1)	61,780
	1,51,790		1,04,250
Add: Correct amount of Opening Stock	14,900	Less: Wrong amount of Creditors	5,900
	1,66,690		98,350
Less: Repairs (Note 1)	61,780	Add: Correct amount of Creditors	6,070
	1,04,910		
Less: Wrong amount of Rent & Rates	2,400		

	1,02,510		
Add: Correct amount of Rent & Rates	2,160		
	1,04,670		
Less: Wrong amount of Sundry Debtors	8,310		
	96,360		
Add: Correct amount of Sundry Debtors	8,060		
	1,04,420		1,04,420

Note :

(1) Repairs is an income in the case of a shoe manufacturing, therefore it will appear on the credit side of the Trial Balance.

The Adjusted Trial Balance (Recasting of a Trial Balance)

When final accounts are to be prepared, the ledger balances need to be updated to include the effects of transactions that are either unrecorded or recorded improperly, for example, outstanding expenses, depreciation, closing stock, etc. Adjusting entries are necessary to bring the ledger balances to their proper levels. After all the necessary adjusting entries have been journalized and posted, a 2nd Trial Balance is prepared to prove that the ledger is still in balance and this 2nd Trial Balance is called ***the adjusted Trial Balance***. This Trial Balance provides a complete listing of the account balances to be used in preparing the Final Accounts. The following illustration will clear the matter.

Illustration 6

Mr Vijay Kumar has been carrying on wholesale trade in textiles from September 1, 2000. His Trial Balance as on December 31, 2014 is as follows :

Name of Account	Debit (₹)	Credit (₹)
Salary	3,200	
Rent	29,000	
Sundry Debtors	43,000	
Loan from Mrs Vijay Kumar		60,000
Cash	4,000	
Sundry Creditors		27,000
Interest paid in part on loan	1,200	
Mr Vijay Kumar's Capital		32,500
Sales		75,800
Purchases	92,500	
Furniture and Fixtures	20,000	
Insurance Premium	2,400	
	1,95,300	1,95,300

Mr Vijay Kumar furnishes the following additional information :

1. Salary due to his shop assistants on December 31, is ₹ 800.
2. Rent includes a deposit of ₹ 25,000, refundable by the landlord when the premises are vacated.
3. Sundry Debtors represent the amounts invoiced but not yet collected, except for a sum of ₹ 2,200 shown as due from Mr Harinarayan in respect of goods sent to him on approval basis. Mr Harinarayan has to exercise his option by January 5, 2015, cost of the goods is ₹ 1,800.
4. Loan from Mrs Vijay Kumar taken on October 1, 2014 carries simple interest at the rate of 12 percent per year. The first instalment of ₹ 15,000 including interest falls due for payment on February 1, 2015.
5. Inventory of mill goods in the shop on December 31, 2014 is ₹ 35,000 (cost).
6. All items of shop furniture were bought on October 1, 2014. They are expected to be useful for 20 years at the end of which they are to be scrapped.
7. Insurance premium for the period September 1, 2014 to August 31, 2015 has been paid.

Required :

(1) Post the entries to ledger accounts (date is not required); and,

(2) Prepare adjusted Trial Balance as on December 31, 2014.

Solution

Ledger of Mr Vijay Kumar

16.	Closing Stock Account		36,800	
	TOTAL		1,94,500	1,94,500

Key Points

- A Trial balance is a five-column schedule listing the names and balances of all the accounts in the ledger and cash book, listed in the order in which they appear in the ledger.
- **Some of the objectives of Drawing up a Trial Balance are :**
  1. It ensures that all transactions have been recorded with identical debit and credit amounts and the balance of each account has been computed correctly.
  2. It facilitates the preparation of the Trading, Profit and Loss Accounts and the Balance Sheet by making available the balances of all the accounts at one place.
  3. It also ensures that the balance of each account, whether debit or credit, has been transferred properly to the respective columns of the trial balance and that the Trial Balance has been correctly added.
- A Suspense Account is a Ledger Account in which entries are made on a temporary basis when the correct account cannot be immediately identified.

THEORETICAL QUESTIONS

1. What do you mean by a Trial Balance?
   Discuss the main objectives and limitations of the Trial Balance.
2. A Trial Balance is merely a proof of arithmetical accuracy.
   Explain this statement and bring out clearly the various classes of errors which a Trial Balance fails to disclose.
3. Explain the errors which are disclosed by the Trial Balance.
4. Explain the steps for locating errors through the Trial Balance.

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each sentence or answer each question below.

1. Why does a business prepare a trial balance ?
   A to provide a list of all its assets and liabilities
   B to calculate its profit or loss
   C to check the accuracy of its ledger entries
   D to check its bank balance
2. The totals of a trial balance do not agree. Which type of error causes this ?
   A a compensating error
   B an error of casting
   C an error of omission
   D an error of principle
3. An error of principle would occur if
   A plant and machinery purchased was credited to a fixed assets account
   B plant and machinery purchased was debited to the purchases account
   C plant and machinery purchased was debited to the equipment account
   D plant and machinery purchased was debited to the correct account but with the wrong amount.
4. In a trial balance, which one of the following items would be correctly shown as a debit balance ?
   A returns outwards
   B discount received
   C returns inward
   D bank overdraft
5. In a trial balance, which one of the following items would be correctly shown as a credit balance ?
   A carriage inwards
   B carriage outwards
   C discount allowed
   D discount received
6. Which of the following is shown on the debit side of the trial balance ?
   A discount received
   B capital
   C sales returns
   D bank overdraft
7. If R. Singh were to post ₹ 1,000 to the debit of S. Ganguli's account instead of to the credit of S. Ganguli's account, this would be known as an error of
   A principle
   B commission
   C omission
   D compensation
8. Which one of the following is an error of principle ?
   A a gas bill credited to gas account and debited to the bank account
   B the purchase of a fixed asset credited to the asset account at cost and debited to the creditor's account
   C the purchase of a fixed asset debited to the purchases account and credited to the creditor's account
   D the payment of wages debited and credited to the correct accounts, but using the wrong amount.

9. Which of the following will cause a difference on a trial balance ?
   A an invoice omitted from the sales day book
   B an invoice for ₹ 415 entered in the sales day book as ₹ 451
   C an invoice for ₹ 600 entered in the sales day book not included in the monthly total
   D a credit note entered to the sales day book
10. After which error will a trial balance still balance ?
   A wages paid ₹ 1,500, was entered correctly in the bank account but debited to the wages account as ₹ 2,500
   B rent receivable of ₹ 200 was debited to the rent payable account
   C goods returned to supplier ₹ 150 were entered in purchases returns day book as ₹ 105
   D The sales day book was undercast by ₹ 200

PRACTICAL QUESTIONS

1. Enter the following transactions in the subsidiary books and post them into ledger and prepare a Trial Balance for the month of November 2014 and bring down the balances on 1st December, 2014. (all figures in ₹)

1	Mr X started a business with	60,000	11	Sold goods to Zakir Khan	10,000
4	Bought furniture from Modern Furniture	5,000	14	Goods returned by Zakir Khan	2,000
5	Purchased goods for cash	10,000	15	Payment to B.Sen & Co by cheque	5,000
8	Purchased from B.Sen & Co for ₹ 15,000. Trade discount 20%		20	Goods purchased on credit from Din Dayal & Co	10,000
9	Opened a bank account by depositing	14,000	25	Goods returned to Din Dayal & Co worth	1,000
10	Sold goods for cash	20,000	28	Paid electricity bill	100
10	Purchased stationery from Bharat Stationery Mart.	500	29	Cash sales	9,000
			30	Withdrew for private use from bank.	1,000

2. Correct the following Trial Balance : (all figures in ₹)

Dr.			Cr.
Return Outward	16,000	Debtors	15,000
Opening Stock	34,200	Carriage Outward	5,000
Salaries	12,000	Capital	55,200
Creditors	28,000	Machinery	18,000
Bank	45,000	Return Inward	3,000
Carriage Inward	6,000	Discount Received	4,000
Rent Received	3,000	Trade Expenses	6,000
Discount Allowed	2,000	Sales	1,40,000
Purchases	1,00,000	Building	20,000
Bills Payable	20,000		
	2,66,200		2,66,200

3. An inexperienced bookkeeper has drawn up a Trial Balance for the year ended 30th June, 2015 :

Dr.			Cr.
Provision for doubtful debts	200	Capital	4,591
Bank overdraft	1,654	Creditors	1,637
Debtors	2,983	Discount allowed	733
Discount received	252	General expenses	829
Drawings	1,200	Return Inwards	330
Office Furniture	2,155	Sales	16,882
Purchases	10,923		
Rent and Rates	314		
Salaries	2,520		
Stock	2,418		
Provision for depreciation on Furniture	364		
	24,983		25,002

Draw up a 'corrected' Trial Balance, debiting or crediting any residual errors to a Suspense Account.

4. The total of debit side of the Trial Balance of a daily newspaper firm at 31st December, 2014 is ₹ 1,80,590 and that of the credit side is ₹ 36,470. After several checkings and re-checkings the following mistakes are discovered :

Name of Accounts	Correct Figure (as it should be)	Figure as it appears in the Trial Balance
Opening Stock	12,700	12,600
Advertisement Income	71,780	71,780 (But appear on the debit side)
Rent & Rates	2,260	2,500
Sundry Creditors	6,170	6,000
Sundry Debtors	8,150	8,400

Ascertain the correct total of the Trial Balance.

5. The following Trial Balance of Sri A K Das was drafted by his son, Sri Provat Sundar Das, a Higher Secondary student. But due to his defective knowledge of the subject, it had been done incorrectly. You are now required to re-draft the Trial Balance correctly stating your reasons for correction.

Trial Balance as on 31.3.2015

Sl.No.	Heads of Account	Debit Balance (₹)	Credit Balance (₹)
1.	Capital	—	1,00,000
2.	Opening Stock	16,590	—
3.	Closing Stock	—	20,580
4.	Creditors	—	12,500
5.	Debtors	20,670	—
6.	Fixed Assets	79,000	—
7.	Gross Purchases	60,920	—
8.	Gross Sales	—	1,02,600
9.	Returns Inwards	2,400	—
10.	Returns Outwards	—	1,230
11.	Carriage Inwards	800	—
12.	Carriage Outwards	—	1,850
13.	Import Duty	1,200	—
14.	Export Duty	—	800
15.	Wages and Salaries	31,400	—
16.	Bills Receivable	15,000	—
17.	Bills Payable	—	8,000
18.	Rent Receivable	3,800	—
19.	Interest Paid	—	1,100
20.	Bank Overdraft	11,000	—
21.	Cash	380	—
22.	Commission Received	—	870
23.	Rates and Taxes	7,130	—
24.	Discount Allowed	—	760
	Total	2,50,290	2,50,290

6. The following Trial Balance of a sole trader, although it adds up to the same total on both sides, is incorrect :

Trial Balance as on 31st December, 2014

Sl. No.	Heads of Account	L F	Debit Balance (₹)	Credit Balance (₹)
1.	Capital, 1st January		4,47,500	—
2.	Drawings		—	52,500
3.	Stock, 1st January		1,86,250	—
4.	Purchases		11,55,000	—
5.	Sales		—	19,71,250
6.	Wages and Salaries		3,10,250	—
7.	Lighting and Heating		15,500	—
8.	Equipment		1,80,000	—
9.	Carriage Outwards		—	11,500
10.	Returns Inwards		5,250	—
11.	Returns Outwards		—	14,500
12.	Provision for Bad Debts		17,500	—
13.	Discount Allowed		14,250	—
14.	Discount Received		—	15,750
15.	Rent, Rates and Insurance		55,750	—

16.	Motor Vehicles		73,750	—
17.	Sundry Debtors		—	6,96,000
18.	Sundry Creditors		2,46,250	—
19.	Bank Overdraft		48,750	—
20.	Cash in hand		5,500	—
	Total		27,61,500	27,61,500

Stock in hand at 31st December ₹ 1,95,000. Draw up a corrected Trial Balance.

7. The following Trial Balance was prepared on 31.3.2015 without taking into consideration the information given below:

Debit Side	₹	Credit Side	₹
Salaries	75,000	Sales	2,75,000
Rent	15,000	Capital	2,50,000
Purchases	1,75,000	Creditors	50,000
Debtors	50,000	Bank Overdraft	27,500
Opening Stock	30,000	Bills Payable	25,000
Fixed Assets	2,30,000	Returns Outwards	2,500
Returns Inwards	5,000		
Bills Receivable	37,500		
Wages	5,000		
Insurance	7,500		
	6,30,000		6,30,000

Information :

(1) Credit purchases of ₹ 10,000 and credit sales of ₹ 20,000 have not been recorded in the books.

(2) Outstanding liabilities :

(i) Wages ₹ 5,000; (ii) Rent ₹ 2,000; (iii) Carriage inwards ₹ 1,000; (iv) prepaid insurance ₹ 500.

On the basis of the above information, (a) post entries to the ledger accounts (without date); (b) prepare adjusted Trial Balance as on 31st March, 2015.

The Cash Book

Meaning and Nature of Cash

Cash is a current asset. Cash is indeed not different from any other asset. However, cash is of special significance for two reasons. First, it is the most readily available asset to meet the current obligation of the business unit and the one most universally accepted by creditors. Second, the economic activities of a business involve regular flow of cash to or from the business. Therefore, cash balance of a business unit is a very important element of its financial condition.

For accounting purposes, cash consists of items that we use in every day financial transactions as mediums of exchange, and which are available to meet current obligations. To an accountant, cash includes, paper currency, coins, money orders, demand deposits, cheque, bank drafts and the like.

However the following items should not be treated as cash:
(i) Postage stamp; (ii) Post-dated cheques; (ii) Securities; (iv) Investment in special funds;
(v) Trade advances to employees; and, (vi) Dishonoured cheques.

Cash Book

The Cash Book is a subdivision of the book of original entry, recording transactions involving receipts or payments of cash.

All cash transactions are first entered in the Cash Book and then posted from Cash Book into the ledger. Cash Book is maintained in the form of a ledger with narration. Practically, the Cash Book is a substitute for Cash Account in the ledger.

Kinds of Cash Book

There are different kinds of Cash Book, such as :

1. Single Column Cash Book—For recording cash transactions only.
2. Cash Book with Cash and Bank Column—For recording cash and bank transactions.

3. Cash Book with Cash, Bank and Discount Column—For recording cash and bank transactions involving loss or gain on account of discount.
4. Petty Cash Book—For recording petty expenses and receipts.

Single Column Cash Book

The Single Column Cash Book makes a record (with narration) of only cash transactions, and it is just like any other Account. In the Cash Book, all cash receipts are recorded on the left-hand (debit) side and all cash payments are recorded on the right-hand (credit) side.

The ruling of a Cash Book depends upon the specific needs of the organisation. However, a specimen ruling of a Single Column Cash Book is given below :

Dr. **Cash Book (Single Column)** **Cr.**

Date	Particulars	Vr. No.	L.F.	Amount	Date	Particulars	Vr. No.	L.F.	Amount
1	2	3	4	5	1	2	3	4	5

Date : The date column in the Cash Book ensures a chronological record of each transaction. In this column, year, month and actual date of transaction is recorded.

Particulars : The column for particulars is left for writing the heads of account to be credited and debited and also for providing the appropriate narration or explanation of the transaction recorded.

Voucher No. : The document in support of a transaction is called voucher. There are two types of vouchers: (1) Receipts voucher, and (2) Payment voucher. Generally, voucher has a serial number and this number is written in this column.

Ledger Folio (L.F.) : The column for ledger folio is for indexing. A folio is a page mark. The folio in which the accounts, named in the Cash Book, are maintained in the ledger, are marked in this column. This enables to locate the respective page or pages in the ledger easily.

Amount : The money value of the transaction is written in this column.

Single Column Cash Book—Some Observations

1. When an entry has been passed in the single column Cash Book, the corresponding entry is passed in the ledger. For instance, if Ram pays ₹ 500, the receipt (or debit) entry will be passed in a single column Cash Book and Ram Account will be credited in the ledger.
2. When a Cash Book is maintained, Cash Account is not opened in the ledger.
3. Cash Book is balanced just like any other account. This should be mentioned because normally a subsidiary book is just totalled, not balanced.
4. It makes no record of: (a) cheque given or received, and (b) cash discount allowed or received.

Balancing the Cash Book

In order to find out cash in hand at the end of the month, the Cash Book is balanced like an ordinary account. The following steps are followed in balancing a Cash Book. (See illustration 1)

Step 1 Add up the debit side of the Cash Book (Total cash received ₹ 85,750) with pencil.
Step 2 Add up the credit side of the Cash Book with pencil (Total cash paid ₹ 39,960).
Step 3 Since the debit side total (₹ 85,750) is greater than that of the credit side (₹ 39,960), the balance is ₹ 45,790.
Step 4 Enter this balance in the side with the smallest total as 'By Balance c/d'.
Step 5 Erase the pencil total.
Step 6 Draw a single line just below the balance amount on both sides.
Step 7 Now, re-add both sides including balance. Total of each side should be the same. Underline the totals with double lines.
Step 8 Carry down the balance to the opposite side as 'To Balance b/d'. Now, Cash Book is ready for making entries in the next month.

Illustration 1

Write up a trader's single column Cash Book for the month of April 2015, from the following (all figures in ₹) :

1 Cash in hand	1,650	17 Paid cleaner in cash	360
2 Cash sales	16,000	19 Cash sales	11,400
3 Paid cheque to Creditor ₹ 3,990 after deducting cash disc. of 210		21 Paid cash for window cleaning	180
4 Wages paid in cash	2,250	25 Paid wages in cash ₹ 2,400, paid cash for rates	3,600
4 Cash sales ₹ 18,000 of which ₹ 15,000 was banked on April 7.		26 Cash sales	19,200
9 Paid cash to TCI ₹ 420 against their bill no. 64.		29 Paid electricity bill in cash	900
11 Paid wages in cash	2,850	30 Cash collected from X (Debtor) ₹ 4,500 after allowing disc. of ₹ 200.	
15 Cash sales ₹ 15,000, of which ₹ 12,000 was banked on April 16.		Rule-off and balance the Cash Book at April 30, 2015.	

Solution

In the Books of . . .

Dr. Cash Book (Single Column) Cr.

Date	Particulars	V.N.	L.F.	₹	Date	Particulars	V.N.	L.F.	₹
2015					2015				
April 1	To Balance b/d			1,650	April 4	By Wages A/c			2,250
2	To Sales A/c			16,000		(Being wages paid)			
	(Being goods sold for cash)				7	By Bank A/c			15,000
4	To Sales A/c			18,000		(Being cash deposited into bank)			
	(Being goods sold for cash)				9	By TCI A/c			420
15	To Sales A/c			15,000		(Being cash paid against bill no. 64)			
	(Being goods sold for cash)				11	By Wages A/c			2,850
19	To Sales A/c			11,400		(Being wages paid)			
	(Being goods sold for cash)				16	By Bank A/c			12,000
26	To Sales A/c			19,200		(Being cash paid into bank)			
	(Being goods sold for cash)				17	By Office Expenses A/c			360
30	To X A/c			4,500		(Being cash paid to cleaner)			
	(Being cash collected after allowing discount of ₹ 200)				21	By Office Expenses A/c (Being cash paid for window cleaning)			180
					25	By Wages A/c			2,400
						(Being wages paid)			
					25	By Rates A/c			3,600
						(Being rates paid)			
					29	By Electricity A/c (Being electricity bill paid)			900
					30	By Balance c/d			45,790
				85,750					85,750
May 1	To Balance b/d			45,790					

Where the account is balanced at the end of the day, date the balance c/d on the next day.	The Cash Account has a debit balance of ₹ 45,790.	Double ruling on the same line	Re-added totals equal — Therefore balance is correct.

Note the following points

1. Always enter the date.
2. Entries should be made in strict ***date order***.
3. All receipts from cash sales, collection from debtors during the day are recorded on the debit side.
4. All payments during the day are recorded on the credit side.
5. The Cash Book is always balanced using the same layout as above.
6. The balance of ₹ 45,790 shows how much the receipts exceed the payments.
7. Payment to creditors by cheque will not be recorded in the Single Column Cash Book (3rd April)

Double Column Cash Book (Cash Book with Cash and Bank Column)

The Cash Book in which cash and transactions involving receipts and payments by cheques are recorded is called ***Double Column Cash Book***. A double column cash book is one, where both cash and bank transactions are shown in columnar fashion. Therefore, one book represents two separate accounts and the transactions are recorded accurately as being either cash or bank transactions. The Bank Account maintained by the enterprise is a ***Personal Account***. For recording transactions in the Bank Column of the Cash Book, the Golden Rule of Debit and Credit applicable to ***personal account*** should be followed, for instance, (Receiver—Debit; Giver—Credit). Thus, for cash deposited into bank—the bank would be receiver and would be debited in the Bank column of the Cash Book. Similarly, for cash withdrawn from bank—the bank would be giver and would be credited in the Bank column of the Cash Book.

Rather than keeping two accounts apart from each other, the ***Double Column Cash Book*** enables us to keep both the Cash and the Bank Account side by side. This is more convenient and we can quickly see how much cash and bank balance we have got altogether.

The main advantages of using this method arises from the fact that cash in hand and cash at bank are almost the same asset, and transactions will frequently occur which will affect both the accounts.

Cheques

Bank provides its depositors with cheque books containing 10, 25 or 50 or more cheques. These cheques are used for withdrawal of cash from bank or making payment to creditors. The use of cheques in business transactions, in particular, is becoming more and more prevalent. In advanced countries, the procedure has considerably eliminated the use of paper money, i.e., paper notes issued by the central banking authority. In India, too, the practice is spreading rapidly.

However, theoretically cheque is not money. It is at best a money substitute. It just enables the transfer of money from one account to another, and thus from one hand to another, eliminating the need of the bothersome cash transactions (withdrawing money, counting it, examining it in detail, arranging for small changes to the paise, and so on).

Definition of Cheque

A cheque is defined by Negotiable Instrument Act ..., as follows: ***A cheque is an unconditional order, drawn upon a specified banker, signed by the maker, directing the banker to pay on demand a certain sum of money only to the order of a person or to the bearer of the instrument.***

Therefore, the distinguishing features of a cheque are:

1. It must be an unconditional order to pay;
2. It must be drawn upon a specified banker;
3. It must be signed by the issuing person or authority, i.e. drawer or maker;
4. It must specify the amount to be paid;
5. It is made payable either to a person named therein, or as ordered.

Parties to a Cheque

There are three parties to a cheque:

(a) Drawer or Maker: The person who issues the cheque is called drawer or maker. Generally, cheques are issued by the depositor(s). In case of a limited company, cheques are issued by the authorised signatory(ies).

(b) Drawee: The bank on which the cheque is drawn is called the Drawee.

(c) Payee: The person who is named in the cheque for receiving the payment is called Payee.

Types of Cheques

Cheques may be drawn in two ways: (a) Payable to person named ‘or bearer’ and (b) ‘to order’.

(a) Bearer Cheques: A bearer cheque is payable to the person who presents it at the counter for encashment. Such a cheque can be transferred by mere delivery and need not be endorsed. Since it is a bearer cheque, the bank is under no obligation to ascertain that the payment is made to the right person. The language of a bearer cheque runs as follows:

Pay .... or bearer ₹ ....

(b) Order Cheques: An order cheque, on the other hand, is one which is payable to a certain person (named in the cheque) or as per order of that certain person. The language of an order cheque runs as follows:

Pay .... or order ₹ ....

An order cheque can be transferred only by endorsement and delivery. In the case of an order cheque, the bank is under obligation to ascertain that the payment is made to the right person and that all the endorsements are in proper order.

Bank Drafts

Bank drafts, which are also called ***banker's cheques***, are one of the very many services which the banks render to and for their customers. A bank draft is a written order of a bank to a certain sum of money to a person in whose favour the draft has been issued. Normally, bank drafts are issued for payment in another town. It is thus a remittance facility made available by banks to its customers. A charge is, of course, made by bank for the facility thus accorded. Since the charge is not very high, the remittance facility is not costly.

Bank Overdraft

Bank overdrafts are a very common form of borrowing. Overdraft is the drawing out from a bank account of more than what has been deposited in it. Therefore, an overdraft is a credit balance in the books of an enterprise and a debit balance in the bank pass book. The bank and the borrower agree upon the maximum size of the overdraft. In effect, an overdraft is a loan by the banker to the customer, but interest is only charged to the extent and period that the overdraft is used.

Double Column Cash Book—Some Observations

1. Contra Entries

The term 'Contra' refers to the opposite side. Contra is an entry in a double entry account representing the reversal or cancellation of an entry on the other side. When both debit and credit aspects of a transaction are recorded in the same account but in different columns, each entry whether in the debit side or in the credit side shall be deemed to be the contra entry of the other. Observe the following examples:

(i) ***Cash deposited into the bank ₹ 500*** : Here, Bank Account is to be debited and Cash Account is to be credited. Debit aspect is to be recorded in the debit side of the Double Column Cash Book (bank column) and credit aspect is to be recorded in the credit side of the Double Column Cash Book (cash column).

(ii) ***Cash withdrawn from Bank for office use ₹ 1,000*** : Here, Cash Account is to be debited and Bank Account is to be credited. Debit aspect is to be recorded in the debit side of the Double Column Cash Book (cash column) and credit aspect is to be recorded in the credit side of the Double Column Cash Book (bank column).

In the above two cases ***Cash*** should be treated as contra of ***Bank*** and ***Bank*** should be treated as contra of ***Cash***. It should be noted that no narration is required for contra entry. In the L.F. column only 'C' is written.

2. Cheque received and deposited into the Bank on the same day

When cheques are received from customers and are deposited on the same date, Bank Account is debited directly and Customer Account is credited. The amount is written in the bank column (Debit side) of the Double Column Cash Book.

3. Cheque received but deposited into the Bank on a later date

When the cheque is received but not deposited into the Bank on the same date, the cheque is first recorded in the cash column of the Double Column Cash Book. Afterwards, when the cheque will be deposited into the bank it will be recorded as if Cash is deposited into the Bank, i.e. Bank Account is to be debited and Cash Account is to be credited.

Example : On 27th December, 2014 a cheque is received from Ram for ₹ 1,000. However, the cheque was deposited into the Bank on 30th December, 2014.

In the examination, if there is no information as to the date of deposit of the cheque, it may be assumed that the cheque has been deposited on the same date.

4. Cheque received but endorsed in favour of a creditor

When cheque is received but endorsed in favour of a creditor, the cheque is first recorded in the cash column. At the time of endorsement, the Party Account is to be debited and Cash Account is to be credited.

Example : On 26th December, 2014 a cheque is received from S. Dey & Co. for ₹ 600. On 29th December, 2014 it was endorsed in favour of K.B. & Co.

Dr. Cash Book (Double Column) Cr.

Date	Particulars	V.N.	L.F.	Cash	Bank	Date	Particulars	V.N.	L.F.	Cash	Bank
2014						2014					
Dec. 26	To S. Dey & Co. A/c (Being a cheque received from S. Dey & Co,)			600		Dec. 29	By K. B. & Co. A/c (Being the cheque endorsed in favour of K.B. & Co.)			600	
27	To Ram A/c Being cheque received from Ram)			1,000		30	By Bank A/c		C	1,000	
30	To Cash A/c		C		1,000						

5. Bearer cheque received

If the bearer cheque is encashed over the counter, Cash Account is debited. If the bearer cheque received is crossed and paid into bank, the Bank Account is debited.

6. Dishonour of a Customer's cheque

When a cheque is received from a customer and it is deposited into the bank for collection but ultimately returned dishonoured, the Customer Account is debited and Bank Account is credited.

Credit Card Sale

Nowadays sales through credit cards are a very common feature. Credit cards are issued by different banks, like Citi Bank, Standard Chartered Bank, State Bank of India, Canara Bank, and others. Presently available most popular credit cards are—Visa Card, Master Card, American Express Card, and others.

The procedures involved are :

1. A small plastic card, called credit card, is issued by a bank to a prospective cardholder, after verifying his credibility. This card would contain an embossed 16-digit card number and name of the cardholder.
2. When goods are intended to be bought through that credit card, seller fills in a form detailing the description of the goods and uses the embossed nature of the credit card to print the data of the customer on the form. The form is to be countersigned by the customer. A carbon copy of the form is given to the customer.
3. Everyday the seller should sum up the different amounts sold like this and should submit all forms thus obtained, to his bank. The amounts are credited to his account as deposit and debited to the bank account of the credit card company.
4. A commission is charged by the credit card company for each such transaction and is extracted from the seller's bank account by direct debit. The rate of commission varies between 1% to 4%.
5. A monthly statement of account is sent by the credit card company to their cardholders who may pay in full or in part. However, if they do not pay in full, they suffer an interest charge until the full amount is paid up.

Accounting for Credit Cards Sale

From the seller's viewpoint, a credit card sale is one equivalent to a cash sale. However, there is a cost involved, i.e., the monthly commission charge.

Journal Entry

(i) Bank Account	Dr.	[Daily total of credit card sales]
To Sales Account		
(ii) Commission Account	Dr.	[Commission on total monthly credit card sales.]
To Bank Account		

Debit Card

A Debit Card is similar in appearance to a Credit Card and which is offered in a similar way in payment for goods and services. The main difference is that in the case of a debit card such payments are then debited to the holder's bank account in exactly the same way as a cheque.

The advantages of a debit card are :

First, it may be used to make larger payments than might by acceptable by cheque (provided there are sufficient funds in the bank account of the cardholder).

Secondly, it can be used to operate automated teller machines (ATM) with a special personal identification number.

Illustration 2

Record the following transactions in a suitable cash book of Mr P. Basu for the month of January, 2015 and show the closing balances of cash and bank (all figures in ₹).

1 He had cash in hand	50,000	5 Deposited the cheque received from Mr Sunil Ranjan	
2 Opened a Bank Account	30,000	5 Withdrawn from Bank for personal use	3,000
2 Received from Mr T. Bose	4,000	5 Paid Eeectricity Bill	52
3 Paid to Mr N. Gopal in cheque	500	5 Paid rates and taxes	100
3 Purchase made in cash	1,000	5 Purchases made in cash	7,000
3 Paid rent	250	5 Cash sales	12,000
3 Withdrawn from Bank	3,000	5 Sold to Sree Nagarjun	5,000
4 Cash sales	5,000	5 Purchased from Mr Nemai Bose	2,000
4 Received a cheque from Sunil Ranjan	10,000	7 Received a cheque from Sree Nagarjun and sent to Bank	3,000
4 Paid wages	200	7 Paid railway freight	250
4 Purchased furniture in cash and paid by cheque	4,000	7 Purchased stamps and stationery	25
4 Cash purchases	3,000	7 Deposited in Bank Account	300

Solution

On 1st May, 2015, G. Flowers, has the following balances in his cash book: Cash in hand ₹ 2,100, Bank O/D ₹ 7,000.

During the month of May :

Cheques were issued as follows :

- 2nd To Surray ₹ 5,000
- 8th To Hampshire ₹ 4,000
- 19th To City Development Corporation ₹ 2,500 in payment of rates.
- 25th Withdrawn from Bank for use as change in the till ₹ 1,000.
- 31st Proprietor withdraw for private purposes ₹ 5,000.

Cheques were received as follows :

- 17th From Mrs Lancashire ₹ 1,300 in payment of monthly account.

On 30th May you are adviced by the bank that this cheque has been returned marked "No Balance".

Cash received during the month :

Cash sales for the week ending 6th May ₹ 6,250, of which ₹ 5,000 was paid to the bank.
Cash sales for the week ending 13th May ₹ 7,500 of which ₹ 6,000 paid to the bank.
Cash sales for the week ending 20th May ₹ 8,000, of which ₹ 7,000 paid to the bank.

Cash sales for the week ending 27th May ₹ 7,500 of which ₹ 5,000 paid to the bank.

Cash paid out during the month :

Wages - 6th, 13th, 20th, 27th : ₹ 1,500 on each day
23rd. Telephone account ₹ 750
29th Delivery ₹ 400.

You are required to draw up a Double Column Cash Book for the month of May and enter the above transactions in date order. Balance the Cash Book as at 31st May.

Solution

Cash Book with Cash, Bank and Discount Column (Triple Column Cash Book)

The most exhaustive Cash Book is the Triple-column Cash Book, which has three amount columns on either side, viz, cash, bank and discount. The discount column is provided for recording discount. It is suited to large business houses which make and receive payments in cash and by cheques and which receive/allow cash discounts.

Cash column and Bank column of the Cash Book represent Cash Account and Bank Account of the ledger, no separate account for cash and bank are to be opened in the ledger. But in respect of discount column, the Cash Book continues to be just a book of original entry. At the end of a specific period, usually a month, the aggregate of the debit side of the discount column of the Cash Book is posted to the debit side of the Discount Allowed Account, separately maintained in the ledger. Similarly, the aggregate of the credit side of the discount column of the Cash book is posted to the credit of Discount Received Account, separately maintained in the ledger.

In regard to the discount columns of a triple-column cash book, the following points are worth noting :

1. The two discount columns on the two sides are two different accounts—they bear no relationship with each other.
2. These are (in the nature of memoranda) and double entry principle is not followed.
3. Unlike cash and bank columns (which are balanced at the end of a particular period), these two columns are separately totalled and the aggregate amounts are transferred to separate ledger accounts as mentioned earlier.

Discount

Discount is a reduction from a stated amount. In general, it is the difference between a face value and a lower amount paid or received.

There are two kinds of discounts :

(a) Trade Discount; and

(b) Cash Discount.

Trade Discount

Trade Discount represents an allowance which is made by the manufacturers to the wholesalers or by the wholesalers to the retailers and it is calculated as a percentage of list or catalogue prices of goods supplied. Between traders, the trade discount represents the profit that the buyer will make by reselling the goods.

The trade discounts are not separately recorded in the books of account. When entering invoices in the Purchases Day Book or Sales Day Book, only the ***net total*** of the invoices are shown in the total column.

Example : We purchase goods from M/s. A & Co., 20 bales of cotton @ ₹ 1,000 per bale, less 10% trade discount. How will this transaction be recorded in the books of account ?

Purchases Day Book

Date	Particulars	Invoice No.	L.F.	Details (₹)	Total (₹)
	M/s A & Co. 20 bales of cotton @ ₹ 1,000 per bale Less: 10% Trade Discount			 20,000 2,000	 18,000

Dr. Purchases Account Cr.

Date	Particulars	₹	Date	Particulars	₹
	To M/s A & Co. A/c	18,000			

Dr. M/s. A & Co. Account Cr.

Date	Particulars	₹	Date	Particulars	₹
				By Purchases A/c	18,000

Similarly, credit sales are recorded in the Sales Day Book after deducting trade discount from list price.

Cash Discount

Cash Discount is allowed to encourage a debtor to payoff his debt within a specified period. If the debtor settles his account within a given time period, he is entitled to reduce his bill by the agreed amount. The invoice sent by the suppliers or to the customers will usually contain details of cash discount. For example : (i) Payment within 7 days, 10% cash discount; (ii) Payment within 14 days, $7^1/_2$% cash discount; and (iii) Payment within 21 days, 5% cash discount. Cash discount is recorded in the books of account when the payment is made within the specified period. The accounting entries are as follows :

(i) When cash discount is allowed

Cash/Bank Account Dr.

Discount Allowed Account Dr..

To Debtors' Account

(ii) When cash discount is received

Creditors' Account Dr.

To Cash/Bank Account

To Discount Received Account

Look at the effect on the accounts in the example below :

Example : On 30th November, 2014 X sells to Y goods costing ₹ 40,000 after a cash discount of 2.5% for prompt payment within 15 days. The Ledger Account will be as follows :

In the books of X

Dr. Y Account Cr.

Date	Particulars	₹	Date	Particulars	₹
30.11.2014	To Sales A/c	40,000			

Now, if Y pays on 10th December, 2014, he will pay ₹ (40,000 – 1,000) = ₹ 39,000. Let us assume that the payment was made by cheque. Therefore, Bank Account will be debited and Y Account will be credited. Y's Account now becomes :

Dr. Y Account Cr.

Date	Particulars	₹	Date	Particulars	₹
30.11.2014	To Sales A/c	40,000	10.12.2014	By Bank A/c	39,000

From Y's Account, it appears that he owes ₹ 1,000 to X. But it is not true, ₹ 1,000 should be treated as cash discount allowed to Y and Y Account will be credited by that amount. The final position is :

Dr. Y Account Cr.

Date	Particulars	₹	Date	Particulars	₹
30.11.2014	To Sales A/c	40,000	10.12.2014	By Bank A/c	39,000
			10.12.2014	By Discount Allowed A/c	1,000
		40,000			40,000

Dr. Discount Allowed Account Cr.

Date	Particulars	₹	Date	Particulars	₹
30.11.2014	To Sales A/c	1,000			

It should be noted that discount may be allowed when payment is received by cheque but this discount should be written back if the cheque is dishonoured. The entry for writing back the discount allowed should be done through Journal Proper, not through the Cash Book. Likewise, discount may be received when payment is made by cheque, but this discount should be written back if the cheque previously issued, is dishonoured. However, the entry for bank should be passed through Cash Book.

In the books of Y

Dr. X Account Cr.

Date	Particulars	₹	Date	Particulars	₹
			30.11.2014	By Purchases A/c	40,000

After payment on 10th December, 2014, X's Account will appear as follows :

Dr. X Account Cr.

Date	Particulars	₹	Date	Particulars	₹
10.12.2014	To Bank A/c	39,000	30.11.2014	By Purchases A/c	40,000
10.12.2014	To Discount Received A/c	1,000			
		40,000			40,000

Dr. Discount Received Account Cr.

Date	Particulars	₹	Date	Particulars	₹
			10.11.2014	By X A/c	1,000

Points to remember

Cash discounts are allowed for the following purposes :
(i) To improve the cash inflow of the business for investing the fund elsewhere; and
(ii) To reduce the possibility of bad debts.

Illustration 5

Prepare a triple Column Cash Book from the following transactions for the month of November, 2014 and bring down the balance for the start of next

1 Cash in hand	2,500	16 Paid to Amarnath by cheque	1,450
1 Cash at Bank	10,000	16 Discount received	50
2 Paid into Bank	1,000	19 Paid into Bank	400
5 Bought furniture and issued cheque	2,000	23 Withdrawn from Bank for Private expenses	600
8 Purchased goods for cash	500	24 Received cheque from Patel	1,430
12 Received cash from Mahindar	980	24 Allowed him discount	20
12 Discount allowed to him	20	26 Deposited Patel's cheque into Bank	—
14 Cash Sales	4,000	28 Withdrew cash from Bank for Office use	2,000
		30 Paid rent by cheque	800

Solution

Dr. **Discount Allowed Account** **Cr.**

To Sundry Debtors A/c	40		

Dr. **Discount Received Account** **Cr.**

		By Sundry Creditors A/c	50

Tutorial Note s:

(1) Discount allowed ₹ 40 and discount received ₹ 50 should be posted in respective accounts in the ledger.

(2) When cheque is not deposited immediately into the Bank, the cheque is entered first in the Cash column and at the time of deposit, Bank A/c is debited and Cash A/c is credited (See transaction of 24th Nov. of this problem).

Illustration 6

From the following information write up Cash Book (Bank and Discounts columns only) of M H Kabir

(a) His bank balance at the close of business on 26th July 2015 according to his cash book, was ₹ 45,000

(b) The counterfoils of his pay-in-slip give the following details:
29th July : Total deposit ₹ 9,850, consisting of cash from sales ₹ 2,500, a cheque from A James for ₹ 2,475 and a cheque from L. Long for ₹ 4,875. Long's cheque was accepted in full settlement of ₹ 5,000 owed by him.
30th July : Total deposit ₹ 2,500, consisting entirely of cash from sales.
31st July : Total deposit ₹ 3,750, consisting of cash from sales ₹ 1,950 and a cheque from H Kapoor for ₹ 1,800.

(c) The counterfoils of his cheque book show:
29th July : Rabin Hood and Co. ₹ 16,250
30th July : Mukherjee and Co. ₹ 9,500
31st July : Petty cash ₹ 1,500; Self ₹ 5,000; Dewar's Garage ₹ 1,000

The Cheque to Mukherjee and Co. was accepted in full settlement of ₹ 10,000. The Cheque to Dewar's garage was for petrol, oil, repairs, and so on, for the previous month, and no portion of this transaction had gone through the books.

The particulars column of the Cash Book should indicate clearly which ledger accounts should be debited or credited in respect of each Cash Book entry. Balance the Cash Book at the close of the business on 31st July, 2015.

			61,100	125				61,100	500
Aug. 1	To Balance b/d		27,850						

Tutorial Notes :

(1) At the end of the month total discount allowed is debited to Discount Allowed Account in the ledger.

(2) At the end of the month total discount received is credited to Discount Received Account in the ledger.

Illustration 7

Reid Limited keeps a full accounting system which includes a Cash Book, ruled to include columns for cash in hand, cash at bank, discount allowed and discount received.

On April 23, 2015, the following balances and totals appeared in the Cash Book (all figures in ₹) :

Cash in hand	4,200
Cash at bank	7,650
Discounts allowed total	420
Discounts received total	950

The following transactions affecting the Cash Book occurred during the last week of April :

April 23 General expenses ₹ 920 were paid in cash.

24 Cash sales totalled ₹ 9,200.

25 A cheque for ₹ 3,040 was received from a debtor, K. Ball, in settlement of his account at this date ₹ 3,200.

26 A Paying-in-slip counterfoil showed that cash ₹ 8,200 had been banked.

27 A cheque was sent to Reid Limited's supplier, Baker Limited, in settlement of the amount due at this date, ₹ 14,000 less 5% cash discount.

28 Notification was received from bank that a cheque for ₹ 2,210 received from T Mc Dermot, a credit customer, during February, 2015 was dishonoured.

30 An old delivery van was sold for ₹ 71,000. A cheque for this amount was received on this date.

30 A cheque was sent to a creditor, Ford Limited, in immediate payment of an invoice received from this supplier on this date. The invoice detailed stock at list price ₹ 8,000 less 25% trade discount, and 5% cash discount.

In the books of Reid Limited, prepare the Three Column Cash Book for the period 23-30 April, 2015, recording all the information given above. Balance the cash and bank accounts and total the discount columns at the end of the month.

Solution

In the books of Reid Limited

Cash Book (Triple Column)

Dr. **Cr.**

Date	Particulars	L F	Cash	Bank	Discount Allowed	Date	Particulars	L F	Cash	Bank	Discount Received
2015			₹	₹	₹	2015			₹	₹	₹
April 23	To Balance b/d		4,200	7,650	420	April 23	By Balance b/d		—	—	950
24	To Sales A/c (Being goods sold for cash)		9,200	—	—	23	By General Exp. A/c (Being general expenses paid)		920	—	—
25	To K Ball A/c (Being a cheque recd. from K Ball for ₹ 3,040 in full settlement of a debt of ₹ 3,200)		—	3,040	160	26	By Bank A/c	C	8,200	—	—
26	To Cash A/c	C	—	8,200	—	27	By Baker Limited A/c (Being paid by cheque and recd discount @ 5% on ₹ 14,000)		—	13,300	700
30	To Delivery Van A/c (Being the sale of old delivery van)		—	71,000	—	28	By Mc Dormot A/c (Being the cheque dishonoured)		—	2,210	—
						30	By Ford Ltd A/c (Note 1) (Being paid by cheque and discount received @ 5% on ₹ 6,000)		—	5,700	300
						30	By Balance c/d		4,280	68,680	—
			13,400	89,890	580				13,400	89,890	1,950

Working Note :

(1) Net amount was due from Ford Limited after 25% trade discount = ₹ 8,000 – ₹ 2,000 = ₹ 6,000. Cash discount is allowed on net amount after deducting trade discount. Therefore, the amount of cash discount will be 5% of ₹ 6,000 = ₹ 300. The amount of cheque will be ₹ 6000 – ₹ 300 = ₹ 5,700.

Illustration 8

Record the following transactions of Keshab in the Cash Book and Journal. Only transactions not suitable for the Cash Book are to be taken to the Journal. Keshab has an overdraft arrangement with the bank subject to a maximum limit of ₹ 5,000.

2015		
April	1	Cash balance brought forward ₹ 1,260.
	1	Bank overdraft brought forward ₹ 3,600.
	1	Advanced to petty cashier by cheque ₹ 500.
	2	Received from Tarun a cheque for ₹ 580 for goods sold in March, 2015. Allowed him discount ₹ 20.
	3	Received from Tanmay ₹ 800. The amount was written-off as bad last year.
	4	Paid cash into bank ₹ 1,500.
	6	Sold goods to Tamal for ₹ 4,000 subject to 10% trade discount and 5% discount for cash in 10 days.
	9	Received from Debesh in full settlement of his account of ₹ 1,600. Somesh's acceptance for ₹ 1,500. Discounted the bill with the banker for ₹ 1,450.
	10	Consignment to Sharma & Co, Baroda, goods worth ₹ 5,000.
	10	Paid freight and insurance on the above ₹ 250.
	11	Tamal gave a cheque in settlement of his account.
	12	Paid Abir by cheque ₹ 1,750, the balance of his account less ₹ 50 discount.
	15	Purchased goods from Sarit for ₹ 3,000 and accepted a bill drawn by him for the amount. Paid carriage on purchase ₹ 150.
	17	Drew cheque for office cash ₹ 500.
	18	Purchased an office desk by cheque ₹ 1,870. Paid cartage thereon in cash ₹ 100.
	20	Somesh's acceptance returned dishonoured noting charges paid by the bank ₹ 20.
	21	Debesh gave a cheque in full settlement of his account.
	25	Goods of the value ₹ 1,800 insured with National Insurance Co for ₹ 1,500 destroyed by fire. The insurance company accepted the claim and sent a cheque for the amount.
	26	Purchased through bank ₹ 5,000, 8% Govt Bonds at ₹ 95. Commission, stamps and fees ₹ 50.

27 Auctioned a typewriter, book value ₹ 500, for ₹ 700.
28 Received from Haran cheque for ₹ 600, in full settlement of account, ₹ 850, he (Haran) being in financial difficulties.
30 Drew cheque for office cash raising the overdraft to the maximum permissible limit.

27	Office Equipments A/c Dr. To Profit and Loss A/c (Being the profit on sale of typewriter)		200	200

Working Notes :

(1) Goods sold to Tamal on credit for ₹ 4,000 less 10% trade discount will be recorded in the Sales Day Book (But here it has been recorded in journal).
When Tamal will pay, it will be recorded in the Cash Book.
After trade discount, amount due from Tamal was (₹ 4,000 – ₹ 400) = ₹ 3,600. He is entitled to cash discount of 5% if he is making the payment within 10 days.
Therefore, the amount received from Tamal = ₹ 3,420 (95% of ₹ 3,600) and discount allowed = 5% of ₹ 3,600 = ₹ 180.

The Petty Cash Book

The chief cashier of a firm generally deals with cash receipts and payments which amounts to hundreds or thousands of ₹ everyday. Because of this heavy responsibility for large payments, he delegates the responsibility for small day-to-day transactions to some senior members of the staff. The person responsible for those small or petty payments records such transactions in a petty cash book. Petty cash is the cash balances held in the form of notes and coins rather than bank deposits and is used in payment of minor expenditures. Almost all businesses are to spend small sums of money for variety of small regular expenses, for instance, bus fares, office teas, purchasing of a newspaper, pins, and the like.

Generally, major payments are made by cheque for better control over cash. Inspite of this advantage, payments by cheque in the above cases are impractical. As a solution, a ***Petty Cash Fund*** is established by transferring a small amount of cash from Head Cashier to a person who is designated to be responsible for it—the ***Petty Cashier.***

A cashier is a person whose responsibility with an organisation is to receive and issue cash and to maintain records in connection with that activity. Such person may be a bookkeeper, a receptionist or a reliable employee. The petty cashier will record all the petty transactions in a separate book called ***Petty Cash Book***. The receipts of cash are entered in the debit side of the petty cash book (in the general Cash Book, cash is credited or bank is credited if petty cash is withdrawn by cheque). All payments are entered in the credit side.

Systems of Petty Cash

The cashier is given petty cash either on the ordinary system or on the imprest system.

Ordinary System of Petty Cash : Under this system, the petty cashier is given a lump sum amount of cash. After spending the whole amount, he submits the account to the head cashier.

Imprest System of Petty Cash : Imprest system is a system of controlling petty cash. Under this system, a fixed sum or float (float is a small sum of money available for immediate use) is allocated as sufficient to meet petty cash expenditure for an agreed period of time (say, a week or a month). At the end of the agreed period, the petty cashier submits the account of the amount spent by him. The sum expended by the petty cashier is reimbursed, thus making up the balance to the original sums. From the control point of view, this system has the advantage that at any point of time the petty cash balance plus the total value of vouchers which have not been reimbursed will equal the agreed float.

Advantages of the Imprest System :

1. It saves the time of the Chief Cashier, who is generally a busy person with responsibilities.
2. Petty cashier is not allowed to keep idle cash with him; if the float is found to be more than adequate, its amount will be immediately reduced. This reduces the chances of misuse of cash by the cashier.
3. Since, the ***imprested*** sum is small, it does not provoke the person in charge of it or others in the office to misappropriate it.
4. The record of petty cash is checked by the cashier, periodically, so that a mistake, if committed, is soon rectified.
5. It enables a great saving to be effected in the posting of small items to the ledger accounts since, it uses an analysis system which collects these small items together into weekly or monthly totals. These are posted to the ledger accounts, where the items are individual in nature, for example, small payments to creditors are entered in column called ledger accounts.
6. It trains young staff to handle money with responsibility.

Simple Petty Cash Book

The Simple Petty Cash Book is written just like the Cash Book. Any cash which the petty cashier receives will be recorded in the left-hand side cash column (debit column) and any cash which he pays out will be recorded in the right-hand side payment column. The date and particulars of every transaction will be written in the same date and particulars column. The ruling of a simple Petty Cash Book is given below:

Dr. **Simple Petty Cash Book** **Cr.**

Cash Received	C.B. Folio	Date	Particulars	Voucher No.	Total Payment
Money received					
			Money paid		

The operations of the Simple Petty Cash Book is illustrated below.

Illustration 9

From the following particulars prepare a Petty Cash Book for the month of January 2015 :

			₹
Jan.	1	Drew for petty cash	100
	3	Paid for postage	15
	5	Paid for telephone	2
	8	Paid for cartage	7
	9	Paid for postage	10
	12	Paid for sundries	5
	27	Paid for taxi fare	12

If the imprest amount is ₹ 100, show what amount the petty cashier would be entitled to draw at the beginning of the next month.

Solution

Dr. **Petty Cash Book** **Cr.**

Cash Received	C.B. Folio	Date	Particulars	Voucher No.	Total Payment
100		2015 Jan. 1	To Bank		₹
		3	By Postage A/c		15
		5	By Telephone A/c		2
		8	By Cartage A/c		70
		9	By Postage A/c		10
		12	By Miscellaneous Expenses A/c		5
		27	By Travelling Expenses A/c		12
		31	By Balance c/d		49
100					100

49			Feb. 1	To Balance b/d		
51			1	To Bank		

Tutorial Note : Total petty expenses for the period is ₹ 51. At the beginning of February 2015, the petty cashier will get ₹ 51.

Analytical Petty Cash Book

The most advantageous method of recording petty cash payment is to enter them in the Analytical Petty Cash Book. In the Analytical Petty Cash Book, a separate column is used for each commonly occurring item of expenditure such as postage, stationery, travelling, wages, and the like. When a petty expense is recorded in the right-hand total payment column, the same amount is immediately recorded in the appropriate analysis column. At the end of a particular period, all the analysis columns are added and posted to the debit side of the respective accounts.

Under imprest system of petty cash, the new petty cash will be reimbursed, at the end of each week or other convenient period, with the exact amount he has spent. The petty cashier will start the period with same amount of money—the imprest amount.

The following points are worth noting :

1. The pages are not divided down the centre, major space is provided for credit side and the debit side contains only two columns—money column and cash book folio column.
2. The chief item of receipt is the original imprest. Other items include the money collected from private telephone calls, sale of old newspapers, and so on.
3. Money disbursed is recorded in the credit side and then analysed out into number of analysis columns which serve as collection columns for a large number of small items. Thus all the stationery is collected in the 'Stationery' column.
4. Certain payments cannot be added together in the above way, for example, small payments to creditors. A special column is provided, under the heading 'Ledger Account' to record these types of payments. These items are posted separately to their respective accounts in the ledger.

Balancing off the Petty Cash Book

At the time of balancing off the Petty Cash Book, a line is drawn right across the figures on the credit side and all the columns are added up. Then only the analysis columns are closed with a double line, the total column being left open.

The balance of petty cash in hand is found out after deducting the total of the payment column in the credit side from the received column in the debit side. This is inserted in the credit column, the book is balanced off and the balance is brought down.

The ruling of an Analytical Petty Cash Book is given below :

Dr. **Analytical Petty Cash Book** **Cr.**

Cash Recei-ved	C. B. Folio	Date	Particulars	Petty Cash V.No.	Total Payment	Postage	Travelling Expenses	Statio-nery	Sundry Expenses	Ledger Account	Folio

Illustration 10

From the following transactions for the month of March 2015, draw up a Petty Cash Book in analytical form with : (i) Postage and Stamps; (ii) Coolie and Cartage; (iii) Printing and Stationery; (iv) Conveyance; (v) Miscellaneous; and (vi) Ledger Account — columns. Show the reimbursement by the General Cashier to the Petty Cashier on 1.4.2015 under the imprest system of petty cash: (all figures in ₹)

1 Petty cash balance	22.00	22 ₹ 10.00 was paid to coolies for shifting office furniture	
Reimbursement by the general cashier	278.00	23 Mr Ram Murty was paid ₹ 28.50 out of petty cash.	
5 Conveyance ₹ 18.00 paid to an employee.		27 Local travelling expenses reimbursed to office peon	4.00
9 Postal stamps bought	4.50	29 The driver of the office car was given ₹ 15.00 to pay the 'fine' for violation of traffic rules.	
16 Cost of blank papers and carbon papers	11.00	31 ₹ 12.00 was spent to send a registered letter by post.	
19 Tips given to the office peon for extra work	5.00		
21 Purchased memo-books for ₹ 143.00, carrying cost on the same amounted to	2.00

330	19	7	To Cash A/c								

The Cash impressed for petty cash purposes are debited in the petty cash book and credited in the main cash book.	These totals are posted to the debit side of the respective account in the general ledger.	These credit items are posted to the debit side of the creditors accounts in the creditor's ledger.

Key Points

- The Cash Book is a subdivision of the book of original entry, recording transactions involving receipts or payments of cash.
- The ***Single Column Cash Book*** makes a record (with narration) of only cash transactions, and it is just like any other Account.
- The Cash Book in which cash and transactions involving receipts and payments by cheques are recorded is called ***Double Column Cash Book***.
- The most exhaustive Cash Book is the ***Triple-column Cash Book***, which has three amount columns on either side, viz, cash, bank and discount. The discount column is provided for recording discount.
- ***Trade Discount*** represents an allowance which is made by the manufacturers to the wholesalers or by the wholesalers to the retailers and it is calculated as a percentage of list or catalogue prices of goods supplied.
- ***Cash Discount*** is allowed to encourage a debtor to payoff his debt within a specified period. If the debtor settles his account within a given time period, he is entitled to reduce his bill by the agreed amount.
- ***Petty cash*** is the cash balances held in the form of notes and coins rather than bank deposits and is used in payment of minor expenditures.
- ***Imprest system*** is a system of controlling petty cash. Under this system, a fixed sum or float (float is a small sum of money available for immediate use) is allocated as sufficient to meet petty cash expenditure for an agreed period of time.

THEORETICAL QUESTIONS

1. What are the different kinds of cash books ?
2. What do you mean by contra entries ? Illustrate with examples.
3. (a) What do you mean by petty cash book ?
   (b) Explain the imprest system of petty cash.

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to answer the following questions :

1. A debit entry in the cash account is matched by a credit entry in T. Porwal's Account. What do these entries record?
   A Goods sold to T. Porwal for cash
   B Payment of cash to T. Porwal
   C Purchase of goods from T. Porwal for cash
   D Receipt of cash from T. Porwal
2. Joy occupies part of Natasha's business premises. Which entry in Natasha's books records the rent Joy pays her ?

	Debit Account	*Credit Account*
A	Bank	Rent Payable
B	Bank	Rent Receivable
C	Rent Payable	Bank
D	Rent Receivable	Bank

3. A trader withdraws money from his bank account for personal expenses. Which entry records this in his books ?

	Debit Account	*Credit Account*
A	Bank	Capital
B	Bank	Drawings
C	Capital	Bank
D	Drawings	Bank

4. Which is both a book of journal and a ledger ?
   A Cash Book
   B General Journal
   C Purchases Journal
   D Sales Journal

5. How is the cash purchase of goods for resale entered in books of account ?

	Debit Account	*Credit Accountnt*
A	Cash	Purchases
B	Cash	Creditors
C	Purchases	Cash
D	Creditors	Cash

6. A owes ₹ 1,000 for goods bought on credit. A pays B the amount owed by cheque, less 2.5% cash discount. Which entry in A's book records this ?

	Debit account(s)	*Credit account(s)*
A	B ₹ 1,000	Bank ₹ 975 Discount received ₹ 25
B	Bank ₹ 975 Discount received ₹ 25	B ₹ 1,000
C	B ₹ 1,000	Bank ₹ 975 Discount allowed ₹ 25
D	Bank ₹ 975 Discount allowed ₹ 25	B ₹ 1,000

7. Discount allowed is an
   A Expense
   B Income
   C Receipt
   D Payment
8. A credit balance of ₹ 10,000 in the bank column of the cash book shows that
   A the amount received exceeds the amount paid out by ₹ 10,000
   B ₹ 10,000 has been lost
   C the accounts clerk has made mistakes
   D the bank account has been overdrawn
9. If the bank account shows a credit balance of ₹ 1,000, the accountholder deposits ₹ 400 and draws a cheque for ₹ 300, the balance in the bank account should be
   A ₹ 900 debit
   B ₹ 1,100 debit
   C ₹ 900 credit
   D ₹ 1,100 credit
10. A debit balance of ₹ 5,000 in the cash column of the cash book shows that
   A ₹ 5,000 has been paid out
   B ₹ 5,000 is owing
   C the amount received exceeds the amount paid by ₹ 5,000
   D ₹ 5,000 has been credited into the bank account
11. Yasmin purchased some office equipment for use in her business. The equipment was faulty and she returned it to the supplier who refunded the cost to Yasmin. Which entries in Yasmin's books record the return of the equipment?

	Debit Account	*Credit Account*
A	Bank	Purchase Returns
B	Bank	Office Equipment
C	Purchase Returns	Bank
D	Office Equipment	Bank

12. A trader returns goods to the supplier and received a refund. Which entries record the refund in the trader's books ?

	Debit Account	*Credit Account*
A	Bank	Purchases
B	Bank	Purchases Returns
C	Purchases	Bank
D	Purchases	ReturnsBank

13. Discount allowed in the cash book should be
   A balanced
   B posted to the respective account in the ledger
   C posted to the respective side of the same discount account
   D ignored

14. The words 'Account Payee only' are written as part of a crossing on a cheque. What does this mean?
    A It can be encashed by the named payee
    B It may be paid into any account at any bank
    C It must be credited to an account at the bank on which it is drawn
    D It must be credited to the bank account of the named payee
15. Which of the following is not treated as cash ?
    A Money order
    B Bank Drafts
    C Post-dated Cheques
    D Coins
16. The bank account maintained by the enterprise is a
    A Real Account
    B Nominal Account
    C Personal Account
    D Valuation Account
17. How is the credit card sale recorded in the books of account ?
    A recording in the sales day book as credit sales
    B debiting cash account and crediting sales account in the cash book
    C debiting bank account and crediting sales account in the cash book
    D debiting customers' account and crediting sales account
18. Which of the following phrase represents discount received ?
    A It is a reduction from a stated amount
    B It is a deduction against the amount owed by a debtor in order to encourage early payment
    C It is a discount deducted by a debtor from the invoiced price of goods sold
    D It is a discount deducted by an enterprise from the amount due to him for goods purchased
19. Which of the following phrase does not represent cash ?
    A It is accepted by a banker at face value
    B It is immediately available for the settlement of debts
    C This is an amount that an enterprise has of notes and coins
    D It is a bill of exchange which is to be discounted through bank
20. Which of the following is not true ?
    A The cash book is a substitute for cash account in the ledger
    B A narration is required for a contra entry
    C The cash book records only one aspect of a transaction
    D Like ledger, a cash book is also a book of final entry.

PRACTICAL QUESTIONS

1. From the following particulars, write up a Single Column Cash Book.

2015, January	₹	2015, January	₹
1 Cash in hand	1,600	16 Paid Salary	400
3 Paid for postage	5	17 Paid travelling expenses	100
5 Sold goods to Banerjee & Sons on credit	1,000	19 Cash sales	250
6 Cash sales	400	20 Paid to Ray & Co.	100
8 Deposited cash into bank from office cash	300	22 Paid rent by cheque	300
9 Received from Dutta Bros in cash ₹ 500; Allowed discount	50	24 Sold goods on credit to Bidhan Nandy	500
10 Purchased Stationery	25	25 Purchased goods from Samar Sanyal on credit	250
12 Received cash from Sarajuddin & Sons	300	28 Cash purchases	200
14 Purchased goods from Raha Bros	1,000	31 Cash Sales	500
15 Purchased goods from Rahim & Co. for cash	300		

2. Enter the following transactions in the Cash book with cash, discount and Bank columns.

2015, January	₹	2015, January	₹
1 Balance of cash in hand	400	14 Electricity charges paid	10
1 Balance at bank (overdraft)	5,000	16 Drew cheque for personal use	700
4 Invested further capital of ₹ 10,000 out of which ₹ 6,000 deposited in the bank		17 Cash sales	2,500
5 Sold goods for cash	3,000	18 Collection from Atul ₹ 4,000; deposited into the Bank next day	
6 Collected from debtors of last year ₹ 8,000;		22 Drew cheque for petty cash	150

and discount allowed to him ₹ 20130 Purchased goods for cash	5,500	24 Dividend received by cheque ₹ 50, deposited in the Bank on the same day	
11 Paid Ramvilas, our creditor ₹ 2,500 and discount allowed ₹ 65		25 Commission received by cheque ₹ 230; deposited into bank on 28th	
13 Commission paid to our agent	530	29 Paid from Bank, salary of the office staff	1,500
14 Office furniture purchased from Keshav	200	29 Paid salary of the manager by cheque	500
14 Rent paid	50	30 Deposited cash into bank	1,000

3. From the following information, prepare a Triple-Column Cash Book of A James :
   (a) At the close of business on 24th January, 2015 the Cash Book balances were: office cash ₹ 15,670, bank ₹ 1,56,940 (debit). For the period 1-24 January the entires made in the discount allowed and discount received columns totalled ₹ 11,760 and ₹ 8,330 respectively.
   (b) Some credit customers have settled their accounts by cheque and the cheques here been paid into the bank :

			Amount due (₹)	Cash Discount deducted
January	25	G Long	26,400	2.5%
	28	D Fender	27,600	2.5%
	30	B Keeper	14,800	5%

   (c) Payments made out of office cash :

			₹
January	25	Travelling	2,850
	28	Postage stamps	1,260
	29	Stationery	1,820

   (d) Payments by cheque to settle creditors' accounts :

			Amount due (₹)	Cash Discount deducted
January	25	N Morris	1,06,540	Nil
	26	F Talbot	61,600	2.5%
	30	J Ford	41,950	Nil

   (e) Other payments made by cheque :

			₹
January	26	Telephone bill	17,530
	26	Repairs to Typewriter	4,340
	29	Wages and Salaries	1,36,060

   (f) Cash sales are always paid intact into the bank at the end of the day. The total for 25-31 January, which you can enter in one amount, was ₹ 3,60,045.
   (g) At 31.1.2015, bank statement shows that the cheque sent to J. Ford on 30th January has not yet been cleared.
4. A petty cash book is kept on imprest system, the amount of imprest being ₹ 50 and has six analysis columns for postage, stationery, travelling expenses, repairs, office expenses and ledger accounts. Enter the following:

2015, January	₹	2015, January	₹
1 Petty cash in hand	9.72	12 Paid to Chandaran	17.50
1 Received cash to make up the imprest	40.28	18 Paid railway fare	5.35
7 Brought stamp	4.75	25 Paid for repairs to typewriter	2.90
8 Paid railway fare	7.25	25 Paid for stationery	1.75
8 Paid bus fare	1.05	30 Paid for office expenses	4.00

5. Write the following transactions in a Three-Column Cash Book and bring down the balances:

2015			₹
Dec.	1	Cash in hand	200
		Cash at bank	1,800
	4	Received cash from Sri Ram	95
		Allowed him discount	5
	6	Purchased stationery for cash	20
	7	Paid to Sri Shyam by cheque	330
		Received discount	10
	12	Rahim settled his account for less 5% discount by cheque	500
	18	Paid sundry expenses in cash	30
	23	Paid to Sri Jadu in cash	190
		Received discount	10

	24	Withdrew from bank for office cash	100
	28	Withdrew from bank for personal use	150
	29	Bought goods by cheque	500
	31	Sold goods for cash	200

6. From the following particulars, prepare a Triple-Column Cash Book for the month of January, 2015 :

			₹
Jan.	1	Cash in hand	2,500
		Cash at bank	12,600
	2	Received cash from Roy	2,900
		Allowed him discount	100
	7	Purchased goods for cash	2,000
	12	Received from Sen	3,000
		Allowed him discount	120
	14	Paid Shyam by cheque	4,000
		Received discount	230
	16	Jadu settled his account for (less 5% discount) in cash	5,000
	20	Paid salary to domestic servants in cash	300
	21	Purchased furniture in cash	600
	22	Paid Madhu in cash	2,500
		Received discount	200
	24	Withdrew from bank for office use	3,000
	25	Repaid loan from Paritosh (including interest ₹ 250)	5,500
	28	Withdrew from bank and paid tuition fees for children	500
	29	Sold goods for cash	5,600
		Paid carriage thereon	60

7. The following items have yet to be recorded in the Cash Book of J A Summerfield for the first week in January 2015.

1	Balance in Cash Account	50
1	Overdrawn bank balance	263
	Cheque counterfoils show :	
3	J B Smith Ltd (cash discount taken ₹ 4)	120
4	A E Evans Ltd	146
5	K L M Spares (cash discount taken ₹ 3)	127
6	Restoring the petty cash imprest	45
	Paying in counterfoils show :	
3	M S Supplies	136
4	J O Jones (cash discount taken ₹ 4)	246

The following additional items should also be recorded in the Cash Book :

The *bank statement* shows :	₹
Direct debit payment — Shop Insurances plc	100
Credit transfer received – ABC Traders	120
Bank charges	23
Bank interest paid	46
The week's till rolls show a cash receipts total of	467
There were cash payments of :	
Part time wages	40
Postage stamps	27

It is the business's policy to retain a cash float of ₹ 50 at the end of each week and pay the rest of the cash into the Bank. This was done on 7 January, 2015.

Record the information in the Cash Book and balance the Cash Book on 7 January, 2015.

Bank Reconciliation Statement

Introduction

A business concern can open an account with the bank by paying an initial sum of money. The banker acts as a custodian of the spendable funds of the business. The customer may deposit cash or cheque with the aid of a 'Paying-in-slip' and can withdraw money by means of a cheque. Since the banker is the trustee of the customer, the bank provides to its customer a ***Bank Statement*** at regular intervals (generally during the 1st week of each month), which summarizes payments as well as deposits and other charges for the period. In fact, Bank Statement is a copy of the customer's account in the Bank's Ledger.

To ascertain the bank balance, a concern has two sources of information:

1. Bank column of the cash book; and
2. Bank Statement (Pass Book).

On principle, the two balances should be *equal and opposite* on a stated date. But usually these two balances do not agree. The main reason for the difference in balances is owing to the fact that no party intimates the other every time a transaction takes place. It is interesting to know that many of the transactions of the customer are intimated to the banker by a third party (for instance, when a cheque is presented). Disagreement in balances may also arise owing to mistake or mistakes in the Cash Book or Bank Statement.

Since the two balances are different, if all the facts are brought together, it should be possible for them to be reconciled by means of a Bank Reconciliation Statement.

By reconciliation, the Cash Book balance can be proved by comparing it with the bank statement. Bank Reconciliation is an important part of the internal control system over cash balance lying in the bank. As a prudent policy, Bank Reconciliation should be done by a person who is not in charge of the Cash Book.

Bank Reconciliation Statement

Bank Reconciliation Statement is a statement which contains a complete and satisfactory explanation of the differences in balances as per the Cash Book and Bank Statement.

The preparation of Bank Reconciliation Statement is not a part of the double entry bookkeeping system. It is just a procedure to prove the Cash Book balance.

It should be noted that : (1) a Bank Reconciliation Statement is to be prepared whenever a Bank Statement is received; and (2) it is prepared on a stated day.

Importance of Bank Reconciliation

Bank reconciliation is an usual and valued practice of almost all business concerns. Valued because, it is an important mechanism of internal control of cash inflow and outflow. Both of them must tally as per Cash Book with the Bank Statement. This brings into focus errors and irregularities, if any. Because of the fear of detection, people in charge of maintaining and recording the cash have to be careful.

Usually, for the purpose of prevention, the two functions of bank reconciliation and of recording cash transactions are separated from each other. With this separation of functions, the system of check automatically operates and chances of pilferage or embezzlement are reduced. The employees cannot prepare unauthorised cheques, and get them encashed, without entering the transaction in the account. If they want to, they should enter into collusion with each other, which is more circuitous and, therefore, difficult than when both the jobs are entrusted to the same person. Therefore, just as a judge should not be the legislator, likewise cash recording and cash dealing with the books should be in separate hands, and they are kept in separate hands in well managed concerns.

Need for Bank Reconciliation Statement

1. It reflects the actual bank balance position.
2. It helps to detect any mistake in the Cash Book and in the Pass Book.
3. It prevents frauds in recording the banking transactions.
4. It explains any delay in the collection of cheques.
5. It identifies valid transactions recorded by one party but not by the other.

Causes of Difference

The differences in the two balances arise from the following three causes :

1. Timing: There may be a time gap between recording transactions in the customer's book and bank's book. For example, when a cheque is issued to a party, it is recorded immediately in the customer's book, but the bank will record it only when it makes payment against that cheque.

Similarly, when a cheque is deposited, it is recorded in the Cash Book immediately, but the bank will record it only when it collects money in respect of that cheque.

2. Transactions: For some transactions, the bank has earlier knowledge and it adjusts its records before the business. Some differences may arise from the bank's actions that have not been intimated to the customer. For example, interest credited by the bank or bank charges debited by the bank. The customer comes to know of these transactions only when he receives the Bank Statement.

3. Errors: Some differences in balance may arise owing to errors committed by the bank or by the person responsible for preparing the Cash Book. For the first two reasons, discussed above, neither of the parties is wrong nor would it be a mistake to 'correct' them. But for the present reason, the books are to be properly rectified.

Some of the items that frequently cause a difference

1. ***Cheque issued but not yet presented for payment :*** When a cheque is issued to a supplier or a third party, it is immediately entered in the Cash Book by crediting the bank and this has the effect of reducing the bank balance in the depositor's book. But the receiving party may not present the cheque to the bank for payment immediately. The bank debits the customer's account only when the cheque has been presented and paid for. So long as it is not presented, the balance shown in the Pass Book or Bank Statement is more than the balance shown by the depositor's Cash Book. Suppose, opening favourable balance as per Cash Book and Pass Book was ₹ 2,000. A cheque was issued in favour of R. Saxena for ₹ 1,000.

Dr.	Cash Book (Bank Column only)		Cr.
To Balance b/f	2,000	By R. Saxena A/c	1,000
		By Balance c/d	1,000
	2,000		2,000

Bank Statement

Date	Particulars	Dr. (Withdrawn)	Cr. (Deposited)	Balance (₹)
	Balance b/f			2,000 (Cr.)

If R. Saxena fails to present the cheque for payment during this period, the balance as per the Bank Statement would show more than the balance as per the Cash Book of ₹ 1,000.

2. ***Cheques deposited but not yet collected*** : Whenever a person receives a cheque from a third person and deposits it, he debits Bank Account in his own books, and credits the account of the person from whom the cheque has been received. His bank balance, therefore, is increased. The bank, however takes some time in collecting the cheque; and it would credit the customer's account only when the amount has been realised. Until the cheque has been collected, the balance appearing in the Pass Book would be less than the balance appearing in the Bank Account or Cash Book.

Opening favourable balance as per the Cash Book and Pass Book was ₹ 2,000. A cheque was received from P. Sharma for ₹ 500 and deposited into the Bank.

Dr.	Cash Book (Bank Column only)		Cr.
To Balance b/f	2,000	By Balance c/d	2,500
To P. Sharma A/c	500		
	2,500		2,500

Bank Statement

Date	Particulars	Dr. (Withdrawn)	Cr. (Deposited)	Balance (₹)
	Balance b/f			2,000 (Cr.)

If the bank fails to collect the cheque during this period, it would not credit the customer's account with ₹ 500. So, the balance as per the Bank Statement would show ₹ 500 less than the balance as per the Cash Book.

3. ***Bank charges not entered in the Cash Book*** : The bank charges some amount from each customer by way of incidental charges, collection charges, and the like and debits his account for this reason from time to time. As soon as these charges are made, the bank debits the customer's account in its own books and this reduces the bank balance. But the customer learns about these charges only, when he receives the Bank Statement or Pass Book and then he credits Bank Account in his own books. Until then, the bank balance as per the Pass Book would be less than the bank balance as per the Cash Book or Bank Account. Suppose, opening favourable balance as per the Cash Book and Pass Book was ₹ 2,000. The bank has charged ₹ 50 as bank charges.

Dr.	Cash Book (Bank Column only)		Cr.
To Balance b/f	2,000	By Balance c/d	2,000

Bank Statement

Date	Particulars	Dr. (Withdrawn)	Cr. (Deposited)	Balance (₹)
	Balance b/f			2,000 (Cr.)
	To Bank charges	50		1,950 (Cr.)

The Pass Book balance has decreased from ₹ 2,000 to ₹ 1,950, whereas the Cash Book balance remained unchanged.

4. ***Interest credited by Bank not entered in the Cash Book*** : When the bank allows interest to a customer, it credits the customer's account and his bank balance would increase. But the customer comes to know about it only at the end of the month, and then he would pass an appropriate entry. Until then, the bank balance as per the Pass Book would be more than the balance as per the Cash Book or Bank Account. Suppose, opening

favourable balance as per the Cash Book and Pass Book was ₹ 2,000. The bank has credited ₹ 100 as interest but not entered it in the Cash Book.

Dr. **Cash Book (Bank Column only)** **Cr.**

To Balance b/f	2,000	By Balance c/d	2,000

Bank Statement

Date	Particulars	Dr. (Withdrawn)	Cr. (Deposited)	Balance (₹)
	Balance b/f			2,000 (Cr.)
	By Interest		100	2,100 (Cr.)

The balance of the Pass Book/Bank Statement has increased from ₹ 2,000 to ₹ 2,100 whereas the Cash Book balance has remained at ₹ 2,000.

5. ***Amount directly deposited into Bank by Debtors***: When any amount is directly deposited by a debtor into the Bank Account of the depositor, the bank would credit the depositor's account immediately but the customer would know about it only after receiving advice from his bank. Until then, the bank balance, as per the Pass Book would show more than the balance as per the Cash Book.

Suppose, opening favourable balance as per the Cash Book and Pass Book was ₹ 2,000. Mr. B. Sarkar, a debtor, has deposited ₹ 500 directly into the bank but is yet to receive any information from the bank.

Dr. **Cash Book (Bank Column only)** **Cr.**

To Balance b/f	2,000	By Balance c/d	2,000

Bank Statement

Date	Particulars	Dr. (Withdrawn)	Cr. (Deposited)	Balance (₹)
	Balance b/f			2,000 (Cr.)
	By Cash		500	2,500 (Cr.)

The balance of the Pass Book/Bank Statement has increased from ₹ 2,000 to ₹ 2,500, whereas the Cash Book balance has remained at ₹ 2,000.

6. ***Credit Transfer***: A business may receive into its bank account revenue from a variety of sources without direct knowledge of those. It may receive regular payments such as rent from property owned or dividends or interest from investments. When the bank collects dividends, it would credit the customer's account and his bank balance will increase. But the customer would know about it only after receiving advice from the bank. Until then, the bank balance as per the Pass Book would be more than the balance as per the Cash Book. Suppose, opening favourable balance as per the Cash Book and Pass Book was ₹ 2,000. The bank has collected a dividend of ₹ 1,000 but nothing has been intimated by bank in this respect to the customer.

Dr. **Cash Book (Bank Column only)** **Cr.**

To Balance b/f	2,000	By Balance c/d	2,000

Bank Statement

Date	Particulars	Dr. (Withdrawn)	Cr. (Deposited)	Balance (₹)
	Balance b/f			2,000 (Cr.)
	By Cash (Dividend)		1,000	3,000 (Cr.)

The balance of the Bank Statement has increased from ₹ 2,000 to ₹ 3,000 whereas the Cash Book balance has remained at ₹ 2,000.

7. ***Standing Order :*** A standing order is an instruction to a bank by a customer to make a fixed payment regularly on stated days to some third party (ies). When a business unit requires to make regular payments for an item like salaries, the business unit may save itself the trouble of remembering to write several cheques and hand these over to the employees each month by making a standing order at the bank to pay salaries to its employees. The bank will then automatically pay the employees the same amount of money each month until further notice is received from the business unit. Since the business unit does not prepare cheques for its employees each month, these will be unrecorded in the cash book. When the business unit receives the bank

statement, it will check that salaries have been paid in accordance with standing orders and then make the necessary double entries in the ledger. The regular payment made by the bank may be monthly, quarterly, annually or at any convenient interval.

8. ***Direct Debit :*** Direct debit is an instruction given to a bank by its customer to allow charges to be made periodically to the account at the instance of some third party. Therefore, a direct debit is also a standing order with the exception that the receiver can alter the date or the amount of payment. Direct debits are used where the date and the amount of the payment due vary from one period to the next, for example, electricity or telephone bills. A business unit gives authority to the recipient of the payment to change the date or the amount paid. In this way, the business unit avoids the trouble of frequently altering the amount payable on a standing order. A bank generally accepts direct debit instructions only in respect of approved third parties. The banker also undertakes to indemnify the customer if the facility is improperly used.

Payment through standing order / direct debit will lead to difference between the balance as per Cash Book and Pass Book. For example, when the bank pays insurance premium on behalf of its customer, it would debit the customer's account and his bank balance would decrease. But the customer will know about it only after receiving advice from the bank. Until then, the bank balance as per the Pass Book will be less than the balance as per the Cash Book. Suppose, opening favourable balance as per the Cash Book and Pass Book was ₹ 2,000. The bank has paid insurance premium of ₹ 500 as per standing order but nothing has been intimated by the Bank in this respect.

Dr. Cash Book (Bank Column only) Cr.

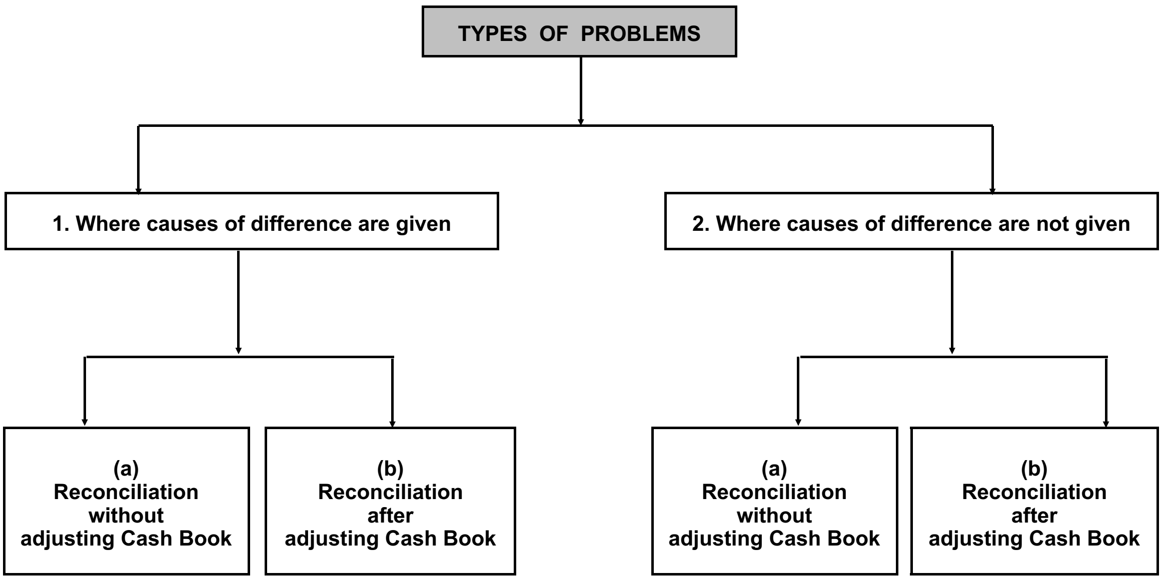
To Balance b/f	2,000	By Balance c/d	2,000

Bank Statement

Date	Particulars	Dr. (Withdrawn)	Cr. (Deposited)	Balance (₹)
	Balance b/f			2,000 (Cr.)
	To Cash (Insurance Premium)	500		1,500 (Cr.)

The balance of the Bank Statement has decreased from ₹ 2,000 to ₹ 1,500 whereas the Cash Book balance has remained at ₹ 2,000.

7. ***Errors and Omissions*** : Errors and omissions either in the Cash Book or in the Pass Book may lead to differences between the bank balance as per the Pass Book and Cash Book.



1.(a) Where causes of difference are given and Bank Reconciliation Statement is to be prepared without adjusting the Cash Book

(i) When bank favourable balance as per the Cash Book is given

If we start Reconciliation Statement with bank favourable balance as per the Cash Book, we are to ascertain the impact of each item (causing a difference) on the Pass Book favourable balance. In other words, we will have to see whether a particular item increases or decreases the favourable balance as per the Pass Book.

Now add : Those items which increase the Pass Book favourable balance more than the Cash Book favourable balance. Examples are:

(a) Cheques issued but not presented;
(b) Interest credited by bank not entered in the Cash Book; and
(c) Cash directly deposited into the bank but not recorded in the Cash Book etc.

Deduct : Those items which decrease the Pass Book favourable balance more than the Cash Book favourable balance. Examples are:

(a) Cheques deposited but not credited by the bank;
(b) Bank charges not recorded in the Cash Book; and
(c) Direct payment by bank as per standing order not recorded in the Cash Book etc.

Illustration 1

From the following particulars, prepare a Bank Reconciliation Statement as on 31st December, 2014.

(i) Bank balance as per the Cash Book ₹ 25,450.
(ii) A number of cheques were deposited in the bank but on 31st December, 2014 a cheque for ₹ 500 was not credited in the Pass Book.
(iii) Several cheques aggregating ₹ 5,000 were issued but only cheques for ₹ 4,500 were presented to the Bank for payment.
(iv) The bank had directly collected dividend ₹ 400 and interest ₹ 300 but this was not entered in the Cash Book.
(v) In accordance with the instructions, the bank honoured a bill for ₹ 2,000 but the debit note was sent to the trader only on 2nd January, 2015.
(vi) Bank charges ₹ 20 were not entered in the Cash Book.
(vii) The debit balance for November was shown short in the Cash Book by ₹ 300.
(viii) The Bank Pass Book revealed that a cheque for ₹ 250 received from a person had been dishonoured, but no entry was passed in the Cash Book.

Solution **Bank Reconciliation Statement as on 31.12.2014**

		₹	₹
	Bank balance as per the Cash Book (Dr.)		25,450
Add:	(iii) Cheque issued but not presented for payment (₹ 5,000 — ₹ 4,500)	500	
	(iv) Bank had directly collected dividend and interest but were not entered in the cash book (₹ 400 + ₹ 300)	700	
	(vii) Debit balance was shown short in the Cash Book	300	1,500
			26,950
Less:	(ii) Cheque deposited but not credited in the Pass Book	500	
	(v) Bank honoured a bill but the debit note was sent only on 2.1.2015	2,000	
	(vi) Bank charges not entered in the Cash Book	20	
	(viii) Cheque had been dishonoured, but no entry passed in the Cash Book	250	2,770
	Bank balance as per the Pass Book (Cr.)		24,180

Illustration 2

Ranganath has two accounts with Hanuman Bank Ltd, styled Account No. 1 and Account No.2. On 31.12.2014, his Cash Book showed balances of ₹ 5,400 and ₹ 2,70,400 in the two accounts respectively.

On an examination of the bank's statements, the following were noticed:

(a) ₹ 27,000 have been transferred from Account No. 2 to Account No. 1 by the bank without advice to Ranganath.
(b) ₹ 10 have been the bank's incidental charges in respect of each account, which have also not been advised.
(c) Cheques for ₹ 5,421 issued on Account No. 1 late in December have not yet been presented to the bank.
(d) A cheque for ₹ 4,272 deposited by Ranganath into A/c No. 2 has been credited by the Bank into A/c No. 1.

You are required to prepare Reconciliation Statements showing the balance as per Bank Statements.

Solution

Bank Reconciliation Statement of Ranganathan (A/c No. 1) as on 31.12.2014

			₹	₹
		Bank balance as per the Cash Book (Dr.)		5,400
Add:	(a)	Transfer from Account No. 2 without advice	27,000	
	(c)	Cheque issued but not yet presented to the Bank	5,421	
	(d)	Cheque deposited into Account No. 2 wrongly credited to Account No. 1	4,272	36,693
				42,093
Less:	(b)	Incidental charges debited in the Pass Book not recorded in the Cash Book	10	10
		Bank balance as per the Pass Book (Cr.)		42,083

Bank Reconciliation Statement of Ranganathan (A/c No. 2) as on 31.12.2014

			₹	₹
		Bank balance as per the Cash Book (Dr.)		2,70,400
Less:	(a)	Transfer to Account No. 1 without advice	27,000

	(d)	Cheque deposited into Account No. 2 wrongly credited to Account No. 1	4,272	31,282
		Bank balance as per the Pass Book (Cr.)		2,39,118

Illustration 3

The Treasurer of the Calcutta Club is attempting to reconcile the balance shown in the Cash Book with that appearing on the Bank Statement. According to the Cash Book, the balance at the bank as at 31st May, 2015 was ₹ 1,900 while the Bank Statement disclosed an overdraft amount of ₹ 470. Upon investigation, the Treasurer discovers the following errors:

(a) A cheque paid to S Ltd for ₹ 340 had been entered in the Cash Book as ₹ 430.
(b) Cash paid to the bank for ₹ 100 had been entered in the Cash Book as ₹ 90.
(c) A transfer of ₹ 1,500 to the Savings Bank had not been entered in the Cash Book.
(d) A receipt of ₹ 10 shown on the Bank Statement has not been entered in the Cash Book.
(e) Cheques drawn amounting to ₹ 40 had not been presented into the bank.
(f) The Cash Book balance had been incorrectly brought down at 1st June, 2015 as a debit balance of ₹ 1,200 instead of a debit balance of ₹ 1,100.
(g) Bank charges of ₹ 20 did not appear in the Cash Book.
(h) Receipts of ₹ 900 paid into the bank on 31st May, 2015 did not appear on the Bank Statement until 1.6.2015.
(i) A standing order payment of ₹ 30 had not been entered in the Cash Book.
(j) A cheque for ₹ 50 previously received and paid into the bank had been returned by the bank marked 'account closed'.
(k) The bank received a direct deposit of ₹ 100 from an anonymous member.
(l) Cheques paid into the bank had been incorrectly totalled. The total amount should have been ₹ 170 instead of ₹ 150.

Draw up a Bank Reconciliation Statement as at 31st May, 2015.

Solution

Calcutta Club
Bank Reconciliation Statement as on 31.05.2015

			₹	₹
		Bank balance as per the Cash Book (Dr.)		1,900
Add:	(a)	Cheque paid for ₹ 340 had been entered in the Cash Book as ₹ 430	90	
	(b)	Cash paid to the Bank ₹ 100 had been entered in the Cash Book as ₹ 90	10	
	(d)	A receipt of ₹ 10 shown in the Bank Statement not recorded in the Cash Book	10	
	(e)	Cheque drawn but not presented to the Bank	40	
	(k)	Direct deposit by a member into the Bank not recorded in the Cash Book	100	250
				2,150
Less:	(c)	Transfer to Saving Bank had not been recorded in the Cash Book	1,500

		Bank balance as per the Pass Book (Dr.)		470

(ii) When bank overdraft as per the Cash Book is given

If we start Reconciliation Statement with bank overdraft as per the Cash Book, then we are to ascertain the impact of each item (causing difference) on Pass Book overdraft. In other words, we will have to see whether a particular item increases the overdraft as per the Pass Book or decreases as per the Pass Book.

Now add: Those items which increase the Pass Book overdraft more than the Cash Book overdraft. Examples are:

(a) Cheque deposited but not credited by the bank;
(b) Bank charges not yet recorded in the Cash Book; and
(c) Direct payment by the bank as per standing order not recorded in the Cash Book.

Deduct: Those items which decrease the Pass Book overdraft more than the Cash Book overdraft. Examples are:

(a) Cheque issued but not presented for payment to the bank;
(b) Interest credited by the bank not entered in the Cash Book; and
(c) Cash directly deposited into the bank but not yet recorded in the Cash Book.

Illustration 4

From the following particulars, prepare the Bank Reconciliation Statement:

		₹
(i)	Bank overdraft as per the Cash Book.	16,200
(ii)	A cheque deposited as per Bank Statement but not recorded in the Cash Book.	700
(iii)	Debit side of the Bank Column cast short.	100
(iv)	A cheque for ₹ 5,000 deposited but collection as per the Bank Statement.	4,996
(v)	A party's cheque returned dishonoured as per the Bank Statement only.	530
(vi)	Bills collected directly by the bank.	3,500
(vii)	Bank charges recorded twice in the Cash Book.	25
(viii)	A bill for ₹ 8,000 discounted for ₹ 7,960 returned dishonoured by the bank, noting charges being	15
(ix)	Cheques deposited but not yet collected by the bank.	2,320
(x)	Cheques issued but not yet presented for encashment.	1,250

Solution **Bank Reconciliation Statement as on ...**

			₹	₹
		Bank Overdraft per the Cash Book		16,200
Add:	(iv)	Cheque for ₹ 5,000 deposited but collection as per Bank statement ₹ 4,996	4	
	(v)	Cheque returned dishonoured as per the Bank statement only	530	
	(vii)	Bill for ₹ 8,000 discounted for ₹ 7,960 returned dishonoured by the bank, noting charges being ₹ 15	8,015	
	(ix)	Cheque deposited but not collected	2,320	10,869
				27,069
Less:	(ii)	Cheque deposited but not recorded in the Cash Book	700	
	(iii)	Debit side of the bank column cast short	100	
	(vi)	Bills collected directly by the bank	3,500	
	(vii)	Bank charges recorded twice in the Cash Book	25

		Bank overdraft as per the Pass Book (Dr.)		21,494

Illustration 5

The Cash Book of Gupta showed an overdraft of ₹ 30,000 on 31.12.2014. The scrutiny of the entries in the Cash Book and the Pass book revealed that:

(i) On 22nd December, cheques totalling ₹ 6,000 were sent to bankers for collection, out of which a cheque for ₹ 1,000 was wrongly recorded on the credit side of the Cash Book and cheques amounting to ₹ 300 could not be collected by the bank within the year.

(ii) A cheque for ₹ 4,000 was issued to a supplier on 28th December, 2014. The cheque was presented to the bank on 4th January, 2015.

(iii) There were debits in the Pass Book for interest ₹ 2,000 on overdraft and bank charges ₹ 600 not recorded in the Cash Book.

(iv) The credit side of the Bank Column of the Cash Book was undercast by ₹ 100.

(v) A cheque for ₹ 1,000 was issued to a creditor on 27th December but unfortunately, the same was not recorded in the Cash Book. The cheque was, however, duly encashed within 31st December.

(vi) As per standing instructions, the banker collected dividend of ₹ 500 on behalf of Gupta and credited the same to his account within 31st December, 2014. The fact was, however, intimated to Gupta on 3rd January, 2015.

You are required to prepare a Bank Reconciliation Statement as on 31st December, 2014.

Solution

Gupta

Bank Reconciliation Statement as on 31.12.2014

		₹	₹
	Bank Overdraft as per the Cash Book (Cr.)		30,000
Add:	(i) Cheques deposited but not collected	300	
	(ii) Debits in the Pass Book for interest on overdraft and the bank charges not recorded in the Cash Book	2,600	
	(iii) The credit side of the Bank column of the Cash Book was undercast	100	
	(iv) Cheque issued to a creditor not recorded in the Cash Book, but it was duly encashed within 31.12.2014	1,000	4,000
			34,000
Less:	(i) Cheque wrongly recorded on the credit side of the Cash Book (₹ 1,000 x 2)	2,000	
	(ii) Cheque issued but not presented for payment	4,000	
	(v) Dividend collected by the Bank not recorded in the Cash Book	500	6,500
	Bank balance as per the Pass Book (Dr.)		27,500

Mr. Jones is having Accounts (A and B) with the Central Bank of India.

On 31.12.2014, his ledger shows a balance of ₹ 5,000 in Account A and an overdraft of ₹ 2,250 in Account B. On verifying the ledger entries with the respective Bank Statements, the following mistakes were noticed:

(i) A deposit of ₹ 1,500 made into 'A' on 20.12.2014 has been entered in the ledger in account 'B'.

(ii) A withdrawal of ₹ 500 from Account A on 20.11.2014 has been entered in the ledger in Account B.

(iii) Two cheques of ₹ 500 and ₹ 750 deposited in Account A on 1.12.2014 (and entered in the books in Account B) have been dishonoured by the bankers. The entries for the dishonour of these cheques have been entered in the books in Account B.

(iv) In the Account A and B Mr. Jones has issued on 29.12.2014 cheques for ₹ 10,000 and ₹ 1,000 respectively and those have not been cashed till 31.12.2014.

(v) Incidental charges of ₹ 10 and ₹ 25 charged in the Account A and B respectively have not been entered in the books.

(vi) The bank credited an interest of ₹ 50 for Account A and has charged interest of ₹ 275 for Account B which have not been recorded in books.

(vii) The deposits of ₹ 5,000 and ₹ 3,500 made into the Accounts A and B both on 30.12.2014 have not been given credit by the bank till 31.12.2014.

Draw the Bank Reconciliation Statements for the above two accounts.

Solution

Mr. Jones

	(v) Incidental charges not entered in the ledger	25	
	(vi) Interest charged by bank has not been recorded in the ledger	275	
	(vii) Cheque deposited but not credited by the Bank	3,500	5,300
			7,550
Less:	(ii) A withdrawal from Account 'A' has been entered in the ledger in Account 'B'	500	
	(iv) Cheque issued but not presented	1,000	1,500
	Bank Overdraft as per the Pass Book (Dr.)		6,050

Illustration 7

The Balance Sheet and Profit and Loss Account of a trader show the following two items :

Bank balance — Overdrawn	₹ 36,200
Profit and Loss Account — Trading profit for the year	₹ 2,31,750

However, the balance as shown on the bank statement does not agree with balance as shown in the cash book. Your investigation of this matter reveals the following differences, and additional information :

1. Cheque payments entered in the cash book but not presented to the bank until after the year end — ₹ 31,380.

2. Bankings entered in the cash book but not credited by the bank until after the year end — ₹ 4,250.
3. Items shown on bank statements but not entered in the cash book —
   Bank charges — ₹ 2,450
   Standing order — Loan repayments 12 instalments @ ₹ 360 each
   Standing order — Being quarterly rent of godown ₹ 1,250, due on each quarter day.
   Dividend received on investment ₹ 900.
4. Cheques for ₹ 350 and ₹ 1,400 received from customers were returned by the bank as dishonoured, but no entries concerning these events have been made in the cash book.
5. The cheques were returned by the bank for the following reasons —
   (i) the ₹ 350 cheque requires an additional signature and should be honoured in due course;
   (ii) the ₹ 1,400 cheque was unpaid due to the bankruptcy of the drawer and should be treated as a bad debt.
6. The loan repayments of ₹ 360 represent ₹ 300 capital and ₹ 60 interest.
7. A cheque for ₹ 450 received from a customer in settlement of his account had been entered in the cash book as ₹ 4,500 on the payments side, analysed to the purchases ledger column and later posted.

You are required to prepare :

(a) a Statement reconciling the cash book balance with the bank statement; and

(b) a Statement showing the effect of the alterations on the trading profit.

Solution

Bank Reconciliation Statement as on . . .

	₹	₹
Bank Overdraft as per Cash Book		36,200
Add: (i) Cheque deposited but not yet credited by bank	4,250	
(ii) Cheques dishonoured but not recorded in the Cash Book (₹ 350 + 1,400)	1,750	
(iii) Bank charges not yet recorded in the Cash Book	2,450	
(iv) Loan repayment (as per standing order) not recorded in the Cash Book (₹ 360 x 12)	4,320	
(v) Rent of godown (as per standing order) not recorded in the Cash Book (₹ 1,250 x 4)	5,000	17,770
		53,970
Less: (i) Cheques issued but not presented for payment	31,380	
(ii) Dividend on investment not recorded in the Cash Book	900	
(iii) Cheque received from customer for ₹ 450 has been entered in the Cash Book as cash purchase of ₹ 4,500	4,950	37,230
Bank Overdraft as per Bank Statement		16,740

Effect of the Alterations on Trading Profit

Particulars	₹	₹
Profit as per last Profit and Loss Account		2,31,750
Add: (i) Wrong entry in the Cash Book as cash purchase	4,500	
(ii) Dividend received from investment not recorded	900	5,400
		2,37,150
Less: (i) Bad Debts	1,400	
(ii) Bank Charges	2,450	
(ii) Interest Paid	720	
(iii) Godown Rent	5,000	9,570
Revised Profit		2,27,580

(iii) When Bank favourable balance as per the Pass Book is given

If we start Reconciliation Statement with bank favourable balance as per the Pass Book, we are to ascertain the impact of each item (causing differences) on Cash Book favourable balance. In other words, we have to see whether a particular item increases or decreases the favourable balance as per the Cash Book.

Now, add: Those items which increase the Cash Book favourable balance more than the Pass Book favourable balance.

Examples are:

(a) Cheques deposited but not credited by the bank.

(b) Bank charges not yet recorded in the Cash Book; and

(c) Direct payment by the bank as per the standing order not yet recorded in the Cash Book.

Deduct: Those items which decrease the Cash Book favourable balance more than the Pass Book favourable balance.

Example are:

(a) Cheques issued but not presented for payment to the bank;

(b) Interest credited by the bank but not entered in the Cash Book; and

(c) Cash directly deposited into the bank but not yet recorded in the Cash Book.

Illustration 8

Shri Rambharose requests his friend Daulatram to compile the Bank Reconciliation Statement based on the data collected as on June 2015, by his accountant prior to his sudden illness:

The Bank Statement showed a favourable balance of ₹ 9,214.

(i) On 29th June, the bank credited the sum of ₹ 1,650 in error.
(ii) Certain cheques, valued at ₹ 4,500 issued before 30.6.2015 were not cleared.
(iii) A hire purchase payment of ₹ 950 made by a standing order was not entered in the Cash Book.
(iv) A cheque of ₹ 600 received, deposited and credited by the Bank, was accounted as a receipt in the cash column of the Cash Book.
(v) Other cheques for ₹ 8,500 were deposited in June, but cheques for ₹ 6,000 only were cleared by the bankers.

Solution

Rambharose
Bank Reconciliation Statement as on 30.06.2015

		₹	₹
	Balance as per Bank Statement		9,214
Add:	(iii) Payment as per standing order not recorded in the Cash Book	950	
	(v) Cheques deposited but not credited by bank (₹ 8,500 – ₹ 6,000)	2,500	3,450
			12,664
Less:	(i) Wrong credit by Bank	1,650	
	(ii) Cheques issued but not presented	4,500	
	(iv) Cheque of ₹ 600 wrongly entered in the cash column of the Cash Book	600	6,750
	Bank balance as per the Cash Book (Favourable)		5,914

Illustration 9

Prepare a Bank Reconciliation Statement from the following particulars:

		₹
	Bank balance as per the Pass Book	10,000
(i)	Cheque deposited into the bank but no entry was passed in the Cash Book	500
(ii)	Cheque received but not sent to bank	1,200
(iii)	Credit side of the Bank Column cast short	200
(iv)	Insurance premium paid directly by the bank under standing advice	600
(v)	Bank charges entered twice in the Cash Book	20
(vi)	Cheque issued but not presented to the bank for payment	500
(vii)	Cheque received entered twice in the Cash Book	1,000
(viii)	Bills discounted dishonoured not recorded in the Cash Book	5,000

Solution **Bank Reconciliation Statement as on ...**

		₹	₹
	Bank balance as per the Pass Book		10,000
Add:	(ii) Cheque received but not sent to the Bank	1,200	
	(iii) Credit side of the Bank column cast short	200	
	(iv) Insurance premium paid directly not recorded in the Cash Book	600	
	(vii) Cheque received entered twice in the Cash Book	1,000	
	(viii) Bill dishonoured not recorded in the Cash Book	5,000	8,000
			18,000
Less:	(i) Cheque deposited into the Bank but no entry was passed in the Cash Book	500	
	(v) Bank charges recorded twice in the Cash Book	20	
	(iv) Cheque issued but not presented to the Bank	500	1,020
	Bank balance as per the Cash Book		16,980

(iv) When bank overdraft as per the Pass Book is given

If we start Reconciliation Statement with bank overdraft as per the Pass Book, we are to ascertain the impact of each item (causing difference) on the Cash Book overdraft balance. In other words, we have to see whether a particular item increases or decreases the overdraft as per Cash Book

Now add: Those items which increase the overdraft of the Cash Book more than the Pass Book overdraft balance. For example :

(a) Cheques issued but not presented for payment to the bank;
(b) Interest credited by the bank but not entered in the Cash Book; and
(c) Cash directly deposited into the bank but not yet recorded in the Cash Book etc.

Deduct: Those items which decrease the overdraft balance of the Cash Book more than the Pass Book overdraft. For example,

(a) Cheques deposited but not credited by the bank;
(b) Bank charges not yet recorded in the Cash Book; and
(c) Direct payment by the bank as per the standing order not yet recorded in the Cash Book etc.

Illustration 10

From the following information, prepare a Bank Reconciliation Statement as at 31.3.2015 of Alfa & Co., who had an overdraft balance of ₹ 5,750.60 as per the Pass Book as on that date:

		₹
(i)	Cheque deposited into the bank but not shown in the Pass Book	3,537.30
(ii)	Cheque drawn but not cashed at the bank	2,500.20
(iii)	Dividend of ₹ 2,000 collected by the bank directly on 31.3.2015 under the advice of Alfa & Co., was not recorded in the Cash Book.	
(iv)	Debit side of the Cash Book was wrongly overcast by	500
(v)	Cheques amounting to ₹ 370 were deposited into the bank, but it was recorded in the debit side of the Pass Book.	

Solution

Alfa & Company
Bank Reconciliation Statement as on 31.03.2015

		₹	₹
	Bank Overdraft as per the Pass Book		5,750.60
Add:	(ii) Cheque drawn but not cashed at Bank	2,500.20	
	(iii) Dividend collected by the Bank directly on 31.3.2015 was not recorded in the Cash Book	2,000.00	4,500.20
			10,250.80
Less:	(i) Cheque deposited into Bank but not shown in the Pass Book	3,537.30	
	(iv) Debit side of the Cash Book was wrongly overcast	500.00	
	(v) Cheque deposited into the Bank but recorded in the debit side of the Pass Book	740.00	4,777.30
	Bank Overdraft as per the Cash Book		5,473.50

Illustration 11

The Pass Book of Bank Account No. 1 of Ghose and Co. Calcutta shows an overdraft of ₹ 17,950 on July 31, 2015, but this does not agree with the bank balance as shown by the Cash Book of the firm. On scrutiny, the following discrepancies are revealed:

(i) Out of cheques amounting to ₹ 4,350 drawn by the firm on July 27, cheques amounting to ₹ 2,650 only are cashed up to July 31.
(ii) The firm paid ₹ 7,000 into the bank, but the bank credited the same to Account No. 2 in the name of the firm.
(iii) Interest and bank charges amounting to ₹ 1,200 debited by the bank to the Firm's account have not been entered in the firm's books.
(iv) Out of ₹ 11,300 paid in by the firm in cash and by cheques on July 31, cheques amounting to ₹ 4,750 are credited to the firm's account on August 4, 2015.
(v) A cheque of ₹ 900 credited in the Pass Book on July 28 being dishonoured is debited to the firm's account on August 2.
(vi) Bankers have credited the firm's account with ₹ 16,000 for interest collected by them on Government papers held by them but the same has not been entered in the firm's books.
(vii) A payment of ₹ 250 from Account No. 2 has been wrongly debited by the bankers to Account No. 1.

Prepare the Bank Reconciliation Statement as at 31st July, 2015 for Bank Account No. 1.

Solution

Ghose & Company
Bank Reconciliation Statement as on 31.07.2015

		₹	₹
	Bank Overdraft as per the Pass Book (Dr.)		17,950
Add:	(i) Cheques drawn but not cashed (₹ 4,350 — ₹ 2,650)	1,700	
	(v) Cheque credited in the Pass Book on July 28 being dishonoured, debited to Firm's A/c in August 2 (Note)	900	
	(vi) Banker credited Firm's A/c for interest collected by them but it has not been entered in firm's books	16,000	18,600
			36,550
Less:	(ii) Bank credited an amount to A/c No. 2 instead of A/c No. 1	7,000	
	(iii) Interest and bank charges debited by the bank to firm's Account have not been entered in the firm's book	1,200	
	(iv) Cheques paid into bank but not credited to Firm's A/c	4,750	
	(vii) A payment from A/c No. 2 has been wrongly debited by the bank to A/c No. 1	250	13,200
	Bank Overdraft as per the Cash Book (Cr.)		23,350

Tutorial Note : The cheque of ₹ 900 was dishonoured, but the bank wrongly credited the firm's account by the same amount. Owing to this error in the Pass Book, the Pass Book overdraft was reduced by ₹ 900 and the Cash Book overdraft was increased by ₹ 900. In effect, to add ₹ 900. (It is assumed that the required entry for dishonour of cheque was passed in the cash book.) It should be further mentioned that if no entry for dishonour of the cheque was passed in the Cash Book, no adjustment for this item is required in the Bank Reconciliation Statement. Then the bank overdraft as per the Cash Book will be ₹ 22,450.

Illustration 12

Prepare the Bank Reconciliation Statement as on 30th November, 2014, from the following information of Mr. Merchant:

(i) Balance as per the Pass Book on 30.11.2014 (Dr.) ₹ 20,000.

(ii) On 5.10.2014, Mr. Merchant deposited a cheque for collection of ₹ 1000 and made entry in Cash Book, appears in the Pass Book on 6.12.2014 at ₹ 990.

(iii) Cheques issued to parties but not presented for payment till 30.11.2014 are of ₹ 525, ₹ 835 and ₹ 900.

(iv) Cheques deposited for collection but not collected by the bankers till 30.11.2014, ₹ 8760 and ₹ 410.

(v) Interest on investment collected by the bankers on 30.11.2014, ₹ 955 entered in the Cash Book on 4.12.2014 on receipt of bank intimation.

(vi) Bank charges ₹ 90 (dated 27.11.2014) not entered in the Cash Book.

(vii) Cheque deposited for collection on 30.11.2014 but returned dishonoured on 6.12.2014 of ₹ 945.

(viii) Bankers have made a mistake in balancing by showing overdrawn balance in excess by ₹ 1,000 on 30.11.2014, which was rectified in the Bank Pass Book on 7.12.2014 when notified.

Solution

Mr. Merchant
Bank Reconciliation Statement as on 30.11.2014

			₹	₹
		Bank Overdraft as per the Pass Book		20,000
Add:	(iii)	Cheque issued to parties but not presented for payment till 30.11.2014 (₹ 525 + ₹ 835 + ₹ 900)	2,260	
	(v)	Interest on investment collected by bankers on 30.11.2014 but intimation sent on 4.12.2014	955	3,215
				23,215
Less:	(ii)	Cheque deposited on 5.10.2014 for collection was not entered in the Pass Book during the period	1,000	
	(iii)	Cheque deposited but not collected by the bank till 30.11.2014 (₹ 8,760 + 410)	9,170	
	(vi)	Bank charges of ₹ 90 not entered in the Cash Book	90	
	(vii)	Cheque deposited for collection on 30.11.2014 but returned dishonoured on 6.12.2014	945	
	(viii)	Bank's mistake in balancing by showing overdraft balance in excess	1,000	12,205
		Bank Overdraft as per the Cash Book		11,010

1(b) Where causes of difference are given and the Bank Reconciliation Statement is to be prepared *after* adjusting the Cash Book

In practice, the Bank Reconciliation Statement is prepared after adjusting the Cash Book. Adjustment of the Cash Book is optional when the Bank Reconciliation Statement is prepared during the different months of the financial year. However, the Cash Book must be adjusted at the end of the financial year and this adjusted balance of the Cash Book is to be shown in the Balance Sheet.

In the examination, quite often students are asked to prepare the Bank Reconciliation Statement after making the necessary adjustments in the Cash Book. In the question, either bank favourable/overdraft balance as per the Cash Book is given or the bank favourable/overdraft balance as per the Pass Book is given.

(i) Where bank favourable/overdraft balance as per the Cash Book is given

In this situation, the following steps should be taken for the preparation of the Bank Reconciliation Statement.

Step 1 Draw up a Cash Book (with Bank Column only). Write down the favourable balance in the debit side of the Cash Book and the overdraft balance in the credit side of the Cash Book.

Step 2 Make the necessary entries in the Cash Book in respect of the following:

(a) Amount recorded in the Pass Book but not yet recorded in the Cash Book such as (i) Bank charges debited by the bank; (ii) Dividend collected directly by the bank; (iii) Payment made by the bank as per standing order; (iv) Dishonour of cheques and bills receivable not yet recorded in the Cash Book

(b) All errors that have crept in the Cash Book such as (i) Overcasting in the debit/credit column of the Cash Book; (ii) Undercasting in the debit/credit column of the Cash Book; (iii) Amount entered twice in the Cash Book; (iv) Wrong amount entered in the Cash Book and the like.

Step 3 Balance off the Cash Book and bring down the adjusted Cash Book balance.

Step 4 Prepare the Bank Reconciliation Statement in the usual manner taking the adjusted Cash Book balance and leaving those items which have already been considered in the adjusted Cash Book.

Observe the entries in the Cash Book

Dr. **Cash Book (Bank Column)** **Cr.**

Date	Particulars	L.F.	₹	Date	Particulars	L.F.	₹
	To Balance b/f To Dividend A/c (Being dividend collected by Bank directly) To Interest A/c				By Bank Charges A/c (Being bank charges debited by Bank) By Sundry Expenses A/c (Being direct payment made by the bank)		

	(Being interest credited by Bank) To Customer's A/c (Being directly deposited by customer)			By Interest A/c (Being interest charged by Bank) By Party A/c (Being B/R dishonoured)		

Tutorial Notes **(1)** No errors of the Pass Book are to be considered for adjusting the Cash Book; **(2)** Items correctly entered in the Cash Book are not to be considered for adjusting the Cash Book.

The following illustration will make the matter more clear:

Illustration 13

According to the Cash Book of A, there was a balance of ₹ 1,050 in favour on 30.6.2015 in his business Bank Account. However, according to his Bank Statement this account was overdrawn. On investigation you find that :

(i) The receipts column of the Cash Book has been overadded by ₹ 1,100.

(ii) Cheques drawn and entered in the Cash Book in June 2015 amounting to ₹ 1,670 were not presented until July, 2015.

(iii) Discount received from a supplier of ₹ 100 had been included with the cheque entered in the Bank Column of the Cash Book in April 2015.

(iv) An amount of ₹ 750 paid directly into A's account by a customer not entered in the Cash Book.

(v) A cheque payment of ₹ 1,230 in April 2015 had been entered in the Cash Book as ₹ 1,320.

(vi) The bank had charged the business account with a cheque for ₹ 2,200 in February 2015, which should have been passed through A's private account.

(vii) Bank charges of ₹ 80 at 31.12.2014 and ₹ 100 at 30.6.2015 had not yet been entered in the Cash Book.

(viii) Cheque to the value of ₹ 3,780 received from customers were recorded in the Cash Book on 28.6.2015 but not entered by the bank until 2.7.2015.

You are asked to make appropriate adjustments in the Cash Book as at 30.6.2015, and prepare a Statement reconciling the adjusted Cash Book balance with the balance shown by the Bank Statement.

Solution

In the Books of A
Bank Reconciliation Statement as on 30.06.2015
(Without adjustment in the Cash Book)

		₹	₹
	Bank balance as per the Cash Book (Dr.)		1,050
Add:	(ii) Cheque drawn but not presented	1,670	
	(iii) Discount received wrongly entered in the bank column of the Cash Book	100	
	(iv) Direct deposit by customer into the bank not recorded in the Cash Book	750	
	(v) Cheque payment of ₹ 1,230 wrongly entered in the Cash Book as ₹ 1,320	90	2,610
			3,660
Less:	(i) Receipt column of the cash book has been over added	1,100	
	(vi) Bank had charged the business account in place of private account	2,200	
	(vii) Bank charges not recorded in the Cash Book (₹ 80 + ₹ 100)	180	
	(viii) Cheque deposited but not entered in the Cash Book	3,780	7,260
	Bank Overdraft as per the Pass Book		3,600

If the Bank Reconciliation Statement is to be prepared after adjusting the Cash Book, then a Cash Book to be drawn up (with Bank Column only) and necessary entries in the Cash Book to be made for: (1) errors crept into the Cash Book; and (2) items not recorded in the Cash Book.

Now, observe each item of the previous illustration.

(1) The receipts column of the Cash Book had been over added by ₹ 1,100

It is an error in the debit side of the Cash Book. So, Cash Book to be credited by ₹ 1,100.

(2) Cheque drawn and entered in the Cash Book in June, 2015 amounting to ₹ 1,670 were not presented until July, 2015.

This item has already been entered in the Cash Book. So, no adjustment is required in the Cash Book.

(3) Discount received from a supplier of ₹ 100 had been included with the cheque entered in the Bank Column of the Cash Book in April, 2015.

It is an error in the credit side of the Cash Book. So, the Cash Book is to be debited by ₹ 100.

(4) An amount of ₹ 750 paid directly into A's account by a customer not entered in the Cash Book.

This item has not been entered in the Cash Book. So, the Cash Book is to be debited by ₹ 750 and the customer is to be credited by the same amount.

(5) A cheque payment of ₹ 1,230 in April, 2015 had been entered in the Cash Book as ₹ 1,320.

There is an error in the payment side of the Cash Book for ₹ 90. So, the Cash Book is to be debited by ₹ 90.

(6) The bank had charged the business account with the cheque for ₹ 2,200 in February 2015, which should have been passed through A's private account

It is an error in the Pass Book. So, no adjustment is necessary in the Cash Book.

(7) Bank charges of ₹ 80 at 31.12.2014 and ₹ 100 at 30.6.2015 had not yet been entered in the Cash Book.

This item has not been entered in the Cash Book. So, the Cash Book is to be credited by ₹ 180 and bank charges account to be debited.

(8) Cheque to the value of ₹ 3,780 received from customer were recorded in the Cash Book on 28.5.2015 but not entered by the bank until 2.7.2015.

This item has already been entered in the Cash Book. So, no adjustment in the Cash Book is required.

The final working will be as follows:

Solution

In the Books of A

Dr. Cash Book (Bank Column) Cr.

Date	Particulars	L.F.	₹	Date	Particulars	L.F.	₹
2015	To Balance b/f		1,050	2015	By Error (Overcasting)		1,100
June 30	To Discount Received A/c		100	June 30	By Bank Charges A/c		180
	To Customers A/c (Direct deposit)		750		By Balance c/d		710
	To Error (₹ 1,320 — ₹ 1,230)		90				
			1,990				1,990

Bank Reconciliation Statement as on 30.06.2015

			₹	₹
		Bank balance as per the Amended Cash Book		710

	(viii)	Cheque received but not recorded	3,780	5,980
		Bank Overdraft as per the Pass Book		3,600

Illustration 14

Following are the transactions recorded in the bank column of the Cash Book of Sri Madhab for the month ending 31.12.2014 :

Dr. Cash Book (Bank column) Cr.

Date	Particulars	₹	Date	Particulars	₹
2014			2014		
Dec. 19	To Cash	54,000	Dec. 1	By Balance b/d	60,000
24	To Buddha	36,000	8	By Ram	3,000
26	To Chaitanya	15,000	10	By Laksman	600
31	To Balance c/d	11,460	19	By Bharat	360
			24	By Satrughna	52,500
		1,16,460			1,16,460

On receipt of the Bank Statement on 31.12.2014, Sri Madhab collected the following information :

(a) Credit transfer not recorded in the Cash Book ₹ 300.

(b) Interest on Government Bond collected by the bank but not entered in Cash Book ₹ 1,620.

(c) Cheques for ₹ 20,000 deposited but the bank collected only ₹ 5,000.

(d) Dividend collected by the bank directly but not intimated the same to Sri Madhab ₹ 1,500.

(e) Bank charges recorded twice in the Cash Book ₹ 510.

(f) Interest on overdraft charged by the bank but not recorded in the Cash Book ₹ 1,500.

(g) Cheques for ₹ 66,100 issued by him but presented to the bank for payment only ₹ 10,000.

You are asked to amend the Cash Book and prepare a Bank Reconciliation Statement from the above information.

Solution

In the books of Madhab

Dr. Amended Cash Book (Bank Column) Cr.

Date	Particulars	₹	Date	Particulars	₹
2014			2014		
Dec. 31	To Credit Transfer A/c	300	Dec. 31	By Balance b/d	11,460

	24,030
Less: Cheques issued but not yet presented for payment (₹ 66,100 – 10,000)	56,100
Bank Balance as per Bank Statement (Cr.)	32,070

Illustration 15

Sri A Basu maintained two separate banking accounts, one with United Bank of India and the other with State Bank of India. On 31 December 2014 the bank balances as per United Bank of India Statement and State Bank of India Statement were ₹ 2,556 and ₹ 2,548 respectively. But the bank balances in Basu's books on that date were ₹ 2,870 (Dr.bal.) and ₹ 4,680 (Dr.bal.) respectively. On scrutiny of these records, the following information was ascertained:

(i) A cheque for ₹ 250 from Sri D.Ray which was directly remitted to the United Bank of India was not entered in Basu's book.

(ii) A cheque for ₹ 700 drawn on State Bank of India and paid to M/s Sen & Co. was entered in the United Bank of India A/c in Basu's Cash Book.

(iii) Payment of ₹ 1,020 by United Bank of India to Life Insurance Corporation of India under a standing order was not recorded in Basu's Cash Book.

(iv) Cheques lodged but not yet credited ₹ 212 for United Bank of India and ₹ 1,600 for SBI.

(v) A cheque for ₹ 57 paid into SBI, was returned dishonoured but this was not recorded in Basu's book.

(vi) Bank charges of ₹ 32 and ₹ 45 for United Bank of India and State Bank of India respectively were not accounted for by Sri Basu.

(vii) ₹ 350 recorded to be deposited into State Bank of India on 30.12.2014 was actually credited by the bank on 4.1.2015.

(viii) There were no unpresented cheques except one for ₹ 620 drawn on State Bank of India.

Ascertain the actual bank balance of Sri A. Basu on 31.12.2014 and prepare a Bank Reconciliation statement.

Solution

Alexander furnishes you with the following information and asks you to —

(i) record the transactions in the Cash Book with bank column for November 2014 (without narration); and

(ii) prepare Reconciliation Statements with State Bank of India as on 31st October and 30th November, 2014.

(a) On October 31, 2014 there was bank overdraft of ₹ 14,000 as per Cash Book and cash in hand ₹ 7,500. Bank statement as on that date showed cheques deposited but not realised of ₹ 40,000 while cheques issued but not presented for payment amounted to ₹ 60,000.

(b) During the month, customers paid ₹ 4,50,000 which were deposited into bank. Of these cheques of ₹ 50,000 were deposited on 30th November, 2014 and realised subsequently. The bank realised all the other cheques and charged

₹ 300 as collection expenses. These charges are to be entered in the Cash Book and not kept as reconciliation items.

(c) Cheques issued during the month totalled to ₹ 4,20,000. Bank statement showed that cheques presented for payment totalled to ₹ 4,50,000 only of which one cheque of ₹ 7,000 issued in October, 2014 was returned on 5.11.2014 for want of Alexander's signature on the cheque. Alexander paid cash to the payee of the cheque and cancelled the cheque. The bank charged ₹ 25 for cheque return.

(d) Cheques presented for payment during the month included cash withdrawn from bank ₹ 15,000, 40% of this cash is handed over on various dates to the petty cashier while 50% is taken by Alexander for his personal use.

(e) Bank charged ₹ 100 for cheque book issued.

Working Notes :

(1) Cheques issued during the month of November amounting to ₹ 4,20,000 and these include ₹ 15,000 for withdrawal of cash. Therefore, cheques for ₹ 4,05,000 were issued to creditors.

(2) Out of ₹ 15,000, 40%, i.e., ₹ 6,000 was paid to petty cashier and 50%, i.e., ₹ 7,500 was taken by Alexander for personal use. The balance 10%, i.e., ₹ 1,500 was retained as cash in hand.

Illustration 17

On 31st October, 2013 Laxmichand's Cash Book showed cash balance of ₹ 3,000 and overdraft of ₹ 53,450 in Current Account with Bank of India.

During November, 2013 the following transactions took place :

(i) Cash sales ₹ 60,000. The entire proceeds were deposited in bank.

(ii) Credit sales ₹ 1,90,000.

(iii) Collections from credit customers ₹ 1,50,000 by cheques in full payment of invoices of October, 2013 totalling to ₹ 1,53,000.

(iv) Credit purchases ₹ 1,55,000.

(v) Cheques of ₹ 1,32,000 issued to suppliers against purchases bills of October, 2013 of ₹ 1,34,000.

(vi) Advances received from customers ₹ 30,000 by cheques against supplies to be made in December, 2013.

(vii) Advances given to suppliers ₹ 25,000 by cheques against supplies to be made in December, 2013.

(viii) Amount withdrawn from bank ₹ 10,000 of which ₹ 4,000 was for personal use and the balance was for meeting cash expenses.

(ix) Expenses paid during the month ₹ 9,000 of which ₹ 5,000 was paid by cheques and the balance was paid out of cash.

(x) Cash paid on behalf of an up-country customer ₹ 4,500.

(xi) Bank charges of ₹ 150 debited by the bank in October, 2013 were recorded through the Cash Book on 10th November, 2013 on receipt of the bank statement for October, 2013.

On 10th December, 2013 Laxmichand received the statement for November, 2013 from the bank.

The following summary of the said statement for November, 2013 was prepared :

Particulars	Withdrawal ₹	Deposit ₹	Balance ₹
Balance on 31.10.2013			(Cr.) 12,500
Deposit realised :			
(i) Cash		60,000	(Cr.) 72,500
(ii) Customers' cheques deposited in:			
October, 2013		5,000	(Cr.) 77,500
November, 2013		1,70,000	(Cr.) 2,47,500
Bank charges on realisation of customers' cheques	400		(Cr.) 2,47,100
Cash paid	10,000		(Cr.) 2,37,100
Cheques honoured :			
Issued before November 1, 2013	68,100		(Cr.) 1,69,000
Issued before November 30, 2013	1,56,000		(Cr.) 13,000

Laxmichand notes that cheques of ₹ 2,500 deposited in the bank before 1.11.2013 were not yet realised by November 30, 2013. Likewise cheques of ₹ 5,500 issued before November 1, 2013 were not presented for payment by November 30, 2013.

Laxmichand asks you to —

(a) write the Cash Book with discount, cash and bank columns for November, 2013 on the basis of information available by November end (without narration);

(b) prepare Bank Reconciliation Statement as on :
(i) October 31, 2013 starting with the balance as per bank statement;
(ii) November 30, 2013 starting with the balance as per Cash Book.

Solution

Illustration 18

Robin had completed his draft final accounts for the year ended 31 March, 2015, which showed a profit of ₹ 81,208, when he realised that no Bank Reconciliation Statement had been prepared at that date.

When checking the Cash Book against the bank statement and carrying out other checks, he found the following :

(1) A cheque for ₹ 1,000 had been entered in the Cash Book but had not yet presented.

(2) Cheques from customers totalling ₹ 2,890 entered in the Cash Book on 31 March, 2015 were credited by the bank after 31 March, 2015.

(3) Bank charges of ₹ 320 appear in the bank statement on 30 March, 2015 but have not been recorded by Robin.

(4) A cheque for ₹ 12,900 drawn by Robin to pay for a new item of plant had been wrongly entered in the Cash Book and the Plant Account as ₹ 2,900. Deprecitaion of ₹ 290 had been charged to the Profit and Loss Account for this plant.

(5) A cheque for ₹ 980 from a credit customer paid in on 26 March was dishonoured after 31 March, 2015 and Robin decided that the debt would have to be written-off as the customer was now untraceable.

(6) A cheque for ₹ 2,400 in payment for some motor repairs had wrongly been entered in the Cash Book as a debit and posted to the credit of Motor Vehicles Account. Depreciation at 25% p.a. (straight line) is charged on motor vehicles with a full year's charge calculated on the balance at the end of each year.

(7) The total of the payments side of the Cash Book had been understated by ₹ 1,000. On further investigation it was found that the debit side of the Purchases Account had also been understated by ₹ 1,000.

(8) Robin had instructed his bank to credit the interest of ₹ 160 on the Deposit Account to the Current Account. This, the bank had done on 28 March. Robin had made an entry on the payments side of the Cash Book for this ₹ 160 and had posted it to the debit of Interest Paid Account.

(9) Robin had wrongly paid an account for ₹ 870 for repairs to his house with a cheque drawn on the business account. The entry in the Cash Book had been debited to Repairs to Premises Account.

(10) The Cash Book showed a debit balance of ₹ 4,890 before any correcting entries had been made.

You are required to :

(a) Prepare an Adjusted Cash Book showing the revised balance which should appear in Robin's Balance Sheet at 31 March, 2015.

(b) Prepare a Bank Reconciliation Statement as on 31 March, 2015.

(c) Draw up a Statement for Robin showing the effect on his profit for the adjustments necessary to correct the errors found.

Solution

In the books of Robin
Adjusted Cash Book

Dr. **Cr.**

Date	Particulars	Bank ₹	Date	Particulars	Bank ₹
2015			2015		
Mar. 31	To Balance b/d	4,890	Mar. 31	By Bank Charges A/c	320
	To Interest Paid A/c	160		By Plant A/c	10,000
	To Interest Received A/c	160		By Customers A/c	980
	To Balance c/d	11,890		By Repairs to Motors A/c	2,400
				By Motor Vehicles A/c	2,400
				By Error in Addition	1,000
		17,100			17,100

Robin
Bank Reconciliation Statement as on 31st March, 2015

	₹	₹
Bank Balance as per Cash Book — Overdraft		11,890
Add: Cheques deposited but not credited by bank	2,890	
Less: Customer's cheque already adjusted in Cash Book	980	1,910
		13,800
Less: Cheques issued but not presented for payment		1,000
Bank Balance as per Bank Statement (Overdraft)		12,800

Statement of Effect on Profit

Particulars	₹	₹
Profit as per Draft Accounts		81,208
Add: Interest adjustments (₹ 160 + 160)	320	
Repairs of own house charged to business account	870	1,190
		82,398
Less: Bank charges not recorded in the Cash Book	320	
Bad Debts	980	
Purchases understated	1,000	
Depreciation on Plant (Note 1)	1,000	
Additional depreciation on Motor Vehicles (Note 2)	600	
Motor repairs wrongly credited to Motor Vehicles Account	2,400	6,300
Revised Profit		76,098

Working Notes :

(1) A new plant of ₹ 12,900 had been recorded as ₹ 2,900 and depreciation of ₹ 290 had been charged. Therefore, the rate of depreciation = ₹ 290 / ₹ 2,900 × 100 = 10%. 10% depreciation on balance Plant for ₹ 10,000 (₹ 12,900 – ₹ 2,900) is to be charged to the Profit and Loss Account. Therefore, profit will be reduced by ₹ 1,000.

(2) Motor repairs of ₹ 2,400 has been wrongly credited to Motor Vehicles Account. Therefore, less depreciation @ 25% on ₹ 2,400 had been charged. To rectify this, ₹ 600 is to be deducted from profit.

Illustration 19

The following is the summary of a Cash Book as presented to you for the month of December, 2014.

Date	Particulars	L.F.	₹	Date	Particulars	L.F.	₹
	Receipts		1,469		Balance b/f		761
	Balance c/f		554		Payments		1,262
			2,023				2,023

All receipts are banked and payments are made by cheque. On investigation you discover :

1. Bank charges of ₹ 136 entered in the Bank Statement had not been entered in the Cash Book.
2. Cheques drawn amounting to ₹ 267 had not been presented to the bank for payment.
3. Cheques received totalling ₹ 762 had been entered in the Cash Book and paid into the bank, but had not been credited by the bank until January, 2015.
4. A cheque for ₹ 22 had been entered as a receipt in the Cash Book instead of as a payment.
5. A cheque for ₹ 25 had been debited by the bank erroneously.
6. A cheque received for ₹ 80 had been returned by the bank and marked 'No funds available', no adjustment had been made in the Cash Book.
7. All dividends receivable are credited directly to the bank account during December, amount totalling ₹ 62 was credited by the bank and no entries made in the Cash Book.
8. A cheque drawn for ₹ 6 had been incorrectly entered in the Cash Book as ₹ 66.
9. The balance brought forward should have been ₹ 711.
10. The Bank Statement as on 31st December, 2014 showed an overdraft of ₹ 1,162. You are required to:
    (1) Show the adjustment required in the Cash Book, and, (2) Prepare a Bank Reconciliation Statement as on 31.12.2014.

Solution

Bank Overdraft as per the Pass Book		1,162

(ii) Where bank favourable/overdraft balance as per the Pass Book is given

In this situation, the following steps should be taken:

Step 1 Prepare a Bank Reconciliation Statement taking the balance as per Pass Book as the starting point.

Step 2 Find out the balance as per the Cash Book on the basis of the above statement.

Step 3 Draw up a Cash Book (Bank Column only). Write down the above balance in the debit/credit side of the Cash Book as per its nature (favourable/overdraft).

Step 4 Make the necessary entries in the Cash Book in respect of : (1) Amount recorded in the Pass Book but not recorded in the Cash Book; and (2) All errors that have crept in the Cash Book.

Step 5 Balance off the Cash Book and bring down the adjusted Cash Book balance.

Step 6 Prepare Bank Reconciliation Statement in the usual manner taking adjusted Cash Book balance and leaving those items which have already been considered in the adjusted Cash Book.

Illustration 20

When Transit Co. Ltd. received its Bank Statement showing a favourable balance of ₹ 7,392 for the period ended on 30 June 2015, this did not agree with the balance in the Cash Book.

An examination of the Cash Book and Bank Statement disclosed the following:

1. A deposit of ₹ 492 paid on 29th June, 2015 had not been credited by the bank until 1st July, 2015.
2. Bank charges amounting to ₹ 17 had not been entered in the Cash book.
3. A debit of ₹ 42 appeared on the Bank Statement for an unpaid cheque, which had been returned marked ‘Out of date’. The cheque had been re-dated by the customer and paid into the bank again on 3rd July, 2015.
4. A standing order for payment of annual subscription amounting to ₹ 10 had not been entered in the Cash Book.
5. On 25th June, the managing director had given the cashier a cheque for ₹ 100 to pay into his personal account at the bank. The cashier had paid it into the Company’s account by mistake.
6. On 27th June, two customers of Transit Co. Ltd., had paid direct to the company’s bank account ₹ 499 and ₹ 157 respectively in payment for goods supplied. The advices were not received by the company until 1st July and were entered in the Cash Book under that date.
7. On 30th March, 2015 the company had entered into a hire-purchase agreement to pay by banker’s order a sum of ₹ 26 on the 10th day of each month, commencing, April. No entries had been made in the Cash book.
8. ₹ 364 paid into the bank had been entered twice in the Cash Book.
9. Cheques issued amounting to ₹ 4,672 had not been presented to the bank for payment until after 30th June, 2015.
10. A customer of the company, who received a cash discount of $2\text{-}^1/_2\%$ on his account of ₹ 200 paid the company a cheque on 10th June. The cashier erroneously entered the gross amount in the bank column of the Cash Book.

You are required :

(a) To show the necessary adjustments in the Cash Book of Transit Co. Ltd., bringing down the correct balance on 30th June, 2015; and,

(b) To prepare a Bank Reconciliation Statement on that date.

2 (a) Where causes of difference are not given, but extract of the Cash Book and Pass Book are given

In the practical situation no readymade causes of discrepancies are available. Bank Reconciliation Statement is required to be prepared from the extract of the Cash Book and the Pass Book. In this situation the causes of discrepancies are to be searched out first and then the Bank Reconciliation Statement to be prepared.

(i) When both the Cash Book and the Pass Book of the same period are given, following steps are taken

Step 1 Compare the amount of the deposits listed on the Bank Statement (Pass Book) with the amount of the deposits listed on the Cash Book Bank Column (debit side) Place tick marks () in the Cash Book and on the Bank Statement beside the items that agree. Any unticked items in the Cash Book represent deposits not yet recorded by the bank. Now list down these items under the heading, 'Cheques/money deposited but not yet credited by the Bank'. Any unticked items in the Bank Statement represent deposits not yet recorded in the Cash Book. List down these items under the heading 'Amount credited by the bank not yet recorded in the Cash Book'.

Step 2 Compare the amount of the withdrawals listed on the Bank Statement (Pass Book) with the amount of the payments listed on the credit side of the Cash Book (Bank Column). Place tick marks ( ) in the Cash Book and on the Bank Statement beside the items that agree. Any unticked items in the Cash Book represent payments not yet recorded by the bank. Now list down these items under the heading 'Cheques issued/drawn but not presented for payment to the bank'. Any unticked items in the Bank Statement will be withdrawals not yet recorded in the Cash Book. Now list down these items under the heading 'amount debited by the bank not yet recorded in the Cash Book'.

15	By Cheque		✓ 30	
20	By ITC Dividend		25	
30	By Interest on deposit		5	

From the above it is clear that :

1. Cheque deposited but not credited by the Bank : A Mukherjee ₹ 40 + P Sharma ₹ 20 = ₹ Total ₹ 60

2. Amount credited by the Bank not recorded in the Cash Book : ITC Dividend ₹ 25 + Interest on deposit ₹ 5 = Total ₹ 30

Dr. **Cash Book (Bank Column)** **Cr.**

Date	Particulars	L.F.	₹	Date	Particulars	L.F.	₹
2015 Jan. 1	To Balance b/f		500	2015 Jan.1	By P. Halder (Ch.No. 825)		✓ 200
				10	By O.P. Khanna (Ch.No. 826)		✓ 50
				20	By K.D. Rowan (Ch.No.827)		100
				30	By R.P. Singh (Ch.No. 828)		50

Bank Statement

Date	Particulars	Dr. (Withdrawn)	Cr. (Deposited)	Balance (₹)
2015 Jan. 1	Balance b/f			500 (Cr.)
8	To Cheque (825)	✓ 200		
15	To Cheque (826)	✓ 50		
25	To Bank charges	10		
30	To Insurance Premium	100		

From the above it is clear that :

1. Cheque issued but not presented to the Bank for payment : K.D. Rowan ₹ 100 + R.P. Singh ₹ 50 = Total ₹ 150

2. Amount debited by Bank not recorded in the Cash Book : Bank charges ₹ 10 + Insurance Premium ₹ 100 = Total 110.

Step 3 And finally, list any other discrepancy item under the appropriate discrepancy heading. For example, show any errors discovered in the Cash Book and in the Bank Statement.

Step 4 Prepare Bank Reconciliation Statement in the usual manner after taking into consideration all the listed items and closing balances of the Cash Book or Pass Book/Bank Statement. The following illustration will make the matter more clear.

Illustration 21

The following were the bank column of the Cash Book of Prakash Agarwal.

Dr. **Cash Book (Bank Column)** **Cr.**

Date	Particulars	L.F.	₹	Date	Particulars	L.F.	₹

28	Cheque	40		1,355 Cr.
29	Cash	250		1,105 Cr.
31	Standing order — Club subscription	$\boxed{100}$		1,005 Cr.

You are required to prepare a Bank Reconciliation Statement

Solution **List of causes of difference**

1. Cheque deposited but not credited by Bank : H. Kabir ₹ 240 + T. K. Basu ₹ 300 = ₹ 540
2. Cheque issued but not presented : C. Banerjee ₹ 300 + B. K. Agarwal ₹ 150 + L. N. Mishra ₹ 80 = ₹ 530
3. Amount debited by Bank not entered in the Cash Book : Bank charges ₹ 5 + Subscription ₹ 100 = ₹ 105

Bank Reconciliation Statement as on 31.12.2014

			₹	₹
		Bank balance as per the Cash Book		1,120
Add:	2.	Cheque issued but not presented to the Bank	530	530
				1,650
Less:	1.	Cheque deposited but not credited by the Bank	540	
	3.	Bank charges debited by the Bank, not recorded in the Cash Book	5	
	3.	Subscription paid by bank, as per standing order, not recorded in the Cash Book	100	645
		Bank balance as per the Pass Book (Cr.)		1,005

Illustration 22

You are given below the Cash Book (bank column) and the Bank Statement which reveals that the bank balance as per Cash Book of Mr T Sinha for the month of January, 2014 did not agree with the bank balance as per Bank Statement. You are asked to mention the reasons of disagreement and prepare a Bank Reconciliation Statement as on 31.12.2014 :

Dr. Cash Book (Bank column) Cr.

Date	Particulars	₹	Date	Particulars	₹
2014			2014		
Jan. 1	To Balance b/f	5,780	Jan. 2	By J K Traders	3,500
3	To A K Roy	2,500	4	By Rent (paid to H Kar)	750
11	To S Bros.	5,250	7	By B Ghosh	1,200
16	To Cash	2,000	15	By French Motor Car Co.	2,450
20	To N Singh	1,420	26	By Insurance Premium (LIC)	600
			31	By Balance c/f	8,450
		16,950			16,950

Bank Statement

Date	Particulars	Dr. (Withdrawals) ₹	Cr. (Deposits) ₹	Balance ₹
2014				
Jan. 1	Balance b/f			(Cr.) 5,780
4	A K Roy		2,500	8,280
4	H Kar (Rent)	750		7,530
6	J K Traders	3,500		4,030
8	Bank Charges	150		3,880
15	S Bros		5,250	9,130
16	Cash		2,000	11,130
16	French Motor Car Co	2,450		8,680
25	Interest		120	8,800
31	Dividend		600	(Cr.) 9,400

Solution

The reasons for disagreement :

(1) Cheque received from N Singh and deposited into bank, not yet credited ₹ 1,420.
(2) Cheque issued to B Ghosh not yet presented for payment ₹ 1,200.
(3) Cheque issued to LIC but not yet presented for payment ₹ 600.
(4) Bank charges not yet recorded in the Cash Book ₹ 150.
(5) Bank interest not yet recorded in the Cash Book ₹ 120.
(6) Dividend collected by the bank directly not yet recorded in the Cash Book ₹ 600.

T Sinha
Bank Reconciliation Statement as on 31.12.2014

		₹	₹
Bank Balance as per Cash Book			8,450
Add:	(2) Cheque issued to B Ghosh but not yet presented for payment	1,200	
	(3) Cheque issued to LIC but not yet presented for payment	600	
	(5) Interest credited by the bank but not yet recorded in the Cash Book	120	
	(6) Dividend collected by the bank not yet recorded in the Cash Book	600	2,520
			10,970
Less:	(1) Cheque from N Singh deposited into bank not yet credited	1,420	
	(4) Bank charges not yet recorded in the Cash Book	150	1,570
Bank Balance as per Bank Statement			9,400

(ii) When both the Cash Book and the Pass Book of the same period and also the Bank Reconciliation Statement of the previous period are given

In this situation, the following steps should be followed for preparing the Bank Reconciliation Statement.

Step 1 Compare the amount of the deposits listed on the Bank Statement with the amount of deposits listed on the debit side of the Cash Book (Bank Column). Place tick marks ( ) in the Cash Book and recorded in the Bank Statement beside the items that agree. Also compare the previous months' Reconciliation Statement with the deposit column of the Bank Statement to make sure that any deposit then in transit has been recorded on the current month's statement. Place tick marks ( ) (in the previous months' Reconciliation Statement) on the items 'Cheque deposited but not credited by bank'. Any unticked items in the Cash Book and in the previous month's Statement represent deposits not yet recorded by the bank.

Now, list down these items under the heading 'Cheques/money deposited but not yet credited by the bank'.

Any unticked items in the Bank Statement represent deposits not yet recorded in the Cash Book.

Now, list down these items under the heading 'Amount credited by the bank not yet recorded in the Cash Book'.

Step 2 Compare the amount of withdrawals listed on the Bank Statement with the amount of the payment listed on the credit side of the Cash Book (Bank Column). Place tick marks ( ) in the Cash Book and in the Bank Statement beside, the items that agree. Also compare the previous month's Reconciliation Statement with the withdrawals listed on the Bank Statement to ascertain whether there still are outstanding cheques from the last reconciliation or not. Place tick marks ( ) (in the previous month's Reconciliation Statement) on the items 'Cheque issued but not presented to the bank for payment' and on the Bank Statement beside the items that agree.

Any unticked item in the Cash Book and in the previous month's Reconciliation Statement represents payment not yet recorded by the bank. Now list down these items under the heading 'Cheques issued/drawn but not presented for payment to the bank'.

Any unticked item in the Bank Statement will be withdrawals not yet recorded in the Cash Book. Now list down these items under the heading 'Amount debited by the Bank not yet recorded in the Cash Book'.

Step 3 And finally, list any other discrepancy item under the appropriate discrepancy heading.

Step 4 Prepare Bank Reconciliation Statement in the usual manner after taking into consideration all the listed items and the closing balance of the Cash Book or Bank Statement/Pass Book.

The following illustration will make the matter more clear.

Illustration 23

P. Sengupta reconciled his Cash Book with the Bank Statement every month. His Bank Reconciliation Statement for the month of November was as follows:

Bank Balance as per Bank statement 30.11.2014		(O/D) ₹ 4,500
Add: Cheque issued but not presented to the Bank for payment :		
Jimi Bros	54	
S. Sarkar	$\boxed{110}$	
P. Usha	26	190
		4,690

The following is the extract of the Bank Column in the Cash Book for the month of December, 2014, and a copy of the Bank Statement for the same period.

Four Column Bank Reconciliation Statement

The purpose of preparing a regular bank reconciliation statement is to reconcile the balance as per pass book and the adjusted bank balance as per cash book. In a four-column bank reconciliation statement, the following reconciliations are made :

1. The pass book balance and the cash book balance at the beginning of a period.
2. The pass book balance and the cash book balance at the end of the same period.
3. The receipts as per pass book and as per cash book for the same period.
4. The payments as per pass book and as per cash book for the same period.

The preparation of a four-column bank reconciliation statement can be illustrated with the following example :

Balances as per pass book :	₹	Cheques deposited but not credited :	₹
June 30, 2015	40,000	June 30, 2015	20,000
July 31, 2015	60,000	July 31, 2015	40,000
July receipts as per pass book	1,00,000	Cheques issued but not presented :	
July payments as per pass book	80,000	June 30, 2015	40,000
Bank service charges for June	40	July 31, 2015	80,000
Bank service charges for July	60	July receipts as per cash book	1,20,000
Balances as per cash book		July payments as per cash book	1,19,980
June 30, 2015	20,040		
July 31, 2015	20,060		

In preparing a four-column bank reconciliation statement, following are the steps to be followed :

Step 1 To complete the bank reconciliations at the beginning and at the end of the period. The first column indicates the reconciliation at the beginning of the period (30.6.2015) and the fourth column indicates the reconciliation at the end of the period (31.7.2015).

Step 2 Complete the balances as per pass book and the balances as per cash book rows, for instance, ₹ 1,00,000 and ₹ 80,000; ₹ 1,20,000 and ₹ 1,19,980.

Step 3 Enter the reconciling items in the appropriate receipts or payments column. To illustrate this step, consider each of the reconciling items in the example :

(a) Cheques deposited but not credited at the end of June will be cleared during July and it is included in the receipts of July (as per pass book). This amount (₹ 20,000) should be deducted from the July bank receipts to arrive at the correct receipts for July.

(b) Cheques deposited but not credited at the end of July will be cleared in August. It is not included in bank receipts in July. Therefore, it (₹ 40,000) must be added to the July bank receipts to arrive at the correct receipts of July.

(c) Cheques issued but not presented at the end of June will be cleared during July. It is included in the July payments (as per pass book). This amount (₹ 40,000) must be deducted to arrive at the correct payments of July.

(d) Cheques issued but not presented at the end of July will be cleared during August. It represents payments of July. Therefore, they must be added to the bank payments to arrive at the correct payments for July.

(e) The bank service charge (₹ 40) for the month of June represents a June payment which is not recorded in the cash book until June bank statement is received sometime in July. Therefore, this bank charge must be deducted from July cash book payments to arrive at the correct payments for July.

(f) The bank serve charge ₹ 60 for the month of July is an actual payment for July, but it is not recorded in the cash book until August, when July bank statement is received. Therefore, this amount must be added to arrive at the correct payment for July.

Four-Column Bank Reconciliation Statement (all figures in ₹)

Particulars	Reconciliation (30.6.2015)	July Receipts	July Payments	Reconciliation (31.7.2015)
Balances as per pass book	40,000	1,00,000	80,000	60,000
Cheques deposited but not credited				
June 30, 2015	20,000	(a) (20,000)		
June 31, 2015		(b) 40,000		40,000
Cheques issued but not presented				
June 30, 2015	(40,000)		(c) (40,000)	
July 31, 2015			(d) 80,000	(80,000)
Adjusted balances as per pass book	20,000	1,20,000	1,20,000	20,000
Balances as per cash book	20,040	1,20,000	1,19,980	20,060
Bank service charges				
June, 2015	(40)		(e) (40)	
July, 2015			(f) 60	(60)
Adjusted balances as per cash book	20,000	1,20,000	1,20,000	20,000

Illustration 24

X Company provides the following information :

	₹		₹
Balances as per pass book :		Bank service charges :	
June 30, 2015	10,203	June 2015	10
July 31, 2015	12,000	July 2015	20
July receipts as per pass book	15,000	Balances as per cash book :	
July payments as per pass book	13,203	June 30, 2015	11,713
Cheques issued but not presented :		July 31, 2015	11,020
June 30, 2015	5,000	July receipts as per cash book	11,500
July 31, 2015	4,000	Wrong debit in June, corrected by the bank in July	500
Cheues deposited but not cleared :			
June 30, 2015	6,000		
July 31, 2015	3,000		

You are required to prepare a four-column Bank Reconciliation Statement for the month of July, 2015.

Solution Four-Column Bank Reconciliation Statement for the month of July, 2015 (all in rupees)

Particulars	Reconciliation (30.6.2015)	July Receipts	July Payments	Reconciliation (31.7.2015)
Balances as per pass book	10,203	15,000	13,203	12,000
Cheques deposited but not presented				
June 30, 2015	6,000	(6,000)		
June 31, 2015		3,000		3,000
Less : Cheques issued but not presented				
June 30, 2015	(5,000)		(5,000)	
July 31, 2015			4,000	(4,000)
Wrong debit in June, corrected in July	500	(500)		
Adjusted balances as per pass book	11,703	11,500	12,203	11,000
Balances as per cash book	11,713	11,500	*12,193	11,020
Bank service charges				
June, 2015	(10)		(10))	
July, 2015			20	(20)
	11,703	11,500	12,203	11,000

* Opening cash book balance + receipts as per cash book – Closing stock book balance = payments as per cash book.
₹ (11,713 + 11,500 – 11,020) = ₹ 12,193.

Key Points

- Bank Reconciliation Statement is a statement which contains a complete and satisfactory explanation of the differences in balances as per the Cash Book and Bank Statement.
- A standing order is an instruction to a bank by a customer to make a fixed payment regularly on stated days to some third party (ies).
- Direct debit is an instruction given to a bank by its customer to allow charges to be made periodically to the account at the instance of some third party.

THEORETICAL QUESTIONS

1. What do you mean by Bank Reconciliation Statement? Why is it prepared?
2. What do you mean by Bank Reconciliation? When is Reconciliation necessary?
3. What are the different causes for discrepancy between the balance as per the Cash Book and the Pass Book?

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each statement or answer each question below.

1. All Bank Reconciliation Statement is prepared :
   A at the end of each week
   B at the end of each month
   C at the end of the accounting year
   D whenever a bank statement is received

2. Which one of the following is not a reason for the disagreement between Cash Book balance and Bank Statement balance ?
   A unpresented cheques
   B direct receipts by the bank
   C error(s) in the cash book
   D bank overdraft
3. When the receiver can change both the date and the amount of payment, it is known as
   A uncredited cheques
   B direct debit
   C standing order
   D credit transfer
4. Which of the following will find a place in the bank reconciliation statement ?
   A unpresented cheques
   B direct debit
   C direct receipts by the bank
   D credit transfer
5. Which of the following is not a reason for discrepancy in the balances of both the cash book and the bank statement?
   A unpresented cheques
   B post-dated cheques
   C deposit not credited
   D credit transfer
6. A current account holder had only ₹ 1,200 in his account and a cheque for ₹ 2,000 issued by him was paid out by the bank. Pick the most appropriate term to describe the above situation.
   A bank deficit
   B bank deposit
   C bank overdraft
   D bank loan
7. Which of the following a credit balance in the cash book indicates ?
   A the account is closed
   B cash in hand
   C cash at bank
   D bank overdraft
8. In checking a bank statement against the bank account details in the cash book, that a direct debit for rent has not been entered in the cash book. Do you ?
   A debit the bank account and credit the rent account
   B debit the rent account and credit the bank account
   C debit the rent account and credit the bank statement
   D not enter the direct debit as it reflects only the bank statement
9. Why is a bank reconciliation statement prepared ?
   A to calculate the bank balance for the balance sheet
   B to check the amount owing from debtors
   C to show how much has been paid to creditors
   D to show the amount of petty cash in hand
10. Which of the following phrases represents credit transfer ?
   A these are fees for bank services
   B it is a system of periodical payments
   C a business may receive into its bank account revenue from a variety of sources without direct knowledge of these.
   D it is another name for standing order.
11. Which of the following does not represent bank reconciliation ?
   A it is based upon the information contained in the bank statement
   B it should be prepared by a person who neither handles nor records cash
   C it is an important part of the internal control system over cash balance lying at the bank
   D the bank column of the cash book finds a place in the trial balance.

12. Which one of the following is a genuine bank reconciliation statement item, as opposed to an error or omission which requires an entry in the cash book ?
    A a credit transfer
    B overdraft interest
    C a standing order
    D an unpresented cheque
13. Which one of the following item requires an entry in the cash book at the time of preparing bank reconciliation statement under amended cash book method ?
    A cheques issued but not presented
    B cheque deposited but not credited
    C bank charges
    D cheque received and recorded in the cash book but not yet deposited into the bank.
14. A bank reconciliation statement starts at the debit balance shown in the cash book.
    How are uncredited deposits and unpresented cheques shown in the bank reconciliation statement ?

	Uncredited deposits	*Unpresented cheques*
A	added	added
B	added	deducted
C	deducted	added
D	deducted	deducted

15. Which of the following correctly describe(s) why a bank reconciliation is prepared ?
    (i) to identify entries which have been generated by the bank, but not recorded in the cash book
    (ii) to identify errors in the entries in the cash book
    A (i) only
    B (ii) only
    C both (i) and (ii)
    D neither (i) nor (ii)
16. Kabita pays her mortgage by instructing the bank to make monthly payments of a fixed amount from her current account. When the mortgage rate changes she issues revised instructions to the bank. Which method of payment is Kabita using ?
    A standing order
    B payable order
    C direct debit
    D crossed cheque
17. Mr. Albert is the Managing Director of Dey's Medical Ltd. He signs his name on a company cheque for ₹ 25,000 in accordance with the bank mandate. The company name appears on the cheque.
    If the bank dishonours the cheque as the company has insufficient funds in the account, who is liable for ₹ 25,000?
    A Mr. Albert
    B the bank
    C Dey's Medical Ltd.
    D no one

PRACTICAL QUESTIONS

1. The Cash Book of P.H. Ltd. shows a favourable bank balance of ₹ 3,856 on 30 June 2015. After comparing the entries in the Cash Book with the entries on the related Bank Statement you find that :
   (i) Cheques amounting to ₹ 218 entered in the Cash Book, have not yet been presented for payment to the bank.
   (ii) An amount of ₹ 50 entered on the debit side of the Cash Book has not been banked.
   (iii) An amount of ₹ 95 has been credited by the bank to the account in error.
   (iv) The Bank has credited and then debited the Bank Statement with an amount of ₹ 48 being Z's cheque which it forwarded on 1st July, 2015 marked 'insufficient funds — return to drawer'.
   (v) Interest of ₹ 10 has been charged by the bank, but not yet entered in the Cash Book.
   (vi) A Cheque from a customer entered in the Cash Book as ₹ 88 has been correctly entered in the bank as ₹ 188.
   You are required to prepare a Bank Reconciliation Statement.
2. From the following particulars, ascertain the bank balance as per the Pass Book of Mr. Kesari as at 31.3.2015.
   (i) Credit balance as per the Cash Book as at 31st March 2015 ₹ 38,721.
   (ii) Interest charged by the Bank ₹ 879 recorded in the Pass Book only.

(iii) Out of cheques worth ₹ 2,400 deposited for collection up to March 31st, value of cheques collected ₹ 1,879 only.
(iv) Dividends on shares collected by the bankers with no intimation to Mr. Kesari ₹ 850.
(v) Out of cheques issued during the last week of March, cheques not presented for payment were ₹ 1,850.
(vi) The bank had credited ₹ 200 on March 30, 2015, which sum should have been credited to Mrs. Kesari's Account.
(vii) Incidental charges debited by the Bank with no advice ₹ 20.

3. On 31st March 2015 a Bank Statement was received by your client. The balance at the bank, as shown by the Pass Book, on behalf of your client as on that date was ₹ 10,500. This balance did not agree with the Cash Book balance. On enquiry the following points were discovered.
(i) On 28th March 2015 three cheques of ₹ 500, ₹ 600 and ₹ 1,200 were deposited by your client but these cheques were not credited by the bank during the period.
(ii) On 27th March, 2015, the client issued two cheques of ₹ 750 and ₹ 350 to his creditors but these were not presented by them to the bank for payment.
(iii) An interest amounting to ₹ 150 was credited in the Pass Book, but was not entered into the Cash Book.
You have been requested to ascertain the correct balance as per the Cash Book.

4. From the following information prepare a Bank Reconciliation Statement as at 31.12.2014:
(i) Balance as per the Pass Book (Dr.) ₹ 7,550.
(ii) Cheques drawn, but not cashed at the Bank ₹ 3,500.
(iii) Cheques deposited into bank but not shown in Pass Book ₹ 4,570.
(iv) Dividend of ₹ 2,000 collected by the bank directly on 30.12.2014 was not recorded in the Cash Book.
(v) Cheque amounting to ₹ 730 was deposited into the bank, but it was recorded in the debit side of the Pass Book.
(vi) Debit side of the Cash Book was wrongly overcast by ₹ 500.
(vii) Bank charges recorded twice in the Cash Book ₹ 25.

5. Prepare a Bank Reconciliation Statement as on 31.12.2014 from the following information and show the bank balance, as on that date, as per the Cash Book :
(i) Bank overdraft, as on 31.12.2014 as per the Pass Book ₹ 7,891.50.
(ii) Cheques issued before, but presented for payment after 1st January, 2015 ₹ 532.25.
(iii) Cheques deposited with the bank on or before 30th December, but collected after 1st January, 2015 ₹ 631.75.
(iv) ₹ 786 was repaid by debtors on 30.12.2014 by depositing the money directly into the bank. The information was received from the bank on 2.1.2015.
(v) There was a wrong entry in the Bank Column on the debit side of the Cash Book amounting to ₹ 300.00
(vi) Dividend received ₹ 125.00 though credited in the Pass Book prior to 30.12.2014 was recorded in the Cash Book on 3.1.2015.

6. From the following particulars, calculate the Cash Book balance of a merchant as on 31st December, 2014 by means of Bank Reconciliation Statement:
(i) Balance as per the Pass Book (Dr.) ₹ 4,475.70.
(ii) A cheque for ₹ 399.50 was deposited on 24th December but the same was returned by the bank on 29th, for which no entry was made in the Cash Book.
(iii) A bill for ₹ 1,020 received from a debtor previously discounted for ₹ 1,000 was dishonoured and the bank debited the account of the merchant, but the same was not recorded in the Cash Book.
(iv) Two cheques issued on 27th December, but not encashed before 5th January, next : ₹ 650.40 and ₹ 498.30.
(v) A cheque for ₹ 300 was debited twice in the Cash Book.
(vi) Interest on overdraft for ₹ 56 and the bank charges for ₹ 17 were not passed through the Cash Book.
(vii) Dividend of ₹ 200 collected by the bank on behalf of the merchant was not recorded in the Cash Book

7. From the following information, prepare a Bank Reconciliation Statement as at 31st December, 2014 for Messrs New Steel Ltd:

		₹
(i)	Bank overdraft as per the Cash Book	2,45,900
(ii)	Interest debited by the bank on 26th December, 2014 but no advice received	27,870
(iii)	Cheque issued before 31st December, 2014 but not yet presented to bank	66,000
(iv)	Transport subsidiary received from State Government directly by the bank but not adviced to the company	42,500
(v)	Draft deposited in the bank, but not credited till 31.12.2014	13,500
(vi)	Bills for collection credited by the bank till 31st December, 2014 but no advice received by the company	83,600
(vii)	Amount wrongly debited to Company Account by the bank for which no details are available	7,400

8. Perfect Private Limited has two accounts with Ever Bank Ltd. The accounts were known as Account I and Account II. As at 31st December, 2014, the balance as per account book reflected the following :
   Account I : ₹ 1,25,000 (Regular balance; Account II : ₹ 1,11,250 (overdraft balance).
   The accountant failed to tally the balance with the Pass Book and the following information was available
   (i) The bank has charged interest on Account II ₹ 11,375 and credited interest on Account I ₹ 1,250. These were not recorded by the accountant.
   (ii) ₹ 12,500 drawn on December 10, 2014 from Account I was recorded in the books of Account II.
   (iii) Bank charges of ₹ 150 and ₹ 1,125 for Account I and Account II were not recorded in the books.
   (iv) A deposit of ₹ 17,500 in Account I was wrongly entered in Account II in the Books.
   (v) Two cheques of ₹ 12,500 and ₹ 13,750 deposited in Account I, but entered in Account II in the books, were dishonoured. The entries for dishonoured cheques were entered correctly in Account II.
   (vi) Cheques issued for ₹ 1,50,000 and ₹ 15,000 from Account I and II respectively, were not presented until January 5, 2015.
   (vii) Cheques deposited ₹ 1,25,000 and ₹ 1,17,500 in Accounts I and II respectively, were credited by the bank only on February 2, 2015.
   You are required to prepare the Bank Reconciliation Statement, for Account II.

9. From the following particulars, find out the adjusted bank balance as per the Cash Book and prepare thereafter, the Bank Reconciliation Statement as on 31-12-2014 for a sole-proprietor:

		₹
(i)	Bank overdraft as per the Cash Book	80,000
(ii)	Cheque deposited as per bank the statement but not entered in the Cash Book	3,000
(iii)	Cheques recorded for collection but not sent to the bank	10,000
(iv)	Credit side of the Bank Column cast short	1,000
(v)	Premium on proprietor's LIP paid on standing advice	5,000
(vi)	Bank charges recorded twice in the Cash Book	100
(vii)	Customer's cheque returned as per Bank Statement only	4,000
(viii)	Cheques issued but dishonoured on technical grounds	3,000
(ix)	Bills collected by the Bank directly	20,000
(x)	Cheque for ₹ 50,000 deposited but collection as per Bank Statement	49,980
(xi)	Cheque received entered twice in the Cash Book	5,000

10. On checking Surendra's Cash Book with the Bank Statement for the month of March 2015, you find the following:
   (i) Cash Book showed an overdraft of ₹ 4,500
   (ii) The payment side of the Cash Book has been undercast by ₹ 150.
   (iii) A cheque for ₹ 750 drawn on his savings deposits above has been shown as drawn on current account in Cash Book.
   (iv) Under instructions from Surendra, the bank has transferred interest ₹ 900 from his deposit account to his current account on April 3, 2015. This amount had, however, been taken in the Cash Book before March 31, 2015.
   (v) Cheques amounting to ₹ 7,500 drawn and entered in the Cash Book had not been presented.
   (vi) Cheques amounting to ₹ 6,000 sent to the bank for collection, though entered in the Cash Book, had not been credited by the bank.
   (vii) Bank charges of ₹ 75 as per the Bank Statement of Account had not been taken in the Cash Book.
   (viii) Dividends of the amount of ₹ 3,000 had been paid direct to the bank but not entered in the Cash Book.
   (ix) A cheque issued to Rafiq for ₹ 200 was replaced when out of date. But it was entered in the Cash Book again, no other entry having been recorded.
   (x) Both cheques were issued but not presented as shown above.
   You are required to arrive at the balance as it would appear in the Bank Statement as on March 31, 2015.

11. Prepare a Bank Reconciliation Statement as on December 31, 2014 of Mr. Pandit from the following particulars after finding out the adjusted bank balance as per the Cash Book:

		₹
(i)	Bank overdraft as per the Cash Book	3,500
(ii)	Cheques issued but not encashed during the year	2,200
(iii)	Cheques deposited but not credited by the bank during the year	660
(iv)	Cheques deposited as per Bank Statement not entered in the Cash Book	950
(v)	Bank charges not recorded in the Cash Book	150
(vi)	Interest charged by the bank recorded twice in the Cash book	450
(vii)	Club dues of Mr. Pandit paid by the bank as per standing instructions not recorded in the Cash Book	100
(viii)	Cheque issued by Mr. Pandit dishonoured.	1,200

12. On 30th September, 2014, the Bank Account of P according to Bank Column of the Cash Book was overdrawn to the extent of ₹ 4,500. On the same date the Bank Statement showed a balance of ₹ 880 in favour of P. An examination of the Cash Book and Bank Statement reveals the following :
    (i) A cheque of ₹ 1,200 deposited on 29th September, 2014, was credited by the Bank only on 3rd October, 2014.
    (ii) A payment by cheque for ₹ 150 has been entered twice in the Cash Book.
    (iii) On 29th September, 2014, the bank credited an account of ₹ 1,700 received from a customer of P, but the advice was not received by P until 1st October 2014.
    (iv) Bank charges of ₹ 70 has not been entered in the Cash Book.
    (v) On 9th September, 2014, the bank credited ₹ 2,500 to P in error.
    (vi) A bill of exchange of ₹ 1,200 was discounted by P with his bank. This bill was dishonoured on 28th September 2014, but no entry had been made in the books of P.
    (vii) Cheque issued upto 30th September 2014, ₹ 6,000 but not presented for payment upto that date totalled ₹ 3,500.

    You are required : (a) To show appropriate rectifications required in the Cash Book of P, to arrive at the correct Balance on 30th September 2014; and (b) To prepare a Bank Reconciliation Statement as on that date.
13. On 30th November 2014, the Cash Book of Imran Khan showed a debit balance on the current account with the Scottish Bank Ltd. of ₹ 5,620.

    The Bank Statement at that date showed a balance due to the bank of ₹ 5,536. The following additional information has been obtained:
    (a) The credit side of the Cash Book for June 2014 does not cross add, the error being the over-statement of the bank drawn column by ₹ 237.
    (b) A deposit receipt for ₹ 4,000 was uplifted on 1st October, 2014 with interest thereon for ₹ 440. ₹ 3,000 was relodged on deposit receipt and the balance lodged in the current account. No entries have been made in the books in respect of these transactions.
    (c) The Cash Book includes an entry for a cheque for ₹ 534 received from a customer in October, 2014. The cheque was, however, postdated and was still held by the cashier on 30th November, 2014.
    (d) No entries have been made in the Cash Book in respect of bond interest payments made by standing order amounting to ₹ 125 per month.

        The payments are due on the first of each month commencing on 1st April, 2014 and all payments have been made on the due dates.
    (e) A bill of exchange was received from a customer of ₹ 7,119, which was the balance due by the customer as shown by his sales ledger account. The bill was discounted with the bank, the sum of ₹ 6,300 being received and lodged in the current account. The cashier has entered the bill at its full value in the Cash Book.
    (f) No entries have been made in the books in respect of bank overdraft interest and bank charges of ₹ 701 and ₹ 67 respectively debited by the bank during the year, while amounts of ₹ 267 and ₹ 53 respectively were accrued but unapplied as at 30th November, 2014.
    (g) Amounts totalling ₹ 4,887 received from customers by credit transfer during the year have not been recorded in the Cash Book.
    (h) The following bank lodgements have been entered in the Cash Book as having been made prior to 1st December, 2014:

Pay-in-slip dated	*Credited on bank statement*	*Amount of lodgement*
29th November, 2014	30th November, 2014	16,621
30th November, 2014	1st December, 2014	13,157
1st December, 2014	2nd December, 2014	12,418

    (i) Cheque payments amounting to ₹ 10,976, including cheques for ₹ 631 that were outstanding at 30th November, 2014, had not been debited on the bank statement by 30th November 2014.

    Prepare the bank reconciliation at 30th November, 2014.
14. On 30th November, 2014, the Cash Book of Mrs. P. Ali showed an overdrawn position of ₹ 3,630 although her Bank Statement showed only ₹ 2,118 overdrawn.

    Detailed examination of the two records revealed the following:
    (i) The debit side of the Cash Book had been undercast by ₹ 300.
    (ii) A cheque for ₹ 1,560 in favour of X Suppliers Ltd. had been omitted by the bank from its Statement, the cheque having been debited to another customer's account.
    (iii) A cheque for ₹ 182 drawn for payment of telephone bill had been entered in the Cash Book as ₹ 128 but was shown correctly in the Bank Statement.

(iv) A cheque for ₹ 210 from A. Banerjee having been paid into bank was dishonoured and shown as such on the Bank Statement, although no entry relating to the dishonoured cheque had been made in the Cash Book.
(v) The bank had debited a cheque for ₹ 126 to Mrs. Ali's account in error; it should have been debited by them to Mr. Kali's account.
(vi) A dividend of ₹ 90 had been collected by the bank but not recorded in the Cash Book.
(vii) Cheques totalling ₹ 1,260 drawn on November had not been presented for payment.
(viii) Cheque of ₹ 1,080 deposited on 30th November had not been credited by the bank.
(ix) Interest amounting to ₹ 228 had been debited by the bank but not entered in the Cash Book.

You are required to prepare a bank reconciliation statement on 30th November, 2014.

15. On 30th June 2015 the Bank Column of the Cash Book of M showed a credit balance of ₹ 11,810. On examination of the Cash Book and Bank Statement, you find that:
(i) Cheques issued amounting to ₹ 17,520 in June 2015 had been entered in the Cash Book as ₹ 17,250. These cheques were not presented at the bank for payment until July 2015.
(ii) A cheque for ₹ 350 paid into the bank in May 2015 had been debited by the bank in error in June 2015.
(iii) Interest of ₹ 880 charged by the bank was not entered in the Cash Book.
(iv) Cheque received and recorded in the Cash Book but not sent to the bank for collection ₹ 1,240.
(v) Payment received from a customer direct by the bank ₹ 2,730 but no entry was made in the Cash Book.
(vi) ₹ 4,490 was entered in the Cash Book as paid into bank on 30.06.2015 but not credited by the bank until the following day.
(vii) The payment side of the Cash Book had been undercast by ₹ 100.

You are required to show the necessary corrections in the Cash Book.
Also, prepare a Statement reconciling the amended Cash Balance with that shown in the Bank Pass Book as on 30th June 2015.

16. On 30 June 2015, Sri C. Chandra's Cash Book showed that he had an overdraft of ₹ 300 on his current account at the bank.
On checking the Cash Book with the Bank Statement, you find the following:
(1) Cheque drawn, amounting to ₹ 500, had been entered in the Cash Book but had not been presented.
(2) Cheque received amounting to ₹ 400, had been entered in the Cash Book but had not been credited by the bank.
(3) On instructions from Sri C. Chandra, the bank had transferred interest, ₹ 60 from his deposits account to his current account, recording the transfer on 5th July 2015. This amount had, however, been credited in the Cash Book as on 30th June 2015.
(4) Bank charges ₹ 35, shown in the Bank Statement had not been entered in the Cash Book.
(5) The payments side of the Cash Book had been undercast by ₹ 10.
(6) Dividends amounting to ₹ 200 had been paid direct to the Bank and not entered in the Cash Book.
(7) A cheque for ₹ 50 drawn on deposit account had been shown in the Cash Book as drawn on current account.
(8) A cheque issued to B. Banerjee for ₹ 25 was replaced when out of date.
It was entered again in the Cash Book no other entry being made. Both cheques were included in the total of unpresented cheques shown above.

You are required : (1) To indicate the appropriate adjustments in the Cash Book, and,
(2) To prepare a statement reconciling the amended balance with that shown in the Bank Statement.

17. The following were extracted from the Bank Columns of the Cash Book of S. Sweetcorn

Dr. Cash Book (Bank Column) Cr.

Date	Particulars	L.F.	₹	Date	Particulars	L.F.	₹
2015 Mar.15	Cash		18,000	2015 Mar.1	By Balance		20,000
18	C. Croydon		12,000	6	By P. People		1,000
19	A. Ash		5,000	7	By W. Wright		200
				15	By. D. Dobson		120
				30	By W. Whipple		17,500
				31	By Balance c/d		

On 31st March, 2015 he received the following Bank Statement from his bank :

Bank Statement

Date	Particulars	Dr. (Withdrawn)	Cr. (Deposited)	Balance (₹)
March 1	Balance (Dr.)			20,000
5	Interest	500		20,500
12	Charges	120		20,620
15	D. Dobson	120		20,740
15	Cash		18,000	2,740

18	C. Croydon			12,000	9,260
25	Interest on Securities			540	9,800
28	Credit transfers — Poster			100	9,900
31	Dividend Warrant			500	(Cr.) 10,400

You are requested to :

(1) Rewrite the cash book for March 2015, bringing it upto date, showing the new balance at 31st March, 2015;

Accounting Concepts and Conventions

Generally Accepted Accounting Principles (GAAP)

Generally accepted accounting principles are the conventions, rules and procedures necessary to define accepted accounting practice at a particular time. These principles provide a foundation for measuring and disclosing the results of business transactions and events. They include both conventions, bases and presentation practices.

Generally accepted accounting principles are conventional — that is, they become generally accepted by agreement rather than by formal derivation from a set of postulates or basic concepts. The principles have developed on the basis of experience, reason, custom, usage, and, to a significant extent, practical necessity. These principles are so widely used and accepted that may be produced to underlie all accounting statements.

From the above, it can be comprehended that generally accepted accounting principles instruct an accountant what to do in the usual case when he has no reason to doubt that the affairs of the organisation are being honestly conducted. Since he has reason to believe that this basic assumption is false, an entirely different situation confronts him.

Accounting Concepts and Conventions

A generally accepted set of rules can provide uniformity in the accounting system, the accounting procedure and presentation of accounting results. In developing the structure of accounting theory and to relate the theory to its practice, the accounting profession has agreed to take for granted certain basic concepts. Accounting assumptions are those broad concepts that develop generally accepted accounting principles, i.e., upon which accounting is based. Certain ideas are assumed or accepted in account in order to provide a unifying theoretical structure and internal logic of accounting. These assumptions are ***rules of the game*** and they have been developed from common accounting practices. These assumptions help accounting statements to become comparable, leading to better analysis and comparison of performances.

Basic Concepts and Conventions

1. Business Entity Concept

According to entity concept, business is considered separate and distinct from the owners of the enterprise. This concept starts with the fact that the business unit is a separate entity with its own identity. We must, for the purposes of bookkeeping, keep the owner and his business quite separate. Only those economic events which affect the business unit are recorded. Assuming that the business unit is a separate entity, accounting records are kept only from the point of view of the business unit and not the owners. For example, Mr. X starts a business, styled 'X & Co.'; accounts are to be prepared only from the point of view of 'X & Co.'—as if it was a different person from the owner. If the owner invests capital into the business, this is treated as if the owner is lending cash to the business. If a part of the capital is taken back by the owner, this is treated as a repayment of loan. For accounting purposes, a partnership firm has a separate entity apart from its partners. Likewise, the existence of a company does not depend on the life span of any of the shareholders.

This concept is applied to all forms of business organisations for the following reasons :

(a) It gives a solution to the problem of separating out business transactions from personal transactions.
(b) To ascertain the return on capital employed.
(c) To ensure the proper use of funds provided by the owners.
(d) To hold title to property in the name of the firm.
(e) To enter into transactions with outsiders in the name of the firm.

Advantages

(1) This concept stresses the importance of the business unit.
(2) This concept can be applied to any form of business organisation.
(3) It is the basis of the double entry system of book-keeping.
(4) It helps in separating out the business transactions from the personal transactions of the owner(s).
(5) This concept can be applied along with proprietary and fund concepts.
(6) It is possible to measure how successful or otherwise the business has been in terms of profit or loss.

Disadvantages

(1) Accounting is done from the viewpoint of the business unit, which is an artificial person.
(2) This concept sometimes coincides with the legal fact.
(3) To some extent, present accounting practice is not based on this concept.
(4) The owners cannot be identified with the existence of the business unit.
(5) This concept does not stress the importance of the proprietor(s).
(6) It is not concerned with increase of wealth of the owner(s).

2. Money Measurement Concept

Money is what money does. It is the medium of exchange. It provides a uniform way to measure the value of goods and services. It makes exchange more efficient. Finally, money is a store of value. Money is one form in which wealth can be maintained. The accounting system uses money as its basic unit of measurement. All business transactions are recorded in terms of money. This is because money is a useful way of converting accounting data into a common unit. Most of the resources of a business can be expressed in terms of money value. Under this concept, *only those transactions which can be measured in terms of money are to be recorded in the books of account.*

There are two *problems* with this concept. First, the concept assumes a stability in the value of money, e.g., Re 1 a year from now will buy the same amount as it does today. Secondly, many factors of vital importance to the business are outside the purview of accounting. This is because they are matters of opinion and cannot be expressed in monetary terms. Such matters include quality of management, growth of competition, changes in the nature of demand, and so on.

For the above two reasons, the money measurement concept is not ideal. It is recognised by all accountants that the concept has its limitations and inadequacies. Yet, it is accepted for accounting purposes because there is no difficulty in adopting the money measurement rule and it is not possible to employ a better measurement scale that can be easily understood by the users of accounting information.

3. Going Concern Concept

Accounting is based on the assumption that the accounting unit is to remain in operation into the foreseeable future in pursuit of its goals and objectives. When a business is inaugurated, except for terminable ventures, it is assumed that the termination of the business is not certain. Based on this idea, this concept assumes that the business will continue in operation for as long as possible and will not be dissolved in the foreseeable future, unless we have some strong evidence to suggest that this is not the case. From the accountant's standpoint, Profit and Loss Account and Balance Sheet are drawn up on the assumption that the business unit will continue functioning in the foreseeable future. This concept can be regarded as supporting the valuation of assets at historical cost or replacement cost. If this method is not adopted, the assets of the business unit would have to be shown at the net realisable value, i.e. at the amount they would sell for in the market at the Balance Sheet date. This concept is the basis of the conventional classification scheme, for instance, fixed / current assets, long term / current liabilities.

This concept assumes that the entity will continue operating under the same economic conditions and in the same general environment, but does not assume that the business will be profitable as long as it exists. This concept also does not imply that the business will continue for ever.

This concept relates to the future which is, by definition, uncertain. Therefore, many factors can be used to determine whether a business unit is a going concern. They include the following:

(a) ***Liquidity :*** The business unit must have sufficient liquid assets (assets which can be in the form of cash or can be easily converted into cash, i.e. current assets other than stock) to pay its current liabilities at present or in the future. A shortage of liquid assets may lead to the risk of insolvency. Various ratios can be formulated and applied to ascertain the liquidity of a business unit.

(b) ***Capital structure :*** A 'going concern' business unit must have a sound capital structure (the composition of an enterprise's sources of funds, especially long-term) to overcome any short-term or long-term difficulties. Capital structure of a business unit is influenced by several factors such as cost of various sources of capital, dividend policy, the risk of insolvency, stability of earnings, and the like.

(c) ***Market :*** A business enterprise cannot continue as a going concern without a continuing demand for the goods it deals in and/or the services it supplies.

(d) ***Management ability :*** A business enterprise should be managed efficiently and effectively to produce a competitive product and to see that the objectives of the enterprise are achieved. To keep the business unit going, the plans, policies, procedures and practices are to be used properly and attention concentrated on those areas that are not going according to plan.

4. Historical Cost Concept

Historical cost refers to the cost at the time of acquisition. Since accounting is basically the recording of past happenings, accountants use the acquisition price as the most objective measurement inasmuch as it is supported by the evidence of a transaction. It is a fundamental concept of accounting which is based on the historical record of the transactions, i.e., an asset is ordinarily recorded at its cost and this cost becomes the basis for subsequent accounting for the asset. If a plot of land is purchased, say for ₹ 10,000, it will appear in the books at that figure without considering the market value of the asset at any other point of time. It follows from this concept, that if nothing is paid for acquiring an asset, it will not be recorded at all. Let us take the example of Goodwill — it should be recorded in the books only when it is purchased. This concept is modified in practice by applying the concept of conservatism (valuing closing stock at cost or market value whichever is less). Furthermore, when the real worth of an asset changes with the passage of time, for various reasons, accounting records are changed to reflect changes in market value by revaluations of assets.

This concept provides uniformity in accounting records under conditions of stable prices. Historical cost values can well be retained in view of their familiarity to accountants.

The major drawback of historical cost concept stems from rapid inflation, which leads to serious distortions in the measurement of income. Since historical costs are matched against current incomes, there is an understatement of the real-value of the non-monetary assets of the business unit and an overstatement of the net income.

The reliance of business on historical cost is no accident. Alternatives to it have been advanced before. But a pragmatic consideration of the possibilities has always found historical cost, in spite of its acknowledged limitations, to be superior.

5. Realisation Concept

Realisation is the process of converting non-cash resources and rights into money. This concept is governed by the concept of conservatism. Revenue should only be brought into account when it is actually realised. However, it is not always easy to determine when revenue is realised. In determining profit, credit sales are taken into consideration. But, in future, customers may not pay their dues or may return the goods. In fact, the actual income may turn out to be less than what it was estimated to be. Therefore, the problem arises about recognising and recording revenue in the books of account for a specific accounting period. Revenue can be recognised at the point of sale or when cash is collected or at any intermediate point.

In general, revenue is recognised at the point of sale or at the performance of a service. The point at which a sale is made, depends on the terms of the contract between the buyer and the seller. But a sale is complete only when the goods are delivered by the seller and accepted by the buyer. To recognise a revenue, there is no need to wait until the cash is received. When revenue is recognised, it is included in the Profit and Loss Account.

There are several exceptions to this rule:

1. Long-term contract work-in-progress—revenue is recognised before completion of the job.
2. Cash basis—where debt collection is doubtful.
3. Hire-purchase transactions—revenue is recognised in proportion to the instalments over price.
4. Unrealised holding gains and losses—these may occur between the points of purchase and sale.

6. Accrual Concept

Any increase in the owner's equity is called revenue and, any decrease in it is called an expense. Income is the excess of revenues over expenses. In calculating profit for any financial period, expenses and revenues are matched in a more realistic way, i.e. they concern the same goods and the same time period. The accrual concept is an accounting system which recognises revenues and expenses as they are earned or incurred, respectively, without regard to the date of receipt or payment. This concept is one of the consequences of the periodicity concept. In the preparation of a Profit and Loss Account for an accounting period, revenues and expenses are recognised as they are earned or incurred respectively, and not when cash is received or paid. The earning of a revenue and the expense incurred for earning it, can be accurately related to specific time periods, but the receipts and payments may not be related to the period under consideration. This concept requires proper apportionment of expenses to time periods by the inclusion of prepayments and accruals in a Balance Sheet.

Illustration 1

J.P. & Co. draws up accounts each year to 31st March. Rent is paid for the business premises six months in advance on 1st July and 1st January each year. Recent rent payments and dates were as follows :

	₹
1st July, 2013	40,000
1st January, 2014	40,000
1st July, 2014	50,000
1st January, 2015	50,000

What amount would be charged for rent in the year 2009-10 Profit and Loss Account ?

Solution

	₹
1 April, 2009 to 30th June, 2014 (3/6 × ₹ 40,000)	20,000
1 July, 2009 to 31st December, 2014 (6/6 × 50,000)	50,000
1 January, 2010 to 31st March, 2015 (3/6 × 50,000)	25,000
Rent expenses for the year 2014-15	95,000

It is to be noted that during the accounting period 2014-15 (1st April, 2009 to 31st March, 2015) J.P. & Co. paid ₹ 1,00,000 (₹ 50,000 + ₹ 50,000) as rent but rent expenses of that period (based on accrual concept) is ₹ 95,000.

In the Balance Sheet ₹ 25,000 will be shown as an asset "**Rent Paid in Advance**".

7. Periodicity Concept

Since the going concern concept postulates that the business will keep functioning continuously, accountants choose some convenient segment of time to ascertain income for that period. This periodicity concept requires that a Profit and Loss Account and a Balance Sheet should be prepared at regular intervals to ascertain information about the business unit for all sorts of purposes—performance evaluation, tax computation, budgetary control and the like. Period-income determination leads to a comparison of the results of successive periods. In fact, periodicity is the consistency of accounting periods. For the purpose of convenient comparison of profits and losses and of other expenses, it is necessary that the periods of measurement should be equal. Since the lifespan of the business unit is segregated into equal parts, most of the problems of accounting measurement arise out of the periodicity concept. This is because accounting periods are often out of correspondence with natural cycles of business activity. The main difficulty arises in deciding what revenues and what expenses are to be taken into consideration for one accounting period and, in consequence, much effort is demanded to prepare the periodic accounts. A business transaction should be identified with a particular period. But, there may be transactions relating to several accounting periods. For example, if a business unit buys a plant for ₹ 1,00,000 with a stipulated lifespan of 5 years, the transaction relates to five accounting periods. The transaction for one accounting period is not the cost of the asset, but the depreciation of the asset charged in one accounting period. The main implication of the periodicity concept is the application of the arbitrary allocation and apportionment of indirect costs, i.e., judgement and guessing will always be required to measure such items as depreciation, doubtful debts, and so on.

The periodicity concept results in the following advantages :

(a) Uniformity and consistency in accounting treatment for profit ascertainment and asset valuations.
(b) Proper matching of periodic revenues and expenses to achieve the objectives of accounting.
(c) Comparability of financial statements of different periods is facilitated.

8. Consistency Concept

Consistency concept relates to the method of measurement in accounting. Accounting principles are not static or unchanging. It is possible to adopt a variety of principles and procedures for financial events. If, in treating a given event, two or more contradictory methods are used, it may yield conflicting results. Whatever accounting method a business unit decides to adopt, a consistent approach has to be followed.

It is very important that the accountant be consistent in applying principles and procedures to similar situations, because inconsistency in reporting can cause misleading interpretations and, therefore, wrong conclusions. The user must be sure that the accounts for a particular business unit for successive years are comparable with each other. Comparability does require that the entity apply the same accounting principles on a consistent basis. Therefore, consistency is essential in improving comparability across accounting periods. This concept gives confidence to the users of accounting information. Though consistency is obligatory for sound financial accounting, this does not mean that changes cannot be made in a business unit's accounts. In the event of any change (when there are good reasons for it), a note must be appended along with the statements indicating the alteration/s.

In accounting, whenever the question of consistency arises, it is spoken of in three different senses:

(i) ***Vertical consistency*** : It means the consistency within a given set of statements of a firm at a specific date and for a specific time. An example of inconsistency within a statement is the recording of an asset in the Balance Sheet at cost and charging of the related depreciation on the basis of replacement cost in the Profit and Loss Account.

(ii) ***Horizontal consistency*** : It means the intra-firm consistency between different accounting periods. There should be consistency in applying accounting methods to different accounting periods. The Profit and Loss Account and the Balance Sheet of an accounting period must be made out on the basis that the figures stated are consistent with those of the earlier years.

(iii) ***Third dimensional consistency*** : It means the inter-firm consistency between a particular organisation and the other organisations in similar industry or trade. It refers to the use of similar measurement concepts and procedures for related items by different firms in the same industry.

9. Prudence (or Conservatism) Concept

This is a basic accounting concept which requires that a degree of caution is necessary when making estimates required under conditions of uncertainty, so that assets or income are not over-stated and liabilities or expenses are not under-stated. Revenue can only be recorded in the books of account when there is a reasonable certainty about its realisation. At the same time, provision must be made for all possible liabilities. It is not important whether the amount of liability is known with certainty or is based on estimation. To illustrate, inventories are recorded at their cost or market price, whichever is lower. Likewise, if there is an anticipation that a debt may not be realised, a specific amount is set aside from profit as a provision for doubtful debts. This concept is expressed as : "Recognise all losses and anticipate no gains". This concept attempts to state the lowest likely value of assets and profits, and the highest likely amount of any losses or liabilities incurred.

Following are the three main arguments for prudence principle :

First, it is necessary to compensate for the frequent over-optimisation in preparing financial statement.

Second, overstating profit is potentially disastrous because it can lead to a reduction of capital.

Third, it is the only practical way of dealing with uncertainty about potential revenue, expenses, asset values and liabilities.

10. Materiality Concept

Materiality implies significance, substance, importance and consequence. The materiality concept permits other concepts to be ignored if the effects are not considered material. The concept of materiality is the threshold for recognition of a transaction in accounting process. Since materiality is primarily related to relevance, this concept deals with the relative importance of economic data. In the accounting sense, an item is recorded only when it is considered to be useful or important to the user of a financial statement. Thus, accountants do not record those transactions which are insignificant and recording those would create more problems than solutions.

Again, as no benefit is gained from excessive precision, accounting statements are not made complicated by including trivial matters—only a reasonable approximation is considered acceptable. It means, accountants take the simpler course of action, even though less exact. For example, a brand new pencil is an asset to the business unit. Whenever the pencil is used, a part of the asset is consumed. Although the pencil is still in use at the year-end, its original cost is so insignificant that it would be a waste of time to evaluate and include it in closing stock. Instead, it is written-off as revenue in the period it was purchased. To make the figures manageable without affecting the accuracy of the accounting data, only round figures (figures to the nearest rupee) are generally shown in the financial statement of any organisation.

Whether an item is material or not depends on personal judgement and common sense. There cannot be any hard and fast rule for that. What is important is that omission of information from the financial statements should not impair the decision of a user of accounting information.

11. Matching Concept

Since the matching concept is an essential part of accrual accounting, these two are often used interchangeably. Like accrual concept, the matching concept also results from periodicity concept. The matching concept requires that the expenses for an accounting period should be matched against related revenues, rather than recognising revenues as being earned at the time when cash is received or recognising expenses when cash is paid. For ascertaining profit, a misleading impression would be given if the cash received during a particular period is simply compared with the cash paid out during the same period. This is because, the exact period in which the cash is either received or paid may bear no relationship to the period in which the business transaction took place. As most businesses keep accounts on accrual basis, it is necessary that the accounting system match periodically the revenues earned against expenses incurred. The result of this matching being, the net income or net loss. This method requires proper allocation of costs into appropriate period so that relevant incomes and expenses are matched. The profit of an accounting period is the revenues from transactions less expenses incurred in producing those revenues. If expenses cannot be traced to specific items of revenues, they are generally written-off in the year in which they are incurred.

12. Full Disclosure

Disclosure is an accounting principle that requires full (adequate) disclosure of all material (significant) matters affecting the financial statements that would be of interest to the users of accounting information. The full disclosure principle specifies that there should be complete and understandable reporting on the financial statements of all significant information relating to the economic affairs of the entity. Full disclosure requires that financial statements be designed and prepared to portray accurately the economic events that have affected the firm for the period and to contain information sufficient to make them useful, and not misleading to the users. Full disclosure is required when alternative policies are available (FIFO, LIFO), principles peculiar to particular industry and unusual or innovative application of accounting principles.. While preparing financial statements, it should be ensured that significant facts or information are not omitted. It would increase the relevance and reliability of financial statements.

13. Substance over Form

Substance over form is an accounting concept whereby transactions and other events are accounted for and presented in accordance with their economic reality rather than their legal form. In accounting, substance should normally take precedence over form in deciding how a particular transaction should be recorded.

The legal form of a transaction is frequently descriptive of its economic substance. However, the form occasionally misrepresents the characteristics that are relevant to users. If the substance can be reliably determined, the accountant should describe the transaction in terms of the substance rather than the form. Accounting for hire-purchase transactions, for example, is based on the above concept, i.e., it looks at the substance of the transaction rather than its legal form. The hire-purchaser can record the asset at its cash down price, while paying for it by instalments over an agreed period of time.

Illustration 2

In preparing the accounts of your company, you are faced with a number of problems. These are summarised below :

(a) The managing director wishes the company's good industrial relations to be reflected in the accounts.
(b) The long-term future success of the company is extremely uncertain.
(c) Although the sales have not yet actually taken place, some reliable customers of the company have placed several large orders that are likely to be extremely profitable.
(d) One of the owners of the company has invested his drawings in some stocks and shares.
(e) At the year end, an amount is outstanding for electricity that has been consumed during the accounting period.
(f) Fixed assets would now cost a great deal more than they did when they were originally purchased.
(g) During the year, the company purchased ₹ 100 worth of pencils; these had all been issued from stock and were still in use at the end of the year.
(h) The company has had a poor trading year, and the owners believe that a more balanced result could be presented if a weighted average stock valuation method was adopted, instead of present FIFO method.
(i) A debtor who owes a large amount to the company is rumoured to be going into liquidation.
(j) The company owns some shares in a quoted company which the accountant thinks are worthless.

You are required to: (i) state which accounting concept the accountant should follow in dealing with each of the above problems; (ii) explain briefly what each concept means.

Solution

(a) **Money measurement concept**. Only those transactions which are capable of being measured in terms of money are to be recorded in the books of account.
(b) **Going concern concept**. The business will continue in operation for as long as possible and will not be dissolved in the foreseeable future, unless there is some strong evidence to suggest that this is not the case.
(c) **Realisation concept**. Revenue is recognised at the point of sale or at the performance of a service.
(d) **Entity concept**. The organisation is a separate entity with its own identity and the accounts and transactions are classified and analysed from the point of view of that entity.
(e) **Accrual concept.** An accounting system which recognises revenues and expenses as they are earned or incurred, respectively, without regard to the date of receipt or payment.
(f) **Historical cost concept**. An asset is recorded at its cost and this cost becomes the basis for subsequent accounting for the asset.
(g) **Materiality concept**. An item is recorded only when it is considered to be useful or important to the user of a financial statement.
(h) **Consistency concept.** Whatever accounting method a business unit decides to adopt, a consistent approach has to be followed.
(i) **Conservatism concept**. Where there is a reasonable choice of accounting treatments, it is desirable to have early recognition of unfavourable events.
(j) **Cost/conservatism concept**. Shares in a quoted company should be valued at the lower of cost or market price. Both these values are objective. The accountant's opinion is subjective.

Key Points

- Generally accepted accounting principles are the conventions, rules and procedures necessary to define accepted accounting practice at a particular time.
- According to entity concept, business is considered separate and distinct from the owner of the enterprise.
- Under money measurement concept, only those transactions which can be measured in terms of money are to be recorded in the books of accounts.
- Going concern concept assumes that the entity will continue operating under the same economic conditions and in the same general environment, but does not assume that the business will be profitable as long as it exists.

THEORETICAL QUESTIONS

1. What do you mean by Generally Accepted Accounting Principles (GAAP) ?
2. Why realisation concept is important for the purpose of determination of profits ?
3. Explain vertical consistency and horizontal consistency.
4. What is materiality concept ?
5. What is 'Substance over Form' concept ?
6. What do you mean by matching concept ?

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each sentence or answer each question below.

1. What does the going concern concept mean ?
   A a business is profitable
   B a business will continue to operate for the foreseeable future
   C the assets of a business exceed its liabilities
   D the assets of a business should be valued at disposal value
2. When a businessman introduces capital into his business, the transaction is debited in the Cash Book and credited to his Capital Account. Of which accounting concept is this an example ?
   A business entity
   B going concern
   C matching
   D prudence
3. A company does not include the value of skills gained by its employees from training programmes in its financial statements. Which accounting concept is being applied ?
   A consistency
   B materiality
   C money measurement
   D substance over form
4. There is great uncertainty about the continuance of a business. This has caused the proprietor to make a large reduction in the valuation of the year-end stock. Which accounting concept does this illustrate ?
   A going concern
   B matching
   C materiality
   D consistency
5. The treasurer of a club has decided not to include subscriptions owing by members in the Balance Sheet at the year-end. Which accounting concept is being applied ?
   A accrual
   B going concern
   C money measurement
   D prudence

6. What is an example of the prudence concept ?
   A accrued expenses are treated as a liability
   B drawings are deducted from capital
   C profit is not over-stated
   D only items with a monetary value are included in accounting
7. A trader who sells food does not include food that is past its 'sell by' date in his stock in the Balance Sheet.
   A matching
   B prudence
   C realisation
   D going concern
8. Two values of closing stock are given, i.e., the cost is ₹ 40,000 and the market value is ₹ 45,000, the lower value, i.e., the cost of ₹ 40,000 will be chosen in favour of the market value of ₹ 45,000 so that the profit will not be over-stated. The choice is the reverse if the market value is lower than the cost.
   Which concept is being applied ?
   A realisation
   B historical cost
   C conservatism
   D consistency
9. State which accounting concept the accountant should follow in dealing with the following :
   Although the sales have not yet actually taken place, some reliable customers of the company have placed several large orders that are likely to be extremely profitable.
   A consistency
   B conservatism
   C historical cost
   D realisation
10. State which accounting concept the accountant should follow in dealing with the following :
   At the year end, an amount is outstanding for electricity that has been consumed during the accounting period.
   A conservatism
   B historical cost
   C accrual
   D realisation
11. State which accounting concept the accountant should follow in dealing with the following :
   Fixed assets would now cost a great deal more than they did when they were originally purchased.
   A historical cost
   B materiality
   C consistency
   D conservatism
12. State which accounting concept the accountant should follow in dealing with the following :
   During the year, the company purchased Rs 100 worth of pencils; these had all been issued from stock and were still in use at the end of the year.
   A realisation
   B conservatism
   C materiality
   D accrual
13. State which accounting concept the accountant should follow in dealing with the following :
   The company has had a poor trading year, and the owners believe that a more balanced results could be presented if a weighted average stock valuation method was adopted, instead of present FIFO method.
   A materiality
   B consistency
   C going concern
   D accounting period

14. State which accounting concept the accountant should follow in dealing with the following :
    A debtor who owes a large amount to the company is rumoured to be going into liquidation.
    A conservatism
    B historical cost
    C materiality
    D accrual
15. State which accounting concept the accountant should follow in dealing with the following :
    The company owns some shares in a quoted company which the accountant thinks are worthless.
    A consistency
    B conservatism
    C realisation
    D materiality

Bases of Accounting

Cash and Accrual Basis of Accounting

Cash Basis of Accounting

Cash basis of accounting is a method of accounting in which transactions are recorded in the books of account when cash is actually received or paid and not when the transactions take place. This method recognises revenues and gains when cash is actually received. Similarly, it recognises expenses and losses when cash is paid. No attempt is made to record prepayments or accruals.

Net profit / Net income under this method represents simply the difference between cash receipts and cash payments. This method of accounting is widely used by professionals and other service enterprises (for example, physicians, lawyers and others).

Features

1. It records transactions only when cash is actually received or paid out.
2. Income is earned when cash is received and expenses are incurred when cash is paid.
3. No record is made for prepayments or accruals.
4. It does not follow double entry system of book keeping. Therefore, profit is ascertained by means of a statement.
5. This method is not suitable for a going concern business.
6. It is widely used by professionals and other service enterprises.

Advantages

1. Transactions are recorded only when all phases of transactions are complete.
2. Recording of transactions are simple.
3. This method does not require estimates and judgements of the accountant.
4. Reliability of accounting information is increased.
5. This method reflects the actual inflow and outflow of cash.
6. This method is most suitable for firms that do not maintain significant amount of inventories and does not extend credit to their customers.

Disadvantages

1. This method of accounting is inappropriate for most businesses.
2. It does not take into account fixed assets, debtors, creditors, inventories, prepayments, accruals etc.
3. No Trading, Profit and Loss Account and Balance Sheets can be prepared.
4. Generally accepted accounting principles do not recognise this basis.
5. This method does not recognise changes in resources and obligations of a business unit.
6. An accurate view of the trend of the periodic income cannot be provided.

Computation of Net Income Under Cash Basis

At the time of calculating net income under cash basis, the following points must be remembered :

1. All incomes received in cash during the year are to be taken into consideration whether it is related to current year, previous year or future year(s).
2. All expenses paid in cash during the year are to be taken into consideration whether it is related to current year, previous year or future year(s).
3. Incomes accrued but not yet received in cash are not to be taken into consideration.
4. Expenses outstanding but not yet paid are not to be taken into consideration.

Illustration 1

Dr P K Srinivasan started his profession as a medical practitioner on 1.1.2014. His income and expenses for the year ended on 31st December 2014 are as follows :

	₹
Fees received in cash	35,100
Rent of chamber paid	10,800
Rent of chamber paid in advance (included in the above)	800
Fees accrued but not yet received	2,000
Salary of compounder paid	5,400
Salary of compounder outstanding	500

You are required to ascertain the net income from profession under Cash Basis of Accounting for the year ended on 31st December, 2014.

Solution **Computation of Net Income (under Cash Basis) of Dr P K Srinivasan for the year ended 31st December, 2014**

Particulars	₹	₹
Fees received in cash		35,100
Less: Expenses paid in cash —		
(i) Rent of Chamber	10,800	
(ii) Salary of Compounder	5,400	16,200
Net Income Under Cash Basis		18,900

Accrual Basis of Accounting

Accrual basis of accounting is an accounting system which records revenues and expenses as they are earned or incurred, not as cash received or paid respectively. This basis of accounting arises from the concept of periodicity. A business follows accrual basis of accounting if income and expenses are measured when the transactions take place, without taking into consideration inflow and outflow of cash. Profit, under accrual basis of accounting, is the excess of revenues over expenses for a given accounting period. But the receipts of incomes or payments of expenses may be related to a different accounting period. Therefore, profit of an accounting period does not reflect cash receipts and cash payments for that period. For proper matching of expenses against revenues, this method takes into account prepayments and accruals. In effect, the earning of income and the expenses incurred in earning it, can be accurately reflected to a specific accounting period.

Features

1. It records revenues and expenses as they are earned or incurred, not as cash received or paid.
2. It is suitable for any business entity, profit making or non-profit making.
3. This basis of accounting does not reflect the actual inflow or outflow of cash.

4. It takes into account prepayments and accruals.
5. It is the basis of double entry system of book keeping.
6. This method is not simple, as compared to cash basis of accounting.
7. This method is not suitable for terminable ventures.
8. Under this method, profit is calculated by matching expenses against revenues.

Advantages

1. This method is widely used by most businesses.
2. Trading, Profit and Loss Account and Balance Sheet can be prepared.
3. Generally accepted accounting principles recognise this basis of accounting.
4. It ensures proper matching of expenses against incomes.
5. An accurate view of the trend of periodic income can be provided.
6. It helps comparison of accounting statements.

Disadvantages

1. This method is not simple.
2. It requires estimates and judgements of the accountant. Therefore, accounting practice may be inconsistent.
3. It is possible to adopt a variety of accounting principles and procedures.
4. This method does not reflect the actual inflow and outflow of cash.
5. It is not suitable for any organisation where realisation of income is doubtful.
6. This method is suitable only for a going concern.

Distinction Between Cash Basis and Accrual Basis

	Cash Basis		Accrual Basis
1.	It records only cash transactions.	1.	It records both cash and credit transactions.
2.	It is not the basis of the double entry system of book-keeping.	2.	It is the basis of the double entry system of book-keeping.
3.	Income is earned when cash is received and expenses are incurred when cash is paid.	3.	Income and expenses are measured when transactions take place.
4.	Profit is the difference between cash receipts and cash payments.	4.	Profit is the difference between revenue and expenses.
5.	No attempt is made to record prepayments or accruals.	5.	Prepayments and accruals are recorded.
6.	Trading, Profit and Loss Account and Balance Sheet cannot be prepared.	6.	Trading, Profit and Loss Account and Balance Sheet can be prepared.
7.	Expenses for an accounting period are not matched against income.	7.	Expenses for an accounting period are properly matched against income.
8.	It is suitable for a terminable venture.	8.	It is suitable for a going concern.
9.	It is widely used by professionals and other service enterprises.	9.	It is widely used for most businesses.
10.	Generally accepted accounting principles do not recognise this basis.	10.	Generally accepted accounting principles recognise this basis.

Computation of Net Income Under Accrual Basis

At the time of calculating net income under accrual basis the following points must be remembered:

1. Incomes relating to the current year are to be taken into consideration whether received in cash or not.
2. Incomes of the previous year received in the current year are to be deducted from the total income received in cash during the year.

3. Incomes of the future year received in the current year are to be deducted from the total income received in cash during the year.
4. Accrued incomes of the current year not yet received are to be added with the total income received in cash during the year.
5. Only expenses relating to the current year are to be taken into consideration whether paid or not.
6. Outstanding expenses of the previous year paid during the current year are to be deducted from the total expenses paid during the year.
7. Prepaid expenses are to be deducted from the total expenses paid during the year.
8. Outstanding expenses of the current year are to be added with the total expenses paid during the year.

Illustration 2

Taking information of ***Illustration 1*** calculate net income of Dr P K Srinivasan under Accrual Basis for the year ended 31st December, 2014 :

Solution **Computation of Net Income (under Accrual Basis) of Dr P K Srinivasan for the year ended 31st December, 2014**

Particulars	₹	₹	₹
Fees received in cash			35,100
Add: Fees accrued but not yet received			2,000
			37,100
Less: Expenses —			
(i) Rent chamber paid	10,800		
Less: Rent paid in advance	800	10,000	
(ii) Salary of compounder paid	5,400		
Add: Outstanding salary	500	5,900	15,900
Net Income Under Accrual Basis			21,200

Mixed Basis of Accounting

Mixed basis of accounting is the mixture of cash basis of accounting and accrual basis of accounting. Under this method, income is recorded when cash is actually received. It does not take into consideration any accrued income. However, expenses are recorded as they are incurred, not when cash is paid. All outstanding and prepaid expenses are taken into consideration for calculating actual expenses of the accounting period.

Features

1. It records income when cash is actually received.
2. It records expenses when it is incurred, not when cash is paid.
3. No record is made for accrued income.
4. All outstanding and prepaid expenses are taken into consideration for calculating actual expenses of the relevant accounting period.
5. It is the most conservative method of accounting.

Computation of Net Income Under Mixed Basis

At the time of calculating net income under mixed basis, the following points must be remembered:

1. All incomes received in cash during the year are to be taken into consideration whether it is related to current year, previous year or future year(s).
2. Incomes accrued but not yet received in cash are not to be taken into consideration.
3. Only expenses relating to the current year are to be taken into consideration ***whether paid or not***.
4. Outstanding expenses of the previous year paid during the current year are to be deducted from the total expenses paid during the year.
5. Prepaid expenses are to be ***deducted*** from the total expenses paid during the year.
6. Outstanding expenses of the current year are to be ***added*** with the total expenses paid during the year.

Ascertain the net income of Sri Arpan Barua for the year ended 31.12.2014 on cash basis and on accrual basis of accounting from the following particulars :

	₹
Fees received in cash in 2014 (gross)	16,200
Fees outstanding on 31.12.2014	950
Expenses paid in cash in 2014 (gross)	4,250
Expenses outstanding on 31.12.2014	500
Fees received in advance on 31.12.2014	300
Prepaid expenses on 31.12.2014	250

Solution **Computation of Net Income (under Cash Basis) of Sri Arpan Barua for the year ended 31st December, 2014**

Particulars	₹
Fees received in cash (gross)	16,200
Less: Expenses paid in cash (gross)	4,250
Net Income Under Cash Basis	11,950

Computation of Net Income (under Accrual Basis) of Sri Arpan Barua for the year ended 31st December, 2014

Particulars	₹	₹
Fees received in cash (gross)		16,200
Add: Fees outstanding on 31.12.2014		950
		17,150
Less : Fees received in advance on 31.12.2014		300
		16,850
Less : Expenses paid in cash (gross)	4,250	
Add : Expenses outstanding on 31.12.2014	500	
	4,750	
Less : Prepaid expenses on 31.12.2014	250	4,500
Net Income Under Accrual Basis		12,350

Illustration 5

Dr P K Das started his profession on 1st January, 2014 as medical practitioner. His incomes and expenses for the year 2014 relating to his profession were as under :

	₹
Fees received in cash	24,000
Fees accrued but not received	6,000
Rent paid for the chamber	6,000
Outstanding rent	2,000
Salary to staff paid	6,000
Salary paid in advance to staff (included in the above)	1,000
Miscellaneous expenses paid	200

You are required to compute the net income of Dr Das from his profession for the year ended 31.12.2014 under : (i) Cash Basis; (ii) Accrual Basis.

Solution **(i) Computation of Net Income (under Cash Basis) of Dr P K Das for the year ended 31st December, 2014**

Particulars	₹	₹
Fees received in cash		24,000
Less : Expenses paid in cash —		
Rent	6,000	
Salary to Staff	6,000	
Miscellaneous expenses	200	12,200
Net Income Under Cash Basis		11,800

(ii) Computation of Net Income (under Accrual Basis) of Dr P K Das for the year ended 31st December, 2014

Particulars	₹	₹	₹
Fees received in cash			24,000
Add : Fees accrued but not received			6,000
			30,000
Less : Expenses—			
Rent paid	6,000		
Add : Outstanding rent	2,000	8,000	
Salary paid	6,000		
Less : Paid in advance	1,000	5,000	
Miscellaneous expenses		200	13,200
Net Income Under Accrual Basis			16,800

Mr A Roy gives the following information relating to his income and expenditures for the year ended 31.12.2014 :

	₹
Fees received in cash (gross)	50,500
Fees earned but not yet received	4,500
Fees received in advance	3,000
Fees for 2013 received	2,000
Staff salaries paid (gross)	8,200
Salaries paid in advance	1,200
Salaries for 2013 paid	1,000
Rent paid for office (gross)	7,100
Outstanding office rent	600
Rent for 2013 paid	500
Telephone charges paid	1,600

Calculate his net income for the year 2014.

Solution **Computation of Net Income (under Cash Basis) of A Roy for the year ended 31st December, 2014**

Particulars	₹	₹
Fees received in cash		50,500
Less : Expenses paid in cash—		
Staff salaries (gross)	8,200	
Rent paid for the office (gross)	7,100	
Telephone charges paid	1,600	16,900
Net Income Under Cash Basis		33,600

Computation of Net Income (under Accrual Basis) of A Roy for the year ended 31st December, 2014

Particulars	₹	₹	₹
Fees received in cash		50,500	
Add : Fees earned but not yet received		4,500	
		55,000	
Less : Fees received in advance		3,000	
		52,000	
Less : Fees received for 2013		2,000	50,000

Less : Expenses —			
Staff salary (gross)	8,200		
Less : Salary paid in advance	1,200		
	7,000		
Less : Salary for 2013 paid	1,000	6,000	
Rent paid for office (gross)	7,100		
Add : Outstanding office rent	600		
	7,700		
Less: Rent for 2013 paid	500	7,200	
Telephone charges paid		1,600	14,800
Net Income Under Accrual Basis			35,200

Illustration 7

From the following particulars, calculate the 'Net Income' of Sri Tapas Roy, an eminent Chartered Accountant for the year ended 31.12.2014 under (i) Cash Basis, and (ii) Accrual Basis:

	₹
Fees received in cash in 2014	1,14,000
Expenses paid in cash in 2014	30,000
Fees received in advance as on 31.12.2014	18,000
Fees accrued but not received as on 31.12.2014	3,600
Outstanding expenses as on 1.1.2014	4,800
Fees accrued but not received as on 1.1.2014	4,800
Prepaid expenses as on 1.1.2014	4,200
Outstanding expenses as on 31.12.2014	2,400
Fees received in advance as on 1.1.2014	12,000
Prepaid expenses as on 31.12.2014	3,600

Solution **(i) Computation of Net Income (under Cash Basis) of Sri Tapas Roy for the year ended 31st December, 2014**

Particulars	₹
Fees received in cash in 2014	1,14,000
Less : Expenses paid in cash 2014	30,000
Net Income Under Cash Basis	84,000

(ii) Computation of Net Income (under Accrual Basis) of Sri Tapas Ray for the year ended 31st December, 2014

Particulars	₹	₹
Fees received in cash in 2014	1,14,000	
Less : Fees received in advance as on 31.12.2014	18,000	
	96,000	
Add : Fees accrued but not received as on 31.12.2014	3,600	
	99,600	
Less : Fees accrued but not received as on 1.1.2014	4,800	
	94,800	
Add: Fees received in advance as on 1.1.2014	12,000	1,06,800
Less : Expenses —		
Expenses paid in cash 2014	30,000	
Less : Outstanding expenses as on 1.1.2014	4,800	
	25,200	
Add : Prepaid expenses as on 1.1.2014	4,200	
	29,400	
Add : Outstanding expenses as on 31.12.2014	2,400	
	31,800	
Less : Prepaid expenses as on 31.12.2014	3,600	28,200
Net Income Under Accrual Basis		78,600

Conversion of Profit Under Cash Basis into Profit Under Accrual basis

Profit / net income under cash basis and accrual basis may vary widely. Sometimes, it may be required to convert profit under cash basis into profit under accrual basis. For the purpose of conversion, the following steps are to be followed :

Step 1 Calculate profit / net income under cash basis in the usual manner.

Step 2

Add the following items —

(i) Outstanding expenses at the beginning of the year.
(ii) Income received in advance at the beginning of the year.
(iii) Income accrued but not yet received at the end of the year.
(iv) Prepaid expenses at the end of the year.
(v) Any other adjustments.

Step 3

Deduct the following items —

(i) Outstanding expenses at the end of the year.
(ii) Income received in advance at the end of the year.
(iii) Income accrued but not yet received at the beginning of the year.
(iv) Prepaid expenses at the beginning of the year.
(v) Any other adjustments.

Step 4 Find out the balance. This balance will represent profit / net income under accrual basis.

Illustration 8

Mr A K Das gives the following particulars of his incomes and expenses for the year 2014. Ascertain his net income for the year under (i) the Accrual Basis and (ii) the Mixed Basis of Accounting :

	₹
Incomes	
Received during 2014 (gross)	2,17,500
Arrear fees received this year	26,400
Advance fees received this year	8,300
This year's fees received in 2013	6,200
This year's fees not yet received	13,800
Expenses	
Paid during 2014 (gross)	58,000
Expenses for 2013 paid this year	7,300
Expenses for this year paid in 2013	1,500
Expenses for this year not yet paid	4,800
Expenses for next year paid this year	6,200

Solution **(i) Computation of Net Income (under Accrual Basis) of Dr A K Das for the year ended 2014**

Particulars	₹	₹
Income received during 2014	2,17,500	
Less : Arrear fees received this year	26,400	
	1,91,100	
Less : Advance fees received this year	8,300	
	1,82,800	
Add : This year's fees received in 2013	6,200	
	1,89,000	
Add : This year's fees not yet received	13,800	2,02,800
Less : Expenses paid during 2014 (gross)—	58,000	
Less : Expenses for 2013 paid this year	7,300	
	50,700	
Add : Expenses for this year paid in 2013	1,500	

	52,200	
Add : Expenses for this year not yet paid	4,800	
	57,000	
Less : Expenses for next year paid this year	6,200	50,800
Net Income Under Accrual Basis		1,52,000

(ii) Computation of Net Income (under Mixed Basis) of Dr A K Das for the year ended 2014

Particulars	₹	₹
Income received during 2014 (See tutorial Note)		2,17,500
Less : Expenses under accrual basis —		
Expenses paid during 2014 (gross)	58,000	
Less : Expenses for 2013 paid this year	7,300	
	50,700	
Add : Expenses for this year paid in 2013	1,500	
	52,200	
Add : Expenses for this year not yet paid	4,800	
	57,000	
Less : Expenses for next year paid this year	6,200	50,800
Net Income Under Mixed Basis		1,66,700

Tutorial Note : Under mixed basis of accounting, incomes are taken on cash basis but expenses are taken under accrual basis.

Illustration 9

From the following statement of M Deb of Calcutta, prepare a Profit and Loss Account on cash basis for the year ended 31st December, 2014:

		₹
Salary received in cash		30,000
Accrued salary		2,500
Salary for 2015, received in 2014		2,000
Expenses due but not paid		1,000
Expenses paid for —	₹	
2013	2,000	
2014	10,000	
2015	1,400	13,400

Convert the profit ascertained on cash basis to the profit on accrual basis by preparing a statement.

Solution

Profit and Loss Account of M Deb (under Cash Basis) for the year ended 31st December, 2014

Dr. **Cr.**

Particulars		₹	Particulars	₹
To Expenses for —			By Salaries	30,000
2013	2,000			
2014	10,000			
2015	1,400	13,400		
To Net Profit		16,600		
		30,000		30,000

Statement Showing the Conversion of Profit Under Cash Basis into Profit Under Accrual Basis

Particulars	₹	₹
Net Profit Under Cash Basis		16,600
Add : (i) Expenses paid for 2013 —	2,000	
(ii) Accrued Salary	2,500	
(iii) Expenses paid for 2015	1,400	5,900
		22,500
Less : (i) Expenses due but not paid	1,000	
(ii) Salary for 2012 received in 2014	2,000	3,000
Net Profit Under Accrual Basis		19,500

Illustration 10

The following Income and Expenditure Account has been prepared by Md. Selim, a Chartered Accountant, on cash basis for the year ended 31.12.2014 :

Expenditure	₹	Income	₹
Salaries	96,600	Fees received from audit work	2,52,000
Membership subscription	44,800	Fees received from legal advice	1,00,800
News papers and magazines	11,200		
House rent	32,000		
Conveyance expenses	71,400		
Electricity charges	4,480		
Office expenses	21,000		
Excess of Income over Expenditure	71,320		
	3,52,800		3,52,800

Additional information —	₹
(i) Fees accrued	49,000
(ii) Fees received in advance	28,000
(iii) Arrear fees received	21,000
(iv) Salary paid in advance	8,400
(v) Outstanding rent	9,800
(vi) Outstanding office expenses	4,200

Prepare Income and Expenditure Account on accrual basis for the year ended 31st December, 2014.

Solution **Income and Expenditure Account of Md. Selim (under Accrual Basis) for the year ended 31st December, 2014**

Expenditure	₹	₹	Income	₹	₹
To Salaries	96,600		By Fees received from audit work (Note 1)		2,52,000
Less : Salary paid in advance	8,400	88,200	By Fees received from legal advice		1,00,800
To Membership Subscriptions		44,800			
To Newspapers and magazines		11,200			
To House Rent	32,000				
Add : Outstanding rent	9,800	41,800			
To Conveyance expenses		71,400			
To Electricity charges		4,480			
To Office expenses	21,000				
Add : Outstanding office expenses	4,200	25,200			
To Excess of Income over Expenditure		65,720			
		3,52,800			3,52,800

Working Note : (1) Calculation of Fees Received from Audit Work under Accrual Basis

	₹
Fees received in cash	2,52,000
Add: Fees accrued	49,000
	3,01,000
Less: Fees received in advance	28,000
	2,73,000
Less: Arrear fees received	21,000
	2,52,000

Conversion of Profit Under Accrual Basis into Profit Under Cash Basis

For the purpose of converting the profit under accrual basis into profit under cash basis, the following steps are to be followed :

Step 1

Calculate profit / net income under accrual basis in the usual manner.

Step 2

Add the following items —

(i) Outstanding expenses at the end of the year.
(ii) Income received in advance at the end of the year.
(iii) Income accrued but not yet received at the beginning of the year.
(iv) Prepaid expenses at the beginning of the year.
(v) Any other adjustments.

Step 3

Deduct the following items —

(i) Outstanding expenses at the beginning of the year.
(ii) Income received in advance at the beginning of the year.
(iii) Income accrued but not yet received at the end of the year.
(iv) Prepaid expenses at the end of the year.
(v) Any other adjustments.

Step 4

Find out the balance. This balance will represent profit / net income under cash basis.

Illustration 11

Mr D Basu is a lawyer. Particulars of the income and expenses for the year ended 31.12.2014 are as follows:

	₹
Fees received from clients in cash	64,800
Salary of clerks and assistants paid	24,000
Rent of chamber paid (gross)	27,000
Salary of clerks and assistants outstanding	2,160
Accrued fees	14,400
Rent of chamber paid in advance (included in above)	1,800
Miscellaneous expenses	5,040
Telephone charges	2,880

You are required to ascertain Mr Basu's net income for the year ended 31.12.2014 under accrual basis. Convert the net income ascertained under accrual basis into net income under cash basis.

Solution **Computation of Net Income (under Accrual Basis) of Mr D Basu for the year ended 31st December, 2014**

Particulars	₹	₹	₹
Fees received in cash		64,800	
Add : Accrued fees		14,400	79,200
Less : Expenses —			
Salary of clerks and assistant	24,000		
Add : Outstanding	2,160	26,160	
Rent of chamber (gross)	27,000		
Less : Paid in advance	1,800	25,200	
Miscellaneous expenses		5,040	
Telephone charges		2,880	59,280
Net Income Under Accrual Basis			19,920

Statement Showing the Conversion of Net Income Under Accrual Basis into Net Income Under Cash Basis

Particulars	₹	₹
Net Income Under Accrual Basis		19,920
Add : Outstanding Salary		2,160
		22,080
Less : Rent of chamber paid in advance	1,800	
Accrual fees not yet received	14,400	16,200
Net Income Under Cash Basis		5,880

Journal Entries for Conversion of Cash Basis Accounting into Accrual Basis Accounting

Under cash basis of accounting, no adjustment is made for outstanding expenses, prepaid expenses, accrued income, income received in advance. For conversion of cash basis into accrual basis, adjustments are to be made for the above items by passing the following entries :

1. For Outstanding Expenses

Profit and Loss Adjustment Account Dr.
To Outstanding Expenses Account

2. For Prepaid Expenses

Prepaid Expenses Account Dr.
To Profit and Loss Adjustment Account

3. For Accrued Income

Accrued Income Account Dr.
To Profit and Loss Adjustment Account

4. For Income Received in Advance

Profit and Loss Adjustment Account Dr.
To Income Received in Advance Account

If there is any increase in the profit due to the conversion, then it is credited to Capital Account by passing the following entry :

Profit and Loss Adjustment Account Dr.
To Capital Account

If there is any decrease in the profit due to the conversion, the entry will be opposite, i.e.,

Capital Account Dr.
To Profit and Loss Adjustment Account

Illustration 12

From the following, pass Journal Entries to convert cash basis into accrual basis of accounting :

Rent outstanding	₹ 600
Accrued interest	₹ 1,000
Insurance premium prepaid	₹ 100
Apprenticeship premium received in advance	₹ 1,000

Solution

Journal

	Insurance Premium Prepaid A/c Dr.		100	
	To Profit and Loss Adjustment A/c			100
	(Being the adjustment for prepaid insurance premium in connection with the conversion of cash basis into accrual basis of accounting)			
	Profit and Loss Adjustment A/c Dr.		1,000	
	To Apprenticeship Premium Received in Advance A/c			1,000
	(Being the adjustment for apprenticeship premium received in advance in connection with the conversion of cash basis into accrual basis of accounting)			

Key Points

- ***Cash basis of accounting*** is a method of accounting in which transactions are recorded in the books of account when cash is actually received or paid out and not when the transactions take place.
- ***Accrual basis of accounting*** is an accounting system which recognises revenues and expenses as they are earned or incurred, not as cash received or paid respectively.

THEORETICAL QUESTIONS

1. What do you mean by cash and accrual basis of accounting ?
2. State the advantages and disadvantages of cash and accrual basis of accounting.

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each statement or answer each question below :

1. Revenue is recognised at the point of sale under
   A cash basis
   B accrual basis
   C none of these
2. Cash basis of accounting is widely used
   A by professionals
   B for most businesses
   C none of these
3. Charges and obligations of a business unit are recognised by
   A cash basis
   B accrual basis
   C none of these
4. Estimates and judgements are required in
   A cash basis
   B accrual basis
   C none of these
5. In order to determine gross profit, an adjustment is made for opening and closing stocks in
   A cash basis
   B accrual basis
   C none of these

PRACTICAL QUESTIONS

1. You are required to ascertain the income from profession under : (a) cash basis; and (b) accrual basis of Dr P K Srinivasan. His incomes and expenses for the year 2015 are as follows :

Particulars	₹	Particulars	₹
Fees received in cash	17,550.00	Accrual fees	1,485.00
Rent of chamber paid	5,400.00	Salary of compounder paid	2,700.00
Rent of chamber paid in advance (included above)	202.50	Salary of compounder outstanding	540.00

2. You are required to ascertain the net income under :
   (a) cash basis; and (b) accrual basis of Mr P L Mehta from the following information relating to his income and expenditure for the year ended 31st December, 2014 :

Particulars	₹	Particulars	₹
Fees received in cash (Gross)	1,39,175.00	Fees received in advance	6,175.00
Fees earned but not received	14,250.00	Outstanding rent of the chamber	7,600.00
Rent of chamber paid	14,962.50	Staff salaries paid in advance	2,850.00
Staff salaries paid (Gross)	15,200.00	Telephone charges paid	2,280.00

Guide to Answers

Multiple Choice

1. B 2. A 3. B 4. B

Practical Questions

1. **Income under cash basis : ₹ 9,100; Income under accrual basis : ₹ 10,205.**
2. **Income under cash basis : ₹ 1,06,732.50; Income under accrual basis : ₹ 1,10,057.50.**

9

Inventories

Introduction

Inventory is another term for 'Stock-in-Trade'. For most businesses, inventory is one of the largest assets (25% to 30% of the total assets of the enterprise). The major source of revenue of a trading organisation is the sale of these inventories. Inventories have an effect on the profit and loss of the organisation as opening inventories are included in and closing inventories are deducted from ***Cost of Sales***. Therefore, inventories should be properly compiled periodically and recorded in the books of account for proper measurement of periodic profit and for inclusion in the Balance Sheet at the end of the accounting period.

For a trading company, the inventory includes all goods owned and held for sale in the ordinary course of business.

But for a manufacturing business, there are three major types of inventories :

(a) raw materials;
(b) work-in-progress; and
(c) finished goods.

As inventories (stock-in-trade) on hand at the end of the accounting period affect both Profit and Loss Account and Balance Sheet, it is extremely important that inventories are accurately ***valued*** at the end of the accounting period.

The Institute of Chartered Accountants of India has issued ***Accounting Standard for Valuation of Inventories — AS-2***.

In this chapter, we will cover the accounting for and valuation of inventories.

Objectives of Accounting for Inventories

A major objective of accounting for inventories is the proper determination of income through the process of matching appropriate costs against revenues (AICPA).

To ascertain the trading profit of a particular period, revenues for the period must be matched or set off by all the related expenses in producing those revenues. Proper inventory accounting will help to determine what portion of the cost of goods available for sale should be deducted from the revenues of the current period and what portion is to be carried forward as inventory to be matched against revenues in the next 'accounting period.'

Effects of Errors in Valuing Inventory

The errors in valuing inventory have effect both on the Profit and Loss Account and the Balance Sheet. When there is an error in valuing inventory, it means inventory is either overstated or understated. Also, the closing inventory of one year becomes the opening inventory for the subsequent period.

The effects are as under:

1. If the closing inventory is understated, the net profit for the period will also be understated and, in effect, the current assets of the business will be understated. The above effects will be reversed when the closing inventory is overstated.
2. If the opening inventory is understated, the net profit for the period will be overstated, and if the opening inventory is overstated, the net profit for the period will be understated.

Accounting Standard [AS-2 : Valuation of Inventories]

Meaning of Important Terms

Inventories : Inventories are assets

(a) held for sale in the ordinary course of business (e.g., finished car ready to be despatched to dealers);

(b) in the process of production for such sale (e.g., car in the assembly lines); or

(c) in the form of materials or supplies to be consumed in the production process or in the rendering of services (e.g., tyre, battery, headlights, etc.).

Inventories do not include machinery spares which can be used only in connection with an item of fixed asset and whose use is expected to be irregular, e.g., spray guns used in the 'paint shop' of an automobile company's workshop.

Net Realisable Value (NRV) : Net realisable value is the estimated selling price, in the ordinary course of business, less cost of completion, and the estimated cost necessary to make the sale.

Illustration 1

X Ltd. has an item in stock which cost ₹ 10,000 and can be sold for ₹ 12,000. However, before it can be sold, it will require to be modified at a cost of ₹ 1,500. The expected selling expenses of the item are an additional ₹ 1,000.

Calculate the Net Realisable Value (NRV) of the item.

Solution

NRV = Selling Price – Modification Cost – Expected Selling Expenses

= ₹ 12,000 – 1,500 – 1,000 = ₹ **9,500**.

Fair Value : Fair value is the value for which an item could be sold between willing independent traders.

For example, X has a contract to supply 100 quintals of sugar to a biscuit manufacturing company @ ₹ 3,500 per quintal. The price is fixed for 3 months, January to March, 2015. At the end of January the market price of sugar is ₹ 3,600 per quintal. X buys 100 quintals at the market price, i.e., ₹ 3,600 per quintal. Here, fair value is ₹ 3,600 and Net Realisable Value is ₹ 3,500 less selling cost.

Measurement of Inventories

Inventories should be valued at the ***lower of cost and net realisable value***.

Illustration 2

The following information is available from the books of account of a trader. Stock which cost ₹ 20,000 can now be replaced for ₹ 14,000. The estimated net realisable value of this stock is ₹ 17,000. It is proposed that the stock should be written down to ₹ 17,000. Give your view.

Solution

As per AS—2, inventories should be valued at cost or NRV whichever is lower. Here, cost is ₹ 20,000 and NRV is ₹ 17,000. Therefore, stock should be valued at ₹ 17,000 being the lowest. ***Replacement value will not be taken into consideration***.

Cost of Inventories

For valuation of inventories, the determination of ***cost*** is very important. The cost of inventories should comprise:

(i) all costs of purchase;
(ii) costs of conversion; and
(iii) other costs incurred in bringing the inventories to their present location and condition.

Costs of Purchase : The costs of purchase consists of the purchase price including duties and taxes (other than those can be reclaimed from the authorities), freight inwards and other expenditure directly attributable to the acquisition (e.g., brokerage on purchase, packing cost for transportation, etc.).

Trade discounts, rebates, duty drawbacks and other similar items are deducted from cost.

Illustration 3

Pepsi India Ltd. purchased 20,000 kgs. of oranges from farmers of Hosierpur @ ₹ 10 per kg. Orange collecting agents' commission were paid @ ₹ 1 per kg. ₹ 8,000 were paid for lorry hire charges for transporting it to Noida Plant. 5% of the oranges were damaged in transit and discarded. This loss is a normal loss. Calculate the cost of purchase per kg. of orange.

Solution

	₹
(i) Purchase Price (20,000 × ₹ 10)	2,00,000
(ii) Collecting agents' commission (20,000 × ₹ 1)	20,000
(iii) Transportation cost	8,000
Total Cost of (20,000 – 1,000) = 19,000 kgs.	2,28,000

Purchase cost per kg. $= \frac{2,28,000}{19,000} =$ **₹ 12**

Costs of Conversion : The costs of conversion of inventories include costs directly related to the units of production, such as direct labour. They also include a systematic allocation of fixed and variable production overheads that are incurred in converting raw materials into finished goods.

For example, Wills Ltd. is having a readymade garment factory in Ludhiana, Punjab, where two products are manufactured — sports T-shirt and Track suit. Direct labour hours of 24,000 are used in each period. Cutting is done by computer controlled automatic machine. However, stitching is done manually. Workers are paid ₹ 50 for stitching one T- shirt and ₹ 100 for stitching one Track suit. At the time of calculating cost of T-shirt ₹ 50 is to be added and for calculating cost of Tract suit ₹ 100 is to be added.

Fixed production overheads are those indirect cost of production that remain relatively constant regardless of the volume of production, such as depreciation and maintenance cost of cutting machine in the above example, depreciation of factory building and the cost of factory management and administration.

The allocation of fixed production overheads for the purpose of their inclusion in the cost of conversion is based on the ***normal capacity*** of the production facility. This is the average expected output over a number of periods, taking into account production reductions due to planned maintenance and normal holidays.

For example, before Diwali you close the factory for routine maintenance and cleaning. You follow 5 days a week and single shift each day. At the time of calculating normal capacity all these factors must be taken into consideration. It should not be calculated on the basis of calendar days.

Low production levels, or idle plant for abnormal reasons are not taken into consideration in determining the allocation rate of fixed production overheads.

For example, productions were suspended for 4 weeks for flood. The fixed production overheads incurred during that time should not be included in the cost of inventory.

Unallocated overheads are recognised as an ***expense*** in the period in which they are incurred. In periods of abnormally-high production, the overhead allocation rate is ***reduced***, so that, inventories are not measured above cost.

For example, Normal output of your factory is 20,000 units per month. You normally charge fixed overhead per unit @ ₹ 20. To complete a special order from China, your factory works overtime every weekends for last 4 months. The new level of output is 25,000 units per month.

Total fixed overhead per month = ₹ 20 × 20,000 = ₹ 4,00,000.

Under changed circumstances, the fixed overhead rate will be reduced :

$$\textbf{New Rate} = \frac{4,00,000}{25,000} = ₹\ 16$$

Variable production overheads are those indirect costs which vary directly or near directly, with the volume of production, such as indirect materials, indirect labour etc.

Variable production overheads are assigned to each unit of production on the basis of actual use of the production facilities.

For example, Wills Ltd.'s ready made garment factory has a centralised ironing facility. It cost ₹ 300 per productive hours to run.

T-shirt takes 1 minute and Track suit takes 2 minutes for ironing.

Therefore, variable production overhead to be assigned to T-shirt = ₹ 5 $\left(\frac{300}{60} \times 1\right)$ **and**

Track suit = ₹ 10 $\left(\frac{300}{60} \times 2\right)$

Joint Products and By-products

A production process may result in more than one product being produced simultaneously.

When a group of individual products is simultaneously produced, and each product has a significant relative sales volume, the outputs are usually called ***Joint Products***. Those products which are part of the simultaneous production process and have a minor sales volume or insignificant sales volume are called ***by-products***.

In case of joint products, when the costs of conversion of each product are not separately identifiable, they are allocated between products on a rational and consistent basis. The joint cost may be allocated on the basis of relative sales value of each product, either when they complete or when they are separately identifiable in the production process.

For example, Haldia Petrochemicals Ltd. incurs per batch joint product cost of ₹ 30,00,000 for the production of two joint products X and Y. Both products can be sold at split-off point. X can be sold @ ₹ 80 per unit and Y can be sold @ ₹ 40 per unit. The production were — X 50,000 units and Y 50,000 units.

In this case, the joint cost of ₹ 30,00,000 will be allocated as follows :

Joint Product Cost — ₹ 30,00,000		**Sale of 50,000 units @ ₹ 80**	**40,00,000**
		Sale of 50,000 units @ ₹ 40	**<u>20,00,000</u>**
	Split-off point	**Total Sales**	**<u>60,00,000</u>**

(i) Product X should bear 2/3 of ₹ 30,00,000	**₹ 20,00,000**
(ii) Product Y should bear 1/3 of ₹ 30,00,000	**₹ 10,00,000**
	₹ 30,00,000

Each unit of X will bear ₹ 40 (₹ 20,00,000 / 50,000)

Each unit of Y will bear ₹ 20 (₹ 10,00,000 / 50,000)

Most by-products as well as scrap or waste materials, by its nature, is immaterial. If this is the case, then it is measured at net realisable value, and this value is deducted from the cost of the main product.

Other Costs : Other costs are included in the cost of inventories only to the extent that they are incurred in bringing the inventories to their present location and condition.

These would include inward transport and storage cost prior to completion of production or the cost of designing products for specific customers.

It should be noted that interest and other borrowing costs are not included in the cost of inventories.

Excise Duty on Finished Goods

Excise duty is a manufacturing expense and therefore, it should be included in the valuation of finished goods. The Guide Note on "Accounting Treatment for Excise Duty" issued by the Institute of Chartered Accountants of India is very important in this respect and it is given below :

"Since the liability for excise duty arises when the manufacture of the goods is completed, it is necessary to create a provision for liability of unpaid excise duty on stock lying in factory or bonded warehouse. The estimate of such liability can be made at the rate in force on the Balance Sheet date. The excise duty paid provided on finished goods should, therefore, be included in the inventory valuation."

It should be noted that if the excise duty is refundable, it should not be included in the cost of raw materials consumed to produce the W.I.P. or the finished goods.

Cost Excluded from Inventories

In determining the cost of inventories it is appropriate to exclude certain costs and recognise them as expenses in the period in which they are incurred. Examples of such costs are :

(a) abnormal amounts of wasted materials, labour or other production costs;

(b) storage costs, unless those costs are necessary in the production process prior to a further production stage;

(c) administrative overheads that do not contribute to bringing the inventories to their present location and condition; and

(d) selling and distribution costs.

Illustration 4

(i) When valuing stock at cost, which of the following shows the correct method of arriving at cost ?

	Include inward transport cost	Include production overheads
A	YES	NO
B	NO	YES
C	YES	YES
D	NO	NO

(ii) According to AS – 2 (Inventories), which of the following costs should be included in valuing the inventories of a manufacturing company ?

(i) carriage inwards
(ii) carriage outwards
(iii) depreciation of factory plant
(iv) general administrative overheads

A all four items
B (i), (ii) and (iv) only
C (i), (iii) and (iv) only
D (i) and (iii) only

Solution

(i) At the time of valuation of stock at cost, inward transparent cost as well as production overheads are to be included. Therefore, answer "**C**" is correct.

(ii) For determining the cost of inventories, carriage inwards and depreciation of factory plant are to be taken into consideration. However, carrying outwards and general administrative overheads will not be taken into consideration. Therefore, answer "**D**" is correct.

Illustration 5

Which of the following costs may be included when arriving at the cost of finished goods inventory for inclusion in the financial statements of a manufacturing company ?

(i) carriage inwards
(ii) carriage outwards
(iii) depreciation of factory plant
(iv) finished goods storage costs
(v) factory supervisor's salary

A all five
B (i) and (v) only
C all except (iv)
D all except (ii) and (iv)

Solution

For calculating cost of finished goods inventory, carriage inwards, depreciation of factory plant and factory supervisor's salary are included. However, carriage outwards and finished goods storage cost are excluded. Therefore, answer "**D**" is correct.

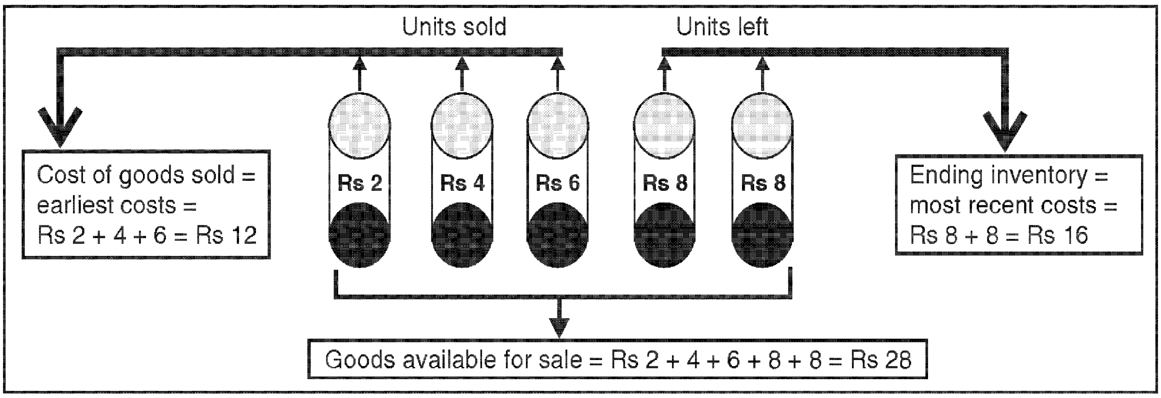
Cost Formulas

Inventory prices are seldom stable. In many cases inventories lose their identity and are substantially indistinguishable from one another, though may be acquired at varying rates. A very important valuation problem arises while assigning costs to inventory items. No problem would arise if prices never changed. Once the unit cost of each inventory item is known, some method must be used to assign costs to closing inventory and cost of goods sold. There are several methods for assigning cost to inventory items.

1. Specific Identification Method This method is adapted by the enterprises to determine the cost of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects. For example, X Ltd. deals in paintings of renowned artists. As the paintings are not interchangeable, X Ltd. should follow 'Specific Identification Method' for valuation of closing inventory and cost of goods sold.

2. First In First Out Method (FIFO) This method is based on the premise that the first item purchased is the first item sold, that is, all the inventories are sold in the order in which they are acquired. Since the oldest stock in the inventory is sold first, the calculation of the inventory is on the basis that the inventories in hand represent the ones most recently purchased or produced and the cost of goods sold represents the cost of items acquired in the earlier purchases.

FIFO METHOD

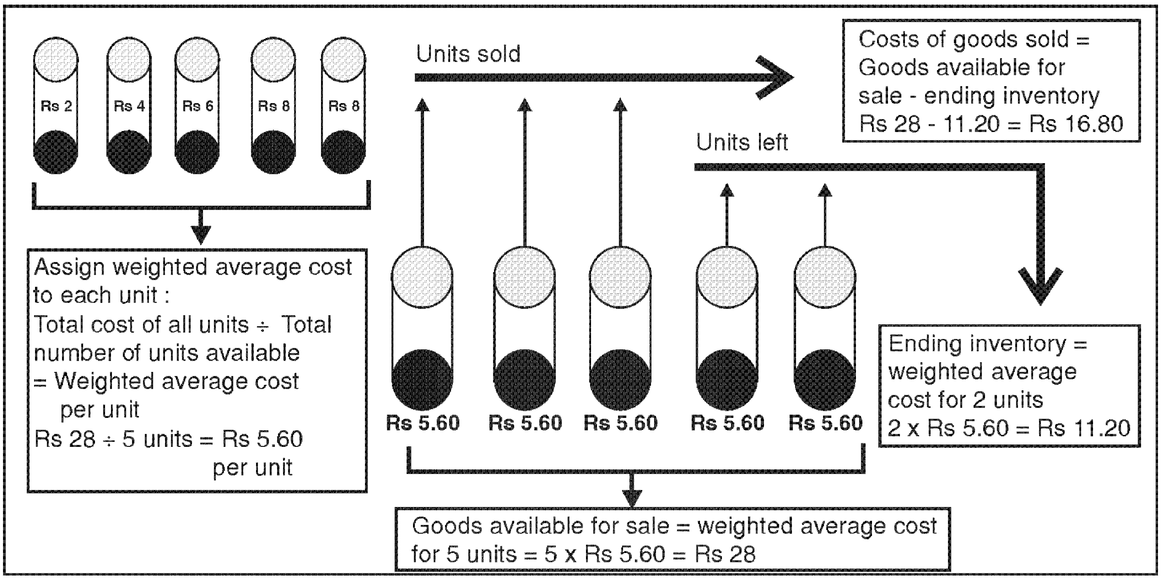


3. Weighted Average Method Under this method, the costs to be assigned to inventories are ascertained by applying to the closing inventory an average cost computed by dividing the total cost of units by the total number of such units. The average cost is calculated by applying the following formula:

$$\text{Weighted Average Cost Per Unit} = \frac{\text{Opening Inventory + Purchases (in amount)}}{\text{Opening Inventory + Purchases (in units)}}$$

The value of the closing inventory is ascertained by multiplying the number of units on hand (from the physical count) by the weighted average cost per unit (see the diagram below).

WEIGHTED AVERAGE METHOD



Techniques for the Measurement of Cost — Standard Cost Method and the Retail Method

Techniques for the measurement of the cost of inventories, such as the standard cost method or the retail method may be used for convenience if the results approximate the actual cost.

Standard Cost Method: Standard costs take into account normal levels of consumption of materials and supplies, labour, efficiency and capacity utilisation. They are regularly reviewed and, if necessary, revised in the light of current conditions.

The Retail Method: The retail method is often used in the retail trade for measuring inventories of large numbers of rapidly changing items that have similar margins and for which it is impracticable to use other costing method. The cost of the inventory is determined by reducing from the sales value of the inventory the appropriate percentage gross margin. The percentage used takes into consideration inventory which has been marked down to below its original selling price. An average percentage for each retail department is often used.

Net Realisable Value (NRV)

Inventories should not be carried in excess of amounts expected to be realised from their sale or use. It may be necessary to write down the cost of the inventory to NRV for different reasons, e.g.,

(i) Damage to the inventories
(ii) Obsolescence
(iii) General decline in the market price for the goods
(iv) Estimated costs necessary to make the product saleable

For calculating NRV, the following points are to be taken into consideration :

1. Review Items Individually

Inventories are usually written down to net realisable value on an ***item-by-item*** basis. In some circumstances, however, it may be appropriate to group similar or related items. This may be the case with items of inventory relating to the same product line that have similar purposes or end uses and are produced and marketed in the same geographical area and cannot be practicably evaluated separately from other items in that product line.

It is not appropriate to write down inventories based on a classification of inventory, for example, finished goods, or all the inventories in a particular business segment.

Illustration 6

Lexus Motors Ltd. a dealer in second hand cars has 5 vehicles in stock at the end of the financial year 2008-09. These are:

Car	Fiat	Ambassador	Maruti Esteem	Maruti 800	Zen	Total (₹)
Cost (₹)	90,000	1,15,000	2,75,000	1,00,000	2,00,000	7,80,000
Net Realisable Value (₹)	95,000	1,55,000	2,65,000	1,25,000	2,30,000	8,70,000

You are required to calculate the value of stock to be included in the Balance Sheet of the company.

Solution

For calculating the value of stock, each item is to be reviewed individually. The valuation of stock is to be done as follows :

Car	Fiat	Ambassador	Maruti Esteem	Maruti 800	Zen	Total (₹)
Value (₹)	90,000	1,15,000	2,65,000	1,00,000	2,00,000	7,70,000

It should be noted that the appropriate stock figure is not ₹ 7,80,000 but ₹ 7,70,000 as calculated above.

Illustration 7

As at 31st December, 2014 the original cost of stock held by A amounted to ₹ 6,345 whilst the total net realisable value of this stock was estimated at ₹ 7,894 — A has analysed these figures as follows :

Item	Cost (₹)	Net Realisable Value (₹)
Readymade Garments	3,169	3,078
Clothing	2,789	4,157
Undergarments	387	659
	6,345	7,894

You are required to value the Stock as per AS—2.

Solution

At the time of valuation of stock, cost and net realisable value of each item is to be considered ***separately***. The value of stock as per AS—2 will be as follows :

Item	Cost (₹)	Net Realisable Value (₹)	Value to be taken (₹)
Readymade Garments	3,169	3,078	3,078
Clothing	2,789	4,157	2,789
Undergarments	387	659	387
Value of Stock			6,254

2. Contract Price and Market Price

Estimates of net realisable value also take into consideration the purpose for which the inventory is held. For example, the net realisable value of the quantity of inventory held to satisfy firm sales or service contracts is based on the contract price. If the sales contracts are for less than the inventory quantities held, the net realisable value of the excess inventory is based on general selling prices.

For example, X Ltd. purchased 10,000 barrels of crude oil @ ₹ 4,400 per barrel. At the end of the period, it has a contract to sell 10,000 barrels @ ₹ 4,000 per barrel. However, the market price is ₹ 3,600 per barrel at the year end.

Here, for the purpose of calculating net realisable value, the contract price ₹ 4,000 per barrel is to be taken into consideration. The value of stock will be : 10,000 × ₹ 4,000 = ₹ **400,00,000**.

Taking the above example, let us assume that X Ltd. has a contract to sell 9,000 barrels @ ₹ 4,000 per barrel. Here net realisable value is to be calculated as follows :

9,000 @ ₹ 4,000 per barrel	₹ 360,00,000
1,000 @ ₹ 3,600 per barrel	₹ 36,00,000
Total	₹ 396,00,000

Illustration 8

X Limited has purchased 1,00,000 units of a product @ ₹ 800 per unit on 1.1.2015. On the Balance Sheet date, i.e., 31.3.2015 there were 20,000 units in stock. Of these, 5,000 units are earmarked against sale contract at a price of ₹ 900 each. The market price of the product has dropped to ₹ 750. How the closing stock will be valued on 31.3.2015 ?

Solution

The inventory will be valued as under :	₹
Inventory held against contract 5,000 × (lower of ₹ 800 and ₹ 900)	40,00,000
Inventory held for resale 15,000 × (lower of ₹ 800 and ₹ 750)	1,12,50,000
Total value of inventory	1,52,50,000

3. No write down when finished goods will be sold at cost or above cost

Materials and other supplies held for use in production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost.

However, when there has been a decline in the price of materials and it is estimated that the cost of the finished products will exceed NRV, the materials are written down to NRV. In such circumstances, the replacement cost of the materials may be the best available measure of their NRV.

Illustration 9

Stock consists of 1,742 units of a raw material purchased at ₹ 7.30 each, but the unit price of the item has fallen to ₹ 6.50. The price reduction is apprehended to be permanent. The firm has already decided that if the price reduction last longer than six months, it will reduce the sale price of the finished goods from ₹ 10.90 to about ₹ 10.

Calculate the Value of Stock.

Solution

In this case, though the unit price has fallen to ₹ 6.50 from ₹ 7.30, the stock will be valued @ ₹ 7.30 because it will not exceed the revised selling price of ₹ 10.

Therefore, the value of stock will be : 1,742 × ₹ 7.30 = ₹ **12,716.60**.

Illustration 10

X Limited uses a single raw material and converts that into a finished product. During the year ended 31.3.2010, the manufacturing cost of the product was as follows:

	₹
Raw materials — 4 units @ ₹ 10 each	40
Conversion cost	30
Manufacturing Cost	70

The finished product is sold @ ₹ 85 per unit.

On 31.3.2008, there was a fall in the sale price of the finished product to ₹ 60, because of steep fall in the raw material prices. Currently, raw materials are available in the market @ ₹ 5 each. On 31.3.2008, there was 50,000 units of raw materials in stock purchased at the above rate.

Calculate the value of inventory on 31.3.2010.

Solution

In this case manufacturing cost is ₹ 70 but the sale of finished goods has fallen to ₹ 60, because of decline of the raw material price from ₹ 10 to ₹ 5. Inventories to be valued at net realisable value.

In this circumstances, the replacement cost of the material may be the best available measure of its net realisable value.

Therefore, the value of closing stock on 31.3.2010 will be : 50,000 × ₹ 5 = ₹ **2,50,000**.

Disclosure

The financial statements should disclose:

(a) the accounting policies adopted in measuring inventories, including the cost formula used; and

(b) the total carrying amount of inventories and its classification appropriate to the enterprise.

Information about the carrying amounts held in different classifications of inventories and the extent of the changes in these assets is useful to financial statement users. Common classifications of inventories are raw materials and components, work in progress, finished goods, stores and spares, and loose tools.

General Illustrations

Illustration 11

DCM Ltd manufactures textiles. The company accountant asks your advice about the following product lines:

Lime Green Tartan : Manufactuing cost ₹ 9,000. This stock has been on a shelf since 2000. The accountant believes that the only way of selling it would be to shred it and bundle it (at a cost of ₹ 500) and sell it as industrial cleaning wipes for an anticipated sale price of ₹ 5,000.

Power Strangers : Originally printed to meet a high demand for garments linked to a popular television serial, there is no further demand for the textile in this country. Stocks cost ₹ 16,000, and the only possible source of revenue would be to export the material at a cost of ₹ 2,750 for use as dusters in Australia. Administration costs to handle the sale are estimated at ₹ 2,650, and the sale price is estimated at ₹ 4,000.

Explain, with reasons, how each of the above product lines should be accounted for in the annual accounts of the company for the year ended 31 March, 2013.

Solution

Inventories should be valued at the lower of cost and net realisable value.

Lime Green Tartan : Manufacturing cost is ₹ 9,000 but the net realisable value is ₹ 4,500 (₹ 5,000 – ₹ 500). Therefore, ₹ 4,500 is to be taken as value of stock for annual accounts of the company.

Power Strangers : Cost is ₹ 16,000 but the net realisable value is negative (₹ 4,000 – ₹ 2,750 – ₹ 2,650). Therefore, the value of stock should be taken as nil.

Illustration 12

X Limited has three major categories of goods: X, Y and Z. The following information is available on 31.3.2015 in respect of these (figures in rupees):

Items	Historical Cost	Replacement Cost	Net Realisation Value
X	50,000	53,000	37,000
Y	65,000	60,000	64,000
Z	50,000	54,000	72,000

Calculate the value of inventory as on 31.3.2015.

Solution

Inventories are valued at lower of historical cost or net realisable value. Replacement cost is relevant when there has been a decline in the price of materials and it is estimated that the cost of the finished products will exceed net realisable value. In such circumstances, the replacement cost of the materials may be the best available measure of their net realisable value. Therefore, the inventory will be valued as under:

Item	Amount (₹)
X	37,000
Y	64,000
Z	50,000
Tota l valu e of inventory	1,51,000

Illustration 13

The company deals in three products A, B and C, which are neither similar nor interchangeable. At the time of closing of its accounts for the year 2014-10, the Historical Cost and Net Realisable Value of the items of closing stock are determined as follows :

Items	Historical Cost (₹ in Lakhs)	Net Realisable Value (₹ in Lakhs)
A	40	28
B	32	32
C	16	24

What will be the value of closing stock ?

Solution

As per para 5 of AS—2, inventories should be valued at the lower of cost and net realisable value.

As per para 14 of AS—2, the cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects should be assigned by specific identification of their individual costs.

As per para 21 of AS—2, inventories are usually written down to NRV on an item-by-item basis.

Statement Showing the Calculation of Closing Stock (figures in Lakhs)

Items	Historical Cost	Net Realisable Value	Valuation of Closing Stock
A	40	28	28
B	32	32	32
C	16	24	16
Total	88	84	76

Therefore, the value of closing stock is ₹ 76,00,000.

Illustration 14

X Ltd has included in its accounts an item of stock which had cost it ₹ 50,000. The business has no further use for this stock. It can be scrapped for ₹ 25,000 or sold for the following (all figures in rupees):

Sale Proceeds	40,000
Less: Trade discount	4,000
	36,000
Less: Cash discount	1,000
	35,000
Less: Cost of disposal	2,500
	32,500

What figure should be included in the accounts for this item ?

Solution

Cost — ₹ 50,000

Net Realisable Value	₹	
Sale Proceeds	40,000	∴ Lower of cost and net realisable value = ₹ 33,500. Therefore, ₹ 33,500 is to be included in accounts for this item. It should be noted that cash discount would appear in the Profit and Loss Account.
Less: Trade discount	4,000	
	36,000	
Less: Cost of disposal	2,500	
	33,500	

Illustration 15

How do you value the closing stock under the following situation?

Closing stock consists of 4,800 units purchased @ ₹ 5 each. At the year end, the firm realised that the closing stock is not that it would choose to acquire the market place. An equivalent product is available in the market which can be acquired @ ₹ 4 each. In effect, the firm has to reduce the selling price of the product from ₹ 6.25 to ₹ 4.75. The closing stock, in its present physical form, can be sold in the market @ ₹ 2.25 each. If the firm wants to replace the existing stock by the new equivalent product, it has to pay an additional amount of ₹ 1.50 per unit.

Solution

The firm has the following two options:

(i) To sell the stock at ₹ 2.25 each and re-acquire the stock at ₹ 4 each. In this case, it has to incur an additional cost of ₹ 1.75 (₹ 4.00 – ₹ 2.25) per unit.

OR

(ii) To replace the stock by paying at ₹ 1.50 per unit.

Obviously, the second option is cheaper. Therefore, the value of the stock = 4,800 × (₹ 4.00–1.50) = ₹ **12,000**.

Illustration 16

The Directors of ITC Limited have valued their stocks at ₹ 4,50,000 at 31 December, 2014. Some of the stock items have been drawn to the attention of the company's auditors :

(i) Two categories of stocks, VX and LX have been valued at ₹ 23,000. The auditors ascertain that the valuation was based on what the directors considered was the lower of cost and net realisable value, calculated as follows:

Item		Cost of Raw Materials [1]	Attributable Production Overheads Incurred [2]	Attributable Distribution Overheads to be Incurred [3]	Expected Selling Price [4]
VX	(₹)	16,000	2,000	2,400	17,000
LX	(₹)	4,000	1,000	2,000	8,000
	(₹)	20,000	3,000	4,400	25,000
Cost	{ [1] + [2] }	23,000			
Net Realisable Value	{ [3] + [4] }				29,400

(ii) A raw material, Opprobrium, was bought at several different prices during the year, and the closing stock was valued at ₹ 44,000. The stock has previously been valued on a FIFO basis. Stock is valued on a periodic basis. Details of the stock are :

Month	Received (Tonnes)	Cost per Tonne (₹)	Issues (Tonnes)
Jan.	500	35	200
Mar.	300	45	500
Jun.	600	65	400
Nov.	800	90	100

There were no stocks of Opprobrium on 1 January, 2014.

You are required to recalculate the value of ITC Limited's Closing Stock at 31 December on the basis of AS—2.

Solution

(i) As per Para 21 of AS—2, '***Inventories are usually written down to net realisable value on an item-by-item basis***.' Therefore, at the time of valuation of stock, cost and net realisable value of each item is to be considered separately. The value of stock as per AS—2 will be as follows :

Item	Cost [Note 1] (₹)	NRV [Note 2] (₹)	Value to be taken (₹)
VX	18,000	14,600	14,600
LX	5,000	6,000	5,000
Value of Stock			19,600

Working Notes :

(1) Calculation of Cost

Item	VX (₹)	LX (₹)
Cost of Raw Materials	16,000	4,000
Add: Attributable Production Overhead	2,000	1,000
Cost	18,000	5,000

(2) Calculation of Net Realisable Value (NRV)

Item	VX (₹)	LX (₹)
Expected Selling Price	17,000	8,000
Less: Attributable Distribution Overhead to be Incurred	2,400	2,000
NRV	14,600	6,000

(ii) As per Para 16 of AS—2, the cost of Inventories should be assigned by using FIFO, or Weighted Average Cost Formula. The company is using FIFO method. Therefore, FIFO method is to be adopted to determine the cost of raw materials — 'Opprobrium'.

Total Quantity Received	2,200 (tonnes)
Total Issue	1,200 (tonnes)
Quantity in hand	1,000 (tonnes)

Cost of Closing Inventory is Calculated as Under

	₹
800 (tonnes) @ ₹ 90	72,000
200 (tonnes) @ ₹ 65	13,000
1,000	85,000

Therefore, the cost of stock will be ₹ 85,000

Revised Value of Stock

Particulars	₹	₹
Value of Stock (as determined by the Directors)		4,50,000
Adjustment for Change in the Value of VX, LX and Opprobrium :		
(i) Reduction in the value of VX + LX (₹ 23,000 – ₹ 19,600)	(3,400)	
(ii) Increase in the value of Opprobrium (₹ 85,000 – ₹ 44,000)	41,000	37,600
Revised Value of Stock		4,87,600

Illustration 17

State with reference to Accounting Standard, how will you value the inventories in the following cases:

(i) Raw materials were purchased at ₹ 100 per kilo. Price of the raw material is on decline. Finished goods in which raw materials were incorporated are expected to be sold at below cost. 10,000 kg of raw materials are on stock at the year end. Replacement cost is ₹ 80 per kg.

(ii) In a production process, normal wastage is 5% of input. 5,000 MT of input were put in process resulting in a wastage of 300 MT. Cost per MT of input is ₹ 1,000. The entire quantity of waste is on stock at the year end.

(iii) Per kg. of finished goods consisted of:
Material cost ₹ 100 per kg.
Direct labour cost ₹ 20 per kg.
Direct variable production overhead ₹ 10 per kg.
Fixed production charges for the year on normal capacity of one lakh kg. is ₹ 10 lakh. 2,000 kg. of finished goods are in stock at the year end.

Solution

(i) As per para 24, when there has been a decline in the prices of materials and it is estimated that the cost of the finished products will exceed net realisable value, the materials are written down to net realisable value. In such circumstances, the replacement cost of the materials may be the best available measure of their net realisable value.
Therefore, in this case, the materials will be valued at ₹ 80 per kg. Total value ₹ 8,00,000.

(ii) Input : 5,000 MT; Normal wastage : 5%, i.e., 5% of 5,000 MT = 250 MT.
Actual wastage : 300 MT; Abnormal wastage 300 MT – 250 MT = 50 MT.
As per para 13, in determining the cost of inventories, it is appropriate to exclude abnormal amounts of wasted materials or expenses in the period in which they are incurred.
Therefore, in this case, the entire cost of abnormal wastage, i.e., 50 × ₹ 1,000 = ₹ 50,000 should be charged to the Profit and Loss Account.

(iii) As per para 9, the allocation of fixed production overheads for the purpose of their inclusion in the costs of conversion is based on the normal capacity of the production facilities.
Therefore, in this case, the cost per kg. of finished goods will be calculated as under:

	₹
Materials	100
Direct labour	20
Direct variable production overheads	10
Fixed production overheads	*10
	140

$$\text{Fixed production overheads per kg.} = \frac{\text{Rs } 10,00,000}{1,00,000} = \text{Rs } 10 \text{ per kg.}$$

Therefore, the value of 2,000 kg. of finished goods = 2,000 × ₹ 140 = ₹ 2,80,000.

Accounting for Inventories

There are two alternative methods that may be adopted in accounting for inventories :

1. Perpetual Inventory Method
2. Periodic Inventory Method (Physical Inventory Method)

1. Perpetual Inventory Method

Perpetual inventory method is a method where the inventory accounting is kept continuously up-to-date and involves the continual recording of additions to and issues or sales of materials on a daily basis. The method is applicable to those businesses where the sale items are of high value and have a number of sale transactions daily. Under this system, a Ledger Account (Inventory Account) is maintained which shows the cost of goods sold at any time during the accounting period. When a perpetual inventory is kept, a physical inventory should be taken at least once in a year.

2. Periodic Inventory Method

Under this method, a physical inventory is usually taken only at the year-end or at regular intervals. The inventory on hand, and hence, the cost of goods sold, are determined by means of physical count at periodic intervals or at the end of the period. This method is costly as well as inconvenient.

To ascertain the cost of goods sold under this method, the books of account must show the following:

(a) opening and closing inventory for the period; and

(b) the cost of the purchased inventory during the period.

This is generally done as under:

	₹
Inventory at the beginning of the period	***
Add: Purchases of inventory during the period	***
Cost of the goods available for sale	***
Less: Inventory at the end of the period	***
Cost of goods sold	***

Following is the system of working of the Periodic Inventory Method:

1. Last year's closing inventory becomes the opening inventory for the current year. Trading Account is debited with the opening inventory.
2. Purchases for the period are recorded in the Purchases Account and this account is closed by transferring to Trading Account as above.
3. The closing inventory, which is based on physical count, is recorded in an account called Closing Stock Account. This account is transferred to the Trading Account by debiting Closing Stock Account and crediting Trading Account. This account has a life for one day only. This is because, it becomes opening stock of the next accounting period.
4. The resultant figure (the balancing figure in the Trading Account) is the cost of goods sold.

Recording Inventory Acquisitions and Sales

Sl. No.	Perpetual Inventory System	Periodic Inventory System
1.	**Purchase of Inventory** Inventory A/c Dr. To Suppliers A/c	**Purchase of Inventory** Purchases A/c Dr. To Suppliers A/c
2.	**Return of Inventory** Suppliers A/c Dr. To Inventory A/c	**Return of Inventory** Suppliers A/c Dr. To Purchases Returns A/c
3.	**Freight paid** Inventory A/c Dr. To Cash A/c	**Freight paid** Carriage Inward A/c Dr. To Cash A/c
4. (i)	**Sale of Inventory** Sundry Debtors A/c Dr. To Sales A/c	**Sale of Inventory** Sundry Debtors A/c Dr. To Sales A/c
(ii)	Cost of Goods Sold A/c Dr. To Inventory A/c	No entry is passed
5. (i)	**Return of goods by customer** Sales Returns A/c Dr. To Sundry Debtors A/c	**Return of goods by customer** Sales Returns A/c Dr. To Sundry Debtors A/c
(ii)	Inventory A/c Dr. To Cost of Goods Sold A/c	No entry is passed

In contrasting the two inventory systems, notice the following :

1. The perpetual system uses no Purchase Account. It records all purchases in the Inventory Account. The periodic system uses a Purchases Account.
2. The perpetual system records goods returned to suppliers by directly reducing the Inventory Account. The periodic system uses Purchases Returns Account.

3. The perpetual system records cost of goods and reduces inventory when goods are sold.
   The periodic system calculates cost of goods sold on the basis of the inventory remaining on hand at the end of the period and records cost of goods sold through the closing process.
4. The perpetual system records customer returns by reducing cost of goods sold and increasing inventory. The periodic system makes no entry in stock for goods returned.
5. The cost of goods sold and inventory amounts are readily available at any time under the perpetual system. Under periodic system cost of goods sold and inventory amounts are usually not available until they are calculated at the year end.

Recording Transaction in Stores Ledger / Stock Cards

Earlier in this chapter, it has been stated that there are a number of acceptable methods for assigning cost to inventories, such as Specific Identification, FIFO and Weighted Average Cost.

Stores Ledger is useful where an enterprise has a large number of different inventory items on hand and individual items cannot be identified / traced. The stores ledger will help to identify the quantity and cost of item on hand.

At the time of recording transaction in Stores Ledger / Stock Cards, the management will need to adopt either FIFO method or Weighted Average Method.

The following illustrations will explain the procedures of recording transaction in stores ledger / stock cards.

Illustration 18

The following transactions took place during the month of January 2015 in DCM Limited.

Jan. 1	Opening Stock 500 units @ ₹ 35	Jan. 15	Purchases 1,200 units @ ₹ 34
Jan. 5	Purchases 1,000 units @ ₹ 38	Jan. 18	Sales 1,000 units
Jan. 7	Sales 300 units	Jan. 23	Purchases 900 units @ ₹ 30
Jan. 12	Sales 800 units	Jan. 28	Sales 1,200 units

Calculate the Cost of Closing Stock based on FIFO method.

Solution

DCM Limited
Store Ledger (FIFO Method)

Date	Purchases			Sales			Balance		
2015	Quantity	Rate	Value (₹)	Quantity	Rate	Value (₹)	Quantity	Rate	Value (₹)
Jan. 1							500	35	17,500
5	1,000	38	38,000				500 1,000	35 38	17,500 38,000
7				300	35	10,500	200 1,000	35 38	7,000 38,000
12				200 600	35 38	7,000 22,800	400	38	15,200
15	1,200	34	40,800				400 1,200	38 34	15,200 40,800
18				400 600	38 34	15,200 20,400	600	34	20,400
23	900	30	27,000				600 900	34 30	20,400 27,000
28				600 600	34 30	20,400 18,000	300	30	9,000
Cost of Closing Stock									9,000

Illustration 19

The following details are available in respect of material ZA 234 for the month of September, 2014.

Sept. 1	Opening Stock 1,000 kg. @ ₹ 20 per kg.	Sept. 20	Purchases 1,000 kg. @ ₹ 26.25 per kg.
Sept. 10	Purchases 500 kg. @ ₹ 23 per kg.	Sept. 30	Issued 750 kg.
Sept. 15	Issued 750 kg.		

Calculate the Cost of Stock as on September 30, 2014 under the Weighted Average (Perpetual) Method.

Solution **Store Ledger [Weighted Average (Perpetual) Method]**

Date	Purchases			Issues			Balance		
2014	Quantity	Rate	Value (₹)	Quantity	Rate	Value (₹)	Quantity	Rate	Value (₹)
1							1,000	20	20,000
10	500	23	11,500				1,500	21	31,500
15				750	21	15,750	750	21	15,750
20	1,000	26.25	26,250				1,750	24	42,000
30				750	24	18,000	1,000	24	24,000
Cost of Closing Stock							1,000		24,000

Illustration 20

A Company, started on 1 January, 2014, purchased raw materials during 2014 as stated below:

January 2	800 kg @ ₹ 62 per kg.	July 10	3,000 kg @ ₹ 56 per kg
February 26	1,200 kg @ ₹ 57 per kg	September 18	1,500 kg @ ₹ 60 per kg
April 13	2,500 kg @ ₹ 59 per kg	November 29	1,000 kg @ ₹ 65 per kg

While preparing its final accounts on 31st December, 2014, the company had 1,300 kg of raw materials in its godown.

Calculate the Cost of Closing Stock of raw materials according to (1) First-in-first-out basis, and (ii) Weighted Average Basis (Periodic).

Solution **Valuation of Closing Stock**

'First-In-First-Out' Basis. Raw materials in hand were 1,300 kg. It should be valued at the rate of last two consignments. So the Cost of Closing stock will be:

		₹
300 kg	@ ₹ 60 per kg	18,000
1,000 kg	@ ₹ 65 per kg	65,000
1,300 kg		83,000

Weighted Average Basis (Periodic)

Date		Price	Quantity	Value (₹)
2014	Jan. 2	62	800	49,600
	Feb. 26	57	1,200	68,400
	Apr. 13	59	2,500	1,47,500
	Jul. 10	56	3,000	1,68,000
	Sep. 18	60	1,500	90,000
	Nov. 29	65	1,000	65,000
			10,000	5,88,500

$$\textit{Weighted Average Price} = \frac{\text{Rs } 5{,}88{,}500}{10{,}000} = \text{Rs } 58.85$$

Cost of Closing Stock = 1,300 x ₹ 58.85

= ₹ 76,505

Illustration 21

At the beginning of December 2014, Quality Brush Company had in stock 10,000 brushes valued at ₹ 10 each. Purchases and Issues during the month were as follows :

Purchases		Issues	
Dec. 7	4,000 Brushes @ ₹ 12.50	Dec. 16	16,000 Brushes
Dec. 14	6,000 Brushes @ ₹ 15.00	Dec. 28	10,000 Brushes
Dec. 24	8,000 Brushes @ ₹ 16.50		

You are required to compute the Cost of Closing Stock on the basis of Weighted Average (Perpetual) Method.

Solution **Quality Brush Company**

Stores Ledger [Weighted Average (Perpetual) Method]

Date	Receipts			Issues			Balance		
2014	Quantity	Rate	Value (₹)	Quantity	Rate	Value (₹)	Quantity	Rate	Value (₹)
Dec. 1							10,000	10.00	1,00,000
7	4,000	12.50	50,000				14,000	10.71	1,50,000
14	6,000	15.00	90,000				20,000	12.00	2,40,000
16				16,000	12.00	1,92,000	4,000	12.00	48,000
24	8,000	16.50	1,32,000				12,000	15.00	1,80,000
28				10,000	15.00	1,50,000	2,000	15.00	30,000

Therefore, the Cost of Closing Stock will be ₹ 30,000.

Illustration 22

P Limited price the issues using the Weighted Average (Perpetual) Method. The following relate to transactions in the month of March 2015. Opening balance 2,000 units @ ₹ 10 each.

	Purchases		Issues
March 4	1,500 units @ ₹ 8 per unit	March 2	1,000 units
March 15	1,300 units @ ₹ 9.50 per unit	March 6	1,200 units
March 22	2,000 units @ ₹ 10 per unit	March 20	2,000 units
		March 26	1,500 units

Calculate the Cost of Closing Stock taking two decimal places.

Solution

P Limited
Store Ledger [Weighted Average (Perpetual) Method]

Date	Purchases			Issues			Balance		
2015	Quantity	Rate	Value (₹)	Quantity	Rate	Value (₹)	Quantity	Rate	Value (₹)
March 1							2,000	10	20,000
2				1,000	10	10,000	1,000	10	10,000
4	1,500	8	12,000				2,500	8.80	22,000
6				1,200	8.80	10,560	1,300	8.80	11,440
15	1,300	9.50	12,350				2,600	9.15	23,790
20				2,000	9.15	18,300	600	9.50	5,490
22	2,000	10	20,000				2,600	9.80	25,490
26				1,500	9.80	14,700	1,100	9.81	10,790
Cost of Closing Stock							1,100		10,790

Illustration 23

Slow and Steady Limited follows the First-in-First-Out (FIFO) Method of inventory valuation. The following particulars are available in respect of an item of raw material for the month of January 2015.

Jan. 1	Opening balance 2,500 kg. @ ₹ 18 per kg.	Jan. 22	Issue 7,000 kg.
Jan. 4	Purchases 3,000 kg. @ ₹ 20 per kg.	Jan. 28	Purchases 2,000 kg. @ ₹ 22 per kg.
Jan. 6	Issues 5,000 kg.	Jan. 31	Issues 4,500 kg.
Jan. 18	Purchases 10,000 kg. @ ₹ 21 per kg.		

Calculate the Cost of Closing Stock on the basis of FIFO Method.

Solution

Slow and Steady Limited
Store Ledger (FIFO Method)

Date	Purchases			Issues			Balance		
2015	Quantity	Rate	Value (₹)	Quantity	Rate	Value (₹)	Quantity	Rate	Value (₹)
Jan. 1							2,500	18	45,000
4	3,000	20	60,000				2,500 3,000	18 20	45,000 60,000
6				2,500 2,500	18 20	45,000 50,000	500	20	10,000
18	10,000	21	2,10,000				500 10,000	20 21	10,000 2,10,000
22				500 6,500	20 21	10,000 1,36,500	3,500	21	73,500
28	2,000	22	44,000				3,500 2,000	21 22	73,500 44,000
31				3,500 1,000	21 22	73,500 22,000	1,000	22	22,000
Cost of Closing Stock									22,000

Illustration 24

The following are the details of a space part of Sriram Mills :

1.1.2015	Opening stock Nil	1.1.2015	Purchases 100 units @ ₹ 30 per unit
15.1.2015	Issued for consumption 50 units	1.2.2015	Purchases 200 units @ ₹ 40 per unit
15.2.2015	Issued for consumption 100 units	20.2.2015	Issued for consumption 100 units
1.3.2015	Purchases 150 units @ ₹ 50 per unit	15.3.2015	Issued for consumption 100 units

Find out the value of stock as on 31.3.2015 if the company follows :

1. First-in-First Out basis and
2. Weighted Average (Perpetual) basis.

Solution

Sriram Mills
(1) Store Ledger (FIFO Method)

Date	Purchases			Issues			Balance		
2015	Quantity	Rate	Value (₹)	Quantity	Rate	Value (₹)	Quantity	Rate	Value (₹)
Jan. 1	100	30	3,000				100	30	3,000
15				50	30	1,500	50	30	1,500

Problems of Stock Taking

Under periodic inventory system, at the end of the last day of the accounting year, stocks in hand are verified and valued. But in case of big organizations, it may not be possible to verify the stock exactly on the last date of the accounting period. In such a case, stock is taken either few days earlier or later, according to the situation.

If the stock is taken on a later date, the following adjustments are required to arrive at the stock as on the closing date:

Let us start with the value of stocks on that later date...
Add: Sales (at cost) between two dates, i.e. date of taking stock and closing date.
Add: Purchases returns during the said period.
Add: Any undercasting in stock sheet.
Add: Any goods in transit.
Less: Purchases between the two dates, i.e. date of taking stock and closing date.
Less: Sales returns (at cost price) between the above two dates.
Less: Any overcasting in stock sheet.
Less: Any goods held on consignment basis.
Less: Any goods included in stock but title of such has been transferred to the buyer.

Illustration 25

Asim's financial year ends on 31st March but actual stock has not been taken till the 8th April, when it is ascertained at ₹ 12,500.

You find that :

(i) Sales are entered in the sales book on the day of despatch and in the returns inward book on the day the goods are received back.

(ii) Purchases are entered in the purchases day book on the day the invoices are received.

(iii) Sales between 31st March and 8th April as per sales day book and cash book are ₹ 860.

(iv) Purchases between 31st March and 8th April as per the purchases day book are ₹ 600 but goods amounting to ₹ 200 are not received till the stock was taken.

(v) Of goods invoiced during March, goods amounted to ₹ 500 were not received till 31st March, of which goods worth ₹ 350 were received betwen 31st March and 8th April.

(vi) Rate of gross profit is $33^1/_3$% on cost.

Ascertain the value of stock as on 31st March.

Solution

Statement showing the Value of Physical Stock on 31st March, ...

Particulars	₹	₹
Stock on 8th April (Physical)		12,500
Add: (iii) Cost of goods sold during 1st April and 8th April (Note 1)		645
		13,145
Less: (iv) Goods purchased between 1st April and 8th April (₹ 600 – 200)	400	
Less: (v) Goods purchased in March but received between 31st March and 8th April	350	750
Stock on 31st March (to be credited to Trading Account)		12,395

Working Note :

(1) Sales	860
Less: Profit @ $33^1/_3$% on Cost or 25% on Sales	215
Cost of Goods Sold	645

Illustration 26

Ashoke's financial year ends on 31st March, but actual stock is not taken until next 6th April when it is ascertained at ₹ 33,500.

You find that :

(i) Sales are entered in the sales day book on the same day as despatched and returns inward in the return book the day the goods are received back.

(ii) Purchases are entered in the purchases day book on the day the invoices are received.

(iii) Purchases between 31st March and 6th April as per the purchases day book are ₹ 120 but goods amounting to ₹ 40 were not received till the stock was taken.

(iv) Sales between 31st March and 6th April as per sales day book and cash book are ₹ 1,720.

(v) Goods invoiced during March but not received till 31st March ₹ 100, of which goods worth ₹ 70 were received with 6th April.

(vi) The rate of gross profit to Sales is 25%.

Ascertain the value of stock as on 31st March.

Solution

Statement showing the Value of Physical Stock on 31st March, ...

Particulars	₹	₹
Stock on 6th April (Physical)		33,500
Add: (iv) Cost of goods sold during 1st April and 6th April (Note 1)		1,290
		34,790
Less: (iii) Goods purchased between 1st April and 6th April (₹ 120 – 40)	80	
Less: (v) Goods invoiced during March but received between 1st April and 6th April	70	150
Stock on 31st March (to be credited to Trading Account)		34,640

Working Note :

(1) Sales	1,720
Less: Gross Profit @ 25% on Sales	430
Cost of Goods Sold	1,290

Illustration 27

FY Ltd conducts physical stock taking every year at the end of the accounting year. Owing to certain difficulties, it was not possible for it to conduct physical stock taking at the end of the accounting year ending 30th June, 2015. Physical stock was taken on 8th July, 2015 when it was valued at ₹ 34,500.

The following transactions took place during 1st July to 8th July, 2015:

1. Net sales during the period were ₹ 9,340. These goods were sold at the usual rate of gross profit of 25% on cost except goods which realized ₹ 840 on the basis of 20% profit on cost.
2. Purchase during the period were ₹ 7,500 of which ₹ 800 worth of goods were delivered to the company only on 10th July, 2015.
3. Sales returns during the period were ₹ 1,500 of which 50% were out of the sales at 20% gross profit mentioned above.
4. On 5th July 2015, goods worth ₹ 4,000 were received, which were to be sold on consignment basis.

You are required to prepare a statement showing clearly the value of the stock to be taken into account in FY Ltd's final accounts for the year ended 30th June, 2015.

Solution **FY Limited**

Statement showing the Value of Physical Stock on 30th June, 2015

Particulars	₹	₹
Stock on 8th July, 2015		34,500
Add: Cost of goods sold during 1st July and 8th July 2015 (Note 1)		7,500
		42,000
Less: Cost of goods returned during 1st July and 8th July 2015 (Note 2)	1,225	
Less: Purchased during 1st July and 8th July 2015 (₹ 7,500 – ₹ 800)	6,700	
Less: Goods held on consignment	4,000	11,925
Stock on 30th June, 2015 (to be credited to Trading Account)		30,075

Working Notes

Cost of goods sold	₹	₹	Cost of goods returned	₹	₹
(a) Sales at cost plus 25% (9,340 – 840)	8,500		(a) Selling price	750	
Less: 20% profit on sales	1,700	6,800	*Less*: Profit 20% on sales	150	600
(b) Sales at cost plus 20%	840		(b) Selling price	750	
Less: 16.67% profit on sales	140	700	*Less:* Profit 16.67% on sales	125	625
		7,500			1,225

Illustration 28

Alpha Ltd. prepares accounts on 31st March each year. On 31st March 2015 its stock taking expert was ill and the preparation of the physical inventory was delayed until 3rd April 2015 on which date the stock valued at cost amounted to ₹ 2,40,000.

An examination of inventories and related financial records discloses that between 1st and 3rd April 2015:

1. Sales totalled ₹ 40,000 including: (i) ₹ 2,000 in respect of goods which left the warehouse on 29th March 2015; and (ii) ₹ 4,000 in respect of goods not despatched until 12th April 2015. The rate of gross profit to sales was 30%.
2. Returns from customers totalled ₹ 6,000.
3. Purchases totalled ₹ 18,000 which included: (i) ₹ 6,000 for goods received in March 2015; and (ii) ₹ 3,000 for goods received in 10th April, 2015.
4. Returns to suppliers totalled ₹ 4,000.
5. There were arithmetical errors in the stock sheets on 3rd April, 2015 resulting in an over-valuation of ₹ 4,600.

Prepare a statement showing the correct amount of the company's stock at cost on 31st March, 2015.

Solution **Alpha Limited**

Statement showing the Value of Physical Stock on 31st March, 2015

Particulars	₹	₹
Stock on 3rd April 2015		2,40,000
Add: Cost of goods actually despatched between 1st and 3rd April 2015 (Note 1)	23,800	
Add: Returned to Supplier	4,000	27,800
		2,67,800
Less: Cost of goods actually received between 1st and 3rd April 2015 (Note 2)	9,000	
Less: Cost of goods returned (₹ 6,000 – 1,800)	4,200	
Less: Errors (over-valuation)	4,600	17,800
Value of Stock as on 31st March, 2015		2,50,000

Working Notes

(1) Out of the total sales of ₹ 40,000, goods valued at ₹ 2,000 were delivered before 1st April and goods valued at ₹ 4,000 were despatched after 3rd April. Hence goods actually despatched between 1st and 3rd April were ₹ 34,000 only. ₹ 34,000 X 0.7 = ₹ 23,800.

(2) Out of the total purchases of ₹ 18,000, goods costing ₹ 6,000 were received before 1st April and goods costing ₹ 3,000 were received after 3rd April. Hence actual goods received were ₹ 9,000 only.

Illustration 29

X's financial year ends on the last Wednesday in September, but actual stock is not taken until the following Saturday, when it is ascertained at ₹ 33,500. You find that:

(i) Sales are entered in the Sales Day Book on the same day as despatched and Returns Inwards in the Returns Book the day the goods are received back.

(ii) Purchases are entered in the Purchases Day Book as the invoices are received.

(iii) Purchases between Wednesday and Saturday as per Purchases Day Book were ₹ 120, but of these, goods amounting to ₹ 40 were not received until after the stock was taken.

(iv) Sales between Wednesday and Saturday as per Sales Day Book and Cash Sales Book were ₹ 1,720.

(v) Goods invoiced during September (prior to the last Wednesday) but not received until after Wednesday amounted to ₹ 100, of which goods worth ₹ 70 were received between Wednesday and Saturday.

(vi) Goods sold in the previous week for ₹ 60 were returned on Monday but did not reach X until Thursday.

(vii) The rate of Gross Profit to sales is 25%.

Ascertain the value of the stock as at the end of the financial year assuming that the NRV is higher than cost and that the Purchases and Sales Day Books are not to be amended.

Solution **Statement showing the Value of Physical Stock on Wednesday**

Particulars	₹	₹
Stock on Saturday		33,500
Add: Cost of goods sold and delivered during Wednesday and Saturday (Note 1)	1,290	
Add: Goods invoiced during September (prior to last Wednesday and recorded in the Purchase Day Book but not physically received before Wednesday)	100	1,390
		34,890
Less: Goods received between Wednesday and Saturday	70	
Less: Goods purchased and physically received between Wednesday and Saturday (₹ 120 – ₹ 40)	80	
Less: Cost of goods returned by customers out of last year's sale (Note 2)	45	195
Cost of Closing Stock at the year end		34,695

Working Notes

(1) Sales ₹ 1,720 less G.P. 25% on sales = ₹ 1,290.

(2) As per the policy of Mr. X, goods returned are recorded only when the goods are physically received back. Here, goods were received after Wednesday but before Saturday. These items were included in the stock on Saturday. The cost of goods returned to be deducted (₹ 60 less 25% Gross Profit) = ₹ 45.

Illustration 30

A firm prepares accounts annually up to 30th November and stock taking takes place in the following weekend. In the year 2014, stock taking commenced on 4th December when the value of stock on that date was found ₹ 25,000. From the following information, you are required to ascertain the value of stock on 30th November 2014:

1. The average rate of gross profit is 20% on sales.
2. Goods outwards are entered in the Sales Day Book as on the day of despatch.
3. Goods inward are entered in the Purchases Day Book as on the date of the invoice.
4. Sales during the period 1st to 4th December, as shown by the Sales Day Book and the Cash Book ₹ 1,500.
5. Purchase during the same period as shown by the Purchases Day Book amounted to ₹ 1,200, but of these goods to the value of ₹ 200 were not received until 4th December.
6. Goods invoiced during November and not received until December totalled ₹ 1,600. Of these, goods to the value of ₹ 1,000 were received during the period 1st to 4th December and ₹ 600 after 4th December.
7. In November, goods were sent to a customer on sale or return basis. The sale price was ₹ 1,000. The goods were still returnable by the customer on 30th November.

Solution **Statement showing the Value of Physical Stock on 30the November, 2014**

Particulars	₹	₹
Value of Stock as on 4th December 2014		25,000
Add: Cost of goods sold between 1st and 4th December (₹ 1,500 – 300)	1,200	
Add: Cost of goods with customers on sale or return (₹ 1,000 – 200)	800	
Add: Purchase made before 30th November, but goods received after 4th December	600	2,600
		27,600
Less: Goods purchased and received between 1st & 4th December (₹ 1,200 – 200)		1,000
Value of Stock on 30th November, 2014		26,600

Illustration 31

Raja makes up his annual accounts to 31st December each year. He was unable to take stock of physical inventory till 9th January 2015 on which date the physical stock at cost was valued at ₹ 75,200.

You are required to ascertain the value of physical stock at cost on 31st December 2014 from the following information regarding the period from 1st January, 2015 to 9th January, 2015.

(a) Purchases of goods amounted to ₹ 25,600 of which goods worth ₹ 4,700 had been received on 28.12.2014 and goods worth ₹ 5,900 had been received on 12.1.2015.

(b) Sales of goods amounted to ₹ 38,400 of which goods of a sale value of ₹ 3,600 had not been delivered at the time of verification and goods of a sale value of ₹ 6,000 had been delivered on 29.12.2014.

(c) Sales return amounted to ₹ 1,800 which included a return of ₹ 720 relating to the goods sold and delivered between 1.1.2015 to 9.1.2015.

(d) A sub-total of ₹ 12,000 on one of the stock sheets had been carried to the summary of stock sheets as ₹ 21,000.

(e) In respect of goods costing ₹ 4,000 received prior to 31st December 2014 invoice had not been received up to the date of verification of stock.

(f) The rate of gross profit was 20% on the cost price.

Solution **Statement showing the Value of Physical Stock on 31st December, 2014**

Particulars	₹	₹
Stock as on 9th January, 2015		75,200
Add: Cost of goods sold and despatched during 1st and 9th January, 2015 (Note 1)		24,000
		99,200
Less: Goods actually received during 1st and 9th January, 2015 (Note 2)	15,000	
Less: Cost of goods returned	900	
Less: Wrong carry forward (₹ 21,000 – 12,000)	9,000	24,900
Value of Stock on 31st December, 2014		74,300

Working Notes

(1) Cost of goods sold	₹	**(2) Goods actually received during 1st and 9th January, 2015**	₹
Sales	38,400	Purchases	25,600
Less: Goods not despatched	3,600	*Less:* Goods received on 28.12.2014	4,700
	34,800		20,900
Less: Goods despatched on 29.12.2014	6,000	*Less:* Goods received on 12.1.2014	5,900
	28,800		15,000
Less: Gross profit 20% on cost, i.e., 16.67% on sales	4,800	**(3) Cost of goods returned**	
	24,000	Return	1,800
(4) No adjustment is required for item (e) , on the assumption that the purchase was recorded at the time of receiving the goods.		*Less:* Return from Sale of 1st & 9th January	720
			1,080
		Less: Gross profit 20% on cost	180
			900

Illustration 32

Krishna Udyog Limited makes up its accounts to December 31 each year. The company was unable to take stock by physical inventory till 14th January, 2015 on which date the stock at cost was valued at ₹ 1,85,000. It was, therefore, necessary to estimate the value of stock in hand as on December 31, 2014.

You ascertain the following facts regarding the period January 1 to January 14, 2015:

1. Purchases totalled ₹ 48,000 and included: (i) ₹ 5,000 in respect of goods received in December, 2014: (ii) ₹ 6,000 in respect of goods received on January 19, 2015; (iii) ₹ 2,000 in respect of goods received but returned to suppliers on January 7, 2015 for which no credit note has been received or passed through the books.
2. Sales totalled ₹ 60,000 and included: (i) ₹ 1,500 in respect of goods which left the warehouse on December 28, 2014; (ii) ₹ 2,800 in respect of goods which were not despatched until January 16,2015; (iii) ₹ 750 in respect of goods invoiced and despatched on January 10, 2015 but returned by the customers on January 12, for which no credit note had been passed but which were, in fact, included in the stock taken on January 14, 2015.

3. Other returns to suppliers totalled ₹ 1,400 and other returns by customers were ₹ 450.
4. The rate of gross profit was 20% on the selling price with the exception of an isolated purchase on January 7, 2014 of 100 similar articles which had cost ₹ 11,000. Of these articles, 50 were sold on January 7, 2015 for ₹ 6,500 and the remainder had been included at cost in the stock taken on January 14, 2015.

Prepare a statement showing the estimated value of stock held on December 31, 2014 at Cost.

Solution

Krishna Udyog Limited

Statement showing the Value of Physical Stock on 31st December, 2014

Particulars	₹	₹
Stock on January 14, 2015		1,85,000
Add: Cost of goods sold during 1st and 14th January, 2015 (Note 1)	45,460	
Add: Purchase returns during 1st and 14th January, 2015	1,400	46,860
		2,31,860
Less: Purchases during 1st and 14th January, 2015 (Note 2)	40,000	
Less: Cost of goods returned during 1st and 14th January, 2015 ₹ (450 – 90)	360	40,360
Value of Stock on 31st December, 2014		1,91,500

Working Notes

(1) Cost of goods sold		₹	**(2) Calculation of purchases**	₹
Sales during 1st and 14th January		60,000	Purchases as given	48,000
Less: Goods not despatched	2,800		*Less:* Goods received on 19.01.2014	6,000
Less: Returned on January 12	750	3,550		42,000
		56,450	*Less:* Goods returned on 7th January	2,000
Less: Sales of isolated purchase		6,500		40,000
Sale of normal item at a profit of 20%		49,950		
Less: Gross profit 20% on sales		9,990	(3) Since the purchase of ₹ 48,000 included ₹ 5,000 in respect of goods received in December , 2014, we may assume that the entry in respect of ₹ 5,000 must have been made during Jan 1 & 14th, 2015 So it should be treated as purchase of 2015 and it should be deducted from ₹ 1,85,000. To fulfil this we must not deduct it from ₹ 48,000.	
		39,960		
Add: Cost of abnormal 50 articles		5,500		
		45,460		

If the stocks are taken on an earlier date.

In this case, the following adjustments are necessary to arrive at the stocks as on the closing date.

Let us start with the value of goods on that earlier date ....

Add: Purchases between the two dates.

Add: Sales returns (at cost price) between the two dates.

Less: Sales (at cost) between the two dates.

Less: Purchases returns during the same period.

Add: Goods lying with consignee (at cost).

Add: Goods on approval with customers (at cost).

Illustration 33

Determine the value of stock to be taken for Balance Sheet as at 31st March, 2015 from the following information :

The stock was physically verified on 23rd March 2015 and was valued at ₹ 6,00,000. Between 23rd March 2015 and 31st March 2015 the following transactions had taken place :

1 Purchases ₹ 50,000 of this, goods worth ₹ 20,000 were delivered on 5th April, 2015.
2. Out of goods sent on consignment, goods worth ₹ 30,000 (at cost) were unsold.
3. Sales was of ₹ 1,70,000. This includes goods worth ₹ 40,000 sent on approval. Half of these were returned before 31st March. As regards remaining, no intimation was received.
4. Normally the firm sells goods on cost plus 25%. However, a lot of goods costing ₹ 30,000 was sold for ₹ 15,000.

Solution **Statement showing the Value of Physical Stock on 31st March, 2015**

Particulars	₹	₹
Stock on 23rd March, 2015		6,00,000
Add: Purchases during 23rd and 31st March (₹ 30,000 + 20,000 in transit)	50,000	
Add: Goods lying with consignee at cost	30,000	
Add: Goods on approval with customer at cost (₹ 20,000 – ₹ 4,000)	16,000	96,000
		6,96,000
Less: Cost of goods sold during 23rd and 31st March (Note 1)	1,08,000	
Less: Cost of Abnormal Sales	30,000	1,38,000
Value of Stock on 31st March, 2015		5,58,000

Working Notes : (1) Cost of goods sold during 23rd March & 31st March, 2015

	₹	₹
Sales		1,70,000
Less: Sales of abnormal items	15,000	
Less: Sent on approval	20,000	35,000
		1,35,000
Less: Gross Profit @ 25% of cost, i.e., 20% on sales		27,000
		1,08,000

Key Points

- A major objective of accounting for inventories is the proper determination of income through the process of matching appropriate costs against revenues.
- Inventories are assets
  - (a) held for sale in the ordinary course of business (e.g., finished car ready to be despatched to dealers);
  - (b) in the process of production for such sale (e.g., car in the assembly lines); or
  - (c) in the form of materials or supplies to be consumed in the production process or in the rendering of services (e.g., tyre, battery, headlights, etc.).
- **Net Realisable Value (NRV)** : Net realisable value is the estimated selling price, in the ordinary course of business, less cost of completion, and the estimated cost necessary to make the sale.
- The cost of inventories should comprise:
  - (i) all costs of purchase;
  - (ii) costs of conversion; and
  - (iii) other costs incurred in bringing the inventories to their present location and condition.
- Perpetual inventory method is a method where the inventory accounting is kept continuously up-to-date and involves the continual recording of additions to and issues or sales of materials on a daily basis.

THEORETICAL QUESTIONS

1. What do you mean by Inventory ?
   What are the objectives of accounting for Inventories ?
2. What are the effects of errors in valuing inventory ?
3. What do you mean by Perpetual and Periodic Inventory Methods ?
   How inventory acquisitions and sales are recorded under Perpetual Inventory System and Periodic Inventory System?
4. Explain what is meant by the term '*stock is valued at the lower of cost and net realisable value*', which is found in AS—2 (Valuation of Inventories).

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each sentence or answer each question below :

1. Which of the following is correct ?
   A Inventories are assets held for use in the construction of the building, e.g., air conditioners
   B Inventories are assets held for sale in the ordinary course of business
   C Inventories includes machinery spares which is used irregularly
2. Net realisable value is
   A the estimated selling price *plus* cost of completion *minus* selling expenses
   B the estimated selling price *less* cost of competition
   C the estimated selling price in the ordinary course of business, *less* cost of completion less selling expenses
3. The purchase price, transport and handling cost, tax and import duties are all examples of
   A cost of purchase
   B cost of conversion
   C cost of purchase, cost of conversion and other costs

4. The cost of inventories should comprise
   A cost of purchase, cost of conversion and other cost like interest
   B cost of purchase, cost of conversion and other cost like post manufacturing storage cost
   C cost of purchase, cost of conversion and other cost like primary packing cost
5. Standard Costs Method or the Retail Method is used as a tool of measurement of cost. Retail Method is
   A sale price plus mark up
   B sale price less gross margin
   C none of the above
6. Reasons for inventories being sold for less than their cost could be:
   (i) Damage to the inventories and obsolescence
   (ii) General fall in the market price of the goods
   (iii) Fall in the production cost for use of better technology
   A all three
   B (i) and (iii) only
   C (i) and (ii) only
7. Amar restores and sells second hand motorcycles. At 31st December, 2014, he had one motorcycle in inventory. Details of this were :
   Model: Bajaj Boxer
   Details : This item cost ₹ 10,000 and in December, 2014 Amar had also spent ₹ 750 on repairs. He has not yet sold it but is confident to sell it in a motorcycle fair in February 2007 for at least ₹ 15,000. It will cost Amar ₹ 250 to transport motorcycle to the fair.
   The value of motorcycle to be included in the final account for 2006 is
   A ₹ 10,000
   B ₹ 15,000
   C ₹ 10,750
8. Amar also holds an inventory of parts, which he values on the periodic weighted average basis. During the year 2014 his purchases of parts was :

Month	Quantity (units)	Cost per unit (₹)
January	400	20
June	500	22
September	300	24

   At 31st September, 2014 he had 300 units in inventory. On 1st January, 2014 he had no parts in inventory.
   The value of inventory of parts at 31st December, 2014 is
   A ₹ 6,600
   B ₹ 6,000
   C ₹ 6,550
9. Following the physical stock taking, the value of total stock is ₹ 1,22,357. The auditors find the following additional information :
   (i) 370 units of stock which cost ₹ 0.40 per unit have been valued @ ₹ 4.00 each.
   (ii) The stock value including damaged goods at their original cost of ₹ 2,885. These goods could be sold for ₹ 3,600 after incurring repairing cost of ₹ 921.
   The correct value of year end stock is :
   A ₹ 1,20,877
   B ₹ 1,20,671
   C ₹ 1,20,819
10. X has closing stock which cost ₹ 38,750. This includes some damaged items which cost ₹ 3,660. It will cost X ₹ 450 to repair these. He will be able to sell them for ₹ 1,500 after the repairs are completed. What is the correct value of X's closing stock ?
   A ₹ 38,750
   B ₹ 36,590
   C ₹ 36,140

11. On 31 March, 2015, inventory code AXN-205 had 1,000 items in inventory. The original cost of this inventory was ₹ 4,600. Alternative valuations were obtained at 31 March, 2015 for this inventory item. Which value should be used in the accounts at 31st March, 2015 as per AS-2 ?
    A original cost ₹ 4,600
    B replacement cost ₹ 3,200
    C net realisable value ₹ 3,400
12. On 31 March, 2015, stock consists of 1,500 units of a raw material purchased @ ₹ 8 each, but the unit price of the item has fallen to ₹ 7. The price reduction is apprehended to be permanent. The firm has already decided that if the price reduction lasts longer than six months it will reduce the sale price of the finished goods from ₹ 12 to ₹ 11. The value of closing stock is :
    A ₹ 16,500
    B ₹ 10,500
    C ₹ 12,000
13. According to AS-2 Inventories, which of the following costs should be included in valuing the inventories of a manufacturing company ?
    (i) freight and insurance
    (ii) carriage outwards
    (iii) depreciation of factory plant
    (iv) general administrative overheads
    A all four items
    B (i), (ii) and (iv) only
    C (ii) and (iii) only
    D (i) and (iii) only
14. During the year to 31 December, 2014 Amar bought goods for resale at a cost of ₹ 7,55,500. His inventory at 1 January 2014 was valued at ₹ 1,57,400. He did not count his inventory at 31 December, 2014 but he knows that his sales for the year to 31 December, 2014 were ₹ 9,18,000. All sales were made at a mark up of 20%. Based on the information above, what was the value of Amar's inventory at 31 December, 2014 ?
    A ₹ 1,36,300
    B ₹ 1,47,900
    C ₹ 1,66,900
15. Karim is an antiques dealer. His inventory includes a clock which cost ₹ 15,800. Karim expects to spend ₹ 700 on repairing the clock which will mean that he will be able to sell it for ₹ 26,000.
    At what value should the clock be included in Karim's inventory ?
    A ₹ 15,100
    B ₹ 15,800
    C ₹ 25,300

PRACTICAL QUESTIONS

1. State how will you deal with each of the following ?
    (i) Stock which cost ₹ 20,000 can now be replaced for ₹ 14,000. The estimated net realisable value of this stock is ₹ 17,000. It is proposed that the stock should be written down to ₹ 17,000.
    (ii) During the stock-taking it was found that of the total stock of ₹ 8,35,000, approximately ₹ 93,000 of stock was missing and had been misappropriated. A further ₹ 50,000 of stock was estimated to be obsolete, with very little likelihood of resale.
    (iii) Some stock has been omitted from the closing stock figure. The omitted stock had originally cost ₹ 30,000 but could be sold only for ₹ 20,000.
    (iv) Stock costing ₹ 9,000 lying in godown for last 10 years. It can only be sold for ₹ 2,500 after incurring ₹ 500 delivery charges..
2. From the following transactions extracted from the books of accounts of X Ltd as on 31st December, 2014, work out the Cost of Closing stock under the following three methods of pricing:
    (i) FIFO and (ii) Weighted Average (Periodic).

Dec. 1	Opening Stock 300 units @ ₹ 9.70	Dec. 20	Issue 210 units
Dec. 3	Purchases 250 units @ ₹ 9.80	Dec. 25	Purchases 150 units @ ₹ 10.30
Dec. 11	Issue 400 units	Dec. 26	Issue 100 units
Dec. 15	Purchases 300 units @ ₹ 10.05		

3. Calculate the Cost of Closing stock under FIFO method:
2015 Jan. 1 Opening stock 200 pieces @ ₹ 2 each.

	Purchases		Issues
Jan. 5	100 pieces @ ₹ 2.20 each	Jan. 2	150 pieces
Jan. 10	150 pieces @ ₹ 2.40 each	Jan. 7	100 pieces
Jan. 20	180 pieces @ ₹ 2.50 each	Jan. 12	100 pieces
		Jan. 28	200 pieces

4. From the following information, calculate the Cost of Closing stock on 31st March, 2015 using FIFO method.

Purchases			Issues	
Date	Units	Rate	Date	Units
3.1.2015	200	5.2	9.1.2015	1,000
15.1.2015	1,400	5.5	17.1.2015	1,000
21.1.2015	800	5.4	23.1.2015	1,000
14.2.2015	2,000	5.3	16.2.2015	1,000

5. With the help of the following information, calculate the Cost of Closing stock using Weighted Average (Perpetual) method.

Sept. 1	Opening balance 24,000 kg @ ₹ 7,500 per MT	Sept. 13	Purchases 10,000 kgs @ ₹ 7,800 per MT
Sept. 1	Purchases 44,000 kgs @ ₹ 7,600 per MT	Sept. 18	Issues 24,000 kgs
Sept. 1	Issue 10,000 kgs	Sept. 22	Purchases 50,000 kgs @ ₹ 8,000 per MT
Sept. 5	Issue 16,000 kgs	Sept. 28	Issues 30,000 kgs
Sept. 12	Issue 24,000 kgs	Sept. 30	Issues 22,000 kgs

6. From the records of an oil distributing company, the following summarized information is available for the month of March, 2015:
   (i) Sales for the month ₹ 9,45,000.
   (ii) Opening stock as on 1.3.2015 1,00,000 litres @ ₹ 3.00 per litre.
   (iii) Purchases (including freight and insurance) : March 5 2,00,000 litres @ ₹ 2.85 per litre; March 27 1,00,000 litres @ ₹ 3.03 per litre.
   (iv) Closing stock as on 31.3.2015 1,30,000 litres.
   (v) General administrative expenses for the month ₹ 25,000.

   On the basis of the above information, work out the following using FIFO method of inventory valuation: (a) Cost of Closing stock on 31.3.2015; (b) Cost of goods sold during March 2015; and (c) Profit or loss for March 2015.
7. B. Ltd started on 1st January, 2014, purchased raw materials during 2014 as given below :

Jan. 1	1,000 kg @ ₹ 70	March 15	700 kg @ ₹ 72	Sept. 15	1,000 kg @ ₹ 65
Jan. 25	1,500 kg @ ₹ 60	July 29	1,400 kg @ ₹ 70	Dec. 20	1,200 kg @ ₹ 60
Feb. 5	1,200 kg @ ₹ 65				

   While preparing its final accounts on 31st December, 2014, the company had 3,000 kg of raw materials in its godown. Calculate the Cost of Closing stock of raw materials according to FIFO method.

Problems of Stock Taking

8. On account of unavoidable circumstances M/s Mahesh Electricals could not do stock taking on 31.12.2014. However the stock was taken on January 10, 2015.
The following are details of transactions from January 1st to 10th on which day Inventory was taken:
Purchased in Jan. upto 10th 45,000; Goods received after 10th 5,000; Purchase returns 3,000; Purchases include special items for ₹ 11,000; Sales ₹ 80,000; Sales Returns ₹ 2,000; Sale of goods invoiced but delivered after 10th ₹ 8,000; Sales include half the quantity of special item purchased for Balance left in the Stock ₹ 6,600; Gross Profit Ratio 25%. Inventory taken on 10th Jan. ₹ 1,75,000. Find out the value of the stock as on 31.12.2014.
9. Sundaram closed his books of account on 31st March, 2015, but due to certain difficulties, it was not possible for him to conduct physical stock-taking on that date. Physical stock was taken on 7th April when it was valued at ₹ 45,000. An examination of the records of inventories from 1st to 7th April revealed the following:
   (a) Net sales during the period were ₹ 10,200. These goods were sold at the usual rate of gross profit of 25% on cost except goods which realised ₹ 1,200 on the basis of 20% profit on cost.
   (b) Purchases during the period were ₹ 8,000 of which ₹ 1,000 worth of goods were delivered on 9th April only.
   (c) Sales returns during the period were ₹ 1,200 of which 50% were out of the sales at 20% gross profit mentioned above.

(d) On 5th April, Sundaram received certain goods costing ₹ 5,000 to be sold by him on consignment basis.

You are required to prepare a statement showing clearly the value of the stock to be taken into account in Sundaram's final accounts for the year ended 31st March, 2015.

10. The financial year of Shri X ends on 31st March 2015 but the stock in hand was physically verified only on 7th April 2015. You are required to determine the Cost of Closing stock at cost at 31st March 2015 from the following information:
    (i) The stock (valued at cost) as verified on 7th April 2015 was ₹ 15,000.
    (ii) Sales have been entered in the Sales Day Book only after the dispatch of the goods and Sales Returns only on receipt of the goods.
    (iii) Purchases have been entered in the Purchases Day Book on receipt of the purchase invoice irrespective of the date of receipt of the goods.
    (iv) Sales as per the Sales Day Book for the period 1st April, 2015 to 7th April 2015 (before the actual verification) amounted to ₹ 6,000 of which goods of a sale value of ₹ 1,000 had not been delivered at the time of verification.
    (v) Purchases as per the Purchases Day Book for the period 1st April 2015 to 7th April 2015 (before the actual verification) amounted to ₹ 6,000 of which goods for purchases of ₹ 1,500 had not been received prior to 31st March 2015.
    (vi) In respect of goods costing ₹ 5,000 received prior to 31st March 2015, invoices had not been received up to the date of verification of stocks.
    (vii) The gross profit is 20% on sales.

11. Moon Ltd keeps no stocks records, but a physical inventory of Stock is made at the end of the quarter and the valuation is taken at Cost. The Company's year ends on 30.9.2014 and Draft Accounts have been prepared to that date. The Stock Inventory taken on 30.9.2014 was, however, mislaid and you have been advised to value the Closing Stock as on 30.9.2014 with the Stock figure as on 30.6.2014 and some other information as available to you are :
    (i) The Cost of Stock on 30.6.2014 as shown by the inventory was ₹ 80,000.
    (ii) On 30th June, Stock sheets showed the following discrepancies: (a) A page total of ₹ 5,000 had been carried to the summary as ₹ 6,000; and (b) The total of a page had been undercast by ₹ 200.
    (iii) Invoice of purchase entered in the Purchase Book during the months from July to September, 2014 totalled ₹ 70,000. Of this ₹ 3,000 related to goods received prior to 30th June, 2014. Invoices entered in October 2014 relating to goods received in September 2014 totalled ₹ 4,000.
    (iv) Sales invoiced to customers from July to September, 2014 totalled ₹ 90,000. Of this, ₹ 5,000 related to goods despatched on or before 30.6.2014. Goods despatched to customers before 30.9.2014 but invoiced on October 2014 totalled ₹ 4,000.
    (v) During the final quarter, Credit notes at invoiced value of ₹ 1,000 had been issued to customers in respect of goods returned during that period.
    (vi) The Gross margin earned by the Company is 25% of cost.

    You are required to prepare a statement showing the amount of stock at cost as on 30.9.2014.

Practical Questions

1. **(i) Yes, it should be written-down to ₹ 17,000; (ii) Stock will be reduced by ₹ 1,43,000 (₹ 93,000 + ₹ 50,000); (iii) ₹ 20,000 will be added to the value of stock; (iv) Stock lying in godown for 10 years should be valued at ₹ 2,000 (₹ 2,500 – ₹ 500).**
2. **FIFO—₹ 2,952; Weighted Average—₹ 2,877.**
3. **FIFO—₹ 200.**
4. **FIFO—₹ 12,020.**
5. **Cost of Closing stock—₹ 15,952.**
6. **FIFO—(a) ₹ 3,88,500; (b) ₹ 7,84,500; (c) ₹ 1,35,500.**
7. **FIFO—₹ 1,93,000.**
8. **Value of stock ₹ 1,91,050.**
9. **Value of stock ₹ 40,220.**
10. **Value of stock ₹ 9,500.**
11. **Value of stock (at cost) on 30.9.2014 — ₹ 79,800. Adjusted cost of sales — ₹ 70,400. Cost of adjusted purchases — ₹ 71,000.**

10

Depreciation Accounting

Introduction

Depreciation is an attempt to spread the cost of a long-lived asset, as an expense to the Profit and Loss Account, over its useful economic life.

Most fixed assets, such as building, plant, machinery, office equipments, and the like have a limited useful life. These assets are acquired not primarily for resale but in anticipation that these assets will benefit the business in the form of generating revenue over a number of future accounting periods. Although the expenditure is made early in the life of the assets, they provide for benefits throughout their useful life.

When a fixed asset is acquired, it is recorded in the accounts at its acquisition cost, i.e. the price paid to acquire it (whether purchased against cash or credit is irrelevant). This is because, as per cost convention, the acquisition cost of an asset is capitalised (capitalisation means that an expenditure on the acquisition of an asset is not charged immediately as a cost against revenue in the Profit and Loss Account, but is carried forward as a fixed asset in the Balance Sheet), which is regarded as a prepayment for the services to be enjoyed by the business concern over the estimated useful life of the asset. The acquisition cost should, therefore, be written off as an expense during its useful life, i.e. a portion of the cost should be charged against profit as an expense in each of the accounting periods in which the asset is gainfully used. This accounting process of gradually converting the unexpired costs of fixed assets into expenses over a series of accounting periods is called ***depreciation***. Though depreciation is a measure (however incorrect) of a reduction in the use value of an asset, it does not refer to physical deterioration or decrease in its market value. It is not concerned with measurement of the value of an asset at any point of time. The written down value of a fixed asset appearing in the Balance Sheet is not likely to agree with the amount that could be realised from its sale. In essence, ***depreciation is the process of allocating the cost of a fixed asset (less any residual value) over its estimated useful life in a rational and systematic manner***. Since depreciation is a method of spreading the cost of the asset over its working life, it may be charged even though the asset may be thought to have appreciated in value in money terms (e.g. land and buildings) as it may provide for obsolescence if it can be anticipated. Obsolescence is the process of becoming obsolete. It is the decline in value of a fixed asset through external causes such as technological change or change in demand. In accounting, its significance is that it is one of the factors leading to a reduction in the useful economic life of a fixed asset.

In this respect , the provision of AS—6 (Depreciation Accounting) is relevant and is given below.

Accounting Standard [AS–6 : Depreciation Accounting]

Objectives

Depreciation has a significant effect in the preparation of the financial statements of an enterprise. It will influence the profit / loss and value of assets of the enterprise. Different enterprises adopt different accounting policies for depreciation.

The main objective of this accounting standard is to prescribe the ***guidelines for charging depreciation*** for different assets.

Scope

This statement deals with depreciation accounting and applies to all depreciable assets, except the following items to which special considerations apply —

(i) forests, plantations and similar regenerative natural resources;
(ii) wasting assets including expenditure on the exploration for and extraction of minerals, oils, natural gas and similar non-regenerative resources;
(iii) expenditure on research and development;
(iv) goodwill;
(v) live stock.

This statement also does not apply to land unless it has a limited useful life for the enterprise.

Definitions

Depreciation
Depreciation is a measure of the wearing out, consumption or other loss of value of a depreciable asset arising from use, effluxion of time or obsolescence through technology and market changes. Depreciation is allocated so as to charge a fair proportion of the depreciable amount in each accounting period during the expected useful life of the asset. Depreciation includes amortisation of assets whose useful life is predetermined.

Depreciable Assets
Depreciable assets are assets which

(i) are expected to be used during more than one accounting period; and
(ii) have a limited useful life; and
(iii) are held by an enterprise for use in the production or supply of goods and services, for rental to others, or for administrative purposes and not for the purpose of sale in the ordinary course of business.

Useful Life
Useful life is either :

(i) the period over which a depreciable asset is expected to be used by the enterprise; or
(ii) the number of production or similar units expected to be obtained from the use of the asset by the enterprise.

Depreciable Amount
Depreciable amount of a depreciable asset is its historical cost, or other amount substituted for historical cost in the financial statements, less the estimated residual value.

Factors in the Measurement of Depreciation

The amount of depreciation to be charged for a particular fixed asset will depend upon the following three factors :

(i) Cost of the asset
(ii) Useful life of the asset
(iii) Residual value of the asset

Cost of the Asset

The cost of an asset is the basis for calculation of depreciation. For the purpose of determination of cost of an asset, the following points are important as stated in AS—10 "Accounting for Fixed Assets" :

(a) Where an asset is purchased from a supplier: The cost of a fixed asset should comprise its purchase price and any attributable cost of bringing the asset to its working condition for its intended use.

Examples of directly attributable costs are :

(i) site preparation;
(ii) initial delivery and handling costs;
(iii) installation cost, such as special foundations for plant; and
(iv) professional fees, for example, fees of architects and engineers.

(b) Where an asset is self-constructed : The cost of a self-constructed fixed asset should comprise those costs that relate directly to the specific asset and those that are attributable to the construction activity in general and can be allocated to the specific asset.

(c) Where a fixed asset is acquired either in exchange or in part exchange for another asset: The asset acquired should be recorded either :

(i) at its fair value; or
(ii) the net book value of the asset given up, adjusted for any balancing payment or receipt of cash or other consideration.

Useful Life of the Asset

The useful life of an asset is its ***service life*** which can be defined as the number of accounting periods during which it will be useful to the business. The physical life of an asset may be considered longer than its economic life. When the operating cost of an asset is considered to be more than the revenue which it generates, it has exceeded its economic life and should not be kept in use. Since there is no way to measure correctly how long an asset will be useful, the asset's useful economic life is always estimated.

The useful life of a depreciable asset should be estimated after considering the following factors:

(i) expected physical wear and tear;
(ii) obsolescence;
(iii) legal or other limits on the use of the asset, e.g., safety limitation or the expiry dates of assets taken on lease.

Estimation of useful life of the asset is very difficult. It is a matter of judgment and depending on the experience of the enterprise with similar assets. Depreciation will vary directly with the useful life of the asset. If the estimated life is too long, each year's depreciation charge will be less and profits in the periods before disposal will be inflated.

Residual Value of the Asset

Residual value of asset is the estimated value of a fixed asset at the end of its economic life. It is the amount which is expected to be received when the asset is sold after being removed from service. The purpose of estimating residual value is to ascertain the ***depreciable amount*** (acquisition cost – residual value), which is allocated to different accounting periods during which the asset is gainfully employed. Depreciable amount is calculated as under:

Acquisition cost (say)	₹ 11,00,000
Less : Residual Value (say)	₹ 1,00,000
Depreciable Amount	₹ 10,00,000

Example : It is the policy of Sita Travel (P) Ltd. to keep their tourist bus in service for 5 years only. The company has purchased one new tourist bus for ₹ 25,00,000. A similar bus purchased 5 years back can be sold at present for ₹ 5,00,000 (Net). Here ₹ 5,00,000 is a reasonable estimate for the residual value of the new bus.

The depreciable amount will be ₹ 20,00,000 (₹ 25,00,000 – 5,00,000).

Annual depreciation = ₹ 20,00,000 / 5 = ₹ 4,00,000.

Unless the residual value of the asset is guaranteed (e.g., buyback by the manufacturer at a guaranteed amount), the residual value will only be ***estimate*** because of future uncertainties.

In some cases, residual value is insignificant and it is taken as zero for calculating the amount of depreciation. The higher the residual value, the lower will be the depreciation charge. In effect, the profits of the previous periods will be inflated and there may be a loss on disposal of the asset.

Reasons for Charging depreciation

1. If depreciation is not charged for, periodic expenses will be understated. In effect, profits for that period will be overstated.
2. To present a true and fair view of the state of affairs of business, the assets must be valued correctly on the Balance Sheet. Unless depreciation is charged, the value of the assets will be overstated in the Balance Sheet. As a result, the fixed assets would stand in the books at an amount which is in excess of their true value to the business. In effect, net worth will be overstated.
3. If depreciation is not charged, the cost of production will be understated. In effect, pricing of the product will be inappropriate.
4. A fixed asset is to be sold at the end of its useful life or may be even before. If no depreciation is provided, the written-down value of the asset on the date of sale cannot be ascertained. In effect, the profit or loss on the sale of that asset cannot be determined.
5. A fixed asset is to be replaced by a new one after the end of its useful life. If depreciation is not charged, the profit available for distribution will be overstated. It may be possible that the whole of the profits may be withdrawn during the life of that asset. In effect, the business may not have sufficient funds to replace the asset.
6. Capital is invested for purchasing fixed assets. If depreciation is not charged, expired cost of capital invested in fixed assets will not be recovered. In effect, the business will not be able to maintain its capital.
7. Certain types of business organisations, e.g., joint stock companies are under obligation to charge depreciation on fixed assets according to the provisions of the law.

Methods of Calculating Depreciation

There are several methods of allocating depreciation over the useful life of the assets. Those most commonly employed in industrial and commercial enterprises are the straightline method and the reducing balance method. The management of a business selects the most appropriate method(s) based on various important factors e.g., (i) type of asset, (ii) the nature of the use of such asset and (iii) circumstances prevailing in the business. A combination of more than one method is sometimes used. In respect of depreciable assets which do not have material value, depreciation is often allocated fully in the accounting period in which they are acquired [***Para 12 of AS—6***]. No particular method is specified by AS—6. However, it has been stated in para 20 that ***the depreciable amount of a depreciable asset should be allocated on a systematic basis to each accounting period during the useful life of the asset.***

1. Straight Line / Equal Instalment Method

This is the most popular method because of its simplicity and consistency. It requires allocation of an equal amount to each period. A fixed amount of the original cost is charged as depreciation every year. Thus, the asset is written down in value each year by the same amount. This amount is such that the book value of the asset may be reduced to zero or its residual value, as the case may be, at the end of its life. Since this method assumes that the cost of the asset expires at a steady (straight line) function of time, the acquisition cost less salvage value is divided by the estimated economic life. *The rate of depreciation is the reciprocal of the estimated useful life.* If the useful life of an asset is 10 years, the depreciation rate will be 1/10 or 10%. This may be put in the shape of a formula as under :

$$\textit{Annual Depreciation} = \frac{\textit{Cost of the Asset} - \textit{Residual Value}}{\textit{Estimated Economic Life}}$$

Example

If a machine costs ₹ 1,20,000 on 1.1.2015, has a salvage value at ₹ 20,000 and a life of 10 years, assuming the accounting year ends on 31st December, the depreciaion per annum will be :

$$Depreciation = \frac{1,20,000 - 20,000}{10} = ₹\ 10,000$$

The profit will not be reduced by ₹, 1,20,000 in 2015 but by ₹ 10,000 in each of the years 2015 – 2019.

This method is appropriate for those assets where the use of time is an important factor, e.g. benefits to be derived from the use of the asset within a fixed time period. Examples are: lease, patents, copyrights, etc. This method is often used for other assets, when the following two conditions are satisfied : (1) the asset renders uniform service throughout its service life; and , (2) it does not involve repair or maintenance cost (or it is equal throughout its service life).

Advantages

1. It is simple to calculate and easy to understand.
2. It can reduce the book value of the asset to zero.
3. The valuation of the asset each year in the Balance Sheet is reasonably fair.

Disadvantages

1. This method ignores the fact that the service yielding ability of the assets fall while the repairs and maintenance costs increase with the passage of time. Though each year's charge for depreciation is the same, the charge for repairs and renewals goes on increasing as the asset becomes older. Therefore, the charge to the Profit and Loss Account increases over the years.
2. If an additional asset is acquired, the amount to be charged as depreciation needs to be recalculated.

Methods of Recording Depreciation

The Ledger Account entries for depreciation are quite straightforward. There are two ways or methods of recording depreciation in the books:

The First Method — ***When no provision for Depreciation Account is maintained***

Under this method, depreciation is directly charged to an Asset Account by debiting Depreciation Account and crediting the Asset Account. At the end of the accounting period, Depreciation Account is closed by transferring it to the Profit and Loss Account. In the Balance Sheet, the asset appears at its written down value (cost less depreciation provided to-date). Here, actual cost of an asset and the total amount of depreciation that has been provided (to-date) cannot be ascertained from the Balance Sheet.

Journal Entries

1. Depreciation Account	Dr.
To Asset Account	
2. Profit and Loss Account	Dr.
To Depreciation Account	

The Second Method — ***When Provision for Depreciation Account is maintained***

Under this method (in contrast to the above), depreciation is not directly charged to the Asset Account.

The depreciation for the period is debited to Depreciation Account and credited to '***Accumulated Depreciation Account***' or ***Provision for Depreciation Account.*** As in the previous method, Depreciation Account is closed by transferring it to the Profit and Loss Account. In the Balance Sheet, asset appears at its original cost and the accumulated depreciation is shown as a deduction from the Asset Account. Here, from the Balance Sheet, the original cost of the asset and the total depreciation to-date that has been charged on that asset can be easily ascertained. As the year passes, the balance of the accumulated depreciation goes on increasing since constant credit is given to this account in each accounting year. After the expiry of the useful life, these two accounts are closed by debiting Accumulated Depreciation Account and crediting Asset Account—any balance in Asset Account is transferred to the Profit and Loss Account.

2. Profit and Loss Account Dr.
   To Depreciation Account

Illustration 1

B. Brown purchased a machine by cheque for ₹ 90,000 on 1st January, 2013. Its probable working life was estimated at 10 years and its probable scrap value at the end of that time at ₹10,000. It was decided to write off depreciation by equal annual instalments. You are required to pass necessary Journal entries for first two years and show necessary accounts and the Balance Sheet:

(a) When no Provision for Depreciation Account is maintained;
(b) When Provision for Depreciation Account is maintained.
[It was decided to close books each year on December 31.]

Solution

$$\textit{Annual Depreciation} = \frac{90,000 - 10,000}{10} = ₹\ 8,000$$

(a) When no Provision for Depreciation Account is maintained.

2. Diminishing Balance Method

Where the straight line method assumes that the net cost of an asset should be allocated to successive periods in uniform amounts, the diminishing balance method assumes that the rate of allocation should be constant through time. Under this method, instead of a fixed amount, a fixed rate on the reduced balance of the asset is charged as depreciation every year. Since a constant percentage rate is being applied to the written down value, the amount of depreciation charged every year decreases over the life of the asset. Though the percentage at which depreciation is charged remains fixed, the amount of depreciation goes on diminishing year after year. This method assumes that an asset should be depreciated more in the earlier years of use than later years because the maximum loss of an asset occurs in the early years of use. The fixed percentage rate, to be applied to the allocation of net costs as depreciation, can be obtained by the following formula :

$r = 1 - \sqrt[n]{\frac{s}{c}}$ (This formula cannot be applied if the asset has no or insignificant scrap value.)

where
n = the expected useful life in years;
s = the scrap value;
c = the acquisition cost;
r = the rate of depreciation to be applied.

Proof
depreciation at the end of the 1st year = rc;
written down value at the end of the 1st year = c – rc = c(1—r)
written down value at the end of the 2nd year = $c(1-r)^2$
similarly, written down value at the end of the nth year = $c(1-r)^n$
therefore, $c(1-r)^n = s$ or $r = 1 - \sqrt[n]{\frac{s}{c}}$

Example :
If the cost of a machine is ₹ 10,000 and scrap value after 4 years is ₹ 2,000, the rate of depreciation is calculated as under :

$$r = 1 - \sqrt[4]{\frac{2,000}{10,000}} = 33.33\%$$

The amount of depreciation to be charged is computed as follows :

1. The rate of depreciation to be charged (r) is calculated by applying the above formula.
2. The first year's depreciation is calculated by multiplying the rate by the acquisition cost of the asset.
3. For the second and subsequent years, the depreciation is computed by multiplying its rate by the written down value (cost *less* accumulated depreciation) of the asset at the beginning of the year.
4. No further depreciation is charged when the written down value declines to its estimated salvage value. There may be some small difference between the estimated and resulting residual values. This arises because the depreciation rate is generally calculated to the nearest to two decimal places.

Taking the above example, the calculation of depreciaton for each of the four years would be as follows:

Year	Computation	Annual Depreciation	Accumulated Depreciation	Written Down Value
1	₹ 10,000 x 33.33%	3,333	3,333	6,667
2	₹ 6,667 x 33.33%	2,222	5,555	4,445
3	₹ 4,445 x 33.33%	1,482*	7,037	2,963
4	₹ 2,963 x 33.33%	963**	8,000	2,000

* Rounded to the nearest rupee.
** In the last year, the depreciation is adjusted to the amount (₹ 24) to bring the carrying value of the asset to its estimated scrap value.

Advantages

1. As the decreasing charge for depreciation cancels out the increasing charges for repairs over the years, it gives a fair charge for depreciation.
2. No recalculation is necessary when additional assets are purchased.
3. This method is applicable for income tax purposes.
4. The impact of obsolescence can be reduced if a significant part of the cost is written off in early life.

Disadvantages

1. This method lacks simplicity—the ascertainment of the percentage to be applied.
2. This method cannot be applied for assets with a very short life.
3. The asset is never fully depreciated.
4. The cost should be spread over evenly throughout the economic life of an asset or should be spread according to use. This method follows neither principle.

Distinction Between Straight Line and Diminishing Balance Methods

Sl. No.	Straight Line	Sl. No.	Diminishing Balance
1.	A fixed amount of depreciation is charged.	1.	A fixed rate of depreciation is charged.
2.	The rate of depreciation is the reciprocal of the life of the asset.	2.	The rate of depreciation is ascertained by applying a formula.
3.	The asset may or may not have scrap value.	3.	The asset must have a significant scrap value.
4.	The amount of depreciation per year is the same.	4.	The amount of depreciation goes on reducing.
5.	In the first year, the depreciation is charged on the cost of the asset, less scrap value, if any.	5.	In the first year, the depreciation is charged on the cost of the asset.
6.	At the end of its life, the book value of the asset becomes zero.	6.	The book value of the asset never reduces to zero.

Illustration 2

Thompson Bros. purchased machinery by cheque for ₹ 1,00,000 on 1st January, 2013. The estimated scrap value of the machinery is ₹ 20,000. At the end of each year, depreciation is provided at the rate of 10% per annum by the diminishing balance method. Show Machinery Account and Balance Sheet for the first two financial years which is ending on December, 31st every year :

(a) When no Provision for Depreciation Account is maintained; and

(b) When Provision for Depreciation Account is maintained.

Solution

1. Depreciation for 2013 = 1,00,000 x 10% = ₹ 10,000; 2. Depreciation for 2014 = (1,00,000 – 10,000) x 10% = ₹ 9,000.

(a) When no provision for Depreciation Account is maintained

Charges for Depreciation and Materiality Concept

It is not fair to assume that a fixed asset is always purchased on the very first day of the accounting period. Assets are generally purchased in the course of the accounting period. When an asset is purchased in any month of the accounting period, it is not necessary to compute the amount of depreciation to be charged to the nearest day or week. As we know, the charge for depreciation is a mere estimate and the application of the concept of materiality does not allow a misleading impression of great precision. Therefore, depreciation is calculated to the nearest whole month. If an asset is acquired on 17th March and the concern follows the calender year as its accounting year, depreciation should be calculated for 9 months only (from 1st April – 31st December). If the asset is acquired on 4th March, depreciation should be calculated for 10 months only.

Another popular approach is to charge depreciation for 6 months only in the year of acquisition, ignoring the actual date of acquisition. This is known as ***'half-year convention'*** and is based on the mean of the opening and closing values of the asset. This method assumes that the actual purchase dates of several fixed assets generally 'average-out' to approximately mid-year. Therefore, any time during the accounting period, when an asset is accquired, half-year's depreciation is provided for the year of acquisition. It should be noted that the same rule is applied in the year when an asset is sold.

In examination, if no date of acquisition is given, the 'half-year convention' should be followed.

Profit and Loss on Disposal of Fixed Assets

Owing to technological developments, a depreciated asset becomes obsolete and it may be sold out before its useful life. The business enterprise may also sell an asset which it no longer requires. It is quite common that the sale value of such asset may not be equal to its written down value (net book value). If the asset is sold at a price which is more than its written down value, it produces a profit.

On the contrary, when the asset is sold at a price which is less than its written down value, it is a case of loss on sale of an asset. It has already been stated that depreciation is a mere estimate. Its accuracy depends on the correctness of the forecasting regarding the useful life of the asset and its scrap value. It is only on sale of an asset that the real position can be determined.

In this connection, para 26 of AS—10 is relevant. It states that ***losses arising from the retirement or gains or losses arising from disposal of fixed asset which is carried at cost should be recognised in the profit and loss statement***.

Journal Entries

The Journal entries for disposal or sale of asset will depend upon the method of recording depreciation.

1. When no provision for Depreciation Account is maintained

When the asset appears in the Balance Sheet at its written down value, on disposal, the written down value of such assets (at the beginning of the year of disposal) is transferred to 'Assets Disposal Account' and profit and loss on sale of assets are ascertained with the help of that account. The detailed entries are given below:

(a) For transferring to Assets Disposal Account

Assets Disposal Account Dr. (W.D.V. of the asset

Illustration 3

Mr. Vaid of Calcutta purchased the required machine on 1.4.2012 for ₹ 65,000. He engaged Kabul to erect the units, who charged ₹ 5,000 and agreed to wait a month for his payment.

The machinery was depreciated at 10% p.a. on the Fixed Instalment Method — and accounting year being April-March.

On 1.10.2014, a single unit which cost ₹ 10,000 originally was sold for a cash price of ₹ 7,000. On the same date, a new machine costing ₹ 10,000 (paid for by cheque) was installed.

Write out the Machinery Account for the years 2012-13, 2013-14, 2014-15 and Machinery Disposal Account.

Solution

Profit and Loss Account Dr.
To Asset Account

For calculating profit or loss on sale, the following points should be remembered :

1. If the sale proceeds is greater than the written down value on the date of disposal, the surplus represents profit.
2. If the sale proceeds is less than the written down value on the date of disposal, the deficit represents loss.

Illustration 5

Bajaj and Co. close their accounts on 31st March every year. They purchased the machineries as follows :

(i) Purchased the machineries costing ₹ 1,20,000 on 1.7.2012.
(ii) On 1.1.2013, some machineries were purchased costing ₹ 1,20,000.
(iii) On 1.10.2013, again purchased some machinery costing ₹ 20,000.
(iv) On 1.1.2014 purchased a new machinery for ₹ 60,000.
(v) One machinery costing ₹ 40,000 which was purchased on 1.7.2007, was sold for ₹ 12,000 on 1.4.2014.
(vi) They charged depreciation @ 33.33% on the written down value method.
(vii) They have the practice to charge depreciation for the full year even if the machinery is used for a part of the year.

Prepare Machinery Account in the books of Bajaj & Co. for the three years—2012-13, 2013-14, 2014-15.

Solution

In the books of Bajaj and Co.

X Company Ltd provides depreciation on Plant and Machinery at 20% p.a. on reducing balances. On 1st April, 2014, the balance of the Plant and Machinery Account was ₹ 10,00,000. It was discovered in 2014-15 that :

(i) ₹ 50,000 being repairs to machiney incurred on 30th June, 2012 had been capitalised.

(ii) ₹ 1,00,000 being the cost of a generator purchased on 1st October, 2011 has been written off to Maintenance Account.

The company directors want to rectify the mistakes while finalising the accounts for the year ended 31st March, 2015.

A plant that cost ₹ 80,000 on 30th September, 2014 was scrapped and replaced with a more sophisticated one on 31st December, 2014 by spending ₹ 1,20,000. Scrap realised ₹ 20,000.

Prepare the Plant and Machinery Account as it would appear on 31st March, 2015 after providing depreciation for the year.

Illustration 10

At the beginning of the financial year on 1st April, 2014, X Co. Ltd. had a balance on Plant Account of ₹ 18,60,000 and on Provision for Depreciation on Plant Account of ₹ 10,27,000.

On 1st September, 2014 the company sold for ₹ 68,500 some plant which it had acquired on 31st October, 2013 at a cost of ₹ 1,80,000. Additionally, installation costs totalled ₹ 20,000. During 2015 major repairs costing ₹ 31,500 had been carried out on this plant and, in order to increase the capacity of the plant, a new motor had been fitted in December 2015 at a cost of ₹ 22,000. A further overhauling cost of ₹ 13,500 had been carried out during 2013.

The company acquired new replacement plant on 30th November, 2014 at a cost of ₹ 4,80,000, inclusive of installation charges of ₹ 35,000. The company's policy is to provide depreciation using the reducing balance method applied to fixed assets held at the end of the financial year at the rate of 20% p.a.

You are required to show : (i) the balance of plant at cost at 31st March, 2015; (ii) the provision for depreciation of plant at 31st March, 2015; and, (iii) Plant Disposal Account.

Solution

		12,70,400			12,70,400

Dr. Plant Disposal Account Cr.

Date	Particulars	₹	Date	Particulars	₹
2014 Sept.1	To Plant A/c (Note 1)	2,22,000	2014 Sept.1	By Provision for Depreciation of Plant A/c	1,26,000
			"	By Bank A/c	68,500
			"	By Loss on Disposal A/c	27,500
		2,22,000			2,22,000

Working Notes :

(1) Original Cost of Plant Sold	₹	**(2) Depreciation on Disposal**	₹	₹
Cost	1,80,000	Cost as on 31.10.2010	1,80,000	
Installation	20,000	Installation on 31.10.2010	20,000	
Upgrade	22,000		2,00,000	
	2,22,000	Less: Depreciation for 2010-01 @ 20%	40,000	40,000
(3) Depreciation for 2014-15	₹		1,60,000	
Original cost of total plant	23,40,000	Less: Depreciation for 2011-2012 @ 20%	32,000	32,000
Less: Original cost plant sold	2,22,000		1,28,000	
Original cost of asset in use	21,18,000	Add: Increase in Capacity (December)	22,000	

Less: Accumulated Depreciation of plant in use			1,50,000	
(₹ 10,27,000 – 1,26,000)	9,01,000	Less: Depreciation for 2012-13 @ 20%	30,000	30,000
W.D.V. of plant in use on 31.3.2015	12,17,000		1,20,000	
Depreciation @ 20%	2,43,400	Less: Depreciation for 2013-14 @ 20%	24,000	24,000
			96,000	1,26,000

Tutorial Note : Major repairs costing ₹ 31,500 in 2012 do not form a part of the cost of this plant and, therefore, it should be charged to the Profit and Loss Account of that period. The overhauling cost in 2013 is also a revenue expense. However, new motor fitted in 2012 will be treated as capital expenditure as it will increase the capacity of the plant.

Change in the Method of Depreciation

In connection with this, AS—6 para 21 states that the depreciation method selected should be applied consistently from period to period. A change from one method of providing depreciation to another should be made only if the adoption of the new method is required by statute or for compliance with an accounting standard or if it is considered that the change would result in a more appropriate preparation or presentation of the financial statements of the enterprise. When such a change in the method of depreciation is made, depreciation should be ***recalculated in accordance with the new method from the date of the asset coming into use***. The deficiency or surplus arising from ***retrospective recomputation*** of depreciation in accordance with the new method should be adjusted in the accounts in the year in which the method of depreciation is changed. In case the change in the method results in deficiency in depreciation in respect of past years, the deficiency should be charged in the statement of profit and loss. In case the change in the method results in surplus, the surplus should be credited to the statement of profit and loss. Such a change should be treated as a change in accounting policy and its effect should be quantified and disclosed.

The following points are important :

1. ***The change in the method of depreciation must be with retrospective effect.***
2. ***The deficiency or surplus arising from retrospective recomputation of depreciation in accordance with the new method should be adjusted in the accounts in the year in which the method of depreciation is changed.***
3. ***The deficiency or surplus of depreciation in respect of past years, should be debited or credited to the Profit and Loss Account of the year of change in the method of depreciation.***

Change in the method of Depreciation with Restrospective Effect

In this case depreciation already recorded in prior years will be adjusted. The W.D.V. on the date of change is to be adjusted for under-depreciation or over-depreciation. The following steps should be taken for such adjustment:

Step 1 Calculate total depreciation from the date of retrospective effect to the date of change by adopting the ***new method*** of depreciation.

Step 2 Ascertain total depreciation under the existing method upto the date of change.

Step 3 Pass the following entry:

(a) if total depreciation of Step 1 is greater than that of Step 2

Profit and Loss Account Dr. [Difference]
To Asset Account

(b) If the total depreciation of step 1 is less than that of step 2

Asset Account Dr. [Difference]
To Profit and Loss Acount

Step 4 Charge depreciation from the date of change by adopting the new method.

Illustration 11

X Co. Ltd. charged depreciation on its assets on SLM basis. For the year ended 31.3.2015, it changed to WDV basis. The impact of the change when computed from the date of the asset coming to use amounts to ₹ 20 lakhs being additional charge. Decide how it must be disclosed in Profit and Loss Account. Also discuss, when such change in method of depreciation can be adopted by an enterprise as per AS—6.

Solution

Para 21 of AS—6 states that in case the change in the method results in deficiency in depreciation in respect of past years, the deficiency should be charged to the statement of Profit and Loss.

Here, ₹ 20 lakhs should be charged to the Profit and Loss Account for the year ended on 31st March, 2015.

An enterprise may change the method of depreciation only under the following conditions :

(a) the change is required by a statute or an Accounting Standard;

(b) the change would produce a more appropriate presentation.

Illustration 12

Ram Co. (P) Ltd. furnishes you the following information for the year ended 31.3.2015 :

		(₹ in lakhs)
(i)	Depreciation for the year ended 31.3.2015 (under SLM)	100
(ii)	Depreciation for the year ended 31.3.2015 (under WDV)	200
(iii)	Excess of depreciation for the earlier years calculated under WDV over SLM	500

The company wants to change its method of claiming depreciation from straight line method to written down value method.

Decide how the depreciation should be disclosed in the financial statement for the year ended 31.3.2015.

Solution

Para 21 of AS—6 states that

"When such a change in the method of depreciation is made, depreciation should be recalculated in accordance with the new method from the date of the asset coming into use. The deficiency or surplus arising from retrospective recomputation of depreciation in accordance with the new method should be adjusted in the accounts in the year in which the method of depreciation is changed. In case the change in the method results in deficiency in depreciation in respect of past years, the deficiency should be charged in the statement of profit and loss. In case the change in the method results in surplus, the surplus should be credited to the statement of profit and loss. Such a change should be treated as a change in accounting policy and its effect should be quantified and disclosed."

In this case, the deficiency of ₹ 500 lakhs would be charged to the Profit and Loss Account for the year ending on 31st March, 2015. In the notes to account the reasons for change in the method of depreciation is to be elaborated. The effect of ₹ 500 lakhs is also to be disclosed. Current year's depreciation of ₹ 200 lakhs is to be charged to Profit and Loss Account for the year ended 31st March, 2015.

Illustration 13

A plant was depreciated under two different methods as under :

Year	SLM (₹ in Lakhs)	WDV (₹ in Lakhs)
1	7.80	21.38
2	7.80	15.80
3	7.80	11.68
4	7.80	8.64
	31.20	57.50
5	7.80	6.38

What should be the amount of resultant surplus / deficiency, if the company decides to switch over from W.D.V. method to S.L.M. method for first four years ? Also state, how will you treat the same in accounts.

Solution

Here, in this case, there is a surplus of ₹ 26.30 lakhs (57.50 – 31.20) on account of change in the method of depreciation.

As per para 21 of AS—6, when a change in the method of depreciation is made, depreciation should be recalculated in accordance with the new method from the date of the asset coming into use. The surplus arising from retrospective recomputation of depreciation in accordance with the new method should be credited to the statement of profit and loss. Such a change should be treated as a change in accounting policy and its effect should be quantified and disclosed.

Therefore, the surplus of ₹ 26.30 lakhs will be ***credited*** to Profit and Loss Account.

Illustration 14

A company purchased machinery for ₹ 20,000 on 1st January, 2011 and followed the diminishing balance method of depreciating the value @ 15%. At the end of 2012, it was decided to follow the fixed instalment system of depreciating the machine at ₹ 3,000 per year from the very beginning and the necessary amount of unabsorbed depreciation of 2011 to 2013 to be adjusted in 2014. Show the Machinery Account for the period 2011 to 2014.

Messrs Mill and Wright commenced business on 1st January, 2011, when they purchased plant and equipment for ₹ 7,00,000. They adopted a policy: (i) Charging depreciation at 15% per annum on diminishing balance basis; and (ii) charging full years depreciation on additions. Over the years, their purchases of plant have been ₹

1.8.2012 1,50,000

30.9.2015 2,00,000

On 1.1.2015 it was decided to change the method and rate of depreciation to 10% on straight line basis with retrospective effect from 1.1.2011, the adjustment being made in the accounts for the year ending 31st December, 2015. Calculate the difference in depreciation to be adjusted in the Plant and Equipment. Account on 1.1.2015 and show the Ledger Account for the year 2015.

Solution **Calculation of Depreciation under Straight Line Basis**

Date of Acquisition	1.1.2011	1.8.2012	Total
No. of years for which depreciation is to be charged	4	3	
Annual Depreciation @ 10% on original cost	70,000	15,000	
Total Depreciation	2,80,000	45,000	3,25,000

Calculation of Depreciation under Diminishing Balance Basis

Date of Acquisition	1.1.2011	1.8.2012	Total
Cost	7,00,000		
Less: Depreciation for 2011	1,05,000		1,05,000
Balance on 1.1.2012 (W.D.V.)	5,95,000		
Cost		1,50,000	
Less: Depreciation for 2012	89,250	22,500	1,11,750
Balance on 1.1.2013 (W.D.V.)	5,05,750	1,27,500	
Less: Depreciation for 2013	75,863	19,125	94,988
Balance on 1.1.2014 (W.D.V.)	4,29,887	1,08,375	
Less: Depreciation for 2014	64,483	16,256	80,739
Balance on 1.1.2015	3,65,404	92,119	3,92,477

Depreciation overcharged = ₹ 67,477 (3,25,000 – 3,92,477)

Total Depreciation from 1.1.2014 to 1.1.2015 under new method ₹ 3,25,000

Total Depreciation from 1.1.2014 to 1.1.2015 under old method ₹ 3,92,477

			Dec. 31	By Profit & Loss A/c (loss)	1,656
		6,480			6,480

Working Notes:

(1) Calculation of Loss on Sale	₹	(2) Extra Depreciation to be charged	₹
Original Cost on 1.1.2012	8,000	Total Depreciation charged under Reducing Balance Method	
Less: Depreciation of 2012 @ 10%	800	2012 — 10% of ₹ 1,12,000 (Note 3)	11,200
Balance on 1.1.2013 (W.D.V.)	7,200	2013 — 10% of ₹ (1,12,000 – 11,200)	10,080
Less: Depreciation of 2013 @ 10%	720		21,280
Balance on 1.1.2014 (W.D.V.)	6,480	Depreciation for 2012 and 2013 under Straight Line Method will	
Less: Depreciation for 6 months	324	be 10% of ₹ 1,12,000 for two years = ₹ 22,400.	
	6,156	Therefore, extra depreciation is to be charged =	
Less: Sale value	4,500	₹ 22,400 – ₹ 21,280 = ₹ **1,120**	
Loss	1,656		

(3) Original cost of Machinery still in use

Balance on 1.1.2014 (W.D.V.)	97,200	Original cost of machine still in use will be:
Less: W.D.V. of Machine sold	6,480	₹ 100 / 81 x ₹ 90,720 = ₹ 1,12,000
W.D.V. of Machine in use (after depreciation for 1994 & 1995)	90,720	

(4) Depreciation for 2014 = ₹ 11,200 + ₹ 790 (6 months) = ₹ 11,990.

Illustration 17

On 1.1.2012, a new plant was purchased by Mrs Kalyani Basu for ₹ 1,00,000 and a further sum of ₹ 5,000 was spent on its installation. On 1.6.2013, another plant was acquired for ₹ 65,000.

On 2.10.2014, the first plant was totally destroyed and the amount of ₹ 2,500 only was realised by selling the scrap. It was not insured. On 20.10.2014, a second hand plant was purchased for ₹ 75,000 and a further sum of ₹ 7,500 was spent on repairs and ₹ 2,500 on its erection. It came into use on 15.11.2014. Depreciation has been provided at 10% on the original cost annually on 31st December. It was the practice to provide depreciation for full year on all acquisitions made at any time during any year and to ignore depreciation on any item sold during the year. The accounts are closed annually on 31st December. In December 2014, it was decided to change the method of depreciation and to follow the rate of 15% on diminishing balance method with retrospective effect in respect of the existing items of plant and to make necessary adjustments on 31.12.2014. Show Plant Account, Plant Disposal Account and Provision for Depreciation Account for 3 years.

Tutorial Note. Plant purchased on June 1, 2013 is in use at present. Therefore, effect of change in the method of depreciation is to be calculated for that plant of ₹ 65,000 only for the year 2013.

3. Sinking Fund Method or Depreciation Fund Method

A Sinking Fund is a fund created by the regular investment of a fixed amount to accumulate the amount of money required to replace an asset at a set date in the future. This method is based on concept of present values.

The previous two methods made no attempt to generate fund for replacement of asset at the end of its useful life. The sinking fund method not only takes depreciation into account but also makes provision for replacement of the asset. Under this method, a fund is created by debiting Depreciation Account and crediting Sinking Fund Account.

Depreciation Account is ultimately transferred to Profit and Loss Account. An amount equivalent to depreciation charged is invested outside the business in gilt-edged or other securities and are allowed to accumulate at compound interest so as to produce the required amount to replace the asset after a specified period of time. The main advantage of this method is that it avoids strain on working capital, if substantial sums are withdrawn from the business to replace the asset at the end of its life. However, during inflation, the depreciable cost of an asset is likely to be less than the replacement cost of the asset.

The asset is shown in the Balance Sheet, every year, at its original value. Sinking fund is shown on the liabilities side and sinking fund investment is shown on the assets side of the Balance Sheet.

At the end of the useful life of the asset, all investments are sold away. The proceeds are utilised for purchasing the new asset. The Asset Account is closed by setting it off against the Sinking Fund Account. It should be noted that profit or loss on sale of investment is also transferred to the Sinking Fund Account.

The equal amount of cash to be invested each year is ascertained from the sinking fund table.

Illustration 18

On 1st July, 2011, Wise Ltd purchased a machine for ₹ 1,10,000 and spent ₹ 6,000 on its installation. The expected life of the machine is 4 years at the end of which the estimated scrap value will be ₹ 16,000. Desiring to replace the machine on the expiry of its life, the company establishes a sinking fund. Investments are expected to realize 5% interest. On 30th June, 2015, the machine was sold off as scrap for ₹ 18,000 and the investments were realized at 5% less than the book value. On 1st July, 2015, a new machine is installed at a cost of ₹ 1,25,000. Sinking Fund tables show that ₹ 0.2320 invested each year will produce ₹ 1 at the end of 4 years at 5%.

Show the necessary Ledger Accounts in the books of Wise Ltd for all the years.

Solution

Amount required = ₹ 1,10,000 + 6,000 – 16,000 = ₹ 1,00,000; Therefore, Annual Contribution = ₹ 1,00,000 x 0.232 = ₹ 23,200.

Illustration 19

On 1 January, 2012 a company purchased a machine at a cost of ₹ 80,000. In order to provide sufficient fund for replacement of the machine at the end of its working life it decided to create a Sinking fund and to invest the amount in Government Securities bearing interest @ 5% per annum. The working life of the machine was 4 years and estimated scrap value was ₹ 16,000.

The machine became obsolete and was sold at ₹ 30,000 on 31 December, 2014. The Government Securities were sold at a profit of ₹ 3,000. A new machine was purchased on 1 January, 2012 at ₹ 1,20,000. Sinking Fund Table shows that ₹ 0.2320 invested each year will produce ₹ 1 at tne end of 4 years at 5% annual interest.

Prepare Machinery Account, Sinking Fund Account and Sinking Fund Investment Account.

Solution

Amount required = ₹ 80,000 – ₹ 16,000 = ₹ 64.000.

Annual contribution = ₹ 64,000 × 0.232 = ₹ 14,848.

		33,438			33,438

4. Insurance Policy Method

This is similar to the sinking fund method but, instead of investing the money in securities, the amount is used in paying premium on a policy taken out with an insurance company. The policy should mature immediately after the expiry of the useful life of the asset. The money that is received from the insurance company is used to replace the asset. Though the interest received is lower than could be obtained by investing in securities, the risk of loss on realisation of securities is avoided. To be more conservative, some accountants are of the opinion that the policy account should be adjusted, at the year end, at its surrender value so as to maintain the policy in the Balance Sheet at its net realisable value. Others argue that there is no need to write down the policy to its surrender value, because the policy is for a fixed sum and there is no intention of surrendering it.

Illustration 20

A company purchased a machinery for ₹ 50,000 on 1.1.2011 and incurred ₹ 10,000 towards freight, insurance, carriage inwards and installation charges. It was estimated that the machinery will have a scrap value of ₹ 5,000 at the end of its useful life of 4 years.

It was decided to take out an insurance policy to provide necessary funds for the replacement of asset at the end of its useful life. The annual insurance premium for the policy on 1st April every year was ₹ 13,000. The scrap value at the end of the 4th year realised ₹ 5,200.

Prepare Depreciation Reserve Fund Account, Depreciation Insurance Policy Account.

5. Sum-of-the-Years' Digits Method

This method assumes that the depreciation charge should be more in the early years of the life of the asset. It allocates approximately two-third of the cost in the first half of the asset's estimated economic life.

Under this method, the depreciation expense is calculated by multiplying the cost by a fraction based on the sum of the number of periods of the useful economic life. The depreciation expense for each year is computed as follows:

(1) To compute the sum of the digits from one through the number of years of the asset's economic life. If n is the estimated years of useful life, the numbers 1,2,3..... n are added. If the estimated useful life of an asset is 5 years, the sum of the years' digit is 1 + 2 + 3 + 4 + 5 = 15.
Taking n as the estimated useful life, the above sum can be computed by the following formula:

$$\text{Sum of years' digits} = \frac{n\ (n + 1)}{2} = \frac{5\ (5 + 1)}{2} = 15.$$

(2) For each year, the depreciation rate is expressed as a fraction in which the denominator is the sum of the digits n (as calculated above) and the numerator of the fraction for each year is determined by taking the digits in increasing order. Therefore, the numerator for the first year is 'n', for the second year it is 'n-1', for the third year it is 'n-2' and so on. Taking the above example, the denominator is 15 and the numerator of the fraction for the first year is 5, for the second year is 4, for the third year is 3 and so on. The asset will be depreciated 5/15 in the first year, 4/15 in the second year and so on. Therefore, the formula for ascertaining depreciation:

$$\text{Depreciation} = \frac{\textit{Number of years life remaining}}{\textit{Sum of years' digits}} \times (\text{Cost} - \text{Salvage Value})$$

Example : If the cost of a machine is ₹ 5,000 and scrap value after 5 years is ₹ 100, the amount of depreciation to be charged in different years will be as under:

		₹
1st year	5/15 of ₹ 4,900	1,633
2nd year	4/15 of ₹ 4,900	1,307
3rd year	3/15 of ₹ 4,900	980
4th year	2/15 of ₹ 4,900	653
5th year	1/15 of ₹ 4,900	327
		4,900

This method is well known as 'Rule of 78', because it is based on the sum of the digits 1 to 12. If the method is used on the monthly intervals and if the digit 1 is assigned to January, and 2 to February, 3 to March and so on up to 12 to December, the sum of the digits for the year becomes: (1+2+3 ... + 12) = 78.

To compute depreciation for a part of the year, the annual depreciation for different years is computed first. When an asset is purchased during the year, the depreciation for one full year will fall in two accounting periods. The depreciation for the first year will be the annual depreciation multiplied by the appropriate fraction representing the portion of the year being considered. For the second and subsequent years, the depreciation will be calculated as: unallocated portion of the previous year's depreciation will be added to the remaining portion of the current year's depreciation.

To illustrate, we consider the above example. If the asset is purchased on 1.7.2014 and the accounting year ends on 31st December, each year, the first year of the asset's life is 1.7.2014 to 30.6.2015. Therefore, depreciation for the first year will be 1/2 of ₹ 1,633 = ₹ 816.50. The depreciation expense for the second year will be half of the first year's depreciation and half of the second year's depreciation, i.e. 1/2 of ₹ 1,633 plus 1/2 of ₹ 1,307 = ₹ 816.50 + ₹ 653.50 = ₹ 1,470.

This method can best be applied to assets that provide more service benefits in the earlier years as compared to the later years, e.g. Copying machines and Computers. It is also used in allocating interest charges in hire-purchase, leasing and instalment sale accounting, and for writing off discount on issue of debentures.

6. Annuity Method

The basis of this method is to consider the time value of money and opportunity cost of capital locked up in the asset. When an amount is invested in acquiring an asset, the business has to forego some amount of interest, which could have been earned if the money was instead employed in the purchase of an income producing asset, like securities. Under this method, the total amount of depreciation written off during the life of the asset equals the net cost of the asset plus interest calculated on the reducing balance. The rate of interest (calculated at a fixed rate per cent) is applied to the cost value of the asset and the amount of interest produced added to the asset. Therefore, interest is debited to the asset (on the reducing balance) and credited to the Interest Account. Here, the asset is regarded as providing an annuity (a series of equal periodic payments occuring at equal intervals of time) and the equal amount of depreciation charged in each year is the value of the annuity. Under this system, the annual amount of depreciation is calculated from the annuity table.

This method for deprecaition can only be applied to an asset the life of which will extend to a known period, e.g. a lease. Since the depreciation charge is same and the interest charges decrease each year (because interest is calculated on reducing balance), the net charge for depreciation (depreciation less interest) gradually decreases.

2014	23,097.38	1,099.87	21,997.51	
TOTAL	1,15,487.38	15,487.38	1,00,000.00	

7. Revaluation Method

This method is applied for the writing off of a fixed asset to its current market value. To ascertain the real profit for an accounting period, it is necessary to value the assets each year at the end of the period and any decrease in the value as compared with the book value should be charged against profit as depreciation. Since there are many practical difficulties in ascertaining the real value of an asset at any point of time, for obvious reasons, a depreciation method never concerns itself with measuring the value of an asset. It remains as a process of allocation only.

The revaluation method can only be used in the case of assets such as loose, tools, livestock, and the like. Here, the assets are valued at their current market values and the depreciation is calculated by finding out the difference between the written down value and the revaluation figure. We consider the following example:

Opening value of loose tools	₹ 10,000
Manufactured / Purchases of loose tools during the peirod	₹ 3,000
Value of the loose tools at the end of the period	₹ 11,000

Therefore, depreciation for the loose tools is : ₹ 10,000 + ₹ 3,000 – ₹ 11,000 = ₹ 2,000.

If any profit is arising out of revaluation of assets, it should be credited to Revaluation Reserve Account, where it will find a place on the liability side of the Balance Sheet. The revaluation method is a departure from historical cost accounting with regard to the valuation of assets.

The point to note is that, under this method, there is no formal recording of individual asset values. In effect, it is not possible to calculate profit or loss arising on sale of an individual asset.

Illustration 22

A company manufacturers loose tools for its own use. At the end of each year, depreciation is charged on revaluation method. From the following particulars, show the Loose Tools Account :

Year ended 31.12.2011 : Loose tools manufacture ₹ 5,000 (revalued on 31.12.2011 ₹ 4,100)
Year ended 31.12.2012 : Loose tools manufacture ₹ 2,700 (revalued on 31.12.2012 ₹ 5,700)
Year ended 31.12.2013 : Loose tools manufacture ₹ 1,000 (revalued on 31.12.2013 ₹ 6,000)
Year ended 31.12.2014 : Loose tools manufacture ₹ 1,500 (revalued on 31.12.2014 ₹ 5,100)

The value as on 31.12.2014 after considering the sale of old tools at the book value of ₹ 1,200 (as on 31.12.2014) for ₹ 950.

8. Depletion Method

This method is an accounting for natural resources rather than accounting for depreciation. Wasting assets, such as mines, quarries, and the like are examples of such natural resources. The distinguishing feature of these types of assets is that they cannot be depreciated but can gradually be *depleted*. This is because these assets can be physically consumed and converted into inventory. For example, a coal mine can be considered as an underground inventory of coal. But such inventory cannot be considered as one of the current assets.

Therefore, this method is applied to wasting assets such as mines, quarries, and the like where the output for each year depends on the quantity extracted. Here, depreciation is calculated first by making an estimate in advance of the total quantity to be extracted over its life and then the cost of the asset is apportioned over the periods of the asset in proportion to the rate of extraction.

For example, suppose a mine is acquired for ₹ 10,00,000 and it is estimated that 2,50,000 tonnes of coal can be extracted over its life. Therefore, the rate of depreciation per tonne of coal is ₹ 10,00,000/2,50,000 = ₹ 4. If 50,000 tonnes are extracted in a year, then the depreciation for that year will be 50,000 x ₹ 4 = ₹ 2,00,000.

Illustration 23

Bharat Collieries Ltd. acquired a lease right for 25 years of a mine on January 1st, 2009 on a lumpsum payment of ₹ 5,00,000. Estimated coal deposit was 25,00,000 tonnes, 80% of which, it is expected, could be raised within the lease period. The company decided to depreciate the lease under the depletion method. The annual raising were: 2009—40,000 tonnes; 2010—60,000 tonnes; 2011—1,00,000 tonnes; 2012 to 2013—2,00,000 tonnes each year.

Show Lease Account from 1st January 2009 to 31st December, 2014.

Solution

			"	By Balance c/d	3,50,000
		4,00,000			4,00,000
1.1.2014	To Balance b/d	3,50,000	31.12.2014	By Depreciation A/c	50,000
			"	By Balance c/d	3,00,000
		3,50,000			3,50,000
1.1.2015	To Balance b/d	3,00,000			

Depreciation per tonne of coal = ₹ 5,00,000 / 20,00,000 (being 80% of 25,00,000) = ₹ 0.25. Therefore, depreciation for 2012 = 40,000 x 0.25 = ₹ 10,000; similarly for 2013 = ₹ 15,000 and so on.

9. Machine Hour Rate Method

This is a method of providing depreciation on annual machine hours in use compared with total anticipated machine hours over the life of the machine. Here, it is necessary to estimate the total effective working hours (estimated hours less idle time) during the whole life of the machine and to divide this total into the net cost of the machine and thus arriving at an hourly rate of depreciation. For example, a machine costs ₹ 50,000 with an estimated residual value of ₹ 10,000. The expected effective hours during its life is 20,000. The depreciation charge per machine hour would be :

$$\textit{Machine Hour Rate} = \frac{\textit{Cost of the Machine} - \textit{Scrap Value}}{\textit{Effective Working Hours}}$$

Therefore, depreciation rate per machine hour is $= \dfrac{50{,}000 - 10{,}000}{20{,}000} =$ ₹ 2.

Under this method, each period is charged with depreciation to the extent of the use of machine. But this method misses a vital point, i.e. depreciation also takes place even when a machine is not in use.

Illustration 24

Computer 'Meteor-500' is estimated to have effective life of 20,000 hours. The cost of the computer is ₹ 60,000. If the computer has worked for 2,000 hours in 2013 and 3,000 hours in 2014, what will be the depreciation at the end of each year? You are required to show the Computer Account for 2013 and 2014.

Solution

Depreciation per hour = $\dfrac{60{,}000}{20{,}000}$ = ₹ 3; Depreciation for 2013 = ₹ 3 x 2,000 = ₹ 6,000;

Depreciation for 2014 = ₹ 3 x 3,000 = ₹ 9,000

10. Depreciation and Repairs Fund Method

Under this method, total maintenance costs are estimated for the entire life of the asset, and added to its capital cost (less residual value) to get a composite figure, which is divided by the number of years the asset is expected to last. The resultant amount is debited to the Profit and Loss Account and credited to Depreciation and Repairs Fund Account.

The repairs and renewals (etc), incurred are debited to this fund, instead of Profit and Loss account. Practically, it is the best method of equalising the burden on Profit and Loss Account in respect of depreciation and repairs (etc).

The Depreciation and Repairs Fund will be closed at the end of the useful life of the asset, by transferring it to the Asset Account. If there is any balance in the Asset Account, it is transferred to the Profit and Loss Account.

Any balance of the Asset Account will be transferred to Profit and Loss Account and it will close this account.

Illustration 25

A combined provision for depreciation and repairs and renewals was made every year at 15% of the original cost of a machine purchased at ₹ 50,000. The 'Provision for Depreciation and Maintenance Account' that was opened for the purpose was, therefore, debited with the actual costs of repairs and renewals which were as stated below :
1st Year—₹ 1,500; 2nd Year—₹ 1,600; 3rd Year—₹ 2,100; 4th Year—₹ 3,000; 5th Year—₹ 4,200

At the end of the fifth year, the machine was sold out at ₹ 20,000 after utilizing a few of its minor parts valued at ₹ 4,000, in installing in its place a new machine purchased at ₹ 75,000. The resulting loss in the disposal of the old machine was debited to revenue. Write up 'Provision for Depreciation and Maintenance Account' for the five years and the Old and the New Machine Accounts at the end.

Revision of the Estimated Useful Life

The useful lives of major depreciable assets or classes of depreciable assets may be reviewed periodically. Where there is a revision of the estimated useful life of an asset, the ***unamortised depreciable amount*** should be charged over the ***revised remaining useful life***.

Illustration 26

On 1.4.2010, ABC Limited purchased plant and machinery worth ₹ 20,00,000, useful life being 8 years. Till the year ended 31.3.2013, the amount of accumulated depreciation on this plant and machinery was ₹ 8,00,000. The remaining useful life of the plant and machinery was reviewed during 2013-14, which was estimated at 2 years due to wear and tear. Calculate the amount of depreciation to be charged from the year 2013-14 onwards.

Solution

Here, in this case, the unamortised depreciable amount is ₹ (20,00,000 – 8,00,000) = ₹ 12,00,000 and the revised remaining useful life is 2 years.

Therefore, the amount of depreciation to be charged from the year 2013-14 onwards is ₹ 12,00,000 / 2 = ₹ 6,00,000 p.a.

Depreciation on Addition or Extention of the Asset

Any addition or extension which becomes an integral part of the existing asset should be depreciated over the remaining useful life of that asset. The depreciation on such addition or extension may also be provided at the rate applied to the existing asset. Where an addition or extension retains a separate identity and is capable of being used after the existing asset is disposed of, depreciation should be provided independently on the basis of an estimate of its own useful life.

Example : ACC Ltd. has installed a conveyor belt system for material handling at its 25 years old cement plant. The cost of the entire conveyor belt unit is ₹ 20,00,000 and its useful life is 10 years without any residual value. However, the remaining life of the principal plant is 5 years.
The conveyor belt unit should be recognised as an item of fixed asset separate from principal plant. It will be depreciated over its useful life, i.e., 10 years. However, if the 'conveyor belt' cannot be used separately, its useful life will terminate with the life of the principal plant, i.e., 5 years. The entire amount of ₹ 20,00,000 is to be depreciated in 5 years.

Illustration 27

On 1.4.2012, the value of X Limited's plant and machinery was ₹ 1,000 lakhs. The company provided depreciation @ 15% p.a. under Reducing Balance Method. It was found that about ₹ 150 lakhs of imported asset, which is the component of plant and machinery acquired on 1.4.2012, would be obsolete in 3 years. Accordingly, X Limited wants to write off this asset over 3 years. Can the company do so as per AS–6?

Solution

As per para 24 of AS–6, any addition or extention which becomes an integral part of the existing asset should be depreciated **over the remaining useful life of that asset**. The depreciation on such addition or extention may also be provided at the rate applied to the existing asset. Where an addition or extention retains a separate identity and is **capable of being used after the existing asset is disposed of**, depreciation should be provided **independently** on the basis of an estimate of its own useful life.

Therefore, in this case, the company can write off the asset in 3 years, since the asset has independent useful life.

Change in the Historical Cost

Where the historical cost of a depreciable asset has undergone a change due to increase or decrease in long term liability on account of ***exchange fluctuations, price adjustments, changes in duties*** or ***similar factors***, the depreciation on the revised unamortised depreciable amount should be provided ***prospectively*** over the residual useful life of the asset.

Illustration 28

ABC Ltd. purchased an imported Printing Machinery from Germany for ₹ 20,00,000 on 1.4.2008. The life of the machine is 10 years without any residual value. The company followed straight line method of depreciation. During 2012-13 due to change in foreign exchange rate the amount of unpaid liability increased by ₹ 3,00,000.

Calculate amount of depreciation to be charged for the year 2012-13 and onwards.

Solution

		₹
Cost of the printing machinery		20,00,000
Less: Depreciation under SLM :		
2008-09	2,00,000	
2009-10	2,00,000	
2010-11	2,00,000	
2011-12	2,00,000	8,00,000
Unamortised depreciable amount on 1.4.2012		12,00,000
Add: Increase in liability for change in foreign exchange		3,00,000
Revised depreciable amount		15,00,000

Depreciation for the year 2012-13 and onwards :

$$\text{Depreciation p.a.} - \frac{15,00,000}{(10 - 4)} = ₹\ 2,50,000.$$

Depreciation of Revalued Assets

Where the depreciable assets are revalued, the provision for depreciation should be based on the revalued amount and on the estimate of the remaining useful lives of such assets. In case the revaluation has a material effect on the amount of depreciation, the same should be disclosed separately in the year in which revaluation is carried out.

Illustration 29

A Ltd acquired a building on 1st January, 1995 at a cost of ₹ 6,40,000. The useful life of the building was estimated as 50 years and depreciation is provided on a straight line basis. The building was revalued on 30th June 2012 for ₹ 16,80,000 and the revaluation incorporated in the accounts. Assuming no change made to the remaining useful life. You are required to calculate : (i) the surplus on revaluation; (ii) depreciation to be charged in the Statement of Profit and Loss of 2012.

Solution

(i) Surplus on Revaluation	₹
Revaluation at 30th June, 2012	16,80,000
Net book value at 30th June, 2012 (Note 1)	4,16,000
Surplus	12,64,000

This surplus of ₹ 12,64,000 should be credited directly to owners' interests under the heading of Revaluation Reserve as per the requirement of AS—10 Para 30.

(ii) Depreciation Charged in the Profit and Loss Account of 2012

Here, it should be noted that upto 30.6.2012 depreciation will be calculated on original value and from 1.7.2015 it is to be calculated on revalued value.

		₹
(a) On historical cost (upto 30.6.2012) — $\frac{6,40,000}{50} \times \frac{1}{2}$		6,400
(b) On revalued amount (1.7.2012 to 31.12.2012) — $\frac{16,80,000}{32\frac{1}{2}} \times \frac{1}{2}$		25,846
	Total	32,246

Working Note :

(1) Net Book Value on 30th June, 2012	₹
Original cost on 1.1.1995	6,40,000
Less: Depreciation for 17.5 years (₹ 6,40,000 / 50 × 17.5)	2,24,000
	4,16,000

Disclosure

1. If any depreciable asset is disposed of, discarded or destroyed, the net surplus or deficiency, if material, should be disclosed separately.
2. The following information should be disclosed in the financial statements:
   (i) the historical cost or other amount substituted for historical cost of each class of depreciable assets;
   (ii) total depreciation for the period for each class of assets; and
   (iii) the related accumulated depreciation.

3. The following information should also be disclosed in the financial statements alongwith the disclosure of other accounting policies:
   (i) depreciation methods used; and
   (ii) depreciation rates or the useful lives of the assets, if they are different from the principal rates specified in the statute governing the enterprise.

Is Depreciation a Source of Fund?

A popular misconception, which does create confusion, that depreciation is a source of fund. ***Under no circumstances is depreciation a source of fund***. The accounting for depreciation is an internal transaction (an adjusting entry without involving second parties) to write off the cost of an asset, i.e. a cost already incurred is charged to expense. Generally, a fund requires a connection with an outside agency. Since depreciation is simply a book entry, (a contra asset account) it has no outside connection. Just by passing some book entry, it is not possible for a business to generate a fund. When depreciation is provided, it does not depend upon a cash payment. For this reason, depreciation is regarded as a non-cash expense. As has already been stated, *when an asset is purchased, the payment of many years' depreciation is made in advance.* When the useful life of an asset ends, an even larger cash payment may be required to replace it.

Though depreciation charges neither recover nor create funds, it may affect fund in the following two ways:

First, depreciation charges affect periodic income and, hence may affect managerial decisions in regard to dividend, product pricing or the selection of a new product or machinery.

Second, depreciation charges affect taxable income and, hence affect directly the amount of income tax payable.

Key Points

- ***Depreciation*** is the process of allocating the cost of a fixed asset (less any residual value) over its estimated useful life in a rational and systematic manner.
- The amount of depreciation to be charged for a particular fixed asset will depend upon the following ***three*** factors:
  (i) Cost of the asset
  (ii) Useful life of the asset
  (iii) Residual value of the asset
- The useful life of an asset is its ***service life*** which can be defined as the number of accounting periods during which it will be useful to the business.
- Residual value of asset is the estimated value of a fixed asset at the end of its ***economic life***.
- The change in the method of depreciation must be with retrospective effect.
- The deficiency or surplus of depreciation in respect of past years, should be debited or credited to the Profit and Loss Account of the year of change in the method of depreciation.
- A ***Sinking Fund*** is a fund created by the regular investment of a fixed amount to accumulate the amount of money required to replace an asset at a set date in the future.
- Any addition or extension which becomes an integral part of the existing asset should be depreciated over the remaining useful life of that asset.

THEORETICAL QUESTIONS

1. What is depreciation? What are the various methods of calculating depreciation ? Describe one of them fully.
2. What do you understand by the Annuity System of providing depreciation ? State the circumstances in which you will employ this system.
3. (a) Briefly discuss two methods of calculating depreciation. (b) Which method of charging depreciation would you recommend for the following : Freehold building; Long-term lease?
4. Explain the Sinking Fund Method of charging depreciation. For what particular types of assets is this method most suitable?
5. What are the factors to be taken into consideration in selecting a depreciation method ?
6. Is depreciation a source of fund ?

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each sentence or answer each question below.

1. AS—6 deals with depreciation accounting and applies to all depreciable assets, except :
   A assets used for administrative purposes
   B assets used for sales and service
   C wasting assets
2. Depreciable assets are assets which
   A have unlimited useful life, e.g., land
   B have a limited useful life, e.g., furniture
   C are expected to be used not for more than one year
3. Residual value is specifically
   A scrap value
   B the estimated value of a fixed asset at the end of its economic life
   C the estimated value of a fixed asset at the end of its physical life
4. The useful life of an asset is :
   A its service life
   B its physical life
   C none of the above
5. Which of the following statement is **not** correct ?
   A depreciation will vary directly with the useful life of the asset
   B the higher the residual value, the lower will be the depreciation charge
   C the higher the residual value, the higher will be the depreciation
6. Repairs and maintenance costs are :
   A normally capitalised
   B expensed in the profit and loss account as incurred
   C recorded as deferred expenses
7. Which of the following statement is correct in relation to AS—6 ?
   A only straight line method can be adopted for calculation of depreciation
   B only reducing balance method can be adopted for calculation of depreciation
   C no particular method has been specified for calculation of depreciation
8. Which of the following statement is correct in relation to AS—6 ?
   A the change in the method of depreciation should be treated as a change in estimate
   B the change in the method to depreciation should be treated as change in accounting policy but the depreciation should be computed in accordance with the new method from the date of change in the method of depreciation
   C the change in the method of depreciation should be treated as change in accounting policy but the depreciation should be recomputed in accordance with the new method from the date of first use of the asset
9. The cost of a fixed asset should comprise :
   (i) its purchase price
   (ii) any attributable cost of bringing the asset to its working condition for intended use
   (iii) overhead of purchase department relating to the purchase of asset
   Which of the following is correct ?
   A (i) only
   B (i) and (ii) only
   C (i), (ii) and (iii)
10. Depreciation charges for a period are recorded
    A only in the Profit and Loss Account
    B only in the Balance Sheet
    C in the Profit and Loss Account or as part of the Cost of another asset (such as inventory).
11. What is the purpose of charging depreciation in accounts ?
    A to allocate the cost less residual value of a fixed asset over the accounting periods expected to benefit from its use
    B to ensure that funds are available for eventual replacement of the asset
    C to comply with prudence concept

PRACTICAL QUESTIONS

Straight Line / Fixed Instalment Method

1. On 1.1.2013 B purchased a machine for ₹ 1,00,000. Assuming its life to be 10 years and its scrap value for ₹ 20,000 charge depreciation according to Straight Line Method. Show the Machine Account in the ledger upto 31.12.2014.
2. A machine was bought at ₹ 20,000. The scrap value of the machine was estimated to be ₹ 5,000 after 10 years. Show the Machinery Account and the Balance sheet for the first three years charging 10% depreciation.
3. On 1.1.2012 a company purchased a machine for ₹ 1,00,000. It was decided to write off 10% depreciation under Straight Line Method, estimating the life of the machine at 10 years and scrap value at ₹ 10,000. You are required to prepare Machinery Account upto 31.12.2014 and also show the Provision for Depreciation Account for the same period.
4. A firm purchased a machine at a cost of ₹ 2,00,000 and paid import duty of ₹ 80,000. The machine was installed on 1st April, 2012 and installation charges of ₹ 20,000 was paid. The scrap value was estimated at 10% of the cost of machine and estimated life of the machine was fixed at 10 years. They decided to charge depreciation under Straight Line Method. Show Machinery Account and Provision for Depreciation Account for 2012, 2013 and 2014. The firm closes its books on 31st December each year.

Reducing Balance / Diminishing Balance Method

5. A machine was purchased on 1.1.2013 for ₹ 5,00,000. On 1.7.2013 another machine was purchased for ₹ 3,00,000. Depreciation is to be provided @ 10% p.a. under Reducing Balance Method.
   You are required to show : (i) Machinery Account for 2013 and 2014; (ii) Provision for Depreciation Account for 2013 and 2014; (iii) How did the Machinery Account appear in the Balance Sheet at the end of 2014. [Assume that no Provision for Depreciation Account is maintained]
6. A plant is purchased for ₹ 6,00,000 on 1st April, 2011. Some additions to the plant are made on 1st July, 2011 for ₹ 1,00,000. Depreciation on the diminishing Balance Method is to be written off at 10% p.a. in 2011, at 15% p.a. in 2012 and 20% in 2013 and 2014. The books are closed on 31st December each year.
   You are required to show Machinery Account for 2011, 2012, 2013 and 2014.
7. A company maintains its fixed assets at cost. Depreciation provision accounts, one for each type of asset are in use. Machinery is to be depreciated @ 12.5% p.a., and fixtures @ 10% p.a., using the reducing balance method. Depreciation is to be calculated on assets in existence at the end of each year, giving a full year's depreciation even though the asset was bought part of the way through the year.
   The following assets were acquired : 1.1.2013 : Machinery ₹ 64,000; Fixture : ₹ 10,000; 1.7.2013 : Fixtures : ₹ 20,000; 1.10.2014 : Machinery : ₹ 72,000; Fixtures : ₹ 5,000.
   The financial year of the business is ending on 31st December. You are to show : (a) Machine Account; (b) Fixtures Account; (c) Two separate Provision for Depreciation Accounts; (d) Fixed assets section of the Balance Sheet at the end each year for the years ended 31.12.2013 and 31.12.2014.

Addition to and Disposal of Assets

8. On 1.1.2014, balance of Machinery Account was ₹ 48,600. On 1.7.2014, a new machine was purchased for ₹ 24,000, installation cost ₹ 1,000. On 1.9.2014, machinery was sold for ₹ 6,000. The original cost of the machine sold was ₹ 10,000 on 1.1.2012. Machinery is depreciated at 10% p.a. under the diminishing balance method. Show Machinery Account for the year 2014. The books are closed on 31st December every year.
9. A manufacturing concern, whose books are closed on 31st March, purchased a machine for ₹ 1,50,000 on 1st April, 2011. Additional machinery was acquired for ₹ 40,000 on 30th September, 2012 and for ₹ 25,000 on 1st April, 2014. Certain machinery, which was purchased for ₹ 40,000 on 30th September, 2012 was sold for ₹ 34,000 on 30th September, 2014.
   Give the Machinery Account for the year ending 31st March, 2015 taking into account depreciation at 10% per annum on the written down value.
10. The following relate to the business of a manufacturer for the year ended 31.12.2014 :
    (a) The debit balance of the Plant and Machinery Account as on 1.1.2014 was ₹ 2,68,400.
    (b) During the year three machines standing in the books at ₹ 12,860 were sold for ₹ 6,000.
    (c) On 1.4.2014, new machines costing ₹ 58,800 were purchased and were installed by the manufacturer's workmen at an expenditure of ₹ 2,160 (i.e. wages ₹ 1,740 and materials ₹ 420).
    (d) It is the practice of the business to write off 15% depreciation on all additions to plant and 20% on all old plants.
    Prepare Plant and Machinery Account as it would appear on 31.12.2014.

11. A firm, writes off 95% of the cost of machinery acquired over a period of 10 years by the straight line method. Full depreciation is written off even if the machinery is in use for part of a year. On 31.12.2013, the original cost of machinery in use was as : Purchased in 2004 or earlier ₹ 57,000; Purchased in 2006 ₹ 1,30,000; Purchased in 2009 ₹ 40,000. On 30.6.2014, a machine which had cost ₹ 10,000 in 2003 was disposed off for ₹ 900 and on 30.9.2014 a machine installed in 2012 at a cost of ₹ 20,000 was destroyed in an accident and ₹ 11,800 was received from the insurance company in settlement of the claim. On the same date, a new machine costing ₹ 25,000 was installed. Show the Machinery Account for the year 2014.
12. The following balances appear in the books of a firm :
    January 1, 2014—Machinery Account ₹ 1,00,000; Provision for Depreciation—₹ 45,000.
    The depreciation is charged at 10% on straight line method and in terms of firm's accounting policy, acquisitions during the year are depreciated for a full year irrespective of the date of purchase and no depreciation is charged on assets in the year of their disposal.
    On June 30, 2014, the following transactions took place :
    (a) Sold machinery for ₹ 43,500 which was purchased for ₹ 80,000 on January 1, 2010.
    (b) Acquired plant costing ₹ 40,000.
    You are required to prepare on December 31, 2014 :
    (i) Machinery Account; (ii) Provision for Depreciation Account; and, (iii) Machinery Disposal Account.
13. The Machinery Account of a big rubber factory showed balance of ₹ 1,90,000 on 1st January 2014 : Its accounts were made up on 31st December each year and depreciation is written at 10% p.a. under the Diminishing Balance Method. On 1st June 2014, new machinery was acquired at a cost of ₹ 28,000 and installation charges incurred in erecting the machine worked out to ₹ 892 on the same date. On 1st June 2014 a machine which had cost ₹ 6,000 on 1st January 2012 was sold for ₹ 750, another machine which had cost ₹ 600 on 1st January 2013, was scrapped on the same date and it realised nothing. Write up Plant and Machinery Account for the year 2014, allowing the same rate of Depreciation as in the past calculating depreciation to the nearest multiple of a Rupee.
14. On July 1, 2012, Gopal Ltd. purchased second-hand machinery for ₹ 20,000 and spent ₹ 3,000 on reconditioning and installing it. On January 1, 2013 the firm purchased new machinery worth ₹ 12,000. On June 30, 2014 the machinery purchased on January 1, 2013 was sold for ₹ 8,000. On July 1, 2014, fresh machinery was purchased on instalment basis, payment for this machinery was to be made as follows :
    July 1, 2014—₹ 5,000; June 30, 2015—₹ 6,000; June 30, 2016—₹ 5,500.
    Payments in 2015 and 2016 include interest ₹ 1,000 and ₹ 500 respectively. The company writes off depreciation @ 10% p.a. on original cost. The accounts are closed every year on 31st March. Show the Machinery Account for three years ending 31st March, 2015.
15. The following details regarding machinery are available from the books of Simco Engineers Limited:
    (a) Balance as on 1.4.2014 ₹ 1,00,000 on Machinery Accoiunt.
    (b) The opening balance [item (a)] includes ₹ 70,000 worth of machinery bought on 31.3.2014.
    (c) Bought new machinery on 1.10.2014 for ₹ 40,000.
    (d) Incurred expenses on installation (to be capitalised) ₹ 8,000 on item (c)..
    (e) Sold machinery on 1.1.2015 for ₹ 32,000 (its original cost was ₹ 40,000 on 1.10.2011).
    (f) Mode of depreciation is Fixed Instalment System @ 10% per annum, bearing in mind the dates of purchase/ sale.
    Show the Machinery Account for the year from 1st April 2014 to 31st March, 2015.

Change in the Method of Depreciation with Retrospective Effect

16. Ram Ltd. which depreciates its machinery at 10% p.a. on Diminishing Balance Method had on 1.1.2014, ₹ 9,72,000 on the debit side of Machinery Account. During the year 2014, Machinery purchased on 1.1.2012 for ₹ 80,000 was sold for ₹ 45,000 on 1.7.2014 and a new machinery at a cost of ₹ 1,50,000 was purchased and installed on the same date, installation charges being ₹ 8,000. The company wanted to change the method of depreciation from Diminishing Balance Method to Straight Line Method, w.e.f., 1.1.2012. Difference of depreciation upto 31.12.2014 to be adjusted. The rate of depreciation remains the same as before.
    Show Machinery Account.
17. A firm charges depreciation on its plant a machinery on the Straight Line Method at 10%. On 1.1.2014, it was decided that the Reducing Balance Method of charging depreciation on plant and machinery should be adopted w.e.f. 1.1.2011, the rate of depreciation remaining at 10%. The Plant and Machinery Account stood in the books at ₹ 1,34,000 on 1.1.2014. The following are the particulars regarding purchase and sale of plant during the 3 year period :
    2011 : Total depreciation charged ₹ 16,000

April 1 : Sale of machinery ₹ 24,000 (bought on 1.7.2008) for	₹ 36,000
June 1 : Acquired a new machine at a cost of	₹ 42,000

2012 : Total depreciation charged ₹ 12,000
Feb 10 : Sale of machinery scrap ₹ 1,200 (bought on 1.1.2002) at a cost of ₹ 55,000
2013 : Total depreciation charged ₹ 14,000
Dec. 31 : Depreciation written off for 3 months on new machinery acquired ₹ 1,000
You are required to recast the Plant and Machinery Account and also to show the relevant figures in the Profit and Loss Account for the year ended 31.12.2014.

18. H Ltd. charged depreciation at 10% p.a. on diminishing balances. On 1.1.2013 there was a balance of ₹ 2,43,000 in Machinery Account.
On 1.7.2013 new machine costing ₹ 72,000 was installed. Installation charge amounted to ₹ 3,000.
On 1.7.2013 a machine was sold for ₹ 43,000 the cost of which was ₹ 60,000 as on 1.1.2011. It was decided in 2013 to change the depreciation method from diminishing balance to straight line with effect from 1.1.2011, keeping the rate of depreciation same as before.
Show the Machinery Account in the books of the company for 2013.

19.. The machinery account (at cost) of a firm for the three years ended 31.12.2013 appeared as follows :

Date	Particulars	₹	Date	Particulars	₹
2011 Jan.1	To Cash A/c (No. 1)	50,000	2011 Dec. 31	By Balance c/d	50,000
2012 Jan. 1	To Balance b/d	50,000	2012 Dec. 31	By Balance c/d	70,000
July 1	To Cash A/c (No. 2)	20,000			
		70,000			70,000
2013 Jan. 1	To Balance b/d	70,000	2013 Dec. 31	By Balance c/d	85,000
July 1	To Cash A/c (No. 3)	15,000			
		85,000			85,000

Depreciation @ 20% on the diminishing balance method was accumulated in Provision for Depreciation Account. On 1.10.2014, machine No. 2 was damaged and had to be replaced by a new machine costing ₹ 25,000. The machine was insured and insurance claim of ₹ 12,400 was admitted by the insurers.
Show the Machinery Account, Provision for Depreciation Account and Machinery Disposal Account for the year 2014. Depreciation during the year is provided for the period for which each machine is in use.

20. A factory possessing different plant and machinery, depreciation on which is provided under 'straight line' method at the rate of 10% p.a. A full year's depreciation is provided at the end of each year on all plant not already completely written off or sold, including any plant purchased during the year. Any profit or loss which may result from sales is transferred to Profit and Loss Account at the end of the year. Accounts are prepared annually to 31st December. The balance standing on the Plant and Machinery Account at 31st December, 2012 after writing off depreciation for that year was ₹ 19,515 and subsidiary records showed that the cost of plant then on hand was made-up as follows: **Items bought** : in 2002 (or earlier) ₹ 5,800; in 2003 ₹ 3,100; in 2004 ₹ 1,700; and in 2005 (or later) ₹ 25,200.
During 2013 a new plant was bought at a cost of ₹ 2,950 and one machine which had cost ₹ 550 in 2001 was sold as scrap for ₹ 35. During 2014 there were additions, costing ₹ 1,800 and a machine which had cost ₹ 700 in 2006 was sold for ₹ 350. You are required to write-up Plant and Machinery Account and Plant Disposal Account for 2013 and 2014.

21. A client of the firm of chartered accountants by which you are employed is interested in buying a road transport business from the widow of its deceased owner.
The senior partner of the practice is investigating various aspects of the business and has delegated to you the task of discovering the amount of investment in vehicles at the end of the each financial year ending 30th September 2011 to 2014 inclusive. The business commenced operations on 1st October, 2010. The only information available to you is the fact that the owner calculated deprecaition @ 20% p.a. using the reducing balance method, based on the balance at 30th September each year, and copies of certain Ledger Accounts which are reproduced below :

Dr. Provision for Depreciation of Vehicles Account Cr.

Reserves and Provisions

Section 1 : Reserves

Meaning of Reserve

A reserve is an amount of profit set aside until it is needed for some particular purpose. Usually, a reserve account is specifically named to indicate its purpose. The creation of a reserve is the result of an accounting entry and does not set aside cash or other assets of the business. It is merely a part of the net worth. A reserve generally arises from the following :

1. Retention of profits—It is an appropriation of profit, that is an amount set aside from distributable profits.
2. Capital receipts—Profit on sale of a fixed asset or issue of shares at a premium.
3. Upward revaluation of assets—It is the bringing up of assets from historical costs to their current values.

All reserves appear on the liabilities side of the Balance Sheet.

Types of Reserves

Reserves are generally classified into: (a) Capital Reserves and (b) Revenue Reserves.

(a) Capital reserves are those which are not generally distributed as profits. They arise mainly out of the following :

1. Capital receipts, e.g. issue of shares or debentures at a premium.
2. Non-trading incomes during the period prior to incorporation.

Capital reserves may or may not involve any receipts of cash.

(b) Revenue reserves are created by retaining profits. They are usually available for distribution as profits in the future. Examples of revenue reserves are credit balance of the Profit and Loss Account, General Reserve etc. Revenue reserves can further be classified into: (i) General Reserves and (ii) Specific Reserves.

1. *General reserves:* These reserves are not created for any particular purpose. They are created for safeguarding the business against unforeseen losses in the future or with a view to planning for further development of the business.

2. *Specific reserves:* These reserves are created for some specific purpose and are utilised for these purposes only. These reserves are generally earmarked against some particular asset and are expressed as 'reserve fund'. An amount of the reserve created is invested outside the business in securities for a specified period. At the end of that specified period, all investments are sold. The proceeds are utilised for meeting that particular purpose for which the reserve was created.

Meaning of Reserve Fund

Funds are cash or its equivalent. In accounting, the term 'fund' means money invested in assets which can produce income, e.g. securities. It should have a ready market and can easily be converted into cash. Funds also refer to assets for specific purposes, which are not generally available for normal business activities. In fact, a fund sets aside cash or other assets to achieve specific objectives.

Reserves are not usually represented by earmarking assets. If they are, they are expressed as 'reserve fund'. A reserve represented by an earmarked asset is usually cash or marketable securities. For example, if an organisation sets aside profits for building construction, the reserve so created is known as '***Building Funds***'. When an amount equal to the reserve created is invested outside the business in securities, it is known as '***Building Fund Investment***'. A reserve fund is usually created either to replace a fixed asset at the end of its useful life or to repay a liability in the future, e.g. redemption of debentures.

Distinction between Provisions and Reserves

	Provisions		Reserves
1.	A provision is a charge against profit (a debit in the Profit and Loss Account)	1.	A reserve is an appropriation of profit (a debit in the Profit and Loss Appropriation Account).
2.	The creation of provisions has nothing to do with the amount of net profit. In fact,provisions are created in order to assist in the calculation of a correct profit.	2.	The creation of a revenue reserve depends on the amount of profits earned by the business.
3.	Provisions are created for future liabilities and charges or for valuation adjustments of assets.	3.	Reserves are created for safeguarding the business against unforeseen losses or with a view to planning for further development of the business.
4.	Provisions are created for some specific purpose and are utilised for that particular purpose.	4.	Reserves that are created are mostly general,and/or in a few cases, particular (reserve fund).
5.	Provisions cannot be distributed as profits except in cases where the actual liabilities or charges fall short of the amount provided for.	5.	Reserves,other than capital reserves,can be distributed as profits.
6.	Provisions are adjustment entries—they are internal transactions and cause a reduction in the net profit.	6.	Capital reserves may be internal or external transactions—they may reduce the net divisible profits or can cause an increase in that or may not bear any relation with net profit.
7.	Provisions may appear in the liabilities side or in the assets side of the Balance Sheet.	7.	Reserves compulsorily appear in the liabilities side of the Balance Sheet alone.
8.	Provisions are not earmarked against any particular asset.	8.	Reserves may be earmarked against a particular asset (reserve fund).

Distinction Between Capital Reserve and Revenue Reserve

	Capital Reserve		Revenue Reserve
1.	The transaction for a capital reserve may be internal or external.	1.	It is always an internal transaction.
2.	It is always specific.	2.	It can be general or specific.
3.	It is not generally distributed as profits.	3.	It may be distributed as profits.

4.	It may or may not involve any receipts of cash.	4.	It may or may not involve any payment of cash.
5.	It may arise during the period prior to incorporation.	5.	It cannot arise during the period prior to incorporation.
6.	It is not created by retaining profits.	6.	It is created by retaining profits.

Sinking Funds

A sinking fund is a fund created by the regular investment of a fixed amount to accumulate the amount of money required to pay off a debt or for the replacement of an asset at a set date in the future. An amount equivalent to reserve created as sinking fund is invested outside the business in gilt-edged or other securities and are allowed to accumulate at compound interest so as to produce the required amount to repay the liability or to replace the asset after a specified period of time. The main advantage of creating such a fund is that it does away with the strain on working capital, if substantial sums are withdrawn from the business to replace an asset at the end of its life or to repay a liability.

Difference between a sinking fund to replace an asset and sinking fund to repay a liability

The following are the differences between the above two:

(a) In the first case, a sinking fund is created by debiting Depreciation Account and crediting Sinking Fund Account. Depreciation Account is ultimately transferred to the Profit and Loss Account as an expense to be charged against profits. Therefore, the fund that is created is the actual amount of depreciation provided. But under the seconed case, it is an appropriation of profit and is created by debiting Profit and Loss Appropriation Account and crediting Sinking Fund Account.

(b) In the first case, at the end of the useful life of the asset, all investments are sold away and the proceeds are utilised for purchasing the new asset and writing-off the old asset. The profit or loss on sale of investments is transferred to the Sinking Fund Account. But in the second case, sinking fund investments are realised to repay the liabilities and the profit or loss on sinking fund investment is transferred to Reserve Account.

(c) In the first case, creation of sinking fund does not enhance the capital of the business unit, since it is a charge against profits. But in the second case, it is an appropriation of profits and it increases the capital of the business to the extent the liabilities are discharged.

Section 2 : Provisions

Meaning of Provision

A provision is a charge against profit for the purpose of providing for any liability or loss. The anticipated liability or loss is likely or certain to be incurred, but the amount or the date on which they will arise may or may not be ascertained with reasonable accuracy. Therefore, a provision is debited in the Profit and Loss Account to ascertain the ***correct profit***. It is an internal transaction and, therefore, does not involve any payment of cash. If the amount of a known liability or loss can be ascertained with substantial accuracy, it should be treated as a liability and not a provision. A Provision can be created for the following purposes :

1. For liabilities and charges (e.g., provision for taxation, provision for sales tax etc.);
2. Valuation adjustment for fixed assets (e.g., provision for depreciation);
3. Valuation adjustment for current assets (e.g., provision for doubtful debts).

A provision can be ***specific***, e.g. provision against a particular debtor; or ***general,*** e.g. provision expressed as a percentage of total debtors; or a combination of specific and general provisions.

Provisions for liabilities and charges are shown on the liabilities side of the Balance Sheet. But, provisions for valuation adjustment appear on the assets side of the Balance Sheet as a deduction from the assets concerned (e.g. provision for doubtful debts are deducted from sundry debtors or provisions for depreciation are deducted from the asset accounts).

Illustration 1

Which of the following should be 'charged' against profit and which should be 'appropriation' of profit ?

(i) Provision for Doubtful Debts; (ii) Provision for Depreciation; and (iii) General Reserves.

Solution

(i) Provision for Doubtful Debts is a charge against profit.
(ii) Provision for Depreciation is a charge against profit.
(iii) General Reserve is an appropriation of profit.

Illustration 2

Crimson Limited's Profit and Loss Account for the year ended 31.12.2014 includes the following information:

(i) Depreciation ₹ 57,500; (ii) Bad debts written off ₹ 21,300; (iii) Increase in doubtful debts ₹ 18,400; (iv) Proposed dividend ₹ 20,000; (v) Retained profit for the year ₹ 30,800; and (vi) Liability for tax ₹ 5,000.

State which one of the items (i) - (vi) above are —

(i) transfer to provisions; (ii) transfer to reserves; and (iii) neither related to provisions nor reserves.

Solution

(i) Transfer to provision.
(ii) Neither related to provisions nor reserves.
(iii) Transfer to provision.
(iv) Neither related to provisions nor reserves.
(v) Transfer to reserve.
(vi) Transfer to provision.

Accounting for Provision for Bad Debts

At the end of each accounting period, the firm knows that it will suffer a loss due to bad debts in future. An accurate estimate of the apprehended bad debts losses can nevertheless be made, because the firm does not know which debtor will fail to make payment in future. Therefore, the book value of the sundry debtors may not be the actual realizable value. Towards the endeavour of ascertaining the true (or fair) trading profit, a portion of the profit is set aside in a special account called 'Provision for Bad and Doubtful Debts Account,' to adjust the loss of future bad debts which is based on approximations. But, we cannot write off the accounts of the doubtful debtors at once, the value of the sundry debtors cannot be reduced directly. This is so because there may still be a chance of recovery (partly or fully) of the debt. The estimate of doubtful debts (Provision for Bad and Doubtful Debts Account) is shown as a separate figure in the Balance Sheet. The value of the sundry debtors are retained at the *sum due*, but are shown in the Balance Sheet at the *estimated realizable value*.

The following entry is passed for the provision against bad debts:

Profit and Loss Account Dr.

To Provision for Bad and Doubtful Debts Account

Dr. Provision for Bad and Doubtful Debts Account Cr.

To Balance c/d		By Profit & Loss A/c	

Though Provision for Bad and Doubtful Debts Account is a credit balance, and should find a place on the liabilities side of the Balance Sheet, it is shown as a deduction from sundry debtors in the assets side (to reflect the net realizable amount at a glance). In the Balance Sheet, the Provision for Bad and Doubtful Debts will appear as follows:

Balance Sheet as at ...

		Sundry Debtors	...	
		Less: Bad Debts*	...	
			...	
		Less : Provision for Bad and Doubtful Debts	...	

***Bad debt occurred after preparation of Trial Balance.**

There are two methods of recording for bad and doubtful debts. Also, the treatment in the first year (when a provision is created for the first time), is different from the treatments of the subsequent years.

First Method

Under this method, a Bad Debts Account is opened and all bad debts are written off to it. A Provision for Doubtful Debts Account is also opened in the very first year. All bad debts are adjusted against this Provision for Doubtful Debts Account in the subsequent years. However, the first year's bad debts is charged to Profit and Loss Account directly.

Journal Entries in the First Year

1. When a provision is created for the first time.

Profit and Loss Account Dr.
To Provision for Bad and Doubtful Debts Account

2. For bad debts after Trial Balance :

Bad Debts Account Dr.
To Sundry Debtors Account

3. For writing off bad debts in the Profit and Loss Account

Profit and Loss Account Dr.
To Bad Debts Account (Trial Balance figure and bad debts after Trial Balance)

Journal entries in the Second and Subsequent Years

1. For bad debts after Trial Balance

Bad Debts Account Dr.
To Sundry Debtors Account

2. For writing off bad debts against provision account

Provision for Bad and Doubtful Debts Account Dr.
To Bad Debts Account (Bad debt during the year and after the Trial Balance)

3. For creating necessary provision at the year end

Profit and Loss Account Dr.
To Provision for Bad and Doubtful Debts Account

In the second and any subsequent year, we may consider our provision to be too large or too small. the above entry is passed to increase the provision. Conversely, to reduce the provision, we must reserve the entry.

The amount of provision to be created is calculated as under

Closing Provision required*	***
Add: Bad debts written off (total)	***
	***
Less: Provision for bad and doubtful debts at the beginning	***
Amount to be charged to Profit and Loss Account	***

* Provision is to be calculated on the balance of sundry debtors after adjusting bad debts (after Trial Balance).

Under this method, (excepting in the first year), bad debt account cannot find a place in the Profit and Loss Account, since it is written off against Provision for Bad and Doubtful Debts Account. First we calculate the amount to be provided against doubtful debts and then we ascertain the amount to be charged in the Profit and Loss Account as an expense. Therefore, Profit and Loss Account is debited with the Provision for Bad and Doubtful Debts Account only (instead of Bad Debt Account).

Illustration 3

The outstanding debtors of X at the end of his first year's trading on 31.12.2014 amounted to ₹ 76,800. A review of the debtors list on the same date revealed that there was a long over due of ₹ 1,500 from a debtor, the collection of which was considered doubtful.

You are required to show the relevant journal entries and ledger accounts in the books of X in the following circumstances : (i) if he decides to write off the balance due from the debtor as a bad debt; and (ii) if he decides to make a provision of ₹ 1,500 for the debt.

Solution

In the books of X

(i) Journal

Illustration 4

Following are the balances taken from the Trial Balance of a trader as on 31.12.2014 : Provision for bad debts—₹ 5,000; Sundry Debtors—₹ 90,000; Bad Debts—₹ 5,000. You are required to prepare Provision for Bad Debts Account after considering the following : (i) further bad debts to be written off ₹ 10,000; and (ii) a provision for doubtful debts to be created @ 10% on closing debtors.

Solution

In the books of the Trader

Dr. Provision for Bad Debts Account Cr.

Date	Particulars	₹	Date	Particulars	₹
2014 Dec. 31	To Bad Debts A/c (₹ 5,000 + 10,000)	15,000	2014 Jan. 1	By Balance b/d	5,000
"	To Balance c/d [10% on ₹ (90,000 – 10,000]	8,000	Dec. 31	By Profit and Loss A/c (Balancing figure)	18,000
		23,000			23,000

Tutorial Notes :

(1) Provision for bad debts appearing in the Trial Balance represents opening provisions.

(2) Bad debts are increased by ₹ 10,000 and sundry debtors are decreased by the same amount. Following is the Journal Entry :

Bad Debts Account Dr. ₹ 10,000
  To Sundry Debtors Account ₹ 10,000

(3) Bad debts of ₹ 5,000 appearing in the Trial Balance represents bad debts already written off by passing the above Journal Entry for ₹ 5,000. Therefore, closing balance of sundry debtors is ₹ 80,000 (₹ 90,000-10,000).

(4) Assumed accounting year begins on 1st January every year.

Illustration 5

Mr. X, a trader, had incurred a loss of ₹ 3,000 as bad debt during the year 2013, and then decided to create a Provision for Bad and Doubtful Debts at 5% on good debtors amounting to ₹ 50,000 on 31st December, 2013. During the year ended 31st December, 2014, the bad debts loss was ₹ 2014. On 31st December, 2014, his good debtors amounted to ₹ 65,000 and decided to maintain the Provision for Bad and Doubtful Debts at 4%. Pass the necessary Journal entries in the books of Mr. X for the year 2013 and 2014.

Solution

Less: Opening balance of provision	₹ 2,500
	₹ 2,100

Illustration 6

The Balance Sheet of A as on 31.12.2014 included the following items :

Sundry Debtors	₹ 98,000	
Less: Provision for bad debts	₹ 2,450	₹ 95,550

At the end of the following financial years, the gross amount of Debtors (before deducting a provision) were as under: As on 31.12.2013—₹ 94,000; As on 31.12.2014—₹ 1,02,000.

On each of these years there was a provision for bad debts calculated on the same percentage basis as on 31.12.2013.

The actual amount of bad debts written off from Debtors Accounts over those periods were :

For the year ended 31.12.2013—₹ 2,600; For the year ended 31.12.2014—₹ 2,300.

You are required to prepare Bad Debts Account and Provision for Bad Debts Account for the years 2013 and 2014.

			2013 Jan. 1	By Balance b/d	2,550

Percentage of provision to be created = $\left(\frac{2,450}{98,000} \times 100\right) = 2.5\%$.

Illustration 7

The Trial Balance as on 31.12.2014 of Mr. X contains the following items :

(a) Provision for Bad Debts—₹ 12,000; (b) Sundry Debtors—₹ 1,00,000; (c) Bad Debts—₹ 8,000.

On enquiry, it was ascertained that sundry debtors include the following :

(i) ₹ 10,000 due from A (creditors include ₹ 15,000 due to the same party);

(ii) ₹ 5,000 due on account of sale of furniture; and,

(iii) Bad debts ₹ 5,000.

You are required to show Bad Debts Account and Provision for Bad Debts Account. A provision for bad debts @ 2% is to be created on closing debtors.

Illustration 9

Banik & Co is in business as a distributor of household goods on credit terms to a wide range of customers. The following balances were extracted from their ledger at 31st March, 2014 (all figures in rupees) :

Sales	9,42,520	Returns inwards	30,510
Debtors – Balance at 31.3.2013	98,412	Carriage outwards	5,760
Discount allowed	8,324	Provision for Doubtful debts as at 31.3.2013	6,876
Cash received from debtors	8,76,940		

Subsequent enquiries revealed the following information :

A cheque for ₹ 3,528 from Samar, a customer, had been returned by the bank marked "refer to drawer". Bad debts totalling ₹ 8,536 are to be written-off, and the provision for doubtful debts is to be raised to 10% of debtors balance at 31st March, 2014.

On the last day of the year a cheque is received for ₹ 1,400 from the receiver of Naresh. This customer ceased to trade in January, 2012 when he owed Banik & Co ₹ 7,000 and the debt had been written-off as bad in the year ended 31st March, 2012. No entry in respect of this cheque has yet been made in the books.

Write-up the following accounts for the year ended 31st March, 2014 :

(a) Sundry Debtors Account; (b) Provision for Doubtful Debts Account.

(2) Carriage outward has nothing to do with Sundry Debtors Account.

Illustration 10

Because of their doubtful nature, Sri A K Sinha instructed his accountants to make a specific provision in the accounts for the year ended 31st December, 2013 against the following debts :

Roy — ₹ 280; Das — ₹ 60; Ghosh — ₹ 240; Saha — ₹ 2,040.

He also instructed that a general provision of 5% for doubtful debts should be created on the other debtors, which at 31st December, 2013 amounted to ₹ 80,000.

No further business transactions were entered into with any of these debtors during the year ended 31st December, 2014 but an amount of ₹ 90 was received from Roy's trustee in bankruptcy by way of a first dividend; a first and final dividend of ₹ 700 was received from the liquidator of Saha and Ghosh paid his debt in full. A further debt of ₹ 950 due from Sarkar proved to be bad.

On 31st December, 2014 Sri A K Sinha instructured his accountants to maintain the provision existing against Das's debt and to provide for the balance due from Roy, and to make further provision for doubtful debts due from Bose ₹ 190 and Ganguli ₹ 150. The other debtors amounted to ₹ 75,000 and the accountants were instructed to make the provision for doubtful debts equal to 5% of these debts.

Prepare Bad Debts Account and Provision for Doubtful Debts Account.

Dinesh Goel has an accounting year ending on 31st December. At 31.12.2013, the ledger contained the following balances:

Sundry Debtors ₹ 10,760; Provision for Doubtful Debts ₹ 1,260.

The provision for doubtful debts consists of a general provision of ₹ 500 and specific provision comprising :

A ₹ 320; B ₹ 180; and C ₹ 260.

The following transactions occurred during 2013 :

30th April A was declared bankrupt and a first dividend of ₹ 70 was received from the trustee.

15th June A debt of ₹ 210 due from D that is included in the debtors at 31.12.2013 was found to be bad.

3rd August B paid his debt in full.

7th October C was declared bankrupt and a first and final dividend of ₹ 110 was received from the estate.

The sundry debtors at 31.12.2014 were ₹ 12,610. This figure is after recording all money received but does not take into account any of the above bad debts.

The relevant specific provisions and a general provision for doubtful debts should be maintained at 31.12.2014.

You are required to prepare Bad Debts Account and Provision for Doubtful Debts Account.

Illustration 12

A trader had incurred a loss of ₹ 2,500 as bad debt during the year 2012 and then decided to create a provision for bad and doubtful debts at 5% on the good debtors amounting to ₹ 75,000 on 31st December, 2012.

During the year ended 31st December, 2013, his debtors worth ₹ 1,500 failed to pay their dues. On 31st December, 2013, his good debtors amounted to ₹ 40,000 and he decided to maintain the provision for bad and doubtful debts at 4% on Debtors. During 2014 his bad debts amounted to ₹ 3,000. He decided to increase the Provision for Bad and Doubtful Debts to 5% on good debtors, which amounted to ₹ 80,000 on 31st December, 2014.

Pass necessary Journal entries and show the Bad Debt Account Provision for Bad and Doubtful Debts Account and also appropriate entries in the Profit and Loss Account and Balance Sheet of 2012, 2013 and 2014.

		Sundry Debtors	₹ 80,000	
		Less: Prov. for Bad & Doubtful Debts @ 5%	₹ 4,000	76,000

Second Method

Under this method, a Bad Debts Account is opened and all bad debts are written off to it. At the end of each year, Bad Debts Account is closed by transferring to Profit and Loss Account. In the first year, a provision is created by debiting the Profit and Loss Account and it is carried to the next period. The amount of provision needed at the end of each subsequent year is established and necessary adjustment made to the balance on the Provision Account.

Journal Entries in the First Year

1. For the bad debts of the period for which no entry has been made

Bad Debts Account Dr.
To Sundry Debtors Account

2. For writing off bad debts in the Profit and Loss Account

Profit and Loss Account Dr.
To Bad Debts Account

3. When provision is created for the first time

Profit and Loss Account Dr.
To Provision for Bad and Doubtful Debts Account

The total charge to the Profit and Loss Account for the first year is thus the sum of the bad debts written off and the amount transferred to the Provision for Bad and Doubtful Debts Account.

Journal Entries in the Second and Subsequent Years

1. For the bad debts of the period for which no entry has been made

Bad Debts Account Dr.
  To Sundry Debtors Account

2. For writing off bad debts in the Profit and Loss Account

Profit and Loss Account Dr.
  To Bad Debts Account

3. For creating provision at the year end

(a) (Closing provision > Opening provision)

Profit and Loss Account Dr.
  To Provision for Bad and Doubtful Debts Account

(b) (Closing provision < Opening Balance)

Provision for Bad and Doubtful Debts Account Dr.
  To Profit and Loss Account

Unlike the first, this method shows the bad debts as well as provision for bad and doubtful debts in the Profit and Loss Account since the bad debts are not adjusted against the Provision for Bad and Doubtful Debts Account.

The Provision for Bad and Doubtful Debts Account is often labelled as Reserve for Bad and Doubtful Debts Account . This is wrong and causes confusion. The reserve is an appropriation of profit, a sum of money set aside from distributable profits after the profits have been calculated whereas a provision is a charge against profit (appears with Profit and Loss Account to assist in the calculation of a correct profit). The Provision for Bad and Doubtful Debts Account is purely in the nature of a suspended credit against doubtful customers.

Illustration 13

The figure of sundry debtors in a Trial Balance is ₹ 90,000. You are asked to write off ₹ 5,000 as bad debts and make a provision for doubtful debts @ 5% on sundry debtors. Pass the necessary Journal Entries and prepare the Ledger Accounts.

Solution

In the books of ...

Journal **Dr.** **Cr.**

Date	Particulars		L.F.	₹	₹
?	Bad Debt A/c	Dr.		5,000	
	To Sundry Debtors A/c				5,000
	(Being bad debt written off)				
?	Profit & Loss A/c	Dr.		5,000	
	To Bad Debt A/c				5,000
	(Being bad debt transferred to P & L Account)				
?	Profit & Loss A/c	Dr.		4,250	
	To Provision for Bad & Doubtful Debts A/c (Note 1)				4,250
	(Being the creation of necessary provision)				

Dr. **Bad Debts Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
?	To Sundry Debtors A/c	5,000	?	By Profit and Loss A/c	5,000

Dr. **Provision for Bad Debts Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
?	To Balance c/d	4,250	?	By Profit and Loss A/c	4,250

Working Note : (1) Provision for bad debts is to be calculated after writing off bad debts of ₹ 5,000 for sundry debtors of ₹ 90,000. Therefore, the amount of provision will be 5% of (₹ 90,000 – ₹ 5,000) = ₹ 4,250.

Illustration 14

Mr. X, a trader, had incurred a loss of ₹ 3,000 as bad debt during the year 2013, and then decided to create a Provision for Bad and Doubtful Debts at 5% on good debtors amounting to ₹ 50,000 on 31st December, 2013. During the year ended

31st December, 2014, the bad debts loss was ₹ 2014. On 31st December 2014 his good debtors amounted to ₹ 65,000 and decided to maintain the Provision for Bad and Doubtful Debts at 4%.

Pass the necessary Journal entries in the books of Mr. X for the year 2013 and 2014.

Illustration 15

You are given the following balances on 1st January, 2013 : Debtors—₹ 10,000; Provision for doubtful debts ₹ 400. You ascertain the following information :

Sales for the year 2013 (all on credit) : ₹ 1,00,000; Sales returns for the year 2013—₹ 1,000; Collection from debtors during 2013—₹ 90,000; Bad debt written off during 2013—₹ 500; Discount allowed during 2013—₹ 400.

At the end of 2013 the provision for doubtful debts is required to be 5% of debtors, after making a specific provision for a debt of ₹ 200 from a customer who has been declared bankrupt.

Sales for the year 2014 (90% on credit)—₹ 1,00,000; Sales returns for the year 2014 (90% relating to credit customers) —₹ 2,000; Collection from debtors during 2014—₹ 95,000; Debtors balances settled by contra against creditors balances during 2014—₹ 3,000; Bad debts written off during 2014 (including 50% of the debt due from the customer who had gone bankrupt), other 50% having been received in cash during 2014—₹ 1,500; Discount allowed during 2014—₹ 500. At the end of 2014, the provision for doubtful debts is still required to be 5% of debtors. You are required to write up the Sundry Debtors Account and the Provision for Doubtful Debts Account for the year 2013 and 2014.

"	To Balance c/d (Note 2)	315			
		1,095			1,095

Working Notes :

(1) On 31st December 2013, the balance of Sundry Debtors is ₹ 18,100. This amount includes ₹ 200 due from a debtor who has been declared bankrupt. Therefore, provision for doubtful debts is to be created 100% on ₹ 200 and 5% on ₹ (18,100 – 200). Total provision on 31st December 2013 = ₹ 200 + ₹ 895 = ₹ 1,095.

(2) On 31st December 2014, the balance of Sundry Debtor is ₹ 6,300. It does not include any balance due from bankrupt debtor. Therefore, provision is to be created @ 5% on ₹ 6,300, which is equal to ₹ 315.

Provision for Discount on Debtors

In a sales transaction, payment is made either at the point of sale or after a specified period of time. Since many sellers offer a cash discount (sales discount), if payment is made within a specified period of time, cash discounts allowed are conveniently treated as an expense of the period. The book value of the debtors may not be the net realizable value. Like Provision for Bad and Doubtful Debts, it is desirable to reduce the debtors figure by the amount of probable cash discount to be allowed. This is because, customers are always debited with the full amount invoiced at the time of sale, but credited with the discount when they earn it.

The difficulties, however, are that nobody knows how many debtors will take the opportunity of cash discount and, hence, discounts allowed to debtors are less predictive. (Here, we must mention that if the cash discount is not more than or equal to the opportunity cost of liquid fund, a majority of the debtors may not avail cash discount.) Therefore, all that is possible is to make a rough estimate based on a percentage of outstanding debtors. A separate 'Provision for Discount on Debtors Account' is opened, which is very similar to Provision for Bad and Doubtful Debts Account. The only difference is that provision for discount is calculated on the debtors' balance after deducting the Provision for Bad and Doubtful Debts. Like Provision for Bad and Doubtful Debts it is also shown in the Balance Sheet as a deduction from Sundry Debtors. Like the treatment of Bad Debts, the accounting treatment of Provision for Discount on Debtors allowed in the first year is different from the treatment in the 2nd and subsequent years.

Accounting Entries in the First Year

1. *When discount is allowed to debtors*

Discount Allowed Account Dr.
To Sundry Debtors Account

2. *For closing the discount allowed account against Profit and Loss Account*

Profit and Loss Account Dr.
To Discount Allowed Account

3. *When Provision is created for the first time*

Profit and Loss Account Dr.
To Provision for Discount on Debtors Account*

This figure will be calculated by applying a percentage on Sundry Debtors after adjusting bad debts (after Trial Balance) and Provision for Bad and Doubtful Debts (new).

Accounting Entries in the Second and Subsequent Years

1. *When discount is allowed*

Discount Allowed Account Dr.
To Sundry Debtors Account

2. *At the end of the accounting year the discount account is closed by passing the following entry:*

Provision for Discount on Debtors Account Dr.
To Discount Allowed Account

3. The balance left in the Provision for Discount on Debtors Account at the end of a period is adjusted with the provision required to be made for next financial year and accounting entry to be passed according to situation.

(i) If the required provision is more than the balance left:

Profit and Loss Account Dr.

To Provision for Discount on Debtors Account*

(ii) If the required provision is less than the balance left:

Provision for Discount on Debtors Account Dr.

To Profit and Loss Account

*This figure will be calculated as follows:

Closing Provision required	***
Add: Discount allowed during the period	***
	***
Less: Opening Provision	***
Amount to be provided	***

The Bad Debts (after Trial Balance), Provision for Bad and Doubtful Debts and Provision for Discount on Debtors together will appear in the Balance Sheet as follows:

		Less: Provision for Bad Debts	9,500	
			85,500	
		Less: Provision for Discount on Debtors	4,275	81,225

Working Notes :

(1) Provision for bad debts and provision for discount on debtors appearing in the Trial Balance represent opening provisions.

(2) Bad debts are increased to ₹ 10,000 (₹ 7,000 + ₹ 3,000) and discount allowed to ₹ 5,000 (₹ 3,000 + ₹ 2,000).
Following are the required Journal Entries.

Bad Debts Account	Dr.	₹ 3,000	
To Sundry Debtors Account			₹ 3,000
Discount Allowed Account	Dr.	₹ 2,000	
To Sundry Sundry Debtors Account			₹ 2,000

(3) The closing balance of sundry debtors becomes ₹ 95,000 [₹ (1,00,000 – 3,000 – 2,000)].

(4) Assumed accounting year begins on 1st January every year.

(5) Provision for discount on debtors is to be created @ 5% on (₹ 95,000 – ₹ 9,500) = ₹ 85,500.

Reserve for Discount on Creditors

If the firm is to allow cash discount to customers for early payments, it is quite possible that the firm may receive discount by making early payment which can be treated as income in the Profit and Loss Account. Such discount will be received in the next year but should be taken into account in current year's account because it relates to creditors of current year. Generally accepted accounting principles (also the concept of conservatism), state that we should provide a loss only when we apprehend that, but should never take a profit until it is actually made. ***It is seldom found in actual practice that a reserve has been created for discount to be received by making prompt payment to creditors (except in examination problems)***.

Journal Entries for Reserve for Discount on Creditors in the First Year

1. *When discount is received from the creditors*
   Sundry Creditors Account Dr.

2. *At the end of the accounting year, the discount received account is closed by transferring it to the Reserve for Discount on Creditors Account as under:*
   Discount Received Account Dr.
   To Reserve for Discount on Creditors Account

3. *For creating a Reserve for the next year*
   Reserve for Discount on Creditors Account Dr.
   To Profit & Loss Account*

*This is calculated as under:

Closing Reserve required	***
Add: Discount received during the year	***
	***
Less: Opening Balance of Reserve	***
Amount to be credited to P & L A/c	***

In the Balance Sheet, the Reserve for Discount on Creditors is shown by way of deduction from Sundry Creditors.

Balance Sheet As At ...

Sundry Creditors	...			
Less: Reserve for Discount on Creditors	...	...		

In regard to the provision for discount on debtors and reserve for discount on creditors, the following points are worth noting:

1. ***The basic source of accounting, the total of discount allowed and discount received are the two discount columns of the Cash Book.***
2. ***Like bad debts, the profit on a credit sale may be taken in one year but the discount allowed as expenses may be a charge against profit of the subsequent year. Similarly, the cost of total purchase may be charged against the profit in one period, but the gain arising out of discount received may be taken to credit in another accounting period.***

Recovery of Bad Debts

We have already mentioned that when the seller apprehends any loss due to bad debt, he immediately writes it off by debiting Bad Debt Account and crediting the Sundry Debtors Account. In case of bad debt, the seller takes the initiative for closing the account of the customer and he does it immediately. After writing off any bad debt, if any amount is received from that customer in respect of that old debt, it is called recovery of bad debt. Occasionally, sundry debtors that have been charged off as bad debts, are unexpectedly collected (generally in a subsequent accounting period). When any bad debt is recovered, the accounting entries are as follows:

1. *When the bad debt is recovered*

Bank Account Dr.
To Bad Debt Recovery Account

2. *For closing bad debt recovery*

(a) If the seller is maintaining a Provision for Bad and Doubtful Debts Account and adjusting the bad debt against such provision, the bad debt recovery should be closed by transferring it to the Provision for Bad Debt Account.

Bad Debt Recovery Account Dr.
To Provision for Bad and Doubtful Debts Account

(b) In all other cases, it should be transferred to Profit and Loss Account

Bad Debt Recovery Account Dr.
To Profit and Loss Account

Treatment of Bad Debt Recovery in the Books of the Buyer

1. If the account of the seller (in the buyer's book) has not been closed

Seller Account Dr.
To Bank Account

2. If the Seller's Account has been closed

Goodwill Account* Dr.

The following balances on accounts appeared in a company's Ledger at 30th September, 2012: (all figures in ₹)

Sundry Debtors Account—63,158; Sundry Creditors Account—32,000 Provision for bad debts—3,158; Reserve for discount receivable—800; Provision for discount allowable—1,500.

During the year to 30th September, 2013 the following summarized transactions occurred (all figures in ₹):

Sales on credit	5,50,000	Discount allowed to customers	12,790
Purchases on credit	2,76,000	Bad Debts written off against the provision	4,100
Sales returns	6,000	Amount recovered from debtor whose debt had been written off as bad in previous years	542
Purchases returns	4,000	Debtor and creditor accounts settled by setting off one against the other	4,000
Cash received from customers (excluding bad debt recovered)	5,14,268		
Cash paid to suppliers	2,58,100	Discount received from suppliers	5,900

The company's policy is to pass all transactions for bad debts written off and recovered through the provision for bad debts account, and to make the provision at the year-end equal to 5% of the debtors. The company also makes provisions for discounts allowable equal to 2.5% of the year-end debtors minus the provision for bad debts, and for discount receivable equal to 2.5% of the year-end creditors.

You are required to enter the above information in the following Ledger Accounts, to carry down the balances at 30th September, 2013, and in the case of (c), (d) and (e), show the amount transferred to Profit and Loss Account:

(i) Sundry Debtors Account;

(ii) Sundry Creditors Account;

(iii) Provisions for Bad Debts Account;

(iv) Reserve for Discount Receivable Account; and

(v) Provision for Discount Allowable Account.

Date	Particulars	₹	Date	Particulars	₹
2014 ?	To Sundry Debtors A/c (₹ 1200+300+200)	1,700	2014 Dec. 31	By Provision for Doubtful Debts	1,700

Dr. **Provision for Doubtful Debts Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014 Dec.31	To Bad Debt A/c	1,700	2014 Jan 1	By Balance b/f (₹ 1,500 + 400 + 250)	2,150
	To Balance c/d (₹ 800 + 900 + 1,000)	2,700	Dec.31	By Bad Debt Recovery A/c	1,800
				By Profit & Loss A/c	450
		4,400			4,400

Note: Amount realised from past bad debts should be credited to Provision for Bad and Doubtful Debts Account. Alternatively, it can be credited to Profit and Loss Account.

Illustration 21

On January 1, 2014 the Provision for Bad and Doubtful Debts Account of a concern showed a balance of ₹ 60,000 and the Debtors amounted to ₹ 15,00,000. Out of these, during 2014, Debtors amounting to ₹ 10,75,000 paid in full, but the following debts proved bad or doubtful: A (₹ 20,000)—bad to the full extent; B (₹ 40,000)—insolvent, estate expected to pay 50 paise in the rupee; C (₹ 12,000)—realised 33.1/3 % in full settlement.

The remaining debts were considered somewhat doubtful on December 31. The following further debts became due during 2014 but outstanding on December 31:

D (₹ 20,000)—expected to prove totally bad; E (₹ 80,000)—expected to prove 5% bad; F (₹ 6,40,000)—expected to prove 4% bad; G (₹ 4,00,000)—expected to prove bad to some extent; H (₹ 12,60,000)—expected to prove wholly good.

It was decided to write off actual debts and to make reserve of 5% on debts of unknown doubtful nature. Draw up the Provision for Bad and Doubtful Debts Account and show the balance of the account as at December, 31,2014.

Solution

Calculation of Actual Bad Debts

Amount due from A (fully bad)	₹ 20,000
Amount due from C (2/3 bad)	8,000
	28,000

Creation of Provision

50% amount due from B	20,000
Full amount due from D	20,000
5% amount due from E	4,000
4% amount due from F	25,600
5% amount due from others*	37,650
	1,07,250

Calculation of Other Debtors*

Debtor at the beginning	15,00,000
Less: Paid during the year	10,75,000
	4,25,000
Less: Amount due from A, B and C	72,000
	3,53,000
Add: Amount due from G	4,00,000
	7,53,000

			2015 Jan.1	By Balance b/f	1,07,250

Illustration 22

On 31.12.2013, the Trial Balance of G. Gupta contained the following Ledger Balances:

Provision for Bad and Doubtful Account (1.1.2013) was ₹ 1,000. Provision for Discount on Debtors Account (1.1.2013) was ₹ 4,750. Sundry Debtors Account was ₹ 40,400 (of the Debtors, ₹ 400 are bad and should be written off).

On 31.12.2014, the Sundry Debtors Account was ₹ 20,500 (of which ₹ 500 are bad and should be written off). It is desired to maintain the Provision for Bad and Doubtful Debts Account at 5% on Sundry Debtors and the Provision for Discount on Debtors at 2.5%. Show by means of Ledger Accounts how the Provision for Bad and Doubtful Debts Account and the Provision for Discount on Debtors Account will appear in the books of G. Gupta for the year 2013 and 2014 and bring down the balance on 1.1.2013.

Solution

In the Books of G. Gupta

Key Points

- A ***reserve*** is an amount of profit set aside until it is needed for some particular purpose.
- ***Reserves*** are generally classified into: (a) Capital Reserves and (b) Revenue Reserves.
- A ***provision*** is a charge against profit for the purpose of providing for any liability or loss.

THEORETICAL QUESTIONS

1. Define the following:
   (a) Reserve; (b) Reserve Fund; (c) Capital Reserve; (d) Specific Reserve; (e) General Reserve; and (f) Secret Reserve.
2. Distinguish between the following:
   (a) Reserves and Provisions; (b) Capital Reserves and Revenue Reserves; (c) General Reserves and Specific Reserves; (d) Reserve and Reserve Fund.
3. Is reserve a charge against profit or an appropriation of profits? Discuss.
4. What do you mean by Provision for Bad and Doubtful Debts? Justify its creation.
5. What are Bad Debts and how are they treated? In this context, explain the way in which provisions are created for such a contingency.
6. Why should provisions for discounts be provided for? Explain fully its working.

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each sentence or answer each question below.

1. The term 'provision' is generally used to indicate known :
   A depreciation
   B losses
   C none of these
2. Reserves are the items of :
   A current liabilities
   B owners' equity
   C none of these
3. Reserves arise from capital receipts are known as :
   A capital reserve
   B reserve fund
   C none of these
4. Provisions are :
   A external transactions
   B internal transactions
   C none of these.

5. Reserves that are created are mostly :
   A general
   B specific
   C none of these.
6. Goods are sold on credit to —
   A known customers
   B unknown customers
   C employees.

PRACTICAL QUESTIONS

1. On 1.1.2012 M/s A & Co had a provision for bad debts of ₹ 10,880. The bad debts during the year 2012 amounted to ₹ 9,040. The debtors as at 31.12.2012 were ₹ 2,24,000. Provision for bad debts @ 5% is maintained by the business. Bad debts during 2013 and 2014 were ₹ 11,680 and ₹ 4,160 respectively. The sundry debtors as at 31.12.2013 and 31.12.2014 were ₹ 2,88,000 and ₹ 1,36,000 respectively.

   Prepare necessary Ledger Accounts in the books of M/s A & Co. Also show how these would appear in the Profit and Loss Account and Balance Sheet for the year 2012 to 2014.
2. A provision for bad and doubtful debts, equal to five per cent of debtors, is created every year-end by a business concern. From the particulars given below, write up the Provision for Bad and Doubtful Debts Accounts for five consecutive years, assuming that accumulated bad debts are, for their necessary adjustment, transferred to the said provision account each year before the new provision is made for the next year: Balance extracted from the Trial Balance:

Years	1st	2nd	3rd	4th	5th
Sundry Debtors (₹)	45,000	48,500	56,800	62,000	58,400
Bad Debts written off (₹)	1,800	2,000	4,000	2,700	2,800
Past Bad Debts recovered (₹)	—	—	—	520	—
Closing Adjustments : Bad Debts written off (₹)	200	140	420	260	300

   Balance of the Provision for Bad and Doubtful Debts Account at the beginning of the 1st year was ₹ 2,500.
3. Docks Limited, a window replacement company, offers fairly generous credit terms to its high risk customers. Provision is made for bad debts at a varying percentage based on the level of outstanding trade debtors, and an assessment of general economic circumstances, resulting in the following data for the last three accounting periods:

Year to 31st March	2012	2013	2014
Trade Debtors at the year end (before allowing for any bad debts) (₹)	1,86,680	1,41,200	2,06,200
Estimated Bad Debts (companies in liquidation) (₹)	1,680	1,200	6,200
Provision for Bad Debts	10%	12.5%	15%

   The provision for Bad Debts at 1st April, 2011 amounted to ₹ 13,000.

   Required:

   (a) Prepare the Provision for Bad Debts Account for each of the three years to 31st March 2012, 2013 and 2014 respectively, showing how the balances would appear on the Balance Sheets at these dates.

   (b) Assuming that a debt of ₹ 1,000 written off as bad in 2012 was subsequently recovered in cash in 2013, state briefly how this would have affected the profit for the year to 31st March, 2012, and also how it would be treated in the accounts for the year to 31st March, 2013.
4. Certain Balances in a company's ledger at 30th June, 2014 were: (all figures in rupees)

   Debtors—20,000; Provision for bad debts—1,000; Stock of coke—630; Electricity accrued—920.

During the year to 30th June, 2015 the following transaction occurred:	₹
Sales on credit	2,00,000
Cash received from Debtors	1,93,000
Certain debtors became bankrupt, and their debts were written off against the provision	3,000
Certain debts which had been written off as bad in previous years were recovered in cash and transferred to the provision	1,000
Purchases of coke	8,000
Payments for electricity for the year ended 30th April, 2015	6,000

   At 30th June, 2015, the stock of coke was valued at ₹ 750, and the provision for bad debts was adjusted to be equal to 5% of the Debtors. On 6th August, 2015, the Company paid its electricity account of ₹ 1,010 for the quarter ended 31st July, 2015.

   You are required to show the debtors and provision for bad debts accounts in the company's Ledger for the year ended 30th June, 2015.

5. Theta Ltd. in a business which acts as a distributor of washing machines entirely on credit term to a wide range of customers. The following balances were extracted from its ledgers at 30th June, 2015: (all figures in ₹)

Sales	7,23,869	Cash received from debtors	6,88,267
Creditors – Balance at 30th June, 2014	49,781	Cash paid to creditors	3,21,853
Debtors – Balance at 30th June, 2014	84,611	Returns inwards	36,925
Purchases of washing machines	3,42,916	Carriage outwards	5,264
Discounts allowed	8,214	Overdraft interest	12,748
Discounts received	6,978	Provision for Doubtful debts as on 30.6.2014	4,813

Subsequent enquiries reveal the following information:

A cheque for ₹ 1,246 from A. Brown, a customer, has been returned by the bank marked 'refer to drawer'. Bad Debts totalling ₹ 6,854 are to be written off, and the provision for doubtful debts is to be raised to 8% of the debtor balances at 30th June, 2015. On the last day of the year a cheque is received for ₹ 1,000 from the liquidator of J. Smith Ltd. This customer had owed Theta Ltd ₹ 7,500 when it ceased to trade in March 2012, and the debt had been written off as a bad debt in the year ended 30th June, 2014. No entry in respect of this cheque has yet been made in the books.

You are required to write up for the year ended 30th June, 2015: (a) The Sundry Debtors Account; (b) The Provision for Bad and Doubtful Debts Account; and, (c) Show the Balance Sheet entry for debtors as at that date.

6. X Company Ltd maintains provisions for bad debts at 5% and a provision for discounts at 2.5%. The company also maintains a reserve for discounts on creditors at 2%.

From the following particulars, write up the Provision Accounts : (a) Provision for Bad Debts—₹ 10,000; (b) Provision for Discount on Debtors—₹ 5,000; (c) Reserve for Discount on Creditors—₹ 4,000.

Total Debtors as on 31.12.2013 were ₹ 2,40,000 after writing off bad debts ₹ 6,000 and allowing discount ₹ 2,000. On 31.12.2014, the total Debtors were ₹ 2,00,000 after writing off bad debts ₹ 1,000 and allowing discounts ₹ 500.

The creditors as on 31.12.2013 and 31.12.2014 were ₹ 1,00,000 and ₹ 1,50,000 respectively. Discount received during each of the years amounted to ₹ 500, ₹ 3,000 respectively.

7. The following details as to bad and doubtful debts are extracted from the books of the Nellore Co. Ltd:

December 31, 2012 – Bad debts to be written off: Chandu ₹ 60; Ehsan ₹ 95; both being totally irrecoverable. Five per cent is to be provided for bad and doubtful debts on ₹ 1,100 that being the total amount owing by the debtors then outstanding.

December 31, 2013 – Five per cent is to be provided for bad and doubtful debt ₹ 2,500, that being the total amount owing by the debtors then outstanding.

December 31, 2014 – Bad debts to be written off : Ganesh ₹ 60; Lodha ₹ 50; Five per cent is to be provided for bad and doubtful debts on ₹ 1,500 that being the total amount owing by the debtors then outstanding.

You are required to show the Ledger entries involved in the following accounts:
(a) Bad Debts Account; and (b) The Provision for Bad and Doubtful Debts Accounts.

8. The firm had the following balances on January 1, 2013 : (a) Provision for Bad and Doubtful Debts—₹ 2,500; (b) Provision for Discount on Debtors—₹ 1,200; and, (c) Reserve for Discount on Creditors—₹ 1,000

During the year, bad debts amounted to ₹ 2,000, discount allowed were ₹ 100 and discount received were ₹ 200. During 2014 bad debts amounting to ₹ 1,000 were written off while discount allowed and received were ₹ 2,000 and ₹ 500 respectively. Total Debtors on December 31, 2013 were ₹ 48,000 before writing off bad debts but after allowing discounts. On December 31, 2014, the amount was ₹ 19,000 after writing off the bad debts but before allowing discounts. Total creditors of these two dates were ₹ 20,000 and ₹ 25,000 respectively.

It is the firm's policy to maintain a provision of 5% against bad and doubtful debts and 2% for discount on debtors and a reserve for discount on creditors @ 3%. Show : (a) Provision for Bad and Doubtful Debts Account; (b) Provision for Discount on Debtors Account; and (c) Reserve for Discount on Creditors Account.

9. On 1.1.2012 the Provision for Doubtful Debts Account in the books of S. Soman, stood at ₹ 1,200 and the Provision for Discount on Debtors Account at ₹ 150.

On 31.12.2012, the Sundry Debtors were ₹ 20,400 of which ₹ 400 are bad and are to be written off. The discount allowed to Debtors during 2012 were ₹ 300.

On 31.12.2013, the Sundry Debtors were ₹ 10,100 of which ₹ 100 are bad and to be written off. The discount allowed to debtors during 2013, were ₹ 50. On 31.12.2014 the Sundry Debtors were ₹ 36,200 of which ₹ 200 are bad and are to be written off. The discount allowed to Debtors during 2014 was ₹ 50.

It is desired to maintain aprovision for doubtful debts at 5% on Sundry Debtors and a provision for discount on debtors at 2% on Debtors. Show how the Provision for Doubtful Debts Account and the Provision for Discount on Debtors Account would appear in the ledger of S .Soman for the year 2012, 2013 and 2014, bringing down the balance on 1.1.2015.

10. A Company maintains its Provision for Bad Debts @ 5% and Provision for Discount on Debtors @ 2%. You are given the following details:

Year	2013	2014
Bad Debts (₹)	800	1,500
Discount Allowed (₹)	1,200	500
Recovery of Bad Debts written off in earlier years (₹)	500	300

Sundry Debtors (before writing off Bad Debts and Discounts) amounted to ₹ 60,000 on 31st December, 2013, and ₹ 42,000 on 31st December, 2014. On 1st January, 2013, Provision for Bad Debts and Provision for Discount on Debtors had balances of ₹ 4,550 and ₹ 800 respectively. Show the Provision for Bad Debts Account and Provision for Discount on Debtors Account for 2013 and 2014.

11. A trader maintained Provision for Doubtful Debts @ 5%; a Provision for Discount @ 2% on Debtors; and Reserve for Discount @ 2% on Creditors, which on 1st January, 2013 stood at ₹ 1,500, ₹ 500 and ₹ 400 respectively. His balances on 31.12.2013 and on 31.12.2014 were: (all figures in ₹)

	31.12.2013	31.12.2014
Bad Debts written off	1,800	300
Discount allowed	600	200
Sundry Debtors	20,000	6,000
Discount received	300	50
Sundry Creditors	15,000	10,000

Show necessary accounts in the ledger.

Capital and Revenue

Capital and Revenue — Income and Expenditure

Meaning of Capital Expenditure

Capital expenditure is the money spent on buying fixed assets or adding to their value. These assets are expected to provide benefits to the business for more than one accounting period. Purchase of land or cost of extentions of existing building are examples of capital expenditure.

Capital expenditure is debited to a fixed asset account which appears on the Balance Sheet. Therefore, it is an expenditure on assets which is not written off completely against income in the accounting period in which it is incurred. A capital expenditure has the following characteristics :

(1) The amount involved in such an expenditure is generally large;
(2) The benefit accruing from such an expenditure is available for more than one accounting period;
(3) The expenditure is of non-recurring nature.
(4) It results in an increase in the value of fixed assets already possessed (for example development of property).

Meaning of Revenue Expenditure

Any form of income is called revenue, but, the term 'revenue' refers to either income or expenditure. Revenue income implies profit, whereas revenue expenditure is the money spent on running the business on a day-to-day basis. Salaries paid to the employees and payment for miscellaneous expenses are the examples of revenue expenditure. Therefore, a revenue expenditure is incurred to carry on the normal course of business and maintain the fixed assets in good condition. Since a revenue expenditure is of benefit for the current accounting period only, it is debited to an expense account which is ultimately transferred to the Trading Account or Profit and Loss Account.

A revenue expenditure has the following characteristics :

(1) The amount involved in such an expenditure is relatively small;
(2) The benefit accruing from such an expenditure is available for one accounting period only;
(3) The expenditure is of recurring nature.
(4) It is incurred in pursuance of trading activities.

Necessity for Distinction Between Capital Expenditure and Revenue Expenditure

The distinction between capital expenditure and revenue expenditure is necessary, because of the following :

1. The distinction affects the measurement of profit in a number of accounting periods.
2. The distinction also affects the valuation of assets in the Balance Sheet.
3. Capital expenditure results in the acquisition of fixed assets, whereas revenue expenditure represents the expenses incurred in the business.
4. Accrual basis of accounting requires a clear distinction between capital and revenue expenditure.
5. The accounting treatment of capital expenditure and revenue expenditure is different.
6. Capital expenditures appear in the Balance Sheet as an asset, whereas revenue expenditures appear in the Profit and Loss Account as expenses.
7. Most of the capital expenditures of a business become revenue expenditures (for example, charging of depreciation on fixed assets).
8. Some revenue expenditures eventually become a capital expenditure (for example, heavy advertisement expenses carried forward to next period).
9. Capital expenditure increases the revenue earning capacity of the business. But revenue expenditure maintains that.
10. Capital expenditure may add to the value of an existing asset, while the revenue expenditure can decrease the value of net assets.

Distinction Between Capital Expenditure and Revenue Expenditure

	Capital Expenditure		Revenue Expenditure
1.	It is the outflow of money to acquire fixed assets of a business or adding to their value.	1.	It is the outflow of money to meet running expenses of a business.
2.	It is always an external transaction.	2.	It may be internal (e.g., depreciation) or external transaction.
3.	It is debited to an asset account.	3.	It is debited to an expense account.
4.	It is a real account.	4.	It is a nominal account.
5.	It is incurred for more than one accounting period.	5.	It is incurred for a particular accounting period.
6.	It finds a place in the Balance Sheet.	6.	It finds a place in the Trading Account or Profit and Loss Account.
7.	It is of non-recurring nature.	7.	It is of recurring nature.
8.	All capital expenditures eventually become revenue expenditures.	8.	Revenue expenditures do not generally become capital expenditures.
9.	Capital expenditures are not matched against capital receipts.	9.	All revenue expenditures are matched against revenue receipts.
10.	It does not affect the profit for an accounting period directly.	10.	It directly affects the profit for an accounting period.
11.	It does not affect the net worth of a business.	11.	It directly affects the net worth of a business.
12.	It may be incurred before or after the commencement of the business.	12.	It is always incurred after the commencement of the business.

Rules For Determining Capital Expenditure

An expenditure can be recognised as capital if it is incurred for the following purposes:

1. An expenditure incurred for the purpose of acquiring long term assets (useful life is at least more than one accounting period) for use in business to earn profits and not meant for resale, will be treated as a capital expenditure. For example, if a second hand car dealer buys a piece of furniture with a view to use it in business, it will be a capital expenditure. But if he buys second hand cars, it will be a revenue expenditure because he deals in second hand cars.

2. When an expenditure is incurred to improve the present condition of an existing fixed asset that enhances its value to the business, e.g., by increasing its capacity, effectiveness or useful life; or putting an old asset into working condition, is recognised as a capital expenditure. The expenditure is capitalised and added to the cost of the asset. Likewise, any expenditure incurred to put an asset into working condition is also a capital expenditure. For example, if one buys a machine for ₹ 5,00,000, and pays ₹ 20,000 as transportation charges and ₹ 40,000 as installation charges, the total cost of the machine comes upto ₹ 5,60,000. Similarly, if a building is purchased for ₹ 1,00,000 and ₹ 5,000 is spent on registration and stamp duty, the capital expenditure on the building stands at ₹ 1,05,000.
3. If an expenditure is incurred, to increase earning capacity of a business, it will be considered as of capital nature. For example, expenditure incurred for shifting the factory for easy supply of raw materials. Here, the cost of such shifting will be a capital expenditure.
4. Wages paid to the firm's own employees engaged on the erection work of a machine or building extention is also capital expenditure and should be debited to the cost of the asset.
5. Preliminary expenses incurred before the commencement of business is considered capital expenditure. For example legal charges paid for drafting the memorandum and articles of association of a company or brokerage paid to brokers, or commission paid to underwriters for raising capital.

Thus, one useful way of recognising an expenditure as capital is to see that the business will own something which qualifies as an asset at the end of the accounting period.

Examples of Capital Expenditure

(1) Purchase of land, building, machinery or furniture;
(2) Cost of leasehold land and building;
(3) Cost of acquisition of long-term rights and benefits (e.g., patents, copyrights);
(4) Preliminary expenditures;
(5) Cost of additions or extensions to existing assets;
(6) Cost of overhauling second-hand machines;
(7) Expenditure on putting an asset into working condition; and
(8) Cost incurred for increasing the earning capacity of a business.

Rules For Determining Revenue Expenditure

Any expenditure which cannot be recognised as capital expenditure can be termed as revenue expenditure. A revenue expenditure temporarily influences only the profit earning capacity of the business. An expenditure is recognised as revenue when it is incurred for the following purposes:

1. Expenditure for day-to-day conduct of the business, the benefits of which last less than one year. Examples are wages of workmen, interest on borrowed capital, rent, selling expenses, and so on.
2. Expenditure on consumable items, on goods and services for resale either in their original or improved form. Examples are purchases of raw materials, office stationery, and the like. At the end of the year, there may be some revenue items (stock, stationery, etc.) still in hand. These are generally passed over to the next year though they were acquired in the previous year.
3. Expenditures incurred for maintaining fixed assets in working order. For example, repairs, renewals and depreciation.

From the above, we can see that any expenditure which is incurred in the process of earning of the profits is a revenue expenditure. It is incurred to maintain the earning capacity of the business unit including the maintenance of the fixed assets.

It should be noted that revenue expenditure is transferred to the Trading or Profit and Loss Account only to the extent to which goods or services bought have been consumed. For example, the purchase of goods for reale is a revenue expenditure, but only the cost of goods sold is transferred to the Trading Account. Again, the payment of an insurance premium would be revenue expenditure, but only that part of it that had expired would be transferred to the Profit and Loss Account.

Examples of Revenue Expenditure

(1) Salaries and wages paid to the employees;
(2) Rent and rates for the factory or office premises;
(3) Depreciation on plant and machinery;
(4) Consumable stores;
(5) Inventory of raw materials, work-in-progress and finished goods;
(6) Insurance premium; and
(7) Taxes and legal expenses.

Joint Expenditure

Sometimes one item of expenditure will need dividing between capital expenditure and revenue expenditure.

A civil contractor was engaged to tackle some work on building, the total bill being for ₹ 30,000. If two-thirds of this was for improvements and one-third for repair work, ₹ 20,000 should be treated as capital expenditure and, therefore, should be added to the value of the building and shown as such in the Balance Sheet. The balance of ₹ 10,000 should be treated as revenue expenditure and charged to the Profit and Loss Account.

Capitalised Expenditure

To capitalise means to treat expenditure as if it were for the purchase of a fixed asset. Capitalised expenditures represent certain types of revenue expenditures, whose usefulness does not expire in the year of their occurrence. The benefit generally expires in the near future. These types of revenue expenditures are treated as assets on the Balance Sheet. They are written off in future accounting periods by the process of depreciation. If we undertake substantial repairs to the existing building, the deterioration of the premises may be avoided. We may employ our own employees to do that work and pay them at current wage rates, which is of a revenue nature. The benefit of such revenue expenditure will not expire in the current year but it will be enjoyed for a number of accounting years. Therefore, the entire expenditure is added to the asset account and is known as capitalised expenditure. The other examples of capitalised expenditure are wages paid for the installation of machinery, interest paid before the commencement of the business etc.

Capital and Revenue Receipts

A receipt of money may be of a capital or revenue nature. A clear distinction, therefore, should be made between capital receipts and revenue receipts.

A receipt of money is considered as capital receipt when a contribution is made by the proprietor towards the capital of the business or a contribution of capital to the business by someone outside the business. Capital receipts do not have any effect on the profits earned or losses incurred during the course of a year. Capital receipts can take one or more of the following forms:

1. Additional capital introduced by the proprietor; by partners, in case of partnership firm, by issuing fresh shares, in case of a company; and,
2. By selling assets, previously not intended for resale.

A receipt of money is considered as revenue receipt when it is received from customers for goods supplied, or fees received for services rendered in the ordinary course of business, which is a result of the firm's activity in the current period. Receipts of money in the revenue nature increase the profits or decrease the losses of a business and must be set against the revenue expenses in order to ascertain the profit for the period.

The following are the points of distinction between capital receipts and revenue receipts :

Sl. No.	Capital Receipts	Sl. No.	Revenue Receipts
1.	Capital receipts are not available for distribution as profits.	1.	Revenue receipts are available for distribution as profits only after deducting revenue expenses.
2.	Capital receipts cannot be utilised for creating a reserve fund.	2.	Revenue receipts can be utilised for creating a reserve fund after deducting revenue expenses.

3.	A business can survive without any capital receipts during an accounting period.	3.	The survival of a business mainly depends on the revenue receipts during an accounting period.
4.	Capital receipts are the sources for creating capital reserves.	4.	Revenue receipts are the sources for creating revenue reserves.

Capital and Revenue Profits

While ascertaining the trading profit of a business for a particular period, a proper distinction is to be made between capital and revenue profits. If a profit arises out of an ordinary nature, being the outcome of the ordinary function and object of the business, it is termed as 'revenue profit'. But, when a profit arises out of a casual and non-recurring transaction, it is termed as capital profit. Revenue profit arises out of the sale of the merchandise that the business deals in.

Generally, capital profits arise out of the sale of assets other than inventory at a price more than its book value or in connection with the raising of capital or at the time of purchasing an existing business. For example, if an asset, whose book value is ₹ 5,000 on the date of sale, is sold for ₹ 6,000—₹ 1,000 will be considered as capital profit. Likewise, issue of shares at a premium is also a capital profit. Revenue profits are distributed to the owners of the business or transferred to General Reserve Account, being shown in the balance sheet as a retained earning. Capital profits are generally capitalised—transferred to a capital reserve account which can only be utilised for setting off capital losses in future. Capital profits of a small amount (arising out of selling of one asset) is taken to the Profit and Loss Account and added with the revenue profit—*applying the concept of materiality.*

Capital and Revenue Losses

While ascertaining profit, revenue losses are differentiated from capital losses, just as revenue profits are distinguished from capital profits. Revenue losses arise from the normal course of business by selling the merchandise at a price less than its purchase price or cost of goods sold or where there is a decline in the current value of inventories. Capital losses may result from the sale of assets, other than inventory for less than written down value or the diminution or elimination of assets other than as the result of use or sale (flood, fire, etc.) or in connection with raising capital of the business (issue of shares at a discount) or on the settlement of liabilities for a consideration more than its book value (debenture issued at par but redeemed at a premium). Treatment of capital losses are same as that of capital profits. Capital losses arising out of sale of fixed assets generally appear in the Profit and Loss Account (being deducted from the net profit). But other capital losses are adjusted against the credit balance of capital profits. Where the capital losses are substantial, the treatment is different. These losses are generally shown on the balance sheet as fictitious assets and the common practice is to spread that over a number of accounting years as a charge against revenue profits till the amount is fully exhausted.

Illustration 1

State whether the following are capital, revenue or deferred revenue expenditure.

(i) Carriage of ₹ 7,500 spent on machinery purchased and installed.
(ii) Heavy advertising costs of ₹ 20,000 spent on the launching of a company's new product.
(iii) ₹ 200 paid for servicing the company vehicle, including ₹ 50 paid for changing the oil.
(iv) Construction of basement costing ₹ 1,95,000 at the factory premises.

Solution

(i) Carriage of ₹ 7,500 paid for machinery purchased and installed should be treated as a ***Capital Expenditure***.
(ii) Advertising expenses for launching a new product of the company should be treated as a ***Deferred Revenue Expenditure***.
(iii) ₹ 250 paid for servicing and oil change should be treated as a ***Revenue Expenditure***.
(iv) Construction cost of basement should be treated as a ***Capital Expenditure***.

Illustration 2

State whether the following are capital or revenue expenditure.

(i) Paid a bill of ₹ 10,000 of Mr. Kumar, who was engaged as the erection engineer to set up a new automatic machine costing ₹ 20,000 at the new factory site.

(ii) Incurred ₹ 26,000 expenditure on varied advertisement campaigns undertaken yearly, on a regular basis, during the peak festival season.

(iii) In accordance with the long-term plan of providing a well- equipped Labour Welfare Centre, spent ₹ 90,000 being the budgeted allocation for the year 2010.

Solution

(i) Expenses incurred for erecting a new machine should be treated as a ***Capital Expenditure***.
(ii) Advertisement expenses during peak festival season should be treated as a ***Revenue Expenditure***.
(iii) Expenses incurred for Labour Welfare Centre should be treated as a ***Capital Expenditure***.

Illustration 3

Classify the following items as capital or revenue expenditure : (i) An extension of railway tracks in the factory area; (ii) Wages paid to machine operators; (iii) Installation costs of new production machine; (iv) Materials for extensions to foremen's offices in the factory; (v) Rent paid for the factory; (vi) Payment for computer time to operate a new stores control system; (vii) Wages paid to own employees for building the foremen's offices. Give reasons for your classification.

Solution

(i) Expenses incurred for extension of railway tracks in the factory area should be treated as a ***Capital Expenditure*** because it will benefit the business for more than one accounting period.
(ii) Wages paid to machine operators should be treated as a ***Revenue Expenditure*** because it will benefit only the current period.
(iii) Installation costs of new production machine should be treated as a ***Capital Expenditure*** because it will benefit the business for more than one accounting period.
(iv) Materials for extensions to foremen's offices in the factory should be treated as a ***Capital Expenditure*** because it will benefit the business for more than one accounting period.
(v) Rent paid for the factory should be treated as a ***Revenue Expenditure*** because it will benefit only the current period.
(vi) Payment for computer time to operate a new stores control system should be treated as ***Revenue Expenditure*** because it has been incurred to carry on the normal business.
(vii) Wages paid for building foremen's offices should be treated as a ***Capital Expenditure*** because it will benefit the business for more than one accounting period.

Illustration 4

For each of the cases numbered (i) to (iv) below, indicate whether the income/expenditure is ***capital*** or ***revenue***.

(i) Payment of wages to one's own employees for building a new office extension.
(ii) Regular hiring of computer time for the preparation of the firm's accounts.
(iii) The purchase of a new computer for use in the business.
(iv) The use of motor vehicle, hired for five years, but paid at every six months.

Solution

(i) Payment of wages for building a new office extension should be treated as a ***Capital Expenditure***.
(ii) Computer hire charges should be treated as a ***Revenue Expenditure***.
(iii) Purchase of computer for use in the business should be treated as a ***Capital Expenditure***.
(iv) Hire charges of motor vehicle should be treated as a ***Revenue Expenditure***.

Illustration 5

State with reasons whether the following are capital or revenue expenditure:

(1) Freight and cartage on the new machine ₹ 150, and erection charges ₹ 500.
(2) Fixtures of the book value of ₹ 2,500 sold off at ₹ 1,600 and new fixtures of the value of ₹ 4,000 were acquired, cartage on purchase ₹ 5.
(3) A sum of ₹ 400 was spent on painting the factory.
(4) ₹ 8,200 spent on repairs before using a second hand car purchased recently, to put it in usable condition.

Solution

(1) Freight and cartage totalling ₹ 650 should be treated as a ***Capital Expenditure*** because it will benefit the business for more than one accounting year.
(2) Loss on sale of fixtures ₹ (2,500 – 1,600) = ₹ 900 should be treated as a ***Capital Loss***. The cost of new fixtures and carriage thereon should be treated as a ***Capital Expenditure*** because the fixture will be used for a long period.
(3) Painting of the factory should be treated as a Revenue Expenditure because it has been incurred to maintain the factory building.
(4) Repairing cost of second hand car should be treated as a ***Capital Expenditure*** because it will benefit the business for more than one accounting year.

Illustration 6

State the nature (capital or revenue) of the following expenditure which were incurred by Harikishore & Co. during the year ending 30th June, 2010:

(i) ₹ 350 was spent on repairing a second hand machine which was purchased on 8th July, 2009 and ₹ 200 was paid on carriage and freight in connection with its acquisition.
(ii) A sum of ₹ 500 was paid as compensation to two employees who were retrenched.
(iii) ₹ 150 was paid in connection with carriage on goods purchased.
(iv) ₹ 20,000 customs duty is paid on import of a machinery for modernisation of the factory production during the current year and ₹ 6,000 is paid on import duty for purchase of raw materials.
(v) ₹ 18,000 interest had accrued during the year on term loan obtained and utilised for the construction of factory building and purchase of machineries; however, the production has not commenced till the last date of the accounting year.

Solution

(i) Repairing and carriage totalling ₹ 550 for second hand machine should be treated as a ***Capital Expenditure***.
(ii) Compensation paid to employees shall be treated as a ***Revenue Expenditure***.
(iii) Carriage paid for goods purchased should be treated as a ***Revenue Expenditure***.
(iv) Customs duty paid on import of a machinery should be treated as a ***Capital Expenditure***. However, import duty paid for raw materials should be treated as a ***Revenue Expenditure***.
(v) Interest paid during pre-construction period should be treated as a ***Capital Expenditure***.

Illustration 7

State with reasons whether the following items relating to Sitalpur Sugar Mill Ltd. are capital or revenue:

1. A truck costing ₹ 1,00,000 and standing in the books at ₹ 60,000 was sold for ₹ 70,000.
2. ₹ 50,000 received from issue of shares including ₹ 10,000 by way of premium.
3. Purchased agricultural land for the mill for ₹ 60,000. ₹ 500 also paid for land revenue.
4. ₹ 5,000 paid as contribution to PWD for improving roads of sugar producing area.
5. ₹ 40,000 paid for exise duty on sugar manufactured.
6. ₹ 70,000 spent for constructing railway siding.

Solution

(i) Profit on sale of truck ₹ 10,000 should be treated as a ***Capital Profit.***
(ii) ₹ 40,000 (₹ 50,000 – ₹ 10,000) received from issue of shares will be treated as a ***Capital Receipt***. The premium of ₹ 10,000 should be treated as a ***Capital Profit.***
(iii) Cost of land ₹ 60,000 will be treated as a ***Capital Expenditure*** and land revenue of ₹ 500 will be treated as a ***Revenue Expenditure.***
(iv) Contribution paid to PWD should be treated as a ***Revenue Expenditure.***
(v) Excise duty of ₹ 40,000 should be treated as a ***Revenue Expenditure.***
(vi) ₹ 70,000 spent for constructing railway siding should be treated as a ***Capital Expenditure.***

Illustration 8

State with reasons whether the following are Capital Expenditure or Revenue Expenditure :

(i) Expenses incurred in connection with obtaining a licence for starting the factory were ₹ 10,000.
(ii) ₹ 1,000 paid for removal of stock to a new site.
(iii) Rings and Pistons of an engine were changed at a cost of ₹ 5,000 to get full efficiency.
(iv) ₹ 2,000 spent as lawyer's fee to defend a suit claiming that the firm's factory site belonged to the Plaintiff. The suit was not successful.
(v) ₹ 10,000 were spent on advertising the introduction of a new product in the market, the benefit of which will be effective during four years.
(vi) A factory shed was constructed at a cost of ₹ 1,00,000. A sum of ₹ 5,000 had been incurred for the construction of the temporary huts for storing building materials.

Solution

(i) ₹ 10,000 incurred in connection with obtaining a licence for starting the factory is a ***Capital Expenditure***. It is incurred for acquiring a right to carry on business for a long period.
(ii) ₹ 1,000 incurred for removal of stock to a new site is treated as a ***Revenue Expenditure*** because it is not enhancing the value of the asset and it is also required for starting the business on the new site.
(iii) ₹ 5,000 incurred for changing Rings and Pistons of an engine is a ***Revenue Expenditure*** because, the change of rings and piston will restore the efficiency of the engine only and it will not add anything to the capacity of the engine.
(iv) ₹ 2,000 incurred for defending the title to the firm's assets is a ***Revenue Expenditure***.
(v) ₹ 10,000 incurred on advertising is to be treated as a ***Deferred Revenue Expenditure*** because the benefit of advertisement is available for 4 years, ₹ 2,500 is to be written off every year.
(vi) Cost of construction of Factory shed of ₹ 1,00,000 is a ***Capital Expenditure***, similarly cost of construction of small huts for storing building materials is also a ***Capital Expenditure***.

Key Points

- **Capital expenditure** is the money spent on buying fixed assets or adding to their value.
- A **revenue expenditure** is incurred to carry on the normal course of business and maintain the fixed assets in good condition.
- A receipt of money is considered as **capital receipt** when a contribution is made by the proprietor towards the capital of the business or a contribution of capital to the business by someone outside the business.
- A receipt of money is considered as **revenue receipt** when it is received from customers for goods supplied, or fees received for services rendered in the ordinary course of business, which is a result of the firm's activity in the current period.

THEORETICAL QUESTIONS

1. Explain the basic principles which would guide you in allocating expenditure as between capital & revenue. Illustrate your answer with example.
2. Define capital expenditure, revenue expenditure and deferred revenue expenditure.
3. Distinguish between capital expenditure and revenue expenditure.
4. Distinguish between capital receipts and revenue receipts.

PRACTICAL QUESTIONS

1. Classify the following between Capital and Revenue giving reasons for the same:
   (a) ₹ 10,000 spent towards additions to the machinery.
   (b) Repairs for ₹ 2,000 necessitated by negligence.
   (c) ₹ 1,500 spent to remove a worn-out part and replace it with a new one.
   (d) ₹ 400 wages paid in connection with the erection of a new machinery.
   (e) Old machinery of book value of ₹ 10,000 wornout, dismantled at a cost of ₹ 2,000 and scraps realised for ₹ 500.
   (f) Second hand motor-car purchased for ₹ 20,000 and spent ₹ 2,000 for repairs immediately.
   (g) Employees' State Insurance premium ₹ 800 paid.
   (h) Insurance claim of ₹ 5,000 received from the Insurance Company for loss of goods by fire of ₹ 6,000.
2. State which of the following items whould be charged to capital and which to revenue:
   (i) A second-hand truck was purchased for ₹ 50,000 and ₹ 12,000 was spent on overhauling and painting it.
   (ii) ₹ 10,000 was spent for whitewashing the factory building.
   (iii) An old machine which stood in the books at ₹ 50,000 was sold for ₹ 30,000.
   (iv) Wages paid to workmen for installation of a new machinery ₹ 10,000.
   (v) Legal expenses ₹ 5,000 incurred for purchasing a land.
3. The Swadeshi Industries removed their works to more suitable premises:
   (a) A sum of ₹ 4,750 was expended on dismantling, removing and reinstalling plant, machinery and fixtures.
   (b) The removal of stock from the old works to the new one costs ₹ 500.
   (c) Plant and machinery which stood in the books at ₹ 75,000 included a machine at a book value of ₹ 1,700. This being obsolete was sold off at ₹ 450 and was replaced by a new machine which cost ₹ 2,400.
   (d) The freight and cartage on the new machine amounted to ₹ 150 and the erection charge cost ₹ 275.
   (e) The fixtures and furniture appeared in the books at ₹ 7,500. Of these, some portion of the book value of ₹ 1,500 was discarded and sold off at ₹ 600 and new furniture of the value of ₹ 1,200 was acquired.
   (f) A sum of ₹ 1,100 was spent on painting the new factory. State which items of expenditure would be charged to Capital and which to Revenue.

Guide to Answers

1. **(a) Capital expenditure; (b) Revenue expenditure; (c) Revenue expenditure; (d) Capital expenditure; (e) ₹ 10,000 capital loss; and ₹ 2,000 – ₹ 500 = ₹ 1,500 should be treated as revenue expenses; (f) Capital expenditure; (g) Revenue receipt.**
2. **(i) Capital expenditure ₹ 50,000 + ₹ 12,000 = ₹ 62,000. (ii) Revenue expenditure. (iii) ₹ 50,000 – ₹ 30,000 = ₹ 20,000 should be treated as capital loss. (iv) Capital expenditure. (v) Capital expenditure.**
3. **(a) Capital Expenditure; (b) Revenue Expenditure; (c) Capital Expenditure; (d) Capital Expenditure; (e) ₹ 900 Capital Loss; ₹ 1,200 Capital Expenditure; (f) Capital Expenditure.**

13

Revenue Recognition

Introduction

Determination of profit is influenced by the revenue recognition policy of the enterprise. In principle, revenue can be recognised at the point of sale or when cash is collected or at any intermediate point. The amount of revenue arising on a transaction is usually determined by agreement between the parties involved in the transaction. Revenue recognition is mainly concerned with the timing of recognition of revenue in the statement of profit and loss. When uncertainties exist regarding the determination of the amount, or its associated costs, these uncertainties may influence the timing of revenue recognition.

Objectives of Revenue Recognition

The main objectives of revenue recognition are :

1. The determination of correct profit for the accounting period.
2. To reduce the confusion of the users of the accounting information regarding the profit earning capacity of the enterprise.
3. It helps to design proper internal control system which can prevent financial abuses by the CEOs /CFOs.
4. It brings transparency and truthfulness in reporting transactions.

Many international accounting scandals in the recent past was due to ***revenue manipulation***. Some of those are given below :

Sl.No.	Name of the Company	Alleged Accounting Abuses
1.	Fannie Mae	Inflated income
2.	AOL Time Warner	Inflated revenues and income
3.	Xerox	Inflated income
4.	Qwest Communications	Inflated revenues and income.
5.	Bristol-Myers Squibb	Inflated revenues and income.
6.	Nortel Networks	Understated expenses to inflate income.
7.	Halliburton	Inflated revenues and income.
8.	Global Crossing	Inflated revenues and income.
9.	Satyam Computers	Inflated revenues and income

It is clear from the above list that revenue recognition is very vital for the reliability of the profit disclosed by the companies in their Profit and Loss Account.

The Institute of Chartered Accountants of India has issued AS – 9 : 'Revenue Recognition' for this purpose.

Accounting Standard [AS–9 : 'Revenue Recognition']

Scope

This Statement does not deal with the following aspects of revenue recognition to which special consideration apply:

(i) revenue arising from construction contracts (subject matter of AS–7);
(ii) revenue arising from hire-purchase, lease agreements (subject matter of AS–19);
(iii) revenue arising from government grants and other similar subsidies (subject matter of AS–12); and
(iv) revenue of insurance companies arising from insurance contracts.

Definitions

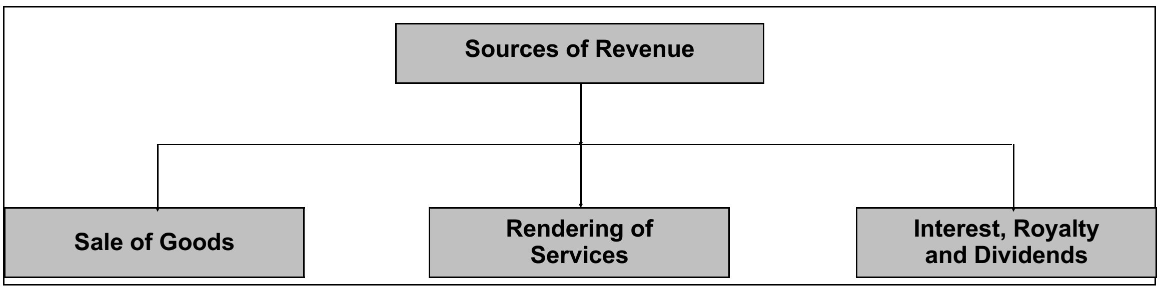
Revenue : Revenue is the gross inflow of cash, receivables or other consideration arising in the course of the ordinary activities of an enterprise from the sale of goods, from the rendering of services, and from the use by others of enterprise resources yielding interest, royalties and dividends. Revenue is measured by the ***charges made to customers*** or ***clients*** for goods supplied and services rendered to them and by the charges and rewards arising from the use of resources by them. In an agency relationship, the revenue is the amount of commission and not the gross inflow of cash, receivables or other consideration.

Completed Service Contract Method : Completed service contract method is a method of accounting which recognises revenue in the statement of profit and loss only when the rendering of services under a contract is completed or substantially completed.

Proportionate Completion Method : Proportionate completion method is a method of accounting which recognises revenue in the statement of profit and loss proportionately with the degree of completion of services under a contract.

This statement deals with the basis for recognition of revenue in the Profit and Loss Account of the enterprise. It is concerned with the recognition of revenue arising in the course of the ordinary activities of the enterprise from :

(i) the sale of goods
(ii) the rendering of services
(iii) the use by others of enterprise resources yielding interest, royalties and dividends.



Sale of Goods

Revenue from sale of goods is recognised when all the following conditions have been satisfied :

1. the seller of goods has transferred to the buyer the property in the goods for a price;
2. all significant risks and rewards of ownership have been transferred to the buyers;
3. the seller retains no effective control of the goods transferred to a degree usually associated with ownership;
4. no significant uncertainty exists regarding the amount of the consideration that will be derived from the sale of the goods.

Example 1: Modern Furnitures (P) Ltd. sold a computer table to Ram for ₹ 6,000. Ram paid it by credit card.
Modern Furnitures (P) Ltd. will recognise ₹ 6,000 as revenue immediately.
Example 2 : Computer Point (P) Ltd. sold 10 computers to St. Xavier's College, Kolkata for ₹ 3,00,000 on credit. Here Computer Point will recognise the revenue of ₹ 3,00,000 immediately because normal credit risk derived from sales is not a reason to defer revenue recognition.

Illustration 1

Bottom Ltd. entered into a sale deed for its immovable property before the end of the year. But registration was done with Registrar subsequent to Balance Sheet date. But before finalisation, is it possible to recognise the sale and gain at the Balance Sheet date ?

Solution

According to AS—9 "Revenue Recognition" it is possible for Bottom Ltd. to recognise the sale and gain at the Balance Sheet date. It is clear that the significant risk and rewards of ownership has passed before Balance Sheet date and the registration of the property is merely a formality.

Transfer of Legal Title

It should be noted that the transfer of legal title normally passes the risks and rewards. However, there are certain cases in which risks and rewards do not get transferred to the buyer with the transfer of legal title or passing of possessions.

For example :

1. If the sale of contract allows the goods to be returned and you cannot reasonably estimate the probability of return, the sale should not be recognised until you are sure about the acceptance by the customer.
2. If installation is an important part of the sale, recognition of revenue does not takes place until installation is complete.
3. If the sale is contingent on the buyer deriving revenue from resale of the goods, revenue is recognised at the time of resale only.

Example : In January, 2015 Tata Motors Ltd. supplied 10 Indica cars to its agent, Lexus Motors (P) Ltd. on consignment basis. The selling price was ₹ 4,00,000 each and commission is payable @ 10% on sales. By 31st March, 2015, Lexus Motors sold 5 cars only.
Here, revenue of ₹ 20,00,000 only will be recognised in March 2015.
Sales commission of ₹ 2,00,000 also will be recognised as expense in March 2015.

Illustration 2

How would you deal with the following in the annual accounts of a Company, for the year ended 31.3.2015:

Some of the transport claims, lodged in 2012-13 has been settled by the Carrier in February 2015 by paying ₹ 1.15 lakhs. These claims were not recorded in the books of the Company so far.

Solution

Since the amount has been received, the revenue is measurable. Therefore, the Company should recognise this as revenue in the current year, as part of net income. The Company was correct in not providing for the same as revenue, when the claim was lodged.

Illustration 3

How will you deal with the following:

The Board of Directors decided on 31.3.2015 to increase the sale price of certain items retrospectively from 1.1.2015. In view of this price revision, w.e.f. 1.1.2015, the Company has to receive ₹ 15 lakhs from its customers in respect of sales made from 1.1.2015 to 31.3.2015 and the accountant cannot make up his mind whether to include ₹ 15 lakhs in the sales for 2014-15.

Solution

Recognition of revenue requires that it would not be unreasonable to expect ultimate collection. In other words, it may be appropriate to recognise revenue only when it is reasonably certain that the ultimate collection will be made.

Here, in this case, the additional revenue arising out of price revision can be recognised as revenue in the current year provided there is certainty relating to collectibility.

Illustration 4

TVSM Company has taken a Transit Insurance Policy. Suddenly in the year 2014-15, the percentage of accident has gone up to 7% and the Company wants to recognise insurance claim as revenue in 2014-15 in accordance with relevant accounting standard. Do you agree?

Solution

Revenue is the gross inflow of cash, receivables or other consideration arising in the course of the ordinary activities of an enterprise. As per AS–9, recognition of revenue requires that revenue is measurable and it would not be unreasonable to expect ultimate collection.

Where the ability to assess the ultimate collection with reasonable certainty is lacking at the time of raising any claim, revenue recognition is postponed to the extent of uncertainty involved. In such cases, it may be appropriate to recognise revenue only when it is reasonably certain that the ultimate collection will be made.

Another essential criterion for the recognition of revenue is that the consideration receivable is reasonably determinable. When such consideration is not determinable within reasonable limits, the recognition of revenue is postponed.

Therefore, in the present case, the Company should ***postpone the revenue recognition*** as there are uncertainties in the settlement of insurance claim.

Illustration 5

Arjun Ltd. sold farm equipments through its dealers. One of the conditions at the time of sale is, payment of consideration money in 14 days and in the event of delay interest is chargeable @ 15% p.a. The company has not realised interest from the dealers in the past. However, for the year ended 31.3.2015, it wants to recognise interest due on the balances due from dealers. The amount is ascertained at ₹ 9 lakhs. Decide whether the income by way of interest from dealers is eligible for recognition as per As—9 ?

Solution

As per AS—9, recognition of revenue requires that revenue is measurable and it would not be unreasonable to expect ultimate collection.

Where the ability to assess the ultimate collection with reasonable certainty is lacking at the time of raising any claim, revenue recognition is postponed to the extent of uncertainty involved. In such cases, it may be appropriate to recognise revenue only when it is reasonably certain that the ultimate collection will be made.

In this case, the company should not recognise ₹ 9 lakhs as interest income for the year ending on 31.3.2015 because there is uncertainty in respect of collection of interest.

The company should postpone the recognition until the collection of interest is made.

Rendering of Services

Revenue from rendering of services should be recognised by referring to the stage of completion at the Balance Sheet date. There are two methods for dealing with this situation :

(i) Proportionate Completion Method; and (ii) Completed Service Contract Method

(i) ***Proportionate Completion Method*** : Performance consists of the execution of more than one act. Revenue is recognised proportionately by reference to the performance of each act. The revenue recognised under this method would be determined on the ***basis of contract value, associated costs, number of acts*** or other suitable basis. For practical purposes, when services are provided by an indeterminate number of acts over a specific period of time, revenue is recognised on a straight line basis over the specific period unless there is evidence that some other method better represents the pattern of performance.

Example : Your company Hindustan Constructing Co. Ltd. (HCCL) is laying a city gas pipe line for its client REL. Total revenue of the project is ₹ 40,00,000.
HCCL has incurred cost up to 31st March, 2015 ₹ 15,00,000 and the company is expecting that ₹ 10,00,000 more will be required to complete the project.
Upto 31st December, 2014 REL has approved ₹ 12,50,000 of expenditure. HCCL is confident that the balance ₹ 2,50,000 (₹ 15,00,000 – ₹ 12,50,000) will be approved by REL when their engineer will inspect the work during the 1st week of April, 2015. No payment has been received so far.
Recognise :
(a) ₹ 12,50,000 as expenses (the amount approved)
(b) ₹ 20,00,000 as (accrued) revenue

$$\frac{12{,}50{,}000}{25{,}00{,}000} \times 40{,}00{,}000$$

(ii) ***Completed Service Contract Method*** : Performance consists of the execution of a single act. Alternatively, services are performed in more than a single act, and the services yet to be performed are so significant in relation to the transaction taken as a whole that performance cannot be deemed to have been completed until the execution of those acts. The completed service contract method is relevant to these patterns of performance and accordingly revenue is recognised when the sole or final act takes place and the service becomes chargeable.

Interest, Royalty and Dividends

Revenue arising from the use by others of enterprise resources yielding interest, royalties and dividends should only be recognised when no significant uncertainty as to measurability or collectibility exists. These revenues are recognised on the following basis:

(i) ***Interest :*** on a time proportion basis taking into account the amount outstanding and the rate applicable;
(ii) ***Royalties :*** on an accrual basis in accordance with the terms of the relevant agreement;
(iii) ***Dividends from Investments in shares :*** when the owner's right to receive payment is established.

Illustration 6

SCL Limited sells agricultural products to dealers. One of the condition of sale is that interest is payable @ 2% p.m. for delayed payment. Percentage of interest recovered is only 10% on such overdue outstanding due to various reasons. During the year 2014-15, the Company wants to recognise the entire interest receivable. Do you agree?

Solution

Revenue arising from the use by others of enterprise resources yielding interest, should only be recognised when no significant uncertainty as to measurability or collectibility exists. Interest is recognised as revenue on the following manner:

On a time proportion basis taking into account the amount outstanding and the rate applicable.

Here, in this case, as the uncertainty arises regarding collectibility of interest. The company should not recognise it as revenue of 2014-15. However, company can recognise it when cash will be received.

Illustration 7

Y Co. Ltd. used certain resources of X Co. Ltd. In return, X Co. Ltd. received ₹ 10 lakhs and ₹ 15 lakhs as interest and royalties respectively from Y Co. Ltd. during the year 2014-15.

You are required to state whether and on what basis these revenues can be recognised by X Co. Ltd.

Solution

Revenue is measured by the charges made to customers for the use of resources by them. The use by others of such enterprise resources gives rise to —

(i) **Interest —** charges for the use of cash resources or amounts due to the enterprise.

Interest accrues, in most circumstances, on the time basis determined by the amount outstanding and the rate applicable.

(ii) **Royalties —** charges for the use of such assets as know-how, patents, trade marks and copyrights.

Royalties accrue in accordance with the terms of the relevant agreement and are usually recognised on that basis unless, having regard to the substance of the transactions, it is more appropriate to recognise revenue on some other systematic and rational basis.

Here, X & Co. Ltd. should recognise ₹ 25 lakhs as revenue for the year 2014-15.

Disclosure

In addition to the disclosure required by Accounting Standard 1 on ***Disclosure of Accounting Policies*** (AS-1), an enterprise also has to disclose the circumstances in which revenue recognition has been postponed pending the resolution of significant uncertainties.

Specific Examples

Sale of Goods

1. **Delivery is delayed at buyer's request and buyer takes title and accepts billing**

In this case, revenue should be recognised though the physical delivery has not been done. However, the following conditions must be satisfied :

(i) the item must be on hand and (ii) the item is identified and ready for delivery

Example : Your company PP Ltd. is about to deliver the boiler to its client CESC Ltd. The site of the client is not yet ready for strike by the casual labours. CESC Ltd. requested PP Ltd. to hold the boiler at their risk until the site is ready.
The revenue is recognised immediately as the title to the goods and risk has passed to CESC Ltd.

2. **Delivered subject to Conditions**

(a) ***Installation and Inspection***: If the contract specifies delivery, installation and inspection, all must be completed to recognise revenue.

Example : HMT Ltd. sold a printing press to Swapna Printers Ltd. for ₹ 50,00,000. As per contract, the payment will be made only after successful installation and trial run. Revenue will not be recognised unless the installation and trial run has been done up to the satisfaction of the customer.

If the installation is very simple, revenue may be recognised on delivery.

Example : Your company, Sony India (P) Ltd. sells colour television to different customers through retail chain "Sony World". All televisions are factory tested. For installation, it requires unpacking and connecting to power plug and dish antennae cables.
Revenue can be recognised at the time of delivery only.

(b) ***On approval*** : Revenue is recognised if the goods have been formally accepted by the buyer or the buyer has done an act adopting the transaction or the time period for rejection has passed or where no time has been fixed, a reasonable time has been passed.

Example : Your company, "Modern Toys" sell electronic toys to retailers. Written communication must be made within 15 days.
After 15 days, if nothing has been rejected the revenue can be recognised.

(c) ***Guaranteed sales, i.e., delivery is made by giving the buyer an unlimited right of return*** : Recognition of revenue in such circumstances will depend on the substance of the agreement. In the case of retail sales offering a guarantee of "money back if not completely satisfied" it may be appropriate to recognise the sale but to make a suitable provision for returns based on previous experience.

(d) ***Consignment Sales***: Revenue should not be recognised until the goods are sold to a third party.

(e) ***Cash-on-delivery sale***: Revenue is recognised when delivery is complete and cash has been received by the seller or his agent.

Example : Your company "Amazon.com" sell books via internet. Customers can pay on receipt of the book. Revenue can be recognised when books have been delivered and cash has been collected by the agent on behalf of the seller.

3. **Payment by Installments followed by Delivery**

Sales where buyer makes a series of installment payments to the seller, and the seller delivers the goods only when the final payment is received.

Revenue is recognised when goods are delivered. However, when experience indicates that most customers pay all of their installments, revenue may be recognised when a significant deposit is received and the goods are ready for delivery.

Example : Your company "Ultra Soft" is developing an accounting software for its client. Price of the software is ₹ 5,00,000. As per contract, a series of payment is to be made with the progress of the work. The software is ready for delivery and so far your company has received 95% of the total price and the balance 5% is expected any time.
Revenue can be recognised fully at present.

4. **Special Order and Shipment**

When payment has been received in advance from customers for goods still to be manufactured or is to be delivered directly to the customer from a third party.

Revenue from such sales should be recognised when the goods have been manufactured, identified and ready for delivery to the buyer by the third party.

5. **Sales and Repurchases of Same Item**

Some items are sold on the condition that it will be repurchased after some time. These transactions are really financing transactions. The ***resulting cash flow will not be treated as revenue***.

Example : Your company, R.K. Securities has sold 1,000 shares of RIL @ ₹ 2,600 to Ganesh in May, 2013 on the condition that all these shares are to be repurchased after 6 months @ ₹ 2,700.
This is basically a finance transaction and no revenue should be recognised.

6. **Sales to Intermediate Parties**

Sometimes goods are sold to distributors, dealers or others for resale.

Revenue from such sales can generally be recognised if significant risks of ownership have passed.

7. **Subscriptions for Publication**

Recognise revenue on a straight line basis over time. If the items delivered vary in value from period to period, revenue should be based on the sales value of the item delivered in relation to the total sales volume of all items covered by the subscription.

8. **Installment Sales**

When the consideration is receivable in installments, revenue attributable to the sale price exclusive of interest should be recognised at the date of sale. The interest element should be recognised as revenue, proportionately to the unpaid balance due to the seller.

Example : On 1st January, 2015 A sells a mini truck to B, on the installment payment system, on the following terms and conditions :

(a) The cash selling price is ₹ 1,00,000.

(b) The amount payable to A in four equal annual installments along with 12% interest p.a. on the outstanding balance, the first installment being payable on the date of sale.

Recognise immediately ₹ 1,00,000 as revenue.

Interest will be recognised as follows :	**₹**
2015 — 12% of (₹ 1,00,000 – ₹ 25,000)	**9,000**
2016 — 12% of (₹ 75,000 – ₹ 25,000)	**6,000**
2017 — 12% of (₹ 50,000 – ₹ 25,000)	**3,000**

9. **Trade Discounts and Value Rebate**

Trade discounts and value rebates are not revenue. They represent a reduction of cost.

Rendering of Services

1. **Installation Fees**

When installation fees are charged separately, they should be recognised as revenue only when the equipment is installed and accepted by the customer.

If the job consists of the excecution of more than one act, revenue is recognised proportionately.

Example : Your company, "Compu Data Services (P) Ltd." is installing a computer network in 10 identical buildings for a customer, under a single contract.
Recognise 10% of the revenue on completion of installation in each building.

2. **Advertising and Insurance Agency Commissions**

Revenue should be recognised when the service is completed. For advertising agencies, media commissions will be recognised when the related advertisement or commercial appears before the public and the necessary intimation is received by the agency.

Insurance agency commissions should be recognised on the effective commencement or renewal dates of the related policies.

3. **Financial Service Commissions**

The following matters should be taken into account before recognition of revenue from financial service commissions. These are :

(i) whether the service has been provided "once and for all" or on a "continuing basis" ?
(ii) the incidence of costs relating to the service;
(iii) when the payment for service will be received ?

Revenue from financial service commissions are recognised in the following manner :

(a) Commissions charged for arranging or granting loan or other facilities should be recognised when a binding obligation has been entered into.

Example : Your company, SBI Housing Finance Ltd., has given a housing loan to Robin of ₹ 20,00,000. Processing fee is payable @ 0.1% on the loan amount.
As and when loan agreement will be signed between SBI Housing Finance Ltd. and Robin, ₹ 2,000 will be recognised as revenue by the company.

(b) Commitment, facility or loan management fees which relate to continuing obligations or services should normally be recognised over the life of the loan or facility having regard to the amount of the obligation outstanding, the nature of the services provided and the timing of the costs relating thereto.

4. **Admission Fees**
Revenue from artistic performances, banquets and other special events should be recognised when the event take place. When a subscription to a number of event is sold, the fees should be allocated to each event on a systematic and rational basis.

5. **Tuition Fees**
Revenue should be recognised over the period of instruction.

6. **Entrance and Membership Fees**
Revenue recognition from these sources will depend upon the nature of the services being provided. Entrance fee received is generally capitalised. If the membership fee permits only membership and all other services or products are paid for separately, or if there is a separate annual subscription, the fees should be recognised when received.

If the membership fee entitles the member to services or publications to be provided during the year, it should be recognised on a systematic and rational basis having regard to the timing and nature of all services provided.

Example : To become a student member of National Library, you have to pay ₹ 500 as entrance fee and ₹ 1,200 as annual membership fee.
Entrance fee of ₹ 500 will be capitalised and the annual membership fee will be recognised as revenue @ ₹ 100 per month by the National Library.

Recognition of Expenses

Expenses are recognised in the Statement of Profit and Loss when a decrease in future economic benefits related to a decrease in an asset or an increase of a liability has arisen that can be measured reliably.

An expense is recognised immediately in the Statement of Profit and Loss when an expenditure produced no future economic benefits. An expense is also recognised to the extent that future economic benefits from an expenditure do not qualify, or cease to qualify, for recognition in the Balance Sheet as an asset.

Example: Swapna Printers (P) Ltd. replaced its offset printing machine with a modern Web Printing Machine during the year 2014-15.

The book value of the offset printing machine is ₹ 5,00,000 but it can be sold as scrap for ₹ 3,00,000 (net) only. Negotiation is going on with two buyers. Till the end of the accounting year (31st March, 2015) nothing has been finalised.

At the time of preparation of financial statements for the year 2014-15, this machine will be shown in the Balance Sheet at ₹ 3,00,000 and to be disclosed separately. The loss of ₹ 2,00,000 (₹ 5,00,000 – 3,00,000) will be recognised as expenses and is to be charged to the Profit and Loss Account of 2014-15.

Key Points

- In principle, revenue can be recognised at the point of sale or when cash is collected or at any intermediate point.
- The main objectives of revenue recognition are :
  1. The determination of correct profit for the accounting period.
  2. To reduce the confusion of the users of the accounting information regarding the profit earning capacity of the enterprise.
  3. It helps to design proper internal control system which can prevent financial abuses by the CEOs /CFOs.
  4. It brings transparency and truthfulness in reporting transactions.
- Revenue is the gross inflow of cash, receivables or other consideration arising in the course of the ordinary activities of an enterprise from the sale of goods, from the rendering of services, and from the use by others of enterprise resources yielding interest, royalties and dividends.
- Revenue from rendering of services should be recognised by referring to the stage of completion at the Balance Sheet date. There are two methods for dealing with this situation : (i) Proportionate Completion Method; and (ii) Completed Service Contract Method.
- Revenue arising from the use by others of enterprise resources yielding interest, royalties and dividends should only be recognised when no significant uncertainty as to measurability or collectibility exists.

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each sentence or answer each question below :

1. When is a sale recognised ?
   A when cash is collected from customer
   B when certain conditions have been satisfied
   C whenever the seller decides to recognise it
2. Revenue
   A includes government grants and other subsidies
   B includes sales tax and VAT
   C is the gross inflow of cash receivables or other consideration arising in the course of the ordinary activities
3. Trade discounts and volume rebate should
   A be recognised as revenue
   B be ignored
   C be subtracted from cost
4. Normal credit risk derived from sales
   A is a reason to defer revenue recognition
   B is not a reason to defer revenue recognition
   C is disclosed in the directors' report

5. If the installation is an important part of the sales;
   A revenue recognition take place when goods are delivered at the site
   B recognition of revenue will take place at the end of the accounting period
   C recognition of revenue does not take place until installation is complete
6. Revenue from rendering of services should be recognised by referring the stage of completion
   A at the end of the calendar year
   B at the balance sheet date
   C none of the above
7. Once a credit sale has been recognised as revenue any risk of non-payment is treated as
   A a reduction in revenue
   B a finance charge
   C a bad or doubtful debt expenses
8. Interest revenue should be recognised on a
   A cash basis
   B time proportion basis taking into account the rate applicable
   C time proportion basis taking into account the amount outstanding and the rate applicable
9. Royalties revenue should be recognised
   A on an accrual basis in accordance with the terms of the relevant agreement
   B on a cash basis
   C on an actual basis
10. Dividends from investments in shares should be recognised
   A on a cash basis
   B when the shareholders' right to receive payment is established
   C on an accrual basis

Guide to Answers

1. B; 2. C; 3. C; 4. B; 5. C; 6. B; 7. C; 8. C; 9. A; 10. B.

Final Accounts

After the preparation of a Trial Balance, the next level of work in accounting is called "Final Accounts" level. Preparation of Final Accounts involves the following:

(a) Preparation of a Trading Account;
(b) Preparation of a Profit and Loss Account; and
(c) Preparation of a Balance Sheet.

Trading Account is prepared to know the gross profit or overall profit. Profit and Loss Account discloses net profit or clear profit of the business. The Balance Sheet shows the financial position of the business on a given date — generally on the last date of the accounting period.

The trial balance contains all of the account balances from the ledger. It includes assets, liabilities, expenses, income, capital and drawings. You should remember that :

(i) Debit balances usually represent either assets, expenses or drawings and these are always shown in the left hand column of the Trial Balance.
(ii) Credit balances are usually either income, liabilities or capital and these are always shown in the right hand column of the Trial Balance.
(iii) The expenses and income are shown in the Trading Account and Profit and Loss Account.
(iv) Assets, liabilities, capital and drawings are shown in the Balance Sheet.
(v) Additional information given by way of a note have not been recorded in the Ledger Accounts and consequently will require both a debit and a credit entry (which is usually effected by entering them in both the Trading and Profit and Loss Account and the Balance Sheet). Accounts appearing in the Trial Balance will be shown in the Trading Account or Profit and Loss Account or Balance Sheet. No double entry is required for these Accounts.

Trading Account

The main objective of preparing the Trading Account is to ascertain gross profit or gross loss of a business during an accounting period — usually a year. In accounting parlance, gross profit means overall profit. Gross Profit is the difference between sale proceeds of a particular period and the cost of the goods actually sold. Since gross profit means overall profit, no deduction of any sort is made, i.e. general, administrative or selling and distribution expenses. Gross Profit is said to be made when the sale proceeds exceed the cost of goods sold. Conversely, when sale proceeds are less than the cost of the goods sold, gross loss is incurred.

Features of Trading Account

1. It is a Nominal Account and part of the double-entry system.
2. It is the first stage in the preparation of final accounts of a trading concern and second stage in case of a manufacturing concern.
3. It records only sales and direct costs of goods sold.
4. The balance of this account discloses the gross profit or gross loss.
5. This account does not include any income from other sources.
6. The balance of this account is transferred to the Profit and Loss Account.
7. This account relates to a particular accounting period and is prepared at the end of that period.
8. It is often treated as a sub-section of the Profit and Loss Account.

Needs of Preparing Trading Account

1. A Trading Account shows the result of buying and selling of goods and services.
2. It is possible to make a comparison between opening stock and closing stock.
3. It is possible to justify the purchases that have been made and the direct expenses that have been incurred.
4. The percentage of gross profit on sales can easily be calculated. The percentage is the minimum margin at which goods and services are sold during an accounting period.
5. The percentage of gross profit on sales can be compared with that of the previous year(s), to have an idea about the progress of the business.
6. A Trading Account helps make a distinction between direct and indirect expenses.
7. A Trading Account can easily eliminate abnormal profits and losses, for example, loss of stock by fire.
8. A Trading Account can easily be prepared for each product or for each department of an organisation.
9. It is possible to make a comparison among purchases, sales and direct expenses for different years.
10. It helps to adjust the future prices of the products, if the required percentage of gross profit on sale is not being earned.

Style of a Trading Account

The styling of a Trading Account is very important, because we should have a clear presentation of how gross profit is achieved.

While preparing a Trading Account, one important point must be kept in mind that a closing journal entry is to be made in the journal proper. At the end of each accounting period, revenues and expenses accounts (direct) are closed by transferring their balances to Trading Account. The balances of these accounts disappear once they are absorbed by Trading Account.

Trading Account can be prepared either in horizontal format ('T' form) or vertical format.

Name of the Trader ... (1)
Trading Account .. (2)
Dr. For the year ended 31st December, 2014 ... (3) Cr.

Particulars			Rs	Particulars			Rs
To Opening Stock	... (4)		20,000	By Sales	... (7)	1,51,500	
To Purchases	... (5)	87,500		Less: Returns inwards	... (8)	1,500	1,50,000
Less: Returns outwards	... (6)	2,500	85,000	By Closing stock	... (9)		32,000
To Wages		10,000					
Add : Outstanding		5,000	15,000				
To Carriage Inwards			2,500				
To Royalty on Production	... (10)		1,500				
To Factory Expenses			1,000				
To Customs Duty and Insurance			5,000				
To Gas, Water and Fuel			2,500				
To Gross Profit	... (11)		50,000				
(Transferred to Profit and Loss Account)							
			1,82,500				1,82,500

Reference 1 : The business entity must be identified because it is the business unit, whose profit is being measured.
Reference 2 : This indicates the statement which is being prepared.
Reference 3 : Indicates the period of time covered by the statement.
Reference 4 : This is the value of the items in stock at the beginning of the year.
Reference 5 : All purchases made during the accounting period (for resale).
Reference 6 : The actual amount of goods returned to supplier during the accounting period.
Reference 7 : This is the total sales actually made in the accounting period.
Reference 8 : The actual amount of goods returned by customers during the accounting period.
Reference 9 : This is the value of the items in stock at the end of the accounting period.
Reference 10 : These expenses are directly attributable to the purchase of goods or to bring the goods into saleable condition.

Reference 11 : It is the difference between the credit side total and debit side total. It is transferred to the Profit and Loss Account for finding out the net profit of the business.

The vertical format of a Trading Account is given below. Now-a-days, this format is more commonly used for profit statements and reporting.

Trading Account of X for the year ended 31st December, 2014

Particulars	₹	₹	₹
Sales			3,03,000
Less : Returns inwards			3,000
			3,00,000
Opening Stock		40,000	
Purchases	1,75,000		
Less: Returns outwards	5,000	1,70,000	
Direct expenses:			
Freight & carriage	5,000		
Customs & insurance	10,000		
Wages	30,000		
Gas, water & fuel	3,000		
Lighting and Heating	2,000		
Factory expenses	2,000		
Royalty on production	3,000	55,000	
		2,65,000	
Less : Closing Stock		65,000	
Cost of Goods Sold			2,00,000
Gross Profit			1,00,0000

Trading Account Items

Debit Side

1. Opening Stock : In case of a merchandising business, the opening stock consists of different types of finished goods. In case of a manufacturing concern, opening stock consists of raw materials, work-in-progress and finished goods. Where a separate manufacturing account is prepared, opening stock consists of only finished goods. In case of a newly set up business, there will be no opening stock — at the beginning of the first year. The amount of the opening stock is available in the Trial Balance.

2. Purchases : The balance of the Purchase Account, as appeared in the Trial Balance, shows the total purchases made during the accounting period which includes both cash and credit purchases. In respect of purchases the following points must be noted :

(i) Purchase of capital asset should not be added with the purchases. If it is already included in purchases, it should be deducted therefrom.

(ii) If goods purchased for personal use and added with the purchases, it should be excluded. This type of purchases should be treated as drawings and following journal entry is to be passed :

Drawings Account Dr.
To Purchases Account

(iii) If some of the goods purchased are still in transit at the year end, it is better to debit Stock-in-transit Account and credit Cash or Supplier's Account.

(iv) If the amount of purchases include goods received on consignment, or on approval or on hire purchase, these should be excluded from purchases.

(v) Cost of goods sent on consignment must be deducted from the purchases in case of a trading concern.

3. Purchases Returns : When goods are returned to the supplier, for some reasons, in the books of account supplier is debited and purchases returns or returns outwards is credited. In the Trial Balance, it appears in the credit side. There are two ways of showing the purchases returns in the Trading Account. It may be shown by way of deduction from purchases in the Trading Account. An alternative way to show the purchases returns in the credit side of the Trading Account.

4. Direct Expenses : Direct expenses are shown separately in the Trading Account. Direct expenses are those expenses which are directly attributable to the purchase of goods or to bring the goods in saleable condition. Some examples of direct expenses are as under :

(a) ***Freight and insurance*** : Freight and insurance paid in connection with acquiring goods or making them saleable is debited to Trading Account. Freight and insurance paid in connection with the sale of goods is charged to Profit and Loss Account. Freight and insurance paid for acquisition of fixed assets must be capitalised.

(b) ***Carriage inwards*** : Carriage paid for bringing the goods to the godown is treated as carriage inwards and it is debited to Trading Account.

(c) ***Wages*** : Wages incurred in a business is direct, when it is incurred on manufacturing or merchandise or on making it saleable. Other wages are indirect wages. Only direct wages are debited to the Trading Account. Other wages are debited to the Profit and Loss Account. If it is not mentioned whether wages are direct or indirect, it should be assumed as direct and should appear in the Trading Account.

(d) ***Octroi*** : When goods are purchased within municipality limits, generally octroi duty has to be paid on it. It is debited to Trading Account.

(e) ***Fuel, power, lighting and heating expenses*** : Fuel and power expenses are incurred for running the machines. These are considered as direct expenses since directly related with the production and debited to Trading Account. Lighting and heating expense of factory is also charged to Trading Account but lighting expenses of administrative office or sales office are charged to Profit and Loss Account.

(f) ***Packing charges :*** There are certain types of goods which cannot be sold without a container or proper packing. These form a part of the finished product. One example is ink, which cannot be sold without a bottle. These type of packing charges are debited to Trading Account. But if the goods are packed for their safe despatch to customers, i.e. packing meant for transportation or fancy packing meant for advertisement will appear in the Profit and Loss Account.

(g) ***Duty on purchases*** : Any duty paid in connection with the purchase of goods is debited to Trading Account.

Credit Side

1. Sales: The balance of the sales account, as appears in the Trial Balance, shows the total sales made during the accounting period which includes both cash and credit sales. In respect of sales, the following points must be noted:

(a) If the goods are sold but yet to be despatched, it should not be included in sales, but the closing stock will be increased by the cost of such goods (if the property in goods has not yet been transferred).

(b) If sale of fixed asset is included in sales, it should be deducted from sales.

(c) Goods sold on approval or on consignment or on hire purchase, should be recorded separately. If these are included in sales, these should be deducted.

2. Sales Returns: When goods are returned by the buyers, for some reasons, in the books of account ''Returns Inwards Account'' or ''Sales Returns Account'' is debited and buyer is credited. In the Trial Balance, it is appearing in the debit side. There are two ways of showing sales returns in the Trading Account. It may be shown by way of deduction from sales in the Trading Account. An alternative way to show the sales returns in the debit side of the Trading Account.

3. Closing Stock: The last item in the credit side of the Trading Account is the closing stock—which is the value of goods which remain unsold at the end of the period. In case of a merchandising business, the closing stock consists of different types of finished goods. In case of a manufacturing concern, closing stock consists of raw materials, work-in-progress and finished goods. Where a separate manufacturing account is prepared, closing stock consists of only finished goods.

Closing stock is an item which is not generally available in the Trial Balance. However, if the closing stock is adjusted against the purchases it will appear in the Trial Balance. When closing stock is shown in the Trial Balance, it will not be included in the Trading Account. It is to be shown in the Balance Sheet.

In this connection, it should be noted that closing stock is valued at cost or net realisable value (NRV), whichever is lower. Therefore, in the Trading Account and/or in the Balance Sheet we will include it at cost price or NRV, whichever is lower.

Balancing of Trading Account

After recording the above items, in the respective sides of the Trading Account, the balance is calculated to ascertain Gross Profit or Gross Loss. If the total of credit side is more than that of the debit side, the excess represents Gross Profit. Conversely, if the total of debit side is more than that of the credit side, the excess represents Gross Loss. Gross Profit is transferred to the credit side of the Profit and Loss Account and Gross Loss is transferred to the debit side of the Profit and Loss Account.

It is common for the gross profit to be expressed as a percentage of the sales value when it is known as the **GROSS PROFIT MARGIN** ***or as a percentage of cost of sales when it is known as the*** **GROSS PROFIT MARK-UP.**

Closing Entries

(i) For the items of debit side

Trading Account	Dr.
To Opening Stock Account	
To Purchases Account (Net)	
To Direct Expenses Account	

(ii) For the items of credit side

Sales Account (Net)	Dr.
Closing Stock Account	Dr.
To Trading Account	

(iii) For gross profit

Trading Account	Dr.
To Profit and Loss Account	

(iv) For gross loss the above entry (iii) will be reverse.

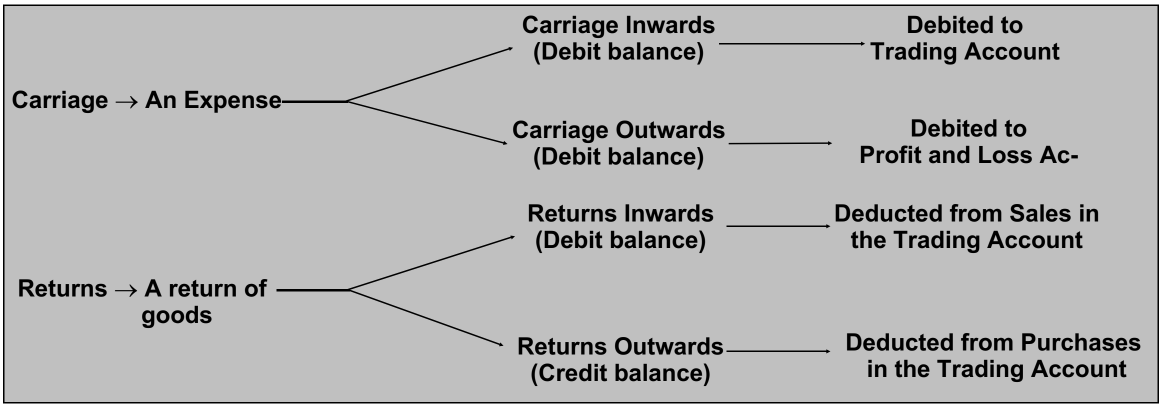
Some Important Items

1. Carriage Inwards / Carriage Outwards

Carriage on purchases is called carriage inwards and similarly carriage on sales is called carriage outwards. Carriage inwards is an additional expense on the goods bought, increasing the cost of the materials or commodities, and, as such, is a trading account expense.

Carriage outwards is a selling and distribution expense and is debited to the Profit and Loss Account along with the other administration and distribution expenses.

It should be noted that both carriages are *debits*, and must not be confused with returns inwards and returns outwards. The following diagram will clear the concept.



2. Production Wages and Office Salaries

The wages of production or of warehousing (where goods are prepared for sales) are direct expenses and are debited to the Trading Account as part of the cost of the goods produced.

The salaries of the office and administrative staff are charged to the Profit and Loss Account.

In this connection, it should be noted that if wages are not related to production, then it should not be charged to Trading Account. For example, wages paid to office cleaners are chargeable to Profit and Loss Account. Likewise, if the salaries are related to production, then it should be charged to Trading Account. For example, salaries paid to designers of the garment factory or salaries paid to works manager are chargeable to Trading Account.
The rule is that if the wages / salaries are part of the cost of the article being sold, it should appear in the Trading Account. If the wages / salaries are administrative, selling or distribution expenses, it should appear in the Profit and Loss Account.

Sometimes, Wages Account and Salaries Account are not maintained separately. One single account called Wages and Salaries Account or Salaries and Wages Account is maintained. At the time of preparation of Trading Account, students should follow the above rule.

In the examination, if nothing is mentioned, wages will be charged to Trading Account (assuming they are direct in nature) and salaries will be charged to Profit and Loss Account. For combined account — Wages and Salaries or Salaries and Wages — a proper note should be given.

3. Discount

There are basically two kinds of discounts :

(a) Trade Discount and (b) Cash Discount.

Trade Discount represents an allowance which is made by the manufacturer to the wholesalers or by the wholesalers to the retailers. Trade discount is deducted from the catalogue price of the goods when the goods are purchased. As such, trade discounts have the effect of reducing the purchase or sales figure. Since the prediscount figures (catalogue price) are typically never recorded, the sales and purchases figures are shown at net figure (i.e., catalogue price *minus* trade discount).

Cash discount is allowed to encourage a debtor to pay-off his debt within a specified time after the purchase. It should be noted that this discount is not really a reduction in the price, but an incentive to pay promptly. The sales and purchases are taken into the trading account at their full price (net of trade discount, if any), any cash discounts allowed to credit customers are treated as an expense in the Profit and Loss Account, and any cash discounts received from suppliers are treated as incomes in the Profit and Loss Account. Thus, cash discounts do not affect the ***gross profit***.

Key Points to Remember

1. ***The heading of the Trading Account should show the name of the concern or trader, the period covered and the date to which the account is made up.***
2. ***Unless stated to the contrary, wages are normally taken to the Trading Account and salaries to the Profit and Loss Account.***
3. ***Carriage inwards is debited to the Trading Account and carriage outwards is debited to the Profit and Loss Account.***
4. ***Returns inwards are deducted from sales whereas returns outwards are deducted from the purchases in the Trading Account.***
5. ***Closing stock is valued at cost or market price, whichever is lower. This value of closing stock is credited to Trading Account. However, if the closing stock has already been adjusted against the purchases, it will not be credited to Trading Account.***
6. ***Cash discount on purchases will not affect the Trading Account.***

Profit and Loss Account

After preparing Trading Account, the next step is to prepare Profit and Loss Account with a view to ascertain net profit or net loss during an accounting period. ***The Profit and Loss Account can be defined as a report that summarises the revenues and expenses of an accounting period to reflect the changes in various critical areas of firm's operations***. As pointed out earlier, the balance of the Trading Account (gross profit or gross loss) is transferred to the Profit and Loss Account, which is the starting point of the preparation of this account. This is why, Trading Account, is treated as a sub-section of the Profit and Loss Account. Profit and Loss Account shows the profit or loss on ordinary activities, profit or loss on the sale of a capital asset, other abnormal losses and gains but excludes the payment of taxation, transfer to or withdrawal from reserves or from the business and the distribution of profit. After transferring the Gross Profit or Gross Loss from the Trading Account to the Profit and Loss Account, the sources of other incomes like commission or discount received are shown on the credit side of the Profit or Loss Account. The credit side also includes the non-trading income like interest on bank deposits or securities, dividend on shares, rent of property let-out, profit arising out of sale of fixed assets, etc. On the debit side, all other expenses appearing in the Trial Balance which cannot find a place in the Trading Account, will appear. The debit side will also include the losses arising out of sale of assets and any abnormal losses.

The Profit and Loss Account measures net income by matching revenues and expenses according to the accounting principles. Net income is the difference between total revenues and total expenses. In this connection, we must remember that all the expenses, for the period are to be debited to this account —whether paid or not. If it is paid in advance or outstanding, proper adjustment are to be made (discussed later). Likewise all revenues, whether received or not are to be credited. Revenue if received in advance or accrued but not received, proper adjustment is required.

After transferring all the nominal accounts from the Trial Balance to the Profit and Loss Account, it is necessary to balance the Profit and Loss Account. If the credit side is more than the debit side, it indicates net profit for the period. Conversely, if the debit side is more than credit side, it indicates net loss for the period.

Features of a Profit and Loss Account

1. It is a nominal account and part of the double entry system.
2. It is the second stage in the preparation of final accounts of a trading concern and the third stage in case of a manufacturing concern.
3. It relates to a particular accounting period and is prepared at the end of that period.
4. This account is credited with the gross profit and income from other sources and debited with indirect expenses and losses.
5. Accrual basis of accounting is followed in the preparation of this account.

6. This account is prepared by matching revenues and expenses for an accounting period.
7. The balance of this account is the net profit or net loss.
8. The preparation of this account depends upon the accounting bases and policies of the business.
9. The capital of the owner is increased or decreased by the balance of this account.
10. This account shows how successfully and how effectively the business is being run.
11. It can be used as a basis for forecasting the future of the business.
12. This account shows whether the business can maintain its capital or not.

Advantages of Profit and Loss Account

1. It is an account of an enterprise's revenues, expenses and profit.
2. It is a link between two consecutive Balance Sheets.
3. It shows the earning power of the business.
4. It makes a distinction between trading and non-trading incomes.
5. It also makes a distinction between expenses incurred for earning revenue and losses suffered during the accounting period.
6. It is a critical study of the past happening.
7. It can be used as a basis for forecasting the future of the business.
8. It is the basis of the amount of drawings to be made by the owner.
9. Many accounts from the Trial Balance are closed by transferring them to the Profit and Loss Account.
10. It can be easily related to the Balance Sheet.

Like Trading Account, Profit and Loss Account can also be prepared either in horizontal format or vertical format.

The horizontal format of a Profit and Loss Account is given below :

Dr. Profit and Loss Account of X for the year ended 31st December, 2014 Cr.

Particulars	₹	Particulars	₹
Management expenses		**By Gross Profit b/d**	1,00,000
To Salaries (administrative)	25,000	**Other income**	
To Office rent, rates and taxes	5,000	By Discount received	12,000
To Printing and stationery	500	By Commission received	3,000
To Telephone charges	1,500	**Non-trading Income**	
To Postage and telegrams	500	By Bank Interest	13,000
To Insurance	1,000	By Rent of property let-out	16,000
To Audit fees	1,000	By Dividend from shares	11,000

Loss on sale of investment	Nil		
Loss by fire	Nil	Nil	60,000
Net Profit (transferred to Capital A/c)			1,30,000

Profit and Loss Account Items

The Debit Side

The items that will appear in the debit side of a Profit and Loss Account can broadly be classified as under :

(a) Management expenses; (b) Maintenance expenses; (c) Selling and distribution expenses; (d) Financial expenses; and (e) Abnormal losses.

(a) Management Expenses : These are the expenses incurred for carrying out the day-to-day administration of a business. Expenses under this head include office salaries, office rent and lighting, printing and stationery and telegrams, telephone charges, etc.

(b) Maintenance Expenses : These expenses are incurred for maintaining the fixed assets of the administrative office in a good condition. They include repairs and renewals, etc.

(c) Selling and Distribution Expenses : These expenses are incurred for promoting sales and distribution of sold goods. Example of such expenses are godown rent, carriage outwards, advertisement, cost of after-sales service, selling agents' commission, etc.

(d) Financial Expenses : These expenses are incurred for arranging finance necessary for running the business. These include interest on loans, discount on bills, brokerage and legal expenses for raising loan, etc.

(e) Abnormal Losses : There are some abnormal losses that may occur during the accounting period. All types of abnormal losses are treated as extraordinary expenses and debited to Profit and Loss Account. Examples are stock lost by fire and not covered by insurance, loss on sale of machinery, cash defalcation etc.

Following are the expenses not to appear in the Profit and Loss Account.

(i) Domestic and household expenses of proprietor or partners.
(ii) Drawings in the form of cash, goods by the proprietor or partners.
(iii) Personal income tax and life insurance premium paid by the firm on behalf of proprietor or partners.

The expenses of a particular accounting period include the cost of the product sold in that accounting period though these products were purchased or manufactured in an earlier period. The wages and salaries earned by the worker—whether paid or not — and rent, electricity, telephone expenses are to be taken into consideration, whether paid during the accounting period or not. To ascertain the amount of expenses to be debited to the Profit and Loss Account, four types of events are needed to be considered and the cash payment made in connection with these events. They are as under :

(i) Expenses incurred and paid out in that year: If an expenditure is incurred in one year and also paid for in the same year, the transaction becomes simplest and least troublesome. Most of the expenses for a period are generally paid before the accounting period is over. Here, when the expenses are incurred and payment is made , we debit expense account and credit cash or bank account. At the year end, the Expense Account cannot have any balance, since closed by transferring it to the Profit and Loss Account by debiting Profit and Loss Account and crediting the Expense Account.

(ii) Expenses incurred but not paid out, partly or fully, during the current year: There are some expenses, which are incurred in the current accounting period, but not paid for, partly or fully, by the end of the period, are called ***'Outstanding Expenses'***.

Outstanding expenses include outstanding salaries, interest, rent, wages and other expenses. These must be duly accounted for because the parties who furnished goods or service have a claim against the business for the amount due to them and these amounts, therefore, become the liabilities of the business at the end of the accounting period.

In fact, on the date of the final accounts, outstanding expenses, both an expense and a liability exist without having been recorded in the books of account. For recording it, the following entry is to be passed:

Expenses Account	Dr.	(Will be shown in the Profit and Loss Account)
To Outstanding Expenses Account		(Will appear in the liabilities side of the Balance Sheet)

Illustrative Example 1

Salaries paid during the year ₹ 40,000; Salaries outstanding at the end of the accounting period ₹ 5,000.

Ledger Accounts

(a) ***Before Adjusting Entry*** :

Dr.	Outstanding Salaries Account		Cr.
	₹		₹

Dr.	Salaries Account		Cr.
	₹		₹
To Cash A/c	40,000		

(b) ***After Adjusting Entry*** is posted :

Dr. Outstanding Salaries Account Cr.

	₹		₹
To Balance c/d	5,000	By Salaries	5,000

Dr. Salaries Account Cr.

	₹		₹
To Cash A/c	40,000	By P/L A/c	45,000
To Out. Salary A/c	5,000		
	45,000		45,000

Balance Sheet

Liabilities	₹	Assets	₹
Outstanding Salaries	5,000		

Dr. Profit & Loss Account Cr.

	₹		₹
To Salaries A/c	45,000		

Note : At the beginning of the next accounting year, a reverse entry will be passed :

Outstanding Salaries Account	Dr.	₹ 5,000	
To Salaries Account			₹ 5,000

Illustrative Example 2

P & Co. is in business dealing in pest control. Its owner, K. Mondal, employs a team of eight workers who were paid ₹ 3,000 per month each in the year to 31 December, 2013. At the start of 2014 he raised salaries by 10% to ₹ 3,300 per month each.

On 1 July, 2014, he hired a trainee at a salary of ₹ 2,100 per month. He pays his work force on the first working day of every month, one month in arrear, so that his employees receive their salary for January on the first working day in February etc.

You are required to :

(a) Calculate the amount of salaries which would be charged in the Profit and Loss Account of P & Co. for the year ended on 31 December, 2014.

(b) Calculate the amount actually paid in salaries during the year.

(c) Calculate the amount of outstanding salaries which would appear in the Balance Sheet of P & Co. as at 31 December, 2014.

Solution

(a)	**Salaries to be charged to Profit and Loss Account for the year ended 31 December, 2014** :	₹
	(i) Salaries of 8 employees for full year @ ₹ 3,300 per month each	3,16,800
	(ii) Salaries of trainee for 6 months @ ₹ 2,100 per month	12,600
		3,29,400
(b)	**Salaries actually paid in 2014 :**	
	(i) December, 2013 Salaries paid in January 2014 (8 x ₹ 3,000)	24,000
	(ii) Salaries of 8 employees for January to November, 2014 paid in February - December, 2014 @ ₹ 3,300 per month for 11 months	2,90,400
	(iii) Salaries of trainee for July to November paid in August - December @ ₹ 2,100 for 5 months	10,500
		3,24,900
(c)	**Outstanding salaries as at 31 December, 2014 :**	
	(i) 8 employees @ ₹ 3,300 each for 1 month	26,400
	(ii) 1 trainee @ ₹ 2,100 for 1 month	2,100
		28,500

(iii) Expenses paid for during the current year, but not yet incurred, partly or fully : Sometimes, it happens that some expenses are paid for during the current year, but not yet incurred, partly or fully, are known as '***Prepaid Expenses***'. Prepaid Expenses include prepaid insurance premium, rent, taxes, interest, etc. A prepaid expense is an asset and will be shown in the Balance Sheet. The adjusting entry to be passed :

Prepaid Expenses Account	Dr. (To be shown as asset in the Balance Sheet)
To Expenses Account	(Balance of this account is to be debited to Profit and Loss Account)

Illustrative Example 3

On 30th June, 2014 insurance premium paid for one year ₹ 1,200. The accounts are prepared on 31st December, 2014.

Out of ₹ 1,200 only ₹ 600 is related to the accounting year 2014 and the remaining ₹ 600 should be carried forward to the next period.

Ledger Accounts

(a) ***Before Adjusting Entry*** :

Dr.	Insurance Premium Account		Cr.
	₹		₹
To Bank A/c	1,200		

Dr.	Prepaid Insurance Premium Account		Cr.
	₹		₹

(b) ***After Adjusting Entry*** is posted :

Dr.	Insurance Premium Account		Cr.
	₹		₹
To Bank A/c	1,200	By Prepaid Insurance	
		Premium A/c	600
		By Profit & Loss A/c	600
	1,200		1,200

Dr.	Prepaid Insurance Premium Account		Cr.
	₹		₹
To Ins. Prem. A/c	600	By Balance c/d	600

Balance Sheet			
Liabilities	₹	Assets	₹
		Prepaid Ins. Prem.	600

Dr.	Profit & Loss Account		Cr.
	₹		₹
To Ins. Prem. A/c	600		

Note : At the beginning of the next accounting year, a reverse entry will be passed :

Insurance Premium Account	Dr.	₹ 600	
To Prepaid Insurance Premium Account			₹ 600

Illustrative Example 4

During the year to 31 December, 2014 payments were made in respect of insurance premium.

January 2nd : ₹ 16,000 for the 3 months ending 31 March, 2014

April 19th : ₹ 32,000 for the 6 months ending 30 September, 2014

October 6th : ₹ 35,000 for the 6 months ending 31 March, 2015.

You are required to calculate the amount of prepaid insurance premium for the year ending on 31 December, 2014 and also show the completed Insurance Premium Account.

Solution

You have notice that total payments of ₹ 83,000 cover a period of 15 months to 31 March 2015 whereas the accounting period ends on 31 December, 2014. The last payment made for ₹ 35,000 can be split as to ₹ 17,500 for the last quarter of 2014 and ₹ 17,500 for the first quarter of 2015. Therefore, prepaid insurance premium is ₹ 17,500. The completed Insurance Premium Account will be:

Dr. **Insurance Premium Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014			2014		
Jan. 2	To Bank A/c	16,000	Dec. 31	By Profit & Loss A/c	65,500
April 19	To Bank A/c	32,000	Dec. 31	By Prepaid Insurance Premium A/c	17,500
Oct. 6	To Bank A/c	35,000			
		83,000			83,000
2015					
Jan. 1	To Prepaid Insurance Premium A/c	17,500			

(iv) Expenses of the current year likely to arise in subsequent period: Sometimes, an expense or a loss may arise in the future in connection with current year's business. In such a case, we make a provision of the anticipated loss and a charge is created against the profit for the current period. This provision is shown either as a liability or as a contingent asset, i.e. it appears in the Balance Sheet as a deduction from some other asset. The best example of this anticipated expense is ***provision for bad debts.***

The Credit Side

The items that appear on the credit side of a Profit and Loss Account can broadly be classified as under:

(a) Gross Profit;

(b) Other incomes;

(c) Non-trading income; and

(d) Abnormal gains.

Gross Profit: This is the balance of the Trading Account transferred to the Profit and Loss Account. If the Trading Account shows a gross loss, it will appear on the debit side.

Other Incomes: During the course of the business, other than income from the sale of goods, the business may have some other income of financial nature. The examples are discount or commission received.

Non-trading Income: The business may have various transactions with the bank. At the end of the year, the business may earn some amount of interest which will find a place in the Profit and Loss Account as non-trading income. The business may have some investment outside the business in the form of shares or debentures or units. Any income received from these investments are also considered as non-trading income and are treated in the same way.

Abnormal Gains: There may be capital gains arising during the course of the year, e.g., profit arising out of sale of a fixed asset. The profit is shown as a separate income on the credit side of the Profit and Loss Account.

In this connection, we are to remember that all the other incomes or abnormal gains are to be credited to the Profit and Loss Account if they arise or accrue during the period. Similarly, income received in advance is to be deducted from the income. The following adjustments are to be considered:

(i) Income accrued but not received, partly or fully: Accrue means increase. Certain income such as interest on debentures, dividend on shares accrued during the accounting period but are not received. Adjusting entry is required to recognise these unrecorded increases (accruals) in income. For recording, the following entry will be passed:

Accrued Income Account	Dr. (Will be shown in the Assets side of the Balance Sheet)
To Income Account	(To be credited to Profit and Loss Account)

Illustrative Example 5

Interest on debenture received during the year, ₹ 1,000. Interest accrued but not received during the year, ₹ 200.

Ledger Accounts

(a) ***Before Adjusting Entry*** :

Dr.	Interest Received Account		Cr.
	₹		₹
		By Cash A/c	1,000

Dr.	Accrued Interest Account		Cr.
	₹		₹

(b) ***After Adjusting Entry*** is posted :

Dr.	Interest Received Account		Cr.
	₹		₹
To Profit & Loss A/c	1,200	By Cash A/c	1,000

	200		200

Dr.	Profit & Loss Account		Cr.
	₹		₹
		By Int. Recd. A/c	1,200

Balance Sheet			
Liabilities	₹	Assets	₹
		Accrued Interest	200

(ii) Income received in advance during the current period: Income received in advance is not the revenue of the current accounting period. It will be recognised as income in the coming year. Income received in advance is treated as a liability and shown in the Balance Sheet. The adjusting entry will be:

Income Account	Dr. (balance to be credited to Profit and Loss Account)
To Income Received in Advance Account	(to be shown in the liability side of the Balance Sheet)

Illustrative Example 6

On November 1, 2014, X & Co. leases one of its Buildings to the Z & Co, for one year. Z & Co. paid ₹ 6,000 rent for one year in advance . The Books are being closed on December 31, 2014.

Out of ₹ 6,000 received as rent, only ₹, 1,000 (November + December) should be treated as revenue for the year 2014 and the balance of ₹ 5,000 should be treated as rent received in advance for 2015, so ₹ 5,000 should be carried to next accounting period.

Note : At the beginning of the next accounting year a reverse entry will be passed :

Rent Received in Advance Account	Dr.	₹ 5,000	
To Rent Received Account			₹ 5,000

Closing Entries

Following are the journal entries to be passed in connection with the preparation of the Profit and Loss Account:

(i) ***For the items of debit side:***

Profit and Loss Account Dr.
To Expenses /Losses Account

(ii) ***For Gross Profit:***

Trading Account Dr.
To Profit and Loss Account

(iii) ***For Other Income/Abnormal Gain:***

Other Income/ Abnormal gain Account Dr.
To Profit and Loss Account

Balancing the Profit and Loss Account

The balance in the Profit and Loss Account represents the net profit or net loss. If the credit side is more than the debit side , it shows the net profit, and if the debit side shows more than the credit side, it shows net loss.

When the Profit and Loss Account shows a net profit, we pass the following entry:

Profit and Loss Account Dr.
To Net Profit Account

If the Profit and Loss Account shows a net loss, the entry will be reverse.

Balance Sheet

A Balance Sheet is a list of assets and claims of a business at some specific point of time and is prepared from an adjusted Trial Balance. It shows the financial position of a business by detailing the sources of funds and the utilisation of these funds. A Balance Sheet shows the assets and liabilities grouped, properly classified and arranged in a specific manner.

It has already been stated that after a Trial Balance is prepared and adjusting entries are passed and incorporated in the Trial Balance, some accounts are closed by transferrring to the Trading Account and some accounts are closed by transferring to the Profit and Loss Account. These accounts are in the nature of expenses and revenues. With the remaining accounts lying in the Trial Balance, which mainly represent assets and liabilities and adjusting accounts, a Balance Sheet is prepared to ascertain the financial position on a given date. In this connection, we must remember that one account appearing in the unadjusted Trial Balance, has to be shown either in the Trading Account or in the Profit and Loss Account or in the Balance Sheet. However, an adjusting account figures both in the Trading, Profit and Loss Account and in the Balance Sheet. For example, ₹ 200 to be provided for outstanding salaries. In the Profit and Loss Account, Salaries Account to be increased by ₹ 200 and in the Balance Sheet outstanding salaries to be shown in the liabilities side.

Functions of a Balance Sheet

The Balance Sheet summarises the incomplete transactions of the business. The Balance Sheet accumulates the various financial data in accordance with the basic accounting equation, Assets – Liabilities = Capital. The left hand side of the Balance Sheet shows the sources from which cash can be obtained and the right hand side shows the forms in which cash has been invested. A primary function of the Balance Sheet is to provide a measure of the assets waiting to be matched with future revenues and liabilities to be met in the future. The main functions of the Balance Sheet are as under:

(1) It is a summary of various assets provided to the business and the claims to these assets. It provides information regarding the assets owned by the business and the debts owed to the outsiders, and indicates the capital of the owners in the business.

(2) It serves as a measure of liquidity. If necessary, it also shows the various assets provided to the business and claims to those assets to indicate the ability of the business to pay its debts, as and when required. The ascertainment of working capital is a basic measure of the firm's liability.

(3) It serves as a measure of solvency by providing information about the assets owned, obligations to outsiders and capital — the residual interest of the owners in the business. The solvency of a firm is measured by ascertaining the relationship of total assets to total liabilities and indicates the firm's ability to meet eventually all its short- and long-term debts.

Balance Sheet and Profit and Loss Account — Relationship

The Profit and Loss Account and the Balance Sheet are said to articulate, i.e. there is a definite relationship between them. The primary relationship between a Profit and Loss Account and a Balance Sheet is that a Profit and Loss Account is a link between the Balance Sheet at the beginning of a period and the Balance Sheet at the end of that period. The fundamental problem in the process of measuring periodic income is the division of costs incurred between the present and future accounting periods. The Profit and Loss Account and the Balance Sheet are the two technical instruments used in reporting this division. Both are necessary, because the absence of one will not exhibit the picture clearly. The profit and Loss Account shows the division of costs assigned to current period, whereas the Balance Sheet exhibits the costs incurred which are reasonably applicable to future years. The Balance Sheet thus serves as a means of carrying forward unexpired acquisition costs of assets. It also stands as a connecting link joining successive Profit and Loss Accounts — as mentioned earlier. Moreover, the amount of net profit reported on the Profit and Loss Account together with the amount of dividends, explains the changes in owners' equity between the two Balance Sheets prepared as at the beginning and the end of the accounting period.

From the foregoing discussion, we can conclude that a Balance Sheet can be described as a summary of residual transactions that results from the Profit and Loss Account transactions. And, the measurement of net assets appearing in the Balance Sheet is dependent upon the measurement of income, which, in turn, is dependent upon the measurement of revenues and expenses.

Uses of the Balance Sheet

The Balance Sheet is regarded as a prominent accounting report. The various interested parties may derive different information for their own use. Generally the following information can be derived from a Balance Sheet:

1. It enables us to ascertain the proprietary interest of a person or business organisation.
2. It enables us to calculate the actual capital employed in the business.
3. The lender can ascertain the financial position of the business.
4. It may serve as the basis for determining purchase consideration of the business.
5. The trends of working capital of the business can be determined by comparing the Balance Sheets of successive years and corrective measures can be taken, where necessary.
6. Different ratios can be calculated from the Balance Sheet and these ratios can be utilised for better management of the business.

Limitations of the Balance Sheet

Though the Balance Sheet is prepared by every organisation for disclosing its financial position, yet it suffers from the following limitations :

1. Fixed assets are shown in the Balance Sheet at historical cost less depreciation up-to-date. A conventional Balance Sheet cannot reflect the true value of these assets. Again intangible assets are shown in the Balance Sheet at book values which may bear no relationship to market values.
2. Sometimes, Balance Sheet contains some assets which command no market value such as preliminary expenses, debenture discount, etc. The inclusion of these assets unduly inflate the total value of assets.
3. The Balance Sheet cannot reflect the value of certain factors such as skill and loyalty of staff.
4. A conventional Balance Sheet may mislead untrained readers in inflationary situations.
5. The value of a major number of current assets depends upon some estimates, so it cannot reflect the true financial position of the business.

Distinction between Profit and Loss Account and the Balance Sheet

The difference betwen a Profit and Loss Account and a Balance Sheet is that while the former provides a 'historical' review of the accounts of the past transactions (how the profit is earned or loss is incurred) the latter gives a 'static' picture of the financial position as on the last day of the accounting period.

The main differences between a Profit and Loss Account and a Balance Sheet are as under:

1. Profit and Loss Account itself is an account whereas a Balance Sheet is a statement of assets and liabilities.
2. Profit and Loss Account shows the profits earned or losses incurred for the accounting period whereas the Balance Sheet shows the financial position of the business.
3. Profit and Loss Account is prepared for the accounting period ended whereas a Balance Sheet is prepared as at the last day of the accounting period.
4. The accounts that are transferred to the Profit and Loss Account are closed and cease to exist . But the accounts that are transferred to the Balance Sheet do not lose their identity and become the opening balances for the next period.

Balance Sheet Formats

A Balance Sheet may be prepared in one of two forms : (i) Horizontal (Traditional) format and (ii) Vertical format.

Horizontal (Traditional) Format

Under this format, the left hand side lists liabilities of the business as on the last day of the accounting period as well as details of its capital position; and on the right hand side are listed various assets of the enterprise. A Balance Sheet is so designed that it discloses the financial interest of the owner(s) in the business and its liabilities to outsiders— and how those amounts are represented by its various assets. Therefore, the Balance Sheet includes the net profit or net loss as disclosed by the Profit and Loss Account . There are two ways of recording net profit in the Balance Sheet. It can be shown as an addition to (in case of profit) or a deduction (in case of loss) from the capital(s) — as in the case of sole proprietorship or partnership firms. Alternatively, it may be shown as a seperate item — as in case of a limited company.

Arrangement of Assets and Liabilities

The assets on the right-hand side and liabilities and capital on the left-hand side must be properly *marshalled*, i.e. they should be shown in a certain order. Subject to any particular law, which requires the assets and liabilities are to be shown in certain order, assets and liabilities can be arranged in any form that exists in the particular organisation. There are two common ways in which the assets and liabilities can be arranged. They are as under:

(a) In the order of liquidity or dischargeability

According to this basis, assets are arranged in order of the case with which they can be converted into cash. Here, the cash in hand will come first, then cash at bank followed by other assets and land and building at the bottom of the list. In regard to the liabilities, they are so arranged in the order they are to be discharged. Bills payable appears first , then trade creditors and followed by loans, outstanding expenses. Thereafter, reserves and surplus will appear and capital at the bottom. Under this method, assets and liabilities are arranged as under:

Balance Sheet as at ...

Liabilities	₹	Assets	₹
Bills Payable		Cash in Hand	
Trade Creditors		Cash at Bank	
Loans		Government Securities	
Outstanding Expenses		Other Investments	
Reserves & Surplus		Bills Receivable	
Capital		Sundry Debtors	
		Stock	
		Furniture & Fixtures	
		Plant & Machinery	
		Land and Building	

(b) In the order of permanence

According to the second basis, assets are listed in order of permanence, i.e. starting with those least *'realisable'* and working down to the most 'liquid' assets. Liabilities are also recorded in order of their permanence, i.e. the liability which will have to be discharged last is shown first. On the assets side, the most fixed asset is land and building, will come first followed by plant and machinery, furniture and fixture, stock, debtors and cash in hand at the bottom. In regard to the liabilities, capital account heads the list, followed by reserve and surplus , and then by any creditors for outstanding expenses. Thereafter, loans from outsiders, followed by creditors will appear and bills payable at the bottom. Under this method, assets and liabilities are arranged as under:

Balance Sheet as at ...

Liabilities	₹	Assets	₹
Capital		Land and Building	
Reserves & Surplus		Plant & Machinery	
Outstanding Expenses		Furniture & Fixtures	
Loans		Stock	
Trade Creditors		Sundry Debtors	
Bills Payable		Bills Receivable	
		Other Investments	
		Government Securities	
		Cash at Bank	
		Cash in Hand	

In this connection, following are the points to be noted :

1. Assets of the same class are grouped together—all fixed assets together and all current assets together.

2. The balance of the Capital Account is shown as under.

Capital		
Opening balance	***	
Add: Profit for the period	***	
	***	
Less : Drawings for the period	***	***

Vertical Format

The Balance Sheet presentation used so far is known as the horizontal format. The disadvantages with the above presentation is that it does not show the value of the organisation. The networth of an organisation to the owner is the value of the owner's capital. The vertical format clearly displays the networth of the business to the owner — i.e. the capital. This format also displays the amount of investment in the fixed assets and in working capital (which is the difference between the current assets and current liabilities).

The vertical format merely involves a re-arrangement of the information shown by a Balance Sheet presented in Horizontal format. Many non-accountant managers are now required to make decisions based on accounting information. The vertical format is intended to help them gain a batter understanding of the financial information presented by the accountants and therefore improve their decision-making. The information shown previously is now presented in the vertical format.

Balance Sheet of X as at 31 December, 2014

	₹	₹	₹
Fixed Assets :			
Land		2,00,000	
Building		4,00,000	
Plant and Machinery		3,00,000	
Furniture		1,00,000

Current Assets :			
Stock	1,50,000		
Debtors	2,50,000		
Bills Receivable	50,000		
Cash at Bank	30,000		
Cash in Hand	20,000	5,00,000	
Current Liabilities :			
Creditors	1,00,000		
Bills Payable	50,000		
Outstanding Expenses	50,000	2,00,000	
Working Capital			3,00,000
NET ASSETS EMPLOYED			15,00,000
FINANCED BY :			
Capital		13,70,000	
Add : Net Profit		1,30,000	15,00,000

Balance Sheet — A Statement of Assets, Liabilities and Capital

A Balance Sheet is a statement of the assets, liabilities and capital of an organisation at a particular date which gives a true and fair view of the *state of affairs* of the business. The financial position of a business is indicated by its assets on a given date and its liabilities (excluding capital) on that date. Assets and liabilities are two independent variables and the capital is the dependent variable, because capital is the resultant of these two varying factors, assets and liabilities. Excess of assets over liabilities represents capital and is indicative of the financial soundness of the business.

Assets and their Classification

Assets are resources, tangible or intangible, from which probable future economic benefits are obtained and the rights to which have been acquired by a paricular entity as a result of past transactions or events. An asset (other than cash) has four essential characteristics :

1. It embodies a probable future benefit that increases a capacity, either singly or in combination with other resources, to contribute directly or indirectly to future cash inflows.
2. A particular business entity must be able to obtain the benefit from the resource and control others access to it. It must be owned by the business, i.e. an entity must have the title to the asset.
3. It is a result of past transactions or events, i.e. the transactions giving rise to the claim to or control of the benefit must already have accrued.
4. The probable future benefits must be quantifiable or measurable in monetary units.

From the above, it is clear that assets are valuable resources owned by a business which are acquired at a measurable money cost. Following are the important points of the above definition :

(i) The resource must be valuable;
(ii) The resource must be owned by a business enterprise; and
(iii) It must be acquired at a measurable money cost.

Assets of a business are generally classified into four groups: (a) Fixed Assets; (b) Current Assets; (c) Fictitious Assets; and (d) Intangible Assets.

(a) Fixed Assets : Fixed assets are defined by the CIMA Terminology (Chartered Institute of Management Accountants) as :

'Any asset . . . acquired for retention by an entity for the purpose of providing a service to the business, and not held for resale in the normal course of trading'.

These assets are tangible in nature — relatively long lived resources of a business. A business generally require these types of assets in order to use them in the production of goods and services . If the assets are held for re-sale they are classified as inventories, even though they are long lived. Therefore, fixed assets are long lived assets whose usefulness is likely to extend beyond one accounting period in the operations of the business. Fixed assets appear in the Balance Sheet at their historical costs minus accumulated depreciation. The expression "accumulated depreciation" means the portion of the original cost of the asset which has already been charged as an expense in the previous years as a cost of doing business.

The examples of fixed assets are land and building, plant and machinery, furniture and fixtures, etc. Fixed assets are generally divided into *wasting assets* and *non-wasting assets*. Wasting assets lose their value by wear and tear (plant and machinery) or by the passage of time (leasehold land) or through being worked (mines). Non-wasting assets are those which do not lose their value by any of the above reasons. A good example of a non-wasting assets is freehold land.

(b) Current Assets : Current assets are defined by the CIMA Terminology as :

'Cash or other asset, e.g., stock, debtors and short term investments, held for conversion into cash in the normal course of trading'.

These assets are reasonably expected to be realised in cash or consumed during normal operating cycle of the business. The distinction between fixed assets and current assets is important. The essence of the distinction is time. Current Assets are those that is owned by the business generally not for more than a year from the Balance Sheet date whereas fixed assets are those that are expected to be owned for more than one year. Following are the examples of the current assets :

Cash consists of funds which are readily available for disbursement without restriction. Most of these funds are usually on deposit with the banker (known as bank balance) and the balance in the temporary storage facilities (cash box) on the business premises.

Investments are easily marketable securities and are generally converted into cash within the accounting period. A business invests money, which is temporarily idle, to get some return in cash. Investments are valued in the Balance Sheet at cost or current market value, whichever is lower. It is valued at cost only when the decline in the market value is believed to be only temporary.

Sundry Debtors are amounts owed to the business generally by its customers arising out of credit sales. Sundry debtors appear in the Balance Sheet at their net expected realisable value, i.e, at their book values less an allowance for that portion of the amount owed which is not expected to be collected.

Bills Receivable are acknowledgements of debts of the customers. When the amount owed by debtors are evidenced by a written acknowledgement of obligation, it would appear not under the head "Sundry Debtors" but under the head ‘‘Bills Receivable’’. Generally, Bills Receivable is a method of converting Sundry Debtors into acceptor of bills.

Stock is the inventory of raw materials, work-in-progress and finished goods. Stock is needed by a business either for sale in the ordinary course of business, or for use in the process of production for such sale or are to be currently consumed in the production of goods and services to be available for sale. Stock is recorded in the Balance Sheet at its cost or current market value which ever is lower.

Prepaid expenses and deferred charges represent certain kinds of assets, usually of an intangible nature, usefulness of which will expire with the near future. In fact, these are expenses which are already incurred, but the entire portion could not be recognised in the current accounting period because the benefit is spread over to more than one accounting period.

(c) Fictitious Assets : These are intangible properties which are not represented by anything concrete. The examples of fictitious assets are preliminary expenses, accumulated losses, etc.

(d) Intangible Assets : Intangible assets are capital assets having no physical existence whose value depends on the rights and benefits that possession confers upon owner. These represents immaterial rights, privileges and competitive advantages owned by a business. Examples of intangible assets are Goodwill, Patents, Copyrights, Trademarks, etc.

Liabilities and their Classification

Liabilities are obligations which arise from transactions or other events that have already been occurred. It involves an enterprise in a probable future transfer of cash, goods or services or the forgoing of a future cash receipt. The amount of the liability and the date of settlement of such liabilities are the claims of the outsiders against the business or the amounts that the business owes to some person or persons other than its owners. A liability need not be a legally enforceable claim. Generally, all the liabilities are not claims against any specific asset or a group of assets. Liabilities are stated in the Balance Sheet at either the amount of cash (or its equivalent) ultimately payable including interest accumulated to that date. Interest payable subsequent to the Balance Sheet is excluded.

The liability of the business may take one of the following forms:

(a) those with fixed amounts and date of payment;
(b) those with fixed amount but date of payment is estimated;
(c) those for which the amount and the date of payment are estimated;
(d) those arise from the advances made by the cutomers.

Liabilities of a business can be classified into : (a) Fixed Liabilities; (b) Current Liabilities; and (c) Contingent Liabilities.

(a) Fixed Liabilities : Fixed liabilities are not defined as such by CIMA Terminology but these are long-term liabilities which are generally redeemed after a long period of time. These include long-term loan, redeemable debentures of a company, etc.

(b) Current Liabilities : Current liabilities are defined by CIMA Terminology as :

‘Liabilities which fall due for payment within one year. They include that part of the long term loans due for repayment within one year’.

These are obligations of the business which are payable in the near future, usually within the next accounting period. Therefore, a liability which is expected to have been paid within one year from the date of the Balance Sheet, is termed as ‘‘Current Liability’’. When a current liability is created, it increases the resources of a business in the form of current assets, e.g., buying inventory on credit. On the other hand, when the obligation for a current liability is paid for, it reduces the current assets. Current liabilities are generally obligations for the items which are entered into the operating cycle of a business, such as sundry creditors and bills payable in the acquisition of inventory, supplies to be used in the production cycle, collection received in advance against the delivery of goods, debts which arise from operations directly relating to the operating cycle such as outstanding salaries, wages, commission, royalty, rent, and so forth. It also includes income tax and other freight and taxes.

There may be other liabilities, which also fall under this category, though not related to the production cycle. These include short-term debts arising from acquisitions of capital assets, serial maturity of long term obligations (interest payment at regular intervals), and so forth. Now, we discuss some important components of current liabilities.

Sundry creditors are the claims of the suppliers against the business for the delivery of the goods on credit — which may not be evidenced by a written acknowledgement of debt.

Bills payable are the claims of the suppliers which is evidenced by a note or some other written acknowledgement of debt.

Liability for taxes are the provisions made for the estimated tax liability which is owed to the government for taxes.

Outstanding expenses are expenses which are already incurred but not paid for. These are the converse of prepaid expenses. These liabilities may be intangible in nature in the sense that they are evidenced by a legal document. The examples of outstanding expenses are outstanding wages and salary, outstanding rent, etc.

Deferred Income represents the short-term liability of a business that arises because the business has received money in advance for a service to be rendered in future. An example is rent received in advance, which means rental payment is received by the business in advance for which the business agrees to permit the tenant to make use of a property during near future.

(iii) Contingent Liabilities : These liabilities are conditions which exist at the Balance Sheet date, the outcomes of which can only be confirmed on the occurrence or non-occurrence of one or more uncertain future events. A contingent liability may also exist when a current situation may result in a future liability, but the amount of the liability in the monetary terms cannot be reasonably anticipated as on the Balance Sheet date. They do not include uncertainties connected with accounting estimates, e.g., provision for doubtful debts or provision for discount on debtors. Also, the situation must exist currently; hence, future losses from fire or flood, natural calamities or outbreak of war are not contingent liabilities. Examples of contingent liabilities are possible penalties, discounting of bills receivable, fines and penalties payable to the government or income tax authorities, etc. By contrast, if an obligation, whose amount can be reasonably estimated as a current liability, and it is not recorded in the books of account even though the exact amount is not known now.

Contingent liabilities are not recorded in the books of account; hence it does not appear on the liability side of the Balance Sheet. They are disclosed as a footnote at the bottom of the Balance Sheet.

Capital — A Liability of Business

In the accounting sense, capital is the money contributed by the owner to an organisation to enable it to function. It is measured by the excess of assets over liabilities. Capital can be brought in by a person into the business in different forms — cash or kind. When capital is brought in the form of cash, it is spent away on various items of assets that make the business a running concern.

Capital Account is the account that shows the interest of the owner in the net assets of the business.

Adjustments

1. Goods Distributed as Free Samples

This is one kind of advertisement. When goods are distributed to the prospective customers as free samples, an expense is incurred (known as advertisement expense) and there is an usual reduction from the stock of goods. The following entry is passed :

Advertisement Account	Dr.
To Purchases Account	(For a trader)
or	
To Trading Account	(For a manufacturer)

At the year end, Advertisement Account is closed by transferring to the Profit and Loss Account Account:

Profit and Loss Account	Dr.
To Advertisement Account	

2. Income Tax

Income tax is not an expense to earn revenue. Therefore, while ascertaining the profit of a concern, income tax is not treated as an expense to be deducted from the profit. For a sole proprietor, income tax is payable by the owner and not by the business. Therefore, if income tax appears in the Trial Balance, it should be treated as drawings and should be deducted from capital. Following are the entries to be passed:

(a) Income Tax Account Dr. (When paid)
    To Cash / Bank Account
(b) Drawings Account Dr.
    To Income Tax Account

But for a registered partnership firm, it is payable by the business itself and not by the partners. It generally appears as an appropriation of the net profits. The following entry is passed :

Profit and Loss Appropriation Account Dr.
    To Income Tax Account

3. Advance Tax

For a sole proprietor, advance tax is payable by the owner and not by the business. Therefore, if the advance tax appears in the Trial Balance, it should be treated as drawings and should be deducted from capital. The following are the entries to be passed :

(a) Advance Tax Account Dr. (When paid)
    To Cash / Bank Account
(b) Drawings Account Dr.
    To Advance Tax Account

4. Interest on Advance Tax

If any interest is received on advance tax, it is not the income of the business. It is the income of the proprietor. Therefore, if the interest on advance tax appears in the Trial Balance (it is shown in the credit column of the Trial Balance) it should be added with the capital.

The following are the entries to be passed :

(a) Bank Account Dr.
    To Interest on Advance Tax Account
(b) Interest on Advance Tax Account Dr.
    To Capital Account

Illustrative Example 7

The following balance of accounts are appearing in the Trial Balance of X. How do you deal with them at the time of preparing the final accounts ?

Trial Balance of X (includes)

Sl.No.	Head of Accounts	L.F.	Dr. (₹)	Cr. (₹)
	Income Tax.		50,000	
	Advance Income Tax		35,000	
	Interest on Advance Income Tax			1,000

Solution

(i) Income tax paid ₹ 50,000 will be treated as the drawings of the proprietor and it is to be deducted from his capital in the Balance Sheet.
(ii) Advance income tax paid ₹ 35,000 will also be treated as the drawings of the proprietor and it is to be deducted from his capital in the Balance Sheet.
(iii) Interest on advance income tax will be treated as private income of the proprietor and it will be treated as additional capital brought in by him. Therefore, it will be added with the capital in the Balance Sheet.

5. Drawings Made by the Proprietor

Drawings made by the proprietor(s) may be in cash or in kinds. Drawings relate to the resources of the business and the capital of the owner(s).

Drawings made in cash : In this case, following entries are passed:

(a) Drawings Account Dr.
    To Cash/ Bank Account

(b) Capital Account Dr.
To Drawings Account

Drawings made in kinds : When some of the stocks withdrawn from the business, the following entry should be passed:

(a) Drawings Account Dr.
To Purchases Account

(b) Capital Account Dr.
To Drawings Account

If the drawings made by the owner is included in sales, we are to pass a reverse entry to cancel the original entry. For the drawings, the above two entries are to be passed:

6. Mutual Indebtedness

Sometimes, a debtor may also be a creditor for the business. If finished goods sold to X for ₹ 1,000 and raw materials purchased from him ₹ 500, the name of X will appear both in the debtors and creditors list. Generally, we set off these types of accounts. We transfer the account which has a smaller balance to the account having a bigger balance and, in effect, one account is closed. The following entry is passed (the amount will be the smaller of the two figures):

Sundry Creditors Account	Dr.	₹ 500	
To Sundry Debtors Account			₹ 500

7. Debtors arising out of Dishonour of Cheques or Bills

When a cheque previously received from a debtor, is dishonoured, the old position of debtor and creditor is restored between the buyer and the seller respectively. Here, Debtor Account is debited and Bank Account is credited. In effect, the value of the sundry debtors is increased and the bank balance is decreased.

When a bill, previously drawn on a debtor, is dishonoured, Debtor Account is debited and the person who is holding the bill is credited. Here the value of the sundry debtors is increased and one of the following is credited, depending on the manner in which it has been previously dealt with:

Sundry Debtors Account	Dr. (Dishonour of bill)
To Bills Receivable Account	(When the bill is retained)
To Bills for Collection Account	(When the bill is sent to bank for collection)
To Bank Account	(When the bill is discounted with banker)
To Endorsee Account	(When the bill is endorsed)

If a provision for doubtful debts is to be created, it will be on the value of the sundry debtors after making the above adjustments.

8. Abnormal Loss of Stock by Accident, e.g., by Fire

If a portion of the stock is lost, the value of such loss is first to be ascertained. Thereafter, Abnormal Loss Account is to be debited and Trading Account is to be credited. Abnormal loss account is closed by transferring to the Profit and Loss Account, i.e. Profit and Loss Account is to be debited and abnormal loss account is to be credited. If the above loss is insured against risk, Insurance Claim Account (or Insurance Company Account) is to be debited and Abnormal Loss Account is to be credited. Till the time, money is not received, Insurance Claim (or Insurance Company Account) will find a place in the asset side of the Balance Sheet. When the money is received, Bank Account is debited and the Insurance claim (Insurance Company Account) is credited. If the goods are partially insured, the portion not covered by insurance, is to be charged to Profit and Loss Account.

Journal entry to be passed is as follows:

(i) Accidental Loss Account	Dr. (Actual loss of stock)
To Trading Account / Purchases Account	
(ii) (a) Insurance Claim Account	Dr. (Insurance claim admitted by the insurance Co.)
or (b) Insurance Company Account	Dr. (Insurance claim admitted by the insurance Co.)
Profit and Loss Account	Dr. (Claim not admitted)
To Accidental Loss Account	

9. Goods Sent on Approval Basis

When goods are sold to the customers on sale or return or on approval basis, it is not considered as sale till the time it is not approved by the customers or the expiring of a fixed period as agreed by the parties. When goods are sold initially to a customer on approval basis, we pass the entry for the sales. At the year end, if the goods are still lying with the customers awaiting approval, the following entries are to be passed:

(i) To cancel previous entry:

Sales Account Dr. (Sales value)
  To Sundry Debtors Account

(ii) To add the value of the closing stock (Cost of goods lying with the customer):

Stock with Customers Account Dr.
  To Trading Account

In the Balance Sheet, it will be deducted from sundry debtors at sales price and the closing stock will be increased by the cost of such sales.

Illustrative Example 8

Sales include goods worth ₹ 30,000 sent out to S M & Co. on approval basis and remain unsold as on 31st March, 2015, the date of closing the books of account. The cost of the goods was ₹ 25,000. How will you deal with this at the time of preparing Final Accounts ?

Solution

First, the entry for sales is to be cancelled by passing the following entry :

Sales Account Dr. ₹ 30,000
  To Sundry Debtors Account ₹ 30,000

Second, the cost of the goods lying with the customers is to be added with closing stock. The entry will be :

Stock with Customers Account Dr. ₹ 25,000
  To Trading Account ₹ 25,000

Net Effect

(i) Reduce sales by ₹ 30,000;
(ii) Reduce the balance of Sundry Debtors by ₹ 30,000;
(iii) Credit Trading Account by ₹ 25,000;
(iv) Show in the assets side of the Balance Sheet Stock with customer — ₹ 25,000.

Remember, the goods lying with customer must be valued at cost or NRV whichever is lower.

10. Goods Received on Approval Basis

Goods may be received on approval basis from the supplier. These goods are not recorded in the books of account when these are received. Only when these goods are accepted, it is recorded as purchase. Before acceptance of these goods, supplier is the owner of these goods. Therefore, these goods are not to be included in the closing stock also.

However, if these goods are recorded wrongly as purchase, the following adjustment entry is to be passed:

Suppliers / Creditors Account Dr.
  To Purchases Account

From the closing stock, cost of such goods are to be eliminated (if costs of such goods were taken into consideration at the time of closing stock valuation).

11. Interest on Loan — Not yet Paid — Fully or Partly

In the Trial Balance, the amount of the loan appears in the credit column. The amount of interest paid appears in the debit column. If a portion of the interest is still outstanding at the year end, we pass the following entry to make the adjustment:

Interest on Loan Account Dr.
  To Loan Account

If nothing has been paid as interest, we are to find out the amount by applying the rate with the amount of the loan and pass the above entry. The total amount of unpaid interest will appear in the Balance Sheet as a liability.

12. Interest on Capital

Sometimes, it may be required to make a provision for interest on the capital contributed by the proprietor or the partners. Such interest is not a charge against profit but an appropriation of profit. In this connection, the following two entries have to be passed :

(i) Profit and Loss Appropriation Account Dr.
To Interest on Capital Account
(Being interest on capital payable)

(ii) Interest on Capital Account Dr.
To Capital/Current Account
(Being interest on capital transferred to Capital/Current Account)

13. Interest on Drawings

Sometimes, interest on drawings may be charged to restrict the frequent drawings by the partners. Such interest increases the divisible profit. The following two entries have to be passed:

(i) Interest on Drawings Account Dr.
To Profit and Loss Appropriation Account

(ii) Capital/Current Account Dr.
To Interest on Drawings Account
(Being interest on drawings transferred to Capital/Current Account)

14. Sales Tax

When goods are sold to customers either in cash or credit, sales tax is collected from him along with the price of the goods sold. Periodically, this sales tax is deposited with the Government through the bank. Generally, in the Sales Day Book, a separate column is provided for sales tax. When goods are sold, sales tax is entered in that separate column and sales are entered in other column.

When these are posted in the ledger, the following entry is passed :

Sundry Debtors Account Dr.
To Sales Account
To Sales Tax Account

When goods are sold for cash the entry will be :

Cash Account Dr.
To Sales Account
To Sales Tax Account

When sales tax is paid to the Government, the following entry is passed :

Sales Tax Account Dr.
To Bank Account

Any balance in the Sales Tax Account represents amount unpaid and it is to be shown in the Balance Sheet as a liability. Sometimes, sales tax is not recorded separately but it is added with the sales. In this case, an adjusting entry is to be passed by debiting Sales Account and crediting Sales Tax Account. Unpaid amount of sales tax is to be shown in the Balance Sheet as a liability.

15. Provident Fund

As per the provision of the Provident Fund Act, both the employer and the employee must contribute a minimum fixed percentage of salary towards provident fund.

When salaries are paid to employees, employer deducts the employees' share of contribution from salary and net salary is paid to the employees. Employer's own contribution as well as deducted amount of employees are deposited within a specified period with the proper authority.

When salaries are paid, the following entry is passed :

Salary Account Dr. [Total amount payable to employees]
To Bank / Cash Account (Net amount paid)
To Provident Fund Deduction Account [Amount deducted from employees]

For employer's own contribution to Provident Fund, the following entry is passed :

Salary Account Dr.

To Own Contribution to Provident Fund Account

When both the amounts are deposited, the following entry is passed :

Provident Fund Deduction Account Dr.

Own Contribution to Provident Fund Account Dr.

To Bank / Cash Account

If the amount has not been deposited within the accounting period, it is to be shown in the Balance Sheet as a current liability.

Illustrative Example 9

The following items are appearing in the Trial Balance of Mr A as on 31st March, 2015.

Trial Balance [Extract]

Sl.No.	Head of Accounts	L.F.	Dr. (₹)	Cr. (₹)
	Salaries		16,000	
	P.F. Deducted from Salaries			1,000

Additional information : Provide employer's share of Provident Fund ₹ 1,000. How will you deal with these items at the time of preparation of final accounts ?

Solution

For employer's share of Provident Fund, Salary Account will be debited and Provident Fund Outstanding Account will be credited.

Net effect :

(i) Salary Account is to be charged to Profit and Loss Account with ₹ 17,000 (16,000 + 1,000); (ii) In the Balance both 'P.F. deducted from Salaries' and 'P.F. Outstanding' ₹ 1,000 each are to be shown as liabilities.

Illustrative Example 10

The following items are appearing in the Trial Balance of Mr X as on 31st March, 2015.

Trial Balance [Extract]

Sl.No.	Head of Accounts	L.F.	Dr. (₹)	Cr. (₹)
	Salaries *less* P.F.		5,400	
	P.F. Remittance including Proprietor's Contribution — 50%		1,200	.

How will you deal with the above items at the time of preparation of final accounts ?

Solution

Out of ₹ 1,200 Provident Fund remittance, 50% i.e. ₹ 600 is proprietor's contribution and 50% i.e. ₹ 600 was deducted from the salary of the employees. In this case, net amount paid was debited to Salaries Account. Therefore, both employees' share and proprietor's share are to be added with the salaries. The entry will be :

Salaries Account Dr. ₹ 1,200

To P.F. Remittance Account ₹ 1,200

Net Effect :

The Salaries Account will be increased by ₹ 1,200. The total salary (₹ 5,400 + ₹ 1,200) of ₹ 6,600 will be debited to Profit and Loss Account.

Alternatively, only employees' share, i.e. ₹ 600 can be added with the Salary Account and ₹ 6,000 is to be shown in the Profit and Loss Account as salary. The proprietor's share of ₹ 600 will also be shown in the Profit and Loss Account as a separate item as employer's contribution to P.F. However, the effect on Profit and Loss Account will be the same.

16. Closing Stock

(i) Closing stock appearing in the additional information will be credited in Trading Account and is to be shown as a current asset in the Balance Sheet.

(ii) If closing stock is appearing in the Trial Balance it is to be shown in the Balance Sheet only.

It should be noted that the closing stock should be valued at lower of cost and net realisable value.
Para 3 of AS—2 defines net realisable value as : Net realisable value is the estimated selling price in the ordinary course of business less the estimated cost of completion and the estimated cost necessary to make the sale.
[For details see Chapter 9 — Inventories.]

Illustration 1

Show by means of Journal Entries how the following items should be adjusted when preparing the Final Accounts of a firm for the year ended 31st March, 2015.

(i) Closing stock at market value as on March 31, 2015 was ₹ 1,00,000 (cost ₹ 80,000). Stock is being valued on a consistent basis of cost or market price whichever is lower.
(ii) No entry had been passed in the books for stock withdrawn from the business by the proprietor ₹ 10,000.
(iii) Legal charges include ₹ 20,000 for cost of stamp and registration of new building acquired during the year.
(iv) Patents and trademarks were acquired at a cost of ₹ 28,000 in 2014 and every year 1/10th is being written-off.
(v) Proprietor had withdrawn for personal use goods for which the cost was ₹ 3,500 but the market value on the date of withdrawal was ₹ 4,500. Sales were credited by ₹ 3,000.
(vi) Purchase include purchase of furniture for office use worth ₹ 10,000.
(vii) An amount of ₹ 25,000 received in respect of new capital introduced by the proprietor was wrongly credited to Sundry Debtors Account.
(viii) An amount of ₹ 5,000 received from a debtor was wrongly credited to Sales Account.
(ix) Goods costing ₹ 8,000 were despatched out on 29th March. The sale, however, took place on 2nd April, 2015, when an invoice of ₹ 9,000 was raised against the customer.

Solution

In the books of ...
Journal

Date	Particulars		L.F.	Dr. ₹	Cr. ₹
2015 March 31 (i)	Closing Stock A/c (Note 1)	Dr.		80,000	
	To Trading A/c				80,000
	(Being the adjustment for Closing Stock)				
(ii)	Drawings A/c	Dr.		10,000	
	To Purchases A/c				10,000
	(Being the adjustment for goods withdrawn by the proprietor)				
(iii)	Building A/c	Dr.		20,000	
	To Legal Charges A/c				20,000
	(Being cost of stamps & registration charges wrongly debited to Legal Charges Account, now adjusted)				
(iv)	Depreciation on Patent & Trademarks A/c	Dr.		2,800	
	To Patent & Trademarks A/c				2,800
	(Being the amount of depreciation written-off)				
(v)	Drawings A/c (Note 2)	Dr.		500	
	To Sales A/c (₹ 3,500 – ₹ 3,000)				500
	(Being the adjustment for goods withdrawn by the proprietor)				
(vi)	Furniture A/c	Dr.		10,000	
	To Purchases A/c				10,000
	(Being the purchase of furniture for office use wrongly debited to Purchases Account, now rectified)				
(vii)	Sundry Debtors A/c	Dr.		25,000	
	To Capital A/c				25,000
	(Being capital introduced by the proprietor wrongly credited to Sundry Debtors Account, now rectified)				
(viii)	Sales A/c	Dr.		5,000	
	To Sundry Debtors A/c				5,000
	(Being cash paid by a debtor wrongly credited to Sales Account, now rectified)				
(ix)	Goods-in-Transit A/c	Dr.		8,000	
	To Trading A/c				8,000
	(Being the adjustment for goods in transit)				

Working Notes :

(1) Closing stock is to be valued at cost or market price whichever is lower. In this case, cost price is ₹ 80,000 which is lower than the market price ₹ 1,00,000. Therefore, only ₹ 80,000 is to be adjusted.

(2) Cost of goods withdrawn by the proprietor will be treated as drawings. The market value of goods ₹ 4,500 is immaterial. Sales Account has already been credited by ₹ 3,000. Therefore, the balance (₹ 3,500 – ₹ 3,000) ₹ 500 is to be adjusted by debiting Drawings Account and crediting Sales/Purchases Account.

Illustration 2

Show by means of Journal Entries how the following matters should be adjusted when preparing the Annual Accounts of a firm for the year ended 30th September, 2014:

(a) Goods sold and recorded as sales for ₹ 4,000 were packed and the invoice for them sent to the customer. Stock taking intervened, and the parcel of goods was not despatched but was included in stock-in-hand.

(b) Several employees took their salary in advance in the month of September 2014, which was payable to them in October 2014 amounting to ₹ 2,500.

(c) A purchase made for a staff member of ₹ 1,000 and the cost was included in purchases. A deduction of similar amount was made from his salary and net payment to him posted to Salaries Account.

(d) Wages paid to the firm's own workmen for making certain additions to machinery amounting to ₹ 750, were posted to Wages Account.

(e) A dishonoured bill receivable for ₹ 500 returned by the bank with whom it had been discounted, had been credited to Bank Account and debited to Bills Receivable Account.

(f) A cheque amounting to ₹ 270 received from a customer, Mr X, was dishonoured. The returned cheque was correctly entered in the Cash Book but was posted therefrom to Allowances Account.

(g) A duplicate invoice for a purchase of machinery costing ₹ 10,000 was erroneously passed again and entered into the books.

(h) A sum of ₹ 1,000 drawn by the proprietor was debited to Travelling expenses.

Suggested Steps for Preparation of Final Accounts

The students may follow the following suggested steps for the preparation of Final Accounts from a given Trial Balance with some year-end adjustments.

Step 1 : Set out a pro-forma Trading Account, Profit and Loss Account and Balance Sheet. Already you know that Final Accounts can be prepared either in Horizontal Format or in Vertical Format. Pro-forma is to be drawn up according to the requirement of the question.

Step 2 : Go down the Trial Balance and identify the items which are to be entered in the Trading Account, which are to be entered in the Profit and Loss Account and which are to be entered in the Balance Sheet. Mark these as 'T', 'P' and 'B'. In addition, it is useful to mark those values with an asterisk (*) which are to be affected by the additional information (i.e. adjustments).

Step 3 : Put all the assets and liabilities (with the mark 'B') into their appropriate position on the Balance Sheet, all the revenues and expenses (with the mark 'T' or 'P' without asterisk) into their appropriate position in the Trading, Profit and Loss Accounts. No double entry is needed since the Trial Balance figures are the result of the double entry.

Step 4 : Make necessary year end adjustment in the items marked with asterisk(*). Since no double entry have been made for these, there will be a double effect on the Final Accounts. Most adjustments will affect both the Balance Sheet and Trading / Profit and Loss Account.

Step 5 : Balance the Trading Account to find out Gross Profit / Loss and transfer it to Profit and Loss Account.

Step 6 : Balance the Profit and Loss Account to find out Net Profit / Loss and transfer it to the capital section of the Balance Sheet and total the Balance Sheet.

Illustration 3

Prepare a Trading Account and a Profit and Loss Account for the year ended 31st December 2014 and a Balance Sheet as on that date from the following Trial Balance and the adjustment items:

Particulars	Dr. (₹)	Cr. (₹)	Particulars	Dr. (₹)	Cr. (₹)
Opening stock	46,000		Office electricity expenses	9,400	
Purchases and Sales	4,42,000	8,20,000	Telephone charges	4,400	
Sales returns and Purchases returns	8,000	12,000	Cash at Bank	18,000	
Discount received		2,200	Printing and Stationery	11,200	
Wages	43,500		Postage stamps	1,090	
Salaries	66,000		Furniture	2,00,000	
Carriage inwards	39,100		Petty cash	210	
Advertising expenses	10,200		Prepaid printing	1,200	
Bills receivable and payable	9,000	10,000	Insurance premium	3,000	
12% Bank loan (taken on 1st November 2014)		1,50,000	Carriage outwards	12,000	
Office equipment	1,99,700		Bad debts	800	
Land and building	3,36,000		Interest on Bank loan paid	1,500	
Provision for doubtful debts		3,200	Capital Account		4,76,900
Sundry Debtors and Sundry Creditors	45,000	40,000	Reserve for Discount on creditors	1,700	
Rates and taxes	5,300		**TOTAL**	15,14,300	15,14,300

Adjustment items:

(a) Closing stock was valued at ₹ 38,000 on 31st December 2014.

(b) Goods worth ₹ 2,500 were distributed by salesmen as free samples, but no entry has been made for this.

(c) Depreciate furniture by $7^1/_2$% p.a and office equipment by 10% p.a.

(d) Reserve for discount on creditors to be maintained at 2%.

(e) Provision for doubtful debts to be maintained at 5% on debtors.

(f) Create a provision for discount on debtors at 2%.

(g) Commission of ₹ 1,300 was earned but not yet received.

(h) Rates and taxes of ₹ 800 was paid in advance for 2015.

(i) Creditors include a debt of ₹ 4,000 to Mr Nayak who is also included in the list of debtors for ₹ 5,000 and, therefore, to be set off before calculating the reserves.

The following is the Trial Balance of Mr Bharat on 31st December, 2014 :

Particulars	Dr. (₹)	Cr. (₹)	Particulars	Dr. (₹)	Cr. (₹)
Capital		4,000	Bills payable		560
Sundry creditors		5,200	Bills Receivable	720	
Plant & Machinery	5,000		Returns inwards	930	
Office furniture and fittings	260		Provision for doubtful debts		250

Stock as on 1st January, 2014	4,800		Drawings	700	
Motor van	1,200		Returns outwards		550
Sundry debtors	4,570		Rent	600	
Cash in hand	40		Factory lighting and heating	80	
Cash at bank	650		Insurance	630	
Wages	15,000		General expenses	100	
Salaries	1,400		Bad debts	250	
Purchases	21,350		Discount	650	370
Sales		48,000	**TOTAL**	58,930	58,930

The following adjustments are to be made :

(i) Stock on 31st December, 2014 ₹ 5,200;

(ii) 3 months factory lighting and heating is due, but not paid ₹ 30;

(iii) 5% depreciation to be written-off on furniture;

(iv) Write-off further bad debts ₹ 70;

(v) The provision for doubtful debts to be increased to ₹ 300 and provision for discount on debtors @ 2% to be made;

(vi) During the year machinery was purchased for ₹ 2,000, but it was debited to Purchases Account.

You are required to make the necessary Journal entries and prepare Trading and Profit and Loss Account and the Balance Sheet.

Illustration 5

From the following figures extracted from the books of Govind, you are required to prepare a Trading and Profit and Loss Account for the year ended 31st March, 2015 and a Balance Sheet as on that date after making the necessary adjustments:

Particulars	₹	Particulars	₹
Shri Govind's capital	2,28,800	Stock 1.4.2014	38,500
Shri Govind's drawings	13,200	Wages	35,200
Plant and Machinery	99,000	Sundry Creditors	44,000
Freehold property	66,000	Postage & Telegrams	1,540

Purchases	1,10,000	Insurance	1,760
Returns outwards	1,100	Gas and fuel	2,970
Salaries	13,200	Bad debts	660
Office expenses	2,750	Office rent	2,860
Office furniture	5,500	Freight	9,900
Discounts A/c. (Dr.)	1,320	Loose tools	2,200
Sundry Debtors	29,260	Factory lighting	1,100
Loan to Shri Krishna @ 10% p.a. balance on 1.4.2014	44,000	Provision for Doubtful Debts	880
Cash at bank	29,260	Interest on loan to Shri Krishna	1,100
Bills payable	5,500	Cash in hand	2,640
Sales	2,31,440		

Adjustments :

1. Stock on 31st March, 2015 was valued at ₹ 72,600.
2. A new machine was installed during the year costing ₹ 15,400 but it was not recorded in the books as no payment was made for it. Wages ₹ 1,100 paid for its erection have been debited to wages account.
3. Depreciate Plant and Machinery by $33^1/_3$%; Furniture by 10%; and Freehold property by 5%.
4. Loose tools were valued at ₹ 1,760 on 31.3.2015.
5. Of the Sundry Debtors ₹ 660 are bad and should be written-off.
6. Maintain a provision of 5% on Sundry Debtors for doubtful debts.
7. The manager is entitled to a commission of 10% of the net profits after charging such commission.

[C.A. (Entrance) — Adapted]

Solution

Govind

Dr. Trading and Profit and Loss Account for the year ended 31st March, 2015 Cr.

Particulars	₹	₹	Particulars	₹	₹
To Opening Stock (1.4.2014)		38,500	By Sales		2,31,440
To Purchases	1,10,000		By Closing Stock		72,600
Less: Returns	1,100	1,08,900			
To Wages	35,200				
Less: Wages for erection of machinery	1,100	34,100			
To Gas & Fuel		2,970			
To Freight		9,900			
To Factory lighting		1,100			
To Gross Profit c/d		1,08,570			
		3,04,040			3,04,040
To Salaries		13,200	By Gross Profit b/d		1,08,570
To Office expenses		2,750	By Interest	1,100	
To Postage and Telegram		1,540	Add: Outstanding	3,300	4,400
To Insurance		1,760			
To Office rent		2,860			
To Discount		1,320			
To Bad Debts		1,320			
To Provision for Doubtful debts:					
New provision	1,430				
Less: Old provision	880	550			
To Depreciation:					
On Machinery	38,500				
On Furniture	550				
On Freehold property	3,300				
On Loose tools	440	42,790			
To Commission to Manager (Note 1)		4,080			
To Net Profit (transferred to capital)		40,800			
		1,12,970			1,12,970

Balance Sheet of Govind as at 31st March, 2015

Liabilities	₹	₹	Assets	₹	₹
Capital:	2,28,800		Plant and Machinery	99,000	
Add: Net Profit	40,800		Add: New Machinery (15,400 + 1,100)	16,500	
	2,69,600			1,15,500	
Less: Drawings	13,200	2,56,400	Less: Depreciation	38,500	77,000
Bills Payable		5,500	Freehold property	66,000	
Sundry Creditors (₹ 44,000 + ₹ 15,400)		59,400	Less: Depreciation	3,300	62,700
Manager's Commission payable		4,080	Office furniture	5,500	

			Less: Depreciation	550	4,950
			Loose tools	2,200	
			Less: Depreciation	440	1,760
			Closing Stock		72,600
			Sundry Debtors	28,600	
			Less: Provision for doubtful debts	1,430	27,170
			Loan to Shri Krishna	44,000	
			Add: Interest outstanding	3,300	47,300
			Cash at bank		29,260
			Cash in hand		2,640
		3,25,380			3,25,380

Working Note : (1) Before charging manager's commission profit is ₹ 44,880. Let the profit after charging manager's commission be ₹ 100. Commission is payable @ 10%, i.e. ₹ 10. Therefore, profit before commission will be : ₹ 100 + 10 = ₹ 110. When profit before commission is ₹ 110 then commission will be ₹ 10. Therefore, when profit before commission is ₹ 44,800 then the commission will be : 10 / 110 x ₹ 44,880 = ₹ 4,080..

Illustration 6

From the following particulars extracted from the books of Ganguli, prepare Trading and Profit and Loss Account and Balance Sheet as at 31st March, 2015 after making the necessary adjustments :

Particulars	₹	Particulars	₹
Ganguli's Capital Account (Cr.)	54,050	Interest Received	725
Stock on 1.4.2014	23,400	Cash with Traders Bank Ltd.	4,000
Sales	1,44,800	Discounts Received	1,495
Sales Returns	4,300	Investments (at 5%) as on 1.4.2014	2,500
Purchases	1,21,550	Furniture as on 1.4.2014	900
Purchases Returns	2,900	Discounts Allowed	3,770
Carriage Inwards	9,300	General Expenses	1,960
Rent	2,850	Audit Fees	350
Salaries	4,650	Fire Insurance Premium	300
Sundry Debtors	12,000	Travelling Expenses	1,165
Sundry Creditors	7,400	Postage and Telegrams	435
Loan from Dena Bank Ltd. (at 12%)	10,000	Cash on Hand	190
Interest Paid	450	Deposits at 10% as on 1.4.2014 (Dr.)	15,000
Printing and Stationery	1,700	Drawings	5,000
Advertising	5,600		

Adjustments :

(1) Value of stock as on 31st March, 2015 is ₹ 39,300. This includes goods returned by customers on 31st March, 2015 to the value of ₹ 1,500 for which no entry has been passed in the books.

(2) Purchases include furniture purchased on 1st January, 2015 for ₹ 1,000.

(3) Depreciation should be provided on furniture at 10% per annum.

(4) The Loan Account from Dena Bank in the books of Ganguly appears as follows :

31.3.2015	To Balance c/d	10,000	1.4.2014	By Balance b/d	5,000
			31.3.2015	By Bank A/c	5,000
		10,000			10,000

(5) Sundry Debtors include ₹ 2,000 due from Robert and Sundry Creditors include ₹ 1,000 due to him.

(6) Interest paid include ₹ 300 paid to Dena Bank.

(7) Interest received represent ₹ 100 from the Sundry Debtors and the balance on investments and deposits.

(8) Provide for interest payable to Dena Bank and for interest receivable on investments and deposits.

(9) Make a provision for doubtful debts at 5% on the balance under "Sundry Debtors". No such provision need be made for the deposits.

From the following balances taken from the Ledger of Krishna on 31st March 2015, prepare the Trading and Loss Account for the year ended 31st March, 2015 and the Balance Sheet as at 31st March 2015 of Krishna **in vertical format** :

Particulars	₹	Particulars	₹
Sundry Creditors	19,000	Bad Debts	100
Building	15,000	Loan from Ram	2,500
Income tax	1,025	Sundry Debtors	9,500
Loose tools	1,000	Investments	6,500
Cash at Bank	16,200	Provision for Bad Debts	1,600
Sundry Expenses	1,990	Rent and Rates	850
Bank Interest (Cr.)	75	Furniture	3,000
Purchases	1,57,000	Stock (1-4-2014)	27,350
Wages	10,000	Capital	47,390
Carriage inwards	1,120	Discount allowed	630
Sales	1,85,000	Dividends received	535
Motor Van	12,500	Drawings	2,000
Cash in hand	335	Bills payable	10,000

Adjustments to be taken into account:

(a) Write-off further ₹ 300 as bad out of Sundry Debtors and create a provision for bad debts at 20% on Debtors.

(b) Dividends accrued and due on Investments is ₹ 135. Rates paid in advance ₹ 100 and wages owing ₹ 450.

(c) On 31.3.2015 stock was valued at ₹ 15,000 and Loose tools were valued at ₹ 800.

(d) Write-off 5% for depreciation on Buildings and 40% on Motor Van.

(e) Provide for interest at 12% p.a. due on Loan taken on 1.6.2014.

(f) Income-tax paid has to be treated as Drawings.

The accountant of M/s Kasturi Agencies extracted the following Trial Balance as on March 31, 2015.

Particulars	Dr. (₹)	Cr. (₹)	Particulars	Dr. (₹)	Cr. (₹)
Capital		1,00,000	Stock as at 31.3.2015		32,000
Drawings		18,000	Establishment expenses	15,000	
Building	15,000		Freight inwards	2,000	
Furniture and fittings	7,500		Freight outwards		1,000
Motor van	25,000		Commission received		7,500
Loan from Hari @ 12% interest	15,000		Sundry debtors	28,100	
Interest paid on above	450		Bank balance	20,500	
Sales		1,00,000	Sundry creditors		10,000
Purchases	75,000				
Stock as at 1.4.2014	25,000		**TOTAL**	2,28,550	2,68,500

The accountant located the following errors but is unable to proceed any further.

(a) Totalling errors in bank column of payment side of Cash Book whereby the column was under totalled by ₹ 500.

(b) Interest on loan paid for the quarter ending December 31, 2014 ₹ 450, was omitted to be posted in the ledger. There was no further payment of interest.

(c) Goods received, on sale or return basis from Suppliers Ltd on 30th March, 2015 at a 'Proforma Invoice' cost of ₹ 5,000 have been recorded as purchase.

(d) Income tax refund of ₹ 1,900 has been recorded as receipt from debtors.

You are required to prepare the Trading and Profit and Loss Account for the year ended March 31, 2015 and the Balance Sheet as at that date, after carrying out the following:

Depreciation to be provided on: Building @ 2.5%; Furniture and fittings @ 10% p.a.; Motor van @ 25% p.a.

Building @ 2.5%	375				
Furniture @ 10%	750				
Motor van @ 2.5%	6,250	7,375			
To Freight outwards		1,000			
To Interest	900				
Add: Outstanding	450	1,350			
To Net Profit (transferred to Capital Account)		12,775			
		37,500			37,500

Balance Sheet of M/s Kasturi Agencies as at 31st March, 2015

Liabilities	₹	₹	Assets	₹	₹
Capital A/c	1,00,000		**Fixed Assets**		
Add: Net Profit	12,775		Building	15,000	
	1,12,775		Less: Depreciation @ 2.5%	375	14,625
Less: Drawings	18,000		Furniture & fitxture	7,500	
	94,775		Less: Depreciation @ 10%	750	6,750
Add: Capital introduced (Note 3)	1,900	96,675	Motor van	25,000	
Loan from Hari		15,000	Less: Depreciation @ 2.5%	6,250	18,750
Interest outstanding on Loan		450	**Current Assets**		
Sundry creditors (Note 1)		5,000	Stock (Note 2)		27,000
			Sundry Debtors (Note 3 and 4)		30,000
			Bank balance		20,000
		1,17,125			1,17,125

Working Notes :

(1) Purchases of ₹ 75,000 includes goods of ₹ 5,000 which was received on sale or return basis. Therefore, to rectify this, the following entry is to be passed :

Creditors Account Dr. ₹ 5,000
To Purchases Account ₹ 5,000

Net effect :

(i) Purchases will be reduced by ₹ 5,000.

(ii) Sundry Creditors will be reduced by ₹ 5,000.

(2) Goods received on sale or return basis were included in the Stock also. Therefore, these are to be deducted from the value of closing stock. Final value of closing stock will be ₹ 27,000.

(3) Income tax refund has been recorded wrongly as payment by debtors. To rectify this, the following entry is to be passed :

Sundry Debtors Account Dr. ₹ 1,900
To Capital Account* ₹ 1,900

* New capital introduced.

(4) Final balance of Sundry Debtors = ₹ 28,100 + ₹ 1,900 = ₹ 30,000.

Illustration 10

The following is the schedule of balances as on 31.3.2015 extracted from the books of Shri Gavaskar, who carries on business under the same name and style of Messrs Gavaskar Viswanath & Co., at Bombay:

Particulars	Dr. (₹)	Cr. (₹)	Particulars	Dr. (₹)	Cr. (₹)
Cash in hand	1,400		Interest on loan from Viswanath	2,700	
Cash at bank	2,600		Rates & taxes	2,100	
Sundry Debtors	86,000		Discount allowed to Debtors	2,400	
Stock on 1.4.2014	62,000		Discount received from creditors		1,600
Furniture & fixtures	21,400		Freight on purchases	1,200	
Office equipment	16,000		Carriage outwards	2,000	
Buildings	60,000		Drawings	12,000	
Motor car	20,000		Printing and Stationery	1,800	
Sundry creditors		43,000	Electricity charges	2,200	
Loan from Viswanath		30,000	Insurance premium	5,500	
Provision for bad debts		3,000	General office expenses	3,000	
Purchases	1,40,000		Bad debts	2,000	
Purchase Returns		2,600	Bank charges	1,600	
Sales		2,30,000	Motor car expenses	3,600	
Sales Returns	4,200		Capital A/c		1,62,000
Salaries	11,000				
Rent for godown	5,500		**TOTAL**	4,72,200	4,72,200

Prepare Trading and Profit and Loss Account for the year ended 31st March, 2015 and the Balance Sheet as at that date after making provision for the following :

1. Depreciate : (a) Building used for business by 5 percent; (b) Furniture and fixtures by 10 percent; One steel table purchased during the year for ₹ 1,400 was sold for same price but the sale proceeds were wrongly credited to Sales Account; (c) Office equipment by 15 percent; Purchase of a typewriter during the year for ₹ 4,000 has been wrongly debited to purchase; and (d) Motor car by 20 percent.
2. Stock consists of 11,000 units of goods purchased @ ₹ 4 per unit, but unit price has fallen to ₹ 3.25. This price reduction is anticipated to be permanent. The firm has already decided that if the price reduction lasts longer than two months it will reduce sale price of the item from ₹ 6.50 to ₹ 5.75.
3. One month's rent for godown is outstanding.
4. One month's salary is outstanding.
5. Interest on loan from Viswanath is payable at 12 percent per annum, this loan was taken on 1.5.2014.
6. Provision for bad debts is to be maintained at 5 per cent of Sundry Debtors.
7. Insurance premium includes ₹ 4,000 paid towards proprietor's life insurance policy and the balance of the insurance charges cover the period from 1.4.2014 to 30.6.2015.
8. Half of the buildings are used for residential purposes of Shri Gavaskar.
9. A debit balance of ₹ 420 existed in the creditors ledger at the end of March 2015, representing advance to supplier, the suppliers concerned cannot be traced and it has been decided to write-off the balance.
10. The actual cash balance in office cash box is ₹ 1,300.

Solution

M/s Gavaskar Viswanath & Co.

Dr. Trading and Profit and Loss Account for the year ended 31st, March 2015 Cr.

To Bank charges		1,600			
To Interest on loan	2,700				
Add: Outstanding (Note 3)	600	3,300			
To Creditors A/c (Note 5)		420			
To Miscellaneous Expenses (Note 6)		100			
To Motor car		3,600			
To Net Profit (transferred to capital)		17,880			
		73,400			73,400

Balance Sheet of M/s Gavaskar Viswanath & Co. as at 31st March, 2015

Liabilities	₹	₹	Assets	₹	₹
Capital Account	1,62,000		Fixed Assets		
Add: Net Profit	17,880		Building	60,000	
	1,79,880		Less: Depreciation	3,000	57,000
Less: Drawings	12,000		Motor Car	20,000	
	1,67,880		Less: Depreciation	4,000	16,000

Less: Insurance premium	4,000		Office equipment (₹ 16,000 + ₹ 4,000)	20,000	
Less: 1/2 of Depreciation on Buildings	1,500	1,62,380	Less: Depreciation	3,000	17,000
Loan from Viswanath	30,000		Furniture & fixtures (₹ 21,400 – ₹ 1,400)	20,000	
Add: Outstanding	600	30,600	Less: Depreciation	2,000	18,000
Sundry Creditors (Note 5)		43,420	Current Assets		
Outstanding expenses :			Stock in trade		44,000
Salaries	1,000		Sundry Debtors	86,000	
Rent	500	1,500	Less: Provision for doubtful debts	4,300	81,700
			Cash at bank		2,600
			Cash in hand		1,300
			Prepaid insurance (Note 1)		300
		2,37,900			2,37,900

Working Notes : (1) Insurance Premium	₹	**(2) Calculation of Depreciation**		₹
Insurance premium as per Trial Balance	5,500	On Building @ 5% on ₹ 60,000	3,000	
Less: Proprietor's life insurance policy premium	4,000	Less: 1/2 for private use	1,500	1,500
Premium for 15 months	1,500	On Motor car @ 20% on ₹ 20,000		4,000
Less: Prepaid for 3 months	300	On Furniture & fittings @ 10% (₹ 21,400—₹ 1,400)		2,000
Charged to Profit and Loss A/c	1,200	On Office equipment as per Trial Balance	16,000	
		Addition (typewriter)	4,000	
			20,000	3,000
				10,500

(3) Calculation of Interest on Loan : (₹ 30,000 x 12 x 11) / 100 x 12 = ₹ 3,300; Outstanding ₹ 3,300 – ₹ 2,700 = ₹ 600.

(4) Para 24 of AS—2 states that ***materials and other supplies held for use in the production of inventories are not written down below cost, if the finished products in which they will be incorporated are expected to be sold at or above cost***.
In this case, though the unit price has fallen to ₹ 3.25 from ₹ 4.00, the stock will be valued @ ₹ 4.00 because it will not exceed the revised selling price of ₹ 5.75.
Therefore, the value of the stock will be : 11,000 × ₹ 4.00 = ₹ **44,000**.

(5) In the creditors ledger a debit balance of ₹ 420 existed representing advance to supplier. At the time of preparation of trial balance net amount of creditors was shown.
Actual position was as follows :
₹ 43,420 (Cr.) less 420 (Dr.). Therefore, net amount ₹ 43,000.
Now the supplier can not be traced. Therefore, it is to be written-off by passing the following entry :
Profit and Loss Account Dr. ₹ 420
To Suppliers / Creditors Account ₹ 420
Final balance of creditors in the Balance Sheet will be ₹ 43,420 (Cr.) after cancellation of ₹ 420 (Dr.)

(6) Cash book balance is ₹ 1,400 but Cash box balance is ₹ 1,300. This difference can be treated as miscellaneous expenses and charged to Profit and Loss Account. The final balance of cash in the Balance Sheet will be ₹ 1,300.

Illustration 11

Below is given the Trial Balance of Ghosh and Guha Co. as on 31st March, 2015. The partners share profit as Ghosh 2/3; and Guha 1/3rd upto 50% of the distributable profit to the company and the balance equally :

Debit Balances	₹	**Credit Balances**	₹
Freehold premises	1,50,000	Capital Account	
Plant and Machinery	45,000	Ghosh	50,000
Wages	20,000	Guha	30,000
Opening stock :		Sundry creditors	25,000
Finished goods	40,000	Sales (net)	3,25,000
Raw materials	20,000	Discount	2,500
Work-in-progress	18,000	Bad debts provision	1,500
Sundry Debtors	50,000	Commission	10,000
Carriage inwards	1,500	Guha Loan A/c	30,000
Carriage outwards	900		
Factory expenses	7,500		
Royalties	1,500		
Purchases of raw materials (net)	75,000		
Factory rent & taxes	6,500		
Discount	2,900		
Office rent	4,000		
Insurance	2,000		

Bad debts	1,500		
Office expenses	7,500		
Salaries of works manager	12,000		
Cash at bank	8,200		
	4,74,000		4,74,000

The following additional information is to be taken into consideration :

(a) Closing stock : Finished goods ₹ 50,000; Raw materials ₹ 30,000; Work-in-process ₹ 25,000;

(b) Outstanding liabilities to be provided for wages ₹ 5,000; Office salaries ₹ 6,000; and Office rent ₹ 2,000.

(c) Bad debts provision to be adjusted to 2.5% on Sundry debtors, Insurance premium paid in advance ₹ 500.

(d) Depreciate freehold premises by 2.5% and plant and machinery by 5%.

(e) Partnership salary to be allowed to Ghosh ₹ 6,000 and Guha ₹ 3,000. The Loan Account of Guha was raised in the books before the commencement of the year.

You are required to prepare the Trading and Profit and Loss Account for the year ended 31st March 2015 and the Balance Sheet at that date.

Solution **Ghosh & Guha Company**

Advanced Adjustments

1. Pre-payment and Outstanding

Illustrative Example 1

Beta, a sole proprietor, prepares his financial statements for the year to 31st March each year. He pays rent for his premises quarterly in advance on 1 December, 1 March, 1 June and 1 September. The annual rent was ₹ 84,000 until 31st May, 2014. It was increased from that date to ₹ 96,000 per year. What rent expenses and end year prepayment should be included in the financial statements for the year end 31st March, 2015 ?

Solution

	₹
Rent Expenses	
(i) 2/12 × ₹ 84,000 (April + May)	14,000
(ii) 10/12 × ₹ 96,000	80,000
	94,000
Prepayment	
2/12 × ₹ 96,000	16,000

Tutorial Note :

On 1st March, 2015 Beta paid ₹ 24,000 for the month of March, April and May, 2015. Payment for April and May 2015 will be treated as prepayments.

Illustrative Example 2

During the year 2014, cash payments of ₹ 1,56,000 were made in respect of general operating expenses. As at 31st December 2013, outstanding and prepayments in respect of such expenses were ₹ 6,744 and ₹ 3,328 respectively. The following information is relevant for determining the equivalent figures at 31st December, 2014.

Item	Amount (₹)	Payment Date	Details
Rates	13,000	30 November, 2014	Quarter ending 28 February, 2015
Electricity	9,678	1 January, 2015	Quarter ending 31 December, 2014
Heat and Light	5,167	11 December, 2014	Six months ending 30 November, 2014
Telephone	2,978	30 October, 2014	Quarter ending 30 October, 2014 (includes ₹ 1,905 rental for lease line for internet for quarter ending 31 January, 2015)
Telephone	3,148 (Estimated)	31 January, 2015	Quarter ending 31 January, 2015 (includes ₹ 1,905 rental for lease line for internet for quarter ending 30 April, 2015)

You are required to :

(i) calculate the amount of outstanding and prepayments of general operating expenses which will be shown in the Balance Sheet as at 31 December, 2014.

(ii) calculate the amount of general operating expenses which will be charged to Profit and Loss Account for the year ended 31 December, 2014.

Solution

(1) Calculation of Outstanding and Prepayments of General Operating Expenses

Expenses	Notes	Outstanding (₹)	Prepayments (₹)
Rates	(1)	—	8,667
Electricity	(2)	9,678	—
Heat and Light	(3)	861	—
Telephone	(4)	829	635
Total		11,368	9,302

Dr. General Operating Expenses Account Cr.

Date	Particulars	₹	Date	Particulars	₹
2014			2014		
Jan. 1	To Prepaid Expenses A/c	3,328	Jan. 1	By Oustanding Expenses A/c	6,744
?	To Bank / Cash A/c	1,56,000	Dec. 31	By Profit and Loss A/c	1,54,650
Dec. 31	To Outstanding Expenses A/c	11,368	"	By Prepaid Expenses A/c	9,302
		1,70,696			1,70,696

Amount of General Operating Expenses to be charged to Profit and Loss Account = ₹ 1,54,650.

Working Notes :

(1) Rates : ₹ 13,000 was paid on 30 November, 2014 for three months, i.e., for December, 2014, January and February, 2015. Therefore, prepaid amount of rates = ₹ 13,000 / 3 × 2 = ₹ 8,667.

(2) Electricity : ₹ 9,678 was payable for the quarter ending on 31 December, 2014 but it was paid on 1 January, 2015. Therefore, the entire amount will be treated as outstanding expenses for the year 2014.

(3) Heat and Light : ₹ 5,167 was paid for 6 months ending on 30th November. Therefore, outstanding amount for the year 2014 will be : ₹ 5,167 / 6 × 1 = ₹ 861.

(4) Telephone : (i) ₹ 1,905 was paid on 30 October for lease line for 3 months, i.e., for November and December 2014 plus January 2015. Therefore, prepaid amount will be : ₹ 1,905 / 3 × 1 = ₹ 635.

(ii) ₹ 1,243 (₹ 3,148 – ₹ 1,905) is payable on 31 January, 2015 for November and December 2014 and January 2015. Therefore, the amount of outstanding will be : ₹ 1,243 / 3 × 2 = ₹ 829.

2. Inventories

Illustrative Example 3

Cost of inventory obtained from physical count on 31st March, 2015 — ₹ 77,700. This figure does not include any amounts for the two items below :

(i) An inventory line which had cost ₹ 1,800 was found to be damaged. Remedial work costing ₹ 300 is needed to enable the items to be sold for ₹ 1,700. Selling expenses of ₹ 100 would also be incurred in selling these items.

(ii) Goods sent to a customer on approval in February, 2015 were not included in the inventory. The sale price of the goods was ₹ 4,000 and the cost ₹ 3,000. The customer notified his acceptance of the goods in April, 2015.

You are required to compute the adjusted closing inventory figures from this information.

Solution **Computation of Adjusted Closing Inventory**

As per inventory count	₹ 77,700
Damaged items (₹ 1,700 – ₹ 300 – ₹ 100)	*1,300
Goods on approval	3,000
	82,000

* Inventory is valued at lower of cost and net realisable value. Here, cost is ₹ 1,800 but NRV is ₹ 1,300. Therefore, the value of damaged items will be ₹ 1,300.

3. Depreciation

Illustrative Example 4

J K is the sole proprietor of a business which is involved in the purchase and resale of software packages for use on personal computers. He is currently engaged in preparing his annual accounts for the year ended on 31st December, 2014, and has asked your assistance for calculating the amount of depreciation for the year 2014. The following information is available in respect of fixed assets. As at 1st January, 2014, the original cost and accumulated depreciation of the fixed assets held by the business were as follows :

Asset	Original Cost (₹)	Accumulated Depreciation (₹)
Buildings	3,56,782	1,55,985
Furnitures	1,01,545	46,328
Motor Vehicles	92,874	51,301
Total	5,51,201	2,53,614

During the year, the business acquired new assets as follows :

Asset	Six Months to 30th June, 2014 (₹)	Six Months to 31st December, 2014 (₹)	Total (₹)
Buildings	—	65,800	65,800
Furnitures	27,385	10,100	37,485
Motor Vehicles	28,954	—	28,954
Total	56,339	75,900	1,32,239

During the year, the following fixed asset disposals were made :

Asset	Original Cost (₹)	Accumulated Depreciation at 31st December, 2013 (₹)	Proceeds (₹)
Furnitures — 7th April, 2014	6,300	2,175	2,000
10th September, 2014	31,907	10,548	52,058
Motor Vehicles — 31st August, 2014	21,560	10,870	14,300
Total	59,767	23,593	68,358

The fixed assets are depreciated on a straight-line basis and to an estimated residual value of zero over the following economic lives :

Buildings	20 years
Furnitures	7 years
Motor Vehicles	4 years

Depreciation is calculated on a semi-annual basis, with a full six months' charge in the half-year of acquisition and no charge in the half-year of disposal.

You are required to calculate the amount of depreciation for the year 2014.

Solution **Depreciation Charge for the year 2014**

Particulars	Original Cost ₹	Depreciation ₹
Buildings		
Balance b/d	3,56,782	
Less: Disposal	—	
Add: Acquisition	—	
Balance at 30.6.2014	3,56,782	
Depreciation for 6 months (₹ 3,56,782 / 20 x 6/12)		8,920
Less: Disposal	—	
Add: Acquisition	65,800	
Balance at 31.12.2014	4,22,582	
Depreciation for 6 months (₹ 4,22,582 / 20 x 6/12)		10,565
Total		19,485
Furnitures

4. Commission to Manager

Sometimes, the manager of a concern is given a percentage of the net profit as commission. Since it is an expense like salaries, we must account for it. The entry will be :

Profit and Loss Account Dr.

To Commission Account

If the amount is not paid within the accounting period, it will be shown in the liability side of the Balance Sheet. The problem arises as to the ascertainment of the amount payable as commission. This is because the commission may be paid at a certain percentage before or after charging such commission.

The calculation of commission in the above two cases are different.

Case 1 : When commission is paid at a fixed percentage of net profit before charging such commission.

$$\text{Commission} = \text{Net Profit before commission} \times \text{Rate of commission}$$

Illustrative Example 5

The manager is entitled to a commission of 10% on net profit before charging such commission. Net Profit before charging such commission is ₹ 1,10,000. Find out the commission payable to manager.

Solution

Commission = Net Profit before Commission x Rate of Commission = ₹ 1,10,0000 x 10% = ₹ 11,000.

Case 2 : When commission is paid at a fixed percentage of net profit after charging such commission.

$$\text{Commission} = \text{Net Profit before such commission} \times \frac{\text{Rate of commission}}{100 + \text{Rate of commission}}$$

Illustrative Example 6

The manager is entitled to a commission of 10% on net profit after charging such commission. Net Profit before charging such commission is ₹ 1,10,000. Find out the commission payable to manager.

Solution

$$\text{Commission} = \text{Net Profit before such commission} \times \frac{\text{Rate of commission}}{100 + \text{Rate of commission}} = ₹\ 1{,}10{,}000 \times \frac{10}{110} = ₹\ 10{,}000.$$

Alternatively,

Let total commission payable be x

x = 10% (₹ 1,100,000 – x) or x = 11,000 – .1x or 1.1x = 11,000 or x = ₹ 10,000.

Illustrative Example 7

(i) The General Manager is to be given commission of 10% after charging the commission of Works Manager and his own on net profits.

(ii) The Works Manager is to be given commission of 5% after charging commission of General Manager and his own on net profits. Such commission shall be calculated to the nearest multiple of a rupee.

(iii) Net profit before charging commission = ₹ 82,960.

Calculate the commission of general manager and works manager.

Solution

In this case, commission payable to General Manager and Works Manager are to be calculated with the help of simultaneous equations.

Let x be the total commission to General Manager

Let y be the total commission to Works Manager

Therefore,

x = 10/110 (₹ 82,960 – y) . . . . (1)

y = 5/105 (₹ 82,960 – x) . . . . (2)

or, x = .09091 (₹ 82,960 – y)

or, x + .091y = 7541.818 . . . . (3)

Similarly, y = .04762 (₹ 82,960 – x)

or, .04762x + y = ₹ 3,950.476 . . . . (4)

Multiplying equation 4 by 21 and 3 by 1 we get the following :

x + 21y = 82,960 . . . . (5)

x + .091y = 7,541.818 . . . . (6)

20.909y = 75,418.18 (Subtracting 6 from 5)

y = 75,418.18 / 20.909 = ₹ **3,607**

x = 82,960 – 21 x 3,609.97 = ₹ 7,213.58, say ₹ **7,214**.

5. Stationery Included in Opening Stock and Closing Stock

Illustrative Example 8

From the following information, calculate the amount of stationery is to be charged to Profit and Loss Account and also show the effect on opening stock, closing stock, purchases and trade expenses, etc.

(i) Opening stock ₹ 50,000.
(ii) Closing stock ₹ 45,000.
(iii) Opening stock and closing stock include stock of stationery, amounting to ₹ 2,000 and ₹ 1,500 respectively. Trade expenses include payment for stationery of ₹ 18,000. Credit purchases of stationery for ₹ 4,500 recorded as ordinary purchases. Stationery of ₹ 500 is consumed by the proprietor.

Solution

(i) Amount of Stationery to be Charged to Profit and Loss Account

Particulars	₹
Opening Balance of Stationery	2,000
Add : Cash Purchases of Stationery included in Trade Exp.	18,000
Add: Credit Purchases of Stationery included in Purchase	4,500
	24,500
Less: Closing Balance of Stationery	1,500
	23,000
Less: Stationery Consumed by the Proprietor	500
	22,500

(ii) Opening stock is to be reduced by ₹ 2,000.
The balance of ₹ 48,000 is to be debited to Trading Account.
(iii) Closing stock is to be reduced by ₹ 1,500.
The balance of ₹ 43,500 is to be credited to Trading Account.
(iv) Purchases is to be reduced by ₹ 4,500
(v) Trade expenses is to be reduced by ₹ 18,000
(vi) Drawings will be increased by ₹ 500.
(vii) Stock of stationery will be shown in the Balance Sheet as a separate item.

6. Loss or Profit on Sale / Exchange of an Asset

Any loss on sale / exchange of an asset will be debited to Profit and Loss Account. Similarly, any profit on sale / exchange will be credited to Profit and Loss Account. For calculating loss / profit on sale or exchange, the W.D.V. on the date of sale and exchange or sale value are to be compared. If the exchange or sale value is less than the W.D.V., then there is a loss. If the exchange or sale value is more than the W.D.V., then there is a profit.

[*See Chapter 9 for details*.]

Illustrative Example 9

(i) Furniture appearing in the Trial Balance of X as on 31.12.2015 at ₹ 56,000.
(ii) Rate of depreciation on furniture 10% p.a.
(iii) Furniture appearing in the book on 1.1.2015 at ₹ 16,000 was disposed of on 30.6.2015 at ₹ 13,500 in part exchange of a new furniture costing ₹ 15,000. The net invoice for ₹ 1,500 was passed through Purchases Day Book.

Calculate : (a) Loss on exchange of furniture; (b) Total depreciation is to be charged to Profit and Loss Account and (c) Book value of furniture on 31.12.2015.

Solution

(i) Depreciation on old furniture in use = 10% (₹ 56,000 – ₹ 16,000) = ₹ 4,000. Depreciation on new furniture for 6 months @ 10% p.a. on ₹ 15,000 = ₹ 750. Therefore, total depreciation on furniture in use = ₹ 4,000 + ₹ 750 = ₹ 4,750.
(ii) Depreciation on furniture disposed of = 10% of ₹ 16,000 for 6 months = ₹ 800.
(iii) Total amount of depreciation is to be charged to Profit and Loss Account = ₹ 4,750 + ₹ 800 = ₹ **5,550**.

(iv) Loss on Exchange

Particulars	₹
Book value of furniture on 1.1.2015	16,000
Less : Depreciation for 6 months @ 10%	800
Written-down value on 30.6.2015	15,200
Less : Exchange value	13,500
	1,700

(v) Book Value of Furniture on 31.12.2015

	₹
Opening balance	56,000
Less : Book value of Furniture sold	16,000
	40,000
Add: Purchase of new furniture	15,000
	55,000
Less : Depreciation (i)	4,750
	50,250

7. Goods Sent on Consignment

When goods are sent on consignment basis, the cost of the goods sent either deducted from Purchases or credited to Trading Account. Profit or loss from consignment is transferred to Profit and Loss Account. Any stock on consignment left with the consignee will be valued at cost or market price (N.R.V.) whichever is lower. The value of such goods is shown in the Balance Sheet only. For calculating profit, Consignment Account is to be prepared.

Illustrative Example 10

Trial Balance of X as at 31.3.2015

Heads of Account	Dr. (₹)	Cr. (₹)
Stock on 1.4.2014	4,00,000	
Purchases	8,00,000	
Suspense Account of P		40,000
Capital		6,00,000
Other balances	2,00,000	7,60,000
	14,00,000	14,00,000

Additional information : Goods costing ₹ 1,00,000 were consigned to P for sale on 10% commission basis. P sold 4/5th of the goods at a profit of 20% on sales. The unsold stock was to be valued at cost. P sent an advance of ₹ 40,000 which was credited to his Suspense Account.

You are required to make necessary adjustments for consignment transactions and also show relevant Ledger Accounts.

Solution

No entry has been made in respect of transaction relating to consignment except cash received from P which has been credited to Suspense Account of P. The following adjustment entries are to be passed in this respect:

Journal **Dr.** **Cr.**

Date	Particulars		₹	₹
2015 March 31	(i) **For Goods Sent on Consignment**			
	Consignment to P A/c	Dr.	1,00,000	
	To Goods Sent on Consignment A/c			1,00,000
	(ii) **For Sale of Goods by P**			
	P A/c (Note 1)	Dr.	1,00,000	
	To Consignment to P A/c			1,00,000
	(iii) **For Commission at 10% on Sales**			
	Consignment to P A/c	Dr.	10,000	
	To P A/c			10,000
	(iv) **For Stock on Consignment**			
	Stock on Consignment A/c	Dr.	20,000	
	To Consignment to P A/c			20,000
	(v) **For Adjusting Purchases**			
	Goods Sent on Consignment A/c	Dr.	1,00,000	
	To Purchases A/c			1,00,000
	(vi) **For Closing Suspense Account of P**			
	Suspense Account of P	Dr.	40,000	
	To P A/c			40,000

Dr. **P Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Consignment to P A/c (Sales)	1,00,000		By Suspense Account of P	40,000
				By Consignment to P A/c (Commission)	10,000
				By Balance c/d	50,000
		1,00,000			1,00,000

Dr. **Consignment to P Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Goods Sent on Consignment A/c	1,00,000		By P A/c (Note 1)	1,00,000
	To P A/c (commission)	10,000		By Stock on Consignment A/c	20,000
	To Profit on Consignment A/c	10,000			
		1,20,000			1,20,000

Dr. **Goods Sent on Consignment Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Purchases A/c	1,00,000		By Consignment to P A/c	1,00,000

Net Effect

(1) Profit on consignment of ₹ 10,000 will be credited to Profit and Loss Account.
(2) ₹ 1,00,000 will be deducted from Purchases. Net purchases of ₹ 7,00,000 will be shown in the Trading Account.
(3) Stock on consignment of ₹ 20,000 will be shown in the assets side of the Balance Sheet.
(4) Suspense Account of P will be eliminated.
(5) Amount due from P of ₹ 50,000 will be shown in the assets side of the Balance Sheet.

Working Notes :

(1) Cost of goods sold = 4/5 of ₹ 1,00,000 = ₹ 80,000. Goods are sold at a profit of 20% on sales i.e. 25% on cost. Therefore, sales = ₹ 80,000 + 25% of ₹ 80,000 = ₹ 1,00,000.

(2) Cost of goods unsold = 1/5 of ₹ 1,00,000 = ₹ 20,000.

8. Profit / Loss on Joint Venture

Any profit earned from Joint Venture will be credited to Profit and Loss Account.

Illustrative Example 11

Trial Balance of X as at 31.3.2015

Heads of Account	Dr. (₹)	Cr. (₹)
Stock on 1.4.2014	4,00,000	
Purchases	8,00,000	
Suspense Account of Q	20,000	
Capital and other Balances		12,20,000
	12,20,000	12,20,000

Additional information :

(i) A joint venture was made with Q for which an advance of ₹ 20,000 was made. The venture yield a profit of ₹ 18,000, 2/3 of which is attributable to X.

You are required to make necessary adjustments for joint venture transactions and also show relevant Ledger Accounts.

Solution

No entry has been made in respect of transaction relating to joint venture except cash sent to Q which has been debited to Suspense Account of Q. The following adjustment entries are to be passed :

Journal **Dr. Cr.**

Date	Particulars		₹	₹
2015	(i) **For Closing Suspense Account of Q**			
March 31	Q A/c	Dr.	20,000	
	To Suspense Account of Q			20,000
	(ii) **For Profit on Joint Venture**			
	Q A/c (Note 1)	Dr.	12,000	
	To Profit and Loss A/c			12,000

Dr. Q Account Cr.

Date	Particulars	₹	Date	Particulars	₹
	To Suspense Account of Q	20,000		By Balance c/d	32,000
	To Profit and Loss A/c	12,000			
		32,000			32,000

Net Effect

(1) Share of profit on joint venture of ₹ 12,000 will be credited to Profit and Loss Account.

(2) Balance of ₹ 32,000 in the Q Account will be shown in the Balance Sheet in the assets side.

(3) Suspense Account of Q will be eliminated.

Working Note :

(1) Total profit on joint venture is ₹ 18,000; 2/3rd belongs to X. Therefore, ₹ 12,000 will be credited to Profit and Loss Account of X.

Illustrative Example 12

Trial Balance of X as at 31.3.2015

Heads of Account	Dr. (₹)	Cr. (₹)
Stock on 1.4.2014	40,000	
Purchases and Sales	1,60,000	3,00,000
Joint Venture Suspense Account	2,000	
Sundry Debtors and Sundry Creditors	88,000	60,000
Other Assets	3,10,000	
Capital		1,40,000
Other Liabilities		1,00,000
	6,00,000	6,00,000

Additional information : On 1.1.2015, X entered into a joint venture with Y on an equal profit sharing basis. Y supplied goods costing ₹ 30,000 which were recorded through Purchases Day Book. X sold these goods at a gross profit of 25% on sales and included these in Sales Account. Y spent ₹ 1,000 in despatching goods for which no entry was made. Joint Venture Suspense Account represented the expenses incurred by X. You are required to make necessary adjustments in respect of joint venture transactions and also show the relevant Ledger Accounts.

Solution

Goods sent by Y in connection with joint venture was wrongly recorded through Purchases Day Book. In the ledger, Purchases Account was debited and Sundry Creditors Account was credited. For joint venture transactions, the following adjustment entries are to be passed:

Journal **Dr.** **Cr.**

Date	Particulars		₹	₹
2015 March 31	(i) **For Cancelling Purchases** Joint Venture with Y A/c To Purchases A/c	Dr.	30,000	30,000
	(ii) **For Adjusting Creditors** Sundry Creditors A/c To Y A/c	Dr.	30,000	30,000
	(iii) **For Recording Expenses paid by Y** Joint Venture with Y A/c To Y A/c	Dr.	1,000	1,000
	(iv) **For Cancelling Joint Venture Suspense Account** Joint Venture with Y A/c To Joint Venture Suspense A/c	Dr.	2,000	2,000
	(v) **For Joint Venture Sales** Sales A/c To Joint Venture with Y A/c	Dr.	40,000	40,000

Dr. **Y Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Balance c/d	34,500		By Sundry Creditors A/c	30,000
				By Joint Venture with Y A/c (expenses)	1,000
				By Joint Venture with Y A/c (share of profit)	3,500
		34,500			34,500

Dr. **Joint Venture with Y Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Purchases A/c	30,000		By Sales A/c (Note 1)	40,000
	To Y A/c (Expenses)	1,000			
	To Joint Venture Suspense A/c (expenses)	2,000			
	To Profit and Loss A/c (share of profit)	3,500			
	To Y A/c (share of profit)	3,500			
		40,000			40,000

Net Effect

(1) Purchases will be reduced by ₹ 30,000.
(2) Sales will be reduced by ₹ 40,000.
(3) Sundry Creditors will be reduced by ₹ 30,000.
(4) Joint Venture Suspense Account will be eliminated.
(5) Balance due to Y ₹ 34,500 will be shown in the Balance Sheet as a liability.

Working Note : **(1)** Profit on sale is 25%, i.e. $33^1/_3$% profit on cost. Therefore, sales = ₹ 30,000 + $33^1/_3$ of ₹ 30,000 = ₹ 40,000.

9. Petty Cash

For meeting small expenses, e.g. purchase of stationery, purchase of newspaper, and so on, head cashier transfers a small amount to a petty cashier. At the time of transferring money, Petty Cash Account is debited and Cash Account is credited. When the given amount of money is exhausted, the petty cashier submits the petty cash vouchers to get the reimbursement from the head cashier. For recording petty expenses different Petty Expenses Accounts are debited and Petty Cash Account is credited. At the end of the accounting period, the above entries are passed (even if the money is not exhausted) to record the petty expenses upto the closing date. The balance in the petty cash account is carried forward to the next accounting period.

Illustrative Example 13

Trial Balance (Extract)

Heads of Account	Dr. (₹)	Cr. (₹)
Petty Cash Account	1,000	
Petty Cash Expenses	9,600	

Additional information : The petty cash balance represents the month-end imprest system. As on the closing date the petty cashier had vouchers totalling ₹ 400 for which he had not received reimbursement from the head cashier.

You are required to pass adjusting entry for petty expenses.

Solution **Journal** **Dr.** **Cr.**

Date	Particulars	₹	₹
	Petty Cash Expenses Dr. To Petty Cash A/c (Being the adjustment for petty cash expenses)	400	400

Net Effect

(1) Petty cash expenses of ₹ 10,000 (₹ 9,600 + ₹ 400) will be debited to Profit and Loss Account.

(2) Petty cash of ₹ 600 (₹ 1,000 – ₹ 400) will be shown in the Balance Sheet.

Illustration 12

From the following balances extracted from the books of a trader on December 31, 2014, prepare a Trading and Profit and Loss Account for the year ended on that date and also a Balance Sheet as on the same day :

Particulars	₹	Particulars	₹
Cash in hand	480	Capital Account	42,500
Drawings	7,100	Sales	1,19,060
Plant and Machinery	9,500	Purchases Return	2,910
Stock in Trade	14,600	Bank Overdraft	1,200
Purchases	1,03,620	Creditors	10,000
Sales Return	2,100	Provision for Doubtful Debts	1,050
General Expenses	2,000		
Wages	2,400		
Rent and Rates	3,200		
Bad Debts	1,720		
Debtors	30,000		
	1,76,720		1,76,720

Note :

(a) Provide 10% depreciation on plant and machinery.

(b) Provision for doubtful debts is to be increased to 5% of debtors.

(c) A credit sale of ₹ 2,000 has not been recorded in the books.

(d) Plant and machinery worth ₹ 1,000 purchased during the year (on September 30, 2014) has been included in Purchases.

(e) Rent paid in advance ₹ 800.

(f) Stock on December 31, 2014 was valued at ₹ 17,300. These does not include the value of the machinery bought on 30.9.2014.

(g) Wages include ₹ 200 for installation of plant.

Solution

Dr. **Trading and Profit and Loss Account for the year ended 31st December, 2014** **Cr.**

Particulars	₹	₹	Particulars	₹	₹
To Opening Stock		14,600	By Sales	1,19,060	
To Purchases	1,03,620		Add: Unrecorded Sales	2,000	
Less: Purchase of Machine	1,000			1,21,060	
	1,02,620		Less: Sales Return	2,100	1,18,960
Less: Purchase Return	2,910	99,710	By Closing Stock		17,300
To Wages	2,400				
Less: Installation of Machine	200	2,200			
To Gross Profit c/d		19,750			
		1,36,260			1,36,260
To General Expenses		2,000	By Gross Profit b/d		19,750
To Rent and Rates	3,200				
Less: Prepaid	800	2,400			
To Bad Debts		1,720			
To Depreciation on machinery (Note 1)		980			
To Provision for Doubtful Debts :					
New Provision	1,600				
Less: Old Provision	1,050	550			
To Net Profit (Transferred to Capital)		12,100			
		19,750			19,750

Balance Sheet as at 31st December, 2014

Liabilities	₹	₹	Assets	₹	₹
Capital	42,500		Plant and Machinery	9,500	
Add: Net Profit	12,100		Add: Purchase	1,000	
	54,600			10,500	
Less: Drawings	7,100	47,500	Add: Installation Charge	200	
Creditors		10,000		10,700	
Bank Overdraft		1,200	Less: Depreciation (Note 1)	980	9,720
			Stock		17,300
			Debtors	30,000	
			Add: Unrecorded Sales	2,000	
				32,000	
			Less: Provision for Doubtful Debts (Note 2)	1,600	30,400
			Prepaid Rent		800
			Cash		480
		58,700			58,700

Working Note :

(1) Depreciation on Plant and Machinery

	₹
On existing plant and machinery (₹ 9,500 × 10/100)	950
On new purchase for 3 months (₹ 1,000 + ₹ 200) × 10/100 × 3/12	30
	980

(2) Required provision for doubtful debts = 50% of ₹ 32,000 = ₹ **1,600**.

Illustration 13

From the following prepare the Trading and Profit and Loss Account for the year ended 31st March, 2015 and Balance Sheet of Mr Z as on that date :

Particulars	₹	Particulars	₹
Capital	50,450	Machinery, Plant and Furniture (cost ₹ 25,000)	15,000
Trade Creditors	10,000	Book Debts	16,400
Bills Payable	1,000	Bank Balance (Dr.)	3,400
General Reserve	5,000	Investment, 4% Government Loan at par	10,000
Provision for Bad and Doubtful Debts	1,000	Bills Receivable	5,050
Sales	75,000	Salaries and Wages	13,000
Discount Allowed	750	Audit Fee	2,000
Stock at April 1, 2014	15,000	Office Expenses	2,000
Purchases	48,000	Repairs and Renewals	1,800
Discount Received	400	Interest Paid	700
Building	10,000	Bad Debts Recovered	250

Additional information :

(a) The value of Stock on hand as at 31st March, 2015 was ₹ 18,000 included goods costing ₹ 900 received on 30th March, 2015 in respect of which supplier's bill had not yet been received.

(b) Goods of the cost of ₹ 1,500 were sent to a customer on sale on approval basis but recorded in Sales Book at sales price of ₹ 2,000. Approval for the sale were not received till 31st March, 2015.

(c) Provisions were made for doubtful debts to the extent of ₹ 400 and for depreciation on building at 2% per annum.

(d) Machinery, Plant and Furniture was depreciated at 20% on the diminishing value; Mr. Z, however, considered that the proper method would be 8% on the original cost and wanted to adopt it from April 1, 2013.

Solution

Mr. Z

Dr. Trading and Profit and Loss Account for the year ended 31st March, 2015 Cr.

Particulars	₹	₹	Particulars	₹	₹
To Opening Stock		15,000	By Sales	75,000	
To Purchases	48,000		Less: Goods sent on approval basis		
Add: Unrecorded Purchases	900	48,900	not yet approved	2,000	73,000
To Gross Profit c/d		28,600	By Closing Stock	18,000	
			Add: Cost of goods lying with customers	1,500	19,500
			on approval basis		
		92,500			92,500
To Salaries and Wages		13,000	By Gross Profit b/d		28,600
To Office Expenses		2,000	By Discount Received		400
To Repairs and Renewals		1,800	By Bad Debt Recovery		250

To Discount Allowed		750	By Provision for Doubtful Debts :		
To Audit Fee		2,000	Old Provision	1,000	
To Interest		700	Less: New Provision	400	600
To Depreciation on :			By Interest on Investment (Note 2)		400
Building	200		By Machinery, Plant and Furniture (Note 1)		1,750
Machinery, Plant and Furniture	2,000	2,200	(Excess depreciation written back)		
To Net Profit (Transferred to Capital)		9,550			
		32,000			32,000

Balance Sheet of Mr. Z as at 31st March, 2015

Liabilities	₹	₹	Assets	₹	₹
Capital	50,450		Building	10,000	
Add: Net Profit	9,550	60,000	Less: Depreciation	200	9,800
General Reserve		5,000	Machinery, Plant and Furniture	15,000	
Trade Creditors	10,000		Add: Excess Depreciation provided	1,750	
Add: Unrecorded Purchases	900	10,900		16,750	
Bills Payable		1,000	Less: Depreciation for 2014-15	2,000	14,750
			Closing Stock	18,000	
			Add: Cost of goods lying with customers	1,500	19,500
			Book Debts	16,400	
			Less: Sale Price of goods lying with customers on approval basis	2,000	
				14,400	
			Less: Provision for Doubtful Debts	400	14,000
			Bills Receivable		5,050
			Investment (4% Govt. Loan at par)	10,000	
			Add: Accrued Interest	400	10,400
			Bank		3,400
		76,900			76,900

Working Notes :

(1) Machinery, Plant and Furniture - Change in Method of Depreciation

W.D.V. on 1.4.2013 = ₹ 15,000 + 20/80 of ₹ 15,000 = ₹ 18,750.

Depreciation to be provided = 8% of ₹ 25,000 = ₹ 2,000.

Excess depreciation to be written back = ₹ 3,750 – ₹ 2,000 = ₹ 1,750.

Depreciation for 2014-15 = 8% of ₹ 25,000 = ₹ 2,000.

(2) Accrued Interest = 4% of ₹ 10,000 = ₹ **400**.

Illustration 14

From the following balances extracted from the books of a trader on December 31, 2014, prepare a Trading and Profit and Loss Account for the year ended on that date and also a Balance Sheet as on same date :

Debit Balances	₹	Credit Balances	₹
Drawings Account	7,100	Capital Account	42,500
Plant and machinery	9,500	Sales	1,19,060
Stock on 1.1.2014	14,600	Purchases Return	2,910
Purchases	1,03,620	Bank Overdraft	1,200
Sales Return	2,100	Creditors	10,000
General Expenses	2,000	Provision for Doubtful Debts	1,050
Wages	2,400		
Rent and Rates	3,200		
Bad Debts	1,720		
Debtors	30,000		
Cash in Hand	480		
	1,76,720		1,76,720

Notes :

(i) Provide 10% depreciation on plant and machinery.

(ii) Provision for doubtful debts is to be increased to 5% of Debtors.

(iii) A credit sale of ₹ 2,000 has not been recorded in the books.

(iv) Plant and machinery worth ₹ 1,000 purchased during the year (on September 30, 2014) has been included in Purchases.

(v) Stock on 31.12.2014 has been valued at ₹ 17,300. This does not include the value of the plant and machinery bought on 30.09.2014.

(vi) Wages includes ₹ 200 for installation of plant.

(vii) Goods costing ₹ 600 have been stolen by a dishonest employee.

(viii) ₹ 510 received from a Debtor whose balance was written off as bad, has been recorded as cash sale.

(ix) A sales return of ₹ 500 was not entered in the accounts though it was duly taken in the stock.

(x) Goods (cost price ₹ 720) (minimum sale price ₹ 900) was consigned to an agent. But those remain still unsold.

On new purchase for 3 months (₹ 1,000 + ₹ 200) × 10/100 × 3/12	30
	980

Illustration 15

X started a business on January 1, 2014 with ₹ 10,000 in cash, ₹ 5,000 in goods and ₹ 10,000 in furniture. His Trial Balance on December 31, 2006 was drawn as follows :

Particulars	₹	Particulars	₹
Bad Debts	3,500	Capital	30,000
Stock in Trade	5,000	Creditors	5,000
Furniture	15,000	Loan	2,400
Drawings	4,500	Commission Received	200
Wages	1,800	Sales	28,700
Purchases	18,000		
Advertisement	1,400		
Debtors	9,000		
Cash	3,200		
Interest on Loan	400		
Commission Paid	600		
Miscellaneous Expenses	700		
Insurance Premium	800		
Salaries	2,400		
	66,300		66,300

Prepare Trading Account, Profit and Loss Account for the year ended December 31, 2014 and a Balance Sheet as at December 31, 2014 after taking into consideration the following :

(i) Goods valued at ₹ 15,000 were destroyed by fire; against this an insurance claim of ₹ 10,000 was to be received.

(ii) During the year, proprietor had taken goods of ₹ 2,000 for personal consumption. The value of the remaining stock in hand was ₹ 8,000.

(iii) Depreciate furniture by 10% p.a.. The addition to furniture was made on 1st April.

(iv) Y, a debtor for ₹ 2,000 was declared insolvent, only 50 paise in the rupee was receivable against his estate.

(v) Create a provision for doubtful debts at 5% and provision for discount at 20% on Debtors as well as on Creditors.

(vi) Goods sold to Robin for ₹ 500 wrongly debited to Rathin's Account.

(vii) Cheque issued to a Creditor for ₹ 800 was wrongly debited to Purchase Account.

(viii) 1/4th of advertisement expenses is to be carried forward.

		41,295			41,295

Working Notes :

(1) For goods sold to Robin wrongly debited to Rathin's Account, the following rectification entry will be passed :

Robin's Account	Dr.	500	
To Rathin's Account			500

(2) Provision for Doubtful Debtors

	₹
Specific provision (for Debtory Y) ₹ 2,000 × 50/100	1,000
General provision (for other Debtors) (₹ 9,000 – ₹ 2,000) × 5/100	350
Total provision required	1,350

(3) Provision for Discount on Debtors = ₹ 7,650 × 20/100 — 1,530

(4) Specific provision for doubtful debt (Debtor Y) has been created as the amount is still receivable.

(5) It has been assumed that 1/4 of the advertisement expenses is prepaid.

(6) Depreciation on Furniture :

	₹
On ₹ 10,000 @ 10% for full year	1,000
On ₹ 5,000 @ 10% for 9 months	375
	1,375

Illustration 16

The following Trial Balance was extracted from the books of Mr Roy as on 31st March, 2015 :

Particulars	Dr. (₹)	Particulars	Cr. (₹)
Plant and Machinery	2,00,000	Capital Account	8,00,000
Manufacturing Wages	3,45,000	Sundry Creditors	4,65,060
Salaries	1,58,500	Bank Loan @ 12% Interest taken on 01.08.2014	1,50,000
Furniture	1,00,000	Purchase Returns	17,400
Freight on Purchase	18,600	Sales	25,08,500
Freight on Sales	21,400	Provision for Doubtful Debts	20,000
Buildings	2,40,000		
Manufacturing Expenses	95,000		
Insurance and Tax	42,500		
Patent and Trademark	2,50,000		
General Expenses	74,000		
Factory Fuel and Power	12,800		
Sundry Debtors	8,02,000		
Factory Lighting	9,500		
Stock (31.3.2014)	3,42,000		
Motor Car	1,20,000		
Purchases	10,20,000		
Sales Returns	31,000		
Bad Debts	14,000		
Bank Charges	4,000		
Interest on Bank Loan	8,000		
Cash at Bank	42,000		
Cash in Hand	11,200		
	39,61,500		39,61,500

Prepare the Trading and Profit and Loss Accounts for the year ended 31st March, 2015 and a Balance Sheet as on that date taking into consideration the following information :

(a) Stock in hand as on 31st March, 2015 was :
Cost price — ₹ 3,05,000
Net realisable value — ₹ 3,20,000.

(b) Depreciate plant and machinery @ 10% p.a.; furniture @ 5% p.a.; and motor car by ₹ 10,000.

(c) Mr Basak, a customer from whom ₹ 15,000 was due, declared insolvent and nothing is expected to be realised out of his estate. Create provision for doubtful debts at 5% on general debtors.

(d) ₹ 5,000 is due from Mr Basu Ray and at the same time ₹ 8,000 is due to him.

(e) A commission of 1% on the gross profit is to be provided to Works Manager.

(f) General Manager is to be allowed a commission @ 2% on net profit after charging Works Manager's commission and before charging General Manager's commission.

(g) Two cheques of ₹ 2,000 and ₹ 5,000 were deposited into bank on 29th March, 2015 but were credited by the bank on 5th April, 2015.

Solution

Mr. Roy

Dr. Trading and Profit and Loss Account for the year ended 31st March, 2015 Cr.

Particulars	₹	₹	Particulars	₹	₹
To Opening Stock		3,42,000	By Sales	25,08,500	
To Manufacturing Wages		3,45,000	Less: Sales Returns	31,000	24,77,500

To Bad Debts		14,000			
To Bank Charges		4,000			
To Interest on Bank Loan	8,000				
Add: Outstanding (Note 5)	4,000	12,000			
To Depreciation on :					
Plant and Machinery	20,000				
Furniture	5,000				
Motor Car	10,000	35,000			
To Provision for Doubtful Debts :					
New Provision	54,100				
Less: Old Provision (Note 2)	20,000	34,100			
To Net Profit before Commission		5,61,500			
		9,57,000			9,57,000
To Commission to Works Manager (Note 6)		9,570	By Net Profit before Commission		5,61,500
To Commission to General Manager (Note 7)		11,039			
To Net Profit (Transferred to Capital)		5,40,891			
		5,61,500			5,61,500

Balance Sheet of X as at 31st March, 2015

Liabilities	₹	₹	Assets	₹	₹
Capital	8,00,000		Buildings		2,40,000
Add: Net Profit	5,40,891	13,40,891	Plant and Machinery	2,00,000	
Bank Loan @ 12%	1,50,000		Less: Depreciation	20,000	1,80,000
Add: Outstanding	4,000	1,54,000	Furniture	1,00,000	
Sundry Creditors	4,65,600		Less: Depreciation	5,000	95,000
Less: Mutual Debt	5,000	4,60,600	Motor Car	1,20,000	
Commission Payable to :			Less: Depreciation	10,000	1,10,000
Works Manager	9,570		Patent and Trademark		2,50,000
General Manager	11,039	20,609	Closing Stock		3,05,000
			Debtors	8,02,000	
			Less: Mutual Debt	5,000	

				7,97,000	
			Less: Provision for Doubtful Debts	54,100	7,42,900
			Bank		42,000
			Cash in Hand		11,200
		19,76,100			19,76,100

Working Notes :

(1) Specific provision should be created for Mr Basak as nothing is yet realised from his estate.

(2) Required Provision for Doubtful Debts

	₹
Specific provision (Mr Basak)	15,000
Provision on general debtors (₹ 8,02,000 – ₹ 5,000 – ₹ 15,000) × 5/100	39,100
	54,100

(3) For two cheques of ₹ 2,000 and ₹ 5,000 deposited into bank on 29th March, 2015 which were credited on 5th April, 2015, nothing is required to be done as Balance Sheet is prepared with Bank Balance as per Cash Book.

(4) Closing Stock is valued at cost or Net Realisable Value (NRV) whichever is lower. Here, cost ₹ 3,05,000 is lower than NRV (₹ 3,20,000). Therefore, the value of closing stock will be ₹ 3,05,000.

(5) Interest on bank loan for 8 months = (₹ 1,50,000 × 12% × 8/12) = ₹ 12,000. ₹ 8,000 has already been paid. Therefore, ₹ 4,000 (₹ 12,000 – ₹ 8,000) is outstanding.

(6) Commission Payable to Works Manager = 1% of Gross Profit = 1% of ₹ 9,57,000 = ₹ 9,570.

(7) Commission Payable to General Manager

	₹
Net Profit before Commission of Works Manager	5,61,500
Less: Works Manager's Commission (Note 6)	9,570
Net Profit after Commission of Works Manager	5,51,930
Less: General Manager's Commission @ 2% of ₹ 5,51,930	11,039
Net Profit after General Manager's Commission	5,40,891

Illustration 17

Rico Traders prepared the following Trial Balance with the balances of the accounts drawn on 31 December, 2014 :

Particulars	Dr. (₹)	Cr. (₹)	Particulars	Dr. (₹)	Cr. (₹)
Capital		5,00,000	Carriage inward	1,000	
Sundry Creditors		45,000	Carriage outward	5,000	
Goods Sent on Consignment		30,000	Return inward	4,000	
Provision for Doubtful Debt		10,000	Salary	40,000	
Provision for Depreciation		15,000	Advertisement	10,000	
Bank Loan (Interest rate 15% p.a.)		10,000	Stationery and Printing	5,000	
Consignment (Profit)		5,000	Discount	6,000	4,000
Land	3,20,000		Advance Salary	3,500	
Furniture	40,000		Electricity and Telephone	6,800	
Debtors	80,000		Sales		2,10,000
Opening Stock	60,000		Bills Payable		15,000
Closing Stock	75,000		Cash in Hand	28,700	
Purchase (Less Closing Stock)	1,30,000		Cash at Bank	20,000	
Rent	9,000		**TOTAL**	8,44,000	8,44,000

Adjustments :

(a) The closing stock was valued at market price. But the cost price per unit of product was ₹ 12 which at that time was lower than market price by ₹ 3.

(b) ₹ 35,000 which was receivable from the consignee was included in Debtors Account. Bad debt was ₹ 3,000 and 5% provision for doubtful debt was to be made on Debtors.

(c) Depreciation on depreciable fixed assets was to be charged @ 10% per annum on diminishing balance method.

(d) The benefits from advertisement would be received for 5 years.

(e) Cash found short by ₹ 1,000 at the time of cash counting.

Prepare Trading and Profit & Loss Account for the year ended 31 December, 2014 and a Balance Sheet as on that date.

			Bank		20,000
			Cash	28,700	
			Less: Shortage	1,000	27,700
		5,28,600			5,28,600

Working Notes : (1) Reduction in Stock		**(2) Depreciation on Furniture**
Cost price per unit	₹ 12	(₹ 40,000 – ₹ 15,000) × 10/100 = ₹ 2,500
Market price pre unit	₹ 12 + ₹ 3 = ₹ 15	**(3)** Cash shortage will be treated as misappropriation by employees and
Closing stock (at cost)	₹ 75,000 x (₹ 12 / ₹ 15) = ₹ 60,000	it is assumed that there is no insurance coverage. It is incidental to
Reduction in stock	₹ 75,000 – ₹ 60,000 = ₹ 15,000.	business and normal and should be charged to Profit and Loss Account.

(4) Though the effects of advertisement is expected to last for 5 years, 4/5 of ₹ 10,000, i.e., ₹ 8,000 cannot be shown as an asset in the Balance Sheet as Deferred Revenue Expenditure. Because the framework for preparation and presentation of Financial Statements states that "***An asset is recognised in the Balance Sheet when it is probable that the future economic benefits associated with it will flow to the enterprise and the asset has a cost or value that can be measured reliably***.
Therefore, the entire amount of advertisement expenses of ₹ 10,000 is to be charged to the Profit and Loss Account.
[For details, see Chapter 13 : 'Revenue Recognition – Page 13.8 (Recognition of Expenses).]

The following Trial Balance has been prepared by Acharya as on 31.3.2015 :

Particulars	Dr. (₹)	Cr. (₹)	Particulars	Dr. (₹)	Cr. (₹)
Capital and Drawings	3,600	90,400	Furniture and Fixtures	3,100	
Stock (1.4.2014)	12,300		Bad Debts	560	
Wages	16,400		Provision for Bad Debts		480
Plant and Machinery	34,000		Patent and Trademark	4,100	
Sundry Debtors	13,160	*1,000	Electricity	1,290	
Sundry Creditors		12,750	Loose Tools	1,510	
Purchases and Sales	52,300	99,150	Advertisement Suspense	4,200	
Freehold Property	29,700		Gas and Fuel	2,050	
Returns	320	540	Insurance	1,330	
Salaries	12,800		Bank	5,200	
Rent	2,400		Cash	2,140	
Outstanding Rent		200			
Trade Expenses	2,060		**TOTAL**	2,04,520	2,04,520

*Advance

Additional information :

(i) Stock was not taken on 31.3.2015 but actually taken on 7.4.2015 at ₹ 10,200. Transactions during the week ended 7.4.2015 were :
Sales — ₹ 12,800; Purchases — ₹ 8,100
A uniform $16\frac{2}{3}\%$ profit is made on the selling price.

(ii) ₹ 510 received from a debtor whose balance had been written-off as bad, was recorded as Cash Sale.

(iii) Private goods of Acharya costing ₹ 2,400 sold for ₹ 2,880 was included in Sales.

(iv) Advance from customers is entitled to 12% interest which is due for 2 months.

(v) Electricity expenses include a deposit of ₹ 600 to the W.B. State Electricity Board.

(vi) The effect of advertisement is expected to last for the coming two years also.

(vii) A furniture costing ₹ 1,600 purchased on 31.12.2014 from M/s Assam Furniture Mart on credit was omitted to be recorded.

(viii) Cash embezzled by a dishonest employee — ₹ 900.

(ix) Patent and Trademark is to be amortized in 10 equal instalments.

(x) Provision for Bad Debts is to be adjusted to 5% of Sundry Debtors; Loose Tools are valued at ₹ 1,020. Provide depreciation : @ 10% p.a. on Plant and Machinery; and @ 15% p.a on Furniture.

You are required to prepare Trading and Profit and Loss Account for the year ended 31st March, 2015 and a Balance Sheet as on that date.

Solution

To Amortization of Patent and Trademark		410			
		29,963			29,963

Balance Sheet of Acharya as at 31st March, 2015

Liabilities	₹	₹	Assets	₹	₹
Capital :			Freehold Property		29,700
Opening balance	90,400		Plant and Machinery	34,000	
Add: Capital Introduced (private goods)	2,880	93,280	Less: Depreciation	3,400	30,600
Less: Net Loss	3,756		Furniture and Fixtures	3,100	
Drawings	3,600	7,356	Add: Further Purchased	1,600	
		85,924		4,700	
Customers' Advance	1,000		Less: Depreciation (Note 2)	525	4,175
Add: Outstanding Interest	20	1,020	Patent and Trademark	4,100	
Sundry Creditors		12,750	Less: Amortization	410	3,690

Creditors for Furniture		1,600	Loose Tools	1,510	
Outstanding Rent		200	Less: Depreciation	490	1,020
			Closing Stock (Note 1)		12,767
			Sundry Debtors	13,160	
			Less: Provision for Bad Debts	658	12,502
			Deposit with WBSEB		600
			Bank		5,200
			Cash	2,140	
			Less: Embezzlement	900	1,240
		1,01,494			1,01,494

Working Notes: (1) Calculation of Closing Stock : Valuation of stock is given as ₹ 10,200 on 7.4.2015. But we are to find out the value of stock as on 31.3.2015. For that, we are to prepare a Memorandum Trading Account for the period 31.3.2015 to 7.4.2015, as under:

Dr. **Memorandum Trading Account for the Period 31.3.2015 to 7.4.2015** **Cr.**

Particulars	₹	Particulars	₹
To Opening Stock (Balancing figure)	12,767	By Sales	12,800
To Purchases	8,100	By Closing Stock	10,200
To Gross Profit ($16\frac{2}{3}$ % of ₹ 12,800)	2,133		
	23,000		23,000

Therefore, the value of closing stock on 31st March, 2015 was ₹ 12,767.

(2) Depreciation on ₹ 3,100 has been charged for the full year and on ₹ 1,600 for 3 months. Therefore, total depreciation : ₹ 465 + 60 = ₹ 525.

(3) Though the effect of advertisement is expected to last for the coming two years also, 2/3rd of ₹ 4,200, i.e., ₹ 2,800 cannot be shown as an asset in the Balance Sheet as Deferred Revenue Expenditure. This is because of the following :
"***An asset is recognised in the Balance Sheet when it is probable that the future economic benefits associated with it will flow to the enterprise and the asset has a cost or value that can be measured reliably.***"
Therefore, the entire amount of advertisement suspense of ₹ 4,200 is to be charged to the Profit and Loss Account.

Illustration 19

From the following Trial Balance of Sri Samaddar, prepare a Trading and Profit and Loss Account for the year ending on 31st December, 2014 and a Balance Sheet as on that date after taking into consideration the necessary adjustments :

Particulars	Dr. (₹)	Cr. (₹)	Particulars	Dr. (₹)	Cr. (₹)
Capital and Drawings	10,200	95,000	Furniture and Fixture	8,600	
Stock (1.1.1998)	18,900		Trade Expenses	12,650	
Purchases and Sales	1,38,600	2,02,000	Outstanding Trade Expenses		1,600
Printing and Stationery	2,600		Provision for Doubtful Debts		2,200
Debtors and Creditors	22,800	16,020	Bad Debt Recovered		700
Freehold Premises	39,000		Income Tax	7,900	
Deposit with Das at 10% (since 30.6.2014)	18,000		Bank Balance	6,950	
Salaries (including advance ₹ 3,500)	28,200		Cash in Hand	6,310	
Returns	890	1,580	Patent Right	5,400	
Provident Funds		6,550	Suspense Account		900
Interest on Deposit with Das		450	**TOTAL**	3,27,000	3,27,000

Adjustments :

(i) Last year's closing stock was valued at 10% below cost. Sri Samaddar wants to revert to cost. Stock as on 31.12.2014 was valued at ₹ 16,400 (at cost).

(ii) Goods costing ₹ 650 pilferred by a dishonest employee and furniture (book value on 1.1.2014 ₹ 700) destroyed by an accidental fire on 31.12.2014.

(iii) Bhowmick is included in both debtors and creditors — the amount due from him is ₹ 430 and the amount due to him is ₹ 200.

(iv) New furniture costing ₹ 1,200 was purchased on 31.12.2014 on credit but not yet recorded.

(v) Suspense Account represents a cheque received from a debtor in full settlement of a claim of ₹ 1,000. The cheque was deposited into bank and duly collected also.

(vi) The employer's contribution to provident fund ₹ 1,240 is yet to be paid.

(vii) Write-off ₹ 400 as bad and maintain provision for doubtful debts @ 5% on debtors.

(viii) Depreciate all tangible fixed assets @ 10% p.a. Patent was acquired in 2013 and annual amortization equal to 1/10th of the cost started last year.

(ix) Creditors include suppliers of stationery ₹ 200.

Solution

Samaddar

Dr. Trading and Profit and Loss Account for the year ended 31st December, 2014 Cr.

Particulars	₹	₹	Particulars	₹	₹
To Opening Stock (Note 1)		21,000	By Sales	2,02,000

To Net Profit c/d (Current)		14,550			
		62,880			62,880
To Net Profit c/d (Transferred to Capital A/c)		16,650	By Net Profit b/d		14,550
			By Opening Stock		2,100
		16,650			16,650

Balance Sheet of Samaddar as at 31st December, 2014

Liabilities	₹	₹	Assets	₹	₹
Capital :			Freehold Premises	39,000	
Opening Balance	95,000		Less: Depreciation	3,900	35,100
Add: Net Profit	16,650	1,11,650	Furniture and Fixture (Note 4)	9,100	
Less: Drawings	10,200		Less: Depreciation	790	8,310
Income Tax	7,900	18,100	Patent Right	5,400	
		93,550	Less: Amortization	600	4,800
Provident Fund	6,550		Debtors (Note 2)	21,200	
Add: Employer's Contribution	1,240	7,790	Less: Provision for Doubtful Debts	1,060	20,140
Creditors for :			Deposit with Das	18,000	
Goods	16,020		Add: Accrued Interest	450	18,450
Less: Mutual Indebtedness	(200)		Closing Stock		16,400
Creditors for Stationery	(200)		Advance Salaries		3,500
	15,600		Bank Balance		6,950
Furniture	1,200		Cash in Hand		6,310
Stationery	200	17,020			
Outstanding Trade Expenses		1,600			
		1,19,960			1,19,960

Working Notes :

(1) Last year's closing stock is this year's opening stock, which is valued at 10% below cost. Therefore, it appears in the Trial Balance at 90%. In effect, the actual cost of opening stock = ₹ 18,900 / 90% = ₹ 21,000. Assuming that the market value of opening stock is more than ₹ 21,000, the value of opening stock is to be increased by ₹ 2,100 (₹ 21,000 – 18,900).

Tutorial Note : Para 19 of AS—5 states that ***prior period items are normally included in the determination of net profit or loss for the current period. An alternative approach is to show such items in the statement of profit and loss after determination of current net profit or loss.*** This is a prior period item.Therefore,it is to be shown in the Profit and Loss Account itself. It is better to show this after determination of current year's profit.

(2) Closing Value of Debtors

	₹
Debtors as per Trial balance	22,800
Less: Received from a Debtor	1,000
	21,800
Less: Mutual Indebtedness	200
	21,600
Less: Bad Debts	400
Closing Value of Debtors	21,200

Provision is required = 5% on ₹ 21,200 = ₹ 1,060.

(3) Loss on Furniture Destroyed

Book value of furniture destroyed ₹ 700. Depreciation @ 10% p.a. for 1 year = 10% of ₹ 700 = ₹ 70.
Therefore, loss on furniture destroyed = ₹ (700 – 70) = ₹ 630.

(4) Closing Value of Furniture and Fixture and Depreciation Thereon

		₹
Book value as per trial balance		8,600
Less: Book value of furniture destroyed on 31.12.1998		700
		7,900
Add: Purchase of furniture		1,200
		9,100
Depreciation @ 10% p.a. on ₹ 700		70
	₹ (8,600 – 700)	790
	₹ 1,200	—
		860

Illustration 20

The accountants of Mr P Sundaram, a sole proprietor of a business, extracted the following Trial Balance as on 31.3.2015:

Particulars	Dr. (₹)	Cr. (₹)	Particulars	Dr. (₹)	Cr. (₹)
Cash	16,000		Purchases	1,40,000	
Bank	25,000		Freight Inward	10,000	
Petty Cash	1,000		Postage and Trade Expenses	5,000	
Furniture and Fixture	10,000		Bad Debts	1,000	
Plant and Machinery	50,000		9% Loan taken from D Kumaran (1.10.2014)		15,000
Capital		60,000	Interest on Loan	500	
Drawings	10,000		Creditors		37,500
Insurance	1,000		Bills Receivable	10,000	
Salaries	12,000		Sales		2,60,000
Wages	5,000		Outstanding Liability for Expenses	1,000	
Sundry Debtors	22,000		Petty Cash Expenses	3,000	
Stock (as on 1.4.2014)	28,000		Bills Payable		15,000
Trademark Rights (10 years from 1.4.2012)	32,000				
Rent and Rates	5,000		**TOTAL**	3,87,500	3,87,500

Adjustments :

(i) Stock lying in godown as on 31.3.2015 ₹ 38,000.

(ii) Invoices of the value of ₹ 5,000 were recorded in Sales Book on 27.3.2015 but goods were not dispatched until 5.4.2015. The cost of such goods was ₹ 4,000.

(iii) The Petty Cash balance represents the month-end imprest amount. As on 31.3.2015 the petty cashier had vouchers totalling to ₹ 400 for which he had not received reimbursement from the main cashier.

(iv) Rent and rates of ₹ 1,000 relating to 2013-14 had not been provided in that year but were paid in May, 2014 by debiting outstanding liability for expenses.

(v) Bills receivable of ₹ 5,000 were endorsed in favour of creditors during the year 2014-15. Of these bills, a bill for ₹ 2,000 was dishonoured but not recorded in the books. Other bills would mature in June 2015.

(vi) Two dishonoured cheques of ₹ 400 and ₹ 600 respectively had not been entered in the Cash Book. The first cheque for ₹ 400 was known to be bad. In case of the second cheque, it was expected that the debtor would be in a position to pay only 50 paise in a rupee. For other debtors, provision for doubtful debts to be provided @ 5%.

(vii) Provide depreciation on all tangible fixed assets @ 10% p.a.

Prepare Trading and Profit and Loss Account for the year ended 31st March, 2015 and a Balance Sheet as on that date.

Solution

P. Sundaram

Dr. Trading and Profit and Loss Account for the year ended 31st March, 2015 Cr.

Particulars	₹	₹	Particulars	₹	₹
To Opening Stock		28,000	By Sales		2,60,000
To Purchases	1,40,000		By Closing Stock (₹ 38,000 – 4,000)		34,000
Add: Freight Inward	10,000	1,50,000

To Bad Debts (₹ 1,000 + 400)		1,400			
To Provision for Doubtful Debts (Note 2)		1,500			
To Petty Cash Expenses (₹ 3,000 + 400)		3,400			
To Interest on Loan	500				
Add: Outstanding Interest	175	675			
To Depreciation on :					
Plant and Machinery	5,000				
Furniture and Fixture	1,000	6,000			
To Amortization of Trademark Rights (Note 4)		4,000			
To Net Profit c/d (Current)		71,025			
		1,11,000			1,11,000
To Outstanding Liability for Expenses (Note 1)		1,000	By Net Profit b/d		71,025
To Net Profit (Transferred to Capital Account)		70,025			
		71,025			71,025

Balance Sheet of P. Sundaram as at 31st March, 2015

Liabilities	₹	₹	Assets	₹	₹
Capital :			Plant and Machinery	50,000	
Opening Balance	60,000		Less: Depreciation	5,000	45,000
Add: Net Profit	70,025		Furniture and Fixture	10,000	
	1,30,025		Less: Depreciation	1,000	9,000
Less: Drawings	10,000	1,20,025	Trademark Rights	32,000	
9% Loan	15,000		Less: Amortization (Note 4)	4,000	28,000
Add: Outstanding Interest (Note 5)	175	15,175	Closing Stock		34,000
Creditors	37,500		Sundry Debtors (Note 2)	24,600	
Add: Endorsed Bill Dishonoured	2,000	39,500	Less: Provision for Doubtful Debts	1,500	23,100
Bills Payable		15,000	Bills Receivable		10,000
			Bank (Note 3)		24,000
			Cash		16,000
			Petty Cash (₹ 1,000 – 400)		600
		1,89,700			1,89,700

Working Notes :

(1) An amount of ₹ 1,000 paid during the year for rent and rates is actually related to the previous year. When this payment was made, Outstanding Liability for Expenses Account was debited and cash Account was credited.
Para 19 of AS—5 states that ***prior period items are normally included in the determination of net profit or loss for the current period. An alternative approach is to show such items in the statement of profit and loss after determination of current net profit or loss.***
This is a prior period item. Therefore, it is to be shown in the Profit and Loss Account itself. It is better to show this after determination of current year's profit.

(2) Ascertainment of Closing Debtors and Provision for Doubtful Debts

	₹
Debtors as per Trial Balance	22,000
Add: Dishonoured cheque	600
Endorsed bill dishonoured	2,000
	24,600
Provision for Doubtful Debts :	
50% on ₹ 600	300
5% on ₹ (24,600 – 600)	1,200
	1,500

(3) Bank Balance

Balance as per Trial Balance	25,000
Less: Dishonoured cheques (₹ 400 + 600)	1,000
	24,000

(4) Remaining life of trade mark right is 8 years. The amount is to be amortized = ₹ 32,000 / 8 = ₹ 4,000.

(5) Interest on loan from D Kumaran = ₹ 15,000 × 9/100 × 1/2 = ₹ 675. Out of ₹ 675 only ₹ 500 has been paid.
Therefore, ₹ 125 is outstanding.

Illustration 21

From the following balances and information, prepare Trading and Profit and Loss Account of Mr A Sen for the year ended 31st December, 2014 and a Balance Sheet as on that date :

Particulars	Dr. (₹)	Particulars	Cr. (₹)
Stock (1.1.2014)	15,100	Sales	1,67,200
Purchases	94,500	Returns Outward	1,500
Wages	30,900	Provision for Doubtful Debts	3,200
Electricity	3,750	Sundry Creditors	35,600
Furniture	12,500	Capital	80,000
Machinery	18,000	Discount Received	1,280
Motor Car	10,240		
Fuel	3,180		
Rent @ ₹ 450 p.m.	4,050		
Printing and Stationery	5,200		
Fixed Deposit (at 10% p.a.)	25,000		
Sundry Debtors	42,000		
Discount Allowed	1,400		
Insurance Premium	4,800		
Telephone Charges	3,750		
Bad Debts	500		
Bank	11,300		
Cash	2,610		
	2,88,780		2,88,780

Other information :

(i) Stock on 31.12.2014 is ₹ 26,700. The stock includes goods returned by a customer on 31st December, 2014 to the value of ₹ 2,200 for which no entry has been made.

(ii) Stock valuing ₹ 5,000 destroyed by fire. ₹ 500 realised through sale of damaged goods and insurance company paid ₹ 3,000 only against the claim.

(iii) Mr A Sen has been providing for depreciation on motor car @ 20% under Diminishing Balance Method. Now he wants to provide depreciation @ 6% under Straight-line Method with effect from 1.1.2014 (the date of purchase of the motor car).

(iv) Mr A Sen's bank has debited ₹ 150 in the Pass Book as clearing charge which has not been entered in the Cash Book.

(v) Creditors include a balance of ₹ 1,600 to the credit of S Chand in respect of which it has been decided and settled with the party to pay only ₹ 1,000.

(vi) Provide depreciation on machinery @ 15% and on furniture @ 10% per annum.

(vii) A debtor of ₹ 12,000 accepted a bill drawn by Mr Sen.

(viii) Create a provision for doubtful debts at 5% on Sundry Debtors.

		66,370			66,370

Balance Sheet of A. Sen as at 31st December, 2014

Liabilities	₹	₹	Assets	₹	₹
Capital :			Machinery	18,000	
Opening Balance	80,000		Less: Depreciation	2,700	15,300
Add: Net Profit	34,770	1,14,770	Furniture	12,500	
Sundry Creditors (₹ 35,600 – 600)		35,000	Less: Depreciation	1,250	11,250
Outstanding Rent		1,350	Motor Car (Note 2)	16,400	
			Less: Depreciation	1,200	15,200
			10% Fixed Deposit	25,000	
			Add: Accrued Interest	2,500	27,500
			Sundry Debtors (Note 1)	27,800	
			Less: Provision for Doubtful Debts	1,390	26,410
			Bills Receivable		12,000
			Closing Stock		26,700
			Bank (Note 3)		14,150
			Cash		2,610
		1,51,120			1,51,120

Working Notes :

(1) Closing Value of Debtors and Related Provision

	₹
Debtors as per Trial Balance	42,000
Less: Returns not recorded	2,200
	39,800
Less: Debtor accepted bill	12,000
	27,800

Provision for doubtful debts : @ 5% on ₹ 27,800 = ₹ 1,390.

(2) Let the original cost of motor car on 1.1.2011

Let the original cost of motor car on 1.1.2011	100.00
Less: Depreciation @ 20% for 2011	20.00
	80.00
Less: Depreciation @ 20% on ₹ 80 for 2012	16.00
	64.00
Less: Depreciation @ 20% on ₹ 64 for 2013	12.80
Written-down Value on 31.12.2013	51.20

When written-down value is ₹ 51.20 the original cost is ₹ 100.

When written-down value is ₹ 1.00 the original cost is 100 / 51.20

When written-down value is ₹ 10.240 the original cost is 100 / 51.20 × 10.240 = ₹ **20,000**.

Adjustment for Depreciation

Diminishing Balance Method	₹	Straight Line Method	₹
2011 (20% x ₹ 20,000)	4,000	2011	1,200
2012 (20% x ₹ 16,000)	3,200	2012	1,200
2013 (20% x ₹ 12,800)	2,560	2013	1,200
	9,760		3,600

Depreciation over-charged = ₹ 9,760 – 3,600 = ₹ 6,160.

Valuation of motor car after adjustment of over-depreciation will be : ₹ 10,240 + 6,160 = ₹ **16,400**.

For adjusting over-depreciation, the following entry is passed :

Motor Car Account	Dr.	₹ 6,160	
To Profit and Loss Account			₹ 6,160

Tutorial Note : Para 21 of AS—6 states that ***the deficiency or surplus arising from retrospective recomputation of depreciation in accordance with the new method should be adjusted in the accounts in the year in which the method of depreciation is changed. In case the change in the method results in deficiency in depreciation in respect of past years, the deficiency should be charged in the statement of profit and loss. In case the change in the method results in surplus, the surplus should be credited to the statement of profit and loss. Such a change should be treated as a change in accounting policy and its effect should be quantified and disclosed***.

(3) Calculation of Bank Balance

	₹
Bank balance as per Trial Balance	11,300
Add: Insurance claim received	3,000
	14,300
Less: Bank charges	150
	14,150

Illustration 22

Nag, Paul and Sen are partners in a firm sharing profits and losses, Nag 2/5th, Paul 2/5th and Sen 1/5th. Sen's annual share of profit (including salary and interest) is to be a minimum of ₹ 28,000, any deficit being borne by the other two partners in their profit-sharing ratio. No interest is allowed or charged on Partners' Current Accounts, but Fixed Capital Accounts carry interest at 6% p.a.

Dr. Trial Balance as on 31st March, 2015 Cr.

Particulars	(₹)	Particulars		(₹)
Freehold Premises at cost	1,26,000	Capital Accounts :		
Plant and Machinery at cost	1,12,000	Nag	1,12,000	
Motor Vehicles at cost	33,600	Paul	84,000	
Purchases	6,32,000	Sen	42,000	2,38,000
Stock, 1st April, 2014	1,00,800	Current Accounts, 1st April, 2014 :		
Wages	64,800	Nag	25,200	
Salaries	1,25,600	Paul	8,400	33,600
Trade Expenses	8,400	Sales		10,49,200
Repairs	16,800	Creditors		58,800
Discount Allowed	3,360	Provision for Doubtful Debts, 1st April, 2014		4,760
Office Expenses	50,400	Discount Received		5,880
Carriage Inwards	8,680	Provision for Depreciation, 1st April, 2014:		
Insurance	19,600	Plant and Machinery		33,600
Professional Charges	19,600	Motor Vehicles		16,800
Debtors	95,200			
Bank	11,200			
Current Account, 1st April, 2014 : Sen	1,400			
Carriage Outwards	11,200			
	14,40,640			14,40,640

Additional information :

(a) Stock on hand on 31st March, 2015 amounted to ₹ 95,720.

(b) Sales include ₹ 33,600 goods sent to Goon and Co., on consignment basis at cost plus 20%. The goods remained in their hands unsold on 31st March, 2015.

(c) The following amounts have been drawn each month by the partners as salaries : Nag — ₹ 500; Paul — ₹ 600; Sen — ₹ 300.

(d) Paul is to be debited with ₹ 3,500 for goods taken by him from stock for personal purpose.

(e) Nag is to be credited with ₹ 2,500 for travelling expenses incurred by him for the purpose of the firm.

(f) Repairs include an item of ₹ 8,000 for alteration to the office, which should be capitalised.

(g) Insurance includes a premium of ₹ 6,000 paid for the year ended 30th September, 2000 and office expenses accrued amount to ₹ 4,200.

(h) A motor vehicle costing ₹ 12,600 had been purchased during the year against which ₹ 5,000 had been allowed on the sale of an old vehicle, the net amount ₹ 7,600 being debited to Purchases Account. The vehicle sold had cost ₹ 10,500 and had been written-down to ₹ 3,000.

(i) Depreciation on plant and machinery and motor vehicles is to be provided at the rate of 10% and 20% p.a. respectively on the original cost. (No depreciation on assets sold and full year's depreciation on assets purchased during the year is chargeable).

(j) A debt of ₹ 840 is to be written-off and the provision for doubtful debts is to be increased to ₹ 6,800.

Prepare a Trading and Profit and Loss Account for the year ended 31st March, 2015 and a Balance Sheet as on that date.

Solution **Nag, Paul and Sen**

Dr. Trading and Profit and Loss Account for the year ended 31st March, 2015 Cr.

Motor Vehicles (Note 3)	7,140	18,340			
To Net Profit c/d		96,940			
		3,52,020			3,52,020

Balance Sheet of Nag, Paul and Sen as at 31st March, 2015

Liabilities	₹	₹	Assets	₹	₹
Capital Accounts :			Freehold Premises	1,26,000	
Nag	1,12,000		Add: Alterations Capitalised	8,000	1,34,000
Paul	84,000		Plant and Machinery	1,12,000	
Sen	42,000	2,38,000	Less: Provision for Depreciation		
Current Accounts (Note 2) :			(₹ 33,600 + 11,200)	44,800	67,200
Nag	56,410		Motor Vehicles (Note 3)	35,700	
Paul	31,930		Less: Provision for Depreciation (Note 3)	16,440	19,260
Sen	23,000	1,11,340	Closing Stock		95,720
Creditors		58,800	Stock with Consingee (Note 4)		28,000
Outstanding Office Expenses		4,200	Debtors	95,200	
			Less: Goods Sent on Consignment at Invoice Price (Note 4)	33,600	
				61,600	
			Less: Bad Debts	840	
				60,760	
			Less: Provision for Doubtful Debts	6,800	53,960
			Prepaid Insurance		3,000
			Bank		11,200
		4,12,340			4,12,340

Working Notes : (1) Profit and Loss Appropriation Account for the year ended 31.3.2015

Particulars	₹	Particulars	₹
To Interest on Capital A/c (Nag—₹ 6,720; Paul—₹ 5,040; Sen—₹ 2,520)	14,280	By Profit and Loss A/c — Net profit	96,940
To Partners' Salaries A/c (Nag—₹ 6,000; Paul—₹ 7,200; Sen—₹ 3,600)	16,800		
To Share of Profit A/c : (Nag—₹ 21,990; Paul—₹ 21,990; Sen—₹ 21,880)	65,860		
	96,940		96,940

Sen's share of profit (including salary and interest) should not be less than ₹ 28,000. Sen's interest on capital and salary = ₹ 2,520 + ₹ 3,600 = ₹ 6,120. Therefore only share of profit should not be less than (₹ 28,000 – ₹ 6,120) = ₹ 21,880.

Divisible profit of the firm = ₹ 96,940 – 14,280 – 16,800 = ₹ 65,860. Actual share of profit of Sen is ₹ 13,172. But he should get minimum of ₹ 21,880. The shortfall of ₹ 8,708 will be shared by Nag and Paul equally.

Share of Profit : Nag : ₹ 26,344 – 4,354 = ₹ 21,990. Paul : ₹ 26,344 – 4,354 = ₹ 21,990. Sen : ₹ 13,172 + 8,708 = ₹ 21,880.

Dr. (2) Partners' Current Accounts [all figures in rupees] Cr.

Dae	Particulars	Nag	Paul	Sen	Date	Particulars	Nag	Paul	Sen
2014					2014				
Apr 1	To Balance b/d	—	—	1,400	Apr 1	By Balance b/d	25,200	8,400	—
						By Travelling Expenses	2,500	—	—
2015					2015				
Mar 31	To Cash A/c	6,000	7,200	3,600	Mar 31	By Interest on Capital A/c	6,720	5,040	2,520
	To Purchases A/c	—	3,500	—		By Partners' Salaries A/c	6,000	7,200	3,600
	To Balance c/d	56,410	31,930	23,000		By Share of Profit A/c	21,990	21,990	21,880
		62,410	42,630	28,000			62,410	42,630	28,000

(3) Profit on Exchange of Motor Vehicle

Written-down value of motor vehicle sold is ₹ 3,000. It was exchanged for ₹ 5,000. Therefore, profit on exchange will be ₹ 5,000 – ₹ 3,000 = ₹ 2,000. To rectify the errors for purchase of new motor vehicle, the entry is to be passed :

New Motor Vehicle Account	Dr.	₹ 12,600	
Provision for Depreciation on Motor Vehicles Account	Dr.	7,500	
To Purchases Account			₹ 7,600

To Old Motor Vehicles Account 10,500

To Profit on Exchange of Motor Vehicles Account 2,000

(i) The final balance of motor vehicles (at cost) will be : ₹ 33,600 – 10,500 + 12,600 = ₹ **35,700**.
Depreciation @ 20% on ₹ 35,700 = ₹ **7,140**.

(ii) The final balance of provision for depreciation on motor vehicles will be : ₹ 16,800 – 7,500 + 7,140 = ₹ **16,440**.

(4) When goods were sent on consignment, Consignor Account was debited and Sales Account was credited. In the sundry debtors, consignee's balance is included. To rectify this, the following entry is to be passed :

Sales Account Dr. ₹ 33,600

To Sundry Debtors Account ₹ 33,600

Net Effect :

(i) Sales will be reduced by ₹ 33,600.

(ii) Sundry Debtors will be reduced by ₹ 33,600.

(iii) Cost of goods sent ₹ 28,000 will be credited to Trading Account and will be shown in the Balance Sheet.

Illustration 23

Following is the Trial Balance of X as on 31.3.2015. You are required to prepare Trading and Profit and Loss Account for the year ended 31.3.2015 and a Balance Sheet as on that date.

Particulars	Dr. (₹)	Cr. (₹)	Particulars	Dr. (₹)	Cr. (₹)
Capital		60,000	Accrued Income	1,500	
Plant and Machinery	18,000		Salaries Outstanding		2,000
Depreciation on Plant and Machinery	2,000		Bills Receivable	30,000	
Repairs to Plant	1,600		Bills Payable		3,000
Wages	28,000		Provision for Bad and Doubtful Debts		6,000
Salaries	4,000		Bad Debts	1,000	
Income Tax	500		Discount Received		4,000
Cash in Hand	2,000		Sundry Debtors	35,000	
Land	24,500		Sundry Creditors		23,300
Depreciation on Building	2,500		Opening Stock (1.4.2014)	37,000	
Purchases less Returns	1,23,500		Building	50,000	
Sales		2,49,000			
Bank Overdraft		13,800	**TOTAL**	3,61,100	3,61,100

Additional information :

(1) Stock on 31.3.2015 was ₹ 30,000.

(2) Write-off ₹ 3,000 as bad debts and maintain a provision for bad and doubtful debts at 5% on sundry debtors.

(3) Goods costing ₹ 5,000 were sent to a customer on "Sale or Approval Basis" on 30.3.2015. These were recorded as actual sales. The rate of gross profit was 1/6th of sales.

(4) ₹ 1,200 paid as rent of the office were debited to landlord account and were included in sundry debtors.

(5) General Manager is to be paid commission at 10% after charging the commission of Works Manager and his own on net profits.

(6) Works Manager is to be given commission at 5% after charging commission of General Manager and his own on net profits. Such commission shall be calculated to the nearest multiple of rupee.

Solution

Mr. X

Dr. Trading and Profit and Loss Account for the year ended 31st March, 2015 Cr.

Particulars		₹	Particulars		₹
To Opening Stock		37,000	By Sales	2,49,000	
To Purchase (less returns)		1,23,500	Less: Sale or Approval	6,000	2,43,000
To Wages		28,000	By Closing Stock	30,000	
To Gross Profit c/d		89,500	Add: Sale or Approval (Note 3)	5,000	35,000
		2,78,000			2,78,000
To Salaries		4,000	By Gross Profit b/d		89,500
To Rent		1,200	By Provision for Bad and Doubtful Debts (Note 2)		760
To Depreciation :			By Discount Received		4,000
Plant and Machinery	2,000				
Building	2,500	4,500			
To Repairs to Plant		1,600			
To General Manager's Comm. (Note 1)		7,214			
To Works Manager's Commission (Note 1)		3,607			
To Net Profit (transferred to Capital)		72,139			
		94,260			94,260

Working Notes (1) : Net profit before charging Commission ₹ 82,960

Less : Works Manager's Commission (see below)	₹ 3,607	
General Manager's Commission	₹ 7,214	₹ 10,821
Net Profit after charging Commission		₹ 72,139

Let x be the total commission to General Manager and y be the total commission to Works Manager.

x = 10/110 (₹ 82,960 – y) . . . . (1)

y = 5/105 (₹ 82,960 – x) . . . . (2)

or, x = .09091 (₹ 82,960 – y) . . . . (1) y = .04762 (82,960 – x)

or, x + .091 y = 7,541.818

or, x + 21 y = 82,960

x + .09091 y = 7541.818

20.909 y = 75418.18 or, y = **3,607** and x = .82960 – 21 x 3,606.97 or x = 7,213.58 (say) **7,214.**

		24,800
Less: New prov. for bad debts		1,240
Closing Sundry Debtors		23,560

(3) Cost price of stock of goods sent on sale or approval = ₹ 6,000 – 1/6 (₹ 6,000) = ₹ 5,000.

Illustration 24

Following is the Trial Balance of Sri Rahul as at 31.12.2014. You are required to prepare Trading and Profit and Loss Account for the year ended 31.12.2014 and a Balance Sheet as on that date after making necessary adjustments:

Debit Balances	₹	Credit Balances	₹
Purchases	60,000	Sales	1,00,000
Sales Ledger Balances	30,400	Purchases Ledger Balances	24,400
Returns Inward	2,000	Discount Received	600
Discount Allowed	2,000	Returns Outward	2,400
Building	44,000	Capital	53,200
Depreciation on Building	2,000	Suspense Account	2,000
Income Tax	2,000	Goods Sent on Consignment	5,000
Wages	4,000	Profit on Consignment	1,000
Salaries	6,000	Apprenticeship Premium (for the year ending 31.3.2015)	2,400
Consignment Stock (31.12.2014)	1,200	Provision for Bad Debts	2,000
Stock-in-Trade (1.1.2014)	20,000	Commission	1,600
Trade Expenses	4,000		
Insurance	400		
Cash at Bank	12,600		
Deposit with Asha	4,000		
	1,94,600		1,94,600

Adjustments :

(i) Stock-in-trade on 31.12.2014 was valued at ₹ 20,000.

(ii) Stock valued at ₹ 4,000 was destroyed by fire on 25.12.2014 for which insurance company admitted a claim of ₹ 2,400 only.

(iii) Deposit with Asha was realised together with interest @ 10% p.a. for 6 months and deposited the same into Fixed Deposit Account with Bank of India on 1.10.2014 bearing interest @ 16% p.a., but no entry had since been made.

(iv) Out of purchases, goods of ₹ 4,000 was distributed as free samples.

(v) Suspense Account represents a cheque received from Bapi, a customer, in settlement of ₹ 2,400 due from him. The cheque was duly deposited and credited by the Bank.

(vi) Maintain provision for bad debts @ 5% on Debtors and provision for discount @ 2% on both Debtors and Creditors.

Solution

			By Reserve for Disc. on Creditors (Note 5)		488
		55,856			55,856

Balance Sheet of Sri Rahul as at 31st December, 2014

Liabilities	₹	₹	Assets	₹	₹
Capital :			Building		44,000
Opening balance	53,200		Stock-in-trade		20,000
Add: Net Profit	34,924		Consignment Stock		1,200
	88,124		Sales Ledger Balances (30,400 – 2,400)	28,000	
Less: Income Tax (Drawings)	2,000	86,124	Less: Provision for Bad Debts (Note3)	1,400	
Purchase Ledger Balances (Note 6)	24,400			26,600	
Less: Reserve for Discount on Creditors	488	23,912	Less: Provision for Discount on Debtors	532	26,068
Apprenticeship Premium recd. in advance		600	Deposit with Bank of India		4,200
			Accrued Interest on Deposit with BOI		168
			Insurance Claim		2,400
			Cash and Bank		12,600
		1,10,636			1,10,636

Working Notes :

(1) Deposit with Asha was realised alongwith interest @ 10% p.a. on 30.6.2014 and ₹ 4,200 was received. It was deposited with Bank of India at a interest of 16% p.a. on 1.10.2014 Therefore, accrued interest on this deposit will be ₹ 168 (3/12 x 16/100 x ₹ 4,200).

(2) For adjustment of Suspense Account, the following entry is to be passed :

Suspense Account	Dr.	₹ 2,000	
Discount Allowed Account	Dr.	₹ 400	
To Sundry Debtors Account			₹ 2,400

(3) Calculation of Provision for Bad Debts

	₹
Sales Ledger Balance (i.e. Sundry Debtors)	30,400
Less : Adjustment of cheque received from Bapi	(2,000)
Less : Discount allowed to Bapi	(400)
Final balance of Debtors	28,000

Provision for bad debts to be maintained @ 5% on Debtors, i.e. 5% of ₹ 28,000 = ₹ 1,400.

(4) Provision for discount on debtors will be @ 2% on ₹ (28,000 – 1,400) = ₹ 532.
(5) Reserve for discount on creditors will be @ 2% on ₹ 24,400 = ₹ 488.
(6) Purchases Ledger balances means Sundry Creditors. Similarly, Sales Ledger balances means Sundry Debtors.

Illustration 25

The following is the Trial Balance of M/s Ray Traders as at 31st December, 2014. You are asked to prepare the Trading and Profit and Loss Account for the year ended 31st December, 1992 and Balance Sheet as on that date: (all figures in ₹)

Particulars	Dr.	Cr.	Particulars	Dr.	Cr.
Ray's Capital		2,16,000	Income from investments		500
Stock as on 1st January 2014	93,600		Cash at bank	23,000	
Sales and sales returns	17,200	5,79,200	Discount received		8,560
Purchase and purchase returns	4,86,200	11,600	Investments	10,000	
Freight and carriage	37,200		Furniture and fittings	13,600	
Rent and taxes	11,400		Discounts paid	5,080	
Salaries and wages	18,600		General expenses	7,820	
Sundry debtors	48,000		Audit fees	1,400	
Sundry creditors		29,600	Insurance	1,200	
Bank loan (at 12% p.a.)		40,000	Travelling expenses	4,660	
Bank Interest on above	3,800		Postage and telegram	1,740	
Advertisement	20,200		Cash in hand	20,760	
Drawings	20,000		Fixed deposit with State Bank of India	40,000	
			TOTAL	8,85,460	8,85,460

Additional information: (a) Closing stock as on 31.12.2014 ₹ 1,57,200. (b) Included amongst the Debtors is ₹ 6,000 from Mr S. Naha and included amongst the creditors is ₹ 2,000 to Mr S. Naha. (c) The effect of advertisement being not yet expired, a quarter of the amount of Advertisement is to be carried forward to the next year. (d) Provide 2% for Discount on Debtors and create a provision for Bad and Doubtful Debts at 5% on Debtors. (e) Depreciation of 10% is to be written-off on Furniture and fittings. (f) Wages owing on 31st December, 1992 ₹ 600, and salaries owing ₹ 1,000. (g) Insurance was paid in advance upto 31st March, 1993. (h) Furniture which stood at ₹ 1,200 in the books on 1st January, 1992 was disposed of at ₹ 580 on 30th June, 1992 in part exchange for a new furniture costing ₹ 1,040. The net amount payable ₹ 460 was passed through the purchase book by mistake. (i) Two dishonoured cheques for ₹ 400 and ₹ 600 respectively had not been entered in the cash book. The first for ₹ 400 is known to be bad. In the case of the second cheque for ₹ 600, it is expected that the Debtor would be in a position to pay a dividend of 60 paise in the rupee. (j) Interest receivable from Fixed Deposit with State Bank of India @ 12% p.a. and provide for interest on Bank loan for the whole year. (working notes must be shown).

M/s. Ray Traders

		1,28,120			1,28,120

Balance Sheet of M/s Ray Trader as at 31st December, 2014

Liabilities	₹	₹	Assets	₹	₹
Capital: Opening	2,16,000		Furniture (Note 5)	13,440	
Add: Net profit	44,082		Less: Depreciation 10% (Note 7)	1,344	12,096
	2,60,082		Fixed Deposit with SBI		40,000
Less: Drawings	20,000	2,40,082	Investments		10,000
Sundry Creditors (₹ 29,600 – ₹ 460)	29,140		Closing Stock		1,57,200
Less: Due to S. Naha	2,000	27,140	Sundry Debtors (Note 2)	46,600	
12% Bank Loan	40,000		Less: Provision for bad and doubtful debts	2,540	
Add: Accrued interest (not yet paid)	1,000	41,000		44,060	
Outstanding expenses:			Less: Provision for discount on Debtors	874	43,186
Salaries	1,000		Accrued interest on fixed deposit		4,800
Wages	600	1,600	Prepaid insurance premium		240
Creditors for purchase of furniture		460	Cash at Bank (Note 3)		22,000
			Cash in hand		20,760
		3,10,282			3,10,282

Working Notes: **(1)** Purchases as per Trial Balance ₹ 4,86,200; Less: Purchase of furniture ₹ 460; Net amount = ₹ 4,85,740.

(2) Sundry Debtors	₹	**(3) Cash at Bank**	₹
As per Balance Sheet	48,000	As per trial balance	23,000
Less: Due from S.Naha	2,000	Less: Dishonoured cheques : ₹ (400 + 600)	1,000
	46,000		22,000
Add: Dishonoured cheque	600	**(4) Provision for Discount on Debtors**	₹
	46,600	@ 2% on (₹ 46,000 – ₹ 2,300)	874
Provision for doubtful debts @ 5% on ₹ 46,000	2,300	No provision for discount is to be created for dishonoured cheque of ₹ 600.	
Add: Additional provision @ 40% on ₹ 600	240		
	2,540		

(5) Loss on exchange of furniture: Book value of furniture sold is ₹ 1,200. It was exchanged for ₹ 580. Therefore, loss on exchange will be ₹ 1,200 – ₹ 580 = ₹ 620. (No depreciation has been charged on old furniture). To rectify the error for purchase of new furniture, the following entry is to be passed:

New Furniture Account	Dr.	₹ 1,040	
Profit and Loss Account	Dr.	₹ 620	
To Purchases Account			₹ 460
To Old Furniture Account			₹ 1,200

The final balance of Furniture Account will be: ₹ 13,600 – ₹ 1,200 + ₹ 1,040 = ₹ 13,440. Therefore, depreciation will be 10% of ₹ 13,440 = ₹ 1,344.

(6) Insurance of ₹ 1,200 paid for 15 months. Therefore, three month's insurance premium should be carried forward = ₹ 1,200 ÷ 15 × 3 = ₹ 240.

(7) It should be noted that depreciation on furniture is to be charged @ 10% (not 10% p.a.). Therefore, depreciation on new furniture has been charged for the full year and no depreciation has been charged on exchanged furniture.

Tutorial Note :Though it has been given in the problem, a quarter of the amount of Advertisement is to be carried forward to the next year. However, it cannot be shown in the Balance Sheet as deferred revenue expenditure because the Accounting Standards states that "***An asset is recognised in the Balance Sheet when it is probable that the future economic benefits associated with it will flow to the enterprise and the asset has a cost or value that can be measured reliably***." So, the entire Advertisement Expenses has been charged to Profit and Loss Account.

Illustration 26

The following is the Trial Balance of Mr. Tendulkar as at 31.3.2015 :

Particulars	Dr. (₹)	Cr. (₹)	Particulars	Dr. (₹)	Cr. (₹)
Stock (1.4.2014)	45,000		Building	35,000	
Sales		3,25,000	Discount Received		2,300
Purchases	2,40,000		Drawings	10,000	
Capital		1,30,000	Bank Current Account	24,000	
Wages	10,000		Fixed Deposit Bank Account	16,000	
Salaries	15,000		Provision for Doubtful Debts		1,500
Discount Allowed	3,000		Debtors	45,000	

Creditors		35,000	Bills Receivable	10,000	
Rent and Rates	2,000		Cash	8,000	
Trade Expenses	15,000		Sales Return	2,000	
Purchases Return		3,000	Sale of Furniture		1,200
Furniture (1.4.1994)	18,000		**TOTAL**	4,98,000	4,98,000

Prepare Trading and Profit and Loss Account for the year ended 31.3.2015 and the Balance Sheet as on that date after taking into account the following adjustments :

(a) Stock on 31.3.2015 ₹ 40,000.

(b) Opening and Closing stock includes stock of stationery amounting to ₹ 200 and ₹ 150 respectively. Trade Expenses include payment of stationery of ₹ 1,800. Credit purchase of stationery for ₹ 450 recorded as ordinary purchases. Stationery of ₹ 300 is consumed by the proprietor.

(c) Furniture which stood in the books of ₹ 2,000 on 1.4.2014 was sold on 30.9.2014.

(d) Bills receivable include a dishonoured bill of ₹ 1,500 and debtors include an amount of ₹ 1,000 in respect of an insolvent customer whose estate is expected to realise only 50 paise in the rupee.

(e) Tendulkar received ₹ 15,000 from Kambli in respect of joint business with him. The sum received so credited to Sundry Creditors Account. It is noted that a sum of ₹ 5,000 is due to Tendulkar as his share of profit from the business.

(f) During the year the proceeds of a matured fixed deposit amounting to ₹ 14,000 has been credited to Fixed Deposit Account. The original amount was ₹ 10,000.

(g) Provide depreciation on all fixed assets @ 10% p.a. and provide 5% for doubtful debts of unknown nature.

Solution

Mr. Tendulkar

Dr. Trading and Profit and Loss Account for the year ended 31st March, 2015 Cr.

Particulars	₹	₹	Particulars	₹	₹

Less: Amount received from Kambli	15,000	20,000	Closing Stock	40,000	
Amount due to Kambli	15,000		Less: Stock of Stationery	150	39,850
Less: Share of Profit	5,000	10,000	Stock of Stationery		150

			Fixed Deposit Bank Account	16,000	
			Add: Interest wrongly credited	4,000	20,000
			Sundry Debtors	45,000	
			Add: Dishonoured Bill	1,500	
				46,500	
			Less: Prov. for Doubtful Debts (Note 2)	2,775	43,725
			Bills Receivable	10,000	
			Less: Dishonoured Bill	1,500	8,500
			Bank Current Account		24,000
			Cash		8,000
		1,90,125			1,90,125

Working Notes : **(1) Stationery Consumed**

Particulars	₹
Opening Balance	200
Add: Cash Purchases*	1,800
Add: Credit Purchases**	450
	2,450
Less: Closing Balance	150
	2,300
Less: Consumed by the Proprietor	300
	2,000

(2) Provision for Doubtful Debts

Particulars	₹
Debtors	45,000
Add: Dishonoured Bill	1,500
	46,500
On ₹ 1,000 @ 50%	500
On ₹ 45,500 @ 5%	2,275
	2,775

(3) Loss on Sale of Furniture

	₹
Book Value of Furniture on 1.4.2014	2,000
Less: Depreciation upto 30.9.2014 (See note below)	100
	1,900
Less: Sale proceeds	1,200
	700

(4) Depreciation on Furniture

	₹
Book value on 1.4.2014	18,000
Less: Sale of Furniture	2,000
Book value on 31.3.2015	16,000
Total Depreciation on furniture = 10% of 16,000 = ₹ 1,600	
Add : Depreciation on furniture sold = ₹ 100	1,700

* (included in Trade Expenses)
** (included in Purchases)

Tutorial Note : In this problem, depreciation on furniture sold has been charged for 6 months because it has been asked to charge depreciation on all fixed assets @ 10% p.a. However, in the previous illustration, no depreciation has been charged on furniture disposed off because in that problem, it was asked to charge depreciation @ 10% only (not 10% p.a.)

Illustration 27

Sri Amit is in business as stationery merchant. He also acts as a selling agent of Sri Asit and for this he is given a commission @ 10% on sales. From the following Trial Balance, you are required to prepare Trading and Profit and Loss Account for the year ended 31.12.2015 and a Balance Sheet as on that date after taking into consideration the adjustments noted below:

Particulars	Dr. (₹)	Cr. (₹)	Particulars	Dr. (₹)	Cr. (₹)
Furniture and fittings	36,000		Salaries	25,000	
Opening Stock	80,000		Sales Return	3,000	
Sundry Debtors	75,000		Purchases Return		2,000
Sales		6,65,000	Printing and Advertising	12,000	
Bills Receivable	40,000		Postage	4,500	
Cash at Bank	36,000		Discount Allowed	2,500	
Cash in Hand	10,000		Discount Received		2,000
Capital		1,90,000	Drawings	15,000	
Purchases	5,20,000		Other Trade Expenses	10,000	
Wages	5,000		Cash Sent to Consignor	75,000	
Sundry Creditors		60,000	Consignor's Balance (1.1.2015)		30,000
			TOTAL	9,49,000	9,49,000

Adjustments :

(1) Stock on 31.12.2015 valued at cost ₹ 64,000.

(2) The effect of advertising is expected to last for coming year also and as such half of printing and advertising is to be carried forward.

(3) A cheque of ₹ 5,000 received from a customer was returned dishonoured by bank but the same has not been recorded in the books. The customer has become insolvent and 60% is expected to realise from his estate.

(4) Furniture appearing in the books on 1.1.2015 at ₹ 6,000 was disposed of on 30.6.2015 at ₹ 3,500 in part exchange of a new furniture costing ₹ 5,000. A net invoice for ₹ 1,500 was passed through Purchases Day Book.

(5) Provide depreciation on furniture and fittings @ 10% p.a.

(6) Sales include ₹ 75,000 for goods sold in cash on behalf of Sri Asit. Trade expenses also include ₹ 4,000 as expenses in connection with this sale.

(7) Opening stock has been valued at 20% below cost but final accounts should be prepared by taking stock at cost.

Solution

Sri Amit

Dr. Trading and Profit and Loss Account for the year ended 31st December, 2015 Cr.

Particulars	₹	₹	Particulars	₹	₹
To Opening Stock (Note 1)		1,00,000	By Sales	6,65,000	
To Purchases	5,20,000		Less: Goods sold on Consignment	75,000	
Less: Purchases Return	2,000		(on behalf of Asit)	5,90,000	
Less: Purchase of Furniture	1,500	5,16,500	Less: Sales Return	3,000	5,87,000
To Wages		5,000	By Closing Stock		64,000
To Gross Profit c/d		29,500			
		6,51,000			6,51,000

To Printing and Advertising	12,000		By Discount Received		2,000
Less: Unexpired Amount	6,000	6,000	By Commission Received (from Asit)		7,500
To Postage		4,500	By Net Loss		12,750
To Discount Allowed		2,500			
To Other Trade Expenses	10,000				
Less: Exp. for Consignment Sale	4,000	6,000			
To Provision for Bad Debts (Note 2)		2,000			
To Depreciation on :					
Furniture in use (Note 3)		3,250			
Furniture Disposed off (Note 4)		300			
To Loss on Exchange of Furniture (Note 5)		2,200			
		51,750			51,750
To Net Loss		12,750	By Opening Stock (See Tutorial Note)		20,000
To Net Profit (Transferred to Capital A/c)		7,250			
		20,000			20,000

Balance Sheet of Sri Amit as at 31st December, 2015

Liabilities	₹	₹	Assets	₹	₹
Capital :			Furniture and Fitting (Note 6)		31,750
Opening balance	1,90,000		Closing Stock		64,000
Add: Net Profit	7,250		Sundry Debtors	75,000	
	1,97,250		Add: Cheque dishonoured	5,000	
Less: Drawings	15,000	1,82,250		80,000	
Sundry Creditors		60,000	Less: Prov. for Bad Debts (Note 2)	2,000	78,000
Balance due to Sri Asit (Note 7)		18,500	Bills Receivables		40,000
			Unexpired Printing and Advertising		6,000
			Cash at Bank : ₹ (36,000 – 5,000)		31,000
			Cash in Hand		10,000
		2,60,750			2,60,750

Working Notes :

(1) Opening stock has been under-valued by 20%. Therefore, it appears in the Trial Balance at 80%. So, the actual cost of opening stock = 80,000 / 80% = ₹ 1,00,000. Assuming that the market value of opening stock is more than ₹ 1,00,000, the value of opening stock is to be increased by ₹ 20,000.

Tutorial Note : Para 19 of AS—5 states that ***prior period items are normally included in the determination of net profit or loss for the current period. An alternative approach is to show such items in the statement of profit and loss after determination of current net profit or loss.*** This is a prior period item.Therefore,it is to be shown in the Profit and Loss Account itself. It is better to show it after determination of current year's profit.

(2) 60% is expected to be realised from the estate of the insolvent debtor owing ₹ 5,000. Therefore, a provision for bad debts is to be created @ 40% on ₹ 5,000, i.e. ₹ 2,000.

(3) Depreciation on old furniture in use = 10% ₹ (36,000 – 6,000) = ₹ 3,000. Depreciation on new furniture for 6 months @ 10% p.a. on ₹ 5,000 = ₹ 250. Therefore, total depreciation on furniture in use = ₹ 3,000 + ₹ 250 = ₹ 3,250.

(4) Depreciation on furniture disposed off = 10% of ₹ 6,000 for 6 months = ₹ 300.

(5) Calculation of Loss on Exchange of Furniture		(6) Book Value of Furniture as on 31.12.2015	
Particulars	₹	Particulars	₹
Book value of furniture (exchanged) on 1.1.1995	6,000	Opening Balance	36,000
Less: Depreciation for 6 months @ 10% p.a.	300	Less: Book value of furniture sold	6,000
Written-down value on 30.6.1995	5,700		30,000
Less: Exchange value	3,500	Add: New furniture purchased	5,000
	2,200		35,000
		Less: Depreciation for 2015 (Note 3)	3,250
			31,750

Dr. (7) Sri Asit (Consignor) Account Cr.

Particulars	₹	Particulars	₹
To Cash Sent to Consignor A/c	75,000	By Balance b/d	30,000
To Trade Expenses	4,000	By Sales	75,000
To Commission on Sale @ 10%	7,500		
To Balance c/d	18,500		
	1,05,000		1,05,000

Illustration 28

From the following Trial Balance of Sri Sengupta and the additional information, prepare a Trading and Profit and Loss Account for the year ending on 31.12.2014 and a Balance Sheet as at that date :

Debit Balances	₹	Credit Balances	₹
Materials Consumed	1,75,000	Capital	75,000
Stock on 31.12.2014	37,500	Sales	3,00,000
Debtors	30,000	Creditors	25,000
Wages — Productive	45,000	Commission Received	1,500
Wages — Others	7,500	Special Rebate Received	2,000
Salaries	7,500	Suspense Account — Sri Roy	27,500
Electric Charges	2,500		
Freight and Insurance on Purchases	1,500		
Delivery Charges	1,000		
Depreciation	5,000		
Commission Paid	1,000		
Special Rebate Allowed	1,000		
Plant and Machinery	32,500		
Furniture	6,500		
Land and Building	47,500		
Suspense Account — Smt. Banerjee	10,000		
Drawings	7,500		
Cash	2,000		
Bank	10,500		
	4,31,000		4,31,000

Additional information :

(a) Salary includes the proprietor's salary of ₹ 3,000 for the year.

(b) Suspense Account of Sri Roy represents a cheque received from him against sale proceeds of goods sent to him on consignment. Goods costing ₹ 32,500 were sent to him on consignment. 4/5th of the goods were sold by him for ₹ 45,000. He is entitled to a commission at 10% on sale proceeds. The only entry passed in this connection was for the cheque received from him.

(c) Suspense Account of Smt. Banerjee represents an advance of ₹ 10,000 to her in connection with a joint venture agreement entered into with her for which she is to get 2/5th share of profit. It is ascertained that the venture has earned a profit of ₹ 7,500.

(d) The scrutiny of the Schedule of Debtors reveals the following :
(i) ₹ 7,500 fully realisable; (ii) ₹ 5,000 — 75% realisable; (iii) ₹ 2,500 — 50% realisable; (iv) Provision for doubtful debts has to be provided for at 5% on the balance besides the amount that may be required as above.

Solution

Sri Sengupta

Dr. Trading and Profit and Loss Account for the year ended 31st December, 2014 Cr.

Particulars	₹	Particulars	₹
To Materials Consumed	1,75,000	By Sales	3,00,000
To Wages — Productive	45,000	By Goods Sent on Consignment	32,500
To Freight and Insurance on Purchases	1,500		
To Gross Profit c/d	1,11,000		
	3,32,500		3,32,500

To Wages — Others		7,500	By Gross Profit b/d	1,11,000
To Salaries	7,500		By Commission Received	1,500
Less: Proprietor's salary	3,000	4,500	By Special Rebate Received	2,000
To Electric Charges		2,500	By Profit on Consignment (Note 1)	14,500
To Delivery Charges		1,000	By Profit on Joint Venture (3/5th of ₹ 7,500)	4,500
To Depreciation		5,000		
To Commission Paid		1,000		
To Special Rebate Allowed		1,000		
To Provision for Doubtful Debts (Note 4)		3,250		
To Net Profit (transferred to Capital)		1,07,750		
		1,33,500		1,33,500

Balance Sheet of Sri Sengupta as at 31st December, 2014

Liabilities	₹	₹	Assets	₹	₹
Capital :			Land and Building		47,500
Opening Balance	75,000		Plant and Machinery		32,500
Add: Net Profit	1,07,750		Furniture		6,500
	1,82,750		Closing Stock		37,500
Less: Drawings : ₹ (7,500 + 3,000)	10,500	1,72,250	Stock on Consignment		6,500
Creditors		25,000	Debtors	30,000	
			Less: Provision for Doubtful Debts	3,250	26,750
			Amount Due from Smt. Banerjee (Note 3)		14,500
			Amount Due from Sri Roy (Note 2)		13,000
			Cash at Bank		10,500
			Cash in Hand		2,000
		1,97,250			1,97,250

Working Notes :

Dr. (1) Consignment to Sri Roy Account Cr.

Particulars	₹	Particulars	₹
To Goods Sent on Consignment A/c	32,500	By Sri Roy A/c — Sales Proceeds	45,000
To Sri Roy A/c — Commission 10% on ₹ 45,000	4,500	By Stock on Consignment A/c (1/5 of ₹ 32,500)	6,500
To Profit on Consignment A/c	14,500		
	51,500		51,500

Dr. (2) Sri Roy Account Cr.

Particulars	₹	Particulars	₹
To Consignment to Sri Roy A/c	45,000	By Suspense A/c — Sri Roy	27,500
		By Consignment A/c (commission)	4,500
		By Balance c/d	13,000
	45,000		45,000

Dr. (3) Smt. Banerjee Account Cr.

Particulars	₹	Particulars	₹
To Suspense A/c — Smt. Banerjee	10,000	By Balance c/d	14,500

	14,500		14,500

(4) Calculation of Provision for Doubtful Debts

	₹	
(i) On ₹ 7,500	Nil	
(ii) On ₹ 5,000 @ 25%	1,250	
(iii) On ₹ 2,500 @ 50%	1,250	
(iv) On ₹ 15,000 @ 5%	750	3,250

Key Points

- Trading Account is prepared to know the gross profit or overall profit. Profit and Loss Account discloses net profit or clear profit of the business. The Balance Sheet shows the financial position of the business on a given date — generally on the last date of the accounting period.
- Freight and insurance paid in connection with acquiring goods or making them saleable is debited to Trading Account. Freight and insurance paid in connection with the sale of goods is charged to Profit and Loss Account.
- When goods are purchased within municipality limits, generally octroi duty has to be paid on it. It is debited to Trading Account.

THEORETICAL QUESTIONS

1. What is a Trading Account? Why is it prepared?
2. What do you mean by Profit and Loss Account? Why is it prepared?
3. What adjustments are usually necessary at the time of preparing the Final Accounts?
4. What are closing entries? How are various accounts closed?
5. What adjusting entries would you pass in respect of (i) Income received in advance; (ii) Outstanding expenses; (iii) Accrued Income; and (iv) Depreciation?
6. What is Balance Sheet? Distinguish between Profit and Loss Account and Balance Sheet. What are the uses and limitations of the Balance Sheet?

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each statement or answer each question below.

1. Relating to the 'closing stock' for an accounting period, which of following is true ?
   A the figure is shown only in the trading account
   B the figure is shown only in the balance sheet
   C the figure is shown in the trading account and the balance sheet
   D the figure is shown as part of purchases in the trading account
2. Depreciation of a delivery van used for carriage inwards and carriage outwards will appear in
   A profit and loss account
   B trading account
   C trading account and profit and loss account
   D profit and loss account and balance sheet
3. A profit on the disposal of a fixed asset can also be described as an :
   A over-provision for depreciation on the asset
   B increase in fixed assets on the balance sheet
   C increase in the bank balance
   D under-provision for depreciation on the asset
4. What is the effect of overvaluing closing stock on the current year's profits ?
   A decreases the gross profit and net profit
   B increases the gross profit but decreases net profit
   C decreases the gross profit and increases net profit
   D increases the gross profit and net profit
5. Which of the following would appear in a trading account ?
   A discount allowed
   B carriage outward
   C carriage inward
   D discount received
6. How should a contingent liability be included in a firm's financial statements if the likelihood of a transfer of economic benefit to settle it is remote ?
   A disclosed by note with some provisions being made
   B disclosed by note with no provision being made
   C neither disclosure nor provision is required
   D adequate provision should be made
7. Which of the following should be classified as current liabilities ?
   (i) sundry debtors
   (ii) sales tax payable
   (iii) sundry creditors
   (iv) investments
   A (i) and (ii)
   B (i) and (iv)
   C (ii) and (iii)
   D (iii) and (iv)

8. Which of the following would be classified as revenue expenditure for a shop ?
   (i) assistant's wages
   (ii) trade licence fee paid
   (iii) purchase of a new shop counter
   (iv) repainting of the outside of the shop
   A (i) and (ii)
   B (i) and (iv)
   C (i) and (iii)
   D (i); (ii) and (iv)
9. Relating to the opening and closing stock for a financial period, which of the following is true ?
   A both figures are shown in the trading account but only the opening stock is shown in the balance sheet
   B only the opening stock is shown in the trading account, but both figures are shown in the balance sheet
   C both figures are shown in the trading account but only the closing stock is shown in the balance sheet
   D only the closing stock is shown in the trading account, but both figures are shown in the balance sheet
10. Which of the following is capital expenditure ?
   A cost of installing a new machine
   B interest paid on loan borrowed to finance the purchase of a new machine
   C cost of replacing parts to maintain the efficiency of a machine
   D cost of electricity to run a machine
11. Which of the following is not capital expenditure ?
   A a major overhaul to the motor of a delivery van to extend its useful life
   B an air-conditioner fixed to a delivery van
   C cost of replacing tyres of a delivery van
   D an extra body is added to a delivery van to increase the carrying capacity
12. Which of the following is not shown in the balance sheet ?
   A fixed deposit
   B opening stock
   C mortgage on land
   D bank overdraft
13. Gross profit is
   A sales less purchases
   B net sales less cost of goods sold
   C net profit less expenses
   D sales less purchases plus opening stock
14. Net profit is determined in the
   A trial balance
   B balance sheet
   C profit and loss account
   D trading account
15. Salaries are expenses incurred in making goods into a saleable condition, they should be charged to the
   A balance sheet
   B trading account
   C profit and loss account
   D trial balance
16. The accounts of a business have been prepared, but no adjustments have been made for accrued expenses at the end of the year.
   What effect will these omissions have on the accounts ?

	Net Profit	Current Assets	Current Liabilities
A	overstated	no effect	understated
B	understated	no effect	overstated
C	overstated	understated	no effect
D	understated	overstated	no effect

PRACTICAL QUESTIONS

1. From the following Trial Balance of Mr Krishna Gupta, prepare Trading and Profit and Loss Account for the year ended 31st December, 2014 and a Balance Sheet as on that date, after giving effect to the adjustments :

	Dr. (₹)	Cr. (₹)		Dr. (₹)	Cr. (₹)
Capital		1,80,000	Debtors	40,000	
Drawings	32,500		Goodwill	17,300	
Stock (1.1.2014)	1,74,450		Creditors		30,000
Return inwards	5,540		Advertisement expenses	9,540	
Carriages inwards	12,400		Provision for doubtful debts		12,000
Deposits with Mr Kamal (interest free)	13,750		Bad debts	4,000	
Carriage outwards	7,250		Patents and trade marks	5.000	
Loan to Anil @ 5% given on 1.1.2014	10,000		Cash in hand	620	
Returns outwards		8,400	Discount allowed	3,300	
Interest on the above loan		250	Wages	7,540	
Rent	8,200		Plant and machinery (purchased on 1.2014	30,000	
Rent outstanding		1,300	Purchases	11,29,700	
Sales		12,79,140	**TOTAL**	15,11,090	15,11,090

Adjustments :
1. Increase bad debts by ₹ 6,000. Make provision for doubtful debts @ 10% and provision for discount on debtors @ 5%.
2. The value of the closing stock is ₹ 1,87,920.
3. Wages include ₹ 2,000 paid for the erection of machinery on 1.1.2014.
4. Provide depreciation machinery @ 10% p.a.

2. From the following balances of Amal, Bimal as on 31.12.2014, prepare Trading Account, Profit and Loss Account for the year ended 31.12.2014 and the Balance Sheet as at 31.12.2014.

	₹		₹
Opening stock	30,000	Machinery at cost (including ₹ 10,000 new)	60,000
Purchases	1,10,000	Sundry Debtors	20,000
Sales	2,50,000	Bad debts	3,000
Building	55,000	Depreciation fund	25,000
Wages	23,000	Sundry Creditors	24,000
Carriage inwards	3,000	Rent,rates and taxes	4,000
Bills payable	10,000	Trade expenses	4,000
Furniture	9,000	Capital : Amal	50,000
Salaries	42,000	Capital : Bimal	40,000
Advertisement	24,000	Petty expenses	4,000
Coal and coke	2,000	Provision for bad debts	1,000
Cash at bank	14,000	Gas and water	1,200
Prepaid wages	1,000	Cash in hand	800
Depreciation fund investment	25,000	Outstanding rent	400
		Bank loan	34,600

The following additional information is supplied :
(a) The partners share profits and losses as Amal 2/5 and Bimal 3/5.
(b) Closing stock — ₹ 15,000.
(c) Stock valued at ₹ 10,000 was destroyed by fire but the Insurance Company admitted a claim of ₹ 8,500 only, and the claim is not yet paid.
(d) Wages include ₹ 2,000 for installation of a new machinery on 1.9.2014.
(e) Depreciate machinery at 10% p.a.

3. Mr P. Sharma is in business as a stationery merchant. From the following business extracted from his books of accounts, you are required to prepare Trading and Profit and Loss Account for the year ended 31st December, 2014 and a Balance Sheet as on that date :

	Dr. (₹)	Cr. (₹)		Dr. (₹)	Cr. (₹)
Cash in hand	20,000		Opening stock	20,000	
Cash at bank	25,000		Trade mark rights (10 years from 1.1.2014)	40,000	
Plant and machinery	50,000		Purchases	1,50,000	
Furniture and fixtures	10,000		Postages and telegrams	2,000	

Drawings	10,000		Bad debts	1,000	
Capital		90,000	Loan from R.D. Bansal @ 6% p.a. (taken on 1.7.2014)		15,000
Insurance charges	1,000		Interest on loan from Bansal	200	
Salaries and wages	25,000		Creditors		54,200
Sundry debtors	35,000		Sales		2,30,000
			TOTAL	3,89,200	3,89,200

Additional information :

1. Stock on 31.12.2014 — ₹ 38,000.
2. Depreciate plant and machinery at 10% and furniture and fixtures at 5% p.a.
3. Invoices of the value of ₹ 3,000 were recorded in the Sales Book on 29th December, 2014, but goods were not despatched until 7th January, 2015 and were included in the closing stock.
4. Of the sundry debtors ₹ 1,000 are bad and should be written-off.
5. Sundry debtors include ₹ 6,000 due from B N Sen whereas sundry creditors include ₹ 1,000 also due to him.
6. Create a provision of 5% on Sundry debtors for bad and doubtful debts.

4. From the following particulars prepare the Trading and Profit and Loss A/c for the year 2014 and the Balance Sheet as on 31.12.2014 of Prem Niwas :

	Dr. (₹)	Cr. (₹)		Dr. (₹)	Cr. (₹)
Building	50,000		Rent	6,000	
Machinery	22,000		Establishment	16,000	
Furniture	10,000		P.F. deducted from salaries		1,000
Bank	9,000		Interest (10%)	2,000	
Cash	1,000		Electricity	1,000	
Loans (since 1.1.2014)		30,000	Phone	1,000	
Capital		52,000	Commission	6,000	
Debtors/Creditors	50,000	40,000	Insurance premium	1,000	
Opening stock	12,000		Bad debts	2,000	
Purchase/Purchase returns	2,50,000	10,000	Bills receivable	4,000	
Sales returns/Sales	12,000	3,22,000	**TOTAL**	4,55,000	4,55,000

Provide depreciation on building @ 5%, machinery @ 15% and furniture @ 10%. Stock was not taken on 31.12.2014 but only on 7.1.2015. The transactions from 1.1.2015 to 7.1.2015 are Sales ₹ 25,000; Purchases ₹ 15,000; Stock on 7.1.2015 ₹ 18,000; and Gross Profit 20%. During the year machinery to the value of ₹ 10,000 was destroyed by fire and the insurance claim was settled at ₹ 8,000 and credit to Machinery Account. Also provide Employer's share of P.F. ₹ 1,000, Provision for bad debts at 5%, Commission to the manager @ 10% on net profit after providing the commission.

5. From the following Trial Balance of Hari and additional information prepare Trading and Profit and Loss Account for the year ended 31st March, 2015 and a Balance Sheet as on that date :

Particulars	Dr. (₹)	Cr. (₹)	Particulars	Dr. (₹)	Cr. (₹)
Capital		1,00,000	Bad Debt written-off	7,000	
Furniture	20,000		Creditors		1,20,000
Purchases	1,50,000		Drawings	24,000	
Debtors	2,00,000		Provision for bad debts		6,000
Interest earned		4,000	Printing and Stationery	8,000	
Salaries	30,000		Insurance	12,000	
Sales		3,21,000	Opening stock	50,000	
Purchase returns		5,000	Office expenses	12,000	
Wages	20,000		Provision for Depreciation		2,000
Rent	15,000				
Sales Return	10,000		**TOTAL**	5,58,000	5,58,000

Additional information :

(1) Depreciate Furniture by 10% on original cost.
(2) A Provision for Doubtful Debts is to be created to the extent of 5% on Sundry Debtors.
(3) Salaries for the month of March 2015 amounting to ₹ 3,000 were unpaid which must be provided for. However, salaries included ₹ 2,000 paid in advance.
(4) Insurance amounting to ₹ 2,000 is prepaid.
(5) Provide for outstanding office expenses ₹ 8,000.
(6) Stock used for private purpose ₹ 6,000; and Closing Stock-in-trade ₹ 60,000.

6. The following is the Trial Balance of Shri Paras, as on 31st March, 2015. You are requested to prepare the final accounts in vertical format, after giving effect to the adjustments:

Particulars	(Dr.) ₹	(Cr.) ₹	Particulars	(Dr.) ₹	(Cr.) ₹
Sundry Creditors	—	63,000	Carriage on Purchases	20,400	—
Sundry Debtors	1,45,000	—	Carriage on Sales	32,000	—
Capital Account	—	7,10,000	Fuel and Power	47,300	—
Drawings	52,450	—	Wages	1,04,800	—
Insurance	6,000	—	Returns Outwards	—	5,000
General Expenses	30,000	—	Returns Inwards	6,800	—
Salaries	1,50,000	—	Sales	—	9,87,800
Patents	75,000	—	Purchases	4,06,750	—
Machinery	2,00,000	—	Cash at Bank	26,300	—
Freehold Land	1,00,000	—	Cash in hand	5,400	—
Building	3,00,000	—			
Stock on 1.4.2014	57,600	—	**TOTAL**	17,65,800	17,65,800

The following adjustment are to be made: (1) Stock on 31st March, 2015 was valued at ₹ 68,000; (2) A provision for bad and doubtful debts is to be created to the extent of 5% on Sundry Debtors; (3) Depreciate Machinery by 10% and Patents by 20%; (4) Wages include a sum of ₹ 20,000 spent on the erection of a cycle shed for employees and customers; (5) Salaries for the month of March, 2015 amounting to ₹ 15,000 were unpaid; (6) Insurance includes a premium of ₹ 1,700 on a policy, expiring on 30 September, 2015.

7. The Trial Balance of M/s R.S. Corporation as on December 31, 2014 was as under :

Particulars	Dr. (₹)	Cr. (₹)	Particulars	Dr. (₹)	Cr. (₹)
Rajeev's Capital A/c		80,000	Bad debts	300	
Suresh's Capital A/c		1,00,000	Bills payable		12,000
Stock as on 1.1.2014			Discount		500
Raw materials	2,500		Land and Building	90,000	
Finished goods	6,500		Plant and machinery	70,000	
Purchases	64,500		Furniture	1,000	
Sales		1,19,000	Sundry Debtors	25,400	
Sales returns	2,000		Sundry Creditors		42,000
Wages	16,000		Drawings :		
Manufacturing expenses	12,000		Rajeev	1,800	
Salaries	8,000		Suresh	1,400	
Insurance	1,500		Cash in hand	500	
Postage	100		Cash at bank	49,000	
Advertisement	1,000		**TOTAL**	3,53,500	3,53,500

Rajeev and Suresh share profits and losses equally. Prepare Trading, Profit & Loss Account for the year ended 31st December 2014, and also the Balance Sheet as on that date after taking into consideration the following adjustments:

1. Stock on 31st December, 2014 : Raw materials ₹ 4,000; Finished goods ₹ 12,000.
2. Provide depreciation on land and building @ 5%; on furniture @ 10%; and on plant & machinery @ 5%.
3. Outstanding expenses : Salaries ₹ 1,500; Wages ₹ 2,100.
4. Insurance paid for 15 months upto March, 2015.
5. Write-off bad debts of ₹ 400
6. Reserve for doubtful debts @ 5% of Debtors.
7. Goods withdrawn by Rajeev for personal use ₹ 2,000.

8. A and B are partners sharing profits in proportion to their capitals. At the close of their financial year on 30th September, 2013, the following balances stood to the credit of the partners.

Capital Accounts: A — ₹ 20,000; B — ₹ 5,000 Current Accounts: A — ₹ 1,060; B — ₹ 2,800

The partnership deed provides :

(a) B shall be credited with a partnership salary of ₹ 1,000 per annum for running business;
(b) B shall be entitled to a commission of 10% of the divisible profit before charging such commission;
(c) Interest at 5% per annum to be allowed on Capital and Current Accounts.
(d) The partners drawings were : A — ₹ 10,000; B — ₹ 3,000
(e) The interest to be charged on such drawings were : A — ₹ 330; B — ₹ 80.

In addition to the entries necessary to record the above particulars, the following balances were extracted from the books of the firm as on 30th September, 2014:

Particulars	₹	Particulars	₹
Freehold premises	15,000	Machinery and plant — balance at the beginning	13,280
Sundry creditors	24,150	Machinery — additions	1,560
Advertising	4,339	Motor vans	900
Office salaries	2,189	Factory expenses paid in advance	70
Sundry Debtors	16,020	Cash at bank	2,841
Office expenses	622	Cash in hand	31
Insurance	364	Mortgage on freehold premises at 6% per annum	10,000
Delivery expenses	2,203	Office furniture	300
Stock	21,069	Mortgage interest	450
Provision for doubtful debts — as on 30.9.2014	600	Patents	4,000
Trading Account credit balance	34,628		

You are required to prepare a Profit & Loss Account for the year ended 30th September, 2014, and the Balance Sheet as on that date.

Mr A's capital		2,88,600	General expenses	14,000	
Drawings	4,000		Carriage inwards	10,000	
Rates and taxes	5,000		Carriage outwards	22,000	
Salaries	32,000		Wages	20,000	
Postage and telephone	11,500		Outstanding liability for expenses	11,000	
Salesmen's commission	35,000		Sundry creditors		40,000
Insurance	9,000		Sundry debtors	1,00,000	
Advertisement	17,000		**TOTAL**	7,43,600	7,43,600

You are requested to prepare Trading and Profit and Loss Account for the year ended 31st March, 2015 and the Balance Sheet as on that date. You are also given the following further information :

(a) Cost of goods in stock as on 31st March, 2015 — ₹ 1,45,000;
(b) Mr A had withdrawn goods worth ₹ 5,000 during the year;
(c) Printing and stationery expenses of ₹ 11,000 relating to 2013-14 accounting year had not been provided in that year but was paid in this year by debiting outstanding liabilities;
(d) Purchases include purchase of furniture worth ₹ 10,000;
(e) Debtors include ₹ 5,000 bad debts;
(f) Creditors include a balance of ₹ 4,000 to the credit of L.M. Corporation in respect of which it has been decided and settled with the party to pay only ₹ 1,000;
(g) Sales include goods worth ₹ 15,000 sent out to S.M. & Co on approval and remained unsold as on 31st March, 2015. The cost of the goods was ₹ 10,000;
(h) Provision for bad debts is to be created at 5% on Sundry debtors;
(i) Depreciation on furniture and fittings by 10%; motor car by 20%;
(j) The salesmen are entitled to a commission of 10% on total sales.
(k) The purchase department has informed the accounts department that it is in possession of a number of free samples given to them by the potential suppliers. Their estimated value at purchase cost is ₹ 5,000. They were not included in the stock referred to (a) above.

11. Hari Singh has extracted the following Trial Balance from his books as on March 31, 2015 :

	Dr. (₹)	Cr. (₹)		Dr. (₹)	Cr. (₹)
Drawings	16,000		Electricity	6,000	
Cash	6,760		Motor car	10,240	
Petty cash	1,000		Advertising	9,000	
Leasehold land	20,000		Sundry creditors		35,000
Opening stock at market value	50,000		Purchases / Sales	4,00,000	6,00,000
Salary	12,000		Postage and telephone	3,000	
Sundry debtors	50,000		Discount	11,400	
Wages	40,000		General charges	4,000	
Bank	21,000		Petty cash expenses	9,600	
Capital		34,000	Suspense		10,000
Rent	9,000		**TOTAL**	6,79,000	6,79,000

You are required to prepare a Trading, Profit and Loss Account and the Balance Sheet using the following information:

(a) Closing stock as on 31st March, 2015 amounted to ₹ 76,000 at cost. A review of inventory items revealed the need for some adjustments for the following :
Items which had cost ₹ 8,000 and which would normally sell for ₹ 12,000 were found to have deteriorated. Remedial work costing ₹ 2,000 would be needed to enable the item to be sold for ₹ 9,000.
(b) The petty cash balance represents the month-end imprest amount. As on the closing date, the petty cashier had vouchers totalling to ₹ 400 for which he had not received reimbursement from the main cashier.
(c) Discounts allowed amounting to ₹ 1,000 had been posted to the debit of Sundry Debtors.
(d) Cash withdrawn from bank ₹ 4,000 had not been entered in the bank column of the cash book.
(e) Sales Account had been undercast on the credit side by ₹ 4,000.
(f) The motor car which had been purchased in 2012-13 was being depreciated at 20% on the reducing balance method. The original cost of the car is ₹ 20,000. It is now decided to charge depreciation at 6% on the straight line method and to make the change effective from the year of purchase of the car.
(g) The leasehold land was purchased during the year. On the date of purchase the unexpired period of the lease was 5 years.
(h) No entry had been passed in the books for stock withdrawn from the business by the proprietor ₹ 10,000.
(i) Telephone bills amounting to ₹ 1,000 remained unpaid.

12. Mr X, a trader, has extracted the following Trial Balance from his books as on 31st March, 2015 :

	Dr. (₹)	Cr. (₹)		Dr. (₹)	Cr. (₹)
Purchases	4,00,000		Claim recoverable	5,000	
Sundry debtors	1,50,000		Research and Development	9,000	
Cash in hand	4,000		Furniture and fittings	23,000	
Cash at bank	8,000		Deposit with supplier	6,000	
Rent, rates and taxes	3,000		Office equipment	10,000	
Insurance premium	9,000		Bills receivable	6,000	
Salaries	42,000		Bad debts	4,000	
Carriage outwards	21,000		Sales		7,00,000
Carriage inwards	18,000		Opening stock	30,000	
Sundry creditors		50,000	Electricity expenses	2,000	
			TOTAL	7,50,000	7,50,000

The following further information is provided :

1. A purchase invoice for ₹ 15,000, received from a creditor, has not been entered through oversight.
2. The claim recoverable has been settled with the insurance company for ₹ 2,000.
3. Break-up for Research and Development is ₹ 3,000 reserach and ₹ 6,000 development. It has been decided to amortise it over a period of 4 years.
4. Depreciation is to be provided on straight-line method on furniture and fittings and office equipment at 5%. The original costs were : Furniture and fittings ₹ 30,000; Office equipment ₹ 15,000.
5. Goods costing ₹ 5,000 were despatched out on 29th March. The sale, however, took place on 2nd April, 2015, when an invoice for ₹ 7,500 was raised against the customer.
6. Insurance premium includes a prepaid amount of ₹ 1,000.
7. The deposit with a supplier was made on 1st October, 2014. It carried interest @ 12% p.a.
8. Two bills receivable from customers of ₹ 700 and ₹ 1,300, were dishonoured on 30th March. These had earlier been discounted with the bank.
9. Provide 2% on sundry debtors for doubtful debts.
10. Physical stock of goods on hand on 31st March, 2015 at cost was ₹ 1,00,000.

Prepare Trading, Profit and Loss Account and the Balance Sheet from the above information.

13. The following are the closing balance as on 31.12.2014 extracted from the books of Mr Mehta. Prepare the Trading and Profit and Loss Account for the year ending 31.12.2014 and the Balance Sheet as on that date after making the necessary adjustments :

	₹		₹
Mr Mehta's Capital Account	1,65,000	Interest received from A.N. Sen	400
Stock on January 1, 2014	70,200	Cash at bank	12,000
Sales	4,34,400	Discounts received	6,300
Purchases	3,64,650	Investment	7,500
Carriage inwards	27,900	Furniture and fittings	2,700
Rent and rates	8,550	Discounts paid	11,310
Sales returns	12,900	General expenses	6,000
Salaries	13,950	Audit fees	1,050
Purchases returns	8,700	Insurance	900
Sundry debtors	36,000	Travelling expenses	3,500
Sundry creditors	26,350	Postage and telegrams	4,070
Bank loan at 6% (1.1.2014)	30,000	Cash in hand	570
Interest paid on above	1,350	Deposit with Mr A N Sen (1.1.2014) Interest @ 9%	45,000
Printing and advertising	21,900	Drawings Account : Mr Mehta	15,000
Motor Van, at cost	8,000	Disposal of Motor Van	250
Provision for Depreciation on motor van at 31.12.2013	3,600		

Adjustments :

(a) Stock as on December 31, 2014 was ₹ 1,20,000.

(b) Sundry Debtors included a sum of ₹ 3,000 due from Mr Nair and Sundry creditors included a sum of ₹ 4,000 due to Mr Nair.

(c) (i) During 2014 a motor van which was purchased during 2006 for ₹ 1,000, was sold for ₹ 250. The only entry which has been made is to credit the ₹ 250 to Disposal of Motor Van Account.

(ii) Depreciation has been and is to be charged on motor van at 20% of cost. A full year's depreciation is charged in the year of purchase none in the year of sale.

(d) Provide 5% for bad debts and 2% on the balance for discount for prompt payment.
(e) Write off depreciation at 10% of furniture and fittings. Depreciation in respect of items sold off during the year need not to be provided.
(f) As on December 31, 2014 salaries and carriage inwards that remain unpaid were ₹ 1,200 and ₹ 150 respectively.
(g) Insurance paid in advance as on 31.12.2014 was ₹ 120.
(h) Furniture of the book value of ₹ 900 as on 1.1.2014 had been disposed off for ₹ 500 on 30.6.2014. The sale proceeds had been credited to the Furniture Account but the loss on sale of furniture had not been written off in the books.
(i) Furniture purchased for ₹ 1,000 on 1.1.2014 had been debited in the Purchases Account.
(j) Purchases to the value of ₹ 1,800 had been omitted from the books.
(k) Personal purchase of ₹ 700 made by Mr Mehta had been included in the purchase.
(l) Provide for interest on: (i) the Deposits with Mr A N Sen; and (ii) Bank loan.

14. The books of Mr X, a trader in tea, showed the following balances as on 31st March, 2015 :

	₹		₹
Opening stock of tea	1,00,000	Commission to sales manager	32,400
Purchases : Tea	4,00,000	Furniture and fittings	35,000
Salaries paid	80,000	Airconditioners	30,000
Buildings	95,000	Sundry debtors	1,00,000
Cash in hand	2,000	Sundry creditors	80,000
Cash at bank	1,35,000	Loan on mortgage	70,000
Rent, rates and taxes	15,000	Interest paid on above	3,000
Insurance premium paid	3,000	Prepaid expenses	4,000
Miscellaneous receipts	10,000	Drawings	18,000
Sales	7,20,000	Bills payable	30,000
Cash discount allowed	4,750	Bank charges	2,000
Bad debts	3,250	Legal charges	6,000
Repairs — Buildings	2,900	Motor vehicles	80,000
Miscellaneous expenses	8,700	Travelling and conveyance	10,000
Advertisement	20,000	Capital	2,80,000

The following further information was obtained :

1. Closing stock ₹ 55,000.
2. Legal charges include ₹ 5,000 for cost of stamps and registration of new building acquired during the year.
3. Purchases include 4,000 kg tea valued at ₹ 20,000 which was found totally spoiled. Insurance claim lodged in this respect is expected to realise ₹ 15,000.
4. Travelling and conveyance include proprietor's personal travelling for which he is to be charged with ₹ 4,800.
5. Loan on mortgage bears interest at 12% p.a.. The loan was taken on 1st June, 2014. One instalment of ₹ 10,000 was repaid on 1st December, 2014.
6. The sales manager is entitled to a commission of 7.5% of total sales. However, the actual bad debts incurred during the year is deductible from such commission entitlements.
7. Debtors include : (a) ₹ 10,000 due from M. & Co. (creditors include ₹ 18,000 due to the same party); (b) ₹ 5,000 due on account of sale of furniture; (c) Bad debts of ₹ 2,000;
8. Provision for bad debts is to be created at 2% of net outstanding debtors.
9. Depreciation is chargeable as follows : (a) Buildings at 2.5%; (b) Furniture and fittings at 10%; (c) Airconditioners at 15%; (d) Motor vehicles at 20%.
10. Miscellaneous receipts represent sale proceeds of furniture, written down value of which was ₹ 12,000.
11. Prepaid expenses include insurance premium of ₹ 1,000 for period from 1st April, 2014 to 30th September, 2014 paid in 2013-14.
12. Bills payable include a bill of ₹ 10,000 which fell due on 31st March, 2015 and was paid by the bank as per standing instructions. The bank charges in this connection amounted to ₹ 100.
13. The balance as per bank as on 31st March, 2015 was ₹ 1,24,900.

Prepare Trading and Profit and Loss Account for the year ended on 31st March, 2015 and the Balance Sheet as on that date from the above information.

15. Padmanabhan, who commenced business as a retail trader on January 1, 2014 extracted the following balances as on 31st December, 2014 :

	₹		₹
Capital A/c	6,00,000	Establishment charges	20,000
Drawings A/c	12,000	Electricity charges	6,575
Building A/c	2,00,000	Postage and telegram	1,284

Furniture and fitting	30,000	Travelling and conveyance	3,816
Depreciation reserve — Buildings	10,000	Advance for salesman's commission	1,000
Depreciation reserve — Furniture	3,000	Insurance	2,500
Depreciation for the year	13,000	Rent received	12,000
Purchases	4,00,000	Motor van (purchased on 1.1.2014)	80,000
Sundry creditors	40,000	Motor van maintenance	23,425
Sales	5,00,000	Fixed deposit (deposited on 1.9.2014)	1,00,000
Sundry debtors	1,20,000	Cash in hand	1,823
Cash at bank	1,47,977		

In view of the difference in Trial Balance, an examination of the books was conducted which revealed the following errors :

(i) ₹ 25 conveyance paid was debited to Motor Van Maintenance Account;
(ii) ₹ 2,000 drawn from bank towards establishment charges for November, was omitted to be posted into ledger.
(iii) The cash column in the cash book on the receipts side, stands excess totalled by ₹ 400.

You are required to prepare Trading and Profit and Loss Account for the year 2014 and a Balance Sheet at the end of the year after taking into consideration the under noted adjustments :

1. Establishment charges have been paid only upto November and provision of ₹ 2,000 has to be made for December.
2. Electricity charges are outstanding to the tune of ₹ 25.
3. 1/2% commission on total sales is payable to the salesman towards which ₹ 1,000 has been paid as advance.
4. Fixed deposit earns interest @ 9% p.a.
5. Provide depreciation @ 20% p.a. on motor van.
6. Closing stock as on 31.12.2014 ₹ 1,00,000.

16. From the following Trial Balance of R. Ramnath as at September 30, 2014 you are required to prepare a Trading and Profit and Loss Account for the year ending September 30, 2014 and a Balance Sheet as on that date, after making the necessary adjustments :

	Dr. (₹)	Cr. (₹)		Dr. (₹)	Cr. (₹)
R. Ramnath — Capital A/c		1,00,000	Printing and stationery	500	
R. Ramnath — Drawings	12,000		Insurance charges	1,000	
Land and buildings	60,000		Provision for doubtful debts		1,000
Plant and machinery	20,000		Provision for discounts on debtors		380
Furniture and fixtures	5,000		Bad debts	400	
Leasehold premises (lease to run for 5 years from 1.10.2014)	30,000		Profit of textiles department		10,000
Sales		1,40,000	Stock of general goods on 1.10.2014	21,300	
Returns outwards		4,000	Salaries and wages	18,500	
Sundry debtors	18,400		Sundry creditors	12,000	
Loan from D. Das @ 6% taken on 1.1.2014		30,000	Trade expenses	800	
Purchases	80,000		Stock of textiles goods on 30.9.2014	8,000	
Returns inwards	5,000		Cash at bank	4,600	
Freight and duty	10,000		Cash in hand	1,280	
Sundry expenses	600		**TOTAL**	2,97,380	2,97,380

Adjustments :

(a) The stock on hand on September 30, 2014 was valued at ₹ 27,300.
(b) On September 23, 2014 a fire broke out and destroyed stock of the value of ₹ 10,000. The insurance company admitted the claim for loss of stock to the value of ₹ 6,000 only, and paid the amount on October 10, 2014.
(c) Of the Sundry Debtors ₹ 400 are bad and should be written-off. The Provison for doubtful debts should be maintained at 5% on Debtors and the provision for discount on debtors at 2%. Also maintain a reserve for discount on creditors at 2%.
(d) Goods of the value of ₹ 6,000 has been received on September 27, 2014 but the purchase invoice was omitted from the Purchase Book.
(e) Ramnath had utilised goods of the value of ₹ 2,000 for his personal use, but no record was made of it.
(f) Depreciate land and buildings at 2%, plant and machinery at 20% and furniture and fixtures at 5%.
(g) Prepaid insurance was ₹ 200.

17. From the following Trial Balance and accompanying adjustments of Jailal Billu & Sons, prepare Trading and Profit and Loss Account for the year ended 31st December, 2014 and a Balance Sheet as on that date :

	₹		₹
Plant and machinery	10,000	Sales	2,00,000
Purchases *less* returns	90,000	Capital	80,000
Factory building	50,000	Interest on income tax paid in advance	400
Wages	10,000	Suspense A/c of Choti Lal	30,000
Fuel and power	2,000	Interest received in advance	3,600
Commission paid to purchase manager	1,000	Creditors	15,000
Insurance and taxes	4,000		
Life insurance	1,000		
Goodwill	30,000		
Debtors	70,000		
Bad debts	1,000		
Income tax advance payment	4,000		
Income tax	10,000		
Cash in hand and at bank	15,000		
Stock on 31.12.2014	20,000		
Suspense A/c of Moti Lal	10,000		
Commission paid in advance	1,000		
	3,29,000		3,29,000

Additional information :

1. On investigation, it was found that goods costing ₹ 40,000 were sent to Choti Lal under consignment; 3/4ths of the goods were sold by him for ₹ 60,000. Remaining stock was valued at cost. A cheque of ₹ 30,000 was received from Choti Lal. Entry for cash received was passed and credited to his Suspense Account. Commission of 5% on sale is payable to Choti Lal.
2. Similarly, a joint venture agreement was made with Moti Lal for which an advance of ₹ 10,000 was entered. It is now ascertained that venture earned a profit of ₹ 6,000 of which Jailal Billu & Sons are entitled to get 2/3rd share.
3. Debtors included an amount due from Chandi Ram ₹ 2,000 and creditors included amount due to Chandi Ram ₹ 3,000.
4. Purchases included purchase of materials used for the building for ₹ 2,000.
5. During the year a new plant was erected and firm's own man had spent time thereon amounting to ₹ 200. The amount was included in Wages Account.
6. Goods costing ₹ 600 (sales price ₹ 900) were sent on approval on 28th December and recorded as sale, but no consent has been received up to 31st December.
7. Make provision for doubtful debts at 5% and depreciate plant at 10% and building at 5%.

18. R retired from a company and started a business in Madras. On retirement, he got ₹ 1,00,000 from his employer which he invested in his business on 1.4.2014. He got from Life Insurance Corporation ₹ 20,000 on maturity of his policy which he also invested in his business. He draws ₹ 1,000 for his personal expenses every month from 30th April, 2014. The following figures are extracted from his books on 31st December, 2014 :

	₹		₹
Purchases	3,10,000	Bad debts	2,000
Cartage	5,000	Sundry debtors	45,000
Salaries and wages	24,000	Bills receivable	30,000
Electricity charges	4,500	Cash in hand	7,997
Travelling	8,900	Sales	3,00,000
Telephone	4,300	Income from personal investment	20,000
Advertisement	10,000	Creditors	85,000
Repairs and renewals	3,303	Bank overdraft	80,000
Plant and machinery	1,50,000	Building (Cr)	10,000

You are requested to prepare a Trading and Profit and Loss Account of the business for the period ended 31st December, 2014 and also the Balance Sheet as on that date after taking into consideration the following further information :

1. Purchase include ₹ 10,000 representing the value of furniture purchased.
2. ₹ 4,000 representing erection wages on plant and machinery was debited to salaries and wages.
3. Electricity charges include ₹ 2,500 paid as deposits to Electric Supply Company. There are bills outstanding to the extent of ₹ 500.
4. Advertisement includes ₹ 4,000 representing the cost of a neon sign.
5. A dishonoured bill of ₹ 5,000 stands debited to the debtor. 50% thereof considered doubtful and has to be provided accordingly.

6. A debtor for ₹ 1,000 was declared insolvent on 30th December, 2014, and it is expected that nothing would be recovered from his estate.
7. Provide 5% discount on net realisable debtors.
8. R received ₹ 25,000 in respect of a business with B. The sum received stood credited to sundry creditors. It is noted that, a sum of ₹ 5,000 was due to R as his share of profit from that business.
9. During the period there was a fire damaging stock costing ₹ 50,000. The damaged goods were sold for ₹ 20,000.
   This sum of ₹ 20,000 is included in sales. The insurance company paid ₹ 25,000 towards the loss of stock. The godown containing the stock was also damaged to the extent of ₹ 15,000, which has also been paid by the insurance company.
   The total amount received from the insurance company was credited to Building Account.
10. The bank overdraft was given on the hypothecation of stock-in-trade. You are informed that the bank had a margin of $33^1/_3$% and the overdraft balance on 31st December, 2014, was the maximum which could have been drawn on the basis of this margin.
11. The manager of the business is entitled to a commission of 10% of net profit after charging such commission.
12. Provide 10% depreciation on plant and machinery and on furniture and fittings and 5% on building. Depreciation to be provided on closing balance.

19. Mr Reddy, a retired government official who started business in Calcutta on 1st April, 2014, gives you the following balances relating to the year ending 31st March, 2015 :

	₹		₹
Sundry Debtors	84,000	Salaries	18,910
Sundry creditors	38,000	Suspense A/c (Dr.)	3,000
Stock in trade (1.4.2014)	40,000	Bad debts	1,200
Machineries	56,000	Reserve for doubtful debts	3,200
Furniture	8,500	Purchases	4,95,000
Bills receivable	4,900	Sales	6,76,000
Bills payable	3,700	Printing charges	2,300
Building rent	9,600	Postage	1,500
Cash in hand	4,250	Travelling expenses	7,900
Cash at bank	17,394	Telephone	1,600
Drawings	12,000	Miscellaneous expenses	41,806
Capital A/c (Cr)	90,000	Insurance	1,040

Additional information :

1. An old furniture which stood at ₹ 1,200 in the books on 1st April, 2014 was disposed of at ₹ 580 on 30th September, 2014 in part exchange for a new furniture costing ₹ 1,040. A net invoice at ₹ 460 was passed through the Purchases Day Book.
2. Sales include ₹ 20,000 as hire purchases sale. Hire purchase sales prices are determined after adding $33^1/_3$ % to cost price. 40% of the instalments have not fell due as yet (profit or loss on H.P. sales is to be shown in Profit and Loss Account).
3. Suspense Account represents money advanced to sales manager who was sent to Delhi in August, 2014 for sales promotion. On returning to Calcutta he submitted a statement disclosing that ₹ 1,200 was incurred for travelling, ₹ 500 for legal expenses and ₹ 900 for miscellaneous expenses. The balance lying with him is yet to be refunded.
4. Mr Reddy desires to change the method of depreciation on machineries from straight line method (i.e. on original cost), to diminishing balance method with retrospective effect from April 2007 and adjust the difference in the accounting year 2014-15. The rate of depreciation will, however, remain unchanged.
5. Business is carried on in a rented house. The ground floor being 50% of the accommodation, is used for business. Mr Reddy lives with his family on the first floor.
6. Total bad debts for the period amounted to ₹ 2,000. Reserve for doubtful debt is to be maintained at 5% on outstanding debtors.
7. Insurance premium covers a period of one month in advance.
8. Depreciation on time basis is to be provided on machineries at 10% per annum as instructed and on furniture at 5% per annum on diminishing balance method.
9. Closing stock amounted to ₹ 50,000.

Prepare Mr Reddy's Trading and Profit and Loss Account for the year ended 31st March, 2015 and a Balance Sheet as on that date after taking into consideration the above-mentioned information.

20. Mr Gavaskar is the proprietor of a large business. The following Trial Balance was prepared from his book as on 31st March, 2015.

	₹		₹
Land and Building	40,000	12% Bank Loan (S.B.I.)	
Cash at bank	25,000	(No movement during the year)	50,000
Motor car	20,000	Capital of Gavaskar	75,000
Furniture	10,000	Bills payable	5,000
Sundry Debtors	60,000	Sundry Creditors	65,000
Cash in hand	5,000	Returns outwards	4,000
Stock (1.4.2014)	55,000	Discount received	1,000
Returns inwards	5,000	Sales	4,50,000
Printing and Stationery	2,000		
Drawings	8,000		
Bills receivable	5,000		
Travelling expenses	6,000		
Discount allowed	2,000		
Miscellaneous expenses	19,000		
Postage	1,000		
Joint Venture Suspense A/c	1,000		
Investments (Market value ₹ 14,000)	15,000		
Interest on Bank Loan	4,000		
Salaries (including Advance for ₹ 2,000)	27,000		
Entertainment expenses	2,000		
Purchases	3,25,000		
Carriage inwards	4,000		
Advertisements	9,000		
	6,50,000		6,50,000

Additional Information:

1. On 1st October, 2014 Mr Gavaskar entered into a joint venture with Mr Kapil with an agreement to share the profits and losses equally. Kapil supplied goods totalling ₹ 30,000 which wrongly passed through the Purchase Day Book.
   The goods were sold for cash at a profit of 25% on sales and stood credited to Sales Account. Kapil had earlier incurred amount of ₹ 2,000 on account of Freight and Insurance. Joint Venture Suspense Account represents expenses incurred by Gavaskar on Joint Venture.
2. Bills Receivable for ₹ 4,000 endorsed on 21st December, 2014 in favour of creditors were subsequently dishonoured but no entry for the dishonoured has been passed.
3. Three cheques of ₹ 1,500, ₹ 2,000 and ₹ 3,000 issued to parties on 30th March, 2015, were lying unpresented on 31st March, 2015.
4. Sales included a sum of ₹ 30,000 received from sale of goods on behalf of Mr Salvey. The cost of these goods to Mr Salvey was ₹ 25,000, Mr Gavaskar is entitled to a commission of 5% on Sales, for which effect should be given, and reimbursement of selling expenses of ₹ 1,000 were debited to Miscellaneous Expenses Account.
5. 1/3rd of the advertisement expenses are to be carried forward.
6. Of the Debtors a sum of ₹ 1,000 is to be written-off as bad debt.
   Create provision for doubtful debts @ 2%.
7. Depreciate Fixed Assets by 10% except Motor car which is to be depreciated at 20%.
8. Stock at the end ₹ 45,000.
9. During the year some goods (invoiced at ₹ 10,000) were sent to sundry customers on sale or approval.
   On 31st March, 2015 of these goods remained with customers as the period of approval did not expire as yet. Proper adjustment should be made in respect of the above.
   Mr Gavaskar makes his invoices at cost plus 25%.

You are required to prepare Trading and Profit and Loss Account for the year ended 31st March, 2015 and a Balance Sheet as on that date.

Rectification of Errors

Introduction

Errors are unintentional misstatements or omission of amounts or disclosures in financial statements. They include mistakes in gathering or processing accounting data from which financial statements are prepared. Errors can also result from incorrect accounting estimates arising from oversight or misinterpretation of facts, and mistakes in the application of accounting principles relating to account classification, manner of presentation or disclosure.

Therefore, accounting errors result from mistakes or omissions in the financial accounting process. Typical errors include (i) Mathematical mistakes; (ii) Mistake in the application of accounting principles; (iii) Oversight; and (iv) Misuse of facts.

Students are advised to reread carefully Chapter 4 (Errors Revealed and Not Revealed By Trial Balance and Types of Errors).

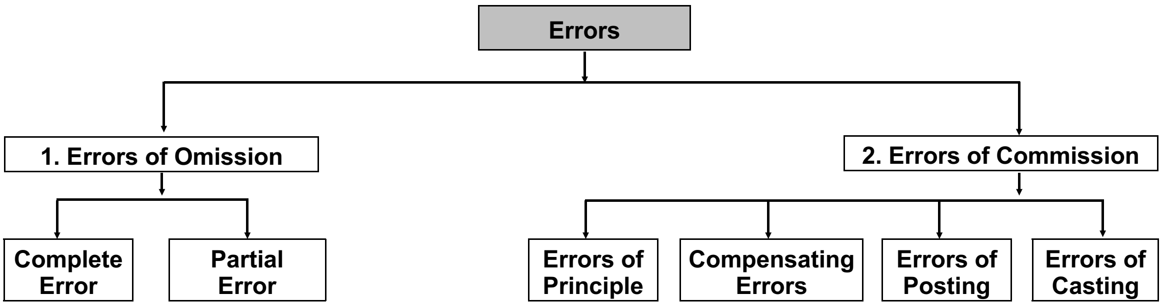
When errors are detected, it is necessary to analyse them to determine what action is appropriate under the circumstances. Since the Trial Balance is prepared to ensure that there is no mathematical error in recording ledger entries or in adding or balancing the accounts, the first step in the process of locating errors is to find out the difference in the Trial Balance totals.

Whenever a Trial Balance disagrees, it indicates that an error has been committed, which must be located and rectified. If the location and rectification of errors takes time and, in the meanwhile, the Trial Balance can not be allowed to remain out of balance, a new account—'Suspense Account' is opened in the Ledger and the difference in Trial Balance is transferred to that account, and the Trial Balance can thus be totalled up and balanced. Afterwards when the errors are located, those can be rectified through the Suspense Account.

Types of Errors

Before explaining how errors are located and rectified, we should know the kinds of errors that usually occur in the books of account. These errors can broadly be divided into two classes —

1. Errors of Omission; and
2. Errors of Commission.



1. Errors of Omission

Errors of omission are errors resulting from the complete failure to enter a transaction in the books. Such errors creep in as a result of some act of omission on the part of the person responsible for the maintenance of the books of account. These errors can further be classified into: (a) Complete error; and (b) Partial error.

(a) Complete Error : When any particular transaction has not at all been entered in the Journal or a book of original entry, it cannot be posted into the Ledger , and a 'complete error of omission' will occur. A complete error will affect both the debit and the credit side of the entry and it will not hamper the agreement of the Trial Balance. Instances of complete errors are :

(i) A receipt of ₹ 1,000 from Ravi is omitted from being entered in the Cash Book.
(ii) Goods sold to Ramesh on credit for ₹ 500 has not been entered in the 'Sales Day Book'.

(b) Partial Error : If a transaction has been journalised or recorded in a subsidiary book but has not been posted in both the Ledger Accounts, it will be an error of partial omission and it will not hamper the agreement of the Trial Balance. For example, discount allowed to a customer has not been debited to 'Discount Allowed Account' in the General Ledger and has also not been credited to Customer Account in the Customer Ledger.

2. Errors of Commission

These errors are the result of some positive act of commission on the part of the person responsible for the maintenance of the books of account. For example, if wrong accounts are entered either in the Journal or in the Ledger, or when the totals are wrongly made, or when the posting is done to wrong accounts, errors of commission are occurred. Errors of commission may further be classified into :

(a) Errors of Principle : These errors arise because of an incorrect application of the principles of accounting, and failure to differentiate between capital and revenue expenditure. Their existence are not usually disclosed by the Trial Balance. Instances of errors of principle are:

(i) Wages paid for the installation of machinery debited to Wages Account. Here, Machinery Account should be debited in place of Wages Account.
(ii) A purchase of furniture passed through the Purchases Day Book. Here, Furniture Account should be debited in place of Purchases Account.

(b) Compensating Errors : These are a group of errors, the total effect of which are not reflected in the Trial Balance. These errors are of a neutralizing nature. One error is compensated by the other error or errors of an opposite nature. For example, an extra debit in Salary Account for ₹ 100 may be compensated by an extra credit of ₹ 100 in Sales Account.

Neither the original error nor the compensating error will thus be detected by a failure to balance, since one error conceals another error. The point to note is that there is no connection between an error and its compensating error other than the coincidence that they are equal and opposite in amount.

(c) Errors of Posting : If a transaction has been journalised or recorded in a subsidiary book but has been posted wrongly in the Ledger Account, it is an error of posting. The following are examples of errors of posting:

(a) Goods sold to Ram on credit for ₹ 210 have been posted in Ram Account as ₹ 21.
(b) Goods purchased from Robin for ₹ 300 have been posted to Rahim Account.

(d) Errors of Casting : Casting is an accounting term for addition. These errors may occur due to short casting or excess casting in any subsidiary book or in any account in the Ledger. These errors are reflected in the Trial Balance unless it is compensated by other errors.

Opportunities may arise to detect and rectify errors in accounts in any of the following stages:

1. Before the preparation of the Trial Balance.
2. After the preparation of the Trial Balance but before the preparation of the Final Accounts.
3. After the preparation of the Final Accounts.

Procedure for correcting errors

The three questions which must be answered before an error can be corrected are :

1. What should have happened ?
2. What has happened ?
3. What action will correct the error ?

1. Rectification of errors before the preparation of the Trial Balance

When errors are detected before the preparation of the Trial Balance, it should be assessed whether they are one-sided errors or two-sided errors. According to the nature of errors, different steps are taken for their rectification.

(a) One-sided errors: For rectification of these types of errors, no journal entry is required to be passed. Only the relevant account in the Ledger is to be debited (for short debit or excess credit) or to be credited (for short credit or excess debit), according to the situation. The following illustrations are self-explanatory.

Illustration 1

Purchases Day Book was cast ₹ 1,500 in place of ₹ 2,000. It means Purchases Account has been debited ₹ 500 short. Therefore, to rectify, the Purchases Account should be debited further by ₹ 500. The following shows it more clearly.

Dr. **Purchases Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Sundry Creditors A/c To Sundry Creditors A/c (Error in casting)	1,500 500			

It is assumed that Individual Creditors' Account is maintained in the General Ledger.

Illustration 2

Sales Day Book was cast ₹ 2,000 in place of ₹ 1,800. It means Sales Account has received excess credit for ₹ 200. Therefore, to rectify, the Sales Account should be debited by ₹ 200.

Dr. **Sales Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Sundry Debtors A/c (Error in casting)	200		By Sundry Debtors A/c	2,000

It is assumed that Individual Debtors' Account is maintained in the General Ledger.

Illustration 3

Return Outward Book was cast ₹ 1,000 in place of ₹ 1,600. It means that Return Outward Account has been credited ₹ 600 short. Therefore, to rectify, the Return Outward Account is to be credited further with ₹ 600.

Dr. **Return Outward Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
				By Sundry Creditors A/c By Sundry Creditors A/c (Error in casting)	1,000 600

It is assumed that Individual Creditors' Account is maintained in the General Ledger.

(b) Two-sided errors: For rectification of these types of errors, the following steps should be taken:

Step 1 Write down in the rough sheet the correct entry necessary for recording the transaction.

Step 2 Write down in the rough sheet the entry that has actually been passed.

Step 3 Pass in the Journal, the required entry to arrive at the correct entry of Step 1 and to cancel the entry of Step 2.

The following illustrations explain it more clearly:

Illustration 4

A purchase of ₹ 1,000 from Rahim entered in the Day Book as ₹ 100.

Solution

The Rectification of this error shall call for:

(a)	Purchases Account	Dr.	1,000		Correct entry
	To Rahim Account			1,000	
(b)	Purchases Account	Dr.	100		Entry as passed
	To Rahim Account			100	
(c)	*The rectifying entry in the journal will be* :				
	Purchases Account	Dr.	900		Rectifying entry
	To Rahim Account			900	

Illustration 5

A cash sales of ₹ 600 has completely been omitted to be recorded in the books.

Solution

The Rectification of this error shall call for:

(a)	Cash Account	Dr.	600		Correct entry
	To Sales Account			600	
(b)	Nil				Entry as passed
(c)	*The rectifying entry in the journal will be* :				
	Cash Account	Dr.	600		Rectifying entry
	To Sales Account			600	

Illustration 6

₹ 500 received from B. Sen entered as ₹ 300 in the Cash Book.

Solution

The Rectification of this error shall call for:

(a)	Cash Account	Dr.	500		Correct entry
	To B. Sen Account			500	
(b)	Cash Account	Dr.	300		Entry as passed
	To B. Sen Account			300	
(c)	*The rectifying entry in the journal will be* :				
	Cash Account	Dr.	200		Rectifying entry
	To B. Sen Account			200	

Illustration 7

The following errors have been detected before the preparation of the final Trial Balance. You are required to pass the journal entries, where necessary, or if no journal entry is required, state how they will be corrected:

(i) The Sales Day Book has been undercast by ₹ 800; (ii) The total of the discount column on the debit side of the Cash Book was cast short by ₹ 50. (iii) Repairs to Building charged to Building Account ₹ 500. (iv) Goods worth ₹ 645 sold to Zishan Ali, but the latter's account was credited with ₹ 654. (v) Wages paid for installation of the machinery debited to Wages Account ₹ 1,000.

Solution

(i) The total of Sales Day Book is credited to Sales Account in the Ledger. Here, Sales Day Book has been undercast by ₹ 800. It means that Sales Account has been under-credited by ₹ 800. This error can be corrected by crediting Sales Account further by ₹ 800 (After correcting the total of the Sales Day Book).

(ii) The discount column of the debit side of the Cash Book represents discount allowed. Here, it was cast short by ₹ 50. It means that the Discount Allowed Account was short-debited by ₹ 50. This error can be corrected by debiting Discount Allowed Account further by ₹ 50.

(iii) Repairs to building should be treated as revenue expenditure and it should be debited to Repairs Account in place of Building Account. So, to rectify the error, the following Journal entry should be passed:

Repairs Account	Dr.	₹ 500	
To Building Account			₹ 500

(iv) Goods have been sold to Zishan Ali for ₹ 645. His account should be debited but his account has actually been credited by ₹ 654. To rectify this error, Zishan's account should be debited by ₹ (645+654) = ₹ 1,299.

(v) Wages paid for installation of machinery should be debited to Machinery Account because it is a capital expenditure. So, to rectify, the following entry should be passed:

Machinery Account	Dr.	₹ 1,000	
To Wages Account			₹ 1,000

Illustration 8

Pass rectification entries for the following transactions:

1. A builder's bill for ₹ 4,600 for the erection of a small shed was debited to Repairs Account.
2. Repairs to plant amounting to ₹ 900 had been charged to Plant and Machinery Account.
3. Wages paid to the firm's workmen for making certain additions to machinery amounting to ₹ 340 were debited to Wages Account.
4. A cheque for ₹ 750 received from S Desai was credited to the account of R Ram.
5. Goods to the value of ₹ 700 returned by X were included in closing stock, but no entry was made in the books.
6. Goods costing ₹ 2,000 were purchased for various members of the staff and the cost was included in Purchases. A similar amount was deducted from the salaries of the staff members concerned and the net payments to them debited to Salaries Account.
7. A bill of exchange (received from Hari) for ₹ 3,000 had been returned by the Bank, with whom it had been discounted, as dishonoured and had been credited to Bank Account and debited to Bills Receivable Account.
8. Goods sold to Z for ₹ 475 have been wrongly entered in the Sales Book as ₹ 745.

Solution **Journal** **Dr.** **Cr.**

Date	Particulars		L.F.	₹	₹
1.	Building A/c	Dr.		4,600	
	To Repairs A/c				4,600
	(Being expenses for erection of a small shed had been wrongly debited to repairs account, in place of building account, now rectified)				
2.	Repairs A/c	Dr.		900	
	To Plant & Machinery A/c				900
	(Being repairs to Plant & Machinery had been wrongly charged to Plant & Machinery A/c, now rectified)				
3.	Plant & Machinery A/c	Dr.		340	
	To Wages A/c				340
	(Being wages paid for addition to machinery had been wrongly debited to Wages A/c in place of Machinery A/c, now rectified)				
4.	R. Ram A/c	Dr.		750	
	To S. Desai A/c				750
	(Being cheque from S. Desai wrongly credited to R. Ram, now rectified)				
5.	Return Inward A/c	Dr.		700	
	To X A/c				700
	(Being goods returned by X not recorded in the book, now rectified)				
6.	Salaries A/c	Dr.		2,000	
	To Purchases A/c				2,000
	(Being goods purchased for staff members not debited to Salaries A/c, now rectified)				
7.	Hari A/c	Dr.		3,000	
	To Bills Receivable A/c				3,000
	(Being bill accepted by Hari was dishonoured but wrongly debited to Bills Receivable A/c, now rectified)				
8.	Sales A/c (₹ 745 – 475)	Dr.		270	
	To Z A/c				270
	(Being sales to Z of ₹ 475 wrongly recorded in the sales book as ₹ 745, now rectified)				

2. Rectification of errors after the preparation of Trial Balance but before the preparation of Final Accounts

When errors are detected after the preparation of the Trial Balance, it should be rectified in the following manner:

(a) One-sided errors: Most of the one-sided errors will be rectified by passing a journal entry via Suspense Account.

Suspense Account

A Suspense Account is a Ledger Account in which entries are made on a temporary basis when the correct account cannot be immediately identified. This may be so because further information has to become available or while preparing the accounts, the accountant is unsure of how to proceed with it.It is opened in the following cases: (i) to balance a disagreed Trial Balance; (ii) to post doubtful items; and (iii) to record incomplete transactions.

(i) To Balance a Disagreed Trial Balance Sometimes, a Trial Balance does not tally despite all efforts; but one cannot wait indefinitely as accounts must be closed at the end of a financial year. In such a case, the amount of difference is entered in the lighter column against Suspense Account. ***The point to note is that no double entry will be possible.*** Later, when the mistakes are detected, the rectifying entries are passed.

(ii) To Post Doubtful Items Sometimes, an item cannot be posted to the correct account for one reason or another. For instance, you may receive a remittance of ₹ 1,500 but you may not know who has sent it. You then pass the following entry:

Journal **Dr. Cr.**

Date	Particulars		L.F.	₹	₹
	Cash A/c	Dr.		1,500	
	To Suspense A/c				1,500
	(Being remittance, received from unknown sender)				

Later, you get the information that Ram, Shyam & Co has sent this amount. Then you should pass the following entry:

Journal **Dr. Cr.**

Date	Particulars		L.F.	₹	₹
	Suspense A/c	Dr.		1,500	
	To Ram, Shyam & Co A/c				1,500
	(Being credit given to the sender for a remittance which had been credited previously to Suspense Account)				

(iii) To Record Incomplete Transactions Sometimes a Suspense Account is opened to record a balance that has not yet been finalised because a particular deal has not been concluded. For example, an advance of ₹ 10,000 received from X for the goods to be delivered in the future, subject to availability. A Suspense Account can include many transactions of this nature, without involving any error.

Now, the following illustrations show the way for rectification of one-sided errors:

Illustration 9

Goods worth ₹ 1,000 were sold to Mr R Sharma on credit. This was entered in the Sales Day Book, but was not posted into R Sharma Account.

Here, only Sales Account has been credited by ₹ 1,000 without a corresponding debit. In effect, the Trial Balance will show a short debit for ₹ 1,000. Now, if the difference in Trial Balance has been transferred to Suspense Account, it implies that Suspense Account has been debited by ₹ 1,000. For rectification, R Sharma Account is to be debited and Suspense Account is to be cancelled by crediting it. Therefore, the effective entry will be:

R Sharma Account	Dr.	1,000	
To Suspense Account			1,000

Illustration 10

Cash paid to Ram ₹ 400 was posted to the credit of his account as ₹ 440 from Cash Book.

Here, Cash Account has been credited by ₹ 400 without any debit and Ram Account has also been credited by ₹ 440 without corresponding debit. In effect, the Trial Balance will show a short debit of (₹ 400 + ₹ 440) ₹ 840. If the difference in account has been transferred to Suspense Account, it implies that Suspense Account has been debited by ₹ 840 to bring the Trial Balance in agreement. For rectification : (i) Ram Account should be debited by ₹ 840 so that he gets a net debit of ₹ 400; and (ii) The Suspense Account should also be cancelled.

The effective entry will be :

Ram Account	Dr.	840	
To Suspense Account			840

(b) Two-sided Error For rectification of two-sided errors, the following steps should be taken:

Step 1 Write down in the rough sheet the correct entry necessary for recording the transaction.

Step 2 Write down in the rough sheet the entry that has actually been passed.

Step 3 Pass in the Journal, the required entry to arrive at the correct entry of Step 1 and to cancel the entry of Step 2.

Illustration 11

Purchase of stationery for ₹ 400 has been recorded in the Cash Book as ₹ 40.

Solution

(a)	Stationery Account	Dr.	400		Correct entry
	To Cash Account			400	
(b)	Stationery Account	Dr.	40		Entry as passed
	To Cash Account			40	
(c)	*The rectifying entry in the journal will be* :				
	Stationery Account	Dr.	360		Rectifying entry

a) An inexperienced bookkeeper has drawn up a Trial Balance for the year ended 30th June, 2015 : Dr. Cr.

Heads of Accounts	₹	₹
Provision for Doubtful Debts	200	
Bank Overdraft	1,654	
Capital		4,591
Creditors		1,637
Debtors	2,983	
Discount Received	252	
Discount Allowed		733
Drawings	1,200	
Office Furniture	2,155	
General Expenses		829
Purchases	10,923	
Returns Inward		330
Rent & Rates	314	
Salaries	2,520	
Sales		16,882
Stock	2,418	
Provision for Depreciation on Furniture	364	
Total	24,983	25,002

Required : (a) Draw up a 'Corrected' Trial Balance, debiting or crediting any residual errors to a Suspense Account.
(b) Further investigation of the Suspense Account, ascertained in (a) above reveals the following errors:

(i) Goods bought from J Jones amounting to ₹ 13 had been posted to his account as ₹ 33.
(ii) Furniture which had cost ₹ 173 had been debited to the General Expenses Account.
(iii) An invoice from Suppliers Ltd., for ₹ 370 had been omitted from the Purchases Account, but credited to Suppliers Ltd. Account.
(iv) Sales on credit to A Hope Ltd, for ₹ 450 had been posted to the Sales Account, but not to A Hope Ltd Account.
(v) The balance on the Capital Account had been incorrectly brought forward in the Ledger, and should have been ₹ 4,291.
(vi) An amount of ₹ 86 received from A. Blunt, a debtor, in settlement of his account had been treated as a cash sale.
(vii) Discount allowed has been undertotalled by ₹ 35.

Required : Prepare Journal entries correcting each of the above errors and write up the Suspense Account.

At 31st March, 2015, the accountant of ABC & Co. has failed to balance his books of account. The difference has been carried to Suspense Account. Subsequently, the following errors are discovered before finalisation of account. Give journal entries to rectify these errors.

(a) Cash discount allowed for ₹ 600 and discount received for ₹ 400 have been posted to the wrong sides of the Discount Account in the ledger.

(b) An amount of ₹ 2,000 withdrawn by the proprietor for his personal use had been debited to Travelling Expenses Account.

(c) Return inward book was overcast by ₹ 300.

(d) A cheque for ₹ 3,456 received from Mr P after allowing him a discount of ₹ 46, was endorsed to Mr N in full settlement for ₹ 3,500. The cheque was finally dishonoured but no entries for dishonour were passed in the books.

Solution **In the books of ABC & Co.**

Journal **Dr.** **Cr.**

Date	Particulars		L.F.	₹	₹

Ravi Shastri could not agree the Trial Balance. He transferred to the Suspense Account amount of ₹ 296, being excess of the debit side total. The following errors were subsequently discovered:

(i) Sales Book was overcast by ₹ 300; (ii) Purchase of furniture for ₹ 615 passed through Purchase Book; (iii) An amount of ₹ 55 received from Yograj Singh was posted to his account as ₹ 550; (iv) Purchase Return Book total on a folio was carried forward as ₹ 221 instead of ₹ 112; (v) A cash sale of ₹ 1,235 duly entered in the Cash Book but posted to Sales Account as ₹ 235; and (vi) Rest of the difference was due to incorrect total in the Salaries Account in the Ledger. Give journal entries to rectify the above and prepare Suspense Account.

Solution

In the books of Ravi Shastri

The trial balance of Shri Govind shows a difference of ₹ 500, the credit side being in excess. The difference is subsequently found due to the following mistakes:

(a) The purchase of an office table costing ₹ 2,000 had been passed through the Purchases Day Book.

(b) A motor car had been purchased for ₹ 3,400. Cash had been correctly credited but the Motor Car Account had been debited with ₹ 3,140 only.

(c) Interest on deposits received ₹ 60 had been debited in the Cash Account, but had not been credited to the Interest Account.

(d) The balance in the account of Mr Rahim ₹ 100 had been written off as bad but no other account had been debited.

(e) A debit balance of ₹ 200 on the personal account of Mr John (correctly shown in the Ledger) had been omitted when extracting a Trial Balance.

Give the necessary journal entries and show the Suspense Account. ***[C.A. (Entrance) — Adapted]***

Ganesh drew a Trial Balance of his operations for the year ended 31.03.2015. There was a difference in the Trial Balance which he closed with a Suspense Account. On a scrutiny by the auditors, the following errors were found :

(i) Purchases Day Book for the month of April 2014 was undercast by ₹ 1,000.

(ii) Sales Day Book of October 2014 was overcast by ₹ 10,000.

(iii) A furniture purchased for ₹ 8,100 was entered in the Furniture Account as ₹ 810.

(iv) A bill for ₹ 10,000 drawn by Ganesh was not entered in the Bills Receivable Book.

(v) A machinery purchased for ₹ 10,000 was entered in the Purchases Day Book.

Pass necessary Journal Entries to rectify the same and ascertain the difference in the Trial Balance that was shown under the Suspense Account in respect of the above items.

Note: The balance in the Suspense Account indicates that there are other undetected errors in the books.

Illustration 21

At 31.12.2014, the accountant of TTC & Co has failed to balance the books of accounts. The difference has been carried to a Suspense Account. Subsequently, the following errors are discovered :

(a) The total of the Purchases Day Book for September has been posted in the Nominal Ledger as ₹ 3,850. The Day Book total is ₹ 3,580.

(b) Cash discounts allowed for the month of November ₹ 750, and discounts received ₹ 430 have been posted to the wrong sides of the Discount Account in the ledger.

(c) A return of goods by a customer ₹ 150 has been posted to the debit side in the Sales Ledger.

(d) A book debt of ₹ 260 due by Sujay Sen has been omitted from the list of Sales Ledger Balances.

(e) Cash drawings of the proprietor, amounting to ₹ 500, have not been posted to the ledger.

(f) An amount of ₹ 200, being insurance paid in advance in the previous year, had not been brought forward as an opening balance in the Insurance Account.

After the discovery and correction of errors mentioned, the book balanced.

You are required to :

(i) Prepare and complete the Suspense Account showing the requisite corrective entries in it. (Journal entries are not required but the appropriate names of the opposite accounts should be written in the Suspense Account).

(ii) State the incorrect total of the credit column of the Trial Balance, given that the incorrect total of the debit column was ₹ 1,37,560.

Effect of Rectification of Errors on Net Profit

Items	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	Total
Increase (₹)	—	—	1,500	—	700	1,000	—	—	—	980	4,180
Decrease (₹)	100	—	—	450	—	—	1,000	—	—	—	1,550
										Net Increase in Profit =	2,630

Illustration 23

The difference in Trial Balance is kept in Suspense Account. Before preparing the final accounts, the following errors were detected:

(a) Purchase for ₹ 540 was written in Sales Day Book, but was posted to the correct side of party's account.
(b) Salary Account total ₹12,600 on page 32 was carried over to the next page as ₹ 1,260 on the wrong side.
(c) Interest on overdraft ₹ 650 was not posted to the Ledger from the Cash Book.
(d) ₹ 600 collected from a party in respect of the old dues from him which had been written off as bad two years ago, was credited to the party's Account.

Show rectification entries and Suspense Account. State to what extent the Profit and Loss Account would have been affected if the above errors had not been detected and corrected.

Solution **Journal** **Dr. Cr.**

				Decrease in Net Profit =	14,990

Tutorial Note : When bad debt is recovered, Cash Account is debited and Bad Debt Recovery Account, is credited. At the end of the accounting period it is transferred to the credit side of the Profit and Loss Account.

Illustration 24

The Trial Balance of Tony Ltd at 31st December 2014 is as follows :

Heads of Accounts	Dr. (₹)	Cr. (₹)
Equity Share Capital — ₹ 10 each		1,00,000
Profit and Loss Account		1,90,000
Sales and Purchases	6,10,000	10,00,0000
Sales Returns and Purchases Returns	20,000	40,000
Debtors and Creditors	2,00,000	70,000
Land and Building (at cost)	4,00,000	
Plant (at cost and provision for depreciation on 1st January, 2014)	5,00,000	2,20,000
10% Debentures		3,00,000
Opening Stock	1,50,000	
Operating Expenses	90,000	
Administrative Expenses	70,000	
Selling Expenses	60,000	

Bank		80,000
Suspense Account		1,00,000
TOTAL	21,00,000	21,00,000

Additional information :

(1) 5,000 new shares were issued during the year at ₹ 16 per share. The proceeds have been credited to the Suspense Account.

(2) Sales returns of ₹ 10,000 have been entered in the sales day book as if they were sales.

(3) The book keeper has adjusted the opening provision for doubtful debts of ₹ 8,000 in the Selling Expenses Account in the Trial Balance.

(4) The remaining balance on the Suspense Account after the above, represents the sales proceeds of a fully depreciated item of plant, costing ₹ 1,00,000. No other entries (except bank) have made concerning this disposal.

You are required to pass necessary Journal Entries to rectify the above errors and also show the Suspense Account.

Illustration 25

You are presented with a Trial Balance of Saxena as on 30.6.2015, showing the credit is in excess by ₹ 415, which has been carried to Suspense Account. On close scrutiny of the books, the following errors are revealed:

(a) A cheque of ₹ 3,456 received from Sankar, after allowing him a discount of ₹ 46 was endorsed to Sharma in full settlement for ₹ 3,500. The cheque was finally dishonoured but no entries were passed in the books.

(b) Goods valued ₹ 230 returned by Swaminathan were entered in the Purchases Book and posted therefrom to Swaika's Account for ₹ 320.

(c) Bad debt amounting to ₹ 505 written-off during the year in Sales Ledger but were not recorded in the General Ledger

(d) Bill for ₹ 750 received from Sureka for repairs to machinery was entered in the Inward Invoice Book as ₹ 650.

(e) Goods worth ₹ 1,234 purchased from Sharaf on 29.6.2015 had been entered in the Purchase Day Book and credited to him but were not delivered till 5th July, 2015, stock being taken on 30.6.2015. The title of the goods was, however, passed on 29.6.2015.

(f) ₹ 79 paid for freight on machinery was debited to Freight Account as ₹ 97.

You are required to pass the necessary Journal entries for correcting the above errors.

Solution **In the books of Saxena**

Illustration 26

The bookkeeper of a firm having been unable to agree the Trial Balance, raised a Suspense Account, in which he entered the amount by which he was out of balance. The following errors were discovered:

(a) The addition of the analysis column in the tabular Purchases Journal posted to Goods Purchased for Resale Account was found to be ₹ 150 short, though the addition of the total column was correct.

(b) Goods bought from a supplier amounting to ₹ 77 had been posted to the credit of his account at ₹ 770.

(c) A dishonoured bill of exchange receivable for ₹ 1,600 returned by the firm's bank had been credited to the Bank Account and debited to the Bills Receivable Account. A cheque was received later from the customer for ₹ 1,600 and duly paid.

(d) An item of ₹ 80 entered in the Sales Returns Book had been posted to the debit of the customers who returned the goods.

(e) Sundry items of plant sold amounting to ₹ 3,000 had been entered in Sales Day Book, the total of which book had been posted to the credit of Sales Account.

(f) An account of ₹ 800 owing by a customer, had been omitted from the list of Sundry Debtors.

(g) Discount amounting to ₹ 30 allowed to a customer, had been duly entered in his account, but not posted to the Discount Account.

(h) An amount of ₹ 100, being rates treated as paid in advance in the previous year, had not been brought forward as a balance on the Rates Account.

You are required to : (i) Pass necessary Journal entries; (ii) Show the Suspense Account.

Prosperity & Co has produced a Trial Balance as on March 31, 2015 which does not balance, the difference of ₹ 1,760 being transferred to the Suspense Account. On examination of the Company's books discloses the following errors:

(a) The Sales Day Book has been undercast by ₹ 800 and posted to the Debtors Control Account accordingly.

(b) Goods received from XYZ Limited on March 31, 2015 costing ₹ 9,690 have been included in stock but the invoice has not been received.

(c) Sales Account in the General Ledger has been credited with a credit note for ₹ 950 being trade-in-allowance given on a company van. This amount had already been taken into account when dealing with the replacement in the motor van account.

(d) An invoice from Joseph & Co, amounting ₹ 4,450 for goods purchased has been omitted from the Purchases Day Book and posted direct to Purchases Account in the General Ledger and Joseph & Co. Account in the Suppliers' Ledger but has not been included in the Suppliers' Ledger Control Account in the Trial Balance.

(e) Discount allowed for the month of March amounting to ₹ 1,740 has not been posted to Discount Allowed Account in the General Ledger.

(f) A cheque for ₹ 1,920 received from Jolly Limited, a debtor, has been posted directly to the Sales Account in the General Ledger.

You are required : (i) to give the journal entries, where necessary, to correct these errors, or if no journal entry is required, state how they will be corrected; (ii) to prepare a statement showing the effect the corrections would have on the company's profit for the year; and (iii) to prepare Suspense Account.

Solution

In the books of Prosperity & Co.
Journal

Date		Particulars		L.F.	Dr. ₹	Cr. ₹
2015 Mar. 31	(a)	Debtors Control A/c	Dr.		800	
		To Sales A/c				800
		(Being Sales Day Book was undercast by ₹ 800, now rectified)				
	(b)	No Journal entries are required — only ₹ 9,690 should be deducted from Stock Sheet				
	(c)	Sales A/c	Dr.		950	
		To Suspense A/c				950
		(Being trade-in-allowance wrongly credited to Sales Account, now recorded)				
	(d)	Suspense A/c	Dr.		4,450	
		To Suppliers' Ledger Control A/c				4,450
		(Being credit purchase had not been posted in the general ledger, now rectified)				
	(e)	Discount Allowed A/c	Dr.		1,740	
		To Suspense A/c				1,740
		(Being discount allowed to customers had not been posted to Discount Allowed Account in general ledger, now reorded)

Effects of Rectification of Errors on Net Profit

Items	(a)	(b)	(c)	(d)	(e)	(f)	Total
Increase (₹)	800	—	—	—	—	—	800
Decrease (₹)	—	—	950	—	1,740	1,920	4,610
						Net Decrease in Profit =	3,810

Dr. **Suspense Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2015 Mar 31	To Supplier's Ledger Control A/c	4,450	2015 Mar 31	By Balance b/d	1,760
				By Sales A/c	950
			"	By Discount Allowed A/c	1,740
		4,450			4,450

Tutorial Note : (i) When ledgers are kept under 'Self Balancing System', in the general ledger Supplier's Ledger Control Account is kept in place of Sundry Creditors Account. In this case, Purchases Account has been debited without a corresponding credit in the Supplier's Ledger Control Account. Therefore, Supplier's Ledger Control Account is to be credited and Suspense Account is to be debited. (ii) Stock has been adjusted, therefore, it will not affect profit.

Illustration 28

How would you rectify the following errors discovered after the preparation of the Trial Balance :

(a) A cheque for ₹ 12,500 received as insurance claim for loss of goods in transit at the time of import was deposited by the proprietor into his Private Bank Account. The full value of the invoice was passed through the Purchases Book.

(b) A purchase of ₹ 500 from A & Co, on the last date of the year was taken into stock, but the invoice was not passed through the Purchase Book.

(c) Sale of goods on approval amounting to ₹ 300 was included in Sales Account, out of which goods to the value of ₹ 125 were returned. No record of the return was made in the books, though the returned goods were included in the stock at their cost of ₹ 100.

(d) A typewriter which stood in the books at ₹ 2,000 was sold for ₹ 1,250 in part exchange of a new typewriter costing ₹ 6,250 and net invoice of ₹ 5,000 was passed through the Purchases Book.

(e) Four per cent G.P. Notes of the face value of ₹ 5,000 purchased through Lakhotia at 96% ex-dividend, brokerage ₹ 25. Accrued interest to date of purchase was ₹ 130. The total payment of ₹ 4,955 stands debited in the books in the name of the broker Lakhotia.

Messrs Modern Chemicals were unable to agree the Trial Balance on 30th June, 2015 and have raised a Suspense Account for the difference. Later, the following errors were discovered and rectified and the Suspense Account was closed:

(a) The addition of the 'Sundry Purchases' column in the tabular Purchases Journal was short by ₹ 150 and other totals were in order.

(b) A bill of exchange (received from Gupta) for ₹ 2,000 had been returned by the bank as dishonoured and had been credited to the bank and debited to Bills Receivable Account.

(c) Goods to the value of ₹ 105 returned by a customer, Thomas, had been posted to the debit of Thomas and also to Sales Returns.

(d) Sundry items of furniture sold for ₹ 3,000 had been entered in the Sales Day Book, the total of which had been posted to Sales Account.

(e) An amount of ₹ 600 due from Z, a customer, had been omitted from the schedule of sundry debtors.

(f) Discount amounting to ₹ 30 allowed to a customer, had been posted in his account, but not posted to Discount Account.

(g) Insurance premium of ₹ 450 paid on June 30, 2014 for the year ended 30th June, 2015 had not been brought forward.

You are required to: (i) Pass journal entries to rectify the above mistakes; and (ii) Draw up the Suspense Account after rectifying the above mistakes and explain how the above errors affect the book profits for the year ended June 30, 2015.

Effects of Rectification of Errors on Net Profit

Items	(a)	(b)	(c)	(d)	(e)	(f)	(g)	Total
Increase (₹)	—	—	—	—	—	—	—	—
Decrease (₹)	150	—	—	3,000	—	30	450	3,630
							Net Decrease in Profit =	3,630

3. Rectification of errors after preparation of Final Accounts

When errors are detected after preparation of Final Accounts, the following points should be kept in mind:

1. ***All the Nominal Accounts have been closed, after transferring to Trading Account, or Profit and Loss Account.***
2. ***The Suspense Account, if any, has been carried forward to the next period. It should appear in the Balance Sheet under current assets if it has a debit balance and under current liabilities if it has a credit balance.***
3. ***Real and Personal Accounts have also been carried forward to the next period.***

The rectification of errors at this stage should be done in the same manner as we do in case of Stage 2. The only exception is that all Nominal Accounts in the rectification entries shall be substituted by 'Profit and Loss Adjustment Account'. The following illustrations shall clear the conception.

Example : (a) Wages of ₹ 1,000 paid for installation of machinery charged to Wages Account.

In the ordinary course, the rectifying entry would be :

Machinery Account	Dr.	₹ 1,000	
To Wages Account			₹ 1,000

Now, as the Final Accounts have been prepared, the Wages Account has been closed by transferring to Trading Account.

Therefore, the rectifying entry will be:

Machinery Account	Dr.	₹ 1,000	
To Profit and Loss Adjustment Account			₹ 1,000

Example : (b) Purchase of furniture has been passed through Purchases Day Book worth ₹ 2,000.

In the ordinary course, the rectifying entry would be:

Furniture Account	Dr.	₹ 2,000	
To Purchases Account			₹ 2,000

Now, as the Final Accounts have been prepared, the Purchase Account has been closed by transferring to Trading Account

Therefore, the rectifying entry will be:

Furniture Account	Dr.	₹ 2,000	
To Profit and Loss Adjustment Account			₹ 2,000

Example : (c) Wages paid ₹ 200 posted to Salaries Account in the Ledger.

In the ordinary course, the entry would be:

Wages Account	Dr.	₹ 200	
To Salaries Account			₹ 200

Now, as the Final Accounts have been prepared, no entry is required to be passed because both the accounts are Nominal Accounts.

The main purpose of preparing a Profit and Loss Adjustment Account is to show the net effect on the profit and loss of the preceding year. After rectification, the balance of this account is transferred to Capital Accounts in case of a sole proprietorship or partnership business. In case of a company, the revised balance is transferred to Balance Sheet.

Illustration 30

The Trial Balance extracted from a set of books showed a difference which was placed in a Suspense Account to prepare the Final Accounts at that time. Subsequently, the following mistakes were detected :

(a) A dishonoured cheque for ₹ 500 received from A and returned by the Bank has been credited to the Bank Account and debited to Sundry Creditors Account.
(b) Several items of Furniture sold for ₹ 2,500 had been entered in the Sales Day Book.
(c) Goods purchased from X, a supplier, for ₹ 155 had been posted to the debit of his account as ₹ 150.
(d) ₹ 600 due from B had been omitted from the schedule of Sundry Debtors.

Show the necessary entries in the jounral properly ruled and with suitable narration to rectify these errors. Show also how non-detection of these errors affected last year's Profit and Loss Account.

	(Being goods purchased from X for ₹ 155 wrongly debited to his account by ₹ 150, now rectified)			
(d)	Sundry Debtors A/c Dr.		600	
	To Suspense A/c			600
	(Being ₹ 600 due from B had been omitted from the schedule of sundry debtors, now rectified)			

Note : Effect of correction on last year's profit — Profit will be reduced by ₹ 2,500 subject to depreciation on furniture of ₹ 2,500.

Illustration 31

The books of account of A Co. Ltd for the year ending 31st December, 2014 were closed with a difference in books carried forward. The following errors were detected in 2015 :

(a) Returns Outward Book was undercast by ₹ 150.
(b) ₹ 1,500 being the total of the discount column on the credit side of the Cash Book was not posted in General Ledger.
(c) ₹ 6,000 being the cost of purchase of office furniture was entered in the Purchase Account.
(d) A credit sale of ₹ 760 was wrongly posted as ₹ 670 to the Customer's Account in the Sales Ledger.
(e) Closing stock was overstated by ₹ 9,000, being casting error in the schedule of inventory.

Pass rectification entries, prepare Suspense Account and find out the effect of corrections on 2014 profit.

A trader agreed his Trial Balance by putting the difference in a Suspense Account and prepared a Trading and Profit and Loss Account and a Balance Sheet. On subsequent scrutiny the books disclosed several errors as detailed below :

(a) A cheque of ₹ 750 received for loss of stock by fire had been deposited in the proprietor's private bank account.

(b) An item of purchase of ₹ 151 was entered in the Inward Invoice Book as ₹ 15 and posted to the Supplier's Account as ₹ 51.

(c) A sales return of ₹ 500 was not entered in the financial accounts though it was duly taken in the stock book.

(d) An amount of ₹ 300 was received in full settlement from a customer after he was allowed a discount of ₹ 50, but while writing the books, the amount received was entered in the discount column and the discount allowed was entered in the amount received column.

(e) Bills receivable from Mr X of ₹ 1,000 was posted to the credit of Bills Payable Account and also credited to the account of Mr X.

Prepare Suspense Account and Profit and Loss Adjustment Account.

Solution

Dr. Suspense Account Cr.

Date	Particulars	₹	Date	Particulars	₹
	To Balance b/d (Balancing figure)	2,036		By Profit and Loss Adjustment A/c	36
				By X A/c (Note 1)	2,000
		2,036			2,036

Dr. Profit and Loss Adjustment Account Cr.

Particulars	₹	Particulars	₹
To Creditors A/c	100	By Capital A/c	750
To Suspense A/c	36	By Bank A/c	250
To Debtors A/c	500		
To Capital A/c	364		
	1,000		1,000

Working Note :

(1) Bills receivable received from X is nothing but Bills payable of the trader. Bills Payable Account has been correctly credited but X was not debited. However, X Account was credited wrongly. Therefore, for rectification — X Account will be debited with ₹ 2,000 and Suspense Account will be credited by the same amount.

Illustration 33

After getting an agreed Trial Balance, the accountant of M/s Senco Brothers drafted the Trading and Profit and Loss Account, and the Balance Sheet.

The following errors were then detected by the auditors :

(a) ₹ 2,500 received from the insurance company in full settlement of the claim for loss of stock-in-transit, was deposited by the proprietor into his private bank account and was not recorded in the business books.

(b) Goods purchased for ₹ 2,000 were included in stock, but the invoice was not entered in the books for the period under review.

(c) There were compensating errors in the books, namely —
   (i) a payment of ₹ 300 as commission to a sales agent had not been posted from the Cash Book;
   (ii) dividends received were undercast by ₹ 100;
   (iii) purchases amounting to ₹ 190 were not posted to the account of the supplier from Purchases Journal; and
   (iv) debit side of a customer's account in the Sales Ledger was overcast by ₹ 10.

(d) Goods sold for ₹ 500 were returned by a customer, but no record of the return was made in the books although the returned goods were included in the stock at their cost price of ₹ 380.

Show the Journal Entries and the effect of these errors and summarise the alterations necessary in the originally drafted statement of Accounts.

The Trial Balance of M/s Roy & Sen & Co at 31.3.2015 did not agree. In order to close the books, the accountant placed the difference to the Suspense Account newly opened and carried forward this difference to the next period for necessary adjustments. Later, the following errors, arising in 2014-10 were detected:

(a) A purchase of ₹ 162 was recorded in the Day Book as ₹ 62 and posted to debit side Supplier's Account as ₹ 26.

(b) Sales Day Book was overcast by ₹ 100 in January, 2015.

(c) Furniture purchased for ₹ 2,500 cash was posted to the Purchase Account in the Ledger.

(d) Credit sale of ₹ 97 was posted to the credit of the Customer's Account as ₹ 79.

(e) ₹ 50 allowed as cash discount to a trade debtor was not debited to the Discount Account.

Show the necessary Journal entries to rectify these errors and show Suspense Account; and Profit and Loss Adjustment Account and state the ultimate effect of these correcting entries in the books for 2014-10.

Solution **In the books of M/s Roy & Sen & Co**

Journal **Dr.** **Cr.**

Effect of corrections

(i) Suspense Account will be nil; (ii) Sundry Debtors Account will be increased by ₹ 176; (iii) Sundry Creditors Account will be increased by ₹ 188; (iv) Furniture Account will be increased by ₹ 2,500; and (v) Partners' Capital Accounts will be increased due to increase in profit by ₹ 2,250 subject to depreciation on furniture wrongly posted to the Purchase Account.

Illustration 35

There was a difference in Trial Balance of Mr S Basu, a trader, on 31.12.2014 and the difference in books was carried to a Suspense Account and the books were closed. Subsequently, on going through the books, the following errors were located :

(a) ₹ 2,296 paid for repairs to motor car, was debited to Motor Car Account as ₹ 696.

(b) A sale of ₹ 1,400 to J Das entered in the sales book as ₹ 2,120.

(c) A cash discount of ₹ 800 received was entered in the cash book but was not posted in the ledger.

(d) ₹ 400 being purchase returns posted to the debit of Purchases Account.

(e) The purchase of a machine on 1.4.2014 for ₹ 24,000 was entered in the purchases book.

(f) While carrying forward total of one page in N Das's Account, the amount of ₹ 1,000 was written on the credit side instead of the debit side.

(g) A cheque of ₹ 6,192 received from S Das (after allowing a discount of ₹ 92) was endorsed to P. Ghosh in full settlement for ₹ 7,000. The cheque was finally dishonoured but no entry is passed in the books.

Give Journal Entries to rectify the above errors and prepare Suspense Account.

Solution **In the books of S. Basu**

Journal

Date	Particulars		L.F.	Dr. ₹	Cr. ₹
2014 (a) Dec. 31	Profit & Loss Adjustment A/c	Dr.		2,296	
	To Motor Car A/c				696

A Mukherjee has agreed his Trial Balance by putting the difference in a Suspense Account and has prepared a Trading and Profit and Loss Account and the Balance Sheet. On subsequent scrutiny, the books disclosed several errors as detailed below. Rectify these errors and ascertain the amount carried to Suspense Account:

(i) A sale of goods to X for ₹ 350 has been credited to his account.

(ii) Goods purchased from Y amounting to ₹ 750 were entered in the Purchases Day Book but were omitted from Y's Account in the Creditors' Ledger.

(iii) An office typewriter purchased for ₹ 500 has been passed through the Purchase Account.

(iv) Goods returned to S Sen valued at ₹ 75 were debited to P Sen's Account.

(v) Repairs to office car valued at ₹ 750 were debited to the Office Car Account.

(vi) Goods sold to R Banerjee valued at ₹ 730 have been posted into his account as ₹ 370.

Will the above rectification affect the profit figure? If so, to what extent?

Solution **In the books of A. Mukherjee**

A book keeper while preparing his Trial Balance finds that the debit exceeds by ₹ 7,250. For preparing Final Accounts he places the difference to a Suspense Account. In the next year, the following mistakes were discovered :

(a) A sale of ₹ 4,000 has been passed through the Purchases Day Book. The entry in customer's Account has been correctly recorded.
(b) Goods worth ₹ 2,500 taken away by the proprietor for his use has been debited to Repairs Account.
(c) A bill receivable for ₹ 1,300 received from Krishna has been dishonoured on maturity but no entry passed.
(d) Salary of ₹ 650 paid to a clerk has been debited to his Personal Account.
(e) A purchase of ₹ 750 from Raghubir has been debited to his account. Purchases Account has been correctly debited.
(f) A sum of ₹ 2,250 written off as depreciation on furniture has not been debited to Depreciation Account.

Draft the journal entries for rectifying the above mistakes and prepare Suspense Account.

The following Balance Sheet was prepared by a novice on 31.12.2014 :

Liabilities	₹	Assets	₹
Capital	98,500	Furniture and other Fixed Assets	59,500
Net Profit during the year	45,700	Stock	61,000
Loan	50,000	Debtors	38,190
Creditors	22,150	Fixed Deposits	25,750
Suspense Account	2,110	Bank	19,820
		Drawings	14,200
	2,18,460		2,18,460

On close scrutiny, the following errors were discovered :

(a) Closing stock was overvalued by ₹ 4,000.

(b) A sale of ₹ 2,300 was recorded in Sales Day Book as ₹ 3,200, though it was rightly posted in Sales Account.

(c) The total of one page of Purchases Day Book was carried forward as ₹ 3,800 instead of ₹ 8,300.

(d) Outstanding telephone bill of ₹ 510 was not recorded in the books.

(e) A collection of ₹ 2,000 from a customer was posted in Creditors Account.

(f) Rent for one month ₹ 2,500 was recorded in the books as rent of the residential house of the proprietor.

(g) Some old furnitures were purchased at ₹ 2,000 for resale. But they were recorded in the books as fixed assets and depreciation was charged @ 10%.

(h) A fixed deposit of ₹ 5,000 was matured and ₹ 7,500 was realised. But the entire amount was credited to Fixed Deposit Account.

Show the necessary journal entries to rectify the errors, prepare a Profit and Loss Adjustment Account and a Balance Sheet after rectification.

Outstanding Telephone Bill		510		
Suspense Account		5,710		
		2,00,060		2,00,060

Tutorial Note : It should be noted that after rectification of given errors, the balance of Suspense Account has been increased to ₹ 5,710. It means that there are other undetected errors in the books of account.

Special Problems

Illustration 39

Balance Sheet of J Thomson as at 31st March, 2015

Liabilities		₹	Assets		₹
Capital at April 1, 2014		18,900	Land and Building at valuation		15,500
Profit for the year ended 31.3.2015	4,500		Machinery (Cost)	13,000	
Less : Drawings	1,500	3,000	*Less* : Depreciation	7,500	5,500
Creditors		6,300	Stock at cost		5,700
Overdraft		2,700	Debtors		4,200
		30,900			30,900

Further investigation reveals the following information:

(i) The Closing Stock includes damaged goods which, although they had costed ₹ 100, have an estimated sale value of ₹ 75.

(ii) Debtors include ₹ 200 in respect of a customer who had gone bankrupt. A doubtful debt provision of $2^1/_2$% is also required.

(iii) The machinery was acquired five years ago, and it is being depreciated down to its scrap value on a straight-line basis over eight years. A more realistic estimate indicates that the life span will be ten years.

(iv) The land and building were revalued in December 2014 by Mr. Thompson. The original cost was ₹ 13,500 and the surplus was credited to the Profit and Loss Account for the year.

(v) Wages owing at March 31, 2015 amounted to ₹ 95 but this has not been reflected in the accounts.

(vi) Charges for the bank overdraft, amounting to ₹ 80, have not been recorded in the accounts.

(vii) In arriving at the profit for the period, a salary of ₹ 1,000 paid to Mr. Thompson had been deducted as an expense.

(viii) ₹ 200 rent owing to Mr. Thompson for the letting of part of his business premises had not been received, and no entry had been made in the books in respect of this item.

Required to: (a) Prepare Journal entries to reflect such corrections as you consider necessary; (b) Draw up a statement of revised profit for the period, and prepare a new Balance Sheet as at 31st March, 2015.

Solution

Notes : (a) Total Depreciation 7,500/5 x 8 = ₹ 12,000; (b) Revised Depreciation per year 12,000/10 = ₹ 1,200; (c) Depreciation to be written back 5 x (₹ 1,500 – ₹ 1,200) = ₹ 1,500; (d) Out of ₹ 1,500, only ₹ 300 to be adjusted with current year's profit and balance to be credited to Capital Account.

Illustration 40

After completing a draft Profit and Loss Account for the year ended April 30, 2015 of ABC Limited, the following balances remained and a Suspense Account entry was required for the difference which had arisen: (all figures in ₹)

Fixed Assets at Cost	60,000	
Provision for Depreciation		31,000
Ordinary Share Capital		35,000
Retained earnings		12,300
Stock in trade, at cost	14,000	
Sales Ledger Control Account	9,600	
Purchases Ledger Control Account		6,500
Balance at Bank	1,640	
Suspense Account (Difference on balance)		440
	85,240	85,240

After investigation, the following discoveries were made:

(i) A rent payment of ₹ 350 in March 2015 had been debited in the Sales Ledger Control Account.

(ii) Although instructed to do so, the accounts clerk had not set a debt due from B Bell of ₹ 1,560 in the Sales Ledger Control Account against an amount due to B Bell in the Purchases Ledger Control Account.

(iii) Discounts allowed of ₹ 500 during the year ended 30 April, 2015 had not been recorded in the company's accounts.

(iv) No entry had been made for the refund of ₹ 2,620 made by cheque to L. Green in March 2015, in respect of defective goods returned to the company. [*Note*: The correct entries had been made previously for the return of the goods to ABC Limited.]

(v) The Purchases Day Book for February, 2015 had been undercast by ₹ 300.

(vi) A payment of ₹ 1,000 to K. Bloom in January, 2015 for cash purchases had debited in the Purchases Ledger Control Account. [*Note*: The company does not maintain a credit account with K. Bloom.]

(vii) No entries had been made in the company's books for cash sales of ₹ 2,450 on April 30, 2015 and banked on that date.

(viii) No entries had been made in the company's books for the bank charges of ₹ 910 debited in the company's bank account in December, 2014.

(ix) The company's Cash Book (bank debit column) had been overcast by ₹ 1,900 in March 2015.

(x) A cheque payment of ₹ 8,640 for new fixtures and fittings in April, 2015 had not been recorded in the company's books.

(xi) A payment by cheque for ₹ 1,460 in June 2014 for stationery had not been posted to the appropriate nominal account.

You are required to prepare :

(a) Journal entries to reflect the above; (b) The Suspense Account, clearing the balance and;

(c) A corrected Balance Sheet.

Key Points

- **Errors** are unintentional misstatements or omission of amounts or disclosures in financial statements.
- **Typical errors** include : (i) Mathematical mistakes; (ii) Mistake in the application of accounting principles; (iii) Oversight; and (iv) Misuse of facts.
- Errors of Omission are errors resulting from the complete failure to enter a transaction in the books.
- **Errors of Principle** arise because of an incorrect application of the principles of accounting, and failure to differentiate between capital and revenue expenditure.
- **Compensating Errors** are a group of errors, the total effect of which are not reflected in the Trial Balance.
- **Errors of Posting** : If a transaction has been journalised or recorded in a subsidiary book but has been posted wrongly in the Ledger Account, it is an error of posting.
- **Errors of Casting** : Casting is an accounting term for addition. These errors may occur due to short casting or excess casting in any subsidiary book or in any account in the Ledger.

THEORETICAL QUESTIONS

1. What are the different types of errors? Explain each one of them with examples.
2. What is Suspense Account? When is it used?
3. What are the different types of errors that affect the agreement of Trial Balance?
4. What are one-sided and two-sided errors? How will you rectify these if detected before preparation of a Trial Balance?

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each sentence or answer each question below.

1. A trial balance failed to agree and a suspense account was opened. It was then found that rent received of ₹ 500 had been debited to the rent payable account. Which entries are required to correct this error?

	Rent Received Account		Rent Payable Account		Suspense Account	
A	credit	500	credit	500	debit	1,000
B	credit	500	debit	500	no entry	
C	debit	500	credit	500	debit	1,000
D	debit	500	credit	500	no entry	

2. The total of the sales day book for one month is ₹ 9,160. It has been entered in the sales account as ₹ 9,610. Which entries are required to correct the error ?

	Debit		Credit	
A	Sales account	₹ 450	Sales day book	₹ 450
B	Sales day book	450	Sales account	450
C	Sales account	450	Suspense account	450
D	Suspense account	450	Sales account	450

3. An invoice for repairs to machinery ₹ 500, has been entered in the Machinery account. Which entries are required to correct the error ?

	Debit		Credit	
A	Machinery account	500	Repairs to machinery account	500
B	Repairs to machinery account	500	Machinery account	500
C	Repairs to machinery account	500	Suspense account	500
D	Suspense account	500	Machinery account	500

4. When Sachin's trial balance was extracted, the total of the debit balances was ₹ 450 less than the total of the credit balances so a suspense account was opened. After checking he found that :
   (i) a supplier's invoice for ₹ 225 had been debited to both the expenses account and the creditors' control account.
   (ii) a cash sale for ₹ 900 had been omitted from the accounting records.
   When these errors are corrected, what is the balance on the suspense account ?
   A ₹ 900 debit
   B ₹ 900 credit
   C ₹ 1,800 debit

5. A book-keeper has made the following errors :
   (i) A cash transaction of ₹ 100 has not been entered in the books at all.
   (ii) A discount received of ₹ 30 was entered in the debit side of the discounts allowed and correctly posted to the creditors account.
   (iii) ₹ 300 cash drawings were entered in the repair expense account and correctly recorded in the cash book.
   What would be the balance on the suspense account before these errors were corrected ?
   A ₹ 30 (Cr.)
   B ₹ 100 (Dr.)
   C ₹ 300 (Cr.)
   D ₹ 60 (Cr.)
6. After calculating your company's profit for 2014, you discover the following :
   (a) A fixed asset costing ₹ 50,000 has been included in the purchases account.
   (b) Stationery costing ₹ 10,000 has been included as closing stock of raw materials, instead of stock of stationery.
   These two errors have had the effect of :
   A understating gross profit by ₹ 40,000 and understating net profit by ₹ 50,000
   B understating both gross profit and net profit by ₹ 40,000
   C understating gross profit by ₹ 60,000 and understating net profit by ₹ 50,000
   D overstating both gross profit and net profit by ₹ 60,000
7. An organisation's year end is 30 September on 1.1.2014. The organization took out a loan of ₹ 1,00,000 with annual interest of 12%. The interest is payable in equal instalments on the first day of April, July, October and January in arrears. How much should be charged to the profit and loss account for the year ended 30 September, 2014 and how much should be accrued on the Balance Sheet ?

	Profit and Loss Account	Balance Sheet
A	₹ 12,000	₹ 3,000
B	₹ 9,000	₹ 3,000
C	₹ 9,000	Nil
D	₹ 3,000	₹ 9,000

8. The trial balance of a business does not agree. The difference has been entered in a suspense account.
   The error was caused by a cheque for ₹ 400 from X being debited to X's account. The correct journal entry is :

	Debit	**Credit**	**With**
A	Bank	Suspense	₹ 400
B	Suspense	X	₹ 400
C	Suspense	X	₹ 800
D	Suspense	Bank	₹ 800

9. A company's trial balance failed to agree and a suspense account was opened for the difference.
   Subsequent checking revealed that discount allowed ₹ 12,500 has been credited to discount received account.
   Which of the following journal entry will correct the errors ?

A	Discount Allowed A/c	Dr.	12,500	
	To Discount Received A/c			12,500
B	Discount Allowed A/c	Dr.	12,500	
	Discount Received A/c	Dr.	12,500	
	To Suspense A/c		25,000	
C	Suspense A/c	Dr.	12,500	
	To Discount Allowed A/c			12,500

PRACTICAL QUESTIONS

1. The Trial Balance as on 31.12.2014 of Moon Light Pvt. Ltd showed a difference and the Trial Balance was made to agree with the help of a Suspense Account. The following errors were detected afterwards. (a) The Sales Day Book was overcast by ₹ 3,000; (b) A sum of ₹ 1,000 received from R. Bose was wrongly credited to B. Bose; (c) A creditor's balance was extracted as ₹ 1,345 instead of ₹ 345; (d) A Sales Bill for ₹ 9,289 was wrongly debited to Customer's Account as ₹ 9,810; (e) The Purchase Day Book was undercast by ₹ 1,000; (f) An invoice of ₹ 2,000 for the purchase of a typewriter was debited to Purchases Account. Pass Journal entries to rectify the above errors.

2. The Trial Balance extracted from a set of books of X showed a difference which was placed in a Suspense Account. Subsequently, the following mistakes were detected:
   (i) A cheque for ₹ 1,000 received from B was dishonoured and returned by the bank had been credited to the Bank Account and debited to Sundry Creditors Account.
   (ii) Several items of furniture sold for ₹ 5,000 had been entered in the Sales Day Book.
   (iii) Goods purchased from Z for ₹ 310 had been posted to the debit of his Account as ₹ 130.
   (iv) ₹ 1,200 for goods sold on credit to A had been omitted to be entered in his account.
   Show the necessary entries in the Journal properly ruled and with suitable narrations to rectify these errors and also indicate the amount of the difference in the Trial Balance.
3. On 31st March 2015, while balancing the books of account of Shri M Singh, they did not agree. The difference in Trial Balance amounting to ₹ 783 was debited to Suspense Account. Later, the following errors were noticed. Give the Journal entries for rectification of errors and prepare the Suspense Account:
   (a) The total of Purchases Day Book for March, 2015 has been undercast by ₹ 300.
   (b) ₹ 220 paid for repairing the Machinery has been debited to Machinery Account.
   (c) The Sales Day Book has been overcast by ₹ 150.
   (d) A sale of ₹ 1,200 to Mr Kapur has been passed through the Purchases Day Book.
   (e) Cash ₹ 117 received from Shri Shankaran though entered in the Cash Book has not been posted to Shri Shankaran Account.
   (f) Goods returned by Mr Charan Singh, ₹ 225 have been entered in the Returns Outward Book. However, Mr Charan Singh's Account is correctly posted.
4. The Trial Balance of Skreen and Co. as on 30th June 2015 shows a difference of ₹ 16,646, the debit side being in excess of the credit side, this difference was placed in 'Suspense' Account while closing the books. The following errors were subsequently noticed:
   (a) Returns Outward Book was undercast by ₹ 1,818 on 28th June, 2015.
   (b) Repairs to Plant and Machinery, amounting to ₹ 2,200 was debited to Plant and Machinery Account on 9th June, 2015.
   (c) Advance of ₹ 2,002 given to one of the suppliers, Mr X on 20th May 2015 was entered correctly in the Cash Book but was posted in his account on the credit side.
   (d) A cheque for ₹ 1,858 deposited in the Bank on 29th May, 2015 was wrongly entered in Cash Book as ₹ 18,458 though the correct amount was posted in the account of the Customer.
   (e) Closing stock as on 30th June, 2014 was ₹ 1,91,400 but the same was wrongly carried forward as ₹ 1,95,000 in the books on 1st July, 2014.
   (f) ₹ 1,368 being the discount allowed by Mr Y on 25th June, 2015 was omitted to be posted in his account.
   Pass rectification entries for the above and draw the 'Suspense' Account.
5. There was an error in the Trial Balance of Mr. Arora on 31st December, 2014 and the difference in the books was carried to Suspense Account. On going through the books, you find that :
   1. ₹ 5,400 received from Mr. Rajiv was posted to the debit of his account.
   2. ₹ 1,000 being purchases returned were posted to the debit of Purchases Account.
   3. Discount of ₹ 2,000 received were posted to the debit of Discount Received Account
   4. ₹ 2,740 paid for repairs to motor car was debited to Motor Car Account as ₹ 1,740.
   5. ₹ 4,000 paid to R. Sanjay was debited to S. Sanjay Account.
   Give Journal entries to rectify the above errors and ascertain the amount transferred to Suspense Account on 31st December, 2014 by showing the Suspense Account, assuming that the Suspense Account is balanced after the above corrections.
6. The Trial Balance of Dilip and Co, showed a difference. On scrutiny of the books, the following errors were detected:
   (a) Total of the debit side of the Stationery Account has been overcast by ₹ 100.
   (b) Sales Account has been totalled in short by ₹ 200.
   (c) One item of purchase of ₹ 50 has been correctly recorded in the Purchases Day Book, but posted to the supplier's account (shown under Sundry Creditors) as ₹ 500.
   (d) Sales Return of ₹ 200 from a customer has not been posted to that account although the Customer's Account has been credited.
   (e) A cheque of ₹ 1,000 issued to a supplier (shown under Sundry Creditors) towards his dues has been debited to the Purchase Account through error.
   (f) A credit sale of ₹ 100 has been credited to the Sales Account and also to the Sundry Debtors Account.
   (i) Show the Journal entries to rectify the errors; (ii) Draw up the Suspense Account as it would appear in the ledger of the firm; (iii) Show also how they affect the profits of the firm.

7. The trial balance of A. Bose did not agree and the difference was carried to a Suspense Account. It was found that :
   (i) A sales invoice for ₹ 1,000 for goods sold on credit to B. Ghosh was entered in the Purchases Book, but in the Ledger, the amount was correctly debited in the Account of B. Ghosh.
   (ii) Goods bought on credit from P. Roy for ₹ 1,500 were wrongly debited to his account at ₹ 5,100.
   (iii) A cash discount of ₹ 50 allowed to S. Gupta remained unposted to his A/c in the Ledger from the Cash Book.
   (iv) The sales book for the month of April was undercast by ₹ 100.
   (v) ₹ 460 paid for repairs to building was debited to Building Account.

   Pass necessary Journal entries to rectify the errors and state what amount was carried to the Suspense Account.
8. The books of A. Vikram did not agree. The accountant put the difference in a Suspense Account. Rectify the following errors and prepare a Suspense Account.
   (a) The total of the Returns Outwards Book, ₹ 200 has not been posted in the Ledger.
   (b) A purchase of ₹ 1,400 from Saran has been entered in the Sales Book. However, Saran's Account has been correctly credited.
   (c) A sale of ₹ 430 to Ramakant has been credited in his account as ₹ 340.
   (d) A sale of ₹ 296 to Krishan has been entered in the Sales Book as ₹ 269.
   (e) Old furniture sold for ₹ 540 has been entered in the Sales Account as ₹ 450.
   (f) Goods taken by the proprietor, ₹ 500 have not been entered in the books at all.
9. Write out the Journal entries to rectify the following errors using a Suspense Account:
   (a) The total of "Discount Allowed" from the Cash Book for the month of December 2014 amounting to ₹ 350 was not posted.
   (b) An amount of ₹ 175 entered in the Sales Return Book has been posted to the debit of Mr. Roberts who returned the goods.
   (c) Bad debts aggregating ₹ 250 were written off during the year in the Sales Ledger but were not adjusted in the General Ledger.
   (d) Goods to the value of ₹ 500 returned by Mr. Smith were entered in the Sales Day Book and posted therefrom to the credit of his account.
   (e) A sale of ₹ 800 made to Mr. Peter was correctly entered in the Sales Day Book but wrongly posted to the debit of Mr. Armstrong as ₹ 80.
10. Rectify the following errors. Calculate the difference in the Trial Balance. Prepare a Suspense Account and find out the effect of these errors on the Net Profit.
   (a) Purchased goods from Mathai ₹ 300, passed through Sales Book. Mathai's account was correctly credited.
   (b) Received a bill of exchange from Arun for ₹ 500, passed it through Sales Book.
   (c) An item of ₹ 150 relating to Prepaid Rent Account was omitted to be brought forward.
   (d) ₹ 500 paid to Mehta Bros. against our acceptance were debited to Malhotra Bros. Account.
   (e) Received final dividend of ₹ 200 from Ajit whose account had already been written off as bad debt, was credited to his newly opened account and was included in the list of creditors.
   (f) Bill received from Janki Das for repairs done to radio ₹ 150 and radio supplied for ₹ 950 was entered in the Invoice Book as ₹ 1,000.
11. Misbal Co has produced a Trial Balance for the year ended March 31, 2015, which does not balance. An examination of the company's books discloses the following errors:
   1. An invoice from J. Smith amounting to ₹ 100, for goods purchased, has been omitted from the Purchases Day Book and posted direct to purchases account in the Nominal Ledger and J. Smith's account in the Purchases Ledger, but has not been included in the Creditors Control Account in the Trial Balance.
   2. The Sales Day Book has been undercast by ₹ 240 and posted to the Debtors Control Account accordingly.
   3. Discount allowed for the month of March amounting to ₹ 489 has not been posted to the Nominal Ledger.
   4. Goods received from Why Ltd on 31 March 2015, costing ₹ 2,410 have been included in stock, but the invoice has not yet been received.
   5. A cheque for ₹ 192 received from J. Jones, a debtor, has been posted direct to Sales Account in the Nominal Ledger.
   6. Sales Account in the Nominal Ledger has been credited with a credit note for ₹ 250 being trade-in allowance given on a company van. This amount had already been taken into account when dealing with the replacement in the Motor Van Account.

   You are required : (a) to give the Journal entries, where necessary, to correct these errors, or if no journal entry is required, state how they will be corrected; (b) to prepare a statement showing the effect the corrections would have on the company's profit for the year, and; (c) to prepare a statement showing the net adjustment to the trial balance.

12. Mr Mehrotra closes his books on 31st March, every year. In August, 2015 he found that his books for the year 2013-14 contained some errors in spite of an agreed Trial Balance. The errors were:
    (a) ₹ 800 paid for purchase of office furniture was posted to the Purchase Account.
    (b) The Sales Book was overcast by ₹ 250.
    (c) ₹ 275 paid for freight on machinery was debited to Freight Account for ₹ 525.
    (d) Closing stock was overcast by ₹ 3,000 by a wrong casting in the inventory.
    (e) An amount of ₹ 700 was received in full settlement from a customer after he was allowed a discount of ₹ 70, but while writing the books, the amount received was entered in the discount column and the discount allowed was entered in the cash column.
    (f) A cheque of ₹ 7,330 received from Mr Rao, after allowing him a discount of ₹ 70 was endorsed to Mr Roy in full settlement, for ₹ 7,500. The cheque was finally dishonoured but no entries for dishonour was passed in the books.

    Give journal entries to rectify the above errors using Suspense Account, where necessary.
13. After the preparation of Profit and Loss Account, the following transactions were overlooked :
    (a) The opening and closing stock were correctly valued amounted to ₹ 40,000 and ₹ 35,000 respectively, but they have both been included in the Trading Account at 20% less.
    (b) ₹ 1,000 received from a customer in respect of a debt previously written off credited to his personal account.
    (c) Goods costing ₹ 1,500 were sent on sale or return basis for ₹ 2,000 which was included in sales, though no information was received from the customers.
    (d) An account of ₹ 5,000 on account of a claim against the merchant was in dispute and it was estimated that ₹ 2,000 would probably have to be paid on this account.
    (e) Actual cash balance in the office cash box is ₹ 8,000 though the books of account shows ₹ 8,500.

    Show the necessary adjusting entries in the merchant's journal.
14. As the trial balance failed to agree, the accountant of X decided to open a Suspense Account. The final accounts were then produced for the year ended 31 December, 2014.

    Further investigations revealed the following :
    1. The Cash Book had been debited with ₹ 125, which was a receipt from C, a customer. C's account in the sales ledger had been debited with ₹ 152.
    2. A general ledger debit balance for Advertising ₹ 34,000 had been correctly transferred to Profit and Loss Account, but incorrectly entered in the trial balance as ₹ 34,400.
    3. I, a creditor of the company who was owed ₹ 2,000, was paid by a personal cheque from J, wife of X. The only ledger entry recording this was a debit in I's account for ₹ 2,000.
    4. The addition of the debit side of the trial balance had been undercast by ₹ 1,000.
    5. Discounts allowed of ₹ 300 had been correctly posted to the personal ledger, but had not been transferred to the Discount Allowed Account.

    (a) Prepare Journal Entries to correct the discrepancies shown in notes 1 to 5 above.
    (b) Show the Suspense Account with the original trial balance difference and all relevant entries required to correct the errors.
    (c) Which, if any, of notes 1 to 5 above did not affect the double-entry book-keeping system of X in any way ?
15. A firm's accountant has agreed a Trial Balance, and drafted the Trading and Profit and Loss Account and the Balance Sheet. You discover the following errors:
    (a) Sales on approval amounting to ₹ 1,000 have been included in the Sales Account; ₹ 750 of these goods were returned. No record of the return was made in the books, but the returned goods were included in stock at their cost price of ₹ 500.
    (b) A cheque for ₹ 2,500 received for a loss of stock sustained by fire has been paid by the proprietor into his private bank account and not recorded in the business books.
    (c) Purchased goods amounting to ₹ 2,000 are included in stock, but the invoice was dated forward, and is not entered for the period under review.
    (d) There were two compensating errors, viz. discounts received were undercast by ₹ 50. Sales Account was overcast by ₹ 50. State the effect of each of these errors, and pass rectifying Journal entries in a summarized form.
16. Chi Knitwear Ltd. is an old fashioned firm with a hand-written set of books. A Trial Balance is extracted at the end of each month, and Profit and Loss Account and Balance Sheets are computed. This month however, the Trial Balance will not balance, the credits exceeding debits by ₹ 1,536.

    You are asked to help and after inspection of the Ledgers discover the following errors:
    (a) A balance of ₹ 87 on a Debtors Account has been omitted from the schedule of debtors, the total of which was entered as debtors in the Trial Balance.
    (b) A small piece of machinery purchased for ₹ 1,200 had been written off to repairs.

(c) The receipts side of the Cash Book had been undercast by ₹ 720.
(d) The total of one page of the Sales Day Book had been carried forward as ₹ 8,154, whereas the correct amount was ₹ 8,514.
(e) A credit note for ₹ 179 received from a supplier had been posted to the wrong side of his account.
(f) An electricity bill in the sum of ₹ 152, not yet accrued for, is discovered in a filing tray.
(g) Mr. Smith whose past debts to the company had been the subject of a provision, at last paid ₹ 731 to clear his account. His personal account has been credited but the cheque has not yet passed through the Cash Book.

Required : (i) Necessary Journal entries for rectification of errors; (ii) Write up the Suspense Account to clear the difference; (iii) State the effect of correcting each error.

17. The Trial Balance of M/s Roy and Smith not having agreed, their book-keeper, in order to close the books places the difference in a Suspense Account. In the next accounting period, he discovers the following:
(a) An item of ₹ 575.33 paid for the purchase of a new typewriter for the Accounts Department has been wrongly passed through the Purchases Book.
(b) An item of ₹ 68.36 in the Sales Day Book has been posted at ₹ 86.36 in the Personal Ledger Account.
(c) An addition in Returns Inwards Day Book has been cast ₹ 23 short.
(d) An item of ₹ 35 appearing in the discount column in the credit side of the Cash Book has been posted to the credit side of the Personal Account as ₹ 53.
(e) A bill of exchange for ₹ 365 accepted by Ranganathan & Co and later discounted with the firm's bankers has been returned by the bankers as dishonoured. On dishonour, this amount has been debited to the Sales Account. Give the correcting entries and also show the Suspense Account.

18. The Trial Balance of S Das & Co, did not tally as on 31st December, 2014. The following errors were detected afterwards. Pass the necessary Journal Entries to rectify the errors and find out the difference in Trial Balance.
(a) ₹ 600 received from Bidhan Nandy on 31.12.2014 was entered in the Cash Book on 2nd January, 2015.
(b) Returns Inward Book was undercast by ₹ 300.
(c) The purchase of typewriter for ₹ 5,000 was entered in the Purchase Day Book.
(d) Wages of workmen engaged in construction of Building amounting to ₹ 500 were debited to Wages Account.
(e) A purchase of ₹ 671 had been posted to the debit of Supplier Account as ₹ 617.
(f) Goods amounting to ₹ 1,000 had been returned by Ramesh and were taken into stock, but no entry was passed for the transaction.
(g) ₹ 4,000 paid for purchase of TV for proprietor's own purpose had been charged to Miscellaneous Expenses Account.
(h) A Sales of ₹ 600 to 'S' was credited to his account by ₹ 60.
(i) A sale of ₹ 2,000 has been passed through Purchase Journal.
(j) ₹ 75 paid for repairs of furniture had been entered in the total column of Petty Cash Book, but not extended in the appropriate analysis column, the total of which has been posted.

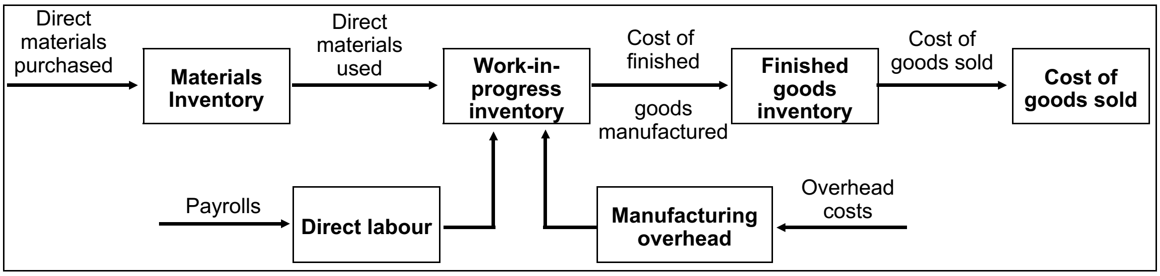
Manufacturing Account and Cost Statement

Introduction

In the Final Accounts chapter, we have seen that the main objective of preparing a Trading Account is to find out the profit from trading, that is the buying and selling of goods. There are many firms which instead of buying saleable products from outside suppliers, make the product themselves. The main objective of such a firm is to make a saleable product and to sell that product at a profit. These firms prepare a Manufacturing Account, in addition to the Trading and Profit and Loss Account, to show separately the cost of goods manufactured during the period.

The Cycle of Production

The production cycle is the sequence of operations which transforms raw materials into finished goods. Each operation will have costs which give rise to expenses. The flow of costs through the manufacturing process is shown as below:



Raw materials are the basic materials that enter into the production of finished goods.
Work-in-Progress are partly completed products that are in the manufacturing process.
Finished goods are the completed products which are ready for sale.

Elements of Cost

In the preparation of a Manufacturing Account, it is necessary to identify all the costs of manufacturing goods. The costs of manufacturing a product consist of three major elements : (a) Materials; (b) Labour; and (c) Expenses.

(a) Materials : Materials are classified as Direct Materials and Indirect Materials.

Direct Materials are those which can be identified with the product, that is, these are directly traceable to an article being manufactured. For example, wood, screws, and the like in a furniture factory.

Indirect Materials are those which do not form a part of the finished product but are necessary for production. For example, sandpaper used in a furniture factory for smoothing surfaces.

Here, we discuss the nature of a few materials. These are :

(i) Raw Materials : The term, raw material is referred to a material that has to be further worked upon for converting into a finished product. The raw materials used in production are treated as *Direct materials*.

(ii) Packing Materials : Primary packing materials are treated as *Direct Materials* where as secondary packing materials are treated as *Indirect Materials***.** Examples of primary packing materials are—bottles and plastic containers, tins, product labels, and the like. Examples of secondary packing materials are—wooden cases, binding wire, string, etc.

(iii) Consumable Materials : These are treated as *Indirect Materials***.** Examples will include cotton waste, grease, lubricating oil, and the like.

(iv) Maintenance Materials : These are required for keeping plant and machinery in working condition. Examples will include gears, bushes and bearings etc. These are treated as *Indirect Materials*.

(b) Labour : Labour is also classified as Direct Labour and Indirect Labour.

Direct Labour is the remuneration paid to production workers who are directly associated with the manufacture of particular articles.

Indirect Labour is the remuneration paid to those workers who are not involved in the actual manufacturing of the product.

Examples will include the remuneration of supervisors, works manager, security staff, and others.

(c) Expenses : Expenses are also classified as Direct Expenses and Indirect Expenses.

Direct Expenses are those which can be directly identified with a particular product other than direct materials and direct labour. Examples are hire charges of special plant, royalties paid on production, etc.

Indirect Expenses are those which cannot be identified with the product such as rent, rates and taxes, etc.

Types of Cost in Manufacturing Account

The total cost of manufacturing are divided into two groups:

(a) **Prime cost** is the aggregate of: (i) Direct Materials; (ii) Direct Labour; and (iii) Direct Expenses.

(b) **Overheads** is the aggregate of: (i) Indirect Materials; (ii) Indirect Labour; and (iii) Indirect Expenses. Overheads are classified into three classes: (i) Factory Overhead; (ii) Administrative Overhead; and (iii) Selling and Distribution Overhead. In Manufacturing Account we only consider the *Factory Overhead***.**

The Format of a Manufacturing Account

In the Manufacturing Account all the elements of production cost, that is, Direct Materials, Direct Labour, Direct Expenses and Factory Overhead are debited. As the Manufacturing Account is concerned with the production cost of goods finished during the year, any opening work-in-progress and closing work-in-progress must be adjusted at the time of preparing the Manufacturing Account of that year. The necessary details required to draw up a Manufacturing Account are shown below.

Dr. Manufacturing Account for the year ended ... Cr.

To Raw materials consumed (Note 1)	***	By Closing Stock of WIP	***
To Direct Labour	***	By Trading Account c/d	***
To Direct Expenses	***	(cost of goods finished and transferred)	
Prime Cost	***		
To Factory overhead (Note 2)	***		
To Opening Stock of W.I.P.	***		
	***		***

Working Notes :

(1) Raw Materials Consumed

Opening stock of raw materials	***
Add: Purchases of raw materials	***
	***
Less: Returns of raw materials	***
Less : Closing stock of raw materials	***
	***
Add: Freight, carriage inward, import duty, excise duty, etc. on materials	***
	***

(2) Factory Overhead

Indirect Materials	Indirect Labour	Indirect Expenses
(i) Secondary packing materials	Wages of :	Factory :
(ii) Maintenance materials	(i) Foreman	(i) Rent
(iii) Stores	(ii) Timekeeper	(ii) Rates
(iv) Grease	(iii) Supervisor	(iii) Taxes
(v) Lubricating oil	(iv) Factory Manager	(iv) Insurance
(vi) Cotton waste	(v) Securitymen	(v) Electricity
		(vi) Lighting
		(vii) Heating
		(viii) Depreciation

Valuation of Stocks in Manufacturing Account

Valuation of manufacturing stock creates problem. At the beginning of the accounting period there will be opening stock of raw materials but at the end of the accounting period there will not only be stocks of raw materials but also stocks of W.I.P. Raw materials will be valued *at cost or market price, whichever is lower*. ***However, it will be a matter to decide what value to place upon work-in-progress. It is common to value the work-in- progress at*** **"***Factory Cost*", that is, at prime cost plus a proportionate factory overhead.

Distinction Between Trading Account and Manufacturing Account

	Trading Accounnt		Manufacturing Account
1.	It shows the gross profit or gross loss.	1.	It shows the cost of production.
2.	It is prepared by all types of businesses.	2.	It is prepared by manufacturers.
3.	It may have a debit balance or a credit balance.	3.	It always has a debit balance.
4.	It is prepared after the Manufacturing Account.	4.	It is prepared before the Trading Account.
5.	The balance of this account is transferred to the Profit and Loss Account.	5.	The balance of this account is transferred to the Trading Account.
6.	It is a part of the Profit and Loss Account	6.	It is a part of the Trading Account.
7.	Any error in the Trading Account will affect the Profit and Loss Account.	7.	Any error in the Manufacturing Account will affect the Trading Account.
8.	It shows the matching of sales and direct costs.	8.	It is not the matching of sales and cost of production.

Key Points to Remember

1. ***Hire charges of special plant, royalty on production and cost of design will be treated as direct expenses. These are to be treated as part of the prime cost.***
2. ***Opening stock of W.I.P. (Work-in-progress) will be debited to Manufacturing Account. Closing stock of W.I.P. will be credited to Manufacturing Account.***
3. ***All indirect expenses relating to factory will be treated as factory overheads. Examples are : (i) Wages and salary of Durwan and security staff. (ii) Salary of works manager, supervisors, factory/ works staff etc. (iii) Depreciation on plant. (iv) Repairs to plant. (v) Repairs to factory shed etc.***
4. ***Opening stock and closing stock of finished goods will be shown in the Trading Account.***
5. ***Bad debts, discount allowed, audit fees etc. will be debited to Profit and Loss Account.***

Illustration 1

The following information is given to you from the books of a manufacturer in respect of the year ended 31st March, 2015.

Particulars	₹	Particulars	₹
Stock of Raw Materials (1.4.2014)	25,000	Electricity and telephone	6,000
Freight — Inward	8,500	Selling expenses	6,000
Freight — Outward	6,000	Miscellaneous expenses	14,000
Wages — Direct	18,000	Stock of raw materials (31.3.2015)	22,000

Wages — Indirect	14,000	Stock of finished goods	
Sales	4,18,000	Opening	30,000
Stationery	1,500	Closing	40,000
Travelling expenses	5,000	Provision for doubtful debts	8,500
Salaries (H.Q.)	26,000	Depreciation on plant	4,000
Factory expenses	26,000	Depreciation on office furniture and equipments	3,000
Interest on loan paid	1,800	Repairs to plant and machinery	4,650
Returns inwards	5,000	Scrap sale	3,700
Returns outwards	3,500	Purchase of raw materials	2,50,000
Power and fuel	8,000	Coal consumed	9,000
Work-in-progress (1.4.2014)	7,000	Bank interest received	2,600
Work-in-progress (31.3.2015)	4,000		

Adjustments necessary for the following :

(i) Finished goods worth ₹ 5,000 was distributed as free samples.
(ii) A loan was obtained on 1st October, 2012 for ₹ 50,000 carrying interest @ 10 p.a.
(iii) Bad debts to be written off ₹ 750 and Provision for Doubtful Debts to be maintained at ₹ 7,000.
(iv) Electricity and telephone to be apportioned as: Factory 3/5th and office 2/5th.
(v) A fire occurred destroying finished goods worth ₹ 15,000. Insurance company admitted a claim of ₹ 12,000 not yet received.
(vi) Stock of stationery in hand (31.3.2015) ₹ 150.

You are required to prepare the Manufacturing Account and Trading Account and Profit and Loss Account for the year ended 31st March, 2015.

General office expenses	100		Finished goods	20,000	
Factory power	1,000		Packing materials	250	30,750
Light and heat	300		Debtors	20,000	
Rent and taxes	600	2,050	Less: Provision for bad debts	3,000	17,000
			Prepaid insurance		300
			Cash at bank		7,500
			Cash in hand		500
		1,07,510			1,07,510

Working Notes :

(1) Materials Consumed

	₹
Opening stock of raw materials	10,000
Add: Purchases	65,000
	75,000
Less: Closing stock of raw materials	7,000
	68,000

(2) Factory Overhead

		₹
Factory power	7,000	
Add: Outstanding	1,000	8,000
Rent and taxes (Note 3)		3,000
Insurance (Note 4)		1,250
Light and Heat (Note 5)		1,000
Repairs to plant		1,500
General expenses	400	
Add: Outstanding	50	450
Depreciation on plant (Note 6)		5,250
		20,450

(3) Rent and Taxes

	₹
As per trial balance	3,000
Add: Outstanding	600
	3,600
Factory 5/6 = 3,000; Office 1/6 = 600	

(4) Insurance

	₹
As per trial balance	1,800
Less: Prepaid	300
	1,500
Factory 5/6 = ₹ 1,250; Office 1/6 = ₹ 250	

(5) Light and Heat

	₹
As per trial balance	900
Add: Outstanding	300
	1,200
Factory 5/6 = ₹ 1,000; Office 1/6 = ₹ 200	

(6) Depreciation — On ₹ 50,000 @ 10% for 1 year = ₹ 5,000 and On ₹ 5,000 @ 10% for 1/2 year = ₹ 250; Total = ₹ 5,250

Manufacturing Account Showing Manufacturing Profit

When the goods are transferred from the factory to the warehouse at 'Factory Cost', they do not give any indication of the profitability of the factory. The Gross Profit achieved by a business is the result of two processes : (a) The manufacturing process, and (b) The trading process. A better control can be exercised over the activities of the business if the results of these two processes can be segregated. A Manufacturing Account can be prepared to ascertain manufacturing profit. In this case, the manufacturing department is treated as a separate ***profit centre***. If this is decided, manufactured goods are transferred from the factory to the warehouse at a profit in any of the following two ways : (a) at sales price, or (b) at cost price plus a fixed percentage of profit.

When goods are transferred to the warehouse at selling price, such transfer price becomes the selling price for the manufacturing department and the purchase price for the trading department. This helps in deciding whether the manufacturing department is running at a profit or at a loss. If the cost per unit is more than the selling price (prevailing in the market), the department will show a loss and the management is to decide whether to close down the manufacturing department or not.

When it is not possible to get a ready market price for the product being transferred to the trading department, goods are transferred at cost plus a fixed percentage of profit. The percentage of profit that is added with the cost is purely on an arbitrary basis.

In both the above cases, the Manufacturing Account is credited with the 'Transfer price' (i.e. selling price or cost plus certain percentage of profit). Since the credit side becomes heavier (for adding the profit with the cost price of the goods transferred), the balancing figure will show the manufacturing profit and will appear on the debit side. Other items in the Manufacturing Account will appear as usual. The manufacturing profit is really the Gross Profit earned by the manufacturing department.

Elimination of Unrealised Profit in Closing Stock

When the goods are transferred from manufacturing department to the trading department at a profit, and at the year end a part of the stock remains unsold, some amount of unrealised profit remains in the closing stock. Applying the concept of conservatism (anticipate no profit but provide for all possible losses), the unrealised profit on closing stock is removed by passing the following journal entry :

Profit and Loss Account Dr.
To Stock Reserve Account

In the Balance Sheet, closing stock appears at its usual value less stock reserve, that is, strictly at cost.

Illustration 4

Leek and Bean were in partnership as lawnmower manufacturers, Leek being responsible for the factory and Bean for the warehouse. All completed lawnmowers were transferred from the factory to the warehouse, at agreed prices. Profits are to be shared as follows :

Factory—Leek (75%); Bean (25%); Trading—Leek (25%); Bean (75%).

The following trial balance has been extracted from the books on 30th June, 2015 :

Particulars	Dr. (₹)	Cr. (₹)	Particulars	Dr. (₹)	Cr. (₹)
Capital Account — Leek		48,000	Stock at 30th June, 2014 — W.I.P.	3,400	
Capital Account — Bean		49,000	Lawn mowers completed (1,200 at ₹ 40 each)	48,000	
Drawings — Leek	6,000		Sales (1,820 lawn mowers)		1,11,020
Drawings — Bean	5,000		Purchase of raw materials	28,650	
Freehold factory, at cost	42,150		Factory wages	15,020	
Factory plant, at cost	25,750		Warehouse wages	6,030	
Provision for depreciation to 30.6.2014		6,050	Expenses — Factory	12,070	
Delivery vans, at cost	8,050		Expenses — Warehouse	10,020	
Provision for depreciation to 30.6.2014		3,450	Provision for doubtful debts		1,600
Stock at 30th June, 2013 — Raw materials	4,028		Trade debtors and creditors	18,000	6,000
Bank overdraft		7,048	**TOTAL**	2,32,168	2,32,168

1,520 lawn mowers at ₹ 45 each were transferred to the warehouse in 2014; lawn mowers in stock at the end of the year were to be valued at ₹ 45 each. Stock of raw materials was ₹ 3,180 and work in progress was valued at prime cost of ₹ 5,050 at 30th June, 2015. Accrued expenses outstanding as on 30th June, 2015 were : Factory Expenses ₹ 2,090; Factory Wages ₹ 280; Warehouse Expenses ₹ 1,080; Factory Wages nil.

The general provision for bad debts was to be maintained at 10% of the trade debtors. Bad debts for the year to 30 June 2015 have already been written-off against last year's provision.

Provision for depreciation is to be made as follows : Factory plant 10% p.a. on cost; Motor vehicles 20% p.a. on cost.

You are required to prepare : (a) Manufacturing, Trading and Profit and Loss Accounts for the year ended 30 June 2015; and (b) a Balance Sheet as at that date.

Solution

Dr. **Manufacturing Account for the year ended 30th June, 2015** **Cr.**

Particulars		₹	Particulars	₹
To Raw materials consumed		29,498	By Closing W.I.P.	5,050
To Factory wages	15,020		By Value of goods transferred to warehouse (1,520 x ₹ 45)	68,400
Add: Outstanding	280	15,300		
Prime cost		44,798		

To Factory overhead (Note 2)	16,735		
To Opening W.I.P.	3,400		
To Factory Profit c/d	8,517		
	73,450		73,450

Dr. Trading and Profit and Loss Account for the year ended 30th June, 2015 Cr.

Particulars		₹	Particulars	₹
To Opening stock of finished goods		48,000	By Closing Stock of finished goods (₹ 45 x 900)	40,500
To Value of goods transferred to warehouse		68,400	By Sales (1,820 Units)	1,11,020
To Gross Profit c/d		35,120		
		1,51,520		1,51,520
To Depreciation : Motor vehicles		1,610	By Gross Profit b/d	35,120

Accrued Expenses (₹ 2,090 + 280 + 1,080)	3,450	16,498	Debtors	18,000	
			Less: Provision for bad debt	1,800	16,200
		1,27,195			1,27,195

Cost Statement/Cost Sheet

It is a statement prepared to show the different components of total cost, total output and profit of a given period of time. Cost sheet is a memorandum statement and is not a part of the double entry system. However, data relating to direct material, direct labour and direct expense are collected from financial accounts. Overheads are added in a cost sheet on the basis of predetermined rates. The profits disclosed by Cost Sheet and financial accounts generally differ due to difference in stock valuation and under/over absorption of overheads and it is explained by means of a reconciliation statement. A specimen of a cost sheet is given below.

Cost Sheet for the year ...

Direct materials consumed	***
Direct labour	***
Direct expenses	***
Prime cost	***
Factory overhead (say, 20% of the prime cost)	***
Factory cost/works cost	***
Add: Opening stock of W.I.P.	***
Less: Closing stock of W.I.P.	***
Works cost of finished goods	***
Administrative overhead (say 10% of works cost)	***

Cost of production	***
Add: Opening stock of finished goods	***
Less: Closing stock of finished goods	***
Cost of goods sold	***
Selling and Distribution overhead (say ₹ 5 per unit sold)	***
Cost of sales	***
Profit	***
Sales	***

Illustration 6

The following extract of information relates to a commodity for the year ended 31st March, 2015:

	₹		
Stock on 1.4.2014	₹	Raw materials purchased	30,000
Raw materials	5,000	Direct wages	25,000
Finished products (1,000 tonnes)	4,000	Rent, rates and insurance of works	10,000
Work-in-progress	1,200	Carriage inwards	360
Stock on 31.3.2015		Cost of factory supervision	2,000
Raw materials	5,560	Sales of finished products	75,000
Finished products (2,000 tonnes)	8,000	Advertisement and selling overhead amount to 25 paise per tonne sold,	
Work-in-progress	4,000	16,000 tonnes were produced during the year.	

Prepare Cost Sheet.

Solution **Cost Sheet for the year ended 31st March, 2015**

	₹
Raw materials consumed (Note 1)	29,800
Direct wages	25,000
Prime cost	54,800
Factory overhead (Note 2)	12,000
Factory cost/works cost	66,800
Add: Opening stock of W.I.P.	1,200
	68,000
Less: Closing stock of W.I.P.	4,000
Works cost of finished goods	64,000
Administrative overhead	nil
Cost of production	64,000
Add: Opening stock of finished goods	4,000
	68,000
Less: Closing stock of finished goods	8,000
Cost of goods sold	60,000
Selling and Distribution overhead ₹ (0.25 x 15,000)	3,750
Cost of sales	63,750
Profit (balancing figure)	11,250
Sales	75,000

Working Notes :

(1) Materials Consumed	₹	**(2) Factory Overhead**	₹
Opening stock of raw materials	5,000	Rent, rates and insurance	10,000
Add: Purchases	30,000	Cost of factory supervision	2,000
	35,000		12,000
Less: Closing stock of raw materials	5,560	**(3) Sales**	(tonnes)
	29,440	Opening stock	1,000
Add: Carriage inward	360	Production	16,000
	29,800		17,000
		Less: Closing stock	2,000
			15,000

Illustration 7

The following figures for the month of April 2015, were extracted from the records of a factory:

Opening stock of finished goods (5,000 units)	45,000	Administrative overhead	Re 1 per unit
Purchases of raw materials	2,57,100	Selling and Distribution overhead	10% of Sales
Direct wages	1,05,000	Closing stock of finished goods (10,000 units)	?
Factory overhead	100% of Direct wages	Sales (45,000 units)	6,60,000

Prepare a Cost Sheet for the month of April, 2015, assuming that sales are made on the basis of FIFO principle.

Solution **Cost Sheet for the month of April, 2015**

Purchase of raw materials	2,57,100
Direct wages	1,05,000
Prime cost	3,62,100
Factory overhead (100% of Direct wages)	1,05,000
Factory cost/works cost	4,67,100
Administrative overhead (Re 1 x 50,000) (Note 1)	50,000
Cost of production	5,17,100
Add: Opening stock of finished goods	45,000
	5,62,100
Less: Closing stock of finished goods (Note 2)	1,03,420
Cost of goods sold	4,58,680
Selling and Distribution overhead (10% of ₹ 6,60,000)	66,000
Cost of sales	5,24,680
Profit (balancing figure)	1,35,320
Sales	6,60,000

Working Notes :

(1) Production

	(Units)
Closing stock	10,000
Sales	45,000
	55,000
Less: Opening stock	5,000
	50,000

Administrative overhead is recovered on the basis of no. of units produced

(2) Value of Closing Stock

No. of units sold—45,000 on FIFO basis. It means that 5,000 units from Opening Stock and 40,000 units from current production. Closing stock represents only from current production. Therefore, the value will be : 5,17,100 / 50,000 x 10,000 = ₹ 1,03,420.

Valuation of Work-in-Progress

The cost of work-in-progress consists of raw materials consumed, direct labour and a proportionate part of the factory overheads. If the work-in-progress is valued at prime cost, it is necessary to have an adjustment for the work-in-progress. It should be made at the stage of calculating the prime cost. With the aggregate value of raw materials consumed and direct labour, value of opening work-in-progress at prime cost is to be added and value of closing work-in-progress at prime cost is to be subtracted. The resultant figure will be the value of prime cost.

Illustration 8

A company manufactures refrigerators and the following details are furnished in respect of its factory operations for the year ended 31.12.2015 (all figures in rupees) :

Work-in-progress on 1.1.2015 :			Stock of raw materials on 1.1.2015	2,25,000
At prime cost	51,000		Purchase of raw materials	4,77,000
Add: Manufacturing cost	15,000	66,000	Direct labour	1,71,000
Work-in-progress on 31.12.2015 :			Manufacturing costs	84,000
At prime cost	45,000		Stock of raw materials on 31.12.2015	2,04,000
Add: Manufacturing cost	9,000	54,000		

On the basis of above data, prepare a statement showing the cost of production.

Solution **Cost Sheet for the month of April, 2015**

Raw materils consumed (Note 1)	4,78,000
Direct labour	1,71,000
Value of work-in-progress at prime cost on 1.1.2015	6,69,000
	51,000
Value of Work-in-Progress at Prime Cost on 31.12.2015	7,20,000
	(45,000)
Prime cost	6,75,000
Value of work-in-progress on 1.1.2015 (Manufacturing Cost)	15,000
Manufacturing costs	84,000
	7,74,000
Less: Value of work-in-progress on 31.12.2015 (Manufacturing Cost)	(9,000)
Cost of production	7,65,000

Working Note : (1) Raw materials consumed : Opening stock of raw materials ₹ 2,25,000; *Add* : Purchases ₹ 4,77,000; Total = ₹ 7,02,000; *Less*: Closing stock of raw materials ₹ 2,04,000; Total raw materials consumed ₹ 4,98,000.

Key Points

- The **production cycle** is the sequence of operations which transforms raw materials into finished goods.
- **Direct Materials** are those which can be identified with the product, that is, these are directly traceable to an article being manufactured.
- **Direct Labour** is the remuneration paid to production workers who are directly associated with the manufacture of particular articles.
- **Direct Expenses** are those which can be directly identified with a particular product other than direct materials and direct labour.
- **Prime cost** is the aggregate of: (i) Direct Materials; (ii) Direct Labour; and (iii) Direct Expenses.
- **Overheads** is the aggregate of: (i) Indirect Materials; (ii) Indirect Labour; and (iii) Indirect Expenses.

THEORETICAL QUESTIONS

1. What do you mean by Manufacturing Account ? Why is it prepared ?
2. What do you mean by Direct Materials, Direct Labour and Direct Expenses ? Give suitable examples.
3. What is a Cost Sheet ? Why is it prepared ?

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each statement or answer each question below :

1. Primary packing materials are
   A treated as indirect materials and included in the factory overhead
   B treated as indirect materials and included in the selling and distribution overhead
   C treated as direct materials and included in prime cost
   D treated as indirect materials and included in the administrative overhead
2. Direct materials are those which
   A cannot be identified with the product
   B are directly not traceable to an article being manufactured
   C are very costly materials used in the production of an article
   D can be identified with the product
3. Which of the following is not an example of direct expenses ?
   A royalties paid on production
   B hire charge of special plant
   C rent and taxes of the factory
   D designing cost
4. Which of the following is an example of direct material ?
   A cotton waste
   B binding wire
   C lubricating oil
   D screws in a furniture factory
5. Direct labour cost is the remuneration paid to a
   A supervisor
   B production worker
   C security staff
   D works manager
6. Which of the following expense is not an item of factory overhead ?
   A insurance of the factory
   B time keeper's salary
   C freight on raw materials
   D stores

7. Prime cost is the aggregate of
   A direct materials consumed + direct labour
   B direct materials purchased + direct labour + direct expense
   C direct materials consumed + direct labour + direct expenses
   D direct materials consumed + direct labour + factory overhead
8. Generally work-in-progress is valued at
   A prime cost
   B factory cost
   C factory cost + administrative overhead
   D prime cost + variable factory overhead
9. Secondary packing materials is treated as
   A direct expenses
   B factory overhead
   C selling overhead
   D distribution overhead
10. Which of the following is an item of overhead ?
   A audit fees
   B bad debts
   C discount allowed
   D delivery van expenses

PRACTICAL QUESTIONS

Manufacturing Account

1. From the following list of balances, prepare Manufacturing Account, Trading Account and Profit and Loss Account for the year ended 31.12.2014. Prepare also a Balance Sheet as on that date.
   Stock on 1.1.2014 : Raw Materials ₹ 30,000, Work-in-Progress ₹ 20,000, Finished Goods ₹ 1,50,000. Purchase of Materials ₹ 3,00,000, Carriage Inwards ₹ 11,000, Wages ₹ 2,00,000, Works Manager's Salary ₹ 56,000, Factory Expenses ₹ 59,000. Sales ₹ 7,34,000, Discount (Cr) ₹ 11,000, Office Expenses ₹ 1,24,000, Advertisement, etc. ₹ 30,000, Carriage Outward ₹ 6,000, Discount (Dr) ₹ 10,000, Cash-in-hand and at Bank ₹ 62,000, Sundry Debtors ₹ 2,50,000, Plant and Machinery ₹ 2,00,000, Land and Buildings ₹ 1,15,000, Sundry Creditors ₹ 4,70,000, Loan @ 5% (Cr.) ₹ 48,000, Drawings ₹ 60,000, Provision for Doubtful Debts ₹ 10,000, Capital ₹ 4,10,000. Additional information available is as follows :
   (a) Stock on 31.12.2014 : Raw Materials ₹ 40,000; Work-in-Progress 45,000; Finished Goods 2,80,000.
   (b) Outstanding Expenses : Wages ₹ 6,000 ; Office Salary ₹ 3,000 and Interest on Loan for the whole year.
   (c) Depreciate : Land and Building @ 2% p.a. and Plant and Machinery @ 5% p.a.
   (d) Provision for doubtful debt is to be raised to 5% on Sundry Debtors.
2. From the following information relating to the business of Lutfur Rahman, prepare a full Manufacturing Account and also prepare Trading, Profit and Loss Account and Balance Sheet for the year ended 30th September, 2014:

Particulars	Dr. (₹)	Cr. (₹)	Particulars	Dr. (₹)	Cr. (₹)
Purchases	18,61,000		Sales staff — salary and commission	1,79,900	
Sales		41,54,500	Royalties	1,89,000	
Opening Stock:			Production wages :		
Raw materials	1,42,100		Direct	4,34,700	
W.I.P.	73,800		Indirect	2,69,800	
Finished goods	88,500		Administrative salaries	1,43,300	
Debtors / Creditors	1,89,600	2,01,600	Drawings	1,10,000	
Discount allowed	66,800		Land and Building	24,50,000	
Discount received		89,400	Plant and machinery at cost	12,50,000	
Bank and cash	2,49,400		Vehicles	6,25,000	
General factory expenses	2,10,100		Depreciation upto date		
Rent and rates	41,200		Vehicle		2,11,000
Light and heat	96,300		Plant and machinery		3,33,000
Factory power	1,56,500		Capital		38,50,000
Insurance	12,500		**TOTAL**	88,39,500	88,39,500

Notes at 30th September, 2014 :

1. Stock of : Raw Materials ₹ 1,68,100, Work-in-progress ₹ 82,500 and Finished Goods ₹ 1,03,400.
2. Light and heat, rent and rates, insurance are to be apportioned : Factory 3/5ths, Administration 2/5ths.
3. Depreciation provisions are to be applied to cost on the basis of : Plant and Machinery 10%, Vehicles 20%.

3. Prepare Manufacturing, Trading and Profit and Loss Account for the year ended 31st December, 2014 and Balance Sheet as at that date of Shri S. Singh, manufacturer, from the following Trial Balance and information:

Trial Balance as at 31st December, 2014

Particulars	Dr. (₹)	Cr. (₹)	Particulars	Dr. (₹)	Cr. (₹)
Advertising	1,660		Purchases	67,336	
Bad debts	1,210		Packing and transport	2,170	
Bad debts provision		2,000	Rent and rates	2,972	
Bank charges	240		Repair to plant	1,570	
Capital Account of Sri S. Singh		70,000	Salaries — Office	7,380	
Current Account of Sri S. Singh		3,246	Sales		1,58,348
Drawings Account of Sri S. Singh	16,000		Stock on 1.1.2014:		
Discount		824	(a) Raw materials	10,460	
Factory power	7,228		(b) Finished goods	14,760	
Furniture	1,800		(c) Work-in-progress	3,340	
General expenses — Factory	410		Wages — Factory	41,400	
General expenses — Office	692		Debtors	21,120	
Insurance	1,804		Creditors		12,300
Light and heat	964		Cash at bank	7,852	
Plant and machinery (1.1.2014)	30,000		Cash in hand	350	
Plant and machinery bought (30.6.2014)	4,000		**TOTAL**	2,46,718	2,46,718

1. Stock at 31st December, 2014 was : Raw materials ₹ 7,120; W.I.P. ₹ 3,480; Finished goods ₹ 19,300; Packing materials ₹ 250.
2. The following liabilities are to be provided for : Factory power ₹ 1,124; Rent and rates ₹ 772; Light and heat ₹ 320; General expenses : Factory ₹ 50; Office ₹ 80.
3. Prepaid Insurance ₹ 340.
4. Increase bad debt provision by ₹ 1,000.
5. Provide depreciation at 10% p.a on Plant and Machinery and 5% p.a. on furniture.
6. 5/6th of Rent and rates, Light and heat, and Insurance are to be allotted to the factory and 1/6th to the office.

Cost Statement / Cost Sheet

4. From the following particulars you are required to prepare a statement showing the total cost of production and cost per unit produced.
Stock on 1.1.2014 : Raw materials ₹ 28,000; Work-in-progress ₹ 15,200;
Stock on 31.12.2014 : Raw materials ₹ 36,800; Work-in-progress ₹ 11,640;
Raw materials purchases ₹ 88,000; Carriage on the purchase of raw materials ₹ 3,120; Direct wages ₹ 30,000; Manufacturing expenses ₹ 14,800; No. of units produced in the year 180.

5. The following are the figures relating to the production of a commodity for the month of March, 2015:

Particulars	₹	Particulars	₹
Stock on 1.3.2015—Raw materials	75,000	Works overheads	2,000
Stock on 1.3.2015—Finished goods	75,000	Office and administrative overheads	3,000
Work-in-progress on 1.3.2015	5,000	Selling expenses	2,000
Work-in-progress on 31.3.2015	3,000	Sales	1,77,000
Stock on 31.3.2015—Raw materials	50,000	Purchase of raw materials	1,00,000
Stock on 31.3.2015—Finished goods	53,000	Direct wages	5,000

Prepare a statement showing Prime Cost, Total Cost and Net Profit for the month.

6. A manufacturing concern requires a statement showing the results of its production for the month of September, 2014. The cost records give the following information :

Particulars	₹	Particulars	₹
Stock on 1.9.2014—Raw materials	1,00,000	Sales	2,84,000
Stock on 1.9.2014—Finished goods	71,500	Direct wages	70,000
Stock on 30.9.2014—Raw materials	1,23,500	Indirect wages	2,500
Stock on 30.9.2014—Finished goods	42,000	Works charges	37,000
Purchase of materials	88,000	Administrative expenses	13,000
Work-in-progress on 1.9.2014	31,000	Selling and distributing expenses	15,000
Work-in-progress on 30.9.2014	34,500		

You are asked to prepare a cost sheet showing: (a) Prime cost; (b) Works cost; (c) Cost of production; (d) Cost of goods sold; (e) Cost of sales; and (f) Profit.

Consignment Accounts

Introduction

Business organisations sometimes market their goods through agents as an alternative to selling goods themselves. Consignment is a kind of business expansion without actually opening a branch in a new potential market. In consignment, a manufacturer or wholesaler despatches goods to an agent who has a better knowledge of the local market, for the purpose of sale. The person sending the goods is called the ***consignor*** and the agent who receives the goods is called the ***consignee***. The consignee markets the product within his own periphery and receives commission at a stipulated rate on the total sales. He is also entitled to recover such expenses which he incurs in connection with the consignment. The consignee does not only market the product but discharges the function of sales promotion also. If he fails to perform this function, he may well be replaced by another. On the other hand, if the consignee finds that the business is not remunerative enough for him, he may well give it up and may not be interested to renew the contract for consignment. Consignment accounts are the accounts recording the transactions relating to the goods sent on consignment.

Economics of Consignment

Consignment flourishes because of its inherent economies. ***First***, it is cost saving. It dispenses with the need of branch opening at distant place or places with heavy cost implications. ***Secondly***, the manufacturer may not have the capacity to open branches while he intends to tap distant markets. Consignment fulfils both the needs. Consignment facilitates expansion without much initial and on-going costs. In short, it is the simplest and more economical way of territorial expansion and, as such, a mode of growth for manufacturing companies.

Distinction Between Sale and Consignment

	Sale		Consignment
(a)	In case of a sale, property in goods is transferred to the buyer along with the transfer of goods.	(a)	In case of a consignment, goods remain the property of the consignor until the time they are sold by the consignee.
(b)	Goods once sold cannot be returned to the seller except when they are defective or the seller agrees to take those back.	(b)	Unsold goods of consignment are the property of the consignor and can be returned to him.

(c)	When goods are sold on credit, the buyer becomes the debtor of the seller. The relationship between the buyer and seller is that of debtor and creditor.	(c)	When goods are sold on credit, the buyer becomes the debtor of the consignor. The relationship between the consignor and the consignee is that of a principal and an agent.
(d)	When goods are lost after delivery to the buyer, it is the buyer who will bear the loss.	(d)	When goods are lost on consignment, it is the consignor who will bear the loss.

Procedure for Consignment Transactions

The consignor sends goods to the consignee along with a ***Proforma Invoice***. An invoice is a document sent by a seller to a buyer giving details of goods or services sold, their price and terms of payments. A proforma invoice is a document to show what the invoice would be. It is not a demand for payment. It is a memorandum invoice and serves as a guide to the consignee in respect of (1) description of the goods and (2) minimum selling price to be realised. In the case of foreign consignments, the 'Proforma Invoice' serves as a prime document for customs clearance.

When goods are sent to the consignee the consignor makes a record of the consignment giving full details of the goods, their cost prices and the expenses incurred.

After receiving goods, the consignee tries to sell them at the best possible price. ***It should be noted that mere receipt of the goods does not make the consignee a debtor of the consignor***. He becomes indebted to the consignor when he sells the goods and realizes the money. The consignee may have to spend some money in respect of the consignment such as unloading charges, godown rent and the like for which he is entitled to be reimbursed. It is the duty of the consignee to remit the proceeds of sales after deducting his expenses in respect of the consignment and his own commission, to the consignor. The details of sale proceeds, expenses and commission are contained in an accompanying statement known as **'*Account Sales*.'**

An ***Account Sales*** is a statement which is periodically rendered by the consignee to the consignor, showing the details about the goods sold, price realized, his own commission, and the expenses incurred in connection with the sale.

Illustrative Example

On 15th November 2014, Kapil & Co of Chandigarh consigned 250 bicycles to Arun & Co Calcutta. On 31st December 2014, Arun forwarded an Account Sales, with a bank draft for the balance, showing the following transactions:

1. 200 bicycles sold @ ₹ 600 each and 50 @ ₹ 560 each.
2. Unloading charges ₹ 500.
3. Storage and Insurance ₹ 1,000.
4. Commission on Sales @ 10%.

You are required to prepare the Account Sales.

Arun & Co **35, Park Street, Calcutta 700 016** **31st December, 2014**		
Account Sales of 250 bicycles sold by order and for account of Kapil & Co.		
Gross Proceeds	₹	₹
200 @ ₹ 600 each	1,20,000	
50 @ ₹ 560 each	28,000	1,48,000
Less: Charges		
Unloading charges	500	
Storage & Insurance	1,000	
Commission @ 10% on ₹ 1,48,000	14,800	16,300
Net proceeds		1,31,700
Bank draft enclosed, ₹ 1,31,700 (Rupees one lakh thirty one thousand seven hundred only)	E. & O. E.	
	(Signed) Arun & Co Calcutta	

Entries in the Books of the Consignor

The primary objective for preparing the Consignment Account is to ascertain the profit or loss on each consignment separately. For that, the consignor prepares a ***Consignment Account*** for each consignment. This special account is always named with either the consignee or the place, for example 'Consignment to Arun & Co Account' or 'Consignment to Calcutta Account'—just to distinguish one consignment from another. Consignment account is a ***Nominal Account***. In fact, it is a combined Trading and Profit and Loss Account related solely to the consignment. This account is debited with : (1) opening stock on consignment (if any); (2) cost of goods sent on consignment; (3) expenses incurred by the consignor, such as freight, insurance for sending goods; (4) expenses incurred by the consignee such as unloading charges, godown rent and the like; and (5) consignee's commission on sales. This account is credited with : (1) gross sales proceeds; and (2) closing stock (if any). The balance of this account represents profit or loss which is transferred to ***'Profit & Loss on Consignment Account'***. At the year end, the balance of the Profit and Loss on Consignment Account is transferred to the General Profit and Loss Account.

The secondary objective of the consignor is to ascertain the amount due from the consignee. For this purpose, he opens a personal account of the consignee. The Consignee Account is debited with gross sales proceeds and credited with: (1) advance made by him (if any); (2) expenses incurred by him in respect of the consignment; and (3) his own commission on sales. The balance shows the amount due from the consignee.

The consignor may price the goods sent on consignment either at 'cost price' or at a higher price which is called 'invoice price'. The accounting procedure in the two cases is slightly different. Therefore, we discuss them separately.

Cost Price Method

Journal entries are as under:

1. For sending goods to the consignee

Consignment to ... Account	Dr.	[cost price]
To Goods Sent on Consignment Account		[cost price]

2. For payment of expenses by the consignor

Consignment to ... Account	Dr.	
To Cash or Bank Account		[If paid]
To Creditors for Expenses Account		[If unpaid]

3. For receipts of advance from the consignee

(a) When payment is received in cash or Bank Draft

Cash or Bank Account	Dr.
To Consignee Account	

(b) When a bill is accepted by the consignee

Bills Receivable Account	Dr.
To Consignee Account	

4. When Account Sales is received from the consignee

Immediately after receiving the Account Sales, the consignor passes the following entries:

(a) For sale of goods by the consignee

Consignee Account	Dr. [Gross sales proceeds]
To Consignment to ... Account	

(b) For expenses incurred by the consignee

Consignment to ....Account	Dr.
To Consignee Account	

(c) For the commission of the consignee

Consignment to ... Account	Dr.
To Consignee Account	

(d) For receiving remittance from the consignee
Cash or Bank Account Dr.
To Consignee Account

5. If the consignee completes the sales before the end of the consignor's accounting year, the consignor closes the Consignment Account by passing the following entry :

(a) When there is a profit on consignment
Consignment to ... Account Dr.
To Profit and Loss on Consignment Account

(b) When there is a loss on consignment
Profit and Loss on Consignment Account Dr.
To Consignment to ... Account

The students should note that a transfer to the Profit and Loss Account would close the Consignment Account but, it is not possible to wait until the Profit and Loss Account is prepared at the end of the accounting year. To overcome this hardship, the profit or loss on consignment is transferred to a special account called 'Profit and Loss on Consignment Account.' This account will also serve the purpose of combining the profits and losses of all consignments in the accounting year. At the end of the year it is transferred to the Profit and Loss Account.

6. At the end of the financial year, the Goods Sent on Consignment Account is closed by passing the following entry:

(a) If the consignor is a manufacturer
Goods Sent on Consignment Account Dr.
To Trading Account

(b) If the consignor is a wholesaler
Goods Sent on Consignment Account Dr.
To Purchase Account

The above adjustment entry should be passed to find out the correct profit of 'General Profit and Loss Account'. We know that every manufacturer prepares Manufacturing Account and the total cost of goods produced is transferred to Trading Account by debiting Trading Account and crediting Manufacturing Account. Now, if any goods have been sent on consignment, out of those goods, the Trading Account must be credited with the cost of goods sent on consignment. If this is not done, the general profit will be understated. Similarly, when the consignor is a wholesaler, whatever he purchases he debits his Purchases Account. Now if any goods that have been sent on consignment out of these goods, ***the Purchases Account must be reduced to that extent*** and the adjusted purchases should be debited to General Trading Account. If this adjustment is not done, the general profit will be understated.

Illustration 1

On 1st March, 2014 Kamal of Calcutta sends 1,000 boxes of tea to Bimal of Bombay on consignment basis. Each box costs ₹ 500. Kamal pays railway freight ₹ 1,000 and insurance ₹ 2,000 and draws upon Bimal a bill for ₹ 2,00,000 for 3 months which was duly accepted and returned.

On 30th September, 2014 Bimal forwards an Account Sales to Kamal showing that 500 boxes have been sold @ ₹ 560 each while 300 boxes were sold @ ₹ 550 each and the remaining boxes were sold @ ₹ 540 each. The expenses incurred by Bimal consisted of carriage charges ₹ 500; and godown rent ₹ 3,500. Bimal is entitled to a commission @ 5% on gross sales proceeds. He encloses a cheque for the balance due to Kamal.

Show how these transactions would be recorded in the books of Kamal, assuming that the bill of exchange was met on its due date. Also assume that Kamal closes the books on 31st December.

Incomplete Consignment and Valuation of Closing Stock

It is not necessary that all consignments should be completed during the accounting year. There may be certain consignments which are incomplete when the consignor's accounting year comes to an end. Under such a situation, the consignee will be required to submit an Account Sales stating sales, expenses and commission upto the ***last date*** of the accounting year. After receiving the Account Sales, the unsold stock with the consignee should be valued. The stock so valued should be credited to the Consignment Account. The entry is:

Stock on Consignment Account Dr.
    To Consignment to ... Account

In the Balance Sheet, this stock is shown as an asset. In the ***next accounting year***, this stock is transferred to Consignment Account. The following entry is passed:

Consignment to .... Account Dr.
    To Stock on Consignment Account

Valuation of Unsold Stock

Now, we discuss the principles and procedures for valuation of consignment stock. We know that stock should be valued at ***cost or market price, whichever is lower***. This, principle applies to consignment stock as well.

The main problem is to ascertain 'cost price' and 'market price.' ***'Cost' includes all expenditure incurred in bringing the goods to a saleable condition and all expenses incurred for sending goods upto the consignee's place. These include freight, carriage, export or import duties, insurance on goods sent, loading and unloading charges, and the like. It should be noted that the expenses may be incurred either by the consignor or by the consignee. All the above expenditures which are included in the cost are popularly known as Non-Recurring Expenditures***. The expenditure incurred after the goods have reached the consignee's place should be ignored for the valuation of stock on consignment. These include godown rent, carriage on sales, establishment expenses, insurance for godown or any other selling expenses.

In the examination, the following format should be followed for valuation of consignment stock :

Valuation of Closing Stock

Particulars	₹.	₹.
Cost price of goods sent		*****
Add : *Consignor's Expenses*	****	
Freight	****	
Carriage	****	
Loading & Unloading charges	****	
Insurance on goods sent	****	
Export & Import duties	****	
Dock dues etc.	****	*****
Add : *Consignee's Expenses*	****	
Cartage	****	
Landing charges	****	
Unloading Expenses	****	*****
Total Cost		*****

$$\text{The cost of unsold goods} = \frac{Total\ \ Cost}{Total\ \ quantity} \text{ x } Unsold\ \ quantity$$

Alternatively,

Valuation of Closing Stock

Particulars	₹.	₹.
Cost price of goods unsold		*****
Add : Proportionate non recurring Expenses by:		
Consignor	****	
Consignee	****	*****

At the end of the accounting year, if some part of the goods are still in transit, the expenses of the consignee are generally not taken into consideration for the valuation of stock in transit

Here, ***'Market Price'*** refers to ***Net Realizable Value (NRV). Applying the concept of conservatism, all other possible expenses to be incurred in selling those goods are to be provided for, which will include the amount of commission payable to the consignee.***

After computing the ***'Cost Price'*** and ***'Market Price'*** in the above manner, the smaller one should be taken as the value of stock on consignment. ***In the examination problem, if there is no indication regarding market price, we should assume that market price is more than the cost price and valuation should be done accordingly.***

Illustration 2

On 30th September, 2014, Dey's Medical of Calcutta sends 500 cases of medicine costing ₹ 1,000 per case to Medicine Corner of Delhi on consignment basis. Dey's Medical incurred the following expenses: packing expense @ ₹ 20 per case (paid in cash); insurance premium ₹ 2,000 (paid by cheque); freight ₹ 10,000 (paid in cash); forwarding agent's expenses ₹ 1,000 (due).

On 31st December, 2014, Medicine Corner forwards an Account Sales to Dey's Medical showing that 200 cases have been sold @ ₹ 1,250 per case while 250 cases were sold @ ₹ 1,200 per case and the 50 cases remained unsold. Medicine Corner paid the following expenses : cartage ₹ 2,000; unloading ₹ 1,000 and ₹ 2,000 as godown rent. Account Sales accompanying an account payee cheque for ₹ 4,00,000.

Under the agreement Medicine Corner was to receive 5% commission on sales.

You are required to show: (1) Consignment to Delhi Account; (2) Medicine Corner Account; (3) Stock on Consignment Account; and (4) Goods sent on Consignment Account in the Ledger of Dey's Medical and Balance Sheet.

On 1st January, 2014 Chatterjee Bros of Calcutta shipped to Shanton Bros of Tokyo 400 musical instruments at the rate of ₹ 350 each. Chatterjee Bros incurred the following expenses on the consignment: cartage ₹ 150, freight ₹ 1,950 and Insurance ₹ 2,500.

The charges incurred by Shanton Bros were landing charges ₹ 450; storage ₹ 1,500 and ₹ 1,250 as fire insurance premium on stock.

On 31st December, 2014, an Account Sales was received from Shanton Bros disclosing that 350 instruments were sold out at ₹ 950 per instrument. Towards the close of the year, suddenly a new type of instrument appeared in the market and there was no possiblity of selling the balance of the goods at a high price. The market price fell down to ₹ 250 per instrument. In the Account Sales, besides their expenses Shanton Bros., charged commission at 15% on the gross sale proceeds. The unsold goods were held by them. A bank draft for the amount due was sent along with the Account Sales.

You are required to prepare:

(1) Consignment to Tokyo Account; (2) Shanton Bros Personal Account; and (3) Goods Sent on Consignment Account in the Ledger of Chatterjee Bros.

				By Bank A/c (Balance)	2,79,425
		3,32,500			3,32,500

Dr. Goods sent on Consignment Account Cr.

Date	Particulars	₹	Date	Particulars	₹
2014 Dec 31	To Purchases A/c	1,40,000	2014 Jan 1	By Consignment to Tokyo A/c	1,40,000

Valuation of Closing Stock

Particulars	₹
Cost price : 400 instruments @ ₹ 350 each	1,40,000
Consignor's Expenses	
Cartage (₹ 150) + Freight (₹ 1,950) + Insurance (₹ 2,500)	4,600
Consignee's Expenses	
Landing charges	450
Total cost	1,45,050

(a) Cost price of 50 instruments = $\frac{1,45,050}{400} \times 50$ = ₹ 18,131.25.

(b) Market Price of an instrument (₹ 250 × 50) = ₹ 12,500; Less: Commission @ 15% — 1,875 = ₹ 10,625;
Therefore, the value of closing stock = ₹ 10,625

Entries in the Books of the Consignee

The following entries are to be made in connection with the consignment:

1. For goods received on Consignment

No entry is made in the books of the consignee because he holds these goods on behalf and on account of the consignor. He may, however, record the details of the goods received in a separate book, called the Consignment Inward Book.

2. For advance made to the consignor

(a) When payment is made by cash or bank draft

Consignor Account Dr.
To Cash or Bank Account

(b) When a bill of exchange is accepted

Consignor Account Dr.
To Bills Payable Account

3. For Payment of Expenses in respect of the consignment

Consignor Account Dr.
To Cash or Bank Account

(4) For Sale of goods

(a) When goods are sold for cash

Cash or Bank Account Dr.
To Consignor Account

(b) When goods are sold on credit

[*See 'Credit Sales and Del credere Commission'*]

5. For Commission

The calculation of actual commission will depend on the agreement between the consignor and the consignee. The entry to be passed:

Consignor Account Dr.
To Commission Received Account

6. For sending a remittance

Consignor Account Dr.

To Cash or Bank Account

On the last date of the accounting year, if there is any balance (Debit/Credit) in the Consignor Account, it should be shown in the Balance Sheet under Sundry Debtors or Sundry Creditors, depending upon the nature of the balance.

The student should note that the consignee will not make any entry in respect of stock on consignment. Similarly, he will not ascertain any profit or loss in respect of goods sold by him on behalf of the consignor. The commission received should be transferred to his Profit and Loss Account at the year end.

Credit Sales and Del Credere Commission

It is not necessary that all the goods are to be sold by the consignee in cash. He may require to sell some part of the goods on credit. When goods are sold on credit, the problem of bad debt arises.

Whether the bad debts loss will be borne by the consignor or the consignee depends upon the fact whether del credere commission is given to the consignee or not.

Remember: (1) The consignor will bear the bad debts loss if no del credere commission is given to the consignee. (2) The consignee will bear the bad debts loss if del credere commission is given to him.

Del Credere Commission is an additional commission paid to a consignee who guarantees the payment in case of credit sale. Where the consignee gets del credere commission, he indemnifies the consignor for all bad debts. To the consignor, it is a ***form of credit insurance.*** **Like ordinary commission, del credere commission is also paid, generally, at a predetermined percentage of the Gross Sales Proceeds. However, there may be a separate agreement between the parties for calculation of the del credere commission.**

Accounting Entries for Credit Sales where no Del Credere Commission is given

In the books of the consignor

1. For Credit Sales

Consignment Debtors Account Dr.

Illustration 6

(a) On 1st November, 2014, C of Calcutta sends goods costing ₹ 1,00,000 to D of Delhi on consignment basis. C paid ₹ 5,000 as railway freight and ₹ 2,000 as insurance. On 31st December, 2014, an Account Sales was received from D disclosing that the entire quantity of goods were sold for ₹ 1,50,000 — out of which, ₹ 30,000 was sold on credit. A customer who purchased goods for ₹ 5,000 failed to pay and the debt proved bad. All other debts were collected by D in full. As per agreement, D is allowed a commission @ 10% on sales. D sends the amount due to C by a cheque.

Prepare necessary ledger accounts in the books of C and D.

(b) Will your answer be different, if in the above Illustration, the consignee is given a del credere commission of 5% on sales (in addition to ordinary commission)—other things remaining the same?

Solution (a)

In the books of C

Somali of Mumbai consigned 100 units of a commodity to Mohua of Kolkata. The goods were invoiced at ₹ 300 so as to yield a profit of 50% on cost. Somali incurred ₹ 2,000 on freight and insurance. Mohua incurred ₹ 1,000 on Salesmen's salary and ₹ 1,600 on godown rent. Mohua sold 50 units for cash at ₹ 320 per unit and 20 units on credit at ₹ 350 per unit. She retained her commission @ 6 per cent (including 1 per cent for the del credere arrangements) and remitted the balance due. Mohua informed that 10 units were damaged on account of bad packing and that she would be able to sell them only for ₹ 160 per unit. A debtor for ₹ 2,000 to whom the goods were sold by Mohua became insolvent and only 50 paise in a rupee was recovered.

Show necessary ledger accounts in the books of Mohua.

Treatment of Discount on Bills in Consignment Account

A consignor may draw a bill on the consignee as an advance on the goods sent to the consignee. After acceptance, the consignor may discount the bill with his banker. ***The discounting charges, however, should not be charged to the Consignment Account*** because it is purely a financial expense. This discounting charge is transferred to the General Profit and Loss Account of the consignor.

Advance Made by the Consignee

An advance is a payment on account. When the consignee makes an advance to the consignor, the advance is adjusted against the amount due from the consignee. The problem of adjusting the advance arises when only a part of the goods are sold. The portion of the advance to be adjusted against the amount due depends on the *nature of the advance* made by the consignee. The consignee may make an advance which is to be *adjusted against the future payment* or the advance may be made by the consignee *as a security of the goods* received on behalf of the consignor. Accounting entries are made according to situations.

When an Advance is *Not Given* as a Security

In the books of the Consignor

(i) For advance received from the Consignee

Cash / Bank / Bills Receivable Account Dr.

To Advance Against Consignment Account

(ii) For adjustment at the end of the period

Advance Against Consignment Account Dr. [Full amount]

To Consignee Account

In the books of the Consignee

(i) For advance given to Consignor
Advance Against Consignment Account Dr.
To Cash / Bank / Bills Receivable Account

(ii) For adjustment at the end of the period
Consignor Account Dr. [Full amount]
To Advance Against Consignment Account

It should be noted that when an advance is not given as a security, the entire amount of advance is to be adjusted against the amount due—even when a part of the goods are sold.

Illustration 8

Arun of Calcutta sent goods costing ₹ 75,000 to Barun of Bombay on consignment basis. Arun paid ₹ 3,000 on various accounts for sending the goods. Barun paid ₹ 1,800 as railway charges and ₹ 750 as godown rent. The consignee sent a bank draft for ₹ 45,000 as advance against the consignment. 4/5ths of the goods were sold at ₹ 87,000. A customer who purchased goods for ₹ 500 failed to pay for which the debt proved bad. The Account Sales sent by the consignee showed that he charged 10 per cent as ordinary commission and 2.5 per cent as Del Credere commission.

You are required to give in the books of Arun :

(1) Consignment Account; (2) Barun Personal Account; (3) Advance against Consignment Account.

Solution

In the Books of Arun

Dr. Consignment to Bombay Account Cr.

Date	Particulars		₹	Date	Particulars	₹
	To Goods sent on Consignment A/c		75,000		By Barun A/c (sale proceeds)	87,000
	To Bank A/c — expenses		3,000		By Stock on Consignment A/c	
	To Barun A/c — expenses				1/5th of (₹ 75,000 + 3,000 + 1,800)	15,960
	Railway charges	1,800				
	Godown rent	750	2,550			
	To Barun A/c — commission					
	Ordinary @ 10%	8,700				
	Del Credere @ 2-$^1/_2$%	2,175	10,875

				By Consignment to Bombay A/c (comm.)	10,875
				By Advance Against Consignment A/c	45,000
				By Balance c/d (amount due)	28,575
		87,000			87,000

Dr. Advance Against Consignment Account Cr.

Date	Particulars	₹	Date	Particulars	₹
	To Barun A/c	45,000		By Bank A/c	45,000

When an Advance is *Given* as a Security of the Goods

In the books of the Consignor

(i) For advance received from the Consignee
Cash / Bank / Bills Receivable Account Dr.
To Advance Against Consignment Account

(ii) For adjustment at the end of the period
Advance Against Consignment Account Dr. [Proportionate amount]
To Consignee Account

In the books of the Consignee

(i) For advance given to Consignor

Advance Against Consignment Account Dr.
To Cash / Bank / Bills Receivable Account

(ii) For adjustment at the end of the period

Consignor Account Dr. [Proportionate amount]
To Advance Against Consignment Account

It should be noted that in this case a proportionate adjustment of advance is to be made against the amount due. For example, if the consignee receives 100 units of goods and makes an advance of ₹ 10,000. At the year end, if 80 units are sold, only ₹ 8,000 of the advance can be adjusted against the amount due.

Illustration 9

Gavaskar of Bombay sent 100 TV sets to Kapil of Chandigarh on consignment basis. The cost price of each set is ₹ 5,000. Gavaskar paid ₹ 100 for cartage, ₹ 1,500 for railway freight and ₹ 400 for insurance premium.

He drew a bill, payable after two months for ₹ 50,000, which was accepted by Kapil, by way of security against the consignment. He then discounted the bill for ₹ 49,900.

Kapil paid ₹ 600 as godown rent and ₹ 400 as sundry expenses. He sold 90 sets @ ₹ 5,400 per set. But he could not realize the sale proceeds of 5 sets from the customers. He was entitled to receive 4% ordinary commission and 1% del credere commission. The net amount due from Kapil was received in time.

Prepare the Consignment Account, Kapil Account and Advance Against Consignment Account in the books of Gavaskar.

Solution

In the books of Gavaskar

Dr. Consignment to Kapil Account Cr.

Date	Particulars	₹	Date	Particulars	₹
	To Goods Sent on Consignment A/c	5,00,000		By Kapil A/c	4,86,000
	To Cash A/c			By Stock on Consignment A/c (Note 1)	50,200
	Cartage	100			
	Railway Freight	1,500			
	Insurance	400			
	To Kapil A/c				
	Godown Rent	600			
	Sundry Expenses	400			
	Commission	24,300			
	To Profit & Loss on Consignment A/c	8,900			
		5,36,200			5,36,200

Dr. Kapil Account Cr.

Date	Particulars	₹	Date	Particulars	₹
	To Consignment to Kapil A/c	4,86,000		By Consignment to Kapil A/c	25,300
				By Advance against Consignment A/c	45,000
				By Bank A/c	4,15,700
		4,86,000			4,86,000

Dr. Advance against Consignment Account Cr.

Date	Particulars	₹	Date	Particulars	₹
	To Kapil A/c (9/10)	45,000		By Bills Receivable A/c	50,000
	To Balance c/d	5,000			
		50,000			50,000

Working Note : (1) Valuation of Closing Stock

Cost price : 100 TV sets @ ₹ 5,000 each	5,00,000	
Add: non recurring expenses (₹ 100 + ₹ 1,500 + ₹ 400)	2,000	Value of Unsold TV = $\frac{5,02,000}{100}$ x 10 = ₹ 50,200
Value of goods sent	5,02,000	

Tutorial Notes:

(1) Sundry expenses should not be considered for valuation of closing stock.
(2) Discount on bill should not be charged to Consignment Account because it is purely a financial expense.
(3) When del credere commission is given to the consignee, the consignor has nothing to do with the bad debts.

Loss of Goods on Consignment

It is possible that a portion of the consignment stock may be stolen or otherwise lost (may be in transit or in the consignee's godown). The consignor will have to bear the loss, but not the consignee. There may also be some inevitable normal losses. In accounting for consignment, losses are classified as *normal and abnormal*. Therefore, in the books of the consignor, accounting treatment for normal and abnormal losses are different.

Accounting for normal losses

Normal losses are inevitable or unavoidable. These may arise due to natural causes like breaking in bulk, evaporation, leakage, drying, etc. No effort can prevent these losses.

Normal loss is treated by ignoring the loss. It means that the value of remaining stock absorbs this loss. Therefore, when there is some normal loss, the value of the remaining goods are artificially inflated to cover the normal loss. For example, a consignment of 100 units costing @ ₹ 0.95 is sent. Due to normal loss, the consignee receives 95 units. The value of stock will become ₹ 1 per unit (instead of the actual price of ₹. 0.95 per unit).

Therefore, when there is no stock remaining unsold, there will be no treatment for normal loss. But where there is some stock remaining unsold, the value of the stock on consignment will be ascertained by applying the following formula:

$$\frac{\textit{Value of the goods received by the consignee}}{\textit{Net quantity received (after normal loss) by the consignee (in units)}} \times \textit{Unsold goods (in units)}$$

Illustration 10

A informed you of the following particulars of his transactions relating to goods consigned to B for the year ended 31.12.2014. Goods sent (10,000 kgs)—₹ 1,00,000; A's expenses—₹ 10,000; B's expenses—freight and insurance—₹ 2,000; selling—₹ 5,000; Sold (8,000 kgs)—₹ 1,12,000; Loss due to natural wastage 100 kgs; Commission @ 5% on gross sales.You are asked to prepare the Consignment Account only with the detailed calculation of unsold stock in the books of A.

Solution

In the Books of A

Dr. Consignment to B Account Cr.

Date	Particulars		₹	Date	Particulars	₹
2014	To Goods sent on Consignment A/c		1,00,000	2014	By B A/c - sale proceeds	1,12,000
?	To Bank A/c - expenses		10,000	Dec. 31	By Stock on Consignment A/c (Note 1)	21,495
Dec. 31	To B A/c - expenses					
	Freight and Insurance	2,000				
	Selling	5,000	7,000

"	To Profit and Loss on Consignment A/c		10,895			
			1,33,495			1,33,495

Working Note: (1) Ascertainment of the value of Stock: We know, when there is a normal loss, it is treated by ignoring the loss, i.e. the value of the remaining goods are artificially inflated. It means remaining goods absorb the normal loss. Therefore, in such a case, closing stock is to be ascertained by applying the following formula :

$$\frac{\text{Value of Goods Sent}}{\text{Quantity received by the Consignee after normal loss}} \times \text{Stock in hand}$$

$$= \frac{1{,}00{,}000 + 10{,}000 + 2{,}000}{10{,}000 - 100} \times 1{,}900 = ₹\ 21{,}495 \text{ (approx.)}$$

Accounting for abnormal losses

Abnormal losses in consignment may arise owing to reasons such as, theft, fire and the like. Again, these may occur either in transit or at the consignee's place. Normal loss is unavoidable but abnormal loss can be avoided. To ascertain the true profit on consignment, abnormal losses are eliminated from the Consignment Account. Therefore, abnormal losses should be charged to the General Profit And Loss Account and Consignment Account should be given due credit for the value of goods lost abnormally. Abnormal losses can be dealt with in two different ways as under:

Method I

(a) When the goods are not insured:

Profit and Loss Account Dr.
To Consignment Account

(b) When the goods are fully insured:

Insurance Claim Account Dr.
To Consignment Account

(c) When the value of goods lost is more than the amount admitted by the insurance company:

Insurance Claim Account Dr. (claim admitted)
Profit and Loss Account Dr. (claim not admitted)
To Consignment Account (value of goods lost)

Method II

Under this method, the whole amount of abnormal loss is transferred to a special account called Abnormal Loss Account by passing the following entry:

Abnormal Loss Account Dr.
To Consignment Account

Now, for closing the Abnormal Loss Account, the following entries are made according to the situation:

(a) When the goods are not insured:

Profit and Loss Account Dr.
To Abnormal Loss Account

(b) When the goods are fully insured:

Insurance Claim Account Dr.
To Abnormal Loss Account

(c) When the value of goods lost is more than the amount admitted by the insurance company:

Insurance Claim Account Dr.
Profit and Loss Account Dr.
To Abnormal Loss Account

The following entry is to be passed under both methods, when the actual claim is received from the insurance company:

Bank Account Dr.
To Insurance Claim Account

Valuation of Abnormal Loss

Particulars	₹.	₹.	
Cost price of goods sent		*****	Value of abnormal loss = $\frac{\textit{Total Cost}}{\textit{Total Quantity}}$ x *Quantity Lost*
Add : Non-recurring expenses upto the point of loss (consignor's + consignee's)		*****	
Total Cost just before loss		*****	

Illustration 11

Romesh of Calcutta consigned 100 packets of medicine, each costing ₹ 500, to his agent Md. Arif of Ahmedabad. He paid ₹ 1,000 towards freight and insurance. 10 packets were destroyed in transit. The consignee took delivery of the remaining packets and spent ₹ 500 as godown rent, ₹ 2,000 as clearing charges and ₹ 500 as selling expenses. The consignee sold 80 packets @ ₹ 600 each.

You are required to calculate the cost of damage and cost of goods in hand at the end.

Solution

Valuation of goods lost in transit	₹	Valuation of goods in hand at the end	₹
Cost of 100 packets @ ₹ 500 each	50,000	Cost of 100 packets just before lost in transit	51,000
Add: Non-recurring expenses up to accident	1,000	Less: Value of 10 packets lost in transit	5,100
Cost of 100 packets just before loss in transit	51,000	Cost of 90 packets after loss in transit	45,900
Therefore, Value of 10 packets = ₹ 51,000 / 100 x 10 =	5,100	Add: Non-recurring exp. after accident (cledaring charges)	2,000
		Total cost of 90 packets	47,900
		Therefore, Value of 10 packets = ₹ 47,900 / 90 x 10 =	5,322

Illustration 12

100 cycles, costing ₹ 150 each were consigned to the agent at Jaipur. Expenses incurred on sending them were ₹ 1,000. On the way, 5 cycles were damaged due to bad handling and insurance claim of ₹ 700 was accepted. Consignee took delivery of the rest and incurred direct expenses of ₹ 285 and indirect expenses of ₹ 150. He sold 80 cycles at ₹ 200 per cycle. Prepare Consignment Account when consignee gets 5% commission on gross sales. also show how abnormal loss and stock at the end is to be calculated.

Solution

In the Books of ...

Dr. Consignment to Jaipur Account Cr.

Date	Particulars	₹	Date	Particulars	₹
	To Goods Sent on Consignment A/c	15,000		By Abnormal Loss A/c (Note 1)	800
	To Cash A/c (Expenses)	1,000		By Consignee A/c (Sales)	16,000
	To Consignee A/c :			By Stock on Consignment A/c (Note 2)	2,445
	Direct expenses	285			
	Indirect expenses	150			
	To Consignee A/c (Commission @ 5%)	800			
	To Profit or Loss on Consignment A/c	2,010			
		19,245			19,245

Working Notes :

(1) Valuation of goods lost in transit	₹	(2) Valuation of goods in hand at the end	₹
Cost of 100 cycles @ ₹ 150 each	15,000	Cost of 100 cycles just before loss in transit	16,000
Add: Non-recurring expenses	1,000	Less: Value of 5 cycles lost in transit	800
Cost of 100 cycles just before lost in transit	16,000	Cost of 95 cycles	15,200
Therefore, value of 5 cycles = ₹ 16,000 / 100 x 5	800	Add: Direct expenses	285
		Total cost of 95 cycles	15,485
		Value of 15 cycles = ₹ 15,485 / 95 x 15	2,445

Illustration 13

Arup consigned 2,000 kg of fine Basmati rice @ ₹ 10 per kg to Sintu. He paid freight ₹ 3,000, dock charges ₹ 2,500 and insurance ₹ 1,500. 800 kg. rice was destroyed in transit due to an accident. Claim admitted by the insurance company was ₹ 4,500. Sintu sold in cash and on credit 1,000 kg. rice @ ₹ 15 per kg. He incurred the following expenses :

Clearing charges ₹ 2,000; Carrying charges ₹ 1,000; Godown rent ₹ 1,200 and Selling expenses ₹ 1,500.

Sintu received commission @ 10% on sales. ₹ 2,000 could not be realised from a debtor.

Show the Consignment Account and determine profit or loss from consignment.

Dr. | **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Trading A/c - transfer	2,00,000		By Consignment to B A/c	2,00,000

In the Books of B

A Account

Dr. | **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Bank A/c (expenses)			By Bank A/c (sale proceeds)	1,92,000
	Cartage	1,000			
	Selling	500			
	Godown rent	500			
	To Commission A/c	9,600			
	To Balance c/d (balance due)	1,80,400			
		1,92,000			1,92,000

Working Notes:

1. Calculation of Abnormal Loss

	₹
Cost of 5,000 kgs @ ₹ 40 per kg.	2,00,000
Add: Expenses prior to the loss (₹ 3,000 + 2,000)	5,000
Value of 5,000 kgs	2,05,000

Therefore, value of 500 kg. is
₹ 20,500 (₹ 2,05,000 x 500 ÷ 5,000).

2. **Calculation of Stock on Consignment**

	₹
Value of 5,000 kgs (Note 1)	2,05,000
Less: Abnormal loss of 500 kgs (Note 1)	20,500
Value of the goods received by the consignee	1,84,500
Add: Non-recurring expenses of the consignee (Cartage)	1,000
Total value of the goods sent to the consignee	1,85,500

The consignee received 4,475 kgs (5,000 kgs – 500 kgs abnormal loss – 25 kgs normal loss). Out of that 3,000 kgs sold by him. Therefore, stock in hand is 1,475 kgs (4,475 – 3,000).
Thus, ₹ 1,85,500 / 4,475 x 1,475 = ₹ **61,142**.

Solution (b)

When the abnormal loss of 500 kgs takes place in the consignee's godown (other things remaining the same) the value of abnormal loss and stock on consignment will be different — which are calculated as under:

Ascertainment of Abnormal Loss and Unsold Stock	₹
Value of the goods received by the consignee	2,05,000
Add: Proportionate expenses of the consignee (cartage)	1,000
	2,06,000

The consignee received 4,975 units (5,000 kgs – 25 kgs normal loss)

Therefore, Value of Abnormal Loss = $\frac{2,06,000}{4,975} \times 500$ = ₹ 20,704 (approx.)

Value of Unsold Stock = $\frac{2,06,000}{4,975} \times 1,475$ = ₹ 61,075 (approx.). Profit on consignment will be ₹ 57,179.

Illustration 15

On 1st January, 2015 ITC Ltd. of Calcutta consigned 10,000 kg of Sunflower Oil, costing ₹ 40 per kg to Dinesh & Co. of Delhi. ITC Ltd. paid ₹ 40,000 as freight and insurance. 200 kg of oil were lost on 15.1.2015 in transit. The insurance claim was settled for ₹ 7,500 and was paid to the consignor directly. Dinesh & Co. took delivery of the consignment on 29th January 2015, and accepted a bill drawn upon them by ITC Ltd. for ₹ 2,00,000 for 2 months. On 31st March, 2015 an Account Sales was received from Dinesh & Co. containing the following information:

(i) 8,000 kg were sold @ ₹ 55 per kg.; (ii) Unloading charges ₹ 9,500; (iii) Godown rent ₹ 1,250; (iv) Printing & Advertisement ₹ 10,000; and (v) 200 kg were lost due to leakage which is considered as normal. Dinesh & Co. is entitled to a commission @ 5% on sales. They paid the amount due in respect of the consignment on 31st March itself.

You are required to show: (i) Consignment to Delhi Account; (ii) Dinesh & Co. Account; and (iii) the Loss in Transit Account in the Books of ITC Ltd.

Messrs Goswami Brothers were appointed agents by Sunrise Limited in 2001. You are given the following particulars relating to the year 2014-15 :

(i) Cost of goods despatched by the Company on consignment ₹ 7,50,000.

(ii) Goods fully destroyed in transit (original cost) ₹ 50,000.

(iii) Expenses incurred by the company towards : Freight ₹ 2,500; Insurance ₹ 1,500.

(iv) Expenses incurred by Goswami Brothers :
Landing and clearing ₹ 1,500; Godown rent ₹ 1,000; Transport charges ₹ 1,000; Advertisement ₹ 800; Insurance ₹ 800.

(v) Advance remitted by the Agent ₹ 1,50,000.

(vi) Bills payable accepted ₹ 25,000.

(vii) Goods destroyed by fire (at original cost) in Agent's godown ₹ 35,000.

(viii) Bad debts ₹ 3,000.

(ix) Unsold stock with Agent at the close of the year (at original cost) ₹ 50,000.
(x) Insurance claim recovered by the consignor towards loss in transit ₹ 48,000.
(xi) Insurance claim recovered by the consignee towards loss by fire ₹ 35,000.

All sales were affected by the Agent at 25% on original cost. He is entitled to a commission of 10% on gross sales.

You are required to show the Consignor's Account (Sunrise Ltd.) as would appear in the books of Goswami Brothers.

Solution

	To Commission A/c		76,875			
	To Balance c/d - amount due		5,46,775			
			8,03,750			8,03,750

Working Note : (1) Calculation of Sale Proceeds

Particulars		₹	
Cost of the goods sent		7,50,000	
Less : Goods lost-in-transit	50,000		Sales were made at 25% of original cost. Therefore, sales are
Goods lost-in-godown	35,000		= ₹ 6,15,000 + 25% of ₹ 6,15,000 = ₹ **7,68,750**.
Unsold stock	50,000	1,35,000	
Cost of goods sold		6,15,000	

Illustration 19

A of Calcutta sent on Consignment basis goods to B of Bombay at an invoice price of ₹ 29,675 and paid for freight ₹ 762, cartage ₹ 231 and insurance ₹ 700. Half the goods were sold by the agents for ₹ 17,500 subject to an agent's commission of ₹ 875, storage expenses of ₹ 200 and other selling expenses of ₹ 350. One-fourth of the consignment was lost in a fire and a claim of ₹ 5,000 recovered.

Draw up the necessary accounts in the books of A and ascertain the profit or loss assuming the closing stock to be one-fourth of the consignment. The agent reported that rest of the goods were also damaged and would need ₹ 700 for repairs.

				By Profit & Loss A/c	2,842
		7,842			7,842

Tutorial Note: : To repair the damaged stock, an expense of ₹ 700 will be incurred. Therefore, we would make a provision of that amount by debiting 'Consignment Account' and crediting 'Provision for Repairs Account'—applying the concept of conservatism, 'anticipate no profit but provide for all possible losses.' In the Balance Sheet, the stock will appear as :

Stock on Consignment	₹ 7,842
Less: Provision for Repairs	₹ 700
	₹ 7,142

When the actual expenses will be incurred, we will pass the following entry:

Provision for Repairs Account	Dr.	700	
To Cash Account			700

Illustration 20

Star Mills Ltd. Surat, sends regular consignments of yarn to X who is the selling agent of the Mill and is entitled to a commission of 10 paise per kg of yarn sold. This includes del credere commission. The following further information is furnished to you:

On 1st July, 2014, stock of yarn with the agent 20,000 kg costing ₹ 50,000.

During the year ended 30th June, 2015 :

Total quantity of yarn consigned 1,60,000 kg. at ₹ 3 per kg

Total quantity of yarn sold 1,50,000 kg at ₹ 3.75 per kg including the opening stock of 20,000 kg.

Total remittances by the agent ₹ 5,10,000.

Railway freight paid by the agent ₹ 40,000.

Of the sales made, X could not collect ₹ 11,000 due to the insolvency of the customer.

5,000 kg of yarn were damaged in transit by the railway for which the agent recovered ₹ 6,000. The damaged goods were sold at the rate of ₹ 1.50 per kg. Show the following Ledger Accounts in the books of Star Mills Ltd for the year ended 30th June, 2015: (a) Consignment Account; (b) Goods Damaged in Transit Account; and (c) X Account.

[I.C.W.A. (Inter) — Adapted]

Solution

In the books of Star Mills Ltd

Dr. **Consignment Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
1.7.2014	To Stock on Consignment A/c	50,000	30.6.2015	By X A/c (sales)	5,62,500
	To Goods Sent on Consignment A/c	4,80,000	"	By Goods Damaged in Transit A/c	16,250

			"	By Profit & Loss A/c (Abnormal loss)	3,250
		16,750			16,750

Dr. **X Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
30.6.2015	To Consignment A/c	5,62,500	30.6.2015	By Consignment A/c	40,000
"	To Goods Damaged in Transit A/c	6,000	"	By Consignment A/c (commission)	15,000
"	To Goods Damaged in Transit A/c	7,500	"	By Goods Damaged in Transit A/c	500
			"	By Bank A/c (Remittance)	5,10,000
			"	By Balance c/d	10,500
		5,76,000			5,76,000

Working Notes : Valuation of Goods Damaged in Transit	₹
Cost of goods sent	4,80,000
Add: Railway freight	40,000
Total cost of 1,60,000 kg	5,20,000

Therefore, 1. The value of 5,000 kg damaged goods = (₹ 5,20,000 / 1,60,000) x 5,000 = ₹ 16,250;

2. The value of closing stock (25,000 kg) = (₹ 5,20,000 / 1,60,000) x 25,000 = ₹ 81,250.

Illustration 21

A consigned to B on 1st January, 2015, 500 bales of cotton costing ₹ 100 per bale. Freight charges incurred in the consignment were ₹ 5,000. A drew a bill on B for ₹ 50,000 payable on 30th June, 2015 which B accepted. The bill was discounted by A with his banker on 31st January, 2015 at 12% p.a.

B rendered Account Sales to A on 31st March, 2015 showing sales of 300 bales for ₹ 80,000 and selling expenses of ₹ 5,000. B's commission was 10%. On this date, B remitted to A net amount due to him.

On 31st May, 2015 B sold the balance stock for ₹ 30,000 after incurring expenses of ₹ 4,000. He remitted ₹ 20,000 to A, the balance being treated as commission earned by him. On 30th June, 2015 the bill accepted by B was dishonoured by him and the amount due to the bank was paid off by A along with incidental charges of ₹ 200.

Pass journal entries in the books of A (including bank transactions).

Solution

Mar 31	B A/c To Consignment to B A/c (Being sale of 300 bales of cotton as per Account Sales)	Dr.	80,000	80,000
	Consignment to B A/c To B A/c (Being expenses incurred by B ₹ 5,000 and commission payable to him ₹ 8,000 as per Account Sales)	Dr.	13,000	13,000
	Bank A/c To B A/c (Being the amount received from B in settlement of sales to date after adjusting bill receivable expenses and commission)	Dr.	17,000	17,000
May 31	B A/c To Consignment to B A/c (Being sale of remaining goods as per Account Sales)	Dr.	30,000	30,000
	Consignment A/c (see note) To B A/c ₹ (4000 + 6000) (Being expenses and commission payable to B)	Dr.	10,000	10,000
	Bank A/c To B A/c (Being the amount received from B in full settlement)	Dr.	20,000	20,000
	Consignment to B A/c To Profit & Loss on Consignment A/c (Being the profit on consignment transferred)	Dr.	32,000	32,000
June 30	B A/c To Bank A/c (Being the bill accepted by B dishonoured and incidental charges ₹ 200 paid)	Dr.	50,200	50,200

Note: Total sales ₹ 30,000 and expenses ₹ 4,000. So net proceeds = (₹ 30,000 – 4,000) = ₹ 26,000, but the amount sent by B is ₹ 20,000. The balance of ₹ 6,000 should be treated as commission.

Illustration 22

Sri Mehta of Bombay consigns 1,000 cases of goods costing ₹ 100 each to Sri Sundaram of Madras. Sri Mehta pays the following expenses in connection with the consignment: carriage ₹ 1,000; freight ₹ 3,000; and loading charges ₹ 1,000.

Sri Sundaram sells 700 cases at ₹ 140 per case and incurs the following expenses : clearing charges ₹ 850; warehousing and storage ₹ 1,700; and packing and selling expenses ₹ 600. It is found that 50 cases have been lost in transit and 100 cases are still in transit. Sri Sundaram is entitled to a commission of 10% on gross sales. Draw up Consignment Account and Sundaram Account in the books of Mehta.

Solution

In the books of Mehta

Dr. Consignment Account Cr.

Date	Particulars	₹	Date	Particulars	₹
	To Goods Sent on Consignment A/c	1,00,000		By Sundaram A/c (sales)	98,000
	To Cash A/c			By Abnormal Loss A/c	5,250
	Carriage	1,000		By Stock on Consignment A/c	15,900
	Freight	3,000		By Stock in Transit A/c	10,500
	Loading charges	1,000			
	To Sundaram A/c				
	Clearing charges	850			
	Warehousing & storage	1,700			
	Packing and selling	600			
	Commission	9,800			
	To Profit & Loss on Consignment A/c	11,700			
		1,29,650			1,29,650

Dr. Sundaram Account Cr.

Date	Particulars	₹	Date	Particulars	₹
	To Consignment A/c	98,000		By Consignment A/c (expenses)	3,150
				By Consignment A/c (commission)	9,800
				By Balance c/d	85,050
		98,000			98,000

Working Notes :

(1) Valuation of Abnormal Loss	₹	(3) Valuation of Closing Stock	₹
Cost of 1,000 cases @ ₹ 100 each	1,00,000	Total cost of 1,000 cases	1,05,000
Add: Non recurring expenses upto accident	5,000	Less : Cost of 50 cases lost in transit	5,250
Total cost of 1,000 cases	1,05,000		99,750
Therefore, value of 50 cases = ₹ (1,05,000 / 1,000) x 50 =	5,250	Less: Cost of 100 cases still in transit	10,500
(2) Valuation of Stock in Transit	₹	Cost of 850 cases	89,250
Total cost of 1,000 cases (as above)	1,05,000	Add: Non recurring expenses of consignee (clearing charge)	850
Therefore, value of 100 cases (₹ 1,05,000 / 1,000) x 100 =	10,500	Total cost of 850 cases	90,100
		Therefore, value of 150 cases = (₹ 90,100 / 850) x 150 =	15,900

Overriding Commission

It is an extra commission which, in addition, to the ordinary commission is allowed by the consignor to the consignee. This commission is normally granted in case sales exceed a specified amount. It can also be an incentive to the consignee for creating market for a new product.

Illustration 23

On 1.10.2013, S Mittal of Faridabad sent on consignment to S Bros of Kolkata 100 boxes of goods costing ₹ 1,200 each and incurred ₹ 4,600 as freight, ₹ 300 as cartage and ₹ 600 as insurance in consigning the goods.

S Bros accepted a bill on 12.10.2013 at 3 months for 60% of the normal selling price of goods and S Mittal discounted the bill on 15.11.2013 at a discount of 12% p.a. The normal selling price was cost plus 45%.

S Bros had incurred ₹ 1,500 as unloading charges, ₹ 700 as godown rent and ₹ 1,600 as selling expenses. He was entitled to a commission @ 6% on normal selling price plus 20% of any surplus over and above the normal selling price.

He reported that 3/5th of the goods received had been sold for ₹ 1,16,400 and 10 boxes of goods were damaged on account of bad packing which would be sold only for ₹ 725 per box. It was found that 10 boxes of goods were still in transit on 31.12.2013 when the accounts of the consignor were closed. The amount due to S Mittal was remitted by a bank draft. Prepare necessary accounts in the books of S Mittal.

Date	Particulars	₹	Date	Particulars	₹
2013			2013		
Dec. 31	To Consignment to Kolkata A/c :		Dec. 31	By Balance c/d	39,878
	Good boxes	33,063			
	Damaged boxes	6,815			
		39,878			39,878

Working Notes :

(1) Calculation of Goods in Transit

	₹
Cost price of 10 boxes	12,000
Add: Proportionate expenses of the consignor (₹ 5,500 × 10 / 100)	550
Value of goods in transit	12,550

(2) Out of 100 boxes sent, 10 boxes are still in transit at the year end. Therefore, number of boxes received by the consignee is 100 – 10 = 90 boxes. The consignee sold 3/5th of 90 boxes = 54 boxes. Therefore, boxes in hand is calculated as :

damaged boxes	10 boxes
good boxes (36 – 10)	26 boxes
	36 boxes

Calculation of Stock on Consignment (good boxes)

	₹
Cost of 26 boxes (26 × ₹ 1,200)	31,200
Add: Proportionate expenses of the consignor (₹ 5,500 / 100 × 26)	1,430
Add: Proportionate non-recurring expenses of the consignee (₹ 1,500 / 90 × 26)	433
Value of stock on consignment (good boxes)	33,063

Calculation of Stock on Consignment (damaged boxes)

Sales value of 10 boxes (10 × ₹ 725)	7,250
Less: Ordinary commission payable (6% on ₹ 7,250)	435
Value of stock on consignment (damaged boxes)	6,815

(3) Calculation of Commission

Normal selling price per unit = Cost price + 45% of cost price = ₹ 1,200 + 45% of ₹ 1,200 = ₹ 1,740

Ordinary commission (6% on 54 × ₹ 1,740)	5,638
Special commission [20% on (₹ 1,16,400 – 54 × 1,740)]	4,488
	10,126

(4) It is assumed that the bill was drawn as an advance against the security of the goods sent. Therefore, the advance will be adjusted proportionately, which is calculated as under :

60% of (26 × ₹ 1,740 + 10 × ₹ 725) = ₹ 31,494.

(5) Amount of the bill = 60% of (₹ 1,740 × 100) = ₹ 1,04,400.

(6) Discounting charges of the bill is a financial charge. It should be debited in the Profit and Loss Account.

Illustration 24

X of Calcutta sent 80 machines to Y of Bombay on 1st January, 2014 on the following terms:

1. All the machines were to be sold 25% above the cost price of ₹ 20,000 each. Any deficit in selling price was to be borne by Y and 50% of the surplus selling price was to be retained by him.
2. Y would get 3% commission and 2% Del Credere commission on all sales. X incurred transport charges of ₹ 80,000. Y sent Account Sales on 31st December, 2014 as: (i) 20 machines sold for ₹ 24,000 each; (ii) 40 machines sold for ₹ 30,000 each; (iii) 5 machines sold for ₹ 25,000 each. (iv) Unloading charges ₹ 8,000; and (v) Selling expenses ₹ 5,000. Y sent a bank draft for the net amount due to X along with the Account Sales.

On 30th June, 2015 Y sent a further Account Sales as: (a) 5 machines sold for ₹ 22,000 each; (b) 10 machines sold for ₹ 40,000 each and sent a bank draft for the amount due.

X closed its books on 31st December each year. Prepare Ledger Accounts in the books of X.

30.6.2015	To Consignment to Bombay A/c	5,10,000	30.6.2015	By Consignment to Bombay A/c	85,500
			"	By Bank A/c	4,24,500
		5,10,000			5,10,000

Working Notes :

(1) Minimum selling price = Cost + 25% Profit on cost = ₹ 20,000 + 5,000 = ₹ 25,000

(2) Calculation of Commission

	₹
2014 5% on Sales proceeds of ₹ 18,05,000	90,250
50% of surplus realization : 40 × (₹ 30,000 – ₹ 25,000)	1,00,000
	1,90,250
Less: Deficit in selling price : 20 × (₹ 25,000 – 24,000)	20,000
	1,70,250
2015 5% on Sales proceeds of ₹ 5,10,000	25,500
50% of surplus realization : 10 × (₹ 40,000 – 25,000)	75,000
	1,00,500
Less: Deficit in selling price : 5 × (25,000 – 22,000)	15,000
	85,500

(3) Valuation of Closing Stock

Particulars	₹.	
Cost price of 80 machines	16,00,000	Therefore, value of closing stock
Add : Non-recurring expenses (₹ 80,000 + ₹ 8,000)	88,000	= ₹ 16,88,000 / 80 x 15 = ₹ 3,16,500.
Total Cost	16,88,000	

Illustration 25

X of Calcutta sent on15th January, 2015, a consignment of 500 bicycles costing ₹ 100 each to Y of Bombay Expenses of ₹ 700 were met by the consignor. Y of Bombay spent ₹ 1,500 for clearance and the selling expenses were ₹ 10 per bicycle.

Y sold on 4th April, 2015, 300 bicycles @ ₹ 160 each and again on 20th June, 2015, 150 bicycles @ ₹ 172 each.

Y was entitled to a commission of ₹ 25 per bicycle sold plus one-fourth of the amount by which gross sale proceeds, less total commission thereon, exceeded a sum calculated @ ₹ 125 per bicycle sold. Y sent the amount due to X on 30th June, 2015. You are to show necessary accounts in the books of X.

15.1.2015	To Goods Sent on Consignment A/c	50,000	30.6.2015	By Y A/c (sales)	73,800
"	To Bank A/c (expenses)	700	"	By Consignment Stock A/c	5,220
30.6.2015	To Y A/c				
	Clearance	1,500			
	Selling expenses	4,500			
	Commission (Note 1)	12,510			
"	To Profit & Loss on Consignment A/c	9,810			
		79,020			79,020

Dr. Y Account Cr.

Date	Particulars	₹	Date	Particulars	₹
30.6.2015	To Consignment to Y A/c	73,800	30.6.2015	By Consignment to Y A/c	6,000
			"	By Consignment to Y A/c	12,510
			"	By Bank A/c	55,290
		73,800			73,800

Working Notes: (1) Calculation of Commission

Let total commission payable to Y = X

x = [(450 x 25) + 1/4 {(73,800 – x) – (450 x 125)}]

or x = 11,250 + 1/4 (73,800 – 56,250 – x)

or x = 11,250 + 1/4 (17,550 – x)

or x = 11,250 + 4,387.5 – 1/4x or x+1/4x = 15,637.5 or 5x = 62,550 or x = ₹ 12,510.

(2) Valuation of Closing Stock

	₹
Cost @ ₹ 100 =	50,000
Add: Non recurring exp (700 + 1,500)	2,200
Cost of 500 bicycles	52,200
Therefore, cost of 50 bicycles	5,220

Return of Goods from the Consignee

Owing to wrong policy, it is quite possible that some part of the goods may be returned by the consignee to the consignor. When goods are returned, the consignor passes the following entry:

Goods Sent on Consignment Account Dr.
To Consignment to ... Account

When goods are returned, there will definitely be some expenses. These expenses will be paid either by the consignor or by the consignee. ***The problem arises whether the expenses incurred should be charged to the Consignment Account or not.***

Some accountants say that since the expense are related to the consignment, it should be charged to the Consignment Account. Others argue that the expenses on returning the goods are not expenses for the consignment, rather it is a policy cost, so it should be charged to General Profit and Loss Account in place of Consignment Account.

In examinations, the expenses on returning the goods are generally charged to the Consignment Account.

The consignor passes the following entry:

Consignment to ... Account Dr.
To Cash/Bank Account [when paid by consignor]
To Consignee Account [when paid by the consignee]

Illustration 26

On 1.4.2014 Mr Doshi of Darjeeling consigned 2,000 kg of tea costing ₹ 60 per kg. to Mr. Naik of Nagpur. Mr Doshi incurred the following expenses: Freight ₹ 2,000; insurance ₹ 400 and sundry expenses ₹ 600.

During the year ended 31.3.2015, Mr. Naik incurred the following expenses: Freight ₹ 600; godown rent ₹ 500 and carriage to godown ₹ 1,000. On 1.12.2014 Mr. Naik sold 1,200 kg of tea for cash at a profit of 25% on sales. On 15.12.2014, Mr. Naik returned 150 kg. of tea, which were of poor quality to Mr. Doshi and paid returned freight and carriage charges of ₹ 250. Out of the remaining tea, 200 kg being partially damaged were valued at 30% less than cost. Mr. Naik charged his commission at 5% and the balance so far due from him to Mr. Doshi on 31.3.2015. Mr Doshi closes his books every year on 31st March.

You are required to prepare the following accounts in the books of Mr Doshi:

(a) Consignment to Nagpur Account; (b) Goods Sent on Consignment Account; (c) Personal Account of Mr Naik.

Solution

In the books of Mr Doshi

Less: Commission @ 5%	420	7,980		
Abnormal Loss		4,420		

Invoice Price Method

Sometimes, the consignor may prefer to send goods to the consignee at a higher price than the cost price and, accordingly, prepares the 'Proforma Invoice' by adding some profit on cost or on sales. For example, C of Calcutta consigned 100 cases of goods to D of Delhi on 1st January, 2015. The cost per case is ₹ 500. The Proforma Invoice was made to show a 20% profit on cost.

Here, Proforma Invoice will be prepared @ ₹ 600 (₹ 500 + 20% of 500) per case and the Consignment Account will be debited with ₹ 60,000 though the actual cost of goods is ₹ 50,000.

The goods are charged to the consignee not at cost but at higher price with a view

(i) to keep the profit on consignment secret;

(ii) to give incentive to the consignee to realize the highest possible price; and

(iii) to make him charge a uniform price.

The method of preparation of accounts is the same as in the *cost price method*, except for a few adjustments which are explained below. ***Journal Entries*** are as under:

1. For sending goods to the consignee

Consignment to .... Account	Dr.	
To Goods Sent on Consignment Account		(Invoice value of goods sent)

2. For payment of expenses by the consignor

Consignment to ... Account	Dr.	
To Cash/Bank Account		(If paid)
To Creditors for Expenses Account		(If unpaid)

3. For receipts of advance from the consignee

(a) When payment is received in cash or bank draft

Cash or Bank Account	Dr.
To Consignee Account	

(b) When a bill is accepted by the consignee

Bills Receivable Account	Dr.
To Consignee's Account	

4. For Abnormal Loss

Abnormal Loss Account	Dr.
To Consignment to ... Account	

5. For closing Abnormal Loss Account

Insurance Claim Account	Dr. [claim admitted]
Consignment Account	Dr. [loading on goods lost]
Profit and Loss Account	Dr. [balance]
To Abnormal Loss Account	

6. When Account Sales is received from the consignee

Immediately after receiving the Account Sales, the consignor will pass the following entries:

(a) For sale of goods by the consignee

Consignee Account	Dr. (Gross sales Proceeds)
To Consignment to ... Account	

(b) For expenses incurred by the consignee

Consignment to ... Account	Dr.
To Consignee Account	

(c) For commission of the Consignee

Consignment to ... Account	Dr.
To Consignee Account	

(d) For receiving remittance from the consignee

Bank Account	Dr.
To Consignee Account	

7. For bringing down the value of goods sent to its cost

Goods sent on Consignment Account	Dr. (Difference between Invoice value and cost)
To Consignment to ... Account	

8. For stock on consignment

Stock on Consignment Account	Dr. (Proportionate Invoice value plus proportionate
To Consignment to ... Account	non recurring expenses)

9. For adjusting value of Closing Stock

Consignment to ... Account	Dr. (Total loading / Total qty x Unsold qty)
To Stock Reserve Account	

10. The profit should be calculated in the usual manner

(a) For profit on consignment

Consignment to ... Account Dr.
  To Profit and Loss on Consignment Account

(b) For loss on consignment

Profit and Loss on Consignment Account Dr.
  To Consignment to ... Account

11. The balance of the 'Goods sent on Consignment Account' should be transferred to Trading Account (If the consignor is a manufacturer) or to a Purchases Account (if the consignor is a trader).

12. The balance of the 'Stock on Consignment Account' and 'Stock Reserve Account' should be carried down on the respective side of the account. In the Balance Sheet Stock on Consignment Account should be shown on the assets side and Stock Reserve should be shown by way of deduction from stock on consignment.

Balance Sheet as at ....

Liabilities	₹	Assets	₹
		Stock on Consignment Less: Stock Reserve	**** ****

13. At the beginning of the next accounting year, the balance of the Stock on Consignment Account will be transferred to the debit side of the Consignment Account and the Stock Reserve will be transferred to the credit side of the Consignment Account.

Illustration 27

Tilak of Tatanagar consigned goods costing ₹ 2,00,000 to his agent Pulak of Patna. The invoice was made pro-forma so as to show a profit of 25% on cost. Tilak paid freight and insurance ₹ 4,000. Pulak sold part of the consignment for ₹ 1,76,000 at a uniform price of 10% over invoice price and spent ₹ 6,000 as warehousing charges and ₹ 2,000 as selling expenses. Pulak is entitled to a commission of 5% on sales and 20% of the net profit after charging commission on sales. Draw up the Consignment Account in the books of Tilak.

Solution

	To Profit and Loss on Consignment A/c	22,912			
		28,640			28,640

Working Notes :

1. Invoice price = Cost price + 25% profit on cost (loading) = ₹ 2,00,000 + ₹ 50,000 = ₹ 2,50,000.

2. Valuation of Stock on Consignment

	₹
Invoice price of the goods sent	2,50,000
Less: Invoice price of the goods sold (₹ 1,76,000 / 110 × 100)	1,60,000
Invoice price of the stock on consignment	90,000
Add: Proporationate non-recurring expenses (₹ 4,000 × 90,000 / 2,50,000) — Freight and Insurance	1,440
	91,440

3. Loading on Stock on Consignment = ₹ 90,000 × 25 / 125 = ₹ 18,000.

Illustration 28

On 1st January, 2014 Seth Bros. of Kandla consigned 200 cycles to Panigrahi & Sons of Paradeep. Each cycle costing ₹ 800. The goods were charged at a proforma invoice price to show a 25% profit on cost. On the same date, the consignor paid ₹ 4,000 as freight and insurance. On 30th April, the consignee sent a bank draft for ₹ 1,00,000 to the consignor as advance. On 31st December, 2014 the consignee sent an Account Sale informing that 180 cycles have been sold for ₹ 1,200 each. They have incurred the following expenses in respect of the consignment: (i) Unloading charges ₹ 1,000; (ii) Cycle fitting charges ₹ 2,000; and (iii) Godown rent ₹ 4,200. With the Account Sale the consignee sent a remittance for the balance due to the consignor after deducting commission of 5% on gross sale proceeds.

You are required to show necessary Ledger Accounts in the books of Seth Bros and Seth Bros Account in the books of Panigrahi & sons.

31.12.2014	To Panigrahi & Sons A/c	1,00,000	30.4.2014	By Bank A/c	1,00,000

Working Notes :

1. Invoice Price = Cost price + 25% profit on cost = ₹ 800 + ₹ 200 = ₹ 1,000;

2. Loading per cycle = Invoice price – Cost price = ₹ 1,000 – 800 = ₹ 200;

3. Total Loading = 200 x 200 = ₹ 40,000;

4. Loading on Unsold stock = (₹ 40,000 / 200) x 20 = ₹ 4,000;

5. Valuation of Closing Stock

	₹
Invoice price of goods sent	2,00,000
Add: Freight & insurance : 4,000 + Unloading charges : 1,000 + Fitting charges : 2,000	7,000
Value of 200 cycles at Invoice price	2,07,000

Therefore, value of 20 unsold cycles = ₹ 20,700.

6. Advance of ₹ 1,00,000 has not been treated as security on goods sent.

Invoice Price—Memorandum Column Method

When goods are sent at a proforma invoice price this method may be used for writing up the Consignment Account and Goods sent on Consignment Account. This method is a modification of the cost price method. Under this method, Consignment Account is provided with an additional column in which memorandum entries in respect of invoice value of goods consigned, amount of sales and value of unsold stock are recorded. This memorandum column is meant only for information and the profit or loss on consignment will not be affected. *The solution of the previous illustration under this method is given below:*

Dr. Consignment to Paradeep Account Cr.

Date	Particulars	Memo	Amount	Date	Particulars	Memo	Amount
1.1.2014	To Goods Sent on Consignment A/c	2,00,000	1,60,000	31.12.2014	By Panigrahi & Sons A/c	2,16,000	2,16,000
	To Bank A/c (freight)	4,000	4,000		By Stock A/c	20,700	16,700
31.12.2014	To Panigrahi & Sons A/c						
	Unloading	1,000	1,000				
	Fitting charges	2,000	2,000				
	Godown rent	4,200	4,200				
	Commission	10,800	10,800				
	To Profit & Loss on Consignment A/c	14,700	50,700				
		2,36,700	2,32,700			2,36,700	2,32,700

Dr. Goods Sent on Consignment Account Cr.

Date	Particulars	Memo	Amount	Date	Particulars	Memo	Amount
31.12.2014	To Purchases A/c	2,00,000	1,60,000	1.1.2014	By Consignment to Paradeep A/c	2,00,000	1,60,000

It should be noted that the memo column may be added and balanced but the profit or loss disclosed by that column is immaterial. The actual profit or loss will be disclosed by amount column of the Consignment Account. Other accounts will appear as usual, so these accounts have not been shown.

Illustration 29

Goods at an invoice value of ₹ 1,32,000 were consigned by Choudhury & Co. of Calcutta to their agent Gupta & Co. of Allahabad at a proforma invoice of 20% profit on cost.

Freight paid by the consignor amounted to ₹ 5,000. Gupta & Co. was allowed 5% ordinary commission and 3% del credere commission on gross sales. They were also allowed 5% of the net profits as extra commission after charging such commission. Allahabad expenses were : landing and clearing charges ₹ 1,020, godown insurance premium ₹ 2,500.

3/4th of the goods were sold at 25% profit on sales, 1/10th of the balance of goods were destroyed by fire and a claim for ₹ 8,500 was settled by the insurance company.

Prepare Consignment Account, Gupta & Co. Account, Stock Destroyed Account and Consignment Stock Account in the books of Choudhury & Co.

		1,10,000			1,10,000

Dr. Stock Destroyed Account Cr.

Date	Particulars	₹	Date	Particulars	₹
	To Consignment to Allahabad A/c (I.P.)	3,450		By Consignment to Allahabad A/c (loading)	550
	To Profit & Loss A/c	5,600		By Insurance Company A/c (Note 6)	8,500
		9,050			9,050

Dr. Consignment Stock Account Cr.

Date	Particulars	₹	Date	Particulars	₹
	To Consignment to Allahabad A/c	31,055		By Balance c/d	31,055

Working Notes : (1) Loading on Goods Sent	₹	**(2) Calculation of Sales**	
Invoice price of goods sent	1,32,000	Cost price of goods sent (₹ 1,32,000 – 22,000)	1,10,000
Loading is 1/5th on cost, or, 1/6th of invoice price, i.e. **22,000**		Sales = ₹ 1,10,000 x 3/4 x 4/3 = **1,10,000**	
(3) Valuation of Goods Destroyed and Closing stock	₹	**(4) Calculation of Loading on Stock Destroyed and Unsold Stock**	
Invoice price of goods sent	1,32,000	Total loading	32,000
Add: Consignor's expenses	5,000	Loading on stock destroyed = 1/40 x ₹ 22,000	550
Consinee's expenses (Non-recurring)	1,020	Loading on unsold stock = 9/40 x ₹ 22,000	4,950
	1,38,020	**(5) Extra Commission**	
3/4th of the goods are sold. Therefore, balance remains 1/4th Goods destroyed 1/4 x 1/10 = 1/40		Profit before special commission = ₹ 11,685. Therefore extra commission is = 5/105 x ₹ 11,685	556
Invoice price of goods destroyed = 1/40 x ₹ 1,38,200	3,450	**(6)** In practice, insurance company compensates the policy-holder to the extent of actual loss. Actual loss is ₹ 2,900 but in the question, it is given that claim admitted by the insurance company is ₹ 8,500, which in our opinion is not correct.	
Closing stock 1/4 x 9/10 = 9/40 Invoice price of unsold stock = 9/40x ₹ 1,38,020	31,055		

Illustration 30

Calcutta Ayurvedic Ltd. produces a bottle of "Draksharista" at a cost of ₹ 10. They appointed Madras Medical Stores of Madras as their agent on the terms that the agent would get commission @ 10% on invoice price of goods sold and also an extra commission at 25% on any excess amount realised over invoice price.

On 1.7.2014, Calcutta Ayurvedic Ltd. sent 50 boxes of "Draksharista" each box containing 50 bottles at invoice price showing a profit of $33^1/_3$% on such invoice price. They spent ₹ 3,000 for freight and ₹ 2,000 for insurance. 5 boxes were completely destroyed in transit and insurance claim of ₹ 2,300 was realised from the insurance company. The agent took delivery of the remaining goods and spent ₹ 2,000 for duty and ₹ 1,000 for freight to carry the goods to the rented godown. He also sent a Bill of Exchange for ₹ 20,000 payable after 2 months to the consignor as advance.

At the end of the year, the agent reported that 40 boxes were sold at ₹ 18 per bottle and 1 box of goods was lost due to bad packaging. This would be treated as normal loss. The agent remitted a bank draft for the net amount after deducting his commission, advance money, godown rent ₹ 800 and selling expense ₹ 200.

On 1.1.2015, Calcutta Ayurvedic Ltd. discounted the bill of ₹ 20,000 for ₹ 19,800. On 1.3.2015, bank informed that the bill was dishonoured. Calcutta Ayurvedic Ltd. demanded the entire amount along with an additional amount of ₹ 200 as interest. The Madras agent sent a bank draft for the amount on 15.3.2015.

You are asked to show the following Ledger Accounts in the books of the consignor : (a) Consignment to Madras Account; (b) Madras Medical Stores Account; (c) Consignment Stock Account; (d) Consignment Stock Destroyed Account; (e) Consignment Stock Reserve Account.

Solution

The Account Sales of 1,200 transistor sets received from and sold on account of and the risk of Sri U. Chopra, Kolkata.

Particulars		₹	₹
1,200 Transistor sets @ ₹ 1,200			14,40,000
Less : Expenses :	₹		
Unloading expenses	3,000		
Selling Expenses	4,000		
Transport Charges	6,100		
Godown Rent	6,000		
Advertisements	2,000	21,100	
Less: Commission :			
5% Ordinary Commission	72,000		
1% Del Credere Commission	14,400	86,400	1,07,500
			13,32,500
Less : Advance sent on 10.1.2015			2,50,000
			10,82,500
Bank draft enclosed; Stock in hand (31.3.2015) — 100 sets			E. & O. E.
Dated, Madras, the 26th April, 2015			S. Raman

On further information you come to know that :

(i) Bad Debts amounted to ₹ 2,400 against 2 sets;

(ii) 20% above the invoice price is the sale price which is equal to cost plus 50%;

(iii) Chopra incurred forwarding expenses @ ₹ 10 per set; and

(iv) During transit 10 sets became fully damaged and Chopra recovered from insurance the full amount of the original cost.

You are required to prepare the Consignment Account, Goods Sent on Consignment Account and Loss in Transit Account in the books of Chopra.

Solution

In the books of Mr. Chopra

Dr. Consignment to Madras Account Cr.

Date	Particulars	₹	Date	Particulars	₹
	To Goods Sent on Consignment A/c (Note 1)	13,10,000		By Goods Sent on Consignment A/c - loading	2,62,000
	To Bank A/c — forwarding expenses	13,100		By Loss in Transit A/c	10,100
	To S. Raman A/c — expenses :			By S. Raman A/c	14,40,000

Date	Particulars	₹	Date	Particulars	₹
	To Consignment to Madras A/c	2,62,000		By Consignment to Madras A/c	13,10,000
	To Purchases A/c - transfer	10,48,000			
		13,10,000			13,10,000

Dr. **Loss in Transit Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Consignment to Madras A/c	10,100		By Consignment to Madras A/c (Loading)	2,000
				By Bank A/c - Insurance claim (Note 2)	8,000
				By Profit and Loss A/c	100
		10,100			10,100

Working Notes :

(1) Sale price of each set is ₹ 1,200 (₹ 14,40,000 ÷ 1,200). Therefore, invoice price of each set is ₹ 1,000 (₹ 1,200 × 100 ÷ 120). Invoice price of (1,200 + 100 + 10) 1,310 sets is 1,310 × ₹ 1,000 = ₹ 13,10,000. Cost plus 50% = Selling price. Therefore, cost price of each transistor = ₹ 1,200 / 150 x 100 = ₹ 800. Loading per set = ₹ 1,000 – ₹ 800 = ₹ 200.

(2) It is assumed that the original cost does not include forwarding expenses of ₹ 10 per set.
The original cost will be 10 x ₹ 800 = ₹ 8000

Illustration 32

Rahim of Bombay consigned to Raju of Madras goods to be sold at invoice price which represents 125% of cost. Raju is entitled to a commission of 10% on sales at invoice price and 25% of any excess realised over invoice price. The expenses on freight and insurance incurred by Rahim were ₹ 10,000. The account sales received by Rahim shows that Raju effected sales aggregating to ₹ 1,00,000 in respect of 75% of the consignment. His selling expenses to be reimbursed were ₹ 8,000, 10% of the consignment goods of the value of ₹ 12,500 were destroyed by fire at the Madras godown and the insurance company paid ₹ 12,000 net of salvage. Raju remitted the balance in favour of Rahim. Prepare the Consignment Account and the account of Raju in the books of Rahim along with necessary working.

[C.A. (Foundation) — Adapted]

Solution

	To Raju A/c (Expenses — selling)	8,000		By Abnormal Loss A/c (Note 2)	13,500
	To Raju A/c — Commission (Note 4)	10,938		By Stock on Consignment A/c (Note 3)	20,250
	To Stock Reserve A/c (Note 5)	3,750		By Profit and Loss on Consignment A/c	1,438
	To Abnormal Loss A/c (Note 6)	2,500			
		1,60,188			1,60,188

Dr. **Raju Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Consignment to Madras A/c — Sales	1,00,000		By Consignment to Madras A/c (Selling Exp.)	8,000
				By Consignment to Madras A/c (Commission)	10,938
				By Bank A/c (Final payment)	81,062
		1,00,000			1,00,000

Working Notes :

(1) The value of 10% of the goods destroyed by fire is ₹ 12,500.
Therefore, the invoice value of the goods sent is ₹ 12,500 / 10% = ₹ 1,25,000.

(2) Valuation of Abnormal Loss	₹
Value of stock lost by fire	12,500
Add: Proportionate expenses upto fire (10% of ₹ 10,000)	1,000
Value of abnormal loss at invoice price	13,500

(3) Valuation of Stock on Consignment	₹
Invoice value of unsold stock (15% of ₹ 1,25,000)	18,750
Add: Proportionate non-recurring expenses (15% of ₹ 10,000)	1,500
	20,250

(4) Calculation of Commission	₹
Sale proceeds (75% of Consignment)	1,00,000
Less: Invoice value of sale proceeds (75% of ₹ 1,25,000)	93,750
Excess sale proceeds received over invoice price	6,250
Therefore, commission is :	
(1) @ 10% on sales in invoice price	9,375
(2) @ 25% on excess sale proceeds	1,563
	10,938

(5) Calculation of Stock Reserve	₹
Total loading on goods sent	25,000
Therefore, loading on closing stock is 15% of ₹ 25,000	3,750

(6) Loading on Abnormal Loss	₹
Total loading on goods sent	25,000
Therefore, loading on goods lost by fire (10%)	2,500

Dr. **Abnormal Loss Account** **Cr.**

		14,500			14,500

Illustration 33

Tanya Motors of Delhi purchased 50 used Maruti cars for ₹ 50,00,000. Out of these, 30 cars were sent on consignment to Hari Motors of Kanpur at a selling price of ₹ 1,20,000 per car. The consignor paid ₹ 60,000 in sending the cars to Kanpur. Hari Motors sold 25 cars for ₹ 33,00,000. Hari Motors incurred ₹ 30,000 as the selling expenses. Out of the remaining 5 cars, Hari Motors kept one car for their personal use at an agreed price of ₹ 1,25,000. 2 cars got damaged and were sold for ₹ 2,00,000 only. Owing to fall in market price of old cars, the value of remaining cars in stock be reduced by 10%. Tanya Motors sold 20 cars at Delhi for ₹ 25,00,000. Hari Motors is entitled to 5% commission on sales.

Prepare the Consignment Account, Trading and Profit and Loss Account of Tanya Motors and the account of Tanya Motors in the books of the consignee, Hari Motors.

On 1st July, 2014, M of Madras consigned goods to the value of ₹ 50,000 to P of Patna. This was made by adding 25% on the cost. M paid ₹ 2,500 for freight and ₹ 1,500 for insurance. During transit 1/10th of the goods was totally destroyed by fire and a sum of ₹ 2,400 was realised from the insurance company.

On arrival of the goods, P paid ₹ 1,800 as carriage to godown. During the year ended 30th June, 2015, P paid ₹ 3,600 for godown rent and ₹ 1,900 for selling expenses. 1/9th of the remaining goods were again destroyed by fire in godown and nothing was recovered from the insurance company. Upto 30th June, 2015, P sold half of the original goods for ₹ 30,000 and charged a commission of 5% on sales. On 30th June, 2015, P sent a bank draft to M for the amount so far due from him. You are required to prepare Consignment Account in the books of M of Madras for the year ended 30th June, 2015.

Solution

In the books of M

Dr. Consignment to Patna Account Cr.

Date	Particulars	₹	Date	Particulars	₹
1.7.2014	To Goods Sent on Consignment A/c	50,000	1.7.2014	By Goods Sent on Consignment A/c (loading)	10,000
	To Bank A/c :			By Abnormal Loss A/c (during transit : Note 1)	5,400
	Freight	2,500	30.6.2015	By P A/c (Sales)	30,000
	Insurance	1,500	30.6.2015	By Abnormal Loss A/c (in godown : Note 2)	5,600
	To Abnormal Loss A/c (loading : Note 1)	1,000	30.6.2015	By Stock on Consignment A/c (Note 3)	16,800
30.6.2015	To P A/c :				
	Carriage	1,800			
	Godown rent	3,600			
	Selling expenses	1,900			
	Commission	1,500			
30.6.2015	To Abnormal Loss A/c (loading : Note 2)	1,000			
30.6.2015	To Stock Reserve A/c (loading : Note 3)	3,000			
		67,800			67,800

Working Notes :

(1) Valuation of Abnormal Loss in Transit

	₹
Invoice price of goods sent	50,000
Add: Expenses of the consignor prior to loss (₹ 2,500 + 1,500)	4,000
Value of goods sent at invoice price	54,000

Value of abnormal loss at invoice price = 1/10th of ₹ 54,000 = ₹ 5,400.

The insurance claim received will not affect the Consignment Account. It will be shown in the Abnormal Loss Account. The difference between the cost and insurance claim received will be transferred to Profit and Loss Account.

Loading on Abnormal Loss in Transit

Total loading = ₹ (50,000 – 40,000) = ₹ 10,000.

Loading on abnormal loss = 10% on ₹ 10,000 = ₹ **1,000**.

(2) Valuation of Abnormal Loss in Godown

	₹
Value of goods sent at invoice price (Note 1)	54,000
Less: Abnormal loss in transit (Note 1)	5,400
Value of goods received by the consignee	48,600
Add: Expenses of consignee (non-recurring) prior to loss	1,800
Value of goods prior to loss	50,400

Value of abnormal loss at invoice price = 1/9th of ₹ 50,400 = ₹ **5,600**.

Loading on Abnormal Loss in Godown

	₹
Total loading	10,000
Less: Loading on abnormal loss in transit	1,000
Loading on goods received by the consignee	9,000

Loading on abnormal loss in godown = 1/9th of ₹ 9,000 = ₹ **1,000**.

(3) Valuation of Stock on Consignment

Let, the consignor sent 100 units. 10% lost in transit. Therefore, consignee received 90 units. Out of that 1/2 of the original goods sold, i.e., 50 units. Destroyed in transit 10 units (1/9th of 90 units). Therefore, stock in hand [100 – (10 + 10 + 50)] = **30 units**.

Valuation of stock at invoice price = ₹ 50,400 / 90 × 30 = ₹ **16,800**.

Stock reserve = ₹ 10,000 / 100 × 30 = ₹ **3,000**.

Illustration 36

Modern Breweries of Bombay consigned 5000 litres of liquor to Saha Brothers of Calcutta on 1st February, 2015. The goods are charged at a Proforma Invoice value of ₹ 2,00,000 including profit of 20% on invoice. Modern Breweries paid ₹ 5,000 as freight and insurance charges.

During transit 200 litres were destroyed for which the insurance company paid directly to the consignor ₹ 5,000 in full settlement of the claim.

On 25th February, Saha Brothers paid for carriage and clearing charges ₹ 3,100 and sent to the consignor a bank draft for ₹ 40,000 as security. Other expenses paid by the consignee were godown rent ₹ 1,200 and salesman's salary ₹ 900. Saha Brothers were entitled to a commission of 4% plus 2% del credere on sales.

On 31st March, 2015 Saha Brothers reported that 4,000 litres were sold at ₹ 1,65,000 and 50 litres were lost due to evaporation. A customer who bought liquor for ₹ 1,500 was able to pay 40% of the amount due from him.

Assuming that Saha Brothers paid the amount by a bank draft, show the Consignment Account and Saha Bros Account, Advance Against Consignment Account in the books of Modern Breweries.

On the date of closing the accounts, market price of liquor was ₹ 33.50 per litre.

Solution

In the books of Modern Breweries Ltd

Dr. Consignment to Calcutta Account Cr.

Working Notes :

(1) Valuation of Abnormal Loss	₹	**(2) Valuation of Closing Stock**		₹
Invoice price of 5,000 litres	2,00,000	Value of 5,000 litres at invoice price		2,05,000
Add: Freight & insurance before accident	5,000	Less: Value of 200 litres at invoice price		8,200
Value of 5,000 litres at invoice price	2,05,000	Value of 4,800 litres at invoice price		1,96,800
Value of 200 litres (₹ 2,05,000 / 5,000) x 200	8,200	Add: Carriage & clearance paid by consignee		3,100
(3) Loading on Goods Sent		Value of (4,800 – 50) = 4,750 litres at invoice price		1,99,900
1/5 (₹ 2,00,000)	40,000	Value of 750 litres (₹1,99,900 / 4,750) x 750		31,563
(4) Loading on Abnormal Loss		Less: Market price (₹ 33.5 x 750)	25,125	
(40,000 / 5,000) x 200	1,600	Less: Commission @ 6%	1,508	23,617
		Stock Reserve		7,946

(5) Liquor in Stock	₹
Sent out (in litres)	5,000
Lost in transit	200
	4,800
Less: Normal loss	50
	4,750
Less: Sold	4,000
Closing Stock	750

(6) Adjustment for Security

Security for 5,000 litres is ₹ 40,000.

So, security for 750 litres = ₹ 6,000.

Correction of Errors

We know that goods sent on consignment is not a sale but sometimes it is recorded as sales in the consignor's books by debiting the Consignee Account and crediting the Sales Account. For correction, the following entry should be passed:

When goods were sent at cost price

	Entries already passed		Correcting Entries
(1)	**For Goods sent** (a) Consignee A/c Dr. (cost price) To Sales/Goods A/c	(1)	**For Goods sent** (a) Sales/Goods A/c Dr. (cost price) To Consignee A/c
			(b) Consignment A/c Dr. (cost price) To Goods Sent on Consignment A/c

Illustration 37

In the Sales Ledger of XY Goods Co, the following account appears :

Dr. **Ram** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2015 May 10	To Goods To Expenses	12,000 720	2015 July 5 July 31	By Cash By Balance c/d	5,000 7,720
		12,720			12,720

Upon enquiry you find that the debit to Ram of ₹ 12,000 represented goods costing ₹ 10,000 delivered to him on the understanding that he will try to sell them in his own make, or otherwise return them. For this he is to be allowed a commission of 10 per cent on all sales effected, out of which he is to defray the expenses that he may incur.

On 31st July, 2015 when XY Goods Co make up their annual accounts, it is learnt that Ram has sold half the goods at the prices at which they were invoiced to him but is doubtful about his ability to sell the remaining. He, therefore, proposes to offer his customers a special trade discount of 20 per cent and to waive any further sales commission. To this, XY Goods Co agreed and took this information into account when closing their books. You are required: (a) to show the necessary corrective entries in the firm's journal; (b) to set out the account of Ram as it will appear when the Journal entries have been posted; and (c) to state clearly the resultant profit or loss on the matter.

Solution : In the above question, the goods sent on consignment to Ram has been wrongly treated as Sales. In order to set the accounts right, the following correcting entries will have to be passed in the books of the Company.

Journal **Dr.** **Cr.**

Date	Particulars		₹	₹
2015 July 31	Goods (Sales) A/c Consignment to Ram A/c To Ram A/c (Being cancellation of wrong entry and expenses on consignment charged to Consignment A/c)	Dr. Dr.	12,000 720	 12,720

Illustration 38

Nripesh consigns goods to Dharani, his agent at Dhanbad, at cost price of ₹ 40,000. Nripesh's accountant, at the end of the year, drew up the agent's account as under (all figures in rupees) :

Dr. Dharani Account Cr.

To Goods	40,000	By Cash	25,000
To Cash — freight and insurance	3,000	By Balance c/d	19,300
To Profit and Loss A/c	1,300		
	44,300		44,300

Dharani sold part of the goods for ₹ 45,000, which exceeded by ₹ 9,000 over invoice price. He collected ₹ 38,000 after allowing discount of ₹ 2,000 to customers, bad debts came to ₹ 1,000 and his expenses ₹ 800 (including ₹ 200 for unloading and cartage). Dharani was entitled to a commission of 5% on cash collected.

From the above information, draw up the following accounts in the books of Nripesh :

(a) Consignment Account; (b) Consignment Debtors Account; (c) Dharani Account.

Solution

In the books of Nripesh

Dr. Consignment to Dhanbad Account Cr.

Working Notes :

(1) Calculation of Stock on Consignment

Here, invoice price means the price indicated in the proforma invoice which is nothing but **cost price**.	₹
Cost of goods sent	40,000
Less: Cost of goods sold ₹ (45,000 – 9,000)	36,000
Cost of stock on consignment	4,000
Add: Proportionate non-recurring expenses (₹ 3,000 + 200) / 40,000 × 4,000	320
Value of stock on consignment	4,320

(2) Goods and profit debited to Dharani have been reversed.

(3) Dharani account starts with the balance given in the question.

Key Points

- The person sending the goods is called the ***consignor*** and the agent who receives the goods is called the ***consignee***.
- An ***Account Sales*** is a statement which is periodically rendered by the consignee to the consignor, showing the details about the goods sold, price realized, his own commission, and the expenses incurred in connection with the sale.
- The primary objective for preparing the Consignment Account is to ascertain the profit or loss on each consignment separately.
- ***Del Credere Commission*** is an additional commission paid to a consignee who guarantees the payment in case of credit sale. Where the consignee gets del credere commission, he indemnifies the consignor for all bad debts.

THEORETICAL QUESTIONS

1. What is a Consignment Account? Distinguish between sale and consignment.
2. What is an Account Sales? Prepare an Account Sales with assumed data.
3. What is del credere commission? Why is it given to the consignee?
4. What are non-recurring expenses? Give some examples.
5. What is a Proforma Invoice? Prepare a Proforma Invoice with assumed figures.
6. State the procedure of valuation of closing stock on consignment.

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each statement or answer each question below.

1. Consignee becomes a debtor of the consignor when
   A the goods are despatched
   B the goods are received
   C the goods are sold.
2. An account sales is a statement which shows the details about the
   A goods received
   B goods sold
   C goods lying unsold.
3. Del credere commission is given when the consignee
   A sells all the goods on credit
   B gets no ordinary commission
   C bears the loss of bad debts.
4. No journal entry is required to be passed when there is
   A normal loss
   B abnormal loss in transit
   C abnormal loss in consignee's godown.
5. Del credere commission that is given to the consignee is to cover
   A normal loss
   B abnormal loss
   C loss of bad debts.
6. Del credere commission is calculated on
   A total sales
   B cash sales
   C credit sales.
7. Consignee account is in the nature of
   A personal account
   B real account
   C nominal account.

PRACTICAL QUESTIONS

Cost Price Method

1. C of Calcutta sent 100 bicycles to B of Mumbai to be sold on consignment basis on 1.1.2014. The cost of each bicycle was ₹ 800, C incurred ₹ 500 for freight, ₹ 750 for cooli charges and ₹ 850 for insurance premium.

   On 31.12.2014, C received on Account Sales from B, which showed that he sold 80 bicycles @ ₹ 1,200 each and after deducting his commission and expenses amounting to ₹ 20,000, he sent the balance amount by a draft with the Account Sales. According to contract, B is entitled to get ordinary commission @ 10% and del credere commission @ 5% on sale proceeds. Show important Ledger Accounts in the books of both the parties.
2. On 1st January, 2014 Sadhan Sen of Sodepur sent 1,000 units of silk goods to Biren Bose of Berhampur .The goods cost ₹ 75,000 to Sadhan and these were sent on consignment basis. Sadhan had to incur an expenditure of ₹ 1,500 on the goods. On the due date, the goods reached the destination and Biren had to spend on the goods ₹ 1,000 on various accounts.

   On 30th September, 2014 an Account Sales was received by Sadhan showing that 750 units were sold at ₹ 150 each. Biren charged 5% ordinary commission and $7^1/_2$% del credere commission. The consignee sent with the Account Sales a sight draft for ₹ 90,000 only.

   You are required to prepare the Account Sales and the necessary Journal entries and Ledger accounts in the books of both the parties.
3. On 1st January, 2015, C of Calcutta sends 1,000 boxes of clothing to M of Madras on consignment basis. The goods in each box cost ₹ 200. C pays railway freight and insurance ₹ 500 and draws upon M a bill for ₹ 10,000 which is duly accepted.

   On 2nd April, 2015, M forwards an Account Sales to C showing that 500 boxes have been sold at ₹ 250 per box while 300 boxes were sold at ₹ 260 per box and 200 boxes remained in stock unsold. The expenses incurred by M consisted of carriage ₹ 100 and other charges ₹ 2,000. M is entitled to a commission @ 5% on the gross sale proceeds. He encloses a cheque for the balance due to C.

Show the Consignment Account and M Account in the books of C.

4. On 1.1.2015, Amar Mills of Calcutta consigned 5,000 Kg of oil to Vijay Stores of Madras. Each Kg of oil costs ₹ 8. Amar Mills paid ₹ 50 as carriage, ₹ 250 as freight and ₹ 200 as insurance. During transit, 500 Kg were accidentally destroyed for which the Insurance company paid directly to consignor ₹ 2,500 in full settlement of the claim. On 1.4.2015, Vijay Stores of Madras reported that 3,500 Kg of oil were sold @ ₹ 9.50 per Kg. and expenses being: Godown rent ₹ 500 and salesman's salary ₹ 750. Vijay Stores is entitled to a 5% commission on sales. Vijay Stores also reported a loss of 20 Kg due to leakage. Show (i) Consignment to Madras Account; (ii) Vijay Stores Account; (iii) Consignment Stock Account in the books of the consignor.

5. Karnath sold goods on behalf of Vijay Sales Corporation on consignment basis. On January 1, 2014, he had with him a stock of ₹ 20,000 on consignment.

   Karnath had instructions to sell the goods at cost plus 25% and was entitled to a commission of 4% on sales, in addition to 1% del credere commission on total sales for guaranteeing collection of all the sale proceeds.

   During the year ended 31st December, 2014, cash sales were ₹ 1,20,000, credit sales ₹ 1,05,000 and Karnath's expenses relating to the consignment ₹ 3,000 being salaries and insurance. Bad debts were ₹ 3,000 and goods sent on consignment ₹ 2,00,000.

   From the above, prepare Consignment Account in the books of Vijay Sales Corporation, and important ledger accounts in the books of Karnath.

6. On 1st July, 2014, Sengupta of Calcutta sent 150 cases of goods at a cost of ₹ 750 per case to Kapoor of Bombay on consignment basis and paid ₹ 1,900 for insurance premium, ₹ 3,500 for freight and ₹ 2,600 for dock charges. On arrival of the goods, Kapoor sent a bank draft for ₹ 10,000 to Sengupta on 30th July, 2014 and paid ₹ 2,500 for clearing charges, ₹ 870 for cartage and ₹ 750 for godown rent. 5 cases were damaged in transit and a sum of ₹ 3,500 was realized by way of compensation from the insurance company. Up to 31st December, 2014, 100 cases were sold for ₹ 1,05,000 incurring a bad debt of ₹ 1,150. Kapoor was entitled to a commission of 5% on the gross sales with further 2% as del credere commission. The amount due to Sengupta up to 31st December, 2014 was remitted by a bank draft.

   Show (a) Consignment Account; (b) Kapoor Account; and (c) Consignment Stock Account in the books of Sengupta.

7. Raja of Calcutta consigned on 1st April, 2014 to Praja of Burdwan 50 TV sets at ₹ 6,000 per set. Raja incurred the following expenses on the consignment : Freight ₹ 1,000; Insurance and other charges ₹ 500. The consignee paid ₹ 980 as non-recurring and ₹ 1,000 as recurring expenses. On the way a set was damaged in full for which the insurance company admitted ₹ 5,600. Praja sent an Account Sales on 1st December, 2014 indicating that 45 sets had been sold at ₹ 6,800 per set. The Account Sales was accompanied by the necessary bank draft deducting commission @ 5% and del credere commission @ $2^1/_2$%.

   Assuming Raja closes his books on 31st December, 2014 give the ledger accounts to record the above transactions.

8. Naresh consigns 1,000 bats costing ₹ 500 each to Swaroop for sales and incurs ₹ 4,000 towards freight and ₹ 1,000 for insurance. Swaroop was able to take delivery of 900 bats only and 100 bats were destroyed in transit. The insurance company admitted the claim and paid the same. Swaroop will be entitled to a commission of 5% on sales and 2% del credere commission on credit sales only. He will be entitled for additional commission of 25% of the excess if the sale price exceeds the cost price by more than 20%. Swaroop has spent ₹ 2,000 towards sales expenses. The sales are as follows : 500 bats at ₹ 600 per bat cash; 200 bats at ₹ 700 per bat credit

   Consignment debtors paid their dues except one customer to whom 4 bats were sold for ₹ 2,800 could pay only ₹ 800.

   Show the Consignment Account, the Consignment Debtors Account, Swaroop Account and commission calculation

   [C.A.(Entrance) —Adapted]

9. Ramesh Oil Mills, Bombay, consigned 40,000 kg of castor oil in 10 kg tins to B N Chatterjee, Calcutta, on 1st April, 2015. The cost of oil was ₹ 2 per kg. The consignors paid ₹ 10,000 as freight and insurance. During transit 50 tins were totally destroyed for which the insurance company paid directly to the consignor, ₹ 900 in full settlement of the claim. B N Chatterjee took delivery of the consignment on 10th April, and accepted a bill drawn on him by the Ramesh Oil Mills for ₹ 20,000 for three months. On June 30, 2015 B N Chatterjee reported that 35,000 kg were sold @ ₹ 3 per kg. The expenses were as follows: Godown rent ₹ 400; advertisement ₹ 2,000; and salaries of salesmen ₹ 4,000.

   B N Chatterjee charged a commission of 3% plus 3% del credere commission. He sold ₹ 19,000 worth of oil, the remaining stock, to X & Co who were declared bankrupt after two months and only 50 paise per rupee were realised from them.

   Show accounts in the books of both the parties assuming that the consignee paid the amount due by bank draft.

10. On July 1, 2014 A had consigned to B goods costing ₹ 50,000, on which A paid freight and insurance amounting to ₹ 2,500. On September 30, 2014, B's first Account Sales was received, showing that he had effected sales for ₹ 32,000 of which ₹ 30,000 had been received in cash. His expenses to date were ₹ 2,000 and commission 5% on gross sales. On receipt of the Account Sales the Consignment Account was balanced off, stock being valued at ₹ 28,000. A further Account Sales was received on December 31, 2014 showing that the balance of the goods had been sold for ₹ 36,000 and the cash collected. Debtors had also paid their dues less discount of 3%. The expenses of B were ₹ 2,500. The rate of his commission was the same as before.
    Write up the Consignment Account and B Account up to December 31, in the books of A assuming that B remitted the balance due with each Account Sales.
11. M/s Abubacker and Sons, Madras, sent to their agents, M/s Chinnadurai and Bros in Ceylon on February 12, 2015 a consignment of hides and skins costing ₹ 24,000. They incurred ₹ 1,200 on freight and packing and ₹ 300 towards insurance. They drew a bill on the agent for ₹ 20,000 at three months' sight. It was accepted by the agent and returned on February 20. A commission at 5% and a del credere commission at 1% was agreed to be payable on sales to the agent. It was found that due to faulty packing, goods invoiced at ₹ 2,200 were damaged and the claim was not admitted by the insurer.
    However, these damaged goods were sold by the consignor as scrap for ₹ 1,250. Half of the goods on consignment were sold for cash on March 7 for ₹ 14,600 and the balance on March 12, 2015 on credit for ₹ 18,200. The agent incurred landing and storage expenses of ₹ 600 and ₹ 800 respectively in connection with these sales. Deducting his commission and expenses, he remitted the balance by draft on March 15, 2015 which was received in Madras on March 18. Show the Consignment Account and the Consignee Account as they would appear in the books of M/s. Abubacker and Sons.
12. Oil India Ltd of Bombay consigned 1,000 barrels of Lubricant oil costing ₹ 800 per barrel to Central Oil Company, Calcutta, on 1st Jan 2015. Oil India Ltd paid ₹ 50,000 as freight and insurance. 25 barrels were destroyed on 7.1.2015 in transit. The insurance claim was settled at ₹ 15,000 and was paid directly to the consignor.
    Central Oil Co took delivery of the consignment on 19th Jan 2015 and accepted a bill drawn upon them by Oil India Ltd for ₹ 5,00,000 for 3 months on 31st March, 2015. Central Oil Co reported as follows:
    (i) 750 barrels were sold at ₹ 1,200 per barrel.
    (ii) Other expenses: unloading ₹ 2,500; wages of salesman ₹ 50,000; printing ₹ 21,300; and godown rent ₹ 10,000.
    (iii) 25 barrels of oil were lost due to leakage which is considered to be a normal loss.
    Central Oil Co is entitled to a commission of 5% on all the sales effected by them. Central Oil Co paid the amount due in respect of the consignment on 31st March itself.
    Show the Consignment Account, the account of Central Oil Co. and the loss in transit account as they will appear in the books of Oil India Ltd.
13. Rahim of Calcutta consigned 100 cases of medicine. Costing ₹ 1,000 per case to Karim of Kanpur on 1.1.2015. The goods were to be sold at 25% above cost. Any deficiency in the selling price was to be borne by Karim. Karim was, however, entitled to a special commission @ 25% of any surplus price realised. Karim was further entitled to an ordinary commission of 5% and del credere commission of $2^1/_2$% on all sales.
    Rahim incurred the following expenses:
    Packing charges ₹ 6,000; loading charges ₹ 1,000; lorry charges ₹ 12,000; and railway freight ₹ 21,000
    The cases were received by Karim on 15.1.2015. The Account Sales received from Karim on 30.6.2015 revealed the following: 40 cases sold on 21.3.2015 @ ₹ 1,500 per case, 30 cases sold on 24.5.2015 @ ₹ 1,200 per cases, 10 cases sold on 30.6.2015 @ ₹ 1,300, 5 cases were stolen by a dishonest employee.
    A compensation of ₹ 2,000 was realised from him. Karim incurred unloading charges of ₹ 2,000 and warehouse rent ₹ 3,000. Karim enclosed a bank draft for the balance due. Write up necessary accounts in the books of Rahim.
14. X consigned goods costing ₹ 1,60,000 to A. The terms of the consignment were:
    (a) Consignee to get commission of 5% on cash sales and 4% on credit sales.
    (b) Any goods taken by consignee himself or goods lost through consignee's negligence, shall be valued at original cost plus $12^1/_2$% and no commission will be allowed on them.
    The expenses incurred by the consignor were: Carriage and freight ₹ 6,720 and insurance ₹ 3,440. The consignor received ₹ 50,000 as advance against the consignment. Account Sales together with a draft for the balance due was received by the consignor showing the following position:
    Goods costing ₹ 1,28,000 were sold for cash at ₹ 1,40,000 and on credit at ₹ 1,08,000. Goods costing ₹ 8,000 were taken by A and goods costing ₹ 4,000 were lost through A's negligence. The expenses incurred by A were: advertisement ₹ 1,720; and other selling expenses ₹ 1,080.
    Show the ledger accounts in the books of X.

15. Mr Krishna Murty requests you to prepare a Consignment Account for the year ended 30.6.2015 and for this purpose gives you the following information to ascertain the profit earned on consignment.
    (i) Agent's commission @ 5% on gross sales ₹ 20,000.
    (ii) Cost of goods fully damaged in transit (insurance claim recovered ₹ 18,000).
    (iii) Expenses incurred by the agent : godown rent ₹ 400; landing and clearing ₹ 1,000; advertisements ₹ 200; transport charges ₹ 900; selling expenses ₹ 1,000.
    (iv) Freight expenses incurred by Krishna Murty ₹ 2,000.
    (v) Cost of unsold stock lying with the agent at the end of the year ₹ 60,000.

    All sales were effected by the agent at a profit of 25% on cost.
16. B of Bombay consigned 400 packages of coffee to K of Kanpur. The cost of each package was ₹ 300. A sum of ₹ 2,000 was paid towards freight and insurance by B. In the transit, 60 packages were damaged. However, the consignor received ₹ 400 for the damaged packages from the insurance company.

    The consignee accepted a Bill of Exchange for ₹ 60,000 for 60 days as an advance to B of Bombay. The operating statement from the consignment disclosed the following information :

    (a) 280 packages were sold @ ₹ 360 per package.

    (b) The damaged packages were sold @ ₹ 100 per package.

    (c) He also paid ₹ 1,400 towards godown rent, ₹ 1,000 for carriage outward and ₹ 3,400 towards clearing charges.

    The consignee is entitled to a commission of 10% on the sale proceeds.

    At the end of the consignment period, K of Kanpur sent a bank draft to B of Bombay You are required to prepare the necessary accounts on the books of consignor B of Bombay.
17. On 1.4.2015, X of Delhi consigned 550 tins of oil to Y of Calcutta. Each tin contains 1.5 Kg of oil. The cost is ₹ 21 per kg. This is to be sold at $33^1/_3$% above cost. Y is to be paid 3% ordinary and 2% del credere commission on sales on the basis of the price specified above.
    Any deficiency in the selling price is to be fully borne by Y, while only 50% of any surplus price realised may be retained by him. X incurred freight and insurance ₹ 3,300. 20 tins were stolen in transit and the insurance company paid ₹ 5,500 in final settlement. Y accepted a bill for 3 months for ₹ 40,000 which was discounted by X for ₹ 39,600. Y sent an account sales which showed that 50 tins were sold @ ₹ 29 per Kg, 200 Kg @ ₹ 32 per kg and from the remaining tins 3,750 Kg of oil were sold @ ₹ 34 per Kg.
    Y paid ₹ 4,270 on clearing charges and ₹ 1,200 as selling expenses. 50 Kg of oil were lost due to leakage which was considered as normal loss. Y collected entire sale proceeds except ₹ 400 which became irrecoverable.
    Prepare the Ledger Account in the books of X.
18. Reema consigns goods to Sunita to be sold at above invoice price, Sunita is to get commission of 5% on sales at invoice price, plus 25% of any surplus price realised. Reema received from Sunita on advance of 75% of the invoice price; the accounts being settled by Bank Drafts immediately on sales.

    During the year Reema consigned to Sunita goods worth ₹ 3,60,000, the invoice price of which was ₹ 5,00,000. This includes freight, sales by Sunita during the year amounted to ₹ 4,30,000, goods unsold on 31.3.12015 with Sunita were of invoice price of ₹ 1,50,000 (cost including freight ₹ 1,00,000). Reema had received from Sunita by bank draft during the year ₹ 90,000, certain remittances being in transit on 31.3.2015.

    Show the Consignment to Sunita Account and Consingee's (Sunita) Account in the books of Reema.

Invoice Price Method

19. A of Bombay sent goods on consignment basis, to B of Calcutta at an invoice price of 25% on cost which was to be sold for general commission of 10% on gross sales plus a special commission of 25% on excess of sale proceeds less all commission over the invoice price. A sent 100 boxes of tea at an invoice price of ₹ 500 per box and incurred ₹ 1,000 as freight, ₹ 500 as insurance and ₹ 300 as general expenses. B paid the following expenses: Clearing charges ₹ 400; carriage ₹ 200; godown rent ₹ 600; insurance ₹ 300 and miscellaneous selling expenses ₹ 200.
    It was found that 10 boxes were lost in transit and another 10 boxes were still in transit. Insurance claim in respect of goods lost was settled at ₹ 3,500. B sold 50 boxes for ₹ 35,000 and sent a bank draft for the amount due.
    You are required to show the necessary ledger accounts in the books of A (Calculations are to be shown separately).
20. Mr Achut of Bombay consigned 100 units of a commodity to Mr. Rao of Delhi. The goods were invoiced at ₹ 150 so as to yield a profit of 50 per cent on cost. Mr.Achut incurred ₹ 1,000 on freight and insurance. Mr. Rao incurred ₹ 500 on freight and ₹ 800 on rent. Before December 31, 2014, he sold 50 units for cash at ₹ 160 per unit, 20 units for ₹ 175 on credit. He retained his commission at 5% and 1% for the del credere arrangements and remitted the balance on December 31, 2014. Mr. Rao noticed that 10 units were damaged on account of bad packing and he

could sell them only for ₹ 80 per unit. A debtor for ₹ 1,000 to whom the goods were sold by Mr Rao became insolvent and only 50 paise in a rupee was recovered. Mr Rao sent an Account Sales on March 31, 2015 detailing the transactions for the quarter ended on that date and he remitted the balance due. Make necessary ledger accounts in the books of Achut and Mr Rao assuming that Mr Achut closes his books every 31st March.

21. X of Delhi purchased 10,000 meters of cloth for ₹ 2,00,000 of which 5,000 meters were sent on consignment to Y of Agra at the selling price of ₹ 30 per meter. X paid ₹ 5,000 for freight and ₹ 500 for packing etc.

    Y sold 4,000 meters at ₹ 40 per meter and incurred ₹ 2,000 as selling expenses. Y is entitled to a commission of 5% on total sale proceeds plus a further 20 per cent on any surplus price realised over ₹ 30 per meter. 3,000 meters were sold at Delhi at ₹ 30 per meter less ₹ 3,000 for expenses and commission. Owing to a fall in the market price, the stock of cloth in hand is to be reduced by 10 per cent. Prepare the Consignment Account and the Trading and Profit and Loss Account in the books of X and his Account in the books of Y.

22. On 1st December, 2014, 100 radio sets were sent on consignment by Kolay & Co of Bombay to Paul & Co of Calcutta at a Proforma Invoice price of ₹ 1,800 each (including a profit of 20% on cost). Kolay & Co paid freight, insurance and other charges amounting to ₹ 8,000. 2 radio sets were totally damaged in transit and as such were thrown away. Paul & Co incurred an expenditure of ₹ 980 for loading and unloading of the consignment and took delivery of the remaining radio sets and sent a cheque for ₹ 90,000 as security against the goods to Kolay & Co. On 31st December, 2014, Paul & Co sent an Account Sales showing that 90 radio sets were sold at 10% above their proforma invoice price and expenses incurred in connection with sales amounted to ₹ 2,208.

    Paul & Co was entitled to an ordinary commission of 5% and del credere commission of 1% on sales. Paul & Co could not realize ₹ 500 from a customer to whom a radio set was sold on credit and accordingly that became a bad debt. Along with the Account Sales Paul & Co sent a bank draft to Kolay & Co for the net amount due.

    You are required to show the Consignment Account and the Consignee Account and Advance Against Consignment Account in the books of the consignor.

23. Rama consigned goods to Ravindran, his agent at New Delhi at cost price of ₹ 40,000. Rama's accountant, at the end of the year, drew up the agent's account as under:

Dr. **Ravindran** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Goods To Profit & Loss A/c	40,000 3,300		By Cash By Balance c/d	24,000 19,300
		43,300			43,300

Ravindran sold the goods for ₹ 45,000, which exceeded by ₹ 9,000 their invoice value. He collected ₹ 38,000 after allowing discount of ₹ 2,000 to customers. Bad debts come to ₹ 1,000 and his expenses to ₹ 800. Ravindran was entitled to a 5% commission on cash collected. Balance of stock is to be valued at invoice prices. From the above information, draw the accounts of Ravindran, Consignment and Consignment Debtors in the books of Rama.

24. On 1st September, 2014 goods which cost to X ₹ 33,000 were consigned by him to his agent Y at a proforma invoice price which was 20% over cost. X paid insurance and freight charges amounting to ₹ 1,250. Y was allowed 3,000 per annum towards establishment cost, 5% commission on gross sales and 3% del credere commission. He was also allowed 5% extra commission on the profit on such consignment sales after charging such commission. Y incurred expenses of ₹ 255 as landing charges. 3/4th of the goods were sold at $33^1/_3$% profit on cost, half of which were on credit; half of the remaining goods were damaged and a claim on insurance company was made for ₹ 4,400 which was settled at a discount of 10%. You are required to prepare a Consignment Account and an Abnormal Loss Account in the books of X for the year ended 31st December, 2014.

25. Roy Brothers of Calcutta sent goods costing ₹ 60,000 to Patel Brothers of Bombay on 10th September, 2013, on consignment basis. The invoice price was made by adding 25% of the cost. Roy Brothers of Calcutta paid the following expenses in connection with the despatch of goods : Packing ₹ 350, carriage ₹ 550 and other expenses ₹ 960.

    On 25th September 2013, after receiving the goods Patel Brothers paid ₹ 850 as freight and ₹ 450 as carriage for taking goods to their godown and forwarded a three months' bill for ₹ 15,000 to Roy Brothers.

    On 31st December, 2013 Patel Brothers sent an Account Sales to Roy Brothers. Roy Brothers of Calcutta came to know from the Account Sales that Patel Brothers had sold half of the goods at ₹ 40,000 in cash and ₹ 20,000 on credit out of which ₹ 7,000 had already been collected by Patel Brothers. The expenses deducted by Patel Brothers also include ₹ 450 for fire insurance. Patel Brothers were entitled to an ordinary commission of 5% and del credere commission of $2^1/_2$% on gross sales.

    On April 30, 2014 a second Account Sales was sent by Patel Brothers. It showed that half of the remaining goods were sold by Patel Brothers at ₹ 15,000 in cash and ₹ 10,000 on credit. Their expenses during the period were ₹ 250 for fire insurance and ₹ 150 for other expenses. The remaining goods could not be sold and were brought back by Roy Brothers on 31st August 2014, at a further cost of ₹ 1,000. These goods were damaged on the way and were valued at 40% below their cost price. Patel Brothers remitted with each Account Sales the balance due from them and Roy Brothers close their books of accounts on 31st December each year. Patel Brothers were able to collect all that was due from the debtors till 31st December, 2014 except ₹ 1,500 from a debtor, which was treated as bad debt.

Draw up the Consignment Account, Patel Brothers' Personal Account and Goods sent on Consignment Account in the books of Roy Brothers of Calcutta.

Joint Venture Accounts

Introduction

A joint venture is the combination of two or more persons into a single activity. It is a form of partnership which is limited to a specific venture. It may seem to be exactly the same as partnership, with the exception that it is one of a business that is to be terminated. Since the business is to be concluded after completion of the venture, a firm name is not generally used. There are many reasons for a joint venture. A joint venture is undertaken when different persons have mutual advantages in tackling a particular business venture together. For example, an individual may be in a particular advantageous position to buy goods exceptionally cheap, but lacks capital. An associate might agree to provide the capital to finance the whole project.

When the respective advantages of the parties are pooled together, the persons can undertake a joint venture for mutual profit.

Features of a Joint Venture

1. It is a specific partnership.
2. It does not entail a continuing partnership since termination is certain.
3. The business is dissolved after the venture is terminated.
4. Many accounting concepts are not applicable such as the going concern concept.
5. Ascertainment of income is relatively simple.
6. All the assets are ultimately received in cash and all liabilities are paid in cash.
7. It does not use a firm name generally.

Difference between Partnership and Joint Venture

	Partnership		Joint Venture
1.	It is a going concern.	1.	It is a terminable venture.
2.	It always has a name.	2.	It may not bear a name.
3.	Persons carrying on business are called partners.	3.	Persons carrying on business are called co-venturers.
4.	Profits are ascertained at regular intervals, i.e., annually.	4.	The profits are ascertained for each venture separately.

Methods of Keeping Accounts

Joint venture accounts can be kept in the manner that will suit the co-venturers in a particular case. The important methods are as follows:

1. ***When a separate set of books is kept for the Joint Venture.***
2. ***When no separate set of books is kept for the Joint Venture.***

1. A Separate Set of Books is Kept

When the size of the venture is large and the duration of the venture is protracted, then a complete separate set of books of account may be maintained under the double-entry system for recording all joint venture transactions. Under this system, the following accounts are commonly maintained in the ledger :

(i) Joint Bank Account: For better financial control, a Joint Bank Account is opened specially for the venture. The co-venturers operate this account jointly. This account is just like a cash book—all cash deposited into the bank is debited and all withdrawals are credited. Generally, capital contribution of the venturers and sale proceeds are deposited in this account. Similarly, all major payments are made from this account. It is finally closed by payment to the co-venturers.

(ii) Co-venturers' Accounts: This account records the transactions between the venture and the co-venturers. Since these are the capital accounts of the co-venturers, they are credited for what they contribute to the venture and debited for any withdrawals from the venture. The co-venturers' contribution towards the joint venture by way of cash, goods or services is credited to these accounts. Goods and sale proceeds taken over by co-venturers are debited to these accounts. The profit or loss on venture is credited or debited respectively in these accounts and ultimately closed off by cash payment from the joint bank balance.

(iii) Joint Venture Account: It is in the nature of a Trading and Profit and Loss Account and it is prepared to ascertain the profit or loss on joint venture. Goods purchased, goods supplied by the co-venturers, expenses incurred etc. are debited to this account and sale proceeds, unsold stock and the like are credited to it. The final balance represents profit or loss on the venture which is transferred to the Co-venturers' Accounts in the profit sharing ratio. It is interesting to note that no separate accounts for purchases, sales and expenses are maintained; all these are directly entered in the Joint Venture Account.

Among the three accounts, Joint Venture Account is closed first of all, transferring the profit or loss to the Co-venturers' Accounts. Thereafter, Joint Bank Account and Co-venturers' Accounts are closed simultaneously, ensuring that the resultant claim of the venturers are equal to the available joint bank balance.

Accounting Entries in Books of Joint Venture

1. For cash contribution by the venturers

Joint Bank Account Dr.
  To Co-venturers' Accounts

---

2. For goods purchased out of Joint Bank Account

Joint Venture Account Dr.
  To Joint Bank Account

---

3. For goods purchased on credit

Joint Venture Account Dr.
  To Creditors Account

---

4. For goods supplied by the co-venturers

Joint Venture Account Dr.
  To Co-venturers' Accounts

---

5. For expenses (paid from joint bank)

Joint Venture Account Dr.
  To Joint Bank Account

6. For expenses (paid by co-venturers)
Joint Venture Account Dr.
To Co-venturers' Accounts

7. For goods sold in cash
Joint Bank Account Dr.
To Joint Venture Account

8. For goods sold by the co-venturer who kept the sale proceeds for own purpose
Co-venturers' Accounts Dr.
To Joint Venture Account

9. For goods sold on credit
Sundry Debtors Account Dr.
To Joint Venture Account

10. For goods taken over by the co-venturers
Co-venturers' Accounts Dr.
To Joint Venture Account

11. For collection from debtors
Joint Bank Account Dr.
To Sundry Debtors Account

12. For bad debt
Joint Venture Account Dr.
To Sundry Debtors Account

13. For payment to creditors
Creditors Account Dr.
To Joint Bank Account

14. For commission payable to any managing venturer
Joint Venture Account Dr.
To Co-venturers' Accounts

15. After passing the above entries, the balance of the Joint Venture Account will show the profit or loss on venture.

(a) If the credit side is greater than the debit side, there is a profit and it should be transferred to the credit side of the Co-venturers' Accounts
Joint Venture Account Dr.
To Co-venturers' Accounts [profit sharing ratio]

(b) If the debit side is greater than the credit side, there is a loss and it should be transferred to the debit side of the Co-venturers' Accounts.
Co-venturers' Accounts Dr.
To Joint Venture Account

16. Now the Joint Bank Account and Co-venturers' Accounts show some balance. The sum total of Co-venturers' Accounts must be equal to the Joint Bank Account balance.

17. For final settlement

(a) If any of the Co-venturers' Account shows debit balance, he will bring in money and the entry is:
Joint Bank Account Dr.
To Co-venturers' Account

(b) Now the credit balance of the other co-venturers will be paid off.

To Joint Bank Account

Illustration 1

Mono and Anusua entered into a joint venture and agreed to share profits and losses in the ratio of 2 : 3. They opened a Joint Bank Account in which Mono and Anusua contributed ₹ 8,000 and ₹ 10,000 respectively. They purchased 10 condemned television sets at ₹ 1,500 each. They met the reconditioning cost ₹ 3,000 from the Joint Bank Account carriage and other expenses of ₹ 2,000 were borne by Anusua. Anusua received a cheque of ₹ 1,000 from Mono. Nine sets were sold @ ₹ 2,500 each and the rest was taken over by Anusua at cost.

Pass necessary journal entries and prepare Joint Venture Account, Joint Bank Account and close the accounts of the Venture.

Ram and Ravan are carrying on a business as contractors. They jointly take up the work of constructing a building for Mr Bose at an agreed price of ₹ 5,00,000 and ₹ 3,00,000 payable in cash and ₹ 2,00,000 payable in fully paid shares of a company. A bank account is opened in which Ram and Ravan paid ₹ 3,00,000 and ₹ 75,000 respectively. The following costs were incurred in completing the construction : a) Salary paid, ₹ 1,00,000; b) Materials purchased, ₹ 2,00,000; c) Materials supplied by Ram from the stock of his own business,₹ 50,000; d) Engineer's fees paid by Ravan, ₹ 10,000. The contract price was duly received. The accounts of the venture were closed; Ram taking up all the shares at an agreed valuation of ₹ 1,70,000 and Ravan taking up the unused stock of materials at ₹ 15,000. Prepare necessary accounts in the Ledger of the venture assuming that a separate set of books are maintained for this purpose and that the net result of the same is shared by Ram and Ravan in the ratio of 3:2.

S D and S G entered into a joint venture to construct a building for a new company. Profits and losses were to be shared in the ratio of 3:2. S D invested ₹ 2,00,000 and S G₹ 1,00,000. The money was deposited to a joint bank account with arrangement of overdraft. S D also supplied materials valued ₹ 35,000 and S G paid the architect's fees ₹ 15,000. S G also supplied a machine valued ₹ 25,000. Building materials valued ₹ 4,00,000 and wages of ₹ 1,00,000 were met from the Joint Bank Account.

On completion of the construction, the company paid ₹ 8,00,000 out of which ₹ 4,00,000 was in cash (deposited into Joint Bank Account) and the balance of ₹ 4,00,000 was in fully paid shares of ₹ 10 each. These shares were sold at ₹ 9.50 each and the proceeds taken by S D and S G in the ratio of 3:1. The machine supplied by S G was taken back by him at an agreed value of ₹ 15,000.Bank charged interest ₹ 1,000 for the overdraft.

Prepare necessary Ledger Accounts.

A and B entered into a joint venture on 1.10.1993 for sale of specified goods paying ₹ 60,000 and ₹ 40,000 respectively in a Joint Bank Account—sharing profits and losses in the ratio of 3 : 5. It was agreed that Joint Bank Account is to be used for purchases and sales and each venturer is to meet his joint venture expenses out of private funds. Each venturer is to charge a commission @ 5% on sales made by him. The transactions for the period ended 31.3.1994 were as follows :

A purchased goods costing ₹ 40,000 and expenses in connection thereof amounted to ₹ 6,000. He sold 90% of these goods at 30% over the cost price and selling expenses amounted to ₹ 2,500. B purchased goods costing ₹ 50,000 and expenses in connection thereof amounted to ₹ 6,500. He sold 80% of these goods at 25% over the cost price and selling expenses amounted ₹ 3,000. 1/5th of the remaining goods purchased by A was destroyed by fire on 28th February, 1994 and the insurance company paid a claim for ₹ 2,000. Write up Joint Venture Account, Joint Bank Account and Venturers' Accounts.

					By Joint Venture A/c (Profit)	5,169	8,615
		76,360	60,940			76,360	60,940

Working Notes : (1) Calculation of Sales	₹	**(2) Valuation of Closing Stock**	₹
A — *Cost of goods sold : 90% of ₹ (40,000 + 6,000)	41,400	A — 10% of ₹ (40,000 + 6,000)	4,600
Add : 30% of ₹ 41,400	12,420	Less : Goods lost by fire (1/5th)	920
	53,820		3,680
B — *Cost of goods sold : 80% of ₹ (50,000 + 6,500)	45,200	B — 20% of ₹ (50,000 + 6,500)	11,300
Add : 25% of ₹ 45,200	11,300	**Total** ₹ 3,680 + 11,300	14,980
	56,500		

* Cost includes purchase price and expenses in connection thereof.

(3) No entry is required for stock destroyed. Only insurance claim received is credited to Joint Venture Account as an income.

Tutorial Note : It is clear from the question that the final settlement was not effected by A and B on 31st March, 1994. Therefore, the value of closing stock and balances on other accounts are to be carried forward to the next period.

Illustration 5

Ujjal and Sajjal started a joint venture to construct five flats in a building sharing profits and losses in the ratio of 3:2. The contract price of each flat was ₹ 90,000. Ujjal contributed ₹ 2,00,000 and Sajjal ₹ 1,40,000 and a bank account was opened in their names. Cost of raw material, wages and other expenses amounting to ₹ 2,90,000, ₹ 35,000 and ₹ 5,000 respectively, and the architect's fee which was 2% of the contract price, were met from the Joint Bank Account. Ujjal supplied further raw materials costing ₹ 15,000 and Sajjal supplied a machine costing ₹ 5,000. Ujjal paid ₹ 3,000 for transport charges.

Sajjal is entitled to a commission of 1% on the cost of raw materials used. Four of the flats were disposed off at the contract price but the fifth one was not according to specification and hence could not be disposed off. This flat was taken by Ujjal at the cost of construction plus 5% profit. The unused raw materials and the machine were taken by Sajjal at ₹ 5,000 and ₹ 1,000 respectively.

Prepare Joint Venture Account, Joint Bank Account, Ujjal Account and Sajjal Account to close the venture.

Gavaskar and Biswanath jointly underwrite and place on the market 50,000 shares of Bombay Machineries Ltd of ₹ 10 each. It was agreed with the company that they would be allotted 2,000 shares as fully-paid towards their remuneration. Their profit sharing ratio is 3:2. Applications were received from the public only for 45,000 shares. Gavaskar paid ₹ 4,000 for postage and advertisement in addition to 60% of the amount required to take up the short subscription. Biswanath financed the balance amount. These are accounted for through the Joint Bank Account. All the shares including those allotted for remuneration were sold. Gavaskar sold 3,000 shares for ₹ 35,000 and Biswanath sold the balance shares for ₹ 48,000. Biswanath incurred expenses ₹ 2,000. Sales proceeds were retained individually. Show necessary accounts in the books of the co-venturers, which were started separately for the purpose. The *inter se* account was settled through the Joint Bank Account.

X and Y entered into a joint venture to act as underwriters of a newly formed company which issued 30,000 shares of ₹ 10 each. The extent of underwriting was 80%. They opened a joint bank account by contributing ₹ 35,000 each. Public subscribed for 22,000 shares and the underwriters duly discharged their obligations in consideration of a commission of 5% which they received by cheque. Miscellaneous expenses amounting to ₹ 1,500 were met out of the Joint Bank Account. X took 1,500 shares at ₹ 9 per share and Y took 1,600 shares at ₹ 9.50 per share. The rest of the shares were sold at ₹ 12 per share, brokerage being Re 0.50 per share. Profits on joint venture are to be shared equally. You are required to prepare the Joint Venture Account, Joint Bank Account and the Personal Accounts of X and Y.

Solution

In the books of M/s XY

Dr. **Joint Venture Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Joint Bank A/c (Purchases of 6,400 shares)	64,000		By Joint Bank A/c (Commission) (Note 2)	12,000
	To Joint Bank A/c (Expenses)	1,500		By Co-venturers' A/cs — Shares taken over	
	To Co-venturers' A/cs — Share of Profit			X — 1,500 x ₹ 9.00	13,500
	X — 1/2	6,575		Y — 1,600 x ₹ 9.50	15,200
	Y — 1/2	6,575		To Joint Bank A/c (Sales Proceeds) (Note 3)	37,950
		78,650			78,650

Dr. **Joint Bank Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Co-venturers' A/cs :			By Joint Venture A/c	64,000
	X	35,000		By Joint Venture A/c (Expenses)	1,500
	Y	35,000		By Co-venturers' A/cs :	
	To Joint Venture A/c (Commission)	12,000		X	28,075
	To Joint Venture A/c	37,950		Y	26,375
		1,19,950			1,19,950

Dr. **Co-venturers' Accounts** **Cr.**

Date	Particulars	X	Y	Date	Particulars	X	Y

		41,575	41,575			41,575	41,575

Working Notes: **(1)** Since the extent of underwriting was 80%, the venturers had to purchase 80% of 8,000 shares (30,000 – 22,000), i.e. 6,400 shares; **(2)** Commission received was 5% on (80% of 30,000 shares of ₹ 10 each), i.e, 5% on ₹ 2,40,000 = 12,000; **(3) Sale proceeds of shares are calculated as under:**

			₹
Shares purchased	6,400 shares	Sale proceeds of 3,300 shares @ ₹ 12 per share	39,600
Less: Shares taken over (1,500 + 1,600)	3,100 shares	Less: Brokerage @ Re 0.50 per share	1,650
Shares sold	3,300 shares		37,950

2. No Separate Set of Books is kept

When the size of the venture is small and co-venturers are residing at distant places, each co-venturer may record joint venture transactions in his own books of account without inaugurating a complete set of double-entry books for the venture. In such a case, two variations are possible : *(a) when each co-venturer maintains a complete record of all the joint venture transactions; and (b) when each co-venturer maintains a record of his own transactions only.*

(a) When each co-venturer maintains a complete record of all the Joint Venture transactions

In such a case, each co-venturer will record in his own books of account all transactions (own + co-venturers') relating to the joint venture. Each co-venturer will open in his ledger the following two accounts:

(i) Joint Venture Account: It is a nominal account and may be treated as a special Profit and Loss Account which discloses profit or loss on venture. It is prepared in the same manner as illustrated previously. One's own share of profit or loss is transferred to the Profit & Loss Account whereas the co-venturers' share of profit is transferred to their respective personal accounts.

(ii) Personal Accounts of Co-venturers: These accounts are credited with cash, goods and services supplied by the co-venturers and debited with goods, sales proceeds taken over, remittance, and the like. Share of profit or loss is credited or debited respectively to these accounts. The balances of these accounts are shown in the Balance Sheet (if it has not been settled). Under this system, each co-venturer will send from time to time a statement of the transactions entered into by him to his co-venturer who will accordingly make appropriate entries in his own books of account.

Accounting Entries

1. For purchase of goods for the venture
Joint Venture Account Dr.
    To Cash/Bank Account

2. For supply of goods from own stock
Joint Venture Account Dr.
    To Purchases Account

3. For expenses in respect of joint venture
Joint Venture Account Dr.
    To Cash/Bank Account

4. For cash received from co-venturers
Cash/Bank Account Dr.
    To Co-venturers' Accounts

5. For supply of goods by the co-venturers
Joint venture Account Dr.
    To Co-venturers' Accounts

6. For any expenses paid by the co-venturers
Joint Venture Account Dr.
    To Co-venturers' Accounts

7. For goods sold
Cash/Bank Account Dr.
    To Joint Venture Account

8. For goods sold by the co-venturer
Co-venturer's Account Dr.
    To Joint Venture Account

9. For goods taken over by the co-venturer for his business/personal use
Co-venturers' Accounts Dr.
    To Joint Venture Account

10. For goods taken over for business
Purchases Account Dr.
    To Joint Venture Account

11. For goods taken over for own use
Drawings Account Dr.
    To Joint Venture Account

12. Sometimes a bill of exchange may be drawn by one venturer on the other for accommodation of funds. When the bill is discounted, the discount on the bill is debited to the Joint Venture Account.

13. Joint Venture Account is finally balanced to find out the trading result. The profit is distributed by closing the Joint Venture Account, as follows:
Joint Venture Account Dr.
    To Profit and Loss Account (own share of profit)
    To Co-venturers' Accounts (co-venturers' share of profit)

14. For loss, the above entry will be reversed.

15. Account with co-venturer will be settled through appropriate remittance.

Illustration 8

M and N enter into a joint venture for the purchase and sale of second-hand motor cars, agreeing to share profits and losses in the ratio of 3:2. On January 15, 2015, M bought five cars for ₹ 43,000 and on January 20, he paid tax and insurance ₹ 1,600. On January 31, 2015, he sold these cars for ₹ 58,000, out of which he remitted ₹ 11,000 to N and the balance deposited into his own bank account. On January 31, 2015, N bought three cars for ₹ 36,000 and he paid tax and insurance ₹ 1,400 and repair charges amounting to ₹ 2,000. He sold one car on February 2, 2015 for ₹ 14,000 which he paid into his own bank account. M then took over the other cars at a valuation of ₹ 26,000, and the venture was closed on February 10, 2015. Pass necessary journal entries in the books of M and as well as in the books of N.

X and Y entered into a joint venture for purchase and sale of jute. They agreed to share profits in the proportion of 2:1.

The following transactions took place in between them: (i) On January 1, 2015, X purchased 1,400 bales of jute at ₹ 55 per bale, the brokerage being ₹ 2 per bale; (ii) On February 1, 2015, Y purchased 1,200 bales of jute at ₹ 62 per bale, the brokerage being ₹ 2 per bale;. (iii) On March 9, 2015 Y sold 700 bales of jute at ₹ 70 per bale (the brokerage being Re 1 per bale) and took the proceeds to himself; and (iv) On April 1, 2015, X sold 1,600 bales of jute at ₹ 66 per bale (brokerage being Re 1 per bale) and took the proceeds to himself. The balance of unsold stock was to be divided between the partners in proportion to their profit-sharing ratio and the goods being valued at cost to the partners concerned. The venture was closed. Show the accounts as they would appear in books of X.

Solution

In the books of X

Dr. **Joint Venture Account** **Cr.**

Date	Particulars	₹	₹	Date	Particulars	₹	₹
1.1.2015	To Bank A/c			9.3.2015	By Y A/c (Sales)		49,000
	Purchase of Jute	77,000		1.4.2015	By Bank A/c (Sales Proceeds)		1,05,600
	Brokerage on Purchase	2,800	79,800		By Purchases A/c (Note 1)		12,046
1.2.2015	To Y A/c				By Y A/c (Unsold goods taken over)		
	Purchases of Jute	74,400			(Note 1)		6,023
	Brokerage on Purchases	2,400	76,800				
9.3.2015	To Y A/c (Brokerage on Sales)		700				
1.4.2015	To Cash A/c (Brokerage on Sales)		1,600				
	To P & L A/c (Share of profit)		9,179				
	To Y A/c (Share of profit)		4,590				
			1,72,669				1,72,669

Dr. **Y Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
9.3.2015	To Joint Venture A/c (Sales)	49,000	1.2.2015	By Joint Venture A/c :	
	To Joint Venture A/c (Unsold goods taken over)	6,023		Purchase of Jute	74,400
1.4.2015	To Balance c/d	27,067		Brokerage	2,400
			9.3.2015	By Joint Venture A/c (Brokerage)	700
			1.4.2015	By Joint Venture A/c (share of profit)	4,590
		82,090			82,090

Working Notes :

(1) Total bales of jute purchased (1,400 + 1,200) = 2,600 Less: Total bales of jute sold (700 + 1,600) = 2,300. Total : 300 unsold. The above unsold bales of jute are taken over by X and Y in the ratio 2:1. Therefore, X takes over 200 bales and Y takes over 100 bales.

		₹
(2) Ascertainment of Cost of bales :	1,400 bales @ ₹ 55 per bale = ₹ 77,000 plus brokerage @ ₹ 2 per bale = 2,800 = Total	79,800
	1,200 bales @ ₹ 62 per bale = ₹ 74,400 plus brokerage @ ₹ 2 per bale = 2,400 = Total	76,800
		1,56,600

Therefore, the cost per bale = ₹ 1,56,600 / 2,600 = ₹ 60.23 (App.).

So, the value of unsold stock taken over by the venturers will be X – 200 x 60.23 each = ₹ 12,046 and Y – 100 x 60.23 each = ₹ 6,023

Abnormal and Normal Losses

Abnormal losses may arise owing to causes such as, theft, fire, and the like. For calculating the profit of the joint venture abnormal losses are ignored. It is ignored on the ground that joint venture account itself represents Trading as well as Profit and Loss Account. However, any insurance claim received is credited to the Joint Venture Account.

Normal losses are inevitable or unavoidable. These may arise due to natural causes like breaking in bulk, evaporation, leakage, drying and the like. No effort can prevent these losses.

When there is no stock remaining unsold, there will be no treatment for normal loss. But where there is some stock remaining unsold, the value of stock on joint venture will be ascertained as follows :

$$\frac{\text{Value of goods purchased}}{\text{Net quantity(after normal loss) in units}} \times \text{Unsold goods (in units)}$$

Illustration 11

X and Y entered into a joint venture agreement to share the profits and losses in the ratio of 2:1. X supplied goods worth ₹ 60,000 to Y incurring expenses amounting to ₹ 2,000 for freight and insurance. During transit goods costing ₹ 5,000 were damaged and a sum of ₹ 3,000 was recovered from the insurance company. Y reported that 90% of the remaining goods were sold at a profit of 30% on their original cost. Towards the end of the venture a fire occurred and as a result the balance stock lying unsold with Y was damaged. The goods were not insured and Y agreed to compensate X by paying in cash 80% of the aggregate of the original cost of such goods plus proportionate expenses incurred by X. Apart from the joint venture share of profits, Y was also entitled under the agreement, to a commission of 5% of the net profits of joint venture after charging such commission. Selling expenses incurred by Y totalled ₹ 1,000. Y had earlier remitted an advance of ₹ 10,000. Y duly paid the balance due to X by draft. You are required to prepare in the Books of X: (1) Joint Venture Account, and (2) Y Account.

Solution

In the books of X

Dr. Joint Venture Account Cr.

Date	Particulars	₹	Date	Particulars	₹
	To Purchases A/c (Goods supplied)	60,000		By Bank A/c (Insurance claim)	3,000
	To Bank A/c (Expenses)	2,000		By Y A/c (Sales)	64,350
	To Y A/c (Expenses)	1,000		By Y A/c (Compensation for loss)	4,546
	To Y A/c (Commission)	424			
	To Profit & Loss A/c (Share of profit)	5,648			
	To Y A/c (Share of profit)	2,824			
		71,896			71,896

Dr. Y Account Cr.

Date	Particulars	₹	Date	Particulars	₹
	To Joint Venture A/c (Sales)	64,350		By Bank A/c (Advance)	10,000
	To Joint Venture A/c (Compensation)	4,546		By Joint Venture A/c (Expenses)	1,000
				By Joint Venture A/c (Commission)	424
				By Joint Venture A/c (Profit)	2,824
				By Bank A/c (Final payment)	54,648
		68,896			68,896

Working Notes :

(1) Calculation of Sales Proceeds

	₹
Cost price of the goods sent	60,000
Less: Goods damaged at cost	5,000
	55,000
Less: Cost of goods unsold (10% of ₹ 55,000)	5,500
Cost of goods sold	49,500
Profit (30% of cost)	14,850
Sales Proceeds	64,350

(2) Calculation of Compensation

	₹
Cost of goods damaged by fire (unsold)	5,500
Add: Proportionate Expenses (2,000 / 60,000) x 5,500	183
Total cost	5,683

Y will compensate to the extent of 80%, i.e., 5,683 x .8 = ₹ 4,546 (approx.)

(3) Commission Payable to Y : Profit before charging Y's commission is ₹ 8,896 {₹ 71,896 – (₹ 60,000 + ₹ 2,000 + ₹ 1,000}. Therefore, Y's commission is (5 /105) x ₹ 8,896 = ₹ 424 (approx.).

Illustration 12

John and Ali entered into a joint venture agreeing to share profits and losses in the ratio of 3:2. On 4.1.2015, Ali purchased goods costing ₹ 60,000 and spent ₹ 2,000 as expenses. On the same date he sent to John part of these goods costing ₹ 40,000. On 7.2.2015, John sent ₹ 30,000 to Ali. On 10.2.2015, he purchased goods costing ₹ 50,000 and sent half of the goods to Ali. He paid ₹ 1,000 as carriage. On 24.3.2015, Ali sold most of the goods in his possession for ₹ 55,000 and the remaining goods costing ₹ 3,000 were taken over by him at an agreed valuation of ₹ 4,000. On 18.4.2015, John sold all the goods in his possession for ₹ 75,000 except some damaged goods costing

₹5,000 which it was agreed were to be written off as unsaleable. His selling expenses amounted to ₹ 2,000. On 30.4.2015, the amount required to settle the accounts between John and Ali was paid by the appropriate party. Show the Joint Venture Account and John's Account in the books of Ali.

Maganbhai of Rajkot and Ramanan of Madras enter into a joint venture deciding to share profits and losses in the ratio of 3:2. Maganbhai purchases 3,000 kg of material A for ₹ 1,50,000 and sends it to Nana of Pune for processing. Maganbhai pays the transport cost amounting to ₹ 6,000. Ramanan purchases 2,000 kg of material B for ₹ 2,00,000 and sends it to Nana of Pune for processing. The transport cost amounting to ₹ 10,000 is paid by Ramanan. Nana does the processing work and manufactures 4,800 units of the finished product C. Nana prepares a 'conversion cost' bill on the joint venture at ₹ 20 per unit. Maganbhai pays this bill. The goods are sent to Banerjee of Calcutta, the transport cost amounting to ₹ 18,000 paid by Maganbhai. Banerjee sells 90% of the goods at ₹ 150 per unit. He takes over the balance goods at ₹ 120 per unit. After deducting his own commission @ 10% of sale proceeds, he remits the amount to Maganbhai. The co-venturers agree to settle the account, after retaining 30% of the profits for taxation on the income of association of persons. You are required to show the ledger accounts in the books of Maganbhai.

Tutorial Note: We assume that no commission is payable on the unsold stock taken over by Banerjee and the amount for the provision for taxation lies with Maganbhai.

(b) When each co-venturer maintains a record of his own transactions. [Memorandum Method]

In such a case, each co-venturer records in his books of account those transactions with which he is concerned. He does not record any transactions of his co-venturers. In this method, each co-venturer opens the following two accounts : (i) Joint Venture with ... Account; and (ii) Memorandum Joint Venture Account.

(i) Joint Venture with .... Account: It is in the nature of a personal account. Each co-venturer debits this account with all the payments and supply made by him on behalf of the joint venture such as purchase, expenses, and the like and credits it with all the payments received by him on behalf of the venture. This account is a part of the double-entry system of the venturer concerned. It should be remembered in this context that 'Joint Venture with ... Account' is not a nominal account and does not disclose any profit or loss.

(ii) Memorandum Joint Venture Account: As soon as the venture is completed, each party submits a copy of his account to others. With the help of this information each co-venturer prepares a 'Memorandum Joint Venture Account', which shows profit or loss on venture. This account simply summarizes the expenses and incomes of all the parties in respect of the joint venture for the purpose of ascertaining profit on venture. Since, it is a memorandum account it does not form a part of the double-entry system.

Illustration 14

A and B entered into a joint venture to purchase and sell crackers during the Diwali season. Profits and losses were to be shared equally between A and B. A was to purchase crackers from Sivakasi and send it to B of Mumbai who would sell it.

On 1.8.2014, A purchased crackers worth ₹ 1,00,000 and incurred the following expenses in sending it to B: (i) forwarding charges ₹ 6,000; and (ii) insurance charges ₹ 2,000.He immediately drew upon B ₹ 1,00,000 for 3 months. The acceptance was discounted @ 18% p.a. B paid the following expenses : (i) cartage charges ₹ 3,000; (ii) commission to agents ₹ 5,000; (iii) rental charges ₹ 4,000.

The whole crackers were disposed of for ₹ 2,00,000. He forwarded a cheque to A for the amount due on 31.10.2014. You are required to prepare the following accounts : (a) Memorandum Joint Venture Account; (b) B in Joint Venture in the books of A; and (c) A in Joint Venture in the books of B.

Ghosh and Bose enter into a joint venture for guaranteeing the subscription at par of 1,00,000 shares of ₹ 10 each of a joint stock company. They agree to share profits and losses in the ratio of 2:3. The terms with the company are 4.5% commission in cash and 6,000 shares of the company as fully paid-up. The public take up 88,000 of the shares and the remaining share of guaranteed issues are taken up by Ghosh and Bose who provided cash equally. The commission in cash is taken by partners in the ratio of 4:5. The entire shareholding of the joint venture is then sold through brokers, 25% at a price of ₹ 9;. 50% at a price of ₹ 8.75; 15% at a price of ₹ 8.50; and remaining 10% are taken over by them equally at ₹ 8 per share. The sale proceeds of the shares are taken by the partners equally.

Prepare a Joint Venture Memorandum Account and the separate accounts in the books of Ghosh and Bose.

Solution

Dr. Memorandum Joint Venture Account Cr.

Date	Particulars	₹	₹	Date	Particulars	₹	₹
	To Ghosh : Cost of shares		60,000		By Ghosh :		
	To Bose : Cost of shares		60,000		Sales proceeds 1/2	71,100	
					Commission (cash) 4/9	20,000	
					Shares taken over	7,200	98,300

	To Share of profit :				To Bose :		
	Ghosh 2/5th		32,640		Sales proceeds 1/2	71,100	
	Bose 3/5th		48,960		Commission (cash) 5/9	25,000	
					Shares taken over	7,200	1,03,300
			2,01,600				2,01,600

Dr. Joint Venture with Bose Account Cr.

Date	Particulars	₹	Date	Particulars	₹
	To Bank A/c : cost of shares	60,000		By Bank A/c (Share of commission)	20,000
	To Profit & Loss A/c (Share of profit)	32,640		By Bank A/c (Share of proceeds)	71,100
	To Balance c/d (Amount due)	5,660		By Shares A/c (Shares taken over)	7,200
		98,300			98,300

In the books of Bose

Dr. Joint Venture with Ghosh Account Cr.

Date	Particulars	₹	Date	Particulars	₹
	To Bank A/c : Cost of shares	60,000		By Bank A/c (Share of commission)	25,000
	To Profit & Loss A/c (Share of profit)	48,960		By Bank A/c (Share of proceeds)	71,100
				By Shares A/c (Shares taken over)	7,200
				By Balance c/d (Amount due)	5,660
		1,08,960			1,08,960

Working Notes : (1) Since public took up 88,000 shares, the venturers were to take up the balance of shares, i.e. 1,00,000 – 88,000 = 12,000 shares. Secondly, 4.5% commission was given on gross face value of shares, i.e. 4.5% on ₹ 10,00,000 (1,00,000 x ₹ 10) = ₹ 45,000; (2) The venturers were having 18,000 shares with themselves, i.e. 12,000 shares purchased and 6,000 shares given to them as a part of the consideration. Therefore, sale proceeds and unsold shares taken over are calculated as under:

Sale Proceeds		**Sale proceeds taken over** :
25% of 18,000 shares = 4,500 shares @ ₹ 9.00 each =	₹ 40,500	Unsold shares — 10% of 18,000 = 1,800 shares
50% of 18,000 shares = 9,000 shares @ ₹ 8.75 each =	₹ 78,750	Taken over by each of them 1/2 of 1,800 x ₹ 8
15% of 18,000 shares = 2,700 shares @ ₹ 8.50 each =	₹ 22,950	= ₹ 7,200.
Sale Proceeds =	1,42,200	

Illustration 16

A and B decided to work on a joint venture for the sale of electric motors. On 21st May, 2014, A purchased 200 electric motors at ₹ 175 each and despatched 150 electric motors to B incurring ₹ 1,000 as freight and insurance charges, 10 electric motors were damaged in transit. On 1st February, 2015 ₹ 500 was received by A from the insurance company in full settlement of claim. On 15th March, 2015, A sold 50 electric motors at ₹ 225 each. He received ₹ 15,000 from B on 1st April, 2015.

On 25th May, 2014 B took delivery of electric motors and incurred the following expenses : clearing charges ₹ 125; Repair charges for motors damaged in transit ₹ 300; and Godown rent ₹ 600. B sold the electric motors as follows : On 1.2.2015 10 damaged motors at ₹ 170 each; on 15.3.2015, 40 motors at ₹ 200 each; on 1.4.2015, 20 motors at ₹ 315 each; on 3.4.2015, 80 motors at ₹ 250 each. It is agreed that they are entitled to commission at 10% on the respective sales effected by them and that the profits and losses shall be shared by A and B in the ratio of 2 : 1. B remits to A the balance of money due on 30th April, 2015.

Prepare : (1) Joint Venture Account with B Account in the books of A, and (2) Memorandum Joint Venture Account.

Illustration 18

Asim and Anup entered in joint venture to buy and sell second hand T.V. sets. They shared profits and losses equally. It was agreed that interest @ 10% p.a. would be provided for the amount invested by the venturers in the venture.

On 1.8.2013 Asim purchased 6 T.V. sets for ₹ 36,000 and paid ₹ 3,300 to the mechanic for repairs. He sold all the T.V. sets for ₹ 47,500 on 15.9.2013.

On 1.9.2013, Anup purchased 3 T.V. sets at a cost of ₹ 18,300 and incurred ₹ 2,100 for repairing. He sold 2 T.V. sets for ₹ 16,400 on 25.11.2013 and the unsold set was taken over by him at cost plus 8%. The venture was closed on 30.11.2013.

Prepare Memorandum Joint Venture Account and the Account of "Joint Venture with Anup" in the books of Asim.

Solution

Dr. Memorandum Joint Venture Account Cr.

Date	Particulars		₹	Date	Particulars		₹
	To Asim : Cost of T.V.Sets	36,000			By Asim (sale proceeds)		47,500
	Repairs	3,300			By Anup :		
	Interest (Note 2)	491	39,791		Sale proceeds	16,400	
	To Anup : Cost of T.V.Sets	18,300			T.V. taken over (Note 1)	7,344	23,744
	Repairs	2,100					
	Interest (Note 2)	510	20,910				
	To Net Profit :						
	Asim	5,272					
	Anup	5,271	10,543				
			71,244				71,244

In the books of Asim

Dr. Joint Venture with Anup Account Cr.

Date	Particulars	₹	Date	Particulars	₹
2013			2013		
Aug 1	To Bank A/c (Purchases of T.V.)	36,000	Sep 15	By Bank A/c (Sale Proceeds)	47,500
	To Bank A/c (Repairs)	3,300			
Nov 30	To Interest Received A/c	491			
	To Profit and Loss A/c (Share of Profit)	5,272			
	To Bank A/c (Final Payment)	2,437			
		47,500			47,500

Working Notes :

(1) Calculation of Unsold Stock taken over by Anup

	₹
Cost of 1 T.V. (₹ 18,300 / 3)	6,100
Add: Proportionate repairs cost (₹ 2,100 / 3)	700
	6,800
Add: 8% Profit on ₹ 6,800	544
Value of 1 T.V. taken over by Anup	7,344

(2) Calculation of Interest

Asim invested ₹ 39,300 (₹ 36,000 + 3,300) on 1.8.2013 but received back ₹ 47,500 on 15.9.2013.

Therefore, he is entitled to interest on capital invested on ₹ 39,300 @ 10% p.a. for 1.5 months (1.8.2013 to 15.9.2013). Therefore, interest = ₹ 39,300 × 10% × 1.5 / 12 = ₹ 491.

Anup invested ₹ 20,400 (₹ 18,300 + 2,100) on 1.9.2013 but received back ₹ 16,400 on 25.11.2013.

If interest is calculated to nearest month, he is entitled to interest on capital invested on ₹ 20,400 @ 10% p.a. for 3 months (1.9.2013 to 30.11.2013). Therefore, interest = ₹ 20,400 × 10% × 3/12 = ₹ 510.

Illustration 19

A and B entered into a joint venture as equal partners and guaranteed, as underwriters, the subscription at par of 10,00,000 shares of Re 1 each of Madan Ltd and to pay all expenses upto allotment in consideration of Madan Ltd issuing to them 30,000 other shares of Re 1 each fully paid up and paying ₹ 20,000 in cash.

A introduced cash into the business to meet the following expenses :

Stamp charges and registration fees etc ₹ 5,000;
Advertisement charges ₹ 2,000.

B introduced cash to meet the following expenses :

Printing charges of documents ₹ 4,000;
Solicitor's charges ₹ 2,500; Rent ₹ 500.

Application fell short of 10,00,000 shares by 40,000 shares. A took up those shares on joint account in terms of their agreement with Madan Ltd and himself paid for those shares. Finally, Madan Ltd handed over the shares and the cash to A and B in full payment of the underwriting commission as per agreement. The cash thus received was taken over by B. Out of the total 70,000 shares received by the venturers, 55,000 shares were sold out for ₹ 50,000 and the proceeds were taken up by A and the rest of the shares were taken up by B at an agreed value of ₹ 12,000.

Prepare Memorandum Joint Venture Account including necessary accounts in the books of both the parties assuming that they settled their accounts by payment of cash.

Valuation of Unsold Stock

Where accounts are to be prepared before the completion of the venture, stock in hand at the balancing date must be valued. The value of the unsold stock is credited to the Joint Venture Account and debited to the Stock on Joint Venture Account. In the next period, it should be brought down in the debit side of the Joint Venture Account.

The unsold stock should be valued by the principle of 'Cost price or Market Price, whichever is lower'.

The cost price should include:

(i) Cost of unsold goods; and (ii) Proportionate non-recurring expenses such as freight, insurance, carriage inward and the like, but not selling or distribution cost.

Interim Settlement of Accounts and Unsold Stock

Before the completion of the venture, if an interim settlement is desired and there is some unsold stock lying in the hands of either or both the parties, then it may be treated in the following manner.

Method 1: (a) Credit Memorandum Joint Venture Account with unsold stock and bring it down on the debit side as balance in the next period; (b) Divide the unsold stock between the co-venturers in the *profit sharing ratio*; (c) Each co-venturer in his own books will bring down *his share of stock* separately without merging with other dues.

Method 2: (a) Credit Memorandum Joint Venture Account with unsold stock and bring it down on the debit as balance in the next period; (b) *Don't divide the unsold stock between the co-venturers*; (c) Each co-venturer in his own books will bring down the amount of unsold stock that *he has on hand*.

We suggest that the students should follow Method 1 because it reflects the respective interest in the stock.
The following illustration will make the matter more clear (Method 1).

Illustration 20

On 1st January, 2014, Pandey and Parker entered into a joint venture to consign goods to Parekh to be sold on their joint risk. They agreed to share profits and losses in the ratio of 3:2.

On 15th April, 2014, Pandey consigned goods to the value of ₹ 36,000 and incurred expenses amounting to ₹ 3,000. On 31st July, 2014, Parker also consigned goods to the value of ₹ 22,000 and incurred expenses amounting to ₹ 1,800. On 15th Nov. 2014, Parekh sold 80% of the total goods for ₹ 60,000 and remitted the proceeds to Pandey after deducting 5% commission on sales. On 31st Dec., 2014, on which date accounts were prepared, an interim settlement was effected between Pandey and Parker. On 15th August, 2015, Parekh sold the remainder of the total goods for ₹ 8,000 and remitted the proceeds to Parker, less 5% commission on sales. On 31st Oct., 2015, a final settlement was effected between Pandey and Parker.

You are required : (a) to show the accounts in the books of each co-venturer to record his own transactions, and (b) to prepare a Memorandum Joint Venture Account.

Illustration 21

Kapil and Amarnath of Nagpur entered into a joint venture to trade in silk goods in the ratio 2:1. On June 1, 2014, Kapil bought goods worth ₹ 7,200 and handed over half of the goods to Amarnath. On July 1, 2014 Kapil bought another lot of goods costing ₹ 2,400 and paid ₹ 180 as expenses. On September 1, Amarnath purchased goods for ₹ 4,500 and on the same day he sent to Kapil a part of these goods costing ₹ 1,800 and paid ₹ 240 towards expenses. On the same day Kapil remitted ₹ 1,800 to Amarnath. The goods were invariably sold by the venturers at a uniform price of $33^{1}/_{3}$% above cost price excluding expenses. Each of the venturers collected cash proceeds on sales excepting an amount of ₹ 250 owing to Kapil by a customer and this was written off as a loss relating to the venture. In addition, goods costing ₹ 600 in possession of Amarnath were destroyed by fire and an amount of ₹ 500 was realized by him as compensation from the Insurance Company. On December 20, unsold goods costing ₹ 1,500 (at cost) were lying with Kapil. Of these, goods costing ₹ 600 were taken by Kapil for personal use and the balance was purchased by him at an agreed value of ₹ 1,000. Amarnath disposed of all the goods with him on December 31, excepting some damaged goods costing ₹ 300 which were written off as unsaleable.

Prepare a Memorandum Joint Venture Account and the Joint Venture Account as it would appear in the books of Kapil and Amarnath assuming that the final settlement of accounts, between the venturers took place on December 31, 2014.

Solution

Dr. Memorandum Joint Venture Account Cr.

Date	Particulars	₹	Date	Particulars	₹
	To Kapil :			By Kapil :	
	Cost of goods (₹ 7,200 + ₹ 2,400)	9,600		Sales (Note)	8,400

Gopal and Gopi, who are share brokers, agreed to enter into a joint venture to underwrite 5,00,000 equity shares of ₹ 10 each of a new flotation of X Ltd. X Ltd. agreed to allot them as fully-paid 4,000 shares in the company in consideration of the underwriting arrangement. The parties were to share profits and losses equally. In connection with the venture, the following expenses were incurred:

Gopal: Printing and stationery ₹ 5,000; postage ₹ 1,000; and advertisement ₹ 3,000.

Gopi : Postage ₹ 750; solicitor's fees ₹ 3,500; and entertainment expense ₹ 4,000.

The public subscription was for 4,80,000 shares only and the underwriters were forced to take up the balance and pay for them, to enable them to do so, the two persons approached the New Bank of India, which on the security of the shares, advanced the required sum on 1st July, 2015 at 15% interest p.a. The underwriters paid for the shares on the same day and were also allotted the 4,000 shares by X Ltd.

The underwriters through the bank unloaded their lot of holdings in the market in equal lots and realized 90% of the face value for the first lot on 30th September and 85% for the second lot on 31st October. The sale proceeds were applied in full to discharge the bank loan and the relative interest on the same date. (The four thousand shares formed part of the second lot). Share transfer fees of ₹ 1,006.25 was met from the Joint Venture Bank Account.

You are required to draw a Memorandum Joint Venture Account, the account of Gopal as appearing in Gopi's books and the account of Gopi as appearing in Gopal's books and as the settlement of account between the parties.

Solution

Date	Particulars	₹	Date	Particulars	₹
	To Bank A/c (Expenses)	8,250		By P & L A/c (Loss on Venture)	8,500
	To Bank A/c (Amount in settlement)	250			
		8,500			8,500

Working Notes :

(1) Sale Proceeds :	₹	(2) Interest :	₹
30.9.2015 12,000 shares @ ₹ 9	1,08,000	On ₹ 2,00,000 @ 15% for 3 months	7,500.00
31.10.2015 12,000 shares @ ₹ 8.50	1,02,000	On ₹ 99,500 @ 15% for 1 month	1,243.75
	2,10,000	[₹ 2,00,000 + ₹ 7,500 — ₹ 1,08,000]	8,743.75

(3) Balance in Joint Bank Account : Sale Proceeds of 24,000 shares = ₹ 2,10,000 Less: (Loan ₹ 2,00,000 + Interest & Transfer Fee ₹ 9,750) = ₹ 2,09,750. Therefore, Balance given to Gopal = ₹ 250.

Conversion of Consignment into Joint Venture

The consignor and the consignee may decide to convert a consignment into a joint venture for their mutual interest. Conversion may be done: (a) from a particular date; and (b) with retrospective effect.

(a) Conversion from a particular date: When a consignment is converted into a joint venture from a particular date, the following steps should be followed:

Step 1 Prepare Consignment Account and Consignee Account in the usual manner upto the date of conversion and determine profit or loss on consignment and consignee's balance upto that date.

Step 2 Open Joint Venture Account and debit it with the stock on consignment (on the date of conversion). Prepare Joint Venture Account in the usual manner.

Step 3 Bring down the balance of the Consignee Account and post all the transactions relating to joint venture in the usual manner. Finally, settle the account of the consignee.

The following illustration will help the students to understand the principles.

Illustration 23

On 1st January, 2015 Menon sent goods to Gupta to be sold on consignment basis @ 5% commission. Goods costing ₹ 6,00,000 were sent and ₹ 50,000 expenses were incurred. Gupta has to incur ₹ 20,000 expenses for landing and 75% of the goods were sold out for ₹ 7,00,000.

Gupta sent the amount due from him with the Account Sales on 31st March, 2015. But he wanted to return the balance goods as he was not agreeable to carry on as a commission agent. He was, however, persuaded to continue on joint venture basis for 1/3rd profit. ₹ 2,50,000 worth of goods were further despatched by Menon.

All goods (except ₹ 25,000 which were taken over by Gupta for the same amount) were sold out for ₹ 6,00,000 before 30th June, 2015. Menon incurred ₹ 25,000 as expenses and Gupta's expenses amounted to ₹ 15,000. The account was settled on 30th June, 2015.

Show necessary accounts in the books of both the parties.

(b) Conversion with retrospective effect: When a consignment is converted into a joint venture with effect from a previous date, the following steps should be followed:

Step 1 Prepare Consignment Account in the usual manner.

Step 2 Prepare Joint Venture Account (from the same information) assuming that the consignor and the consignee were in joint venture from the very beginning.

Step 3 Determine the amount received by the consignee under consignment.

Step 4 Determine the amount which would have been received by the consignee as a co-venturer.

Step 5 If there is any difference between the two amounts, pass the following adjusting entry:

(a) If the amount received as consignee is more than the amount receivable as co-venturer

Consignee Account Dr.

To Profit and Loss Account

(b) If the amount received as consignee is less than the amount receivable as co-venturer

Profit and Loss Account Dr.

To Consignee Account

Illustration 24

On 1st January, 2015, Singh of Amritsar, a manufacturer of sports goods, sent a consignment of 100 cricket bats to Bose of Calcutta to be sold on a consignment basis at a commission of 20%. The commission is to cover the consignee's expenses but not the freight charges of the goods to Calcutta. The cost of each bat is ₹ 100 but is invoiced to Bose at ₹ 150 each. A case containing 10 cricket bats was lost, against which the consignor lodged a claim and collected from the insurance company ₹ 800.

The consignee paid ₹ 540 as freight charges and spent a further sum of ₹ 400 as sales expenses. Consignor's expenses amounted to ₹ 500. The consignee accepted a bill of exchange drawn by Singh for 3 months (beginning with the date of despatch) for ₹ 10,000 which bill was discounted at 6% p.a. with the bankers. Bose sold 75 bats at ₹ 200 each and on 30th June 2015 remitted the balance due from him.

After making up the accounts on 30th June 2015, the parties decide to convert their relationship to that of a joint venture on the terms that the cost of a bat would be taken at ₹ 150. Singh is to get an interest of 8% p.a. on his investment and Bose to get a commission of 10% on sales. The co-venturers are to share profit and losses equally.

Prepare the necessary accounts in the books of Singh and indicate the adjustment journal entry required on conversion of the terms of despatch. The workings should form a part of your answer.

Key Points

- A joint venture is the combination of two or more persons into a single activity. It is a form of partnership which is limited to a specific venture.
- When the size of the venture is large and the duration of the venture is protracted, then a complete separate set of books of account may be maintained under the double-entry system for recording all joint venture transactions.
- When the size of the venture is small and co-venturers are residing at distant places, each co-venturer may record joint venture transactions in his own books of account without inaugurating a complete set of double- entry books for the venture.

THEORETICAL QUESTIONS

1. (a) What do you understand by a joint venture? (b) State its main features.
2. Distinguish between Joint venture and consignment.
3. Explain how joint venture accounts are kept when a complete set of double-entry books is separately maintained for this purpose.
4. (a) What is a joint bank account?
   (b) How are entries regarding joint venture passed when such an account is kept?

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each statement or answer each question below.

1. A memorandum joint venture summarises -
   A assets and liabilities
   B expenses and incomes
   C receipts and payments
   D all transactions
2. Recording of transactions in a separate set of book is made
   A when the size of the business is small
   B when double entry system cannot be followed
   C for better financial control
   D when co-venturers are residing at distant places
3. In a joint venture, valuation of stock is affected -
   A when there is an abnormal loss
   B when insurance claim is received for loss of stock
   C when insurance claim is not received for loss of stock
   D when there is a normal loss
4. For calculating the profit of a joint venture, abnormal losses are :
   A credited to joint venture account
   B ignore
   C debited to abnormal loss account
   D debited to co-venturers' capital account
5. Any insurance claim received for the loss of stock is
   A treated as an income
   B deducted from expenses
   C debited in the bank account only
   D not shown in the books

6. In a joint venture, no distinction is made between normal and abnormal loss when
   A there is some unsold stock
   B there is no unsold stock
   C one venturer withdraws some stock
   D insurance claim is received in respect of goods lost by fire
7. To make final settlement in a joint venture :
   A joint bank account is closed first
   B joint bank account and venturers' accounts are closed
   C joint venture is closed last
   D joint venture account is closed first and the remaining account are closed simultaneously
8. For determining profit / loss of the joint venture -
   A joint venture account is prepared
   B memorandum joint venture account is prepared
   C joint venture account or memorandum joint venture account is prepared
   D joint venture account and memorandum joint venture account is prepared
9. A joint venture will come to an end as soon as
   A income is received and payments are made
   B income is earned and payments are recognised
   C income is earned and payments are made
   D the venture is completed
10. A joint venture is undertaken when the
    A respective advantages of the parties are pooled together
    B termination is uncertain
    C ascertainment of income is simple
    D accounting concepts are not applicable
11. A joint venture is a
    A general partnership
    B specific partnership
    C limited partnership
    D limited liability partnership
12. A joint venture account is a
    A real account
    B personal account
    C nominal account
    D valuation account
13. Which of the following is true ?
    A there will be separate treatment for normal loss
    B there will be separate treatment for abnormal loss
    C there will be separate treatment for both normal and abnormal loss
    D there will be no treatment for normal loss but valuation of unsold stock is affected
14. Which of the following is true ?
    A profit / loss is shown by the ventures equally
    B for distribution of profit on joint venture, a separate account is opened
    C the relationship of the co-ventures is that of partners
    D in a joint venture, generally a balance sheet is prepared
15. Which of the following is true ?
    A joint bank account is just like a cash book
    B joint venture account is just like a trading account
    C joint venture account is just like a profit and loss account
    D joint bank account is closed first of all
16. Which of the following is true ?
    A joint venture account does not record depreciation
    B joint bank account is opened specially for the venture
    C goods taken over by the venturers are not recorded in the venturers' accounts
    D joint venture account and joint bank account are closed simultaneously.

17. Profit / loss in a joint venture is ascertained -
    A any time during an accounting period
    B at the end of the accounting period
    C at the end of the venture
    D at the end of the venture and for each venture separately.
18. In joint venture, many accounting concepts are not applicable. For example,
    (i) money measurement concept
    (ii) going concern
    (iii) entity concept
    A all three are not applicable
    B (i) and (ii) are not applicable
    C (ii) is not applicable
    D (iii) is not applicable
19. Memorandum joint venture account shows :
    A the cash transaction between the co-venturers
    B the amount due to co-venturer
    C profit or loss on joint venture
    D the credit as well as cash transactions between the co-venturers
20. In joint venture, discounting charges of a bill of exchange is
    A treated as financial expenses and charged to profit and loss account
    B treated as joint venture expense and charged to joint venture account
    C treated as personal expenses of the drawee
    D treated as personal expenses of the drawer

PRACTICAL QUESTIONS

A. Separate Set of Books

1. Murari and Mihir entered into a joint venture and agreed to divide the profit as Murari 60% and Mihir 40%. Murari and Mihir contributed ₹ 60,000 and ₹ 40,000 respectively for carrying on transactions relating to the venture. They opened a Joint Account with the above contributions. They purchased three old State Buses for ₹ 80,000. Murari and Mihir personally paid ₹ 15,000 and ₹ 10,000 respectively for repairs and renewals. They purchased few tyres and tubes costing ₹ 18,000. Two buses were sold for ₹ 90,000 and the third one was taken by Mihir at cost price. Show the Joint Venture Account, Joint Bank Account and the Co-venturers Accounts.
2. Ram and Shyam undertook jointly to build a house for a company at an agreed price of ₹ 60,000, payable ₹ 45,000 in cash and the balance in fully paid shares of the new company. A Joint Banking Account was opened in their names into which Ram paid ₹ 15,000 and Shyam paid ₹ 10,000. Profit sharing ratio between Ram and Shyam was 3:2. From the following transactions, prepare Joint Venture Account, Joint Bank Account and the Venturers Personal Account closing the venture: Materials purchased ₹ 20,000; Wages paid ₹ 15,000; Materials supplied from Stock by Ram ₹ 3,000 and Shyam ₹ 2,500 respectively. Architect's fees ₹ 1,000 was paid by Shyam.
   The joint venture was closed by Ram taking up all the shares of the company at an agreed valuation of ₹ 12,000 and Shyam taking up the stock of surplus materials at an agreed valuation of ₹ 1,500. The contract was duly completed and the price was received. Prepare Joint Venture Account, Joint Bank Account and accounts of the venturers.
3. Das, Bose and Gupta undertake to errect a five storied mansion for National Housing Trust Ltd. The contract price is agreed at ₹ 25,00,000 and to be paid in cash ₹ 22,00,000 by four equal instalments and the balance amount in 8% Debentures of the company. They agree to share profit or loss in 2:2:1 ratio. They opened a joint banking account with the cash contributed as stated below: Das ₹ 3,00,000; Bose ₹ 3,75,000 and Gupta ₹ 2,00,000. Das arranges the preparation of building plans, and the like and pays ₹ 32,000 as architects fees. Bose brings a concrete mixer and other implements valued at ₹ 80,000 and Gupta brings a motor lorry valued at ₹ 75,000. They paid in cash for the following items :
   Materials — ₹ 12,26,800; Wages — ₹ 7,33,200; Sundry Expenses — ₹20,000; and Plant — ₹ 60,000
   On completion of the venture the concrete mixer is sold for ₹ 50,000 and thePlant and other implements are sold as scrap for ₹ 10,000. Gupta takes back the motor lorry at ₹ 40,000. Subsequently, Das took over the Debentures issued by the company at a valuation of ₹ 2,80,000.
   Show the necessary ledger accounts for the Joint Venture.

4. Das and Krishnan entered into a joint venture sharing profits and losses in the ratio of 3:2. They opened a Bank Account by depositing ₹ 40,000 each. Das purchased 800 kg of an item @ ₹ 60, and his expenses were ₹ 13,000. Krishnan purchased a second item of 10,000 kg.@ ₹ 2.10 and his expenses were ₹ 11,000. Expenses were met from private sources and purchases were paid from Bank Account. Das sold 600 kgs of the first item @ ₹ 100 and his selling expenses were ₹ 5,500. Krishnan sold 8,000 kgs of the second item @ ₹ 5 and his selling expenses were ₹ 6,000. All the sale proceeds were deposited in the bank account and expenses were met from private sources. Write up necessary accounts in the books of the venture. Also prepare a Balance Sheet of the venture.
5. X and Y enter into a Joint Venture to build a multi-storeyed building. They agree to share the profits and losses equally upto ₹ 50,000 of the profit or loss from the venture. Thereafter, the profit and loss are to be shared in the proportion of X 3/5th and Y 2/5th. X contributes plant and machinery worth ₹ 40,000 and meets registration expenses worth ₹ 10,000. Y contributes the plot on which the building is to be built, valued at ₹ 1,00,000. Other expenses incurred are: Fuel and electricity charges ₹ 40,000; Raw materials ₹ 1,60,000; Labour charges ₹ 75,000; and Advertisement expenses ₹ 5,000. All the above expenses were met from the Bank Account opened for the joint venture. At the end of the venture X agreed to take the Plant and Machinery valued at ₹ 10,000. Y sold off the multi-storeyed building for a total of ₹ 7,20,000 and collected all dues from the buyers except for one flat, valued at ₹ 1,80,000 which he kept for himself in lieu of his expected share of profit.
   The venturers who had agreed to maintain their venture accounts in separate sets of books, ask you to prepare the Joint Venture Account, Joint Bank Account and Venturer's Capital Accounts.

B. No Separate Set of Book

6. A and B entered into a joint venture for the purchase and sale of iron tubes. Profits and losses were to be shared equally. A financed the venture and B undertook the sales on a commission of 10% on the sale proceeds. A purchased goods to the value of ₹ 40,000 less $3^3/_4$% trade discount, paid freight ₹ 1,000 and advanced ₹ 1,800 to B for expenses. B expended for travelling ₹ 200, carriage ₹ 500, rent ₹ 300, advertisement ₹ 700 and sundries ₹ 50. B sold whole of the goods for ₹ 56,000 and paid A ₹ 46,000 on account. It was agreed that A should receive interest of ₹ 5,000. Show how the transactions would be recorded in the ledgers of both the parties.
7. A and B entered into a joint venture for underwriting the subscription at par of the entire share capital of the Copper Mines Ltd., consisting of 1,00,000 equity shares of ₹ 10 each and to pay all expenses upto allotment. The profits were to be shared by them in the ratio 3:2. The consideration in return for this agreement was the allotment of 12,000 other shares of ₹ 10 each to be issued to them as fully paid. A provided the funds for: registration fees ₹ 12,000, advertising expenses ₹ 11,000, expenses on printing and distributing the prospectus ₹ 7,500 and other printing and stationery expenses ₹ 2,000. B contributed payment of office rent ₹ 3,000, legal charges ₹ 13,750, Salary to clerical staff ₹ 9,000 and other petty disbursement ₹ 1,750. The prospectus was issued and application fell short of the issue by 15,000 shares. A took these over on joint account and paid for the same in full. The venturers received the 12,000 fully- paid shares as underwriting commission. They sold their entire holding at ₹ 12.50 less 50 paise brokerage per share. The net proceeds were received by A for ₹ 15,000 shares and B for 12,000 shares.
   Show necessary accounts in the books of both the parties showing the adjustments.
8. A obtained a contract for the manufacture and supply of tubewell strainers for ₹ 1,62,500. He entered into a joint venture with B on the following terms, profit and losses being shared equally: (a) A should provide ₹ 1,50,000 as capital, earning interest at 4 per cent per annum. This amount was paid to B on 1st January, 2015. A should also be entitled to 2% of the contract price as commission; and (b) B should look after the technical and management side of the contract and would get (in addition to his share in the profits) a salary of ₹ 400 per month and ₹ 1,500 for the use of his plant in the joint venture.
   The following payments were made by B :
   Raw materials ₹ 50,000; Upkeep of Machine ₹ 5,000; Wages ₹ 60,000; and Establishment Expenses ₹ 4,500.
   The contract was completed on 30th September, 2015 and A received the contract price. On the same date he received the balance due from B.
   You are required to show in the books of B: Joint Venture Account, A Account and the Cash Account

C. Memorandum Method

9. Shipra of Siliguri and Balaram of Bombay entered into a joint venture with the object of buying and selling tea. Shipra agreed to arrange the purchase and Balaram to effect sales. They agreed to share profits and losses in the ratio of 2:1. Shipra purchased 100 boxes of tea at ₹ 1,500 per box subject to 30% trade discount and paid freight ₹ 3,500 and insurance ₹ 500.     Draw up the Memorandum Joint Venture Account and determine the share of profit of each partner.
15. Adarsh of Delhi and Laxman of Bangalore entered into a joint venture for purchase and sale of one lot of mopeds. The cost of each moped was ₹ 3,600 and the fixed retail selling price ₹ 4,500. The following were the recorded transactions:
    2015 Jan.1: Adarsh purchased 100 mopeds, paying ₹ 72,000 in cash on account. Adarsh raised a loan from A. Bank of ₹ 50,000 at 18% p.a. interest, repayable with interest on 1.3.2015. Adarsh forwarded 80 mopeds to Laxman incurring ₹ 2,880 as forwarding and insurance charges.
    Jan. 7: Laxman received the consignment and paid ₹ 720 as clearing charges.
    Feb. 1: Adarsh sold 5 mopeds for cash; Laxman sold 20 mopeds for cash. Laxman raised a loan of ₹ 1,50,000 from B. Bank repayable with interest at 18% p.a. on 1.3.2015. Laxman telegraphically transferred ₹ 1,50,000 to Adarsh incurring charges of ₹ 50. Adarsh paid the balance due for the mopeds.

Feb.26: Adarsh sold the balance mopeds for cash. Laxman sold balance mopeds for cash. Adarsh paid selling expenses ₹ 5,000. Laxman paid selling expenses ₹ 20,000.

Mar.1: Accounts settled between the venturers and loans repaid, profit being appropriated equally.

You are required to show : (1) The Memorandum Joint Venture Account; (2) Joint Venture with Laxman Account in Adarsh's books; and (3) Joint Venture with Adarsh Account in Laxman's books; You are to assume that each venture recorded only such transactions as concluded by him.

16. On 2.5.2014, P of Patna and C of Calcutta entered into a joint venture to buy and sell dolls. They agree to share profits and losses as 3:2. On 7.6.2014, C purchased 600 dolls at ₹ 52 each and sent 240 dolls to P, incurring ₹ 3,700 as freight and insurance charges. 25 of such dolls were damaged in transit and on 1.7.2014, he recovered a sum of ₹ 250 from the insurance company. On 15.7.2014, P made a remittance of ₹ 7,050 to C. On 26.7.2015, P purchased 300 dolls at ₹ 55 each and sent 100 dolls to C incurring ₹ 1,500 as freight and insurance charges. On 14.8.2014, 18 damaged dolls were taken over by P for personal purposes at an agreed valuation of ₹ 25 each and distributed the remaining damaged dolls, free of cost, amongst their customers. On 1.11.2014 both P and C disposed of all the dolls in their possession at ₹ 60 each. On 30.11.2014, the venture was closed and the accounts were settled by bank through bank draft.

    You are required : (a) to prepare a Memorandum Joint Venture Account, and (b) to show the account in the books of P to record his own transactions.

17. Sakti and Sadhan agree to enter into a joint venture to buy and sell television sets. Profits and losses are to be shared equally. On 5th May, 2015, Sakti purchased three television sets for ₹ 3,000, ₹ 3,500 and ₹ 4,000 respectively. He bought a special cabinet costing ₹ 750, which he fixed for one of the sets. On 31st May, 2015, he sold two of the sets for ₹ 4,000 each, paying the proceeds into his private bank account. On 15th June, 2015, he sold the other set for ₹ 4,500 which amount he paid over to Sadhan who paid it into his bank account. On 6th May, 2015, Sadhan purchased a T.V. set for ₹ 3,000 having incurred expenditure of ₹ 200 on repairing, he sold it on 14th May, 2015, for ₹ 3,800 paying the proceeds into his own bank account. This set developed mechanical trouble and on 26th May, 2015, Sadhan agreed to take the set back at a price of ₹ 2,800 which he paid out of his bank account. The set was still unsold on 30th June, 2015 and it was agreed that Sadhan should take it over for his personal use at a valuation of ₹ 2,600. Sakti incurred ₹ 300 as showroom charges and Sadhan incurred ₹ 225 as travelling and postage charges. You are required to prepare: (a) the account of joint venture with Sakti as it would appear in the books of Sadhan; and (b) Memorandum Joint Venture Account showing the net profit.

18. Ravi and Suresh entered into a joint venture for purchase and sale of electronics goods, sharing profits and losses in the ratio of 3:2. They also agreed to receive 5% commission on their individual sales and the following information was extracted from the records:

    July 1, 2014 Ravi purchased goods worth ₹ 1,90,000 financed to the extent of 90% out of his funds and balance by loan from his uncle Shyam.

    August 1, 2014 Ravi sent goods costing ₹ 1,70,000 to Suresh and paid ₹ 1,410 as freight charges. Suresh paid ₹ 13,410 to Ravi.

    October1,2014 Suresh sold all the goods sent to him. Ravi paid back the loan taken from his uncle, including interest of ₹ 350.

    All sales, by either party, were made at an uniform profit of 40% above cost. On November 30, 2014, they decided to close the venture by transferring the balance of goods unsold, lying with Ravi at a cost of ₹ 9,000 to a wholesale dealer. You are required to prepare the Memorandum Joint Venture Account and Joint Venture with Ravi in the books of Suresh and Joint Venture in the books of Ravi. They further disclosed that goods worth ₹ 4,000 were taken personally by Ravi at an agreed price of ₹ 5,000.

19. A and B enter into a joint venture sharing profits and losses equally. A purchased goods for ₹ 5,000 and B spent ₹ 1,000 for freight on 1st Janaury 2015. On the same day B bought goods worth ₹ 10,000 on credit. Further expenses were incurred as follows: On 1.2.2015 ₹ 1,500 by B; on 1.3.2015 ₹ 500 by A. Sales were made against cash as follows: On 15.1.2015 ₹ 3,000 by A; On 31.1.2015 ₹ 6,000 by B; On 15.2.2015 ₹ 3,000 by A; On 1.3.2015 ₹ 4,000 by B. Creditors for goods were paid as follows: On 1.2.2015 ₹ 5,000 by A; On 1.3.2015 ₹ 5,000 by B. On 31st March, 2015 the balance stock was taken over by B at ₹ 9,000. The accounts between the venturers were settled by cash payment on this date. The venturers are entitled to interest at 12% per annum.

    You are required to prepare: (a) Memorandum Joint Venture Account; and (b) Necessary Ledger Accounts in the books of venturers.

20. A and B entered into a joint venture involving the buying and selling of old railway material. The profit or loss was to be shared equally. The cost of the material purchased was ₹ 42,500 which was paid by A who drew a bill on B at 2 months demand for ₹ 30,000. The bill was discounted by A at a cost of ₹ 240. The transaction relating to the venture was: (a) A paid ₹ 300 for carriage, ₹ 500 for commission on sales, and ₹ 200 travelling expenses; (b) B paid ₹ 100

travelling expenses and ₹ 150 sundry expenses; (c) Sales made by A amounted to ₹ 20,000; and (d) Sales made by B were ₹ 30,000. Goods costing ₹ 1,000 and ₹ 1,500 (being unsold stock) were retained by A and B respectively and these were charged to them at prices to show the same rate of gross profit as that made on the total sales (excluding these sales). A was credited with a sum of ₹ 400 to cover the cost of warehousing and insurance. The expenses in connection with the bill were to be treated as a charge against the venture. You are required: (a) to show the account in the books of each party to record his own transactions; and (b) to prepare a Memorandum Joint Venture Account.

21. Aswin of Madras and Gupta of Delhi entered into a joint venture on 1.4.2014 for the purpose of buying second-hand cars for reconditioning and selling them as airconditioned diesel cars. Aswin agreed to buy second-hand cars and recondition them and fit diesel engines. Gupta agreed to fix airconditioners and sell them at Delhi. They agreed to share the profits and losses equally and settle their accounts at the end of each year.

The following are the details of purchase, sale and expenses incurred by Aswin and Gupta during the year 1.4.2014 to 31.3.2015 :

Particulars	Aswin (₹)	Gupta (₹)	Particulars	Aswin (₹)	Gupta (₹)
Cost of 10 cars	5,00,000	—	Expenses incurred :		
Reconditioning expenditure	45,000	—	Freight — local	10,000	8,000
Cost of 10 diesel engines	30,000	—	Freight — Delhi	30,000	—
Labour charges	18,000	32,000	Rent — Office	10,000	10,000
8 Airconditioners purchased	—	4,00,000	Rent — Garage	12,000	20,000
Buying commission @ 5%	25,000	—	Insurance	16,000	20,000
Selling commission @ 5%	—	60,000	Miscellaneous expenses	6,000	10,000
Sale value of 8 cars	—	12,00,000			

Gupta sent a cheque for ₹ 6,00,000 to Aswin on 1.3.2015. Of the balance of 2 cars, one car was met an accident on the way to garage before reconditioning and the insurance company settled the claim at ₹ 30,000 as a total loss. The old petrol engines were sold @ ₹ 500 per engine and one diesel engine was sold at ₹ 3,000 by Aswin. All of them were sold before 31.3.2015. Aswin retained the balance one car as a non-airconditioned diesel car for his personal use which was priced at the average cost.

Aswin / Gupta settled the balance due to / by them as on 31.3.2015 by sending a crossed cheque as the case may be. Prepare : (a) Memorandum Joint Venture Account; (b) Joint Venture Account with Gupta in the books of Aswin; and (c) Joint Venture Account with Aswin in the books of Gupta.

Bills of Exchange

Introduction

Goods can be sold for cash or on a credit basis. If the customers are asked to pay cash all the times, the amount of sales would be considerably less. A complete refusal to give credit is likely to mean that potential sales would go to competitors. Again, if goods are sold on credit, in future the buyer may refuse to pay, part or whole of the amount due from him. The argument may be any one or more of the following : (i) Goods were defective; or (ii) Goods were not received, and the like. To avoid all these, it is a common practice to make use of a bill of exchange.

Definition of Bill of Exchange

A bill of exchange can be defined as an acknowledgment of debt which also fixes the date of payment. It is a legal document which is drawn up and signed by the seller. It requires the buyer to pay a definite sum on a predetermined future date. Therefore, the seller gets the documentary evidence of the amount due from the buyer and also the terms of payment.

Section 5 of The Negotiable Instruments Act, 1881 defines a bills of exchange as under :

'A bill of exchange is an instrument in writing containing an unconditional order, signed by the maker, directing a person to pay a certain sum of money only to, or to the order of, a certain person, or to the bearer of the instrument.

Features of Bill of Exchange

1. It must be drawn on a particular date.
2. It must be in writing.
3. There are three parties to a bills of exchange — the drawer, the drawee, and the payee.
4. It must be signed by the maker (drawer).
5. It must be accepted by the drawee (However, a bill payable on demand is not required to be accepted).
6. It must be an unconditional order to pay.

7. The maker (drawer) must direct a person to pay a certain sum of money.
8. It arises generally out of credit sales or loans.
9. It helps temporary settlement of a debt between a debtor and a creditor without involving cash.
10. It must be properly stamped, based on its value.
11. It is an evidence of a debt.
12. It is an asset for the creditor and a liability for the debtor.
13. A bill of exchange does not pay the amount due from a debtor, but the form of the asset is changed from a debtor to a bill receivable.
14. It is drawn for a certain period as agreed by the parties e.g., for two months; 90 days etc.
15. It can be discounted with the bank or it can be endorsed in favour of a creditor to pay a debt.

Advantages of Bill of Exchange

1. By accepting a bill, the debtor acknowledges the debt and agrees to pay it on a particular date. Therefore, it has advantages over oral promises.
2. It is useful in a court of law as evidence of a debt.
3. A bill fixes the date of payment. Both the parties are aware of the time of receipt or payment of money. Thus, it helps better cash management.
4. If necessary, it can be converted into cash by discounting at the bank, before the date of maturity. Thus, it provides easy liquidity.
5. It can be endorsed to a creditor in payment of a debt, if the creditor is willing to accept it.
6. It can be transferred from one place to another in the same way a cheque is remitted.
7. Foreign bill helps to expand foreign trade.
8. The drawee may pay the bill before the due date and he can avail of the rebate.
9. It facilitates the transfer of funds from one place of business to another place of business without the risk of carrying cash.
10. A bill can be renewed for an extended period. It helps the debtor by providing more time for payment of his debts.

Parties to a Bill of Exchange

There are three parties to a bill of exchange — the drawer, the drawee and the payee.

Drawer : The maker of a bill of exchange is known as the drawer. The signature of the drawer is necessary to complete the instrument.

Drawee : The person on whom the bill is drawn and is thereby directed to pay is known as the drawee. When the drawee signs his acceptance on the bill and delivers the bill to the holder, he becomes the 'acceptor' of the bill. The acceptance of a bill by the drawee signifies his assent to the order of the drawer.

Payee : The person named in the instrument to whom or to whose order the amount of the instrument is directed to be paid is known as payee. The drawer may make the bill payable to himself or may name another person to whom the amount has to be paid.

Specimen of a Bill of Exchange

On 1st January, 2015 C of Calcutta purchases goods from B of Bombay for ₹ 50,000 on credit for which B draws a bill on C for ₹ 50,000 for 3 months. The bill is duly accepted by C. The bill will be drawn as follows:

₹ 50,000 Bombay, 1st January, 2015

Three months after date pay to me or my order the sum of Rupees Fifty Thousand only, for value received.

To,
C
3, Park Street
Kolkata

Revenue Stamp

Accepted
C

Distinction Between Bill of Exchange and Cheque

	Bill of Exchange		Cheque
1.	It is drawn by a creditor.	1.	It is drawn by a debtor.
2.	It requires an acceptance.	2.	It does not require an acceptance.
3.	It can be drawn on any person including a bank.	3.	It is always drawn on a bank.
4.	It is not always payable on demand.	4.	It is always payable on demand.
5.	It is entitled to three days of grace.	5.	It is not entitled to any days of grace.
6.	It cannot be crossed.	6.	It can be crossed.
7.	It requires a stamp.	7.	It does not require a stamp.
8.	Notice of dishonour is usually required.	8.	Notice of dishonour is not required.
9.	It is not payable to the bearer on demand.	9.	It is payable to the bearer on demand.
10.	Upon dishonour, noting may be necessary.	10.	Upon dishonour, it does not require any noting.

Definition of Promissory Note

A promissory note is a written unconditional promise made by one person to another, to pay a specific sum of money either on demand or at a specified future date.

It has been defined by section 4 of The Negotiable Instruments Act, as under :

An Instrument in writing (not being a bank note or a currency note) containing an unconditional undertaking, signed by the maker, to pay a certain sum of money only to, or the order of, a certain person or to the bearer of the instrument.

Parties to a Promissory Note

There are two parties to a promissory note:

1. The maker — who signs the note (the debtor) and agrees to pay the amount on the due date; and
2. The payee — to whom the amount is payable (the creditor).

Specimen of a Promissory Note

₹ 10,000

5, Park Street
Kolkata - 700 016
15th April, 2015

Revenue Stamp

Two months after date, I promise to pay Mr. S. Subramanian or order the sum of Rupees Ten Thousand only for value received.

To,
S. Subramanian
5, Patel Nagar
New Delhi 110 008

M. Mukherjee

Features of Promissory Note

1. It must be in writing;
2. It must be signed by the maker of the instrument;
3. It must be an unconditional promise to pay by the maker; and
4. The amount payable must be certain and should be expressed in terms of money only.

Distinction Between Bill of Exchange and Promissory Note

	Bill of Exchange		Promissory Note
1.	It is an unconditional order.	1.	It is an unconditional promise.
2.	It is given by a creditor to a debtor.	2.	It is given by a debtor to a creditor.
3.	There may be three parties—drawer, drawee and payee.	3.	There are two parties — maker and payee.
4.	The drawer and the payee may be the same person.	4.	The maker and the payee cannot be the same person.
5.	The liability of the drawer is secondary and conditional.	5.	The liability of the maker is primary and absolute.
6.	The drawer stands in immediate relation with the acceptor.	6.	The maker stands in immediate relation with the payee.
7.	It requires an acceptance.	7.	It does not require an acceptance.
8.	Notice of dishonour must be given.	8.	Notice of dishonour is not required to be given.
9.	A bill can be accepted conditionally.	9.	A promissory note cannot be made conditionally.
10.	Fixation of stamp is not required for a bill payable on demand (however, in a term bill fixation of stamp is required).	10.	Fixation of stamp is always compulsory.

Types of Bills

There are different types of bills. They can be classified on the basis of when they are due for payment, whether drawn for any consideration or not, whether documents to title of goods accompany them or not.

Basically bills are classified into two categories :

(a) Trade / Commercial Bills

(b) Accommodation Bills.

Trade / Commercial Bills

This bill is drawn by the seller and accepted by the buyer for a certain sum of money. It is essentially a trade related instrument.

Trade / Commercial Bill can be sub-divided into :

(a) Demand Bill

(b) Usuance / Time Bill

(c) Documentary Bill

(d) Clean Bill

(a) ***Demand Bill*** : It is payable 'at site' or 'on presentation' to the drawee. A bill on which no due date is specified is also called a demand bill.

(b) ***Usuance / Time Bill*** : It is payable at a specified later date.

(c) ***Documentary Bill*** : This bill is accompanied by documents. These documents include the invoice and other documents of title such as railway receipts, lorry receipts, etc. Documentary bills can be subdividedinto:

(i) Document against acceptance (D/A) bill

(ii) Document against payment (D/P) bill.

(d) Clean Bill : This bill is not accompanied by any document.

Accommodation Bill

Accommodation bill is that which is drawn and accepted without any consideration. It is drawn for the purpose of arranging temporary finance.

The Working of a Commercial / Trade Bill

The working of a bill of exchange can be explained with the ***following example*** : A sells goods to B for ₹ 5,000 on credit. In order to acknowledge the debt, A (the creditor) writes out a bills of exchange and sends it to B (the debtor). After receiving the bill, B signs his name on the bill with the word 'accepted'. Thereafter, B returns the bill to A and becomes liable to make payment for the bill.

Bills Receivable and Bills Payable

When a bill is written out, it is called 'drawing' of a bill. Since the drawer draws the bill, a bill from the point of view of the drawer is called a Bill Receivable because the money is receivable by him.

On the other hand, the same bill from the point of view of the drawee is called a Bill Payable because the money is payable by him.

Accounting Entries in the Books of Drawer

Bills Receivable Account Dr. [Assets comes in]
To Drawee Account [Giver]

Accounting Entries in the Books of Drawee

Drawer Account Dr. [Receiver]
To Bills Payable Account [Liability Increases]

For example, when A draws a bill for ₹ 5,000 on B which he accepts and returns to A, the accounting entries in the Books of the Drawer (A) and the Drawee (B) will be as under:

In the Books of the Drawer (A)
Journal **Dr.** **Cr.**

Date	Particulars	L.F.	₹	₹
	Bills Receivable A/c Dr. To B A/c (Being a bill drawn on B for ... months)		5,000	5,000

Dr. **B Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Sales A/c	5,000		By Bills Receivable A/c	5,000

Dr. **Bills Receivable Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To B A/c	5,000		By Balance c/d	5,000

A Bill of Exchange does not pay the amount the customer owes, but the form of the asset is changed from a debtor to a bill receivable. Therefore, when a bill is drawn on B, he is no more a debtor for A but he is an acceptor of the bill. Since the account of B is closed, it cannot be included in sundry debtors and hence, cannot find a place in the Balance Sheet. But the Bills Receivable Account has a debit balance of ₹ 5,000. Therefore, if a Balance Sheet is to be prepared now, the bills receivable will appear as a current asset which will find a place immediately below Sundry Debtors.

In the Books of the Drawee (B)
Journal **Dr.** **Cr.**

Date	Particulars	L.F.	₹	₹
	A A/c Dr. To Bills Payable A/c (Being a bill daccepted for ... months)		5,000	5,000

Dr. **A Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Bills Payable	5,000		By Purchases A/c	5,000

Dr. **Bills Payable Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Balance c/d	5,000		By A A/c	5,000

Now, when we consider the books of B, A is no more a creditor for B but B has incurred a liability to him by accepting the bill. This is because, when a person accepts a bill, his liability towards the drawer is paid off but a new liability against the bill payable is created. Since the money is payable by him, the Bills Payable will find a place in the Balance Sheet under the heading 'Current Liabilities and Provision' just below Sundry Creditors.

Due Date of a Bill of Exchange

The due date of a bill of exchange is the date when the amount of the bill is payable by the drawee. It is also called maturity date.

A bills of exchange may be payable —

1. on demand, or,
2. on a specified day, or,
3. after a specified period.

In the first case, the amount is payable when the demand is made.

In other cases, due date has to be calculated. Any bill of exchange payable otherwise than 'on demand' is entitled to three days of grace. These days of grace were originally allowed as a gratuitous favour to the debtor. But now it has become a legal right. Therefore, while calculating the due date of a bill, in its period, for which it is drawn, three more days are added.

Example: A bill dated January 1, 2014 is made payable four months after date. The due date of the bill will be May 4, 2014.

Calculation of Due Date

Date of drawing of bill	1.1.2014
Period / Tenure (month)	4
	1.5.2014
Days of grace	3
Due date / Maturity date	4.5.2014

A bill payable can be : (a) a certain period after date; or (b) a certain period ***after sight.***

When a bill contains a direction to 'pay three months after date', three months have to be counted from ***the date of drawing of the bill***. But, when the bill contains a direction to 'pay three months after sight', three months have to be counted from ***the date of acceptance***.

While calculating the due date of a bill, the following points should be noted :

1. ***Days of grace is not allowed when the bill is payable 'on demand' or 'on presentment' or 'at sight'.***
2. ***When the period of the bill is stated in days, the calculation of the due date will be in days (which includes the date of payment but excludes the date of transaction).***
   Example: A bill dated January 1, 2014 is payable sixty days after date. The due date of the bill will be March 5, 2014 (30 days of January + 28 days of February + 2 days of March + 3 days of grace).
3. ***When the period of the bill is stated in months, the calculation of due date will be made in terms of calendar months, ignoring the number of days in a month.***
   Example: A bill dated January 1, 2014 is payable three months after date. The due date of the bill will be April 4, 2014 (1.1.2014 + 3 months + 3 days of grace).
4. ***If the due date falls on a day which is a 'public holiday', the due date shall be the preceding business day. The expression 'public holiday' includes Sundays and any other day declared by the Central Government, by notification in the Official Gazette, to be a public holiday.***
   Example: If the due date of a bill is January 26, 2014 (Republic Day), it falls due on January, 25.
5. ***If the month in which the period would terminate has no corresponding day, the period is held to terminate on the last day of such month.***
   Example: (a) A bill dated January 30, 2014 is payable one month after date. The due date of the bill will be March 3, 2014.
   Example: (b) A bill dated July 31, 2014 is payable two months after date. The due date of the bill will be October 3, 2014.

Methods of Dealing with a Bill of Exchange by the Drawer

The drawer, as the holder of an accepted bill, can deal with the bill of exchange in the following ways:

(a) Holding the bill till the date of maturity and then presenting the bill to the drawee for payment
If the drawer of a bill is not in need of immediate cash, he can retain the bill with himself; and present it for payment to the drawee on the due date and receive cash from him. In our previous example, if A presents the bill to B for payment on the due date and B makes the actual payment due on the bill, the bill is said to be honoured and the following entry is passed in the books of A:

In the Books of A
Journal **Dr.** **Cr.**

Date	Particulars		L.F.	₹	₹
	Cash A/c To Bills Receivable A/c (Being the bill drawn on B paid by him)	Dr.		1,000	 1,000

Here, Cash Account is debited because actual cash comes in and Bills Receivable Account is closed by crediting the account because nothing is receivable from B, now.

The ledger accounts will be as under:

Dr. **Bills Receivable Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To B A/c	1,000		By Cash A/c	1,000

Dr. **Cash Account (Inclusive)** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Bills Receivable A/c	1,000			

A bill of exchange should be presented for payment on the due date and at the place named. If no place is indicated, presentation should be made at the drawee's usual place of business during business hours.

(b) Discounting the bill with the banker A drawer can receive payment from the drawee on or after the date of maturity. But he can obtain payment from a banker before its due date by ***discounting the bill***. ***Discounting is a device to convert the bill into cash at its present value***. This is done by selling the bill to the banker — which means that the right to receive the money is given to the banker. The consideration for obtaining money in advance (before the due date) is termed as discount. Therefore, by discounting, the drawer of the bill can get present worth of the bill from the banker — which is the difference between the face value of the bill and the discounting charges. In other words, the banker pays the drawer an amount of cash which is less than the face value (the face value of the bill less discounting charges) — with the hope of recovering the full value of the bill from the drawee at maturity. When a bill is discounted with the banker, the banker requires the payee (who is discounting) to agree to pay the amount of the full value of the bill if the drawee will not pay at maturity. Though this discount is more in the nature of interest (from the point of view of the drawer), it has no connection with cash or trade discount, which is very common in accounting parlance. This discount rate is really an interest rate charged by the bank for holding the bill for the remainder of its life. The amount of the discount is based on current interest rates and the unexpired period of the bill, i.e. the period from the date of discounting to the date of maturity. Discount is calculated as under :

$$\text{Discount} = \textit{Face Value of the Bill} \times \textit{Rate of Interest} \times \frac{\textit{Unexpired days of the bill}}{365}$$

In actual practice, discount is always calculated on the number of days of the unexpired period of the bill, but in the illustrations, discounts have been calculated in months (since the difference in amounts are too small to be of any consequence).

A bill can generally be discounted with the banker when the drawer of the bill has an account with the banker. While discounting a bill, the banker does not make the payment in cash — rather the account of the drawer is credited with the face value of the bill less discounting charges, known as ***proceeds***. If the drawer of the bill sells it to another banker or a bill broker, he receives a cheque for the net amount.

When a bill is discounted, the drawer of the bill debits the Bank Column of the Cash Book with the proceeds of the bill and credits the Bills Receivable Account with the full value (because the right to receive money is transferred to the banker). The difference of the above two figures, i.e. the discount, is transferred to an account called 'Discount on Bills Account', — which is debited. Therefore, the accounting entry in the books of the drawer is as under:

Bank Account Dr.
Discount on Bills Account Dr.
To Bills Receivable Account

At the end of the accounting year, the debit balance of the Discount on Bills Account is transferred to the Profit and Loss Account — treating that as an expense for the period (irrespective of the fact that the drawee makes the payment to the banker or not). On the due date, the banker presents the bill to the drawee for payment (as it is payable to the bearer of the instrument). If the bill is met by the drawee, no entry is required to be passed in the books of the drawer, since the drawer has already accepted payment from the banker.

When a bill is drawn, it becomes a current asset of the drawer (which appears on the Balance Sheet). But when it is discounted, it is no longer an asset of the drawer, and, therefore, disappears from the Balance Sheet.

We suppose, in our example that the bill is drawn by A on 1.1.2015 and it is payable after 3 months. If the bill is discounted by A on 4.1.2015 @ 6% p.a., the amount of the discount will be ₹ 15 (₹ 1,000 x 3/12 x 6/100).

***Accounting entry, in the Books of A (drawer) will be as under*:**

Journal **Dr.** **Cr.**

Date	Particulars		L.F.	₹	₹
1.1.2015	Bills Receivable A/c	Dr.		1,000	
	To B A/c				1,000
	(Being a bill drawn on B for 3 months)				
4.1.2015	Bank A/c	Dr.		985	
	Discount on Bill A/c	Dr.		15	
	To Bills Receivable A/c				1,000
	(Being the bill discounted with the banker @ 6% p.a.)				

Dr. **Bills Receivable Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
1.1.2015	To B A/c	1,000	4.1.2015	By Bank A/c	985
			4.1.2015	By Discount on Bills A/c	15
		1,000			1,000

Dr. **Discount on Bills Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
4.1.2015	To Bills Receivable A/c	15	31.12.2015	By Profit & Loss A/c	15

At maturity, the banker presents the bill to the drawee (B) for payment, since the drawer (A) has already obtained payment, no entry is required to be passed in the books (provided B makes the payment to the banker on the due date).

Interest is the price of credit. It is a charge made for the use of money. Interest is the expense for the period during which the money is borrowed. In accounting parlance, the meaning of interest is different depending upon whether the interest is to be paid at the time of maturity or whether it is to be paid in advance. Under the first case, it is called 'Interest' but under the second case, it is customarily known as 'Discount'.

Effects of Discounting a Bill

(1) In the books of the drawer, the balance of the Bills Receivable Account is reduced by the face value of the bill and the Bank Account is increased by its present value (the proceeds).
(2) From the viewpoint of the drawer, the discount paid to the banker is in the nature of interest. It has no connection with cash or trade discount.
(3) The discount is an expense for the drawer and revenue for the banker.
(4) The banker realises the face value of the bill on the due date from the drawee. Therefore, when a discounted bill is honoured, no journal entry is to be passed in the books of the drawer.
(5) The discounting of a bill does not affect the position of the drawee.

Discounted Bills Receivable as a Contingent Liability

Where a firm has discounted bills receivable and, at the end of the accounting period, those have not reached the due date of presentation for payment, there is a contingent liability. Because, if a bill, which has already been discounted with the banker, is dishonoured in the future, the banker will debit the account of the drawer in their books. Because it is a potential obligation of the drawer to pay the maturity value of the bill, if the drawee fails to make payment. For example, X draws a bill for ₹ 10,000 on Y on 1.12.2014 payable after 4 months, i.e. 4.3.2015. The bill is discounted by X for ₹ 9,750. If the year closing of X is 31st December, 2014, there would be a contingent liability amounting to ₹ 10,000. In case of a limited company, preparing accounts in accordance with the Companies Act, the contingent liability should be disclosed in the Balance Sheet in the form of a note which will read as : 'Contingent liability for bills receivable discounted'. If the drawee makes the payment for the bill on the due date, the contingent liability of the drawer is thereby ended.

Proportionate Chargeability of Discount Charges

When the amount of the discounting charge is quite substantial and the date of discounting of the bill and its due date lie in two accounting periods (like in the previous example), then the chargeability of discounting charges should be proportionately shared. In the above example, if the amount of the bill is ₹ 10,00,000 and the amount of the discounting charges is ₹ 1,00,000 the discounting charges to be debited to the Profit and Loss Account for the year ended 31.12.2014 will be ₹ 25,000 (1 month) and the balance will be charged in the next year.

Entries in the Books of Bank

After discounting a bill, the banker holds it in good faith on the assumption that the drawee will pay in due course. The banker recognizes the interest at the point of discounting the bill. At maturity, when the bill is presented and paid by the drawee, the receipt of the cash is being recorded.

Therefore, when the bill is discounted by the bank, they pass the following entries:

Journal **Dr.** **Cr.**

Date	Particulars		L.F.	₹	₹
	(i) **When the Bill is Discounted**				
	Bills Discounted A/c	Dr.		1,000	
	To Customers A/c				985
	To Discount A/c				15
	(Being the customer's bill discounted)				
	(ii) **When Cash is Collected from Drawee**				
	Cash A/c	Dr.		1,000	
	To Bills Discounted A/c				1,000
	(Being bills receivable collected)				

(c) Endorsing the bill in favour of a third party Endorsement are the words written on the back of a bill of exchange so as to vary the terms of the bill. A bill of exchange can be transferred by the holder to any other party by mere physical delivery. This is because, a bill of exchange is a negotiable instrument, i.e. amount is payable to the bearer of the instrument. The bearer is the person who has legal physical possession of the bill. Negotiability makes a bill of exchange readily transferable and increases its usefulness.

A further use of a bill of exchange by the drawer is to settle a debt that the drawer owes to someone else. This is done by the drawer by transferring the bill of exchange to his creditor in full or part settlement of a debt (the amount will rarely be exactly the same), provided that his creditor is willing to agree to such an arrangement. This is called 'Endorsing a bill'. The drawer (who endorses the bill) is called the ***endorser*** and the creditor (to whom it is endorsed) is called the ***endorsee***.

> ***A creditor who is prepared to take a bill in this way in part payment of a debt will clearly only take it at its discounted value on the day it is taken.***

The drawer of the bill (the original payee) endorses the bill by signing his name on it and passes the bill in favour of his creditor (the new payee) — and a valid title passes.

In this connection, we are to remember that when a bill is negotiated in favour of a third party, it does not mean that it has to be treated as a bill payment by the drawer (endorser). Conversely, the creditor (endorsee) of the bill cannot treat the endorser as drawee. The journal entry in the books of the drawer will be :

Endorsee Account Dr.
    To Bills Receivable Account

In the previous example, we suppose the bill is endorsed by A to C (a creditor, from whom goods have been purchased) in full settlement of a debt of ₹ 1,000.

Generally, a slip of paper is attached to a bill of exchange, known as allonge to provide for additional endorsements because the original bill does not afford sufficient space.

The journal entry in the books of A, will be as under :

Journal **Dr.** **Cr.**

Date	Particulars	L.F.	₹	₹
	C A/c Dr. To Bills Receivable A/c (Being the bill endorsed in favour of C)		1,000	1,000

At maturity, C will present the bill for payment to B and will realise the amount. No entry is required to be passed in the books of A (provided B does not fail to make payment).

The Ledger Accounts will be as under :

Dr. **Bills Receivable Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To B A/c	1,000		By C A/c	1,000

Dr. **C Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Bills Receivable A/c	1,000		By Purchases A/c	1,000

Journal entries in the books of the endorsee:
***When the bill is endorsed in favour of the endorsee he passes the following entry*:**

Bills Receivable Account Dr.
    To Drawer Account

After receiving the bill, the endorsee can deal with the bill of exchange in the same manner as the drawer, such as (i) he may retain the bill till the date of maturity; (ii) he may discount the bill with his banker; (iii) he may further endorse it in favour of his creditor; and (iv) he may send the bill to banker for collection.

The Journal entries will be on the same lines as we do in the books of the drawer under such circumstances.

Effects of Endorsing a Bill

(1) When a bill of exchange is endorsed, the amount is payable to the endorsee instead of the original holder. The endorsee can again endorse the bill to another party and this process may continue to any extent till the due date of the bill.

(2) Endorsement facility gives a bill of exchange the status of a currency for limited circulation between different parties for settlement of debts.

Types of Endorsement

A bill of exchange may be endorsed in any one of the following ways:

(i) Blank endorsement Here, the holder of the bill endorses the bill by signing his name on it and passes the bill in favour of a third party, who can again endorse it in favour of any other party, just by mere physical delivery. Thus, only the signature of the holder is necessary. For example —

R K Singh.

(ii) Special endorseme Here the holder of the bill writes the name of the endorsee to whom the bill is transferred. The endorsee can transfer the bill in favour of some other party. This type of endorsement looks as follows: 'Pay A K Roy or order'

R K Singh

(iii) Restrictive endorsement In this case, the holder of the bill endorses the bill in favour of a definite person and thereby restricts the right of subsequent re-endorsement. This is expressed as:

'Pay A K Roy only'

R K Singh

(iv) Endorsement Sans Recourse (without recourse) Under this type of endorsement, the holder relieves himself from any liability to all subsequent endorsees in the case of dishonour of a bill. Here, the holder acts in a representative capacity as agents and not as principals. The endorsee of the bill cannot treat the endorser as drawee. Following is the pattern of such endorsement:

'Pay A K Roy or order'

R K Singh
Sans Recourse

(v) Faultive endorsement Here, the endorser of a bill waives some of the rights to which he is entitled. The endorser clearly states the right which is being given up by him while endorsing the bill. Following is the pattern of endorsement:

'Pay A K Roy or order'

Notice of dishonour waives.

R K Singh

A bill of exchange can be endorsed any number of times. In case of a successive endorsement (when the bill is endorsed by more than one person), endorsements are actually made in the order in which they appear, the last named being the holder to receive payment from the drawee.

(d) Sending the bill to the banker for collection Where a person has to receive a large number of bills receivable regularly (in case of big business houses), it becomes difficult to present the various bills to different drawees on different due dates. In such a case, the bills are sent to the banker for collection; thus entrusting the banker to do this job. Everytime, a bill is received from the drawee, it is sent to the banker. An instruction is given to the banker before hand to present the bills to the respective drawees on the due date and to credit the drawer's account when money is received. For this, the drawer opens (in his books) one temporary account called Bills for Collection Account. Whenever a bill is sent to the banker for collection, Bills for Collection Account is debited and Bills Receivable Account is credited. (Here, Bank Account is not debited because money can only be received by the banker after the due date). When the money is actually received by the banker, Bank Account is debited and Bills for Collection Account is credited. Any balance in the Bills for Collection Account shows the amount of uncollected bills lying with the banker. ***These bills must not be confused with the discounted bills — the banker holds these bills as an agent for collection.***

In our example, if A sends the bill to the banker for collection and on the due date, the banker obtains money, the following Journal entries will be passed in the books of A.

Journal **Dr.** **Cr.**

Date	Particulars		L.F.	₹	₹
	Bills for Collection A/c	Dr.		1,000	
	To Bills Receivable A/c				1,000
	(Being the bill sent to the banker for collection)				
	Bank A/c	Dr.		1,000	
	To Bills for Collection A/c				1,000
	(Being the bill previously sent to the banker for collection, now honoured)				

The Ledger Accounts will be as follows :

Dr. **Bills Receivable Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To B A/c	1,000		By Bills for Collection A/c	1,000

Dr. **Bills for Collection Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Bills Receivable A/c	1,000		By Bank A/c	1,000

Dr. **Bank Account (Inclusive)** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Bills for Collection A/c	1,000			

It should be noted that the bank will not make any accounting entry in the books of account in respect of bills received by the bank for collection. However, the bank enters all particulars of the bills in a Memorandum Book.

When the bank collects money from the drawee then it passes the following entry:

Cash Account Dr.
To Current Account of Customer
To Collection Charges Account
(Being the bill collected on behalf of the customer and the net proceeds credited)

(e) Advance on the security of bills Sometimes an advance can be obtained from the banker by depositing the bill as a security. It should be noted that, in this case, the bills are not discounted, but remain the property of the drawer. Therefore, in the books of the drawer, bills will remain as assets in the Bills Receivable Account. The following Journal entry is passed:

(a) Bank Account Dr.
To Advances on Bills Account

At maturity, when the banker presents the bill for payment and the drawee honours it, the banker is to refund the excess of the amount received over the sum advanced plus the interest charged. When the drawer receives the notification from the banker that the bill (which was previously deposited as a security) has been honoured, the following Journal entries are passed.

(b) Advances on Bills Account Dr.
To Bills Receivable Account
(c) Interest Account Dr. [Interest charged by the bank]
To Advances on Bills Account
(d) Bank Account Dr. [Excess amount received]
To Advances on Bills Account

Entries in the Books of the Drawee

The drawee of the bill is not at all concerned with any of the above transactions. On the due date, the amount of the bill is payable by him to the bearer of the bill. Therefore, at maturity, when the bill is presented to the drawee for payment, either by the drawer or by the bank or by the endorsee — depending on the manner in which the bill is being dealt with by the drawer previously, he (the drawee) will pass the following entry in his books:

Journal **Dr.** **Cr.**

Date	Particulars	L.F.	₹	₹
4.4.2015	Bills Payable A/c Dr. To Cash A/c (Being the bill met at maturity)		1,000	1,000

Bills Receivable Book and Bills Payable Book

For any organization, where a number of bills are drawn and/or accepted, bills are recorded in special subsidiary books — particulars of all bills receivable in the Bills Receivable Book and particulars of the bills payable in Bills Payable Book. At regular intervals, the amounts of the various bills are added together and posted to their relevant accounts in the main ledger. The total of the Bills Receivable Book is posted to the debit side of the Bills Receivable Account and the total of the the Bills Payable Book is posted to the credit side of the Bills Payable Account. In respect of each the Bill Receivable, the Customer's Account, i.e. the drawee from whom it is received, is credited in the Ledger. Usual Formats of Bills Receivable Book and Bills Payable Book are given below:

Bills Receivable Book

Sl. No.	Bill No.	Name of the acceptor	From whom received	Date of Bill	Term	Date of Maturity	Amount ₹	How dealt with

Bills Payable Book

Sl. No.	Bill No.	Date of Bill	Name of the Drawer	Payee	Term	Date of Maturity	Amount ₹	Remarks

Illustration 1

Record the following transactions in the Bills Receivable and Bills Payable Books of a trader :

2015 Jan. 1 Received from Hari Kumar an acceptance of 2 months for ₹ 1,000.
5 Our acceptance to Ram Prasad at 3 months for ₹ 4,000.
15 Received from Benigopal an acceptance for 4 months for ₹ 2,000.
18 Discounted Hari Kumar's acceptance for ₹ 980.
19 Received from Rajagopal an acceptance for 2 months for ₹ 6,000.
20 Our acceptance to Jadav at 2 months for ₹ 1,500.
21 Renewed our acceptance to Ram Prasad by paying him cash ₹ 2,000 and accepted a fresh bill of ₹ 2,100 at 4 months ₹ 100 being interest charged.
22 Benigopal's acceptance endorsed in favour of Rahman in full settlement of a debt of ₹ 2,250.

Solution

Bills Receivable Book

Sl. No.	Bill No.	Name of the acceptor	From whom received	Date of Bill	Term (Months)	Date of Maturity	Amount ₹	How dealt with
1.		Hari Kumar	Hari Kumar	1.1.2015	2	4.3.2015	1,000	Discounted
2.		Benigopal	Benigopal	15.1.2015	4	18.5.2015	2,000	Endorsed
3.		Rajagopal	Rajagopal	19.1.2015	2	22.3.2015	6,000	

Bills Payable Book

S. No.	Bill No.	Date of Bill	Name of the Drawer	Payee	Term (Months)	Date of Maturity	Amount	Remarks
1.		5.1.2015	Ramprasad	Ramprasad	3	8.4.2015	4,000	Renewed
2.		20.1.2015	Jadav	Jadav	2	23.3.2015	1,500	
3.		21.1.2015	Ramprasad	Ramprasad	4	24.5.2015	2,100	

Illustration 2

On 1.4.2015 A draws a bill on B for ₹ 9,000 for 3 months. B accepts the bill and returns it to A. Pass Journal entries in the books of A in each of the following circumstances, assume that the bill is honoured on the due date:

(i) A retains the bill till the due date; (ii) A discounts the bill for ₹ 8,750; (iii) A endorses the bill in favour of C; and, (iv) A sends the bill to the bank for collection.

Solution

On 1.1.2015 A purchased goods from B for ₹ 15,000 on 3 months credit. On 1.4.2015 A endorsed a bill for ₹ 10,000 in favour of B and paid the balance in cash. The due date of the bill is 1.6.2015. Immediately after receipt, B discounted the bill with the banker @ 12% p.a. The bill was honoured on the due date.

In the books of A
Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
2015 Jan. 1	Purchases A/c Dr. To B A/c (Being the goods purchased on credit)		15,000	 15,000
Apr. 1	Interest A/c (Note 1) Dr. To B A/c (Being the interest charged for the delay in payment)		2012	 2012
"	B A/c Dr. To Bills Receivable A/c To Cash A/c (Being a bill endorsed and the balance paid in cash)		15,200	 10,000 5,200

In the books of B
Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
2015 Jan. 1	 A A/c Dr. To Sales A/c (Being the goods sold on credit)		 15,000	 15,000

Apr. 1	A A/c Dr. To Interest A/c (Being the interest charged for the delay in payment)		2012	2012
"	Bills Receivable A/c Dr. Cash A/c Dr. To A A/c (Being the receipt of a bill and the balance in cash)		10,000 5,200	15,200
"	Bank A/c Dr. Discount on Bills A/c Dr. To Bills Receivable A/c (Being the bill discounted with the banker @ 12%)		9,800 2012	10,000

Working Note :

(1) Due date for payment is 1.4.2015 but the maturity date of the bill is 1.6.2015. Though two months interest is payable by A to B, the rate of interest will be the rate of discounting of the bill by bank. The interest will be : ₹ 10,000 × 12/100 × 2/12 = ₹ 2012.

Tutorial Note : A creditor who is prepared to take a bill in this way in part payment of the debt will clearly only take it at its discounted value on the day it is taken.

Dishonour of a Bill

When the holder of a bill presents it to the drawee for payment on the due date and the drawee fails to make the payment, the bill is said to be ***dishonoured*** (it may be noted that a bill can also be dishonoured by non-acceptance). When a bill is dishonoured, notice of dishonour must be given to the prior parties to retain their liability. The entry to be passed (either in the books of the drawer or the drawee) will cancel the original entry/entries in regard to the bill, and the original position of debtor and creditor will be restored. It means that the drawer will re-establish the draweee as a debtor and the drawee will re-establish the drawer as a creditor.

Let us assume that A is the drawer, B is the drawee and C is the endorsee.

The entry will be as follows

Situation		In the books of A	In the books of B
(1)	**When 'A' retains the bill till maturity**	B A/c Dr. To Bills Receivable A/c (Being the bill dishonoured at maturity)	Bills Payable A/c Dr. To A A/c (Being the bill dishonoured at maturity)
(2)	**When 'A' discounts the bill with the banker**	B A/c Dr. To Bank A/c (Being the bill previously discounted, now dishonoured.) *Note*: Bank Account will be credited by the full value of the bill.	Bills Payable A/c Dr. To A A/c (Being the bill dishonoured at maturity)
(3)	**When 'A' endorsed the bill in favour of 'C'**	B A/c Dr. To C A/c (Being the bill previously endorsed in favour of 'C', now dishonoured)	Bills Payable A/c Dr. To A A/c (Being the bill dishonoured at maturity)
(4)	**When 'A' sends the bill to the banker for collection**	B A/c Dr. To Bills for collection A/c (Being the bill previously sent to bank for collection, now dishonoured)	Bills Payable A/c Dr. To A A/c (Being the bill dishonoured at maturity)

It should be noted that when a bill is dishonoured:

In the books of the Drawer — Drawee Account is always debited and the person who is holding the bill, is credited.

In the books of Drawee — Drawer Account is always credited and Bills Payable Account is always debited.

Effects of Dishonour of a Bill

(1) When a bill is dishonoured, it becomes valueless and the original position of debtor and creditor is restored between the drawee and the drawer.

(2) Upon its dishonour, the holder of a bill has a right of action against the drawee or any previous endorser.

(3) When an endorser makes the payment to the endorsee, he can sue any previous endorser or the drawer.

(4) Upon dishonour, to avoid confusion and multiplicity of legal actions, generally the drawer takes up the bill and exercises his rights upon the drawee.

(5) Expenses incurred for establishing the fact of dishonour of a bill (noting charges) are generally paid by the holder, but ultimately these are recoverable from the drawee.

Illustration 6

X receives from Y four bills on 1st April 2015 for ₹ 1,000, ₹ 2,000, ₹ 3,000 and ₹ 4,000 respectively for 3 months. The 2nd bill of ₹ 2,000 is endorsed in favour of Z and the 3rd bill of ₹ 3,000 is discounted with the Central Bank of India for ₹ 2,980. The 4th bill for ₹ 4,000 is sent to the banker for collection. Pass the Journal entries in the books of X and Y assuming that (a) the bills have been met at maturity; and (b) the bills have been dishonoured at maturity.

Solution

Noting Charges

Noting is the procedure adopted if a bill of exchange has been dishonoured by non-acceptance or by non-payment. As we know, if the holder of the bill presents it to the drawee for payment on the due date but the latter does not pay it off, the bill is said to be dishonoured. In such a case, the holder of the bill may resort to legal action by getting the fact of dishonour noted (a form of disapproval) by a Notary Public (a legal practitioner, usually a solicitor, who is empowered to note a dishonoured bill of exchange). This is done by the holder by referring the matter to the notary public who himself presents the bill for payment to the drawee and testifies that the latter declined to pay it off. This is a legally acceptable evidence of dishonour. Therefore, ***noting of a bill*** means that it is re-presented by the notary public to the drawee to obtain legal proof of dishonour. The Notary Public records particulars of the bill, its re-presentment, and the reasons for non-payment of the bill in a regular and also on a notarial ticket, which is to be attached to the bill. The notary public charges some fees for doing all these — which is called ***noting charges***. Generally, the loss by way of noting charges is to be borne by the drawee because it can legally be recoverable from him. The journal entries are as under:

In the books of the drawer

(a) When the drawer pays for the noting charges

Drawee Account Dr.
To Cash Account

(b) When Bank pays for the noting charges

Drawee Account Dr.
To Bank Account

(c) When the endorsee pays for the noting charges

Drawee Account Dr.
To Endorsee Account

(d) When a bill is sent to the banker for collection and ultimately it proves dishonoured, the bank generally returns the bill to the drawer and the drawer himself pays for the noting charges.

It should be noted that entries for noting charges are similar to the entries for dishonour of a bill. All the time, the Drawee Account is debited (in the hope of recovering it from him) and the person who is paying for it, is credited. The Noting Charges Account is not debited because it is not an expense for the drawer.

In the books of the drawee

For all the above cases, the following entry is passed:

Noting Charges Account Dr.
To Drawer Account

We notice that the drawee has nothing to do with the manner in which the bill has been dealt with by the drawer. Noting charges being an expense for the drawee is debited. The amount is payable to the drawer and is therefore credited.

Illustration 7

On 1st November, 2014, Ranjit accepted a bill for ₹ 500 for four months drawn by Aloke. On 4th November, 2014 Aloke discounted the bill @ 6% p.a. with his banker. At maturity, the bill was dishonoured and the bank charged ₹ 15 as noting charges.

A sells goods for ₹ 10,000 to B on 1st January, 2015 and on the same day draws a bill on B at three months for the amount. The bill is dishonoured on the due date, the noting charges paid being ₹ 25.

B then accepts a fresh bill for ₹ 6,000 at three months by A, and he also pays A in cash ₹ 4,205 together with the amount of interest at 12% p.a. for the further credit granted. The bill is duly met on the due date.

Pass journal entries to record these transactions in the books of A.

Insolvency

Insolvency is the inability to pay one's debts when they fall due. Insolvency arises due to bankruptcy. A person is said to be insolvent when he is unable to pay the amount due by him. An insolvent person may have valuable assets that are not immediately realisable. When a person becomes insolvent, his properties are sold by the liquidator or official receiver, who pays off the creditors proportionately out of the realized money. This payment to the creditors by the official receiver (which is generally less than the amount due) is termed as 'Dividend' and is generally expressed as so many paise in the rupee, e.g. 50 paise in the rupee, which means 50% of the amount due is paid.

Effect of Insolvency of the Drawee

(a) When the drawee of the bill is declared insolvent, any bill of exchange accepted by him should be treated as dishonoured and the entry for dishonour is passed in the books of the drawer.

Drawee Account Dr.
To Bills Receivable Account / Bank Account / Endorsee Account / Bills for Collection Account

(b) When any dividend is received from the official liquidator, the following entry is passed:

Bank Account Dr.
To Drawee Account

(c) The amount ultimately proved irrecoverable should be treated as bad debt and it is written off from the books. The drawee account is closed by passing the following entry:

Bad Debt Account Dr.
To Drawee Account

Generally the last two entries are clubbed as under:

Bank Account Dr.
Bad Debt Account Dr.
To Drawee Account

The drawee, in his books, passes the following entries in regard to the above transactions:

(a) Entry for the dishonour:

Bills Payable Account Dr.
To Drawer Account

(b) Entry for the final dividend

Drawer Account Dr.
To Bank Account

(c) Entry for the unsatisfied balance, i.e. deficiency

Drawer Account Dr.
To Deficiency Account

Here also, the last two entries are clubbed as under:

Drawer Account Dr.
To Bank Account
To Deficiency Account

On 1st January, 2015, Kuntal sold goods to Subhra valuing ₹ 6,000. On 4th January, 2015 Kuntal received from Subhra ₹ 2,000 and drew a bill receivable 3 months after date for the balance. On the same date, Kuntal endorsed the accepted bill to Aparna for full settlement of a debt of ₹ 4,050. On the due date the bill was dishonoured and Subhra, having become insolvent, paid on 5th May, 2015 — 60% of her acceptance. Give Journal Entries in the books of Kuntal and Subhra.

Working Note : 2/12 x 10 / 100 x ₹ 3,000 = ₹ 50.

Renewal of a Bill

When the drawee of the bill, after accepting it, has some apprehension that he may not be able to honour the bill on the due date, he may request the drawer of the bill to cancel the original bill and to draw a fresh bill on him for a further period of time.

If the drawee agrees to such an offer, the drawee gets some extention to pay for the bill at a later date and, thereby, dishonouring of the bill is avoided. This is called renewal of a bill. In such a case, the drawee of a bill becomes liable to pay interest to the drawer for the extended period. The amount of the new bill will include the amount of the interest less the part payment made by the drawee, if any, while requesting the drawer to renew the bill.

The renewal of a bill of exchange should always entail the cancellation of the maturing (old) bill and the making of a new one, and accounting records should show such cancellation and renewal. When a bill is renewed, the following entries are required to be passed in the books of the drawer and the drawee.

Transactions	Drawer's Books	Drawee's Books
(1) Cancelling the original bill	Drawee A/c Dr. To Bills Receivable A/c	Bills Payable A/c Dr. To Drawer A/c
(2) Recording interest for the new period	Drawee A/c Dr. To Interest A/c	Interest A/c Dr. To Drawer A/c
(3) Part payment received / made	Cash/Bank A/c Dr. To Drawee A/c	Drawer A/c Dr. To Bank A/c
(4) New bill drawn / accepted	Bills Receivable A/c Dr. To Drawee A/c	Drawer A/c Dr. To Bills Payable A/c

Effects of Renewal of a Bill

(1) Upon renewal, the indebtedness of the drawee is not restricted to the face value of the bill, but it is increased by an amount equal to the aggregate of interest charges, noting charges, stamp duty, and the like.

(2) The new bill re-establishes the acknowledgement of the debt of the drawee.

Illustration 12

A sells goods to B for ₹ 1,000 and draws a bill on him for the same amount for 3 months. Before the due date, B requests A to cancel the bill, to accept ₹ 300 as part payment and to draw a fresh bill on him for ₹ 720 for a further period of 2 months — ₹ 20 being the interest for the period extended. A agrees to the proposal. The new bill is duly honoured. Pass Journal Entries and other Party's Account in the books of both the parties.

₹ 4,060 for 4 months @ 18% p.a. = ₹ 243.60
₹ 2,060 for 3 months @ 18% p.a. = ₹ 92.70
Total interest payable = ₹ 336.30

Illustration 18

In the books of A, there was a balance of ₹ 13,000 due by B on 31st March, 2015 which was written-off as bad debt in closing of the books on that date. On 12th July, 2015 B paid cash ₹ 12,000 in full and final settlement of his dues.

Further transactions took place between A and B as follows :

2015

Aug 4 A sold goods to B valued at ₹ 25,000 which were paid by cheque ₹ 4,000 and a bill of exchange for ₹ 21,000 at one month. A discounted the bill of exchange at the bank for ₹ 20,900.

Sep. 7 B's bill was dishonoured and A was called upon to take it up. This he did by paying noting charges of ₹ 100.

Sep. 8 B met his obligation for ₹ 21,000 with a bill at two months for the same amount, paid cash for noting charges on the old bill and interest of ₹ 2012 on the new bill.

Nov. 11 B met his bill by paying cash ₹ 11,000 and accepted a fresh bill at two months for ₹ 10,400 including interest.

Dec. 11 B having become insolvent paid final dividend of 50 paise in the rupee.

Retiring a Bill

Retiring a bill is the act of withdrawing a bill of exchange from circulation when it has been paid before the due date. When the drawee of a bill desires to make payment before the due date of the bill and the drawer welcomes it, it is called retiring a bill. In such a case, the drawer is to allow some discount (rebate) because what he was to receive at some time in the future, he receives immediately. The discount (rebate) is an expense for the drawer and a gain for the drawee.

Journal entries are as under :

Drawer's Book		Drawee's Book	
Bank A/c	Dr.	Bills Payable A/c	Dr.
Discount Allowed / Rebate on Bill Retired A/c	Dr.	To Bank A/c	
To Bills Receivable A/c		To Discount Received / Rebate on Bill Retired A/c	
(Being the bill retired before the due date)		(Being the bill retired by us before maturity)	

Effects of Retiring a Bill

(1) Upon retirement, the drawer of the bill gets an early payment, i.e. before the due date.
(2) The 'rebate on bill retired' is an expense for the drawer and a revenue for the drawee.
(3) The rebate is actually calculated at a fixed percentage per annum on the unexpired period of the bill.

Rebate on Bill Retired Account can be used in place of Discount Allowed Account or Discount Received Account. In our all illustrations, we have used Discount Allowed Account and Discount Received Account in place of Rebate on Bill Retired Account.

Illustration 19

On January 1, 2015 Saju accepted a bill, drawn on him by Rinku for ₹ 5,000 payable 4 months after sight, against his dues. Having surplus funds, Saju paid off the bill on 4th February and was allowed a rebate of 6% p.a. Show Journal entries in the books of Saju and Rinku to record these transactions.

Solution

In the books of Saju

Journal

Date	Particulars		L.F.	Dr. ₹	Cr. ₹
2015 Jan. 1	Bills Receivable A/c	Dr.		5,000	
	To Saju A/c				5,000
	(Being the bill drawn on Saju for four months)				
Feb. 4	Bank A/c	Dr.		4,925	
	Discount Allowed A/c	Dr.		75	
	To Bills Receivable A/c				5,000
	(Being the bill retired and discount allowed @ 6% p.a.)				

Note : The due date of the bill is 4.5.2015. But the drawee made payment on 4.2.2015. Therefore, he has been allowed a discount for 3 months @ 6% p.a. which is calculated as : ₹ 5,000 × 6/100 × 3/12 = ₹ 75.

Illustration 20

On 1st July, 2015, A sold goods to B priced at ₹ 6,000 subject to a deduction of $16^2/_3$% trade discount and drew a bill on B for 3 months. B accepted the bill and returned it to A. A and B mutually agreed that this bill should be discharged by a cash payment of ₹ 2,000 and a new bill on such a date as would enable the latter to earn a rebate of ₹ 100 @ 10% p.a. The new bill would be accepted for 2 months at 12% p.a. interest. The new bill was met on the due date.

Pass Journal Entries in the books of B.

Solution

In the books of B
Journal

Date	Particulars		L.F.	Dr. ₹	Cr. ₹
2015 July 1	Purchases A/c To A A/c (Being the goods purchased on credit for ₹ 6,000 at a trade discount of $16^2/_3$%)	Dr.		5,000	5,000
July 1	A A/c To Bills Payable A/c (Being the acceptance of a bill from A)	Dr.		5,000	5,000
July 23	Bills Payable A/c To A A/c (Being the bill cancelled for renewal)	Dr.		5,000	5,000
July 23	A A/c To Bank A/c (Being a part payment made to A)	Dr.		2,000	2,000
July 23	A A/c To Discount Received A/c (Being discount received for discharging the bill before the due date)	Dr.		100	100
July 23	Interest A/c To A A/c (Being the interest payable @ 12% p.a. on ₹ 2,900 for 2 months)	Dr.		58	58
July 23	A A/c To Bills Payable A/c (Being the acceptance of a new bill for 2 months for the balance plus interest)	Dr.		2,958	2,958
Sept. 26	Bills Payable A/c To Bank A/c (Being the new bill honoured by payment)	Dr.		2,958	2,958

Working Note: **Calculation of the number of days to earn a rebate of ₹ 100**.

Interest @ 10% p.a. for 1 year on ₹ 5,000 is ₹ 500. To earn ₹ 100, the number of days should be 100/500 x 365 = 73 days. Therefore, the bill should be honoured 73 days before the due date, i.e. 23rd July.

Illustration 21

Mr David draws two Bills of Exchange on 1.1.2015 for ₹ 6,000 and ₹ 10,000. The Bills of Exchange for ₹ 6,000 is for two months while the Bills of Exchange for ₹ 10,000 is for three months. These bills are accepted by Mr Thomas. On 4.3.2015 Mr Thomas requests Mr David to renew the first bill with interest at 18% p.a. for a period of two months. Mr David agrees to this proposal. On 20.3.2015 Mr Thomas retires the acceptance for ₹ 10,000, the interest rebate, i.e. discount, being ₹ 100. Before the due date of the renewed bill, Mr Thomas becomes insolvent and only 50 paise in a rupee could be recovered from his estate. You are to give the Journal Entries in the books of Mr David.

Solution

In the books of Mr David
Journal

Note : Since the Bills Receivable account is closed, they cannot find a place in the Balance Sheet at 31st December, 2014. Since there is a contingent liability, a note must be given below the Balance Sheet as — 'Contingent liability towards bills discounted ₹ 1,05,000'.

Illustration 25

Ravi accepted on April 1, 2015 a bill for ₹ 10,000 drawn by Kapil at three months. Kapil, on 4th April, discounted the bill with his banker at 6% p.a. Ravi failed to meet the bill on the due date and at his request Kapil agreed to renew the bill for three more months for which he demanded collateral security. Ravi endorsed two of his customers bills for ₹ 7,000 and ₹ 5,400 due on August, 20 and September 20, 2015 respectively as collateral security. Kapil discounted all the three bills at 6% p.a. on 10th July with the bankers; but on the due date the second customers' bill was dishonoured, Ravi became bankrupt on 1st September, 2015 and nothing was realised from his estate.

Ram draw upon Shyam three bills of exchange of ₹ 10,000, ₹ 8,000 and ₹ 6,000 respectively. A week later the first bill of ₹ 10,000 was cancelled on mutual agreement. Shyam paid ₹ 4,000 in cash and for the balance amount, together with interest of ₹ 600, he accepted a new bill. This new bill was endorsed to Jadu along with a cheque for ₹ 2,000 in full settlement of his claim for ₹ 9,000. The second bill for ₹ 8,000 was discounted by Ram for ₹ 7,750. All the bills were dishonoured at maturity as Shyam became insolvent. However, his estates realised 40 paise per rupee. Noting charges were incurred by Ram ₹ 75 and by Jadu ₹ 50.

Prepare Bills Receivable Account, Shyam Account and Jadu Account in the books of Ram reflecting the above mentioned transactions.

Solution **In the books of Ram**

Working Note : Bills drawn on Shyam for a total amount of ₹ 24,000. It means amount due from him was ₹ 24,000. Therefore, opening balance on Shyam Account will show a debit balance of ₹ 24,000.

Accommodation Bill

An Accommodation Bill is a bill of exchange signed by a party as drawer, drawee, endorser to accommodate another party whose credit is not strong enough to enable him to borrow on his single name. It is drawn for the purpose of arranging temporary finance. Therefore, an Accommodation Bill is a Bill of Exchange which has been drawn on and accepted by a reputable party for the purpose of giving value to the bill so that it can be discounted.

Ordinary bills are drawn for some consideration — known as 'Trade Bills'. But accommodation bills are those which are drawn and accepted without any consideration. Here, the idea is to assist one or both the parties financially. Accommodation bill is also called ***Kite Bill***. 'Kite' is an informal name for an accommodation bill. Kite-flying or Kiting is the discounting of an accommodation bill at a bank, knowing that the person on whom it is drawn will dishonour it, if the required amount is not remitted to him. As no consideration is involved, accommodation bills are not legally enforceable. Though accommodation bills are not bills from a legal point of view, yet they are in practice no way different from an ordinary bill.

What actually happens in the case of an accommodation bill is that one party draws the bill and the other party accepts it. Then, the drawing party gets it discounted from the bank and receives ready cash of which he is in need. The money received is either wholly utilized by the drawer, or by both, the drawer and the acceptor. Before the due date approaches, the required sum of money is sent to the acceptor in order to make him able to honour the bill and the bill is honoured by the acceptor on the due date. Thus, although there is no legal liability, there exists a strong moral understanding between the parties concerned.

Distinction between Trade Bills and Accommodation Bills

	Trade Bills		Accommodation Bills
1.	These bills are drawn and accepted for some consideration.	1.	These bills are drawn and accepted without any consideration.
2.	These bills are acknowledgements of the debts.	2.	These bills are not the acknowledgements of the debts.
3.	These bills may or may not be discounted with the bank.	3.	These bills are always discounted with the bank.
4.	The loss by way of discounting charges is to be borne by the drawer because the drawee is no way benefitted.	4.	The loss by way of discounting charges is to be shared by the drawer and the drawee in the same ratio in which they share the proceeds.
5.	The drawer can resort to legal action when the bill is dishonoured.	5.	Legal action cannot be resorted to when the bill is dishonoured.

Entries in the case of accommodation bills are the same as those discussed above. Accommodation bills are generally drawn and accepted for three different purposes.

(i) When the bill is drawn and accepted only for the accommodation of the drawer

When a person is in need of funds, he draws a bill on a friend who accepts the bill to oblige the drawer. The drawer can then discount the bill with the bank and obtain the needed funds to meet his requirement with the temporary finance. When the bill is about to fall due for payment, the drawer gives the amount of the bill to the acceptor who meets the bill on presentation by the bank.

Illustration 27

A approached his friend B for a loan of ₹ 5,000 and the latter, being unable to find the money, agreed to accept a bill drawn on him at 3 months for accommodation. In due course, the bill was drawn, accepted and discounted with the banker. The bank rate of discounting the customer's bill was 6% p.a. On the due date, A remits the required amount to B and the bill was duly met. Pass the Journal entries in the books of both the parties.

(ii) When the bill is drawn and accepted for the accommodation of both the drawer and the drawee

When two persons are in need of funds, one of the parties draws a bill on the other. Here, after the bill is discounted with the banker, the realized cash is shared by the drawer and the drawee in an agreed proportion. The understanding is that the loss by way of discounting charges is also to be shared in the same ratio in which they share the proceeds. Before the due date of the bill, the drawer sends his share of the proceeds to the drawee. The drawee then arranges his share of the proceeds and meets the bill on the due date.

Another way of accommodating both the parties who are in the need of funds is that they draw on each other a bill for similar amounts. Both the parties discount their respective bills with the bankers and at maturity, pay off their acceptances.

Illustration 29

For the mutual accommodation of Hiru and Biru, Hiru accepts a bill drawn on him by Biru for three months for ₹ 3,000 on 1st January, 2015. Biru discounts the bill immediately for ₹ 2,700 and remits 1/3rd of the proceeds to Hiru. Before the bill becomes due, Biru remits the balance due to Hiru to enable him to meet the bill. 	Bills Payable A/c	Dr.		1,200	
	To Bank A/c				1,200
	(Being the 1st bill honoured at maturity)				
	A A/c	Dr.		600	
	To Bank A/c				600
	(Being the balance amount of the 2nd bill remitted to A)				

Note : Before the due date of the first bill, A was to remit ₹ 800 to B to enable him to honour the bill. But A was not in a position to remit the required amount. He accepted a bill of ₹ 1,800 drawn by B. B discounted the bill for ₹ 1,740 and remitted to A ₹ 360 after adjusting ₹ 800 in respect of the first bill.

Therefore, A enjoyed (₹ 360 + 800) = ₹ 1,160 out of ₹ 1,740. A's share of discount will be : ₹ 60 / 1,740 x ₹ 1,160 = ₹ 40.

Illustration 33

On 1st January, 2015, Vinod drew and Pramod accepted a bill at three months for ₹ 2,000. On 4th January, 2015 Vinod discounted the bill with his bank at 15% p.a. and remitted half the proceeds to Pramod. On 1st February, 2015 Pramod drew and Vinod accepted a bill at four months for ₹ 1,500. On 4th February 2015 Pramod discounted the bill at 15% p.a., with his bank and remitted half the proceeds to Vinod. They agreed to share the discount equally.

At maturity Vinod met his acceptance, but Pramod dishonoured his and Vinod had to pay the bill. Vinod drew and Pramod accepted a new bill at three months for the original bill plus interest at 18% p.a. On 1st July, 2015 Pramod became insolvent and only 50 paise in the rupee was received from him. Record the above transactions in Vinod's Journal.

Arun and Anand were friends and in need of funds. On 1.1.2015 Arun drew a bill for ₹ 2,00,000 for 3 months on Anand. On 4.1.2015 Arun got the bill discounted at 10% p.a. and remitted half of the proceeds to Anand. On the due date, Arun could not remit his share, instead, he accepted Anand's bill for ₹ 1,20,000 on 4.4.2015 for two months. This bill was discounted by Anand at 12% p.a. Out of this, ₹ 19,600 was paid to Arun after deducting ₹ 400 discounting charges. Due to financial crisis, Arun became insolvent and the bill drawn on him was dishonoured and his estate paid 50%. Days of grace for discounting purposes may be ignored.

Give Journal Entries in the books of Arun and prepare Anand's Account in Arun's books and Arun's Account in the books of Anand.

G and K enter into an accommodation arrangement whereunder the proceeds are to be shared as 2/3 and 1/3 respectively. G draws a bill for ₹ 45,000 on 3rd April, 2015 at 3 months. G gets it discounted for ₹ 44,600 and on 5th April, remits K's share to him. On due date, K pays the bill, though G fails to remit his share. On 18th July, G accepts a bill for ₹ 63,000 drawn on him by K at 3 months, which K discounts on 19th July for ₹ 61,650 and remits ₹ 11,100 to G. Before the maturity of the second bill, G becomes insolvent and only 40% was realised from his estate on 20th October, 2015.

Rita for mutual accommodation of 2 : 1 with Mita draw on the latter two bills of ₹ 9,000 and ₹ 6,000 for 3 months and 4 months respectively on 5th March, 2014. Both the bills were discounted with the bank on 8th March, 2014 @ 12% p.a. interest. On the due date of the first bill, Rita endorsed Sita's acceptance of ₹ 6,200 to Mita in settlement of her share. This bill was discounted by Mita at a charge of ₹ 60. On the due date of the second bill, Mita wanted appropriate share from Rita but the latter was not in a position to give any fund. To settle the problem, Rita issued a promissory note of ₹ 4,000 for 3 months in favour of Mita. Mita discounted it immediately for ₹ 3,920. This promissory note was dishonoured on the due date at a noting charge of ₹ 40. On the same day, Mita collected ₹ 1,690 in cash and drew a new bill for two months for ₹ 2,400. However, on the due date of this bill, Rita became insolvent. On 10th February 2015, Mita received a first dividend of 20% from the estate of Rita and on 10th March 2015, a second and final dividend of 50% from the estate of Rita through official receiver. Show Mita Account and Rita Account in the books of Rita and Mita respectively.

Working Notes :

(1) Amount due to Mita in respect of 1st bill was ₹ 6,000 (2/3 of ₹ 9,000). Bill of Sita for ₹ 6,200 was endorsed to Mita in settlement of her share. Therefore, ₹ 2012 will be treated as interest.

(2) Amount due to Mita in respect of 2nd bill was ₹ 4,040 including noting charges of ₹ 40. Cash paid to Mita ₹ 1,690 and a bill for ₹ 2,400 was accepted. Therefore, the difference of ₹ 50 (₹ 1,690 + ₹ 2,400 – ₹ 4,040) will be treated as interest.

(3) Final amount due to Mita is ₹ 2,400. Out of which 20%, i.e. ₹ 480 was paid on 10th February, 1994 as 1st instalment. 2nd instalment equal to 50%, i.e. 1,200 was paid on 10th March. The balance 30%, i.e. ₹ 720 wll be treated as bad debts.

(4) It is assumed that the accounting year for both drawer and the drawee is ending on 31st December every year.

(5) Discounting charges for the first bill is ₹ 270 (₹ 9,000 x 12/100 x 3/12) and that of the second bill is ₹ 240 (₹ 6,000 x 12/100 x 4/12). Therefore, total discounting charges = ₹ 510. Mita's share is 1/3, i.e. 1/3 of ₹ 510 = ₹ 170. Amount remitted to Mita — ₹ 5,000 – ₹ 170 = ₹ 4,830.

(iii) When several bills are drawn and accepted for the accommodation of more than two parties

Here, each party draws one or more bills on the others. The bills are then discounted by the respective parties. The total net proceeds of the bills is then shared by the parties in an agreed ratio — the total discounting charges are also shared by them in the same proportion. Before the due date, in order to enable each party to honour his bill, the required amount is remitted by the others — with the help of which (along with their own share), they honour the accepted bills.

Illustration 37

For mutual accommodation of A, B and C, they draw and accept the following bills:

A draws a bill on B for ₹ 10,000; B draws a bill on C for ₹ 20,000; C draws a bill on A for ₹ 30,000.

All the above bills are discounted at 10% and the proceeds are shared equally.

Assuming all the bills are honoured on the due date, pass Journal entries in the books of A, B and C.

Solution

The aggregate amount of the bills is ₹ 60,000. The bills are discounted at 10%. Therefore, total amount of discount is 10% of ₹ 60,000, i.e. ₹ 6,000.

Each party will g et 1/3rd of the total amount of the bill less 1/3rd of the discounting charges. Therefore, each party will receive ₹ 18,000 (₹ 20,000 – ₹ 2,000) and will pay ₹ 20,000. After discounting the bill, A gets ₹ 9,000 (₹ 10,000 – ₹ 1,000). Therefore, he is to get ₹ 9,000 from C to make his share equal to others. B gets ₹ 18,000 (₹ 20,000 – ₹ 2,000) — exactly what each party is to get. C gets ₹ 27,000 (₹ 30,000 – ₹ 3,000) after discounting the bills. When C sends ₹ 9,000 to A, his share becomes ₹ 18,000 (₹ 27,000 – ₹ 9,000) — which is equal to that of the other parties.

Before the due date, A is to honour a bill of ₹ 30,000. To honour the bill, he is to get ₹ 10,000 from B, because B is to honour a bill of ₹ 10,000, but he has ₹ 20,000 with himself. Therefore, the excess of ₹ 10,000 will be remitted to A. Lastly, C is having with himself exactly what he requires to honour the bill drawn by B on him.

Illustration 38

A, B and C, for mutual accommodation, drew and accepted the following bills: A drew on B for ₹ 10,000 and on C ₹ 8,000; B drew on A for ₹ 12,000 and on C ₹ 20,000; C drew on A for ₹ 18,000 and on B ₹ 7,000. All the bills were discounted at 10% and the proceeds were shared equally. Pass Journal entries in the books of all the parties, assuming that all the bills were honoured on the due date.

Solution

The aggregate value of the bills is ₹ 75,000 and the amount of discounting charges is 10% of ₹ 75,000, i.e. ₹ 7,500. Since the proceeds are shared equally, the loss by way of discount is also to be shared equally. Therefore, each party is to receive ₹ 22,500 (₹ 25,000 – ₹ 2,500) and each party is to pay ₹ 25,000 to honour the bills. A gets ₹ 16,200 (₹ 18,000 – ₹ 1,800) after discounting the bills drawn by him. Similarly, B gets ₹ 28,800 (₹ 32,000 – ₹ 3,200), and C gets ₹ 22,500 (₹ 25,000 – ₹ 2,500). Therefore, A is to receive ₹ 6,300 (₹22,500 – ₹ 16,200) from B to make his share equal to that of the other parties. On the due date, A is to honour two bills of ₹ 12,000 and ₹ 18,000, i.e. ₹ 30,000. Therefore, he must get ₹ 5,000 from the other parties. B is to honour bills worth ₹ 17,000 (₹ 10,000 + ₹ 7,000). Therefore, he is to pay ₹ 8,000 to the other parties. Lastly, C is to honour bills worth ₹ 28,000 (₹ 8,000 + ₹ 20,000). Therefore, he is to get ₹ 3,000 from the other parties. From the above, we see that A and C will get from B ₹ 5,000 and ₹ 3,000 respectively to honour the bills.

	Bank A/c Dr. To B A/c (Being the receipt of ₹ 3,000 from B in order to honour the bill)		3,000	 3,000

Bills Payable A/c Dr. To Bank A/c (Being the bill accepted by us, honoured by payment)		28,000	28,000
A A/c Dr. To B A/c (Being the required adjustment)		10,000	10,000

Key Points

- Section 5 of The Negotiable Instruments Act, 1881 defines a bills of exchange as under : 'A bill of exchange is an instrument in writing containing an unconditional order, signed by the maker, directing a person to pay a certain sum of money only to, or to the order of, a certain person, or to the bearer of the instrument.
- There are three parties to a bill of exchange — the drawer, the drawee and the payee.
- A promissory note is a written unconditional promise made by one person to another, to pay a specific sum of money either on demand or at a specified future date.
- Basically bills are classified into two categories : (a) Trade / Commercial Bills and (b) Accommodation Bills.
- When the period of the bill is stated in days, the calculation of the due date will be in days (which includes the date of payment but excludes the date of transaction).
- When the period of the bill is stated in months, the calculation of due date will be made in terms of calendar months, ignoring the number of days in a month.
- When the holder of a bill presents it to the drawee for payment on the due date and the drawee fails to make the payment, the bill is said to be dishonoured.
- Noting is the procedure adopted if a bill of exchange has been dishonoured by non-acceptance or by non-payment.
- The Notary Public records particulars of the bill, its re-presentment, and the reasons for non-payment of the bill in a regular and also on a notarial ticket, which is to be attached to the bill. The notary public charges some fees for doing all these — which is called ***noting charges***.
- Insolvency is the inability to pay one's debts when they fall due. Insolvency arises due to bankruptcy.
- Retiring a bill is the act of withdrawing a bill of exchange from circulation when it has been paid before the due date.
- An Accommodation Bill is a bill of exchange signed by a party as drawer, drawee, endorser to accommodate another party whose credit is not strong enough to enable him to borrow on his single name.

THEORETICAL QUESTIONS

1. Define Bill of Exchange and Promissory Note. Distinguish between a bill of exchange and a promissory note.
2. What are the effects of endorsing a bill ? What are the different types of endorsement ?
3. What are the effects of dishonour of a bill ?
4. Write short notes on : (a) Noting charges; (b) Renewal of a bill; (c) Retiring of a bill.
5. Distinguish between Trade Bills and Accommodation Bills.

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each sentence or answer each question below.

1. A bill of exchange must be -
   A in writing
   B signed by the drawee
   C a conditional order to pay
   D an unconditional promise to pay
2. A bill of exchange -
   A requires no acceptance
   B must be accepted
   C can be drawn only on a bank
   D is drawn by a debtor

3. There are three parties to a bill of exchange -
   A the seller, the buyer and the bank
   B the debtor, the creditor and the endorsee
   C the payer, the payee and the bank
   D the drawer, the drawee and the payee
4. A bill of exchange is payable -
   A at any time in the future
   B only on presentation
   C on presentation or at a time in the future
   D only to a bank
5. Noting is a procedure adopted if a bill of exchange has been dishonoured by
   A acceptance
   B non-acceptance
   C non-payment
   D non-acceptance or non-payment
6. Upon retirement, the drawer of the bill
   A requires the payment on the due date
   B does not get the payment
   C receives the payment before the due date
   D receives the payment after the due date
7. The rebate on bill retired is actually calculated at a fixed percentage per annum on the face value of the bill for
   A unexpired period of the bill
   B expired period of the bill
   C tenor of the bill
   D none of the above
8. Upon renewal, the indebtedness of the drawee is not restricted to the -
   A value of the bill
   B face value of the bill
   C discounted value of the bill
   D present value of the bill
9. When a bill of exchange is endorsed the amount is payable to the -
   A original holder
   B bank
   C endorsee
   D notary public
10. The discounting of a bill does not affect the position of the -
   A drawer
   B drawee
   C bank
   D seller
11. Discounted Bills Receivable is shown in the Balance Sheet as a
   A current asset
   B contingent liability
   C liability
   D contingent asset
12. State which of the following is a promissory note.
   A 'Mr Amar, I owe you Rs 100.'
   B 'I promise to pay Rs 5,000 to Y provided he is ready to go with me to kill X.'
   C 'Received from Mr Y Rs 4,000 which I promise to pay on demand.'
   D 'Deposit with me Rs 4,000 to be returned on demand.'

13. The liability of the maker of a promissory note is
    - **A** secondary but absolute
    - **B** secondary and conditional
    - **C** primary and absolute
    - **D** primary but conditional
14. Accommodation bill is also called -
    - **A** trade bill
    - **B** promissory note
    - **C** Kite bill
    - **D** bank note
15. Which of the following is true for accommodation bill ?
    - **A** this bill is the acknowledgment of the debt.
    - **B** this bill is always discounted with bank.
    - **C** this bill is drawn and accepted for consideration.
    - **D** in case of dishonour, legal action can be resorted.
16. Which of the following is true ?
    - **A** a bill of exchange must direct a certain person to receive a certain sum of money.
    - **B** a bill payable on demand is not required to be accepted.
    - **C** a bill of exchange is not one kind of a post-dated cheque.
    - **D** a bill payable on demand is estimated to three days of grace.
17. Which of the following is true ?
    - **A** the person to whom a bill is addressed is the creditor.
    - **B** a bill from the point of view of a creditor is called a bills payable.
    - **C** when the drawer discounts a bill, he credits discount account.
    - **D** refusal by the acceptor to make payment of the bill on the maturity date is called dishonour of the bill.
18. Which of the following is true ?
    - **A** no cancellation entry is required when a bill is renewed.
    - **B** a banker holds discounted bills as an agent for collection.
    - **C** discount at the time of retirement of a bill in a gain for the drawee.
    - **D** the noting charges are ultimately borne by the drawer.
19. Which of the following is true ?
    - **A** a bill of exchange should be presented on the due date and at the place named.
    - **B** a bill can generally be discounted with the banker where the drawee of the bill has an account.
    - **C** a bill of exchange cannot be transferred by the holder to any other party by mere physical delivery.
    - **D** no entry is passed in the books of the drawer in respect of bills sent for collection.
20. Which of the following is true ?
    - **A** noting is not a legally acceptable evidence of dishonour.
    - **B** when a bill is honoured, notice must be given to the prior parties.
    - **C** a renewed bill re-establishes the acknowledgment of the debt of the drawee.
    - **D** upon retirement, the drawer of the bill gets a fixed payment.

PRACTICAL QUESTIONS

Commercial Bills

1. On 1.2.2015, J. Jadav received from K. Kadam three acceptances for ₹ 6,000, ₹ 8,000 and ₹ 10,000 for two, three and four months respectively. The first bill for ₹ 6,000 was endorsed to M. Mehta; the second bill for ₹ 8,000 was held till the due date; and the third bill for ₹ 10,000 was discounted for ₹ 50 discount.
   At maturity all the bills were dishonoured. Give the Journal Entries in the books of J. Jadav and the Ledger Accounts in the books of K. Kadam, in respect of these transactions.

[C.A. (Entrance) — Adapted]

2. Y owed money to S and hence accepted two bills each of ₹ 4,850 of three months duration drawn on him by the latter on July 1,2015. S endorsed one of the bills in favour of H on July 7, 2015. On the same date he discounts the other bill with his bank and received net proceeds of ₹ 4,675. Y failed to meet both the bills on the due date. On 4th October, 2015, the bank debited the account of S with value of the second bill plus their charges of ₹ 20. Y is adjudicated insolvent and his estate paid 60 paise in the rupee on 1st November, 2015.
Show the entries in the books of both Y and S. *[C.A. (Entrance) — Adapted]*
3. Amarnath drew on Parker a bill of exchange for ₹ 1,00,000 on 1st January, 2015 payable after 3 months from 1st January 2015, which Parker accepted. On 4th January, 2015, Amarnath discounted the bill with his bankers at 18% p.a. Parker failed to meet the bill on the due date and the bill was returned to Amarnath with bank charges ₹ 2012 debited to him by the bank. Amarnath claimed the bill value plus bank charges from Parker. However, only 40% of the amount claimed could be recovered by Amarnath on 8th April, 2015 as Parker was declared insolvent. Pass the Journal Entries in the books of Amarnath and Parker for the above transactions. *[C.A. (Entrance) — Adapted]*
4. Patel received from one of his customers a bill at three months for ₹ 16,000. He discounted it on the same day at 10 per cent per annum with his bankers. On the date of maturity, the bill was dishonoured and the bank incurred noting charges of ₹ 80. However, the customer paid him ₹ 2,000 plus noting charges plus interest for three months amounting to ₹ 420 in cash and accepted a fresh bill at three months for ₹ 14,000, being the balance amount due from him. Patel gave the second bill to Mr Narayan, one of his creditors. The second bill was duly honoured on the due date. Record these transactions in the Journal of Patel. *[C.A. Entrance — Adapted]*
5. S. Sen and B. Banerjee have a number of transactions on bills of exchange between them. You are required to show the journal entries in their books in respect of the following transactions :
1.1.2015 Sen draws a bill on Banerjee for ₹ 15,450 payable after a month, inclusive of interest at 3% p.m.
3.1.2015 Sen discounts a bill for ₹ 25,000 drawn on 30.12.2014 with his Bank, discounting charges being 15% p.a. The bill is payable on 3.2.2015.
4.1.2015 Sen endorses the bill for ₹ 15,450 in favour of R. Ram towards account.
1.2.2015 Banerjee pays the bill for ₹ 15,450.
4.2.2015 The bill for ₹, 25,000 is returned by Sen's bankers as unpaid with their charges of ₹ 10.
6. Yashpal owed money to Srinivas and hence accepted two bills each of ₹ 4,850 of three months' duration drawn on him by the latter, on July 1, 2015. Srinivas endorsed one of the bills in favour of Hariram on July 7, 2015. On the same date he discounted the other bills with his bank and received net proceeds of ₹ 4,675. Yashpal failed to meet both the bills on the due date. On 4th October, 2015, the bank debited the account of Srinivas with the value of the second bill plus their charges of ₹ 20. Yashpal is declared insolvent and his estate paid 60 paise in the rupee, on 1st November, 2015. Show the Journal Entries in respect of the above in the books of Yashpal and Srinivas.
7. Sri G sold his diamond ring to Sri K for ₹ 20,000 and received in payment thereof, a three months bill of exchange from him of the bill amount. Thereafter, Sri G, discounted the said bill with his bankers receiving ₹ 19,800. Sri K, was not able to meet the bill on the due date. Sri K, however, agreed to accept a new two months bill for the amount due by him together with interest @ 9% p.a. and discount charges.
Show the Journal Entries and Ledger Accounts in the books of Sri G and Sri K.
8. On 1st January 2015 X owes Y ₹ 10,000 for which Y draws on X two bills for ₹ 4,000 and ₹ 6,000 payable after 3 months and 4 months respectively. Both the bills are drawn on 1st January, 2015. Y discounts both the bills with his bankers on 3rd January, at 12% p.a. Before the due date of the 1st bill, X requests Y to assist him by providing with ₹ 4,000 cash and drawing a 3rd bill on him (X) for the amount plus interest @ 12% p.a. for 3 months. Y agrees to this proposal and pays the money after discounting the third bill with his banker @ 12% p.a. A week before the 2nd bill for ₹ 6,000 falls due, X again asks Y to assist him by providing ₹ 5,000. Y however is not in a position to pay any cash but he arranges with X to draw on him (Y) two bills for ₹ 2,000 and ₹ 3,000 at 2 months and 3 months respectively from the due date of the 2nd bill (₹ 6,000). Y accepts these two bills and X discounts them with his bankers at 12% p.a. and assisted by the proceeds, duly meets the 2nd bill on the due date. Y fails to meet his own acceptances. On 10th June 2015 X becomes bankrupt, before meeting his third bill. On 1st September 2015, a first and final dividend of 50 paise in the rupee is received from X's estate. Pass Journal entries and the account of X in the books of Y.

Accommodation Bills

9. On 1st January, 2015, Ram drew and Shyam accepted a bill at three months for ₹ 4,000. On 4th January, 2015, Ram discounted the bill with his bank at 15% per annum and remitted half the proceeds to Shyam. On 1st February, 2015, Shyam drew and Ram accepted a bill at four months for ₹ 3,000. On 4th February, 2015 Shyam discounted the bill at 15% per annum with his bank and remitted half the proceeds to Ram. They both agreed to share the discount

equally. At maturity, Ram met his acceptance, but Shyam dishonoured his acceptance and Ram had to pay it. Ram drew and Shyam accepted a new bill at three months for the original bill plus interest at 18% per annum. On 1st July, 2015, Shyam became insolvent and only 50 paise in the rupee was received from him. Record the above transactions in Ram's Journal.

10. On 1.7.2015 Salil for mutual accommodation of himself and Sunil drew on the other a bill for ₹ 10,000 payable at 3 months date. The bill was discounted with Central Bank of India at 5% and half of the proceeds were remitted to Sunil on 2.7.2015. On 2.7.2015, Sunil drew a bill on Salil for ₹ 4,000 payable at 3 months date. He discounted the bill with Bank of India at 10% and remitted half of the proceeds to Salil. Sunil became bankrupt on 31.8.2015 and only 25% was received by Salil on 15.9.2015 as the first and final dividend from his estate. Write up the Journal entries in the books of Salil.
11. Mr Dhawlka draws on Mr Agarwal for mutual accommodation of both, a bill of ₹ 9,000 on 1st February, 2015 at 3 months. Mr Dhawlka discounts the bill at 10% p.a. and remits 2/3rd of the proceeds, to Mr Agarwal. On maturity, Mr Dhawlka is unable to send the amount due and therefore Mr Agarwal draws on Mr Dhawlka a bill for ₹ 6,000 at 4 months which is duly accepted by Mr Dhawlka. Mr Agarwal discounts the bill for ₹ 5,400 and remits ₹ 600 to Mr Dhawlka. Before the bill is due for payment Dhawlka becomes insolvent. Later 20% dividend is recovered from his estate. Show the Journal Entries in the book of Mr Agarwal and Agrawal's A/c in the book of Mr Dhawlka.
12. Sudip Ray accepted a three month's bill for ₹ 15,000 drawn by Keshab Bose for mutual accommodation on 1.2.2015. This bill was immediately discounted for ₹ 14,650 and moiety was sent to Sudip Ray. Just before maturity Sudip Ray received a cheque for ₹ 2,500 from K. Bose, and the bill was duly honoured. On 15.4.2015, K. Bose was declared insolvent and only 24 paise in the rupee was received as dividend from his estate. Show the necessary Journal entries and the personal accounts in the books of both the parties.
13. X draws a bill for ₹ 3,000 and Y accepts the same for the mutual accommodation of both of them to the extent of X 2/3 and Y 1/3. X discounts the same for ₹ 2,820 and remits 1/3 of the proceeds to Y. Before the due date, Y draws another bill for ₹ 4,200 on X in order to provide funds to meet the first bill. The second bill is discounted for ₹ 4,080 with the help of which the first bill is met and ₹ 720 are remitted to X. Before the due date of the second bill, X becomes bankrupt and Y receives a dividend of 50 paise in the rupee in full satisfaction. Pass the Journal entries in the books of X and Y.
14. On 1st January, 2014, Pankaj for mutual accommodation of Tony and himself drew upon the latter a three months bill for ₹ 12,000 which was duly accepted. Pankaj discounted the bill at 6% p.a. on 4th January 2014 and remitted 1/2 of the proceeds to Tony.

    On 1st February, 2014, Tony drew and Pankaj accepted a bill at 3 months for ₹ 4,800. On 4th February, 2014, Tony discounted the bill at 6% p.a. and remitted half the proceeds to Pankaj. At maturity Pankaj met his acceptance, but Tony failed to meet his and Pankaj had to take up. Pankaj drew and Tony accepted a new bill at two months on 4th May, 2014, for the amount due to Pankaj plus ₹ 100 as interest. On 1st July, 2014 Tony became insolvent and a first and final dividend of 50 paise in the rupee was received from his estate on 30th September, 2014.

    Pass the necessary Journal Entries in the books of Pankaj.

Average Due Date and Account Current

Average Due Date

Average is a single figure representing a group of figures. Average due date is a mean date on which a single amount can be paid in lieu of several payments on different dates. When several bills of exchange are drawn by the drawer on the drawee payable on different dates, the drawee should make payments on those different dates to discharge his liability. Both the parties may feel it inconvenient to make/receive payments at different dates. As a solution, a mean date is calculated for a lump sum payment, which may result neither in any loss of interest to the drawer nor any undue advantage to the drawee.

The average due date technique of payment may be used in the following situations:

1. In settlement of contra accounts, that is, X and Y sell goods to each other on different dates.
2. In the settlement of accounts between a principal and an agent.
3. In calculating interest on partners' drawings.
4. In calculating interest on book debts which is realized piecemeal during dissolution of partnership.

Steps for Calculation of Average Due Date

Step 1 Select one of the due dates as the ***base date*** from which calculations are to be made. Any due date may be taken as a base date but preferably we should take the ***first due date*** as the base date.

Step 2 Calculate the number of days (plus or minus) of each of the other due dates from the base date.

Step 3 Multiply the amount of each payment by the respective number of days as calculated under Step 2.

Step 4 Add the amount of each payment and also add the products.

Step 5 Divide the total of the products by the total of the amounts payable. The result will give the number of days which are added to (or subtracted from) the base date and thus, the average due date is found out. If the due date is in a fraction, round it off to the next whole number.

Due Date of a Bill of Exchange

The due date of a bill of exchange is the date when the amount of the bill is payable by the drawee.

A bill of exchange payable ***at sight*** becomes due immediately after the bill is presented for payment.

A bill of exchange, payable at a predeterminable time in the future, becomes due on the expiry of the period of the bill. The time after which the term bill is to be paid is said to be the ***tenure*** of the bill. But it is customary to allow three ***days of grace*** to the drawee to pay the amount in the case of a term bill. Therefore, while calculating the due date of a term bill, in its period, for which it is drawn, three more days are added. For example, a bill is drawn 1.1.2015 for 3 months. The due date of the bill is 4.4.2015.

	Date	Month	Year
Date of drawing of the bill	1	1	2015
Period		3	
	1	4	2015
Days of grace	3	—	—
Due date of the bill	4	4	2015

A bill payable can be : (a) a certain period after date; or (b) a certain period after sight.

When the bill contains a direction to 'pay three months after date', three months have to be counted from the *date of drawing of the bill*. But, when the bill contains a direction to 'pay three months after sight', three months have to be counted from the *date of acceptance of the bill*.

While calculating the due date of a bill, the following points should be noted :

1. ***When the period of the bill is stated in days, the calculation of the due date will be in days (which includes the date of payment but excludes the date of transaction).***
2. ***When the period of the bill is stated in months, the calculation will be made in terms of calendar months, ignoring the number of days in a month. For example, if a bill is drawn on 15th January, 2015, for 3 months, the due date of the bill is 18th April, 2015.***
3. ***If the due date falls on a day which is a public holiday, the due date shall be the preceding business day. And now, if the preceding day is also a public holiday, it will fall due on the day preceding the previous day. For example, if the due date of a bill is 26th January (Republic Day) it falls due on 25th January and if 25th January is also a public holiday, it will fall due on 24th January (provided 24th January is not a public holiday).***
4. ***If the maturity date of a bill of exchange falls on a day which is an 'emergent holiday' declared by the Government as per the Negotiable Instruments Act, 1881, the date of maturity will be next working day.***

Illustration 1

A sold goods to B as follows :

Date of Invoice	Amount (₹)
15.5.2014	40,000
22.5.2014	25,000
29.5.2014	45,000
03.6.2014	32,500
09.6.2014	30,000

The payments were to be made two months from the respective date of invoices.

Calculate the average due date on which a single payment can be made by B to A without loss of interest to either parties.

Solution **Calculation of Average Due Date** **Base Date : 15.07.2014**

Date	Due Date	No. of Days from base date	Amount (₹)	Products
15.5.2014	15.7.2014	0	40,000	0
22.5.2014	22.7.2014	7	25,000	1,75,000
29.5.2014	29.7.2014	14	45,000	6,30,000
03.6.2014	03.8.2014	19	32,500	6,17,500
09.6.2014	09.8.2014	25	30,000	7,50,000
			1,72,500	21,72,500

Average Due Date = Base Date + $\frac{21,72,500}{1,72,500}$ = 15.7.2014 + 13 days (rounded off) = **28.7.2014**.

Illustration 2

A drew upon B several Bills of Exchange due for payment on different due dates as under:

Date	Amount (₹)	Tenure
02.10.2014	600	3 months
20.10.2014	800	2 months
10.11.2014	1,000	3 months
27.11.2014	750	3 months
08.12.2014	900	1 month
16.12.2014	1,200	2 months

Find out Average Due Date, on which payment may be made in one single amount.

Solution **Calculation of Average Due Date** **Base Date : 23.12.2014**

Date	Due Date	No. of Days from base date		Amount (₹)	Products
02.10.2014	05.01.2015*	8 + 5	= 13	600	7,800
20.10.2014	23.12.2014		= 0	800	0
10.11.2014	13.02.2015	8 + 31 + 13	= 52	1,000	52,000
27.11.2014	02.03.2015	8 + 31 + 28 + 2	= 69	750	51,750
08.12.2014	11.01.2015	8 + 11	= 19	900	17,100
16.12.2014	19.02.2015	8 + 31 + 19	= 58	1,200	69,600
				5,250	1,98,250

Average due date = Base date + $\frac{1,98,250}{5,250}$ days = 23.12.2014 + 38 days (rounded off) = **30.01.2015**.

***Note** : 3 days of grace has been added for calculating due dates.

Illustration 3

X owes Y the following sum of money on the due dates stated below :

Amount (₹)	Due Date
1,000	1.1.2014
2,000	1.2.2014
3,000	1.3.2014
4,000	1.4.2014

Calculate the average due date. Base date should be taken as 1.2.2014.

Solution **Calculation of Average Due Date** **Base Date : 01.02.2014**

Due Date	No. of Days from base date	Amount (₹)	Products
01.01.2014	– 31	1,000	– 31,000
01.02.2014	0	2,000	0
01.03.2014	28	3,000	84,000
01.04.2014	(28 + 31) 59	4,000	2,36,000
		10,000	2,89,000

Average Due Date = Base Date + $\frac{2,89,000}{10,000}$ = 1.2.2014 + 29 days (rounded off) = **2.3.2014.**

Illustration 4

Anand sold goods to Balwant as detailed below:

Date of Invoice	Value of goods sold (₹)	Date of Invoice	Value of goods sold (₹)
05.05.2014	3,000	26.05.2014	2,250
12.05.2014	1,500	01.06.2014	2,000
19.05.2014	3,500	03.06.2014	1,000

The payments were agreed to be made by bills payable 90 days from the respective dates of the invoice. However, Balwant wanted to arrange for payment of all the bills to be made on a single date.

Calculate the date on which such a payment could be made without loss of interest to either party.

Solution **Calculation of Average Due Date** **Base Date : 06.08.2014**

Date	Due Date	No. of Days from base date	Amount (₹)	Products
05.05.2014	06.08.2014	0	3,000	0
12.05.2014	13.08.2014	7	1,500	10,500
19.05.2014	20.08.2014	14	3,500	49,000
26.05.2014	27.08.2014	21	2,250	47,250
01.06.2014	02.09.2014	27	2,000	54,000
03.06.2014	04.09.2014	29	1,000	29,000
			13,250	1,89,750

Average due date = Base date + $\frac{1,89,750}{13,250}$ days = 6.8.2014 + 14 days (Rounded off) = **20.08.2014**.

Working Note: **Calculation of Due Date**

Date of Drawing of bill	Period (days)	May	June	July	August	Sept.	Due date with days of grace
05.05.2014	90	26	30	31	3		06.08.2014
12.05.2014	90	19	30	31	10		13.08.2014
19.05.2014	90	12	30	31	17		20.08.2014
26.05.2014	90	5	30	31	24		27.08.2014
01.06.2014	90		29	31	30		02.09.2014
03.06.2014	90		27	31	31	1	04.09.2014

Illustration 5

Calculate average due date from the following information :

Date of the bill	Term	Amount of the bills (₹)
August 10, 2014	3 months	6,000
October 23, 2014	60 days	5,000
December 4, 2014	2 months	4,000
January 14, 2015	60 days	2,000
March 8, 2015	2 months	3,000

Solution **Calculation of Average Due Date** **Base Date : 13.11.2014**

Date	Due Date	No. of Days from base date		Amount (₹)	Products
10.8.2014	13.11.2014		= 0	6,000	0
23.10.2014	24.12.2014	17 + 24	= 41	5,000	2,05,000
04.12.2014	07.2.2015	17 + 31 + 31 + 7	= 86	4,000	3,44,000
14.1.2015	18.3.2015	17 + 31 + 31 + 28 + 18	= 125	2,000	2,50,000
08.3.2015	11.5.2015	17 + 31 + 31 + 28 + 31 + 30 + 11	= 179	3,000	5,37,000
				20,000	13,36,000

Average due date = Base date + $\frac{13,36,000}{20,000}$ days = 13.11.2014 + 67 days (Rounded off) = **19.1.2015**.

Working Note: **Calculation of Due Date**

Date of the bill	Period	October	November	December	January	February	March	Due date with days of grace
August 10, 2014	3 months	—	—	—	—	—	—	13.11.2014
October 23, 2014	60 days	8	30	22	—	—	—	24.12.2014*
December 4, 2014	2 months	—	—	—	—	—	—	07.2.2015
January 14, 2015	60 days	—	—	—	17	28	15	18.3.2015
March 8, 2015	2 months	—	—	—	—	—	—	11.5.2015

*After considering 3 days of grace, the actual due date falls on 25th December. It is a public holiday, therefore due date will be 24th December, 2014.

Tutorial Notes :

(1) When the period of the bill is stated in days, the calculation of due date will be in days (which includes the date of payment but excludes the date of transaction).

(2) When the period of bill is stated in months, the calculation will be made in terms of calendar month.

Illustration 6

Ramkumar having accepted the following bills drawn by his creditor Prakash Chand due on different dates approached his creditor to cancel them all and allow him to accept a bill for the payment of his entire liability on the average due date. You are requested to ascertain the total amount of the bill and its due date.

Bill No.	Date of Drawing	Date of acceptance	Amount of the bills (₹)	Tenure
(i)	16.02.2014	20.02.2014	8,000	90 days after sight
(ii)	06.03.2014	07.03.2014	6,000	2 months after sight
(iii)	24.05.2014	07.06.2014	2,000	4 months after sight
(iv)	01.06.2014	04.06.2014	9,000	1 month after sight

Solution **Calculation of Average Due Date** **Base Date : 10.05.2014**

Date	Due Date	No. of Days from base date	Amount (₹)	Products
16.02.2014	24.05.2014	14	8,000	1,12,000
06.03.2014	10.05.2014	0	6,000	0
24.05.2014	10.10.2014	153	2,000	3,06,000
01.06.2014	07.07.2014	58	9,000	5,22,000
			25,000	9,40,000

Average due date = Base Date + $\frac{9,40,000}{25,000}$ days = 10.05.2014 + 38 days (Rounded off) = **17.06.2014.**

Total amount of the bill ₹ 25,000

Working Note: **Calculation of Due Date**

Date of Acceptance of bill	Period	February	March	April	May	Due date with days of grace
20.02.2014	90 days	8	31	30	21	24.05.2014
07.03.2014	2 months					10.05.2014
07.06.2014	4 months					10.10.2014
04.06.2014	1 month					07.07.2014

Tutorial Note: In case of a bill after sight, the due date is to be calculated from the **date of acceptance**.

Calculation of days from base date.

	May	June	July	August	September	October	Days
3rd bill	21	30	31	31	30	10	153
4th bill	21	30	7				58

Illustration 7

For goods sold, Nair draws the following bills on Roy who accepts the same as per terms.

Amount of the bills (₹)	Date of Drawing	Date of Acceptance	Tenure
8,000	06.01.2014	09.01.2014	3 months after date
9,000	15.02.2014	18.02.2014	60 days after date
8,000	21.02.2014	21.02.2014	2 months after date
15,000	14.03.2014	17.03.2014	30 days after sight

On 18th March 2014, it is agreed that the above bills will be withdrawn and the acceptor will pay the whole amount in one lumpsum by a cheque, 15 days ahead of average due date and for this, a rebate of ₹ 1,000 will be allowed. Calculate the average due date, the amount and the date of the cheque.

Solution **Calculation of Average Due Date** **Base Date : 09.04.2014**

Date	Due Dates	No. of Days from base date	Amount (₹)	Products
06.01.2014	09.04.2014	0	8,000	0
15.02.2014	19.04.2014	10	9,000	90,000
21.02.2014	24.04.2014	15	8,000	1,20,000
14.03.2014	19.04.2014	10	15,000	1,50,000
			40,000	3,60,000

(a) **Average due date** = Base date + $\frac{3,60,000}{40,000}$ Days = 9th April + 9 days = **18th April, 2014**.

(b) Amount of cheque = ₹ 40,000 – ₹ 1,000 = ₹ 39,000.

(c) Due date of the cheque = 18.4.2014 – 15 days = 3.4.2014.

Average Due Date as the Basis for Calculating Interest

We have already mentioned that if the payment is made exactly on the average due date, the drawer/creditor will not suffer any loss in respect of interest. In case the drawee/debtor delays the payment of lump sum amount, the drawer/creditor will lose interest for the period of delay. In this situation the drawee/debtor should pay interest at agreed rate for the period of delay, that is, the difference between average due date and actual date of payment.

For calculating interest the following steps should be followed :

Step 1 : Calculate the average due date in the usual manner.

Step 2 : Find out the difference between the average due date (as computed above) and payment date.

Step 3 : Calculate interest by applying the following formula :

Interest = Amount × Rate of Interest p.a. × Difference Between Payment date and Due Date.

Illustration 8

Mr. Neutral purchased goods from Mr. Positive on two month's credit. The purchases were made on the following dates :

	₹
(a) 3rd March, 2014	750
(b) 13th April, 2014	500
(c) 8th May, 2014	700
(d) 5th June, 2014	1,000
(e) 20th July, 2014	600

He wishes to pay the total amount of ₹ 3,550 on the basis of average due date.

(i) Find out average due date.

(ii) If he desires to make the whole payment on 22nd September, 2014, what will be the amount of interest @ 10% p.a.?

Solution **Calculation of Average Due Date** **Base Date : 03.05.2014**

Date	Due Date	No. of Days from base date		Amount (₹)	Products
03.03.2014	03.05.2014		0	750	0
13.04.2014	13.06.2014	28 + 13	= 41	500	20,500
08.05.2014	08.07.2014	28 + 30 + 8	= 66	700	46,200
05.06.2014	05.08.2014	28 + 30 + 31 + 5	= 94	1,000	94,000
20.07.2014	20.09.2014	28 + 30 + 31 + 31 + 20	= 140	600	84,000
				3,550	2,44,700

Average due date = Base Date + $\frac{2,44,700}{3,550}$ days = 03.05.2014 + 69 days (Rounded off) = **11.07.2014.**

Desired date of payment = 22.09.2014. Difference between due date and desired date of payment
= 20 + 31 + 22 = 73 days.

Interest = ₹ 3,550 × 10 / 100 × 73 / 365 = ₹ 71.

Illustration 9

The following amounts are due to A by B :

Due Date	Amount (₹)
10.1.2014	5,000
26.1.2014 (Republic Day)	10,000
23.3.2014	30,000
21.8.2014 (Sunday)	40,000

B wants to pay off the total amount on 18.3.2014 by a single payment — interest @ 16% p.a. is to be taken into consideration. Calcuate the amount to be paid by B.

Solution **Calculation of Average Due Date** **Base Date : 10.01.2014**

Date	Due Date	No. of Days from base date		Amount (₹)	Products
10.1.2014	10.1.2014		0	5,000	0
26.1.2014	25.1.2014*		= 15	10,000	1,50,000
23.3.2014	23.3.2014	21 + 28 + 23	= 72	30,000	21,60,000
21.8.2014	20.8.2014*	21 + 28 + 31 + 30 + 31 + 30 + 31 + 20	= 222	40,000	88,80,000
				85,000	1,11,90,000

* If the due date falls on a day which is a public holiday, the due date shall be the preceding business day.

Average due date = Base Date + $\frac{1,11,90,000}{85,000}$ days = 10.01.2014 + 132 days (Rounded off) = **22.05.2014.**

When the payment is made on 18.3.2014, rebate will be allowed for the unexpired period of the average due date, i.e., 18.3.2014 to 22.5.2014. The amount of rebate =

$$₹\ 85,000 \times 16\% \times \frac{(13+30+22)}{365} = ₹\ 85,000 \times 16\% \times \frac{65}{365} = ₹\ 2,422 \text{ (approx.)}$$

Therefore, the amount to be paid = ₹ 85,000 – 2,422 = ₹ 82,578.

Illustration 10

Kausthav had accepted bills payable to Hrishav as follows :

10th April, 2014 ₹ 4,000 for 4 months
18th April, 2014 ₹ 5,000 for 3 months
25th May, 2014 ₹ 3,000 for 3 months
5th June, 2014 ₹ 6,000 for 3 months

On 1st July, it was agreed that these bills should be withdrawn and that Kausthav should accept on that day two bills, one for ₹ 10,000 due in 4 months and the other for the balance with interest, due in 6 months.

Calculate the amount of the second bill taking interest @ 10% p.a. ***(ignore days of grace)***.

Solution

On 1st July, it was agreed that the bills should be withdrawn. Among the four bills, the first due date is in respect of the second bill—the due date of which is 18th July. Therefore, 18.7.2014 will be taken as the base date.

Calculation of Average Due Date **Base Date 18.07.2014**

Date of Drawing	Period	Due Date	Amount ₹	Number of Days from Base Date	Products ₹
10.4.2014	4 months	10.08.2014	4,000	13 + 10 = 23	92,000
18.4.2014	3 months	18.07.2014	5,000	0 = 0	0
25.5.2014	6 months	25.11.2014	3,000	13 + 31 + 30 + 31 + 25 = 130	3,90,000
5.6.2014	3 months	5.09.2014	6,000	13 + 31 + 5 = 49	2,94,000
			18,000		7,76,000

Average due date = Base date + $\frac{-7,76,000}{18,000}$ = 18.7.2014 + 43 days = **30.08.2014.**

Since two new bills will be drawn, their due date will be :

First Bill — 1.7.2014 + 4 months = 1.11.2014; Second Bill — 1.7.2014 + 6 months = 1.1.2015.

Interest to be charged in respect of the above bills :

1st bill — Interest will be charged on ₹ 10,000 @ 10% p.a. for 63 days (30..8.2014 to 1.11.2014)

=₹ 10,000 × 10% × 63/365 = ₹ 172.60

2nd bill — Interest will be charged on ₹ 8,000 (₹ 18,000 – 10,000) @ 10% p.a. for 124 days (30.8.2014 to 1.1.2015) = ₹ 8,000 × 10% × 124/365 = ₹ 271.78.

Therefore, the value of the two bills :

First bill — ₹ 10,000; Second bill — ₹ (8,000 + 17.60 + 271.78) = ₹ 8,444.38 or (say) ₹ **8,444**.

Application to Partnership

Average due date technique can be used for calculating interest on partners' drawings at different dates. For calculating interest the following steps should be followed:

Step 1 Calculate the average due date in the usual manner.

Step 2 Find out the difference between the average due date (as computed above) and the date of closing the books of account.

Step 3 Calculate interest by applying the following formula:

(1) Interest $= \frac{\text{Number of months}}{12} \times \text{Rate of interest} \times \text{Amount}$ (monthly basis), or

(2) Interest $= \frac{\text{Number of days}}{365} \times \text{Rate of interest} \times \text{Amount}$ (daily basis).

Illustration 11

Gavaskar and Kapil are two partners of a firm. They have drawn the following amounts from the firm in the year ending 31st March, 2015 :

Gavaskar		Kapil	
Date	₹	Date	₹
2014, 1st June	500	2014, 1st July	500
2014, 31st August	300	2014, 1st September	600
2014, 1st October	1,000	2015, 1st January	800
2015, 31st January	400	2015, 1st February	400

Interest @ 6% is charged on all drawings. Calculate interest chargeable under Average due date system (calculation to be made in months).

Solution **Calculation of Average Due Date of Gavaskar** **Base Date : 31.01.2015**

Date	Months from base date	Amount (₹)	Products
01.06.2014	(–) 8	500	(–) 4,000
31.08.2014	(–) 5	300	(–) 1,500
01.10.2014	(–) 4	1,000	(–) 4,000
31.01.2015	0	400	0
		2,200	(-) 9,500

Average due date = Base date + $\frac{-\ 9{,}500}{2{,}200}$ months = 31st January, 2015 – 4 months. = **1st October, 2014.**

Interest to be charged for 6 months (1st Oct. to 31st March) = ₹ 2,200 x 6/12 x 6/100 = ₹ **66.**

Calculation of Average Due Date of Kapil **Base Date : 31.01.2015**

Date	No. of Days from base date	Amount (₹)	Products
01.07.2014	(–) 7	500	(–) 3,500
01.09.2014	(–) 5	600	(–) 3,000
01.01.2015	(–) 1	800	(–) 800
01.02.2015	0	400	0
		2,300	(–) 7,300

Average due date = Base date + $\frac{-7{,}300}{2{,}300}$ months = 1st Feb. – 3 months (rounded-off) = **1st Nov. 2014.**

Interest to be charged from 1st Nov. 2014 to 31st March, 2015, i.e., for 5 months.
Interest = 5/12 x 6/100 x 2,300 = ₹ 57.5.

Application to Settlement of Contra Accounts

Where there are mutual dealings between two parties, the average due date technique can be applied for the settlement of accounts. For calculating the average due date, the following steps should be followed:

Receivable

Step 1 Select the first due date as the base date.

Step 2 Calculate the number of days from the base date.

Step 3 Multiply the amounts by the number of days (calculated above)

Payables

Step 1 ***Take*** the same due date (as above) ***as the base date.***

Step 2 Calculate the number of days from the base date.

Step 3 Multiply the amounts by the number of days (calculated above).

Now, add both ***amounts*** and ***products*** of Receivable and Payables. Find out the balance ***of amounts*** and ***balance of Products*** column. ***Finally*** : Divide 'the balance of the products' by 'the balance of the amounts'. The result will give the number of days which is added to the base date and thus, the average due date is found out.

Illustration 12

A draws on B the following bills for goods sold as per terms :

Bill Value (₹)	Date of Drawing	Date of Acceptance	Tenure
10,000	1.1.2014	5.1.2014	30 days after date
7,000	20.1.2014	22.1.2014	2 months after sight
3,000	7.2.2014	10.2.2014	1 month after sight

B draws on A the following bills for goods sold as per terms :

Bill Value (₹)	Date of Drawing	Date of Acceptance	Tenure
6,000	9.1.2014	10.1.2014	60 days after sight
8,000	15.1.2014	15.1.2014	1 month after date
1,000	10.2.2014	14.2.2014	30 days after sight

Calculate the average due date on which a single payment to be made or received without loss of interest on either side.

Solution **Calculation of Due Date of Bills Receivable Drawn by A**

	1st	2nd	3rd
Date of Drawings / Acceptance*	01.01.2014	22.01.2014*	10.02.2014
Period (Days / Months)	30	2	1
	31.01.2014	22.03.2014	10.03.2014
Days of grace	3	3	3
Due Date	03.02.2014	25.03.2014	13.03.2014

Calculation of Due Date of Bills Payable Accepted by A

	1st	2nd	3rd
Date of Drawings / Acceptance*	10.01.2014	15.01.2014	14.02.2014*
Period (Days / Months)	60	1	30
	11.03.2014	15.02.2014	16.03.2014
Days of grace	3	3	3
Due Date	14.03.2014	18.02.2014	19.03.2014

Bills Receivable **Calculation of Average Due Date** **Base Date : 03.02.2014**

Due Date	No. of Days from base date		Amount (₹)	Products
03.02.2014		0	10,000	0
25.03.2014	25 + 25	= 50	7,000	3,50,000
13.03.2014	25 + 13	= 38	3,000	1,14,000
			20,000	4,64,000

Bills Payable **Calculation of Average Due Date** **Base Date : 03.02.2014**

Due Date	No. of Days from base date		Amount (₹)	Products
14.03.2014	25 + 14	= 39	6,000	2,34,000
18.02.2014	18 – 3	= 15	8,000	1,20,000
19.03.2014	25 + 19	= 44	1,000	44,000
			15,000	3,98,000

Balance of Product = ₹ 4,64,000 – 3,98,000 = ₹ 66,000.

Balance of Amount= ₹ 20,000 – 15,000 = ₹ 5,000

Average due date = Base date + $\frac{66,000}{5,000}$ days = 03.02.2014 + 13 days (rounded off)= **16.02.2014.**

Illustration 13

Anil Kapoor had the following bills receivable and bills payable against Raj Kapoor. Calculate the average due date when the payment can be made or received without any loss of interest to either party.

Note: Holidays intervening in the period: 15 August, 2014, 16th August, 2014 and 6th September, 2014.

Bills Receivable			Bills Payable		
Date	Amount (₹)	Tenure (months)	Date	Amount (₹)	Tenure (months)
01.06.2014	3,000	3	29.05.2014	2,000	2
05.06.2014	2,500	3	03.06.2014	3,000	3
09.06.2014	6,000	1	10.06.2014	6,000	2
12.06.2014	10,000	2	13.06.2014	9,000	2
20.06.2014	15,000	3	27.06.2014	13,000	1

Solution **Calculation of Due Date of Bills Receivable**

	1st	2nd	3rd	4th	5th
Date of Drawing	01.06.2014	05.06.2014	09.06.2014	12.06.2014	20.06.2014
Period	3	3	1	2	3
	01.09.2014	05.09.2014	09.07.2014	12.08.2014	20.09.2014
Days of grace	3	3	3	3	3
	04.09.2014	08.09.2014	12.07.2014	15.08.2014*	23.09.2014

Calculation of Due Date of Bills Payable

	1st	2nd	3rd	4th	5th
Date of Drawing	29.05.2014	03.06.2014	10.06.2014	13.06.2014	27.06.2014
Period	2	3	2	2	1
	29.07.2014	03.09.2014	10.08.2014	13.08.2014	27.07.2014
Days of grace	3	3	3	3	3
Due Date	01.08.2014	06.09.2014	13.08.2014	16.08.2014*	30.07.2014

***Tutorial Note**: After including days of grace, if the maturity date falls on a Public Holiday, the bill is payable on the preceding Working day. Therefore, the due date of 4th B/R will be 14.8.2014; 2nd B/P will be 5.9.2014 and that of 4th B/P will be 14.8.2014.

Bills Receivable **Calculation of Average Due Date** **Base Date : 12.07.2014**

Date	Due Date	No. of Days from base date	Amount (₹)	Products
01.06.2014	04.09.2014	54	3,000	1,62,000
05.06.2014	08.09.2014	58	2,500	1,45,000
09.06.2014	12.07.2014	0	6,000	0
12.06.2014	14.08.2014	33	10,000	3,30,000
20.06.2014	23.09.2014	73	15,000	10,95,000
			36,500	17,32,000

Bills Payable — **Calculation of Average Due Date** — **Base Date : 12.07.2014**

Date	Due Date	No. of Days from base date	Amount (₹)	Products
29.05.2014	01.08.2014	20	2,000	40,000
03.06.2014	05.09.2014	55	3,000	1,65,000
10.06.2014	13.08.2014	32	6,000	1,92,000
13.06.2014	14.08.2014	33	9,000	2,97,000
27.06.2014	30.07.2014	18	13,000	2,34,000
			33,000	9,28,000

Balance of Products = ₹ 17,32,000 – ₹ 9,28,000 = ₹ 8,04,000; Balance of Amount = ₹ 36,500 – ₹ 33,000 = ₹ 3,500.

Average due date = Base date + $\frac{8,04,000}{3,500}$ days = 12.07.2014 + 230 days **= 27.02.2015.**

Calculation of Average Due Date by Sum of the Years' Digit Method

This method is adopted when the amount of bill / instalment is equal. For calculating average due date, the following steps are followed :

Step 1 Take the first date of transaction as base date.

Step 2 Calculate number of years from the base date.

Step 3 Take the total of number of years from base date column.

Step 4 Apply the following formula for calculating average due date:

$$\text{Average Due Date} = \text{Base Date} + \frac{\text{Sum of the Years' Digit}}{\text{Number of Instalments}}$$

Illustration 14

X lends ₹ 1,00,000 to Y on 1.1.2009. The loan is repayable in 5 equal annual instalments, commencing from 1.1.2010. Calculate the Average Due Date.

Solution — **Calculation of Average Due Date** — **Base Date : 01.01.2009**

Date of Payment	No. of Years from base date	Amount (₹)
01.01.2010	1	20,000
01.01.2011	2	20,000
01.01.2012	3	20,000
01.01.2013	4	20,000
01.01.2014	5	20,000
	Sum of the Years' Digit = 15	1,00,000

$\text{Average Due Date} = \text{Base Date} + \frac{\text{Sum of the Years' Digit}}{\text{Number of Instalments}} = 1.1.2009 + \frac{15}{5}$ years = 1.1.2009 + 3 years = **1.1.2012**.

Illustration 15

P lends Q on 1.1.2012. The loan is repayable in 5 half-yearly equal instalments commencing on 1.1.2013. Calculate the Average Due Date.

Solution — **Calculation of Average Due Date** — **Base Date : 01.01.2012**

Date of Payment	No. of Years from base date	Amount (₹)
01.01.2013	1	10,000
01.07.2013	1.5	10,000
01.01.2014	2	10,000
01.07.2014	2.5	10,000
01.01.2015	3	10,000
	Sum of the Years' Digit = 10	50,000

$\text{Average Due Date} = \text{Base Date} + \frac{\text{Sum of the Years' Digit}}{\text{Number of Instalments}}$

$= 1.1.2012 + \frac{10}{5}$ years = 1.1.2012 + 2 years = **01.01.2014**.

Illustration 16

₹ 20,000 is lent by A to B on 1.1.2009. The loan is repayable in 5 equal instalments commencing from 1.1.2011. Calculate the Average Due Date and interest @ 12% p.a.

Solution **Calculation of Average Due Date** **Base Date : 01.01.2009**

Date of Payment	No. of Years from base date	Amount (₹)
01.01.2011	2	4,000
01.01.2012	3	4,000
01.01.2013	4	4,000
01.01.2014	5	4,000
01.01.2015	6	4,000
	Sum of the Years' Digit = 20	20,000

$$\text{Average Due Date} = \text{Base Date} + \frac{\text{Sum of the Years' Digit}}{\text{Number of Instalments}}$$

$$= 1.1.2009 + \frac{20}{5}\text{ years } = 1.1.2009 + 4 \text{ years } = \mathbf{01.01.2013}.$$

Interest = ₹ 20,000 × 12% × 4 = ₹ **9,600**.

Account Current

An Account Current is a statement of mutual transactions between two parties for a given period of time, and includes interest payable to or receivable from the other party at an agreed rate. It takes the form of an account with some additional columns for due date, number of days, interest or interest product, and the like. All transactions are recorded according to date. It is, in fact, a copy of the Debtor's Ledger Account in the books of the creditor.

Account Current is prepared, generally, in the following situations:

1. When frequent transactions regularly take place between two parties and interest is chargeable on outstanding balance at an agreed rate.
2. When goods are sent by the consignor to the consignee for sale but the latter is to settle the account at the end of the consignment and as per the agreement the consignee is to pay interest on outstanding balance.
3. When two or more persons are in joint venture and each co-venturer is entitled to interest on their investment and no separate set of book is maintained for the joint venture.
4. When frequent transactions take place between a banker and his customers.

Parties in an Account Current

An Account Current has two parties — one who renders the account and the other to whom the account is rendered. If X renders the account to Y, then in the books of X, the heading of the account is written as 'Y in Account Current with X'.

Preparation of Account Current

There are two methods of preparing Account Current:

(a) The Forward Method; and

(b) The Backward or Epoque Method.

The Forward Method : This method can again be divided into two:

(i) preparation of Account Current with the help of interest table; and

(ii) preparation of Account Current by means of product.

(i) Preparation of Account Current with the help of Interest Table (Forward Method)

Under this method, the number of days for interest is calculated from the due date of each transaction to the date of rendering the account. The following steps are followed for preparing an Account Current.

Step 1 Write down the heading of the account. The name of the party rendering the account will appear last and to whom it is rendered will appear first. For example, if A renders account to B,then in the books of A, the heading of the account will be as follows : ***'B in Current Account with A'.***

Step 2 Rule the account in the ledger as follows:

Dr. **B in Current Account with A** **Cr.**

Date	Particulars	Due Date	Days	Interest	Amount ₹	Date	Particulars	Due Date	Days	Interest	Amount ₹

Step 3 Record each transaction in the appropriate side after determining whether the person, to whom the account is rendered, is to be debited or credited.

Step 4 Insert the due date of each transaction.

Step 5 Calculate the number of days from the due date of each transaction to the date of rendering the account and insert it in the 'Days' column.

Step 6 Calculate the interest with the help of the interest table.

Step 7 Find out the balance of the interest column and insert this balance in the 'Amount' column of the greater interest column side.

Step 8 Lastly, bring down the balance of the 'Amount' column.

The students should note the following points :

1. ***While counting the number of days, the date of the "due date" is ignored and the date upto which the accounting is prepared, is included.***
2. ***While counting the number of days for opening balances, the opening date as well as the date upto which the account is prepared, is included.***
3. ***If nothing has been mentioned, the date of transaction should be taken as the due date.***

Illustration 17

From the following particulars, prepare the Account Current to be rendered by Mrs Singh to Mr Paul as on 31st August, 2014. The interest must be calculated @10% p.a.

2014		₹	2014		₹
June 11	Goods sent to Paul	1,020	July 7	Goods sent to Paul	700
June 15	Cash received from Paul	500	Aug. 8	Cash received from Paul	1,100
June 20	Goods sent to Paul	650			

Solution

Dr. **Mr Paul in Current Account with Mrs Singh** **Cr.**

Date 2014	Particulars	Due Date	Days	Interest	₹	Date 2014	Particulars	Due Date	Days	Interest	₹
June 11	To Sales A/c	June 11	81	22.64	1,020.00	June 15	By Cash A/c	June 15	77	10.55	500.00
June 20	To Sales A/c	June 20	72	12.82	650.00	Aug. 8	By Cash A/c	Aug. 8	23	6.93	1,100.00
July 7	To Sales A/c	July 7	55	10.55	700.00	Aug. 31	By Balance of Interest (As per Contra)			28.53	
Aug. 31	To Interest A/c (As per Contra)				28.53	Aug. 31	By Balance c/d				798.53
				46.01	2,398.53					46.01	2,398.53

(ii) Preparation of Account Current by means of Products (Forward Method)

The way of preparing the Account Current, under this method, is almost similar to the above. In this method, the interest column (of the previous method) is replaced by the products column. Generally, the following steps are followed:

Step 1 Write down the heading of the account just as in the previous method.

Step 2 Rule the account in the ledger as follows:

Dr. **B in Current Account with A** **Cr.**

Date	Particulars	Due Date	Days	Products	Amount ₹	Date	Particulars	Due Date	Days	Products	Amount ₹

Step 3 Record each transaction in the appropriate side in the usual manner.

Step 4 Insert the due date of each transaction.

Step 5 Calculate the number of days from the due date of each transaction to the date of rendering the account and insert it in the "Days" column.

Step 6 Calculate the product of each transaction by multiplying the days with amount and insert it in the 'product' column.

Step 7 Find out the balance of products of the two sides.

Step 8 Calculate the interest with the help of this formula:

$$\text{Interest} = \frac{\text{Balance of products}}{365} \times \text{Rate of Interest}$$

Step 9 Insert this interest in the 'Amount' column on the side other than that on which the balance of products appears.

Step 10 Lastly, bring down the balance of the 'Amount' column.

Illustration 18

Prepare Account Current under this method by taking the information of ***Illustration 20***.

Solution

Dr. **Mr Paul in Current Account with Mrs Singh** **Cr.**
[Interest to 31st August, 2014 @ 10% p.a.]

From the following particulars make up an Account Current to be rendered by S Dasgupta to A Halder at 31st December reckoning interest @ 5% p.a.

2014		₹	2014		₹
June 30	Balance owing by A Halder	520	Sept. 1	Halder accepted Dasgupta's Bill at 3 months date	300
July 17	Goods sold to A Halder	40	Oct. 22	Goods bought from A Halder	20
Aug. 1	Cash received from A Halder	500	Nov. 12	Goods sold to A Halder	14
Aug. 19	Goods sold to A Halder	720	Dec. 14	Cash received from A Halder	50
Aug. 30	Goods sold to A Halder	50			
Sept. 1	Cash received from A Halder	400			

Solution

Dr. **A. Halder in Current Account with S. Dasgupta** **Cr.**

Date 2014	Particulars	Due Date	Days	Products	₹	Date 2014	Particulars	Due Date	Days	Products	₹
Jun 30	To Balance b/d		185	96,200	520.00	Aug. 1	By Cash A/c	Aug. 1	152	76,000	500.00
July 17	To Sales A/c	July 17	167	6,680	40.00	Sept. 1	By Cash A/c	Sept. 1	121	48,400	400.00
Aug. 19	To Sales A/c	Aug. 19	134	96,480	720.00	Sept. 1	By B/R A/c	Dec. 4	27	8,100	300.00
Aug. 30	To Sales A/c	Aug. 30	123	6,150	50.00	Oct. 22	By Purchases A/c	Oct. 22	70	1,400	20.00
Nov. 12	To Sales A/c	Nov. 12	49	686	14.00	Dec. 14	By Cash A/c	Dec. 14	17	850	50.00

Dec. 31	To Interest A/c					Dec. 31	By Balance of Product			71,446	
Aug. 31	To Interest A/c $\frac{71,446}{365} \times \frac{5}{100}$				9.79	Dec. 31	By Balance c/d				83.79
				2,06,196	1,353.79					2,06,196	1,353.79

Tutorial Notes:

(1) It is assumed that the bill was honoured on the due date. The due date of the bill should be treated as the date of payment and days to be calculated from the due date to the date of account; and

(2) While counting the number of days for opening balances, the opening date as well as the date upto which the account is prepared, is included.

Red-ink Interest

In case the due date of a bill falls after the date of closing the account, generally no interest is allowed for that. However, interest from the date of closing to such due date is written in 'Red-ink' in the appropriate side of the 'Account Current'. This interest is called Red-ink Interest. This Red-ink Interest is treated as negative interest. In actual practice, however, the product of such bill [value of bill x (due date – closing date)] is written in ordinary ink on the opposite side on which the bill is entered.

Illustration 20

Mehra owed ₹ 3,000 on 1st January, 2014 to Mr Somesh. The following are the transactions that took place between them during 2014. It is agreed between the parties that interest @ 6% p.a. is to be calculated on all transactions:

		₹
January 16	Mr Somesh sold goods to Mr Mehta	2,000
January 26	Mr Somesh purchases goods from Mr Mehta	1,500
February 10	Mr Somesh paid cash	1,500
March 13	Mr Mehta accepts a bill drawn by Somesh for 1 month	2,000

They desire to settle their accounts by one single payment on 15 March, 2014. Ascertain the amount to be paid to the nearest rupee.

Ignore days of grace.

Solution

Dr. **Mr Mehra in Current Account with Mr Somesh** **Cr.**

[Interest to 15 March, 2014 @ 6% p.a.]

Date 2014	Particulars	Due Date	Days	Products	₹	Date 2014	Particulars	Due Date	Days	Products	₹
Jan. 1	To Balance b/d		75	2,25,000	3,000.00	Jan. 29	By Purchases A/c	Jan. 29	46	69,000	1,500.00
Jan. 16	To Sales A/c	Jan. 16	59	1,18,000	2,000.00	Mar. 13	By B/R A/c	Apr. 13	—	—	2,000.00
Feb. 10	To Cash A/c	Feb. 10	34	51,000	1,500.00	Mar. 15	By Balance of Product			3,81,000

Mar. 15	To Interest A/c				62.46						
				4,50,000	6,562.46					4,50,000	6,562.46

Illustration 21

Following transactions took place between X and Y during the month of April, 2014:

		₹
April 1	Amount payable by X to Y	10,000
April 7	Received acceptance of X by Y for 2 months	5,000
April 10	Bills receivable (accepted by Y) on 7.2.2014 is honoured on this due date	10,000
April 10	X sold goods to Y (invoice dated 10.5.2014)	15,000
April 12	X received cheque from Y dated 15.5.2014	7,500
April 15	Y sold goods to X (invoice dated 15.5.2014)	6,000
April 20	X returned goods sold by Y on 15.5.2014	1,000
April 20	Bill accepted by Y is dishonoured on this due date	5,000

You are required to make out an Account Current by products method to be rendered by X to Y as on 30.4.2014, taking interest into account @ 10% p.a.

Solution

Dr. **Y in Current Account with X** **Cr.**

Date 2014	Particulars	Due Date	Days	Products	₹	Date 2014	Particulars	Due Date	Days	Products	₹
Apr. 7	To B/P A/c	Jun. 10	—	—	5,000.00	Apr. 1	By Balance b/d	—	30	3,00,000	10,000.00
Apr. 10	To Sales A/c	May 10	—	—	15,000.00	Apr. 12	By Bank A/c	May 15	—	—	7,500.00
Apr. 20	To Return Outward A/c	May 15	—	—	1,000.00	Apr. 15	By Purchases A/c	May 15	—	—	6,000.00
Apr. 20	To B/R A/c (Bill dishonoured)	Apr. 20	10	50,000	5,000.00	Apr. 30	By Red Ink Product (5,000 x 41) as per Contra	Jun. 10	41	2,05,000	—
Apr. 30	To Red Ink Product (7,500 x 15) as per Contra	May 15	15	1,12,500	—	Apr. 30	By Red Ink Product (15,000 x 10) as per Contra	May 10	10	1,50,000	—
Apr. 30	To Red Ink Product (6,000 x 15) as per Contra	May 15	15	90,000	—	Apr. 30	By Red Ink Product (100 x 15) as per Contra	May 15	15	15,000	—
Apr. 30	To Balance of Products			4,17,500	—	Apr. 30	By Interest A/c $\frac{4,17,500}{365} \times \frac{10}{100}$	—	—	—	114.38
						Apr. 30	By Balance c/d				2,385.62
				6,70,500	26,000.00					6,70,500	26,000.00

No entry is required for honoured bill on 10th April, since party is not concerned.

Epoque or Backward Method : Under this method, the number of days for interest is calculated from the date of commencement of Account Current to the due date of each transaction. In other words, the number of days are calculated from the due date of each transaction ***back*** to the starting point. The following steps are followed for preparing an Account Current.

Step 1 Write down the heading of the account in the same manner.

Step 2 Rule the account in the ledger as follows :

Dr. **B in Current Account with A** **Cr.**

Date	Particulars	Due Date	Days	Products	Amount ₹	Date	Particulars	Due Date	Days	Products	Amount ₹

Step 3 Record each transaction in the appropriate side in the usual manner.

Step 4 Insert the due date of each transaction.

Step 5 Calculate the number of days from the ***date of commencement of Account Current*** to the due date of each transaction. (If 1st January is the date of commencement of Account Current, for balance brought forward the starting point would be December, 31st).

Step 6 Calculate the product of each transaction by multiplying the days with amount and insert it in the 'Products' column.

Step 7 Determine the balance of 'Amount' column. Multiply this balance by the number of days for the whole term of the account. Insert this product in the 'Products' column of that side having ***Lesser*** 'Amount' total . ***For example —*** The total of the amount column of debit side is ₹ 600 and that of the credit side ₹ 400. Number of days for the whole term of the account is 90 days. For calculating product, multiply the balance (₹ 600 – ₹ ₹ 400) ₹ 200 by 90 which will give a product of ₹ 18,000 and insert this product in the credit side (because the credit side is having lesser 'Amount' total). ***Do not insert this balance of ₹ 200 in the 'Amount' column.***

Step 8 Find out the balance of products in the two sides.

Step 9 Calculate the interest with the help of the following formula:

$$\text{Interest} = \frac{\text{Balance of products}}{365} \times \text{rate of interest}$$

Step 10 Insert this interest in the 'Amount' column on the side on which the balance of products appear.

Step 11 Bring down the balance of the 'Amount' column.

Illustration 22

From the following particulars make up an Account Current rendered by S Dasgupta to A Halder at 31st December reckoning interest @5% p.a.

2014	Particulars	₹	2014	Particulars	₹
June 30	Balance owing by A Halder	520	Sept. 1	Halder accepted Dasgupta's Bill at 3 months date	300

Date	Particulars	Due Date	Days	Products	₹	Date	Particulars	Due Date	Days	Products	₹
2014						2014					
June 30	To Balance b/d				520.00	Aug. 1	By Cash A/c	Aug. 1	33	16,500	500.00
July 17	To Sales A/c	July 17	18	720	40.00	Sept. 1	By Cash A/c	Sept. 1	64	25,600	400.00
Aug. 19	To Sales A/c	Aug 19	51	36,720	720.00	Sept. 1	By B/R A/c	Dec. 4	158	47,400	300.00
Aug. 30	To Sales A/c	Aug 30	62	3,100	50.00	Oct. 22	By Purchases A/c	Oct. 22	115	2,300	20.00
Nov. 12	To Sales A/c	Nov 12	136	1,904	14.00	Dec. 14	By Cash A/c	Dec. 14	168	8,400	50.00
Dec. 31	To Balance of Products			71,446		Dec. 31	By Product on Balance of amount (74 x 185)		185	13,690	
Dec. 31	To Interest				9.79		By Balance c/d				83.79
				1,13,890	1,353.79					1,13,890	1,353.79

Note: (1) Epoque, 29th June 2014; and
(2) It is assumed that the bill was honoured on the due date.

Key Points

- Average due date is a mean date on which a single amount can be paid in lieu of several payments on different dates.
- If the due date falls on a day which is a public holiday, the due date shall be the preceding business day. And now, if the preceding day is also a public holiday, it will fall due on the day preceding the previous day. For example, if the due date of a bill is 26th January (Republic Day) it falls due on 25th January and if 25th January is also a public holiday, it will fall due on 24th January (provided 24th January is not a public holiday).
- If the maturity date of a bill of exchange falls on a day which is an 'emergent holiday' declared by the Government as per the Negotiable Instruments Act, 1881, the date of maturity will be next working day.
- An Account Current is a statement of mutual transactions between two parties for a given period of time, and includes interest payable to or receivable from the other party at an agreed rate. It takes the form of an account with some additional columns for due date, number of days, interest or interest product, and the like. All transactions are recorded according to date. It is, in fact, a copy of the Debtor's Ledger Account in the books of the creditor.

THEORETICAL QUESTIONS

1. What is an average due date? State the procedures of calculating it.
2. What is an Account Current? Explain the different methods of calculating interest on Account Current.
3. What is Red-ink interest? Why is it so called?
4. State two situations where average due date technique may be used.

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each statement or answer each question below :

1. If the maturity date of a bill of exchange falls on a day which is an 'emergent holiday' declared by the Government as per Negotiable Instrument Act, 1881, the date of maturity will
   A fall on preceding working day
   B fall on next working day
   C none of the above
2. If the due date falls on a day which is a public holiday, the due date shall be
   A the next working day
   B the preceding working day
   C none of the above
3. Red ink interest is
   A really not interest
   B negative interest
   C used in connection with average due date
4. Account current is prepared when frequent transactions regularly take place between two parties and interest is
   A not chargeable on outstanding balance
   B chargeable on outstanding balance @ 6% p.a.
   C chargeable on outstanding balance at an agreed rate
5. When a bill contains a direction to 'Pay three months after sight', the three months have to be counted from the
   A date of drawing the bill
   B date of accepting of the bill
   C date of discounting the bill with the bank
6. When a bill contains a direction to 'Pay three months after date', the three months have to be counted from the
   A date of drawing the bill
   B date of accepting the bill
   C date of idscounting the bill with the bank

PRACTICAL QUESTIONS

Average Due Date

1. The due dates for the payment of certain amounts are as follows :
   January 1 ₹ 400 due on February 4
   February 4 ₹ 500 due on April 7
   April 1 ₹ 800 due on May 4
   May 10 ₹ 700 due on June 13
   May 17 ₹ 1,000 due on June 20.
   Suggest a date on which the bills may be paid, without any loss of interest to either party.
2. The following purchases were made for which the due date for cash payments is as under :

on March 15	₹ 1,200	Due 18th April
on April 21	₹ 3,000	Due 24th May
on April 27	₹ 2,000	Due 30th June
on May 15	₹ 1,000	Due 18th July

   A bill is to be drawn for the total amount due on the average due date. You are required to ascertain the date.
3. Mr Radheshyam purchased goods from Hariram, the due dates for payment in cash being as follows:
   March, 15, 2014 ₹ 400 due on 18th April;
   April 27, 2014 ₹ 200 due on 30th June;
   April, 21, 2014 ₹ 300 due on 24th May;
   May 15, 2014 ₹ 250 due on 18th July.
   Hariram agreed to draw a bill for the total amount due on the average due date. Ascertain that date .

4. A owes B the following sums of money due on the dates stated :
₹ 600 due on 5th April 2014;
₹ 300 due on 20th April 2014;
₹ 1,200 due on 5th May 2014;
₹ 150 due on 26th May 2014; and
₹ 75 due on 10th June 2014.
Calculate such a date when payment may be made by A in one instalment resulting in no loss to either party.

5. Find the average due date of payment for the data given below :

Date of Acceptance	Due Date	Amount
14.1.2014	17.2.2014	2,100
30.1.2014	3.3.2014	900
6.3.2014	9.4.2014	500
9.3.2014	12.4.2014	3,000
11.4.2014	14.5.2014	2,000

6. Satyajit and Prosenjit are two partners of a firm. They have drawn the following amounts from the firm in the year ending 31st March, 2006.

Satyajit			**Prosenjit**		
Date		₹	Date		₹
2014	1st July	300	2014	1st June	500
	30th Sept.	500		1st Aug.	400
	1st Nov.	800	2015	1st Feb.	400
2015	28th Feb.	200		1st Mar.	900

Interest at 6% is charge on all drawings. Calculate interest chargeable under average due date system. (Calculation to be made in month)

7. X sold goods to Y as detailed below:

Date of Invoice	Value of goods sold	Date of Invoice	Value of goods sold
05.05.2014	₹ 3,000	26.05.2014	2,250
12.05.2014	₹ 1,500	01.06.2014	2,000
19.05.2014	₹ 3,500	03.06.2014	1,000

The payments were agreed to be made by bills payable 90 days from the respective dates of the invoice. However Y wanted to arrange for payment of all the bills to be made on a single date.
Calculate the date on which such a payment could be made without loss of interest to either party.

8. Sri Maynak has drawn the following bills of exchange on Sri Sanjay :

Bill No.	Date of Bill	Payment of bill	Amount
1	15.1.2014	3 months	35,000
2	17.2.2014	2 months	57,500
3	13.3.2014	1 month	7,500
4	19.3.2014	2 months	50,000

Find the average due date.

9. For goods sold, Nair draws the following bills on Roy who accepts the same as per terms :

Amount of the Bills (₹)	Date of Drawing	Date of Acceptance	Tenure
8,000	6.1.2015	9.1.2015	3 months after date
9,000	15.2.2015	18.2.2015	60 days
8,000	21.2.2015	21.2.2015	2 moinths
15,000	14.3.2015	17.3.2015	30 days after sight

On 18th March, 2015, it is agreed that the above bills will be withdrawn and the acceptor will pay the whole amount in one lump sum by a cheque, 15 days ahead of average due date and for this a rebate of ₹ 1,000 will be allowed.

10. A drew on B the following bills for goods sold as per terms :

Bill Value (₹)	Date of Drawing	Date of Acceptance	Tenor
10,000	1.1.2014	5.1.2014	30 days after date
7,000	20.1.2014	22.1.2014	2 months after sight
3,000	7.2.2014	10.2.2014	1 month after sight

B drew on A the following bills for goods sold as per terms :

Bill Value (₹)	Date of Drawing	Date of Acceptance	Tenor
6,000	9.1.2014	10.1.2014	60 days after sight
8,000	15.1.2014	15.1.2014	1 months after date
1,000	12.2.2014	14.2.2014	30 days after sight

Consolidate the above bills and calculate the Average Due Date on which a single payment can be made or received without loss of interest on either side.

11. Mr. Big purchased goods from Mr. Small as follows :

    ₹ 4,000 to be paid on 6th January, 2015;
    ₹ 2,000 to be paid on 3rd February, 2015;
    ₹ 3,000 to be paid on 31st March, 2015.

    He also sold goods to Mr Small as follows :

    ₹ 1,500 to be paid on 10th January, 2015;
    ₹ 2,500 to be paid on 15th February, 2015;
    ₹ 1,000 to be paid on 21st March, 2015.

    Mr. Big settled the account on 21st April, 2015.
    (a) Find out the Average Due Date.
    (b) Calculate the interest at 5% p.a. from the average due date to the date of settlement.

12. For sales made to Brijmohan from time to time, Shankar Prasad had drawn upon him trade bills payable as follows:

		₹
2014	14th May due 22nd July	6,000
	5th June due 2nd August	5,000
	15th June due 30th August	7,000
	17th June due 10th September	6,000

On 2nd July, as mutually agreed, he draws upon Brijmohan 2 bills of exchange of equal sums payable on the average due date. 15 days before the date of payment Brijmohan desired to retire one of the bills at 6% p.a. and extend the date of another by 30 days at the same rate of interest. It was agreed, subject to the condition that the discount payable on retirement would be adjusted against the interest on extended bill. The arrangement having been carried through, Shankar Prasad endorsed the second bill to Manoharlal, one of his creditors, in full discharge of his liability for ₹ 12,000. The bill was dishonoured on due date and on October 30, Brijmohan's estate finally realised 50 paise in the rupee.

Calculate the average due date and show the working of Brijmohan's Account, Bills Receivable Account and Manoharlal's Account as would appear in the books of Shankar Prasad. (Interest may be calculated on the basis of 30 days a for a month).

13. ₹ 20,000 lent by A to B on 1.1.2012. The loan is repayable in 5, two-yearly instalments commencing from 1.1.2014 — the rate of interest is 10% p.a.

    Calculate the average due date and the amount of interest, which is to be paid along with the last instalment.

Account Current

14. Make out an account current to be rendered by Murugan to Srinivasan on 30th September, 2014 in respect of the following transactions appearing in the books of Murugan :

			₹
July	1	Debit balance b/f	1,350
	5	Sold goods to Srinivasan	900
	15	Received cash from Srinivasan	1,350
Aug.	4	Sold goods to Srinivasan	1,920
	14	Received cash from Srinivasan	900
Sept.	1	Bought goods from Srinivasan	2,100
	1	Paid cash to Srinivasan	750
	12	Sold goods to Srinivasan	960
	15	Paid cash to Srinivasan	600

Interest to be taken into account @ 5% p.a. calculated to the nearest rupee according to product method.

15. The transactions that book place between Kumar and Prabhakaran during 2014 is given below :

			₹
July	1	Debit balance b/f	1,300
	5	Sold goods to Prabakaran	900
	15	Received cash from Prabakaran	1,400

Aug.	4	Prabakaran purchased goods	1,900
	15	Prabakaran remitted cash	900
Sept.	1	Bought goods from Prabakaran	2,000
	1	Paid cash to Prabakaran	700
	12	Sold goods to Prabakaran	900
	15	Prabakaran received cash	600

Prepare an account current to be rendered by Kumar to Prabakaran on 30th September, 2014. Interest is to be calculated (nearest to rupee) at 5% p.a.

16. Gopal Krishan had the following transaction with Balsubrahmaniam.

2014			₹
Jan.	1	Balance due from Balsubrahmaniam	2,000
Feb.	16	Purchased goods from him	12,000
Feb.	28	Sold goods to him	20,000
Mar.	16	Received a cheque	6,000
Apr.	20	Sold him goods (Invoiced on May 3)	20,000
June	16	Purchased goods from him (Invoiced on July 10	30,000
Sept	23	Paid him cash	6,000
Oct.	24	Accepted his bill for 3 months	10,000
Nov.	26	Received his acceptance for 2 months	16,000

You are asked to prepare an Account Current of Balsubrahmaniam completed upto December 31, 2014 as will appear in the books of Gopal Krishnan reckoning 10% interest on the balance due.

17. The following are the transactions that took place between X and Y during the period from 1st January to 30th June:

2014			₹
Jan.	1	Balance due to X	602
Jan.	17	Goods sold by X to Y	884
Feb.	16	Goods sold goods by Y to X (Invoiced April 1)	1,296
Feb.	18	Goods returned by X to Y (Out of goods purchased on Feb. 16)	112
Mar.	24	Goods sold by Y to X (Invoiced May 1)	712
Apr.	22	Bill drawn by Y on X at 3 months	300
Apr.	29	Cash paid by X to Y	500
May	17	Goods sold by X to Y (Invoiced June 1)	542
June	22	Goods sold by Y to X (Invoiced Aug. 1)	45

Draw up an Account Current upto 30th June, 2014 to be rendered by X to Y charging interest @ 5% p.a.

Non-profit Organisation

Introduction

In the previous chapters, the main emphasis was on recording and reporting for trading and manufacturing organisations which are formed for the exclusive purpose of earning a profit for the owner / stakeholders. There are, however, a large number of organisations that do not operate for the profits or gains of their individual members. These organisations are known as ***Non-profit organisations***.

A non-profit organisation is operated for the benefit of the society as a whole, rather than for the benefit of a sole proprietor or a group of partners or shareholders. In every society, some organisations or associations are found which do not have profit making as their objective. Their main objective may be social, educational, religious or charitable and they take the form of clubs, societies or charitable bodies and so on.

Many government activities fall into this category, such as hospitals, schools and colleges. Their main objective is to provide service to the members or beneficiaries. The main idea is to spend the funds of the organisation in such a way that it provides maximum benefit to the members. Nonetheless, in the long run, these forms of organisation must have sufficient surplus after meeting the expenses from the income.

These organisations have no 'owner' as such and these are managed on a voluntary basis. Many social clubs are democratically managed just like a company and the members or beneficiaries get information similar to that provided to a shareholder. But the surplus of these organisations is not distributed among its members by way of dividends as it is done in case of a company. However, we may find certain charitable institutions which are autocratic. They are managed by a small group of trustees who retain the power to appoint their own successors.

Formation of a Non-Profit Organisation

A non-profit organisation is formed when a number of like-minded people decide to formalise their association. After formation, the founder member elect / select a management comittee. They also formulate the rules and regulations for managing the organisation. These matters are formalised in a document called a '***Constitution***' or '***By-laws***'.

The Constitution of the Organisation

At the time of the drafting the constitution of the organisation, the nature of the organisation, the activities of the organisation and the requirements of its members are to be taken into consideration. Generally, the following matters are included in the constitution of the organisation :

1. Purpose of the organisation (education, sports, medical aid, etc.);
2. Qualification for membership;
3. Admission / Joining fees, annual membership subscriptions;
4. Power of different committees, meeting procedures;
5. Financial records and reports;
6. Audit of financial records;
7. Members record;
8. Cheque signing authority;
9. Dissolution procedures of the organisation;
10. Procedures for addressing grievances of the members;
11. Procedures for cancellation of membership;
12. Procedures for acquisition and disposal of fixed assets.

Composition of Management Committee

The management committee of a non-profit organisation generally comprise of the following office bearers:

(a) ***President*** : President is the chief representative of the organisation. All meetings of the organisation are held under his chairmanship.

(b) ***General Secretary*** : General secretary is responsible for correspondence and issue of notice of the meetings. He is also responsible for preparing minutes of the meeting and other administrative works.

(c) ***Treasurer*** : Treasurer is responsible for maintenance of financial records and preparation for financial statements. He also manages the finance of the organisation.

In addition to the above, additional posts are created according to the needs of the organisation. For example, the organisation may have cultural secretary, game secretary, food and beverage secretary and other such office bearers.

Characteristics of a Non-profit Organisation

(1) Entity : The entity concept can well be applied to non-profit organisations because these organisations have no owners.

(2) Service : Non-profit organisations render services to members of the public. The members may range from a limited number of citizens of a community to almost the entire population of a city, state or nation.

(3) Form : Their main objective may be social, educational, religious or charitable and they take the form of clubs, societies or charitable bodies and so on. Many government activities fall into this category such as hospitals, schools, colleges, and the like.

(4) No profit motivation : Non-profit organisations do not operate with the objective of earning a profit. Their main objectives are to provide service to the members or beneficiaries. The surplus of these organisationss is not distributed among its members.

(5) Financing : Many a time, these organisations are to depend on the donations given by members or outsiders, because revenue received from the members may not cover all their operating costs.

(6) Funds : It is quite possible that a substantial portion of the resources of a non-profit organisation are donation, the organisation must account for the resources and to spend the funds of the organisation in such a fashion that provides maximum benefit to the members.

(7) Budget : It is very important for a non-profit organisation to prepare an annual budget.

Among the characteristics of non-profit organisations that resemble those of business enterprises are the following :

(1) Governance by elected members : A non-profit organisation is governed by elected members in the same way a business corporation is governed by a board of directors.

(2) Recognition of revenue and measurement of cost expirations : Allocation of costs including depreciation and recognition of revenue to the appropriate accounting period is a common characteristic of non-profit entities and busines enterprises.

(3) Use of accrual basis of accounting : A non-profit organisation employs the same accrual basis of accounting used by a business enterprise.

Accounting Records

The extent of records kept by a non-profit organisation will depend upon the size of the organisation. All big organisations are keeping detailed record of all transactions under double entry system, normally with the help of a suitable accounting package. However, small organisations keep accounting records under single entry method where mainly cash transactions are recorded regularly. Generally, the following books of accounts are maintained :

(i) Petty Cash Book
(ii) Cash Book
(iii) Purchase Journal
(iv) Sales Journal
(v) General Journal

The functions of all the books of accounts are similar to that of a trading organisation.

Non-accounting Records

A non-profit organisation needs to maintain a range of non-accounting records. These records are almost common to all non-profit organisations. Mainly the following non-accounting records are maintained :

(i) Register of Members;
(ii) Minute Book; and
(iii) Correspondence file.

Register of Members *:* It is extremely important for a non-profit organisation to maintain accurate up-to-date records relating to its members. Nowadays all records relaing to membership are maintained in the computer. A hard copy (print out) is also maintained by the organisation. The register of members should include : the name of the member, date of joining, age of the member, category of membership, permanent address, phone number, mobile number, e-mail address, etc.

A s***pecimen of Register of Members*** is given below :

<table>
<tr><td colspan="5" align="center">Bengal Rowing Club
Register of Members</td></tr>
<tr><td colspan="4">Name : Mr P. Gupta
Address : 42, Park Street
Kolkata - 700 016
Telephone No. : 033-2343638
Mobile No. : 93-4645569
E-mail: pgupta@gmail.com</td><td>Membership No. : Ord/0159
Date of Joining : 31st March, 2013
Age Group : Senior</td></tr>
<tr><td colspan="5" align="center">Financial Details</td></tr>
<tr><td>Details</td><td>Due Date</td><td>Date Received</td><td>Amount (₹)</td><td>Receipt Number</td></tr>
<tr><td>Admission Fees</td><td>31st March, 2013</td><td>31st March, 2013</td><td>50,000</td><td>A/204</td></tr>
<tr><td>Annual Subscription</td><td>1st April, 2014</td><td>16th May, 2014</td><td>2,000</td><td>S/115</td></tr>
<tr><td>Annual Subscription</td><td>1st April, 2014</td><td>20th June, 2015</td><td>2,500</td><td>S/120</td></tr>
</table>

Minute Book : All the records of the proceedings of the meetings are maintained in the Minute Book. For a non-profit organisation, regular meeting is very common. The accurate records of these meetings are maintained by the Secretary of the organisation. It is used as an evidence in case of any disputes.

Correspondence File : This file is also maintained by the Secretary of the organisation. All important documents (e.g., constitution of the organisation) copy of the correspondences (inward and outward) are kept in this file.

Financial Statements

Non-profit organisations must prepare regularly annual accounts reflecting the financial affairs of the organisation for submitting to the members and government departments for financial grants and the like. A majority of the organisations keep their accounting records under the single entry system. They mainly maintain cash book, suppliers' ledger and members' register. Where the size of the organisation is large, the accounts are kept under complete double entry system. Whatever may be the system of accounting, these organisations prepare, at the year end, the following three key statements:

1. Receipts and Payments Account;
2. Income and Expenditure Account; and
3. Balance Sheet.

Now, we explain below the nature of the above three statements.

1. Receipts and Payments Account

A Receipts and Payments Account is a summary of the Cash Book. This is the primary report prepared by the treasurers of clubs, societies etc to present the result of the year's cash position. Since it is a cash basis of reporting, the Receipts and Payments Account gives the opening cash and bank, the receipts and payments in cash or by cheque during an accounting period and the resultant balance of cash and bank at the end of the accounting period. All the receipts and payments (whether in cash or cheque) are shown on the left-hand side, and all payments (whether in cash or cheque) are shown on the right-hand side.

Features of a Receipts and Payments Account

1. It is the summary of the cash and bank transactions; like cash book, all the receipts (capital or revenue) are debited, similarly all the payments (capital or revenue) are credited.
2. It starts with opening cash and bank balances (though sometimes they are merged) and also ends with their closing balances.
3. This account is usually not a part of the double entry system. It is the duplicate of cash book in concise form.
4. It includes all cash and bank receipts and payments, whether they are related to current, past or future periods.
5. Surplus or deficit for an accounting period cannot be ascertained from this account, since it shows only the cash position and excludes all non-cash items.
6. This account is not a Trial Balance but a 'Cash Trial'.

A specimen of a Receipts and Payments Account is given below.

(Name of the Institution/Club etc.)
Receipts & Payments Account for the year ended 31st March, 2015

Receipts		₹	Payments		₹
To Opening Balance :			By Salaries		***
Cash	***		By Rent		***
Bank	***	***	By Electricity		***
To Subscriptions :			By Purchase of Investment		***
2013-14		***	By Purchase of Furniture		***
2014-15		***	By Closing Balance :		
2015-16		***	Cash	***	
To Donation		***	Bank	***	***
To Sale of Sports Equipment		***			

2. Income and Expenditure Account

The Income and Expenditure Account is equivalent to the Profit and Loss Account of a business enterprise. It is prepared by matching the revenues against the expenses for a specified period, usually a year. Since non-profit organisations do not earn profit (or incur loss) they do not prepare Profit and Loss Account but for evaluating the financial condition of the organisation, they prepare Income and Expenditure Account at the year-end. This account shows surplus or deficit of income over expenditure.

The title 'Income and Expenditure Account' is not strictly correct as the financial report actually records expenses rather than expenditure for the period. An expense is an amount of benefit that has been used up during an accounting period. Expenditure usually means an outlay of money (the benefits of the outlay may or may not be used up during the accounting period in which the outlay occured). Nevertheless, this title is in general usage and will be employed in this chapter.

The method and technique of the preparation of an Income and Expenditure Account is similar to that which is followed in the preparation of a Profit and Loss Account of a profit-seeking concern. The main sources of revenue of these organisations are subscriptions, admission fees, donations and government or other grants. The whole of the revenue income and revenue expenditure for the period is taken into consideration, irrespective of the fact whether they have been actually received or paid or not. Just like Profit and Loss Account, all accrued incomes and outstanding expenditures are shown in this account.

All incomes are shown on the right-hand side (income side) and all expenditures are shown on the left-hand side (expenditure side). No capital expenditure or receipt is taken in the Income and Expenditure Account. If the right-hand total of this account exceeds the left-hand side total, the balance is a surplus and it is called 'Excess of Income over Expenditure'.

Conversely, if the the left-hand side total exceeds the right-hand side total, the balance is a deficit and it is called 'Excess of Expenditure over Income'.

Features of an Income and Expenditure Account

1. It is a revenue account prepared at the end of the financial period for finding out the surplus or deficit of that period.
2. It is prepared by matching expenses against the revenues of the period concerned.
3. Both cash and non cash items, such as depreciation, are taken into consideration.
4. All capital expenditures and incomes are excluded.
5. Only current year's incomes and expenses are considered.

Distinction between the Receipts and Payments Account and the Income and Expenditure Account

	Receipts and Payments Account		Income and Expenditure Account
1.	It is merely a summary of the cash transactions — which begins with the opening balances of cash and bank and ends with the closing balances of cash and bank.	1.	It is a comparable account of a profit and loss account which shows the incomes, expenses and surplus/deficit for the period.
2.	It is almost like a Real Account	2.	It is almost like a Nominal Account.
3.	It records all monies received or paid during a year, irrespective of revenue or capital nature and also relating to the past, current or following year.	3.	It records only expenses and revenues for the current year. Items of capital nature or relating to the past or future period are excluded.

4.	Here, receipts are shown on left-hand side and payments on the right-hand side.	4.	Items appearing on the Receipts and Payments Account cross over sides as they enter into Income and Expenditure Account, that is, incomes on the right-hand side and expenses on the left-hand side.
5.	The balance of this account represents closing balances of cash and bank.	5.	The balance represents either surplus or deficit for the period.
6.	This is followed by an Income and Expenditure Account.	6.	This is followed by a Balance Sheet.

Distinction between the Income and Expenditure Account and the Profit and Loss Account

	Income and Expenditure Account		Profit and Loss Account
1.	It is a revenue account prepared at the end of the accounting period for finding out the surplus or deficit of that period.	1.	It is a revenue account prepared at the end of the accounting period for measuring net profit or net loss by matching revenues and expenses according to the accounting principles.
2.	The surplus or deficit of an accounting period arises as a result of saving the income from subscriptions, small and recurring donations, profit from trading activities and from the expenses and losses incurred to render the necessary services.	2.	The net profit of an accounting period is the difference between total revenue and total expenses. Total revenue is the aggregate of gross profit, other incomes, non-trading income and abnormal gains. Likewise, total expenses combine management expenses, maintenance expenses, selling and distribution expenses, financial expenses and abnormal losses.
3.	When the organisation undertakes trading activities, a separate trading account is prepared and this is used as a subsidiary statement alongwith income and expenditure account.	3.	After preparing trading account the balance of which is transferred to the profit and loss account which is the starting point of the preparation of the profit and loss account.
4.	The surplus of an accounting period cannot be withdrawn by the members, it is added with the general fund.	4.	The net profit may be withdrawn wholly or partly by the owners.

3. Balance Sheet

The Balance Sheet of a non-profit concern is prepared on the same principles as the Balance Sheet of a profit-seeking business. It may be prepared either in the order of liquidity or in the order of permanence.

Balance Sheet of ... as at ...

Liabilities		₹	Assets	₹
Capital Fund	***		Building	***
Add: Surplus	***	***	Furniture	***
Subscriptions Received in advance		***	Sports Equipment	***
Outstanding Wages		***	Cash at Bank	***
			Cash in Hand	***
		***		***

Terminology Used in Accounts of Non-Profit Organisations

1. Capital Fund

It is an item on the Balance Sheet of a non-profit organisation representing the net investment in the organisation of its contributing members. It is nothing but the capital of non-profit organisations. It represents the surplus of assets over liabilities of the organisation. It may be made up in part by special donation or by capitalising admission fees etc. This fund is increased (or decreased) by any surplus (or deficit) on the income and expenditure account. It is also called 'General Fund' or 'Accumulated Fund'.

2. Donation
It is the amount contributed by the supporters, members and well-wishers of the organisation in the form of cash or kind. The donation may be general or special (such as donation for building, prize etc.)

3. Legacy
It is an amount or other item of value received from a deceased person under the terms of a will. When anything is personally given away by a will, it is treated as a gift in the eye of law. The gift which is made by a will, out of general fund of an estate, it is described as 'legacy'. The amount received as legacy may be big or small. A legacy may be 'demonstrative' when it is made out of a particular fund or 'specific' when a particular portion of the estate is assigned. The legacy may be for a specific purpose or just general. If it is for a specific purpose, then it should be capitalised in the name of the 'fund' for that particular purpose. Otherwise, it is directly added to capital fund.

4. Subscriptions
It is the amount paid by the members at regular intervals to keep his membership alive. Subscriptions are the normal main source of revenue of non-profit organisations. At the beginning of the accounting period all subscriptions normally become due and almost all members pay it immediately, since the organisations usually have rules which provide for members to be deleted from the membership roll if they do not pay their subscriptions within a decided period.

5. Sectional Subscriptions
It is the special subscriptions collected from the members who participate in a particular activity because of the cost involved in providing these may vary considerably.

6. Life Membership
This is a system whereby a member pays a lumpsum and then becomes a member for the whole life.

7. Honorarium
A token payment made to a person who has voluntarily undertaken a service which would normally command a fee. It is thus an expression of gratitude rather than a payment for the work done.

Sources of Income of Non-profit Organisations
1. Membership subscriptions
2. Donations
3. Life membership fees
4. 'Profits' from bar sales
5. 'Profits' from the sale of food in the club, restaurant or cafeteria
6. 'Profits' from social events, such as dinner-dance
7. Interest received on investments

Treatment of Few Items used in the Accounts of Non-profit Organisations

1. Membership Subscriptions
Annual membership subscriptions of clubs and societies are payable at the time of renewal of the membership. It should be treated as income of the period concerned after being adjusted for outstanding and advance subscriptions. In practice,outstanding subscriptions are seldom taken into consideration. It may be taken as revenue, provided there is a strong expectation that defaulting members will pay in future. (In examinations, we generally take these into consideration).

Amount to be credited to Income and Expenditure Account	16,000

Illustration 1(e)

Prepare a statement showing subscriptions received in 2014-15 as per Receipts and Payments Account. ₹

		₹
(i)	Subscriptions Income for 2014-15 as per Income and Expenditure Account	82,000
(ii)	Advance subscriptions received in 2013-14	4,000
(iii)	Subscriptions outstanding at the end of 2014-15 including ₹ 1,000 for 2013-14	9,500
(iv)	Advance subscriptions received for 2015-16	2,000
(v)	Subscriptions written-off during 2014-15	500
(vi)	Subscriptions receivable on 1.4.2014	5,000
(vii)	Subscriptions collected for 2014-15 by the Secretary but not deposited	1,000

Solution

Statement Showing Subscriptions Received in 2014-15 as per Receipts and Payments Account

Subscriptions Income for 2014-15 as per Income and Expenditure Account			82,000
Less :	Advance subscriptions received in 2013-14	4,000	
	Outstanding subscriptions (2014-15) — ₹ (9,500 – 1,000)	8,500	12,500
			69,500
Add:	Outstanding subscriptions collected in 2014-15 (Note 1)	3,500	
	Subscriptions received in advance for 2015-16	2,000	5,500
			75,000
Less:	Subscriptions collected by the Secretary but not deposited		1,000
			74,000

Working Note : (1) Subscriptions receivable at 1.4.2014 ₹ 5,000. Out of this, ₹ 500 has been written off during 2014-15 and at the end of 2014-15 subscriptions outstanding for 2013-14 was ₹ 1,000. Therefore, subscriptions collected in 2014-15 in respect of previous year is ₹ 3,500 (₹ 5,000 – ₹ 500 – ₹ 1,000).

Alternatively

Dr. **Subscriptions Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹

	(2015-16)	2,000		By Secretary A/c	1,000
				By Cash / Bank A/c (Balancing figure)	74,000
			31.3.2015	By Subscriptions Receivable A/c	
				2013-14	1,000
				2014-15	8,500
		89,000			89,000

Illustration 1(f)

The following information was obtained from the Secretary of the Crazy Jay Club : ₹

	₹
Subscriptions received in 2014-15 as per Receipts and Payments Account	89,000
Advance subscriptions received in 2013-14	5,000
Subscriptions outstanding at the end of 2014-15 (including ₹ 1,500 for 2013-14)	12,500

Advance subscriptions received for 2015-16	3,000
Subscriptions written-off during 2014-15	600
Subscriptions receivable on 1.4.2014	8,400

Prepare (i) a Statement or Account showing the Subscriptions Income for the year ended 31.3.2015 and (ii) show how the relevant items will appear in the Income and Expenditure Account for the year and in the Balance Sheet as at the end of the year.

Solution

Dr. (i) Subscriptions Account Cr.

Date	Particulars	₹	Date	Particulars	₹
1.4.2014	To Subscriptions Receivable	8,400	1.4.2014	By Subscriptions Received in Advance	5,000
31.3.2015	To Income and Expenditure A/c	95,700		By Bank A/c	89,000
31.3.2015	To Subscriptions Received in Advance	3,000		By Income and Expenditure A/c (Written-off subscriptions)	600
			31.3.2015	By Subscriptions Receivable :	
				2013-14	1,500
				2014-15	11,000
		1,07,100			1,07,100

(ii) In Income and Expenditure Account ₹ 95,700 will be shown as income and ₹ 600 will be shown as expense.
In the Balance Sheet, subscriptions receivable ₹ 12,500 (₹ 11,000 for 2014-15 and ₹ 1,500 for 2013-14) will be shown on the **assets side**.
Subscription received in advance for 2015-16 ₹ 3,000 will be shown on the **liabilities side**.

Illustration 1(g)

Anderson Club has 300 annual members. In the annual general meeting held on 31st December, 2013, it was decided to raise the subscriptions from the current ₹ 200 p.a. to ₹ 300 p.a. from the year 2014. The members who have paid in advance will be allowed subscriptions at the old rates.

Subscriptions received in advance on 31.12.2013 was ₹ 2,000 and subscriptions in arrear on 31.12.2013 was ₹ 3,000.

Subscriptions in arrear on 31.12.2013 were received during 2014 with the exception of those due from 5 members.

Subscriptions in arrear for the year 2014 are in respect of 15 members.

You are required to prepare Subscriptions Account for the year 2014 and calculate the amount of subscriptions received in cash during the year 2014.

Solution

Dr. Subscriptions Account Cr.

Date	Particulars	₹	Date	Particulars	₹
1.1.2014	To Subscriptions in Arrear A/c (15 x ₹ 200)	3,000	1.1.2014	By Subscriptions Received in Advance A/c (10 x ₹ 200)	2,000
31.12.2014	To Income and Expenditure A/c (Note 1)	89,000	?	By Cash / Bank A/c (Balancing figure)	84,500
			31.12.2014	By Subscriptions in Arrear A/c	
				2013 (5 x ₹ 200)	1,000
				2014 (15 x ₹ 300)	4,500
		92,000			92,000

Working Note : (1) Calculation of Subscriptions for the year 2014

	₹	₹
Subscriptions received at new rate ₹ 300 from 290 members (300 – 10)	87,000	
Subscriptions received at old rate ₹ 200 from 10 members who paid in advance in 2013	2,000	89,000

2. Donation

(i) Donations received from persons, firms, companies in the form of money should be added directly to the capital fund if the amount is *large and non-recurring*.

(ii) *Small and recurring* donations collected or received should be credited to Income and Expenditure Account of the period concerned.

(iii) Donations received in the form of an asset should be credited to the particular fund, for which the amount has been donated and in the absence thereof, to the Capital Fund Account.

(iv) When specific direction has been given in the rules and regulations of the organisation, it should be treated accordingly.

3. Entrance or Admission Fee

(i) Admission fee payable by a member only once, at the time of becoming a member, should be treated as capital receipts and credited to Capital Fund Account.

(ii) Where the amount is small, just to cover the expenses of admission, it should be treated as revenue receipts and credited to Income and Expenditure Account.

(iii) When a specific direction has been given in the rules and regulations of the organisation, it should be treated accordingly.

4. Life Membership Fee

(i) Amount received from life membership should be *credited to a special fund* called ***Life Membership Fund*** and an amount equal to annual subscriptions or other agreed amount is transferred every year to the Income and Expenditure Account, the balance of this fund is carried forward till it is fully exhausted. If any life member dies before the entire amount paid by him has been transferred in the above way, the balance should be transferred to the Capital Fund on the date of his death.

(ii) Alternatively, the entire amount can be credited to the Capital Fund in the year in which it is received.

There is no universal practice and a constituent treatment of such items as either revenue or capital would be acceptable.

Illustration 2(a)

A club received the following life membership fees in each of its first two years : 2013 : ₹ 15,000; 2014 : ₹ 8,000.

The club's policy is to take credit for life membership fees in equal amounts over 10 years.

Show their Life Membership Fund Account for the years 2013 and 2014. State the income from life membership fees to be shown in the Income and Expenditure Account in both the years.

Solution

Dr. **Life Membership Fund Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2013	To Income and Expenditure A/c	1,500	2013	By Bank A/c	15,000
	To Balance c/d	13,500			
		15,000			15,000
2014	To Income and Expenditure A/c (Note 1)	2,300	2014	By Balance b/d	13,500
	To Balance c/d	19,200		By Bank A/c	8,000
		21,500			21,500

Working Note : (1) The amount transferred to income and expenditure account in 2nd year is made up of :

10% of 1st year = 10% of ₹ 15,000	1,500
10% of 2nd year = 10% of ₹ 8,000	800
	2,300

Illustration 2(b)

From the following information show the Life Membership Fund Account

For many years, life membership of the Club cost ₹ 1,000 but with effect from 1.1.2014, the rate has been increased to ₹ 1,200. The life membership details on 31.12.2013 were as follows :

	Number of Members
Joined more than 19 years ago	32
Joined within the last 19 years	64
	96

The balance of Life Membership Fund as on 1st January, 2014 was ₹ 37,800.

The club's policy is to take credit for life membership fees in equal amount over 20 years, beginning with the year of enrollment. During 2014, 4 new members were enrolled and one member (who had joined in 2010) died.

Solution

In respect of 32 members, those who joined more than 19 years ago, life membership fees so received have already been exhausted. Therefore, nothing will be credited to Income and Expenditure Account.

Till 31.12.2013, life membership was ₹ 1,000. Therefore, ₹ 50 (₹ 1,000 / 20) per member is credited to Income and Expenditure Account every year.

In respect of deceased members who joined in 2010, ₹ 200 (4 years — 2010 to 2013) has already been credited to Income and Expenditure Account. The balance of ₹ 800 (₹ 1,000 – 200) is to be transferred to Capital Fund Account. The Life Membership Fund Account will be as follows :

Dr. **Life Membership Fund Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
?	To Capital Fund A/c (See Note above)	800	1.1.2014	By Balance b/d	37,800
31.12.2014	To Income and Expenditure A/c (Note 1)	3,390	?	By Cash / Bank A/c (4 x ₹ 1,200)	4,800
31.12.2014	To Balance c/d	38,410			
		42,600			42,600

Working Note :

(1) Amount to be transferred to Income and Expenditure Account in respect of Life Membership Fees

	₹	₹
(i) In respect of 63 (64 – 1) members those who joined within the last 19 years @ ₹ 50 each	3,150	
(ii) In respect of 4 new members @ ₹ 60 (₹ 1,200 / 20)	240	3,390

5. Legacy

Legacy received is directly added to Capital Fund after deducting any tax payable under the law for the time being in force.

6. Restaurant or Bar Trading

In order to calculate the restaurant or bar profit, a restaurant or bar trading account is prepared in the same way as we prepare trading accounts for trading organisations. The restaurant or bar profit is then transferred to the income and expenditure account. Likewise, a trading account can also be prepared for any subsidiary activity carried on by the organisation.

7. Other Club Activities

Other club activities can be netted off on the face of the Balance Sheet. For example, surplus from charity show can be added with the excess of income over expenditure in the Balance Sheet. Alternatively, charity show receipts should appear as an income and charity show payments as an expense in the income and expenditure account.

Fund Based and Non-Fund Based Accounting

Funds are cash or its equivalents. In accounting, the term ‘fund’ is used to include securities (money invested in income-bearing assets) which have a ready market and can be converted into cash. Funds also refer to assets for specific purposes, which are not generally available for normal business activities. In fact, a fund sets aside cash or other assets to achieve specific objectives. Non-profit organisations can be distinguished by the difference in the source of its financial resources. One type includes organisations whose financial resources are obtained from subscription dues, interest or dividends on investments, and from the sale of goods or services. Normally, such revenue is inadequate to cover the expenses of the organisations. The other type obtains a significant quantum of its resources when they solicit support and capital additions from various donors. **Support** consists primarily of contributions from individuals, other non-profit organisations, etc. to be used for current operations. ***Capital additions*** are non-expendable gifts, grants, etc. restricted by the owner or granted for a particular purpose, either for an unlimited or a limited period of time.

Accounting for capital additions is known as ***fund based accounting***, while accounting for resources from sources, other than capital additions, is known as ***non-fund based accounting***.

Under fund based accounting, in order to keep a record for the funds received or raised for a particular purpose, a capital fund account is opened. At the same time, to prevent the funds being used for other purposes, a separate fund investment account is opened to record the investments made out of those funds. The Balance Sheet shows funds on the liabilities side and funds investments on the assets side. At the end of the specified period, all investments are sold away. The proceeds are utilised for meeting that particular purpose for which the fund was created, and that fund is transferred to capital fund. It should be noted that fund based accounting has nothing to do with the preparation of income and expenditure account.

Under non-fund based accounting, all financial resources, other than capital additions, are treated as income for the current period and taken to the income and expenditure account.

Special Kinds of Funds

Non-profit organisations may also set up a fund for a special purpose. For example, a cricket club may wish to acquire an electronic score board and may set up a special fund for this purpose. It should be noted that any amount received through donation or fund raising activities for a particular purpose should be transferred directly to the fund rather than to the income and expenditure account. Similarly, all expenses relating to the special purpose should be charged to the fund rather than the income and expenditure account.

(1) Unrestricted Fund : An unrestricted fund includes all the assets of a non-profit organisation that are available for use as authorised by the managing committee, and are not restricted for specific purposes.

(2) Restricted Fund : A restricted fund is generally established by a non-profit organisation to account for assets available for current operations, but expendable only as authorised by the donor of the assets.

(3) Endowment Fund : 'Endow' means to provide permanent income for. An endowment fund is generally a non- expendable fund. A pure endowment fund is one for which the principal must be maintained indefinitely in income producing investments. Only the income can be expended.

A ***term endowment fund*** can be expended only after a specified period of time or the occurrence of an event specified by the donor. A ***quasi endowment fund*** is created by the non-profit organisation itself, rather than by an outside donor, for a specific purpose (as explained earlier).

(4) Annuity Fund : An annuity fund is established when a non-profit organisation receives assets from a donor with the stipulation that the organistaion pay specified amounts periodically to designated recipients, for a specified time period.

(5) Loan Fund : A loan fund may be established by any non-profit organisation to grant loans to the members. Loan funds, generally, are revolving, i.e., as old loans are repaid, new loans are made from receipts.

(6) Agency Fund : An agency fund is used to account for money held by a non-profit organisation as a custodian. The money is disbursed only as instructed by their owner. For example, for lending books, a club may ask for a deposit from members. The deposit is refunded to the member when he does not want to avail of this facility. An agency fund is shown as a ***liability*** than as a fund balance.

Types of Problems

1. Preparation of Income and Expenditure Account and Balance Sheet when Trial Balance and other information are given.
2. Preparation of Income and Expenditure Account and Balance Sheet when Receipts and Payments Account and other information are given.
3. Preparation of Income and Expenditure Account and Balance Sheet from incomplete records.
4. Preparation of Receipts and Payments Account, Income and Expenditure Account and Balance Sheet when ledger balances and other information are given.
5. Preparation of Receipts and Payments Account when Income and Expenditure Account, Balance Sheet and other information are given.
6. Preparation of opening and closing Balance Sheet when Receipts and Payments Account and Income and Expenditure Account are given.

1. Preparation of Income and Expenditure Account and Balance Sheet when Trial Balance and other Information are Given

The method of preparation of an Income and Expenditure Account is similar to that which is used in the preparation of a Profit and Loss Account. The following points are worth noting about the Income and Expenditure Account:

(i) All the incomes are shown on the right hand side of the account and all the expenses are shown on the left hand side of the account.

(ii) It should be carefully noted that the incomes and expenses shown are those which relate to the period for which such an account is prepared. The whole of income and expenditure for the year are taken into account, irrespective of the fact whether they have been actually received and paid respectively or not. If an income is accrued or if an expenditure is outstanding, it is to be adjusted properly in the account.

(iii) All capital income and expenditure are shown in the Balance Sheet.

(iv) If the total of the right hand side is greater than the total of the left-hand side, the balance is a surplus and is called 'Excess of Income over Expenditure'. If, on the other hand, the total of the left-hand side is greater than the total of the right-hand side, the balance is a deficit and is called 'Excess of Expenditure over Income'.

(v) The surplus is not distributed as profit among the members but it is added to the Accumulated/Capital Fund in the Balance Sheet. Similarly, the deficit is deducted from the Accumulated Fund.

Illustration 3

From the following Trial Balance of Calcutta Club prepare an Income and Expenditure Account for the year ended on 31st March, 2015 and a Balance Sheet as on that date (all figures in Rupees):

Particulars	Dr.	Cr.	Particulars	Dr.	Cr.
General Fund		30,000	Subscriptions received in advance		1,500
Cash in hand	2,000		Steward's and servant's wages	5,800	
Cash at Bank	3,000		Extension of Club house	10,000	
Sundry Debtors	2,400		Printing and stationery	1,000	
Sundry Creditors		1,500	Law charges	500	
Loan @ 15% (01.07.2014)		20,000	Annual subscriptions		30,000
Furniture and Fixture	10,000		Card and Billiard room receipts		4,000
Club house	40,000		Washing of liveries and sundries	1,600	
Stock of Cigar (01.04.2014)	500		Wines, Cards and Cigars sold		5,000
Rent	6,000		Repairs to Club house and furniture	400	
Rates, Taxes and Insurance	600		Conversion expenses	1,000	
Secretary's Honorarium	1,200		Wine Cards and Cigars purchased	4,000	
Entrance Fees	1,000		Interest on Loan	1,000	
			TOTAL	92,000	92,000

Additional Information : (i) Subscriptions for 2014-15 outstanding ₹ 2,000; (ii) Write-off depreciation @ 10% p.a. on furniture and 2% on Club house including the extention; and (iii) Stock of Cigars ₹ 400; Wine ₹ 600 on 31.03.2015.

Solution

Calcutta Club

Income and Expenditure Account for the year ended 31st March, 2015

Expenditure		₹	Income		₹
To Stock of Cigar		500	By Subscriptions	30,000	
To Wine, cards & cigars purchased		4,000	Add: Outstanding	2,000	32,000

		Wine	600	1,000
		Sundry Debtors		2,400
		Subscriptions due		2,000
		Cash at Bank		3,000
		Cash in hand		2,000
	68,400			68,400

2. Preparation of Income and Expenditure Account and Balance Sheet when Receipts and Payments Account and other Information are Given

The following steps are to be followed for preparing the Income and Expenditure Account and Balance Sheet from a given Receipts and Payments Account :

Step 1

Prepare Balance Sheet at the beginning of the period after taking into account (i) the opening balances of cash and bank as per Receipts and Payments Account, and (ii) Assets and Liabilities (supplied through additional information) at the beginning. The difference between the Assets and Liabilities represents Accumulated Fund. This Accumulated Fund is also called General Fund or Capital Fund.

Step 2

Identify, from the Payments side of the Receipts and Payments Account, the Capital Payments and Revenue Payments. Now,

(i) Post revenue payments in which no adjustments to be made directly, to the expenditure side (left hand side/debit side) of the Income and Expenditure Account.
(ii) Prepare statements or open ledger accounts in respect of revenue payments in which adjustment to be made. Post the adjusted amount to the expenditure side of the Income and Expenditure Account.
(iii) Post capital payments to appropriate assets or liabilities accounts for being incorporated in the Balance Sheet.

Step 3

Identify, from the Receipts side of the Receipts and Payments Account, the Capital Receipts and Revenue Receipts. Now,

(i) Post revenue receipts in which no adjustment is to be made, directly to the income side (right hand side/credit side) of the Income and Expenditure Account.
(ii) Prepare statement or open ledger accounts in respect of revenue receipts in which adjustment is to be made. Post the adjusted amount is to the income side of the Income and Expenditure Account.
(iii) Post capital receipts to appropriate assets and liabilities for being incorporated in the Balance Sheet.

Step 4

Analyse the additional information given and make necessary entries in the Income and Expenditure Account for depreciation on fixed assets, loss or profit on sale of assets etc.

(i) Depreciation ⟶ Post to the expenditure side of the Income and Expenditure Account.
(ii) Loss on sale of Assets ⟶ Post to the expenditure side of the Income and Expenditure Account.
(iii) Profit on sale of Assets ⟶ Post to the income side of the Income and Expenditure Account.

Step 5

Calculate surplus or deficit in the Income and Expenditure Account. (i) If the income side is greater than expenditure side, there is a 'surplus' and put it in the expenditure side as 'To Excess of Income over Expenditure'; (ii) If the expenditure side is greater than the Income side, there is a 'deficit' and put it on the

Income side as 'By Excess of Expenditure over Income'; (iii) Transfer the surplus or deficit of the Income and Expenditure Account to the Accumulated Fund Account; and (iv) Prepare Balance Sheet at the end of the period after taking into account opening balance, addition and/or, sale during the year and other adjustments like depreciation etc. in respect of the assets.

Illustration 4

Calcutta Golf Club prepared the following Receipts and Payments Account for the year ended 31.12.2014 :

Receipts	₹	Payments	₹
To Balance b/d	3,800	By Sports Equipments (purchased on 1.9.2014)	10,000
To Subscriptions :		By Tournament Expenses	4,000
2013	2,000	By Electricity	500
2014	18,500	By Printing	300
2015	900	By Salaries and Wages	3,400
To Entrance Fees (capital receipts)	800	By Expenses for Exhibition	2,100
To Interest on Investment	1,500	By Balance c/d	7,200
	27,500		27,500

Additional information : (i) Fixed assets of the club on 1.1.2014 include the following : Sports Equipment — ₹ 15,500; Club Ground—₹ 62,000; Furniture—₹ 2,000; (ii) Subscriptions for 2014 collected in 2013—₹ 500; (iii) Unpaid subscriptions for 2014—₹ 300; (iv) Depreciation to be provided @ 20% p.a. on sports equipment and @ 5% p.a. on furniture.

Prepare an Income and Expenditure Account for the year ended on 31.12.2014.

Solution

Calcutta Golf Club

Income and Expenditure Account for the year ended 31st December, 2014

Expenditure	₹	Income		₹
To Tournament Expenses	4,000	By Subscriptions	18,500	
To Electricity	500	Add: Received in 2013	500	
To Printing	300		19,000	
To Salaries and Wages	3,400	Add: Subscriptions in arrear	300	19,300
To Expenses for Exhibition	2,100	By Interest on Investment		1,500
To Depreciation on :				
Sports Equipments (Note 1)	3,767			
Furniture	100			
To Excess of Income over Expenditure	6,633			
	20,800			20,800

Working Note : (1) Depreciation on sports equipments — 20% on ₹ 15,500 for 1 year + 20% on ₹ 10,000 for 4 months = ₹ 3,100 + ₹ 667 = ₹ 3,767.

Illustration 6

A summary of receipts and payments of Medical Aid Society for the year ended 31.12.2014 is given below:

Receipts	₹	Payments	₹
To Balance (1.1.2014)	7,000	By Payment for medicines	30,000
To Subscriptions	50,000	By Honorarium to doctors	10,000
To Donations	14,500	By Salaries	27,500
To Interest on investments @ 7% p.a.	7,000	By Sundry expenses	500
To Charity show proceeds	10,000	By Equipment purchased	15,000
		By Charity show expenses	1,000
		By Balance (31.12.2014)	4,500
	88,500		88,500

Additional information (in Rupees):	1.1.2014	31.12.2014		1.1.2014	31.12.2014
Subscriptions due	500	1,000	Amount due to Medicine suppliers	8,000	12,000
Subscriptions received in advance	1,000	500	Value of equipments	21,000	30,000
Stock of medicines	10,000	15,000	Value of Buildings	40,000	38,000

You are required to prepare Income and Expenditure Account for the year ended 31st December, 2014 and the Balance Sheet as on that date.

Solution

Medical Aid Society
Income and Expenditure Account for the year ended 31st December, 2014

Expenditure	₹	Income	₹
To Medicines consumed (Note 4)	29,000	By Subscriptions (Note 2)	51,000
To Honorarium to Doctors	10,000	By Interest on investment	7,000
To Salaries	27,500	By Charity show proceeds	10,000
To Sundry Expenses	500	By Excess of Expenditure over Income	8,000
To Charity show expenses	1,000		
To Depreciation :			
On Equipment	6,000		
On Buildings	2,000		
	76,000		76,000

Balance Sheet of Medical Aid Society as at 31st December, 2014

Liabilities		₹	Assets		₹
Capital Fund :	1,69,500		Building	40,000	
Add: Donations	14,500		Less: Depreciation	2,000	38,000
	1,84,000		Equipments	21,000	
Less: Excess of Expenditure over Income	8,000	1,76,000	Add: Purchased	15,000	
Subscriptions received in advance for 2015		500		36,000	
Creditors for Medicines		12,000	Less: Depreciation (Note 7)	6,000	30,000
			Stock of medicines		15,000
			Investments		1,00,000
			Subscriptions outstanding for 2014		1,000
			Cash in hand		4,500
		1,88,500			1,88,500

Working Notes : **(1) Balance Sheet of Medical Aid Society as at 1st January 2014**

Liabilities	₹	Assets	₹
Capital Fund (balancing figure)	1,69,500	Building	40,000
Creditors for Medicines	8,000	Equipment	21,000
Subscriptions received in advance	1,000	Stock of medicines	10,000
		Subscriptions outstanding	500
		Investment (Note 5)	1,00,000
		Cash in hand	7,000
	1,78,500		1,78,500

Dr. **(2) Subscriptions Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
1.1.2014	To Outstanding subscriptions for 2013	500	1.1.2014	By Subscriptions received in advance for 2014	1,000
31.12.2014	To Income and Expenditure A/c (balancing fig.)	51,000	?	By Cash	50,000
31.12.2014	To Subscriptions received in advance in 2014	500	31.12.2014	By Outstanding subscriptions for 2007	1,000
		52,000			52,000

Dr. **(3) Creditors for Medicines Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
?	To Cash A/c (payments)	30,000	1.1.2014	By Balance b/d	8,000
31.12.2014	To Balance c/d	12,000	31.12.2014	By Purchase of medicines (balancing figure)	34,000
		42,000			42,000

(4) Medicines Consumed = Opening stock ₹ 10,000 + Purchases ₹ 34,000 – Closing stock ₹ 15,000 = ₹ 29,000

(5) Interest on investment received ₹ 7,000 in 2014 indicates that there was investments at the beginning of 2014. The rate of interest is 7%. So, the value of investment = 100/7 x ₹ 7,000 = ₹ 1,00,000

(6) Donation has been transferred to capital fund.

Dr. **(7) Equipment Account** **Cr.**

The following summary of the Cash Book has been prepared by the Treasurer of a Club:

Receipts	₹	Payments	₹
Cash in hand and at bank on April 1, 2014	4,740	Wages — Outdoor staff	13,380
Members' subscriptions	29,720	Restaurant purchases	50,400
Entrance fees	3,200	Rent — 18 months to June 30, 2015	7,500
Restaurant receipts	56,800	Rates	2,200
Games competition receipts	13,640	Secretary's salary	3,120
Due to secretary for petty expenses	80	Lighting, cleaning and sanitary services	7,700
		Competition prizes	4,000
		Printing, postage and sundries	6,000
		Placed in fixed deposits with bank	8,000
		Balance in hand and at bank on March 31, 2015	5,880
	1,08,180		1,08,180

On April 2014, the Club's assets were: Furniture and Equipment ₹ 48,000; Restaurant Stocks ₹ 2,600; Stock of Prizes ₹ 800. ₹ 5,200 was owing for supplies to the Restaurant.

On March 31, 2015 the Restaurant Stocks were ₹ 3,000 and prizes in hand were ₹ 500 while the Club owed ₹ 5,600 for Restaurant Supplies.

It was also found that Members' Subscriptions unpaid at March 31, 2015, amounted to ₹ 1,000 and that the figure of ₹ 29,720 shown in the Cash Book included ₹ 700 in respect of the previous year and ₹ 400 paid in advance for the following year.

Prepare an account showing the profit or loss made on the Restaurant and a General Income ad Expenditure Account for the year ended 31st March, 2015 together with a Balance Sheet at that date, after writing 10 per cent off on the furniture and equipment.

Solution

New Delhi Recreation Club consists of a Tennis section and a Badminton section. The Balance Sheet of the Club as on 1.1.2014 is as under :

Liabilities	₹	Assets	₹
Accumulated Fund	4,17,500	Club House	2,50,000
		Courts : Tennis (cost ₹ 1,00,000)	80,000
		Badminton (cost ₹ 50,000)	35,000
		Furniture	25,000
		Bank Deposit	10,000
		Cash and Bank	17,000
		Petty Cash	500
	4,17,500		4,17,500

The following is the Receipts and Payments Account for the year ended 31.12.2014 :

Receipts	₹	Payments	₹
To Balance b/d	17,000	By New Tennis Court	1,00,000
To Ten-year Tennis Memberships	60.000	By Annual Dinner — Expenses	10,500
To Subscriptions :		By Expenses on Tournament :	
General	25,000	Tennis	15,000
Sectional :		Badminton	4,000
Tennis	32,000	By Bank Deposits	3,000
Badminton	21,000	By General Expenses on :	
To Tournament Entry Fees :		Tennis	12,000
Tennis	20,000	Badminton	10,000
Badminton	5,000	By Rates of Club House	12,000
To Annual Dinner — Sale of Tickets	12,000	By Miscellaneous Expenses	14,000
		By Petty Cash	700
		By Balance c/d	10,800
	1,92,000		1,92,000

Additional information :

(1) In order to help pay for the new tennis court, ten-year tennis memberships were offered for sale at the beginning of 2014 at ₹ 2,000 each.

(2) It is the club's policy to write-off the cost of the tennis and badminton courts over a ten-year period.
(3) The petty cash balance on 31.12.2014 was ₹ 200. The petty cash float is used exclusively for postage.
(4) ₹ 10,000 received as donations during the year for the new coaching scholarship fund. This will be utilised for the provision of training facilities for promising young sportspersons. It is expected to make the first award during 2012. Though the amount has been invested in short-term securities, no entry has been made in the books.
(5) The balance of the Bank Deposit Account on 31.12.2014 was ₹ 14,200.
(6) Furniture is to be depreciated at 10%.

Prepare an Income and Expenditure Account for the year ended 31.12.2014 showing the net surplus or deficit arising separately from the tennis section and badminton section. Also prepare the Balance Sheet of the Club as on 31.12.2014.

Solution

From the following information, you are required to prepare an Income and Expenditure Account for the year ended 31.3.2015 and a Balance Sheet as on that date :

(i)

Dover Lane Music Society
Receipts and Payments Account for the year ended 31st March, 2015

Receipts	₹	Payments	₹
To Balance b/d	7,200	By Rent	30,000
To Members' Joining Fees	35,000	By Electricity	12,400
To Annual Subscriptions	35,500	By Salaries	21,300
To Training Fees	76,600	By Training Expenses	40,200
To Interest on Investments	600	By Purchase of Investments	15,600
		By Short-term Deposits	10,000

	₹		₹
		By Balance c/d	25,400
	1,54,900		1,54,900

(ii) On joining the society, members pay a non-returnable fee of ₹ 1,000 (before 1.4.2012, the fee had been ₹ 500). It had been found from experience that, on average, members remain in the society for five years. On this basis, one-fifth of each joining fee is credited to Income and Expenditure Account each year.

New members' statistics are :

During year ended 31st March	Number of new members (No.)	Joining fees in Suspense at 31.3.2014 (₹)
2011	20	2,000
2012	24	4,800
2013	32	19,200
2014	27	21,600
2015	35	Nil
		47,600

(iii) Annual subscriptions are due on 1st April each year. It is the society's policy to credit these to Income and Expenditure Account on an actual receipts basis, not on an accrual basis. However, if subscriptions are received in advance, the amounts are credited to Income and Expenditure Account for the year for which they are paid. Subscriptions received in advance included in the actual receipts for the year are as under :

2014-15 — ₹ 3,000; 2015-16 — ₹ 4,000.

(iv) The society has a permanent training room. Non-members can use the facilities on payment of a fee. In order to guarantee a particular facility, advance booking is allowed. Advance booking fees received before 31.3.2015 in respect of 2015-16 total ₹ 4,700. The corresponding amount paid up to 31.3.2014 in advance of 2014-15 was ₹ 3,250. Members can use the facilities free of charge.

(v) The club received interest on investments bought a number of years ago at a cost of ₹ 50,000 (current valuation ₹ 52,000). At the end of March, 2015, the club acquired further investments which cost ₹ 15,600 (current valuation ₹ 16,000) and at the same time, placed ₹ 10,000 in a short-term deposit account.

Solution

Dover Lane Music Society
Income and Expenditure Account for the year ended 31st March, 2015

Expenditure	₹	Income		₹
To Rent	30,000	By Members' Joining Fees (Note 2)		23,200
To Electricity	12,400	By Annual Subscriptions (Note 4)		34,500
To Salaries	21,300	By Training Fees (Note 5)	75,150	
To Excess of Income over Expenditure	29,550	Less: Training Expenses	40,200	34,950
		By Interest on Investments		600
	93,250			93,250

Balance Sheet of Dover Lane Music Society as on 31st March, 2015

Liabilities		₹	Assets	₹
Capital Fund :			Investments at cost (Current valuation ₹ 68,000)	65,600
Opening balance (Note 1)	3,350		Short-term Deposit	10,000
Add: Excess of Income over Expenditure	29,550	32,900	Cash and Bank	25,400
Joining Fees in Suspense (Note 3)		59,400		
Subscriptions in Advance		4,000		
Joining Fees in Advance		4,700		
		1,01,000		1,01,000

Working Notes : **(1) Balance Sheet as on 1st April, 2014**

Liabilities	₹	Assets	₹
Capital Fund (Balancing figure)	3,350	Investments	50,000
Joining Fees in Suspense	47,600	Cash and Bank	7,200
Subscriptions in Advance	3,000		
Training Fees in Advance	3,250		
	57,200		57,200

(2) Members' Joining Fees Credited to Income and Expenditure Account

Year ended	Amount Received (Number of New Members x Joining Fees)	Total ₹
31.3.2011	20 x ₹ 500	10,000
31.3.2012	24 x ₹ 500	12,000
31.3.2013	32 x ₹ 1,000	32,000
31.3.2014	27 x ₹ 1,000	27,000
31.3.2015	35 x ₹ 1,000	35,000
		1,16,000

1/5th of ₹ 1,16,000 is to be credited to Income and Expenditure Account, i.e., ₹ 1,16,000 / 5 = ₹ 23,200.

	₹
(3) Joining Fees in Suspense at 31.3.2015	₹
Joining fees in suspense at 31.3.2014	47,600

The Receipts and Payments Account for the year ended 31.12.2014 of The Gardeners' Club is as follows :

Receipts		₹	Payments	₹
To Balance b/d		87,280	By Creditors of Seeds and Fertilisers	1,64,000
To Subscriptions :	Individuals	33,700	By Cost of Visit to Research Centre	24,700
	Groups	10,000	By Purchase of Garden Equipments	73,800
To Sale of Tickets to Visit Research Centre		23,200	By Repairs to Garden Equipments	10,200
To Debtors of Seeds and Fertilisers		1,30,000	By Annual Garden Show :	
To Annual Garden Show :			Hire of marquee	36,400
	Sale of tickets	82,900	Prizes	65,000
	Competition Fees	41,000	By Cost of Printing Pamphlets	3,500
To Annual Garden Party		20,100	By Annual Garden Party Expenses	15,000
To Sales of Pamphlets		4,000	By Balance c/d	39,580
		4,32,180		4,32,180

The assets and liabilities as on 1.1.2014 and 31.12.2014 are as follows (all figures in rupees) :

Date	Garden Equipments	Stock of Pamphlets	Seeds and Fertilisers		
			Debtors	Creditors	Stock
1.1.2014	24,200	2,500	22,200	80,400	26,100
31.12.2014	89,400	2,000	42,400	54,700	39,000

Additional information :

(1) Annual subscriptions are ₹ 100 for an individual member and ₹ 250 for a group. On 31.12.2014, 4 group members had paid in advance and 15 individual members were in arrear. There were no subscriptions in advance on 31.12.2013, but 10 individual members were in arrears.

(2) Cash received from annual garden party was banked after deducting payments of ₹ 1,800 general expenses and ₹ 290 postage.

(3) The employee who had handled sales of seeds and fertilisers, had disappeared taking with him monies he had received from the debtors of seeds and fertilisers. It was not known how much he had stolen, but seeds and fertilisers were sold at a profit of $33^1/_3$ on cost price.

(4) ₹ 1,500 is yet to be received for pamphlets sold.

You are required to prepare Income and Expenditure Account for the year ended 31.12.2014 and the Balance Sheet as on that date.

Solution

The Gardeners' Club

The following information is supplied to you by the Treasurer of The Delhi Boys Club. From these details, prepare the Income and Expenditure Account for the year ended 31.12.2014, and the Balance Sheet as on that date :

(a) The club was founded five years before when a loan of ₹ 2,00,000 was obtained, free of interest, from a local authority. A club house was erected at the cost of ₹ 1,75,000 and paid for out of the Loan Account. ₹ 80,000 has now been repaid on account of the loan.

(b) Subscriptions received during 2014 totalling ₹ 56,950, made up of the following —

for 2013 ₹ 2,750; for 2014 ₹ 53,000; for 2016 ₹ 1,200.

In 2013, some subscriptions for 2015 were received in advance, amounting to ₹ 2,350. When the annual accounts for 2013 were prepared, it was estimated that 2013 subscriptions arrears amounting to ₹ 4,400 would be collected in 2014.

On 31.12.2014, it was considered that 2014 subscriptions arrears of ₹ 3,800 would be received in 2015, but the subscriptions still in arrears for 2013 should be written-off.

(c) As an alternative to paying annual subscriptions, members can at any time opt to pay a lump sum which gives them membership for life without further payment. Amounts so received are held in suspense in a Life Membership Fund Account and then credited to Income and Expenditure Account in equal instalments over 10 years; the first such transfer takes place in the year in which the lump sum is received. On 31.12.2013, the credit balance on the Life Membership Fund Account was ₹ 47,200, of which ₹ 8,500 is to be taken as income for the year ended 31.12.2014. During 2014, amount received in respect of life membership amounted to ₹ 27,000.

(d) The net profit on bar during the year was ₹ 10,500 after charging 1/2 of salaries. Purchases and sales of bar during the year amounted to ₹ 15,000 and ₹ 30,000 respectively. The stock of bar on 31.12.2014 was ₹ 8,000.

(e) During the year ended, among others, the club paid for the following —

Loan repayment ₹ 20,000; Salaries ₹ 15,000; Electricity ₹ 5,500; Cleaning ₹ 2,600;

Sundry expenses ₹ 8,200.

(f) The other assets and liabilities as on 1.1.2014 and 31.12.2014 were as follows (all figures in rupees) —

Date	Cash and Bank	Equipments	Vehicles	Furniture
1.1.2014	25,150	15,000	80,000	40,000
31.12.2014	?	12,000	65,000	36,000

Solution

The Delhi Boys' Club

Income and Expenditure Account for the year ended 31st December, 2014

Expenditure	₹	Income	₹
To Salaries (1/2 of ₹ 15,000)	7,500	By Subscriptions (Note 1)	56,800
To Electricity	5,500	By Life Membership Fund (Note 2)	11,200
To Cleaning	2,600	By Net Profit on Bar	10,500
To Sundry Expenses	8,200		
To Bad Debts (Note 1)	1,650		
To Depreciation on :			
Equipments (₹ 15,000 – 12,000)	3,000		
Vehicles (₹ 80,000 – 65,000)	15,000		
Furniture (₹ 40,000 – 36,000)	4,000		
To Excess of Income over Expenditure	31,050		
	78,500		78,500

Balance Sheet of Delhi Boys' Club as on 31st December, 2014

Liabilities	₹	Assets	₹
Capital Fund	1,55,000	Building	1,75,000
Add: Excess of Income over Expenditure	31,050	Equipments	12,000
	1,86,050	Vehicles	65,000
Life Membership Fund (Note 2)	63,000	Furniture	36,000
Loan from Local Authority (₹ 2,00,000 – 80,000)	1,20,000	Bar Stock	8,000
Subscriptions in Advance (Note 1)	3,550	Cash and Bank (Note 5)	72,800
		Subscriptions in Arrear	3,800
	3,72,600		3,72,600

Working Notes :

Dr. **(1) Subscriptions Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014			2014		
Jan. 1	To Subscriptions in Arrear	4,400	Jan. 1	By Subscriptions Received in Advance A/c	2,350
Dec. 31	To Income and Expenditure A/c (Balancing figure)	56,800	?	By Cash and Bank A/c	56,950
"	To Subscriptions Received in Advance A/c [See Note below (ii)]	3,550	Dec. 31	By Bad Debts (See Note below (i)]	1,650
			"	By Subscriptions in Arrear	3,800
		64,750			64,750

(i) Subscriptions in arrear for 2013 was ₹ 4,400, out of which only ₹ 2,750 was collected in 2014. The balance of ₹ 1,650 (₹ 4,400 – 2,750) is to be written-off as bad debts.

(ii) ₹ 2,350 was received in 2013 for 2015 and ₹ 1,200 was received in 2014 for 2016. Therefore, total amount to be carried forward to next year = ₹ (2,350 + 1,200) = ₹ 3,550.

Dr. **(2) Life Membership Fund Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014			2014

The United Club closes its accounts on calendar year basis. It runs a pantry and general services. On 1st January, 2014 on the persuasion of some members, it laid a tennis court on the understanding that half of the cost of laying the court would be met by the said members individually and that the maintenance of the court would be subsidised fully by them.

The following figures are furnished to you by the accountant of the Club for the year ended 31st December, 2014:

	₹		₹
General Fund	1,25,000	Salaries and wages	30,000
Admission fees from members	10,000	Tennis court laying expenses	4,000
Membership subscriptions	57,000	Marker's wages	1,800
Audit fees	250	Salaries of stewards, bearers and cooks	24,080
Subscriptions outstanding on 1.1.2014	3,000	Sundry creditors for pantry purchases	2,630
Pantry stock on 1.1.2014	300	Subscriptions to books and periodicals	17,060
Bank balance	1,275	Sports equipments	19,800
Cash in hand	95	Furniture & Fittings (pantry)	24,770
Pantry sales	70,000	Fixed deposits with bank	70,000
Tennis court maintenance collections	5,000	Library	8,000
Rent outstanding on 1.1.2014	1,500	Rent	21,000
Pantry purchases	40,000	Printing & Stationery	5,700

1. 2014 subscriptions in arrears are ₹ 1,400 and 2013 subscriptions received during the year are ₹ 480.
2. The monthly rent is ₹ 1,500.
3. Fixed deposits in Banks were made: ₹ 15,000 on 1st April 2014; ₹ 30,000 on 1st September, 2015 and the balance on 1st October, 2014. Interest on these deposits for the current year has not been received and is at 8% p.a.
4. Depreciation at the rate of 15% on Library, 10% on Furniture and Fittings and 30% on Sports Equipments is to be provided.
5. In connection with the inauguration of the tennis court, the club on its own brought out a souvenir. Printing expenses on this came to ₹ 1,000 and these remain unpaid on 31st December. Amounts due from the advertisers are ₹ 1,500. These figures have not been taken into account by the accountant.
6. Salaries and wages of ₹ 30,000 include salary of ₹ 9,000 to the managers of the club. Manager's salary is to be distributed between Pantry, General and Tennis court in the ratio of 3:2:1 and the rest among the departments in the ratio 5:4:1.
7. Bills of supplies of provisions to the Pantry in December 2014 amounting to ₹ 1,750 have not been paid and taken into account.
8. Pantry stock on hand on 31st December, 2014 is valued at cost of ₹ 250.
9. Subscriptions to periodicals to the extent of ₹ 3,950 have been paid in advance.

You are required to prepare the Income and Expenditure Account in columnar form for the year ended 31st December, 2014 and the Balance Sheet on that date.

Solution

Special Problems

Illustration 16

The accounting records of the Happy Tickers Sports and Social Club are in a mess. You manage to find the following information to help you prepare the accounts for the year to 31 December, 2014.

Summarised Balance Sheet as at 31.12.2013

Liabilities		₹	Assets	₹
Insurance (three months)	150		Half-share in motorised roller	600
Subscriptions — 2014	120		New sports equipment unsold	1,000
Life subscriptions	1,400	1,670	Used sports equipment at valuation	700
Accumulated fund		2,900	Rent (two months)	200
			Subscriptions — 2013	60
			Cafe stocks	800
			Cash and bank	1,210
		4,570		4,570

Receipts	₹	Payments	₹
Subscriptions — 2013	40	Rent (for 12 months)	1,200
Subscriptions — 2014	1,100	Insurance (for 18 months)	900
Subscriptions — 2015	80	To Suppliers of sports equipment	1,000
Subscriptions — Life	200	To Cafe suppliers	1,900
From sales of new sports equipment	900	Wages of Cafe Manager	2,000
From sales of used sports equipment	14	Total cost of repairing motorised roller	450
Cafe takings	4,660		
	6,994		7,450

Notes :

(1) Ownership and all expenses of the motorised roller are agreed to be shared equally with the Carefree Conveyancers Sports and Social Club which occupies a nearby site. The roller cost a total of ₹ 2,000 on January 1, 2010 and had an estimated life of 10 years.

(2) Life subscriptions are brought into income equally over 10 years, in a scheme begun in 2009. Since the scheme began the cost of ₹ 200 per person has been constant. Prior to 31 December 2013, 10 life subscriptions had been received.

(3) Four more annual subscriptions of ₹ 20 each had been promised relating to 2014, but not yet received. Annual subscriptions promised but unpaid are carried forward for a maximum of 12 months.

(4) New sports equipment is sold to members at cost plus 50%. Used equipment is sold off to members at book valuation. Half the sports equipment bought in the year (all from a cash and carry supplier) has been used within the club, and half made available for sale, new to members. The 'used equipment at valuation' figures in the 31 December 2014 Balance Sheet is to remain at ₹ 700.

(5) Closing cafe stocks are ₹ 850 and ₹ 80 is owed to suppliers at 31 December 2014.

Required : (a) Calculate profit on cafe operations and profit on sale of sports equipment; (b) Prepare statement of subscriptions income for 2014; and (c) Prepare Income and Expenditure Account for the year to 31 December, 2014 and Balance Sheet as at 31st December, 2014.

Solution

(a) Profit on Cafe Operation

Particulars	₹	₹
Cafe Takings		4,660
Opening Stock	800	
Purchases (1,900 + 80)	1,980	
	2,780	
Less: Closing stock	850	1,930
		2,730
Less : Wages of Cafe Manager		2,000
Profit		730

Profit on Sale of Sports Equipments

Particulars	₹
Sale of New Sports Equipment	900
Less: Cost of Goods sold (100 / 150 x Sales)	600
Profit	300

It should be noted that there is no profit on the sale of used sports equipment as it is sold at book valuation.

(b) Statement of Subscriptions Income for 2014

Particulars	₹
Ordinary Subscriptions — ₹ (120 + 1,100 + 20 x 4)	1,300
Life Subscriptions allocated (11 x 200 x 1/10)	220
	1,520

(c) Happy Tickers Sports and Social Club
Income and Expenditure Account for the year ended 31st December, 2014

Expenditure	₹	Income	₹
To Rent	1,200	By Subscriptions (as above)	1,520
To Insurance (900 x 12/18)	600	By Profit from Cafe Operation	730
To Subscriptions of 2013 written-off (Note 1)	20	By Profit on Sale of Sports Equipment	300
To Share of Roller Repair Expenses (450 x 1/2)	225	By Excess of Expenditure over Income	81
To Depreciation of Roller (2,000 x 10% x 1/2)	100		
To Depreciation of Used Sports Equipment (Note 2)	486		
	2,631		2,631

Balance Sheet of Happy Tickers Sports and Social Club as at 31st December, 2014

Liabilities	₹	₹	Assets	₹	₹
Accumulated Fund	2,900		Motorised Roller (Half share)	600	
Less : Deficit	81	2,819	Less: Depreciation (1/2)	100	500
Cafe Suppliers		80	New Sports Equipment Unsold (Note 4)		900
Subscriptions 2015		80	Used Sports Equipment at Valuation		700
Life Subscriptions (Note 6)		1,380	Rent paid in Advance		200
			Prepaid Insurance (Note 3)		150
			Amount due from C.C.S.C.		225
			Subscriptions for 2014 (₹ 20 x 4)		80
			Cafe Stock		850
			Cash and Bank (Note 5)		754
		4,359			4,359

Working Notes :

(1) Outstanding subscriptions is carried forward only for 12 months. Subscriptions of 2013 carried forward to 2014 is ₹ 60. In 2014, only ₹ 40 was recovered. Therefore, the balance ₹ 20 to be written off in 2014.

(2) Depreciation on Sports Equipment / **(3) Prepaid Insurance**

Particulars	₹	Particulars	₹
Opening balance	700	Total amount paid in 2014	900
Add : 1/2 of newly bought used in the Club	500	Less: Outstanding for 2013	150
	1,200		750
Less: Sold at book value	14	Less : Charged to Income and Expenditure	600
	1,186		150
Less: Value of sports equipments on 31.12.2014	700		
	486		

(4) Opening balance of unsold new sports equipment = ₹ 1,000 *plus* Purchases (1/2 of ₹ 1,000 = ₹ 500) *minus* cost of new sports equipment sold (₹ 600) = ₹ 900.

(5) Opening balance of cash and bank = ₹ 1,210 + Total receipts – ₹ 6,994 less total payments – ₹ 7,450 = ₹ 754.

(6) Opening balance of life subscriptions is ₹ 1,400. Life subscriptions received during the year is ₹ 200. The amount transferred to Income and Expenditure Account is ₹ 220. Therefore, balance at the end of the year = ₹ (1,400 + 200 – 220) = ₹ 1,380.

Illustration 17

The treasurer of the Calcutta Dancing and Rambling Club has prepared the following Receipts and Payments Account for the year ended 31st December 2014.

Receipts	₹	Payments	₹
Opening balance	1,760	Purchase of amplifier (1st July, 2014)	700
Subscriptions [Note (i)] :		Country dancing :	
Country dancing	2,410	Musicians' fees	900
Rambling	1,690	Coaching fees	820
Annual dinner ticket sales	340	Hall rent	330
Sales of hut	670	Rates for the year to 31st December, 2014	800
Country dancing festival :		Decorating	110
Admissions	940	Cleaning	160
Sales — Clothes	2,100	Annual rambling expedition	1,320
Refreshments	8,300	Annual dinner — hotel and catering	410

		Country dancing festival :	
		Prizes	170
		Adjudicator's fee	90
		Purchases — Clothes	1,800
		Refreshments	7,000
		Closing balance	3,600
	18,210		18,210

Additional information :

(a) (i) Subscriptions

	Country Dancing	Rambling
Received in 2013 for 2014	130	60
Received in 2014 for 2013	10	140
Received in 2014 for 2014	2,300	1,520
Received in 2014 for 2015	100	30
	2,410	1,690

(ii) It is not the policy of the Society to take into account subscriptions in area until they are paid.

(b) The hut which was sold during 2014 had been valued at ₹ 800 on 31st December 2013 and was used for the Society's activities until sold on 30th June 2014.

(c) Immediately after the sale of the hut, the Society rented a new hall at ₹ 330 per annum.

(d) The above receipts and payments account is a summary of the Soceity's bank account for the year ended 31st December, 2014; the opening and closing balances shown above were the balances shown in the bank statement on 31st December, 2013 and 2014 respectively.

(e) All cash is banked immediately and all payments are made by cheque.

(f) A cheque for ₹ 200 drawn by the Society on 28th December, 2014, for stationery was not paid by the bank until 4th January, 2015.

(g) The Society's assets and liabilities at 31st December, 2013 and 2014 in addition to those mentioned earlier, were as follows:

	2013	2014
Stock of goods for resale, at costs :		
Clothes	1,300	1,100
Refreshments	310	600
Sundry creditors — Annual dinner (catering)	—	70
Purchases — Clothes	600	400
Purchases — Refreshments	300	500

The Society has now instructed its treasurer to prepare an income and expenditure account for the year ended 31st December, 2014, and a Balance Sheet at that date. It is proposed to provide for depreciation on the amplifier at the rate of 20% per annum on cost, pro-rata to time.

Required : The Society's income and expenditure account for the year ended 31st December, 2014 and Balance Sheet as at that date. Comparative figures are not required.

3. Preparation of Income & Expenditure Account and Balance Sheet from Incomplete Records

Examination questions often require candidates to prepare an Income and Expenditure Account and Balance Sheet from incomplete records. Generally, a summary of bank and cash transactions is provided along with information relating to opening and closing assets and liabilities. To solve these types of problems, the following steps are followed :

Step 1 Prepare a cash book with cash and bank columns.

Step 2 Open such ledger accounts as are deemed necessary.

Step 3 Draft a proforma Income and Expenditure Account and Balance Sheet.

Step 4 Post the balances from the opening Balance Sheet into an appropriate ledger accounts, or in the appropriate place in the Income and Expenditure Account / Closing Balance Sheet.

Step 5 Post the cash book entries to the appropriate ledger accounts or draft Income and Expenditure / Balance Sheet.

Step 6 Enter the closing adjustments (outstanding accruals, depreciation) either in the appropriate ledger account or the draft final accounts, making sure that the double entry is carried out.

Step 7 Post the balancing figure of the Ledger Accounts to the Income and Expenditure Account / Balance Sheet.

Step 8 Find out the surplus or deficit of the Income and Expenditure Account and transfer it to Balance Sheet.

Illustration 18

The Comrades club makes up its account to 31st December in each year. On 31st December, 2014 the treasurer left the club premises and has not been seen since. An examination of the records showed that the books had not been written up for a considerable time, and it was decided to reconstruct the figures from 1st January 2014.

A summary of the Bank Account for the year showed the following:

Receipts	₹	Payments	₹
Balance (1.1.2014)	416	Rent & Rates	460
Bank deposits	42,610	Insurance	40
		Light & heat	156
		Bar purchases	35,067
		Telephone	59
		Cash withdrawn	5,848
		Balance as on 31.12.2014	1,396
	43,026		43,026

The following information is also obtained:

1. The barman places takings in the bank 'night safe' on his way home for crediting to the club account. The duplicate paying-in-slips total ₹ 40,612 for the year. The treasurer had no access to bar takings or stock.
2. The receipt counterfoils for members' subscriptions total ₹ 3,050 for the year.
3. A summary of expenditure for petty cash and wages was as follows:
   Glasses, crockery and maintenance—₹ 1,310; Wages—₹ 2,658; National Insurance—₹ 210; Sundry expenses—₹ 257.
4. Outstanding amounts and prepayments at 31st December, were :

	2013	2014
Rates prepaid	26	28
Rent outstanding	40	82
Electricity outstanding	24	18

5. The Bar stock on 1st January, 2014 was ₹ 3,607 and on 31st December, 2014 was ₹ 2,916. The cash in hand with the treasurer at the beginning of the year was ₹ 35.

You are required to prepare :

(i) A summary of the cash position for the year ended 31st December, 2014 indicating the amount, if any, to be claimed under the club's fidelity insurance policy;

(ii) An Income and Expenditure Account for the year 2014.

Universal Brotherhood Club does not maintain complete double entry books of account. From the following details, prepare a Receipts and Payment Account, and an Income and Expenditure Account for the year ended 31.12.2014, and a Balance Sheet as on that date (all figures in rupees) :

Date	Outstanding Subscriptions	Advance Subsriptions	Outstanding Salaries	Advance Salaries	Cash and Bank	5% Investments	Furniture	Sports Goods
1.1.2014	14,000	2,800	1,400	—	14,000	14,000	2,800	5,600
31.12.2014	19,600	5,600	700	700	?	7,000	1,400	11,200

Subscriptions for the year amount to ₹ 70,000. Salaries paid ₹ 15,400. Face value of investments was ₹ 16,800. 50% of investments was sold at 80% of face value. Interest on investments left unsold was received. ₹ 1,400 furniture was sold for ₹ 700 at the beginning of the year. Sports goods were purchased at the end of the year. Charge 20% depreciation on sports goods and 10% on furniture. Sports expenses amount ₹ 14,000. Miscellaneous expenses are ₹ 4,200 and rent amount to ₹ 8,400.

Solution **Universal Brotherhood Club**

Illustration 20

The Noida Sports Club provides the following information :

(1) The Club conducts all its transactions in cash — any surplus being paid into a Building Society Account. Interest credited to this account for the year to 31.3.2015 was ₹ 3,500.

(2) The Club has 100 members who pay an annual subscription of ₹ 50 each. However, on 31.3.2014, ten members had already paid their subscriptions for 2014-15.
On 31.3.2015, two members who had not been seen in the Club since august 2014 had not paid subscriptions for 2014-15 and it has been decided that the amount due be written-off and that their names be removed from the list of members.

(3) The Club has only two sources of income : subscriptions from members and bar sales. A profit margin of 30% of selling price is normally applied to determine bar selling prices but during the year ₹ 3,970 of goods were sold at cost.

(4) A summary of the payments for the year is as follows (all figures in rupees) :

Purchase of Equipments	1,000	Rental of Premises	10,000
Lighting	2,620	Club Match Expenses	6,750
Repairs to Equipments	1,760	Trophies (treated as an expense)	4,240
Bar Creditors	74,550	Refreshments for Visiting Teams	2,350

(5) The Club has the following other assets and liabilities (all figures in rupees) :

Date	Equipments	Building Society Account	Bar Stock	Bar Creditors
1.4.2014	40,000	46,000	8,400	6,300
31.3.2015	?	?	9,200	4,700

(6) Equipments are depreciated at 10% of the value of equipments held on 31st March each year.

You are required to prepare : (a) A Bar Trading Account for the year ended 31.3.2015; (b) A Receipts and Payments Account for the year ended 31.3.2015; (c) An Income and Expenditure Account for the year ended 31.3.2015; and (d) A Balance Sheet as at 31.3.2015.

Solution

The Noida Sports Club

Bar Trading Account for the year ended 31st March, 2015

Dr. Particulars	₹	Particulars	₹ Cr.
To Opening Stock	8,400	By Sales (Note 2)	1,01,370
To Purchases (Note 1)	72,950	By Closing Stock	9,200
To Profit on Bar	29,220		
	1,10,570		1,10,570

Receipts and Payments Account for the year ended 31st March, 2015

Receipts	₹	Payments	₹
To Subscriptions (Note 3)	4,400	By Purchase of Equipments	1,000
To Bar Sales	1,01,370	By Lighting	2,620
		By Repairs to Equipments	1,760
		By Bar Creditors	74,550
		By Rental of Premises	10,000
		By Club Match Expenses	6,750
		By Trophies	4,240
		By Refreshment for Visiting Teams	2,350
		By Deposit to Building Society Account (Balancing figure)	2,500
	1,05,770		1,05,770

Income and Expenditure Account for the year ended 31st March, 2015

Expenses	₹	Income	₹
To Lighting	2,620	By Subscriptions (98 x ₹ 50)	4,900
To Repairs to Equipments	1,760	By Profit on Bar	29,220
To Rental of Premises	10,000	By Interest on Building Society Account	3,500
To Club Match Expenses	6,750		
To Trophies	4,240		
To Refreshment for Visiting Teams	2,350		
To Depreciation on Equipments [10% on ₹ (40,000 + 1,000)]	4,100		
To Excess of Income over Expenditure	5,800		
	37,620		37,620

Balance Sheet of Noida Sports Club as on 31st March, 2015

Liabilities		₹	Assets		₹
Capital Fund :			Equipments	40,000	
Opening balance (Note 4)	87,600		Add: Purchases	1,000	
Add: Excess of Income over Expenditure	5,800	93,400		41,000	
Bar Creditors		4,700	Less: Depreciation	4,100	36,900
			Bar Stock		9,200
			Building Society Account :		
			Opening balance	46,000	
			Add: Further deposit	2,500	
			Interest credited	3,500	52,000
		98,100			98,100

Working Notes :

(1) Bar Creditors Account

Dr. Particulars	₹	Particulars	₹ Cr.
To Cash	74,550	By Balance b/d	6,300
To Balance c/d	4,700	By Bar Purchases (Balancing figure)	72,950
	79,250		79,250

(2) Calculation of Bar Sales

Cost of goods sold = Opening stock + Purchases – Closing stock

= ₹ (8,400 + 72,950 – 9,200) = ₹ 72,150

Out of ₹ 72,150, goods costing ₹ 3,970 were sold at cost.

Therefore, sales are :

	₹
at cost	3,970
at 30% margin — ₹ (72,150 – 3,970) / 70%	97,400
	1,01,370

(3) Calculation of Subscriptions Received in Cash

Subscriptions from 98 (100 – 2) members @ ₹ 50 each	4,900
Less: Received in advance in the previous year (10 × ₹ 50)	500
	4,400

(4) Balance Sheet as on 1st April, 2014

Liabilities	₹	Assets	₹
Capital Fund (Balancing figure)	87,600	Equipments	40,000
Bar Creditors	6,300	Bar Stock	8,400
Subscriptions in Advance (10 x ₹ 50)	500	Building Society Account	46,000
	94,400		94,400

4. Preparation of Receipts and Payments Account, Income and Expenditure Account and Balance Sheet when Ledger Balances and other Information are Given

A Receipts and Payments Account is a summary of the Cash Book. Therefore, as in the Cash Book, receipts are shown on the debit side, that is, left-hand side and payments on the credit side, that is, right-hand side. The following points are worth noting about the preparation of a Receipts and Payments Account:

(i) Any opening balance of Cash and Bank are shown first on the receipts side separately.

(ii) It includes all receipts and payments whether they are of revenue or capital nature.

(iii) It does not exclude receipts and payments relating to preceding years or the subsequent years. For example, if a member pays his subscriptions in advance for the coming year, it is shown on the receipts (debit) side.

(iv) It excludes outstanding expenses of the period.

(v) Closing balance represents cash-in-hand and at Bank at the end of the period.

However, Income and Expenditure Account and Balance Sheet are prepared in the usual manner.

Illustration 21

From the following information, prepare a Receipts and Payments Accounts for the year ended 31st December, 2014.

Receipts:

Donation for Building ₹ 60,000; Sale of old news papers ₹ 500; Fees for coaching ₹ 2,000; Sundries ₹ 200; Subscriptions realised for 2013 ₹ 4,000; Subscriptions for 2014 ₹ 25,000; Subscriptions for 2015 ₹ 600.

Payments:

Salaries ₹ 6,000; Repairs ₹ 1,000; Newspaper ₹ 1,000; Printing and Stationery ₹ 500; Rates and Taxes ₹ 1,000; Electricity ₹ 400; Sundries ₹ 200; Construction of Building ₹ 50,000.

Cash-in-Hand:

1st January ₹ 1,000; 31st December 2014 ₹ 33,200.

Other Information:

(i) Subscriptions to be realised for 2014 ₹ 1,200; (ii) Outstanding Expenses: Repairs ₹ 100; Printing ₹ 400.

Solution **Receipts & Payments Account for the year ended 31st December, 2014**

Receipts	₹	Payments	₹
To Balance b/f	1,000	By Salaries	6,000
To Donation for building	60,000	By Repairs	1,000
To Sale of old newspaper	500	By Newspaper	1,000
To Fees for coaching	2,000	By Printing & Stationery	500
To Sundries	200	By Rates & Taxes	1,000
To Subscriptions :		By Electricity	400
2013	4,000	By Sundries	200
2014	25,000	By Construction of building	50,000
2015	600	By Balance c/d	33,200
	93,300		93,300

Illustration 22

The following balances are obtained from the books of Kanpur Cricket Club as on 31.3.2014 and 31.3.2015 (all figures in rupees):

Particulars	31.3.2014	31.3.2015	Particulars	31.3.2014	31.3.2015
Buildings	80,000	85,500	Outstanding Expenses	3,000	1,200
Furniture	40,000	30,600	Sports Equipments	24,000	21,600
Advance Subscriptions	1,500	1,000	Investments	—	12,000
Arrears of Subscriptions	3,000	5,000	Books	15,000	16,200
Prepaid Expenses	800	1,000	Cash	16,000	17,100

Consider the following information relevant to the year 2014-15 :

(i) Depreciation provided for the year : Building—₹ 4,500; Furniture—₹ 3,400; Sports equipments—₹ 5,400; Books—₹ 1,800.

(ii) Some old furniture standing in the books for ₹ 6,000 as on 1.4.2014 was sold for ₹ 4,000 on the same date.

(iii) The Club had 300 members on 31.3.2015 as per the Register of Members. No fresh members were admitted during the year but 10 members left the Club on 1.10.2014.

(iv) Subscriptions payable—₹ 15 per month.

(v) Donation received ₹ 5,000 has been capitalised.

(vi) Considerable expenses were paid during the year.

You are required to prepare Receipts and Payments Accounts and Income and Expenditure Account for the year ended 31.3.2015 and the Balance Sheet as on that date.

Solution

Kanpur Cricket Club

Receipts and Payments Account for the year ended 31st March, 2015

Receipts	₹	Payments	₹
To Balance b/d — Cash	16,000	By Investment (Note 2)	12,000
To Subscriptions (Note 1)	52,400	By Buildings (Note 3)	10,000
To Sale of Furniture	4,000	By Sports Equipments (Note 4)	3,000
To Donation	5,000	By Books (Note 5)	3,000
		By Expenses (Balancing figure)	32,300
		By Balance c/d — Cash	17,100
	77,400		77,400

Income and Expenditure Account for the year ended 31st March, 2015

Expenditure	₹	Income	₹
To Expenses (Note 6)	30,300	By Subscriptions (Note 1)	54,900
To Depreciation on :			
Building	4,500		
Furniture	3,400		
Sports Equipments	5,400		
Books	1,800		
To Loss on Sale of Furniture : ₹ (6,000 – 4,000)	2,000		
To Excess of Income over Expenditure	7,500		
	54,900		54,900

Balance Sheet of Kanpur Cricket Club as at 31st March, 2015

Liabilities		₹	Assets	₹
Capital fund :			Buildings	85,500
Opening balance (Note 7)	1,74,300		Furniture	30,600
Add: Surplus	7,500		Sports Equipments	21,600
Donation	5,000	1,86,800	Books	16,200
Advance Subscriptions		1,000	Investments	12,000
Outstanding Expenses		1,200	Arrears of Subscriptions	5,000
			Prepaid Expenses	1,000
			Cash	17,100
		1,89,000		1,89,000

Working Notes : (1) Calculation of Subscriptions due and received : There are 300 members as on 31.3.2015 and 10 members left the club on 1.10.2014. Therefore, the number of members at the beginning of the year were 300 + 10 = 310.

Total subscriptions for the year 2014-15 are as under :	₹	
300 members @ 15 per month for the whole year = 300 x ₹ 15 x 12	= 54,000	
10 members @ 15 per month for 6 months = 10 x ₹ 15 x 6	= 900	₹ 54,900

Subscriptions received can be ascertained by preparing the Subscriptions Account as under :

Dr. **Subscriptions Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Arrears of subscriptions (opening balance)	3,000		By Advance Subscriptions (opening balance)	1,500

	1,78,800		1,78,800

5. Preparation of Receipts and Payments Account when Income and Expenditure Account, Balance Sheet and other Information are Given

The following steps are to be followed for preparing a Receipts and Payments Account:

Step 1 Draw up a proforma of Receipts and Payments Account. Opening Balance of Cash and Bank are to be written first on the receipts side separately. If no information regarding opening balance of Cash and Bank has been given, leave space for that.

Step 2 Analyse the figure given in the expenditure side of the Income and Expenditure Account. Now,

(i) Post those items of expenditure in which no adjustment to be made, directly to the payments side of the Receipts and Payments Account.

(ii) Prepare statement or open ledger accounts in respect of items of expenditure in which adjustment to be made. Post the adjusted amount to the payments side of the Receipts and Payments Account.

Step3 Analyse the given information and Balance Sheet and post capital expenditure (involving outflow of Cash and/or Bank) to the payments side of the Receipts and Payments Account.

Step4 Analyse the figures given in the income side of the Income and Expenditure Account. Now,

(i) Post those items of income in which no adjustment to be made, directly to the receipts side of the Receipts and Payments Account.

(ii) Prepare statement or open ledger accounts in respect of items of income in which adjustment to be made. Post the adjusted amount to the receipts side of the Receipts and Payments Account.

Step 5 Analyse the given information and Balance Sheet and post capital receipts, if any, to the receipts side of the Receipts and Payments Account.

Step 6 Now, balance the Receipts and Payments Account. The closing balance will represent balance of cash and bank at the end of the period.

In this respect the following points are important:
(i) If both the opening and closing balances of Cash and Bank are given, both payments side and receipts side of the Receipts and Payments Account will be equal.
(ii) If only the opening balances of Cash and Bank have been given, the balance will represent closing balances of Cash and Bank.
(iii) If only the closing balances of Cash and Bank have been given, the balancing figure will represent opening Cash and Bank.

Illustration 23

Prepare a Receipts and Payments Account of Woodburn Club for the year ended 31.12.2014.

Income & Expenditure Account for the year ended 31.12.2014

Expenditure	₹	Income	₹
To Salaries	700	By Donations	420
To General expenses	200	By Subscriptions	800
To Depreciation of assets	120		
To Surplus for the year	200		
	1,220		1,220

Adjustments were also to be made for the following items: Subscriptions for 2013 outstanding on 1.1.2014, ₹ 80 but ₹ 72 only of this amount were realised in 2014. Subscriptions received in advance on 31.12.2013 were ₹ 20 and 31.12.2014 were ₹ 16. Subscriptions for 2014 outstanding at 31.12.2014 were ₹ 28. Sundry Assets on 1.1.2014 were ₹ 1,040. Sundry Assets (after depreciation) were ₹ 1,080 on 31.12.2014. Cash in hand on 31.12.2014 was ₹ 264.

Solution

Woodburn Club
Receipts & Payments Account for the year ended 31st December, 2014

Receipts	₹	Payments	₹
To Balance b/f (balancing figure)	64	By Salaries	700
To Donations	420	By General expenses	200
To Subscriptions (Note 1)	840	By Purchase of assets (Note 2)	160
		By Balance c/d	264
	1,324		1,324

Working Notes :

(1) Subscriptions	₹	**(2) Purchase of Assets**	₹
As per Income & Expenditure A/c	800	Closing balance of Sundry assets	1,080
Add: Subscriptions for 2013 realised in 2014	72	Add: Depreciation	120
Add: Subscriptions for 2015 received in advance in 2014	16		1,200
	888	Less: Opening balance	1,040
Less: Subscriptions for 2014 received in advance in 2013	20		160
	868		
Less: Subscriptions for 2014 outstanding	28		
	840		

Illustration 24

From the following Income and Expenditure Account and the Balance Sheet of a club, prepare its Receipts and Payments Account and Subscriptions Account for the year ended 31.3.2015.

Income and Expenditure Account for the year ended 31st March, 2015

Expenditure	₹	Income	₹
To Upkeep of ground	10,000	By Subscriptions	17,320
To Printing	1,000	By Sale of newspapers (old)	260
To Salaries	11,000	By Lectures	1,500
To Depreciation on furniture	1,000	By Entrance fees	1,300
To Rent	600	By Miscellaneous income	400
		By Deficit	2,820
	23,600		23,600

Balance Sheet as at 31st March, 2015

Liabilities		₹	Assets	₹
Subscriptions in advance (2015-16)		100	Furniture	9,000
Prize fund :			Ground and building	47,000
Opening balance	25,000		Prizes fund investment	20,000
Add: Interest	1,000		Cash in hand	2,300
	26,000		Subscriptions (2014-15)	700
Less: Prizes	2,000	24,000		
General fund :				
Opening balance	56,420			
Less: Deficit	2,820			
	53,600			
Add: Entrance fees	1,300	54,900		
		79,000		79,000

The following adjustments have been made in the above accounts:

1. Upkeep of ground ₹ 600 and Printing ₹ 240 relating to 2013-14 were paid in 2014-15.
2. One-half of entrance fee has been capitalised by transfer to General fund.
3. Subscriptions outstanding in 2013-14 was ₹ 800 and for 2014-15 was ₹ 700.
4. Subscriptions received in advance in 2013-14 was ₹ 200 and in 2014 for 2015-16 was ₹ 100.

Solution **Receipts & Payments Account for the year ended 31st March, 2015**

Receipts	₹	Payments	₹
To Balance b/f (balancing figure)	4,660	By Upkeep of ground (Note 3)	10,600
To Subscriptions (Note 1)	17,320	By Printing (Note 4)	1,240

To Membership Fees :	2013-14	300		By Balance c/d	1,374
	2014-15	1,150			
	2015-16	390	1,840		
To Miscellaneous Income			130		
			4,190		4,190

Income and Expenditure Account (2014-15)

Expenditure	₹	Income	₹
To Printing Charges	80	By Tuition Fees	1,100
To Advertisement	150	By Membership Fees	1,150
To Rent	600	By Miscellaneous Income	130
To Salary to Staff	1,200	By Interest	160
To Miscellaneous Expenses	110		
To Excess of Income over Expenditure	400		
	2,540		2,540

You are asked to prepare the Balance Sheets of the Society as on 31.3.2014 and 31.3.2015.

Additional information :

The Society had the following assets on 31.3.2014 :

Investments ₹ 4,000; Furniture ₹ 2,000; Library Books ₹ 1,500.

Solution **Balance Sheet of Adult Education Society as at 31st March, 2014**

Liabilities	₹	Assets	₹
Capital fund (Balancing figure)	8,250	Furniture	2,000
Outstanding Salaries : ₹ (1,300 – 1,200)	100	Investments	4,000
		Library Books	1,500
		Membership Fees Receivable (2013-14)	300
		Interest Receivable	100
		Bank	450
	8,350		8,350

Balance Sheet of Adult Education Society as at 31st March, 2015

Liabilities		₹	Assets	₹
Capital fund :			Furniture — ₹ (2,000 + 670)	2,670
Opening Balance	8,250		Investments	4,000
Add : Surplus	400		Library Books	1,500
Entrance fees	420	9,070	Tuition Fees Receivable : ₹ (1,100 – 1,000)	100
Tuition Fees received in Advance		100	Interest Receivable : ₹ (160 – 150)	10
Membership Fees Received in Advance		390	Bank	1,374

Printing charges : ₹ (80 – 75)		5		
Advertisement : ₹ (150 – 141)		9		
Rent : ₹ (600 – 520)		80		
		9,654		9,654

Illustration 27

The following are the items of receipts and payments of the All India Sports Club summarized from the books of account maintained by the secretary:

Receipts	₹	Payments	₹
Opening balance (1.1.2014)	4,200	Manager's salary	1,000
Entrance fees (2013)	1,000	Printing & stationery	2,600
Entrance fees (2014)	10,000	Advertising	1,200
Subscriptions (2013)	600	Fire Insurance	1,800
Subscriptions (2014)	15,000	Investments purchased	20,000
Interest received on investments	3,000	Closing balance (31.12.2014)	7,600
Subscriptions (2015)	400		
	34,200		34,200

It was ascertained from enquiry that the following represented a fair picture of the income and expenditure of the club for the year 2014 for audit purposes :

Expenditure		₹	Income	₹
Manager's salary		1,500	Entrance fees	10,500
Printing & stationery	2,000		Subscriptions	15,600
Add: Outstanding	400	2,400	Interest on investments	4,000
Advertising		1,600		
Audit fees		500		
Fire insurance		1,000		
Depreciation		4,940		
Excess of income over expenditure		18,160		
		30,100		30,100

You are required to prepare the Balance Sheets of the club as on 1.1.2014 and 31.12.2014, it being given that the book values of the fixed assets as on 1.1.2014 were Building ₹ 44,000, Cricket Equipment ₹ 25,000 and Furniture ₹ 4,000. The rates of depreciation on Building 5%, Cricket Equipment 10%, Furniture 6%.

Solution **Balance Sheet of All India Sports Club as at 1st January, 2014**

Liabilities	₹	Assets	₹
Capital fund (balancing figure)	78,000	Building	44,000
Outstanding expenses:		Furniture	4,000
Advertisement (₹ 1,800 – ₹ 1,600)	200	Cricket equipment	25,000
Printing and stationery (₹ 2,600 – ₹ 2,000)	600	Entrance fees outstanding (2013)	1,000
		Subscriptions outstanding (2014)	600
		Cash in hand	4,200
	78,800		78,800

Balance Sheet of All India Sports Club as at 31st December, 2014

Liabilities	₹	₹	Assets	₹	₹
Capital fund			Building	44,000	
Opening balance	78,000		Less: Depreciation @ 5%	2,200	41,800
Add: Excess of income over expenditure	18,160	96,160	Furniture	4,000	
Subscriptions received in advance		400	Less: Depreciation @ 6%	240	3,760
Outstanding expenses :			Cricket equipment	25,000

	500		500

Illustration 28

The Secretary of The Systematic Club has prepared the following draft Balance Sheet of the Club as on 30.9.2015 :

Liabilities		₹	Assets		₹
Capital Account :			Fixtures and Fittings :		
Balance as on 30.9.2015	14,300		As on 30.9.2015	10,600	
Less : Loss for the year	2,100	12,200	Less: Depreciation for the year	1,000	9,600
Subscriptions in Advance		600	Stock		3,200
Creditors		2,400	Debtors		1,400
			Balance at Bank		950
			Cash in Hand		50
		15,200			15,200

You ascertain the following :

(1) The amount of loss was only a balancing figure as the books had been kept on a single entry basis.

(2) The balance at bank was that shown by the bank statement at the close of the business on 30.9.2015.

(3) The following amounts had been paid into bank on 30.9.2015 but had not been credited by the bank :

(i) Two cheques of ₹ 50 each had been cashed for a member—one had since been duly honoured but the other had been returned marked 'refer to drawer' and, on being approached, the member repaid ₹ 50 in cash.

(ii) A member's subscriptions of ₹ 80 for the year 2015-16.

(4) The following cheques had been drawn in September but has not been presented until October :
(i) ₹ 480 for bar supplies which had been delivered but had not been included in stock;
(ii) ₹ 350 for additional typewriter received on October 2;
(iii) ₹ 100 as bonus of the professional included under the creditors;
(iv) ₹ 140 for fuel which had been included in the stock figure but not in the creditors and this cheque was dated October 1, 2015.

You are required to prepare :

(a) a bank reconciliation statement as on 30.9.2015; and (b) a revised Balance Sheet as on the date to give effect to the consequential adjustments, assuming that otherwise the items in the draft Balance Sheet were correct.

Solution **(a) Bank Reconciliation Statement of The Systematic Club as on 30th September, 2015**

Bank balance as per Bank Statement			950
Add :	Cheque dishonoured but not entered in the Cash Book	50	
	Cheque deposited but not credited	80	130
			1,080
Less:	Cheques issued but not presented for payment :		
	Bar supplies	480	
	Advance for office equipment	350	
	Bonus of the professional	100	
	Fuel (Note 1)	—	930
Bank Balance as per Cash Book			150

(b) Balance Sheet of The Systematic Club as at 30th September, 2015

Liabilities		₹	Assets		₹
Capital Fund :			Furniture and Fittings	10,600	
Opening balance	14,300		Less: Depreciation	1,000	9,600
Less: Excess of Expenditure over Income (Balancing figure)	2,140	12,160	Stock : ₹ (3,200 + 480)		3,680
			Debtors		1,400
Subscriptions in Advance ₹ (600 + 80)		680	Advance for Office Equipment (Note 2)		350
Creditors (Note 3)		2,440	Bank		150
			Cash : ₹ (50 + 50)		100
		15,280			15,280

Working Notes :

(1) No adjustment is required for ₹ 140 for fuel since the cheque was dated October 1.

(2) Since the typewriter was not received before 30.9.2015, it should be shown as an advance for office equipment in the Balance Sheet on 30.9.2015.

(3) Ascertainment of correct balance of creditors.

Dr. **Creditors Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Bonus of Professional (cancelled)	100		By Balance c/d	2,400
	To Balance c/d	2,440		By Fuel (previously not recorded)	140
		2,540			2,540

Key Points

- A non-profit organisation is operated for the benefit of the society as a whole, rather than for the benefit of a sole proprietor or a group of partners or shareholders.
- A non-profit organisation is formed when a number of like-minded people decide to formalise their association.
- A Receipts and Payments Account is a summary of the Cash Book. This is the primary report prepared by the treasurers of clubs, societies etc to present the result of the year's cash position.
- The Income and Expenditure Account is equivalent to the Profit and Loss Account of a business enterprise. It is prepared by matching the revenues against the expenses for a specified period, usually a year.
- Amount received from life membership should be *credited to a special fund* called ***Life Membership Fund*** and an amount equal to annual subscriptions or other agreed amount is transferred every year to the Income and Expenditure Account, the balance of this fund is carried forward till it is fully exhausted.

THEORETICAL QUESTIONS

1. What are the main features of Receipts and Payments Account ?
2. What are the main features of Income and Expenditure Account ?
3. Distinguish between Receipts and Payments Account and Income and Expenditure Account.
4. How do you treat the following at the time of preparation of final accounts of a non-profit organisation ?
   (i) Donations (ii) Legacy (iii) Life Membership Fees (iv) Admission Fees (v) Sectional Subscriptions.

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each statement or answer each question below.

1. The Income and Expenditure Account begins with :
   A debit balance
   B credit balance
   C no balance
2. The Receipts and Payments Account records receipts and payments of :
   A revenue nature only
   B capital nature only
   C revenue as well as capital nature.
3. A profit on the sale of furniture of a club will be taken to :
   A cash account
   B receipts and payments account
   C income and expenditure account
4. Entrance fees are generally :
   A capitalised
   B taken as income
   C treated as a liability
5. Legacy for specific purpose is:
   A added to the specific fund
   B shown in the income and expenditure account
   C shown as a separate liability

PRACTICAL QUESTIONS

Preparation of Income and Expenditure Account

1. The following is the Receipts and Payments Account of Silver Streek Cricket Club for the year ended 31.12.2014. You are to prepare the Income and Expenditure Account for 2014 and Balance Sheet as at 31.12.2014 of the Club:

Receipts	₹	Payments	₹
Opening Balance — Cash	290	New building constructed	75,000
Bank	3,710	Souvenir	2,000
Subscriptions	12,000	Salaries	6,000
Donations	13,000	Postage	500
Activities collection	6,900	Telephone	500
Sale of old newspapers	300	Electricity	600
Souvenir advertisement	5,800	Maintenance expenses	12,000
Endowment income	3,000	Newspapers	500
Sale proceeds of old building at book value	60,000	Closing balance — Cash	300
Income from investments @ 10%	4,000	Bank	11,600
	1,09,000		1,09,000

Subscriptions : For 2013 (due as at 31.12.2013, ₹ 1,500) received ₹ 1,000; For 2015 advance ₹ 1,200; Due for 2014 ₹ 800; Expenses outstanding : Salaries ₹ 1,200; Electricity ₹ 100; Telephones ₹ 100; Postage ₹ 100; Provide depreciation on Building @ 5%.

2. The following is the Receipts and Payments Account of the Calcutta Club for the year ending 31.12.2014:

Receipts	₹	Payments	₹
Opening Balance :		Salaries	6,000
Cash	1,025	Sports expenses	6,900
Stamps	50	Electricity	1,000
Bank F.D.	10,000	Telephone	1,200

S/B Account	4,200	Postage expenses	200
Current Account	2,100	General body expenses	700
Subscriptions		Printing & Stationery	850
2013	1,010	Building purchase account	12,000
2014	18,900	Repairs	400
2015	900	Closing Balance :	
Donations	7,000	Cash	1,740
Bank interest received	1,340	Stamps	25
Receipts from sports	2,600	Bank F.D.	11,000
Telephone recoveries	900	S/B A/c	4,310
		Current A/c	3,700
	50,025		50,025

A building costing one lakh of rupees was purchased during the last year and ₹ 88,000 was paid for it.

Subscriptions outstanding for 2014 — ₹ 1,100; Interest accrued on bank deposits but not received ₹ 200; and Salaries outstanding ₹ 200. From the above, prepare Income and Expenditure Account for the year 2014 and also the Balance Sheet as on 31.12.2014 of the Calcutta Club.

3. Given below is the Receipts and Payments Account of a club for the year ending 31st December, 2014:

Receipts	₹	Payments	₹
To Balance	1,500	By Salaries	600
To Subscriptions:		By Expenses	100
2013	50	By Drama Expenses	500
2014	2,000	By Newspapers	120
2015	80	By Municipal Taxes	60
To Donations	550	By Charity	400
To Sale of Drama tickets	1,050	By Investments	2,000
To Sale of waste paper	50	By Electric Charges	200
To Entrance fees	300	By Payment on new furniture	1,000
		By Balance	600
	5,580		5,580

Prepare the club's Income and Expenditure Account for the year ended 31st December, 2014 and its Balance Sheet as at that date after taking the following information into account:

(i) There are 400 members each paying ₹ 5 as annual subscriptions, ₹ 60 subscriptions still outstanding for 2013;

(ii) Municipal Taxes amounting to ₹ 60 per annum have paid upto 31st March 2015;

(iii) 6 per cent has accrued on investment for five months; and

(iv) Building stands in the books at ₹ 5,000 on 1.1.2014.

4. The following is the Receipts and Payments Account of the Sanatan Sangha for the year ended 31st December 2014.

Receipts	₹	Payments	₹
To Balance b/d	800	By Salaries	300
To Subscriptions :		By Stationery	300
2013	50	By Rates	300
2014	1,000	By Telephone charges	100
2015	200	By Investments on 4% Govt. securities (pur. on 30.6.2014)	1,000
To Admission fees	400	By Sundry expenses	150
To Dividends on investments	200	By Balance c/d	500
	2,650		2,650

The following additional information are given below:

1. There are 600 members paying annual subscriptions of ₹ 2 per head, ₹ 90 being in arrear for 2013 at the beginning of 2014.
2. Stock of stationery at 31st December 2013 was ₹ 200, at 31st December 2014 ₹ 100
3. The rates were paid for fifteen months upto 31st March, 2015.
4. Sundry Expenses outstanding at 31st December 2013 was ₹ 50.
5. The telephone charges for 3 months is outstanding, amount acrrued being ₹ 40.
6. At 31st December 2013 the building stood in the books at ₹ 10,000 and it is required to write off depreciation at 5% p.a.
7. At 31st December 2013 Investments were ₹ 4,000.

You are required to prepare an Income and Expenditure Account for the year ended 31st December 2014 and a Balance Sheet as at that date

5. Prantik Boys' Club prepared the following Receipts and Payments Account for the year ended 31st December, 2014:

Receipts	₹	Payments	₹
To Balance b/d	7,600	By Sports Equipment purchased on 1.10.2014	30,000
To Subscriptions :		By Postage and stationery	700
2013	2,000	By Salaries and wages	5,000
2014	37,000	By Upkeep of ground	1,000
2015	3,000	By Electric charges	2,300
To Admission fees	4,000	By Tournament expenses	8,000
To Locker rents	1,000	By Balance c/d	8,800
To Interest on Govt. Securities	1,200		
	55,800		55,800

The fixed assets of the club on 1st January, 2014 include the following: sports equipments ₹ 40,000, furniture ₹ 6,000, 10% Government securities ₹ 16,000 and club ground ₹ 25,000.

Prepare Income and Expenditure Account of Prantik Boys' Club for the year ended 31st December, 2014 and a Balance Sheet as at that date after taking into account the following information :

(a) Subscriptions for 2014 collected in 2013 for ₹ 1,500; (b) Subscriptions for 2014 are outstanding for ₹ 1,000; (c) Depreciation to be provided at 15% p.a. on sports equipment and at 7.5% p.a. on furniture.

6. The following is the Receipts and Payments Account of an Amusement Club :

Receipts	₹	Payments	₹
Balance b/d :		Salary of secretary	3,600
Cash	60	Honorarium	450
Bank	3,000	Wages	2,400
Subscriptions (including subscriptions for 2013 ₹ 150)	9,000	Charities	2,000
Sale of old furniture on January 1, 2014	750	Printing & stationery	300
Sale of newspapers	50	Postage	100
Legacies	3,000	Rates and taxes	1,200
Interest on Investments (cost of investments ₹ 20,000)	1,200	Upkeep of the land	500
Endowment fund receipts	10,000	Sports materials	2,500
Proceeds of concerts	800	Balance c/d	14,850
Advertisement in the year book	40		
	27,900		27,900

Current assets and liabilities as on December 31, 2013 and 2014 were as follows :		31.12.2013	31.12.2014
Subscriptions in arrears	₹	200	750
Subscriptions in advance	₹	300	600
Furniture	₹	2,000	1,080

Depreciation was 10% p.a. on the furniture left after selling a part of it. Legacies to be capitalised.

Prepare Income & Expenditure Account and the Balance Sheet as on that date.

Two members resigned without paying their arrears of previous year and as at the end of the year, there were 550 members as per records.

(c) The Cash Book was not written up to date and the records showed that the following bills were paid : Food for bar— ₹ 33,280; Sundry expenses— ₹ 5,440; Repairs and Renewals— ₹ 2,400; Salaries— ₹ 36,690; and Stationery— ₹ 2,290.

(d) The Club's source of income was from bar sales and the bartender generally hands over daily cash collections to the accountant along with cash collection list.
On enquiry, it was found that certain cash collection lists were misplaced or lost. The bartender stated that the average gross profit on bar sales were fifty per cent of sales. Bar stocks as on December 31, 2014 were ₹ 30,260 and cash in hand ₹ 125.

(e) Bank statements were summarized and showed the following:

Balance on 1.1.2014	96,820	Bar purchases	2,39,040
Cash deposited	3,92,310	Salaries	1,19,450
		Rent	62,420
		Power	12,570
		Telephone	910
		Repairs & Renewals	18,510
		Washing machine	5,940
		Balance on 31.12.2014	30,290
	4,89,130		4,89,130

(f) The accountant's records were searched and following unpaid bills were located :
Bar purchases — ₹ 62,540; Power — ₹ 1,830; Stationery — ₹ 2,170; and Telephone — ₹ 460.

You are required to prepare :

(1) Income and Expenditure Account for the year ended December 31, 2014. (2) Balance Sheet as at that date after providing depreciation at 20 per cent on written down value of Fixed Assets.

21. Suresh runs a Circulating Library and his accounts are in a mess. One Bank Account has been used for both the business as well as his personal transactions. After looking into his records you gather the following information:-
    1. Payments for magazines in the year ended 31st March 2015 ₹ 9,700.
    2. Payment of delivery peon's wages for the year ended 31st March 2015 ₹ 2,200.
    3. Payment of other expenses for the year ended 31st March 2015 ₹ 3,080.
    4. Subscriptions collected ₹ 21,695.
    5. He has taken ₹ 500 per month in cash from the subscriptions collections to pay to his wife for their household and personal expenses, depositing the balance of the collections into Bank.
    6. During the year he bought a second-hand car (not used for the business) from a friend for ₹ 4,000. However, as the friend owned him ₹ 250 for subscriptions, the matter was settled by a cheque for the difference.
    7. An assurance policy on his life matured during the year and realised ₹ 7,000.
    8. Suresh issued a cheque for ₹ 1,200 to a friend as loan. The friend is repaying by instalments in cash, and owes ₹ 500 on 31.3.2015.
    9. Magazine subscriptions for the year amounting to ₹ 400 had to be written off by Suresh as irrecoverable.
    10. Other personal payments by cheques total ₹ 2,350.
    11. Cash collected includes ₹ 600 in respect of magazine subscriptions written-off as irrecoverable in a previous year.
    12. Suresh runs the business from his flat for which a rent of ₹ 90 per month is included in the payments for other expenses ₹ 3,080. The living accommodation may be regarded as two-thirds of the whole.
    13. The following balances may be accepted as correct:

	31st March 2014	31st March 2015
Cash in hand	115	70
Bank balance	4,720	5,880
Subscriptions receivable (Debtors) considered good	1,830	2,105
Creditors for purchase of magazines	900	840
Stock of magazines, at cost	2,450	830

You are required to prepare:

1. A Cash and Bank Account for the year;
2. Suresh (Proprietor's) Account for the year;
3. An Income and Expenditure Account of the Circulating Library for the year ended 31st March 2015; and,
4. A Balance Sheet of the Business as at 31st March 2015. (Show your workings.)

Preparation of Opening and Closing Balance Sheet

22. The following particulars related to Fast Sports Club :

Receipts and Payments Account for the year ended 31.12.2014

Receipts	₹	Payments	₹
To Balance	5,000	By Salary (including advance)	7,500
To Admission fees:		By Printing & stationery	2,500
2013	2,500	By Advertising	1,000
2014	13,500	By Insurance charges (partly for next year)	1,200
To Subscriptions:		By Electricity charges	500
2013	1,000	By Purchase of fixed assets	20,000
2014	23,000	By Balance	17,900
2015	2,000		
To Rent	3,600		
	50,600		50,600

On 1st January, 2014 the club had the following assets :

Land and Buildings — ₹ 60,000; Sports equipments — ₹ 30,000; Furniture — ₹ 4,500.

Prepare opening and closing Balance Sheets.

22

Incomplete Records

Introduction

Many small businesses have neither the time nor the experience necessary to maintain a full set of accounting records using the double entry system; and cannot afford the expense of outside staff to keep such records. However, every business is interested to know its profit from time to time. Any set of procedures for ascertaining profits that does not provide for the ***analysis of each transaction*** in terms of the double entry system of bookkeeping is generally referred to as 'Single Entry System'. Strictly speaking, single entry constitutes ***incomplete records*** rather than single entry accounting. Under this system, certain transactions are recorded just like the double entry system; for example : cash collected from debtors — it is recorded in the Debtors Account as well as in the Cash Account. Again, certain transactions are recorded partially, e.g., cash sales, cash purchases, etc. Similarly, certain transactions are not recorded at all, e.g., Bad Debt, Depreciation, etc. Since all the transactions are not recorded strictly on the double entry principle, it is not possible to prepare a Trial Balance and check the arithmetical accuracy of the books of account. Consequently, the system engenders a spirit of laxity and invites frauds and misappropriation.

In India, there are many small-scale business which do not keep complete records for all their financial transactions because the proprietors of these businesses are untrained in accounting and regard it better to keep an additional productive employee rather than a bookkeeper. They assume that without an elaborate accounting system, they can exercise control over assets, expenses, revenues and liabilities. They record few transactions completely just like the double entry system but a majority of the transactions are recorded only partially.

Features of Incomplete Records (Single Entry System)

1. This system is a mixture of: (i) double entry; (ii) single entry; and (iii) no entry.
2. This system is suitable for small businesses where the proprietor or partners can directly control the affairs of the business.
3. In this system, generally Personal Accounts are kept but Real and Nominal Accounts are ignored. This is because, a single entry takes account only of the personal transactions and leaves the impersonal transactions of the business unit entirely unrecorded.
4. In the absence of record of the two-fold aspect of every transaction, it is not possible to prepare a trial balance and check the arithmetical accuracy of the books of account. Similarly, no Balance Sheet can be prepared in the absence of balances in ledger.

5. This system is highly changeable and flexible and it is not governed by any definite rules of operation.
6. Under this system the profit or loss can be found out but its composition will not be available.

Limitations of Incomplete Records (Single Entry System)

Single entry system ignores the concept of duality and, therefore, transactions are not recorded in their two-fold aspects. As a result, the final accounts of the business concern cannot be prepared in the usual way. The other limitations are as under :

1. Since no trial balance can be prepared, arithmetical accuracy of the books of account cannot be checked.
2. This system engenders a spirit of laxity and invites frauds and misappropriations.
3. Since no Nominal Accounts are maintained, the Trading and Profit and Loss Account cannot be prepared and, consequently, the different ratios such as gross profit ratio, net profit ratio and operating ratio, etc., cannot be computed.
4. Owing to incompleteness of record, proper appraisal of the financial position of the business is not possible.
5. No limited company can keep account under this system, because of legal restrictions.

Difference between Double Entry System and Single Entry System

Double Entry System		Single Entry System	
1.	Under this system, both aspects of each transaction are recorded.	1.	Under this system, both aspects of each transaction are not recorded.
2.	In this system, Personal, Real and Nominal Accounts are kept fully.	2.	In this system, only Personal Accounts are kept and Real and Nominal Accounts are ignored. (However, in some cases Cash Account is maintained.)
3.	In this system, Cash Book, General Ledger, Debtors' Ledger and Creditors' Ledger are maintained.	3.	In this system, only Debtors' Ledger and Creditors' Ledger are kept. Cash Book is also kept but personal transactions get mixed up with business transactions.
4.	Under this system, arithmetical accuracy can be checked by preparing Trial Balance at any moment of time.	4.	Under this system, arithmetical accuracy cannot be checked because no Trial Balance can be prepared.
5.	In this system, Trading, Profit and Loss Accounts and Balance Sheet can be prepared.	5.	In this system, Trading, Profit and Loss Accounts and Balance Sheet cannot be prepared.
6.	For interpretation of financial statement, we can compute different ratios, if the accounts are maintained under this method.	6.	Vital ratios cannot be computed (such as gross profit ratio, net profit ratio, etc), if the accounts are maintained under this system.
7.	This system is scientific and follows certain rules.	7.	This system is unscientific and does not follow any concrete rules.

Ascertainment of Profit or Loss

There are mainly two approaches for income determination :

(a) The Transaction Approach, and (b) The Balance Sheet Approach.

(a) The Transaction Approach

When books of account are maintained under complete double entry principles of bookkeeping, this approach is followed for determining the profit or loss of a particular period. In this approach, every transaction is analysed and the following steps are followed:

1. We record only transactions to business — events which can be translated into monetary terms.
2. Every transaction involves two accounts — one of these accounts is debited and the other is credited in the books of primary entry.

3. From books of primary entry, we prepare Ledger Accounts and, thereafter, accounts are balanced.
4. A Trial Balance is prepared from the Ledger; balances to ensure the arithmetical accuracy of the records.
5. After preparing the Trial Balance, adjusting entries are passed to record the internal transactions such as provision for bad debts, depreciation, etc.
6. A second Trial Balance (called Adjusted Trial Balance) is prepared to incorporate the adjusting entries.
7. From the Trial Balance, nominal accounts are transferred to Trading and Profit and Loss Account.
8. The Trading Account shows the gross profit and the Profit and Loss Account shows the net profit or loss.

The above procedures have been discussed here just for comparison of the two approaches.

(b) The Balance Sheet Approach

When books of account are maintained under single entry system, it is not possible to determine profit or loss by the transaction approach because we cannot get full information regarding all transactions.

The problems that arise in the single entry system for the determination of profit can be solved within the context of the fundamental Balance Sheet equation, as under:

Capital = Assets – Liabilities

Under this method, two Balance Sheets (better to say, Statement of Affairs) are prepared. One, at the beginning of the period for finding out ***the Opening Capital*** and the other at the end of the period for finding out ***the Closing Capital.*** A comparison is made between the opening and closing capital. If the closing capital is more than the opening capital, it shows an increase in capital, which means a ***profit.*** Conversely, if the closing capital is less than the opening capital, it shows a decrease in capital, which means a loss for the period. In other words:

Closing Balance Sheet: Assets = Liabilities + Capital
Opening Balance Sheet: Assets = Liabilities + Capital
Change in period : Δ Assets = Δ Liabilities + Δ Capital

The change (Δ) in assets may be due to change in liabilities or capital or both. The increase in assets due to increase in capital represents profit.

Let us take a simple example in which Mr X keeps no adequate records. The firm was set up on 1st January, 2014 with a capital in cash ₹ 50,000. At the end of the year, the following assets and liabilities were revealed:

Assets : Building at cost — ₹ 30,000; Stock — ₹ 10,000; Trade debtors — ₹ 20,000; Cash — ₹ 15,000

Liabilities : Trade creditors — ₹ 5,000. From this, it appears that the changes for the year are :

	Assets =	Liabilities +	Capital
Closing position (₹)	75,000	5,000	70,000
Opening position (₹)	50,000	—	50,000
Net changes (₹)	25,000	5,000	20,000

Assets have increased by ₹ 25,000. Out of this increase, ₹ 5,000 owing to increase in liabilities and ₹ 20,000 owing to increase in capital and it is nothing but profit earned during the year 2014.

We can also calculate the above profit as follows :

Statement of Profit and Loss

	₹
Closing Capital (Assets — Liabilities)	70,000
Less: Opening Capital	50,000
Profit for the year	20,000

The above are only the initial figures for income. Any fresh capital introduced during the period by the owner or any withdrawal by him will definitely affect the size of the profit calculated. The ascertainment of profit by the above process needs to be adjusted for the introduction or withdrawal of capital. This is because, ignoring capital introduced during the period would be an overstatement of income. Similarly, ignoring withdrawals would show an understatement of income. Therefore, if there is any introduction of fresh capital or withdrawal by the proprietor, then the profit or loss should be calculated as follows :

Statement of Profit and Loss

	₹
Closing Capital (Assets — Liabilities)	***
Add: Drawings (Since if they had not been withdrawn from the business, the increase in capital would have been greater)	***
	***
Less: Opening Capital	***
	***
Less: New Capital paid in (Since without the increase in capital would have been smaller)	***
Profit for the year	***

However, the above profit figure is not really a very satisfactory one, because no adjustments have so far been made for depreciation on assets or provision for doubtful debts etc. The above profit is termed as 'Trading Profit' or 'Profit before adjustments'. Therefore, net profit can be ascertained only when we deduct the depreciation, provision, etc from the above trading profit.

Steps For Ascertaining Profit

Step 1 – Calculate Opening Capital : It can be calculated by preparing a Statement of Affairs at the beginning of the year. The Statement of Affairs is just similar to a Balance Sheet. All the assets are shown on the right-hand side and all the liabilities are shown on the left-hand side of the Statement of Affairs. If the total of the right-hand side is greater than the total of the left-hand side, it represents 'Opening Capital'. The assets and liabilities are ascertained as follows:

1. Amount of cash is ascertained by physical count;
2. Bank balance is ascertained from the Pass Book;
3. The closing stock is ascertained by physical stock taking;
4. The balances of debtors and creditors can be ascertained from the list, the trader maintains;
5. Regarding other assets, the trader prepares a list and values them; and
6. Other relevant information is supplied by the trader from his memory.

Step 2

Ascertain the Drawings During the Period : Ascertainment of drawings for the period is a most difficult task. Drawings increase the personal capital but decrease the business capital. Since the entries are recorded from the point of the proprietor, personal affairs of the proprietor get mixed up with the business affairs. To take an account of drawings, all withdrawals from the business must be traced. For calculating drawings, the following are to be considered: (i) How much is drawn from the business at regular intervals for household or private purposes ? and (ii) How much has been utilized for household or private purposes from the sale proceeds or other receipts before depositing it into the bank ?

Step 3 – Ascertain the Capital Introduced During the Period : A trader may introduce new capital (in the form of cash or assets) during the period. The trader is to make a list of the amount of capital introduced during the period.

Step 4 – Calculate Closing Capital : It can be calculated by preparing the closing Statement of Affairs in the same manner we prepare the opening Statement of Affairs in Step 1. However, in the closing Statement of Affairs, we will consider assets and liabilities at the end of the period (***before adjustments***).

Step 5 – Prepare Statement of Profit : The statement of profit is to be prepared as follows:

Statement of Profit and Loss for the year ended ...

		₹
Closing Capital (before adjustment)		***
Add: Drawings for the period		***
		***
Less: Opening Capital	***	
New Capital introduced	***	***
Profit before adjustments		***
Less : Adjustments :		
(i) Depreciation	***	
(ii) Provision for Bad debts, etc	***	***
Net profit for the period		***
Less: Appropriations :		
(i) Salary of the partners*	***	
(ii) Interest on capital*	***	***
Divisible profit *		***

*Applicable to partnership firms.

Final Statement of Affairs

After ascertaining profit by following the above procedures, a final Statement of Affairs is prepared at the end of the period after incorporating adjustment for depreciation, provision for bad debts, etc. The final Statement of Affairs will appear as follows :

Statement of Affairs as at ...

Liabilities	₹	₹	Assets	₹	₹
Opening Capital	***		Plant & Machinery	***	
Add: New Capital introduced	***		*Less:* Depreciation	***	***
Add: Profit for the year	***		Furniture	***	
	***		*Less:* Depreciation	***	***
Less: Drawings	***	***	Debtors	***	
Creditors		***	*Less:* Provision for bad debts	***	***
			Stock		***
			Cash at bank		***
			Cash in hand		***
		***			***

Difference Between Statement of Affairs and Balance Sheet

A Statement of Affairs is a statement of the assets, liabilities and capital prepared from incomplete records whereas a Balance Sheet is a statement of the assets, liabilities and capital extracted from ledger balances maintained under the double entry system.

Under the double entry system, the basic purpose of the Balance Sheet is to show the financial position of the business on the last day of the accounting period. Under single entry, the same purpose is served by the Statement of Affairs. Also, it is used as the basis for calculating the trading profit or loss for the period.

Illustration 1

Mr Sunanda Sanyal, who keeps his books on single entry system, tells you that his capital on 31.12.2014 is ₹ 18,700 and on 1st January, 2014 was ₹ 19,200. He further informs you that he gave loan of ₹ 3,500 to his brother on private account and withdrew ₹ 300 p.m. for personal purposes. He also used a flat for his personal purposes, the rent of which @ ₹ 100 per month and electric charges ₹ 10 per month were paid from the business account. He sold his 7% Government Bond of ₹ 2,000 at 3% premium and brought that money into business. Besides this, there is no other information.

You are required to prepare his Statement of Profit for the year ended 31.12.2014.

Solution

Sunanda Sanyal

Statement of Profit and Loss for the year ended 31st December, 2014

	₹	₹
Closing Capital (31.12.2014)		18,700
Add: Drawings :		
Loan given to brother	3,500	
Withdrawals for personal purposes (₹ 300 x 12)	3,600	
Rent of the flat (₹ 100 x 12)	1,200	
Electric charges (₹ 10 x 12)	120	8,420
		27,120
Less: Capital introduced during the period — 7% of Govt. Bond of ₹ 2,000 at 3% premium, i.e., (₹ 2,000 x 103) / 100		2,060
		25,060
Less: Opening Capital (1.1.2014)		19,200
Profit for the period		5,860

Illustration 2

On January 1, 2014 a trader started a business with a capital of ₹ 1,00,000 with which he opened a bank account. On the same day, he bought furniture and fittings for shop costing ₹ 4,800 and goods for trade costing ₹ 25,000.

On December 31, his stock-in-hand was valued at ₹ 29,000 and furniture and fittings stood at ₹ 6,300. On that date, his book debts amounted to ₹ 78,000 of which ₹ 1,200 was considered to be bad. Creditors amounted to ₹ 15,000. His balance as per Cash Book was ₹ 5,500 a cheque for ₹ 400 sent for deposit on December 30, was not realized till after December 31, and cheque for ₹ 700 issued on December 29, was not presented to Bank till after December 31. Bank charges for the year amounted to ₹ 50 but this was not known to the trader on December 31. His drawings during the year amounted to ₹ 9,300. He had also taken for personal use goods from the shop valued at ₹ 1,500.

Prepare a Statement showing the trader's profit or loss during 2014.

Solution **Ascertainment of Closing Capital (before adjustments)**

Liabilities	₹	Assets	₹
Creditors	15,000	Stock	29,000
Closing capital (balancing figure)	1,03,800	Furniture & Fittings	6,300
		Book debts	78,000
		Cash-at-bank (Note 1)	5,500
	1,18,800		1,18,800

Statement of Profit and Loss for the year ended 31st December, 2014

	₹	₹
Closing Capital (as above)		1,03,800
Add: Drawings during the year :		
Cash	9,300	
Goods	1,500	10,800
		1,14,600
Less: Opening Capital (as given)		1,00,000
Profit before adjustment		14,600
Less: Adjustments :		
Bad debts	1,200	
Bank charges (See Note)	50	1,250
Profit for the period		13,350

Note Since the amended Cash Book balance is to be taken as the closing balance of cash at Bank, there will be no adjustment for: (a) Cheque deposited into bank but not realised, and (b) cheque issued but not presented.

Therefore, in this problem, when we prepare the closing Statement of Affairs, Cash-at-Bank will be ₹ 5,450 (₹ 5,500 – ₹ 50).

Illustration 3

The Statement of Affairs of Sri S. Roy as on 1st April, 2014 is given below:

Liabilities	₹	Assets	₹
Sundry Creditors	16,500	Cash	7,450
Accrued expenses	3,500	Sundry Debtors	25,350
Capital	50,000	Stock	30,300
		Furniture	6,900
	70,000		70,000

During the year ended 31st March, 2015 his drawings amounted to ₹ 15,000. He also withdrew goods worth ₹ 600 for his personal use. On 1st July, 2014, S. Roy transferred some of his household furniture to the business at a value of ₹ 2,100. His assets and liabilities as on 31st March, 2015 were:

Liabilities	₹	Assets	₹
Sundry Creditors	18,600	Cash	6,580
Accrued expenses	4,300	Sundry Debtors	36,900
		Stock	40,320
		Furniture	9,000
		Prepaid Rent	400

Furniture is to be depreciated @ 10% p.a. and a provision is to be created on debtors @ 5%, Interest 5% to be allowed on capital as at the beginning of the year. Ascertain the profit or loss for the year ended 31st March, 2015 and prepare the Statement of Affairs as on that date.

Solution **Ascertainment of Closing Capital (before adjustments)**

Liabilities	₹	Assets	₹
Sundry Creditors	18,600	Cash	6,580
Accrued expenses	4,300	Sundry Debtors	36,900
Closing Capital (balancing figure)	70,300	Stock	40,320
		Furniture	9,000
		Prepaid Rent	400
	93,200		93,200

Statement of Profit and Loss of Sri S. Roy for the year ended 31st March, 2015

		₹
Closing Capital (as above)		70,300
Add: Drawings during the year		
Cash	15,000	
Goods	600	15,600
		85,900

Less : Capital introduced during the year	2,100	
Opening Capital (as given)	50,000	52,100
Profit before adjustments		33,800
Less : Adjustments :		
(i) Depreciation on Furniture (₹ 690 + 158)	848	
(ii) Provision for doubtful debts	1,845	2,693
Net profit for the period		31,107
Less: Interest on Capital (5% of ₹ 50,000)		2,500
Net profit		28,607

Statement of Affairs of Sri S. Roy as at 31st March, 2015

Liabilities	₹	₹	Assets	₹	₹
Opening Capital	50,000		Furniture (₹ 6,900 + ₹ 2,100)	9,000	
Add: New Capital introduced	2,100		Less: Depreciation	848	8,152
Add: Interest on Capital	2,500		Stock		40,320
Add: Profit for the year (Net)	28,607		Sundry Debtors	36,900	
	83,207		Less: Provision for Doubtful debts	1,845	35,055
Less: Drawings	15,600	67,607	Prepaid rent		400
Accrued expenses		4,300	Cash		6,580
Sundry Creditors		18,600			
		90,507			90,507

Illustration 4

R had ₹ 3,00,000 in bank on 1st January 2014 when he started his business. He closed his accounts on 31st March, 2015. His single entry books (in which he did not maintain any account for the bank) showed his position as follows:

	31.3.2014	31.3.2015
Cash in hand	2,000	3,000
Stock in trade	19,000	29,000
Debtors	1,000	2,000
Creditors	5,000	3,000

On 1st February, 2014, he began drawing ₹ 700 per month for his personal expenses from the Cash Box of the business.

His account in the bank had the following entries :

	Deposits	Withdrawals
1.1.2014	3,00,000	—
1.1.2014 to 31.3.2014	—	2,23,000
1.4.2014 to 31.3.2015	2,30,000	2,70,000

The above withdrawals included payments by cheques of ₹ 2,00,000 and ₹ 60,000 respectively during the period from 1st January, 2014 to 31st March, 2014 and from 1st April, 2014 to 31st March, 2015 for the purchase of machinery for the business. The deposits after 1st January, 2014 consisted wholly of sale price received from customers by cheques. Draw up R's Statement of Affairs as at 31st March, 2014 and 31st March, 2015 respectively and work out his profit or loss for the year ended 31st March, 2015.

Solution **Ascertainment of Opening Capital (31st March, 2014)**

Liabilities	₹	Assets		₹
Sundry Creditors	5,000	Cash in hand		2,000
Capital (Balancing figure)	2,94,000	Cash at bank	3,00,000	
		Less: Withdrawals	2,23,000	77,000
		Stock in trade		19,000
		Debtors		1,000
		Machinery		2,00,000
	2,99,000			2,99,000

Ascertainment of Closing Capital (31st March, 2015)

Liabilities	₹	Assets	₹
Sundry Creditors	3,000	Cash in hand	3,000
Capital (balancing figure)	3,28,000	Cash at bank (Note 2)	37,000
		Stock in trade	29,000
		Sundry Debtors	2,000
		Machinery	2,60,000
	3,31,000		3,31,000

Statement of Profit and Loss of R for the year ended 31st March, 2015

		₹
Closing Capital (as above)		3,28,000
Add: Drawings during the year (₹ 700 x 12)		8,400
		3,36,400
Less: Opening Capital (as above)		2,94,000
Net profit for the year		42,400

Notes : 1. The above profit of ₹ 42,400 is earned by R subject to depreciation on machinery;
2. Opening balance + Deposit – Withdrawals = ₹ 77,000 + 2,30,000 – 2,70,000 = ₹ 37,000.

Illustration 5

On 1.1.2014, the assets and liabilities of Sougata Roy, a retailer, were as follows :

Building ₹ 5,00,000; Motor van ₹ 1,00,000; Furniture ₹ 80,000; Stock ₹ 60,000; Debtors ₹ 40,000; Provision for Doubtful Debts ₹ 4,000; Cash ₹ 2,500; Creditors ₹ 42,000; Loan ₹ 1,00,000; Bank Overdraft ₹ 15,000.

The following information was available at 31.12.2013 :

(1) Stock ₹ 60,000; Debtors ₹ 50,000; Cash ₹ 4,500; Creditors ₹ 37,000; Loan ₹ 80,000; Bank Overdraft ₹ 10,000.

(2) No fixed assets had been bought or sold during the year.

(3) Fixed assets are to be depreciated as follows :
(i) Motor van by 20% p.a.; and (ii) Furniture by 25% p.a.

(4) A provision for doubtful debts is to be maintained at 10% of year-end debtors.

(5) Sougata withdrew ₹ 6,000 p.m. for his own use.

(6) On 1.3.2014, Sougata brought further ₹ 30,000 as capital into the business.

You are required to prepare a Statement of Profit and Loss for the year ended 31.12.2014 and a Statement of Affairs as on that date.

Solution

Opening Statement of Affairs as on 1.1.2014

Liabilities	₹	Assets		₹
Opening Capital (Balancing figure)	6,21,500	Building		5,00,000
Loan	1,00,000	Motor van		1,00,000
Creditors	42,000	Furniture		80,000
Bank Overdraft	15,000	Stock		60,000
		Debtors	40,000	
		Less : Provision for doubtful debts	4,000	36,000
		Cash		2,500
	7,78,500			7,78,500

Closing Statement of Affairs as on 31.12.2014

Liabilities	₹	Assets	₹
Closing Capital (Balancing figure)	6,67,500	Building	5,00,000
Loan	80,000	Motor van	1,00,000
Creditors	37,000	Furniture	80,000
Bank Overdraft	10,000	Stock	60,000
