	5,84,800	6,20,600		5,84,800	6,20,600

* Final balance of debtors : Balance as given ₹ 1,70,000 + Sales omitted ₹ 10,000 – Collections from debtors ₹ 12,000 = ₹ 1,68,000.

Tutorial Note : Opening capital and Closing capital can be ascertained on cash basis, ignoring outstanding expenses and prepaid expenses as well as advance salary. In that case, opening capital will be ₹ 3,44,000 and closing capital will be ₹ 4,55,600. However, profit will be the same, i.e., ₹ 1,03,600; ₹ (4,55,600 + 42,000 – 3,44,000 – 50,000).

Illustration 7

Mr Kothari does not keep complete records of his business but gives you the following information:

His assets on 31.3.2015 consisted of Machineries ₹ 1,50,000; Furniture ₹ 60,000; Motor Car ₹ 40,000; Stock-in-trade ₹ 50,000; Debtors ₹ 80,000; Cash in hand ₹ 12,000 and Cash at Bank ₹ 30,000; Creditors on that date amounted to ₹ 1,20,000.

On further information received, you come to know that:

On 1.10.2014 he purchased a new machinery costing ₹ 50,000.

Sales are made for cash as well as on credit. There is no cash purchases. He always sells his goods at cost plus 25%. Cash sales for the year 2014-15 were accounted for ₹ 80,000.

During the year 2014-15 collection from debtors amounted to ₹ 5,00,000 and a sum of ₹ 4,25,000 was paid to creditors. He obtained a Bank loan for ₹ 50,000 on 1.2.2014. The entire amount was repaid in February, 2015 with interest ₹ 2,500.

In November, 2014 his life insurance policy for ₹ 50,000 became matured and the same was invested in the business. His drawings were ₹ 2,500 p.m. all through the year.

On 1.4.2014 he had ₹ 1,500 as cash in hand and balance at bank for ₹ 40,000. Debtors and Creditors on that date amounted to ₹ 60,000 ad ₹ 90,000 respectively.

Provide depreciation on Machineries @ 15% p.a., on Furniture @ 10% p.a. and on Motor Car @ 20% p.a.

Mr Kothari requests you to prepare a statement of Profit & Loss for the year ended 31.3.2015.

Solution

Working Notes

(1) Ascertainment of Opening Capital

Liabilities	₹	Assets	₹
Creditors	90,000	Machineries (Note 6)	1,00,000
Bank Loan	50,000	Furniture	60,000
Outstanding Interest (Note 7)	417	Motor Car	40,000
Capital (balancing figure)	2,36,083	Stock in trade (Note 5)	75,000
		Debtors	60,000
		Cash in hand	1,500
		Cash at bank	40,000
	3,76,500		3,76,500

(2) Ascertainment of Closing Capital (before adjustments)

Liabilities	₹	Assets	₹
Creditors	1,20,000	Machineries	1,50,000
Capital (balancing figure)	3,02,000	Furniture	60,000
		Motor Car	40,000
		Stock in trade	50,000
		Debtors	80,000
		Cash in hand	12,000
		Cash at bank	30,000
	4,22,000		4,22,000

Dr. **(3) Creditors Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
?	To Bank A/c	4,25,000	1.4.2014	By Balance b/d	90,000
31.3.2015	To Balance c/d	1,20,000	?	By Credit purchases (balancing figure)	4,55,000
		5,45,000			5,45,000

Dr. **(4) Debtors Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
1.4.2014	To Balance b/d	60,000	?	By Bank A/c	5,00,000
?	To Credit sales (balancing figure)	5,20,000	31.3.2015	By Balance c/d	80,000
		5,80,000			5,80,000

(5) Ascertainment of Opening Stock : Total Sales = Credit sales + Cash sales = ₹ 5,20,000 + ₹ 80,000 = ₹ 6,00,000.
Gross profit is 25% on cost or 20% on sales. Therefore, cost of goods sold is 80% of Sales = 80% of ₹ 6,00,000 = ₹ 4,80,000.
We know, Opening stock + Purchases = Cost of goods sold + Closing stock
Or Opening Stock + ₹ 4,55,000 = ₹ 4,80,000 + ₹ 50,000; Or Opening Stock = ₹ 75,000.

Dr. **(6) Machineries Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
1.4.2014	To Balance b/d (balancing figure) To Bank A/c	1,00,000 50,000	31.3.2015	By Balance c/d	1,50,000
		1,50,000			1,50,000

(7) Statement showing allocation of interest
Total interest from 1.2.2014 to 1.2.2015 = ₹ 2,500; Therefore, interest from 1.2.2014 to 31.3.2014 = ₹ 417;
And, interest from 1.4.2014 to 1.2.2015 = ₹ 2,083.
(8) Depreciation on Machinery
On ₹ 1,00,000 @ 15% for 1 year = ₹ 15,000 + On ₹ 50,000 @ 15% for 1/2 year = ₹ 3,750; Therefore, total = ₹ 18,750.

Statement of Profit and Loss of Kothari for the year ended 31st March, 2015

		₹
Closing Capital		3,02,000
Add: Drawings for the period (₹ 2,500 x 12)		30,000
		3,32,000
Less: Opening Capital	2,36,083	
New Capital introduced	50,000	2,86,013
Profit before adjustments		45,917
Less : Adjustments :		
(i) Depreciation on Machinery @ 15% p.a.	18,750	
(ii) Depreciation on Furniture @ 10% p.a.	6,000	
(iii) Depreciation on Motor Car @ 20% p.a.	8,000	32,750
Net Profit		13,167

Single Entry System as Applied to Partnerships

When the single entry system is adopted by a partnership firm, the calculation of profit or loss is made along the lines indicated before. The Statement of Affairs would yield the amount of the combined capital of the partners; and the Statement of Profit and Loss would show the profit made during the year, which should be divided among the partners in agreed proportions.

Therefore, in case of a partnership firm, the Statement of Profit and Loss will be as under :

Statement of Profit and Loss for the year ended ...

		₹
Combined closing Capital		***
Add: Combined drawings for the period		***
		***
Less: Combined opening Capital	***	
Combined new Capital introduced	***	***
Profit before adjustments		***
Less : Adjustments :		
(i) Depreciation	***	
(ii) Provision for Doubtful debts etc	***	***
Net profit for the period		***
Less: Appropriations :		
(i) Salary of the partners	***	
(ii) Interest on Capital	***	***
Add: Interest on Drawings		***
Divisible profit		***

Illustration 8

Akash and Bikash are partners in a firm sharing profits and losses in the proportion of 3 and 2. They keep their books on the Single Entry System. On 31st December, 2013, the following Statement of Affairs was extracted from their books:-

Liabilities	₹	Assets	₹
Capital Accounts		Plant & Machinery	30,000
Akash	25,000	Stock	20,000
Bikash	20,000	Sundry Debtors	35,000
Loan — Bikash	25,000	Cash at bank	15,000
Sundry Creditors	30,000		
	1,00,000		1,00,000

On 31st December, 2014, their assets and liabilities were: Sundry Debtors ₹ 40,000; Sundry Creditors ₹ 25,000; Plant and Machinery ₹ 50,000; Stock ₹ 30,000; Bills Receivable ₹ 5,000; Cash at Bank ₹ 25,000; Loan —Bikash ₹ 25,000.

You are required to prepare a Profit and Loss Statement for the year ended 31st December, 2014 and a Statement of Affairs as at that date after taking into consideration the following:

(a) Plant and machinery is to be depreciated by 10% p.a.
(b) Stock is to be reduced to ₹ 25,000.
(c) A provision for bad debts to be raised at 5% on Sundry Debtors.
(d) Interest on loan is to be allowed at 6% p.a.
(e) During the period Akash and Bikash drew ₹ 5,000 and ₹ 3,000 respectively.

Solution **Ascertainment of Combined Closing Capital (Before adjustments)**

Liabilities	₹	Assets	₹
Sundry Creditors	25,000	Sundry Debtors	40,000
Loan — Bikash	25,000	Plant & Machinery	50,000
Capital (balancing figure)	1,00,000	Stock	30,000
		Bills Receivable	5,000
		Cash at bank	25,000
	1,50,000		1,50,000

Statement of Profit and Loss of Akash and Bikash for the year ended 31st December, 2014

		₹
Combined closing Capital (as above)		1,00,000
Add: Combined Drawings during the year (₹ 5,000 + ₹ 3,000)		8,000
		1,08,000
Less : Combined Opening Capital (₹ 25,000 + ₹ 20,000)		45,000
Profit before adjustments		63,000
Less : Adjustments :		
(i) Stock written-off	5,000	
(ii) Depreciation on Plant & Machinery (₹ 3,000 + ₹ 1,000)	4,000	
(iii) Provision for Doubtful debts (5% on ₹ 40,000)	2,000	
(iv) Interest on loan (6% of ₹ 25,000)	1,500	12,500
Divisible profit :		50,500
Akash — 3/5th of ₹ 50,500	30,300	
Bikash 2/5th of ₹ 50,500	20,200	50,500

Statement of Affairs of Akash & Bikash as at 31st December, 2014

Liabilities	₹	₹	Assets	₹	₹
Capital — Akash			Plant & Machinery	50,000	
Opening balance	25,000		Less: Depreciation	4,000	46,000
Add: Profit	30,300		Stock		25,000
	55,300		Sundry Debtors	40,000	
Less: Drawings	5,000	50,300	Less: Provision for Doubtful debts	2,000	38,000
Capital — Bikash			Bills Receivable		5,000
Opening balance	20,000		Cash at bank		25,000
Add: Profit	20,200				
	40,200				
Less: Drawings	3,000	37,200			
Loan — Bikash	25,000				
Add: Outstanding interest	1,500	26,500			
Sundry Creditors		25,000			
		1,39,000			1,39,000

Illustration 9

A and B are carrying on business in partnership sharing profits and losses equally. They were unable to maintain full and complete records. From the following available information, compute the profits of the firm and prepare a Balance Sheet:

	1.1.2014 (₹)	31.12.2014 (₹)
Land and Building (cost)	50,000	50,000
Machinery (cost)	60,000	75,000
Furniture (cost)	20,000	25,000
Stock	12,000	30,000
Debtors	17,000	22,000
Bank	4,900	5,000
Cash	1,100	5,000
Prepaid Insurance Premium	5,000	—
Bills Receivable	—	8,000
Creditors	60,000	50,000
Bills Payable	10,000	—

At the beginning of the year, the capital of the partners were equal. During the year, A brought in ₹ 15,000 and B has withdrawn ₹ 5,000. An insurance policy matured during the year for ₹ 10,000. A sum of ₹ 4,000 has become bad out of debtors. Provision has to be made for depreciation @ 10% on Land and Building, Machinery and Furniture.

Solution

Ascertainment of Combined Opening Capital

Liabilities	₹	Assets	₹
Creditors	60,000	Land and Building	50,000
Bills Payable	10,000	Machinery	60,000
Capital (balancing figure)		Furniture	20,000
A — 1/2 of ₹ 1,00,000	50,000	Stock	12,000
B — 1/2 of ₹ 1,00,000	50,000	Debtors	17,000
		Bank	4,900
		Cash	1,100
		Prepaid Insurance Premium	5,000
	1,70,000		1,70,000

Ascertainment of Combined Closing Capital (before adjustments)

Liabilities	₹	Assets	₹
Creditors	50,000	Land and Building	50,000
Capital (balancing figure)	1,70,000	Machinery	75,000
		Furniture	25,000

Sundry Creditors		50,000			
		2,01,000			2,01,000

Preparation of Final Accounts from Incomplete Records

The procedure to be adopted for preparation of final accounts from incomplete (single entry) records depends upon the nature of the records and data available. It is not possible to give a formula which can be applied in every situation. However, as a general rule, the following steps are followed :

Step 1 Prepare opening Balance Sheet, if last year's Balance Sheet is not available. In examination problem on incomplete records, it may not be possible to prepare the opening Balance Sheet due to the missing out of opening balances of certain assets and liabilities. For example, opening debtors or opening creditors or opening cash in hand may be missing. In such a situation, students are advised to prepare the Balance Sheet as far as possible with the available information and leave it for the time being. (I have discussed the procedures of calculating missing figures in the next few pages.)

Step 2 If no Cash Account or Bank Account is maintained properly, a careful scrutiny of the Bank Statement or Pass Book shall be made and enquiry should be done in respect of the amount of cash takings which has been used by the trader for meeting personal expenses, business expenses or for cash purchases, etc. After collecting information through enquiry and scrutiny, a Cash Book (with cash and bank columns etc.) should be prepared as follows :

Dr. **Cash Book** **Cr.**

Particulars	Cash	Bank	Particulars	Cash	Bank
To Balance b/d			By Sundry Creditors (Payments)		
To Sundry Debtors (Collection)			By Assets (Purchased)		
To Sales (Cash)			By Drawings		
To Income from Interest			By Wages		
To Sale of Assets			By Balance c/d		

In examination problems, the opening or closing balance of cash or bank may be missing. The balance of the Cash Book will represent the respective figure at the beginning or at the end. Cash Book must be prepared even when both the opening and closing balances of cash and bank are given. The shortage on the debit side of cash column represents cash sales or capital introduced or sundry income. Similarly, shortage on the credit side of the cash column represents cash purchases, drawing or sundry expenses. Where the Cash Book is maintained, care should be taken in respect of private income and private expenditure which have been entered in the Cash Book. All the private income such as interest on private investment, etc should be credited to Capital Account. Similarly, all the private payments should be debited to Capital Account.

Step 3 Prepare Total Debtors Account, Total Creditors Account, Bills Receivable Account and Bills Payable Account, Total Sales Account and Total Purchases Account. The preparation of these accounts will help for finding out different missing information regarding; (i) opening/closing debtors balances; (ii) opening/closing creditors balances; (iii) credit purchases; and (iv) credit sales, etc.

Step 4 Now complete the opening Balance Sheet (left incomplete at Step 1) with the available information. The balance of the Balance Sheet represents ***Opening Capital***.

Step 5 Draft a pro-forma Profit and Loss Account and Balance Sheet (this is without figures).

Step 6 Enter the balances from the opening Balance Sheet into the appropriate ledger accounts or the appropriate place in the final accounts

Step 7 Post the cash and bank accounts entries either to the appropriate ledger accounts or to the draft final accounts.

Step 8 Enter the closing adjustments (depereciation, outstanding, prepaid, bad debts, stock etc.) either in the appropriate ledger account or the draft final accounts, making sure that the double entry is followed.

Step 9 Transfer the balancing figures of the ledger account to the final accounts.

Step 10 Complete the final accounts.

Initially these steps may look complicated and difficult to remember. Actually they should not cause too many problems, if you practice a little.

Calculation of Missing Figures

In examination problems on incomplete records, there must be certain missing figures. For finding out those, the relevant account is prepared. Missing figures come out by way of ***balancing figures***.

Illustration 10

S, a trader, does not keep a complete set of books. On May 1, 2014 his debtors were ₹ 24,500 and creditors ₹ 7,500.

A summary of his Cash Book for the year to 30th April, 2015 showed the following totals:

	Cash (₹)	Bank (₹)
Credits — Payments to Creditors for purchases	1,350	11,250
Deibis — Receipts from Debtors for sales	—	21,250
Sale of machinery	13,000	—
Rent of warehouse sublet	390	—
Cash sales	5,000	3,750
Cash Capital introduced on November 1, 2014	—	2,500

At April 30, 2015 the debtors and creditors respectively amounted to ₹ 44,000 and ₹ 9,750; Cash discount allowed to debtors were ₹ 230 and those received from creditors were ₹ 810.

Ascertain Total Sales and Total Purchases for the year.

Solution

Dr. Total Debtors Account Cr.

Date	Particulars	₹	Date	Particulars	₹
1.5.2014	To Balance b/f	24,500	30.4.2015	By Bank	21,250
30.4.2015	To Credit Sales (balancing figure)	40,980	30.4.2015	By Discount allowed	230
			30.4.2015	By Balance c/d	44,000
		65,480			65,480

Dr. Total Creditors Account Cr.

Date	Particulars	₹	Date	Particulars	₹
30.4.2015	To Cash	1,350	1.5.2014	By Balance b/f	7,500
30.4.2015	To Bank	11,250	30.4.2015	By Credit purchases (balancing figure)	15,660
30.4.2015	To Discount received	810			
30.4.2015	To Balance c/d	9,750			
		23,160			23,160

Calculation of Total Sales and Total Purchases : Total Sales = Cash ₹ 8,750 + Credit ₹ 40,980 = ₹ 49,730;
Total Purchases = Cash ₹ Nil + Credit ₹ 15,660 = ₹ 15,660.

Illustration 11

Sri Bose kept his books under Single Entry System. From the following particulars obtained from his books, you are required to calculate : Total Sales and Total Purchases during the year 2014-15.

	₹
Balance as on 1.4.2014 :	
Debtors	56,250
Creditors	43,525
Bills Receivable	30,200
Bills Payable	15,275
Transactions during the year :	
Cash Sales	10,280
Cash Purchases	18,530
Cash paid to Creditors (including ₹ 2,000 for purchase of office furniture)	26,500
Cash received from Debtors	31,960
Discount earned from suppliers	2,325
Bad Debts written off	3,200
Return Inward	2,650
Discount allowed to customers	3,150
Return Outward	2, 000
Payment made against Bills Payable	16,000
Cash received against Bills Receivable	28,300
Balance as on 31.3.2015 :	
Debtors	52,450
Creditors	39,000
Bills Receivable	27,200
Bills Payable	27,900

Solution

Dr. Bills Payable Account Cr.

Date	Particulars	₹	Date	Particulars	₹
2014 ?	To Cash A/c	16,000	1.4.2014	By Balance b/d	15,275
31.3.2015	To Balance c/d	27,900		By Total Creditors A/c (Balancing figure)	28,625
		43,900			43,900

Dr. Total Creditors Account Cr.

Date	Particulars	₹	Date	Particulars	₹
2015 ?	To Cash A/c (₹ 26,500 – 2,000)	24,500	1.4.2014	By Balance b/d	43,525
	To Discount Received A/c	2,325		By Credit Purchases (Balancing figure)	52,925
	To Purchase Returns A/c	2,000			
	To Bills Payable A/c	28,625			
31.3.2015	To Balance c/d	39,000			
		96,450			96,450

Dr. Bills Receivable Account Cr.

Date	Particulars	₹	Date	Particulars	₹
1.4.2014	To Balance b/d	30,200	?	By Cash A/c	28,300
	To Debtors A/c (Balancing figure)	25,300	31.3.2015	By Balance c/d	27,200
		55,500			55,500

Dr. Total Debtors Account Cr.

Date	Particulars	₹	Date	Particulars	₹
1.4.2014	To Balance b/d	56,250	?	By Cash A/c	31,960
	To Credit Sales (Balancing figure)	62,460		By Bad Debts A/c	3,200
				By Return Inward A/c	2,650
				By Discount Allowed A/c	3,150
				By Bills Receivable A/c	25,300
			31.3.2015	By Balance c/d	52,450
		1,18,710			1,18,710

(a) Total Sales = Cash Sales + Credit Sales = ₹ 10,280 + ₹ 62,460 = ₹ **72,740**.
(b) Total Purchases = Cash Purchases + Credit Purchases = ₹ 18,530 + ₹ 52,925 = ₹ **71,455**.

Illustration 12

From the following facts supplied by A, who keeps his books on single entry, you are required to calculate Total Purchases and Bills Payable Account:

	₹		₹
Opening balance of Bills payable	5,000	Bills payable discharged during the year	8,900
Opening balance of Creditors	6,000	Cash paid to Creditors during the year	30,200
Closing balance of Bills payable	9,000	Returns outwards	1,200
Closing balance of Creditors	4,000	Cash purchases	25,800

Solution

Dr. Bills Payable Account Cr.

Particulars	₹	Particulars	₹
To Cash	8,900	By Balance b/f	5,000
To Balance c/d	9,000	By Total creditors (balancing figure)	12,900
	17,900		17,900

Dr. Total Creditors Account Cr.

Particulars	₹	Particulars	₹
To Cash	30,200	By Balance b/f	6,000
To Returns outwards	1,200	By Credit purchases (balancing figure)	42,300
To Bills payable (Acceptance given)	12,900		
To Balance c/d	4,000		
	48,300		48,300

Total purchases = Cash ₹ 25,800 + Credit ₹ 42,300 = ₹ 68,100.

Illustration 13

From the following facts supplied by Mr X, who keeps his books on the single entry system, you are required to calculate "Total Sales" :

Opening balance of bills receivable ₹ 2,500; Opening balance of sundry debtors ₹ 3,900; Closing balance of bills receivable ₹ 3,500; Closing balance of Sundry debtors ₹ 2,540; Bills receivable encashed during the year ₹ 10,000; Cash received from Debtors during the year (Including ₹ 300 being the sales proceeds of an old typewriter sold on credit received during the year) ₹ 29,000; Returns Inwards ₹ 560; Bad debts written-off ₹ 700; Bills receivable dishonoured ₹ 500; Cash Sales ₹ 7,000.

Solution

Dr. Bills Receivable Account Cr.

Particulars	₹	Particulars	₹
To Balance b/f	2,500	By Cash	10,000
To Total Debtors A/c	11,500	By Total Debtors A/c (Bills receivable dishonoured)	500
(Bills receivable recd. during the year — balancing figure)		By Balance c/d	3,500
	14,000		14,000

Dr. Total Debtors Account Cr.

Particulars	₹	Particulars	₹
To Balance b/f	3,900	By Cash (₹ 29,000 — ₹ 300)	28,700
To Bills Receivable (dishonoured)	500	By Returns Inwards	560
To Credit sales (balancing figure)	39,600	By Bad debts	700
		By Bills Receivable	11,500
		By Balance c/d	2,540
	44,000		44,000

Total sales = Cash ₹ 7,000 + Credit ₹ 39,600 = ₹ 46,600.

Illustration 14

From the following information, calculate Drawings in cash by the proprietor :

Opening cash in hand	10,000	Cash purchases	15,000
Opening cash at bank	5,000	Purchase of furniture (for office use) in cash	600
Cash sales	20,000	Expenses — Cash	1,000
Cash collected from Debtors	50,000	Expenses — Cheque	1,500
Drawings by cheque	5,000	Cash deposited	60,000
Cheque issued to creditors	30,000	Closing cash in hand	12,500
Closing cash at bank	8,500		

Solution

Dr. **Cash Book** **Cr.**

Particulars	Cash	Bank	Particulars	Cash	Bank
To Balance b/f	10,000	5,000	By Drawings		5,000
To Sales	20,000		By Creditors		30,000
To Sundry Debtors	50,000		By Purchases	15,000	
To Cash "C"		60,000	By Office furniture	600	
To Bank "C"	20,000		By Sundry expenses	1,000	1,500
			By Bank "C"	60,000	
			By Cash (balancing) "C"		20,000
			By Drawings (balancing figure)	10,900	
			By Balance c/d	12,500	8,500
	1,00,000	65,000		1,00,000	65,000

Therefore, the drawings for the period is ₹ 10,900 in cash.

Illustration 15

X does not maintain proper books of account. From the following information, prepare Trading and Profit and Loss Account for the year ended December 31, 2014 and a Balance Sheet as on that date :

Assets and Liabilities	On 31.12.2013 ₹	On 31.12.2014 ₹
Debtors	9,000	12,500
Stock	4,900	6,600
Furniture	500	750
Creditors	3,000	2,250

Analysis of other transactions are :	₹
Cash collected from Debtors	30,400
Cash paid to Creditors	22,000
Salaries	6,000
Rent	750
Office Expenses	900
Drawings	1,500
Fresh Capital introduced	1,000
Cash Sales	750
Cash Purchases	2,500
Discount Received	350
Discount Allowed	150
Return Inward	500
Return Outward	400
Bad Debts	100

He had ₹ 2,500 cash at the beginning of the year.

Mr Sen did not keep the books of accounts of his business in double entry system. But he maintained the following record of cash transactions :

Receipts	₹	Payments	₹
Opening (1.1.2014) :		Purchase	30,000
Cash in Hand	30,000	Payment to Creditors	45,000
Cash at Bank	40,000	Wages	20,000
Sales	80,000	Salary	22,000
Collection from Debtors	75,000	Rent	6,000
Sale of Furntirue	5,000	Outstanding rent of last year	2,000
		Selling Expenses	3,000

		Closing (31.12.2014) :	
		Cash in Hand	12,000
		Cash at Bank	90,000
	2,30,000		2,30,000

The following information is also received :

Particulars	On 31.12.2013 ₹	On 31.12.2014 ₹
Debtors	60,000	75,000
Creditors	20,000	15,000
Stock-in-trade	13,000	18,000
Machinery	80,000	80,000
Furntirue	30,000	17,000

Furniture was sold on 1 January, 2014 and on the same date Mr Sen took furniture worth ₹ 5,000 for his personal use. Depreciation on machinery and furniture was charged @ 10% per annum. Debt of ₹ 1,000 became bad.

Prepare Trading and Profit and Loss Account for the year ended 31 December, 2014 and Balance Sheet as on that date.

Solution

Mr Sen

		Bank		90,000
		Cash		12,000
	2,82,300			2,82,300

Working Notes :

Dr. (1) Creditors Account Cr.

Date	Particulars	₹	Date	Particulars	₹
2013 ?	To Cash A/c	45,000	1.1.2013	By Balance b/d	20,000
31.12.2013	To Balance c/d	15,000		By Purchases A/c (Balancing figure)	40,000
		60,000			60,000

Dr. (2) Debtors Account Cr.

Date	Particulars	₹	Date	Particulars	₹
1.1.2013	To Balance b/d	60,000	2013 ?	By Cash A/c	75,000
	To Sales A/c (Balancing figure)	91,000		By Bad Debts A/c	1,000
			31.12.2013	By Balance c/d	75,000
		1,51,000			1,51,000

(3) Balance Sheet of Mr Sen as at 1st January, 2014

Liabilities	₹	Assets	₹
Capital (Balancing figure)	2,31,000	Machinery	80,000
Creditors	20,000	Furniture	30,000
Outstanding Rent (Last year's)	2,000	Debtors	60,000
		Stock	13,000
		Bank	40,000
		Cash	30,000
	2,53,000		2,53,000

(4) Loss on Sale of Furniture

Cost of furniture sold ₹ 30,000 – ₹ (17,000 + 5,000) = ₹ 8,000.

Loss on sale = ₹ (8,000 – 5,000) = ₹ 3,000.

(5) Depreciation on Furniture = 10% of ₹ 17,000 = ₹ 1,700.

Illustration 17

Mr X carries on a small business, but he does not maintain a complete set of books of accounts. He banks all receipts and makes all payments only by means of cheques. He maintains properly a Cash Book, a Sales Ledger and a Purchase Ledger. He also makes a proper record of the assets and liabilities as at the close of every accounting year. From such records you are able to gather the following facts :

	₹
Receipts for the year ended March 31, 2014 :	
From Sundry Debtors (Sales Ledger Account)	17,625
Cash Sales	4,125
Paid in by Mr X, the proprietor	2,500
Payments made in the year ended March 31, 2014 :	
New Furniture Purchased	625
Drawings	1,500
Wages	6,725
Salaries	1,125
Interest paid	75
Telephone	125
Rent	1,200
Light and Power	475
Sundry Expenses	2,125
Sundry Creditors (Purchase Ledger Accounts)	7,625

Assets and Liabilities:

Particulars	As on 31.3.2013 ₹	As on 31.3.2014 ₹
Purchase Ledger Balance (Creditors)	2,525	2,400
Sales Ledger Balance (Debtors)	3,750	6,125
Bank	625	—
Stock	6,250	3,125
Furniture	7,500	7,315

From the above data prepare the Trading and Profit and Loss Account for the year ended 31st March, 2014 and the Balance Sheet as on that date.

To Balance c/d	46,000	By Purchases A/c (Note 7)	2,72,500
	3,26,000		3,26,000

(5) Balance Sheet as at 1st January, 2014

Liabilities	₹	Assets	₹
Capital (Balancing figure)	1,69,000	Fixed Assets	7,500
Creditors (Note 4)	53,500	Debtors	1,02,500
		Stock	50,000
		Bank (Note 1)	62,500
	2,22,500		2,22,500

(6) Calculation of Sales

	₹
Cost of goods sold	2,60,000
Profit 25%	65,000
Sales	3,25,000

(7) Opening Stock + Purchases – Closing Stock = Cost of Goods sold
or, Purchases = Cost of Goods Sold – Opening Stock + Closing Stock
or, Purchases = ₹ 2,60,000 – ₹ 50,000 + ₹ 62,500 = ₹ **2,72,500**.

Illustration 19

P maintains accounts under single entry system and furnishes the following information for the year ending 31.12.2001 (all figures in rupees) :

Date	Bank	Stock	Debtors	Furniture (after depreciation)	Building	Creditors
1.1.2001	28,000	30,000	45,000	15,000	1,50,000	32,000
31.12.2001	?	40,000	33,000	18,000	?	36,000

Cost of goods sold during the year was ₹ 3,60,000, which constituted 75% of the sales for the year. The rate of gross profit is 25% on sales.

All purchases and sales are on credit and amounts received from customers and payments to suppliers are by cheques. P realised ₹ 10,000 in cash on the sale of scrap from which he paid ₹ 6,000 as freight on purchases and the balance was retained for his personal use.

Details of his other transactions with the bank are as under :

Receipts

Capital invested ₹ 1,50,000; Sale of furniture (book value ₹ 1,000) ₹ 800.

Payments

10% Govt. Bonds (face value ₹ 1,40,000 purchased on 1.7.2001) ₹ 1,50,000; Salaries ₹ 60,000; Taxes (11 months ending 30.11.2001) ₹ 11,000; Printing and stationery ₹ 7,800; Miscellaneous expenses ₹ 12,000; Drawings ₹ 26,000.

Bad Debts written-off during the year were ₹ 7,000. Furniture has been depreciated by 10% and Building is to be depreciated by 2%.

The shop assistant is entitled to a commission of 10% of net profit after charging his commission.

Prepare Trading and Profit and Loss Account for the year ending 31.12.2001 and Balance Sheet as on that date.

[I.C.W.A. (Foundation) — Dec., 2002]

Solution

P

Dr. Trading and Profit and Loss Account for the year ended 31st December, 2001 Cr.

Particulars	₹	Particulars	₹

(5) Balance Sheet as at 1st January, 2001

Liabilities	₹	Assets	₹
Capital (Balancing figure)	2,36,000	Building	1,50,000
Creditors	32,000	Furniture	15,000
		Stock	30,000
		Debtors	45,000
		Bank	28,000
	2,68,000		2,68,000

(6) Net Profit before shop assistant's commission = ₹ 33,000. Therefore, commission = ₹ 33,000 × 10/110 = ₹ 3,000.

Illustration 20

On 1.1.2014, Mr S. Sen commenced business. He did not maintain proper books of account. At the end of the year, the following information is obtained after going through the records :

(i) All cash received from cash sales was banked after keeping ₹ 1,000 p.m. for petty expenses and after withholding monthly drawings of ₹ 500.

(ii) Counter foils of pay-in-slip revealed the following deposits :
capital contributed ₹ 1,00,000; balance of cash sales ₹ 78,000; collections from debtors ₹ 1,00,000.

(iii) Counter foils of cheques revealed the following payments :
payment to creditors ₹ 1,50,000; salary ₹ 35,000; purchase of furniture ₹ 10,000.

(iv) Sales were effected at a uniform rate of gross profit at 25% on sales.

(v) Discount allowed ₹ 2,000, discount received ₹ 3,000 and bad debts ₹ 1,000.

(vi) Petty cash expenses were : postage ₹ 200; stationery ₹ 1,000; conveyance ₹ 2,000 and rent ₹ 2,200.

(vii) On 31.12.2014 amount due from debtors ₹ 10,000 and amount owing to creditors were ₹ 20,000.

Prepare Trading and Profit and Loss Account for the year ended 31.12.2014 and a Balance Sheet as on that date.

Solution

S. Sen

Dr. Trading and Profit and Loss Account for the year ended 31st December, 2014 Cr.

Particulars	₹	Particulars		₹
To Purchases	1,73,000	By Sales — Cash	96,000	
To Gross Profit c/d (25% of ₹ 2,09,000)	52,250	Credit	1,13,000	2,09,000
		By Closing Stock (Balancing figure)		16,250

	1,73,000		1,73,000

(5) Amount of cash sales = ₹ 78,000 + 6,000 (Drawings @ ₹ 500 p.m.) + ₹ 12,000 (Petty expenses @ ₹ 1,000 p.m.) = ₹ 96,000.
(6) For lack of information, depreciation on furniture has not been provided.

Illustration 21

A fire in the office of Pioneer Trading Limited occured in the evening of 31.3.2015, as a result of which the Cash Book and the Nominal Ledger kept in the cupboard were completely destroyed. The cash box containing cash representing the day's taking for 31.3.2015 was also destroyed. The insurance company concerned requests you to ascertain the amount of cash lost in the fire accident.

The Balance Sheet of the Company as at 31.12.2014 was as follows :

Liabilities	₹	Assets		₹
Share Capital	60,000	Office Furniture (at cost)	14,616	
Reserve and Balance of Profit and Loss Account	85,028	Less: Depreciation	7,204	7,412
Creditors	14,140	Stock (at cost)		75,742
Dividend Unpaid	6,000	Debtors		71,212
		Bank		10,802
	1,65,168			1,65,168

From the records and documents saved from the accident, the following information was obtained :

Balance on 31.3.2015 —

Debtors : ₹ 1,19,612; Creditors : ₹ 31,610;

Bank balance after adjusting outstanding ₹ 14,822.

Transactions from 1.1.2015 to 31.3.2015 were as follows —

Cash and Credit sales less returns ₹ 8,21,154; Miscellaneous expenses ₹ 2,03,124; Wages and salaries ₹ 90,634; Office furniture purchased ₹ 1,300; Dividend paid ₹ 6,000; Goods purchased on credit ₹ 4,69,212; Depreciation on furniture ₹ 360.

All receipts have been banked except those for 31.3.2015. Stock on 31.3.2015 (value at cost) was ₹ 53,816.

Required :

(i) A statement showing the computation of the amount of cash lost in the fire accident; and

(ii) Trading, and Profit and Loss Account for 3 months ending on 31.3.2015 and a Balance Sheet as at that date.

Solution (i) Statement Showing the Computation of the Amount of Cash Lost in Fire

Particulars	₹
Opening balance of Debtors	71,212
Add : Cash and Credit sales less returns	8,21,154
	8,92,366
Less : Balance of Debtors on 31.3.2015	1,19,612
Cash Available for Deposit into the Bank	7,72,754
Less : Cash Deposited into the Bank (Note 2)	7,56,820
Cash Lost by Fire	15,934

Pioneer Trading Limited

Dr. (ii) Trading and Profit and Loss Account for the year ended 31st March, 2015 Cr.

Particulars	₹	Particulars	₹

			?	By Dividend	6,000
			31.3.2015	By Balance c/d	14,822
		7,67,622			7,67,622

(3) It is assumed that wages and salaries of ₹ 90,634 is a direct expense. If it is taken as an indirect expense, the gross profit will be ₹ 3,30,016.

(4) For lack of information in respect of insurance claim for loss of cash by fire, it has been charged to Profit and Loss Account. If any amount is received from the insurance company in the subsequent period, Cash Account will be debited and Profit and Loss Adjustment Account will be credited as a prior period adjustment.

Illustration 22

The following balances are available from the books of Sanjoy as on 31.12.2013 and 31.12.2014 (all figures in rupees) :

Date	Building	Equipments	Furniture	Debtors	Creditors	Stock	Bank Loan	Cash
31.12.2013	60,000	1,20,000	10,000	?	32,000	?	20,000	32,000
31.12.2014	60,000	1,34,000	10,000	48,000	?	34,000	16,000	22,000

The transactions of Sanjoy during the year ended 31.12.2014 were the following :

Collection from Debtors ₹ 1,86,000; Payment to Creditors ₹ 1,22,000; Cash Purchases ₹ 32,000; Expenses ₹ 20,000; Sale of one Equipment (book value ₹ 10,000) ₹ 6,000; Drawings ₹ 20,000.

Cash sales amounted to 10% of total sales. Credit sales amounted to ₹ 1,80,000. Credit purchases were 80% of total purchases. Sanjoy sells goods at cost plus $33^1/_3$%. His suppliers allowed him discount ₹ 2,000.

Equipments and furniture are to be depreciated by 10% p.a. and building by 2% p.a.

Prepare the Trading and Profit and Loss Account for the year ended 31.12.2014, and a Balance Sheet as on that date.

Solution

Sanjoy

Dr. Trading and Profit and Loss Account for the year ended 31st December, 2014 Cr.

Particulars	₹	Particulars	₹
To Opening Stock (Balancing figure)	24,000	By Sales (Note 1)	2,00,000
To Purchases (Note 2)	1,60,000	By Closing Stock	34,000
To Gross Profit c/d (Note 3)	50,000		
	2,34,000		2,34,000
To Expenses	20,000	By Gross Profit b/d	50,000
To Loss on Sale of Equipments (Note 4)	4,000	By Discount Received	2,000
To Depreciation on (Note 5) :			
(Furniture : 1,000; Equipments : 12,200; Building : 1,200)	14,400		
To Net Profit	13,600		
	52,000		52,000

Balance Sheet of Sanjoy as on 31st December, 2014

Liabilities		₹	Assets		₹
Capital :			Building	60,000	
Opening Balance (Note 8)	2,48,000		Less : Depreciation	1,200	58,800
Add : Net Profit	13,600		Equipments	1,20,000	
	2,61,600		Less: Sold	10,000	
Less : Drawings	20,000	2,41,600		1,10,000	
Bank Loan		16,000	Add: Additions	24,000	
Creditors (Note 7)		36,000		1,34,000	
			Less : Depreciation	12,200	1,21,800
			Furniture	10,000	
			Less : Depreciation	1,000	9,000
			Debtors		48,000
			Stock		34,000
			Cash		22,000
		2,93,600			2,93,600

Working Notes :

(1) Since cash sales were 10% of total sales, credit sales were 90% of total sales which were ₹ 1,80,000. Therefore, cash sales were ₹ 1,80,000 / 9 = ₹ 20,000. Total sales were ₹ 2,00,000.

(2) Since credit purchases were 80% of total purchases, cash purchases were 20% of total purchases which were ₹ 32,000. Therefore, credit purchases were ₹ 32,000 x 4 = ₹ 1,28,000. Total purchases were ₹ 1,60,000.

(3) Gross profit was $33^1/_3$% on cost or 25% on sales. Therefore, gross profit was 25% on ₹ 2,00,000 = ₹ 50,000.

(4) Loss on sale of equipments = ₹ (10,000 – 6,000) = ₹ 4,000.

(5) Depreciation on : Furniture — 10% on ₹ 10,000 = ₹ 1,000; Equipments — 10% on ₹ 1,10,000 (1,20,000 – 10,000) for full year and 10% on ₹ 24,000 (addition) for half year = ₹ (11,000 + 1,200) = ₹ 12,200; Building — 2% on ₹ 60,000 = ₹ 1,200.

Dr. (6) Debtors Account Cr.

Date	Particulars	₹	Date	Particulars	₹
1.1.2014	To Balance b/d (Balancing figure)	54,000	31.12.2014	By Cash	1,86,000
31.12.2014	To Credit Sales	1,80,000	31.12.2014	By Balance c/d	48,000
		2,34,000			2,34,000

Dr. (7) Creditors Account Cr.

Date	Particulars	₹	Date	Particulars	₹
31.12.2014	To Cash	1,22,000	1.1.2014	By Balance b/d	32,000
31.12.2014	To Discount Received	2,000	31.12.2014	By Credit Purchases (Note 2)	1,28,000
31.12.2014	To Balance c/d (Balancing figure)	36,000			
		1,60,000			1,60,000

(8) Balance Sheet of Sanjoy as on 1st January, 2014

Liabilities	₹	Assets	₹
Capital (Balancing figure)	2,48,000	Building	60,000
Bank Loan	20,000	Equipments	1,20,000
Creditors	32,000	Furniture	10,000
		Debtors (Note 6)	54,000
		Stock (Note 9)	24,000
		Cash	32,000
	3,00,000		3,00,000

(9) Opening stock = Sales + Closing Stock – Purchases – Gross Profit = ₹ (2,00,000 + 34,000 – 1,60,000 – 50,000) = ₹ 24,000.

Tutorial Note. It should be noted that depreciation on equipments is to be charged @ 10% p.a. Therefore, on addition, depreciation has been charged for 1/2 year.

	60,000		60,000

(7) Ascertainment of Sales

Particulars	₹
Opening Stock	48,000
Purchases (Note 4)	2,73,600
Freight	18,000
	3,39,600

Less:	Advertisement	5,400	
	Closing Stock	42,000	47,400
Cost of Goods sold			2,92,200
Add: Profit 50%			1,46,100
		Sales	4,38,300

(8) Face value of investment purchased on 1.7.2014 = ₹ 57,600 / 96 x 100 = ₹ 60,000. Interest is payable @ 4% on face value of ₹ 60,000 for 6 months. Therefore, interest accrued = ₹ 60,000 x 4% x 1/2 = ₹ 1,200.

Illustration 24

M.H. Kabir owns a small business and keeps all the accounting records himself on a computer using basic accounting package. He does not understand financial statements and therefore never uses this part of the software. He does, however, regularly print out the analysis of the receipts and payments in and out of his bank account. Unfortunately, his computer's hard disk was crashed and his accountant now wants to prepare his accounts. The accountant has the Balance Sheet of the previous year and this is given below :

Balance Sheet as at 31st March, 2014

Liabilities	₹	Assets		₹
Capital	8,20,000	**Fixed Assets :**		
Long-term Loan (10%)	1,00,000	Machinery		2,50,000
Current Liabilities :		Vehicles		5,00,000
Trade Creditors	1,60,000	**Current Assets :**		
Outstanding Vehicles Expenses	10,000	Stock		1,20,000
		Sundry Debtors	1,90,000	
		Less: Provision for Bad Debts	10,000	1,80,000
		Prepaid Advertising		30,000
		Bank		10,000
	10,90,000			10,90,000

The accountant has asked Kabir for some additional information and Kabir has prepared the following schedule (all figures in rupees) :

1. The following payments appeared on the bank statement for the year ended on 31st March, 2015 :

(i)	Wages	1,50,000	
(ii)	Payment to Suppliers	13,50,000	Kabir takes a cash discount of 10% on invoice amount on all payments to suppliers.
(iii)	Vehicle Expenses	90,000	
(iv)	New Vehicle	1,20,000	
(v)	General Expenses	80,000	
(vi)	Advertising	30,000	This includes a prepayment of ₹ 10,000.
(vii)	Loan Interest	5,000	₹ 5,000 was paid on 1st April, 2015.
(viii)	Drawings	2,00,000	Kabir also took goods from the business worth ₹ 20,000.
	TOTAL	20,25,000	

2. The following receipts appeared on the bank statement in the year ended 31st March, 2015 :

Receipts from sale	₹ 21,50,000
Sale of old vehicle	20,000
	21,70,000

3. The following amounts relate to cheques dated before 31st March, 2015, but not presented by that date :

	₹
General expenses	60,000
Vehicle expenses	30,000

4. At 31st March, 2015 :
Sundry Debtors were ₹ 2,10,000 (after excluding bad debts for ₹ 20,000);
Sundry Creditors ₹ 1,80,000; and Stock ₹ 1,00,000.

The accountant has the following information on his file :

(i) The net book value of the old vehicle which was sold was ₹ 30,000.

(ii) Depreciation is charged on the net book value at the year ended :
Vehicles 25% and Machinery 20%.

(iii) A general provision is made for doubtful debts of 5% of debtors, after bad debts have been written off.

You are required to prepare :

(i) Profit and Loss Account for the year ended on 31st March, 2015;

(ii) Balance Sheet as at 31st March, 2015.

Illustration 25

The following is the Balance Sheet of the retail business of Mr Padamsi as at 31st December, 2014.

Particulars	₹	Particulars	₹
Mr Padamsi's Capital	1,25,000	Furniture & Fittings	25,000
Creditors for goods	30,000	Stocks	75,000
Outstanding expenses (Rent)	1,000	Sundry Debtors	20,000
		Cash at bank	35,000
		Cash in hand	1,000
	1,56,000		1,56,000

You are furnished with the following information :

1. Mr Padamsi always sells his goods at a profit of 25% on sales.
2. Goods are sold for cash and credit. Credit customers pay by cheques only.
3. Payments for purchases are always made by cheques.
4. It is the practice of Mr Padamsi to send to the bank every weekend the takings of the week after paying every week salaries of ₹ 250 to the clerk, sundry expenses of ₹ 50 and personal expenses of ₹ 100.

An analysis of the Bank Pass Book for the period ending 31st March, 2015 disclosed the following:

Payment to Creditors ₹ 75,000; Payment of rent ₹ 4,000; Amount remitted into the bank ₹ 1,35,000 including cheques for ₹ 10,000 received from customers to whom the goods were sold on credit.

The following are the balances on 31st March, 2015 :

Stocks ₹ 32,500; Creditors for goods ₹ 32,500; Sundry Debtors ₹ 30,000.

On the evening of 31st March, 2015 the cashier absconded with the cash available in the cash box.

You are required to prepare a statement showing the amount of cash defalcated by the cashier and also a Profit and Loss Account for the period ended 31st March, 2015 and a Balance Sheet as on that date.

Solution

Padamsi

Dr. Trading and Profit and Loss Account for the period ended 31st March, 2015 Cr.

Particulars	₹	Particulars	₹
To Opening stock	75,000	By Cash sales	1,40,000
To Purchases	77,500	By Credit sales	20,000
To Gross profit c/d	40,000	By Closing stock	32,500
	1,92,500		1,92,500
To Salaries (₹ 250 x 13)	3,250	By Gross profit b/d	40,000
To Sundry expenses (₹ 50 x 13)	650		
To Rent (₹ 4,000 — ₹ 1,000)	3,000		
To Defalcation loss	10,800		
To Net profit	22,300		
	40,000		40,000

Balance Sheet of Padamsi as at 31st March, 2015

Liabilities		₹	Assets		₹
Capital:			Furniture & fittings		25,000
Opening balance	1,25,000		Stock		32,500
Add: profit	22,300		Sundry Debtors		30,000
	1,47,300		Cash at bank		91,000
Less: Drawings (₹ 100 x 13)	1,300	1,46,000			
Creditors		32,500			
		1,78,500			1,78,500

Working Notes : [Taking 13 weeks; (52/12) x 3]

Cash Book

Dr.		Cr.	
To Balance b/f	1,000	By Bank	1,25,000
To Sales	1,40,000	By Salary	3,250
		By Sundry expenses	650
		By Drawings	1,300
		By Defalcation (bal.fig)	10,800
	1,41,000		1,41,000

Bank Account

Dr.		Cr.	
To Balance b/f	35,000	By Creditors	75,000
To Cash	1,25,000	By Rent	4,000
To Debtors	10,000	By Balance c/d	91,000
	1,70,000		1,70,000

Sundry Debtors Account

Dr.		Cr.	
To Balance b/f	20,000	By Bank	10,000
To Sales	20,000	By Balance c/d	30,000
	40,000		40,000

Sundry Creditors Account

Dr.		Cr.	
To Bank	75,000	By Balance b/f	30,000
To Balance c/d	32,500	By Purchases	77,500
	1,07,500		1,07,500

Cost of Sales = Opening Stock + Purchases — Closing Stock = ₹ 75,000 + ₹ 77,500 – ₹ 32,500 = ₹ 1,20,000. Total Sales = ₹ 1,20,000/75 x 100 = ₹ 1,60,000. Credit Sales ₹ 20,000. So Cash Sales = ₹ 1,40,000. **No depreciation has been charged on furniture for lack of information.**

Illustration 26

Dear Mr Hanif,

I am most relieved that you have agreed to assist me by sorting out the financial affairs of my second-hand business, which, as you know, commenced on 1 January, 2014. Such records as I have kept are, unfortunately, to be found on now rather scruffy scraps of paper stored in a large cardboard box. Doubtless, you will want to examine these records for yourself, but I thought it might assist you if I were to summarize my business dealings up to 31 December, 2014 as I recall them.

In December, 2013, I was lucky enough to win ₹ 5,000 on the football pools, and this, together with ₹ 1,000 loaned to me by a friend — I agreed, incidentally, to pay him 10% per year interest — formed the initial capital of ₹ 6,000. I put ₹ 5,500 into the bank immediately, in a separate business account, I needed a lorry to enable me to collect and deliver the second-hand goods, a dealer was asking ₹ 1,300 for a second-hand lorry, but, I beat him down to ₹ 840. I've only paid by cheque ₹ 200 of this so far, but as I will finish paying the full ₹ 840 in three years, it will be mine before it falls to pieces in another five years from now. I rent some business premises, and, as they are fairly dilapidated, I only pay ₹ 350 a year. I've paid by cheque this year's rent and also ₹ 50 in respect of next year.

My first bit of business was to buy a job lot of 2,000 pairs of jeans for ₹ 6,000. I've paid a cheque for ₹ 4,000 so far, and my supplier is pressing me for the balance. To date, I've sold 1,500 pairs, and received ₹ 5,800, but I reckon I'm still owed ₹ 500, most of which I should be able to collect. I promptly banked the ₹ 5,800 as it was all in cheques.

I bought 800 T-shirts for ₹ 1,200 out of my bank account. I've sold 700 of these for cash — ₹ 1,500 in all — but as the remainder have got damaged, I'd be lucky if I get ₹ 50 for them.

I managed to get some pocket-calculators cheaply — 50 of them only cost me ₹ 400, but I'm rather pleased I haven't paid for them yet, as I think there is something wrong with them. My supplier has indicated that he will in fact accept ₹ 200 for them, and I intend to take up his offer, as I reckon I can repair them for Re 1 each and then sell them at ₹ 8 a time — a good profit.

I haven't paid my cash into the bank at all, as the cash I got for the T-shirts and my initial float enabled me to pay for my petrol ₹ 400 and odd expenses ₹ 250. Also, it enabled me to draw ₹ 20 per week for myself. As I've done so well, I also took my wife on holiday it made a bit of a hole in the bank account but it was worth all ₹ 600 of it.

Perhaps, from what I've told you, you can work out what profit I've made, only keep it as small as possible as I don't want to pay too much tax.

Yours sincerely,
P. Ali

Required: a) From the data provided by Mr P. Ali prepare a business Trading and Profit and Loss Account for the period ended 31 December, 2014, and a Balance Sheet as at that date. Show clearly all your workings and assumptions as notes to the accounts.

On April 1, 2014 Mr Silgardo bought for ₹ 50,000 a business whose assets and liabilities are shown below. The business carried on its operations in a rented shop from which it sold cosmetics and confectionery. The business did not keep double entry accounts, but you are provided with the following information:

(i) Balance Sheet of the company as on 31st March, 2014:

Liabilities	₹	Assets	₹
Capital	50,000	**Fixed Assets :**	
Profit & Loss A/c	10,500	Furniture & fixtures (at cost)	30,000
Creditors :		**Current Assets :**	
Cosmetics	2,500	Stock of Cosmetics (at cost)	5,000
Confectionary	2,000	Stock of Confectionary (at cost)	3,000
Outstanding rent	500	Sundry Debtors : Confectionary	500

		Prepaid : Rent & Insurance	2,500
		Balance with bank	23,500
		Cash in hand	1,000
	65,500		65,500

(ii) *Analysis of the Bank statements for the year ended March 31, 2015 :*

	₹
Paid in : Cash	2,45,000
Withdrawn for :	
Purchase of cosmetics	1,00,000
Purchase of confectionary	1,10,000
Repairs	4,000
Rent	6,000
Rates & Insurance	10,000
Electricity	4,000
Mr Silgardo	15,000

(iii) *The following were paid in cash* :

	₹
Salaries	15,000
Confectionary purchases	1,500
Trade expenses	1,250
Cosmetic purchases	5,000

(iv) Mr Silgardo had taken from the shop Cosmetics for his own consumption and paid into the till the cost price of ₹ 4,550.

(v) The following are the gross profit percentages with reference to sales: Cosmetics — 9%; Confectionery — 30%

(vi) On 31st March, 2015 there were :		Stock at cost	Debtors/Prepayments and Cash	Liabilities
Cosmetics	(₹)	4,850	Nil	2,000
Confectionary	(₹)	3,500	1,000	3,000
Rent	(₹)			500
Rates & Insurance	(₹)		2,750	
Cash in hand	(₹)		250	
Accountancy / Audit fees	(₹)			2,000

(vii) Mr Silgardo has instructed you to regard any shortage in cash as being due to amounts withdrawn by him.

You are required to prepare:

(a) The Trading and Profit and Loss Account for the year ended March 31st, 2015 showing separately the gross profit from (i) Cosmetics; and (ii) Confectionery.

(b) The Balance Sheet as at March 31, 2015;

(c) Total Debtors and Total Creditors Accounts; and

(d) An Account in columnar form for cash and bank transactions.

			By Rates & Insurance		10,000
			By Electricity		4,000
			By Drawings		15,000
			By Salary	15,000	
			By Total Creditors A/c :		
			Cosmetics	5,000	
			Confectionary	1,500	
			By Trade expenses	1,250	
			By Drawings	7,050	
			By Balance c/d	250	19,500
	2,75,050	2,68,500		2,75,050	2,68,500

Working Notes : **Ascertainment of the Sales Proceeds**

Particulars	Cosmetics	Confectionary
Opening Stock	5,000	3,000
Add: Purchases	1,04,500	1,12,500
	1,09,500	1,15,500
Less: Stock used for personal purpose (at cost)	4,550	—
	1,04,950	1,15,500
Less: Closing stock	4,850	3,500
Cost of goods sold	1,00,100	1,12,000

Therefore, sale proceeds for cosmetics is $\frac{1,00,100 \times 100}{91} = ₹\ 1,10,000.$

And, sale proceeds for confectionary is $\frac{1,12,000 \times 100}{70} = ₹\ 1,60,000.$

Drawings = Goods ₹ 4,550 + Cash ₹ 2,500 + Bank ₹ 15,000 = ₹ 22,050.

Key Points

- Any set of procedures for ascertaining profits that does not provide for the ***analysis of each transaction*** in terms of the double entry system of bookkeeping is generally referred to as 'Single Entry System'.
- There are mainly two approaches for income determination : (a) the Transaction Approach, and (b) the Balance Sheet Approach.
- A Statement of Affairs is a statement of the assets, liabilities and capital prepared from incomplete records.
- A Balance Sheet is a statement of the assets, liabilities and capital extracted from ledger balances maintained under the double entry system.

THEORETICAL QUESTIONS

1. What are the essentials of the Single Entry System of Book-keeping?
   In what respects is the Double Entry System superior to it?
2. What is a Statement of Affairs? How does it differ from a Balance Sheet?
3. How are profits calculated under the Single Entry System ?
4. How would you convert a set of books of accounts from the Single Entry to the Double Entry System ?
5. What are the advantages of Single Entry Book-keeping?

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each sentence or answer each question below.

1. From incomplete records, it is possible to prepare
   A Trial Balance
   B Balance Sheet
   C Statement of Affairs
   D none of the above
2. Under single entry system, opening capital is calculated by preparing
   A Closing Balance Sheet
   B Final Statement of Affairs
   C Opening Statement of Affairs
   D Opening Balance Sheet
3. Under single entry system details of
   A expenses will not be available
   B income will not be available
   C both expenses and income will not be available
   D both income and expenses will be available
4. Final Statement of Affairs is prepared for ascertaining
   A net profit of the business
   B capital of the owner
   C financial position of the business at the end of the accounting period
   D financial position of the business at the beginning of the accounting period
5. The shortage on the debit side of the Cash Book represents
   A credit Sales
   B cash Purchases
   C cash Sales
   D credit Purchases
6. The fundamental Balance Sheet equation is :
   A Capital – Liabilities = Assets
   B Assets = Capital
   C Capital = Assets – Liabilities
   D none of the above

PRACTICAL QUESTIONS

Preparation of Statement of Profit and Statement of Affairs

1. Sri R. Mitra commenced business on 1st January 2014, with ₹ 20,000 as Capital. He kept his books on Single Entry System. On 31st December, 2014, his books disclosed the following : Sundry Creditors ₹ 7,500; Plant ₹ 15,000; Stock-in-trade ₹ 12,000; Debtors ₹ 13,500; and Cash at Bank ₹ 3,000. He drew from his business at the rate of ₹ 225 at the end of each month. On 1st July, 2014, he introduced a further capital amounting to ₹ 6,000.
You are required to prepare a statement of Profit and Loss for the year ended 31.12.2014 and a Statement of Affairs as on that date after taking into consideration the following: (i) 7.5% of sundry debtors proved to be bad; (ii) plant suffered depreciation @ 10%; and (iii) a provision for doubtful debts was required to be made at 2.5% of debtors.
2. Mr A does not maintain complete double entry books of account. From the following details, determine the profit for the year and statement of affairs at the end of the year:
₹ 1,000 (Cost) furniture was sold for ₹ 5,000 on 1.1.2014; 10% depreciation is to be charged on furniture. Mr A has drawn ₹ 1,000 per month, ₹ 2,000 was invested by Mr A in 2014. (all figures in ₹)

	1.1.2014	31.12.2014
Stock	40,000	60,000
Debtors	30,000	40,000
Cash	2,000	1,000
Bank	10,000	(O.D.) 5,000
Creditors	15,000	25,000
Outstanding Expenses	5,000	8,000
Furniture (Cost)	3,000	2,000

Bank balance on 1.1.2014 is as per Cash Book, but the bank overdraft on 31.12.2014 is as per bank statement ₹ 2,000, Cheques drawn in December, 2014 have not been encashed within the year.
3. X is a small cloth merchant, who has not kept full double entry records. His position as on 1st January 2014 stood as follows:- Cash in hand ₹ 760; Balance at Bank ₹ 6,950; Stock ₹ 12,600; Sundry Debtors ₹ 4,500; Furniture ₹ 2,000 and Sundry Creditors ₹ 4,310.
His position at the end of 2014 was as : Cash in hand ₹ 470; Balance at Bank, as per Bank Pass Book ₹ 5,930; Stock ₹ 16,700; Sundry Debtors ₹ 6,320; Furniture ₹ 2,000; Mobike ₹ 4,000; and Sundry Creditors ₹ 5,300.
During the year, he had withdrawn ₹ 400 per month for his personal expenses and purchased a new mobike for his business use for ₹ 4,000. A cheque of ₹ 1,000 issued on 29.12.2014 was presented for payment on 12.1.2015.
Prepare a Statement, showing his trading result for the year ended 31st December, 2014 and a Balance Sheet as on 31st December, 2014 after (a) providing 10% depreciation on furniture and 20% depreciation on mobike; (b) writing-off ₹ 320 as actual bad debts; and (c) making a 5% provision for likely bad debts.
4. K and D are partners in a firm sharing profits and losses as K 60% and D 40%. Their Statement of Affairs as at 31st March 2014, is given below:

Liabilities	₹	₹	Assets	₹	₹
Sundry Creditors		40,000	Plant		40,000
Capital Accounts			Furniture		15,000
K	50,000		Stock		25,000
D	30,000	80,000	Debtors		30,000
			Cash		10,000
		1,20,000			1,20,000

The partners keep their books by Single Entry System. On 31st March 2015, the position of the business was :
Plant ₹ 50,000; Furniture ₹ 20,000; Stock ₹ 40,000; Debtors ₹ 45,000; Cash ₹ 11,000 and Sundry Creditors ₹ 30,000.
On 30th September, 2014 K and D withdrew from the business ₹ 6,000 and ₹ 4,000 respectively.
You are required to ascertain the profit made by the partners during the year and draw up a Statement of Affairs as at 31st March, 2015 by taking into consideration the following further information:
Plant and Furniture are to be depreciated at 10% and 20% p.a. respectively. A Bad Debts Reserve of 2.5% to be raised against Sundry Debtors, Interest on Capital is to be allowed at 5% per annum and Interest on drawings at 12% p. a.
5. Ram, Shyam and Jadu were in partnership and towards the end of 2014, most of their books and records were destroyed in a fire. The Balance Sheet of the firm as on 31.12.2013 was as follows:

Liabilities	₹	₹	Assets	₹	₹
Sundry Creditors		15,040	Cash at Bank		6,000
Capital A/cs:			Debtors		8,800
Ram	10,000		Stock		12,500
Shyam	5,000		Plant & Machinery		4,950
Jadu	5,000	20,000	Fixture & Furniture		2,800

Current A/c:			Current A/c:		
Ram	300		Jadu		500
Shyam	210	510			
		35,550			35,550

Partners' Drawings during the year were : Ram ₹ 3,000; Shyam ₹ 2,500; and Jadu ₹ 1,500. On 31.12.2014 Cash at Bank was 8,000; Debtors ₹ 9,500; Stock ₹ 12,000; Creditors ₹ 10,000; Plant and Machinery to be depreciated at 10% and fixture and furniture at 7.5%. The partners share profits in the proportion of 2 : 1 : 1.

You are required to prepare a Statement showing net profit for the year 2014 and the division of the same between the partners, together with the Balance Sheet as at 31.12.2014.

6. A, B and C are in partnership and keep their books by single entry system. They are entitled to 5% interest on the amounts standing to their credits at the beginning of each year, and B and C are entitled to salary of ₹ 250 and ₹ 175 per month respectively, in addition. The remaining profits are to be shared as A — 1/2, B — 1/3rd, C — 1/6th.

   On 1st January, 2014 their Capital Accounts were: A — ₹ 27,600, B — ₹ 10,800 and C — ₹ 1,200 and their Plant was valued at ₹ 8,200.

   In the half-year ended 30.6.2014, each partner had drawn interest on capital to which he was entitled: B and C had received their salaries. They had also drawn at the end of each month : A — ₹ 500, B — ₹ 300 and C — ₹ 250. They had bought Plant costing ₹ 2,200 and now valued the whole at ₹ 9,500. Creditors were for ₹ 10,700, Cash — ₹ 4,600, Debtors — ₹ 30,400 and Stock — ₹ 18,900.

   Prepare Statement of Profit and Loss for half-year ended 30th June, 2014 and Balance Sheet as on that date.

7. A and B started business on January 1, 2013 with ₹ 50,000 as capital contributed equally but the profit-sharing ratio was 3 : 2. Their drawings were ₹ 300 and ₹ 200 per month respectively. They had kept no accounts except the following information :

	31.12.2013	31.12.2014
	₹	₹
Machinery at cost	20,000	25,000
Stock in trade	30,000	30,000
Debtors	50,000	60,000
Cash	2,000	500
Creditors	30,000	20,000
Outstanding expenses	4,000	3,000
Bank balance (as per pass book)	6,000	8,000

   Provision is to be made for depreciation at 10% on the cost of the machinery as at the end of the each year. Debtors on 31.12.2013, include ₹ 5,000 for goods sent out on consignment at 25% above cost, and the goods were not sold until 2014. A cheque for ₹ 1,000 had been deposited on 31.12.2013 but was credited on 2.1.2014.

   A cheque for ₹ 2,000 issued on 26.12.2014 was presented on 3.1.2015. A cheque for ₹ 1,000 was directly deposited by a customer on 27.12.2014 and a cheque for ₹ 500 deposited in December 2014 was dishonoured. No adjustment for these was made. Determine the profits for 2013 and 2014 and draw up a Balance Sheet as on 31.12.2014.

8. Naresh, Ramesh and Dinesh are partners in a firm sharing profits and losses in the ratio 5 : 3 : 2 respectively. They kept their books on the Single Entry System. On 31st March, 2014, the following Statement of Affairs are extracted from their books:

Liabilities	₹	Assets	₹
Creditors	20,000	Plant	45,000
Ramesh — Loan A/c	10,000	Land & Building	30,000
Capital		Stock	20,000
Naresh	50,000	Debtors	15,000
Ramesh	40,000	Cash	8,000
		Capital — Dinesh	2,000
	1,20,000		1,20,000

   On 31.3.2015 the Assets and Liabilities were as follows :
   Plant ₹ 50,000; Land and Building ₹ 30,000; Stock ₹ 30,000; Debtors ₹ 25,000; Creditors ₹ 25,000; Cash ₹ 15,000.
   You are required to prepare a Profit and Loss Statement for the year ended 31.3.2015 and a Statement of Affairs as at that date after taking into consideration the following additional information:
   (i) Plant is to be depreciated by 10% p.a.;
   (ii) A Reserve for Bad Debts is to be raised at 2.5%;
   (iii) Interest on Partners' Capital is to be allowed at 5% p.a.; and
   (iv) During 2014-15, Naresh and Ramesh withdrew from business ₹ 7,500 and ₹ 5,000 respectively.

9. A and B are in partnership, sharing profits and losses, two-thirds and one-third respectively. The books are kept on the single entry system and their Statement of Affairs dated 31st December, 2013 showed their position to be as follows:

Statement of Affairs of A and B as at 31st December, 2013

Liabilities	₹	Assets	₹
Capital :		Freehold Building	6,000
A	10,000	Plant and Machinery	2,000
B	4,000	Office Furniture	500
Creditors	5,000	Stock	4,000
Loan	1,000	Debtors	6,000
Bills Payable	500	Bills Receivable	1,500
		Cash	500
	20,500		20,500

On 31st December, 2014 the books disclosed the following facts: Debtors ₹ 8,000, Creditors on open accounts ₹ 8,500, Creditors for loan ₹ 1,600 and Cash ₹ 800. The Stock was valued at ₹ 4,200 and the bills receivable amounted ₹ 1,400.

An examination of the Cash Book showed that during the year, A had drawn on account of profits ₹ 1,500 and B ₹ 600. A had, in addition, withdrawn ₹ 2,000 from his Capital Account on 30th June, 2014.

The partners agree to reduce the existing valuation of the Plant and Machinery by 5 per cent and the office furniture by 10 per cent by way of depreciation, and to charge 5 per cent by way of interest on capital.

You are required to prepare:

(1) A Statement of Profit, dividing the balance between A and B; and

(2) A Statement of Affairs showing the position as at 31st December, 2014.

Preparation of Final Accounts from Incomplete Records

10 Anandram is a wholesaler in textile goods. On January 1, 2015, he had stocks of main varieties A and B valued at ₹ 14,000 and ₹ 24,000 respectively. During the six months ended June 30, 2015, his purchases were ₹ 72,000 and ₹ 1,44,000 respectively. He had taken for personal and family use one bale of variety A costing ₹ 6,000. On 30th June, his stocks were : A, ₹ 8,000 and B ₹ 18,000.

Goods were sold by Anandram at the retail prices fixed by the manufacturer, which yield 25% gross profit on sales. Determine the total sales figure of Anandram for the six months.

11. From the following particulars for the years 2013 and 2014 determine the value of closing stock at the end of 2014 :

	2013 (₹)	2014 (₹)
Opening Stock	20,000	30,000
Purchases	1,20,000	1,90,000
Sales	2,00,000	2,40,000

Uniform rate of gross profit may be assumed.

12. You are required to calculate for each product of the company as a whole:

(a) Value of Stock at 31st December, 2014, at cost;

(b) The amount of Gross Profit, as they would appear in the company's Trading Account.

The company sells three products A, B and C on which it earns gross profit percentages, calculated on normal selling prices, of 20, 25 and $33^1/_3$ respectively.

The value of its stock at 1st January, 2014 valued at cost, were A ₹ 24,000; B ₹ 36,000; C ₹ 12,000.

During the year ended 31st December 2014 the actual purchases and sales were :

Purchases : A ₹ 1,46,000; B ₹ 1,24,000; C ₹ 48,000; **Sales** : A ₹ 1,72,500; B ₹ 1,59,400; C ₹ 74,600.

However, certain items were sold during the year at a discount on the normal selling prices and these discounts were reflected in the values of sales shown above. The items sold at a discount were :

Normal Sales Price : A ₹ 10,000; B ₹ 3,000; C ₹ 1,000;

Actual Sales Price : A ₹ 7,500; B ₹ 2,400; C ₹ 600.

These discounts were not provided for in the cost values at 1st January, 2014 given above.

13. S.K.S. does not maintain proper books of account. However, he provides you with the following details:

(a) **Sales and Purchases policy :** Total sales during the year 2014 — ₹ 6,00,000. Volume of sales during 2nd half of 2014 was 1/3 that of 1st half. Volume of credit sales was twice that of cash sales throughout the year. All purchases were on credit and were made evenly throughout the year.

(b) **Credit policy :** Closing debtors represent last two months' sales, whereas closing creditors represent last 3 months' purchases.

(c) **Price Policy :** Goods are sold at 10% profit on credit sales. Cash selling price was always at a profit of 5% of Sales.

(d) **Inventory Policy :** The firs two months' requirement was held as opening stock whereas the last month's requirement was held as closing stock. From the above details, ascertain the following: (i) Opening Stock; (ii) Closing Stock; (iii) Total Purchases; and (iv) Closing Debtors and Creditors.

14. You are preparing an income statement and balance sheet for Longman, a sole trader who does not keep adequate accounting records.

    The following information is available to you to compute the figures for inclusion in the accounts for sales revenue and purchases for the year ending 31 March, 2015 (all figures in Rupees) :

(a) Sales revenue			**(b) Purchases**		
Cash received from credit customers		2,18,500	Payment to suppliers		1,14,400
Cash sales receipts paid into bank		1,14,700	Trade Creditors :	31 March, 2014	22,900
Expenses paid out of cash sales before banking		9,600		31 March, 2015	24,800
Trade Debtors :	31 March, 2014	41,600	Cost of items taken from inventory by Longman for personal use		400
	31 March, 2015	44,200			
Refunds to customers		800	Amount due from credit customer deducted by Longman in settling supplier's account		700
Discounts allowed		2,600			
Bad debts written off		1,500			
Amount due from credit customer deducted by Longman in paying supplier's account		700			

    You are required to compute the sales revenue figure and the purchases figure.

15. Mr Mukherjee commenced business on 1st January, 2014, with a capital of ₹ 45,000. He immediately purchased Furniture of ₹ 24,000. During the year he received from his uncle a gift of ₹ 3,000 and he borrowed from his father a sum of ₹ 5,000. He had withdrawn ₹ 600 per month for his household expenses. He had no Bank Account and all dealings were in cash. He did not maintain any books but the following information is given:

Sales (including cash sales ₹ 30,000)	1,00,000	Salaries	6,200
Purchases (including cash purchases ₹ 10,000)	75,000	Bad debts written off	1,500
Carriage Inwards	700	Trade expenses	1,200
Wages	300	Advertisements	2,200
Discount allowed to Debtors	800		

    He used goods worth ₹ 1,300 for personal purposes and paid ₹ 500 to his son for examination and college fees.

    On 31st December, 2014, his Debtors were worth ₹ 21,000 and Creditors ₹ 15,000. Stock in trade was valued at ₹ 10,000. Furniture to be depreciated by 10% p.a.

    Prepare Trading and Profit and Loss Account for the year ended on 31st December, 2014 and Balance Sheet as at 31st December, 2014.

16. Motilal is a small trader, and is financially incapable of engaging the services of an accountant. He keeps no books but only an account with a bank in which all takings are lodged after meeting business expenses and his personal drawings and through which all payments for business purchases are passed.

    You are required to ascertain his trading result for the year ended 31.3.2015 and the financial position of his business as on that date from the following information supplied by him :

    (a) The bank statement shows deposits during the year of ₹ 12,020 and withdrawals of ₹ 11,850.
    (b) ₹ 1,000 had been placed in fixed deposit account on 31.12.2013 at 10% p.a. and withdrawn with interest on 30.6.2014.
    (c) The assets and liabilities on 31.3.2015 were : Stock ₹ 1,100; Book Debts ₹ 1,150; Bank balance ₹ 320, Furniture ₹ 2,000; and Trade Creditors ₹ 400.
    (d) In the absence of reliable information, estimates are supplied on the following matters :
        (i) The stock and book debts have each increased by ₹ 100 during the year.
        (ii) The trade creditors were ₹ 200 on 1.4.2014.
        (iii) During the year, personal expenses amounted to ₹ 800 and business expenses ₹ 700. Ignore fractions.

17. X does not maintain regular books of account. The following information is available for the year ended 31.12.2014:

    (i) Cash sales ₹ 38,400;
    (ii) Cash collections from debtors ₹ 60,000;
    (iii) A summary of the bank transactions for the year ended 31.12.2014 :
        Deposits : cash ₹ 95,820.
        Withdrawals : expenses ₹ 19,020; interest ₹ 180; salaries ₹ 20,400; drawings ₹ 4,800; creditors ₹ 36,000.
    (iv) Balances as on 1.1.2014 were as follows : Bank overdraft : ₹ 9,600; Stock : ₹ 21,600; Debtors : ₹ 52,800; Furniture ₹ 2,400; Buildings ₹ 36,000; Creditors ₹ 19,200; Cash ₹ 200.
    (v) X purchased an old motor cycle for ₹ 2,400 on 1.10.2014.
    (vi) The other balances on 31.12.2014 were : Creditors ₹ 13,200; Stock ₹ 24,480 and Debtors ₹ 72,000.

    Prepare a Profit and Loss Account for the year ended 31.12.2014 and a Balance Sheet as on that date after charging depreciation @ 10% p.a. on fixed assets.

18. Shri V.L. Srivastav does not maintain regular books but keeps only memoranda of his transactions. He furnishes the following information from the memoranda for the year ended 30.9.2014:
    (a) Total collection from Debtors (in cash) ₹ 30,000;
    (b) Cash Sales ₹ 19,200;
    (c) The abstract of Bank Account for the year ended 30.9.2014: (all figures in ₹)

To Deposits (cash)	47,910	By Balance (overdraft) (1.10.2013)	4,800
		By Interest & bank charges	90
		By Drawings	2,400
		By Salaries	10,200
		By General expenses	9,510
		By Creditors	18,000
		By Balance on 30.9.2014	2,910
	47,910		47,910

    (d) Other balances as on 1.10.2013 were: Stock ₹ 10,800; Debtors ₹ 26,400; Furniture ₹ 1,200; Buildings ₹ 18,000; Creditors ₹ 9,600; Cash in hand ₹ 100;
    (e) He purchased an old scooter at ₹ 1,200 on 30.6.2014.
    (f) Besides cash balance other balances on 30.9.2014 were: Stock ₹ 12,240; Debtors ₹ 36,000; Creditors ₹ 6,600.

    Prepare a Profit and Loss Account for the year ended 30.9.2014 and a Balance Sheet on that date after charging depreciation @ 10% p.a. on Buildings, Furniture and Scooter.

19. Rama Reddi is a retail merchant who keeps only a memorandum of his transactions. By going through his notes and records, you are able to ascertain the following:

	₹		₹
To Balance b/d	2,500	By Payment to Creditors	2,20,000
To Cash deposited	2,30,000	By Rent paid	12,000
To Balance c/d	13,100	By Electric charges	3,600
		By Drawings	10,000
	2,45,600		2,45,600

    (b) Other cash transactions : Cash purchases — ₹ 20,000; Office expenses paid — ₹ 20,500; Cash balance on 1.4.2014 — ₹ 500; and Cash balance on 31.3.2015 — ₹ 1,000.
    (c) Other information :
    (i) Stock in trade : As on 1.4.2014 — ₹ 50,000; As on 31.3.2015 — ₹ 75,000.
    (ii) A deposit of ₹ 3,000 for rent lies with the landlord.
    (iii) Furniture with a written-down value of ₹ 30,000 on 1.4.2014 is subject to depreciation at 10% p.a.
    (iv) Electricity bills to be paid on 1.4.2014 and 31.3.2015 were for ₹ 400 and ₹ 600 respectively.
    (v) Amounts due to creditors on 1.4.2014 and 31.3.2015 were ₹ 10,600 and ₹ 21,000 respectively.
    (vi) An amount of ₹ 2,000 being irrecoverable from a customer is to be written-off as bad.
    (vii) Debtors on 1.4.2014 and 31.3.2015 were ₹ 20,000 and ₹ 17,400 (excluding bad debts of ₹ 2,000) respectively.

    From the above information, prepare Rama Reddi's:
    1. Trading and Profit and Loss Account for the year ended 31st March 2015; and
    2. Balance Sheet as at 31st March, 2015.

20. Bhuvanabhoopati who commenced business as a retail trader on 1.1.2014 has not kept proper records of his transactions for the year ended 31.12.2014. He, however, has kept a cash diary from which he has extracted the following:

Cash Account

Receipts	₹	Payments	₹
Amount withdrawn from Bank on various dates	3,520	Postage expenses	720
		Conveyance expenses	2,400
		Licence fees	60
		Miscellaneous expenses	220
		Balance c/d	120
	3,520		3,520

    An analysis of his Bank Statements reveals the following :
    Deposits: Capital introduced ₹ 50,000; Cash sales ₹ 2,40,000; Collection from debtors ₹ 20,000;
    Withdrawals : Cash withdrawals for petty expenses ₹ 3,520; Rent paid ₹ 2,200; Electricity bills paid ₹ 660; Payments to suppliers ₹ 1,80,000; Insurance ₹ 12,000; Salaries ₹ 3,600; Furniture & Fixtures purchased ₹ 24,000; Advance income-tax paid ₹ 12,000; Typewriter purchased ₹ 2,000; Personal drawings ₹ 36,000.

You also ascertain the following additional information:
(a) All fixed assets were purchased in each January. Furniture is to be depreciated at 10% and Typewriter at 15%.
(b) Rent and electricity payable to the landlord are in arrears for December, 2014.
(c) At the end of the year, debtors were ₹ 5,000, creditors ₹ 2,700 and stock ₹ 39,000.

You are required to prepare:

(i) A summary of the Bank Account and ascertain the closing balance; (ii) Trading and Profit and Loss Account for the year ended 31.12.2014; and (iii) Balance Sheet as at that date.

21. The following is a summary of the Bank Account of Mr Khanna, a trader, for the year 2014.

Bank Summary

Particulars	₹	Particulars	₹
Balance on January 1, 2014	5,140	Payment to trade creditors	1,87,860
Cash receipts on account of credit sales	2,43,720	General expenses	16,970
Balance on December 31, 2014	1,180	Rent & rates	7,710
		Drawings	37,500
	2,50,040		2,50,040

All business takings had been paid into the bank except ₹ 21,180, out of which he paid wages amounting to ₹ 12,800. He retained ₹ 8,380 for private purposes. The following information is obtained from the books:

Particulars	31.12.2013	31.12.2014	Particulars	31.12.2013	31.12.2014
Stock in trade	24,300	31,500	Rates paid in advance	420	450
Creditors for goods	19,450	17,090	Creditors for general expenses	810	1,340
Debtors for goods	22,400	26,900	Amount owing to a customer who had overpaid his account	600	—
Furniture and fittings	10,000	10,000			

Discounts received from trade creditors during 2014 amounted to ₹ 1,500. No discounts were allowed to customers. The amount due to the customer who overpaid his account was set off against sales to him in 2014.

You are required to prepare a Trading and Profit and Loss Account for the year ended 31.12.2014 and a Balance Sheet as on that date.

22. Anand started business on 1.1.2014 with his own capital of ₹ 20,000, and an interest free loan of ₹ 20,000 from a friend.

His business makes toys, which are selling at ₹ 40 each. Anand, who has little knowledge of accountancy, produced the following information at the end of the first year's trading :

Cash received : Sale proceeds of 2,000 toys ₹ 80,000.

Cash paid : Wages ₹ 28,000; Raw materials ₹ 13,600; Rent ₹ 8,000; General expenses ₹ 4,800; Loan repaid ₹ 6,000.

You ascertain the following additional information :
(1) A further 300 toys were sold in 2014, but not paid for at the year end.
(2) ₹ 3,600 of raw materials received in the year, but not paid for.
(3) The only stock at 31.12.2014 was ₹ 1,600 raw materials.
(4) The rent covered the period from 1.1.2014 to 31.3.2015.
(5) Expenses included ₹ 800 withdrawn by Anand for his own use.
(6) The initial capital and loan of ₹ 40,000 was used to buy machinery with 4-year life and an anticipated residual value of ₹ 8,000.
(7) The wages figure included ₹ 10,000 for installing the machinery.
(8) The machinery is to be depreciated under reducing balance method @ 25% p.a. for the whole year.

Prepare a Trading and Profit and Loss Account for the year ended 31.12.2014 and a Balance Sheet as on that date.

23. Sanjay is in business but does not keep full accounting records. For the year ended 31.12.2014, he is able to provide you with the following information (all figures in rupees) :

Date	Stock	Debtors	Creditors	Furniture

Payment of rent and rates	700	Payments from bank account - personal	3,250
Lighting charges paid	250	Cash payments - personal	910
Cash receipts from debtors	31,250		
Stock taken for personal use	140		

Prepare Trading and Profit and Loss Account for the year ended 31.12.2014 and Balance Sheet on that date.

[Delhi University — B.Com. (Hons.) — Adapted]

25. The following is the Balance Sheet of Sri Govind as on 30th June 2014 :

Liabilities	₹	Assets	₹
Capital Account	96,000	Buildings	65,000
Loan	30,000	Furniture	10,000
Creditors	62,000	Motor car	18,000
		Stock	40,000
		Debtors	34,000
		Cash in hand	4,000
		Cash at bank	17,000
	1,88,000		1,88,000

A riot occurred on the night of 30th June 2015 in which all books and records were lost. The cashier had absconded with the available cash. Shri Govind gives you the following information :

(a) His sales for the year ended 30th June 2015 were 20% higher than the previous years. He always sells his goods at cost plus 25%. 20% of the total sales for the year ended 30th June 2015 was for cash. There were no cash purchases.

(b) On 1st July, 2014, the stock level was raised to ₹ 60,000 and the stock was maintained at this level throughout the year.

(c) Collection from Debtors amounted to ₹ 2,80,000 of which ₹ 70,000 was received in cash. Business expenses amounted to ₹ 40,000 of which ₹ 10,000 was outstanding on 30th June 2015 and ₹ 12,000 was paid by cheques.

(d) Analysis of the pass books revealed on the following : Payment to creditors ₹ 2,75,000; Personal drawings ₹ 15,000; Cash deposited in bank ₹ 1,43,000; Cash withdrawn from bank ₹ 24,000.

(e) Gross profit as per last year's audited accounts was ₹ 60,000.

(f) Provide depreciation on building and furniture at 5% and on motor car at 20%.

(g) The amount defalcated by the cashier may be treated as recoverable from him.

Prepare the Trading and Profit and Loss Account for the year ended 30th June 2015 and Balance Sheet as on that date.

26. The following are the assets and liabilities of Sanjoy as on 31.3.2014 (all figures in ₹ '000) :
Liabilities : Capital 200; Creditors 50. **Assets :** Fixed assets : 145; Stock 40; Debtors 50; Cash 5; Bank 10.
A fire destroyed the accounting records as well as the closing cash on 31.3.2015.

However, the following information was available :

(a) Debtors and Creditors on 31.3.2015 showed an increase of 20% as compared to 31.3.2014.
(b) Credit period : Debtors 1 month; Creditors 2 months.
(c) Stock was maintained at the same level throughout the year.
(d) Cash sales constituted 20% of total sales.
(e) All purchases were for credit only.
(f) Current ratio as on 31.3.2015 was exactly 2.
(g) Total expenses excluding depreciation for the year amounted to ₹ 2,50,000.
(h) Depreciation was provided at 10% on the closing value of fixed assets.
(i) Bank and cash transactions :
(i) Payments to creditors included ₹ 50,000 by cash; (ii) Receipts from debtors included ₹ 5,90,000 by way of cheques; (iii) Cash deposited into the bank ₹ 1,20,000; (iv) Personal drawings from bank ₹ 50,000; and (v) Fixed assets purchased and paid by cheques ₹ 2,25,000.

You are required to prepare :

(a) Trading and Profit and Loss Account for the year ended 31.3.2015; and
(b) A Balance Sheet on that date. For your exercise assume that cash destroyed by fire is written off in the Profit and Loss Account.

Accounting for Sale on Approval

Introduction

With a view of pushing up the sales or for introducing a new product in the market, goods are sometimes sent to the customers on sale or approval basis. This means that a business delivers the goods to the customers with the option to retain or reject them within a specified period. A contract of goods on sale or return permits the buyer to return the goods for a full refund (then cash is received) or allow for an adjustment to be made to the amount owed. Generally, these transactions take place between a manufacturer (or a wholesaler) and a retailer. When the goods are transferred from the wholesaler to the retailer, under a sale or return basis, it implies a change in the possession of goods only and not a transfer of the ownership of goods. The ownership is passed only when the retailer gives his approval or if the goods are not returned within that specified period. The retailer (customer) does not incur any liability when the goods are merely sent to him.

The Sale of Goods Act, 1893, therefore, provides that when goods are sent on sale or approval basis, the sale will take place or the property in the goods passes to the buyer :

(i) When he signifies his approval or acceptance to the seller, or

(ii) Does any other act adopting the transactions, or

(iii) If, without signifying his approval or acceptance, the buyer retains the goods without giving notice of rejection, then, if a time has been fixed for the return of the goods, on the expiry of such time, and if no time is fixed, on the expiration of a reasonable time. *[Section 24]*

Under a sale or return agreement, revenue is not recognised from the sale until all of the following criteria are met :

(1) The sales price is fixed or determinable at the date of sale.

(2) The buyer has paid or will pay the seller, and the obligation is not contingent upon resale of the product.

(3) The buyer's obligation to the seller would not be changed by theft or damaged to the merchandise.

(4) The buyer has an economic substance apart from the seller.

(5) The seller does not have sufficient obligations for future performance to directly bring about the resale of the product by the buyer.

Economics of Sale or Return

Goods sent on sale or return are beneficial to either party, i.e., the seller gets a larger sale and the buyer is able to make a right choice. But in every bargain, the economies and diseconomies go hand in hand. Since some of the provisional purchasers may return the commodity, the actual sales fall below the target. Also some of the units returned may not be in their original condition. Therefore, the cost of marketing and bringing back the replaced units to their original quality should be put under to the total selling cost. Since no hire charges are generally made on these goods, the fixation of the price of the product should take into consideration the above mentioned factors.

Accounting Record

Accounting entries depend on the fact whether the business sends goods on sale or approval basis — (i) casually; (ii) frequently; and (iii) numerously.

(i) When the Business Sends Goods Casually on Sales or Return

When the transactions are few, the seller, while sending the goods, treats them as an ordinary sale. If the goods are accepted, or not returned, or the business receives no intimation within that specified time limit, no further entry is required to be passed. Because, a transaction for sale or return becomes entry after the expiry of that specified period. If the goods are returned within a specified time limit, a reverse entry is passed to cancel the previous transaction. If, at the year-end, goods are still lying with the customers and the specified time limit is yet to expire, the original entry for sales is cancelled and the value of the goods lying with the customers ***must be reduced from the selling price to the cost price***, and treated as an ordinary stock for Balance Sheet purposes.

Journal Entries

1. When goods are sent on approval or on sale or return basis

Customers/Sundry Debtors Account   Dr. [Invoice price]
    To Sales Account

---

2. When goods are rejected or returned within the specified time

Sales/Return Inwards Account   Dr. [Invoice price]
    To Customers/Sundry Debtors Account

---

3. When goods are accepted at invoice price or not returned within the specified time limit

[No Entry]

---

4. When goods are accepted at a higher price than the invoice price

Customers/Sundry Debtors Account   Dr. [Difference in price]
    To Sales Account

---

5. When goods are accepted at a lower price than the invoice price

Sales Account   Dr. [Difference in price]
    To Customers/Sundry Debtors Account

---

6. At the year-end, when goods are lying with customers and the specified time limit is yet to expire

Sales Account   Dr. [Invoice price]
    To Customers/Sundry Debtors Account

These goods should be considered as stock with customers and the following adjustment entry is to be passed:

Stock with Customers on Sale or Return Account   Dr. [Cost price or market price whichever is less]
    To Trading Account

It should be noted that no entry is to be passed for goods returned by the customers on a subsequent date.

Illustration 1

Capital Electronics sends goods to his customers on Sale or Return. The following transactions took place during 2014:

2014		₹
Sept. 15	Sent goods to customers on sale or return basis at cost plus $33^1/_3$%	1,00,000
Oct. 20	Goods returned by customers	40,000
Nov. 25	Received letters of approval from customers	40,000
Dec. 31	Goods with customers awaiting approval	20,000

Capital Electronics records sale or return transactions as ordinary sales. You are required to pass the necessary Journal Entries in the books of Capital Electronics assuming that accounting year closes on 31st December, 2014.

Solution **In the books of Capital Electronics**

Journal **Dr.** **Cr.**

Date	Particulars		L.F.	₹	₹
2014 Sept. 15	Sunday Debtors A/c	Dr.		1,00,000	
	To Sales A/c				1,00,000
	(Being the goods sent to customers on sale or return basis)				
Oct. 20	Return Inwards A/c (Note 1)	Dr.		40,000	
	To Sundry Debtors A/c				40,000
	(Being the goods returned by custormers to whom goods were sent on sale or return basis)				
Dec. 31	Sales A/c	Dr.		20,000	
	To Sundry Debtors A/c (Note 3)				20,000
	(Being the cancellation of original entry of sale in respect of goods on sale or return basis)				
Dec. 31	Stock with Customers on Sale or Return A/c	Dr.		15,000	
	To Trading A/c (Note 4)				15,000
	(Being the adjustment for cost of goods lying with customers awaiting approval)				

Tutorial Notes :

(1) Alternatively, Sales Account can be debited in place of Return Inwards Account.

(2) No entry is required for receiving letter of approval from customer.

(3) Alternatively, Debtors Suspense Account can be credited in place of Sundry Debtors Account.

(4) Cost of goods with customers = ₹ 20,000 $\times \frac{100}{133.33}$ = ₹ 15,000.

Illustration 2

S.S. Ltd. sends out its goods to dealers on Sale or Return. All such transactions are, however, treated as actual sales and are passed through the Day Book. Just before the end of the accounting year on 31.12.2014, 200 such goods have been sent to a dealer at ₹ 250 each (cost ₹ 200 each) on sale or return and debited to his account. Of these goods, on 31.12.2014, 50 were returned and 70 were sold, for the other goods date of return has not yet expired.

Pass necessary adjustment entries on 31.12.2014.

	(Being the cancellation of original entry for sale in respect of 80 units of goods not yet returned or approved by customers)				
Dec. 31	Stock with Customers on Sale or Return A/c	Dr.		16,000	
	To Trading A/c				16,000
	(Being the cost of goods sent to customers on sale or return basis not yet approved, adjusted)				

Tutorial Notes :

(1) Alternatively, Sales Account can be debited in place of Return Inwards Account.

(2) Alternatively, Debtors Suspense Account can be credited in place of Sundry Debtors Account.

Illustration 3

Modern Electrical Ltd. sends electrical heaters costing ₹ 100 each to their customers on Sale or Return. These are, however, treated like actual sales and passed through the Sales Day Book. A few days before the end of financial year, 120 such heaters were sent out at a invoice price of ₹ 150 each. Of these, 10 are accepted by the customers at ₹ 140 each. There was no report as to the rest of the articles. You are required to pass necessary Journal Entries at the end of the accounting period.

Solution **In the books of Modern Electricals Ltd.**

Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
?	Sales A/c (₹ 10 x 10) Dr. To Sundry Debtors A/c (Being the adjustment for reduction in the selling price of 10 heaters @ ₹ 10 each)		100	100
?	Sales A/c (₹ 150 x 110) Dr. To Sundry Debtors A/c (Note 1) (Being the cancellation of original entry for sale in respect of 110 heaters not yet returned or approved by customers)		16,500	16,500
?	Stock with Customers on Sale or Return A/c Dr. To Trading A/c (Being the cost of goods sent to customers on sale or return basis not yet approved, adjusted)		11,000	11,000

Tutorial Note : (1) Alternatively, Debtors Suspense Account can be credited in place of Sundry Debtors Account.

Illustration 4

Calcutta Company sends out its gas containers to dealers on Sale or Return. All such transactions are, however, treated as actual sales and are passed through the Day Book. Just before the end of the financial year, 100 gas containers, which cost them ₹ 900 each have been sent to the dealer on 'sale or return' and have been debited to his account at ₹ 1,200 each. Out of this only 20 gas containers are sold at ₹ 1,500 each.

You are required to pass necessary adjustment entries for the purpose of Profit and Loss Account and Balance Sheet.

Solution **In the books of Calcutta Company**

Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
?	Sundry Debtors A/c Dr. To Sales A/c (Being the adjustment for excess price of 20 gas containers @ ₹ 300 each)		6,000	6,000
?	Sales A/c Dr. To Sundry Debtors A/c (Being the cancellation of original entry for sale in respect of 80 gas containers @₹ 1,200 each)		96,000	96,000
?	Stock with Customers on Sale or Return A/c Dr. To Trading A/c (Being the adjustment for cost of 80 gas containers lying with customers awaiting approval)		72,000	72,000

Illustration 5

P & Co. has credited certain items of sales on Approval aggregating ₹ 10,000 to the Sales Account. Of these, goods to the value of ₹ 3,000 have been returned and taken into stock at cost of ₹ 1,500 though the record of return was omitted in the accounts; and in respect of another parcel of ₹ 1,000 (sale price being cost plus 100%) the period of approval did not expire on the closing date. Show adjustment and correcting entries in the books of the trader.

Solution **In the books of P & Co.**

Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
	Return Inwards A/c Dr. To Sundry Debtors A/c (Being the goods returned by customer taken into stock but not recorded in the books of account, now adjusted)		3,000	3,000
	Sales A/c Dr. To Sundry Debtors A/c (Being the cancellation of original entry for sale in respect of goods not yet approved by the customers)		1,000	1,000

	Stock with Customer on Sale or Return A/c Dr. To Trading A/c (Being adjustment for cost of goods lying with customers awaiting approval)		500	500

Illustration 6

On 1st November, 2014, M/s Tini and Tubai Traders sent goods valuing ₹ 1,50,000 at invoice price to the customers on sale or return basis. On 10th December, goods worth ₹ 40,000 were returned by the customers. On 23rd December, intimation was received that goods worth ₹ 80,000 has been accepted by the customers but at a reduced price of 5% which was agreed by the Traders. The customers could not yet decide anything about the rest of the goods.

Show the journal entries in the books of M/s Tini and Tubai Traders at the end of financial year 31st December, 2014. Goods are invoiced to the customers at 25% above cost.

Solution **In the books of M/s Tini and Tubai Traders**

Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
2014 Dec. 31	Sales A/c (Note 3) Dr. To Sundry Debtors A/c (Being the adjustment for reduction in the selling price @ 5%)		4,000	4,000
	Sales A/c (₹ 1,50,000 – ₹ 40,000 – ₹ 80,000) Dr. To Sundry Debtors A/c (Being the cancellation of original entry for sale in respect of goods sent to customers on approval basis)		30,000	30,000
	Stock with Customers on Sale or Return A/c Dr. To Trading A/c (Note 4) (Being the cost of goods sent to customers, on approval basis not yet approved, adjusted)		24,000	24,000

Working Notes :

(1) It is assumed that goods sent on approval basis was recorded as normal sales.
(2) It is assumed that entries for sale and returned by customers have already been passed.
(3) It is assumed that no entry has been passed for price adjustment in respect of goods accepted by the customers.
(4) Cost of goods with customers = 100/125 × ₹ 30,000 = ₹ 24,000.

Illustration 7

Guha Traders sends out the goods on Sale or Approval to customers and includes the same in sales account. On 31st December, 2014, the stock in hand amounted to ₹ 40,000 and the Sundry Debtors balance stood at ₹ 75,000 which included ₹ 5,000 being invoice value of goods sent on 'sale or return' against which no intimation was received during the year. These goods were sent out at 25% above cost and were sent to S. Dutta — ₹ 2,000 and R. Mitra — ₹ 3,000.

Make necessary adjustment entries and show how these items will appear in the Balance Sheet on 31st December, 2014.

Solution **In the books of Guha Traders**

Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
2014 Dec. 31	Sales A/c (₹ 2,000 + ₹ 3,000) Dr. To Sundry Debtors A/c (Note 1) (Being the cancellation of original entry for sale in respect of goods sent to customers — S. Dutta and R. Mitra, on approval basis)		5,000	5,000
	Stock with Customers on Sale or Return A/c (Note 2) Dr. To Trading A/c (Being the cost of goods sent to customers on approval basis not yet approved, adjusted)		4,000	4,000

Balance Sheet as on 31st December, 2014 [Extract]

Liabilities	₹	Assets	₹	₹
		Sundry Debtors ₹ (75,000 – 5,000)		70,000
		Stock-in-hand	40,000	
		Add : Stock with Customers on Sale or Return	4,000	44,000

Tutorial Notes :

(1) Alternatively, Debtors Suspense Account can be credited in place of Sundry Debtors Account.
(2) Cost of goods with customers = 100/125 x ₹ 5,000 = ₹ 4,000.

Illustration 8

A & Co. sends out goods on approval to a few customers and includes the same in the Sales Account. On 31.3.2013 the Sundry Debtors balance stood at ₹ 1,00,000 which included ₹ 7,000 goods sent on approval against which no intimation was received during the year. These goods were sent out at 25% over and above cost price and were sent to Mr. X — ₹ 4,000 and Mr. Y — ₹ 3,000.

Mr. X sent intimation of acceptance on 30th April and Mr. Y returned the goods on 10th April, 2013.

Make the adjustment entries and show how these items will appear in the Balance Sheet on 31st March, 2013. Show also the entries to be made during April, 2013. Value of closing stock as on 31st March, 2013 was ₹ 60,000.

[I.C.W.A. (Inter) — Adapted]

Solution

In the books of A & Co.
Journal

Date	Particulars		L.F.	Dr. ₹	Cr. ₹
2013 March 31	Sales A/c	Dr.		7,000	
	To Sundry Debtors A/c (Note 1)				7,000
	(Being the cancellation of original entry for sale in respect of goods lying with customers awaiting approval)				
March 31	Stock with Customers on Sale or Return A/c	Dr.		5,600	
	To Trading A/c (Note 2)				5,600
	(Being the adjustment for cost of goods lying with customers awaiting approval)				
April 30	Sundry Debtors A/c	Dr.		4,000	
	To Sales A/c				4,000
	(Being goods costing ₹ 3,200 sent to Mr. X on sale or return basis has been accepted by him)				

Balance Sheet of A & Co. as on 31st March, 2013

Liabilities	₹	Assets	₹	₹
		Sundry debtors (₹ 1,00,000 – ₹ 7,000)		93,000
		Stock-in-trade	60,000	
		Add : Stock with customers on Sale or Return	5,600	65,600
				1,58,000

Tutorial Notes :

(1) Alterantively, Debtors Suspense Account may be credited in place of Sundry Debtors Account.

(2) Cost of goods lying with customers = 100/125 x ₹ 7,000 = ₹ 5,600.

(3) No entry is required on 10th April, 2014 for goods returned by Mr. Y. Goods should be included physically in the stock-in-trade.

(ii) When the Business Sends Goods Frequently on Sale or Return

When the number of transactions are moderate, a separate specially ruled Sale or Return Day Book is maintained to incorporate all the relevant details relating to Sale or Return transactions. This Day Book is divided into 4 main columns — (1) Goods Sent on Approval; (2) Goods Returned; (3) Goods Approved; and (4) Balance.

At the time of sending the goods on a sale or return basis, all information is recorded in the first column. It is a memorandum record and nothing is transferred to the actual books of account.

When goods are returned by the customers, it is recorded in the second column. It is also a memorandum record and nothing is transferred to the actual books of account.

When goods are approved, it is recorded in the third column. A periodical total of this column is credited to Sales Account in the General Ledger. In the Debtors Ledger the respective Customers' Account is debited.

In the fourth column, the balance of goods at invoice price is recorded. It represents the balance of goods with customers, awaiting approval.

The balance amount is calculated as follows:

Balance Value of Goods Sent on Sale or Return
Less Value of Goods Returned
Less Value of Goods approved.

At the time of preparing the Final Accounts, an adjustment entry is required for these goods which is as follows:

Goods with Customers on Sale or Return Account Dr. [Cost or market price, whichever is lower]
To Trading Account

***The format of this Sale or Return Book is given below*:**

Sale or Return Day Book

Date	(1) Goods Sent on Approval		(2) Goods Returned		(3) Goods Approved			(4) Balance	
	Particulars	₹	Particulars	₹	Particulars	S.L. Folio	₹	Value (₹)	Remarks

No entry is made from this column in the General Ledger or Debtors Ledger

No entry is made from this column in the General Ledger or Debtors Ledger

Entry for sale is made in the General Ledger as well as in the Debtors Ledger

Cost or market price whichever is lower is adjusted at the time of preparing the Final Accounts, debiting Stock with Customers on Sale or Return Account and crediting Trading Account

(iii) When the Business Sends Goods Numerously on Sale or Return

When the transactions are numerous, a business maintains the following books : (a) Sale or Return Day Book; (b) Sale or Return Day Book; and (c) Sale or Return Ledger. It is important to remember is that these are all ***Memorandum Books***.

In this case, when the goods are sent to the customers on a sale or return basis, they are recorded in the Sale or Return Day Book. Thereafter, in the Sale or Return Ledger, all the customers are individually debited and the Sale or Return Account is credited with the periodical total of the Sale or Return Day Book.

When the goods are returned by the customers within the specified time, they are recorded initially in the Sale or Return Day Book. Thereafter, in the Sale or Return Ledger, the Sale or Return Account is debited with the periodical total of the Sale or Return Day Book and the individual customers are credited. The above records are all memoranda and hence can not find a place in the regular books.

When the business receives information about the acceptance of the goods or no intimation is received within the specified time, they are recognised as sales and are recorded in the original Sales Day Book. Periodically, the total of the Sales Day Book is credited to Sales Account and debited to the Individual Customers Account. To cancel the earlier memoranda entries, individual customers are credited and the Sale or Return Account is debited. The entries for the approved goods are shown below :

In the Memorandum Sale or Return Ledger		In the Regular General Ledger	
Sale or Return Account To Individual Customer's Account	Dr.	Individual Customer's Account To Sales Account	Dr.

At the year end, in the Sale or Return Ledger, the sum of the debit balances of the Individual Customers' Account must be equal to the credit balance of the Sale or Return Account. It represents stock with customers awaiting approval at invoice price. To adjust the cost of such goods with customers in the Final Accounts, the following entry is passed :

Stock with Customers on Sale or Return Account Dr. [Cost or market price, whichever is less]
To Trading Account

Illustration 9

Hindusthan Automobiles Ltd. sent out motor cars on Sale or Return. They maintained a separate set of books for this type of business. During the month of April, 2013 they sent out motor cars on Sale or Return as follows:

2013	Name of the Customers	₹	2013	Remarks
April 2	Y & Co. Ltd.	1,00,000	April 7	Returned
April 16	X & Co. Ltd.	1,50,000	April 20	Retained
April 20	Y & Co. Ltd.	1,60,000	April 25	Returned

THEORETICAL QUESTIONS

1. If the goods are sent on sale or approval basis, when will the sale take place or the property in the goods passes to the buyer ?
2. Under a sale or return agreement, when revenue is recognised ?
3. What are the benefits of selling goods on sale or approval basis ?

OBJECTIVE QUESTIONS

Multiple choice

Select the best choice to complete each statement or answer each question below :

1. Under a sale or return basis, when goods are transferred from wholeseller to retailer, it implies a change
   A in the possession of the goods only
   B in the ownership of the goods
   C in the possession and the ownership of goods
2. Under a sale or return basis, the property in the goods passes to the buyer
   A when he gives his approval subject to certain conditions
   B when he gives his approval unconditionally
   C when a bill receivable is accepted
3. Goods sent on sale or return basis are beneficial to the
   A seller only
   B buyer only
   C seller and the buyer
4. Under sale or return agreement, revenue is recognised
   A at the time of delivery of goods
   B when the buyer signifies his approval but sale price has not be fixed
   C when the buyer signifies his approval and the sale price has been fixed
5. When the transaction are few, the seller, while sending the goods on sale or return basis treats them as
   A ordinary sale
   B no sale
   C profit

PRACTICAL QUESTIONS

1. A Gas Company sends out its gas stoves to dealers on Sale or Return. All such transactions are, however, treated like actual sales and are passed through the Day Book. Just before the end of the financial year, 100 stoves which cost them ₹ 150 each, are sent to a dealer on sale or return and are debited to his account at ₹ 200 each out of which only 20 stoves are sold at ₹ 180 each.
Show Journal Entries to adjust these transactions for the purpose of Company's Profit and Loss Account and Balance Sheet.
2. X Ltd. sends out its gas stoves to dealers on Sale or Return. All such transactions are, however, treated like actual sales and are passed through the Day Book. Just before the end of the financial year, 100 stoves, which cost them ₹ 150 each, are sent to a dealer on Sale or Return and are debited to his account at ₹ 200 each, out of which only 20 stoves are sold at ₹ 220 each. Show the entries in the Journal of the Company to adjust these transactions for the purpose of preparing the Final Accounts for the year ended December 31, 2014.
3. In preparing the final accounts of a company it is found that Sundry Debtors of ₹ 42,000 includes ₹ 4,000 representing price of goods sent out on approval for which the date of return has not yet expired.
Give the adjustment entries assuming that the goods were invoiced at a price of 25% above cost. How will the related items appear in the Balance Sheet of the Company ?
4. A merchant sells goods to his customers on "sale or return" basis treating all such transactions as actual sale at the time of despatch. On 10.12.2014, just before the end of accounting year on 31.12.2014, the merchant sent some goods costing ₹ 6,000 at 20% profit on sale, and was passed through Sales Day Book. Out of these, goods to the value of ₹ 2,000 have been returned on 15.12.2014. The merchant received sales approval from customers on 20.12.2014 for goods valued at ₹ 2,000. For the remaining goods with the customers, approval was pending on 31.12.2014. Record the transactions in the books of the merchant.
5. Messrs. Sound of Music supplied goods on Sale or Return basis, the particulars of which are as under:

Date of Despatch	Customer's Name	Amount (₹)	Other Particulars
2013 March, 10	ABC Co.	2,600	2013 March 14 — Returned
March 15	XYZ Co.	3,400	17 — Retained
March 20	PQR Co.	1,900	25 — Goods worth ₹ 800 returned
March 27	XYZ Co.	2,200	No intimation till 31.03.2013
March 28	PQR Co.	1,700	-do-

The books of Messrs. Sound of Music are closed on 31st March each year.
You are required to show Day Books and Ledger Accounts. ***[C.A. (Inter) — Adapted]***

6. A Mehta who keeps a special set of books for this type of business sends out goods on sale or return as follows :

Date	Particulars	₹	Date	Particulars	₹
1.1.2013	B. Bose	500	4.1.2013	All retained	
9.1.2013	C. Chatterjee	250	10.1.2013	Returned	150
				Retained	100
16.1.2013	D. Dutta	700	19.1.2013	All retained	
23.1.2013	C. Chatterjee	250	25.1.2013	All returned	
30.1.2013	B. Bose	400		No intimation received as to sale and goods not yet returned	
31.1.2013	E. Edward	500

Self-Balancing Ledger

Classification of Ledgers

In the case of a small business, all the accounts can be accommodated in one ***single ledger***. For a big business, when numerous transactions take place every day and a number of book-keepers are to work at the same time, it becomes necessary to maintain several ledgers. Therefore, in such a case, ledgers are subdivided into various categories. The division of the ledgers will vary according to the nature and size of the business, but the broadest division is as follows :

(i) Creditors Ledger/Bought Ledger: This ledger contains the accounts of all the creditors for goods purchased. Entries are made in this ledger mainly from Purchases Day Book, Cash Book, Return Outward Book and Bills Payable Book, etc.

(ii) Debtors Ledger/Sales Ledger: This ledger contains the accounts of all debtors for goods sold. Entries are made in this ledger mainly from Sales Day Book, Cash Book, Return Inward Book and Bills Receivable Book, etc.

(iii) General Ledger: This ledger contains all other accounts. It is used to denote all ledgers, other than Debtors Ledger and Creditors Ledger, however subdivided. In this context, it should be noted that Cash Book which functions as a Cash Account is deemed to be a part of the General Ledger.

When General Ledger, Creditors Ledger and Debtors Ledger are maintained by a concern, quite often, the debit and credit entries relating to a transaction are posted in different ledger. For example, goods sold to X for ₹. 5,000 on credit. X Account will be debited in the Debtors Ledger but the corresponding credit will be made in the Sales Account appearing in the General Ledger. Similarly, goods purchased on credit from Y for ₹. 4,000. Purchase Account will be debited in the General Ledger but the corresponding credit will be made in the Y Account appearing in the Creditors Ledger.

If the above two transactions are posted in the respective ledgers, it will appear as follows :

In the General Ledger

Dr. **Sales Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
			?	By X Account	5,000

Dr. **Purchases Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
?	To Y Account	4,000			

In the Debtors Ledger

Dr. **X Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
?	To Sales Account	5,000			

In the Creditors Ledger

Dr. **Y Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
			?	By Purchases Account	4,000

In this case, if we want to prove the accuracy of posting of any one ledger, it will be necessary to take out the balances of all accounts of all the ledgers (General Ledger, Debtors Ledger and Creditors Ledger); a small mistake in one ledger will lead to checking of the balances of all the ledgers.

In such a situation, the detection and rectification of the error involves considerable labour and time. Sometimes, it may delay the preparation of the Final Accounts.

To minimize the trouble and time, sometimes the system of ***Sectional Balancing*** or ***Self-Balancing*** of Ledger is employed.

Sectional Balancing System

Under this system, in the General Ledger, two additional accounts

(i) Total Debtors Account / Sales Ledger Control Account / Debtors Ledger Control Account; and

(ii) Total Creditors Account / Purchases Ledger Control Account / Creditors Ledger Control Account are kept, so that double entry is completed in the General Ledger itself.

The customers', and suppliers' individual accounts are kept in the respective ledgers.

At the end of each month, the total of Sales Day Book will be debited to 'Total Debtors Account' and credited to 'Sales Account' in the General Ledger — thus completing double entry in the General Ledger itself. Similarly, total amount received from customers, total discount allowed to them, total returns inwards, total bills receivable will be credited to 'Total Debtors Account' and debited to the respective accounts appearing in the General Ledger.

Again, the monthly total of Purchases Day Book will be credited to 'Total Creditors Account' and debited to 'Purchases Account' in the General Ledger. Similarly, total amount paid to creditors, total discount received from them, total returns outwards, total bills payable accepted will be debited to Total Creditors Account and credited to the respective accounts in the General Ledger.

In the 'Debtors Ledger' individual customer's account is debited with credit sales and credited with payments, discount allowed, bills receivable, etc. Similarly in the 'Creditors Ledger' individual supplier's account is credited with credit purchases and debited with payments, discount received, bills payable, etc.

The accuracy of individual customer's account can be checked by comparing the total of their balance with balances of the ***Total Debtors Account*** in General Ledger.

In the same manner, the accuracy of individual supplier's account can be checked by comparing the total of their balance with the balance of the ***Total Creditors Account***.

The summaries of entries are shown below :

Books of Original Entry	General Ledger	Debtors Ledger
Sales Day Book **Cash Book Credit** (For noting charges as cheques dishonoured) **Journal Proper** (for interest etc.)	Total Debtors Account Dr. To Sales Account To Cash Account To Interest Account etc.	Individual customer's account is debited for each item.
Sales Returns Book **Bills Receivable Book** **Cash Book Debit** (Discount allowed) **Journal Proper** (for bad debts)	Sales Returns Account Dr. Cash Account Dr. Discount Allowed Account Dr. Bad Debts Account Dr. To Total Debtors Account	Individual customer's account is credited for each item.

Books of Original Entry	General Ledger	Creditors Ledger
Purchases Day Book **Cash Book Debit** (for other charges, allowances, etc.) **Journal Proper** (for overdue interest)	Purchases Account Dr. Cash Account Dr. Interest Account Dr. To Total Creditors Account	Individual supplier's account is credited for each item.
Purchases Returns Book **Bills Payable Book** **Cash Book Credit** **Journal Proper** (for allowances)	Total Creditors Account Dr. To Purchases Returns Account To Bills Payable Account To Cash Account To Discount Received Account	Individual supplier's account is debited for each item.

Students should note that, under this system, double entry will be completed only in the General Ledger and Trial Balance can be prepared for General Ledger only. No Trial Balance can be prepared in the Debtors Ledger or Creditors Ledger.

Temporary Adverse Balances

It must be noted that, in practice, Debtors Ledger may contain a few accounts showing credit balances (e.g., where allowances are made for defective goods or empties are returned by the customers after full payment has been made). In such a situation, balances should be brought down on both sides of the 'Total Debtors Account' in respect of the total debit balances and the total credit balances. Likewise, the 'Total Creditors Account' may have both balances . For example, advance payment made to the suppliers for the goods to be received in future or allowances to be received for defective goods or empties return after full payment.

Debtors Ledger Control Account / Total Debtors Account will contain the totals of :

Sl.No.	Debit side	Sl.No.	Credit side
1.	Opening debit balances	1.	Opening credit balances (if any)
2.	Credit sale made during the period	2.	Cash and cheque received from debtors during the year
3.	Dishonoured bills and cheques (if any)	3.	Discount allowed to debtors
4.	Cash paid to debtors (if any)	4.	Returns inwards and allowances
5.	Transfer (if any)	5.	Bills receivables
6.	Other items (if any)	6.	Bad debt written-off
		7.	Transfer (if any)
		8.	Other items (if any)

Creditor Ledger Control Account / Total Creditors Account will contain the totals of :

Sl.No.	Debit side	Sl.No.	Credit side
1.	Opening debit balances (if any)	1.	Opening credit balances
2.	Cash and cheque paid to creditors during the period	2.	Credit purchase of goods during the period
3.	Returns outwards	3.	Bills payable renewed
4.	Discount received	4.	Bills payable dishonoured
5.	Bills payable	5.	Transfer (if any)
6.	Transfer (if any)	6.	Other items (if any)
7.	Other items (if any)		

It is to be noted that at any time :

(i) the balance in the Debtors Control Account should be equal to the total balances of individual debtors.

(ii) the total balance in the Creditors Control Account should be equal to the balances of individual creditors.

Purposes of Using Control Accounts

The various purposes of using Control Accounts are as follows :

1. Control accounts provide a check on the accuracy of entries made in the personal accounts in the Debtors ledger as well in the Creditors ledger. Regular comparison of the balances on the Debtors Control Account with the total of Individual Personal Account balances in the Debtors ledger will help to detect if any errors have occurred. Similarly, comparison of the balances on the Creditors Control Account with the total of Individidial Personal Account balances in Creditors ledger will help to detect if any errors have occurred.

2. Control accounts assist in locating the errors. A regular comparison of the balances of the Control Accounts with individual balances will quickly fix up the errors. This means that the volumes of transactions to be checked will be lowered and this will make it easier to locate errors.
3. Control accounts can assist in speeding up the preparation of final accounts by providing the total debtors and total creditors balances.
4. Control accounts can be used to calculate missing figures. For example, if we know the opening debtor balance and closing debtors balance and the amount collected from debtors during the accounting period, we can calculate the amount of credit side.
5. Control accounts provide an internal check. The staff posting the entries to the Control Accounts will act as a check on different staff(s) posting entries in the Debtors ledger and Creditors ledger.

Illustration 1

The Balance Sheet of H on 1st January 2015 disclosed the following assets and liabilities.

Liabilities	₹	Assets	₹
Capital	4,00,000	Freehold Premises	2,00,000
Total Creditors	1,00,000	Furniture & fittings	50,000
		Stock-in-trade	40,000
		Total Debtors	60,000
		Cash at bank	1,00,000
		Cash in hand	50,000
	5,00,000		5,00,000

List of Debtors : X ₹ 30,000; Y ₹ 20,000; Z ₹ 10,000.

List of Creditors : A ₹ 40,000; B ₹ 30,000; C ₹ 30,000

Mr. H. keeping his ledgers under Sectional Balancing System. You are required to enter the following transactions in the proper subsidiary books, post them in the respective ledger and extract a Trial Balance for General Ledger as on 31st January 2015. The following transactions occurred during the month of January, 2015:

Jan.		₹	Jan.		₹
2	Bought goods from A	20,000	25	Bought goods from B	10,000
3	Paid to C by cheque	10,000	26	Sold goods to Z	10,000
8	Sold goods to X	25,000	28	Paid rent in cash	1,000
16	Received a cheque from Z	8,000	30	Paid to A by cheque	30,000
20	Bought goods from C	15,000	31	Paid to B by cheque	12,000
24	Sold goods to Y	11,000	31	Paid salary in cash	2,000

From the following information, prepare a Total Debtors Account as appearing in the General Ledger in the Books of M/s Singh and Company:

Debit balance as on 1.7.2014, ₹ 87,200; Credit balance as on 1.7.2014 in Debtors Account ₹ 600.

Transactions during 6 months ended on 31.12.2014 : Total sales were ₹ 94,000 including cash sales of ₹ 4,000. Debtors whose balance were in credit were paid off ₹ 600. Payments received by cheques from Debtors ₹ 60,000; Payments received by cash from Debtors ₹ 48,000; Payment received by bills receivable ₹ 26,000.

Bills receivable received from Debtors were dishonoured for ₹ 6,000 and noting charges of ₹ 60 were paid. Cheques received from customers were dishonoured for ₹ 800. Out of bills receivable received and included in ₹ 26,000 above, bills of ₹ 5,000 were endorsed to suppliers.

Bad debts written-off during the period were ₹ 1,000. Discount allowed for prompt payment were ₹ 700 and bad debts written off in 2012 and now recovered from debtors amounted to ₹ 900.

Interest debited for delay in payments were ₹ 1,250. On 31.12.2014 provision for doubtful debts was created for ₹ 2,100.

M/s Trade Syndicates Account appeared in Debtors Ledger and also in Creditors Ledger. The balance in Creditors Ledger was ₹ 900 and the same was transferred to Debtors Ledger. Goods of ₹ 2,760 were rejected by the customers.

Solution

In the General Ledger of M/s. Singh & Company

Dr. Total Debtors Accounts Cr.

Date	Particulars	₹	Date	Particulars	₹
1.7.2014	To Balance b/f	87,200	1.7.2014	By Balance b/f	600
31.12.2014	To Sales (₹ 94,000 – ₹ 4,000)	90,000	31.12.2014	By Bank	60,000
"	To Cash	600	"	By Cash	48,000
"	To Bills Receivable (dishonoured)	6,000	"	By Bills receivable	26,000
"	To Bank (noting charges)	60	"	By Bad debts	1,000
"	To Bank (cheque dishonoured)	800	"	By Discount allowed	700
"	To Interest	1,250	"	By Total Creditors A/c – Transfer	900
			"	By Sales Return	2,760
			"	By Balance c/d	45,950
		1,85,910			1,85,910

Tutorial Notes :

(1) Bad debts of 2012 recovered in 2014 will not appear in the Total Debtors Account. It should be credited to Profit and Loss Account.

(2) Bills Receivable of ₹ 5,000 endorsed to suppliers has nothing to do with Total Debtors Account, because at the time of endorsement, Suppliers Account is debited and Bills Receivable Account is credited.

Illustration 3

The following details were extracted from the books of a company for the 6 months ended 31.3.2015 (all figures in ₹):

Debtor balances total on 1.10.2014	1,927	Purchases returns	182
Supplier balances total on 1.10.2014	1,215	Interest charged to debtors	5
Cash paid to suppliers	7,613	Debtor's cheque dishonoured	76
Cash received from debtors	12,993	Discount allowed	356
Purchases	8,849	Bills payable accepted (including renewals)	891
Discount received	286	Bills payable withdrawn upon renewal	200
Bad debts written-off	56	Interest on bills payable renewed	3
Sales returns	93	Sales	13,308

The total of the balances extracted from the Trade Ledgers on 31.3.2015 were : Sales Ledger ₹ 1,808; Bought Ledger ₹ 1,290.

Prepare Total Debtors Account and Creditors Account from the details given above and show whether the balance agree with the balances per schedule as extracted from the Trade Ledgers as on 31.3.2015.

Solution

Dr. Total Debtors Account Cr.

Date	Particulars	₹	Date	Particulars	₹
1.10.2014	To Balance b/d	1,927	31.3.2015	By Cash	12,993
31.3.2015	To Interest charged	5	"	By Bad debts	56
"	To Bank (cheque dishonoured)	76	"	By Sales returns	93
"	To Sales (credit)	13,308	"	By Discount allowed	356
			"	By Balance c/d	1,818
		15,316			15,316

Dr. Total Creditors Account Cr.

Date	Particulars	₹	Date	Particulars	₹
31.3.2015	To Cash	7,613	1.10.2014	By Balance b/f	1,215
"	To Discount received	286	31.3.2015	By Purchases	8,849
"	To Purchases returns	182	"	By Bills payable (renewed)	200
"	To Bills payable	891	"	By Interest on bills payable (renewed)	3
"	To Balance c/d	1,295			
		10,267			10,267

31.3.2015	Debtors balance as per schedule	1,808	31.3.2015	Creditors balance as per schedule	1,290
	Debtors bal. as per Total Account	1,818		Creditors bal. as per Total Account	1,295
	Difference	10		Difference	5

From the above, it is clear that the total accounts do not agree with the balance as per schedule.

Illustration 4

Modern Traders operates a computerised accounting system for its debtors and creditors ledgers. The control accounts for the month of March 2015 are in balance and incorporate the following totals :

Debtors Ledger :		**Creditors Ledger :**	
Balance at 1 March, 2015	₹	Balance at 1 March, 2015	₹
Debit	3,86,430	Credit	1,84,740
Credit	190	Debit	520
Sales	1,63,194	Purchases	98,192
Cash received	1,58,288	Cash paid	1,03,040
Discount allowed	2,160	Discount received	990
Returns inwards	590	Returns outwards	1,370
Credit balance at 31 March, 2015	370	Debit balance at 31 March, 2015	520

Although the control accounts agree with the underlying ledgers, a number of errors have been found, and there are also several adjustments to be made. These errors and adjustments are detailed below:

(1) Four sales invoices totalling ₹ 1,386 have been omitted from the records.
(2) A cash refund of ₹ 350 paid to a customer, A Sen, was mistakenly treated as a payment to a supplier with the same name.
(3) A contra settlement offsetting a balance of ₹ 870 due to supplier against the debtors ledger account for the same party is to be made.
(4) Bad debts totalling ₹ 1,360 are to be written-off.
(5) During the month, a settlement was reached with a supplier over a disputed account. As a result, the supplier issued a credit note for ₹ 2,000 on March 26. No entry has yet been made for this.
(6) A purchases invoice for ₹ 1,395 was keyed in as ₹ 1,359.
(7) A payment of ₹ 2,130 to a supplier, B Rao, was mistakenly entered to the account of R Rao.

You are required to : (i) prepare the Debtors Ledger Control Accounts; (ii) prepare Creditors Ledger Control Accounts; as they should appear after allowing, where necessary, for the errors and adjustments listed above.

Balancing and Reconciling Control Accounts

The Control Account should be balanced at regular intervals (at least once in a month). This balance must be checked with the total of individual personal account balances in the Debtors ledger / Creditors ledger.

The balance of the Control Account may not agree with the total of individial personal account balances because of the following reasons :

1. Wrong amount has been posted in the Control Account because of casting error in the day book.
2. Transaction has been recorded in the Control Account without posting to individual personal accounts.
3. Wrong balancing of individual personal accounts in the Debtors / Creditors ledger.
4. A transposition error may occur in an individual balance, e.g., ₹ 240 has been posted as ₹ 420.

Special Problems

Illustration 5

At 31st December, 2014 the balance on the Debtors Control Account in Sourav's general ledger was ₹ 39,982. The total of the list of balances on the customers' personal accounts was ₹ 39,614.

Sourav has discovered the following errors :

(i) An invoice of ₹ 288 was entered correctly in the general ledger, but no entry was made in the personal account.
(ii) A payment of ₹ 1,300 was accepted in full settlement of a balance of ₹ 1,309. No entry was made to record the discount.
(iii) A credit note issued to a credit customer for ₹ 120 was incorrectly treated as an invoice.
(iv) An addition error on a personal account meant that the balance was understated by ₹ 27.
(v) A customer had lodged a payment of ₹ 325 directly to Sourav's bank account. The balance on the personal account was adjusted, but no entry was made in the general ledger.
(vi) An invoice for ₹ 644 was posted as ₹ 466 in the general ledger.
(vii) A credit balance of ₹ 47 on a customer's account was treated as a debit balance.

Required :

(a) Show the Debtors Control Account, including the necessary correcting entries and the corrected balance.
(b) Prepare a Reconciliation of the list of balances to the corrected balance on the Debtors Control Account.
(c) State the correct Debtors balance for inclusion in the final accounts and indicate where it should be reported on the Balance Sheet.

Solution

(a) In the General Ledger

Dr. Debtors Control Account Cr.

Date	Particulars	₹	Date	Particulars	₹
2014			2014		
Dec. 31	To Balance b/d	39,982	Dec. 31	By Discount Allowed A/c	9
	To Sales A/c (Invoice Error)	178		By Sales A/c (₹ 120 x 2)	240
				By Bank A/c (Direct payment)	325
				By Balance c/d	39,586
		40,160			40,160

(b) Reconciliation Statement of Debtors Control Account

Particulars		₹	₹
List of balance (Total)			39,614
Add:	Invoice omitted	288	
	Addition error on a personal account	27	315
			39,929
Less:	Discount omitted	9	
	Credit Note wrongly treated as invoice	240	
	Credit balance of a customer treated as debit balance (₹ 47 x 2)	94	343
Correct Total			39,586

(c) The correct ledger balances of ₹ 39,586 should be shown in the Balance Sheet as ***Current Assets***.

Illustration 6

You are assisting in the preparation of the year end accounts of A & Co. The balance on the Creditors Ledger Control Account in the general ledger is ₹ 45,505. The total amount of the list of balances on the Suppliers' Personal Account is ₹ 46,886.

You have noted the following :

(i) An invoice from a supplier for ₹ 739 has been entirely omitted from the accounting records.
(ii) A credit note received from a supplier for ₹ 266 was entered in the day book as an invoice.
(iii) No entries have been made in respect of an agreement to offset a credit balance of ₹ 864 in the Creditors ledger against a debit balance in the Debtors ledger.
(iv) Payments to a supplier totalling ₹ 1,800 have been recorded in the general ledger, but no entries have been made in the supplier's personal account.
(v) A payment of ₹ 17,500 was made to settle a balance of ₹ 17,585. The balance on the supplier's personal account was fully written off, but only the payment of ₹ 17,500 was entered in the general ledger.

(vi) A payment of ₹ 340 to a supplier was recorded in the cheques issued day book as ₹ 430.
(vii) A credit balance of ₹ 167 on a supplier's account was listed as a debit balance.

Required :

(a) Prepare the Creditors Ledger Control Account including the necessary adjusting entries and the corrected balance. (**NB** : You must present your answer in a format which clearly indicates whether such entry is a debit entry or a credit entry.)
(b) Prepare the Reconciliation of the list of balances to the corrected balance on the Creditors Ledger Control Account.
(c) State the correct payables balance for inclusion in the final accounts and where it should be reported.

Solution

(a) In the General Ledger

Dr. Creditors Ledger Control Account Cr.

Date	Particulars	₹	Date	Particulars	₹
?	To Purchases (₹ 266 x 2)	532	?	By Balance b/d (Given)	45,505
	To Debtors Ledger Control A/c	864		By Purchases A/c	739
	To Discount Received A/c	85		By Bank A/c (Payment overstated)	90
	To Balance c/d	44,853			
		46,334			46,334

(b) Reconciliation Statement of Creditors Ledger Control Account

Particulars		₹	₹
List of balances (Total)			46,886
Add:	(i) Purchase invoice omitted	739	
	(ii) Payment overstated	90	
	(iii) Balance incorrectly listed (₹ 167 x 2)	334	1,163
			48,049
Less:	(i) Credit Note recorded as invoice in the day book (₹ 266 x 2)	532	
	(ii) Offset	864	
	(iii) Payment omitted	1,800	3,196
Adjusted List of Balances			44,853

(c) The correct ledger balances of ₹ 44,853 should be shown in the Balance Sheet as ***Current Liabilities***.

Illustration 7

As at 31 March, 2015, the balance on the sales ledger control account of ITC Ltd was ₹ 1,56,300, whilst the total of the list of balances on the sales ledger was ₹ 1,51,835. At the same time, the balance on the purchase ledger control account was ₹ 1,70,690. The total of the list of balances on the purchase ledger as at that date was ₹ 1,37,645 — this is after deducting debit balances of ₹ 900 (Telco Ltd) and ₹ 16,200 (Reliance Ltd).

You are also given the following information :

(1) The debit balance on the account of Telco Ltd arose as a result of posting a payment of ₹ 4,500 as ₹ 5,400.
(2) The debit balance on the account of Reliance Ltd represent a payment in advance for goods to be delivered and invoiced in April 2015.
(3) The purchase day book for 29 March 2015 had been incorrectly cast, overcasting the total by ₹ 1,260.
(4) A purchase of ₹ 7,050 from HPCL had not been posted to HPCL's account in the purchase ledger.
(5) An invoice received from H M Ltd for ₹ 15,000 had been entered in the purchase day book as ₹ 1,500.
(6) A bad debt of ₹ 3,695 written-off the Sare Gama Ltd in the sales ledger had been posted to the purchase ledger control account.
(7) Discount received amounting to ₹ 19,370 had been posted to the relevant accounts in the purchase ledger but no posting had been made to either the purchase ledger control account or the discount received account.
(8) A contra entry of ₹ 770 between the accounts of Tisco Ltd in the sales and purchase ledger had not been posted to either the sales ledger control account or the purchase ledger control account.

You are required to :

(a) Prepare a Sales Ledger Control Account Reconciliation and a Purchase Ledger Control Account Reconciliation as at 31 March 2015.
(b) Prepare any journal entries required to reflect the information contained in (1) to (8) above.
(c) Calculate the amouts to be shown on the Balance Sheet as at 31 March 2015 in respect of trade debtors and trade creditors.

Solution **Reconciliation Statement of Sales Ledger Control Account**

	1,68,035		1,75,295

Self-Balancing System

When ledgers are kept under Sectional Balancing System, the double entry is not completed in the Debtors Ledger and Creditors Ledger. As a result, no Trial Balance can be prepared from these ledgers.

Self-Balancing is a system of ledgers keeping by means of which each ledger can be balanced independently with the other ledgers. Under this system, a 'General Ledger Adjustment Account' is prepared in the Debtors Ledger as well as in the Creditors Ledger to complete double entry in these ledgers. In the General Ledger, double entry is completed by preparing the following two accounts :

(i) Debtors Ledger Adjustment Account (in reality Total Debtors Account)

(ii) Creditors Ledger Adjustment Account (in reality Total Creditors Account).

Now, we explain the procedures for passing entries in the different Ledgers and Adjustment Accounts from the various books of original entry.

1. Books of Original Entry used for Self Balancing Debtors Ledger

(a) Sales Day Book: The monthly total of Sales Day Book is posted to the credit side of the Sales Account in the General Ledger. In the Debtors Ledger, Individual Customer's Account is debited datewise. If we want to make both the Debtors Ledger and General Ledger Self- balancing, the following entry is to be passed:

In the General Ledger:
Debtors Ledger Adjustment Account Dr.
In the Debtors Ledger:
To General Ledger Adjustment Account

(b) Returns Inwards Book: The monthly total of Returns Inwards Book is posted to the debit side of the Returns Inwards Account in the General Ledger. In the Debtors Ledger, Individual Customer's Account is credited. If we want to make both the Debtors Ledger and General Ledger Self-balancing, the following entry is to be passed:

In the Debtors Ledger:
General Ledger Adjustment Account Dr.
In the General Ledger:
To Debtors Ledger Adjustment Account

(c) Bills Receivable Book: The monthly total of Bills Receivable Book is posted to the debit side of Bills Receivable Account in the General ledger. In the Debtors Ledger, Individual Customer's Account is credited. If we want to make both the ledgers self-balancing, the following entry is to be passed:

In the Debtors Ledger:
General Ledger Adjustment Account Dr.
In the General Ledger:
To Debtors Ledger Adjustment Account

(d) Cash Book: In the Debtors Ledger, cash collected from debtors is posted to the credit side of the Individual Customer's Account. To make both the ledgers self-balancing, the following entry is to be passed:

In the Debtors Ledger:
General Ledger Adjustment Account Dr.
In the General Ledger:
To Debtors Ledger Adjustment Account
Similar entries are to be passed for discount allowed, bad debts, and so forth.

(e) Others: The following entry is to be passed for Bills Receivable dishonoured, interest charged, notary charges and cash paid.

In the General Ledger:
Debtors Ledger Adjustment Account Dr.
In the Debtors Ledger:
To General Ledger Adjustment Account

The summaries of entries are given below:

Books of Original Entry	General Ledger	Debtors Ledger
Sales Day Book **Cash Book Credit** (For noting charges and cheques dishonoured) **Journal Proper** (for interest etc.)	The totals, in each case, are ***debited to the 'Debtors Ledger Adjustment Account';*** Credit is given to Sales Account, Cash Account and other Nominal Accounts.	Individual customer's account is debited for each item. The totals are posted to the ***credit of the 'General Ledger Adjustment Account'.***
Sales Returns Book **Bills Receivable Book** **Cash Book Debit** **Journal Proper** (allowances, etc.)	The totals, in each case, are ***credited to the 'Debtors Ledger Adjustment Account';*** Debit is given to Sales Returns Account, Cash Account and other Nominal Accounts.	Individual customer's account is credited for each item. The totals are posted to the ***debit of the 'General Ledger Adjustment Account'.***

2. Books of Original Entry used for Self-balancing Creditors Ledger

(a) Purchases Day Book The monthly total of Purchases Day Book is posted to the debit side of the Purchases Account in the General Ledger. In Creditors Ledger, Individual Supplier's Account is credited. If we want to make both the Creditors Ledger and General Ledger Self-balancing, the following entry is to be passed:

In the Creditors Ledger:
General Ledger Adjustment Account Dr.
In the General Ledger:
To Creditors Ledger Adjustment Account

(b) Returns Outwards Book The monthly total of Returns Outwards Book is posted to the credit side of the Returns Outwards Account in the General Ledger. In the Creditors Ledger, Individual Supplier's Account is debited. If we want to make both the ledgers Self-balancing, the following entry is to be passed:

In the General Ledger:
Creditors Ledger Adjustment Account Dr.
In the Creditors Ledger:
To General Ledger Adjustment Account

(c) Bills Payable Book: The monthly total of Bills Payable Book is posted to the credit side of Bills Payable Account in the General Ledger. In the Creditors Ledger, Individual Supplier's Account is debited. If we want to make both the ledgers Self-balancing, the following entry is to be passed:

In the General Ledger:
Creditors Ledger Adjustment Account Dr.
In the Creditors Ledger:
To General Ledger Adjustment Account

(d) Cash Book: In the Creditors Ledger, cash paid to creditors is posted to the debit side of the Individual Suppplier's Account. If we want to make both the ledgers Self-balancing, the following entry is to be passed:

In the General Ledger:
Creditors Ledger Adjustment Account Dr.
In the Creditors Ledger:
To General Ledger Adjustment Account
Similar entry is to be passed for discount received from suppliers.

(e) Others: The following entry is to be passed for Bills Payable dishonoured, interest paid, notary charges, cash received from suppliers, etc.

In the Creditors Ledger:
General Ledger Adjustment Account Dr.
In the General Ledger:
To Creditors Ledger Adjustment Account

The summaries of entries are given below:

Books of Original Entry	General Ledger	Creditors Ledger
Purchases Day Book **Cash Book Debit** (for over charges, allowances, etc.) **Journal Proper** (for overdue interest)	The totals, in each case, are ***credited to the 'Creditors Ledger Adjustment Account';*** Debit is given to Purchases Account, Cash Account and other Nominal Accounts.	Individual supplier's account is credited for each item. The totals are posted to the ***debit of the 'General Ledger Adjustment Account'.***
Purchases Returns Book **Bills Payable Book** **Cash Book Credit** **Journal Proper** (for allowances)	The totals, in each case, are ***debited to the 'Crediors Ledger Adjustment Account';*** Credit is given to Purchases Returns Account, Bills Payable Account, Cash Account and other Nominal Accounts.	Individual supplier's account is debited for each item. The totals are posted to the ***credit of the 'General Ledger Adjustment Account'.***

Temporary adverse balances should be brought down on both sides of the Adjustment Accounts in respect of the total debit balances and the total credit balances.

Advantages of Self-Balancing Ledger

1. Since errors can be localized, delay in detection is minimised, thereby saving labour and time of the book-keepers.
2. Arithmatic accuracy of each ledger can be proved independently.
3. A complete Trial Balance can be prepared without balancing subsidiary ledgers, thus facilitating the quick preparation of Final Accounts.
4. A number of book-keepers can work on different ledgers.
5. Each ledger is of a suitable size.

Though Self-Balancing System is employed mainly in connection with Debtors and Creditors Ledgers, this system can be used in Plant Ledgers, Share Registers, etc.

The students should note the following alternative terms used for different ledgers :

(i) The General Ledger is also called as Nominal Ledger
(ii) The Debtors Ledger is also called as Sales Ledger or Customers' Ledger.
(iii) The Creditors Ledger is also called as Purchases Ledger or Suppliers' Ledger or Bought Ledger.

The specimen of Adjustment/Control Accounts in the General Ledger are given below :

In the General Ledger

Samaresh keeps his Ledger on Self-balancing system. From the following particulars, you are required to write up the Individual Debtor's Account and the General Ledger Adjustment Account (in Sales Ledger) during the month of January 2015. Also prepare a Trial Balance in Sales Ledger.

(i) Individual Debtors balances on 1.1.2015 : A – ₹ 1,530; B – ₹ 1,620; C – ₹ 1,890; D – ₹ 1,170.

(ii) Transactions during the month (all figures in ₹) :

2.1.2015	Sold Goods to A	1,710	19.1.2015	Recd. from A, a B/R, accepted by X payable on 25.1.2015	1,200
9..1.2015	Received from B on A/c	300			
11.1.2015	Recd. from A in full settl. of his bal. on 1.12015	1,500	22.1.2015	Received from B	900
12.1.2015	Sold goods to B	600	25.1.2015	A's bill returned dishonoured	
14.1.2015	B returned goods (damaged in transit)	180	28.1.2015	D is insolvent, 30% is recd. as final settlement	
18.1.2015	Recd. from C and allowed discount ₹ 90	1,800	30.1.2015	Sold goods to C	1,020

Temporary Adverse Balances

It should be noted that in practice, Debtors Ledger may contain a few accounts showing credit balances (e.g., where allowances are made for defective goods or empties are returned by the customers after full payment has been made). In this case, balances should be brought down on the both sides of the Debtors Ledger Adjustment / Control Account in respect of the total debit balances and the total credit balances. Likewise, Creditors Ledger Account may contain a few accounts showing debit balances (e.g., advance payment made to the Suppliers for goods to be received in future or allowance to be received for defective goods etc). In this case also, balances should be brought down on the both sides of the Creditors Ledger Adjustment / Control Account is respect of the total credit balances and the total debit balances.

Illustration 10

X deals in specialised electronic equipment. The following information is extracted from his records for the three months ended on 31.12.2014 (all in ₹).

		October	November	December
Balances on purchases ledger on 1.10.2014	(Dr.)	6,250		
	(Cr.)	3,20,000		
Purchases at retail price		15,00,000	20,00,000	18,00,000
Purchases returns at retail prices		40,000	60,000	50,000
Cheques sent to creditors		10,02,000	14,80,000	13,00,000
Discounts received		25,000	38,000	27,000
Temporary debit balances at month end		4,100	5,700	2,200

X buys his goods at 20% less than the retail price. You are required to prepare Purchases Ledger Control Account for each of the above three months for the period in question.

Solution

In the General Ledger

Dr. Purchases Ledger Control Account Cr.

31.12.2014	To Balance c/d	5,63,950			
		19,36,650			19,36,650

Tutorial Note : Since trade discount is not recorded in double entry book-keeping, the entries in the Control Accounts should be net of trade discount.

Illustration 11

From the books of X Limited you ascertain that on 1.1.2014, the Debtors Ledger balance was ₹ 40,000 and the Suppliers Ledger balance was ₹ 31,155. The following particulars were available for the year ended 31.12.2014 :

	₹		₹
Sales	3,18,700	Bills receivable dishonoured	1,300
Purchases	1,99,800	Returns inwards	5,000
Cash received from debtors	2,76,000	Returns outwards	2,600
Cash paid to creditors	1,26,500	Bad debts	1,600
Discount allowed	11,600	Cash recd. in respect of debts previously written-off bad	600
Bills payable matured during the year	49,000	Discount received	7,300
Bills receivable received	20,300	Bills payable accepted	60,000

From the above particulars, you are required to show the Debtors Ledgers Control Account, the Suppliers Ledgers Control Account as they would appear in the General Ledger of X Limited for the year ended 31.12.2014.

Solution

In the General Ledger of X Limited

Dr. Debtors Ledger Control Account Cr.

				Returns inward	5,000
				Bad debts	1,600
			31.12.2014	By Balance c/d	45,500
		3,60,000			3,60,000

Dr. Suppliers Ledger Control Account Cr.

Date	Particulars	₹	Date	Particulars	₹
31.12.2014	To General Ledger Adj. A/c :		1.1.2014	By Balance b/d	31,155
	Cash paid	1,26,500	31.12.2014	By General Ledger Adj. A/c :	
	Returns outwards	2,600		Purchases (credit)	1,99,800
	Discount received	7,300			
	Bills payable accepted	60,000			
31.12.2014	To Balance c/d	34,555			
		2,30,955			2,30,955

Tutorial Note : Bad debt recovery and reserve for bad debts do not affect the debtors balance. Therefore, these are to be ignored in Adjustment Accounts. Similarly, bills payable matured ₹ 49,000 during the year will not affect Adjustment Accounts.

Illustration 12

The following information is available from the books of a trader from 1.1.2015 to 31.3.2015 :

(1) Total sales amounted to ₹ 60,000, including the sale of old furniture for ₹ 1,200 (Book value ₹ 3,500). The total cash sales were 80% less than the credit sales.

(2) Cash collected from debtors amounted to 60% of the aggregate of the opening debtors and credit sales for the period. Debtors were allowed cash discount for ₹ 2,600.

(3) Bills receivable drawn during the three months totalled to ₹ 6,000 of which bills amounting to ₹ 3,000 were endorsed in favour of suppliers. Out of these endorsed bills receivable, a bill for ₹ 600 was dishonoured for non-payment as the party became insolvent, his estate realising nothing.

(4) Cheques received from Sundry Customers for ₹ 6,000 were dishonoured; a sum of ₹ 500 is irrecoverable; bad debts written-off in the earlier years realised ₹ 2,500.

(5) Sundry Debtors as on 1.1.2015, stood at ₹ 40,000.

You are required to show the Debtors Ledger Adjustment Account in the General Ledger.

Solution

In the General Ledger

Dr. Debtors Ledger Adjustment Account Cr.

Date	Particulars	₹	Date	Particulars	₹
1.1.2015	To Balance b/d	40,000	31.3.2015	By General Ledger Adjustment A/c :	
31.3.2015	To General Ledger Adjustment A/c :			Cash received (Note 2)	53,400
	Credit Sales (Note 1)	49,000		Discount allowed	2,600
	Bills receivable dishonoured	600		Bad debts (₹ 500 + ₹ 600)	1,100
	Cheques dishonoured	6,000		Bills receivable	6,000
			31.3.2015	By Balance c/d	32,500
		95,600			95,600

Working Notes : (1) Cash sales were 80% less than the credit sales. If credit sales are 100, then cash sales are 20. Therefore, when total sales is ₹ 120 then credit sale is 100, i.e., 5/6 of total sales. Total sales is ₹ 60,000 – ₹ 1,200 = ₹ 58,800. Therefore, credit sales are ₹ 58,800 x 5/6 = ₹ 49,000.

(2) Aggregate of opening value of debtors and credit sales = ₹ (40,000 + 49,000) = ₹ 89,000. Therefore, cash realised from debtors is 60% of ₹ 89,000 = ₹ 53,400.

More than One Debtors Ledger

Where a business enterprise has got many Debtors Accounts, it may maintain more than one Debtors Ledger. The division of Debtors Ledger may be alphabetical or geographical, etc..

Alphabetical Sub-division	Geographical Sub-division
Debtors : A to G Debtors : H to P Debtors : Q to T Debtors : U to Z	Debtors : East Zone Debtors : South Zone Debtors : North Zone Debtors : West Zone

The same procedures described above, as applied to Self-balancing of Ledgers, to be followed even when ledgers are subdivided. In this case, each ***Debtors Ledger*** will contain a General Ledger Adjustment Account. In the General Ledger, there will be a separate Debtors Ledger Adjustment Account for each ***group of ledger***.

Where Debtors Ledger is sub-divided, it is necessary to rule the books of original entry accordingly. For example, Sales Day Book would be ruled as follows:

Sales Day Book

Date	Invoice No.	Particulars	Folio	Debtors A to G	Debtors H to P	Debtors Q to T	Debtors U to Z

Illustration 13

X Ltd. divides its Debtors Ledger into two sections, A-L, and M-Z, each being Self-balancing. The following details have been extracted from the books of the company for the month of March, 2015:

		A – L	M – Z
Ledger Balances : 1st March	Dr.	1,11,125	67,970
Ledger Balances : 1st March	Cr.	980	210
Ledger Balances : 31st March	Dr.	1,51,445	59,815
Ledger Balances : 31st March	Cr.	1,645	595
Credit sales for the month		79,100	23,870
Cash received		34,090	31,395
Discount allowed		455	175
Returns Inwards		2,275	770
Bad Debts written-off		280	70
Bills Receivable		2,345	—
Bad debts recovery		300	200

Prepare necessary Adjustment Accounts.

Illustration 14

The Trial Balance of a firm when abstracted shows a difference of ₹ 27. From the undermentioned figure prepare Sales and Bought Ledger Adjustment Accounts and show in which ledger the error arises.

Jan 1st : Balance in Bought Ledger ₹ 11,805; Balance in Sales Ledger ₹ 20,201.

Dec..31st	₹		₹
Bad debts written-off	320	Purchases returns	288
Bills receivable	1,200	Sales	57,360
Bills payable	5,940	Sales returns	2,166
Cash paid for purchases	37,350	Bought Ledger (Dr. balances)	15
Cash received from customers	60,260	Bought Ledger (Cr. balances)	8,317
Discount allowed	1,050	Sales Ledger (Dr. balances)	12,727
Purchases	40,325	Sales Ledger (Cr. balances)	189
Discount received	250		

Solution

In the General Ledger

Dr. **Sales Ledger Adjustment Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
Jan. 1	To Balance b/d	20,201	Dec. 31	By General Ledger Adjustment A/c :	
Dec. 31	To General Ledger Adjustment A/c :			Bad debts	320
	Sales	57,360		Bills receivable	1,200
Dec. 31	To Balance c/d	189		Cash received	60,260
				Discount allowed	1,050
				Sales returns	2,166
			Dec. 31	By Balance c/d	12,754
		77,750			77,750

Dr. **Bought Ledger Adjustment Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
Dec. 31	To General Ledger Adjustment A/c :		Jan.1	By Balance b/f	11,805
	Bills payable	5,940		By General Ledger Adjustment A/c :	
	Cash paid to creditors	37,350		Purchases	40,325
	Discount received	250	Dec. 31	By Balance c/d	15
	Purchase returns	288			
Dec. 31	To Balance c/d	8,317			
		52,145			52,145

Working Notes : Debit balance of Sales Ledger is ₹ 12,754, but the balance has been given as ₹ 12,727. Therefore, in Sales Ledger, an error of ₹ 27 arises.

Transfer between Subsidiary Ledgers

Sometimes, a business enterprise may purchase from and sell to the same person on credit. In that case, the person is a creditor as well as a debtor of the business unit. Where no separate ledger is maintained, both credit purchases and credit sales are recorded in the same account. But in the case of the Self-balancing Ledgers, for such a person, two separate accounts are maintained to record credit purchases and credit sales.

One account is maintained in the Debtors Ledger to record credit sales and another in the Creditors Ledger to record credit purchases. Where this occurs it is the common practice to settle both accounts by transferring the balance of the smaller account to the account with the higher balance. In effect, the smaller account is closed. It should be noted that this transfer affects not only the two personal accounts adjusted, but also Debtors Ledger Adjustment Account, Creditors Ledger Adjustment Account and the two General Ledger Adjustment Accounts.

Suppose that, in the books of Y, at 31st January, 2015, X Account in Creditors Ledger shows a balance of ₹ 5,000 and in Debtors Ledger a balance of ₹ 7,500. For settlement of two accounts the following entries are necessary.

In the books of Y
Journal **Dr.** **Cr.**

Date	Particulars		₹	₹
31.1.2015	X A/c (In the Creditors Ledger)	Dr.	5,000	
	To X A/c (In the Debtors Ledger)			5,000
	(Being the balance of X's Account in the Creditors Ledger transferred to his account in the Debtors Ledger)			
	Creditors Ledger Adjustment A/c (In the General Ledger)	Dr.	5,000	
	To General Ledger Adjustment A/c (In the Creditors Ledger)			5,000
	General Ledger Adjustment A/c (In the Debtors Ledger)	Dr.	5,000	
	To Debtors Ledger Adjustment A/c (In the General Ledger)			5,000

Illustration 15

Write up the Sales Ledger Adjustment Account as would appear in the General Ledger from the following particulars :

Particulars		₹
Opening Balance of Debtors	Dr.	25,200
Opening Balance of Debtors	Cr.	800
Sales		62,400
Returns		6,340
Cash Received		40,100
Discount Allowed		2,600
Bad Debts written off		7,420
Provision for Doubtful Debts		11,000
Bad Debts previously written off, now received		600
Allowances		840
Bills Receivable		2,600
Bills Dishonoured		1,000
Trade Discount		300
Transfer from Bought Ledger		2,400
Closing Balance of Debtors	Dr.	27,980
Closing Balance of Debtors	Cr.	2,480

Solution

In the General Ledger

Dr. **Sales Ledger Adjustment Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
?	To Balance b/d	25,200	?	By Balance b/d	800
	To General Ledger Adjustment A/c :			By General Ledger Adjustment A/c :	
	Sales (Note 1)	62,400		Return (from Customers)	6,340
	Bills Dishonoured	1,000		Cash received	40,100
	To balance b/d	2,480		Discount allowed	2,600
				Bad Debts (written off)	7,420
				Allowance	840
				Bills Receivable	2,600
				Transfer from Bought Ledger	2,400
				By Balance c/d	27,980
		91,080			91,080

Working Notes:

(1) Assumed to be all on credit..

Tutorial Notes :

(1) Provision for doubtful debts will affect the debtors balance so it will not affect the Adjustment Account.

(2) Bad Debts previously written off, now received will not affect the debtors balance, so it is also ignored.

(3) Trade discount is not accounted for. Therefore, it will not affect debtors balance.

Illustration 16

From the following particulars for the year ended 31st March, 2015 extracted from the books of X Ltd., prepare Sales Ledger Adjustment Account in the General Ledger :

Particulars		₹
Sales Ledger Balances : 1st April, 2014	Dr.	12,500
Sales Ledger Balances : 1st April, 2014	Cr.	300
Sales during the year (including cash sales of ₹ 2,000)		60,400

	Goods returned by customers	4,710		Bills dishonoured	540
	Transfer from Bought Ledger	780		Cheques dishonoured	220
	Bad Debts (written off)	1,610		Interest on overdue balance	330
	Discount allowed	2,460		Carriage charged to customers	1,220
	To Balance c/d	60,695			
		1,73,310			1,73,310

Working Note :

(1) It is assumed to be all on credit.

Tutorial Note :

(1) Bad debts recovered will not be taken into consideration at the time of preparation of Adjustment Account.

Illustration 19

Mr. Patel maintains his ledgers on self-balancing system. The transactions from 1.1.2015 to 30.4.2015 are given below.

You are required to prepare the General Ledger Adjustment Account as will appear in the Debtor's Ledger:

(1) Opening balance (1.1.2015) Debtors' Ledger ₹ 78,000.

(2) Cash sales : ₹ 12,000 (being 10% of total sales).

(3) Collection from customers (other than collections on bills receivable) amounted to ₹ 1,10,000 which included the following:

(a) A sum of ₹ 3,000 realised from the estate of an insolvent (at 0.60 paise per rupee);

(b) ₹ 6,500 received from a customer as advance for sale;

(c) ₹ 4,000 received from a debtor after adjustment of an advance of ₹ 2,000 made in December 2014;

(d) ₹ 1,250 received from a party where account was written-off in earlier years;

(4) Interest charged to customers on overdue accounts ₹ 2,600.

(5) Bills receivable drawn during the period of ₹ 18,500.

(6) Bills receivable collected during the period ₹ 10,600 (including ₹ 5,900 collected on bills receivable drawn during November and December 2014).

(7) Bills receivable dishonoured on maturity ₹ 1,700.

(8) Bills receivable endorsed to suppliers — ₹ 6,000 out of which bills receivable for ₹ 2,000 discounted by creditors at 5% duly met at maturity. Bills receivable for ₹ 3,000 were dishonoured on maturity (noting charges being ₹ 20) and bills receivable amounting to ₹ 1,000 will mature in May 2015.

(9) Returns inwards ₹ 11,600.

(10) Transfer from creditors ledger ₹ 6,900.

Solution

In the Debtors Ledger

Dr. General Ledger Adjustment Account Cr.

Date	Particulars	₹	Date	Particulars	₹
1.1.2015	To Balance b/d (Note 1)	2,000	1.1.2015	By Balance b/d (Note 3)	78,000
30.4.2015	To Debtors Ledger Adjustment A/c:		30.4.2015	By Debtors Ledger Adjustment A/c:	
	Cheques received	1,08,750		Credit Sales (Note 4)	1,08,000
	(₹ 1,10,000 – 1,250)			Interest charged	2,600
	Bad debts (Note 2)	2,000		Bills receivable (dishonoured)	1,700
	Bills receivable	18,500		B/R endorsed & dishonoured	3,020
	Returns inward	11,600		(Noting charges ₹ 20)	
	Transfer	6,900	30.4.2015	By Balance c/d (Note 5)	6,500
30.4.2015	To Balance c/d (Balancing figure)	50,070			
		1,99,820			1,99,820

Working Notes :

(1) ₹ 2,000 represents temporary adverse balance in the debtors' account.

(2) 60% of the debt which is realised is ₹ 3,000. Therefore, the total amount due is ₹ 3,000 / 60% = ₹ 5,000. In effect, bad debt is ₹ (5,000 – 3,000) = ₹ 2,000.

(3) Debtors balance of ₹ 78,000 appears on the credit side of General Ledger Adjustment Account in the Debtors' Ledger.

(4) Cash sale is 10% of total sales which is ₹ 12,000. Therefore, credit sale is 90% of total sales, which is ₹ 12,000 / 10 x 90 = ₹ 1,08,000.

(5) Advance received from a customer to be carried forward as adverse balance.

Illustration 20

From the following extracted from the books of Mr X, prepare the necessary adjustment accounts in the General Ledger:

1.1.2014 — Debtors Ledger balance ₹ 1,37,000; Creditors Ledger balance ₹ 1,64,000

Transactions during the year:	₹		₹
Credit purchases	62,500	Cash sales	50,000
Credit sales	69,500	Sundry charges debited to customers	500
Cash received from customers	77,000	Allowances from creditors	1,600
Cash paid to suppliers	92,000	Bills payable dishonoured	9,000
Returns from customers	2,000	Discount allowed to debtors	1,300
Returns outwards	2,000	Cash purchases	30,900
Discount received	1,800	Bills receivable dishonoured	2,100
Bad debts written-off	7,200	Bad debts written-off, now recovered	900
Acceptances received from customers	25,500	Transfer from Bought Ledger to Sales Ledger	1,500
Bills payable accepted	36,000	Bills receivable discounted	3,000

Solution **In the General Ledger of Mr X**

Dr. **Debtors Ledger Adjustment Account** **Cr.**

	Credit purchases	45,000		Bills payable accepted	2,000
	Credit balance transferred from			Return outward	1,500

	Sales Ledger (Note 1)	100		Allowance received	150
				Cash paid	25,000
				Bills endorsed	300
				Credit balance transferred to Sales Ledger (Note 2)	85
31.3.2015	To Balance c/d	84	31.3.2015	By Balance c/d	20,499
		49,684			49,684

Working Notes :

(1) For credit balance transferred from Sales Ledger to Bought Ledger ₹ 100 will increase both debtors and creditors balance by ₹ 100. This is because, sundry debtors have debit balance but opposite (i.e., credit) balance is being transferred.

(2) For credit balance transferred from Bought Ledger to Sales Ledger ₹ 85 will reduce both debtors and creditors balance by ₹ 85. This is because sundry creditors have credit balance and such balance is being transferred.

(3) Bad debts reserve will not affect the adjustment account.

Illustration 22

Prepare a Sales Ledger Adjustment Account and a Purchase Ledger Adjustment Account in the General Ledger, for the year ended 31st March, 2015 from the following information (all figures in ₹) :

Customers' Account debit balance as on 1.4.2014	23,000	Goods returned by debtors	20,000
Customers' Account credit balance as on 1.4.2014	2,000	Cash discount allowed to debtors	6,000
Suppliers' Account credit balance as on 1.4.2014	40,000	Cash discount received from creditors	1,300
Suppliers' Account debit balance as on 1.4.2014	5,400	Trade discount received from the suppliers	80,000
Credit sales during the year	2,94,000	Bad debts written-off during the year	4,000
Credit purchases during the year	2,78,000	Bad debts recovered during the year	800
Cash sales during the year	2,26,000	Transfer from creditors ledger to debtors ledger	2,400
Cash purchases during the year	58,000	Bills receivable dishonoured	3,200
Cheques received from credit customers	1,80,000	Bills payable dishonoured	1,800
Cash received from credit customers	20,000	Cheques recd from debtors returned dishonoured	7,500
Cheques issued to the creditors during the year	2,10,000	Cheques issued to creditors returned dishonoured	2,900
Goods returned to the creditors	14,000	Customers' Account credit balance as on 31.3.2015	3,100
Bills payable accepted during the year	18,000	Suppliers' Account debit balance as on 31.3.2015	4,200
Bills received during the year	15,000		

Solution **In the General Ledger of ...**

Dr. **Sales Ledger Adjustment Account** **Cr.**

		3,26,900			3,26,900

Tutorial Note : Trade discount received from suppliers is not recorded in the books of accounts. Therefore, it will not affect the Adjustment Accounts.

Illustration 23

Indian Radicals Limited has three ledgers — Debtors' Ledger, Creditors' Ledger and General Ledger, which are kept under Self-balancing system. From the following particulars, prepare the relevant Adjustment Accounts that would appear in each of the Ledgers (all figures in ₹) :

Particulars	₹	Particulars	₹
Debtors Ledger balance on 1.1.2014 (Dr.)	16,000	Sundry charges for dishonoured bills payable	100
Debtors Ledger balance on 1.1.2014 (Cr.)	2,000	Bills receivable drawn	10,000
Creditors Ledger balance on 1.1.2014 (Dr.)	1,800	Bills receivable dishonoured	2,500
Creditors Ledger balance on 1.1.2014 (Cr.)	14,000	Bills receivable discounted	4,000
Purchases (including cash purchases ₹ 2,000)	36,500	Bills receivable endorsed	4,500
Sales (including cash sales ₹ 8,000)	80,000	Bills receivable as endorsed dishonoured	1,000
Cash paid to creditors	21,000	Bad debts	400
Collection from debtors	62,000	Provision for doubtful debts	1,500
Discount allowed	300	Transfer from Debtors' Ledger to Creditors' Ledger	500
Discount received	400	Debtors' Ledger balance on 31.12.2014 (Cr.)	1,300
Returns inwards	2,500	Creditors' Ledger balance on 31.12.2014 (Dr.)	1,200
Returns outwards	1,500	Transfer from Creditors Ledger to Debtors' Ledger	700
Acceptance matured	5,000	Bills payable accepted (including renewed	
Acceptance dishonoured	3,000	bills and interest thereon)	14,000
Acceptance renewed	2,000	Interest on renewed bills	500

Solution

In the General Ledger of Indian Radical Limited

Dr. Debtors Ledger Adjustment Account Cr.

Date	Particulars	₹	Date	Particulars	₹
1.1.2014	To Balance b/d	16,000	1.1.2014	By Balance b/d	2,000

	Discount received	400		Bills payable dishonoured	3,000
	Returns outwards	1,500		Sundry charges	100
	Bills payable renewed	2,000		B/R endorsed dishonoured (Note 1)	1,000
	Bills receivable endorsed	4,500		Interest on renewed bills	500
	Trans. from Debtors Ledger (Note 3)	500		Bills payable cancelled for renewal	2,000
	Trans. to Debtors Ledger	700		(Note 2)	
	Bills payable accepted*	12,000	31.12.2014	By Balance c/d	1,200
31.12.2014	To Balance c/d	11,900			
		56,300			56,300

* excluding renewal

In the Debtors Ledger

Dr. General Ledger Adjustment Account Cr.

Date	Particulars	₹	Date	Particulars	₹
1.1.2014	To Balance b/d	2,000	1.1.2014	By Balance b/d	16,000
31.12.2014	To Debtors Ledger Adj. A/c :		31.12.2014	By Debtors Ledger Adj. A/c :	
	Collection from Debtors	62,000		Credit Sales (Note 4)	72,000
	Discount allowed	300		Bills receivable dishonoured	2,500
	Returns inwards	2,500		Bills receivable endorsed	
	Bills receivable	10,000		dishonoured (Note 1)	1,000
	Bad debts	400	31.12.2014	By Balance c/d	1,300
	Transferred to Creditors Ledger	500			
	Transferred from Creditors Ledger	700			
31.12.2014	To Balance c/d	14,400			
		92,800			92,800

In the Creditors Ledger

Dr. General Ledger Adjustment Account Cr.

Date	Particulars	₹	Date	Particulars	₹
1.1.2014	To Balance b/d	14,000	1.1.2014	By Balance b/d	1,800
31.12.2014	To Creditors Ledger Adj. A/c :		31.12.2014	By Creditors Ledger Adj. A/c :	
	Credit purchases	34,500		Cash paid	21,000
	Bills payable dishonoured	3,000		Discount received	400
	Sundry charges	100		Returns outward	1,500
	B / R endorsed dishonoured (Note 1)	1,000		B / P renewed	2,000
	Interest on renewed bill	500		B/R endorsed	4,500
	B / P cancelled for renewal (Note 2)	2,000		Transferred from Debtors Ledger	500
31.12.2014	To Balance c/d	1,200		Transferred to Debtors Ledger	700
				B / P accepted (excl. renewed)	12,000
			31.12.2014	By Balance c/d	11,900
		56,300			56,300

Working Notes :

(1) Bills receivable endorsed dishonoured will increase both debtors and creditors balances.

(2) For renewal, bills payable is to be cancelled first by debiting Bills Payable Account and crediting Creditors Account.

(3) Both transfer from Debtors Ledger to Creditors Ledger and from Creditors Ledger to Debtors Ledger will decrease both debtors and creditors balances at the same time.

(4) Cash sales, provision for doubtful debts, bills receivable discounted will not affect Adjustment Account.

(5) Cash purchases, acceptance matured will not affect Adjustment Account.

Rectification of Errors relating to Self-Balancing System

We have already discussed in Chapter 16, the details procedures of rectification of errors. The same procedures are to be applied here with some modifications.

For rectification of errors relating to Self-balancing system, the following steps should be followed:

Step 1 Rectify the errors in the usual manner, as if the ledgers are not kept under self-balancing system.

Step 2 Assess the nature of the error. If it is affecting the totals of some subsidiary books, (e.g., sales day book, purchases day book, returns inwards book, returns outwards book, bills receivable book, bills payable book) it is to be rectified by passing a self-balancing entry. No self-balancing entry is required if it is not affecting the totals of subsidiary books.

Illustration 24

The following errors were detected on 31st December, 2014.

(i) Purchases Day Book was undercast by ₹ 500; (ii) Sales Day Book was undercast by ₹ 300; (iii) A cheque of ₹ 2,000 issued to Karmakar & Co was recorded as having been issued to M/s K. M. Kar & Co; (iv) Goods worth ₹ 250 returned by Das & Co, were entered in the Day Book as ₹ 2,500.

You are required to show all the Journal entries necessary to rectify the above errors assuming that the ledgers are maintained on self-balancing system.

Solution **Journal** **Dr. Cr.**

Date	Particulars		₹	₹
2014 Dec.31	(a) Purchases A/c	Dr.	500	
(i)	To Suspense A/c			500
	(Being the undercasting in Purchase Day Book, now rectified)			
	(b) General Ledger Adjustment A/c (In the Creditors Ledger)	Dr.	500	
	To Creditors Ledger Adjustment A/c (In the General Ledger)			500
	(Being the necessary adjustment for undercasting error in the Purchases Day Book)			
(ii)	(a) Suspense A/c	Dr.	300	
	To Sales A/c			300
	(Being the undercasting in Sales Day Book, now rectified)			
	(b) Debtors Ledger Adjustment A/c (In the General Ledger)	Dr.	300	
	To General Ledger Adjustment A/c (In the Debtors Ledger)			300
	(Being the adjustment for undercasting error in the Sales Day Book)			
(iii)	Karmakar & Co A/c	Dr.	2,000	
	To K.M. Kar & Co A/c			2,000
	(Being cheque issued to Karmakar & Co wrongly debited to K.M. Kar & Co, now rectified)			

(iv)	(a) Das & Co A/c Dr. To Returns Inwards A/c (Being goods worth ₹ 250 returned by Das & Co were entered in the Day Book as ₹ 2,500, now rectified)	2,250	 2,250
	(b) Debtors Ledger Adjustment A/c (In the General Ledger) Dr. To General Ledger Adjustment A/c (In the Debtors Ledger) (Being adjustment for excess credit to Debtors for goods returned)	2,250	 2,250

Illustration 25

Following errors are detected after opening Suspense Account but before preparing Final Accounts:

1. Goods of the value of ₹ 100 returned by Sharma were entered in the Sales Day Book and posted therefrom to the credit of his account.
2. An amount of ₹ 150 entered in the Sales Returns Book, has been posted to the debit of Philip, who returned the goods.
3. A sale of ₹ 200 made to Ghanshyam was correctly entered in the Sales Day Book but wrongly posted to the debit of Radheshyam (a customer) as ₹ 20.
4. No entry appeared for Bad Debts aggregating ₹ 450 except writing-off the individual debtors in the Sales Ledger.
5. The total of ''Discount Allowed'' column in the Cash Book for the month of September amounting to ₹ 250 was not posted.

Rectify by journal entries under (a) Single Ledger and (b) Self-balancing Ledgers.
Ignore narrations.

Solution **Journal** **Dr.** **Cr.**

	(ii) General Ledger Adjustment A/c (In Debtors Ledger)	Dr.	250	
	To Debtors Ledger Adjustment A/c (In General Ledger)			250

Key Points

- Under Sectional Balancing System, two additional accounts are kept in General Ledger. These are : (i) Total Debtors Account; and (ii) Total Creditors account.
- The balance in the Debtors Control Account should be equal to the total balances of individual debtors.
- The total balance in the Creditors Control Account should be equal to the balances of individual creditors.
- Control accounts provide an internal check. The staff posting the entries to the Control Accounts will act as a check on different staff(s) posting entries in the Debtors ledger and Creditors ledger.
- Self-Balancing is a system of ledgers keeping by means of which each ledger can be balanced independently with the other ledgers.

THEORETICAL QUESTIONS

1. State the purposes of using Control Accounts.
2. (a) What is 'Self-Balancing Ledger' ? (b) Why adjustments are necessary in the Self-Balancing System?
3. State the advantages of Self-Balancing System.
4. What is Sectional Balancing System ? State the advantages of Sectional Balancing.
5. On account of the very large number of his transactions, a merchant keeps a separate Bought Ledger and a separate Sold Ledger as also a General Ledger. What matters would you expect to find in each of the above ledgers ? How would you make each of the above ledgers Self-Balancing ?
6. It is said that "In a business of any magnitude it is desirable to raise total accounts in respect of Debtors and Creditors Ledgers". What are these total accounts and why is it desirable to raise them ?

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each statement or answer each question below :

1. When carrying out the reconciliation of the balance on the Debtors' Ledger Control Account with the list of balance from debtors ledger, X found the following :
   (i) total of the sales day book was overcast by ₹ 900;
   (ii) a sales invoice for Ram was posted to Raman's Account;
   (iii) an invoice to a customer for ₹ 650 has been recorded as ₹ 560 in the sales day book.
   Which of the errors will require an entry in the general ledger ?
   A all three
   B (i) and (ii) only
   C (i) and (iii) only
   D (ii) and (iii) only
2. Which of the following statements is / are correct ?
   (i) the debtors ledger control account balance ***must be correct*** if it agrees with the total of the list of balances from the receivable ledger;
   (ii) if there is a different between the balance on the debtors ledger control account and the total of the list of balances from the debtors ledger, the balance in the control account is always correct;
   A both (i) and (ii)
   B neither (i) nor (ii)
   C (i) only
   D (ii) only
3. Kabir's book keeper has prepared the following trade creditors ledger reconciliation :

	₹
Balance on general ledger control account	78,553
Less: Discount not recorded in general ledger	128
	78,425
Add: Debit balance of ₹ 100 included on list of balances as credit balance	200
Total list of balances	78,625

What is the correct trade creditors balance to be reported in the Balance Sheet ?

A ₹ 78,425
B ₹ 78,553
C ₹ 78,625
D ₹ 78,753

4. Sriram has prepared the following reconciliation of the balance on the debtors ledger control account in his general ledger to the total of the list of balances on customer's personal accounts :

	₹
Balance on debtors ledger control account	35,776
Less: Balance omitted from list of balances	452
	35,324
Add: Sales day book undercast	900
	36,224

What is the correct balance of debtors to be reported on the Balance Sheet ?

A ₹ 35,324
B ₹ 35,776
C ₹ 36,224
D ₹ 36,676

5. Consider the following statements about control accounts.
   (i) Control accounts can help to speed up the preparation of draft accounts by providing the balance sheet value for trade debtors and trade creditors.
   (ii) Control accounts are used in double entry book-keeping only.

	(i)	(ii)
A	True	False
B	True	True
C	False	True
D	False	False

6. While preparing the creditors ledger reconciliation for a client, you noted the following errors :
   (i) An invoice for ₹ 215 from a supplier was not entered in the accounting records.
   (ii) An invoice for ₹ 465 was recorded as ₹ 456 in the purchase day book.

   Which of the errors will cause a difference between the balance on the control account in the general ledger and the total of the list of balances from the personal ledger ?

A (i) only
B (ii) only
C both (i) and (ii)
D neither (i) nor (ii)

7. Praveen prepared the following creditors ledger reconciliation statement.

	₹
Balance on general ledger control account	46,865 (Credit)
Payment entered twice in general ledger control account	573 (Credit)
	47,438 (Credit)
Purchase day book overcast	900 (Debit)
Total of list of balances	46,538 (Credit)

How should the payable ledger balance be reported in the Balance Sheet ?

A ₹ 46,538 as a current asset
B ₹ 46,538 as a current liability
C ₹ 46,865 as a current asset
D ₹ 46,865 as a current liability

8. On checking the list of balances on the creditors ledger accounts, it was found that the total is ₹ 2,250 more than the balance on the creditors control account in the general ledger.

   Which of the following erros could, by itself, account for this difference ?

A The total of contra entries against debtor accounts is overstated by ₹ 1,125.
B Purchases day book has been overcast by ₹ 2,250.
C A credit note to the value of ₹ 1,125 has been omitted from a creditors ledger account.
D A creditors ledger account with a debit balance of ₹ 1,125 has been treated as a credit balance.

The following information relates to questions 9 and 10.

Robin is preparing a reconciliation of the balance on the creditors ledger control account in the general ledger to the total of the list of balances of individual accounts in the creditors ledger. He has discovered the following:

(i) A debit balance on a suppliers' account was listed as a credit balance.

(ii) An invoice for ₹ 376 was entered in the purchase day book as ₹ 387.

9. Which of the errors will require an adjustment to the creditors ledger control account in the general ledger?
   - **A** neither (i) nor (ii)
   - **B** (i) only
   - **C** (ii) only
   - **D** both (i) and (ii)
10. Which of the errors will require an adjustment to the list of balances ?
    - **A** neither (i) nor (ii)
    - **B** (i) only
    - **C** (ii) only
    - **D** both (i) and (ii)

PRACTICAL QUESTIONS

Sectional Balancing System

1. From the following information, prepare: (i) Total Debtors Account; and (ii) Total Creditors Account.

1.1.2015 : Balance of Sundry Debtors ₹ 32,000; Balance of Sundry Creditors ₹ 37,000.

30.6.2015 : Balances of other Accounts	₹		₹
Credit purchases	9,000	Bills receivable received	6,000
Credit sales	19,600	Returns inwards	1,750
Cash sales	1,500	Returns outwards	1,200
Cash purchases	1,000	Rebate allowed to debtors	550
Paid to creditors	19,750	Rebate allowed by creditors	300
Discount received	650	Provision for doubtful debts	320
Cash received from debtors	15,600	Bad debts	900
Discount allowed	400	Bills receivable dishonoured	750
Bills payable accepted	3,000	Bad debts, previously written off, now recovered	500

2. From the following informations, prepare Total Debtors Account in the General Ledger. (all figures in ₹)

Debtors - opening balances : Dr.	2,00,000	Bills receivable received	1,00,000
Debtors - opening balances : Cr.	10,000	Bills receivable discounted	40,000
Discount allowed	30,000	Provision for bad debts	10,000
Cash and cheques receipts	8,00,000	Bad debts recovered	5,000
Credit sales	10,00,000	Transfer from Debtors to Creditors Ledger	5,000
Returns inwards	20,000	Transfer from Creditors to Debtors Ledger	6,000
Bad debts	15,000	Closing credit balance in Debtors	30,000

3. Prepare Total Accounts from the following particulars in the General Ledger. (all figures in ₹)

1.1.2015	Balance on Bought Ledger (Dr.)	1,740	Cash received from customers	1,52,420
	Balance on Bought Ledger (Cr.)	23,880	Discount allowed thereon	5,640
	Balance on Sales Ledger (Dr.)	29,240	Cash paid to suppliers	1,16,860
	Balance on Sales Ledger (Cr.)	480	Discount received thereon	3,320
31.1.2015	Purchases	1,32,360	Cash paid to customers	260
	Purchases returns	5,120	Bills receivable	8,240
	Sales	1,74,980	Bills payable	4,500
	Sales returns	2,340	Bills receivable dishonoured	500
	Bought Ledger balances (Dr.)	1,540	Sales Ledger balances (Cr.)	36,700

4. From the following information prepare Total Debtors Account and Total Creditors Account in the General Ledger of ABC Ltd. (all figures in ₹)

Debtors on 1.1.2015	4,575	Cash paid to suppliers	3,070
Creditors on 1.1.2015	5,490	Discount received	67
Transactions for the year :		Allowances from creditors	28
Credit purchases	2,050	Acceptances received from Debtors	850
Credit sales	2,270	Acceptances given to creditors	1,200
Returns inwards	40	Bills receivable dishonoured	120
Returns outwards	60	Bills payable dishonoured	300
Cash received from customers	2,550	Bad debts written-off	250
Discount allowed	45	Sundry charges debited to customers	35

5. HP Ltd has prepared the following sales ledger control account for December 2014 :

Dr. **Sales Ledger Control Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014			2014		
Dec. 1	Balance b/d	32,168	Dec. 31	Bank	59,861
Dec. 31	Sales	45,972		Discount allowed	2,563
	Returned cheque	123		Returns inwards	1,879
				Balance c/d	13,960
		78,263			78,263
2015					
Jan. 1	Balance b/d	13,960			

The following errors are then discovered:

(1) The sales day book total has been overcast by ₹ 2,500.

(2) The returns inwards figure should have been ₹ 1,789.

(3) There is a contra entry with the purchase ledger of ₹ 560, representing an account settled with a supplier, which has been omitted.

(4) An account for J M Ltd was credited with a cheque for ₹ 769; this should have been credited to J B M and Son.

Redraft the sales ledger control account making the entries necessary to show the correct balance to be brought down.

6. You are carrying out a reconciliation between the balance on the trade debtors control account (which is ₹ 64,969) and the total of the list of the balances on the customers' personal accounts (which is ₹ 65,132). You have found the following reasons for the difference :

(i) A sales invoice for ₹ 320 was entered in the sales day book as ₹ 230.

(ii) The total of the sales returns day book was understated by ₹ 900.

(iii) A credit note for ₹ 460 was treated as an invoice when the entries were being made in the personal ledger.

(iv) A customer paid ₹ 1,700 in full settlement of a balance of ₹ 1,715. The discount was correctly recorded in the personal ledger, but was not entered in the control account.

(v) The total value of cheques received from customers was ₹ 67,908 but ₹ 67,980 was posted to the control account.

(vi) A debit balance of ₹ 20 on a customer's account was omitted.

(vii) A credit balance of ₹ 53 on a customer's account was treated as a debit balance.

Required :

(a) Show the trade debtors control account, including any necessary correcting entries and the corrected closing balance.

(b) Prepare a reconciliation of the total of the list of balances on the customers' personal accounts to the corrected balance on the trade debtors control account.

(c) State the amount to be reported in the final accounts for trade debtors and indicate how this balance will be reported.

7. You are employed as a Trainee Accountant in Robin and Co. One of your task is to prepare the monthly reconciliation of the balance on the creditors control account in the general ledger (₹ 98,524) to the list of balances from the creditors ledger (₹ 97,264).

When preparing the reconciliation at 31st December, 2014, you have noted the following :

(i) One of the suppliers agreed to accept ₹ 1,500 in payment of a balance of ₹ 1,514. The full balance of ₹ 1,514 was deducted from the supplier's personal account, but only the cheque issued was recorded in the general ledger.

(ii) There is an ongoing agreement to offset balances with Rahul, who is both a customer and a supplier. The amount for December is ₹ 2,856. No entries have yet been made.

(iii) A credit balance of ₹ 623 on the account of Anil was listed as a debit balance.

(iv) An invoice for ₹ 462 received from Mukesh was incorrectly recorded in the purchase day book as a credit note.

(v) Your company makes direct payments to Amar. The payment of ₹ 974 made in December has not been recorded.

(vi) An invoice for ₹ 760 from Zahir was entered in the purchase day book as ₹ 670.

Required :

(a) Show the Creditors Control Account in the general ledger, including the necessary adjusting entries and the corrected balance. (**NB**: You must present your answer in a format which clearly indicates whether each entry is a debit entry or a credit entry.)

(b) Prepare a reconciliation of the total of the list of balances on the Creditors Control Account in the General Ledger.

(c) State the correct creditors balance for inclusion in the final accounts and indicate where it should be reported on the Balance Sheet.

8. The sales ledger supervisor of H Ltd has been taken ill and the inexperienced ledger clerk is having problems balancing the ledgers for the month of February 2015. He presents you with the following information and asks for your help.

The balances on the individual accounts at 28 February are :

	₹
R & Sons	100
S Ltd	1,160
C Lion & Co Ltd	2,835
Sea Food Ltd	490
A Ltd	195
B Ltd	235
C Ltd	180
D Ltd	740
	5,935

The balance brought forward on the control account for 1 February is ₹ 6,830.

The clerk says he has entered the following items on the customers' accounts to get the above balances:

	₹	₹	₹	₹
R & Sons	250	190	—	—
S Ltd	490	960	40	—
C Lion & Co ltd	365	745	15	125
Sea Food Ltd	45	85	—	30
A Ltd	—	25	—	—
B Ltd	70	50	—	—
C Ltd	230	30	—	—
D Ltd	510	290	30	
	1,960	2,375	85	155

When he enters the above totals in the sales ledger control account it does not balance to the total of the customer's accounts.

On investigation you find that :

(a) Sales to S Ltd have been mistakenly entered on S Lal's account in the creditors ledger.

(b) A contra has been entered on the account of B Ltd for ₹ 65 against his account on the creditors ledger. This has not been recorded on the control account.

(c) An invoice for ₹ 210 in respect of C Lion & Co Ltd has been omitted from the list of sales and is not included in the individual account balances on 28 February.

(d) The account for Mr C Rao showing a balance of ₹ 165 has been removed from the sales ledger as the debt has been proven to be bad.

(e) The cheque from R & Son has been returned by the bank marked 'refer to drawer'.

(f) A credit note for ₹ 450 has been posted to the account of D Ltd but not to the control account.

(g) The cash received from C Lion & Co had not been entered in the customer account.

(h) The chief accountant has been looking at the account of G Ltd. You have reason to believe the customer account showing a credit balance of ₹ 185 is locked in his filing cabinet.

You are required to :

(a) complete the sales ledger control account; and

(b) reconcile the list of individual debtors account balances to the control account balance.

9. The following information has been taken from the books of Southern Chemicals in respect of the year ended 31 March, 2015 :

	₹
Sales ledger control account balance at 1 April, 2014	49,251
Return by credit customers	6,144
Credit sales	5,44,382
Cash sales	36,243
Settlement discounts allowed to credit customers	1,316
Cash received from credit customers	5,26,139

The following additional information has been established :

(a) The list of balances on the sales ledger at 31 March, 2015 totals to ₹ 62,183; a similar list at 31 March, 2014, agreed with the sales ledger control account at their date.

(b) Credit balances on the sales ledger at 31 March, 2015 amounting to ₹ 1,066 were entered as debit balances on the list extracted at that date.

(c) An amount of ₹ 62, received during the year from Salmon & Co., a supplier, in settlement of a debit balance on the bought ledger was entered in the sales ledger column in the cash book, and was posted to the account of Solomon Brothers in the sales ledger.

(d) Cash received from customers includes ₹ 315 in respect of a debt which was written-off at 31 March, 2014. This has not been posted to the sales ledger as no account exists.

(e) A sub-total of ₹ 3,456 in the sales day book total column has been carried forward as ₹ 3,654.

(f) A total in the sales ledger column of the cash book has been undersummed by ₹ 100.

(g) An amount of ₹ 39 received during the year from H Co Ltd., has been posted to the account of B & Co. (Holdings) Ltd.

(h) It was agreed during the year that an amount of ₹ 52 owing by M B & Sons would be settled by contra with a similar balance on their account in the bought ledger. No entries have yet been made in respect of this contra.

You are required to prepare the sales ledger control account for the year ended 31 March, 2015 and to reconcile the balance with the list of debtors' balances.

Self Balancing System

10. M/s XYZ Limited maintains its books under the Self-balancing system. From the following particulars at the close of the year, write up the necessary adjustment accounts as they would appear in the General Ledger :

Closing Debtor's balance as per General Ledger Adjustment Account (Cr.) ₹ 60,000; Credit sales ₹ 40,000; Cash sales ₹ 10,000; Purchases (50% on credit) ₹ 30,000; Payment to creditors ₹ 7,500; Discount allowed ₹ 1,500; Discount received ₹ 500; Payment from customers ₹ 20,000; Bad debts ₹ 5,000.

Closing Creditor's balance as per General Ledger Adjustment Account(Dr.) ₹ 30,000; Bills payable accepted ₹ 5,000; Bills receivable received ₹ 3,000.

Discount allowed to Debtors amounting to ₹ 500 was recorded as Discount received from creditors.

11. Prepare Purchase and Sales Ledger Adjustment Account as would appear in the Nominal Ledger from the following particulars :

On 1st Jan 2014 : Balance on Purchases Ledger ₹ 174(Dr.) 2,388 (Cr.);
Balance on Sales Ledger ₹ 2,924 (Dr.) 48 (Cr.)

31.12.2014	Purchases	13,036	Purchases returns	512
	Cash paid to suppliers	11,686	Discounts received thereon	336
	Sales	17,498	Sales returns	234
	Cash received from customers	15,248	Discount allowed thereon	564
	Bills payable	450	Bills receivable	824
	Transfer from purchases to sales ledger	152	Purchases ledger balances (Dr.)	154
	Sales ledger balances (Cr.)	84		

12. You have been furnished with the following information by M/s Mehra & Sons, New Delhi :

Opening Balances : Bought Ledger : Credit Balances ₹ 2,70,900; Debit Balances ₹ 29,000; Sales Ledger : Debit Balances ₹ 3,27,000

	₹		₹
Purchases returns	2,700	Cheques issued in favour of creditors	8,32,800
Acceptance of Bills payable	1,00,000	Credit sales	18,27,000
Credit purchases	9,27,600	Discount received	22,500
Receipts from Debtors	13,42,000	Bills receivable	6,00,000
Discount allowed	7,500		

You have to prepare :

(i) Bought Ledger Adjustment Account in General Ledger;

(ii) Sales Ledger Adjustment Account in General Ledger; and

(iii) General Ledger Adjustment Account in the Sales Ledger.

13. X Co. Ltd. have three Ledgers — Debtors Ledger, Creditors Ledger and General Ledger which are all kept under self-balancing. From the following particulars, prepare the relevant adjustment accounts that would appear in the General Ledger.

Particulars	₹	Particulars	₹
Debtors balance on 1.1.2014 (Dr.)	15,000	Bills receivable drawn	7,500
Debtors balance on 1.1.2014 (Cr.)	1,000	Bills receivable dishonoured	2,000
Creditors balance on 1.1.2014 (Dr.)	600	Bills receivable discounted	1,500
Creditors balance on 1.1.2014 (Cr.)	12,800	Bills receivable endorsed to creditors	4,300
Purchases (including cash ₹ 1,500)	36,000	Bills receivable as endorsed to creditors dishonoured	1,000
Sales (including cash ₹ 3,000)	75,000	Bad Debt	800
Cash paid to creditors	21,000	Provision for bad debts	1,100
Collection from debtors	62,000	Transfer from Debtors Ledger to Creditors Ledger	500
Discount allowed	260	Bills payable accepted	4,000
Discount received	320	Debtors balance on 31.12.2014 (Cr.)	300
Returns inwards	2,400	Creditors balance on 31.12.2014 (Dr.)	200
Returns outwards	1,600		

14. Prepare Bought Ledger Adjustment Account and Sales Ledger Adjustment Account as would appear in the General Ledger of Sonali Enterprises for the year ended 31.12.2014 from the following information (all figures in ₹) :

Debtor balance on 1.1.2014 ₹ 15,000; Creditors balance on 1.1.2014 ₹ 17,100

Sales (including cash sales of ₹ 19,000)	45,000	Bills receivable dishonoured (incl. endorsed ₹ 300)	1,400
Purchases (including cash purchases ₹ 12,000)	30,000	Bad debts recovered	375
Cash paid to suppliers in full settlement of ₹ 19,800	19,000	Purchase returns	2,500
Cash recd. from customers in full settlement of ₹ 17,400	16,900	Sales returns	1,600
Bills payable accepted	1,300	Bad debts	750
Bills receivable received	2,900	Reserve for bad and doubtful debts	2,000
Bills receivable endorsed	800		

Included in the Debtors was an amount of ₹ 1,500 due from Barnali from whom goods worth ₹ 1,050 had been purchased. Barnali agreed to set off her claim against the amount due from her.

15. From the following information prepare Sales Ledger Adjustment Account and Bought Ledger Adjustment Account in the General Ledger :

On 1.1.2014 : Balance on Bought Ledger (Dr.) ₹ 5,000; (Cr.) ₹ 48,000; Balance on Sold Ledger (Dr.) ₹ 70,940; (Cr.) ₹ 1,120

		₹		₹
31.12.2014	Purchases	2,70,000	Reserve for doubtful debts	4,580
	Purchases returns	10,000	Cash paid to customers	920
	Total sales	3,84,000	Discount received	3,600
	Cash sales	20,000	Bills receivable received	20,000
	Sales returns	5,000	Bills payable issued	11,200
	Cash received from customers	3,12,000	Bills receivable dishonoured	3,000
	Discount allowed	5,600	Bought Ledger balance (Dr.)	5,200
	Cash paid to suppliers	2,40,000	Sales Ledger balance (Dr.)	91,600
	Transfer from Sales to Bought Ledger	10,400		

16. From the following particulars as extracted from the books of Wadia and Co., who keeps a Debtors Ledger, a Creditors Ledger and a General Ledger on self balancing system, show how the Debtors and Creditors Ledger Adjustment Accounts will appear in the General Ledger for the year 2014 (all figures in ₹):

1.1.2014	Debtors balance	45,750	Creditors balance	54,900
31.12.2014	Credit purchase	20,500	Credit sales	22,700
	Returns inwards	400	Returns outwards	600
	Cash received from customers	25,500	Discount allowed to customers	450
	Cash paid to creditors	30,700	Discount received from creditors	670
	Acceptances received from debtors	8,500	Creditors bill accepted	12,000
	Bills receivable returned dishonoured	1,200	Bills payable dishonoured	3,000
	Bad debts written-off	2,500	Misc. Exp. wrongly debited to Customers A/c	345
	Allowances from creditors	275		

17. From the following particulars, which have been extracted from the books of Gulzar and Co., for the year ended 31.12.2014 prepare General Ledger Adjustment Account in the Creditors Ledger Account and Debtors Ledger Adjustment Account in the General Ledger :

		₹		₹
1.1.2014	Debtors balance (Dr.)	20,000	Debtors balance (Cr.)	300
	Creditors balance (Dr.)	200	Creditors balance (Cr.)	15,000
31.12.2014	Purchases (including cash ₹ 4,000)	12,000	Sales (including cash ₹ 6,000)	25,000
	Paid to suppliers in full settlement of ₹ 9,000	8,500	Recd. from customers in full settlement of ₹ 15,000	14,100
	Bills payable accepted (incl. renewals)	2,000	Bills payable withdrawn upon renewals	500
	Interest on Bills payable renewed	20	Bills receivable received	3,000
	Bills receivable endorsed	800	Bills receivabled as endorsed dishonoured	300
	Bills receivable discounted	1,400	Bills receivable dishonoured	400
	Interest charged on dishonoured bills	30	Transfer from one ledger to another	600
	Returns to creditors	700	Debtors balance on 31.12.2014 (Cr.)	450
	Creditors balance on 31.12.2014 (Cr.)	10,870		

18. Messrs Pioneer and Co. are maintaining accounts on self-balancing system. On 31.12.2014 the General Ledger discloses the following balances :

(Sales Ledger Adjustment Account (Dr.) ₹ 35,235; Purchases Ledger Adjustment Account (Cr.) ₹ 15,530.

On scrutinising the ledgers, the following mistakes were notices :

(a) A credit purchase of ₹ 4,350 has been credited to the Sales Ledger Adjustment Account though the payment has been debited to the Purchase Ledger Adjustment Account. However, in the subsidiary books, these two entries have been entered only in the Purchase Ledger.

(b) ₹ 1,000 paid to Mr Holdger for goods purchased have been debited to the Sales Ledger Adjustment Account. In the subsidiary books, the party's account shows a debit balance in the Sales Ledger and a credit balance in the Purchase Ledger.

(c) ₹ 4,750 were due from Mr Albert in the Sales Ledger as against ₹ 7,740 due to him for purchases made and entered in the Purchase Ledger.

(d) The Sales Ledger balances disclose the sums aggregating ₹ 740 have to be written off as bad debts and discounts.

Prepare the necessary journal entries in the General Ledger and other Subsidiary Books.

Insurance Claims

Introduction

A business may suffer abnormal losses due to different reasons such as fire, theft, burglary, strike, etc. Among them, the most common which destroys or causes severe damage to the assets like stock, building, plant, machinery, furniture, etc., is fire. When a fire takes place, the business naturally incurs heavy losses and, in turn, the normal business operations are disrupted. There may arise a tremendous strain on the working capital if the business does not possess adequate funds to replace the assets so destroyed. To cover the risk of loss from such events, a business may take on an insurance policy with an Insurance Company.

The business has to pay insurance premium at regular intervals as per the terms of the agreement — the insurance premium is charged to the Profit and Loss Account as an expense at the year-end. The insurance policy matures on the occurrence of any such mishap and the business is entitled to recover from the insurance company, the full value of the insurance policy or the actual cost of the assets lost, whichever is lower. When a business suffers a loss from an insured event, it has to notify the insurance company regarding the loss of the assets and to file a claim for compensation against those losses. Such claims are known as Insurance Claims. When a fire takes place, to file a claim with the Insurance Company for the loss of assets damaged or destroyed, a set of procedures is to be followed. Apart from the legal formalities, one of the most important problems that a business has to face is the determination of the amount of the claim to be lodged.

Types of Claims

A business takes a fire insurance policy to cover (i) the loss of assets including stock; and (ii) loss of profit (consequential loss). A business may take insurance policy for loss of cash due to theft or misappropriation.

When a fixed asset is destroyed, the computation of loss is simple. The value of such assets on the date of fire can be ascertained from the books of account of the business because most of them usually maintain proper records of the fixed assets. Fixed assets are recorded in the books of accounts at their acquisition cost, which becomes the basis for calculation of claim for the loss of fixed assets.

When a stock is destroyed the computation of loss is not so simple because the prices of different items of stock are seldom stable and are acquired at varying rates. For most of the businesses, particularly for trading concerns, stock taking is not maintained up to date. Therefore, at the time of accident no readymade value of stock is available. If the Stock Register is maintained properly, the value of stock lost by fire can be ascertained from it. However, the business may face a problem, even when the Stock Register is maintained up to date, if the books of account are also destroyed along with the stock.

Loss of Stock Policy

There are two steps for determination of claim for loss of stock:

(1) Ascertainment of the value of stock on the date of fire; and

(2) Ascertainment of actual amount of claim to be lodged.

1. Ascertainment of the Value of Stock on the Date of Fire

When it is not possible to ascertain the exact value of stock (destroyed by fire) from the Stock Register, the value of stock on the date of fire can be ascertained by constructing a Memorandum Trading Account for a period starting from the first day of the accounting period and ending on the date of fire. The following is a specimen of the Memorandum Trading Account.

Memorandum Trading Account

Dr. For the period from 1st day of the accounting year to the date of fire Cr.

Particulars	₹	Particulars	₹
To Opening Stock		By Sales	
To Purchases A/c		Less: Return Inwards	
Less: Return Outwards		By Closing Stock	
To Direct Expenses A/c		(Balancing figure)	
To Carriage Inward A/c			
To Wages A/c			
To Gross Profit (% on sales)			

The different items of the above Memorandum Trading Account are gathered as follows:

Debit Side

(i) Opening Stock: It is nothing but the closing stock of the last accounting period. Therefore, it can be ascertained from the Balance Sheet of the last accounting period.

(ii) (a) Purchases: These can be ascertained from the Purchase Day Book (credit purchases) and Cash Book (cash purchases).

(b) Return Outwards: It can be ascertained from the Return Outwards Book.

(iii) Direct Expenses: These can be ascertained from the Cash Book.

(iv) Carriage Inwards: It can be ascertained from the Cash Book.

(v) Wages: These can be ascertained from the Wages Register and Cash Book.

(vi) Gross Profit: It is calculated on sales, based on ***usual*** gross profit percentage of the last few years.

In the examination, sometimes readymade gross profit percentage may not be available. In that case, it is to be calculated on the basis of given information. Generally, information is related to last accounting year. At the time of calculation of gross profit percentage on sales, all the necessary adjustments must be made for:

(i) the slow moving items;

(ii) goods distributed as free sample;

(iii) goods taken by the proprietor/partners for personal use; and

(iv) over-valuation or under-valuation of stock.

Credit Side

(i) (a) Sales: These can be ascertained from the Sales Day Book (credit sales) and Cash Book (cash sales).

(i) (b) Return Inwards: It can be ascertained from the Return Inwards Book.

The difference between the debit side total and credit side total of the Memorandum Trading Account represents the estimated ***closing stock on the date of fire***.

2. Ascertainment of Actual Amount of Claim to be Lodged

The amount of loss to be compensated by the insurance company is always stipulated in the insurance policy, but under no circumstances, the claim for loss can exceed over the actual loss suffered by the business. When the business is fully compensated by the insurance company for the loss of stock, the insurance company becomes the owner of the stock, salvaged (saved), if any.

The Memorandum Trading Account shows the value of stock which is supposed to exist at the time of fire. Therefore, to ascertain the actual amount of claim to be lodged, we have to deduct the value of stock salvaged from the estimated value of closing stock on the date of fire, as ascertained from the Memorandum Trading Account. The actual amount of claim to be lodged is as follows:

Statement of Claim for Loss of Stock as on ...

	₹
Book value of Stock (as per Memorandum Trading Account)	****
Less: Salvaged (Retained by the business)	****
	****
Loss of Stock (claim to be lodged)*	****
	****

* Subject to average clause (discussed after Illustration 5)

Illustration 1

A fire occurred in the premises of Mr X on June 15, 2015 and a considerable part of the stock was destroyed. The value of the stock saved was ₹ 4,000.

The books disclosed that on 1st April, 2015 the stock was valued at ₹ 45,000; the purchases up to the date of fire amounted to ₹ 1,25,000 and the sales to ₹ 1,80,000. On investigation, it was found that during the past five years, the average gross profit on sales was 30%.

You are required to prepare a statement showing the amount Mr X should claim from the insurance company in respect of stock destroyed by the fire.

[B.Com (Delhi — Adapted]

Solution

Mr. X

Dr. Memorandum Trading Account for the period 1st April to 15th June, 2015 Cr.

Particulars	₹	Particulars	₹
To Opening Stock	45,000	By Sales	1,80,000
To Purchases A/c	1,25,000	By Closing Stock (Balancing figure)	44,000
To Gross Profit (30% on sales of ₹ 1,80,000)	54,000		
	2,24,000		2,24,000

Statement of Claim for Loss of Stock as on 15th June, 2015

Particulars	₹
Book value of Stock	44,000
Less: Salvaged	4,000
Claim to be Lodged	40,000

Illustration 2

The godown of Purple Ltd. caught fire on 15th June, 2015. Records saved from fire showed the following particulars:

Particulars	₹	Particulars	₹
Stock at cost on 1st January, 2014	60,000	Sales less returns for the year 2014	7,20,000
Stock at cost on 31st December, 2014	84,000	Purchases less returns from January 1 to June 15, 2015	1,80,000
Purchases less returns for the year 2014	5,08,000	Sales less returns from January 1 to June 15, 2015	2,46,000
Wages for the year 2014	20,000	Wages from January 1 to June 15, 2015	16,200

Gross profit remained at a uniform rate. The stocks salvaged was worth ₹ 7,200 and it was retained by Purple Ltd.

The godown was insured. Show the amount of claim.

Solution

Purple Ltd.

Dr. Memorandum Trading Account for the period 1st January to 15th June, 2015 Cr.

Particulars	₹	Particulars	₹
To Opening Stock	84,000	By Sales	2,46,000
To Purchases A/c	1,80,000	By Closing Stock (Balancing figure)	1,08,000
To Wages A/c	16,200		
To Gross Profit (30% on sales of ₹ 2,46,000)	73,800		
	3,54,000		3,54,000

Statement of Claim for Loss of Stock as on 15th June, 2015

Particulars	₹
Book value of Stock	1,08,000
Less: Salvaged	7,200
Claim to be Lodged	1,00,800

Working Notes:

Dr. (1) Trading Account for the year ended 31st December, 2014 Cr.

Particulars	₹	Particulars	₹
To Opening Stock	60,000	By Sales	7,20,000
To Purchases A/c	5,08,000	By Closing Stock	84,000
To Wages A/c	20,000		
To Gross Profit (Balancing figure)	2,16,000		
	8,04,000		8,04,000

(2) Rate of gross profit = ₹ 2,16,000/₹ 7,20,000 x 100 = 30%.

Illustration 3

The fire insurance policy taken out by Sultan Limited included stock purchased by the company for re-sale and stock sent to the company on approval for which a pro-forma invoice was sent by the supplier.

A disastrous fire took place at the warehouse on 1.10.2015 and you have been asked to prepare the claim for submission to the insurance company. Unfortunately, many of the records of Sultan Limited were destroyed by the fire, but the following information was available :

(a) Value of stock salvaged after the fire ₹ 68,640.

(b) Goods supplied on approval and lost in the fire ₹ 4,000.

(c) Sales for nine months to 30.9.2015, ₹ 6,26,500.

(d) Purchases for nine months to 30.9.2015, ₹ 6,02,100.

(e) Stock (as per accounts) at 31.12.2014, ₹ 1,65,206 — but on examination of the stock sheets it was found that the stock had been undervalued by ₹ 7,534.

(f) The average rate of gross profit during last few years were 20% — it was expected that this rate would have been maintained during the year 2015.

Show the claim that you would submit to the insurance company.

Solution

Sultan Limited

Dr. Memorandum Trading Account for the period 1st January to 30th September, 2015 Cr.

Particulars		₹	Particulars	₹
To Opening Stock	1,65,206		By Sales	6,26,500
Add: Undervalued Stock	7,534	1,72,740	By Closing Stock (Balancing figure)	2,73,640
To Purchases		6,02,100		
To Gross Profit (20% of ₹ 6,26,500)		1,25,300		
		9,00,140		9,00,140

Statement of Claim for Loss of Stock as on 30th September, 2015

Particulars	₹
Book Value of Stock	2,73,640
Less: Salvage	68,640
	2,05,000
Add : Goods received on approval and destroyed by fire	4,000
Claim to be Lodged	2,09,000

Illustration 4

On 31st August, 2015 the premises and stock of a firm were totally destroyed by fire, the books of accounts, however, were saved. In order to make a claim on their fire policy, they ask you to advise on the basis of the following information. The stock in hand has always been valued at 5% below cost :

Particulars	2012-13 (₹)	2013-14(₹)	2014-15 (₹)	2015-16 (₹)
Opening Stock as valued	22,800	30,400	36,100	39,900
Purchases less returns	91,000	1,10,000	1,20,000	41,000
Sales less returns	1,40,000	1,70,000	1,86,000	75,000
Wages	28,400	31,200	34,200	12,000
Closing Stock	30,400	36,100	39,900	?

Prepare a statement for submission to the insurance company in support of your claim for loss of stock. The company closes its books of account every year on 31st March.

[C.S. (Inter) — Adapted]

Solution

Dr. Memorandum Trading Account for the period 1st April to 31st August, 2015 Cr.

Particulars	₹	Particulars	₹
To Opening Stock	42,000	By Sales	75,000
To Purchases less Returns	41,000	By Closing Stock (Balancing figure)	35,000
To Wages	12,000		
To Gross Profit (20% of ₹ 75,000)	15,000		
	1,10,000		1,10,000

Statement of Claim for Loss of Stock as on 31st August, 2015

Particulars	₹
Book Value of Stock	35,000
Less: Salvage	Nil
Claim for Loss of Stock	35,000

Working Notes :

Dr. (1) Trading Account for the year ended 31st March, 2013, 2014 and 2015 Cr.

Particulars	2012-13 ₹	2013-14 ₹	2014-15 ₹	Particulars	2012-13 ₹	2013-14 ₹	2014-15 ₹
To Opening Stock (Note 2)	24,000	32,000	38,000	By Sales less Returns	1,40,000	1,70,000	1,86,000
To Purchases less Returns	91,000	1,10,000	1,20,000	By Closing Stock (Note 2)	32,000	38,000	42,000
To Wages	28,400	31,200	34,200				
To Gross Profit (Balancing figure)	28,600	34,800	35,800				
	1,72,000	2,08,000	2,28,000		1,72,000	2,08,000	2,28,000

(2) Stock is valued at 5% below cost. It means stock is shown in the accounts at 95%. Therefore, actual value of stock is :

(i) Opening stock of 2012-13 — ₹ 22,800 / 95 × 100 = ₹ 24,000
(ii) Closing stock of 2012-13 — ₹ 30,400 / 95 × 100 = ₹ 32,000
(iii) Closing stock of 2013-14 — ₹ 36,100 / 95 × 100 = ₹ 38,000
(iv) Closing stock of 2014-15 — ₹ 39,900 / 95 × 100 = ₹ 42,000.

(3) Rate of Gross Profit :

2012-13 — ₹ 28,600 / ₹ 1,40,000 × 100 = 20.43%
2013-14 — ₹ 34,800 / ₹ 1,70,000 × 100 = 20.47%
2014-15 — ₹ 35,800 / ₹ 1,86,000 × 100 = 19.25%

$$\text{Average Rate of Gross Profit} = \frac{20.43 + 20.47 + 19.25}{3} = 20.05\% \quad \text{Say, } 20\%.$$

Illustration 5

The premises of X Ltd caught fire on 22nd January, 2015 and the stock was damaged. The firm had made up accounts to 31st March each year and on 31st March, 2014, the stock at cost was ₹ 13,27,200 as against ₹ 9,62,200 on 31st March, 2013.

Purchases from 1st April, 2014 to the date of fire were ₹ 34,82,700 as against ₹ 45,25,000 for the full year 2013-14 and the corresponding sales figures were ₹ 49,17,000 and ₹ 52,00,000 respectively. You are given the following further information :

(i) In July 2014, goods costing ₹ 1,00,000 were given away for advertising purposes, no entries being made in the books.

(ii) During 2014-15, a clerk had misappropriated unrecorded cash sales. It is estimated that the defalcation averaged ₹ 2,000 per week from 1st April, 2014 until the clerk was dismissed on 21st August, 2014.

(iii) The rate of gross profit is constant.

From the above information make an estimate of the stock in hand on the date of fire.

Solution

X Limited

Dr. Memorandum Trading Account for the period 1st April, 2014 to 22nd January, 2015 Cr.

Particulars	₹	Particulars	₹
To Opening Stock	13,27,200	By Sales	49,17,000
To Purchases	34,82,700	By Advertisement	1,00,000
To Gross Profit [20% on (₹ 49,17,000 + ₹ 40,000)]	9,91,400	By Cash Sales (Note 3)	40,000
		By Closing Stock (Balancing figure)	7,44,300
	58,01,300		58,01,300

Statement of Claim for Loss of Stock as on 22nd January 2015

Particulars	₹
Book Value of Stock	7,44,300
Less: Salvage	Nil
Loss of Stock	7,44,300

Working Notes :

Dr. (1) Trading Account for the year ended 31st March, 2014 Cr.

Particulars	₹	Particulars	₹
To Opening Stock	9,62,200	By Sales	52,00,000
To Purchases	45,25,000	By Closing Stock	13,27,200
To Gross Profit (Balancing figure)	10,40,000		
	65,27,200		65,27,200

(2) Rate of Gross Profit = ₹ 10,40,000 / 52,00,000 × 100 = 20%.

(3) Assuming that the clerk misappropriated cash sales for 20 weeks (1.4.2013 to 21.8.2013). Therefore, total amount of misappropriation = 20 × ₹ 2,000 = ₹ 40,000.

Average Clause

The amount of insurance premium to be paid at regular intervals depends on the value of stock insured. More the value of stock insured, more is the amount of premium to be paid. To reduce the burden of insurance premium, the average stock of a business may not be adequately insured with the assumption that fire may not destroy the whole stock. When a business takes an insurance policy, the value of which is less than the value of the average stock lying in the godown, it is known as "Under-insurance".

Generally, fire insurance policies contain an "average clause" to discourage under-insurance. At the time of calculating insurance claim, this clause is applicable if the value of stock on the date of fire was ***more*** than the policy value. In the event of a ***partial*** loss, the insurance company pays a proportional amount of claim. The net claim is calculated as follows:

$$\text{Net Claim} = \text{Loss of Stock} \times \frac{\text{Policy Value}}{\text{Value of Stock on the date of fire}}$$

Example: X took out a fire insurance policy containing an average clause covering his stock for ₹ 30,000. On the date of fire the value of stock was ₹ 36,000. The loss was assessed at ₹ 24,000.

In this case, the value of stock on the date of fire was more than the policy value. Therefore, the average clause is applicable. X can recover from the insurance company:

$$₹\ 24{,}000 \times \frac{30{,}000}{36{,}000} = ₹\ 20{,}000$$

It should be noted that average clause is applied after deduction for salvage stock.

Illustration 6

On 17th June, 2015 a fire occured in the premises of M/s Taraporewalla, a bookseller. Most of the stock was destroyed, with the cost of salvaged stock being ₹ 11,200. In addition, some stock was salvaged in damaged condition and its value was estimated at ₹ 10,400. From books of account the following particulars are available:

(1) Stock at close of accounts on 31st December, 2014 was valued at ₹ 83,500.
(2) Purchases from 1.1.2015 – 17.6.2015 amounted to ₹ 1,12,000 and sales during that period amounted to ₹ 1,54,000.
(3) On the basis of past 3 years it appears that on an average gross profit of 25% is earned on sales.
(4) Stock was insured for ₹ 75,000.

Compute the amount of claim.

Solution

M/s. Taraporewalla

Dr. Memorandum Trading Account for the period 1st January to 17th June, 2015 Cr.

Particulars	₹	Particulars	₹
To Opening Stock	83,500	By Sales	1,54,000
To Purchases A/c	1,12,000	By Closing Stock (Balancing figure)	80,000
To Gross Profit (25% on sales on ₹ 1,54,000)	38,500		
	2,34,000		2,34,000

Statement of Claim for Loss of Stock as on 17th June, 2015

Particulars	₹
Book value of Stock	80,000
Less: Salvaged (₹ 11,200 + ₹ 10,400)	21,600
Loss of Stock	58,400

The insurance policy was taken for ₹ 75,000 but the value of stock on the date of fire was ₹ 80,000. Therefore, the average clause is applicable.

Net claim $= \text{Loss of stock} \times \frac{\text{Policy Value}}{\text{Value of stock on the date of fire}}$

$$= ₹\ 58{,}400 \times \frac{75{,}000}{80{,}000} = ₹\ 54{,}750.$$

Illustration 7

A trader took out a fire policy containing an average clause covering his stock for ₹ 15,000. His practice was to base his selling price at cost plus $33\frac{1}{3}$%.

He closes his books on 30th June every year.

On 31st March, 2015, a fire occured at his premises and destroyed his stock.

The salvaged stock was worth ₹ 6,000.

During the period of 9 months preceding the fire his purchases amounted to ₹ 61,000 and sales to ₹ 84,000. His stock at 1st July, 2014 was valued at ₹ 20,000.

You are required to prepare a statement showing the amount of claim.

Solution

Dr. Memorandum Trading Account for the period 1st July 2014 to 31st March, 2015 Cr.

Particulars	₹	Particulars	₹
To Opening Stock	20,000	By Sales	84,000
To Purchases A/c	61,000	By Closing Stock (Balancing figure)	18,000
To Gross Profit (25% on sales)*	21,000		
	1,02,000		1,02,000

* Rate of gross profit $33\frac{1}{3}$% on cost, i.e., 25% on selling price.

Statement of Claim for Loss of Stock as on 31st March, 2015

Particulars	₹
Book value of Stock	18,000
Less: Salvaged	6,000
Loss of Stock	12,000

The insurance policy was taken for ₹ 15,000; but the value of stock on the date of fire was ₹ 18,000. Therefore, the average clause is applicable.

Net claim = Loss of stock $\times \dfrac{\text{Policy Value}}{\text{Value of stock on the date of fire}}$ = ₹ 12,000 $\times \dfrac{15{,}000}{18{,}000}$ = ₹ 10,000

Illustration 8

The godown of A Ltd. caught fire on March 31, 2015. As a result stock of goods in the godown of the company were gutted. Goods worth ₹ 41,360 could, however, be saved from the accident. The following particulars are supplied to you:

	₹
Stock on January 1, 2015	60,000
Purchases to the date of fire	2,60,000
Carriage paid on purchases	1,600
Sales to the date of fire	1,80,000
Commission paid to the Purchase Manager, at 2% on purchases	
Average Gross Profit on Sales	$33^1/_3$%

The company had a fire policy of ₹ 1,60,000 covering its stock of goods in the godown. The policy is subject to Average Clause.

You are to ascertain (a) total loss of stock; and (b) the amount of insurance claim to be made.

Solution

A Ltd.

Dr. Memorandum Trading Account for the period 1st January to 31st March, 2015 Cr.

Particulars	₹	Particulars	₹
To Opening Stock	60,000	By Sales	1,80,000
To Purchases	2,60,000	By Closing Stock (Balancing figure)	2,06,800
To Carriage on Purchases	1,600		
To Commission on Purchases	5,200		
To Gross Profit ($33^1/_3$% of ₹ 1,80,000)	60,000		
	3,86,800		3,86,800

(a) Statement of Claim for Loss of Stock as on 31st March, 2015

Particulars	₹
Book value of Stock	2,06,800
Less: Salvaged	41,360
Loss of Stock	1,65,440

The insurance policy was taken for ₹ 1,60,000 but the value of stock on the date of fire was ₹ 2,06,800. Therefore, the average clause is applicable.

(b) **Net claim** = Loss of stock $\times \dfrac{\text{Policy Value}}{\text{Value of stock on the date of fire}}$ = ₹ 1,65,440 $\times \dfrac{1{,}60{,}000}{2{,}06{,}800}$ = ₹ 28,000

Illustration 9

Due to a fire in the godown of a company on 30th September, 2015, the entire stock was burnt except some stock costing ₹ 70,000. The books were, however, saved.

From the information available, it was found that —

(i) The company's average gross profit was 25% on sales.
(ii) The stock on 31st March, 2015 valued at 10% above cost was ₹ 2,20,000.
(iii) The purchases and sales from 1st April, 2015 upto the date of fire were ₹ 3,00,000 and ₹ 6,80,000 respectively.
(iv) The wages for the period amounted to ₹ 1,44,000.
(v) The company got the stock insured for ₹ 1,20,000.
(vi) The policy had an average clause.

You are required to prepare a statement showing the amount of stock lost by fire and the amount of claim to be lodged with the insurance company. ***[C.S. (Inter) — Adapted]***

Solution

Dr. Memorandum Trading Account for the period 1st April to 30th September, 2015 Cr.

Particulars	₹	Particulars	₹
To Opening Stock (Note 1)	2,00,000	By Sales	6,80,000
To Purchases	3,00,000	By Closing Stock (Balancing figure)	1,34,000
To Wages	1,44,000		
To Gross Profit (25% of ₹ 6,80,000)	1,70,000		
	8,14,000		8,14,000

Working Note : (1) Value of Opening Stock = ₹ 2,20,000 / 110 × 100 = ₹ 2,00,000.

Statement of Claim for Loss of Stock as on 30th September, 2015

Particulars	₹
Book Value of Stock	1,34,000
Less: Salvage	70,000
Loss of Stock	64,000

The insurance policy was taken for ₹ 1,20,000 but the value of stock on the date of fire was ₹ 1,34,000. Therefore, the average clause is applicable.

Net Claim = $\text{Loss of Stock} \times \dfrac{\text{Policy Value}}{\text{Value of Stock on the Date of Fire}} = ₹\ 64{,}000 \times \dfrac{1{,}20{,}000}{1{,}34{,}000} = ₹\ 57{,}313.$

Amount of claim to be lodged = ₹ 57,313.

Illustration 10

The premises of E.F. Limited were damaged due to fire on 21st December, 2014. The company made up its accounts on 30th June, each year. On 30th June, 2014 the stock at cost was ₹ 13,272 as against ₹ 9,614 on 30th June, 2013.

The purchases for full year 2013-14 were ₹ 45,258 and that for current year up to date of fire were ₹ 34,827. Corresponding sales were ₹ 52,000 and ₹ 29,170, respectively.

In October 2014 goods costing ₹ 943 were given as samples for which no entries were made.

During August to November a clerk had misappropriated unrecorded cash sales. It is estimated that defalcation was at ₹ 20 per week for 20 weeks. A part of stock is salvaged for ₹ 300. Rate of Gross profit is constant.

The policy is for ₹ 18,800 with average clause. Ascertain the amount of claim.

Solution

E.F. Ltd.

Dr. Memorandum Trading Account for the period 1st July to 21st December, 2014 Cr.

Particulars	₹	Particulars	₹
To Opening Stock	13,272	By Sales	29,170
To Purchases A/c	34,827	By Advertisement (sample)	943
To Gross Profit 20% on (₹ 29,170 + ₹ 400)	5,914	By Cash Sales (Misappropriation)	400
		By Closing Stock (Balancing figure)	23,500
	54,013		54,013

Statement of Claim for Loss of Stock as on 21st December, 2014

Particulars	₹
Book value of Stock	23,500
Less: Salvaged	300
Loss of Stock	23,200

The insurance policy was taken for ₹ 18,800 but the value of stock on the date of fire was ₹ 23,500. Therefore, the average clause is applicable.

Net claim = $\text{Loss of stock} \times \dfrac{\text{Policy Value}}{\text{Value of stock on the date of fire}}\ ₹\ 23{,}200 \times \dfrac{18{,}800}{23{,}500} = ₹\ 18{,}560.$

Working Notes:

Dr. (1) Trading Account for the year ended 30th June, 2014 Cr.

Particulars	₹	Particulars	₹
To Opening Stock	9,614	By Sales	52,000
To Purchases A/c	45,258	By Closing Stock	13,272
To Gross Profit (Balancing figure)	10,400		
	65,272		65,272

Rate of gross profit = ₹ 10,400/₹ 52,000 x 100 = 20%.

Illustration 11

On 20th July 2015, the godown and the business premises of a merchant were affected by fire. From the accounting records salvaged, the following information is made available to you: (all figures in ₹)

Stock of goods on 1st April, 2014	1,00,000	Sales for the same period	6,00,000
Stock of goods at 10% lower than cost as on 31st Mar.,'15	1,08,000	Purchases less returns from 1st Apr. '15 to 20th July '15	1,40,000
Pur. of goods for the year from 1st Apr. '09 to 31st Mar. '15	4,20,000	Sales less returns for the above period	3,10,000

Sales up to 20th July 2015 included ₹ 40,000 for which goods had not been despatched. Purchases up to 20th July 2015 did not include ₹ 20,000 for which purchase invoices had not been received from suppliers, though goods have been received at the godown.

Goods salvaged from the accident were worth ₹ 12,000 and these were handed over to the insured.

Ascertain the value of the claim for the loss of goods/stock which could be preferred on the insurer.

Solution

Dr. Memorandum Trading Account for the period 1st April to 20th July, 2015 Cr.

Particulars		₹	Particulars		₹
To Opening Stock (Note 2)		1,20,000	By Sales	3,10,000	
To Purchases A/c	1,40,000		Less: Goods not yet delivered	40,000	2,70,000
Add: Goods included in stock but not recorded	20,000	1,60,000	By Closing Stock (Balancing figure)		1,00,000
To Gross Profit (@ 33-1/3% on ₹ 2,70,000)		90,000			
		3,70,000			3,70,000

Statement of Claim for Loss of Stock as on 20th July, 2015

Particulars	₹
Book value of Stock	1,00,000
Less: Salvaged	12,000
Claim to be Lodged	88,000

Working Notes:

Dr. (1) Trading Account for the year ended 31st March, 2015 Cr.

Particulars	₹	Particulars	₹
To Opening Stock	1,00,000	By Sales	6,00,000
To Purchases A/c	4,20,000	By Closing Stock (Note 2)	1,20,000
To Gross Profit (Balancing figure)	2,00,000		
	7,20,000		7,20,000

Rate of gross profit = ₹ 2,00,000/₹ 6,00,000 x 100 = $33^1/_3$%.

(2) The closing stock on 31st March 2015 was valued at 10% less than cost. Therefore, the actual cost of closing stock will be : ₹ 1,08,000/90 x 100 = ₹ 1,20,000.

Illustration 12

The Trading Account of A & Co. for the year ending 31st March, 2014 is given below: (all figures in ₹)

To Opening Stock	68,480	By Sales less returns	1,96,000
To Purchases less returns	1,56,940	By Closing Stock	58,820
To Gross Profit c/d	29,400		
	2,54,820		2,54,820

A fire occurs in their godown on 31st December, 2014, and a considerable part of the stock of readymade garments is destroyed. The salvaged stock is worth ₹ 1,520. The stock is fully insured against fire risks.

Considering the following further particulars, prepare a statement showing the amount of claim to be lodged by A & Co. with insurer for the loss of stock.

Sales for the period ending 31st December, 2014 are ₹ 1,09,200.

The amount paid for purchases is ₹ 88,016 including a cheque for ₹ 562 which remains unpresented to the bankers up to 31.12.2014 as shown by the books of account.

Trade creditors on 31st March 2014 amount to ₹ 24,608 and on 31st December, 2014 are ₹ 22,112.

Goods worth ₹ 6,390 are returned to creditors during the period ending 31st December, 2014.

Solution

Dr. Memorandum Trading Account for the period 1st April to 31st December, 2014 Cr.

Particulars		₹	Particulars	₹
To Opening Stock		58,820	By Sales	1,09,200
To Purchases A/c (Note 1)	91,910		By Closing Stock (Balancing figure)	51,520
Less: Returns	6,390	85,520		
To Gross Profit (15% on ₹ 1,09,200)		16,380		
		1,60,720		1,60,720

Statement of Claim for Loss of Stock as on 31st December, 2014

Particulars	₹
Book value of Stock	51,520
Less: Salvaged	1,520
Claim to be Lodged	50,000

Working Notes:

Dr. (1) Sundry Creditors Account Cr.

Date	Particulars	₹	Date	Particulars	₹
2014 ?	To Returns A/c	6,390	2014 Apr. 1	By Balance b/d	24,608
?	To Bank A/c	88,016	?	By Purchases A/c (Balancing figure)	91,910
Dec. 31	To Balance c/d	22,112			
		1,16,518			1,16,518

(2) Rate of Gross Profit = ₹ 29,400 / ₹ 1,96,000 x 100 = 15%.

(3) Cheque not yet presented by Creditors for ₹ 562 will not affect the Creditors balance.

Illustration 13

A fire occured in the premises of Shri Romesh on 1st April 2015 and a considerable part of the stock was destroyed. The stock salvaged was worth ₹ 1,12,000. Shri Romesh had taken a fire insurance policy for ₹ 6,84,000 to cover the loss of stock by fire.

You are required to ascertain the insurance claim due from the insurance company for the loss of stock by fire. The following particulars are available: (all figures in ₹)

Purchases for the year 2014	37,52,000	Stock on 1st January 2014	5,76,000
Sales for the year 2014	46,40,000	Stock on 31st December 2014	9,68,000
Purchases from 1st January 2015 to 1st April 2015	7,28,000	Wages paid during the year 2014	4,00,000
Sales from 1st January 2015 to 1st April 2015	9,60,000	Wages paid during 1st January 2015 to 1st April 2015	72,000

Shri Romesh had in June 2014 consigned goods worth ₹ 2,00,000 which were lost in an accident. As there was no insurance the loss was borne by him in full.

Stocks at end of each year for and till the end of calendar year 2013 had been valued at cost less 10%. From 2014 however, there was a change in the valuation of closing stock which was ascertained by adding 10% to its cost.

Solution

Dr. Memorandum Trading Account for the period 1st January to 1st April, 2015 Cr.

Particulars	₹	Particulars	₹
To Opening Stock (Note 3)	8,80,000	By Sales	9,60,000
To Purchases A/c	7,28,000	By Closing Stock (Balancing figure)	9,12,000
To Wages	72,000		
To Gross Profit (@ 20% on ₹ 9,60,000)	1,92,000		
	18,72,000		18,72,000

Statement of Claim for Loss of Stock as on 1st April, 2015

Particulars	₹
Book value of Stock	9,12,000
Less: Salvaged	1,12,000
Loss of Stock	8,00,000

The insurance policy was taken for ₹ 6,84,000 but the value of stock on the date of fire was ₹ 9,12,000. Therefore, the average clause is applicable.

$$\textbf{Net claim} = \text{Loss of stock} \times \frac{\text{Policy Value}}{\text{Value of stock on the date of fire}} = ₹\,8{,}00{,}000 \times \frac{6{,}84{,}000}{9{,}12{,}000} = ₹\,6{,}00{,}000.$$

Working Notes:

Dr. (1) Trading Account for the year ended 31st December, 2014 Cr.

Particulars	₹	Particulars	₹
To Opening Stock (Note 2)	6,40,000	By Sales	46,40,000
To Purchases	37,52,000	By Accidental Loss (not covered by insurance)	2,00,000
To Wages	4,00,000	By Closing Stock (Note 3)	8,80,000
To Gross Profit (Balancing figure)	9,28,000		
	57,20,000		57,20,000

Rate of Gross Profit = ₹ 9,28,000 / ₹ 46,40,000 x 100 = 20%.

(2) On 31.12.2013, stock was valued at cost less 10%, i.e., at 90% of cost. Therefore, the actual value of stock will be : ₹ 5,76,000 / 90 x 100 = ₹ 6,40,000.

(3) On 31.12.2014, stock was valued at cost plus 10%, i.e., at 110% of cost. Therefore, the actual cost of stock will be : ₹ 9,68,000 / 110 x 100 = ₹ 8,80,000.

Illustration 14

A fire occured on 1st October, 2014 in the premises of X Co. Ltd. From the following figures, calculate the amount of claim to be lodged with the insurance company for loss of stock: (all figures in ₹)

Stock at cost on 1.1.2013	90,000	Purchases from 1.1.2014 to 30.9.2014	6,00,000
Stock at cost on 1.1.2014	70,000	Sales during 2013	6,00,000
Purchases during 2013	4,00,000	Sales from 1.1.2014 to 30.9.2014	8,80,000

You are informed that:

(a) In 2014 the cost of purchases has risen by 20% over the levels prevailing in 2013; (b) In 2014 the selling prices have gone up by 10% over the levels prevailing in 2013; and (c) Salvaged value is ₹ 5,000.

Solution

X & Co. Ltd.

Dr. Memorandum Trading Account for the period 1st January to 30th September, 2014 Cr.

Particulars		₹	Particulars		₹
To Opening Stock		70,000	By Sales: (Note 2)		
To Purchases A/c		6,00,000	Out of opening stock	1,10,000	
To Gross Profit: On opening stock (Note 2)	40,000		Out of current purchases	7,70,000	8,80,000
On current year items (Note 4)	1,82,000	2,22,000	By Closing Stock (Balancing figure)		12,000
		8,92,000			8,92,000

Statement of Claim for Loss of Stock as on 30th September, 2014

Particulars	₹
Book value of Stock	12,000
Less: Salvaged	5,000
Claim to be Lodged	7,000

Working Notes:

Dr. (1) Trading Account for the year ended 31st December, 2013 Cr.

Particulars	₹	Particulars	₹
To Opening Stock	90,000	By Sales	6,00,000
To Purchases	4,00,000	By Closing Stock — at cost	70,000
To Gross Profit	1,80,000		
	6,70,000		6,70,000

Rate of Gross Profit = ₹ 1,80,000 / ₹ 6,00,000 x 100 = 30%.

(2) Sales out of Opening Stock	₹		₹
Let selling price in 2013	100	Selling price in 2014 gone up by 10%, i.e.,	110
Less: Profit 30%	30	Less: Cost of Sales	70
Cost of Sales in 2013	70	Gross Profit	40

(i) Sales value of opening stock = ₹ 70,000 / 70 x 110 = ₹ 1,10,000.

(ii) Gross Profit on sale of opening stock = ₹ 1,10,000 – ₹ 70,000 = ₹ 40,000.

(3) Sales and Gross Profit out of 2014 Purchases:

Selling price has gone up by 10% in 2014. So Selling price	=	₹ 110
Less: Cost of Sales — 2013 rate plus 20% : ₹ 70 + ₹ 14	=	₹ 84
Gross Profit	=	₹ 26

Rate of Gross Profit in 2014 = 26 / 110 x 100 = **23.6364%.**

(4) Total sales of 2014 = ₹ 8,80,000. Sales out of opening stock [2(i)] ₹ 1,10,000. Therefore, sale out of current purchases = ₹ 8,80,000 – ₹ 1,10,000 = ₹ 7,70,000. Gross Profit from sales of purchases of 2014 = 23.6364% of ₹ 7,70,000 = ₹ 1,82,000.

Illustration 15

From the following figures, calculate the amount of claim for loss of stock with the insurance company:

	₹
Stock at cost on 1st January, 2014	1,35,000
Stock at cost on 1st January, 2015	1,50,000
Purchases during 2014	9,15,000
Purchases from 1st January, 2015 to 30th June 2015	8,00,000
Sales during 2014	12,00,000
Sales from 1st January, 2015 to 30th June 2015	9,90,000

You are informed that —

(a) In 2015 the costs of purchases have risen by 20% above the level prevailing in 2014.
(b) In 2015 the selling prices have gone up by 10% over the level prevailing in 2014.
(c) Salvage value of stock ₹ 20,000.
(d) Fire insurance policy for ₹ 1,48,750 to cover the loss of stock by fire.

Solution

Dr. Memorandum Trading Account for the period 1st January to 30th June, 2015 Cr.

Particulars	₹	Particulars	₹
To Opening Stock	1,50,000	By Sales (Note 2)	
To Purchases	8,00,000	Out of Opening Stock	2,20,000
To Gross Profit :		Out of Current Purchases	7,70,000
On Opening Stock (Note 2)	70,000	By Closing Stock (Balancing figure)	1,70,000
On Current year purchased item (Note 4)	1,40,000		
	11,60,000		11,60,000

Statement of Claim for Loss of Stock as on 30th June, 2015

Particulars	₹
Book Value of Stock	1,70,000
Less: Salvage	20,000
Loss of Stock	1,50,000

The insurance policy was taken for ₹ 1,48,750 but the value of stock on the date of fire was ₹ 1,70,000. Therefore, the average clause is applicable.

$$\textbf{Net Claim} = \text{Loss of Stock} \times \frac{\text{Policy Value}}{\text{Value of Stock on the Date of Fire}} = ₹\,1{,}50{,}000 \times \frac{1{,}48{,}750}{1{,}70{,}000} = ₹\,1{,}31{,}250..$$

Working Notes :

Dr. (1) Trading Account for the year ended 31st December, 2014 Cr.

Particulars	₹	Particulars	₹
To Opening Stock	1,35,000	By Sales	12,00,000
To Purchases	9,15,000	By Closing Stock (Given)	1,50,000
To Gross Profit (Balancing figure)	3,00,000		
	13,50,000		13,50,000

Rate of Gross Profit = ₹ 3,00,000 / ₹ 12,00,000 × 100 = 25%.

(2) Sales Out of Opening Stock

Particulars	₹	Particulars	₹
Let selling price in 2014 be	100	Selling price in 2015 gone up by 10%, i.e.,	110
Less: Profit 25%	25	Less : Cost of sales	75
Cost of Sales	75	Gross Profit	35

(i) Sale value of opening stock = ₹ 1,50,000 / 75 × 110 = ₹ 2,20,000.
(ii) Gross Profit on sale of opening stock = ₹ 2,20,000 – ₹ 1,50,000 = ₹ 70,000.

(3) Sales and Gross Profit out of 2015 Purchases:	₹
Selling price in 2015 has gone up by 10%. Therefore, selling price	110
Less: Cost of sales — 2014 rate plus 20% (₹ 75 + 15)	90
Gross Profit	20

Rate of Gross Profit in 2015 = 20/110 × 100 = **18.1818%**.

(4) Total sales of 2015 — ₹ 9,90,000. Sales out of opening stock [2(i)] ₹ 2,20,000. Therefore, sales out of current purchases = ₹ 9,90,000 – ₹ 2,20,000 = ₹ 7,70,000. Gross profit from sales of purchases of 2015 = 18.1818% of ₹ 7,70,000 = ₹ **1,40,000**.

Illustration 16

The warehouse of Cores (India) Ltd was destroyed by fire on 1.5.2014. The goods in stock were insured to a value of ₹ 25,000.

The following information is available :

Balance Sheet figures at 31.12.2013 —

Stock (including goods held by agent ₹ 700); ₹ 16,900; Debtors ₹ 31,300; Creditors ₹ 12,900.

Transactions to 30.4.2014 include —

Receipts from debtors ₹ 1,48,600; Payment to creditors ₹ 1,07,300; Bad debts ₹ 300; Discount received ₹ 100.

Balances at 30.4.2014 —

Debtors ₹ 31,000; Creditors ₹ 13,600.

The closing debtors' figure includes an amount owing from the agent for sales to date ₹ 1,800, less 10% commission and his expenses of ₹ 20. At 30.4.2014, the agent still held goods from the company valued at their selling price of ₹ 1,500.

The total sales for the period includes ₹ 600 for goods which have had the selling price reduced by 50% and ₹ 2,400 where the selling price was reduced by 20%.

The normal mark-up is 50% and, except as indicated differently above, all sales can be assumed to be at the full selling price. All of the stock in the warehouse was destroyed and there was no salvage value.

You are required to calculate the amount of insurance claim.

Solution

Cores (India) Ltd

Dr. Memorandum Trading Account for the period 1st January to 30th April, 2014 Cr.

Particulars	₹	₹	Particulars	₹	₹
To Opening Stock	16,900		By Sales (Note 1)	1,47,000	
Less: Goods held by Agent	700	16,200	Less: Sale of Goods below Normal Selling		
To Purchases (Note 2)	1,08,100		Price (Note 8)	3,000	1,44,000
Less: Goods Sent to Agent (Note 4)	1,500		By Closing Stock (Balancing figure)		24,000
	1,06,600				
Less: Cost of Goods Sold below Normal Selling Price (Note 8)	2,800	1,03,800			
To Gross Profit*		48,000			
		1,68,000			1,68,000

*Mark-up is 50%. It means profit is 50% of cost. If the cost is ₹ 100, then profit will be ₹ 50 and selling price will be ₹ 150. It means, rate of gross profit on sales is 1/3 of sales. Therefore, gross profit = 1/3 of ₹ 1,44,000 = ₹ **48,000**.

Tutorial Note : A mark-up is always at cost, whereas a margin is on selling price.

Statement of Claim for Loss of Stock as on 30th April, 2014

Particulars	₹
Book Value of Stock	24,000
Less: Salvage	—
Loss of Stock	24,000

Working Notes :

Dr. (1) Debtors Account Cr.

Date	Particulars	₹	Date	Particulars	₹
1.1.2014	To Balance b/d	31,300	?	By Cash	1,48,600
	To Sales (Balancing figure)	1,47,000	?	By Bad Debts (written off)	300
			30.4.2014	By Balance c/d (Note 5)	29,400
		1,78,300			1,78,300

Dr. **(2) Creditors Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
?	To Cash	1,07,300	1.1.2014	By Balance b/d	12,900
	To Discount Received	100	?	By Purchases (Balancing figure)	1,08,100
30.4.2014	To Balance c/d	13,600			
		1,21,000			1,21,000

Dr. **(3) Agent's Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
?	To Sales	1,800	?	By Commission (10% of ₹ 1,800)	180
			?	By Expenses	20
			30.4.2014	By Balance c/d	1,600
		1,800			1,800

Dr. **(4) Stock with Agent Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Balance b/d	700		By Cost of Goods Sold (Note 6)	1,200
	To Goods Sent to Agent (Balancing figure)	1,500		By Balance c/d (Note 7)	1,000
		2,200			2,200

(5) Balance of debtors at 30.4.2014 = ₹ 31,000 which include amount due from agent ₹ 1,600 (Note 3). Therefore, actual amount due from debtors = ₹ 31,000 – ₹ 1,600 = ₹ 29,400.

(6) Normal mark-up is 50%.

Let, cost =	₹ 100
Add : Profit (50%)	₹ 50
Selling price	150

When selling price is ₹ 150 then cost = ₹ 100

When selling price is Re 1 then cost = ₹ 100 / 150

When selling price is ₹ 1,800 then cost = ₹ 100 / ₹ 150 × ₹ 1,800 = ₹ **1,200**

(7) Goods held by the agent at selling price = ₹ **1,500**.

When selling price is ₹ 150 then cost = ₹ 100

When selling price is Re 1 then cost = ₹ 100 / ₹ 150

When selling price is ₹ 1,500 then cost = ₹ 100 / ₹ 150 × ₹ 1,500 = ₹ **1,000**

(8) Calculation of Cost of Goods Sold below Normal Selling Price

Sales (₹)	Normal Selling Price (₹)	Cost (₹)
600	600 / 50 x 100 = 1,200	1,200 / 150 x 100 = 800
2,400	2,400 / 80 x 100 = 3,000	3,000 / 150 x 100 = 2,000
3,000		2,800

Poor Selling Goods

It is quite possible that there may be some poor-selling goods included in the stock. These goods are generally valued at below cost and, in effect, gross profit is reduced. To determine the normal rate of gross profit, the stock and sales proceeds of these goods are to be eliminated from the total sales and stock. In this case, Trading Account is prepared in columnar form to show separately normal and abnormal items.

Illustration 17

On 1st October, 2013, the godown of XYZ Ltd was destroyed by fire. The record of the company revealed the following:

	₹
Stock on 1st April, 2012	9,50,000
Stock on 31st March, 2013	8,00,000
Purchases for the year ended 31st March, 2013	31,00,000
Sales for the year ended 31st March, 2013	40,00,000
Purchases from 1st April, 2013 to the date of fire	7,50,000
Sales from 1st April, 2013 to the date of fire	10,00,000

While valuing stock on 31st March, 2013, a sum of ₹ 10,000 was written-off on the goods, cost of which was ₹ 48,000. A part of this stock was sold in June, 2013 at a loss of ₹ 4,000 on the original cost of ₹ 24,000. The remainder of this stock was now estimated to be worth the original cost. Subject to the above exception, gross profit remained at a uniform rate throughout.

Stock salvaged was ₹ 50,000. The godown was fully insured.

Calculate the amount of the insurance claim for the loss. ***[C.S. (Inter) — Adapted]***

Solution

XYZ Ltd

On 15th June 2015, the business house of Maneka & Co. was destroyed by fire. The following particulars are given to you: (all figures in ₹)

Stock at cost 1st January 2014	4,41,000	Sales less returns year ended 31.12.2014	29,22,000
Stock at cost 31st December 2014	4,77,600	Purchases less returns Jan 1-15th June 2015	9,72,000
Purchases less returns year ended 31.12.2014	23,88,000	Sales less returns Jan 1-15th June 2015	13,87,200

In valuing stock for Balance Sheet at 31.12.2014, ₹ 13,800 had been written-off on certain stock which was a poor selling line, having cost ₹ 41,400. A portion of these goods was sold in March 2015 at a loss of ₹ 1,500 on the original cost of ₹ 20,700. The remainder of this stock is now estimated to be worth the original cost. Subject to the above exception, Gross profit remained at a uniform rate throughout. The stock salvaged from fire was valued at ₹ 34,800. You are to ascertain the amount of claim to be placed.

Solution

Maneka & Co.

Dr. Memorandum Trading Account for the period 1st January to 15th June, 2015 Cr.

Particulars	Normal items	Abnormal items	Total ₹	Particulars	Normal items	Abnormal items	Total ₹
To Opening Stock	4,50,000	41,400	4,91,400	By Sales	13,68,000	19,200	13,87,200
To Purchases	9,72,000	—	9,72,000	By Loss	—	1,500	1,500
To Gross Profit (20%)	2,73,600	—	2,73,600	By Closing Stock	3,27,600	20,700	3,48,300
	16,95,600	41,400	17,37,000		16,95,600	41,400	17,37,000

Statement of Claim for Loss of Stock as on 15th June, 2015

Particulars	₹
Book value of Stock	3,48,300
Less: Salvaged	34,800
Claim to be Lodged	3,13,500

Working Note:

Dr. (1) Trading Account for the year ended 31st December, 2014 Cr.

Particulars	₹	Particulars	₹
To Opening Stock	4,41,000	By Sales	29,22,000
To Purchases A/c	23,88,000	By Closing Stock:	
To Gross Profit	5,84,400	Nominal items (₹ 4,77,600 – 27,600)	4,50,000
		Abnormal items (cost)	41,400
	34,13,400		34,13,400

Rate of Gross Profit = ₹ 5,84,400/29,22,000 x 100 = 20%.

Illustration 20

On Friday, 13.5.2014, a fire at the premises of Rustam Limited destroyed a substantial part of the stock. It also destroyed some of the office records. The company has a loss of stock insurance policy under which the amount insured is ₹ 84,000. The amount of the claim for stock lost in the fire will have to be calculated from what information is available. For the accounting year ended 31.12.2013, the following figures were included in the profit calculation :

Sales ₹ 4,06,000; Purchases ₹ 3,06,000; Stock (1.1.2013) ₹ 70,000; Stock (31.12.2013) ₹ 80,000.

Notes :

(i) The stock at 1.1.2013 included ₹ 6,000 representing goods which had been reduced in value at the stock taking and were all sold during 2013 for the same reduced amount.

(ii) The stock at 31.12.2013 included ₹ 10,000 representing goods which were reduced to half-cost at the stock taking. Of these, ₹ 6,000 were sold at the reduced amount in January, 2014, ₹ 2,000 were scrapped in February 2014 without any revenue at all, and the balance had not been disposed of at the time of fire.

The cost price of stock at 13.5.2014 unaffected by the fire was ₹ 26,143 but the rest of the stock was completely destroyed, and this included the balance of the marked-down stock referred to in (ii) above.

The mix of products sold up to 13.5.2014 was substantially the same as for 2013. No writing-down of stock values takes place except at annual stocktaking and, with the exception of the items mentioned, there have been no alterations to normal selling prices.

Purchases from 1.1.2014 to 13.5.2014 total ₹ 1,45,500. Sales for the same period total ₹ 1,90,000, and there were returns from customers of ₹ 4,000.

Calculate the amount which you expect the company could claim for the loss of stock.

Solution

Rustam Limited

Dr. Memorandum Trading Account for the period 1st January to 13th May, 2014 Cr.

Particulars	Normal Items	Abnormal Items	Total ₹	Particulars	Normal Items	Abnormal Items	Total ₹
To Opening Stock	70,000	20,000	90,000	By Sales	1,84,000	6,000	1,90,000
To Purchases	1,45,500	—	1,45,500	Less: Returns	4,000	—	4,000
To Gross Profit	54,000	—	54,000		1,80,000		1,86,000
(30% of ₹ 1,80,000)				By Loss (Note 3)	—	12,000	12,000
				By Closing Stock	89,500	2,000	91,500
	2,69,500	20,000	2,89,500		2,69,500	20,000	2,89,500

Statement of Claim for Loss of Stock as on 13th May, 2014

Particulars	₹
Book Value of Stock (Total)	91,500
Less: Stock Unaffected	26,143
Loss of Stock	65,357

The policy was taken for ₹ 84,000 but the value of stock on the date of fire was ₹ 91,500. Therefore, the average clause is applicable:

$$\textbf{Net Claim} = \text{Loss of Stock} \times \frac{\text{Policy Value}}{\text{Value of Stock on the Date of Fire}} = ₹\ 65{,}357 \times \frac{84{,}000}{91{,}500} = ₹\ 60{,}000.$$

Working Notes :

Dr. (1) Trading Account for the the year ended 31st December, 2013 Cr.

Particulars	Normal Items	Abnormal Items	Total ₹	Particulars	Normal Items	Abnormal Items	Total ₹
To Opening Stock	64,000	6,000	70,000	By Sales	4,00,000	6,000	4,06,000
To Purchases	3,06,000	—	3,06,000	By Closing Stock (Note 2)	90,000	—	90,000
To Gross Profit	1,20,000	—	1,20,000				
	4,90,000	6,000	4,96,000		4,90,000	6,000	4,96,000

Rate of Gross Profit = ₹ 1,20,000 / ₹ 4,00,000 × 100 = 30%.

(2) On 31.12.2013 stock representing ₹ 10,000 were reduced to half cost. It means the actual cost of those goods were ₹ 10,000 × 2/1 = ₹ 20,000. Cost of other goods were ₹ 80,000 – ₹ 10,000 = ₹ **70,000**.
Total closing stock on 31.12.2013 = ₹ 70,000 + ₹ 20,000 = ₹ 90,000.

(3) Original cost of abnormal item = ₹ 20,000. ₹ 10,000 was reduced for stock taking purpose and further ₹ 2,000 were scrapped. Therefore, total loss = ₹ 12,000. Closing stock at reduced price = ₹ 20,000 – ₹ 6,000 – ₹ 12,000 = ₹ 2,000.

Illustration 21

On 1st April 2015, the stock of Shri Ramesh was destroyed by fire but sufficient records were saved from which following particulars were ascertained: (all figures in ₹)

Stock at cost 1st January 2014	73,500	Sales for the year ended 31st December 2014	4,87,000
Stock at cost 31st December 2014	79,600	Purchases from January 1 to March 31 2015	1,62,000
Purchases for the year ended 31st December 2014	3,98,000	Sales from January 1 to March 31 2015	2,31,200

In valuing the stock for the Balance Sheet at 31st December 2014, ₹ 2,300 had been written-off on certain stock which was a poor selling line having cost ₹ 6,900. A portion of these goods was sold in March 2015 at a loss of ₹ 250 on the original cost of ₹ 3,450. The remainder of this stock is now estimated to be worth its original cost. Subject to the above exception, gross profit had remained at a uniform rate throughout the year.

The value of stock salvaged was ₹ 5,800. The insurance policy was for ₹ 50,000 and was subject to the average clause. Work out the amount of the claim of loss by fire.

Solution

Sri Ramesh

Dr. Memorandum Trading Account for the period 1st January to 31st March, 2015 Cr.

Particulars	Normal items	Abnormal items	Total ₹	Particulars	Normal items	Abnormal items	Total ₹
To Opening Stock	75,000	6,900	81,900	By Sales	2,28,000	3,200	2,31,200
To Purchases	1,62,000	—	1,62,000	By Loss	—	250	250
To Gross Profit (20%)	45,600	—	45,600	By Closing Stock	54,600	3,450	58,050
	2,82,600	6,900	2,89,500		2,82,600	6,900	2,89,500

Statement of Claim for Loss of Stock as on 31st March, 2015

Particulars	₹
Book value of Stock (Total)	58,050
Less: Salvaged	5,800
Loss of Stock	52,250

The insurance policy was taken for ₹ 50,000 but the value of stock on the date of fire was ₹ 58,050. Therefore, the average clause is applicable:

$$\textbf{Net claim} = \text{Loss of stock} \times \frac{\text{Policy Value}}{\text{Value of stock on the date of fire}} = ₹\ 52,250 \times \frac{50,000}{58,050} = ₹\ 45,004.$$

Working Notes:

Dr. (1) Trading Account for the year ended 31st December, 2014 Cr.

Particulars	₹	Particulars	₹
To Opening Stock	73,500	By Sales	4,87,000
To Purchases	3,98,000	By Closing Stock: (Note 2)	
To Gross Profit	97,400	Nominal items (₹ 79,600 – 4,600)	75,000
		Abnormal items	6,900
	5,68,900		5,68,900

Rate of Gross Profit = ₹ 97,400/4,87,000 x 100 = 20%.

(2) Cost of abnormal items was ₹ 6,900. These were valued on 31st December 2014 after writing-off ₹ 2,300, i.e., at ₹ 6,900 – ₹ 2,300 = ₹ 4,600.

Illustration 22

On 1st July 2014, a fire took place in the godown of Ram Kumar which destroyed the stock. Calculate the amount of insurance claim for stock from the following details: (all figures in ₹)

Sales in 2012	2,00,000	Stock as on 1.1.2014	2,70,000
Gross Profit in 2012	60,000	Purchases from 1.1.2014 to 30.6.2014	4,00,000
Sales in 2013	3,00,000	Sales from 1.1.2014 to 30.6.2014	7,20,000
Gross Profit in 2013	60,000		

The following are also to be taken into consideration:

1. Stock as on 31st December 2013 had been undervalued by 10%.
2. A stock taking conducted in March 2014 had revealed that stock costing ₹ 80,000 was lying in a damaged condition. 50% of this stock was sold in May 2014 at 50% of cost and the balance was expected to be sold at 40% of cost.

Solution

To Gross Profit (30%)	2,10,000	—	2,10,000	By Closing Stock	1,30,000	16,000	1,46,000
	8,30,000	80,000	9,10,000		8,30,000	80,000	9,10,000

Statement of Claim for Loss of Stock as on 30th June, 2014

Particulars	₹
Book value of Stock	1,46,000
Less: Salvaged	Nil
Loss of Stock	1,46,000

Working Notes:

(1) Rate of Gross Profit in 2012 = ₹ 60,000 / 2,00,000 x 100 = 30%.

(2) Rate of Gross Profit in 2013 = *₹ 90,000 / 3,00,000 x 100 = 30%.

*Gross Profit as given	₹ 60,000
Add: Increase in the value of Closing stock ₹ 2,70,000 / 90 x 10	₹ 30,000
	₹ 90,000

(3) Sales of the abnormal items = 50% of (1/2 of ₹ 80,000) = ₹ 20,000.

(4) Value of abnormal items unsold = 40% of (1/2) of ₹ 80,000) = ₹ 16,000.

Illustration 23

On 30th September 2014 the stock of Fred Perry was lost in a fire accident. From the records, the following information is made available to enable you to prepare a statement of claim on the insurers: (all figures in ₹)

Stock at cost on 1st April 2013	37,500	Sales less returns for the year ended 31st March 2014	3,15,000
Stock at cost on 31st March 2014	52,000	Purchases less returns up to 30th September 2014	1,45,000
Purchases less returns for the year ended 31st March 2014	2,53,750	Sales less returns up to 30th September 2014	1,84,050

In valuing the stock on 31st March 2014, due to obsolescence 50% of the value of the stock which originally cost ₹ 6,000 has been written-off. In May 2014, three-fourths of this stock had been sold at 90% of the original cost and it is now expected that the balance of the obsolete stock is also expected to realise the same price. Subject to the above, gross profit had remained uniform throughout. The stock salvaged was worth ₹ 7,200.

Solution

Fred Perry

Dr. Memorandum Trading Account for the period 1st April to 30th September, 2014 Cr.

Particulars	Normal items	Abnormal items	Total ₹	Particulars	Normal items	Abnormal items	Total ₹

Book Value of Stock (Normal + Abnormal)	48,200
Less: Salvage	15,000
Loss of Stock	33,200

Insurance policy was taken for ₹ 42,000, but the value of stock on the date of fire was ₹ 48,200. Therefore, the average clause is applicable :

$$\textbf{Net Claim} = \text{Loss of Stock} \times \frac{\text{Policy Value}}{\text{Value of Stock on the Date of Fire}} = ₹\ 33,200 \times \frac{42,000}{48,200} = ₹\ 28,929.46$$

Working Notes :

Dr. (1) Trading Account for the year ended 31st December, 2014 Cr.

Particulars	Normal Items	Abnormal Items	Total ₹	Particulars	Normal Items	Abnormal Items	Total ₹
To Opening Stock (Note 2)	30,000	10,000	40,000	By Sales	2,00,000	3,400	2,03,400
To Purchases	1,42,000	—	1,42,000	By Loss	—	1,600	1,600
To Wages (Note 3)	5,000	—	5,000	By Closing Stock (Note 4)	30,000	5,000	35,000
To Carriage Inwards	3,000	—	3,000				
To Gross Profit	50,000	—	50,000				
	2,30,000	10,000	2,40,000		2,30,000	10,000	2,40,000

Rate of Gross Profit = ₹ 50,000 / ₹ 2,00,000 × 100 = 25%.

(2) On 31.12.2013 an item costing ₹ 10,000 was valued for ₹ 6,000. This ₹ 6,000 is included in the stock of 1.1.2014 ₹ 36,000. After deducting abnormal item, the value of normal items would be ₹ 36,000 – ₹ 6,000 = ₹ 30,000.

(3) Total wages paid in 2014 — ₹ 6,000. Out of that ₹ 1,000 paid for construction of the stage. Therefore, wages related to business = **₹ 5,000**.

(4) Closing stock on 31.12.2014 — ₹ 32,000 which includes ₹ 2,000 abnormal item (original cost ₹ 5,000). Therefore, closing stock on normal items = **₹ 30,000**.

(5) Original cost of all abnormal items = ₹ 10,000. 1/4 of this i.,e., ₹ 2,500 was sold for ₹ 2,600. Therefore, profit on sale of abnormal items = ₹ 100.

(6) Original cost of abnormal items unsold = ₹ 5,000 – ₹ 2,500 = ₹ 2,500. Present worth of unsold items = 40% of ₹ 2,500 = ₹ 1,000.

(7) Information in respect of wages and carriage inwards for 2015 has not been given. It is assumed that in 2015, these expenses were incurred, proportionately in relation to cost of goods sold as in 2014. Therefore, wages and carriage inwards have been calculated as follows :
When cost of goods is ₹ 1,50,000 (2014) then wages is ₹ 5,000 and carriage inwards ₹ 3,000
When cost of goods is Re 1 (2014) then wages is ₹ 5,000 / ₹ 1,50,000 and carriage inwards ₹ 3,000 / ₹ 1,50,000
When cost of goods is ₹ 60,000 (2015) then wages is ₹ 5,000 / ₹ 1,50,000 × ₹ 60,000 = ₹ 2,000.
and carriage inwards ₹ 3,000 / ₹ 1,50,000 × ₹ 60,000 = ₹ 1,200

Special Problems

Illustration 26

Arif operates a stationery and book shop. Separate stock records and trading accounts have not been maintained in respect of stationery and books.

On the night of 31.3.2014, a fire destroyed the shop and all the stock was lost or damaged. As the accounting books and records are kept in Mr Arif's house, they escaped destruction in the fire.

From the surviving books and other records, the following information is available :

1. The mark-up on stationery is $33^1/_3$% and on books is 50%.
2. The accounts for the year ended 30.6.2013 included the following —
   Sales for the year ₹ 1,75,320.
   Purchases during the year : Stationery ₹ 57,100; Books ₹ 68,550.
   Stock on 30.6.2013 : Stationery ₹ 5,500; Books ₹ 12,650.
   Stock on 1.7.2012 : Stationery ₹ 4,200; Books ₹ 12,100.
3. During August each year Arif holds a book sale of old stock on which he reduces his gross margin to 20%. Records of the sales of old stock in August 2013 and August 2012 show that the proceeds of these sales amounted to ₹ 6,250 and ₹ 5,400 respectively.
4. Purchases between 1.7.2013 and 31.3.2014 were — Stationery ₹ 55,640; Books ₹ 66,200.
5. The value of sales (excluding the sale of old book stock in August) between 1.7.2013 and 31.3.2014 increased by 15% in respect of books and 12.5% in respect of stationery as compared with the same period in the year ended 30.6.2013. Sales arise evenly throughout the year, except for the sale of old book stocks in August.
6. Goods salvaged from the fire realised ₹ 2,000 of which ₹ 1,500 was in respect of books and ₹ 500 in respect of stationery.
7. Adequate insurance coverage has been maintained since 1.7.2013.

You are required to prepare a statement showing the amount to be claimed from the insurance company in respect of the stationery and books destroyed in the fire.

Solution

Arif

Dr. Memorandum Trading Account for the period 1st July, 2013 to 31st March, 2014 Cr.

Particulars	Stationery ₹	Books ₹	Particulars	Stationery ₹	Books ₹
To Opening Stock	5,500	12,650	By Sales (Note 3 & 4)	62,775	82,386
To Purchases	55,640	66,200	By Closing Stock (Balancing figure)	14,059	18,926
		78,850			
Less: Cost of Books Sold at reduced margin (Note 5)		5,000			
		73,850			
To Gross Profit*	15,694	27,462			
	76,834	1,01,312		76,834	1,01,312

* Stationery : Mark-up $33^1/_3$. It means, if cost is ₹ 100 the profit will be ₹ $33^1/_3$ and sales will be ₹ $133^1/_3$. Therefore, profit on sales will be $33^1/_3$ / $133^1/_3$ or 1/4. Therefore, Gross Profit = 1/4 of ₹ 62,775 = ₹ **15,694**.

* Books : Mark-up 50%. It means, if cost is ₹ 100 then profit will be ₹ 50 and sales will be ₹ 150. Therefore, profit on sales will be 50/150 or 1/3. Therefore, Gross Profit = 1/3 of ₹ 82,386 = ₹ **27,462**.

Statement of Claim for Loss of Stock as on 31st March, 2014

Particulars	₹	₹
Stationery	14,059	
Books	18,926	32,985
Less: Salvage —		
Stationery	500	
Book	1,500	2,000
Claim to be Lodged		30,985

Working Notes :

(1) Total sales for the year : 2012-2013 = ₹ 1,75,320. However, individual sales for stationery and books have not been given. Before calculating claim for loss of stock of stationery and books, it will be necessary to calculate the sales of stationery and books.

(a) Calculation of Sales of Stationery (2012-2013)

Particulars	₹
Opening Stock (1.7.2012)	4,200
Add : Purchases	57,100
	61,300
Less: Closing Stock (30.6.2013)	5,500
Cost of Goods Sold	55,800
Sales : Cost + $33\frac{1}{3}$%* = (₹ 55,800 + ₹ 18,600)	74,400

(b) Calculation of Sales of Books (2012-2013)

Particulars	₹
Opening Stock (1.7.2012)	12,100
Add: Purchases	68,550
	80,650
Less: Closing Stock (30.6.2013)	12,650
Cost of Goods Sold	68,000
Books sold at reduced margin	5,400
Cost of books sold at reduced margin (Note 2)	4,320
Cost of books sold at normal margin (₹ 68,000 – ₹ 4,320)	63,680
Sale of books at normal margin = Cost + 50% = (₹ 63,680 + ₹ 31,840)	95,520

(c) Break-up of Total Sales

	₹
(i) Stationery (a)	74,400
(ii) Books — at reduced margin	5,400
— at normal margin (b)	95,520
	1,75,320

* A mark-up is always on cost whereas a margin is on selling price.

(2) Gross margin is 20%. It means, if the sale is ₹ 100 then profit is ₹ 20 and cost will be ₹ 80. Therefore, cost of books sold at reduced margin = ₹ **4,320**.

(3) Calculation of Sales of Stationery between 1.7.2013 – 31.3.2014

Sales = 112.5% × 9/12 (2012-2013 Sales)
= 112.5% × 9/12 × ₹ 74,400 [Note 1(a)]
= ₹ **62,775**.

(4) Calculation of Sales of Books between 1.7.2013 - 31.3.2014

Sales at Normal Mark-up = 115% × 9/12 (2012–2013 Sales)
= 115% × 9/12 × ₹ 95,520 [Note 1(b)]
= ₹ **82,386**.

(5) Cost of Books Sold at Reduced Margin

Gross margin is 20%. It means, if the sales is ₹ 100 then profit is 20 and cost is ₹ 80. Therefore, cost of books sold at reduced margin = 80/100 × ₹ 6,250 = ₹ **5,000**.

Illustration 27

The premises of Fireproof Ltd. were destroyed by fire on 30.6.2015. The following figures were ascertained:

		2012	2013	2014	1.1.2015 to 30.6.2015
Opening Stock	₹	2,000	2,200	1,180	3,402
Purchases	₹	16,000	14,500	17,000	3,500
Sales	₹	20,000	19,850	18,750	2,600
Carriage Inwards	₹	500	300	500	100
Freight Outwards	₹	600	700	300	25

In 2012, while valuing closing stock, some defective goods costing ₹ 500 were valued at ₹ 400. These were sold for ₹ 450 in 2013.

In 2013, an item costing ₹ 600 was wrongly valued at ₹ 700. This was sold for ₹ 550 in 2014.

In 2014, items costing ₹ 1,200 were valued at ₹ 1,000. 50% of these items was sold in June 2015 for ₹ 600.

Subject to this, the gross profit rate is more or less uniform. Value of salvage was ₹ 800.

Calculate the claim to be lodged.

Solution

First of all, the gross profit rate of 2012, 2013, and 2014 are to be calculated separately. For calculating respective gross profit rate, abnormal items are to be excluded. In this case, it is advantageous to prepare the Trading Account in columnar form.

Working Notes:

Dr. (1) Trading Account for the year ended 31st December, 2012 Cr.

Particulars	₹	Particulars	₹
To Opening Stock	2,000	By Sales	20,000
To Purchases	16,000	By Closing Stock:	
To Carriage inwards	500	Nominal items (₹ 2,200 – 400)	1,800
To Gross Profit	3,800	Abnormal items (cost)	500
	22,300		22,300

Dr. Trading Account for the year ended 31st December, 2013 Cr.

Particulars	Normal items	Abnormal items	Total ₹	Particulars	Normal items	Abnormal items	Total ₹
To Opening Stock	1,800	500	2,300	By Sales	19,400	450	19,850
To Purchases (Note 1)	13,900	600	14,500	By Loss	—	50	50
To Carriage inward	300		300	By Closing Stock	480	600	1,080
To Gross Profit	3,880	—	3,880				
	19,880	1,100	20,980		19,880	1,100	20,980

Dr. Trading Account for the year ended 31st December, 2014 Cr.

Particulars	Normal items	Abnormal items	Total ₹	Particulars	Normal items	Abnormal items	Total ₹
To Opening Stock	480	600	1,080	By Sales	18,200	550	18,750
To Purchases	15,800	1,200	17,000	By Loss	—	50	50
To Carriage inward	500	—	500	By Closing Stock	2,402	1,200	3,602
To Gross Profit	3,822	—	3,822				
	20,602	1,800	22,402		20,602	1,800	22,402

Gross Profit Rate: 2012 — ₹ 3,800/20,000 x 100 = 19%; 2013 — ₹ 3,800/19,400 x 100 = 20%; and 2014 — ₹ 3,822/18,200 x 100 = 21%.

Average Gross Profit Rate (19% + 20% + 21%)/3 = 20%.

Tutorial Note:

(1) Abnormal items of 2012 were totally sold in 2013. Therefore, the closing stock (abnormal items) of 2013 ₹ 600 was purchased in 2013 itself. Purchase of normal items = (₹ 14,500 – 600) = ₹ 13,900.

(2) Abnormal items of 2013 were totally solid in 2014. Therefore, the closing stock (abnormal items) of 2014 ₹ 1,200 was purchased in 2014 itself. Purchase of normal items = ₹ (17,000 – 1,200) = ₹ 15,800.

(3) Freight outwards should not be taken in Trading Account.

Dr. Memorandum Trading Account for the period 1st January to 30th June, 2015 Cr.

Particulars	Normal items	Abnormal items	Total ₹	Particulars	Normal items	Abnormal items	Total ₹
To Opening Stock	2,402	1,200	3,602	By Sales	2,000	600	2,600
To Purchases	3,500		3,500	By Closing Stock (Balancing fig.)	4,402	600	5,002
To Carriage inward	100		100				
To Gross Profit	400		400				
	6,402	1,200	7,602		6,402	1,200	7,602

Statement of Claim for Loss of Stock as on 30th June, 2015

	₹
Book value of Stock	5,002
Less: Salvaged	800
Claim to be Lodged	4,202

Illustration 28

The factory premises of Toy Company were engulfed in fire on 31st March 2015 as a result of which a major part of stock was burnt to ashes. The stock was covered by policy for ₹ 1,00,000 subject to average clause.

The records at the office revealed following information:

1. (a) The company sold goods to dealers on one month credit at dealers' price which is catalogue price less 15%. A cash discount is allowed @ 5% for immediate payment.
   (b) The goods are also sold to Agents at catalogue price less 10% against cash payment.
   (c) Goods are sent to branches at catalogue price
   (d) Catalogue price is cost + 100%.
2. The Sales/Despatch during period up to date of fire is:
   (a) Sale to dealer (without cash discount) ₹ 3,40,000.
   (b) Sale to dealer (net of cash discount) ₹ 3,23,000.
   (c) Sale to agents ₹ 90,000
   (d) Despatch to branches ₹ 3,00,000.
3. Stock on 1st January 2015 was ₹ 2,50,000 at catalogue price.
4. Purchases at cost from 1st January to 31st March,2015 ₹ 6,25,000.
5. Salvages stock valued at ₹ 45,000.

Compute the amount of claim to be lodged.

Solution

Before solving this problem, it is necessary to compute certain basic data:
Let cost = ₹ 100, Then,
1. Catalogue price (cost + ₹ 100) = ₹ 200;
2. Agents' price (catalogue price – 10%) = ₹ 180
3. Dealers' price (catalogue price – 15%) = ₹ 170;
4. Dealers' price when cash discount is given (Dealers price – 5%) = ₹ 161.50

Dr. Memorandum Trading Account (At cost) Cr.

Particulars	₹	Particulars	₹
To Balance b/d (Note 1)	1,25,000	By Cost of Despatch to:	
To Purchases A/c	6,25,000	(i) Dealers (Note 2)	2,00,000
		(ii) Dealers (when cash discount is allowed Note 3)	2,00,000
		(iii) Agents (Note 4)	50,000
		(iv) Branches (Note 5)	1,50,000
		By Balance c/d	1,50,000
	7,50,000		7,50,000

Statement of Claim for Loss of Stock as on 31st March, 2015

	₹
Book value of Stock	1,50,000
Less: Salvaged	45,000
Loss of Stock	1,05,000

The insurance policy was taken for ₹ 1,00,000 but the value of stock on the date of fire was ₹ 1,50,000. Therefore, the average clause is applicable:

$$\textbf{Net claim} = \text{Loss of stock} \times \frac{\text{Policy Value}}{\text{Value of stock on the date of fire}} = ₹\ 1{,}05{,}000 \times \frac{1{,}00{,}000}{1{,}50{,}000} = ₹\ 70{,}000.$$

Working Notes:
(1) ₹ 2,50,000/200 x 100 = ₹ 1,25,000.
(2) ₹ 3,40,000/170 x 100 = ₹ 2,00,000;
(3) ₹ 3,23,000/161.50 x 100 = ₹ 2,00,000.
(4) ₹ 90,000/180 x 100 = ₹ 50,000.
(5) ₹ 3,00,000/200 x 100 = ₹ 1,50,000.

Illustration 29

A fire occured in the premises of M/s. Fireprone Co. on 30th May 2015. From the following particulars, relating to the period from 1st January 2015 to 30th May 2015, you are required to ascertain the amount of claim to be filled with the insurance company for the loss of stocks: (all figures in ₹)

(1) Stock as per Balance Sheet at 31st December 2014, 99,000
(2) Purchases (including purchase of a machinery costing ₹ 30,000), 1,70,000
(3) Wages (including wages for the installation of machinery ₹ 3,000), 50,000
(4) Sales (including goods sold on approval basis amounting to ₹ 49,500. No confirmation had been received in respect of two- thirds of such goods sold on approval basis), 2,75,000
(5) Sales value of goods drawn by partners, 15,000
(6) Cost of goods sent to consignees on 15th May 2015, lying unsold with them, 16,500
(7) Sales value of goods distributed as free samples, 1,500

The average rate of gross profit was 20% in the past. The selling price was increased by 20% with effect from 1st January 2015.

For valuing the stock for the Balance Sheet as at 31st December 2014 ₹ 1,000 were written-off in respect of a slow moving item, the cost of which was ₹ 5,000.

A portion of these goods were sold at a loss of ₹ 500 on the original cost of ₹ 2,500. The remainder of the stock is now estimated to be worth the original cost.

Subject to the above exceptions, the gross profit remained at a unfirom rate throughout.

The value of goods salvaged was estimated at ₹ 25,000.

The concern had taken an insurance policy for ₹ 60,000 which was subject to the average clause.

Dr. Memorandum Trading Account for the period 1st January to 31st May, 2015 Cr.

Particulars	Normal items	Abnormal items	Total ₹	Particulars	Normal items	Abnormal items	Total ₹
To Opening Stock	95,000	5,000	1,00,000	By Sales (Note 3)	2,40,000	2,000	2,42,000
To Purchases (Note 1)	1,40,000	—	1,40,000	By Stock with cust. on app. (Note 4)	22,000	—	22,000
To Wages (Note 2)	47,000	—	47,000	By Goods sent to Consignees	16,500	—	16,500
To Gross Profit : $33^1/_3$% on Sales (Note 7)	80,000	—	80,000	By Partners' Drawing (Note 5)	10,000	—	10,000
				By Free Samples	1,000	—	1,000
				By Loss	—	500	500
				By Closing Stock	72,500	2,500	75,000
	3,62,000	5,000	3,67,000		3,62,000	5,000	3,67,000

Statement of Claim for Loss of Stock as on 31st May, 2015

Particulars	₹
Book value of Stock	75,000
Less: Salvaged	25,000
Loss of Stock	50,000

The insurance policy was taken for ₹ 60,000 but the value of stock on the date of fire was ₹ 75,000. Therefore, the average clause is applicable:

$$\textbf{Net claim} = \text{Loss of stock} \times \frac{\text{Policy Value}}{\text{Value of stock on the date of fire}} = ₹\,50{,}000 \times \frac{60{,}000}{75{,}000} = ₹\,40{,}000$$

Working Notes:

(1) Total purchases = ₹ 1,70,000. This figure includes ₹ 30,000 for purchase of machinery. Therefore, actual purchase will be ₹ 1,70,000 – ₹ 30,000 = ₹ 1,40,000.

(2) Total wages = ₹ 50,000. This figure includes ₹ 3,000 for installation of machinery. Therefore, actual wages to be charged to Trading Account = ₹ 50,000 – ₹ 3,000 = ₹ 47,000.

(3) Calculation of Sales		**(4) Cost of Goods with Customers on approval**	
Particulars	₹	Particulars	₹
Total Sales	2,75,000	Total goods sent	49,500
Less: 2/3 of goods sold not yet approved	33,000	Less: 1/3 sold	16,500
	2,42,000	Goods still unsold	33,000
Less: Sale of abnormal items	2,000	Less: Gross Profit — $33^1/_3$%	11,000
Sale of normal items	2,40,000	Cost of goods unsold	22,000
(5) Cost of Goods withdrawn by Partners		**(6) Cost of Goods distributed as sample**	
Sales value of goods drawn	15,000	Sales value of goods distributed	1,500
Less: Gross Profit @ $33^1/_3$%	5,000	Less: Gross Profit @ $33^1/_3$%	500
	10,000		1,000

(7) Old rate of gross profit 20%, i.e., Cost = ₹ 80 and S.P. = ₹ 100. New selling price = ₹ 100 + 20% = ₹ 120. Therefore, Gross Profit ratio (new) = 40/120 x 100 = $33^1/_3$%.

Loss of Profit Policy

Besides insuring against loss of stocks or assets, businesses often take out loss of profit insurance to cover them against loss of profits if a fire (or other perils) interrupts their business. This insurance is designed to provide for indemnification of the insured for losses ensuing from the interruption, wholly or in part, of the normal business activities consequent upon a fire or other perils. Therefore, loss of profit insurance is an insured protection against loss of gross profit. Insuring from interruption of or interference as a result of destruction of or damage to any building or any other property of the insured premise by fire. While a fire policy covers loss of or damage to insured property, a loss of profit policy covers loss of gross profit sustained in consequence of a business interruption.

The terms of such policies vary widely, but they are usually framed to meet the requirements of the insured. A business interruption due to destruction of / or damage to property by fire is likely to result in :

(a) the reduction in turnover during the period of indemnity and

(b) the increased cost of working incurred for the purpose of avoiding or reducing the reduction in turnover.

The claim for loss of profit insurance is granted only when the insured has a valid claim in respect of the property, the loss of / or damage to which results in interruption, being admissible under a corresponding fire policy. Therefore, it is a basic condition that a business unit cannot have a loss of profit insurance policy without the presence of a fire policy covering property damage, giving rise to the loss of profit claim. The period of indemnity is the contemplated period of disorganisation for which loss of insurance policy is effected. The length of this period may vary with the nature of the business and required time to obtain new plant and machinery.

Some Important Terms / Expressions

Gross Profit For loss of profit insurance purposes Gross Profit is the sum produced by adding the amount of the insured standing charges to the Net Profit. If there is net loss, gross profit is the amount of insured standing charges less such a proportion of any net trading loss as the amount of the insured standard charges bears to all the standing charges (insured + uninsured) of the business.

Net Profit The net trading profit (exclusive of all capital receipts and accretions and all outlay properly chargeable to Capital) resulting from the business of the insured at the premises after due provision has been made for all standing and other charges including depreciation but before the deduction of any taxation chargeable on profits.

Insured Standing Charges The insured standing charges are those charges specified in the policy which the insured desires to recover in the case of an accident. It may include the following :

(i) Rent, rates and taxes (not related with the profit of the business);
(ii) Interest on debentures and loans;
(iii) Salaries of permanent staff;
(iv) Wages of skilled workers;
(v) Directors' fees;
(vi) Auditor's fees;
(vii) Advertising;
(viii) Travelling; and
(ix) Unspecified standing charges (not exceeding 5% of the amount of specified standing charges).

Turnover The money paid or payable to the insured for goods sold and delivered and for services rendered in course of the business at the premises.

Indemnity Period The period beginning with the occurrence of the Damage and ending not later than 12 months thereafter during which the results of the business shall be affected in consequence of the damage.

Rate of Gross Profit The rate of Gross Profit earned on the turnover during the financial year immediately before the date of the damage

Annual Turnover The turnover during the twelve months immediately before the date of the damage

Standard Turnover The turnover during that period in the twelve months immediately before the date of damage which corresponds with the indemnity period

to which such adjustments shall be made as may be necessary to provide for the trend of the business and for variations in or special circumstances affecting the business either before or after the damage or which would have affected the business had the damage not occurred, so that the figures thus adjusted shall represent as nearly as may be reasonably practicable the results of which but for the damage would have been obtainbed dring the relative period after the damage.

Memo 1 : If during the Indemnity Period goods shall be sold or services shall be rendered elsewhere than at the premises for the benefit of the business either by the insured or by others on his behalf the money paid or payable in respect of such sales or services shall be brought into account in arriving at the turnover during the Indemnity Period.

Memo 2 : If any standing charges of the business be not insured by this policy then in computing the amount recoverable hereunder as increase in cost of working that proportion only of the additional expenditure shall be brought into account which the sum of the net profit and the insured standard charges bears to the sum of the net profit and all standing charges.

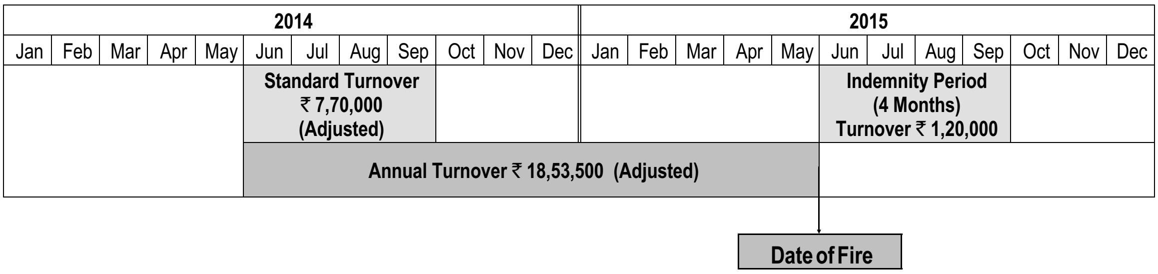
Example

From the following information calculate: (i) Standard Turnover; (ii) Short Sales; and (iii) Annual Turnover.

X Ltd. had taken a loss of profit policy for ₹ 1,50,000 being ₹ 65,000 for net profit and ₹ 85,000 for standing charges. On 1st June, 2015 there was a fire as a result of which sales suffered a lot for a period of 6 months. The indemnity period was 4 months.

Month	2014 (₹)	2015 (₹)	Month	2014 (₹)	2015 (₹)
January	1,00,000	1,10,000	July	2,00,000	25,000
February	1,00,000	1,10,000	August	1,70,000	30,000
March	1,25,000	1,37,500	September	1,50,000	40,000
April	1,25,000	1,37,500	October	1,25,000	55,000
May	1,50,000	1,65,000	November	1,25,000	75,000
June	1,80,000	25,000	December	75,000	80,000

Solution



Calculation of Standard Turnover

Particulars	₹
Sales from 1st June 2014 to 30th September 2014	7,00,000
Add : 10% for upward trend*	70,000
	7,70,000

* Sales from 1st January 2014 to 31st May 2015 are ₹ 6,00,000; for the corresponding months of 2015, Sales is ₹ 6,60,000. Therefore, increase in sales is 10%.

Calculation of Short Sales

Particulars	₹
Standard Turnover	7,70,000
Less: Sales from 1st June 2015 to 30th September 2015	1,20,000
	6,50,000

Calculation of Annual Turnover (Adjusted)

Particulars	₹
Sales for 12 months immediately preceding the month of fire (i.e., 1st June, 2014 to 31st May 2015)	16,85,000
Add: 10% increase for upward trend as noticed between 1.1.2015 and 31.5.2015	1,68,500
	18,53,500

Procedures to Ascertain Amount of Claim

The following steps are followed to arrive at the amount of a claim under loss of profit insurance :

Step 1 Calculate rate of gross profit (adjust to provide for the trend of the business, if any).

Step 2 Calculate short sales. (It is the difference between the standard sales (adjusted) and actual sales of dislocated period.

Step 3 Calculate gross profit on short sales.

Step 4 Calculate the amount of admissible additional expenses as follows :
The least of the following shall be taken as admissible additional expenses.
(i) Actual expenses incurred
(ii) Gross Profit on additional sales

(iii) Additional Expenses × $\dfrac{\text{G.P. on Annual Turnover}}{\text{G.P. on Annual Turnover + Uninsured standing charges}}$

OR

Additional Expenses × $\dfrac{\text{Net Profit + Insured standing charges}}{\text{Net Profit + All standing charges}}$

Step 5 Deduct from the sum of 3 and 4 any savings in insured standing charges during the period of indemnity.

Step 6 Apply average clause : Net Claim = Gross Claim × $\dfrac{\text{Policy value}}{\text{G.P. on Annual Turnover}}$

Illustration 30

From the following information, find the claims under a loss of profit policy: (all figures in ₹)

Sales in 2011	1,00,000	Policy value	50,000
Sales in 2012	1,20,000	Date of dislocation by fire	1.1.2015
Sales in 2013	1,44,000	Period of dislocation	3 months
Sales in 2014	1,72,800	Indemnity period	9 months
Standing charges (all insured) in 2014	7,280	Sales from 1.1.2014 to 31.3.2014	43,200
Net profit in 2014	10,000	Sales from 1.1.2015 to 31.3.2015	11,840

There was no reduction in standing charges during the dislocation period, nor were there any additional costs.

Solution

(1) Gross Profit Ratio

	₹	
Net Profit in 2014	10,000	Rate of Gross Profit $= \dfrac{\text{Gross Profit}}{\text{Sales}} \times 100$
Insured standing charges	7,280	
Gross Profit	17,280	$= \dfrac{17,280}{1,72,800} \times 100 = 10\%.$

(2) Short Sales

(a) Standard Sales (adjusted)	₹	(b) Actual Sales of dislocated period = ₹ 11,840
Sales from 1.1.2014 to 31.3.2014	43,200	Short Sales = Standard Sales – Actual Sales
Add: 20% increase	8,640	= ₹ 51,840 – ₹ 11,840 = ₹ 40,000
	51,840	
*Sales figures of 2011 to 2014 clearly indicate 20% increase every year. So standard sales are to be adjusted accordingly.		(3) Amount of Claim = Short Sales x Gross Profit ratio = ₹ 40,000 x 10% = ₹ 4,000 (The claim is payable in full, since the policy is adequate)

Illustration 31

From the following particulars, prepare a claim for loss of profits under the Consequential Loss Policy :

	₹
Date of fire — June 30, 2014; Period of Indemnity — Six months.	
Sum Insured	50,000
Turnover for the year ended June 30, 2014	2,00,000
Net Profit for the accounting year ending March 31, 2014	12,500
Standing charges for the accounting year ending March 31, 2014	28,500
Turnover for the year ending March 31, 2014	1,98,000
Turnover for the indemnity period from 01.07.2014 to 31.12.2014	56,000
Turnover for the period from 01.07.2013 to 31.12.2013	1,10,000

The turnover of the year 2011-12 had shown a tendency of increase of 10% over the turnover of the preceding year.

Solution

(1) Gross Profit Ratio

	₹	
Net Profit (2010-11)	12,500	Rate of Gross Profit $= \dfrac{\text{Gross Profit}}{\text{Sales}} \times 100$
Insured standing charges	28,500	
Gross Profit	41,000	$= \dfrac{41,000}{1,98,000} \times 100 = 20.7070\%.$

(2) Short Sales

(a) Standard Sales (adjusted)	₹	(b) Actual Sales of dislodged period = ₹ 56,000
Sales from 1.7.2013 to 31.12.2013	1,10,000	Short Sales = Standard Sales – Actual Sales
Add: 10% Increase in 2014-15	11,000	= ₹ 1,21,000 – ₹ 56,000 = ₹ 65,000
	1,21,000	

(3) Loss of Gross Profit = Short sales × Gross Profit ratio = ₹ 65,000 × 20.7070 = ₹ 13,460.

(4) Statement of Claim

Particulars	₹
Loss of Gross Profit (Note 3 — Above)	13,460
Admissible increased working cost	Nil
	13,460
Less: Saving in insured standing charges	Nil
Gross Claim	13,460

Sum assured is ₹ 50,000 but gross claim is ₹ 13,460. Therefore, the average clause will not be applicable.

Illustration 32

Bright Ltd. has a 'loss of profit' insurance policy of ₹ 12,60,000. The period of indemnity is three months. A fire occured on 31st March 2015. The following information is available (all figures in ₹) :

Sales for the year ended 31st December 2014	42,00,000	Standing charges for 2014	9,60,000
Sales for the period from 1st April 2014 to 31st Mar. 2015	48,00,000	Profit for 2014	3,00,000
Sales for the period from 1st April 2014 to 30th June 2014	10,80,000	Saving in standing charges because of fire	30,000
Sales for the period from 1st April 2015 to 30th June 2015	72,000	Additional expenses to reduce loss of turnover	60,000

Assuming no adjustment has to be made for the upward trend in turnover, compute the claim to be made on the insurance company.

Solution

(1) Gross Profit Ratio

	₹	
Net Profit in 2014	3,00,000	Rate of Gross Profit $= \frac{\text{Gross Profit}}{\text{Sales}} \times 100$
Insured standing charges	9,60,000	
Gross Profit	12,60,000	$= \frac{12,60,000}{42,00,000} \times 100 = 30\%$.

(2) Short Sales

(a) Standard Sales (adjusted)	₹	(b) Actual Sales of dislocated period = ₹ 72,000
Sales for the corresponding period in the preceding		Short Sales = Standard Sales – Actual Sales
year, i.e., 1.4.2014 to 30.6.2014	10,80,000	= ₹ 10,80,000 – ₹ 72,000 = ₹ 10,08,000

(3) Loss of Gross Profit = Short Sales x Gross Profit ratio = ₹ 10,08,000 x 30% = ₹ 3,02,400.

(4) Admissible increased working cost :

Lower of the following: (a) Actual additional expenses to reduce loss of turnover = ₹ 60,000.
(b) Gross profit on additional sales = ₹ 72,000 x 30% = ₹ 21,600.

(5) Statement of Claim

Particulars	₹
Loss of Gross Profit (Note 3)	3,02,400
Admissible increased working cost (Note 4)	21,600
	3,24,000
Less: Saving in insured standing charges	30,000
Gross Claim	2,94,000

6. Application of Average Clause

Net claim $= \text{Gross Claim} \times \frac{\text{Policy Value}}{\text{G.P. on Annual Sales}} = ₹\ 2,94,000 \times \frac{12,60,000}{30\% \text{ of } 48,00,000} = ₹\ 2,57,250$

Therefore, amount of claim under the policy = ₹ 2,57,250.

Assumptions:

(1) All standing charges are insured. (2) All sales during indemnity period have been effected by incurring additional expenses.

Illustration 33

A businessman took out a 'loss of profit policy' for ₹ 40,000 with an indemnity period of 6 months. The financial year of the business ended on 30th June. Gross profit for the last financial year was ₹ 50,000 and turnover for that period was ₹ 2,00,000. Turnover for the 12 months immediately preceding the fire was ₹ 2,20,000. A fire occured on 31st March, 2015. Turnover for 6 months immediately following the fire, compared with the turnover of corresponding months in the previous year was:

	April	May	June	July	August	September
2014 (₹)	16,000	17,000	18,000	16,000	17,000	19,000
2015 (₹)	—	6,000	9,000	14,000	16,000	18,000

₹ 1,000 was spent on putting the fire out. During the indemnity period, increase in the cost of working directly attributable to sales amounted to ₹ 8,050. All standing charges of the business were insured and paid.

From the above particulars, you are required to assess the loss and the amount payable by the insurance company as claim under the policy.

Solution

1. Gross Profit Ratio $= \dfrac{\text{Gross Profit}}{\text{Sales}} \times 100 = \dfrac{50{,}000}{2{,}00{,}000} \times 100 = 25\%.$

2. Short Sales

(a) Standard Sales (adjusted)	₹	(b) Actual Sales from April to Sept. 2015 = ₹ 63,000
Sales from 1.4.2014 to 30.9.2014	1,03,000	Short Sales = Standard Sales – Actual Sales
Add: 10% increase (Note 1)	10,300	= ₹ 1,13,300 – ₹ 63,000 = ₹ 50,300
	1,13,300	

3. Loss of Gross Profit = Short sales x Gross Profit ratio = 50,300 x 25% = ₹ 12,575.

4. Admissible increased working cost

Lower of the following:

(a) Gross Profit on additional sales = 25% of ₹ 63,000 = ₹ 15,750.

(b) $\text{Additional Expenses} \times \dfrac{\text{G.P. on Annual Turnover(Adjusted)}}{\text{G.P. on Annual Turnover (Adjusted)} + \text{Uninsured standard charges}}$

$= ₹\,8{,}050 \times \dfrac{55{,}000}{55{,}000 + \text{nil}} = ₹\,8{,}050.$

5. Statement of Claim

Particulars	₹
Loss of Gross Profit (Note 3)	12,575
Admissible insured working cost (Note 4)	8,050
Gross Claim	20,625

6. Application of Average Clause

Net claim $= \text{Gross Claim} \times \dfrac{\text{Policy Value}}{\text{G.P. on Annual Sales}} = ₹\,20{,}625 \times \dfrac{40{,}000}{55{,}000} = ₹\,15{,}000.$

7. **Total Claim**

Amount of claim under policy	= ₹ 15,000
Expenses for putting off fire	= ₹ 1,000
	₹ 16,000

Tutorial Note: Insurance company is liable to pay all expenses for putting off fire.

Working Note:

(1) Calculation of Upward Trend in Turnover

Turnover for the 12 months immediately preceding fire was ₹ 2,20,000 and Sales of the previous accounting period were ₹ 2,00,000. Increase in Sales ₹ 20,000. Therefore, % of increase = 20,000/2,00,000 x 100 = 10%.

Illustration 34

A fire occured on 1st February 2015 in the premises of Pioneer Ltd., a retail store, and business was partially disorganised up to 30th June 2015. The company was insured under a 'loss of profit' for ₹ 1,25,000 with a six months period indemnity. From the following information, compute the amount of claim under the loss of profit policy. (all figures in ₹)

Actual turnover from 1st February to 30th June 2015	80,000	Turnover from 1st February to 30th June 2014	2,00,000
Turnover from 1st February 2014 to 31st January 2015	4,50,000	Net profit for last financial year	70,000
Insured standing charges for last financial year	56,000	Total standing charges for last financial year	64,000
Turnover for the last financial year	4,20,000		

The company incurred additional expenses amounting to ₹ 6,700 which reduced the loss in turnover. There was also a saving during the indemnity period of ₹ 2,450 in the insured standing charges as a result of the fire.

There had been a considerable increase in trade since the date of the last annual accounts and it has been agreed that an adjustment of 15% be made in respect of the upward trend in turnover.

Solution

(1) Gross Profit Ratio

	₹	
Net Profit for last financial year	70,000	Rate of Gross Profit $= \frac{\text{Gross Profit}}{\text{Sales}} \times 100$
Insured standing charges	56,000	
Gross Profit	1,26,000	$= \frac{\text{Rs } 1,26,000}{\text{Rs } 4,20,000} \times 100 = 30\%.$

(2) Short Sales

	₹	
(a) Standard Sales (adjusted)	₹	(b) Actual Sales of disorganised period = ₹ 80,000
Sales from 1.2.2014 to 30.6.2014	2,00,000	Short Sales = Standard Sales – Actual Sales
Add: 15% increase (expected)	30,000	= ₹ 2,30,000 – ₹ 80,000 = ₹ 1,50,000
	2,30,000	

(3) Loss of Gross Profit = Short Sales x Gross Profit ratio = ₹ 1,50,000 x 30% = ₹ 45,000.

(4) Annual Turnover

Particulars	₹
Turnover for 12 months immediately preceding the month of fire i.e. from 1.2.2014 to 31.1.2015	4,50,000
Add: 15% expected increase	67,500
	5,17,500
Gross Profit on Annual Turnover = 30% of 5,17,500	1,55,250

(5) Admissible increased working cost:

Lower of the following:

(a) Gross Profit on additional Sales = 30% of ₹ 80,000 = ₹ 24,000.

(b) $\text{Additional Expenses} \times \frac{\text{G.P. on Annual Turnover}}{\text{G.P. on Annual Turnover + Uninsured Standing Charges}}$

$= ₹\, 6,700 \; \frac{1,55,250 \text{ (Note 4)}}{1,55,250 + 8,000*} = ₹\, 6,372$ *(Total standing charges – Insured standing charges)

(6) Statement of Claim

Particulars	₹
Loss of Gross Profit (Note 3)	45,000
Admissible increased working cost (Note 5)	6,372
	51,372
Less: Saving in insured standing charges	2,450
Gross claim	48,922

(7) Application of Average Clause

$\textbf{Net Claim} = \text{Gross Claim} \times \frac{\text{Policy Value}}{\text{Gross Profit on Annual Turnover}} = ₹\, 48,922 \times \frac{1,25,000}{1,55,250} = ₹\, 39,390$

Amount of claim under the policy = ₹ 39,390.

Assumption : (1) All sales during indemnity period have been effected by increasing additional expenses only.

Illustration 35

From the following information, you are required to work out the claim under the 'loss of profit' insurance policy.

(1) Cover — Gross profit ₹ 1,00,000.

(2) Indemnity period — Six months.

(3) Damage — due to a fire accident on 28th December, accounting year ends on 31st December.

(4) Net profit plus all standing charges in the prior accounting year — ₹ 1,30,000.
(5) Standing charges uninsured — ₹ 25,000.
(6) Turnover of the last accounting year was ₹ 5,00,000, the rate of gross profit being 25%.
(7) The annual turnover — namely the turnover for 12 months immediately preceding the fire — ₹ 5,20,000.
(8) As a consequence of fire, there was a reduction in certain insured standing charges at the rate of ₹ 25,000 per annum.
(9) The standard turnover was ₹ 2,60,000.
(10) Increased costs of working during the period of indemnity were ₹ 20,000.
(11) Turnover during the period of indemnity was ₹ 1,00,000 and out of this, turnover of ₹ 80,000 was maintained due to increased costs of working.

Solution

1. Gross Profit Ratio = 25% (given).
2. Short Sales = Standard Sales – Actual Sales = (₹ 2,60,000 (given) – ₹ 1,00,000) = ₹ 1,60,000.
3. Loss of Gross Profit = Short Sales x Gross Profit Ratio = ₹ 1,60,000 x 25% = ₹ 40,000.
4. Annual Turnover = ₹ 5,20,000. Gross Profit on Annual Turnover = ₹ 5,20,000 x 25% = ₹ 1,30,000.
5. **Admissible Increased Working Cost:**
   Lower of the following:
   (a) Gross Profit on additional Sales = 25% of ₹ 80,000 = ₹ 20,000.
   (b) $\text{Additional Exp.} \times \dfrac{\text{G.P. on Annual Turnover (Adjusted)}}{\text{G.P. on Annual Turnover (Adjusted)} + \text{Uninsured standing charges}}$

$$= ₹\ 20,000 \times \frac{1,30,000}{1,30,000 + 25,000} = ₹\ 16,774$$

(6) Statement of Claim

Particulars	₹
Loss of Gross Profit (Note 3)	40,000
Add: Admissible Increased Working Cost (Note 5)	16,774
	56,774
Less: Saving in Standing Charges (6 months)	12,500
Gross Claim	44,274

(7) Application of Average Clause

$$\text{Net Claim} = \text{Gross Claim} \times \frac{\text{Policy Value}}{\text{G.P. on Annual Sales}} \quad ₹\ 44,274 \times \frac{1,00,000}{1,30,000} = ₹\ 34,057$$

Assumption: (1) Annual Turnover and Standard Turnover as given in the problem have already been adjusted for upward trend.

Illustration 36

The premises of a company was partly destroyed by fire on 1st March 2015, as a result of which the business was disorganised from 1st March to 31st July, 2015. Accounts are closed on 31st December every year. The Company is insured under a 'loss of profit' policy for ₹ 7,50,000. The period of indemnity specified in the policy is 6 months. From the following information, you are required to compute the amount of claim under the loss of profit policy. (all figures in ₹)

Turnover for the year 2014	40,00,000	Standard turnover for the corresponding period in the preceding year i.e. from 1.3.2014 to 31.7.2014	20,00,000
Net profit for the year 2014	2,40,000	Annual turnover for the year immediately preceding the fire i.e. from 1.3.2014 to 28.2.2015	44,00,000
Insured standing charges	4,80,000	Increased cost of working	1,50,000
Uninsured standing charges	80,000	Reduction in turnover avoided through increase in working cost	4,00,000
Turnover during the period of disloc. i.e. from 1.3.15 to 31.7.15	8,00,000		
Savings in insured standing charges	30,000		

Owing to reasons acceptable to the insurer, the "Special circumstances clause" stipulates for: (a) Increase of turnover (standard and annual) by 10% and (b) Increase of rate of gross profit by 2%.

Solution

(1) Gross Profit Ratio

	₹	
Net Profit in 2014	2,40,000	$\text{Rate of Gross Profit} = \dfrac{\text{Gross Profit}}{\text{Sales}} \times 100$
Insured standing charges	4,80,000	$= \dfrac{7,20,000}{40,00,000} \times 100 = 18\%.$
Gross Profit	7,20,000	Revised Rate of G.P. = 18% + 2% increase = 20%.

(2) Short Sales

(a) Standard Sales (adjusted)	₹	(b) Actual Sales of dislocated period = ₹ 8,00,000
Sales from 1.3.2014 to 31.7.2014	20,00,000	Short Sales = Standard Sales – Actual Sales
Add: 10% increase (agreed)	2,00,000	= ₹ 22,00,000 – ₹ 8,00,000 = ₹ 14,00,000
	22,00,000	

(3) Loss of Gross Profit = Short Sales x Gross Profit Ratio = ₹ 14,00,000 x 20% = ₹ 2,80,000.

(4) Annual Turnover

Particulars	₹
Turnover for 12 months immediately preceding the month of fire, i.e. from 1.3.2014 to 28.2.2014	44,00,000
Add: 10% increase (agreed)	4,40,000
	48,40,000
Gross Profit on Annual turnover = 20% of ₹ 48,80,000 = ₹ 9,68,000	

(5) Admissible Increased Working Cost:

Lower of the following:

(a) Gross Profit on additional Sales = 20% of ₹ 4,00,000 = ₹ 80,000.

(b) $\text{Additional Exp.} \times \dfrac{\text{G.P. on Annual Turnover}}{\text{G.P. on Annual Turnover + Uninsured standing charges}}$

$$= ₹\ 1,50,000 \times \frac{9,68,000}{9,68,000 + 80,000} = ₹\ 1,38,550$$

(6) Statement of Claim

Particulars	₹
Loss of Gross Profit (Note 3)	2,80,000
Add: Admissible Increased Working Cost (Note 5) being lower	80,000
	3,60,000
Less: Saving in Insured standing charges	30,000
Gross Claim	3,30,000

(7) Application of Average Clause

$$\text{Net Claim} = \text{Gross Claim} \times \frac{\text{Policy Value}}{\text{G.P. on Annual Sales}} = ₹\ 3,30,000 \times \frac{7,50,000}{9,68,000} = ₹\ 2,55,682$$

Illustration 37

A fire occured in the premises of a businessman on 31st January 2015, which destroyed stock. However, stock worth ₹ 5,940 was salvaged. The company's insurance policy covers the following:

Stock — ₹ 6,00,000; Loss of profit (including standing charges) — ₹ 3,75,000; and Period of indemnity — 6 months.

The summarised Profit and Loss Account for the year ended 31st December, 2014 is as follows: (all figures in ₹)

Dr. Profit and Loss Account for the year ended 31st December, 2014 Cr.

To Opening Stock	6,18,750	By Sales	30,00,000
To Purchases	27,18,750	By Closing Stock	7,87,500
To Standing charges	2,51,250		
To Variable expenses	1,20,000		
To Net Profit	78,750		
	37,87,500		37,87,500

The transactions for the month of January, 2015 were: (i) Turnover — ₹ 1,50,000; and (ii) Payment to creditors — ₹ 1,60,020. *Trade Creditors*: 1st January, 2015 — ₹ 2,26,000; 31st January, 2015 — ₹ 2,30,980.

The company's business was disrupted until 30th April, 2015, during which period the reduction in the turnover amounted to ₹ 2,70,000 as compared with the corresponding turnover of same period in the previous year.

You are required to submit the claim for insurance for loss of stock and loss of profit.

Solution

Loss of Stock

Dr. Memorandum Trading Account for the period 1st January to 31st January, 2015 Cr.

Particulars	₹	Particulars	₹
To Opening Stock	7,87,500	By Sales	1,50,000
To Purchases (Note 3)	1,65,000	By Closing Stock (Balancing figure)	8,25,000
To Gross Profit @ 15% on Sales (Note 2)	22,500		
	9,75,000		9,75,000

Statement of Claim for Loss of Stock as on 31st January, 2015

Particulars	₹
Book value of Stock	8,25,000
Less: Salvaged	5,940
Loss of Stock	8,19,060

The insurance policy for loss of stock was taken for ₹ 6,00,000 but the value of stock on the date of fire was ₹ 8,25,000. Therefore, the average clause is applicable.

$$\text{Net claim} = \text{Loss of stock} \times \frac{\text{Policy Value}}{\text{Value of stock on the date of fire}} = ₹\ 8{,}19{,}060 \times \frac{6{,}00{,}000}{8{,}25{,}000} = ₹\ 5{,}95{,}680$$

Working Notes:

Dr. (1) Trading Account for the year ended 31st December, 2014 Cr.

Particulars	₹	Particulars	₹
To Opening Stock	6,18,750	By Sales	30,00,000
To Purchases	27,18,750	By Closing Stock	7,87,500
To Gross Profit	4,50,000		
	37,87,500		37,87,500

(2) Rate of Gross Profit = ₹ 4,50,000 / ₹ 30,00,000 x 100 = 15%.

Dr. (3) Trade Creditors Account Cr.

Particulars	₹	Particulars	₹
To Bank A/c	1,60,020	By Balance b/d	2,26,000
To Balance c/d	2,30,980	By Purchases (credit)	1,65,000
	3,91,000		3,91,000

Loss of Profit

(1) Gross Profit Ratio

	₹
Net Profit in 2014	78,750
Insured standing charges	2,51,250
Gross Profit	3,30,000

$$\text{Rate of Gross Profit} = \frac{\text{Gross Profit}}{\text{Sales}} \times 100 = \frac{3{,}30{,}000}{30{,}00{,}000} \times 100 = 11\%.$$

(2) Short Sales = ₹ 2,70,000 (given).

(3) Amount of Claim = Short Sales x Gross Profit Ratio = ₹ 2,70,000 x 11% = ₹ 29,700. (The claim is payable in full, since the policy is adequate).

Illustration 38

A "loss of profit" policy was taken for ₹ 80,000. Fire occured on 15th March, 2015. Indemnity period was for three months. Net profit for 2014 year ending on 31st December was ₹ 56,000 and standing charges (all insured) amounted to ₹ 49,600. Determine insurance claims from the following details available from quarterly sales tax returns:

Sales	2012 (₹)	2013 (₹)	2014 (₹)	2015 (₹)
From 1st January to 31st March	1,20,000	1,30,000	1,42,000	1,30,000
From 1st April to 30th June	80,000	90,000	1,00,000	40,000
From 1st July to 30th September	1,00,000	1,10,000	1,20,000	1,00,000
From 1st October to 31st December	1,36,000	1,50,000	1,66,000	1,60,000

Sales from 16.3.2014 to 31.3.2014 were ₹ 28,000. Sales from 16.3.2015 to 31.3.2015 were ₹ Nil.
Sales from 16.6.2014 to 30.6.2014 were ₹ 24,000 and Sales from 16.6.2015 to 30.6.2015 were ₹ 6,000.

Solution

(1) Gross Profit Ratio

	₹
Net Profit in 2014	56,000
Insured standing charges	49,600
Gross Profit	1,05,600

$$\text{Rate of Gross Profit} = \frac{\text{Gross Profit}}{\text{Sales}} \times 100 = \frac{1{,}05{,}600}{^{*}5{,}28{,}000} \times 100 = 20\%.$$

*(₹ 1,42,000 + ₹ 1,00,000 + ₹ 1,20,000 + ₹ 1,66,000)

(2) Short Sales

(a) Standard Sales (adjusted)	
Indemnity period : 16.3.2015 to 15.6.2015.	
Standard sales are to be calculated on the basis of sales of corresponding period of the previous year, i.e., 16.3.2014 to 15.6.2014. In this problem, however, sales value for this period has not been given directly. Therefore, it is to be calculated part by part from the given information :	₹
(i) Sales for the period 16.3.2014 to 31.3.2014 (given)	28,000
(ii) Sales for the period 1.4.2014 to 15.6.2014 (Note 1)	76,000
	1,04,000
Add: Upward trend in Sales 10% (Note 2)	10,400
	1,14,400
(b) Actual Sales of disorganised period	₹
Sales value from 16.3.2015 to 15.6.2015 has not been given directly. So it is also to be calculated part by part from the given information:	
(i) Sales for the period 16.3.2015 to 31.3.2015	Nil
(ii) Sales for the period 1.4.2015 to 15.6.2015 (Note 3)	34,000
	34,000
Short Sales = Standard Sales – Actual Sales = ₹ 1,44,400 – ₹ 34,000 = ₹ 80,400	

(3) Loss of Gross Profit = Short Sales x Gross Profit Ratio = ₹ 80,400 x 20% = ₹ 16,080.

(4) Application of Average Clause

$$\text{Net Claim} = \text{Gross Claim} \times \frac{\text{Policy Value}}{\text{Gross Profit on Annual Turnover}}$$

$$= ₹\ 16{,}080 \times \frac{80{,}000}{1{,}19{,}680} = ₹\ 10{,}749 \text{ (approx.)}$$ Amount of claim under the policy = ₹ 10,749.

Working Notes:

(1) Sales for the period 1.4.2014 to 30.6.2014 (given)	1,00,000
Less: Sales for the period 16.6.2014 to 30.6.2014 (given)	24,000
Sales for the period 1.4.2014 to 15.6.2014	76,000

(2) Calculation of Upward Trend in Sales

(a) Total Sales of 2013 = ₹ 4,80,000 less total sales of 2012 = ₹ 4,36,000. Increase of Sales in 2013 over 2012 = ₹ 44,000.
Therefore, % of increase = ₹ 44,000 / ₹ 4,36,000 x 100 = 10.09%.

(b) Total Sales of 2014 = ₹ 5,28,000 less total Sales of 2013 = ₹ 4,80,000. Increase of Sales in 2014 over 2012 = ₹ 48,000.
Therefore, % of increase = ₹ 48,000 / ₹ 4,80,000 x 100 = 10%.

Average Percentage of increase = (10.09% + 10%) / 2 = 10% (Approx.)

(3) Annual Sales	₹	₹
Sales from 16.3.2014 to 31.3.2014	28,000	
Sales from 1.4.2014 to 30.6.2014	1,00,000	
Sales from 1.7.2014 to 30.9.2014	1,20,000	
Sales from 1.10.2014 to 31.12.2014	1,66,000	
Sales from 1.1.2015 to 5.3.2015 (₹ 30,000 – Nil between 16.3.2015 to 31.3.2015)	1,30,000	
Sales for 12 months just before fire		5,44,000
Add: 10% increase (upward trend)		54,400
Adjusted sales of 12 months just before fire		5,98,400
Gross Profit on Annual Sales = ₹ 5,98,400 x 20% =		1,19,680

Cash Losses

Cash is the most liquid of all assets. Therefore, it is subject to loss or theft. It is necessary to establish a sound system of internal control to safeguard cash. One way of controlling cash is to prove frequently that the amount of cash in hand agrees with the accounting records. When a discrepancy is anticipated, the value of suspected losses can be calculated as follows :

Step 1 To calculate the cost of goods sold by applying the formula :

Opening Stock + Purchases – Closing Stock = Cost of Goods Sold

Step 2 To calculate the theoretical value of sales by applying the mark-up rate (i.e., percentage of profit on cost) to the cost of goods sold.

Step 3 To deduct recorded sales from theoretical sales and to calculate the shortfall in recorded sales, and hence cash.

Illustration 39

The owner of a departmental store suspects that receipts from cash sales are being stolen. He ascertains the following for the month of July, 2015 :

Stock at 1.7.2015 : ₹ 15,762; Purchases during July, 2015 : ₹ 68,570; Recorded sales : ₹ 80,840; Stock at 31.7.2015 : ₹ 17,056.

All goods are sold at a price to yield a gross profit of 20% on selling price.

Calculate the value of any cash discrepancy for submission to the insurance company.

Solution

Dr. Memorandum Trading Account for the period 1st July to 31st July, 2015 Cr.

Particulars	₹	Particulars	₹
To Opening Stock	15,762	By Sales (Note 1)	84,095
To Purchases	68,570	By Closing Stock	17,056
To Gross Profit	16,819		
	1,01,151		1,01,151

Statement of Claim for Loss of Cash as on 31st July, 2015

	₹
Theoretical Value of Sales	84,095
Less: Recorded Sales	80,840
Claim to be Lodged	3,255

Working Note :

(1) Cost of goods sold = Opening Stock + Purchases – Closing Stock
= ₹ (15,762 + 68,570 – 17,056)
= ₹ 67,276.

Gross Profit is 20% on Sales. Therefore, cost of goods sold = 80% of Sales.

Sales = ₹ 67,276 / 80 × 100 = ₹ 84,095.

Illustration 40

Roshan & Co. sells goods in cash as well as on credit. A riot occurred on the night of 18.2.2015. Though stock and books of account were saved, the owner suspects that there is a discrepancy between recorded cash sales and actual cash sales. The firm wishes to submit a claim for the loss of cash.

The following information is available :

(a) The firm's accounting year ends on 31st December, and the Balance Sheet at that date in 2015 showed stock ₹ 66,000, debtors ₹ 54,000 and creditors ₹ 42,000.

(b) During the period 1.1.2015 to 18.2.2015, the following transactions took place —

	₹		₹
Receipts from Debtors	97,000	Discount Received	400
Discount Allowed	1,000	Cash Sales	30,000
Payments to Creditors	68,000	Withdrawal of Stock by the Owner	600

(c) The firm's ledger shows that on 18.2.2015, debtors and creditors were ₹ 57,000 and ₹ 39,000 respectively.

(d) A stock-take, carried out immediately after the riot, showed the value of stock to be ₹ 28,050.

(e) The firm makes a gross profit of 25% on the selling price of its goods.

You are required to prepare a Statement showing the Loss of Cash.

Solution

Dr. Memorandum Trading Account for the period 1st January to 18th February, 2015 Cr.

Particulars		₹	Particulars		₹
To Opening Stock		66,000	By Sales		
To Purchases	65,400		Cash (Balancing figure)	36,000	
Less: Drawings	600	64,800	Credit (Note 2)	1,01,000	1,37,000
To Gross Profit (Note 3)		34,250	By Closing Stock		28,050
		1,65,050			1,65,050

Statement of Claim for Loss of Cash as on 18th February, 2015

	₹
Theoretical Value of Cash Sales	36,000
Less: Recorded Sales	30,000
Claim to be Lodged	6,000

Working Notes :

(1) Creditors Account

Date	Particulars	₹	Date	Particulars	₹
2015			2015		
Feb. 18	To Bank A/c	68,000	Jan. 1	By Balance c/d	42,000
	To Discount Received A/c	400	Feb. 18	By Purchases (Balancing figure)	65,400
	To Balance c/d	39,000			
		1,07,400			1,07,400

(2) Debtors Account

Date	Particulars	₹	Date	Particulars	₹
2015			2015		
Jan. 1	To Balance b/d	54,000	Feb. 18	By Bank A/c	97,000
Feb. 18	To Sales (Credit — Balancing figure)	1,01,000		By Discount Allowed A/c	1,000
				By Balance c/d	57,000
		1,55,000			1,55,000

(3) Cost of goods sold = Opening Stock + Purchases – Closing Stock = ₹ (66,000 + 64,800 – 28,050) = ₹ **1,02,750**.
Gross Profit is 25% on Sales. Therefore, Cost of goods sold is 75% of Sales. Sales = ₹ 1,02,750 / 75 × 100 = ₹ 1,37,000.
Gross Profit = 25% on ₹ 1,37,000 = ₹ **34,250.**

Key Points

- A business takes a fire insurance policy to cover (i) the loss of assets including stock; and (ii) loss of profit (consequential loss). A business may take insurance policy for loss of cash due to theft or misappropriation.
- There are two steps for determination of claim for loss of stock: (1) Ascertainment of the value of stock on the date of fire; and (2) Ascertainment of actual amount of claim to be lodged.
- Net Claim = Loss of Stock x $\dfrac{\text{Policy Value}}{\text{Value of Stock on the date of fire}}$
- **Indemnity Period** is the period beginning with the occurrence of the Damage and ending not later than 12 months thereafter during which the results of the business shall be affected in consequence of the damage.
- The turnover during the twelve months immediately before the date of the damage is known as the **Annual Turnover**.
- The turnover during that period in the twelve months immediately before the date of damage which corresponds with the indemnity period is called the ***Standard Turnover***.

THEORETICAL QUESTIONS

1. Explain the various steps for ascertaining the loss of stock by fire.
2. How is the gross profit computed for the purpose of insurance on loss of profit?
3. Write short notes on:
   (a) Average clause; (b) Indemnity period; (c) Annual sales; (d) Short sales; and (e) Increased cost of working.
4. Explain the different steps for ascertaining the amount of claim for loss of profit.
5. Why is it necessary to insure the assets of the business while taking up a policy on loss of profit?

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each statement or answer each question below :

1. When a fire takes place, the business naturally incurs heavy
   A expenditure
   B losses
   C none of these

2. A business takes a fire insurance policy to cover the loss of asets including
   A liabilities
   B stock
   C none of these
3. Gross profit is calculated on sales, based on usual gross profit percentage of the
   A last few years
   B last year
   C none of these
4. Fire insurance policies may contain an "average clause" to
   A discourage under-insurance
   B encourage under-insurance
   C none of these
5. The terms of loss of profit policies are usually framed to meet the requirements of the
   A insurer
   B insured
   C none of these

PRACTICAL QUESTIONS

Loss of Stock

1. A fire occured on 15th April, 2015 and destroyed the business premises of Johnson & Co. The books of account and stock amounting to ₹ 18,000 were saved and the following information was available from the books:

Year ended 31st December	2010	2011	2012	2013	2014
Sales (₹)	8,60,000	7,10,000	6,00,000	5,50,000	4,80,000
Gross Profit (₹)	2,15,000	2,13,000	2,10,000	1,87,000	1,72,800

The stock on 31st December, 2014 was valued at ₹ 97,000. The purchases, sales and productive wages from 1st January, 2015 to 14th April, 2015 were ascertained at ₹ 75,000, ₹ 1,59,000 and ₹ 30,000 respectively.
Prepare a statement in support of the claim for loss of stock against the insurance company.

2. There was a fire in godown of Spark Ltd. on 1.7.2015. Stock worth ₹ 30,000 was saved. The goods were insured and fully covered.
   (i) An average gross profit of 20% on sales is maintained by the company.
   (ii) The stock is valued at 10% above cost.
   The purchases and sales for first 6 months of the year were ₹ 2,10,000 and ₹ 4,50,000 respectively. Stock on January 1, 2015 was ₹ 1,48,500. the wages for that period amounted to ₹ 90,000.
   Find out the cost of stock burnt.
3. M owns a retail stationery shop which is partly destroyed by fire on 27th June 2015. The stock is insured for ₹ 10,500 and is subject to average clause. The opening Balance Sheet drawn on January 1, 2015 includes, inter alia, the following items:
   Stock — ₹ 12,500; Trade creditors — ₹ 3,500.
   On examination of the books of account for the subsequent period up to the date of fire, the following particulars are obtained:
   Sales — ₹ 88,800; Payment to creditors for goods — ₹ 75,000; Trade creditors as on 27.6.2015 — ₹ 1,800.
   An inspection of stock after the fire shows that items undamaged are ₹ 7,000. The normal rate of gross profit is 25% on purchases but the stock on January 1, 2015 includes items of discontinued lines costing ₹ 3,800 which are all sold during the next two months at cost.
   You are required to compute the amount of claim to be made to the insurer.
4. The premises of Bombay Sports House caught fire on 1st April, 2015 and its stock was damaged. The firm made up accounts to 31st May each year. The following information is available: (all figures in ₹)

	1st June 2013 to 31st May 2014	1st June 2014 to 1st April 2015
Stock at commencement conventionally valued at 10% above cost	1,05,754	1,45,992
Purchases	4,52,580	3,48,270
Sales	5,20,000	4,91,700

In December 2014, goods which cost ₹ 10,000 were given away to Gymkhana Secretaries of various colleges for advertising purposes. No entry was made in the books. During the same month a salesman misappropriated unrecorded cash sales of ₹ 4,000. The rate of gross profit is constant. From the above, make an estimate of stock in hand on the date of fire.

5. The premises of Eagle Pen Company caught fire on 22nd October 2014 and the stock was damaged. The firm made up accounts to 31st December each year, and on 31st December 2013 the stock at cost was ₹ 13,272 as against ₹ 9,614 on 31st December 2012.

   Purchases from 1st January 2014 to the date of fire were ₹ 34,827 as against ₹ 45,258 for the full year 2013 and the corresponding sales figures were ₹ 49,170 and ₹ 52,000 respectively.

   You are given the following further information:

   (a) In April 2014 goods which cost ₹ 1,000 were given away for advertising purposes, with no entries being made in the books.

   (b) During 2014 a clerk misappropriated unrecorded cash sales. It is estimated that the defalcation averaged ₹ 20 per week from 1st January 2014 until the clerk was dismissed on 21st May 2014.

   (c) The rate of gross profit is constant.

   From the foregoing information make an estimate of the stock on hand on the date of fire.

6. A fire occured on 15th September 2015 in the premises of X Co. Ltd. From the following figures, calculate the amount of claim to be lodged with the insurance company for loss of stock:

	₹		₹
Stock at cost as on 1st January 2014	20,000	Purchases from 1st January 2015 to 1st Sept. 2015	88,000
Stock at cost as on 1st January 2015	30,000	Sales — 2014	60,000
Purchases — 2014	40,000	Sales from 1st January 2015 to 15th Sept. 2015	1,05,000

   During the current year cost of purchases has risen by 10% above last year's level. Selling prices have gone up by 5%. Salvage value of stocks after fire was ₹ 2,000.

7. A fire on October 1, 2015 destroyed the stocks of a firm. The business records were saved and from them the following particulars were ascertained:

	₹		₹
Stock at cost on April 30, 2014	44,300	Sales for the year to April 30, 2015	1,52,500
Stock at cost on April 30, 2015	37,550	Purchases from May 1, 2015 to September 30, 2015	37,350
Purchases for the year to April 30, 2015	1,03,850	Sales from May 1, 2015 to September 30, 2015	59,000

   In valuing the stock on April 30, 2015 ₹ 800 were written-off a particular line of goods which originally cost ₹ 1,800 and which were sold in June 2015 for ₹ 1,750. Except this transaction, the ratio of gross profit remained unchanged throughout.

   The value of stock salvaged from the fire was ₹ 5,105. You are required to calculate the amount of claim to be presented to the insurance company in respect of the loss of stock.

8. On 1st April, 2015 the godown of Stone Ltd. was destroyed by fire. The records of the company revealed the following particulars:

	₹		₹
Stock on 1st January, 2014	75,000	Sales during 2014	4,00,000
Stock on 31st December, 2014	80,000	Purchases from 1st January, 2015 to the date of fire	75,000
Purchases during 2014	3,10,000	Sales from 1st January, 2015 to the date of fire	1,00,000

   In valuing closing stock of 2014, ₹ 5,000 were written-off whose cost was ₹ 4,800. Part of this stock was sold in 2015 at a loss of ₹ 400, ₹ 2,400. Stock salvaged was ₹ 5,000. The godown and the cost of which was fully insured.

   Indicate from above, amount of the claim to be made against the insurance company.

9. The premises of a company was destroyed by fire on 15th June, 2015. The records were, however, saved which from the following particulars were available (all figures in ₹):

Stock at cost as on 1st January 2014	30,000	Sales less returns for the year ended Dec. 31, 2014	2,50,000
Stock at cost as on 31st December 2014	40,000	Purchases less returns from 1.1.2015 to 15.6.2015	85,000
Purchases less returns for the year ended Dec. 31, 2014	2,00,000	Sales less returns from 1.1.2015 to 15.6.2015	1,20,000

   ₹ 2,500 were written-off a certain stock, which was a poor selling line, while valuing the stock for the Balance Sheet as at December 31, 2014. The cost of such stock was ₹ 4,000. A portion of this stock was sold in March 2015 at a loss of ₹ 500 on the original cost of ₹ 2,000. The balance of this stock is now estimated to be worth the original cost. Excepting the above, the gross profit remained at a uniform rate throughout. The stock saved was ₹ 5,000. You are required to ascertain the amount of loss of stock which is to be claimed from the insurance company.

10. A fire occured in the godown of M/s. Krishna Traders on 31st March 2015. The stock as on 31st December 2014 was valued at ₹ 5,88,000. From the following particulars relating to the period from 1st January 2015 to 31st March 2015, you are required to ascertain the amount of claim to be lodged with the insurance company in respect of the value of goods destroyed by fire:
    (1) The purchases during the above period amounted to ₹ 2,13,000 of which goods costing ₹ 30,000 were received on 8th May, 2015.
    (2) Goods costing ₹ 15,000 were found defective and were sold for ₹ 9,000. The goods in question had been included in the closing stock as at 31st December 2014, at cost.
    (3) The closing stock as at 31st December 2014 was undervalued by ₹ 12,000.
    (4) The sales during the above period amounted to ₹ 2,79,000 of which "sales on approval" basis amounted to ₹ 30,000. No intimation was received from the customers in respect of 60% of the goods sold on approval basis.
    (5) On 20th February 2015, goods costing ₹ 68,000 were sent to consignee and the same were lying unsold with them.
    (6) The accounting year of the firm ends on 31st December every year and the sales and gross profits of the preceding 5 years are as under:

Year	Sales (₹)	Gross Profit (₹)
2010	13,97,500	3,49,375
2011	11,53,750	3,46,125
2012	9,75,000	3,25,000
2013	8,93,750	3,03,875
2014	9,75,000	3,37,050

    The gross profit during the period of fire should be taken on the basis of the weighted average of last five years' profits, giving more weightage to the results of the later years.
    (7) The value of the goods salvaged was estimated at ₹ 1,20,000.
    (8) The insurance policy taken out by the company was for ₹ 3,00,000. The policy was subject to average clause.
11. A fire occurred in the premises of Malcom Marshall & Co on 15.5.2012 causing destruction of a large part of the stock. The firm had taken a fire insurance policy for ₹ 5,47,200 to cover the loss of stock by fire. From the records saved, the following particulars were ascertained :

	₹
Purchases for the year 2011	30,01,600
Sales for the year 2011	37,12,000
Purchases from 1st January 2012 to 15th May 2012	5,82,400
Sales from 1st January 2012 to 15th May 2012	7,68,000
Stock on 1st January 2011	4,60,800
Stock on 31st December 2011	7,74,400
Wages paid during 2011	3,20,000
Wages paid during 1st January 2012 to 15th May 2012	57,600
Stock salvaged was	89,600

    In 2011 some goods were destroyed by fire. The cost of such goods were ₹ 1,60,000. These goods were not covered by any insurance policy.
    In valuing the stock on 31st December, 2011 stocks costing ₹ 34,000 were found to be poor selling line and ₹ 6,000 in relation to such stock were written-off. A portion of these goods (original cost ₹ 5,000) were sold in April, 2012 at a loss of ₹ 1,000 on original cost. The remainder of this stock was now estimated to be worth the original cost. Subject to the above exception, gross profit has remained at a uniform rate throughout.
    You are required to ascertain the insurance claim available to the firm.

Loss of Profit

12. On 31st December 2014, a fire damaged the premises of Shanker Ltd. and the business of the company got disorganised till 31st March, 2015. The company was insured under a loss of profit for ₹ 1,95,000 with a six month's period indemnity. The company's account for the year ended 31st October, 2014 showed a turnover of ₹ 5,25,000 with a net profit of ₹ 60,000. The amount of standing charges covered by the insurance and debited in that year was ₹ 1,50,000. The turnover for the twelve months ended 31st December, 2014 was ₹ 5,85,000. The turnover during the period the business was dislocated amounted to ₹ 60,000 while during the corresponding period in the preceding year it was ₹ 1,27,500. A sum of ₹ 15,000 was spent as additional expenses to mitigate the effect of the loss, there being no saving, however, in standing charges as a result of fire.
    Prepare a claim to be submitted in respect of the consequential loss policy.
13. There was a serious fire in the premises of M/s. Fortunate on 1st September, 2014. Their business activities were interrupted till 31st December, 2014 when normal trading conditions were re- established. M/s Fortunate are insured under the loss of profit policy for ₹ 42,000, the period of indemnity being six months.

You are able to ascertain the following information:

(1) The net profit for the year ended 31st December 2013 was ₹ 20,000;

(2) The annual insurable standing charges amounted to ₹ 30,000 of which ₹ 2,000 were not included in the definition of insured standing charges under the policy;

(3) The additional cost of working in order to mitigate the damage caused by the fire amounted to ₹ 600, and, but for this expenditure, the business would have had to shut down;

(4) The saving in insured charges in consequence of the fire amounted to ₹ 1,500;

(5) The turnover for the period of four months ended April 30th, August 31st and December 31st in each of the years 2013 and 2014 was as under:

	April 30 (₹)	August 31 (₹)	December 31 (₹)
2013	65,000	80,000	95,000
2014	70,000	80,000	15,000

You are required to compute the relevant claim under the terms of the loss of profit policy.

14. A fire occurred on 1st July 2014 in the premises of Arolite Ltd., and business was disorganised up to 30th November 2014.

From the books of account, the following information was extracted (all figures in ₹) :

Actual turnover from 1st July 2014 to 30th Nov. 2014	60,000	Turnover for the last financial year	5,00,000
Turnover from 1st July 2013 to 30th Nov. 2013	2,00,000	Turnover for the year ending 30th June 2014	5,50,000
Net Profit for the last financial year	90,000	Total standing charges for the year	72,000
Insured standing charges for the last financial year	60,000		

The company incurred additional expenses amounting to ₹ 9,000 which reduced the loss in turnover. There was also a saving of ₹ 2,486 during the indemnity period.

The company holds a "Loss of profit" policy for ₹ 1,65,000 having an indemnity period for 6 months. There was a considerable increase in trade and it was agreed that an adjustment of 20% be made in respect of upward trend in turnover. Compute claim under "Loss of profit insurance".

15. On 1st November 2014, a severe fire broke out in the premises of Good Luck Co. Ltd. The indemnity period lasted for 4 months during which the sales of the Company were reduced to ₹ 2,00,000 only. The company closes its accounts on 30th June each year. The Profit and Loss Account for the year ended 30th June 2014 is given below:

	₹		₹
Opening Stock	5,00,000	Sales	47,50,000
Purchases	30,00,000	Closing Stock	2,50,000
Variable Expenses	7,87,500		
Standing charges	3,62,500		
Net Profit	3,50,000		
	50,00,000		50,00,000

The Company took a loss of profit policy for a sum of ₹ 6,00,000. The sales of the company for the 12 months ending the date of fire were ₹ 50,00,000 and for the 4 months from 1st November, 2013 to 29th February 2014 were ₹ 15,00,000. It was noted that the sales for the first four months of the year under indemnity were 20% higher than the previous year. Compute the claim for loss of profit.

16. From the following information, compute a consequential loss claim:

Financial year ends on 31st December : Turnover ₹ 2,00,000; Indemnity period — 6 months.

Period of interruption — 1st July to 31st October.

Net profit — ₹ 18,000. Standing charges — ₹ 42,000 out of which ₹ 10,000 have not been insured.

Sum assured — ₹ 50,000. Standard turnover — ₹ 65,000.

Turnover in the period of interruption — ₹ 25,000 out of which ₹ 6,000 was from a rented place at ₹ 600 p.m.

Annual turnover — ₹ 2,40,000. Savings in standing charges — ₹ 4,725 per annum.

Date of fire — night of 30th June.

It was agreed between the insurer and the insured that the business trends would lead to an increase of 10% in the turnover.

17. From the following details, determine the amount of claim under a loss of profit policy :

Indemnity period	4 months
Date of fire	1.4.2014
Dislocation continued upto	1.8.2014
	₹
Sum insured	60,000
Sales for the last accounting year	2,40,000

Net profit for the last accounting year	34,000
Standing charges for the last accounting year all insured	26,000
Sales for the dislocation period, i.e., 1.4.2014 to 1.8.2014	30,000
Sales for the year 1.4.2013 to 31.3.2014	3,20,000
Sales for the corresponding period in the preceding year, i.e., 1.4.2013 to 1.8.2013	1,00,000

The policy contains special circumstances clause which stipulates for increase of turnover (standard and annual) by 10% as there is an upward trend in the business.

18. Calculate the amount of claim for consequential loss from the following information :
    (i) The policy is for ₹ 4,90,000 with a six months period of indemnity.
    (ii) On 1st July, 2014 fire broke out and sales of 3 months were affected.
    (iii) Sales for 12 months ended 30th June, 2014 amounted to ₹ 5,00,000.
    (iv) A sum of ₹ 1,000 was spent as additional expenses to mitigate the effect of loss.
    (v) After debiting insured standing charges of ₹ 25,000, the net profit for the year 2013 amounted to ₹ 2,00,000.
    (vi) Sales for the year 2013 amounted to ₹ 4,50,000.
    (vii) Accounts are closed each year on 31st December.
    (viii) Sales for 3 months ending 30th September, 2013 were ₹ 1,00,000.
    (ix) Sales for 3 months ending 30th September, 2014 were ₹ 40,000.
19. Mitra & Co. has taken out a policy against consequential loss, the amount of the policy being ₹ 60,000 for 2013-14 and the indemnity period being 18 months. A fire occurred on 1st September, 2013 in the premises of Mitra & Co., which interrupted business for a period of 12 months. The Profit and Loss Account for the year ended 31st March, 2013 showed a sale of ₹ 2,40,000 and a profit of ₹ 20,000 after debiting ₹ 30,000 standing charges of which ₹ 2,000 were not insured. You have ascertained the turnover for the various periods as :

Year		2012	2013	2014
5 Months ended 31st August	(₹)	1,00,000	1,10,000	20,000
7 Months ended 31st March	(₹)	1,40,000	1,40,000	10,000

Additional expenses totalled ₹ 7,800 and the saving in expenses was ₹ 1,500.
Compute the claim for loss of profit in respect of the policy.

Practical Questions

1. **Rate of gross profit on sales — 25%; 30%; 35%; 34%; 36%. Average rate of gross profit — 32%; Stock on the date of fire — ₹ 93,880; Insurance claim ₹ 75,880.**
2. **Insurance claim — ₹ 75,000 – ₹ 30,000 = ₹ 45,000. It is assumed that in the preceding years there was no difference between the amount of opening stock and closing stock. Thus the gross profits of all the years were same, i.e., 20%.**
3. **Insurance claim — ₹ 5,250.**
4. **Gross profit on sales — 20%; Stock in hand on the date of fire ₹ — 74,430.**
5. **Stock in hand on the date of fire — ₹ 7,443.**
6. **Rate of gross profit on sales — 50%; Insurance claim — ₹ 64,000.**
7. **Insurance claim ₹ 27,575.**
8. **Rate of gross profit on sales — 25%; Insurance claim — ₹ 79,100.**
9. **Rate of gross profit on sales — 25%; Total stock on the date of fire — ₹ 36,625; Insurance claim — ₹ 31,625.**
10. **Average rate of gross profit — (500 / 15) = $33^1/_3$%. Loss of stock — ₹ 4,00,000. Net Claim (after average clause) — ₹ 2,30,769.**
11. **Rate of Gross Profit — 23.4375%; Loss of Stock — ₹ 7,40,863; Net Claim — ₹ 4,88,162.**
12. **Upward trend — 80/7%; Short sales — ₹ 82,071; Rate of gross profit — 40%; Additional expenses incurred — ₹ 15,000; Loss of profit = ₹ 47,828. Net claim after average clause — ₹ 39,857.**
13. **Gross profit — 20% (₹ 48,000/2,40,000). Short sales — ₹ 80,000; Additional expenses admissible — ₹ 576; Loss of profit — ₹ 15,076; Net claim — ₹ 12,922.**
14. **Rate of gross profit — ₹ 30%; Short sales — ₹ 1,80,000; Additional expenses admissible — ₹ 8,486; Gross claim — ₹ 60,000; Net claim — ₹ 50,000.**
15. **Short sales — ₹ 16,00,000; Claim for loss of profit — ₹ 1,92,000.**
16. **Rate of gross profit (after adjustment) — 28% for loss of stock; Value of stock on the date of fire — ₹ 83,200; Claim for loss of stock will be limited to ₹ 80,000.**
    Gross profit for loss of profit — 20%; Short sales (after adjustment) — ₹ 2,28,000; Groff profit on short sales ₹ 45,600 + Additional expenses ₹ 12,000 = Total claim ₹ 57,600. Average clause is not applicable.
17. **Gross profit ratio = 25%. Short sales ₹ 80,000. Amount of net claim = ₹ 13,636 (after applying average clause).**
18. **Gross profit ratio = 50%. Short sales ₹ 60,000. Net claim = ₹ 31,000 (the average clause will not be applicable).**
19. **Gross profit = 20%. Short sales — ₹ 2,45,000. Amount of insurance claim = ₹ 53,500. Increased cost of workings (admissible) ₹ 6,000.**

Profit and Loss Appropriation Account

Meaning of Partnership

Partnership is the relation that exists between or among persons carrying on business in common with a view to earn profit. The partnership form of enterprise is very common and popular because (1) it is easy to form; (2) it allows several individuals to combine their talents and skills in a particular business venture; (3) it provides a means of obtaining more capital than a single individual can obtain; and, (4) it allows the sharing of risks for rapidly growing businesses.

In India partnership is governed by The Indian Partnership Act, 1932. Section 4 of this Act defines partnership as ***'the relationship between persons who have agreed to share the profit of a business carried on by all or any of them acting for all'.***

From the foregoing definition, it is clear that partnership consists of three essential elements:

1. The partnership must be the result of an agreement between two or more persons.
2. The agreement must be to share profits or losses of the business.
3. The business must be carried on by all or any of them acting for all.

In the absence of any of these essentials, a partnership cannot be formed.

Persons who enter into a partnership are individually called ***partners***, and collectively, ***a firm***.

A partnership may be formed when a sole proprietor of an existing business agrees with one or more persons to combine assets and/or skills. Persons may also start a new business that has not existed before. Partnerships are common in wholesale businesses, in small retail stores, and in personal service businesses. Partnerships are also often used for professional businesses such as accounting and audit firms, law firms and medical clinics.

Features of Partnership

The following are the features of partnership:

1. There should be two or more persons to form a partnership. But the number of persons must not exceed 20, and in case of banking business, it must not exceed 10. It should be noted that if the number of

persons exceeds the above limit, the partnership becomes illegal and it cannot enter into a contract with a third party or file a legal suit.

2. The persons must agree to share the profits or losses of the business.
3. The business must be carried on by all or any of them acting for all. Each partner is a co-owner of the partnership assets and liabilities. Each partner is considered as an agent of the partnership firm capable of transacting business in the name of the partnership. In effect, any partner can bind the other partners when acting within the scope of the partnership activities.
4. The liability of the partners is unlimited. A partner is both jointly and severally liable to third parties. At any point of time, if the assets of a partnership firm are not sufficient to pay its liabilities, creditors may take action against the personal assets of any or all of the partners.
5. In the eyes of the law, partners and the firm are not separate entities.
6. A partnership legally terminates as a business entity each time there is a change in the constitution, for instance, change in the profit sharing ratio, admission, retirement or death of a partner. A partnership agreement should include provisions for changes in the constitution so that the business is not interrupted.

Partnership Deed

Since partnership is an agreement between two or more persons, it is advisable that a Partnership Deed or Partnership Agreement, showing the terms and conditions, should be drawn up and signed by all the partners. The Partnership Deed may be entered into orally or written on paper. Though the Partnership Act does not make it obligatory that a firm must have a Partnership Deed in writing, yet it is better to have it in black and white to avoid confusion in future. A Partnership Deed, generally, includes the following :

1. The name of the partners;
2. The name of the firm under which it is to work;
3. The nature of business to be carried on by the firm;
4. The conduct and the powers of the partners;
5. When termination is certain, the term of duration of partnership;
6. The amount of capital to be contributed by each partner;
7. The restrictions on working of each partner;
8. Methods of division of profits or losses;
9. Salary, commission, interest on capital payable to the partners;
10. Interest on drawings to be charged on withdrawals;
11. Interest on loan payable to a partner;
12. Valuation of goodwill when there is a change in the constitution of the firm;
13. Methods to be followed when there is a change in the constitution of the firm;
14. Methods of keeping books of account; and
15. Arbitration clause, that is, the procedure to be followed in the event of dispute.

Kinds of Partners

General and Limited Partners

Ordinarily, each partner is equally liable for any debts or other obligations incurred by any of the partners in the name of the business, that is, each partner is personally liable to creditors for all debts of the partnership if the other partners fail to meet their obligations under the agreement. Such partners are known as ***general partners*** and the partnership, a ***general partnership***. But by the virtue of the provisions of the Partnership Act, some partner or partners may have limited liability — to the extent of their respective capital contribution. Such partners are called ***limited partners*** and the firm is known as ***limited partnership***. It goes without saying that the liability of only some of the partners can be unlimited. In other words, every limited partnership must have at least one general partner.

For having limited liability, the rights of a limited partner are also limited. He cannot take part in the management of the business. He cannot control the books of account, but can inspect or advise the other partners. He cannot dissolve partnership. Therefore, a limited partner is an inactive partner, who only contributes capital and merely shares profits or losses of the firm; he has no right to interfere if he dislikes the way the business is being carried on. Limited partners must be identified as such to creditors and others doing business with the partnership firm.

Active or Ordinary Partners are those who take active part in the conduct of the business.

Sleeping, Dormant or Silent Partners are those who do not take any part in the conduct of the business. They only provide money into the business as capital and share profits and losses in the agreed ratio.

Nominal or Ostensible Partners are those who do not contribute any capital and without having any interest in the business, lend their name to the business.

Minor Partners

A partner, who has not attained the age of maturity is called a minor partner. A minor partner can be admitted only into the benefits of the partnership but is not personally liable, like other partners, for any debts of the firm.

Partner in Profits only, Subpartner, Holding out

A partner who is entitled to the profits of the business without making himself responsible for losses, is called a ***partner in profits*** only. A partner may enter into a contract with a third party (an outsider) to share his profit. In such a case, the third party is called a ***subpartner***.

As per Section 28 of the Partnership Act, anybody, who, by spoken or written words or by conduct, represents himself or knowingly permits himself to be represented as a partner in a firm is liable as a partner in that firm to a person who has on the faith of any such representation given credit to the firm. A person, who, thus represents himself or allows himself to be represented as a partner is said to be ***'holding out'*** as a partner under the principle of estoppel.

Registration of Partnership Firm

The registration of a partnership firm is not compulsory under the Indian Partnership Act. However, a firm may be registered at any time by sending by post or delivering a statement in the prescribed form to the ***Registrar of Firms*** of the area in which any place of business of the firm is situated or proposed to be situated.

The statement must contain the following information:

(i) the firm's name;
(ii) the principal place of business;
(iii) the names of its other places of business;
(iv) the date of joining of each partner;
(v) the full name and address of the partners; and
(vi) the duration of the firm.

The aforesaid statement must be signed by all the partners and must be accompanied by the prescribed fees. After satisfying himself, the Registrar will record an entry of this statement in the Register of Firms.

Consequences of Non-Registration

As per the provision of Section 69 of the Indian Partnership Act, non-registration of a partnership gives rise to a number of disabilities, such as:

(i) No partner can bring a suit in any court against the firm or his co-partners.
(ii) The firm cannot file a suit against third party for breach of contract, and like matters.

Partners' Capital Accounts

At the formation of a new partnership, the partnership agreement provides for a fixed amount of capital to be contributed by each partner from his private resources. In the Balance Sheet of a partnership firm, there are several capital accounts—one for each partner.

In this connection, the following important points may be noted:

1. Capital contribution by the partners may not be equal or as per their profit sharing ratio. The ratio of the capital contribution is to be decided by the partners mutually or as per the Partnership Deed.
2. Capital contribution by the partners may not only be in the form of cash—it can be in the shape of other assets also.
3. A partner, on the strength of his expert knowledge or qualification, may not bring in any physical capital.
4. The ratio of the partners' capitals may be changed by mutual consent. It generally changes when there is a change in the constitution, that is, change in the profit sharing ratio; admission, retirement or death of a partner.
5. Along with other physical assets (also goodwill), if a partner brings any liability to the business, the net amount (assets – liabilities) will represent his capital contribution.

Fixed and Fluctuating Capital Accounts

1. Fixed Capital Accounts

Under this method, for each partner, two accounts are opened. The first account, Partners' Capital Account shows the Partners' original contribution to the business as capital. This method is adopted when it is desired to keep Partners' Capital Account at the original figures. The balance of this account is only changed when there is a change in the constitution or when a partner draws money from the business against his capital. The other account, known as Partners' Current Account, is opened to record the transactions between the partners and the firm, that is, salary, interest on capital, drawings, and so on.

2. Fluctuating Capital Accounts

When the partnership firm decides not to keep separate current accounts for the partners, all the entries in regard to partners' drawings, salaries, interest and share of profit are passed through the Capital Accounts of the partners. In such a case, the Capital Accounts of the partners keep on fluctuating. There is one danger in this method. If a partner draws more than what he is entitled to, regarding share of profit, salaries, etc., there will be a depletion of capital. When the partners maintain the fluctuating capital method, no maximum limit can be put on the partners' drawings by the division between the Capital and Current Accounts.

Therefore, when the partners maintain the fixed capital method, the firm may distinguish between permanent capital and endeavour profits (amount entitled minus drawings) by keeping separate Capital and Current Accounts for each partner. Alternatively, when the firm maintains the fluctuating capital method, partners maintain only the Capital Accounts for each partner combining the above two accounts.

The Proprietary Theory and Partnership

From a legal viewpoint, the partnership is not separate from the partners. But, from the accounting viewpoint, the partnership is a separate business entity.

The proprietorship section of a partnership Balance Sheet contains the following :

1. Capital Account for each partner — to show each partner's fixed stake in the partnership for the original capital brought into the partnership.
2. Partners' Loan Account—to reflect any loan provided by a partner to the firm over and above the agreed capital.
3. Current Account for each partner — to show each partners' fluctuating stake in the partnership for the transactions between the partners and the partnership. The transactions are generally as under :
   (a) Salary to the partners;
   (b) Interest on capital to the partners;
   (c) Commission to any or all the partners;
   (d) Drawings of the partners;
   (e) Interest on drawings of the partners; and
   (f) Share of profits to the partners.

The Appropriation of Net Income

In the case of a sole proprietorship, the whole of the net profit is credited to the proprietor's capital and the Capital Account is debited for any drawings. A distinction is required, in the case of a partnership business, for computing and demonstrating the division of the profit or loss among the partners. Therefore, a new section, known as Profit and Loss Appropriation Account, is added to the Profit and Loss Account, which is an essential part of the partnership accounts. This account will show how the net profit of the business is being apportioned among partners. The Profit and Loss Appropriation Account includes interest on capital, interest on partner's loan, salaries to partners, commission to partners, interest on drawings and the share of profit. This account may also include any reserve that has been created by the business but will not include any drawings made by the partners.

This account is credited with the net profit (taken from Profit and Loss Account) and the interest on drawing charged to the partners (which is a loss to the partners but an income for the firm) and debited with interest on capital, salaries to partners, commission to partners, share of profit, transfer to reserve, etc. A specimen of this account is as under:

(Assuming that there are two partners; A and B. A is entitled to salary and B is entitled to commission.)

Dr. Profit and Loss Appropriation Account for the year ended ... Cr.

Particulars	₹	Particulars	₹
To Reserve A/c — transferred to Reserve	***	By Profit and Loss A/c — Net profit	***
To Interest on Capital A/c		By Interest on Drawings A/c	
A — **		A — **	
B — **	***	B — **	***
To Interest on Partners' Loan A/c	***		
To Partners' Salary A/c — A	***		
To Partners' Commission A/c — B	***		
To Share of Profit A/c (balancing figure)			
A — ** B — **	***		
	***		***

The manner in which the net income is to be distributed between the partners is normally detailed in the Partnership Deed and it is final. In the absence of specific agreement on a particular matter, the provisions of Section 13 of the Indian Partnership Act, 1932 is applicable.

The main provisions of this section are given below:

(a) A partner is not entitled to receive remuneration for taking part in the conduct of the business.

(b) The partners are entitled to share equally the profits earned, and shall contribute equally to the losses sustained by the firm.

(c) Interest on partners' loan is to be allowed @ 6%p.a.

(d) Interest on capital (if payable under agreement) is payable out of profit only.

In this connection, we must remember that:
Any amount payable to a partner (except rent), such as interest on capital, interest on loan, salaries, commission, etc., should be treated as appropriation and it should not be charged against profit.

Interest on Capital

As has already been stated, partners are not entitled to any interest on capital, unless specifically provided in the Partnership Deed.

The idea for providing the interest on capital is to compensate the opportunity cost suffered by the partners by not investing the money elsewhere in securities with little or no risk. When the partners contribute unequal capitals but profits are shared equally or where the profit-sharing ratio is different from capital contribution ratio, the charge of interest against the firm on capital contributed by each partner is justified to mitigate differential advantage of one partner over the other.

The amount of interest on capital is to be calculated on time basis after taking into consideration the withdrawal or introduction of capital. The Profit and Loss Appropriation Account is debited and Partners' Capital/Current Accounts is credited with the interest on capital.

In this context, it should be noted that interest on capital is chargeable to a firm to the extent of available profit only, since interest on capital is an appropriation of profits.

For example, X and Y are partners sharing profits and losses in the ratio 3:2. They earn ₹ 15,000 as profit before allowing interest on capital @ 10% p.a. X's capital was ₹ 1,20,000 and Y's capital was ₹ 60,000. Now, interest payable to the partners comes to ₹ 18,000 (X—₹ 12,000 and Y—₹ 6,000). In the absence of any special provision in this regard in the Partnership Deed, X will get ₹ 10,000 and Y will get ₹ 5,000 only, i.e., ₹ 15,000 will be divided in the ratio of interest actually payable to partners.

However, by agreement, partners may waive the above limitation and in such a case, the resultant loss (after providing whole interest) would be borne by the partners in the profit-sharing ratio.

The Profit And Loss Appropriation Account will appear as follows:

Dr. Profit and Loss Appropriation Account for the year ended ... Cr.

Particulars		₹	Particulars		₹
To Interest on Capital A/c			By Profit and Loss A/c — Net profit		15,000
X	10,000				
Y	5,000	15,000			
		15,000			15,000

When there is an agreement between the partners :

Dr. Profit and Loss Appropriation Account for the year ended ... Cr.

Particulars		₹	Particulars		₹
To Interest on Capital A/c			By Profit and Loss A/c — Net profit		15,000
X	12,000		By Share of Loss X	1,800	
Y	6,000	18,000	Y	1,200	3,000
		18,000			18,000

Partners' Salaries, Commission, etc

Like interest on capital, partners are also not allowed any salary or commission, unless specifically provided for in the agreement. The Partnership Deed may, however, provide for the salaries to a partner or partners in the following circumstances:

1. When some partners do most of the work of operating the business.
2. When one or more of the partners look after the entire sales operation.
3. When there are junior or sleeping partners, they may be remunerated by way of a fixed salary plus a small percentage of profits.
4. When the business is managed by the partners who have different expert knowledge or qualification, such partners are remunerated for their labour put into this business.
5. When some of the partners devote the whole of their time to the business while the other partners do not, it is desirable to ascertain true profit after charging managerial remuneration, which would have been incurred if the business were managed by outsiders.

Interest on capital is paid to the partners as a compensation for their contribution of capital; similarly, salaries are paid to the partners as a compensation for their labour. Since these salaries are not the result of an employer-employee relationship, these are merely in the nature of preferential shares of the divisible profit.

The amount of salaries should be debited to Profit and Loss Appropriation Account and credited to Partners' Capital or Current Accounts.

Partners' Drawings

For meeting personal needs, partners may require to draw money from the firm in varying amounts. They can also draw money against their salary, commission and interest on capital (provided the partnership deed expressly states that).

In addition to the above, partners are allowed to draw money in anticipation of their share of profits. These amounts are termed as ***'Drawings'***. When drawings are made, Drawings Account or Current Account in the name of each partner is debited and Cash or Bank is credited. At the end of the accounting period Partners' Drawings Accounts are closed by transferring those to Partners' Capital Accounts by crediting Drawings Accounts and debiting Capital Accounts.

Calculation of Interest on Drawings

Subject to the partnership agreement, partners are allowed to withdraw money from the firm to meet their personal expenses. Generally, they withdraw money against their salary, commission, etc. In addition, partners are allowed to withdraw money in anticipation of their share of profits. These amounts are termed as ***Drawings***.

When drawings are made in cash, the following entry is passed :

Drawings Account Dr.
To Bank / Cash

When drawings are made in kind, the following entry is passed :

Drawings Account Dr.
To Purchases Account

At the end of the accounting year, the balance of the Drawings Account is closed by transferring it to the Capital Account (when fluctuating capital system is used) or Current Account (when fixed capital system is used). To limit the amount of drawings by the partners, the partnership agreement provides for charging of interest on drawings. If there is no partnership agreement or partnership agreement is silent in this aspect, no interest is charged on partners' drawings.

Interest on drawings is an income of the ***firm*** and it is credited to Profit and Loss Appropriation Account.

Fixed Amount of Money is Withdrawn for 12 Months

The partners may decide to withdraw fixed amount of money every month. For the purpose of calculation of interest on drawings, it is to be seen whether the fixed amount is withdrawn at the beginning of each month or at the end of each month or at the middle of each month.

Calculation of interest on drawings is to be made according to situation. The different situations are shown below :

Situation 1 : When fixed amount is withdrawn at the beginning of each month for 12 months

In this case, the interest on total drawings will be equal to interest of ***6.5 months*** at an agreed rate per annum.

The above factor of 6.5 months has been calculated as follows :

First withdrawal is made on the 1st day of the **1st** month. It means that this amount is outstanding for 12 months. Similarly, ***second*** withdrawal is made on the 1st day of the ***2nd*** month. It means that this amount is outstanding for 11 months.

Similarly, ***third*** withdrawal is made on the 1st day of the ***3rd*** month. It means that this amount is outstanding for 10 months.

In the same way, ***twelfth*** withdrawal is made on the 1st day of the ***12th*** month. It means that this amount is outstanding for 1 month.

If the average is taken, it will be as follows :

$$\text{Average Period} = \frac{[12+11+10+9+8+7+6+5+4+3+2+1]}{12}$$

$$= \frac{78}{12} = 6.5 \text{ Months}$$

Alternatively, the average period can be calculated as follows :

Average Period =

$$\frac{\text{Outstanding Period after 1st withdrawal} + \text{Outstanding Period after last withdrawal}}{2}$$

$$= \frac{12 \text{ months} + 1 \text{ month}}{2} = \frac{13 \text{ months}}{2} = 6.5 \text{ Months}$$

$$\textbf{Interest on Drawings} = \textbf{Total Drawings} \times \frac{\textbf{Rate of Interest}}{\textbf{100}} \times \frac{\textbf{6.5}}{\textbf{12}}$$

Situation 2 : When fixed amount is withdrawn at the end of each month for 12 months

In this case, interest on total drawings will be equal to interest of $5^1/_2$ months at an agreed rate p. a.

The above factor of $5^1/_2$ months has been calculated as follows :

First withdrawal is made on the last day of the ***1st*** month. It means that this amount is outstanding for 11 months.

Similarly ***second*** withdrawal is made on the last day of the ***2nd*** month. It means that this amount is outstanding for 10 months.

Similarly, ***third*** withdrawal is made on the last day of the ***3rd*** month. It means that this amount is outstanding for 9 months.

Similarly, ***twelfth*** withdrawal is made on the last day of ***12th*** month. It means that this amount is outstanding for 0 months. If the average is taken, it will be as follows :

$$\text{Average Period} = \frac{[\,11 + 10 + 9 + 8 + 7 + 6 + 5 + 4 + 3 + 2 + 1 + 0\,]}{12}$$

$$= \frac{76}{12} = 5.5 \text{ Months}$$

Alternatively, the average period can be calculated as follows :

Average Period =

$$\frac{\text{Outstanding Period after 1st withdrawal} + \text{Outstanding Period after last withdrawal}}{2}$$

$$= \frac{11 \text{ months} + 0 \text{ month}}{2} = \frac{11 \text{ months}}{2} = 5.5 \text{ Months}$$

$$\textbf{Interest on Drawings} = \textbf{Total Drawings} \times \frac{\textbf{Rate of Interest}}{\textbf{100}} \times \frac{\textbf{5.5}}{\textbf{12}}$$

Situation 3 : When fixed amount is withdrawn at the middle of each month for 12 months

In this case, interest on total drawings will be equal to interest of 6 months at an agreed rate per annum. The above factor of 6 months has been calculated as follows :

First withdrawal is made at the middle of ***1st*** month. It means that this amount is outstanding for 11.5 months. Similarly, ***second*** withdrawal is made at the middle of ***2nd*** month. It means that this amount is outstanding for 10.5 months. Similarly, ***third*** withdrawal is made at the middle of ***3rd*** month. It means that this amount is outstanding for 9.5 months. Smilarly, ***twelvfh*** withdrawal is made at the middle of the ***12th*** month. It means that this amount is outstanding for 0.5 months.

If the average is taken, it will be as follows :

Average Period =

$$\frac{[\,11.5 + 10.5 + 9.5 + 8.5 + 7.5 + 6.5 + 5.5 + 4.5 + 3.5 + 2.5 + 1.5 + 0.5\,]}{12}$$

$$= \frac{72}{12} = 6 \text{ Months}$$

Alternatively, the average period can be calculated as follows :

Average Period =

$$\frac{\text{Period of outstanding after 1st withdrawal} + \text{Period of outstanding after last withdrawal}}{2}$$

$$= \frac{11.5 \text{ months} + 0.5 \text{ month}}{2} = \frac{12 \text{ months}}{2} = 6 \text{ Months}$$

Interest on Drawings = Total Drawings $\times \frac{\text{Rate of interest}}{100} \times \frac{6}{12}$

The above matters can be explained with the help of the following example:

Suppose A, B and C are partners sharing profits equally. During the year 2010 the following amounts were withdrawn by the partners in anticipation of profits:

A @ ₹ 100 p.m. at the beginning of each month; B @ ₹ 100 p.m. at the end of each month; C @ ₹ 100 p.m. at the middle of each month; and Rate of interest on drawings is 10% p.a.

Now applying the above rules the interest on drawings will be as follows:

A: 1,200 × 10/100 × 6.5/12 = ₹ 65;

B: 1,200 × 10/100 × 5.5/12 = ₹ 55; and

C: 1,200 × 10/100 × 6/12 = ₹ 60.

Alternatively,

A is withdrawing at the beginning of each month, so for the *first month's* withdrawal, he will pay interest @ 10% p.a. for 12 months on ₹ 100. Similarly, for the second month's withdrawal, he will pay interest for 11 months and so on. For the *last month's* withdrawal, he will have to pay interest for 1 month. B is withdrawing at the end of each month, so for *first month's* withdrawal, he will have to pay interest @ 10% p.a. for 11 months on ₹ 100.

Similarly for *second month's* withdrawal, he will have to pay interest @ 10% p.a. for 10 months and so on. For *last month's* withdrawal, he will pay interest for zero month.

C is withdrawing at the middle of each month, so for *first month's* withdrawal, he will have to pay interest @ 10% p.a. for 11.5 months on ₹ 100. similarly, for *second month's* withdrawal, he will have to pay interest @ 10% p.a. for 10.5 months and so on.

For *last month's* withdrawal, he will have to pay interest for 1/2 month.

Calculation of Interest on Drawings (Month-wise)

Month's withdrawals	A			B			C		
1st	100 x 10/100 x 12/12	=	10.00	100 x 10/100 x 11/12	=	9.17	100 x 10/100 x 11.5/12	=	9.58
2nd	100 x 10/100 x 11/12	=	9.17	100 x 10/100 x 10/12	=	8.33	100 x 10/100 x 10.5/12	=	8.75
3rd	100 x 10/100 x 10/12	=	8.33	100 x 10/100 x 9/12	=	7.50	100 x 10/100 x 9.5/12	=	7.92
4th	100 x 10/100 x 9/12	=	7.50	100 x 10/100 x 8/12	=	6.67	100 x 10/100 x 8.5/12	=	7.08
5th	100 x 10/100 x 8/12	=	6.67	100 x 10/100 x 7/12	=	5.83	100 x 10/100 x 7.5/12	=	6.25
6th	100 x 10/100 x 7/12	=	5.83	100 x 10/100 x 6/12	=	5.00	100 x 10/100 x 6.5/12	=	5.42
7th	100 x 10/100 x 6/12	=	5.00	100 x 10/100 x 5/12	=	4.17	100 x 10/100 x 5.5/12	=	4.58
8th	100 x 10/100 x 5/12	=	4.17	100 x 10/100 x 4/12	=	3.33	100 x 10/100 x 4.5/12	=	3.75
9th	100 x 10/100 x 4/12	=	3.33	100 x 10/100 x 3/12	=	2.50	100 x 10/100 x 3.5/12	=	2.92
10th	100 x 10/100 x 3/12	=	2.50	100 x 10/100 x 2/12	=	1.67	100 x 10/100 x 2.5/12	=	2.08
11th	100 x 10/100 x 2/12	=	1.67	100 x 10/100 x 1/12	=	0.83	100 x 10/100 x1.5/12	=	1.25
12th	100 x 10/100 x 1/12	=	0.83	100 x 10/100 x 0/12	=	0	100 x 10/100 x .5/12	=	0.42
Total			65.00			55.00			60.00

Fixed Amount of Money is withdrawn in Each Quarter

The partner may decide to withdraw fixed amount of money each quarter. For the purpose of calculation of interest on drawings, it is to be seen whether the fixed amount is withdrawn at the beginning of each quarter or at the end of each quarter or at the middle of each quarter.

Calculation of interest on drawings is to be made according to situation. The different situations are shown below :

Situation 1 : When Fixed Amount of Money is Withdrawn at the Beginning of Each Quarter

In this cas,e the interest on total drawings will be equal to interest of 7.5 months at an agreed rate per annum. The above factor of 7.5 months has been calculated as follows :

$$\text{Average Period} = \frac{(4 + 3 + 2 + 1)}{4} = \frac{10}{4} \text{ Quarter or 2.5 Quarter}$$

If it is converted into months, it will be 2.5 Quarter x 3 months = **7.5 months**.

Situation 2 : When Fixed Amount of Money is Withdrawn at the End of Each Quarter

In this case, the interest on total drawings will be equal to interest of 4.5 months at an agreed rate per annum.

The above factor of 4.5 months has been calculated as follows :

$$= \frac{[3 + 2 + 1 + 0]}{4} = \frac{6}{4} = 1 \text{ Months}$$

Situation 3 : When Fixed Amount of Money is Withdrawn at the Middle of Each Quarter

In this case, the interest on total drawings will be equal to interest of 6 months at an agreed rate per annum.

The above factor of 6 months has been calculated as follows :

$$\text{Average Period} = \frac{(3.5 + 2.5 + 1.5 + 0.5)}{4} = \frac{8}{4} \text{ Quarter or 2 Quarter}$$

If it is converted into months, it will be : 2 Quarters × 3 Months = **6 Months**.

The above matters can be explained with the help of the following example :

Let us assume that there aare three partners X, Y Z in a firm. The profit sharing ratio is 2 : 2 : 1.

During year 2013, the following amounts were withdrawn by the partners in antiticpation of profits:

X : ₹ 3,000 per quarter at the beginning of each quarter.

Y : ₹ 3,000 per quarter at the end of each quarter.

Z : ₹ 3,000 per quarter at the middle of each quarter.

The rate of interest is 10% p.a. Now applying the above rules, the interest on drawings will be as follows :

Total drawings of each partner is ₹ 12,000.

Interest on drawings of X :

$$₹\ 12{,}000 \times \frac{10}{100} \times \frac{7.5}{12} = ₹\ 750$$

Alternatively, it can be calculated as follows :

Calculation of Interest on Drawings Chargeable to X

Date of Withdrawal	Amount (₹)	Period in Months	Interest (₹)
1.1.2013	3,000	12	₹ 3,000 x $\frac{10}{100}$ x $\frac{12}{12}$ = 300
1.4.2013	3,000	9	₹ 3,000 x $\frac{10}{100}$ x $\frac{9}{12}$ = 225
1.7.2013	3,000	6	₹ 3,000 x $\frac{10}{100}$ x $\frac{6}{12}$ = 150
1.10.2013	3,000	3	₹ 3,000 x $\frac{10}{100}$ x $\frac{3}{12}$ = 75
			750

Interest on drawings of Y :

$$₹\ 12{,}000 \times \frac{10}{100} \times \frac{4.5}{12} = ₹\ 450$$

Alternatively, it can be calculated as follows :

Calculation of Interest on Drawings Chargeable to Y

Date of Withdrawal	Amount (₹)	Period in Months	Interest (₹)
31.3.2013	3,000	9	₹ 3,000 x $\frac{10}{100}$ x $\frac{9}{12}$ = 225
30.6.2013	3,000	6	₹ 3,000 x $\frac{10}{100}$ x $\frac{6}{12}$ = 150
30.9.2013	3,000	3	₹ 3,000 x $\frac{10}{100}$ x $\frac{3}{12}$ = 75
31.12.2013	3,000	0	₹ 3,000 x $\frac{10}{100}$ x $\frac{0}{12}$ = 0
			450

Interest on drawings of Z :

₹ 12,000 $\times \frac{10}{100} \times \frac{6}{12}$ = ₹ 600

Alternatively, it can be calculated as follows :

Calculation of Interest on Drawings Chargeable to Z

Date of Withdrawal	Amount (₹)	Period in Months	Interest (₹)
15.2.2013	3,000	10.5	₹ 3,000 x $\frac{10}{100}$ x $\frac{10.5}{12}$ = 262.50
15.5.2013	3,000	7.5	₹ 3,000 x $\frac{10}{100}$ x $\frac{7.5}{12}$ = 187.50
15.8.2013	3,000	4.5	₹ 3,000 x $\frac{10}{100}$ x $\frac{4.5}{12}$ = 112.50
15.11.2013	3,000	1.5	₹ 3,000 x $\frac{10}{100}$ x $\frac{1.5}{12}$ = 37.50
			600.00

Different Amount of Money is Withdrawn at Different Time

The partners may withdraw different amount of money at different time. In this case, interest on drawings can be calculated by adopting any of the following method s:

(i) Simple Method or (ii) Product method.

Simple Method : Under this method interest of each drawing is calculated separately after taking into consideration the amount, time period and rate of interest. Time period is the difference between the date of closing the books of accounts and the date of withdrawal. Total interest chargeable to partners is the sum total of interest of all withdrawals.

$$\textbf{Interest} = \textbf{Amount} \times \textbf{Rate of interest} \times \frac{\textbf{Period in months}}{\textbf{12}} \left(\textbf{or } \frac{\textbf{Period in days}}{\textbf{365}}\right)$$

Formula for calculating interest of each withdrawal :

Illustration 1

Ms B Gupta, a partner of a firm withdrew the following amount of money at different dates. Calculate the interest on drawings if the rate of interest is 10% p.a. and date of closing the books of account is 31st December, 2014.

Date	Amount withdrawn (₹)
1.2.2014	10,000
31.3.2014	12,000
31.8.2014	15,000
30.9.2014	10,000
1.11.2014	20,000

Solution

Calculation of Interest on Drawings will be as follows :

Calculation of Interest on Drawings Chargeable to Ms B Gupta

Date of Withdrawal	Amount	Period in Months	Interest (₹)
1.2.2014	10,000	11	$10{,}000 \times \frac{10}{100} \times \frac{11}{12} = 916.67$
31.3.2014	12,000	9	$10{,}000 \times \frac{10}{100} \times \frac{9}{12} = 900.00$
31.8.2014	15,000	4	$10{,}000 \times \frac{10}{100} \times \frac{4}{12} = 500.00$
30.9.2014	10,000	3	$10{,}000 \times \frac{10}{100} \times \frac{3}{12} = 250.00$
1.11.2014	20,000	2	$10{,}000 \times \frac{10}{100} \times \frac{2}{12} = 333.33$
			2,900.00

Product Method : Under this method, for each withdrawal, the amount of money is multiplied by the period in months to find out the product. The product of all withdrawals are added to get the total products. To calculate the interest, the following formula is applied :

$$\text{Interest} = \text{Sum of Products} \times \text{Rate of Interest} \times \frac{1}{12}$$

Illustration 2

Let us take the data of previous example.

Solution

Calculation of Products

Date of Withdrawal	Amount	Period in MOnths	Product (Amount x Months)
1.2.2014	10,000	11	1,10,000
31.3.2014	12,000	9	1,08,000
31.8.2014	15,000	4	60,000
30.9.2014	10,000	3	30,000
1.11.2014	20,000	2	40,000
			3,48,000

$$\text{Interest on Drawings} = ₹\ 3{,}48{,}000 \times \frac{10}{100} \times \frac{1}{12} = ₹\ 2{,}900.$$

Students should note that interest will be same under both the methods. In the examination, you can follow any of the methods unless it is mentioned in the question specifically.

For calculating interest on drawings, students should remember the following :

(i) When a partner draws a fixed sum at the beginning of each month for 12 months, interest on total drawings will be equal to interest of 6.5 months at an agreed rate per annum.

(ii) When a partner draws a fixed sum at the end of each month for 12 months, interest on total drawings will be equal to interest of 5.5 months at an agreed rate per annum.

(iii) When a partner draws a fixed sum at the middle of each month for 12 months, interest on total drawings will be equal to interest of 6 months at an agreed rate per annum.

(iv) When a partner draws a fixed sum at the beginning of each quarter for all quarters, interest on total drawings will be equal to interest of 7.5 months at an agreed rate per annum.

(v) When a partner draws a fixed sum at the end of each quarter for all quarters, interest on total drawings will be equal to 4.5 months at an agreed rate per annum.

(vi) When a partner draws a fixed sum at the middle of each quarter for all quarters, interest on total drawings will be equal to 6 months at an agreed rate per annum.
(vii) When the dates of drawings are given and the interest is to be charged at an agreed rate per annum, interest will be calculated on the basis of time.
(viii) When the dates of drawings are not given and the interest is to be charged at an agreed rate per annum, interest will be calculated for 6 months.
(ix) When the rate is given without the word 'per annum', interest will be charged without considering the time factor.

Partners' Loan Accounts

If the business is short of cash, a partner may make a temporary loan to the partnership with the intention that the amount concerned should ultimately be repaid. When a partner provides a loan to the firm, it should be credited to a separate Loan Account and should not be mixed up with the Partners' Capital Accounts. It is important to distinguish Loan and Capital Account of partners for the following reasons:

1. As per the provision of the Indian Partnership Act, partners' loan is repayable on dissolution in priority to capital.
2. In the absence of any agreement, partners are entitled to get 6% interest p.a. on loan whereas they are not entitled to interest on capital.

Loan arrangements should be evidenced by legal documents necessary to show that a loan arrangement exists between the partnership firm and individual partner(s).

Occasionally, a partner may receive money from partnership with the intention of repaying that in the future. Such a transaction may be debited to the Partners' Loan Account rather than Partners' Drawings Account. Loans payable to partners are shown as liabilities in the Balance Sheet, whereas loans receivable from partners are shown as assets in the Balance Sheet.

Interest on Partners' Loans

Generally, partners' loans carry interest at a fixed rate, as may be mentioned in the Partnership Deed. However, if the Partnership Deed is silent on this point, a partner 'is entitled to interest thereon at the rate of 6% p.a.' [Section 13(d)].

There is some difference of opinion as to whether the interest on loan should be charged to Profit and Loss Account or to Profit and Loss Appropriation Account.

It may be argued that interest on loan paid to partners is like any other operating expense of the firm and should be charged to the Profit and Loss Account but according to the provision of the Indian Partnership Act, any amount payable to a partner (except rent) should be treated as appropriation of profit and it should not be charged against profit.

We are in favour of treating interest on loan as Appropriation

When interest on Loan falls due, the following entries to be passed:

If interest is paid in cash

Profit and Loss Appropriation Account (Interest Account) Dr.
    To Cash Account

If interest is not paid in cash

Profit and Loss Appropriation Account (Interest Account) Dr.
    To Partners' Capital or Current Account

Again, here, it may be argued that interest due on loan should be credited to Loan Account and not to the Partners' Capital or Current Account because in case of dissolution of partnership, partners' loans have priority in repayment over partners' capitals. ***But in our view, outstanding interest on loan should not be added with the original loan on the following grounds:***

(i) At the time of dissolution, loan has priority over capital but no where in the Act has it been provided that the ***interest on loan*** has the same priority over capital.
(ii) There is no provision in the Act to pay ***compound interest*** on Loan.

Sharing of Profits

Generally, the Partnership Deed provides the ratio in which profits and losses of the firm should be shared by the partners. If the Partnership Deed is silent on this point, the profit should be shared ***equally***, irrespective of capital contribution.

At the time of distribution of profit, proper care should be taken in respect of the provision of the Indian Partnership Act and terms and conditions of the partnership deed.

Illustration 3

Ram, Rahim and Karim are partners in a firm. They have no agreement in respect of profit-sharing ratio, interest on capital, interest on loan advanced by partners and remuneration payable to partners. In the matter of distribution of profits they have put forward the following claims :

(i) Ram, who has contributed maximum capital demands interest on capital at 10% p.a. and share of profit in the capital ratio. But Rahim and Karim do not agree.

(ii) Rahim has devoted full time for running the business and demands salary at the rate of ₹ 500 p.m. But Ram and Karim do not agree.

(iii) Karim demands interest on loan of ₹ 2,000 advanced by him at the market rate of interest which is 12% p.a.

How shall you settle the dispute and prepare Profit and Loss Appropriation Account after transferring 10% of the divisible profit to Reserve. Net profit before taking into account any of the above claims amounted to ₹ 45,000 at the end of the first year of their business.

Solution

There is no partnership deed. Therefore, the following provisions of The Indian Partnership Act are to be applied for settling the dispute.

(i) No interest on capital is payable to any partner. Therefore, Ram is not entitled to interest on capital.
(ii) No remuneration is payable to any partner. Therefore, Rahim is not entitled to any salary.
(iii) Interset on loan is payable @ 6% p.a. Therefore, Karim is to get interest @ 6% p.a. on ₹ 2,000.
(iv) The profits should be distributed equally.

Dr. Profit and Loss Appropriation Account for the year ended . . . Cr.

Particulars	₹	Particulars	₹
To Interest on Karim Loan A/c (₹ 2,000 x 6/100)	120	By Profit and Loss A/c (Net profit)	45,000
To Reserve A/c – 10% of ₹ (45,000 – 120)	4,488		
To Share of Profit A/c : Ram : ₹ 13,464; Rahim : ₹ 13,464; Karim : ₹ 13,464	40,392		
	45,000		45,000

Illustration 4

A and B are partners sharing profits and losses in the ratio of their effective capital. They had ₹ 1,00,000 and ₹ 60,000 respectively in their Capital Accounts as on 1st January, 2014.

A introduced a further capital of ₹ 10,000 on 1st April, 2014 and another ₹ 5,000 on 1st July, 2014. On 30th September 2014 A withdrew ₹ 40,000.

On 1st July, 2014, B introduced further capital of ₹ 30,000.

The partners drew the following amounts in anticipation of profit.

A drew ₹ 1,000 per month at the end of each month beginning from January, 2014. B drew ₹ 1,000 on 30th June, and ₹ 5,000 on 30th September, 2014.

12% p.a. interest on capital is allowable and 10% p.a. interest on drawings is chargeable. Date of closing 31.12.2014.

Calculate: (a) Profit-sharing ratio; (b) Interest on capital; and (c) Interest on drawings.

Solution

(a) Calculation of Effective Capital

A	B
₹ 1,00,000 invested for 3 months ,i.e., ₹ 3,00,000 invested for 1 month.	₹ 60,000 invested for 6 months, i.e., ₹ 3,60,000 invested for 1 month.
₹ 1,10,000 invested for 3 months, i.e., ₹ 3,30,000 invested for 1 month.	₹ 90,000 invested for 6 months, i.e., ₹ 5,40,000 invested for 1 month.
₹ 1,15,000 invested for 3 months ,i.e., ₹ 3,45,000 invested for 1 month.	₹ 9,00,000
₹ 75,000 invested for 3 months, i.e., ₹ 2,25,000 invested for 1 month.	
₹ 12,00,000	**The profit- sharing ratio will be** 12 : 9 or 4 : 3

(b) Calculation of Interest on Capital

A	B
₹ 12,00,000 x 12/100 x 1/12 = ₹ 12,000	₹ 9,00,000 x 12/100 x 1/12 = ₹ 9,000

(c) Calculation of Interest on Drawings	
₹ 12,000 x 10/100 x 5.5/12 = ₹ 550	₹ 1,000 x 10/100 x 6/12 = ₹ 50 ₹ 5,000 x 10/100 x 3/12 = ₹ 125

Illustration 5

A, B and C are partners in a firm with capitals of ₹ 50,000, ₹ 40,000 and ₹ 20,000 respectively. They share profits and losses as : (i) Up to ₹ 10,000, in the ratio of 4:3:3; (ii) Above ₹ 10,000, equally.

The net profit of the firm for the year ended 31st December, 2014 amounted to ₹ 40,200 and the drawings of the partners were: A — ₹ 6,000 B — ₹ 5,000 C — ₹ 3,000.

You are required to prepare the Profit and Loss Appropriation Account for the year ended 31.12.2014 and Capital Accounts of the partners assuming: (a) partners capitals are fixed; and (b) partners' capitals are fluctuating, after considering the following adjustments:

(1) interest on partners' capitals to be paid @ 10% p.a.;
(2) interest on drawings to be charged @ 5% p.a.;
(3) A to receive salary of ₹ 5,000 p.a.; and
(4) B and C to get commission @ 10% each on the net profit.

Solution

Dr. Profit and Loss Appropriation Account for the year ended 31st December, 2014 Cr.

Particulars	₹	₹	Particulars	₹	₹
To Interest on Capital A/c			By Profit and Loss A/c — Net profit		40,200
(A—₹ 5,000; B—₹ 4,000; C—₹ 2,000)		11,000	By Interest on Drawings A/c		
To Partners' Salary A/c : A		5,000	A — 5% on ₹ 6,000 for 6 months	150	
To Commission A/c :			B — 5% on ₹ 5,000 for 6 months	125	
(B — ₹ 4,020; C — ₹ 4,020)		8,040	C — 5% on ₹ 3,000 for 6 months	75	350
To Share of Profit A/c (Note 1)					
(A—₹ 6,170; B—₹ 5,170; C—₹ 5,170)		16,510

Illustration 6

A and B are partners with capitals of ₹ 40,000 and ₹ 20,000 respectively. They share profits and losses in proportion to their capitals after charging interest on capital @ 5% and a partners' salary of ₹ 30,000 p.a. to B. From 1.1.2014, A decides to retire from the firm's full active work in the partnership and it is accordingly agreed that :

(i) B shall in future be entitled to a partnership salary of ₹ 50,000 p.a.;
(ii) Interest is to be allowed on capital @ 5% p.a.;
(iii) C, the manager of the firm, shall be introduced as a partner, without capital, as and from 1.1.2014, with a salary of ₹ 75,000 p.a. The excess of over ₹ 40,000 (his previous salary as manager) being chargeable against A.
(iv) C shall be entitled to 1/10th of the profits after charging interest on capital and partnership salary;
(v) The balance of the profit is to be divided as 3/5th to A and 2/5th to B.

The profits during the year 2014 were ₹ 2,50,000. Show Profit and Loss Appropriation Account and Partners' Capital Accounts under Fluctuating Method. Assuming that the salaries have been drawn during the year. Drawings of the partners (excluding salaries) were : A—₹ 50,000; B—₹ 30,000; and C—₹ 10,000.

Solution

Dr. Profit and Loss Appropriation Account for the year ended 31st December, 2014 Cr.

Particulars	₹	Particulars	₹
To Interest on Capital A/c : A — ₹ 2,000; B — ₹ 1,000	3,000	By Profit and Loss A/c — Net profit	2,50,000
To Partners' Salaries A/c : B — ₹ 50,000; C — ₹ 40,000 (Note 2)	90,000		
To Share of Profit A/c : (Note 1) A — ₹ 84,780; B — ₹ 56,520; C — ₹ 15,700	1,57,000		
	2,50,000		2,50,000

Dr. Partners' Capital Accounts Cr.

Date	Particulars	A	B	C	Date	Particulars	A	B	C
31.12.2014	To C Capital A/c (Note 2)	35,000	—	—	1.1.2014	By Balance b/d	40,000	20,000	—
"	To Drawings (Note 3)	50,000	80,000	85,000	31.12.2014	By Interest on Capital A/c	2,000	1,000	—
"	To Balance c/d	41,780	47,520	5,700	"	By Partners' Salaries A/c	—	50,000	40,000
					"	By Share of Profit A/c	84,780	56,520	15,700
					"	By A Capital A/c (Note 2)	—	—	35,000
		1,26,780	1,27,520	90,700			1,26,780	1,27,520	90,700

Working Note : (1) Calculation of Share of Profit	₹
C — 1/10th of ₹ (2,50,000 – 3,000 – 90,000)	15,700
A — 3/5th of ₹ (2,50,000 – 3,000 – 90,000 – 15,700)	84,780
B — 2/5th of ₹ (2,50,000 – 3,000 – 90,000 – 15,700)	56,520

(2) C will get salary of ₹ 75,000. But only ₹ 40,000 is to be charged to the partnership firm and the balance is to be adjusted against A's Capital Account.

(3) 'Drawings' of B and C includes their salaries.

Illustration 7

A and B are in partnership as general traders, sharing profits and losses equally after allowing A a salary of ₹ 40,000 p.a. On 1.1.2014, their capital account balances were : A—₹ 1,00,000; B—₹ 80,000. Their current account balances were: A—₹ 30,000 (Cr.); B—₹ 20,000 (Cr.). On 1.7.2014, they admitted C as a partner. From that date, profits were to be shared among A, B and C in the ratio of 2 : 2 : 1. C alone is to receive a salary of ₹ 30,000 p.a.

It was agreed that from 1.7.2014, A would transfer ₹ 20,000 from his Capital Account to a Loan Account on which interest would be paid at 10% p.a. C brought his private car into the firm at a valuation of ₹ 50,000.

No entries to reflect the foregoing matters were made in the books before the end of the accounting year on 31.12.2014.

The following information is available for the year ended 31.12.2014 : Sales (spread evenly throughout the year) ₹ 8,00,000; Cost of Sales ₹ 3,50,000; Rent and rates ₹ 1,00,000; Salaries ₹ 1,40,000; General expenses ₹ 60,000.

The car is to be depreciated over 4 years on the straight line basis; it is assumed it will have a nil residual balance.

Of the general expenses, ₹ 20,000 was incurred in the six months ended 30.6.2014. All sales produce a uniform rate of gross profit.

Prepare : (1) the Trading and Profit and Loss Account for the year ended 31.12.2014; (2) the Profit and Loss Appropriation Account for the year ended 31.12.2014; and (3) the Partners' Capital and Current Accounts as on 31.12.2014.

		1,00,600	69,600	23,550			1,00,600	69,600	23,550

Working Note : (1) A will get salary for half year only, which is half of ₹ 40,000, i.e., ₹ 20,000.

Illustration 8

A, B, C and D are partners in a garage comprising (i) petrol sales,(ii) repairs and servicing, and (iii) second-hand car dealing. A is responsible for petrol sales, B for repairs and servicing; and C for second-hand car dealing, while D acts purely in an advisory capacity.

The partnership agreement provides for the following :

(i) Each partner is to receive commission of the net profit of the partner's own department as under — A — 10%; B — 15% and C — 20%.

(ii) A total salary of ₹ 11,000 is payable to D which is to be allocated among the above three departments in the ratio of 3 : 4 : 4 respectively.

(iii) 50% of the net profit of each department after charging commission and salary will be distributed to A, B and C as under —

Petrol Sales	*Repairs and Servicing*	*Second-hand Car Dealing*
A, B and C — Equally	A : B : C = 2 : 2 : 1	A : B : C = 3 : 2 : 1.

(iv) The balance of the profit of the firm will be shared equally by all partners after charging interest on capital @ 10% p.a.

The net profits of the departments for the year ended 31.12.2014 were as under :

Petrol sales : ₹ 20,000; Repairs and Servicing — ₹ 40,000; Second-hand car dealing — ₹ 50,000.

The partners' capitals are :

A — ₹ 40,000; B — ₹ 30,000; C — ₹ 25,000; D — ₹ 10,000.

You are required to prepare the Profit and Loss Appropriation Account for the year ended 31.12.2014.

Solution

Dr. Profit and Loss Appropriation Account for the year ended 31st December, 2014 Cr.

Particulars	Petrol Sales	Repairs and Servicing	Second-hand Car Dealing	Particulars	Petrol Sales	Repairs and Servicing	Second-hand Car Dealing
To Partners' Commission A/c :				By Net Profit	20,000	40,000	50,000
A (10%)	2,000						
B (15%)		6,000					
C (20%)			10,000

To Interest on Capital A/c (A—₹ 4,000; B—₹ 3,000; C—₹ 2,500; D—₹ 1,000)			10,500	By Balance b/d ₹ (7,500 + 15,000 + 18,000)			40,500
To Share of Profit A/c (A—₹ 7,500; B—₹ 7,500; C—₹ 7,500; D—₹ 7,500)			30,000				
			40,500				40,500

Illustration 9

A, B and C are partners in a firm with capital contributions of ₹ 50,000, ₹ 40,000 and ₹ 30,000 respectively.

Their partnership agreement provides for the following :

(a) Interest on capitals and drawings are to be charged @ 10% p.a.;

(b) B and C are to be paid salaries @ ₹ 500 p.a.;

(c) Interest on partners' loan is to carry @ 10% p.a.;

(d) The remaining profits are to be divided —
40% to A; 30% to B; 20% to C; and 10% carried to a Reserve Account.

The net profit for the year ended 31.12.2014 was ₹ 50,000.

A withdrew ₹ 1,000 per month at the beginning of each month, B withdrew ₹ 1,000 per month at the middle of each month, and C withdrew ₹ 1,000 per month at the end of each month.

No entries had been made in the books of account to record the following :

(1) The partners commenced business on 1.1.2013 on which date A provided in addition to capital, ₹ 10,000 as loan to the firm. Interest on that loan is outstanding till 31.12.2014. This has to be paid now at compound rate of interest.

(2) The firm has made a recovery of bad debts of ₹ 18,000. The amount has already been withdrawn by the partners in their profit-sharing ratio.

You are required to prepare the Profit and Loss Appropriation Account for the year ended 31.12.2014 and the Partners' Capital Accounts.

Solution

Dr. Profit and Loss Appropriation Account for the year ended 31st December, 2014 Cr.

Particulars	₹	Particulars		₹
To Interest on Capital A/c (A — ₹ 5,000; B — ₹ 4,000; C — ₹ 3,000)	12,000	By Profit and Loss A/c (Net Profit)		50,000
To Partners' Salaries A/c (B — ₹ 6,000; C — ₹ 6,000)	12,000	By Interest on Drawings A/c :		
To Interest on Loan A/c — A (Note 1)	2,100	A — ₹ 12,000 x 10/100 x 6.5/12	650	
To Reserve A/c (Note 2)	2,570	B — ₹ 12,000 x 10/100 x 6/12	600	
To Share of Profit A/c (Note 2) (A — ₹ 10,280; B — ₹ 7,710; C — ₹ 5,140)	23,130	C — ₹ 12,000 x 10/100 x 5.5/12	550	1,800
	51,800			51,800

Dr. Partners' Capital Accounts Cr.

Date	Particulars	A	B	C	Date	Particulars	A	B	C
2014					2014				
Dec. 31	To Drawings A/c (Note 4)	20,000	18,000	16,000	Jan. 1	By Balance b/d	50,000	40,000	30,000
	To Interest on Drawings A/c	650	600	550	Dec. 31	By Interest on Capital A/c	5,000	4,000	3,000
	To Balance c/d	54,730	45,110	31,590		By Partners' Salaries A/c	—	6,000	6,000

						By Interest on Loan A/c	2,100	—	—
						By Share of Profit A/c	10,280	7,710	5,140
						By Recovery of Bad Debts A/c (Note 3)	8,000	6,000	4,000
		75,380	63,710	48,140			75,380	63,710	48,140

Working Notes :

(1) Interest for the year 2013 @ 10% p.a. on ₹ 10,000 = ₹ 1,000; Interest for the year 2014 @ 10% p.a. on ₹ 11,000 (₹ 10,000 + 1,000 outstanding interest) = ₹ 1,100. Therefore, total interest is to be paid for 2 years = ₹ (1,000 + 1,100) = ₹ 2,100.

(2) Divisible profit is ₹ 25,700 (₹ 50,000 + 1,800 – 12,000 – 12,000 – 2,100). It is to be divided as under :
A — 40% of ₹ 25,700 = ₹ 10,280; B — 30% of ₹ 25,700 = ₹ 7,710; C — 20% of ₹ 25,700 = ₹ 5,140; and transfer to reserve — 10% of ₹ 25,700 = ₹ 2,570.

(3) The profit sharing ratio is 4 : 3 : 2, on which basis the recovery of bad debts is shared, i.e., A — ₹ 8,000; B — ₹ 6,000; and C — ₹ 4,000.

(4) The drawings include recovery of bad debts.

Illustration 10

A, B and C are in partnership as general traders, sharing profits and losses equally after allowing A, a salary of ₹ 40,000 p.a.

On 1.1.2014, their account balances were :

	Capital Accounts	Current Accounts
A	1,00,000	20,000 (Cr.)
B	80,000	10,000 (Cr.)
C	75,000	5,000 (Dr.)

From 1.7.2014, A decided to retire from the firm's full active work in the partnership. It is accordingly agreed that from 1.7.2014 —

(a) A would transfer ₹ 20,000 from his Capital Account to a Loan Account on which interest would be paid @ 15% p.a.;

(b) A will not be entitled to any salary, but B and C are to receive salary of ₹ 25,000 p.a. and ₹ 15,000 p.a. respectively.

The net profit for the year ended 31.12.2014 was ₹ 1,02,000.

No entry has been made in the books in regard to the following :

(a) On 1.7.2014, C brought his private car into the firm at a valuation of ₹ 50,000. The car is to be depreciated over 4 years on the straight line basis. It is assumed that it will have a residual value of ₹ 10,000.

(b) 1/5th of the general expenses of ₹ 12,000, which have been debited in the Profit and Loss Account, is related to the next accounting period.

Partners are entitled to interest on capital @ 12% p.a. No interest is allowed or charged on current accounts or on drawings. The drawings of the partners were : A ₹ 30,800; B ₹ 20,600; C ₹ 13,000.

You are required to prepare Profit and Loss Appropriation Account for the year ended 31.12.2014. Also show their Capital and Current Accounts.

		32,400

Illustration 11

A and M are two partners sharing profits and losses in the ratio of 3 : 2 respectively. On 31.12.2013 their capital accounts stood at ₹ 55,000 and ₹ 45,000 after distribution of net profit of ₹ 15,000 and due consideration of drawings of the partners for ₹ 6,000 and ₹ 4,000 respectively. After closing the books, the following discrepancies were discovered :

(i) An item in the inventory was valued at ₹ 12,800 but had a realisable value of ₹ 8,300.

(ii) ₹ 2,400 paid for insurance premium for the year ending on 31.3.2014 had been debited to Profit and Loss Account.

(iii) Interest on capital at 5% on partners' capital as at the beginning of the year and interest on drawings of partners at 8% p.a. were left out of consideration.

Ascertain the correct net profit of the firm and redistribute the profit by preparing a Profit and Loss Appropriation Account and determine the balance of Partners' Capital Accounts.

Solution

Ascertainment of Opening Capital Balances on which Interest is to be Charged

Particulars	A	M
Capital at the end (31.12.2013)	55,000	45,000
Less: Profit of ₹ 15,000 distributed in the ratio of 3 : 2	9,000	6,000
	46,000	39,000
Add: Drawings during the period	6,000	4,000
Opening Capital of the Partners (1.1.2013)	52,000	43,000

"	To Balance c/d	52,410	43,690				
		61,650	49,850			61,650	49,850

Working Notes :

(1) Interest on Capital

A : ₹ 52,000 × 5 / 100 = ₹ 2,600.

M : ₹ 43,000 × 5 / 100 = ₹ 2,150.

(2) Interest on Drawings

A : ₹ 6,000 × 8 / 100 × 1/2 = ₹ 240*.

M : ₹ 4,000 × 8 / 100 × 1/2 = ₹ 160*.

(*Date of drawings has not been given. Therefore, it has been calculated for 1/2 year.)

Illustration 12

Weak, Able and Lazy are in partnership sharing profits and losses in the ratio of 2 : 1 : 1. It is agreed that interest on capital will be allowed @ 5 per cent per annum and interest on drawings will be charged @ 4 per cent per annum. No interest will be charged/allowed on current accounts.

The following are the particulars of the Capital, Current and Drawings Accounts of the partners:

Particulars	Weak ₹	Able ₹	Lazy ₹
Capitals (1st January 2014)	75,000	40,000	30,000
Current Accounts (1st January 2014)	10,000	5,000	(Dr.) 5,000
Drawings	15,000	10,000	10,000
Interest on Drawings (2014)	500	190	350

The draft accounts for 2014 showed a net profit of ₹ 60,000 before taking into account interest on capital and drawings and subject to following rectification of errors:

(a) Life insurance premium of Weak amounting to ₹ 750 paid by the firm on 31st December, 2014 has been charged to Miscellaneous Expenditure Account.

(b) Repairs of machinery amounting to ₹ 10,000 has been debited to Plant Account and depreciation thereon charged @ 20 per cent.

(c) Travelling expenses of ₹ 3,000 of Able for a pleasure trip to U.K. paid by the firm on 30th June 2014 has been debited to Travelling Expenses Account.

You are required to prepare the Profit and Loss Appropriation Account for the year ended 31st December, 2014 and the Partners' Current Accounts for the year.

Solution

Working Notes: (1) Ascertainment of Adjusted Net Profit

	₹	₹
Net Profit as per books of account		60,000
Add: Life insurance premium of Weak	750	
Travelling expenses of Able	3,000	
Depreciation wrongly charged (20% on ₹ 10,000)	2,000	5,750
		65,750
Less: Repairs wrongly debited to Plant		10,000
Adjusted Net Profit		55,750

(2) Ascertainment of Actual Drawings

Weak — ₹ 15,000 + ₹ 750 = ₹ 15,750; Able — ₹ 10,000 + ₹ 3,000 = ₹ 13,000; Lazy — ₹ 10,000.

(3) Ascertainment of Actual Interest on Drawings of Able

₹ 190 + 4% on ₹ 3,000 for 6 months = ₹ 190 + ₹ 60 = ₹ 250

Guarantee of Profits to or by a Partner

Sometimes, under the agreement of the partnership, one partner may be guaranteed a minimum amount of profit either by another partner or by the firm, while distributing the profits of the business. Such a guarantee is fairly common in professional firms. A useful employee may be given an offer to become a partner while at the same time being guaranteed an amount equal to the employee's existing remuneration. The guaranteed amount may include or exclude the incoming partner's interest on capital or salary. If nothing is mentioned in the question, it is usually taken to be the residual profit share that is guaranteed. We consider the above two situations.

Guarantee by the Firm

When all the partners guarantee that one of the partners should be credited with a minimum amount of profit, we are to calculate the following two figures separately (as a working note) :

(1) share of profit as per the profit sharing ratio; and (2) minimum guaranteed amount.

The higher of the above two will be credited to the partner. The balance of the profit (total profit minus profit credited to the guaranteed partner) will be shared by the remaining partners in their profit-sharing ratio.

Guarantee by one of the Partners

When one of the partners guarantees another a minimum amount of profit, the adjustment is to be done through the Partners' Capital Accounts. The following are the steps to be followed:

First, to distribute the profits among the partners in the usual profit-sharing ratio as if there is no guarantee.

Secondly, if the share of the guaranteed partner falls short of the minimum amount, the difference is to be deducted from the original share of profit of the partners giving guarantee and the same should be added with the original share of profit of the guaranteed partner.

Illustration 13

Ram and Rahim are in partnership sharing profits and losses in the ratio of 3:2. As Ram, on account of his advancing years, feels he cannot work as hard as before, the chief clerk of the firm, Ratan, is admitted as a partner with effect from 1st January, 2014, and becomes entitled to 1/10th of the net profits and nothing else, the mutual ratio between Ram and Rahim remaining unaltered.

Before becoming a partner, Ratan was getting a salary of ₹ 500 p.m. together with a commission of 4% on the net profits after deducting his salary and commission. It is provided in the partnership deed that the share of Ratan's profits as a partner in excess of the amount to which he would have been entitled if he had continued as the chief clerk, should be taken out of Ram's share of profits. The net profit for the year ended December 31, 2014, amounts to ₹ 1,10,000. Draw up the Profit and Loss Appropriation Account for the year ended December 31, 2014 showing the distribution of net profit amongst the partners.

Solution **Amount due to Ratan as a Chief Clerk**

	₹
Salary	6,000
Commission 4/104 x (₹ 1,10,000 — ₹ 6,000)	4,000
	10,000
Share of Profit as a partner (1/10th of 1,10,000)	11,000
Excess chargeable to Ram	1,000

Dr. Profit and Loss Appropriation Account for the year ended 31st December, 2014 Cr.

Particulars	₹	Particulars	₹
To Share of Profit A/c		By Profit and Loss A/c (Net profit)	1,10,000
Ram 3/5 x (₹ 1,10,000 – ₹ 10,000) less ₹ 1,000	59,000		
Rahim 2/5 x (₹ 1,10,000 – ₹ 10,000)	40,000		
Ratan 1/10 x (₹ 1,10,000)	11,000		
	1,10,000		1,10,000

Illustration 14

A and B were in partnership sharing profits and losses in the ratio 3:2. In appreciation of the service of clerk C, who was in receipt of a salary of ₹ 2,400 p.a. and a commission of 5% on the net profit after charging such salary and commission, they took him into partnership as from 1st April, 2014, giving him 1/8th share of profits.

The agreement provided that any excess over his former remuneration to which C becomes entitled will be borne by A and B in the ratio of 2:3. The profit for the year ended 31st March, 2015 amounted to ₹ 44,400.

Prepare a Profit and Loss Appropriation Account showing the distribution of profit amongst all the partners.

Solution **Statement Showing the Excess Amount Payable to C** ₹

Amount due to C as partner (1/8th of ₹ 44,400)		5,550
Amount payable as a clerk:		
Salary	2,400	
Commission 5/105 (₹ 44,400–₹ 2,400)	2,000	4,400
Excess chargeable to A and B in the ratio 2:3		1,150

A's share of excess = 2/5th of ₹ 1,150 = ₹ 460; B's share of excess of ₹ 1,150 = ₹ 690.

Dr. **Profit and Loss Appropriation Account for the year ended 31st March, 2015** **Cr.**

Particulars	₹	₹	Particulars	₹	₹
To Share of Profit A/c			By Profit and Loss A/c (Net profit)		44,400
A — 3/5th × (₹ 44,400–₹ 4,400)	24,000				
Less: Share of Excess	460	23,540			
B — 2/5th × (₹ 44,400–₹ 4,400)	16,000				
Less: Share of Excess	690	15,310			
C — ₹ 4,400 + 460 + 690		5,550			
		44,400			44,400

Illustration 15

A and B are two partners sharing profits and losses in the ratio 4 : 1. A, in addition, is entitled to a commission at a certain percentage of net profit (such commission is to be charged in arriving at the net profit).

First, ₹ 2,000 of the net profit to be ignored; Next, ₹ 2,000 of the net profit to carry 10% commission;

Next, ₹ 2,000 of the net profit to carry 15% commission; and

Next, ₹ 2,000 of the net profit to carry 20% commission.

Assuming that the profit for the year ended 31.12.2014, before computing A's commission is ₹ 7,700, prepare the Profit and Loss Appropriation Account for the period.

Solution

Commission, in this case, is payable on net profit after charging such commission. Accordingly, if 'P' is the net profit after charging commission and 'C' is the total commission payable, profit before charging commission for the firm will be 'P + C'. In this instance, P + C = ₹ 7,700.

Commission as given in the problem is at varying rates and also at different slabs of net profit.

On the first ₹ 2,000 of net profit, commission is nil. On the next ₹ 2,000 of net profit, commission @ 10% will be equal to ₹ 200.

On further ₹ 2,000 of net profit, commission @ 15% will be equal to ₹ 300.

Thus, if net profit after charging commission is ₹ 6,000, aggregate commission will be amounted to ₹ 500 and profit before charging commission is ₹ 6,500.

Total profits before charging commission = ₹ 7,700. On first 6,000 profit commission is ₹ 500. It means on first 6,500 profits (before commission), commission is ₹ 500. On the balance profit (₹ 7,700 – ₹ 6,500) = ₹ 1,200 commission is to be paid @20% after charging such commission. Therefore, commission on such profit = 20/120 x ₹ 1,200 = ₹ 200. So, total commission will be ₹ 500 + ₹ 200 = ₹ 700.

Dr. **Profit and Loss Appropriation Account for the year ended 31st December, 2014** **Cr.**

Particulars		₹	Particulars		₹
To Commission to Partners A/c — A		700	By Profit and Loss A/c (Net profit)		7,700
To Share of Profit A/c					
(A — 4/5 of ₹ 7,000; B — 1/5 of ₹ 7,000)		7,000			
		7,700			7,700

Illustration 16

Three Chartered Accountants A, B and C entered into a partnership subject to the following terms :

(a) That the profit sharing ratio among A, B and C will be 3 : 2 : 1 respectively.

(b) That the gross fees earned by A, B and C shall be equal to their average gross fees of the preceding 3 years when they were carrying on the profession individually.

(c) That C's share of profit shall not be less than ₹ 30,000 p.a.

Other information :

(i) The net profits for the first year is ₹ 1,50,000.

(ii) Average gross fees of the preceding 3 years : A — ₹ 1,20,000; B — ₹ 50,000; C — ₹ 30,000.

(iii) Actual gross fees earned during the year : A — ₹ 1,26,000; B — ₹ 32,000; C — ₹ 30,000.

You are required to prepare the Profit and Loss Appropriation Account.

Solution

In this problem, each partner gives a guarantee that fees to be earned by him during the year will not be less than average gross fees of the preceding 3 years. In case of any shortfall, his account will be charged by that amount. A and C have earned more than or equal to average gross fees of the preceding 3 years. But for B, there is a deficiency of ₹ 18,000 (₹ 50,000 – ₹ 32,000). In effect, B's account is to be debited by ₹ 18,000.

Secondly, C's share of profit shall not be less than ₹ 30,000. Therefore, first the net profit will be distributed in the agreed ratio, i.e., 3 : 2 : 1. The net profit is ₹ 1,68,000 (₹ 1,50,000 + ₹ 18,000) which will be shared by A, B and C as follows : A—₹ 84,000; B—₹ 56,000 and C—₹ 28,000. Since the share of C is less by ₹ 2,000 (₹ 30,000 – ₹ 28,000), first ₹ 30,000 is to be set aside for C, the balance will be shared by A and B in the ratio of 3 : 2.

Dr. Profit and Loss Appropriation Account for the year ended . . . Cr.

Particulars	₹	Particulars	₹
To Share of Profit A/c A — ₹ 82,800; B — ₹ 55,200; C — ₹ 30,000	1,68,000	By Profit and Loss A/c (Net Profit) By B Capital A/c (deficiency)	1,50,000 18,000
	1,68,000		1,68,000

Illustration 17

A and B are two partners in a firm with respective capital contributions of ₹ 1,92,000 and ₹ 1,08,000 respectively. On 1.1.2014, A and B offered partnerships to C and D on the following terms :

(1) C and D should introduce capital of ₹ 1,00,000 and ₹ 80,000 respectively.

(2) All partners would be entitled to interest on capital @ 10% p.a. on opening balances of the new partnership.

(3) A and B are to receive salaries @ ₹ 20,000 p.a. and @ ₹ 12,000 p.a. respectively.

(4) The minimum dues of C and D would be ₹ 20,000 p.a. and ₹ 24,000 p.a. respectively (inclusive of their interest on capitals).

(5) Profits after charging partners'salaries and interest on capitals would be shared as 3 : 3 : 2 : 2 among A, B, C and D respectively.

You are required to prepare a statement to ascertain the net income that must be earned by the new firm during the year ended 31.12.2014 so that A and B receive equal shares of profit and A receives an aggregate of ₹ 60,000 inclusive of interest on capital, salary and share of profit.

Solution Statement Showing the Net Income that must be Earned

Particulars	A (₹)	B (₹)	C (₹)	D (₹)
Interest on capital to be paid @ 10%	19,200	10,800	10,000	8,000
Salary to be paid	20,000	12,000	—	—
Share of profit to be paid	*20,800	#20,800	*10,000	*16,000
	$60,000	43,600	$20,000	$24,000

* Balancing figure; # same as A; $ as given.

Therefore, the minimum net income that should be earned = ₹ (60,000 + 43,600 + 20,000 + 24,000) = ₹ **1,47,600**.

Working Notes :

(1) Minimum amount payable to A is ₹ 60,000. Interest on capital to be paid ₹ 19,200 and salary to be paid ₹ 20,000. The balance ₹ (60,000 – 19,200 – 20,000) = ₹ 20,800 is to be paid by way of share of profit.

(2) As per terms and conditions A and B will get equal profit. Therefore, B's share of profit will be ₹ 20,800 which is equal to A's share of profit.

(3) Minimum amount payable to C is ₹ 20,000. Interest on capital to be paid ₹ 10,000. The balance (₹ 20,000 – ₹ 10,000) = ₹ 10,000 is to be paid by way of share of profit.

(4) Minimum amount payable to D is ₹ 24,000. Interest on capital to be paid ₹ 8,000. The balance (₹ 24,000 – ₹ 8,000) = ₹ 16,000 is to be paid by way of profit.

Adjustment of Partnership Net Profit of Prior Years

A partnership firm, from time to time, may discover errors made in the measurement of net income in prior accounting periods. Examples include errors in the computation of depreciation or inventory valuation, wrong distribution of divisible profits and omission of accruals of revenues and expenses. When such errors are discovered, corrections are not generally treated as part of the measurement of net income for the current accounting period. Instead, prior period adjustments are made through the partners' capital accounts by means of a single journal entry.

Illustration 18

A and B started a partnership on 1.1.2013 with resepective capital contributions of ₹ 1,20,000 and ₹ 40,000. Their Capital Account balances as on 31.12.2014 were : A—₹ 2,09,500 and B—₹ 90,500.

The transactions recorded in the Capital Accounts during these two years were interest on capital @ 10% p.a. on initial investments and allocations of incomes. On 31.12.2014, it was further discovered that drawings of ₹ 42,000 by A and ₹ 30,000 by B had been wrongly treated as business expenses. You are required to a pass a single Journal Entry to adjust the Partners' Capital Accounts correctly on 31.12.2014.

Solution

Working Notes

(1) Ascertainment of Total Profit for 2 years

Particulars	A (₹)	B (₹)
Balance of capital as on 1.1.2013	1,20,000	40,000
Add: Interest on capital for 2 years @ 10% p.a.	24,000	8,000
Add: Profit credited for 2 years (Balancing fig.)	65,500	42,500
Balance of capital on 31.12.2014	2,09,500	90,500

(2) Ascertainment of Correct Profit

Particulars	₹
Profits already credited ₹ (65,500 + 42,500)	1,08,000
Add: Drawings shown as expense ₹ (42,000 + 30,000)	72,000
Corrected profits to be shared equally	1,80,000

(3) Adjustment of Sharing of Profits

Particulars	A (₹)	B (₹)
Profits that should have been credited (Note 2)	90,000	90,000
Less: Profits that actually have been credited	65,500	42,500
Profit that should be credited further	24,500	47,500

(4) Ascertainment of Correct Capital Balances

Particulars	A (₹)	B (₹)
Balance of capital as on 31.12.2014	2,09,500	90,500
Less: Drawings previously not charged	42,000	30,000
	1,67,500	60,500
Add: Profits to be credited (Note 3)	24,500	47,500

Adjustment of Profits When a Manager is Treated as a Partner

A situation may arise when a partnership firm promotes one of its employees to partnership status, who has provided money into the partnership as a security deposit that carries interest at a specified rate. Moreover, the person may be entitled to a minimum amount of salary or a percentage of profit as bonus, before the profits are distributed to the partners. There is usually no significant change in the finances or operating routines. But, on becoming a partner, the previous employee may not be entitled to any of the benefits he has been enjoying so far. Instead, he will be entitled to a fixed percentage of profits. His security deposit will be treated as a capital contribution. If the adjustments are to be made with retrospective effect, the difference between the amount that he has received in prior years and the amount that he is entitled to as a partner will also be adjusted through the Partners' Capital Accounts by passing a single journal entry.

Illustration 19

A and B commenced business on 1.7.2012 as partners with capitals of ₹ 1,80,000 and ₹ 1,20,000 respectively. The capitals remain fixed and carry interest @ 10% p.a. Profits and losses are to be shared in proportion to their capitals.

They appointed C as their manager on 1.7.2012 at a salary of ₹ 9,600 p.a. plus a bonus of 5% of the profits after charging such bonus and interest on capital. C had to deposit on 1.7.2012 ₹ 80,000 as security carrying interest @ 12% p.a.

In June 2015, it was settled that C should be treated as a partner from the commencement of the business. It was agreed that he should be entitled to 1/5th of the profits and his security deposit would be treated as his capital carrying interest @ 10% p.a. instead of the 12% he had received.

It was further agreed that this new arrangement should not result in C's share for any of these years being less than he had already received under the original agreement and terms of his appointment.

The profits before charging C's bonus and interest on capital of partners or giving effect to the new arrangement were:

For the year ended : 2012-13 : ₹ 60,000; 2013-14 : ₹ 1,20,000; 2014-15 : ₹ 1,60,000.

Show by a single journal entry to give effect to the new arrangement with explanatory computation.

Solution

Working Notes

(1) Statement Showing Amount Due to C as Manager

Particulars	2012-13	2013-14	2014-15
Salary	9,600	9,600	9,600
Interest on security deposit (@ 12% on ₹ 80,000)	9,600	9,600	9,600
Bonus (5% of net profit after charging bonus and interest on capital) :			
2012-13 : 5/105 of ₹ [60,000 – 10% of (1,80,000 + 1,20,000)]	1,429		
2013-14 : 5/105 of ₹ [1,20,000 – 10% of (1,80,000 + 1,20,000)]		4,286	
2014-15 : 5/105 of ₹ [1,60,000 – 10% of (1,80,000 + 1,20,000)]			6,190
	20,629	23,486	25,390

(2) Statement Showing C's Share of Profits as the Partner

Particulars	2012-13	2013-14	2014-15
Net profit before C's bonus and interest on capital but after charging C's salary and interest on security deposit (as given)	60,000	1,20,000	1,60,000
Add: C's salary and interest on security deposit (added back since not payable) — ₹ (9,600 + 9,600)	19,200	19,200	19,200
Profit before interest on capital to the partners	79,200	1,39,200	1,79,200
Less: Interest on capital : 10% of ₹ (1,80,000 + 1,20,000 + 80,000)	38,000	38,000	38,000
Divisible profits	41,200	1,01,200	1,41,200
C's share of profits — 1/5th of divisible profits	8,240	20,240	28,240

(3) Statement Showing Difference in Payment to C as the Manager and as the Partner

Particulars	2012-13	2013-14	2014-15
(A) C's share as the partner :	₹	₹	₹
Interest on capital (@ 10% on ₹ 80,000)	8,000	8,000	8,000
Share of profit (Working Note 2)	8,240	20,240	28,240
Total C's share as the partner	16,240	28,240	36,240
(B) C's share as the manager (Working Note 1)	20,629	23,486	25,390
Difference in payment (being less than what he had received as the manager)	—	4,754	10,850

In 2012-13 C got as the manager more than what he was to receive as a partner. Therefore, no adjustment is required. But, in 2013-14 and 2014-15, as the manager he received less.

Therefore, the total difference he is to receive as a partner is ₹ (4,754 + 10,850) = ₹ **15,604**.

Required Journal Entry for Adjustment

Particulars		Dr. (₹)	Cr. (₹)
A Capital A/c	Dr.	9,362	
B Capital A/c	Dr.	6,242	
To C Capital A/c			15,604
(Being the difference payable to C adjusted through the Partners' Capital Accounts in the profit sharing ratio of 3 : 2)			

Illustration 20

Following is the Profit and Loss Appropriation Account of A & Co for the year ended 31.12.2014 :

Particulars	₹	₹	Particulars	₹	₹
To Interest on Capital A/c			By Profit & Loss A/c (Net Profit)		50,000
X — 6% on ₹ 50,000		3,000	By Interest on Drawings A/c		
Y — 6% on ₹ 30,000		1,800	X — 5% on ₹ 12,000	600	
To Partners' Salary A/c — X		3,600	Y — 5% on ₹ 10,000	500	1,100
To Share of Profit A/c					
X	25,620				
Y	17,080	42,700			
		51,100			51,100

The entries were duly passed in the books but the following discrepancies were subsequently discovered:

(1) Interest on capital should be charged at 5% and that on drawings at 6% p.a.;

(2) X was not entitled to any partnership salary but Y was entitled to a salary of ₹ 200 p.m. not yet drawn by him;

(3) Profits to be shared in capital ratio; and,

(4) A loan on ₹10,000 stood in books in the name of A carrying 6% interest p.a.

Pass Journal entries to set these right.

Illustration 21

A, B and C are partners in a firm of solicitors since 1.1.2012. They maintain accounts on cash basis and share profits and losses in the ratio of 5:3:2 after allowing salaries of ₹ 8,000 p.a. to A, ₹ 5,000 p.a. to B and ₹ 2,000 p.a. to C. Besides, C's share is guaranteed to a fixed minimum of ₹ 5,000 (including his salary).

In 2015, they decide to change the method of accounting to mercantile basis with retrospective effect. The relevant information is furnished below :

Year	Profit before Partners' Salaries	O/S Exp. on 31st Dec.	Accrued fees on 31st Dec.
2012	₹ 24,000	₹ 6,000	₹ 5,000
2013	₹ 28,000	₹ 5,000	₹ 8,000
2014	₹ 40,000	₹ 3,000	₹ 5,000

Pass a single-entry adjusting the partners' accounts to give effect to the above change.

Solution

Working Notes : **(1) Profit as have already been distributed under Cash Basis**

Particulars	Total (₹)	A	B	C
2012 — Profit for the year	24,000			
Less: Salaries to partners	15,000	8,000	5,000	2,000
	9,000			
Less: C's guaranteed share (₹ 5,000 – ₹ 2,000)	3,000			3,000
Balance to A and B in the ratio 5:3	6,000	3,750	2,250	
2013 — Profit for the year	28,000			
Less: Salaries to partners	15,000	8,000	5,000	2,000

Less: Accrued fees as on 1st January	—	5,000	8,000
Profits under mercantile basis	23,000	32,000	39,000

(b) Share of the above profits

Particulars	Total (₹)	A	B	C
2012 — Profit as above	23,000			
Less: Salary to partners	15,000	8,000	5,000	2,000
	8,000			
Less: C's guaranteed share (₹ 5,000 – ₹ 2,000)	3,000			3,000
Balance to A and B in the ratio 5:3	5,000	3,125	1,875	
2013 — Profit as above	32,000			
Less: Salaries to partners	15,000	8,000	5,000	2,000
Balance to the partners in the ratio of 5 : 3 : 2	17,000	8,500	5,100	3,400
2014 — Profit as above	39,000			
Less: Salary to partners	15,000	8,000	5,000	2,000
Balance to the partners in the ratio of 5 : 3 : 2	24,000	12,000	7,200	4,800
Total Profit as to be distributed		47,625	29,175	17,200

Statement Showing the Adjustments to be Made

Particulars	A	B	C
Profit to be distributed as per mercantile basis	47,625	29,175	17,200
Profit as have already been distributed	46,500	28,500	17,000
Profits to be credited	1,125	675	200

Required Journal Entry for Adjustment

Particulars		Dr.	Cr.
Accrued Fees A/c	Dr.	5,000	
To Outstanding Expenses A/c			3,000
To A Capital A/c			1,125
To B Capital A/c			675
To C Capital A/c			200
(Being the required adjustment of wrong distribution of profit)			

Illustration 22

After the accounts of a partnership have been prepared, it is discovered that for the year 2012, 2013 and 2014, interest has been credited upon Partners' Capital Accounts at 5% p.a., although no provision is made for interest in the partnership agreement. The amounts involved are :

	2012	2013	2014
X	₹ 3,250	₹ 3,500	₹ 3,600
Y	₹ 2,100	₹ 2,000	₹ 2,150
Z	₹ 900	₹ 1,100	₹ 1,100

You are required to put through an adjusting entry as on 1st January, 2015, assuming that the profits are shared in the following proportions :

Year	X	Y	Z
2012	1/2	3/10	1/5
2013	2/5	2/5	1/5
2014	3/10	2/5	3/10

You are not required to calculate compound interest on the adjustments.

Illustration 23

S, T and Q were partners sharing profits in the proportion of 3:2:1. Their capitals on 31st December, 2014, stood at ₹ 45,000, ₹ 15,000 and ₹ 15,500 respectively after adjustments of net profit of ₹ 18,000 for the year ending that date and drawings of ₹ 6,000, ₹ 4,000 and ₹ 2,000 respectively. It was discovered that while ascertaining the profits, the accountant did not take into consideration the following matters :

1. Interest @ 6% p.a. on capital as on January 1, 2014.
2. Q was entitled to a salary of ₹ 2,000 p.a. of which ₹ 490 was unpaid.
3. Till 31st December, 2013, partners were sharing profits equally. Land costing ₹ 12,000 was purchased on the date of reallocation of profit, but no entry has been passed in that respect for which each partner contributed equal capital.
4. A loan of ₹ 5,000 from T as brought-forward from 2013 carrying interest at 8% p.a. was merged into his capital on July 1, 2014. No interest on loan was, however, charged to Profit and Loss Account.

You are required to work out a Profit and Loss Adjustment Account and show the Journal Entries necessary for readjustments of Capital Accounts and the revised Capital Accounts of partners, assuming that all their dues are to be adjusted in the Capital Accounts.

				By Profit & Loss Appropriation A/c	5,219	3,131	—
				By Profit & Loss Appropriation A/c	4,978	3,122	3,000
	47,197	29,253	16,000		47,197	29,253	16,000

Balance Sheet as on 31st December, 2014

Liabilities		₹	Assets		₹
Capital Accounts :			Machinery	30,000	
A	41,197		Less : Depreciation : ₹ (2,000 + 250)	2,250	27,750
B	21,453		Furniture	6,000	
C	16,000	78,650	Less : Depreciation	600	5,400
Creditors		16,500	Closing Stock		24,000
			Debtors		20,000
			Cash		18,000
		95,150			95,150

Working Notes :

(1) At the time of calculating profits on 31.12.2013, the value of stock was taken ₹ 4,000 less. Therefore, in 2013 partners got ₹ 4,000 less profit. At the time of calculating gross profit for 2014 the value of opening stock was taken ₹ 4,000 less. So, the gross profit of 2014 was increased by ₹ 4,000. Therefore, the following adjustment entry is to be passed : (figures in ₹)

Gross Profit Account	Dr.	4,000	
To A Capital Account			2,500
To B Capital Account			1,500
(Being adjustment for under valuation of opening stock).			

(2) C's salary of ₹ 6,000 is to be charged as follows :
(i) Profit and Loss Account for the period 1.1.2014 to 30.6.2014 ₹ 3,000
(ii) B's Capital Account ₹ 3,000.

(3) Profit for the period 1.7.2014 to 31.12.2014 is ₹ 11,100 which will be shared by A, B and C in the new ratio of 15 : 9 : 8 (See Note 4). However, C's share of profit for this period must not be less than ₹ 3,000 (1/2 of ₹ 6,000 p.a.). Any shortfall to be charged to A.

Particulars	A	B	C
Share of Profit (15 : 9 : 8)	5,203	3,122	2,775
Adjustment for Guarantee	– 225	—	+ 225
	4,978	3,122	3,000

(4) Calculation of new profit sharing ratio : 1 – 1/4 = 3/4. A will get 5/8 of 3/4, i.e., 15/32; B will get 3/8 of 3/4 = 9/32 and C will get 1/4 or 8/32. Therefore, new ratio = 15 : 9 : 8.

(5) C's Suspense Account of ₹ 17,000 represents ₹ 13,000 capital and ₹ 4,000 premium for goodwill.
Premium for goodwill brought in by C will be shared by A and B in the sacrificing ratio of 5 : 3.

Illustration 25

A, B and C are partners in X & Co., boot dealers. The firm controls three shops, and each partner undertakes the management of one of these. C, in addition, manages a repair department.

The profits of each department are subject to a charge for interest at 7.5% p.a. on loan and partners' capital employed. The profits of the repair department are, in addition, chargeable with a salary of ₹ 4,000 p.a. in favour of C.

The profits, subject to interest and salary as stated, are apportionable thus —

Repair department : allocable to shops in proportion of their respective shares in the turnover of this department.

Shop : including transfer from repair department, 90% to individual partners taking control of each respectively. 10% to a general pool.

General pool : A — 1/2, B — 1/3 and C — 1/6.

For the year 2014, repairs department shows profits, prior to charge for interest and salary of ₹ 8,250. Turnover of this department with shops has been A — ₹ 55,000, B — ₹ 30,000, C — ₹ 15,000. For the same period, profits of shops prior to charge for interest are : A — ₹ 64,000, B — ₹ 56,050 and C — ₹ 42,000.

Interest has been paid on loans of ₹ 1,00,000 and partners are entitled to interest on their capital : A—₹ 1,00,000; B—₹ 70,000; C—₹ 50,000. Loan and Partners' Capital employed by A—shop—₹ 1,40,000; B—shop—₹ 90,000; C—shop—₹ 60,000; and repair department—₹ 30,000.

Prepare, for the year 2014, accounts showing allocation of interests and appropriation of profits.

Illustration 26

X, Y and Z are partners, managing the business at Chennai, Bangalore and Ooty branches respectively. The terms of agreement are :

1. A sum of ₹ 600 p.m. to be charged against the branch profits as salary to the managing partner.
2. The profits and losses, after charge of salary, are to be shared in the following manner :
   (a) The managing partner of each branch has to be paid 50% of the additional profits in excess of 20% return on average capital employed at the branch; and
   (b) The balance of the profits to be pooled for division in the ratio 4:3:3.
3. Interest on capital to be charged @ 8% p.a. and on Current Account (including overdrawals) @ 6% p.a.—both on the opening balances.

The following information made available for the year 2014, to enable you to prepare the statement of distribution of profits among the partners:

(a) Drawings in addition to salary from the respective branches : X—₹ 15,000; Y—Nil; Z—₹ 22,000.

(b) Balance on Capital and Current Accounts at the beginning of the year were :
Capital Accounts : X—₹ 90,000; Y—₹ 84,000; Z—₹ 48,000
Current Accounts : X—₹ 12,000 (Dr.); Y—₹ 7,500 (Cr.); Z—₹ 5,000 (Dr.)

4. Assets and Liabilities at the close of the year at the branches were :

	Chennai (₹)	Bangalore (₹))	Ooty (₹)
Fixed Assets	30,000	48,000	36,000
Stock	25,000	18,000	15,000
Sundry Debtors	48,000	36,000	32,000
Cash and Bank	2,000	1,800	2,200
Sundry Creditors	18,000	12,000	10,000
Outstanding Expenses	1,800	1,200	1,000

5. During the year, fixed assets remain constant; current assets increased by 20% and Current Liabilities by 10%.

Solution **Statement of Profit for the year 2014**

Particulars		Chennai	Bangalore	Ooty

Key Points

- In India partnership is governed by The Indian Partnership Act, 1932. Section 4 of this Act defines partnership as ***'the relationship between persons who have agreed to share the profit of a business carried on by all or any of them acting for all'.***
- A partner, who has not attained the age of maturity is called a minor partner. A minor partner can be admitted only into the benefits of the partnership but is not personally liable, like other partners, for any debts of the firm.
- A partner who is entitled to the profits of the business without making himself responsible for losses, is called a ***partner in profits*** only.
- As per the provision of Section 69 of the Indian Partnership Act, non-registration of a partnership gives rise to a number of disabilities, such as:
  (i) No partner can bring a suit in any court against the firm or his co-partners.
  (ii) The firm cannot file a suit against third party for breach of contract, and like matters.
- Any amount payable to a partner (except rent), such as interest on capital, interest on loan, salaries, commission, etc., should be treated as appropriation and it should not be charged against profit.
- Interest on capital is chargeable to a firm to the extent of available profit only, since interest on capital is an appropriation of profits.

THEORETICAL QUESTIONS

1. In the absence of any agreement, how are the following dealt with in the books of account of a partnership firm: (a) Salaries to the partners; (b) Interest on capital to the partners; (c) Commission to the partners; (d) Interest on loan to the partners; and (e) Interest on drawings of the partners.
2. Distinguish between 'Fixed Capitals' and 'Fluctuating Capitals'.
3. Why are Partners' Current Accounts opened, when there are Capital Accounts of the partners?
4. How is interest on capital calculated when there are several introductions and withdrawals of capital at equal and unequal intervals?
5. How is interest on drawings calculated when there are several drawings of money at equal or unequal intervals?
6. How would you adjust the capital accounts of the partners, when the share of profit of a partner is guaranteed (a) by the firm and (b) by another partner?

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each statement or answer each question below.

1. A partner's private petrol bills have been treated as part of the partnership vehicle expenses. Which of the following entries is necessary to correct the error :

	Debit	Credit
A	drawings account	motor vehicle expenses account
B	motor vehicle expenses account	drawings account
C	motor vehicle expenses account	capital account
D	capital account	motor vehicle expenses account

2. What double entry is necessary to reflect interest earned on fixed partners' capital account balances ?

A	partners' current accounts	profit and loss appropriation account
B	profit and loss appropriation account	partners' current accounts
C	profit and loss appropriation account	cash account
D	profit and loss appropriation account	partners' capital accounts

3. What double entry is necessary to reflect interest payable on partners' drawings ?

A	partners' drawings accounts	partners' current accounts
B	profit and loss appropriation account	partners' drawings accounts
C	partners' drawings accounts	interest payable account
D	partners' current accounts	profit and loss appropriation account

4. Which of the following is not incorporated in the Partnership Act ?
   A profit and loss are to be shared equally
   B no interest is to be charged on capital
   C all loans are to be charged interest @ 6% p.a.
   D all drawings are to be charged interest
5. When is the Partnership Act enforced ?
   A when there is no partnership deed
   B where there is a partnership deed but there are differences of opinion between the partners
   C when capital contribution by the partners varies
   D when the partner's salary and interest on capital are not incorporated in the partnership deed
6. Which one of the following items cannot be recorded in the appropriation account ?
   A interest on capital
   B interest on drawings
   C rent paid to partners
   D partner's salary
7. How should interest charged on partners' drawings be dealt with in partnership final accounts ?
   A credited as income in profit and loss account
   B deducted from profit in allocating the profit among the partners
   C added to profit in allocating the profit among the partners
   D debited as an expense in the profit and loss account
8. Which of the following statement is true ?
   A a minor cannot be admitted as a partner
   B a minor can be admitted as a partner, only into the benefits of the partnership
   C a minor can be admitted as a partner but his rights and liabilities are same of adult partner
   D none of the above
9. Non-registration of a partnership gives rise to a number of disabilities such as :
   (i) no partner can bring a suit in any court against the firm or his co-partners.
   (ii) the firm cannot file a suit against third party for breach of contract.
   Which of the above statement(s) is / are true ?
   A (i) only
   B (ii) only
   C both (i) and (ii)
   D neither (i) nor (ii)
10. In the absence of partnership deed, interest on partners' loan is payable by the firm @
   A 12% p.a.
   B 6% p.a.
   C 10% p.a.
   D 16% p.a.
11. Ostensible partners are those who
   A do not contribute any capital but get some share of profit for lending their name to the business
   B contribute very less capital but get equal profit
   C do not contribute any capital and without having any interest in the business, lend their name to the business
   D contribute maximum capital of the business
12. Sleeping partners are those who
   A take active part in the conduct of the business but provide no capital. However, salary is paid to them.
   B do not take any part in the conduct of the business but provide capital and share profits and losses in the agreed ratio
   C take active part in the conduct of the business but provide no capital. However, share profits and losses in the agreed ratio.
   D do not take any part in the conduct of the business and contribute no capital. However, share profits and losses in the agreed ratio.

PRACTICAL QUESTIONS

1. X and Y started a business on 1st January, 2014 by contributing ₹ 50,000 and ₹ 25,000 respectively as capitals. On 1st April, 2014, X made an advance to the firm to the tune of ₹ 20,000. Y alone was looking after the business of the firm. During the year ended on 31st December, 2014, they earned a net profit of ₹ 40,900. There was no partnership agreement — oral or written. At the time of distribution of profit

   X claims:

   (i) Interest to be given on capital and loan @ 12% p.a.; and (ii) The profit should be distributed in the capital ratio.

   Y claims:

   (i) Salary @ ₹ 1,000 p.m. for his service; and (ii) Interest on capital and loan should be given @ 8% p.a. only.

   You are required to prepare a Profit and Loss Appropriation Account as per the provisions of the Indian Partnership Act.

2. On 1st January, 2014, A, B and C enter into partnership contributing ₹ 2,50,000, ₹ 1,30,000 and ₹ 1,20,000 respectively and sharing profits and losses in the ratio of 5 : 3 : 2. B and C are entitled to a salary of ₹ 16,000 and ₹ 14,500 respectively per year. Interest on capital is allowed at 5% p.a. 6% interest is charged on drawings.

   During the year, A withdrew ₹ 40,000, B ₹ 25,000 and C ₹ 15,000.

   Interest being : A — ₹ 2,250; B — ₹ 1,125; and C — ₹ 725. Profit in 2014 before the above mentioned adjustments was ₹ 71,400.

   Show how the profit is distributed and also prepare the Capital Accounts, if they were fluctuating.

3. P and Q share profits and losses equally, but by agreement, Q, out of his share, pays P a salary of ₹ 500 p.m. The accounts at 31.12.2014, show the following results:

   Capital: P—₹ 38,430; Q—₹ 41,790

   Net profit before charging interest on capital amount to ₹ 23,505.

   Drawings: P—₹ 7,500; Q—₹ 10,500

   Paid by Q to P in cash privately on account of salary of ₹ 2,000. After charging 5% interest on capital (ignoring interest on drawings and salary), write up the Capital Account of each partner as at the end of the year.

4. From the following information, prepare:

   1. The Profit and Loss Appropriation Account of P, Q and R for the year ended 31.12.2014.
   2. The Capital and Current Accounts of the partners.

Partners	Capital (1.1.2014)	Current (1.1.2014)	Drawings (31.12.2014)
P	₹ 6,000	₹ 2,000 (Cr.)	₹ 4,000
Q	₹ 10,000	₹ 1,000 (Cr.)	₹ 4,800
R	₹ 16,000	₹ 1,000 (Cr.)	₹ 4,800

   (i) Interest is credited @ 6% p.a. on capital and is charged on drawings at the same rate. Interest is neither credited nor charged on the balances of current accounts.

   (ii) Each partner took at the end of each quarter 25% of his drawings.

   (iii) P and Q were to be credited with salaries of ₹ 2,400 and ₹ 1,600 p.a. respectively.

   (iv) On 1.7.2014, P paid in an additional ₹ 2,000 as capital and R withdrew ₹ 2,000 from capital.

   (v) The net profit before charging interest on capital and partners' salaries and before interest on drawings had been credited was ₹ 19,600.

   (vi) Profits and losses were shared among P, Q and R in the ratio of 5 : 4 : 3 respectively.

5. A, B and C start business in partnership. A puts in ₹ 20,000 for the whole year, B puts in ₹ 30,000 at first and increases it to ₹ 40,000 at the end of four months but withdraws ₹ 20,000 at the end of six months. C puts in ₹ 40,000 at first and then withdraws ₹ 20,000 after the end of 8 months. The profit for the period can be assumed to be ₹ 60,000.

   Show the Profit and Loss Appropriation Account, distributing the same on the basis of effective capital employed (interest on capital basis).

6. Sanatan and Narayan are partners in a firm sharing profits and losses as Sanatan—4/5th and Narayan—1/5th. On 1st April 2014, the capital of the partners were: Sanatan—₹ 50,000 and Narayan—₹ 40,000. The Profit and Loss Account of the firm for the year ended 31st March, 2015 showed a net profit of ₹ 1,75,000.

   You are required to give the Profit and Loss Appropriation Account of the firm after taking into consideration the following adjustments :

   (i) interest on capital at 5% p.a.;

   (ii) interest on Narayan Loan Account of ₹ 50,000 for the whole year;

(iii) interest on drawings of partners at 6% p.a.; the drawings were: Sanatan—₹ 15,000 and Narayan—₹ 10,000; and

(iv) transfer 10% of the net profit, before distribution to the Reserve Fund of the firm.

7. On January 1, 2014, John and Robert commenced business as partners with an initial capital of ₹ 20,000 and ₹ 30,000 in their respective accounts. The partnership deed provided, ***inter-alia,*** that :

(1) Profit and Losses shall be shared in the ratio 2:3 as between John and Robert;

(2) Partners shall be entitled to interest on capital at the commencement of each year at 6% p.a.; and

(3) Interest on drawings shall be charged at 8% p.a.

During the year ended 31.12.2014, the firm made a profit of ₹ 19,280 before adjustment of interest on Capital and Drawings. The partners withdrew during the year ₹ 3,000 each at the end of every quarter commencing from 31.3.2014.

You are required to open a Profit and Loss Appropriation Account and show the entries for interest and distribution of profit. Show also the Capital Accounts of partners for the year.

8. A, B and C are partners in a firm. The terms are:

(a) Profits and Losses to be shared by A, B and C as 6 : 3 : 1; (b) Interest on Capital at 6% p.a.; (c) Interest on opening Current Account balance 5% p.a.; and, (d) 5% interest is to be charged on the excess of drawings (excluding salary) over share of profit as such and the converse. Share of profit for this clause means share in balance profit after deducting partnership salary, interest on Capital and Current Accounts. Interest on Drawings under this clause is to be ignored for the purpose. (e) B and C to get salary @ ₹ 600 and ₹ 800 p.a. respectively.

The following facts are available :

Partners	Fixed Capital (31.12.2013)	Current A/c (31.12.2013)	Drawings 2014 (including salary)
A	₹ 9,000	₹ 2,000 (Cr.)	₹ 4,000
B	₹ 6,000	₹ 1,000 (Dr.)	₹ 3,100
C	₹ 3,000	₹ 1,200 (Cr.)	₹ 2,300

D, the manager, is to be admitted as a partner on 31.12.2014. The draft account for 2014 (before providing for partnership salary, interest, etc.) discloses profits of ₹ 12,590. Bonus of ₹ 1,000 is to be provided for D.

Prepare Profit and Loss Appropriation Account for the year ended 31.12.2014.

9. Ripa, Rini and Rima are three partners in a firm. According to the partnership deed, the partners are entitled to draw ₹ 700 per month. On the first day of every month Ripa, Rini and Rima drew ₹ 700, ₹ 600 and ₹ 500 respectively. Interest on capitals and interest on drawings are fixed at 8% and 10% respectively. Profit during the year 2014 was ₹ 75,500 out of which ₹ 20,000 is to be transferred to General Reserve. Rini and Rima are entitled to receive salary of ₹ 3,000 and ₹ 4,500 p.a. respectively and Ripa is entitled to receive commission at 10% on net distributable profit after charging such commission. On 1st January, 2014, the balances of their Capital Accounts were ₹ 50,000, ₹ 40,000 and ₹ 35,000 respectively.

You are required to show Profit and Loss Appropriation Account for the year ended 31st December, 2014, and Capital Accounts of partners in the books of the firm.

10. A, B and C were in partnership. A and B sharing profits in the proportion of three to one, and C receiving a Salary of ₹ 25,000 plus 5% of the profit after charging his salary and his 5% of the profit, or 1/7th of the profit of the firm whichever is the larger. Any excess of the latter over the former is, under the partnership agreement, to be charged to A.

The profit for the year ended 31st December, 2014 was ₹ 2,87,000, after charging interest on capital and C's salary.

You are required to show the distribution of the profit among the partners.

11. A, B and C are partners sharing profits and losses in proportion to their capitals at the beginning of the year. They are entitled annually to draw ₹ 6,000, ₹ 5,000 and ₹ 4,000 respectively out of their anticipated shares of profits. Any drawings in excess of these amounts are to be regarded as advances taken from the firm and are to be subject to interest at an average rate of 6% p.a. The capitals as at the beginning of the year are to be allowed interest at an average rate of 5% p.a.

The capitals of the partners as at the beginning of the year were : A — ₹ 80,000; B — ₹ 60,000 and C — ₹ 40,000. The credit balances of their Current Accounts were : A — ₹ 2,304; B — ₹ 3,728 and C — ₹ 1,152. Their drawings during the year were : A — ₹ 10,000; B — ₹ 12,000 and C — ₹ 5,000. The profit for the year were ₹ 30,096 before making any adjustment for interest as above.

Draw up the Capital and Current Accounts of the partners.

12. X and Y were partners with ₹ 20,000 as capital, contributed equally. They shared profits as follows:

    Salary to X ₹ 1,000 p.a. and Salary to Y ₹ 1,000 p.a. Remaining profits were shared equally. Due to certain circumstances, it became essential to make changes in the shares of X and Y, which were as follows: Salary to X ₹ 500 p.a. and Salary to Y ₹ 1,000 p.a. Remaining profits equally.

    The above new change was applicable subject to Z being introduced on 1st January, 2014 as a partner (without capital) at a salary of ₹ 1,500 and one-seventh share in the profits and losses of the firm (after charging interest on capital and all salaries) all of which was to be charged to X with the exception of ₹ 1,000, the amount of salary, Z had formerly received as manager of the firm. X and Y are entitled to interest on capital at 5% p.a. The profit for the year ended 31st December,2014, before charging interest on capital or partners' salary was ₹ 2,740.

    Prepare Profit And Loss Appropriation Account.

13. A, B and C are in partnership. Their partnership deed provides that :

    (i) Interest on capital is to be provided @ 5% p.a.

    (ii) Interest on drawings is to be charged @ 10% p.a.

    (iii) Each partner is entitled to salary for their duty in the firm @ ₹ 4,000 p.a.

    (iv) A is to receive commission of 10% on the net profit before charging the above provisions.

    (v) B is to receive commission of 10% on the net profit after charging such commission and above provisions.

    (vi) 25% of the net profit after charging all the above provisions to be transferred to reserve.

    (vii) First net distributable profit of ₹ 40,000 to be apportioned in the ratio of 5 : 4 : 1 and the balance to be shared equally.

    The opening balances as on 1.1.2014 were as follows :

    (a) Capital Accounts — A : ₹ 1,00,000; B : ₹ 60,000 and C : ₹ 40,000

    (b) Current Accounts — A : ₹ 20,000 (Cr.); B : ₹ 5,000 (Cr.) and C : ₹ 6,000 (Dr.)

    (c) Loan Account — ₹ 50,000 (Interest on loan provided in the Profit and Loss Account).

    You are required to prepare : Profit and Loss Appropriation Account and Partners' Current Accounts.

14. A, B and C formed a partnership business, in the year 2013. They did not have any Partnreship Deed. From the year 2014, they agreed upon the following :

    (a) Partners will share profits or losses equally.

    (b) Partners will get interest on capital @ 6% p.a.

    (c) 'A' will get salary @ ₹ 1,000 p.m.

    A, B and C started the business contributing capital ₹ 10,000, ₹ 15,000 and ₹ 20,000 respectively. They did not maintain any proper books of accounts. Only the records of assets and liabilities to outsiders were maintained by them. The assets and outside liabilities were as follows :

	31.12.2013 (₹)	31.12.2014 (₹)
Sundry Creditors	35,000	20,000
Furniture and Fixtures	50,000	50,000
Stock	30,000	45,000
Sundry Debtors	25,000	30,000
Cash-in-hand and at bank	20,000	25,000

    They decided to prepare accounts as per Partnership Deed and charge depreciation on Furniture and fixtures @ 10% p.a. on straight line basis withb effect from 2013.

    Show Profit and Loss Appropriation Account and Partners' Capital Account for 2013 and 2014.

15. A and B are partners in a firm sharing profits and losses in the ratio of 3 : 2 with capital of ₹ 1,20,000 and ₹ 40,000 respectively. The amount of capital carries interest @ 5% p.a. They admit C into partnership w.e.f. 1.10.2014 on the following conditions :

    (i) That C is to bring in ₹ 15,000 as premium for goodwill, which will be withdrawn by A and B in their old profit sharing ratio.

    (ii) That C is to contribute ₹ 22,400 to the firm as his share of capital.

    (iii) That the partners' capitals will carry interest @ 5% p.a.

    (iv) That the profit earned during 2014 will be apportioned between the pre-admission and post-admission period on the basis of turnover.

    (v) That the profit sharing ratio between B and C will be the same as A and B.

    The profit for the year ending 31.12.2014 before charging interest on partners' capitals amounted to ₹ 66,500. The monthly average of turnover during the first nine months of the calendar year was twice the corresponding figure for the remaining three months. You are required to prepare Profit and Loss Appropriate Account for the pre and post admission periods.

16. A, B and C are partners in a firm. Following are their summarised capital accounts :

Date	Particulars	A	B	C	Date	Particulars	A	B	C
31.12.2014	To Drawings A/c	12,000	12,000	12,000	1.1.2014	By Balance b/d	20,000	30,000	40,000
	To Balance c/d	23,000	33,000	43,000	31.12.2014	By Sh. of Profit A/c	15,000	15,000	15,000
		35,000	45,000	55,000			35,000	45,000	55,000

On 1.1.2015, it is agreed that the following would be effective retrospectively from 1.1.2014:

(1) A shall be entitled to a salary of ₹ 750 p.m.

(2) Interest shall be allowed on partners' capital at 5% on the opening balances.

(3) Profits shall be shared in proportion to opening balance in capital accounts.

(4) C's share of profit exclusive of interest on capital shall not fall below ₹ 15,000, the deficit, if any, being contributed by A out of his share.

You are required to show by a single journal entry to give effect to the above arrangement.

17. A, B, C and D are partners in a firm. Their capital accounts stood at ₹ 60,000; ₹ 30,000; ₹ 30,000 and ₹ 20,000 respectively on 1.1.2014. They share profits and losses in the proportion of 5 : 3 : 2 : 2. D's share of profit (excluding interest on capital) is guaranteed by the firm to be not less than ₹ 16,000 p.a. C's share of profit (including interest on capital and salary) is guaranteed by A at a minimum of ₹ 26,000 p.a.

The profit for the year ended 31.12.2014 amounted to ₹ 91,000 before considering interest on capital @ 5% p.a. and salary to C @ ₹ 1,000 p.m. Prepare the Profit and Loss Appropriation Account for the year ended 31.12.2014.

18. A, B and C were partners. On 1.4.2014, they admitted, their manager, D as a partner. Profits and losses in the new partnership were to be shared in the ratio of 4 : 3 : 2 : 1 respectively. In addition, C is to get a salary of ₹ 600 p.m.

D had previously been paid a salary of ₹ 1,000 p.m. and a commission of 3% of the profits, after charging his salary and commission but before charging out partners' salary. It was agreed that for the first year of the new partnership, any excess of his share of profit over the sum he would have earned had he remained as manager increased by ₹ 700, should be charged to A's share of profits.

On considering the draft accounts for the year ended 31.3.2015, the partners agreed to the following adjustments:

(a) to provide a staff bonus of ₹ 5,500;

(b) that A's son E, an employee of the business, should receive an additional bonus of ₹ 250 chargeable against his father's share of profit;

(c) that ₹ 500 of B's share of profits should be credited to C.

The profits for the year ended 31.3.2015, before making the above adjustments and before charging C's salary amounted to ₹ 32,000.

You are required to prepare a statement showing the division of profits among the partners.

19. The partnership accounts of A and B, sharing profits in the ratio of 3 : 2, were maintained on cash basis right from its formation. Now, the partners decided for change into mercantile basis with retrospective effect. Following details are given in this respect (all in ₹). Pass the required journal entry.

	2012	2013	2014
Rent outstanding	5,000	4,000	6,000
Salaries paid in advance	3,000	2,000	4,000
Prepaid insurance premium	3,500	2,500	—
Outstanding insurance premium	—	—	2,000

20. A and B had been in partnership for many years as architects, sharing profits equally. It had been their custom to ignore fees, etc., earned on uncompleted matters when preparing annual accounts. On 1.1.2014, they entered into a new partnership agreement under which the profits earned in any year were to be distributed as follows :

Upto ₹ 12,000 — equally; Excess over ₹ 12,000 — 1/3rd to A and 2/3rd to B.

Although they shared profits in accordance with the new agreement, they continued to prepare their accounts upon the old basis, i.e., ignoring fees earned on uncompleted work. At the end of 2015, it was pointed out to them that they were not following the terms of their agreement, and it was agreed that such correcting entries as might be necessary, should be put through as on 31.12.2014.

The profits already dealt with were : 2012 — ₹ 11,500; 2013 — ₹ 12,210; 2014 — ₹ 13,350.

The outstanding fees not brought into account on 31st December each year were :

2011 — ₹ 960; 2012 — ₹ 1,280; 2013 — ₹ 1,550; 2014 — ₹ 920.

Assuming that the books were duly closed at the end of each year, give the entries necessary to correct the Partners' Accounts.

21. A, B and C are partners in a firm with Head Office in Kolkata and Branches in Mumbai and Chennai. They share profits and losses in the ratio of 5:3:2. B and C (respectively managing Mumbai and Chennai Branches) are also entitled to a fixed salary of ₹ 5,000 p.a. and to a commission equal to 30% of profit of their respective branches after deducting therefrom the aforesaid salary and an amount equal to 10% of the average capital employed in the branch. Interest on capital is to be allowed at 5% p.a. Besides, if the share of C (including salary, interest and commission), is less than ₹ 30,000, the shortfall is to be borne by A.

    From the following information, prepare the Profit and Loss Appropriation Account for the year ended 31.12.2014:

    (a) Capital: A — ₹ 2,00,000; B — ₹ 80,000; C — ₹ 60,000. Drawings: A — ₹ 30,000; B — ₹ 17,500; C — ₹ 14,000.

    (b) Assets as on 31.12.2014 : Kolkata — ₹ 2,35,900; Mumbai — ₹ 93,800; Chennai — ₹ 72,100.
    Liabilities as on 31.12.2014 : Kolkata — ₹ 21,400; Mumbai — ₹ 12,200; Chennai — ₹ 8,500.

    (c) Profit for the year ended 31.12.2014 without adjustments:
    Kolkata — ₹ 63,350; Mumbai — ₹ 31,900; Chennai — ₹ 27,600.

    It is ascertained that the net assets of Mumbai and Chennai branches have registered an increase of ₹ 5,200 and ₹ 3,200 respectively as compared to the beginning of the year.

Change in the Profit-sharing Ratio

Introduction

From time to time it may be necessary to change the profit-sharing ratios of the partners. A partner's share of profit may be increased because he has considerably increased his capital in relation to the other partner(s), or because he takes on a much more active role in running the partnership business. The share of a partner may be decreased if he withdraws capital or spends less time in the business. When there is a change in the profit-sharing ratio, the agreement of all the partners are needed and the guidance of the partnership deed should be followed. A change in the profit-sharing ratio between the partners is a change in the constitution of partnership. In effect, the old partnership is dissolved and a new partnership is formed, though the books of account are maintained in the usual manner. When a change in the profit-sharing ratio takes place in a partnership firm, one (or more) partner(s) purchases an interest in the business from another partner(s). Therefore, the aggregate amount of gain by one or more partner(s) is equal to the aggregate amount of sacrifices made by the other partner(s).

The required adjustments in regard to change in the share of profit, revaluation of assets and liabilities, treatment of goodwill or reserves or joint life policy or partners' capitals are same as what we have done in case of admission or retirement or death of a partner. The account of a partner will be ***debited*** when he makes a ***gain*** in his share of profit. Conversely, his account will be ***credited*** when he makes a ***sacrifice***.

Adjustments For Change in the Profit-Sharing Ratio

When there is a change in the profit-sharing ratio, different adjustments are required in respect of the following:

1. Change in the Share of Profit
2. Goodwill
3. Revaluation of Assets and Liabilities
4. Reserves or Accumulated Losses
5. Joint Life Policy
6. Partners' Capital

Change In the Share of Profit

A change in the profit-sharing ratio results in a new partnership, although daily operations of the firm currently are not affected. One or more partners may be entitled to an additional share of future profits. At the same time, the combined shares of the remaining partners will be reduced by the same proportion.

Illustration 1

A, B and C are partners sharing profits and losses in the ratio of 3 : 2 : 1. They have decided to change the profit sharing ratio to 2 : 2 : 1. Calculate the sacrifice / gain made by each partner.

Solution **Statement Showing Sacrifice / Gain made by each Partner**

Particulars	Old Ratio	New Ratio	Sacrifice / Gain
A	3/6	2/5	3/6 – 2/5 = 3/30 (Sacrifice)
B	2/6	2/5	2/6 – 2/5 = 2/30 (Gain)
C	1/6	1/5	1/6 – 1/5 = 1/30 (Gain)

Illustration 2

A, B and C are partners sharing profits and losses in the ratio of 4 : 3 : 3. They have decided to change the profit sharing ratio. A surrendered 1/4th of his share and B surrendered 1/3rd of his share in favour of C. Calculate the new profit-sharing ratio.

Solution **Calculation of New Profit Sharing Ratio**

Particulars	Old Ratio	New Ratio	New Profit Sharing Ratio
A	4/10	4/10 – (1/4 of 4/10) = 4/10 – 1/10 = 3/10	A : B : C
B	3/10	3/10 – (1/3 of 3/10) = 3/10 – 1/10 = 2/10	= 3/10 : 2/10 : 5/10
C	3/10	3/10 + 1/10 + 1/10 = 5/10	= 3 : 2 : 5

Treatment of Goodwill

When there is a change in the profit sharing ratio, an adjustment is necessary in respect of goodwill. The goodwill can be treated in the books of account in any of the following manner :

Case 1 : Goodwill is raised in the books of the firm at full value but it is written-off immediately

In this case, goodwill is raised by crediting all the partners in the old ratio and written-off in the new ratio. The following entries are passed :

(i) ***For raising goodwill***

Goodwill Account	Dr.	[Full value]
To All Partners' Capital Accounts		[Old ratio]

(ii) ***For writing-off goodwill***

All Partners' Capital Accounts	Dr.	[New ratio]
To Goodwill Account		[Full value]

Case 2 : Adjustment is to be made without opening Goodwill Account

In this case, the adjustment for goodwill is to be made through the partners' capital accounts. The account of a partner will be debited if he makes a gain in his right of goodwill. Conversely, his account will be credited when he makes a sacrifice in his right of goodwill. The entry will be :

(Gaining) Partners' Capital Account	Dr.
To (Sacrificing) Partners' Capital Account	

Illustration 3

A, B and C are partners sharing profits and losses in the ratio of 3 : 2 :1. They have decided to change the profit-sharing ratio to 2 : 2 : 1

The goodwill of the firm is valued at ₹ 12,000.

Pass Journal Entries under the following cases when :

(a) adjustment is to be made without opening Goodwill Account

(b) when goodwill is raised in the books of the firm at full value but written-off immediately.

Solution **In the books of the firm**

Journal

Date	Particulars		Dr. ₹	Cr. ₹
(a)	B Capital A/c (Note 1)	Dr.	800	
	C Capital A/c	Dr.	400	
	To A Capital A/c			1,200
	(Being the adjustment for goodwill through the Partners' Capital Accounts)			
(b)	Goodwill A/c	Dr.	12,000	
	To A Capital A/c			6,000
	To B Capital A/c			4,000
	To C Capital A/c			2,000
	(Being the goodwill raised at its full value before change in the constitution of the firm and credited to partners in the old ratio)			
	A Capital A/c	Dr.	4,800	
	B Capital A/c	Dr.	4,800	
	C Capital A/c	Dr.	2,400	
	To Goodwill A/c			12,000
	(Being the goodwill written-off in the new profit-sharing ratio)			

Working Note : **(1) Adjustment for Goodwill**

Particulars	A	B	C
Right of goodwill before change in the profit-sharing ratio (3 : 2 : 1)	6,000	4,000	2,000
Right of goodwill after change in the profit-sharing ratio (2 : 2 : 1)	4,800	4,800	2,400
	(Sacrifice) 1,200 Cr.	(Gain) 800 Dr.	(Gain) 400 Dr.

Illustration 4

The following is the Balance Sheet of A and B, who are equal partners as on 31.12.2014 :

Liabilities		₹	Assets	₹
Capital Accounts :	A	15,000	Sundry Assets	28,000
	B	9,000		
Creditors		4,000		
		28,000		28,000

From 1.1.2015, the partners decided to share profits and losses in the ratio of 2 : 1. For this purpose, the goodwill of the firm is valued at ₹ 6,000 which will not be shown in the Balance Sheet.

Pass necessary Journal Entries and re-draft the Balance Sheet.

Solution **In the books of the firm**

Journal

Date	Particulars		Dr. ₹	Cr. ₹
2015 Jan. 1	A Capital A/c (Note 1)	Dr.	1,000	
	To B Capital A/c			1,000
	(Being the adjustment for goodwill made through the Partners' Capital Accounts)			

Working Note : **(1) Adjustment for Goodwill**

Particulars	A	B
Right of goodwill before change in the profit-sharing ratio (1 : 1)	3,000	3,000
Right of goodwill after change in the profit-sharing ratio (2 : 1)	4,000	2,000
	(Gain) 1,000	(Sacrifice) 1,000

Balance Sheet of A and B as at 1st January, 2015

Liabilities		₹	Assets	₹
Capital Accounts :	A : ₹ (15,000 – 1,000)	14,000	Sundry Assets	28,000
	B : ₹ (9,000 + 1,000)	10,000		
Creditors		4,000		
		28,000		28,000

Revaluation of Assets and Liabilities

At the time of change in the profit sharing ratio, it may be necessary to revalue the assets and liabilities of the firm, so that each partner gets his fair share of the firm's net assets. Therefore, revaluation should be made in the interest of all the partners. Just like admission or retirement / death, here also a Revaluation Account is prepared for calculating profit or loss on revaluation.

Accounting entries to be passed in the books of account will depend upon the situation :

(a) When the value of assets and liabilities are to be shown in the Balance Sheet at ***revalued figures***.

(b) When the value of assets and liabilities are to be shown in the Balance Sheet at ***original figures***.

When the Value of Assets and Liabilities are to be shown in the Balance Sheet at Revalued Figures

(a) If the value of the assets increase

Assets Account Dr. [Revised value *minus* original book value]
  To Revaluation Account

(b) If the value of the assets decrease

Revaluation Account Dr. [Original book value *minus* revised value]
  To Assets Account

(c) If the value of the liabilities increase

Revaluation Account Dr. [Revised amount *minus* original amount]
  To Liabilities Account

(d) If the value of the liabilities decrease

Liabilities Account Dr. [Original amount *minus* revised amount]
  To Revaluation Account

(e) The Revaluation Account is closed by transferring the balance to the All Partners' Capital Accounts in the old profit sharing ratio

(i) ***If there is a profit on revaluation, i.e., the total of the credit side of the Revaluation Account is greater than that of the debit side.***

Revaluation Account Dr.
  To All Partners' Capital Account [Old ratio]

(ii) ***If there is a loss on revaluation, i.e., the total of the debit side of the Revaluation Account is greater than that of the credit side.***

All Partners' Capital Account Dr. [Old ratio]
  To Revaluation Account

In this context, it should be noted that after change in the profit sharing ratio, the assets and liabilities appear in the Balance Sheet at *revised value*.

Illustration 5

The following is the Balance Sheet of A and B as on 31.12.2014 :

Liabilities		₹	Assets	₹
Capital Accounts :	A	54,000	Land	6,000
	B	37,000	Buildings	40,000
Creditors		25,000	Furniture	3,750
			Stock	25,000
			Debtors	20,000
			Investments	15,250
			Bank	4,500
			Cash	1,500
		1,16,000		1,16,000

The partners shared profits and losses in the ratio of 2 : 1.

From 1.1.2015, they agreed to share profits and losses equally.

For this purpose, the following particulars are provided :

(a) Buildings are to be appreciated by 25%;

(b) Current value of furniture is to be taken at ₹ 2,750;

(c) C is valued at ₹ 15,000.

Prepare Revaluation Account, Partners' Capital Accounts and show the revised Balance Sheet as at 1.1.2015.

Solution — **In the books of the firm**

Dr. — **Revaluation Account** — **Cr.**

Particulars		₹	Particulars	₹
To Furniture A/c		1,000	By Land	9,000

				Jan. 1	By Revaluation A/c	12,000	6,000
		66,000	43,000			66,000	43,000

Balance Sheet of A and B as at 1st January, 2015

Liabilities		₹	Assets	₹
Capital Accounts :	A	66,000	Land	15,000
	B	43,000	Buildings	50,000
Creditors		25,000	Furniture	2,750
			Stock	25,000
			Debtors	20,000
			Investments	15,250
			Bank	4,500
			Cash	1,500
		1,34,000		1,34,000

When the Value of Assets and Liabilities are to be shown in the Balance Sheet at Original Figures

All the partners may decide that the revised value of assets and liabilities are not to be shown in the books of account. In this case, a Memorandum Revaluation Account is opened. This account is divided into two parts. In the first part, like the Revaluation Account, any increase in the value of assets and/or decrease in the value of liabilities is credited to this account.

Likewise, any decrease in the value of assets and/or increase in the value of liabilities is debited to this account. If the credit side of the Memorandum Revaluation Account is more than the debit side, there is a profit. This profit should be transferred to the All Partners' Capital Accounts in the old profit sharing ratio. The Journal Entry is as under:

Memorandum Revaluation Account Dr.
 To All Partners' Capital Accounts [Old ratio]

If the debit side of the Memorandum Revaluation Account is more than the credit side, there is a loss which is transferred to All Partners Capital Accounts in the old profit sharing ratio. The Journal Entry is as under :

All Partners' Capital Accounts Dr. [Old ratio]
 To Memorandum Revaluation Account

In the second part of the Memorandum Revaluation Account, reverse entries are passed to complete the double entry. Any account which is debited in the first part is to be credited now.

Likewise, any account which is credited in the first part, is to be debited now. The profit on revaluation is to be transferred to All Partners' Capital Accounts in the new profit sharing ratio. The Journal Entry is as under:

Memorandum Revaluation Account Dr.
 To All Partners' Capital Accounts [new ratio]

If there is a loss on revaluation, it should be transferred to all Partners' Capital Accounts in the new profit sharing ratio. The journal entry is as under :

All Partners' Capital Accounts Dr.
 To Memorandum Revaluation Account [new ratio]

In connection with Memorandum Revaluation Account, the following points should be remembered:
1. If the first part of this account shows a profit, the second part must show a loss and vice versa.
2. The book value of assets and liabilities do not change.
3. The resultant profit or loss on revaluation is adjusted through the Partners' Capital Accounts.

Illustration 6

The following is the Balance Sheet of A, B and C as on 31.12.2014 :

Liabilities		₹	Assets	₹
Capital Accounts :	A	10,000	Land	4,000
	B	5,000	Buildings	6,000
	C	3,000	Plant and Machinery	4,000
Creditors		7,500	Stock	5,500
			Debtors	3,100
			Bills Receivable	2,000
			Bank	900
		25,500		25,500

On 1.1.2015, the assets of the firm were revalued as under : Land ₹ 8,000; Buildings ₹ 8,500; Plant and machinery ₹ 3,500. The partners agree that from 1.1.2001, they will share profits and losses in the ratio of 3 : 2 : 1 instead of their former ratio of 2 : 2 : 1. They do not, however, want to alter the book value of the assets.

Prepare Memorandum Revaluation Account, Partners' Capital Accounts and the revised Balance Sheet as at 1.1.2015.

		25,500		25,500

Reserves and Accumulated Losses

An adjustment is required for any reserve / accumulated losses appearing in the Balance Sheet at the time of change in the profit-sharing ratio. The adjustment entry will be :

General Reserve Account Dr.
Profit and Loss Account Dr.
Other Reserves Account Dr.
    To All Partners' Capital Accounts [Old ratio]

If there is any accumulated loss in the Balance Sheet, the journal entry will be as follows :

All Partners' Capital Accounts Dr. [Old ratio]

To Profit and Loss Account

After change in the profit-sharing ratio, the partners may decide that the reserve is to be shown in the books at its original figure (or agreed figure). Under this situation, reserve is written-off by debiting Reserve Account and crediting All Partners' Capital Accounts in the old profit-sharing ratio. Thereafter, reserve is raised in the books at its original figure (or agreed figure) by debiting All Partners' Capital Accounts in the new ratio and crediting the Reserve account.

The accounting entries are as under :

(i) ***When reserve is written-off***

Reserve account Dr.

To All Partners' Capital Accounts [Old ratio]

(ii) ***When reserve is to be shown in the new Balance Sheet at agreed figure***

All Partners' Capital Accounts Dr. [New ratio]

To Reserve Account

Illustration 7

The following is the Balance Sheet of A, B and C as on 1.1.2015 :

Liabilities	₹	Assets	₹
Capital Accounts :		Building	50,000
(A ₹ 60,000; B ₹ 50,000; C ₹ 40,000)	1,50,000	Machinery	40,000
General Reserve	48,000	Furniture	20,000
Creditors	12,000	Stock	30,000
		Debtors	20,000
		Bank	50,000
	2,10,000		2,10,000

The partners share profits and losses in the ratio of 3 : 2 : 1. Now, they have decided to change that to 2 : 2 : 1. The partners have further decided the following :

(a) An amount of ₹ 30,000 should be withdrawn from the business by the partners.

(b) General reserve is to appear in the books at ₹ 18,000.

Prepare Partners' Capital Accounts and re-draft the Balance Sheet.

Solution

In the books of the Firm

Partners' Capital Accounts

Dr. **Cr.**

		1,80,000		1,80,000

Adjustment for Joint Life Policy

Under a change in the profit-sharing ratio, the adjustment for joint life policy will depend on the manner in which the joint life policy is treated in the books of account.

*Case 1 : **When the premium paid is treated as revenue expense***

Under this case, the adjustment of surrender value of joint life policy is to be made through the Partners' Capital Accounts. The partner, who makes a gain in his right of joint life policy will be debited. Conversely, the partner, who suffers a loss in his right of joint life policy will be credited. The journal entry is as under :

(Gaining) Partners' Capital Account Dr.
To (Sacrificing) Partners' Capital Account

*Case 2 : **When joint life policy appears in the Balance Sheet***

When the surrender value of the joint life policy appears as an asset in the Balance Sheet, no adjustment is required for change in the profit-sharing ratio. But if the partners decide not to show that in the Balance Sheet, it will be written-off by debiting all the partners in the new profit-sharing ratio and crediting Joint Life Policy Account. The entry will be :

All Partners' Capital Accounts Dr. [New Ratio]
To Joint Life Policy Account

Illustration 8

A, B and C are partners sharing profits and losses in the ratio of 3 : 2 : 1. They have decided to change their profit-sharing ratio to 2 : 2 : 1. They took a joint life policy of ₹ 60,000. The surrender value of the policy on the date of change in the constitution is ₹ 15,000. Pass Journal Entries under the following cases :

(a) When the surrender value does not appear in the books and the partners have decided not to show that in the books also.

(b) When the surrender value appears as an asset but the partners decided not to show that in the Balance Sheet.

Solution **In the books of the firm**

		48,000	36,000	31,000			48,000	36,000	31,000

Balance Sheet of the New Firm as on 1st January, 2015

Liabilities		₹	Assets	₹
Capital Accounts :	A	40,000	Building	40,000
	B	28,000	Machinery	20,000
	C	27,000	Furniture	10,000
Joint Life Policy Reserve		20,000	Stock	15,000
Creditors		5,000	Debtors	5,000
			Joint Life Policy	20,000
			Cash and Bank	10,000
		1,20,000		1,20,000

Adjustment of Capital

Sometimes, after the change in the profit-sharing ratio, the partners may decide to make their capitals proportionate to their profit-sharing ratio or some other ratio. In this case, capital account balances of all the partners will be changed. Some partner(s) will bring in money to make-up the deficit of his capital or others will withdraw their excess capital.

The total required capital can be ascertained as under :

Particulars		₹	₹
Opening combined capital			***
Add:	Goodwill to be adjusted	***	
	Revaluation profit	***	
	Reserve	***	***
			***
Less:	Revaluation loss	***	
	Debit balance of Profit and Loss Account	***	***
	Required adjusted capital		***

Illustration 10

The following is the Balance Sheet of A and B, who shared profits and losses in the ratio of 2 : 1, as on 1.1.2015 :

Liabilities		₹	Assets	₹
Capital Accounts :	A	30,000	Land and Buildings	29,000
	B	20,000	Furniture	8,000
Reserve		15,000	Stock	24,000
Creditors		20,000	Debtors	15,000
			Bank	6,000
			Cash	3,000
		85,000		85,000

On the above date, the partners changed their profit-sharing ratio to 3 : 2. Following are agreed upon : (i) The value of land and buildings will be ₹ 50,000; (ii) Reserve to be maintained at ₹ 30,000; (iii) The total capital of the partners will be ₹ 60,000, which will be shared by the partners in their new profit-sharing ratio.

Prepare Partners' Capital Accounts and the revised Balance Sheet.

Solution

Dr. Partners' Capital Accounts Cr.

Date	Particulars	A	B	Date	Particulars	A	B
2015	To Reserve A/c (See Note)	18,000	12,000	2015	By Balance b/d	30,000	20,000
Jan. 1	To Balance c/d (required)	36,000	24,000	Jan. 1	By Reserve A/c (See Note)	10,000	5,000
					By Land and Buildings A/c	14,000	7,000
					By Cash A/c (Balancing figure)	—	4,000
		54,000	36,000			54,000	36,000

Balance Sheet of A and B as on 1st January, 2015

Liabilities		₹	Assets	₹
Capital Accounts :	A	36,000	Land and Buildings	50,000
	B	24,000	Furniture	8,000
Reserve		30,000	Stock	24,000
Creditors		20,000	Debtors	15,000
			Bank	6,000
			Cash (₹ 3,000 + ₹ 4,000)	7,000
		1,10,000		1,10,000

Tutorial Note : Reserve appearing in the Balance Sheet before the change in the profit-sharing ratio will be distributed between the partners—in their old ratio, i.e., 2 : 1. When it is again brought back in the books the Partners' Capital Accounts will be debited in the new ratio, i.e., 3:2. A's Capital Account will be debited by ₹ 3/5 × ₹ 30,000 = ₹ 18,000 and B's Capital Account will be debited by ₹ 2/5 × ₹ 30,000 = ₹ 12,000.

Illustration 11

Raju, Shastri and Tanka are partners in a firm, sharing profits and losses in the ratio of 5 : 3 : 2. Their Balance Sheet as on 31st March 2014 stood as follows:

Liabilities		₹	Assets		₹
Sundry Creditors		25,000	Cash at Bank		10,000
General Reserve		20,000	Sundry Debtors	22,000	
Shastri's Loan Account		15,000	Less: Provision for Bad Debts	2,000	20,000
Capital Accounts	₹		Furniture		10,000
Raju	25,000		Plant and Machinery		35,000
Shastri	10,000		Stock		25,000
Tanka	5,000	40,000			
		1,00,000			1,00,000

From 1st April, 2014 the partners decided to change their profit- sharing ratio as 2 : 1 : 2 instead of their former ratio of 5 : 3 : 2 and for that purpose the following adjustments were agreed upon: (i) The Provision for Bad Debts was to be raised to 10%; and, (ii) Furniture was to be appreciated by ₹ 5,200. They did not, however, want to alter the book values of the assets and reserves but record the change by passing one single journal entry.

The Profit and Loss Account of the firm for the year ended 31st March, 2015 showed a net profit of ₹ 22,900.

You are required: (a) to show the single Journal Entry adjusting the partners' capitals as on 1st April, 2014 and (b) to prepare the Profit and Loss Appropriation Account for the year ended 31st March, 2015 after taking into consideration the following adjustments: (i) Interest on Capital at 5% p.a.; (ii) Interest on Shastri's Loan, and (iii) Transfer 25% of the divisible profit to the General Reserve after charging such Reserve.

Solution

Working Notes: (1) Ascertainment of Profit or Loss on required Adjustments

	₹
Value of furniture to be appreciated	5,200
Less: Further provision for bad debts to be created (₹ 2,200 – ₹ 2,000)	200
	5,000
Add: General reserve to be distributed (appearing in the Balance Sheet)	20,000
Profit to be shared	25,000

(2) Ascertainment of Adjusted Capitals

Particulars	Raju	Shastri	Tanka
Profit credited in the old profit-sharing ratio (5 : 3 : 2)	12,500	7,500	5,000
Profit debited in the new profit-sharing ratio (2 : 1 : 2)	10,000	5,000	10,000
Net effect on Capitals	(+) 2,500	(+) 2,500	(–) 5,000

Capital as per the Balance Sheet on 31.3.2014	25,000	10,000	5,000
Net effect on capital (as above)	(+) 2,500	(+) 2,500	(–) 5,000
Adjusted capitals as on 1.4.2014	27,500	12,500	—

Required Journal Entry

Date	Particulars		Dr. ₹	Cr. ₹
	Tanka Capital A/c	Dr.	5,000	
	To Raju Capital A/c			2,500
	To Shastri Capital A/c			2,500
	(Being the required adjustment)			

Dr. Profit and Loss Appropriation Account for the year ended 31st March, 2015 Cr.

Particulars	₹	Particulars	₹
To Interest on Capital A/c		By Profit & Loss A/c — Net Profit	22,900
Raju : ₹ 1,375; Shastri : ₹ 625	2,000		
To Interest on Loan A/c — Shastri (6% on ₹ 15,000)	900		
To General Reserve A/c*	4,000		
To Share of Profit A/c	16,000		
Raju : ₹ 6,400; Shastri : ₹ 3,200; Tanka : ₹ 6,400			
	22,900		22,900

* Divisible profit before transferring to General Reserve is ₹ 20,000. Therefore reserve is to be created : 25 / 125 of ₹ 20,000, i.e., ₹ 4,000.

Illustration 12

A, B and C are partners in a firm sharing profits and losses in the ratio of 3 : 2 : 1 respectively. Their Balance Sheet as at 31.3.2015 was as follows :

Liabilities		₹	Assets	₹
Sundry Creditors		1,50,000	Cash	40,000
General Reserve		1,20,000	Bills Receivable	90,000
Partners' Capital Accounts :	A	2,10,000	Sundry Debtors	1,80,000
	B	1,40,000	Stock	1,20,000
	C	70,000	Fixed Assets	2,60,000
		6,90,000		6,90,000

From 1.4.2015, they agreed to alter their profit sharing ratio as 4 : 6 : 5. It is also decided that :

(a) The fixed assets be valued at ₹ 3,21,000.

(b) The stock be reduced to ₹ 1,10,000.

(c) A provision of 5% on sundry debtors be made for doubtful debts.

(d) The goodwill of the firm at this date be valued at three years' purchase of the average net profits of the last five years before charging insurance premium.

There is a joint life insurance policy for ₹ 2,00,000 for which an annual premium of ₹ 10,000 is paid, the premium being charged to Profit and Loss Account. The surrender value of the policy on 31.3.2015 was ₹ 81,000.

The net profits of the firm for the last five years were ₹ 16,000, ₹ 20,000, ₹ 25,000, ₹ 23,000 and ₹ 26,000.

Goodwill and surrender value of the joint life policy are not to appear in the books.

Draft journal entries necesary to adjust the profit sharing ratio of the partners and prepare Partners' Capital Accounts and the Balance Sheet after giving effect to the above. ***[C.A. (Foundation) — Adapted]***

Right of general reserve after change in the profit sharing ratio (4 : 6 : 5)	32,000	48,000	40,000
Sacrifice (–) / Gain (+)	(–) 28,900	(+) 8,000	(+) 20,000

Change in the Profit Sharing Ratio During an Accounting Year

A change in the profit sharing ratio among the partners may occur at some time during the accounting period. In such a case, it will be necessary to divide the profit before appropriations into the periods prior to and after the change. This is usually done on a time basis. The interest on capital, salaries and share of retained profit are computed for each period separately.

Illustration 13

A, B and C have been in partnership for many years sharing profits and losses in the ratio of 3 : 2 : 1 respectively.

The following data for the year ended 31.12.2014 have been extracted from the partnership books :

Sales ₹ 7,40,000; Cost of goods sold ₹ 4,60,000; General expenses ₹ 30,000; Depreciation ₹ 10,000.

The partners have agreed that from 1.7.2014, A will be entitled to a salary of ₹ 30,000 p.a. and the balance of the profits will be shared equally. Sales have been taken place evenly throughout the year and all sales earned a uniform rate of gross profit. No entries to reflect the change in profit sharing ratio have been made in the books before the year end.

You are required to prepare the Trading and Profit and Loss Account, and the Profit and Loss Appropriation Account for the year ended 31.12.2014.

Illustration 14

A, B and C (without capital) are partners sharing profits and losses in the ratio of 3 : 2 : 1 respectively. Their capital account balances as on 1.1.2014 were : A — ₹ 45,000; B — ₹ 25,000.

A and B are entitled to interest on capital @ 10% p.a.; and in addition A is to get a salary of ₹ 250 p.m.

On 1.7.2014 partners decided that the new profit sharing ratio among A, B and C will be 2 : 2 : 1 respectively and C is to bring in ₹ 20,000 as capital. On the same date, they also decided that the total capital of the firm will be ₹ 1,00,000 and it will be adjusted in the profit sharing ratio. For A and B, any excess or deficiency is to be paid off or brought in cash. Interest on capital will be allowed @ 12% p.a. to all the partners. As regards partners' salaries, instead of A, B will be getting @ ₹ 500 p.m. The net profit for the year ended 31.12.2014 is ₹ 22,000 (which is assumed to be earned evenly throughout the period).You are required to prepare Profit and Loss Appropriation Account for the year ended 31.12.2014, Partners' Capital and Current Accounts.

Illustration 15

A and B are partners in an old established trading business. Their partnership agreement provides for interest on partners' capital @ 5% p.a., a salary of ₹ 3,900 p.a. payable to B, and interest to be charged at 5%, on the total drawings for the year. Net profit after these adjustments is to be divided in the ratio of 4 : 1 to A and B respectively.

The agreement was varied as from 1.9.2014 in that B's salary was reduced to ₹ 3,000 p.a., and the profit sharing ratio became 3:2 to A and B respectively. The partners agreed to assume that profits and drawings accrued evenly over the year.

The following information is provided :

Particulars		₹	₹
Net Profit for the year 2014			12,060
Capital Accounts —	A	30,000	
	B	24,000	54,000
Current Accounts —	A	6,516

Illustration 16

X and Y are in partnership sharing profits and losses equally. Their accounts are made up to 31st December each year. They have decided that from 1.10.2014, the profit sharing ratio is to become X 3/5th and Y 2/5th.

Their Balance Sheet at 31.12.2014 prior to sharing profits is as under :

Liabilities		₹	Assets	₹
Capitals :	X	80,000	Sundry Assets	2,10,000
	Y	70,000		
Profit for the year		60,000		
		2,10,000		2,10,000

It was decided that the impact of the change in profit sharing ratio would be affected at 31.12.2014 when the sundry assets were revalued at ₹ 2,50,000. The goodwill was valued at ₹ 25,000 but no goodwill account is to be maintained in the books. It is to be assumed that profits have been earned evenly throughout the period.

You are required to prepare Profit and Loss Appropriation Account for the year ended 31.12.2014 and the Partners' Capital Accounts.

Solution

Illustration 17

The following information relates to the partnership of A and B (until 30.9.2014) and A, B and C (from 1.10.2014) :

1. The net profit for 2014 was ₹ 24,000. The profit sharing ratio changed on 1.4.2014 from A 40%, B 60%, to equal shares. No adjustments were required to the partnership goodwill at that date. The profit sharing ratio changed again on 1.10.2014 when C was admitted as a partner. The share of profit became A 40%, B 40%, C 20%.
2. C was unable to introduce cash into the partnership, but brought in furniture with an agreed value of ₹ 20,000.
3. On C's admission to the partnership, goodwill was valued at 1.5 times the average net profit for 2011, 2012 and 2013. The net profit figure for 2011, 2012 and 2013 were ₹ 8,000, ₹ 10,000 and ₹ 12,000 respectively.
4. C had drawings of ₹ 1,500 in the 3 months to 31.12.2014.

(a) Calculate the profit share for each of the three partners for 2014.

(b) Show a journal entry recording the adjustment of goodwill among partners at 1.10.2014.

(c) Show C's capital account for the 3 months ended 31.12.2014 in as much detail as possible.

Solution

(a) Share of Profit (calculated on a time basis)

Partners	1.1.2014 – 31.3.2014 ₹	1.4.2014 – 30.9.2014 ₹	1.10.2014 – 31.12.2014 ₹	Total ₹
A	2,400	6,000	2,400	10,800
B	3,600	6,000	2,400	12,000
C	—	—	1,200	1,200
	6,000	12,000	6,000	24,000

(b) Required Journal Entry

C Capital Account	Dr.	₹ 3,000	
To B Capital Account			₹ 3,000
(Being the required adjustment for goodwill)			

Workings :

Value of goodwill = ₹ (8,000 + 10,000 + 12,000) / 3 x 1.5 = ₹ **15,000**.

Required Adjustment for Goodwill

Particulars	A (₹)	B (₹)	C (₹)
Right of goodwill before C's admission (4 : 6)	6,000	9,000	—
Right of goodwill after C's admission (4 : 4 : 2)	6,000	6,000	3,000

		21,200			21,200

Illustration 18

A and B are partners in an old established business. Their partnership agreement provides that :

(a) Interest @ 10% p.a. is paid on partners' fixed capital.

(b) B is credited with a salary of ₹ 30,000 p.a.

(c) The balance profit or loss is divided between A and B in the ratio of 3 : 2 respectively.

The balances on the partenrs' capital and current accounts at 1.1.2014 were as follows (all balances are in credit) :

Partners	Capital Accounts (₹)	Current Accounts (₹)
A	1,20,000	10,000
B	80,000	7,000

During the year ended 31.12.2014, the partnership net profit carried to the appropriation account was ₹ 1,60,000 arising uniformly throughout the year. The partners' cash drawings during 2014 were as follows :

A — ₹ 5,000; B — ₹ 6,000

After reviewing the draft accounts for 2014, A and B decided to admit their senior clerk, C, as a partner w.e.f. 1.10.2014.

C has been in the business for many years and from the beginning of 2014 has received a salary of ₹ 40,000 p.a. payably monthly.

For some years, the partnership has used a house owned by C for offices and paid him a rent of ₹ 10,000 p.a. It has now been agreed that w.e.f. 1.10.2014, the property is transferred at its market valuation of ₹ 60,000 to the partnership as C's fixed capital.

After stating that there will be no partners' salaries, the new partnership agreement provides that :

(i) Interest @ 10% p.a. is to be paid on partners' fixed capital.

(ii) The balance of profit or loss is to be shared among A, B and C in the ratio of 5 : 3 : 2.

You are required to prepare the Profit and Loss Appropriation Account for the year ended 31.12.2014. Also prepare the Partners' Capital and Current Accounts.

Solution

		94,500	84,300	12,500			94,500	84,300	12,500

Working Note :

(1) At the time of calculating profit ₹ 1,60,000 for the year, salary and rent of C were taken into consideration. As per agreement amongst the partners, no salary and rent is payable to C from 1.10.2014. Therefore, three months' salary and rent are to be written-back.

Key Points

- A change in the profit-sharing ratio between the partners is a change in the constitution of partnership.
- When a change in the profit-sharing ratio takes place in a partnership firm, one (or more) partner(s) purchases an interest in the business from another partner(s).
- A change in the profit-sharing ratio results in a new partnership, although daily operations of the firm currently are not affected.
- When there is a change in the profit sharing ratio, an adjustment is necessary in respect of goodwill.
- At the time of change in the profit sharing ratio, it may be necessary to revalue the assets and liabilities of the firm, so that each partner gets his fair share of the firm's net assets.
- An adjustment is required for any reserve / accumulated losses appearing in the Balance Sheet at the time of change in the profit-sharing ratio. The adjustment entry will be :

  General Reserve Account Dr.
  Profit and Loss Account Dr.
  Other Reserves Account Dr.
  To All Partners' Capital Accounts [Old ratio]

THEORETICAL QUESTIONS

1. Why is it necessary to revalue assets and liabilities of the firm in case of change in the profit-sharing ratio ?
2. What are the effects of change in the profit-sharing ratio of the partners ?
3. State the treatment of goodwill in case of change in the profit-sharing ratio of the partners.
4. How will you deal with accumulating profits and losses at the time of change in the profit-sharing ratio of the partners?

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each statement or answer each question below :

1. Change in the profit-sharing ratio between the partners is :
   A the dissolution of partnership firm
   B the change in the constitution of the partnership firm
   C the formation of a new partnership firm.
2. When there is a change in profit-sharing ratio of the partner :
   A partners will only gain
   B partners will only sacrifice
   C some partners will gain and some partners will sacrifice.
3. When there is a change in the profit-sharing ratio of the partners, the consent of :
   A all the partners are needed
   B some of the partners are needed
   C majority of the partners are needed.
4. When there is a change in the profit-sharing ratio of the partners, the accounts of the firm is :
   A maintained in the usual manner
   B maintained in the new set of books
   C maintained under cash basis.
5. A change in the profit-sharing ratio between the partners may occur :
   A only at beginning of the accounting year
   B only at the end of the accounting year;
   C any time during the accounting year.

PRACTICAL QUESTIONS

1. A and B are partners sharing profits and losses in the ratio of 3 : 1. Their capitals were : A — ₹ 60,000; B ₹ 20,000. They decided to change the profit-sharing ratio to 5 : 3 with effect from 1.1.2015. The goodwill of the firms is to be valued at 2 years' purchase of 3 years' average profits. They also decided that their capitals should be proportionate to their profit-sharing ratio. The profits of the firms for 2012, 2013 and 2014 were ₹ 22,000; ₹ 28,000 and ₹ 34,000 respectively. Pass necessary Journal Entries. Also, show the Partners' Capital Accounts.
2. The following is the Balance Sheet of A, B and C who share profits equally as on 1.1.2015.

Liabilities	₹	Assets	₹
Capitals : A	30,000	Land	15,000
B	20,000	Building	35,000
C	20,000	Furniture	20,000
Reserve	15,000	Stock	10,000
Creditors	10,000	Debtors	15,000
Bills Payable	5,000	Cash and bank	5,000
	1,00,000		1,00,000

On the above date, the partners changed their profit-sharing ratio to 2 : 2 : 1. Following are agreed upon : (i) The value of land is ₹ 30,000; (ii) Reserve is to be maintained at ₹ 30,000; (iii) The total capital of the partners will be ₹ 1,00,000 which will be shared by them in their new profit-sharing ratio; (iv) Building is to be increased by ₹ 5,000 and furniture is to be decreased by ₹ 10,000.

You are required to prepare the revised Balance Sheet. Preparation of Ledger Accounts is not required.

3. The following is the Balance Sheet of A, B and C who share profits in the ratio of 3 : 2 : 1 as on 1.1.2015 :

Liabilities	₹	Assets	₹
Capitals : A	30,000	Land	15,000
B	25,000	Building	30,000
C	20,000	Plant and Machinery	20,000
Reserve	15,000	Joint Life Policy	12,000
Joint Life Policy Reserve	12,000	Stock	15,000
Creditors	3,000	Debtors	10,000
		Cash	3,000
	1,05,000		1,05,000

From the above date, the partners decided to share profits equally. Following are agreed upon :

(i) The value of the land will be ₹ 21,000;

(ii) Joint life policy will not be shown;

(iii) Half of the reserve will be withdrawn by the partners;

(iv) The total capital of the partners will be ₹ 90,000. Any deficiency is to be brought in cash and the surplus is to to be transferred to a Loan Account carrying interest @ 12% p.a.

Prepare necessary Ledger Accounts and re-draft the Balance Sheet.

4. A, B and C were partners sharing profits and losses in the ratio of 3 : 2 : 1. The Balance Sheet of the firm as on 1.1.2014 was as under :

Liabilities	₹	Assets	₹
Capital Accounts :		Fixed Assets	40,000
(A ₹ 30,000; B ₹ 20,000; C ₹ 10,000)	60,000	Stock	40,000
General Reserve	12,000	Debtors	30,000
Capital Reserve	9,000	Bank	10,000
Creditors	39,000		
	1,20,000		1,20,000

On the above date, the partners decided to change their profit sharing ratio to 1 : 2 : 3. Goodwill was valued at ₹ 18,000. No entries were, however, passed to give effect to this change.

The Balance Sheet of the firm as on 31.12.2014 was as under :

Liabilities		₹	Assets	₹
A Capital	30,000		Fixed Assets	36,000
Less: Drawings	5,000	25,000	Stock	55,000
B Capital	20,000		Debtors	45,000
Less: Drawings	3,000	17,000	Advances	14,000
C Capital	10,000			
Less: Drawings	4,000	6,000		
General Reserve		36,000		
Capital Reserve		9,000		
Creditors		50,000		
Bank Overdraft		7,000		
		1,50,000		1,50,000

You are required to pass necessary Journal Entries to give effect to the above change in the constitution of the firm on 1.1.2014. Draw also the revised Balance Sheet as on 31.12.2014 [Assume that there will be no reserve in the new Balance Sheet].

5. The following is the Balance Sheet of A, B and C as on 1.1.2015 :

Liabilities		₹	Assets	₹
Capital Accounts :	A	40,000	Land	10,000
	B	20,000	Building	50,000
	C	20,000	Machinery	40,000
Reserve		20,000	Furniture	10,000
Creditors		15,000	Stock	5,000
Bills Payable		15,000	Debtors	5,000
			Bank	10,000
		1,30,000		1,30,000

The partners share profits in the ratio of 2 : 2 : 1, but, on the above date, they have decided to change that to 2 : 1 : 1. The following adjustments are required :

(a) The value of the land is ₹ 15,000.

(b) The value of machinery and furniture are to be increased by ₹ 15,000 and ₹ 5,000 respectively.

(c) The value of stock and debtors are to be decreased by ₹ 3,000 and ₹ 2,000 respectively.

(d) The capitals of the partners are to be adjusted according to the new profit-sharing ratio. For that, necessary capital to be brought-in or excess capital to be writhdrawn. No reserve will be shown in the new Balance Sheet.

Prepare necessary Ledger Accounts and re-draft the Balance Sheet.

6. The firm of A, B and C has existed for some years, profit being shared as 2/5, 2/5 and 1/5 respectively. C, however, feels that this arrangement has not been satisfactory to him and requires to be placed on some basis as regards profits as A and B. He further wants that this arrangement shall apply not only to future profits but also retrospectively to the profits of the past three years which were ₹ 26,000, ₹ 22,100 and ₹ 25,805. A and B have no objection to this. They further agree that in making such adjustment regards should be given to ₹ 6,500 value of goods which had been charged to profits but which actually were taken privately by B and ₹ 3,900 of office equipment for which no Asset Account had been opened in the books but charged to the Profit and Loss Account. Plant and Machinery of the firm

had not been depreciated over the past years and it was estimated that the total of the amounts which should have been written off was ₹ 9,035. It was further agreed that after adjustment the Capital Accounts were to be equalized without, however, increasing or reducing the total capital of the firm.

Show the Adjustment Account and the Capital Accounts of the partners after giving effect to the above agreement, assuming that immediately after the distribution of last year's profits, Capital Accounts stood as : A—₹ 52,000; B—₹ 39,000; C—₹ 27,430.

7. A, B and C are partners in a firm sharing profits and losses as 8 : 5 : 3. Their Balance Sheet as at 31st December, 2014, was as follows :

Liabilities		₹	Assets	₹
Sundry Creditors		1,50,000	Cash	40,000
General Reserve		80,000	Bills Receivable	50,000
Partners' Loan Accounts :	A	40,000	Sundry Debtors	60,000
	B	30,000	Stock	1,20,000
Partners' Capital Accounts :	A	1,00,000	Fixed Assets	2,80,000
	B	80,000		
	C	70,000		
		5,50,000		5,50,000

From 1st January, 2015 they agreed to alter their profit-sharing ratio as 5 : 6 : 5. It is also decided that :

(a) the fixed asets should be valued at ₹ 3,31,000;
(b) a provision of 5% on sundry debtors to be made for doubtful debts;
(c) the goodwill of the firm at this date be valued at three years' purchases of the average net profits of the last five years before, charging insurance premium; and
(d) the stock be reduced to ₹ 1,12,000.

There is a joint life insurance policy for ₹ 2,00,000 for which an annual premium of ₹ 10,000 is paid, the premium being charged to Profit and Loss Account. The surrender value of the policy on 31st December, 2014 was ₹ 78,000. The net profit of the firm for the last five years were : ₹ 14,000; ₹ 17,000; ₹ 20,000; ₹ 22,000 and ₹ 27,000. Goodwill and the surrender value of the joint policy was not to appear in the books.

Draft Journal Entries necessary to adjust the Capital Accounts of the partners.

Admission of a Partner

Introduction

A person may be admitted as a new partner in a partnership firm with the consent of all the partners. A new partner is admitted for different reasons such as more capital, influence or special skill, etc.

Whenever a new partner is admitted, it has the effect of bringing the old partnership to an end and transferring the business to new partnership. Generally, public announcements are made (through newspaper) about new partner additions so that third parties transacting business with the partnership are aware of the change in the partnership. After admission, the new partner acquires two rights :

(i) he becomes the part owner of the assets of the firm; and
(ii) he is entitled to share part of the profits of the business. At the same time, he becomes partly liable for any liability of the business incurred after admission and any loss incurred by the firm.

Effects of Admission of a Partner

The effects of admission of a new partner are the following :

1. The admission of a partner constitutes the termination of old partnership and the beginning of a new one.
2. The new partner is entitled to a share of future profits and, in effect, the combined shares of the old partners will be reduced.
3. The new partner has to contribute an agreed amount of capital to the business.
4. The new partner acquires ownership rights of the assets and also become liable for the liabilities of the business.
5. Separate accounts should be prepared for the old and new partnership.
6. An adjustment is to be made in regard to undrawn profits or accumulated losses.
7. The goodwill of the firm has to be valued and some adjustments are to be made.
8. The assets and liabilities of the firm are to be revalued and proper adjustments are to be made.

Adjustments for Admission of a New Partner

At the time of admission of a new partner, different adjustments are required in respect of the following :

1. Change in the profit sharing ratio
2. Goodwill
3. Revaluation of assets and liabilities
4. Reserve and surplus
5. Partners' capitals

1. Change in the Profit Sharing Ratio

New Profit Sharing Ratio

When a new partner is admitted, he is entitled to a share of future profits. In effect, there will be a change in the old profit sharing ratio. The new partner may acquire his share of profit either from one partner or from all partners. At the time of calculating the new ratio the above matters are to be taken into consideration.

In this connection, it should be noted that, *unless otherwise agreed, the profit sharing ratio between the existing partners will remain same.* We will discuss the different situations as under :

Situation 1 : When the share of the new partner is given and the remaining profit will be shared by the old partners in the given new profit sharing ratio.

In this situation, first new partner's share of profit will be deducted from total, i.e., from 1. The remaining share will be distributed amongst the old partners in the given new ratio. The following illustration will clear the matter.

Illustration 1

A, B, C and D are in partnership sharing profits and losses in the ratio of 36 : 24 : 20 : 20 respectively. E joins the partnership for 20% share. A, B, C and D would, in future, share profits among themselves as 3/10, 4/10, 2/10, and 1/10 respectively.

Calculate new profit sharing ratio after E's admission.

Solution

E joins the firm for 20% or 1/5th share. Therefore, the balance 4/5th (1 – 1/5) will be shared by the old partners in the ratio of 3/10 : 4/10 : 2/10 : 1/10.

The new profit sharing ratio is :

A — 4/5 × 3/10 = 12/50; B — 4/5 × 4/10 = 16/50; C — 4/5 × 2/10 = 8/50; D — 4/5 × 1/10 = 4/50; E — 1/5 or 10/50.

New profit sharing ratio = A : B : C : D : E = 12 : 16 : 8 : 4 : 10 = **6 : 8 : 4 : 2 : 5**.

Situation 2 : When the share of the new partner is given, which he acquires from other partners in an agreed ratio.

In this situation, the share of each old partner is to be calculated after deducting the share of profit to the extent he has surrendered in favour of the new partner. The following ***Illustration*** will clear the matter.

Illustration 2

Bijender and Narender are partners in a firm sharing profits in the ratio of 3 : 2. They admit Surender as a partner for 1/4th share in the profits. Surender acquires his share from Bijender and Narender in the ratio of 2 : 1. Calculate the new profit sharing ratio.

Solution

Surender's share of profit in the firm is 1/4 which he acquires from Bijender and Narender in the ratio of 2 : 1.

It means Bijender has surrendered 2/3 of 1/4, i.e., 2/12 and

Narender has surrendered 1/3 of 1/4 = 1/12.

Bijender's share of profit in the new firm : 3/5 – 2/12 = (36 – 10) / 60 = 26/60.

Narender's share of profit in the new firm : 2/5 – 1/12 = (24 – 5) / 60 = 19/60.

Surender's share of profit in the new firm : 1/4 or 15/60.

New profit sharing ratio = Bijender : Narender : Surender = 26/60 : 19/60 : 15/60 = 26 : 19 : 15.

Alternatively, **Calculation of New Profit Sharing Ratio**

Partners	Old Ratio	Share Acquired or Surrendered	New Ratio	New Profit Sharing Ratio
Bijender	3/5	2/3 x 1/4 = 2/12	3/5 – 2/12 = 26/60	Bijender : Narender : Surender = 26/60 : 19/60 : 15/60 or 26 : 19 : 15
Narender	2/5	1/3 x 1/4 = 1/12	2/5 – 1/12 = 19/60	
Surender	—	2/12 + 1/12	2/12 + 1/12 = 1/4 or 15/60	

Situation 3 : When the old partners are surrendering a part of their share of profit in favour of the new partner.

In this situation the new partner's share of profit will be the sum total of share of profit surrendered by the old partners. Old partner's share of profit will be reduced to the extent surrendered in favour of the new partner. The following ***Illustrations*** will clear the matter.

Illustration 3

X and Y were partners sharing profits in the ratio of 3 : 2. They admitted P and Q as new partners. X surrendered 1/3rd of his share in favour of P and Y surrendered 1/4th of his share in favour of Q.

Calculate the new profit sharing ratio of X, Y, P and Q.

Solution

X's old share of profit = 3/5. X surrendered 1/3rd of his share, i.e., 3/5 × 1/3 = 3/15 (It means X has surrendered 3/15 in favour of P).
X's share of profit in the new firm = 3/5 – 3/15 = (9 – 3) /15 = 6/15.

Y's old share of profit = 2/5. Y surrendered 1/4th of his share, i.e., 2/5 × 1/4 = 2/20 (It means Y has surrendered 2/20 in favour of Q).
Y's share of profit in the new firm = 2/5 – 2/20 = (8 – 2) / 20 = 6/20.
P's share of profit in the new firm = 3/15.
Q's share of profit in the new firm = 2/20.
Therefore, new profit sharing ratio
= X : Y : P : Q = 6/15 : 6/20 : 3/15 : 2/20 = 24/60 : 18/60 : 12/60 : 6/60
= 24 : 18 : 12 : 6 or **4 : 3 : 2 : 1**.

Alternatively, **Calculation of New Profit Sharing Ratio**

Partners	Old Ratio	New Share	New Profit Sharing Ratio
X	3/5	3/5 – (1/3 of 3/5) = 3/5 – 1/5 = 2/5	X : Y : P : Q = 2/5 : 3/10 : 1/5 : 1/10 or **4 : 3 : 2 : 1**
Y	2/5	2/5 – (1/4 of 2/5) = 2/5 – 1/10 = 3/10	
P	—	1/3 of 3/5 = 1/5	
Q	—	1/4 of 2/5 = 1/10	

Illustration 4

A and B are partners sharing profits in the ratio of 3 : 2. A surrenders 1/6th of his share and B surrenders 1/4th of his share in favour of C, a new partner. What is the new ratio ?

Solution

A's old share of profit = 3/5. A surrenders 1/6th of his share, i.e., 3/5 x 1/6 = 3/30 or 1/10
(It means A has surrendered 1/10th in favour of C).
A's share of profit in the new firm : 3/5 – 1/10 = (6 – 1) / 10 = 5/10.
B's old share of profit = 2/5. B surrenders 1/4th of his share, i.e., 2/5 x 1/4 = 2/20 = 1/10
(It means B has surrendered 1/10 in favour of C).
B's share of profit in the new firm = 2/5 – 1/10 = (4 – 1) / 10 = 3/10.
C's share of profit in the new firm = 1/10 + 1/10 = 2/10.
New profit sharing ratio = A : B : C = 5/10 : 3/10 : 2/10 or **5 : 3 : 2**.

Alternatively, **Calculation of New Profit Sharing Ratio**

Partners	Old Ratio	Share Acquired or Surrendered	New Ratio	New Profit Sharing Ratio
A	3/5	3/5 x 1/6 = 3/30 or 1/10	3/5 – 1/10 = 5/10	A : B : C = 5/10 : 3/10 : 2/10 or **5 : 3 : 2**
B	2/5	2/5 x 1/4 = 2/20 or 1/10	2/5 – 1/10 = 3/10	
C	—	1/10 + 1/10	1/10 + 1/10 = 2/10	

Illustration 5

R and S are partners sharing profits in the ratio of 5 : 3. T joins the firm as a new partner. R gives 1/4 of his share and S gives 2/5 of his share to the new partner. Find out the new ratio.

Solution

R's old share of profit = 5/8. He gives 1/4 of 5/8 to T, i.e., 5/8 × 1/4 = 5/32
(It means that R has surrendered 5/32 in favour of T).
R's share of profit in the new firm = 5/8 – 5/32 = (20 – 5) / 32 = 15/32.
S's old share of profit = 3/8. He gives 2/5 of 3/8 to T, i.e., 3/8 × 2/5 = 6/40
(It means that S has surrendered 6/40 in favour of T).
S's share of profit in the new firm = 3/8 – 6/40 = (15 – 6) / 40 = 9/40.
T's share of profit in the new firm = 5/32 + 6/40 = (25 + 24) / 160 = 49/160.
New profit sharing ratio = R : S : T = 15/32 : 9/40 : 49/160 or 75 : 36 : 49.

Alternatively, **Calculation of New Profit Sharing Ratio**

Partners	Old Ratio	Share Acquired or Surrendered	New Ratio	New Profit Sharing Ratio
R	5/8	5/8 x 1/4 = 5/32	5/8 – 5/32 = 15/32	R : S : T
S	3/8	3/8 x 2/5 = 6/40	3/8 – 6/40 = 9/40	= 15/32 : 9/40 : 49/160
T	—	5/32 + 6/40	5/32 + 6/40 = 49/160	or **75 : 36 : 49**

Illustration 6

Singh, Gupta and Lal are partners in a firm sharing profits in the ratio of 3 : 2 : 3. They admitted Jain as a new partner. Singh surrendered 1/3rd of his share in favour of Jain. Gupta surrendered 1/4th of his share in favour of Jain and Lal surrendered 1/5th of his share in favour of Jain. Calculate the new profit sharing ratio.

Solution

Singh's old share of profit = 3/8. He surrenders 1/3 to Jain, i.e., 3/8 × 1/3 = 3/24
(It means Singh has surrendered 3/24 in favour of Jain).
Singh's share of profit in the new firm = 3/8 – 3/24 = (9 – 3) /24 = 6/24.
Gupta's old share of profit = 2/8. He surrenders 1/4 to Jain, i.e., 2/8 × 1/4 = 2/32
(It means Gupta has surrendered 2/32 in favour of Jain).
Gupta's share of profit in the new firm = 2/8 – 2/32 = (8 – 2) / 32 = 6/32.
Lal's old share of profit = 3/8. He surrenders 1/5 to Jain, i.e., 3/8 × 1/5 = 3/40
(It means Lal has surrendered 3/40 in favour of Jain).
Lal's share of profit in the new firm = 3/8 – 3/40 = (15 – 3)/40 = 12/40.
Jain's share of profit in the new firm = 3/24 + 2/32 + 3/40 = (30 + 15 + 18)/240 = 63/240.
New profit sharing ratio = Singh : Gupta : Lal : Jain = 6/24 : 6/32 : 12/40 : 63/240
= 60 : 45 : 72 : 63 or **20 : 15 : 24 : 21**.

Alternatively, **Calculation of New Profit Sharing Ratio**

Partners	Old Ratio	New Share	New Profit Sharing Ratio
Singh	3/8	3/8 – (1/3 of 3/8) = 3/8 – 1/8 = 2/8	Singh : Gupta : Lal : Jain
Gupta	2/8	2/8 – (1/4 of 2/8) = 2/8 – 1/16 = 3/16	= 2/8 : 3/16 : 12/40 : 21/80
Lal	3/8	3/8 – (1/5 of 3/8) = 3/8 – 3/40 = 12/40	= **20 : 15 : 24 : 21**
Jain	—	1/8 + 1/16 + 3/40 = 21/80	

Illustration 7

Find out the new ratio :

(i) A and B are partners. They admit C for 1/4 share. In future, the ratio between A and B would be 2 : 1.
(ii) A and B are partners sharing profits in the ratio of 3 : 2. They admit C for 3/7th profit which he acquires 2/7th from A and 1/7th from B.
(iii) K, L and M are partners sharing in the ratio of 3 : 2 : 1. They admit N for 1/6th share. M would retain his original share.

Solution

(i) Let the total share be 1. C is admitted for 1/4 share. Therefore, 1 – 1/4 = 3/4 remains for A and B which they will share in the ratio of 2 : 1. The final profit sharing ratio will be :
A — 2/3 of 3/4 = 6/12; B — 1/3 of 3/4 = 3/12; C — 1/4 = 3/12
A : B : C = 6 : 3 : 3 = **2 : 1 : 1**.
(ii) After admission of C the final profit sharing ratio will be:
A — 3/5 – 2/7 = (21 – 10) / 35 = 11/35 B — 2/5 – 1/7 = (14 – 5) / 35 = 9/35 C — 3/7 or 15/35. A : B : C = **11 : 9 : 15**.

(iii) Let the total share be 1. N is admitted for 1/6 share.
Therefore, 1 – 1/6 = 5/6 remains for K, L and M but M will retain his original share, i.e., 1/6.
In effect, 5/6 – 1/6 = 4/6 will be shared by K and L in the ratio of 3 : 2.
The final profit sharing ratio will be :
K — 3/5 of 4/6 = 12/30 L — 2/5 of 4/6 = 8/30
M — 1/6 = 5/30 N — 1/6 = 5/30.
∴ K : L : M : N = **12 : 8 : 5 : 5**.

Sacrificing Ratio

When a new partner is admitted into the partnership for a certain share of profit, the combined shares of the old partners will be reduced. The ratio in which the old partners are surrendering their share of profit in favour of the new partner is called ***sacrificing ratio***. Any one partner or all partners may sacrifice in favour of the new partner. Again, the sacrifice may be in the old ratio or in other ratio.

Calculation of sacrificing ratio is necessary when the new partner will bring premium for goodwill in cash. This premium for goodwill is distributed between old partners in the ratio of their sacrifice.

Calculation of sacrificing ratio under different situations are shown below :

Situation 1 : When both old profit sharing ratio and new profit sharing ratio are given

In this case, sacrificing ratio is calculated by deducting new profit sharing ratio from the old profit sharing ratio.

Sacrificing Ratio = Old Ratio – New Ratio

The following ***Illustrations*** will clear the matter :

Illustration 8

A and B are partners sharing profits in the ratio of 3 : 2. C is admitted as a partner. The new profit sharing ratio among A, B and C is 5 : 3 : 2. Find out the sacrificing ratio.

Solution **Calculation of Sacrificing Ratio**

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
A	3/5	5/10	3/5 – 5/10 = 1/10 (Sacrifice)	A : B = 1/10 : 1/10 = 1 : 1
B	2/5	3/10	2/5 – 3/10 = 1/10 (Sacrifice)	
C	—	2/10	1/10 + 1/10 = 2/10 (Gain)	

Illustration 9

X and Y are partners sharing profits in the ratio of 3 : 2. They admit Z into partnership. The new profit sharing ratio is 3 : 3 : 2. Calculate the sacrificing ratio.

Solution **Calculation of Sacrificing Ratio**

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
X	3/5	3/8	3/5 – 3/8 = 9/40 (Sacrifice)	X : Y = 9 : 1
Y	2/5	3/8	2/5 – 3/8 = 1/40 (Sacrifice)	
Z	—	2/8	0 – 2/8 = 10/40 (Gain)	

Illustration 10

Gopal and Gobind are partners sharing profits and losses in the ratio of 3 : 2. From 1st January, 2015 they have decided to admit Guru as a partner. The new profit sharing ratio will be 7 : 5 : 8. Calculate the sacrificing ratio.

Solution **Calculation of Sacrificing Ratio**

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
Gopal	3/5	7/20	3/5 – 7/20 = 5/20 (Sacrifice)	Gopal : Gobind 5 : 3
Gobind	2/5	5/20	2/5 – 5/20 = 3/20 (Sacrifice)	
Guru	—	8/20	0 – 8/20 = 8/20 (Gain)	

Illustration 11

Sun and Moon are partners sharing profits in the ratio of 3 : 2. They admit Jupiter into the firm for 3/7th profit. The new profit sharing ratio is 11 : 9 : 15. Calculate the sacrificing ratio.

Solution **Calculation of Sacrificing Ratio**

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
Sun	3/5	11/35	3/5 – 11/35 = 10/35 (Sacrifice)	Sun : Moon
Moon	2/5	9/35	2/5 – 9/35 = 5/35 (Sacrifice)	= 10 : 5
Jupiter	—	15/35	0 – 15/35 = 15/35 (Gain)	= 2 : 1

Illustration 12

A, B and C are in partnership sharing profits and losses in the ratio of 5 : 4 : 1 respectively. Two new partners are introduced, D and E. The profits are now to be shared in the ratio of 3 : 4 : 1 : 2 : 2 respectively. Calculate the sacrificing ratio.

Solution **Calculation of Sacrificing Ratio**

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
A	5/10	3/12	5/10 – 3/12 = 15/60 (Sacrifice)	A : B : C
B	4/10	4/12	4/10 – 4/12 = 4/60 (Sacrifice)	= 15 : 4 : 1
C	1/10	1/12	1/10 – 1/12 = 1/60 (Sacrifice)	
D	—	2/12	0 – 2/12 = 10/60 (Gain)	
E	—	2/12	0 – 2/12 = 10/60 (Gain)	

Tutorial Note : Sum total of sacrifice must be equal to sum total of the gain.

Situation 2 : When the new partner gets his share of profit from all the partners and there is no change in the profit sharing ratio of the old partners.

In this case, new profit sharing ratio is to be calculated first. For calculating new ratio, new partner's share of profit is to be deducted from the total, i.e., 1. The balance should be divided between the old partners in the ***old*** ratio. After calculating new ratio, the sacrificing ratio is to be calculated in the usual manner.

Sacrificing Ratio = Old Ratio – New Ratio

The following Illustrations will clear the matter.

Illustration 13

A, B and C are partners sharing profits in the ratio of 4 : 3 : 2. D is admitted for 1/3rd share in future profits. What is the sacrificing ratio ?

Solution

Calculation of New Profit Sharing Ratio

D is admitted for 1/3rd share in future profits. Therefore, 1 – 1/3 = 2/3 is available to A, B and C which they will share in the ratio 4 : 3 : 2.

A's share will be = 4/9 of 2/3 = 8/27 B's share will be = 3/9 of 2/3 = 6/27

C's share will be = 2/9 of 2/3 = 4/27 D's share will be = 1/3 = 9/27

New profit sharing ratio = A : B : C : D = 8 : 6 : 4 : 9.

Calculation of Sacrificing Ratio

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
A	4/9	8/27	4/9 – 8/27 = 4/27 (Sacrifice)	A : B : C
B	3/9	6/27	3/9 – 6/27 = 3/27 (Sacrifice)	= 4 : 3 : 2
C	2/9	4/27	2/9 – 4/27 = 2/27 (Sacrifice)	
D	—	9/27	0 – 9/27 = 9/27 (Gain)	

Tutorial Note : It should be noted that in this case, the sacrificing ratio will always be the ***old*** profit sharing ratio.

Situation 3 : When new partner gets his share of profit from all the partners and there is a change in the profit sharing ratio of the old partners.

In this case also, new profit sharing ratio is to be calculated first. For calculating new ratio, new partner's share of profit is to be deducted from the total, i.e., 1. The balance should be divided between the old partners in the ***new*** ratio. After calculating new ratio, the sacrificing ratio is to be calculated in the usual manner.

Sacrificing Ratio = Old Ratio – New Ratio

The following ***Illustrations*** will clear the matter.

Illustration 14

A and B are partners sharing profits and losses in the ratio of 3 : 2. They admit C into the partnership for 1/4th share. In future, A and B will share the profits equally.

You are required to calculate the new profit sharing ratio and the sacrificing ratio.

Solution

Calculation of New Profit Sharing Ratio

C is coming for 1/4th share. The remaining 1 – 1/4 = 3/4th share will be divided between A and B equally. Therefore, the new profit sharing ratio will be :

A's share of profit = 1/2 of 3/4 = 3/8
B's share of profit = 1/2 of 3/4 = 3/8
C's share of profit = 1/4 = 2/8

New profit sharing ratio = A : B : C = 3 : 3 : 2.

Calculation of Sacrificing Ratio

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
A	3/5	3/8	3/5 – 3/8 = 9/40 (Sacrifice)	A : B = 9 : 1
B	2/5	3/8	2/5 – 3/8 = 1/40 (Sacrifice)	
C	—	2/8	0 – 2/8 = 10/40 (Gain)	

Illustration 15

P and Q are partners sharing profits and losses in the ratio of 4 : 3. They admit R into the partnership for 1/5th share. P and Q decide to share future profits in the ratio of 2 : 1. Calculate the new profit sharing ratio and the sacrificing ratio.

Solution

Calculation of New Profit Sharing Ratio

R is coming for 1/5th share. Therefore, the balance 4/5th (1 – 1/5) is to be shared by P & Q in the ratio of 2:1. Therefore, the new profit sharing ratio will be :

P's share of profit = 2/3 of 4/5 = 8/15
Q's share of profit = 1/3 of 4/5 = 4/15
R's share of profit = 1/5 = 3/15

New profit sharing ratio = P : Q : R = 8 : 4 : 3.

Calculation of Sacrificing Ratio

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
P	4/7	8/15	4/7 – 8/15 = 4/105 (Sacrifice)	P : Q = 4 : 17
Q	3/7	4/15	3/7 – 4/15 = 17/105 (Sacrifice)	
R	—	3/15	0 – 3/15 = 21/105 (Gain)	

Illustration 16

K, L and M are partners sharing profits and losses in the ratio of 3 : 2 : 1. They admit N for 1/6th share and M should retain his original share. You are required to calculate the new profit sharing ratio and the sacrificing ratio.

Solution

Calculation of New Profit Sharing Ratio

N is coming for 1/6th share and M retains his original share (which is also 1/6th). Therefore, total share of N and M is 1/6th + 1/6th = 2/6th. Balance of share remains for K and L is 1 – 2/6 = 4/6 or 2/3, which will be shared by K and L in the ratio 3 : 2.

Therefore, new profit sharing ratio will be :

K's share of profit = 3/5 of 2/3 = 6/15
L's share of profit = 2/5 of 2/3 = 4/15
M's share of profit = 1/6
N's share of profit = 1/6

New profit share ratio = K : L : M : N = 6/15 : 4/15 : 1/6 : 1/6 = 12 : 8 : 5 : 5.

Calculation of Sacrificing Ratio

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
K	3/6	12/30	3/6 – 12/30 = 3/30 (Sacrifice)	K : L = 3 : 2
L	2/6	8/30	2/6 – 8/30 = 2/30 (Sacrifice)	
M	1/6	5/30	1/6 – 5/30 = 0	
N	—	5/30	0 – 5/3 = 5/30 (Gain)	

Situation 4 : When the old partners surrender a part of their share in favour of the new partner.

In this case also new profit sharing ratio is to be calculated first. For calculating new share of profit of the old partner, the share surrendered will be deducted from the old share of profit. New partner's share of profit will be the total of share surrendered by the old partners in his favour. Sacrificing ratio will be calculated in the usual manner.

Sacrificing Ratio = Old Ratio – New Ratio

The following ***Illustrations*** will clear the matter.

Illustration 17

A and B are partners sharing profits in the ratio of 7 : 3. A surrenders 1/7th of his share and B surrenders 1/3rd of his share in favour of C, a new partner.

What is the new ratio and what is the sacrificing ratio ?

Solution **Calculation of New Profit Sharing Ratio**

Partners	Old Ratio	New Ratio	New Profit Sharing Ratio
A	7/10	7/10 – (1/7 of 7/10) = 7/10 – 1/10 = 6/10	A : B : C
B	3/10	3/10 – (1/3 of 3/10) = 3/10 – 1/10 = 2/10	= 6/10 : 2/10 : 2/10
C	—	1/10 + 1/10 = 2/10	= 6 : 2 : 2

Calculation of Sacrificing Ratio

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
A	7/10	6/10	7/10 – 6/10 = 1/10 (Sacrifice)	A : B
B	3/10	2/10	3/10 – 2/10 = 1/10 (Sacrifice)	= 1/10 : 1/10
C	—	2/10	1/10 + 1/10 = 2/10 (Gain)	= 1 : 1

Illustration 18

A and B are partners sharing profits in the ratio of 4 : 1. A surrenders 1/4th of his share and B surrenders 1/2 of his share in favour of C, a new partner. What is the new ratio and the sacrificing ratio ?

Solution **Calculation of New Profit Sharing Ratio**

Partners	Old Ratio	New Ratio	New Profit Sharing Ratio
A	4/5	4/5 – (1/4 of 4/5) = 4/5 – 1/5 = 3/5	A : B : C
B	1/5	1/5 – (1/2 of 1/5) = 1/5 – 1/10 = 1/10	= 3/5 : 1/10 : 3/10
C	—	1/5 + 1/10 = 3/10	= 6 : 1 : 3

Calculation of Sacrificing Ratio

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
A	4/5	6/10	4/5 – 6/10 = 2/10 (Sacrifice)	A : B
B	1/5	1/10	1/5 – 1/10 = 1/10 (Sacrifice)	= 2 : 1
C	—	3/10	0 – 3/10 = 3/10 (Gain)	

Situation 5 : When only one of the old partners is sacrificing.

Sometimes it may happen that only one partner is sacrificing. In this case, it will not be possible to calculate the sacrificing ratio. The total sacrifice of that partner will be equal to the share of profit sacrificed in favour of the new partner as well as the other old partner(s). The following ***Illustrations*** will clear the matter.

Illustration 19

Quick and Slow are in partnership sharing profits and losses in the ratio of 4 : 1. They admit Smooth into the firm for an equal share. Calculate the sacrificing ratio.

Solution **Calculation of Sacrificing Ratio**

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing / Gaining Ratio
Quick	4/5	1/3	4/5 – 1/3 = 7/15 (Sacrifice)	Here, sacrificing ratio cannot be calculated because only Quick is sacrificing 7/15th of his share.
Slow	1/5	1/3	1/5 – 1/3 = 2/15 (Gain)	However, on Smooth's admission, Slow is gaining 2/15th. The gaining ratio between Slow and Smooth will be 2 : 5.
Smooth	—	1/3	0 – 1/3 = 5/15 (Gain)	

Illustration 20

P, Q and R were on partnership terms sharing profits and losses in the ratio of 6 : 3 : 1. They decided to take S into partnership with effect from April 1, 2015. The new profit sharing ratio between P, Q, R and S will be 3 : 3 : 3 : 1. Find out the sacrificing ratio.

Solution **Calculation of Sacrificing Ratio**

<table>
<tr><th>Partners</th><th>Old Ratio</th><th>New Ratio</th><th>Sacrifice / Gain</th><th>Sacrificing / Gaining Ratio</th></tr>
<tr><td>P</td><td>6/10</td><td>3/10</td><td>6/10 – 3/10 = 3/10 (Sacrifice)</td><td rowspan="4">Here, sacrificing ratio cannot be calculated because only P is sacrificing 3/10th of his share.
However, on S's admission, R is gaining 2/10. The gaining ratio between R and S will be 2 : 1.</td></tr>
<tr><td>Q</td><td>3/10</td><td>3/10</td><td>3/10 – 3/10 = 0 (Sacrifice)</td></tr>
<tr><td>R</td><td>1/10</td><td>3/10</td><td>1/10 – 3/10 = 2/10 (Gain)</td></tr>
<tr><td>S</td><td>—</td><td>1/10</td><td>0 – 1/10 = 1/10 (Gain)</td></tr>
</table>

2. Goodwill

Meaning of Goodwill

Goodwill is viewed in accounting as the combination of those intangible attributes of a business which permit it to earn above-average profit. Goodwill may arise from such attributes of a business as a favourable location, superior management team, secret or patented manufacturing process, etc.

Goodwill has been defined by different persons in different manner. Some of these are reproduced here.

"*Goodwill is nothing more than the probability that the old customers will resort to the old place*" (Lord Eldon).

"*The value of business connections, the value of the probability that present customers will continue to buy in spite of the allurements of competing dealers*." (Hatfield)

"*The element of an established business which makes the business as a going concern worth more than its book value, that is, its net worth as shown by the books*." (Walton)

"*It is the influence that the proprietor or his organisation has upon the purchasing public through which he is enabled to attract and retain patronage*." (Wildman)

"*Goodwill is the benefit and advantage of good name, reputation and connection of business. It is the attractive force which brings in customers. It is the one thing which distinguishes an old established business from a new business at its start — Goodwill is composed of a variety of elements. It differs in the composition in different trades and in different business in the same trade."* (Lord Maenaghten)

Nature of Goodwill

1. It is an intangible asset but not a fictitious asset.
2. The value of goodwill is highly dependent on the subjective judgment of the valuer.
3. It cannot have an existence separate from the organisation.
4. It is difficult to place a cost on goodwill. It is fluctuating with the changing fortunes of the company.

Classification of Goodwill

Goodwill can be classified into two categories :

(1) Purchased Goodwill

(2) Non-Purchased or Inherent Goodwill.

Purchased Goodwill When one business is taken over by another business, the excess of purchase consideration over its net asset value is referred to as ***purchased goodwill***.

The following are the important features of purchased goodwill :

(i) It arises on purchase of a business.

(ii) It is recorded in the books of account.

(iii) It is amortised (i.e., depreciated) over its useful economic life.

(iv) It is shown in the Balance Sheet as an asset.

Non-purchased Goodwill Non-purchased goodwill is referred to as internally generated goodwill which arises from a number of attributes that an on- going business possesses.

The following are the important features of non-purchased goodwill :

(i) It is internally generated over years.

(ii) A cost cannot be placed on this type of goodwill.

(iii) It is not recorded generally in the books of account.
(iv) Valuation depends on subjective judgment of the valuer.

Positive and Negative Goodwill

Since goodwill is the difference between the value of a business as a whole and the fair value of its separate net assets, goodwill can be both positive and negative.

Non-purchased goodwill exists in all businesses. Positive goodwill arises when the value of the business as a whole is more than the fair value of the separate net assets. If the real worth of the business is less than the sum of the fair values of the separate net assets, it represents negative goodwill.

Treatment of Purchased Goodwill

Following are the possible methods of accounting for purchased goodwill: (a) Carry it as an asset in the Balance Sheet indefinitely; (b) amortise it over its estimated useful life; (c) adjust against capital reserves on acquisition; and (d) charge as an expense against profits in the year of acquisition.

At the time of admission of a new partner, it is necessary to value the goodwill and due credit should be given to the old partners for their efforts to bring the firm to the present stage of super-profit earning capacity and their sacrifice of a fraction of future super-profits. On admission, a new partner acquires a claim to share the future super-profits and he should compensate the old partners for the sacrifices made by them.

Factors to be Taken into Consideration in Valuing Goodwill

1. The prestige and reputation attached to the name of a business or its products (for example, Arrow shirts, Levi's jeans, etc.).
2. The location of the business premises (for example, news magazine store or fast food centre next to railway station).
3. Possession of patents, trademarks, brand names and specified technical knowhow (for example, intel pentium chip).
4. Superior management team.
5. Outstanding sales force.
6. Good labour relations.
7. Good public 'image'.
8. Number of outlets for products.
9. Number of service locations for products.
10. Experienced workforce.
11. Existing contracts for supply of goods in future (for example, defence equipment supply).
12. Established list of customers.
13. Established licence to trade.
14. Good relation with customers.
15. Favourable government regulation.

Need for Valuation of Goodwill

Purchased goodwill arises at the time of acquisition of business. In this case, the value of goodwill is the difference between the purchase consideration and net assets taken over. However, the need for valuation of non-purchased goodwill arises in the following circumstances :

1. When a new partner is admitted.
2. When an existing partner retires or dies.
3. When there is a change in the profit sharing ratio of the existing partners without admission, retirement or death of a partner.
4. When there is amalgamation of two or more partnership firms.
5. When a partnership firm is converted into a limited company.
6. Where a partnership firm is sold.

Methods of Valuation of Non-Purchased Goodwill

At the time of valuation of goodwill, the provisions of the partnership deed must be taken into consideration and valuation should be done on that line. If the partnership deed is silent, the valuation should be done in such a manner as must have been agreed upon by the partners. Generally calculation of goodwill is based on "number of years' purchase" of average profit or super profit.

Generally the following methods are adopted for the valuation of the goodwill :

(a) Average profit method
(b) Super profit method
(c) Capitalisation of average profit method
(d) Capitalisation of super profit method
(e) Annuity method.

(a) Average Profit Method Under this method goodwill is calculated by multiplying the 'average profit' by a certain number of years' purchases as agreed by the partners. Average profit is calculated on the basis of the past few years' profits. While calculating the average profit, precaution should be taken in respect of any abnormal items of profit or loss which may affect future profit. (***Note*** : Add abnormal losses and deduct abnormal gains).

The following steps are followed for calculating goodwill under this method :

Step 1 : Calculate normal profit of each year after adding abnormal losses and deducting abnormal gains.

Step 2 : Calculate average profit as follows :

$$\text{Average Profit} = \frac{\text{Total Profits (after adjustments)}}{\text{Number of years}}$$

Step 3 : Calculate goodwill as follows : Goodwill = Average Profit × Number of years' purchase

Illustration 21

X, Y and Z are partners sharing profits and losses in the ratio of 5 : 3 : 2. They admit A for 1/5th share. For the purpose of admission of A, the goodwill of the firm should be valued on basis of 3 years' purchase of last 4 years' average profits. The profits were :

Year	₹
2011	1,00,000
2012	1,20,000
2013	1,30,000
2014	1,50,000

Calculate the value of goodwill.

Solution

Calculation of Average Profit

Year	Profit (₹)
2011	1,00,000
2012	1,20,000
2013	1,30,000
2014	1,50,000
Total Profit	5,00,000

Average Profit = ₹ 5,00,000 / 4 = ₹ 1,25,000.

Goodwill = Average Profit × Number of years' purchase = ₹ 1,25,000 × 3 = ₹ 3,75,000.

Illustration 22

Ram and Rahim are partners sharing profits and losses in the ratio of 3 : 2. They admit Laxman for 1/5th share. For this purpose, the goodwill of the firm should be valued on the basis of 3 years' purchase of last 5 years average profits. The profits were :

Year	₹
2010	50,000
2011	60,000
2012	40,000

2013	65,000
2014	80,000

The profit of 2013 was calculated after charging ₹ 5,000 for loss of goods by fire. Calculate goodwill of the firm.

Solution

Calculation of Average Profit

Year	Profit (₹)
2010	50,000
2011	60,000
2012	40,000
2013	70,000 (See Note)
2014	80,000
Total Profit	3,00,000

Average Profit = ₹ 3,00,000 / 5 = ₹ 60,000.

Goodwill = Average Profit × Number of years' purchase = ₹ 60,000 x 3 = ₹ 1,80,000.

Note: In 2013, profit of ₹ 65,000 was arrived at after charging an abnormal item of ₹ 5,000 (loss of goods by fire). Therefore, the normal profit of 2013 = ₹ 65,000 + 5,000 = ₹ 70,000.

Illustration 23

A, B and C were in partnership sharing profits and losses in ratio 6 : 3 : 1. They decided to take D into partnership from 1st January, 2015. For this purpose, goodwill is to be valued at 60% of the average annual profits of the previous three or four years, whichever is higher.

The average profits for the purpose of goodwill for the past four years were :	₹
Year ending on 31st December 2014	48,000
Year ending on 31st December 2013	30,300
Year ending on 31st December 2012	31,200
Year ending on 31st December 2011	42,200

Calculate the value of goodwill.

Solution **Calculation of Average Profit**

Based on 3 years' Profits	₹	Based on 4 years' Profits	₹
2014	48,000	2014	48,000
2013	30,300	2013	30,300
2012	31,200	2012	31,200
	1,09,500	2011	42,200
Average Profit = ₹ 1,09,500 / 3 = ₹ 36,500.			1,51,700
		Average Profit = ₹ 1,51,700 / 4 = ₹ 37,925.	

4 years' average profit is higher than the 3 years' average profit. Therefore, the value of goodwill will be 60% of ₹ 37,925 = ₹ 22,755.

Illustration 24

A, B and C are partners sharing profits and losses equally. They agree to admit D for equal share. For this purpose, the value of goodwill is to be calculated on the basis of 4 years' purchase of average profit of last 5 years. The profits were :

Year	₹
2010	6,000 (Profit)
2011	14,000 (Profit)
2012	20,000 (Profit)
2013	28,000 (Profit)
2014	24,000 (Loss)

On 1st January, 2014 a moped costing ₹ 8,000 was purchased and debited to travelling expenses account, on which depreciation is to be charged @ 25%. Calculate the value of goodwill after adjusting the above.

Solution **Calculation of Average Profit**

Year	₹
2010	6,000 (Profit)
2011	14,000 (Profit)
2012	20,000 (Profit)
2013	28,000 (Profit)
2014	*18,000 (Loss)
Total Profit	50,000

Average Profit = ₹ 50,000 / 5 = ₹ 10,000.

Goodwill = Average Profit × Number of years' Purchase = ₹ 10,000 × 4 = ₹ 40,000.

***Note** = In 2014, a moped costing ₹ 8,000 was purchased but it was wrongly debited to Travelling Expenses Account. After rectification, the loss of 2014 will be reduced by ₹ 8,000. The depreciation on moped ₹ 2,000 (25% of ₹ 8,000) was not charged to Profit and Loss Account of 2014. Therefore, the final loss of 2014 will be : ₹ 24,000 – 8,000 + 2,000 = ₹ 18,000.

Illustration 25

Red and White are partners sharing profits and losses in the ratio of 60 : 40. Due to financial difficulties, they decided to admit Blue as partner from 1.4.2015 on the following terms :

(1) Blue will be given 40% share of the profit.

(2) Goodwill of the firm will be valued at 2 years' purchase of 3 years' normal average profits of the firm.

The profits of the previous three years were as follows :

For the year ended 31.3.2015 — Profit ₹ 30,000 (after debiting loss of stock by fire ₹ 40,000).

For the year ended 31.3.2014 — Loss ₹ 80,000 (includes voluntary retirement compensation paid ₹ 1,10,000).

For the year ended 31.3.2013 — Profit ₹ 1,05,000 (includes a profit of ₹ 25,000 on the sale of assets).

You are required to value the goodwill.

Solution **Calculation of Normal Profits**

Year ended on 31st March, 2015 (₹)	2015 (₹)	2014 (₹)	2013 (₹)
Profit / Loss for the year	30,000	(80,000)	1,05,000
Add : Abnormal loss of stock by fire	40,000	—	—
Add : Voluntary retirement compensation	—	1,10,000	—
Less : Profit on sale of assets	—	—	25,000
Normal Profits	70,000	30,000	80,000

Normal Average Profit = ₹ (70,000 + 30,000 + 80,000) /3 = ₹ 60,000

Goodwill = 2 years' purchase of 3 years' normal average profit = ₹ 60,000 × 2 = ₹ 1,20,000.

The main disadvantage of the above method of valuation of goodwill is that any trend in the level of profitability is not reflected. If the simple average is used, i.e., each year's profits are given the same weightage, no discrimination is made between a business that has rising profits and one that has falling profits. To avoid this, weighted average profit can be calculated by giving more weightage to the profits of recent years.

The weighted average is calculated as follows :

$$\text{Weighted Average Profit} = \frac{\text{Total Products (Profit} \times \text{Weight)}}{\text{Total Weights}}$$

In this case, goodwill is calculated as follows :

Goodwill = Weighted Average Profit × Number of years' Purchase

Illustration 26

Sachin and Sourav are partners sharing profits and losses in the ratio of 3 : 2 and for the last four years they have been entitled to annual salaries of ₹ 1,20,000 and ₹ 1,00,000 respectively. The annual accounts have shown the following net profit before charging partners' salaries :

Year ended on 31st December 2012 — ₹ 3,50,000; 2013 — ₹ 2,45,000; and 2014 — ₹ 3,20,000.

On 1st January, 2015 David is admitted to the partnership for 2/5 shares (without any salary). The goodwill for this purpose is to be valued at 4 years' purchase of weighted average profit of last three years (after allowing same salaries to partners); profits to be weighted as 1 : 2 : 3, the greatest weight being given to the last year. Calculate the value of goodwill.

Solution **Calculation of Weighted Average Profit**

Year	Profits before Salary	Salary	Profits after Salary	Weights	Products
2012	3,50,000	2,20,000	1,30,000	1	1,30,000
2013	2,45,000	2,20,000	25,000	2	50,000
2014	3,20,000	2,20,000	1,00,000	3	3,00,000
				6	4,80,000

Weighted Average Profit = ₹ 4,80,000 / 6 = ₹ 80,000.

Goodwill = Weighted Average Profit × Number of Years' Purchase = ₹ 80,000 × 4 = ₹ 3,20,000.

(b) Super Profit Method Under this method goodwill is calculated by multiplying the 'super profit' by a certain number of years' purchase as agreed by the partners. 'Super profit' is the excess of actual profit over the normal profit. The super profit is the return from risking money in a business over and above that could be earned by depositing that money elsewhere at a fixed rate of interest. For calculating goodwill under this method, the following steps are followed :

Step 1 : Calculate capital employed.
Step 2 : Calculate normal profit by multiplying capital employed with normal rate of return.
Step 3 : Calculate average maintainable profit of the firm.
Step 4 : Calculate the difference between the average maintainable profit and normal return as calculated above. This difference is called ***super-profit*** (if it is positive).
Step 5 : Multiply that super profit by the number of years' purchase. The product will be called ***goodwill***.

Illustration 27

X and Y are partners sharing profits and losses equally. They decide to admit Z for an equal share. For this purpose the goodwill of the firm is to be valued at 4 years' purchase of super profit. The capital employed in the firm is ₹ 2,00,000. The normal rate of return may be taken as 12% p.a. Average maintainable profit of the firm is ₹ 30,000. Calculate the value of goodwill.

Solution

Capital employed = ₹ 2,00,000 (given)
Normal profit = Capital employed × normal rate of return = ₹ 2,00,000 × 12% = ₹ 24,000
Average maintainable profit = ₹ 30,000 (given)
Super profit = Average maintainable profit – normal profit = ₹ 30,000 – ₹ 24,000 = ₹ 6,000
Goodwill = Super profit × No. of years' purchase = ₹ 6,000 × 4 = ₹ 24,000.

Illustation 28

A firm earned net profits during the last five years as follows :
I — ₹ 7,000; II — ₹ 6,500; III — ₹ 8,000; IV — ₹ 7,500; and V — ₹ 6,000.

The capital investment of the firm is ₹ 40,000. A fair return on capital in the market is 12%. Find out the value of goodwill of the business if it is based on three years' purchase of average super profits of the past five years.

Solution

Total profit for the last 5 years = ₹ (7,000 + 6,500 + 8,000 + 7,500 + 6,000) = ₹ 35,000.
Average maintainable profit = ₹ 35,000 / 5 = ₹ 7,000.
Capital employed = ₹ 40,000 (given)
Normal profit = Capital employed × Expected rate of return = ₹ 40,000 × 12% = ₹ 4,800
Super profit = Average profit — Normal profit = ₹ 7,000 – ₹ 4,800 = ₹ 2,200.
Goodwill = Super profit × No. of years' purchase = ₹ 2,200 × 3 = ₹ 6,600.

Illustration 29

On April 1, 2015, an existing firm had assets of ₹ 75,000 including cash of ₹ 5,000. The Partners' Capital Accounts showed a balance of ₹ 60,000 and reserve constituted the rest. If the normal rate of return is 10% and the goodwill of the firm is ₹ 24,000 at 4 years' purchase of super profits, find the average profits of the firm.

Solution

Goodwill is 4 years' purchase of super profits, which is ₹ 24,000.
Therefore, Goodwill = Super profits × 4
or, ₹ 24,000 = Super profits × 4
or, Super profits = ₹ 24,000 / 4 = ₹ 6,000.
Again, Normal profits = Capital employed × Normal rate of return
= (Capital + Reserve) × 10% = ₹ 75,000 × 10% = ₹ 7,500.
Super profits are the excess of average profits over normal profits.
Therefore, Super profits = Average profits – Normal profits
or, ₹ 6,000 = Average profits – ₹ 7,500
or, Average profits = ₹ 7,500 + ₹ 6,000 = ₹ 13,500.

Illustration 30

On 1st April, 2015, an existing firm had assets of ₹ 75,000 including cash of ₹ 5,000. Its creditors amounted to ₹ 5,000 on that date. The firm had a reserve fund of ₹ 10,000 while Partners' Capital Accounts showed a balance of ₹ 60,000. If the normal rate of return is 20% and the goodwill of the firm is valued at ₹ 24,000, at 4 years' purchase of super profit, find the average profits per year of the existing firm.

Solution

Goodwill is 4 years' purchase of super profits, which is ₹ 24,000.

Therefore, Goodwill = Super profits × 4

or, ₹ 24,000 = Super profits × 4

or, Super profits = ₹ 24,000 / 4 = ₹ 6,000

Again, Normal profits = Capital employed × Normal rate of return

= (Capital + reserve) × 20%

= (₹ 60,000 + 10,000) × 20%

= ₹ 14,000.

Super profits are the excess of average profits over normal profits.

Therefore, Super profits = Average profits – Normal profits.

or, ₹ 6,000 = Average profits – ₹ 14,000.

or, Average profits = ₹ 14,000 + ₹ 6,000 = ₹ 20,000.

Illustration 31

The following particulars are available in respect of the business carried by A and K.

(i) Capital employed ₹ 3,00,000.

(ii) Trading profit : 2011 — ₹ 61,000; 2012 — ₹ 75,000; 2013 — ₹ 10,000 (Loss) and 2014 — ₹ 1,05,000.

(iii) Rate of return on capital invested in this type of business 12%.

(iv) Remuneration from alternative employment of the partners who are engaged full time in this business ₹ 18,000 p.a.

You are required to calculate the value of goodwill on the basis of 3 years' purchase of super profits of the business calculated on the average profit of the last 4 years.

Solution

Calculation of Average Profits

Particulars	₹
2011	61,000
2012	75,000
2013	(10,000)
2014	1,05,000
	2,31,000
Average Profit = ₹ 2,31,000 / 4 = 57,750	

Calculation of Super Profit

Particulars	₹
Average Profits	57,750
Less: Remuneration of alternative employment	18,000
Average Trading Profits	39,750
Less: Normal Interest @ 12% on ₹ 3,00,000	36,000
Super Profits	3,750
Goodwill = 3 years' purchase of super profits = ₹ 3,750 × 3 = ₹ 11,250.	

(c) Capitalization of Average Profit Method Under this method, the firm is valued by applying the following formula :

$$Total\ value\ of\ the\ firm = \frac{Average\ maintainable\ profit}{Normal\ rate\ of\ return} \times 100$$

After calculating the value of the firm in the above manner, the net assets of the firm is deducted from this and the balance is goodwill.

Now, if we take the above example then the total value of the firm will be:

15,000/10 x 100 = ₹ 1,50,000. The net assets of the firm are ₹ 1,00,000.

Therefore, the value of goodwill will be ₹ 1,50,000 – ₹ 1,00,000 = ₹ 50,000.

(d) Capitalization of Super-profits Method Under this method, goodwill is calculated by capitalizing super-profits at agreed rate. The goodwill is calculated directly by applying the following formula:

$$Goodwill = \frac{P - rc}{m}$$

where, P = Adjusted forecast maintainable profit;
r = Normal rate of return;
c = Capital employed;
m = Capitalization ratio.

Illustrative Example 1

(i) The adjusted forecast maintainable profit is ₹ 40,000; (ii) Capital employed is ₹ 2,00,000; (iii) Normal rate of return is 15%; and (iv) Capitalization rate is 20%. Calculate goodwill.

$$Goodwill = \frac{40{,}000 - 15\% \times 2{,}00{,}000}{20\%} = ₹\ 50{,}000$$

(e) Annuity Method Under this method, goodwill is calculated by taking the average super-profit as the value of an annuity over a certain number of years. The present value of the above annuity, discounted at the given rate of interest (normal rate of return) is the value of the goodwill.

Therefore, the value of the goodwill is: Average super-profits x Annuity.

The following formula can also be applied for valuing goodwill:

$$V = \frac{a}{i}\left[1 - \frac{1}{(1 + i)^n}\right]$$

where, V = Value of Goodwill;
a = Average super profit;
i = Rate of interest per annum
n = Number of years.

Illustrative Example 2

The net profits of a business, after providing for income-tax for the last 5 years were: ₹ 80,000; ₹ 1,00,000; ₹ 1,20,000; ₹ 1,25,000 and ₹ 2,00,000 respectively. The capital exmployed in the business is ₹ 10,00,000 and the normal rate of return is 10%. Calculate the value of the goodwill on the basis of the annuity method taking the present value of the annuity of Re 1 for 5 years at 10% is 3.7907 (approx).

Solution

Total profits for the 5 years	₹ 6,25,000
Average profit (₹ 6,25,000/5)	₹ 1,25,000
Less: Normal return (10% on ₹ 10,00,000)	₹ 1,00,000
Average super-profit	₹ 25,000

Therefore, goodwill = Average super-profit x annuity = ₹ 25,000 x 3.7907 (approx) = ₹ 94,768 (approx).

Alternatively, Given that: a = ₹ 25,000; n = 5; and i = 10%. Therefore, the value of goodwill will be as follows:

$$V = ₹\ \frac{25{,}000}{10\%}\left[1 - \frac{1}{(1 + 10\%)^5}\right] = ₹\ 94{,}770 \text{ (approx.)}$$

Illustrative Example 3

A partnership firm is about to admit more partners and decides that goodwill is to be raised in the books. The partners are considering 3 different methods of calculating each:

(a) On the basis of two years' purchase of the average profits over the last 5 consecutive years. These were: 2014 — ₹ 36,000; 2013 — ₹ 28,000; 2012 — ₹ 26,000; 2011 — ₹ 38,000; 2010 — ₹ 46,000.

(b) On the basis of three years' purchase of total super-profits of the last 5 years. For this purpose the normal profit is to be taken as ₹ 30,000 p.a.

(c) On the basis of capitalizing the average super-profit. For this purpose the following information is provided: (i) adjusted forecast maintainable profits ₹ 60,000; (ii) normal rate of return 20%; (iii) capital employed ₹ 2,00,000; and (iv) the capitalisation rate 25%.

You are required to calculate the value of the goodwill on the basis of each of the 3 methods (a) to (c) above.

Solution

(a) Total profit of the last 5 years = ₹ 1,74,000. Average profit is ₹ 1,74,000/5 = ₹ 34,800.
Therefore, goodwill = ₹ 34,800 x 2 = ₹ 69,600.

(b) Average profit (as above) = ₹ 34,800 Less: Normal profit ₹ 30,000 = Super-profit ₹ 4,800. The total super-profits for 5 years = ₹ 4,800 x 5 = ₹ 24,000. Therefore, Goodwill = ₹ 24,000 x 3 = ₹ 72,000.

(c) Applying the formula: $Goodwill = \frac{P - rc}{m}$

{₹ 60,000 − (₹ 2,00,000 × 20%)}/25% = ₹ (60,000 − ₹ 40,000)/.25 = ₹ 80,000.

where, P = Adjusted forecast maintainable profit;
r = Normal rate of return;
c = Capital employed;
m = Capitalization ratio.

The Admission of a New Partner and Treatment of Goodwill

At the time of admission of a partner, an adjustment is necessary in respect of goodwill. The goodwill can be treated in the books of account in any of the following manner :

Case 1 : When premium for goodwill is paid privately.

Case 2 : When premium of goodwill is paid and retained in the business.

Case 3 : When premium for goodwill is paid and withdrawn by the old partners.

Case 4 : When the incoming partner cannot bring premium for goodwill.

Case 5 : When a loan account is raised in the name of the incoming partner.

Case 6 : Hidden goodwill.

Case 7 : Goodwill raised and written-off.

Case 8 : When the incoming partner brings personal goodwill into the business.

Case 9 : When goodwill appears in the old Balance Sheet and the incoming partner pays premium for goodwill or pays partly the premium for goodwill.

Case 10 : When the incoming partner can bring only a portion of the required amount of premium for goodwill. There is no goodwill appearing in the Balance Sheet.

Case 1 : When premium for goodwill is paid privately

Sometimes, the new partner may pay premium to the old partners privately. In this case, no entry is passed in the books of the firm as it is not a transaction of the firm.

Case 2 : When premium for goodwill is paid and retained in the business

When cash is brought in by the new partner for goodwill, it is called premium. This premium is to be shared by the existing partners in the sacrificing ratio. The sacrificing ratio is to be calculated by deducting new ratio from old ratio for each partner.

Accounting Entries

1. For premium for goodwill brought in cash by the new partner

Cash / Bank Account Dr. [Actual amount of premium]
To Premium for Goodwill Account

2. For capital brought in cash by the new partner

Cash / Bank Account Dr. [Actual amount of capital]
To New Partners' Capital Account

3. For sharing of premium for goodwill

Premium for Goodwill Account Dr. [Actual amount of premium]
To Old Partners' Capital Account [Sacrificing ratio]

Illustration 32

Sachin and Kapil are partners sharing profits and losses in the ratio of 2 : 1. They agree to admit Amit into partnership who brings in ₹ 24,000 for 1/4th share of goodwill.

Make necessary journal entries to record the above transactions.

Solution

In the books of the Firm
Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
	Bank A/c Dr.		24,000	
	To Premium for Goodwill A/c			24,000
	(Being the amount of premium for goodwill brought in by Amit)			

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
	Premium for Goodwill A/c Dr.		24,000	
	To Sachin Capital A/c (Note 1)			16,000
	To Kapil Capital A/c			8,000
	(Being the premium for goodwill brought in by Amit, shared by Sachin and Kapil on the basis of their sacrifice)			

Working Note : (1) Since there is no change in the profit sharing ratio between Sachin and Kapil, their old ratio will be their sacrificing ratio.

Illustration 33

On 1st January, 2015, A and B sharing profits two-thirds and one-third respectively, agree to admit C into partnership on condition that he pays ₹ 30,000 as capital and ₹ 9,000 for one-sixth share of goodwill which he acquires equally from A and B. Give journal entries necessary to record these transactions.

Solution

In the books of the Firm
Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
2015				
Jan. 1	Bank A/c Dr.		39,000	
	To Premium for Goodwill A/c			9,000
	To C Capital A/c			30,000
	(Being the amount of premium for goodwill and capital brought in by C)			
"	Premium for Goodwill A/c Dr.		9,000	
	To A Capital A/c			4,500
	To B Capital A/c			4,500
	(Being the premium for goodwill brought in by C, shared by A and B on the basis of their sacrifice)			

Illustration 34

A and B are in partnership with capitals of ₹ 10,000 and ₹ 6,000 and sharing profits two-thirds and one-third respectively. On 1st January, 2015, they agree to admit C into partnership with a one-sixth share on condition that he brings in ₹ 5,500 (₹ 4,000 to represent his capital and ₹ 1,500 to represent goodwill). The whole of ₹ 5,500 is to remain in the business.

Give journal entries to record these transactions, the relative shares of A and B remaining the same as before and state the future shares of the partners.

Solution

In the books of the Firm
Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
2015	Bank A/c Dr.		5,500	
Jan. 1	To C Capital A/c			4,000
	To Premium for Goodwill A/c			1,500
	(Being the amount of capital and premium for goodwill brought in by C)			
"	Premium for Goodwill A/c Dr.		1,500	
	To A Capital A/c (Note 1)			1,000
	To B Capital A/c (Note 1)			500
	(Being the premium for goodwill shared by the old partners on the basis of their sacrifice)			

Working Note : (1) Since the profit sharing ratio between A and B does not change after the admission of C, their old profit sharing ratio is their sacrificing ratio.

Calculation of New Profit Sharing Ratio :

C joins the business for 1/6th share. The remaining 5/6th (1 – 1/6) will be shared by A and B in the ratio of 2 : 1. Therefore, the new profit sharing ratio among A, B and C is as under : A — 5/6 × 2/3 = 10/18; B — 5/6 × 1/3 = 5/18; C = 1/6 or, A : B : C = 10 : 5 : 3.

Illustration 35

X and Y are partners sharing profits and losses in the ratio of 3 : 2. Z is coming in as a new partner who pays ₹ 25,000 as premium for goodwill. The profit sharing ratio among X, Y and Z is equal.

Pass necessary journal entries assuming that premium money is retained in the business.

Solution

In the books of the Firm
Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
	Cash A/c Dr.		25,000	
	To Premium for Goodwill A/c			25,000
	(Being the amount of premium for goodwill brought in by Z)			
	Premium for Goodwill A/c Dr.		25,000	
	To X Capital A/c (Note 1)			20,000
	To Y Capital A/c (Note 1)			5,000
	(Being the premium for goodwill shared by X and Y in the ratio of 4 : 1)			

Working Note : (1) The premium for goodwill of ₹ 25,000 brought in by Z is to be shared by X and Y in the ratio of their sacrifice which is calculated as under :

Calculation of Sacrificing Ratio

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
X	3/5	1/3	3/5 – 1/3 = 4/15 (Sacrifice)	X : Y = 4 : 1
Y	2/5	1/3	2/5 – 1/3 = 1/15 (Sacrifice)	
Z	—	1/33	0 – 1/3 = 5/15 (Gain)	

X will get 4/5th of ₹ 25,000 = ₹ 20,000; Y will get 1/5th of ₹ 25,000 = ₹ 5,000.

Illustration 36

A, B and C are partners, sharing profits in the ratio of 4 : 3 : 2. D is admitted as a partner who brings in ₹ 30,000 as his capital and ₹ 10,000 for his share of goodwill. The new profit sharing ratio will be A, B, C and D = 3 : 2 : 2 : 2.

Journalise the above arrangement in the books.

Solution

In the books of the Firm
Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
	Bank A/c Dr.		40,000	
	To D Capital A/c			30,000
	To Premium for Goodwill A/c			10,000
	(Being the amount of capital and premium for goodwill brought in by D)			
	Premium for Goodwill A/c (Note 1) Dr.		10,000	
	To A Capital A/c			5,000
	To B Capital A/c			5,000
	(Being the premium for goodwill credited to A and B on the basis of their sacrifice)			

Working Note : (1) The premium for goodwill of ₹ 10,000 brought in by D will be shared by the existing partners in the sacrificing ratio. Sacrificing ratio is calculated as follows :

Calculation of Sacrificing Ratio

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
A	4/9	3/9	4/9 – 3/9 = 1/9 (Sacrifice)	A : B = 1 : 1
B	3/9	2/9	3/9 – 2/9 = 1/9 (Sacrifice)	
C	2/9	2/9	2/9 – 2/9 = Nil	
D	—	2/9	0 – 2/9 = 2/9 (Gain)	

The premium for goodwill will be shared between A and B equally. C will not get anything because he does not sacrifice anything.

Alternatively,

The premium for goodwill to be shared by the existing partners can be ascertained as follows :

D brings in ₹ 10,000 as premium for goodwill for 2/9th share. Therefore, the total value of goodwill of the firm = ₹ 10,000 × 9/2 = ₹ 45,000. The sharing of premium money is calculated as follows :

Particulars	A (₹)	B (₹)	C (₹)	D (₹)
Right of goodwill before admission (4 : 3 : 2)	20,000	15,000	10,000	—
Right of goodwill after admission (3 : 2 : 2 : 2)	15,000	10,000	10,000	10,000
Sacrifice (–) / Gain (+)	(–) 5,000	(–) 5,000	—	(+)10,000

In this method there is no need of calculating sacrificing ratio. The amount of premium to be shared can be calculated directly. Therefore, A will get ₹ 5,000 and B will get ₹ 5,000.

Illustration 37

P and Q are in partnership sharing profits and losses in the ratio 4 : 1. They admit R into the firm, R paying a premium of ₹ 60,000 for an equal share. Draft journal entries showing the appropriation of premium money.

Solution

R pays ₹ 60,000 as Premium for Goodwill. Therefore, total value of the Goodwill is ₹ 60,000 x 3/1 = ₹ 1,80,000. The future profit-sharing ratio among partners are equal and R is coming for 1/3rd share. The appropriation of premium money is calculated as:

Particulars	P (₹)	Q (₹)	R (₹)
Right of goodwill before admission (4 : 1)	1,44,000	36,000	—
Right of goodwill after admission (1 : 1 : 1)	60,000	60,000	60,000
Sacrifice (–) / Gain (+)	(–) 84,000	(+) 24,000	(+) 60,000

We get, the sacrifice of P is ₹ 84,000, of which he gives to Q (₹ 24,000) and to R (₹ 60,000). Therefore, entire premium money brought in by R to be credited to P. Also, Q is to pay P an amount equal to ₹ 24,000.

Journal **Dr.** **Cr.**

	C Capital A/c	Dr.		12,000	
	E Capital A/c	Dr.		15,000	
	Premium for Goodwill A/c	Dr.		30,000	
	To A Capital A/c				45,000
	To B Capital A/c				12,000
	(Being the adjustment for goodwill)				

Working Notes : D is paying ₹ 30,000 for 2/12th share.
Therefore, total value of goodwill = ₹ 30,000 x 12/2 = ₹ 1,80,000

Particulars	A (₹)	B (₹)	C (₹)	D (₹)	E (₹)
Right of goodwill before admission	90,000	72,000	18,000	—	—
Right of goodwill after admission	45,000	60,000	30,000	30,000	15,000
Sacrifice (–) / Gain (+)	(–) 45,000	(–) 12,000	(+) 12,000	(+) 30,000	(+) 15,000

Illustration 39

E and F are partners sharing profits and losses in the ratio of 4 : 1 respectively. G is admitted as a partner for which he pays ₹ 10,000 as premium for goodwill and in future E, F and G decide to share profits and losses in the ratio of 2 : 1 : 1 respectively.

You are required to pass a single journal entry to give effect to the above arrangement.

Solution **In the books of the Firm**

Journal

Date	Particulars		L.F.	Dr. ₹	Cr. ₹
	Bank A/c	Dr.		10,000	
	F Capital A/c	Dr.		2,000	
	To E Capital A/c				12,000
	(Being the premium and the proportionate amount of F's gain credited to E)				

Working Note :

(1) G brings in ₹ 10,000 as premium for goodwill for 1/4 share in the profit. Therefore, the total value of goodwill of the firm = ₹ 10,000 × 4/1 = ₹ 40,000. The ***sharing of premium money is calculated*** as under :

Particulars	E (₹)	F (₹)	G (₹)
Right of goodwill before admission (4 : 1)	32,000	8,000	—
Right of goodwill after admission (2 : 1 : 1)	20,000	10,000	10,000
Sacrifice (–) / Gain (+)	(–) 12,000	(+) 2,000	(+) 10,000

Case 3 : When premium for goodwill is paid and withdrawn by the old partners.

In this case also, the premium brought in by the new partner will be shared by the old partners in the sacrificing ratio. However, the premium money is not retained in the business fully or partly.

Accounting Entries

1. For premium for goodwill brought in cash by the new partner

Cash / Bank Account Dr. [Actual amount of premium]
 To Premium for Goodwill Account

2. For capital brought in by the new partner

Cash / Bank Account Dr. [Actual amount of capital]
 To New Partners' Capital Account

3. For sharing of premium for goodwill

Premium for Goodwill Account Dr. [Actual amount of premium]
 To Old Partners' Capital Account [Sacrificing ratio]

4. For withdrawal of premium money fully / partly

Old Partners' Capital Account Dr. [Amount withdrawn]
 To Cash / Bank Account

Illustration 40

Strong and Weak are partners sharing profits and losses in the ratio of 4 : 3. They admit Able into partnership for 1/5th share who pays ₹ 7,000 in cash for goodwill. Strong and Weak decide to share future profits equally between themselves. No Goodwill Account appears in the books. They withdrew the premium money from business. Pass necessary journal entries.

Solution **In the books of Strong, Weak and Able**

Journal

Date	Particulars		L.F.	Dr. ₹	Cr. ₹
	Cash A/c	Dr.		7,000	
	To Premium for Goodwill A/c				7,000
	(Being the amount of premium for goodwill brought in by Able)				
	Premium for Goodwill A/c	Dr.		7,000	
	To Strong Capital A/c (Note 1)				6,000
	To Weak Capital A/c (Note 1)				1,000
	(Being the premium for goodwill credited to the old partners on the basis of their sacrificing ratio 6 : 1)				
	Strong Capital A/c	Dr.		6,000	
	Weak Capital A/c	Dr.		1,000	
	To Cash A/c				7,000
	(Being the withdrawal of premium money by the partners)				

Working Note : **(1) Calculation of Sacrificing Ratio**

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
Strong	4/7	1/2 of 4/5 = 4/10	4/7 – 4/10 = 12/70 (Sacrifice)	Strong : Weak = 12 : 2 = 6 : 1
Weak	3/7	1/2 of 4/5 = 4/10	3/7 – 4/10 = 2/70 (Sacrifice)	
Able	—	1/5 or 2/10	0 – 2/10 = 14/70 (Gain)	

Illustration 41

A and B are equal partners. C is coming as a new partner who pays ₹ 8,000 as premium for goodwill. The new profit sharing ratio among A, B and C is 4 : 3 : 2. Pass necessary journal entries showing the appropriation of premium money assuming that the premium for goodwill is immediately withdrawn by the old partners.

Solution **In the books of the Firm**

Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
	Cash A/c Dr.		8,000	
	To Premium for Goodwill A/c			8,000
	(Being the premium for goodwill brought in by C)			
	Premium for Goodwill A/c (Note 1) Dr.		8,000	
	To A Capital A/c			2,000
	To B Capital A/c			6,000
	(Being the premium for goodwill shared by A and B in the ratio of 1 : 3)			
	A Capital A/c Dr.		2,000	
	B Capital A/c Dr.		6,000	
	To Cash A/c			8,000
	(Being the premium withdrawn by A and B)			

Working Note : **(1) Calculation of Sacrificing Ratio**

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
A	1/2	4/9	1/2 – 4/9 = 1/18 (Sacrifice)	A : B = 1 : 3
B	1/2	3/9	1/2 – 3/9 = 3/18 (Sacrifice)	
C	—	2/9	0 – 2/9 = 4/18 (Gain)	

Illustration 42

X and Y are in partnership, sharing profits and losses in the ratio of 5 : 3. They admit Z into partnership and the new profit sharing ratio is 4 : 3 : 3. Value of goodwill is agreed at ₹ 10,000. Z contributes ₹ 20,000 as capital and necessary amount of premium, half of which is retained in the business. Show the journal entries.

Solution **In the books of the Firm**

Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
	Bank A/c Dr.		23,000	
	To Z Capital A/c			20,000
	To Premium for Goodwill A/c			3,000
	(Being cash brought in by Z for his capital and share of premium for goodwill)			
	Premium for Goodwill A/c Dr.		3,000	
	To X Capital A/c			2,250
	To Y Capital A/c			750
	(Being the premium for goodwill shared by X and Y in the ratio of 3 : 1)			
	X Capital A/c Dr.		1,125	
	Y Capital A/c Dr.		375	
	To Bank A/c			1,500
	(Being 1/2 of the premium for goodwill withdrawn by X and Y)			

Working Note : **(1) Calculation of Sacrificing Ratio**

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
X	5/8	4/10	5/8 – 4/10 = 18/80 (Sacrifice)	18 : 6 = 3 : 1
Y	3/8	3/10	3/8 – 3/10 = 6/80 (Sacrifice)	
Z	—	3/10	0 – 3/10 = 24/80 (Gain)	

Case 4 : When the incoming partner cannot bring premium for goodwill

In this case the necessary adjustment for goodwill is done through the Capital Accounts of the partners. The New Partner's Capital Account will be debited with his share of goodwill and the Old Partners' Capital Accounts will be credited in the sacrificing ratio.

No goodwill will be shown in the Balance Sheet after admission.

> ***In this connection, Para 36 of AS—10 is very important. This para states that 'Goodwill should be recorded in the books only when some consideration in money or money's worth has been paid for it. Whenever a business is acquired for a price (payable in cash or in shares or otherwise) which is in excess of the value of the net assets of the business taken over, the excess should be termed as Goodwill'.***
> ***The effects of the above provision of AS—10 in Partnership Accounts are the following :***
> ***1. Only purchased goodwill to be recorded in the books of accounts.***
> ***2. Non-purchased goodwill (internally generated goodwill) will be adjusted through Partners' Capital Accounts. In effect, this goodwill cannot be shown in the Partnership Balance Sheet.***

Accounting Entries

New Partner's Capital Account Dr. [Share of goodwill]
    To Old Partners' Capital Account [Sacrificing ratio]

Illustration 43

X and Y are partners in a firm sharing profits and losses in the ratio of 3 : 2. Z joins the firm for 1/4th share and is to pay ₹ 25,000 as premium for goodwill but cannot pay anything. There is no goodwill in the current Balance Sheet. As between X and Y they decided to share profits and losses equally. You are required to pass necessary journal entry.

Solution

In the books of the Firm
Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
	Z Capital A/c Dr.		25,000	
	To X Capital A/c (Note 1)			22,500
	To Y Capital A/c (Note 1)			2,500
	(Being the adjustment for goodwill on Z's admission)			

Working Notes :

(1) Z is admitted for 1/4 share in future profit. Therefore, 1 – 1/4 = 3/4 is available to X and Y which they will share equally.

X's share will be = 1/2 of 3/4 = 3/8
Y's share will be = 1/2 of 3/4 = 3/8
Z's share will be = 1/4 or 2/8
The new profit-sharing ratio = **3 : 3 : 2**.

Calculation of Sacrificing Ratio

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
X	3/5	3/8	3/5 – 3/8 = 9/40 (Sacrifice)	X : Y = 9 : 1
Y	2/5	3/8	2/5 – 3/8 = 1/40 (Sacrifice)	
Z	—	2/8	0 – 2/8 = 10/40 (Gain)	

Illustration 44

Jadeja and Robin are partners sharing profits and losses in the ratio of 2 : 1. They admit Kapil as a partner who is unable to bring premium for goodwill in cash. Goodwill is to be valued at 2 years' purchase of the last three years' average profits. The profits for the last three years were ₹ 50,000, ₹ 40,000 and ₹ 45,000. The profit sharing ratio among the partners has been agreed to be 2 : 1 : 1. No goodwill will be shown in the Balance Sheet.

Calculate the value of goodwill and make necessary journal entries.

Solution

Total profits of last three years (₹ 50,000 + ₹ 40,000 + ₹ 45,000) = ₹ 1,35,000.
Average profit for the last three years = ₹ 1,35,000 / 3 = ₹ 45,000.
Goodwill = Average profit × No. of years' purchase = ₹ 45,000 × 2 = ₹ 90,000.

In the books of Jadeja, Robin and Kapil
Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
	Kapil Capital A/c Dr. To Jadeja Capital A/c (Note 1) To Robin Capital A/c (Note 1) (Being the adjustment for Goodwill on Kapil's admission)		22,500	 15,000 7,500

Working Note : **(1) Calculation of Sacrificing Ratio**

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
Jadeja	2/3	2/4	2/3 – 2/4 = 2/12 (Sacrifice)	Jadeja : Robin = 2 : 1
Robin	1/3	1/4	1/3 – 1/4 = 1/12 (Sacrifice)	
Kapil	—	1/4	0 – 1/4 = 3/12 (Gain)	

Kapil's share of goodwill = ₹ 90,000 × 1/4 = ₹ **22,500**.

Case 5 : When a loan account is raised in the name of the incoming partner.

In this case, a Loan Account is opened in the name of the new partner. An amount equal to premium for goodwill is debited to Loan Account and credited to Premium for Goodwill Account. The amount of premium is distributed amongst the old partners in the sacrificing ratio.

Journal Entries

(1) New Partner's Loan Account Dr. [Share of goodwill]
    To Premium for Goodwill Account [Share of goodwill]
(2) Premium for Goodwill Account Dr. [Share of goodwill]
    To Old Partners' Capital Account [Sacrificing ratio]

Alternatively,

New Partner's Loan Account Dr. [Share of goodwill]
    To Old Partners' Capital Account [Sacrificing ratio]

Illustration 45

A and B are partners in a firm sharing profits and losses in the ratio of 3 : 2. C is admitted for 1/4 share and he is to pay ₹ 20,000 as premium for goodwill. He was not in a position to pay premium in cash. It was decided that a Loan Account is to be opened for this purpose. You are required to pass necessary journal entries to record the above.

Solution

In the books of the Firm
Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
	C Loan A/c Dr. To Premium for Goodwill A/c (Being the amount of premium debited to C's Loan A/c)		20,000	 20,000
	Premium for Goodwill A/c Dr. To A Capital A/c (Note 1) To B Capital A/c (Note 1) (Being the premium for goodwill credited to Partners' Capital A/cs in the sacrificing ratio)		20,000	 12,000 8,000

Working Note :

(1) Profit sharing ratio between A and B is not changing. Therefore, the sacrificing ratio will be the old profit sharing ratio, i.e., 3:2.
A' share of premium = ₹ 20,000 × 3/5 = ₹ 12,000
B's share of premium = ₹ 20,000 × 2/5 = ₹ 8,000
Alternatively, the above amount can be calculated as follows :
Total value of goodwill = ₹ 20,000 × 4/1 = ₹ **80,000**.

Particulars	A (₹)	B (₹)	C (₹)
Right of goodwill before admission (3 : 2)	48,000	32,000	—
Right of goodwill after admission (9 : 6 : 5*)	36,000	24,000	20,000
Sacrifice (–) / Gain (+)	(–) 12,000	(–) 8,000	(+) 20,000

*New profit sharing ratio :

1 – 1/4 = 3/4

A's share = 3/5 of 3/4 — 9/20

B's share = 2/5 of 3/4 — 6/20

C's share = 1/4 — 5/20

Illustration 46

J and R are partners. V is admitted as a partner for 1/4 share of profit but is unable to contribute premium for goodwill in cash amounting to ₹ 8,000 and so it is decided to raise a Loan Account in the name of V.

You are required to pass a single journal entry in order to give effect to the above problem.

Solution

In the books of the Firm

Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
	V Loan A/c Dr.		8,000	
	To J Capital A/c			4,000
	To R Capital A/c			4,000
	(Being the adjustment for premium for goodwill)			

Working Note : Profit sharing ratio has not been given. Therefore, profit sharing ratio between J and R is 1 : 1. After admission of V, profit sharing ratio between J and R is not changing. Therefore, the sacrificing ratio will be the old ratio, i.e., 1 : 1.

Case 6 : Hidden Goodwill

In some cases, the value of goodwill is not given in the question. This hidden goodwill is calculated with reference to the total capital of the firm and the profit sharing ratio. The following examples will clear the matter.

Illustration 47

X and Y are partners in a firm sharing profits and losses in the ratio of 3 : 2. Their capitals are ₹ 1,20,000 and ₹ 80,000 respectively. They admit Z as a new partner who will get 1/6th share in the profits of the firm. Z brings in ₹ 50,000 as his capital.

Find out the amount of goodwill on the basis of the above information.

Solution

Z brings ₹ 50,000 as his capital for 1/6th share of profit. Therefore, total capital of the firm will be ₹ 50,000 × 6/1 = ₹ 3,00,000 and the capital of the old partners should be ₹ 2,50,000 (₹ 3,00,000 – 50,000). But the combined capital of old partners is ₹ 2,00,000 (₹ 1,20,000 + 80,000).

Therefore, the goodwill of the firm should be ₹ 2,50,000 – ₹ 2,00,000 = ₹ 50,000.

Illustration 48

A and B are partners with capitals of ₹ 13,000 and ₹ 9,000 respectively. They admit C as a partner with 1/5th share in the profits of the firm. C brings in ₹ 8,000 as capital. Give journal entries to record goodwill.

Solution

C brings in ₹ 8,000 as capital for 1/5th share of profit. Therefore, the total capital of the firm will be ₹ 8,000 × 5/1 = ₹ 40,000 and the capitals of the old partners should be ₹ 32,000 (₹ 40,000 – ₹ 8,000). But their combined capital is ₹ 22,000 (₹ 13,000 + ₹ 9,000). In effect, the goodwill of the firm will be ₹ 32,000 – ₹ 22,000 = ₹ 10,000.

Since C joins the business for 1/5th share, ₹ 2,000 (₹ 10,000 × 1/5) will be treated as premium for goodwill, out of ₹ 8,000 capital brought in by him.

In the books of the Firm

Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
	Bank A/c Dr.		8,000	
	To C Capital A/c			6,000
	To Premium for Goodwill A/c			2,000
	(Being the amount of capital and premium for goodwill brought in by C)			

Date	Particulars	L.F.	₹	₹
	Premium for Goodwill A/c Dr.		2,000	
	To A Capital A/c			1,000
	To B Capital A/c			1,000
	(Being the premium for goodwill credited to the old partners on the basis of their sacrifice, i.e., equally)			

Case 7 : Goodwill raised and written-off

When the new partner can not bring premium for goodwill, the adjustments for goodwill can be done by raising and writing-off goodwill.

In this case, goodwill is raised at its full value by crediting the old partners in the old ratio and immediately it is written-off by debiting all the partners (including new partner) in the new ratio.

Journal Entries

(a) ***For raising goodwill in the books at its full value***

Goodwill Account Dr. [Full value]
  To Old Partners' Capital Account [Old ratio]

(b) ***For writing-off goodwill***

All Partners' Capital Account Dr. [New ratio]
  To Goodwill Account [Full value]

Illustration 49

A, B and C are partners sharing profits and losses in the ratio of 2 : 2 : 1. D is admitted as a partner. The new profit sharing ratio is 2 : 2 : 1 : 1. The total value of goodwill is ₹ 1,20,000.

Pass necessary journal entries to record the above.

Solution

In the books of the Firm
Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
	Goodwill A/c Dr.		1,20,000	
	To A Capital A/c			48,000
	To B Capital A/c			48,000
	To C Capital A/c			24,000
	(Being the raising of goodwill at its full value)			
	A Capital A/c Dr.		40,000	
	B Capital A/c Dr.		40,000	
	C Capital A/c Dr.		20,000	
	D Capital A/c Dr.		20,000	
	To Goodwill A/c			1,20,000
	(Being the writing-off of the full value of goodwill in the new profit sharing ratio)			

Illustration 50

A and B are partners sharing profits and losses in the ratio of 3 : 2. They admit C as a partner who is unable to bring goodwill in cash but pays ₹ 16,000 as his capital. A Goodwill Account is raised in the books of the firm. Goodwill of the firm is valued at two years' purchase of three years' profits. The profits for the three years were ₹ 10,000; ₹ 8,000 and ₹ 9,000. The new profit sharing ratio will be 5 : 2 : 2. The partners decided to write off goodwill after C's admission.

Make journal entries.

Solution

Average profit = (₹ 10,000 + ₹ 8,000 + ₹ 9,000) / 3 = ₹ 9,000.

Value of Goodwill = Two year's purchase of average profit = ₹ 9,000 × 2 = ₹ **18,000**.

In the books of the Firm
Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
	Bank A/c Dr.		16,000	
	To C Capital A/c			16,000
	(Being cash brought in by C as his capital)			

Goodwill A/c Dr.		18,000	
To A Capital A/c			10,800
To B Capital A/c			7,200
(Being the raising of goodwill at its full value)			
A Capital A/c Dr.		10,000	
B Capital A/c Dr.		4,000	
C Capital A/c Dr.		4,000	
To Goodwill A/c			18,000
(Being the writing off of the full value of goodwill in the new profit sharing ratio)			

Case 8 :When the incoming partner brings personal goodwill into the business

At the time of admission, the new partner may bring some assets and liabilities and his personal goodwill. All the assets and liabilities including goodwill is recorded in the books of the firm at agreed value. The difference between the assets and liabilities will be treated as capital of the new partner. However, after recording the goodwill, it is written in the new ratio.

Illustration 51

X and Y are partner of a firm sharing profits and losses in the ratio 2 : 1. They admit Z for 1/4th share of profit.

Z brought into partnership —

Book debts of — ₹ 40,000; Computers of — ₹ 50,000;

Goodwill of his connection valued at — ₹ 30,000 (as agreed by X and Y)

Balance in cash, so as to make his capital of — ₹ 1,50,000.

Pass necessary journal entry to record the above (assume that no goodwill is to be shown in the books of account)

Solution

In the books of the Firm

Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
	Goodwill A/c Dr.		30,000	
	Sundry Debtors A/c Dr.		40,000	
	Computers A/c Dr.		50,000	
	Cash A/c (Balancing figure) Dr.		30,000	
	To Z Capital A/c			1,50,000
	(Being different assets brought in by Z as his capital)			
	X Capital A/c Dr.		15,000	
	Y Capital A/c Dr.		7,500	
	Z Capital A/c Dr.		7,500	
	To Goodwill A/c			30,000
	(Being the goodwill written-off in the new ratio 2 : 1 : 1)			

Case 9 : When goodwill appears in the Old Balance Sheet and the incoming partner pays premium for goodwill or pays partly the premium for goodwill

In rare case it may happen that the new partner is bringing premium for goodwill though the goodwill is appearing in the Balance Sheet.

In this situation the following steps are followed :

Step 1 : Write-off the goodwill already appearing in the Balance Sheet.

Old Partners' Capital Account Dr. [Old ratio]

To Goodwill Account

Step 2 : Record the premium brought-in by the new partner

Cash / Bank Account Dr.

To Premium for Goodwill Account

Step 3 : Distribute the premium for goodwill among the old partners in the sacrificing ratio

Premium for Goodwill Account Dr.

To Old Partners' Capital Account [Sacrificing ratio]

Step 4 : If part of the premium for goodwill brought-in by the new partner, pass adjusting entry for ***premium not brought-in***

New Partner's Capital Account Dr. [Premium not brought-in]
To Old Partners' Capital Account [Sacrificing ratio]

Note : No goodwill will be shown in the Balance Sheet as per AS—10.

Illustration 52

A and B are partners sharing profits equally. They admit C into partnership, C paying only ₹ 1,000 for premium out of his share of premium of ₹ 1,800 for 1/4th share of profit. Goodwill Account appears in the books at ₹ 6,000. All the partners have decided that goodwill should not appear in the new firm's books.

Give the necessary journal entries.

Solution

In the books of the Firm
Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
	Goodwill A/c (Note 1) Dr.		6,000	
	To A Capital A/c			3,000
	To B Capital A/c			3,000
	(Being the goodwill written-off in the ratio 1 : 1)			
	Bank A/c Dr.		1,000	
	To Premium for Goodwill A/c			1,000
	(Being the premium for goodwill brought-in by the new partner)			
	Premium for Goodwill A/c Dr.		1,000	
	To A Capital A/c			500
	To B Capital A/c			500
	(Being the distribution of premium for goodwill in the sacrificing ratio 1 : 1)			
	C Capital A/c Dr.		800	
	To A Capital A/c			400
	To B Capital A/c			400
	(Being the adjustment for premium for goodwill not brought in cash)			

Working Notes :

(1) New Profit-Sharing Ratio :

C joins for 1/4 share. Therefore 3/4 (1 – 1/4) share remains for A and B.

A's share = 3/4 × 1/2 = 3/8 B's share = 3/4 × 1/2 = 3/8 C's share = 1/4 or 2/8

New profit-sharing ratio = A : B : C = **3 : 3 : 2**.

(2) Calculation of Sacrificing Ratio

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
A	1/2	3/8	1/2 – 3/8 = 1/8 (Sacrifice)	A : B = 1 : 1
B	1/2	3/8	1/2 – 3/8 = 1/8 (Sacrifice)	
C	—	2/8	0 – 1/4 = 2/8 (Gain)	

Illustration 53

P and S are partners sharing profits in the ratio of 3 : 2. Their books showed goodwill at ₹ 20,000. R is admitted with 1/5th share which he acquires equally from P and S. R brings in ₹ 20,000 as his capital and ₹ 10,000 as his share of goodwill. You are required to give journal entries to carry out the above arrangement.

Solution

	To Goodwill A/c			20,000
	(Being the goodwill written off before R's admission)			
	Bank A/c Dr.		30,000	
	To R Capital A/c			20,000
	To Premium for Goodwill A/c			10,000
	(Being the amount of capital and premium for goodwill brought in by R)			

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
	Premium for Goodwill A/c Dr. To P Capital A/c To S Capital A/c (Being the premium for goodwill shared by the old partners on the basis of their sacrifice, i.e., equally)		10,000	 5,000 5,000

Tutorial Note : When goodwill is to be written off before admission of new partner (as appearing in the Balance Sheet), it should be debited to Old Partners' Capital Account in ***old ratio***.

Illustration 54

B and C are partners sharing profits in the ratio of 3 : 2. Goodwill appears in the books at ₹ 3,000. D is admitted into partnership on payment of ₹ 20,000 for goodwill for 1/4th share. B and C are sharing profits between themselves in the same proportion as before.

(a) Calculate the sacrificing ratio; and

(b) Record the transactions assuming Goodwill Account will not appear in the books of B, C and D.

Solution

(a) Since the profit sharing ratio between B and C does not change after the admission of D, their old profit sharing ratio will be their sacrificing ratio, i.e., 3 : 2.

In the books of B, C and D

Journal **Dr.** **Cr.**

Date	Particulars	L.F.	₹	₹
	B Capital A/c Dr. C Capital A/c Dr. To Goodwill A/c (Being the goodwill written off before D's admission)		1,800 1,200	 3,000
	Cash A/c Dr. To Premium for Goodwill A/c (Being the amount of premium for goodwill brought in by D)		20,000	 20,000
	Premium for Goodwill A/c Dr. To B Capital A/c To C Capital A/c (Being the premium for goodwill shared by the old partners on the basis of their sacrifice)		20,000	 12,000 8,000

Illustration 55

A and B are partners sharing profits in the ratio of 5 : 3. They admit C as a partner. C pays a premium of ₹ 1,500 for 1/4th share of profit, which he acquires from A and B in equal proportions. Goodwill Account appears in the books at ₹ 1,600. Give the necessary journal entries.

Solution

In the books of the Firm

Journal **Dr.** **Cr.**

Date	Particulars	L.F.	₹	₹
	A Capital A/c Dr. B Capital A/c Dr. To Goodwill A/c (Being the goodwill written off before C's admission)		1,000 600	 1,600
	Bank A/c Dr. To Premium for Goodwill A/c (Being the premium for goodwill brought in by C)		1,500	 1,500
	Premium for Goodwill A/c Dr. To A Capital A/c (Note 1) To B Capital A/c (Note 1) (Being the premium for goodwill shared by the old partners on the basis of their sacrifice)		1,500	 750 750

Working Note :

(1) Premium for goodwill ₹ 1,500 will be shared by A and B equally because C acquired 1/4th share in equal proportions.

Illustration 56

A and B are partners sharing profits in the ratio of 3 : 2. They admit C into partnership. C pays a premium of ₹ 1,000 for 1/4th share of profit. The new ratio is 3 : 3 : 2. Goodwill Account appears in the books at ₹ 1,000. Pass necessary journal entries.

Solution

In the books of A, B and C
Journal

Date	Particulars		L.F.	Dr. ₹	Cr. ₹
	A Capital A/c	Dr.		600	
	B Capital A/c	Dr.		400

	(Being the premium brought in by C)				
	Premium for Goodwill A/c	Dr.		1,000	
	To A Capital A/c (Note 1)				900
	To B Capital A/c (Note 1)				100
	(Being the premium for goodwill shared by the old partners in the sacrificing ratio)				

Working Note :

(1) Calculation of Sacrificing Ratio

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
A	3/5	3/8	3/5 – 3/8 [(24 – 15) / 40] = 9/40 (Sacrifice)	A : B = 9 : 1
B	2/5	3/8	2/5 – 3/8 = [(16 – 15) / 40] = 1/40 (Sacrifice)	
C	—	2/8	0 – 2/8 = 10/40 (Gain)	

Illustration 57

A and B are partners sharing profits in the ratio of 3 : 2. They admit C as a new partner. C pays a premium of ₹ 3,000 for 3/10th share of profits which he acquires from A and B in the ratio of 2 : 1. Goodwill Account appears in the books at ₹ 2,000. Give the necessary journal entries.

Solution

In the books of the Firm
Journal

Date	Particulars		L.F.	Dr. ₹	Cr. ₹
	A Capital A/c	Dr.		1,200	
	B Capital A/c	Dr.		800	
	To Goodwill A/c				2,000
	(Being the goodwill written off prior to the admission of C)				
	Bank A/c	Dr.		3,000	
	To Premium for Goodwill A/c				3,000
	(Being the amount of premium for goodwill brought in by C)				
	Premium for Goodwill A/c	Dr.		3,000	
	To A Capital A/c				2,000
	To B Capital A/c				1,000
	(Being the premium for goodwill credited to the old partners on the basis of their sacrifice, i.e., in the ratio of 2 : 1)				

Illustration 58

A and B sharing profits in the ratio of 3 : 2, admit C for 20% share in profits. C pays ₹ 2,000 for goodwill. New profit sharing ratio is 2 : 2 : 1. Goodwill already appears at ₹ 6,000. Give journal entries in connection with goodwill.

Solution

C joins the business for 20% or 1/5th share and pays ₹ 2,000 for goodwill. Therefore the total value of the goodwill is 5/1 × ₹ 2,000 = ₹ 10,000.

The appropriation of premium money is as under :

Particulars	A (₹)	B (₹)	C (₹)
Right of goodwill before admission (3 : 2)	6,000	4,000	—
Right of goodwill after admission (2 : 2 : 1)	4,000	4,000	2,000
Sacrifice (–) / Gain (+)	(–) 2,000	—	(+) 2,000

On C's admission, B does not make any sacrifice. Therefore, the entire premium for goodwill brought in by C will be given to A.

Journal   **Dr.**   **Cr.**

Date	Particulars		L.F.	₹	₹
	A Capital A/c	Dr.		3,600	
	B Capital A/c	Dr.		2,400	
	To Goodwill A/c				6,000
	(Being the goodwill written off before C's admission)				
	Bank A/c	Dr.		2,000	
	To Premium for Goodwill A/c				2,000
	(Being the amount of premium for goodwill brought in by C)				
	Premium for Goodwill A/c	Dr.		2,000	
	To A Capital A/c				2,000
	(Being the premium for goodwill credited to A)				

Illustration 59

A, B and C are partners sharing profits in the ratio of 5 : 3 : 2. Goodwill is appearing in the books at ₹ 50,000. D is admitted to the partnership, the new profit sharing ratio among A, B, C and D being 3 : 3 : 2 : 2.

Give the journal entries for goodwill if the new partner D brings in ₹ 1,00,000 for capital and cash for his share of goodwill. The goodwill of the firm is valued at ₹ 1,20,000 and is not to appear in the books after D's admission.

Solution

Statement Showing the Premium to be Brought in and its Distribution

Particulars	A (₹)	B (₹)	C (₹)	D (₹)
Right of goodwill before D's admission (5 : 3 : 2)	60,000	36,000	24,000	—
Right of goodwill after D's admission (3 : 3 : 2 : 2)	36,000	36,000	24,000	24,000
Sacrifice (–) / Gain (+)	(–)24,000	—	—	(+)24,000

In regard to goodwill D makes a gain of ₹ 24,000. Therefore, he is to bring premium for goodwill ₹ 24,000. A makes a sacrifice of ₹ 24,000. He is to get the entire amount of premium for goodwill. B and C do not make any sacrifice. Therefore, they are not entitled to any premium for goodwill.

In the books of the Firm

Journal   **Dr.**   **Cr.**

Date	Particulars		L.F.	₹	₹
	A Capital A/c	Dr.		25,000	
	B Capital A/c	Dr.		15,000	
	C Capital A/c	Dr.		10,000	
	To Goodwill A/c				50,000
	(Being the goodwill written off before D's admission)				
	Bank A/c	Dr.		1,24,000	
	To D Capital A/c				1,00,000
	To Premium for Goodwill A/c				24,000
	(Being the amount of capital and premium for goodwill brought in by D)				
	Premium for Goodwill A/c	Dr.		24,000	
	To A Capital A/c				24,000
	(Being the premium for goodwill credited to A alone, since he only makes the sacrifice)				

Case 10 : When the incoming partner can bring only a portion of the required amount of premium for goodwill. There is no goodwill appearing in the Balance Sheet.

In this case, whatever premium for goodwill brought in by the new partner will be shared by the old partners in the sacrificing ratio.

Accounting Entries

1. For premium for goodwill brought in cash by the new partner

Cash / Bank Account   Dr. [Actual amount of premium]

    To Premium for Goodwill Account

2. For capital brought in cash by the new partner

Cash / Bank Account Dr. [Actual amount of capital]
To New Partners' Capital Accounts

3. For sharing of premium for goodwill

Premium for Goodwill Account Dr. [Actual amount of premium]
To Old Partners' Capital Accounts [Sacrificing ratio]

In addition to the above entries, New Partner's Capital Account will be debited with the amount of premium not brought in and Old Partners' Capital Account will be credited in the sacrificing ratio.

Illustration 60

A and B are partners of a firm sharing profits and losses in the ratio of 2 : 3. They admit 'C' as a new partner. The new profit/loss sharing ratio is 1 : 2 : 1. 'C' brings 60% of his due for goodwill. For this purpose the goodwill is valued at 3 years purchase of last 5 years' average profits.

Net profit for last 5 years are as under :

2010 — ₹ 40,000; 2011 — ₹ 35,000; 2012 — ₹ 25,000; 2013 — ₹ 38,000 and 2014 — ₹ 45,000.

Calculate the value of goodwill and show how transaction of goodwill be recorded in the books of the firm without opening Goodwill Account.

Solution

Calculation of Average Profit

Year	Profit (₹)
2010	40,000
2011	35,000
2012	25,000
2013	38,000
2014	45,000
Total Profit	1,83,000

Average profit = ₹ 1,83,000 / 5 = ₹ 36,600.

Goodwill = Average Profit × Number of year's Purchase

= ₹ 36,600 × 3 = ₹ 1,09,800.

C's share of goodwill = 2/5 of ₹ 1,09,800 = ₹ 43,920.

Cash brought in by C = 60% of ₹ 43,920 = ₹ 26,352.

Solution

In the books of the Firm

Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
	Bank A/c Dr.		26,352	
	To Premium for Goodwill A/c			26,352
	(Being premium for goodwill brought in by C to the extent of 60% of the premium in cash)			
	Premium for Goodwill A/c Dr.		26,352	
	To A Capital A/c			13,176
	To B Capital A/c			13,176
	(Being division of premium between A and B in the ratio 1 : 1)			
	C Capital A/c Dr.		17,568	
	To A Capital A/c			8,784
	To B Capital A/c			8,784
	(Being the adjustment of goodwill for the portion of premium not brought-in by C)			

Working Note : **(1) Calculation of Sacrificing Ratio**

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
A	2/5	1/5	2/5 – 1/5 = 1/5 (Sacrifice)	A : B = 1 : 1
B	3/5	2/5	3/5 – 2/5 = 1/5 (Sacrifice)	
C	—	2/5	0 – 2/5 = 2/5 (Gain)	

Illustration 61

Red and White are two partners sharing profits and losses in the ratio of 5 : 4. They take Pink into partnership. Pink brings ₹ 20,000 as capital and ₹ 3,600 as premium for goodwill out of his share of ₹ 5,400. The new profit sharing ratio of the partners is 5 : 4 : 3. The new firm decided that no goodwill will appear in the books. Pass necessary journal entries.

Solution

The amount of premium brought in by Pink will be shared between Red and White in the sacrificing ratio which is calculated as under :

Calculation of Sacrificing Ratio

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
Red	5/9	5/12	5/9 – 5/12 = 5/36 (Sacrifice)	Red : White = 5 : 4
White	4/9	4/12	4/9 – 4/12 = 4/36 (Sacrifice)	
Pink	—	3/12	0 – 3/12 = 9/36 (Gain)	

Journal **Dr.** **Cr.**

Date	Particulars	L.F.	₹	₹
	Cash A/c Dr.		23,600	
	To Pink Capital A/c			20,000
	To Premium for Goodwill A/c			3,600
	(Being capital and premium for goodwill brought in by Pink in cash)			
	Premium for Goodwill A/c Dr.		3,600	
	To Red Capital A/c			2,000
	To White Capital A/c			1,600
	(Being the premium shared by Red and White in their sacrificing ratio)			
	Pink Capital A/c Dr.		1,800	
	To Red Capital A/c			1,000
	To White Capital A/c			800
	(Being the adjustment of goodwill for the portion of premium not brought-in by Pink)			

Illustration 62

A and B sharing profits in the ratio of 2 : 1, admit C for 1/4th share in profits. C pays ₹ 20,000 for capital and ₹ 3,000 out of his share of ₹ 4,000 for goodwill. After admission they decided not to show goodwill. Give journal entries in connection with C's admission.

Solution

In the books of the Firm

Journal **Dr.** **Cr.**

Date	Particulars	L.F.	₹	₹
	Bank A/c Dr.		23,000	
	To C Capital A/c			20,000
	To Premium for Goodwill A/c			3,000
	(Being the amount brought-in by C as his capital and premium for goodwill)			
	Premium for Goodwill A/c Dr.		3,000	
	To A Capital A/c			2,000
	To B Capital A/c			1,000
	(Being the premium for goodwill shared by A and B in their ratio of sacrifice)			
	C Capital A/c (Note 2) Dr.		1,000	
	To A Capital A/c			667
	To B Capital A/c			333
	(Being the adjustment of goodwill for the portion of premium not brought-in by C)			

Working Notes :

(1) C joins for 1/4th share. Therefore, 3/4th (1 – 1/4) share remains for A and B. A's share = 2/3 of 3/4 = 2/4; B's share = 1/3 of 3/4 = 1/4; C's share = 1/4. Therefore, new profit sharing ratio = A : B : C = 2 : 1 : 1.

(2) Calculation of Sacrificing Ratio

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
A	2/3	2/4	2/3 – 2/4 = 2/12 (Sacrifice)	A : B = 2 : 1
B	2/3	1/4	1/3 – 1/4 = 1/12 (Sacrifice)	
C	—	1/4	0 – 1/4 = 3/12 (Gain)	

Illustation 63

K, L and M with respective capitals of ₹ 30,000, ₹ 20,000 and ₹ 10,000 and sharing profit in the ratio of 3 : 2 : 1 agreed to admit N for a sixth share on the lines that he brings in ₹ 20,000 as capital and ₹ 10,000 as Premium for Goodwill and that M should retain his original share. N paid in his capital money but in respect of premium he could bring in only ₹ 5,000. You are required to:

(i) Give the Journal entries to carry out the above arrangements;
(ii) Construct the Capital Accounts of the partners; and
(iii) Work out the new profit-sharing ratio of the partners.

Solution **In the books of the Firm**

(i) Journal **Dr.** **Cr.**

Date	Particulars	L.F.	₹	₹
	Bank A/c Dr.		25,000	
	To N Capital A/c			20,000
	To Premium for Goodwill A/c			5,000
	(Being the premium for goodwill and capital brought in by N)			
	Premium for Goodwill A/c Dr.		5,000	
	To K Capital A/c			3,000
	To L Capital A/c			2,000
	(Being the premium for goodwill shared by K and L in their sacrificing ratio 3:2)			
	N Capital A/c Dr.		5,000	
	To K Capital A/c			3,000
	To L Capital A/c			2,000
	(Being the adjustment of goodwill for the portion of premium not brought-in by N)			

Dr. **(ii) Partners' Capital Accounts** **Cr.**

Particulars	K (₹)	L (₹)	M (₹)	N (₹)	Particulars	K (₹)	L (₹)	M (₹)	N (₹)
To K Capital A/c	—	—	—	3,000	By Balance b/d	30,000	20,000	10,000	—
To L Capital A/c	—	—	—	2,000	By Bank A/c	—	—	—	20,000
To Balance c/d	36,000	24,000	10,000	15,000	By Premium for Goodwill A/c	3,000	2,000	—	—
					By N Capital A/c	3,000	2,000	—	—
	36,000	24,000	10,000	20,000		36,000	24,000	10,000	20,000

(iii) Ascertainment of New Profit-Sharing Ratio

N is coming for 1/6th share and M retains his original share (which is also1/6th). Therefore, share of N and M is 1/6th + 1/6th = 2/6th. Balance of share remains for K and L is 1 – 2/6th = 4/6th or 2/3rd, which will be shared by K and L in the ratio 3 : 2. Therefore, K gets 2/3 × 3/5 = 2/5th share and L gets 2/3 × 2/5 = 4/15th share. The new profit sharing ratio among K, L, M and N is 2/5 : 4/15 : 1/6: 1/6 or 12 : 8 : 5 : 5.

Working Note : **(1) Calculation of Sacrificing Ratio**

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
K	3/6	12/30	3/6 – 12/30 = 3/30 (Sacrifice)	K : L = 3 : 2
L	2/6	8/30	2/6 – 8/30 = 2/30 (Sacrifice)	
M	1/6	5/30	1/6 – 5/30 = Nil	
N	—	5/30	0 – 5/30 = 5/30 (Gain)	

Illustration 64

(a) A and B are partners in a firm sharing profits and losses in the ratio of 3 : 2. X who joins the firm for 1/3 share is to pay ₹ 25,000 as premium for goodwill but he cannot pay anything. As between A and B, they decided to share profits and losses equally. Pass the required journal entries in respect of the goodwill.

(b) A and B are equal partners. C comes in as a new partner who pays ₹ 6,000 as premium for goodwill. The new profit sharing ratio among A, B and C is 1 : 2 : 3. Pass necessary journal entries showing the appropriation of premium money assuming that the premium for goodwill is immediately withdrawn by the old partners.

(c) A partnership firm is about to admit a partner and decides theat goodwill is to be raised in the books. The basis is two years' purchase of the average profits over the last five consecutive years.
Profit : ₹ 36,000; ₹ 28,000; ₹ 25,000; ₹ 37,000; ₹ 45,000.
Calculate value of goodwill.

Solution (a)

In the books of the Firm
Journal

Date	Particulars		L.F.	Dr. ₹	Cr. ₹
	X Capital A/c	Dr.		25,000	
	To A Capital A/c (Note 1)				20,000
	To B Capital A/c (Note 1)				5,000
	(Being the adjustment for goodwill on X's admission)				
	Alternatively,				
	Goodwill A/c (Note 2)	Dr.		75,000	
	To A Capital A/c				45,000
	To B Capital A/c				30,000
	(Being the goodwill raised in the books at its full value)				
	A Capital A/c	Dr.		25,000	
	B Capital A/c	Dr.		25,000	
	X Capital A/c	Dr.		25,000	
	To Goodwill A/c (Note 3)				75,000
	(Being the goodwill written-off in the new ratio)				

Solution (b)

In the books of the Firm
Journal

Date	Particulars		L.F.	Dr. ₹	Cr. ₹
	Cash A/c	Dr.		6,000	
	To Premium for Goodwill A/c				6,000
	(Being the premium for goodwill brought in by cash)				
	Premium for Goodwill A/c	Dr.		6,000	
	To A Capital A/c (Note 4)				4,000
	To B Capital A/c (Note 4)				2,000
	(Being the premium for goodwill credited to A and B on the basis of their sacrifice)				
	A Capital A/c	Dr.		4,000	
	B Capital A/c	Dr.		2,000	
	To Cash A/c				6,000
	(Being the premium money withdrawn by the old partners)				

Solution (c)

$$\text{Average Profit} = \frac{36{,}000 + 28{,}000 + 25{,}000 + 37{,}000 + 45{,}000}{5}$$

$$= \frac{1{,}71{,}000}{5} = ₹\ 34{,}200$$

Value of Goodwill = 2 × Average Profit = 2 × ₹ 34,200 = ₹ **68,400**.

Working Notes :

(1) X is admitted for 1/3 share in future profit. Therefore, 1 – 1/3 = 2/3 is available to A and B which they will share equally.
A's share will be = 1/2 of 2/3 = 2/6
B's share will be = 1/2 of 2/3 = 2/6
X's share will be = 1/3 or 2/6.
The new profit sharing ratio = 2 : 2 : 2 or 1 : 1 : 1.

Calculation of Sacrificing Ratio

Partners	Old Ratio	New Ratio	Sacrifice / Gain	Sacrificing Ratio
A	3/5	1/3	3/5 – 1/3 = 4/15 (Sacrifice)	
B	2/5	1/3	2/5 – 1/3 = 1/15 (Sacrifice)	4 : 1
X	—	1/3	0 – 1/3 = 5/15 (Gain)	

(2) X is joining the firm for 1/3 share and he is required to pay ₹ 25,000 as premium for goodwill but cannot pay anything. So goodwill is to be raised at its full value = ₹ 25,000 × 3/1 = ₹ **75,000**.

(3) As per AS—10, only purchased goodwill is recorded in the books of account. Therefore, the entire goodwill ₹ 75,000 is to be written-off immediately in the new ratio. In the Balance Sheet no goodwill is to be shown.

(4) C is joining the firm for 3/6 share. He is paying ₹ 6,000 as premium for goodwill. The total value of goodwill = ₹ 6,000 × 6/3 = ₹ 12,000.

The sharing of premium money is calculated as follows :

Particulars	A (₹)	B (₹)	C (₹)
Right of goodwill before admission (1 : 1)	6,000	6,000	—
Right of goodwill after admission (1 : 2 : 3)	2,000	4,000	6,000
Sacrifice (–) / Gain (+)	(–) 4,000	(–) 2,000	(+) 6,000

Special Problems

Illustration 65

A and B are partners in a firm sharing profits and losses in the ratio of 3 : 2 respectively. Their summarised Balance Sheet as on 31.3.2015 is as under :

Liabilities		₹	Assets	₹
Capital :	A	90,000	Fixed Assets	1,60,000
	B	60,000	Current Assets	75,000
Current Liabilities		85,000		
		2,35,000		2,35,000

On 1.4.2015, C is admitted to the partnership.

Prepare the appropriate journal entries for each of the following :

(i) C ***purchases*** $33^1/_3$% of A's interest for ₹ 35,000.

(ii) C ***contributes*** ₹ 70,000 to obtain a 25% interest in the firm.

Solution

In the books of the Firm
Journal

Date	Particulars		Dr. ₹	Cr. ₹

	(Being the premium for goodwill brought in by C credited to A for his sacrifice)			
	A Capital A/c (₹ 5,000 + 30,000)	Dr.	35,000	
	To Cash A/c			35,000
	(Being the premium for goodwill and 1/3rd of capital withdrawn by A)			
(ii)	Cash A/c (Note 2)	Dr.	70,000	
	To C Capital A/c			50,000
	To Premium for Goodwill A/c			20,000
	(Being the required amount of money as capital and premium for goodwill brought in by C to obtain a 25% interest in the firm)			
	Premium for Goodwill A/c	Dr.	20,000	
	To A Capital A/c			12,000
	To B Capital A/c			8,000
	(Being the premium for goodwill shared by the old partners on the basis of their sacrifice)			

Working Notes :

(1) 1/3rd of A's Capital = ₹ 30,000. C is paying ₹ 35,000 for acquiring 1/3 share of A. Therefore, ₹ 5,000 (₹ 35,000 – ₹ 30,000) will be treated as premium for goodwill.

(2) 3/4 value of the firm = ₹ 1,50,000. Therefore, total value of the firm = ₹ 2,00,000 (₹ 1,50,000 / 3 × 4). C's contribution for 1/4 interest in the firm should be ₹ 2,00,000 × 1/4 = ₹ 50,000. However, C is contributing ₹ 70,000. Therefore, the difference ₹ 20,000 (₹ 70,000 – ₹ 50,000) will be treated as premium for goodwill and it will remain in the business.

Illustration 66

P and Q are partners in a firm sharing profits and losses in the ratio of 3 : 2 respectively. They admit R as a partner on 1.1.2012 on the basis of his buying 1/5th of P's share and 1/6th of Q's share. On 1.1.2014, they permit R to purchase a further 1/10th of their remaining shares. How much did R pay each of the others on each occasion for goodwill, assuming that the goodwill of the firm was ₹ 30,000 on the first occasion and ₹ 40,000 on the second ?

What is the ultimate share of each partner in the business ?

Solution

First occasion	Second occasion
R gets from P — 1/5 × 3/5 = 3/25	R gets from P — 1/10 × 36/75 = 36/750
R gets from Q — 1/6 × 2/5 = 2/30 = 1/15	R gets from Q — 1/10 × 25/75 = 25/750
Therefore, Share of R = 3/25 + 1/15 = 14/75	Therefore, Share of R = 14/75 + 36/750 + 25/750 = 201/750
Sacrificing ratio of P and Q = 3/25 : 1/15 = 9 : 5.	Sacrificing ratio of P and Q = 36/750 : 25/750 = 36 : 25.
R is to bring in premium for goodwill = ₹ 30,000 × 14/75 = ₹ 5,600.	R is to bring in premium for goodwill = ₹ 40,000 × 61/750 = ₹ 3,253.
The premium for goodwill of ₹ 5,600 will be shared by P and Q as under :	The premium for goodwill of ₹ 3,253 will be shared by P and Q as under :
P — ₹ 5,600 × 9/14 = ₹ 3,600; Q — ₹ 5,600 × 5/14 = ₹ 2,000.	P — ₹ 3,253 × 36/61 = ₹ 1,920; Q — ₹ 3,253 × 25/61 = ₹ 1,333.
New profit sharing ratio :	New profit sharing ratio :
P — 3/5 – 3/25 = 36/75	P — 36/75 – 36/750 = 324/750
Q — 2/5 – 1/15 = 25/75	Q — 25/75 – 25/750 = 225/750
R — 3/25 + 1/15 = 14/75	R — 14/75 + 36/750 + 25/750 = 201/750
P : Q : R = 36 : 25 : 14.	**P : Q : R = 108 : 75 : 67**.

Illustration 67

The following is the Balance Sheet of A and B, who share profits in the ratio of 3 : 2.

Liabilities		₹	Assets	₹
Capital :	A	80,000	Assets	2,00,000
	B	50,000		
Creditors		70,000		
		2,00,000		2,00,000

The business has been valued and the net worth is ₹ 1,80,000. It is decided to introduce a new partner, C who has ₹ 60,000 to contribute. The profits are to be shared in the ratio of 4 : 3 : 3.

Show the Balance Sheet when :

(a) goodwill has been entered in the accounts but eliminated after the admission of C;

(b) the payment made to the partners if C pays a premium for admission to the partnership.

Solution

The net worth as per the Balance Sheet is ₹ 1,30,000 (₹ 2,00,000 – 70,000). But, the actual net worth is ₹ 1,80,000. Therefore, the difference of ₹ 50,000 (₹ 1,80,000 – 1,30,000) represents goodwill.

Dr. **(a) Partners' Capital Accounts** **Cr.**

Date	Particulars	A (₹)	B (₹)	C (₹)	Date	Particulars	A (₹)	B (₹)	C (₹)
	To Goodwill A/c	20,000	15,000	15,000		By Balance b/d	80,000	50,000	—
	To Balance c/d	90,000	55,000	45,000		By Bank A/c	—	—	60,000
						By Goodwill A/c	30,000	20,000	—
		1,10,000	70,000	60,000			1,10,000	70,000	60,000

Balance Sheet of A, B and C as at . . .

Liabilities		₹	Assets	₹
Capital : A		90,000	Assets	2,00,000
	B	55,000	Bank	60,000
	C	45,000		
Creditors		70,000		
		2,60,000		2,60,000

(b) Workings :
Adjustment of Premium for Goodwill

Particulars	A (₹)	B (₹)	C (₹)
Right of goodwill before admission (3 : 2)	30,000	20,000	—
Right of goodwill after admission (4 : 3 : 3)	20,000	15,000	15,000
Sacrifice (–) / Gain (+)	(–) 10,000	(–) 5,000	(+) 15,000

Therefore, C is to bring in ₹ 15,000 as premium for goodwill and it will be shared by A ₹ 10,000 and B ₹ 5,000.

Dr. **Partners' Capital Accounts** **Cr.**

	C	60,000		
Creditors		70,000		
		2,75,000		2,75,000

3. Revaluation of Assets and Liabilities

Revaluation is the recording of an asset or a liability at its current value. It is a process of placing a different valuation on an asset or a liability from its book value. At the time of admission of a new partner, it is found necessary to revalue the assets and liabilities of the firm. Buildings could have appreciated substantially due to being in a particularly favourable position; some of the debtors need to be written-off as bad, stock may not reflect the current market values; or the creditors might require some amendment.

The new partner should not be given any benefit of appreciation in the value of assets. Similarly, he should not be burdened for any undisclosed liabilities or losses. For proper adjustment in respect of appreciation or depreciation, a Revaluation Account (Profit and Loss Adjustment Account) should be opened, to which all the items of increase or decrease in the value of assets and liabilities are shown. Therefore, the purpose of preparing a Revaluation Account is to recognise the above events on a current value rather than on a historical cost basis. The balance of Revaluation Account represents profit or loss on revaluation and it is finally closed by transfer to old Partners' Capital Accounts in the old profit-sharing ratio.

Sometimes, either intentionally or by mistake, one or more assets and/or liabilities are not recorded in the books of account. But while preparing Revaluation Account, if all the partners agree, these assets and liabilities are to be recorded. Effectively, the creation of a new asset is a profit on revaluation and recognition of an unrecorded liability in the books is a loss on revaluation.

From the above, it can be comprehended that the practice of asset or liability revaluation is to state fully the true economic condition of the partnership firm at the time of admission of a partner and to assign the changes in asset and liability values to the old partners who have been managing the business during the time the changes in values occured. It should be remembered that revaluation is a comparatively rare event in accounting and is used only where balance sheet values have become conspicuously misleading. Revaluation should be done by independent valuers and it should be ensured that sufficient evidence exists for any revaluation in order to prevent valuation abuses.

Accounting entries to be passed in the books of account will depend upon the situation:

(a) When value of assets and liabilities are to be shown in the Balance Sheet at ***Revalued Figures***.

(b) When value of assets and liabilities are to be shown in the Balance Sheet at ***Original Figures***.

(a) When value of assets and liabilities are to be shown in the Balance Sheet at revalued figures

The relevant Journal entries are as follows:

(a) If the values of the assets increase

Assets Account	Dr.	[Revised value *minus* original book value]
To Revaluation Account		

(b) If the values of the assets decrease

Revaluation Account	Dr.	[Original book value *minus* revised value]
To Assets Account		

(c) If the amount of liabilities increase

Revaluation Account	Dr.	[Revised amount *minus* original amount]
To Liabilities Account		

(d) If the amount of the liabilities decrease

Liabilities Account	Dr.	[Original amount *minus* revised amount]
To Revaluation Account		

(e) The Revaluation Account should be closed by transfer to the old Partners' Capital Accounts in the old profit-sharing ratio

(i) If there is profit on Revaluation, i.e., the total of the credit side of the revaluation account is greater than that of the debit side:

Revaluation Account	Dr.	
To Old Partners' Capital Accounts		[Old ratio]

(ii) If there is loss on Revaluation, i.e., the total of the debit side of the revaluation account is greater than that of the credit side:

Old Partners' Capital Accounts	Dr.	(Old ratio)
To Revaluation Account		

In this connection, Para 30 of AS—10 is also important. This para states that '***An increase in net book value arising on revaluation of fixed assets should be credited directly to owners' interests under the head of revaluation reserve, except that, to the extent that such increase is related to and not greater than a decrease arising on revaluation previously recorded as a charge to the profit and loss statement, it may be credited to the profit and loss statement. A decrease in net book value arising on revalutaion of fixed asset should be charged directly to the profit and loss statement except that to the extent that such a decrease is related to an increase which was previously recorded as a credit to revaluation reserve and which has not been subsequently reversed or utilised, it may be charged directly to that account***'.

In case of Partnership, revaluation profit or loss is transferred directly to Partners' Capital Accounts. Therefore, an increase in net book value arising on revaluation of fixed assets may be credited to Revaluation Account (in place of Revaluation Reserve Account because it will be utilimately closed by transferring to Partners' Capital Accounts) and loss on revaluation of fixed assets may be debited to Revaluation Account (in place of Profit and Loss Account because it will be ultimately closed by transferreing to Partners' Capital Accounts).

In this chapter or elsewhere the effects of revaluation of fixed assets have been shown through the Revaluation Account (in place of Revaluation Reserve Account / Profit and Loss Account because the effect will be same on Partners' Capital Accounts).

Illustration 68

A, B and C were in partnership, sharing profits and losses as to A — 1/2, B — 1/3rd and C — 1/6th. As from 1st January, 2015 they admitted D into partnership on the following terms :

D to have a 1/6th share which he purchased entirely from A paying A ₹ 8,000 for that share of goodwill. Of this amount, A had withdrawn ₹ 6,000 and put the balance in the firm as additional capital. As a condition to admission of D as a partner D also brought in ₹ 5,000 capital into the firm. It was further agreed that the investments should be valued at its market value of ₹ 3,600 and plant be valued at ₹ 5,800.

The Balance Sheet of the old firm on 31.12.2014 was as :

Cash at bank ₹ 8,000; Debtors ₹ 12,000; Stock ₹ 10,000; Investments at cost ₹ 6,000; Furniture ₹ 2,000; Plant ₹ 7,000; Creditors ₹ 21,000; Capital : A ₹ 12,000; B ₹ 8,000 and C ₹ 4,000. The profits for the year 2015 were ₹ 12,000 and the drawings were : A ₹ 6,000, B ₹ 6,000, C ₹ 3,000 and D ₹ 3,000.

You are required to journalise the opening adjustments, prepare the opening Balance Sheet of the new firm as on 1st January, 2015 and give the capital account of each partner as on 31st December, 2015. ***[C.A. (Foundation) — Adapted]***

* Revaluation Loss = ₹ 3,600 (₹ 1,200 for plant and ₹ 2,400 for investments).

**New Profit Sharing Ratio will be 4 : 4 : 2 : 2 or 2 : 2 : 1 : 1.

Tutorial Note : D purchased 1/6th share entirely from A. In this situation, generally total capital of the firm should remain the same. However, this question has been solved as per the direction in the question.

Illustration 69

The following is the Balance Sheet of A and B, a partnership business, as at 31st December, 2014:

Liabilities			₹	Assets	₹
Creditors			40,000	Cash at Bank	12,000
Capitals:	A	48,000		Plant and Machinery	50,000
	B	54,000	1,02,000	Furniture	10,000
				Stock	40,000
				Debtors	30,000
			1,42,000		1,42,000

The partners decided to revalue the assets and liabilities as under on the admission of partner C on 1.1.2015, who brings in ₹ 30,000 as capital: Plant and Machinery ₹ 60,000; Debtors ₹ 27,000; Furniture ₹ 9,500; and Stock ₹ 36,000.

An amount of ₹ 3,000 included in creditors is no longer a liability and hence requires to be properly adjusted and ₹ 2,000 is to be paid to the creditors which is not recorded in the books.

A contingent liability of ₹ 500 not included in the above Balance Sheet had to be cleared.

Show the Revaluation Account, Partners' Capital Accounts and the Balance Sheet after C's admission.

		Cash at Bank ₹ (12,000 + 30,000 – 500)	41,500
	1,74,000		1,74,000

Tutorial Note : Revaluation profit is shared by A and B equally as the profit sharing ratio has not been mentioned.

Illustration 70

Following is the Balance Sheet of A and B, who share profits and losses as 3 : 2 respectively, as at 31st December, 2014:

Liabilities		₹	Assets		₹
Capitals :	A	35,000	Land and Building		30,000
	B	30,000	Plant and Machinery		20,000
Reserve		10,000	Stock		10,000
Creditors		25,000	Debtors	20,000	
			Less: Provision for Doubtful Debts	1,000	19,000
			Bank		11,000
			Cash		10,000
		1,00,000			1,00,000

On 1st January, 2015 C joins the firm and brings in the following assets :

Stock — ₹ 21,000; Investments — ₹ 12,000; Cash — ₹ 15,000; and Debtors — ₹ 10,000.

Following were agreed upon :

(i) The new profit sharing ratio among A, B and C will be equal.

(ii) The capitals of the partners should also be equal taking C's capital as base.

(iii) The reserve of the new firm will be ₹ 15,000.

(iv) Provision for doubtful debts is to be created @ 10% on total debtors.

(v) An investment provision of ₹ 2,000 is to be created.

You are required to prepare the Balance Sheet of the new firm.

Solution **Balance Sheet of A, B and C as at 1st January, 2015**

Liabilities			₹	Assets		₹
Capitals :	A	50,000		Land and Building		30,000
	B	50,000		Plant and Machinery		20,000
	C	50,000	1,50,000	Stock ₹ (10,000 + 21,000)		31,000
Reserve			15,000	Debtors ₹ (20,000 + 10,000)	30,000	
Creditors			25,000	Less: Provision for Doubtful Debts @ 10%	3,000	27,000
				Investments	12,000	
				Less: Investment Provision	2,000	10,000
				Bank ₹ (11,000 + 14,600 + 21,400)		47,000
				Cash ₹ (10,000 + 15,000)		25,000
			1,90,000			1,90,000

Working Notes :

Dr. **(1) Partners' Capital Accounts** **Cr.**

Particulars	A	B	C	Particulars	A	B	C
To Reserve A/c	5,000	5,000	5,000	By Balance b/d	35,000	30,000	—
To Provision for Doubtful Debts A/c (Note 2)	600	400	1,000	By Stock A/c	—	—	21,000
				By Investments A/c	—	—	12,000
To Investment Provision A/c (Note 3)	—	—	2,000	By Cash A/c	—	—	15,000
To Balance c/d	*50,000	*50,000	50,000	By Debtors A/c	—	—	10,000
(*taking C's capital as base)				By Reserve A/c	6,000	4,000	—
				By Bank A/c (Balancing figure)	14,600	21,400	—
	55,600	55,400	58,000		55,600	55,400	58,000

(2) Debtors of A and B were ₹ 20,000. Provision for doubtful debts is to be maintained at 10%. Therefore, new provision for doubtful debts for these Debtors will be ₹ 2,000. To create further provision of ₹ 1,000, capital of A and B will be debited in the ratio of 3 : 2 respectively.
For the debtors ₹ 10,000 brought-in by C, entire provision is to be created by debiting C's Capital Account.

(3) Investment provision is to be created by debiting C's Capital Account only.

Illustration 71

The Balance Sheet of A and B, who share profits and losses as 3 : 1 respectively as on 1.1.2015 is as under :

Liabilities		₹	Assets	₹
Capital Accounts :	A	50,000	Plant and Machinery	50,000
	B	30,000	Furniture and Fixture	20,000
Reserve		10,000	Stock	10,000
Creditors		10,000	Debtors	5,000
			Bank	15,000
		1,00,000		1,00,000

The partners are unable to bring in any additional capital in order to increase the plant capacity.

To increase the capital base of the firm to ₹ 1,50,000, they admitted C as an equal partner on the above date. To join the business, C was required to pay a sum of ₹ 70,000.

Show Journal Entries, Partners' Capital Accounts and the Balance Sheet after C's admission.

				By Premium for Goodwill A/c	10,000	—	—
				By B Capital A/c	2,500	—	—
	70,000	32,500	60,000		70,000	32,500	60,000

Balance Sheet (after C's Admission) as at 1st January, 2015

Liabilities			₹	Assets	₹
Capital Accounts :	A	60,000		Plant and Machinery	50,000
	B	30,000		Furniture and Fixture	20,000
	C	60,000	1,50,000	Stock	10,000
Creditors			10,000	Debtors	5,000
				Bank ₹ (15,000 + 70,000 – 10,000)	75,000
			1,60,000		1,60,000

Working Notes :

(1) The total capital of A and B was ₹ 90,000 (₹ 50,000 + ₹ 30,000 + ₹ 10,000). To increase the capital base to ₹ 1,50,000, C is required to bring in ₹ 60,000 (₹ 1,50,000 – ₹ 90,000). But he brings in ₹ 70,000. Therefore, the excess of ₹ 10,000 represents premium for goodwill.

(2) C brings in ₹ 10,000 for 1/3 share. Therefore, the value of the goodwill is ₹ 10,000 × 3/1 = ₹ 30,000.

Adjustment in Regard to Goodwill

Partners		A	B	C
Right of goodwill before admission (3 : 1)	(₹)	22,500	7,500	—
Right of goodwill after admission (1 : 1 : 1)	(₹)	10,000	10,000	10,000
Gain (+) / Sacrifice (–)	(₹)	(–) 12,500	(+) 2,500	(+) 10,000

Illustration 72

Rain and Storm are partners in a firm sharing profits and losses as 3 : 2 respectively. Their Balance Sheet on 31.12.2014 stands as under :

Liabilities		₹	Assets		₹
Creditors			Cash		4,000
Capital Accounts :	₹	35,000	Debtors	22,000	
Rain	40,000		Less: Provision for doubtful debts	2,000	20,000
Storm	20,000	60,000	Stock		18,000
			Machinery		20,000
			Land and Building		33,000
		95,000			95,000

On 1.1.2015, they agreed to take Dust as a partner on the following conditions :

(i) The goodwill of the firm shall be valued at ₹ 23,750 and Dust shall pay his share of goodwill in cash.

(ii) Dust shall contribute ₹ 15,000 as his share of capital.

(iii) Land and Building shall be valued at ₹ 42,000. Machinery shall be depreciated by ₹ 5,000. Provision for doubtful debts shall be raised to ₹ 3,000 and another provision shall be made for a probable liability for damages amounting to ₹ 1,300.

(iv) The profit and loss sharing ratio shall be so adjusted that, between Rain and Storm the former ratio is maintained, while between Storm and Dust there shall be the same ratio as between Rain and Storm.

(v) The capital shall be adjusted (without disturbing the ultimate total capital) so as to correspond with the new ratio, the excess or deficit being transferred to their respective current accounts.

Show journal entries to give effect to the above arrangement and prepare the opening Balance sheet of the new firm.

(Being the shortage capitals transferred to current accounts)			

Balance Sheet of the New Firm as on 1st January, 2015

Liabilities		₹	Assets		₹
Capital Accounts :			Land and Building		42,000
Rain	38,700		Machinery		15,000
Storm	25,800		Stock		18,000
Dust	17,200	81,700	Debtors	22,000	
Current Accounts :			Less: Provision for doubtful debts	3,000	19,000
Rain		5,320	Cash (₹ 4,000 + 20,000)		24,000
Creditors		35,000	Current Accounts :		
Liability for Damages		1,300	Storm	3,120	
			Dust	2,200	5,320
		1,23,320			1,23,320

Working Notes :

(1) Calculation of New Profit Sharing Ratio

The profit sharing ratio between Rain and Storm is 3 : 2, and profit sharing ratio between Storm and Dust will also be 3 : 2.

Therefore, share of Dust = $\frac{2/5}{3} \times 2 = 4/15$

The new profit sharing ratio = 3/5 : 2/5 : 4/15
= 9 : 6 : 4.

(2) Premium for goodwill brought in by Dust = ₹ 23,750 / 19 × 4 = ₹ 5,000.

(3) The partners' old profit sharing ratio (3 : 2) is their sacrificing ratio.

(4) **Total capital of the new firm**

Opening capital + Capital and premium brought in by Dust + Revaluation profit
= ₹ (60,000 + 15,000 + 5,000 + 1,700) = ₹ 81,700

Rain's share = ₹ 81,700 × 9/19 = ₹ 38,700

Storm's share = ₹ 81,700 × 6/19 = ₹ 25,800

Dust's share = ₹ 81,700 × 4/19 = ₹ 17,200.

Illustration 73

A and B are in partnership, sharing profits and losses in the ratio of 3 : 2 respectively. Interest is charged on partners' drawings @ 8% p.a.

On 1.1.2015, C was admitted into partnership, with future profits or losses to be shared equally and interest on drawings to continue @ 8% p.a. He brought in ₹ 52,000 as his share of capital. Goodwill was calculated as twice the average profits after interest on drawings for 2012, 2013 and 2014.

Details of drawings and profits before interest in those years were :

Drawings : 2012 — ₹ 20,000; 2013 — ₹ 30,000; 2014 — ₹ 37,500.

Profit before interest : 2012 — ₹ 30,800; 2013 — ₹ 30,200; 2014 — ₹ 31,000.

The partners' capital balances on 31.12.2014 were : A ₹ 45,000; B ₹ 35,000.

Net profit for 2015 was ₹ 60,000 before interest. Drawings at the end of 2015 totalled :

A ₹ 24,000; B ₹ 22,000; C ₹ 20,000.

Prepare Profit and Loss Appropriation Account for the year ended 31.12.2015 and the Partners' Capital Accounts. Assume that all drawings were made on the first day of the year.

Solution

Workings :

	₹
Total profit for 3 years : ₹ (30,800 + 30,200 + 31,000)	92,000
Add: Interest on drawings for 3 years : @ 8% on ₹ (20,000 + 30,000 + 37,500)	7,000
Total profit for 3 years after interest on Drawings	99,000

Therefore, Goodwill = ₹ 99,000 / 3 × 2 = ₹ 66,000.

Statement Showing Required Adjustment for Goodwill

		84,360	51,160	73,760			84,360	51,160	73,760

Illustration 74

A and B are in partnership and share profits and losses in the ratio of 3 : 2 respectively. Interest is paid on capital at 7% p.a. The partners' capital and current accounts balances at 31.12.2013 were :

Capital Account : A ₹ 35,600 (Cr.); B ₹ 28,400 (Cr.);

Current Account : A ₹ 1,400 (Cr.); B ₹ 1,800 (Dr.)

The only change to the capital balances since 2011 has been A's introduction of ₹ 10,000 on 1.7.2013.

On 1.1.2014, C was admitted paying ₹ 45,000 which represented a payment for goodwill and an additional sum as capital. Goodwill was calculated as 1.5 times average profits before interest on capital for the previous 3 years. Profits after interest for those years were : 2011 ₹ 31,640; 2012 ₹ 42,870; 2013 ₹ 62,400. The new profit and loss sharing ratio for A, B and C was 7 : 5 : 3 respectively.

The net profit before interest for the year ended 31.12.2014 was ₹ 82,660.

Drawings were : A ₹ 24,000; B ₹ 18,000; C ₹ 16,000.

Prepare Profit and Loss Appropriation Account for the year ended 31.12.2014, Partners' Capital and Current Accounts.

Solution

Workings :

		₹
Total profit after interest for 3 years : ₹ (31,640 + 42,870 + 62,400)		1,36,910
Add: Interest on capital for 3 years @ 7% p.a. on ₹ (35,600 + 28,400)	13,440	
Less: Interest @ 7% p.a. on ₹ 10,000 for 6 months	350	13,090
Profit for 3 years before interest on capital		1,50,000

Therefore, Goodwill = ₹ 1,50,000 / 3 × 1.5 = ₹ 75,000

C's share of goodwill = ₹ 75,000 / 15 × 3 = ₹ 15,000.

Out of ₹ 45,000 brought in by C, ₹ 15,000 is to be treated as premium for goodwill and the balance ₹ 30,000 (₹ 45,000 – ₹ 15,000) is to be treated as capital.

Illustration 75

Gopal and Govind are partners sharing profits and losses in the ratio of 60 : 40. The firm's Balance Sheet as on 31.03.2015 was as follows :

Liabilities	₹	Assets	₹
Capital Accounts :		Fixed Assets	3,00,000
Gopal	1,20,000	Investments	50,000
Govind	80,000	Current Assets	2,00,000
Long Term Loan	2,00,000	Loans and Advances	1,00,000
Current Liabilities	2,50,000		
	6,50,000		6,50,000

Due to financial difficulties, they have decided to admit Guru as a partner from 1.4.2015 on the following terms :

Guru will be paid 40% of the profits. Guru will bring in cash ₹ 1,00,000 as capital. It is agreed that goodwill of the firm will be valued at 2 years' purchase of 3 years' normal average profits of the firm and Guru will bring in cash his share of goodwill. It was also decided that the partners will not withdraw their share of goodwill nor will the goodwill appear in the books of account.

The profits of the previous three years were as follows :

For the year ended 31.03.2013 — Profit ₹ 20,000 (includes insurance claim received of ₹ 40,000).

For the year ended 31.03.2014 — Loss ₹ 80,000 (includes voluntary retirement compensation paid ₹ 1,10,000).

For the year ended 31.03.2015 — Profit ₹ 1,05,000 (includes a profit of ₹ 25,000 on the sale of assets).

It was decided to revalue the assets on 31.03.2015 as follows : Fixed Assets (Net) — ₹ 4,00,000; Investments — Nil; Current Assets — ₹ 1,80,000; Loans and Advances — ₹ 1,00,000.

The new profit sharing ratio after the admission of Guru was 35 : 25 : 40.

Pass Journal Entries on admission. Show goodwill calculation and prepare Revaluation Account, Partners' Capital Accounts and Balance Sheet as on 1.4.2015 after the admission of Guru.

Guru	1,00,000	Loans and Advances	1,00,000
Long Term Loan	2,00,000		
Current Liabilities	2,50,000		
	8,04,000		8,04,000

Working Note : **(1) Calculation of Goodwill and its Adjustment**

Year ended on 31st March		2013	2014	2015
Profit / (Loss) for the year	(₹)	20,000	(80,000)	1,05,000
Adjustment for abnormal items	(₹)	*(40,000)	1,10,000	(25,000)
Normal Profit / (Loss)	(₹)	(20,000)	30,000	80,000

*Insurance claim received ₹ 40,000 included in the Profit for the year ended on 31 March, 2013 has been treated as abnormal item as nothing has been mentioned in the question regarding its nature.

Three years' total profit = – 20,000 + 30,000 + 80,000 = ₹ 90,000. Average profit ₹ 90,000 / 3 = ₹ 30,000. Goodwill is two years' purchase of average profit = ₹ 30,000 x 2 = ₹ 60,000. Therefore, premium for Goodwill to be brought in by Guru is 40% of ₹ 60,000 = ₹ 24,000. This premium for goodwill will be shared by Gopal and Govind as under :

	Gopal (₹)	Govind (₹)	Guru (₹)
Right of goodwill before admission (3 : 2)	36,000	24,000	—
Right of goodwill after admission (7 : 5 : 8)	21,000	15,000	24,000
Sacrifice (–) / Gain (+)	(–) 15,000	(–) 9,000	(+) 24,000

Illustration 76

A, B and C are partners sharing profits and losses in the ratio of 3:2:1. D is admitted as a new partner on 31.12.2014 for an equal share and is to pay ₹ 25,000 as capital. Following is the Balance Sheet on the date of admission:

Liabilities	₹	Assets	₹
Capital : A	30,000	Land and Buildings	25,000
Capital : B	30,000	Plant and Machinery	20,000
Capital : C	20,000	Furniture and Fixture	15,000
Creditors	15,000	Stock	10,000
Bills payable	5,000	Debtors	15,000
		Bills receivable	10,000
		Bank	5,000
	1,00,000		1,00,000

Following are the required adjustments on D's admission:

(i) Out of the creditors, a sum of ₹ 5,000 is owing to D.

(ii) Bills worth ₹ 8,000 were discounted with the bankers, out of which, a bill of ₹ 2,000 was dishonoured on 31.12.2014, but no entry has been passed for that. Due dates of the other discounted bills fall in January, 2015.

(iii) Unexpired insurance premium ₹ 600.

(iv) Expenses debited in the Profit and Loss Account includes a sum of ₹ 1,000 paid for B's personal life insurance policy.

(v) A provision for bad debts @ 5% is to be created against Debtors.

(vi) Expenses on revaluation amounting to ₹ 1,010 is paid by A.

(vii) During 2014, part of the furniture was sold for ₹ 2,500. The book value of the furniture sold was ₹ 4,000 and the written-down value on the date of sale is ₹ 3,500. The proceeds were wrongly credited to the Sales Account.

Required: Necessary Ledger Accounts and the Balance Sheet after D's admission.

	31,010	30,000	20,000	25,000		31,010	30,000	20,000	25,000

Balance Sheet as at 31st December, 2014 (after D's admission)

Liabilities		₹	Assets		₹
Capitals :	A	28,880	Land and Buildings		25,000
	B	27,580	Plant and Machinery		20,000
	C	19,290	Furniture & Fixture		11,000
	D	25,000	Stock		10,000
Creditors		10,000	Debtors	17,000	
Bills payable		5,000	Less: Provision for bad debts	850	16,150
			Bills receivable		10,000
			Bank — ₹ (5,000 + 20,000 – 2,000)		23,000
			Prepaid Insurance Premium		600
		1,15,750			1,15,750

Working Notes:

(1) Contingent liability for bills discounted ₹ 6,000;

(2) Debtors after adjustment of bills dishonoured = ₹ 17,000. Provision is to be created @ 5%, i.e. ₹ 850.

(3) Capital brought in cash (₹ 25,000 – ₹ 5,000) = ₹ 20,000.

(4) For sale of furniture, the actual rectifying entry will be :

Sales Account	Dr.	₹ 2,500	
Depreciation Account ₹ (4,000 – 3,500)	Dr.	₹ 500	
Loss on Sale of Furniture Account	Dr.	₹ 1,000	
To Furniture Account			₹ 4,000

As all the nominal accounts have been closed at the time of preparing final account for 2014, the rectifying entry to be passed through Revaluation Account.

Revaluation Account	Dr.	₹ 4,000	
To Furniture Account			₹ 4,000

Alternatively,

Old Partners' Capital Account	Dr.	(old ratio)	
To Furniture Account			

If alternative entry is passed, the loss on revaluation will be ₹ 260 only.

Illustration 77

P, Q and R were on partnership terms sharing profits and losses in the ratio of 6:3:1. They decided to take S into partnership with effect from April 1, 2014 on the following terms and conditions:

(i) S is to bring in his proportionate share of goodwill in cash. Goodwill is not to be brought into the books but necessary adjustments are to be made in the old Partners' Capital Accounts.

(ii) Goodwill to be valued at 60% of the average annual profits of the previous three or four years, whichever is the higher.

(iii) The average profits for the purpose of goodwill for the past years, were:
Year ending March 31, 2014 ₹ 48,000 Year ending March 31, 2013 ₹ 30,300
Year ending March 31, 2012 ₹ 31,200 Year ending March 31, 2011 ₹ 42,200

(iv) The new profit-sharing ratio between P, Q, R and S will be 3 : 3 : 3 : 1.

(v) S should bring in ₹ 20,000 as capital.

(vi) The new partner is to receive an annual salary of ₹ 12,000 in addition to his share of profit. R personally guaranteed that the aggregate of salary and share of profit of the new partner shall not be less than ₹ 25,000 p.a.
The draft accounts for the year ending March 31, 2015 showed a profit of ₹ 1,32,800 before taking into account the salary of S.

Show the Journal entries (including cash entries) passed at the time of admission of the partner and also the distribution of the net profit for the year ending March 31, 2015 between the partners.

Solution **In the books of P, Q and R**

	To S Capital A/c			20,000
	(Being the capital and premium for goodwill brought in by X)			
	Premium for Goodwill A/c	Dr.	2,275	
	R Capital A/c	Dr.	4,551	
	To P Capital A/c			6,826
	(Being the appropriation of premium money)			

Statement Showing Distribution of Profit for the year ended 31st March, 2015

Particulars	P (₹)	Q (₹)	R (₹)	S (₹)
Salary	—	—	—	12,000
Balance (₹ 1,32,800 – ₹ 12,000) in the ratio 3 : 3 : 3 : 1	36,240	36,240	36,240	12,080
	36,240	36,240	36,240	24,080
Excess payable to S by R	—	—	(–) 920	(+) 920
Share of profit	36,240	36,240	35,320	25,000

Working Note :

(1) Calculation of the Value of the Goodwill and its adjustment : Average profit for the last three years is ₹ 36,500; Average profit for the last four years is ₹ 37,925; Goodwill is 60% of ₹ 37,925 = ₹ 22,755. Proportionate share of S on goodwill is ₹ 2,275.

Particulars	P (₹)	Q (₹)	R (₹)	S (₹)
Right of goodwill before admission (6 : 3 : 1)	13,653	6,827	2,275	—
Right of goodwill after admission (3 : 3 : 3 : 1)	6,827	6,827	6,826	2,275
Sacrifice (–) / Gain (+)	(–) 6,826	—	(+) 4,551	(+) 2,275

Illustration 78

Red, White and Blue are partners sharing profits as 4:3:2. For any change in partnership, goodwill is to be valued at 2.5 times the average profits for 4 years — but no Goodwill Account is to be raised. The profits are: 2011 — ₹ 50,000; 2012 — ₹ 60,000; 2013 — ₹ 56,000; 2014 — ₹ 86,000. On 31.12.2014, White and Blue acquire from Red an additional one-ninth share in the firm. On 1.1.2015, Red's son Pink is admitted. His share is to be 1/7th, of which a proportion calculated to produce ₹ 5,500 p.a. on the basis of the past profits, is ceded to him by his father; balance is to be purchased from White and Blue in proportion to their shares immediately prior to Pink's admission.

Show the present ratio and also pass Journal entries.

Solution **Calculation of Profit Sharing Ratio (Before Pink's Admission)**

Partners	Old ratio	Sacrifice/gain	New ratio
Red	4/9	(1/9 + 1/9) = 2/9 (sacrifice)	4/9 – 2/9 = 2/9
White	3/9	1/9 (gain)	3/9 + 1/9 = 4/9
Blue	2/9	1/9 (gain)	2/9 + 1/9 = 3/9

Average profits (50,000 + 60,000 + 56,000 + 86,000)/4 = ₹ 63,000; Value of goodwill = 63,000 x 2.5 = ₹ 1,57,500.

Adjustment for goodwill due to change in the profit sharing ratio

Particulars	Red (₹)	White (₹)	Blue (₹)
Right of goodwill before change (4 : 3 : 2)	70,000	52,500	35,000
Right of goodwill after change (2 : 4 : 3)	35,000	70,000	52,500
Sacrifice (–) / Gain (+)	(–) 35,000	(+) 17,500	(+) 17,500

Journal Dr. Cr.

Date	Particulars		₹	₹
	White Capital A/c	Dr.	17,500	
	Blue Capital A/c	Dr.	17,500	
	To Red Capital A/c			35,000
	(Being adjustment for change in the profit-sharing ratio)			

Proportion that can produce ₹ 5,500 p.a. = 5,500 /63,000 = 11/126.

Pink's total share = 1/7; his father providing 11/126, so remaining (1/7 – 11/126) = 7/126 are to be purchased from White and Blue in the ratio 4:3. White will sell = 7/126 x 4/7 = 4/126; Blue will sell = 7/126 x 3/7 = 3/126.

Calculation of Profit Sharing Ratio (After Pink's Admission)

Partners	Old ratio	Sacrifice/gain	New ratio
Red	2/9	11/126 (sacrifice)	2/9 – 11/126 = 17/126
White	4/9	4/126 (sacrifice)	4/9 – 4/126 = 52/126
Blue	3/9	3/126 (sacrifice)	3/9 – 3/126 = 39/126
Pink	Nil	1/7 or 18/126 (gain)	= 18/126

Adjustment for goodwill on Pink's Admission

	Red (₹)	White (₹)	Blue (₹)	Pink (₹)
Right of goodwill before admission (2 : 4 : 3)	35,000	70,000	52,500	—
Right of goodwill after admission (17 : 52 : 39 : 18)	21,250	65,000	48,750	22,500
Sacrifice (–) / Gain (+)	(–) 13,750	(–) 5,000	(–) 3,750	(+) 22,500

Journal Dr. Cr.

Date	Particulars		₹	₹
	Pink Capital A/c ₹ (22,500 – 13,750)	Dr.	8,750	
	To White Capital A/c			5,000
	To Blue Capital A/c			3,750
	(Being adjustment for goodwill on Pink's admission)			

No entry is required for the amount ceded by Red ₹ 13,750.

(b) When value of assets and liabilities are to be shown in the Balance Sheet at original figures

All the partners may decide that the revised values of assets and liabilities should not be shown in the Balance Sheet to avoid ***departure from historical cost.*** In this case, a Memorandum Revaluation Account is opened. Any increase in the value of assets (and/or decrease in the liabilities) is credited to Memorandum Revaluation Account. Similarly, any decrease in the value of assets (and/or increase in the liabilities) is debited to Memorandum Revaluation Account. If the credit side of the Memorandum Revaluation Account is more than the debit side, there is a profit. This profit should be transferred to Old Partners' Capital Accounts in the old profit-sharing ratio. The Journal entry will be:

Memorandum Revaluation Account Dr.
　　To Old Partners' Capital Accounts

If the debit side of the Memorandum Revaluation Account is more than the credit side, there is a loss which is transferred to Old Partners' Capital Accounts in the old profit-sharing ratio. The journal entry will be:

Old Partners' Capital Accounts Dr.
　　To Memorandum Revaluation Account

After completing the above procedure, reverse entries are made for increase in the values of assets and/or decrease in the liabilities, and decrease in the values of assets and/or increase in the liabilities) in the lower portion of the Memorandum Revaluation Account. The profit on revaluation is to be transferred to all Partners' Capital Accounts in the ***new profit-sharing ratio***.

The Journal entry will be :

Memorandum Revaluation Account Dr.
 To All Partners' Capital Accounts (New ratio)

The loss on revaluation should be transferred to all partners' Capital Accounts in the new profit-sharing ratio. The Journal entry will be:

All Partners' Capital Accounts Dr. (New ratio)
 To Memorandum Revaluation Account

It should be noted that if there is a profit in the upper portion of the Memorandum Revaluation Account, the lower protion of the Memorandum Revaluation Account must show a loss. Conversely, if the upper portion of the Memorandum Revaluation Account shows a loss, the lower portion of the Memorandum Revaluation Account must show a profit.

It should be noted that when a Memorandum Revaluation Account is prepared, the book values of assets and liabilities do not change — they remain at their historical cost to the partnership. In effect, the resultant profit or loss on revaluation is adjusted through the Partners' Capital Accounts. In this way, the amount invested as a capital by the incoming partner may be set at a level that reflects the current fair value of the partnership, even though the book values of assets and liabilities of the existing partnership remain unchanged in the books of accounts.

Illustration 79

A and B are partners sharing profits and losses in the ratio of 3 : 2. Their Balance Sheet as at 31.3.2015 is given below:

Liabilities	₹	Assets	₹
Creditors	30,000	Freehold premises	2,00,000
Bills Payable	20,000	Plant	40,000
Capital A/c		Furniture	20,000
A	2,00,000	Office equipment	25,000
B	1,00,000	Stock	30,000
		Debtors	25,000
		Bank	10,000
	3,50,000		3,50,000

On 1.4.2015 they admit C on the following terms: (1) C will bring ₹ 50,000 as capital and ₹ 10,000 for goodwill for 1/5 share; (2) Provision for doubtful debts is to be made on debtors @ 2%; (3) Stock to be written down by 10%; (4) Freehold premises is to be revalued at ₹ 2,40,000, plant at ₹ 35,000, furniture ₹ 25,000 and office equipment ₹ 27,500; (5) Partners agreed that the values of the assets and liabilities remain the same and, as such, there should not be any change in their book values as a result of the above-mentioned adjustments. You are required to make necessary adjustment in the Capital Accounts of the partners and show the Balance Sheet of the New Firm.

			Current Account : C		5,000
		3,20,000			3,20,000

D is admitted as a partner on the above date for 1/5th share in the profit and loss. Following are agreed upon :

(1) The profit and loss sharing ratio among the old partners will be equal.

(2) D brings in ₹ 75,000 as capital but is unable to bring in the required amount of premium for goodwill.

(3) An appropriate valuation of goodwill is to be made under the said circumstances based on all partners' capitals.

(4) Assets and liabilities are to be revealed as follows —
Building ₹ 1,03,000; Machinery ₹ 64,000; Provision for doubtful debts @ 10% on Debtors.

(5) Necessary adjustments regarding goodwill and profit or loss on revaluation are to be made through the Partners' Current Accounts.

(6) Except cash, the values of assets and liabilities are not to be altered in the Balance Sheet of the new firm.

(7) Capital Accounts of the old partners in the new firm should be proportionate to the new profit and loss sharing ratio — taking D's capital as base. The existing partners will not bring in any further capital. The necessary adjustments are to be made through the Partners' Current Accounts.

Prepare a Memorandum Revaluation Account, Partners' Capital and Current Accounts, and the Balance Sheet of the new firm after admission.

	34,500	32,000	47,000	9,000		34,500	32,000	47,000	9,000

Balance Sheet after D's Admission

Liabilities			₹	Assets		₹
Capital Accounts :	A	1,00,000		Building		80,000
	B	1,00,000		Machinery		70,000
	C	1,00,000		Stock		1,05,000
	D	75,000	3,75,000	Debtors	40,000	
Current Accounts :	A		12,500	Less: Provision for Doubtful Debts	2,000	38,000
Creditors			60,000	Cash ₹ (22,000 + 75,000)		97,000
				Current Accounts : B		9,000
				C		39,500
				D		9,000
			4,47,500			4,47,500

Working Notes :

(1) D joins the business for 1/5th share and brings in ₹ 75,000 as capital. Therefore, the total capital of the new firm will be ₹ 3,75,000 (₹ 75,000 × 5/1). The total capital of A, B and C will be ₹ 3,00,000 (₹ 3,75,000 – ₹ 75,000), which will be shared by them equally, i.e., ₹ 1,00,000 each.

(2) The total capital of A, B and C before the admission of D is ₹ 2,55,000 (₹ 90,000 + ₹ 80,000 + ₹ 70,000 + ₹ 12,000 + ₹ 8,000 – ₹ 5,000) plus the revaluation profit of ₹ 15,000, i.e., ₹ 2,70,000. But the capitals of A, B and C, after the admission of D, will be ₹ 3,00,000, without the existing partners bringing in any further capital. Therefore, the difference ₹ 30,000 (₹ 3,00,000 – ₹ 2,70,000) represents goodwill.

4. Reserve and Accumulated Profits / Losses

At the time of admission of a new partner any undrawn profit or retained earning and accumulated loss should be transferred to the Capital Accounts of the old partners in the ***old profit-sharing ratio***.

The Journal entry will be:

(i) Profit and Loss Account Dr.
General Reserve Account Dr.
Other Retained Earnings Account Dr.
To Old Partners' Capital Accounts [Old ratio]

If there is any accumulated loss, it should be transferred to the Old Partners' Capital/Current Accounts by passing the following entry:

Old Partners' Capital Accounts Dr. [Old ratio]
To Profit and Loss Account

All partners may decide that the reserve to be shown in the books of the new firm at its orginal figure.

Under this situation, Reserve is written-off first by debiting Reserve Account and crediting Old Partners' Capital Accounts in the old profit sharing ratio, then Reserve is raised in the books at its original value (or agreed value) by debiting All Partners' Capital Accounts in new profit sharing ratio and crediting the Reserve Account.

(i) General Reserve Account Dr.
To Old Partners' Capital Accounts [Old ratio]
(Being general reserve transferred to Old Partners' Capital Accounts in the old ratio).
(ii) All Partners' Capital Accounts Dr. [New Ratio]
To General Reserve Account [Agreed value]
(Being general reserve brought back in the books of account by debiting all partners in the new ratio)

Students must pass necessary entries for reserve and surplus or accumulated losses even if the question is silent on that point.

Illustration 81

A, B and C were Partners in a firm sharing profits and losses in the ratio 3:2:1 respectively. Following is their Balance Sheet as on 31.12.2014:

Liabilities	₹	Assets	₹
Capital — A	30,000	Land and Building	50,000
Capital — B	20,000	Furniture	15,000
Capital — C	10,000	Stock	20,000
Reserve	29,800	Bills Receivable	5,000
Creditors	6,200	Debtors	7,500
Bills Payable	4,000	Cash at bank	2,500
	1,00,000		1,00,000

D is to be admitted as a partner w.e.f. 1.1.2015 on the following terms :

(a) D will bring in ₹ 15,000 as capital and ₹ 12,000 as premium for goodwill. Half of the premium will be withdrawn by the partners; (b) D will be entitled to 1/6th share in the profits of the firm; (c) The assets, will be revalued as: Land and building ₹ 56,000; Furniture ₹ 12,000; Stock ₹ 16,000; Debtors ₹ 7,000; (d) The claim of a creditor for ₹ 2,300 is paid at ₹ 2,000; and (e) Half of the Reserve to be withdrawn by the partners. Prepare necessary Ledger Accounts and the opening Balance Sheet of the new firm.

5. Adjustment of Capital

When a new partner is admitted into the partnership, he is to bring in capital.

The amount of capital to be brought in by the new partner will depend upon the agreement between the partners. In some cases, the capital of the new partner is determined on the basis of the adjusted combined capital of the old partners.

Sometimes after admission of a new partner, all the partners may decide to make their capitals proportionate to the profit sharing ratio or other ratios. In that case, old partners' capitals will be changed. Some partners will bring in new capital to make up deficit of his capital and others will withdraw their excess capital.

Adjustments under different situations are shown below :

Case 1 : When the new partner will bring proportionate capital of the firm

For calculating the capital to be brought in by the new partner, the following steps are to be followed:

Step 1. Calculate the adjusted combined capital of the old partners as follows :

Opening combined capital	****
Add : Goodwill to be adjusted	****
Add : Revaluation profit	****
Add : Reserve and surplus of the old partners	****
	****
Less : Revaluation loss	****
Less : Profit and Loss Account (Debit balance)	****
Adjusted combined capital of old partners	****

Step 2. Calculate the combined share of profit of the old partners after deducting the share of new partner.

Step 3. Calculate the total capital of the firm based on adjusted combined capital as calculated in Step 1 above.

Step 4. Calculate the capital of the new partner based on total capital of the firm as calculated in Step 3.

Case 2 : When the old partners' capital to be fixed on the basis of the capital of the new partner

For calculating the revised capital of the old partners in the new partnership, the following steps are to be followed :

Step 1 : Calculate total capital of the firm with the help of the following formula :

$$\text{Total capital of the firm} = \frac{\text{Capital of the new partner}}{\text{Share of profit of the new partner}}$$

Step 2 : Calculate the proportionate capital of the old partners on the basis of the new profit sharing ratio.

Step 3 : Ascertain the present capital of the old partners (after all adjustments)

Step 4 : Find out the surplus capital / deficit capital by comparing proportionate capital (ascertained in Step 2) and present capital (ascertained in Step 3).

Surplus occurs when Present capital is greater than Proportionate capital

Deficit occurs when Present capital is less than Proportionate capital

Step 5 : Pass necessary journal entry for adjusting the above surplus / deficit.

It should be noted that surplus capital is transferred to Current Account or it may be withdrawn by the old partners as per agreement between the partners. Similarly, the deficit capital is brought in by the old partner or it is transferred to Current Accounts of the old partner.

Illustration 82

The following is the Balance Sheet of A and B as at March 31, 2015. C is admitted as a partner on that date when the position of A and B was as under :

Liabilities	₹	Assets	₹
A's Capital	10,000	Debtors	11,000
B's Capital	8,000	Land and Building	8,000
Creditors	12,000	Plant and Machinery	10,000
General Reserve	16,000	Stock of Goods	12,000
Workmen's Compensation Fund	4,000	Cash and Bank Balance	9,000
	50,000		50,000

A and B shared profits in the proportion of 3 : 2. The following terms of admission are agreed upon :

(a) Revaluaton of Assets : Land and Buildings ₹ 18,000 and Stock of Goods ₹ 16,000.

(b) The liability on Workmen's Compensation Fund is determined at ₹ 2,000.

(c) C brought in as his share of goodswill ₹ 10,000 in cash.

(d) C was to bring further cash as would make his capital equal to 20% of the combined capitals of partners A and B after above revaluation and adjustments are carried out.

(e) the future profit sharing proportions are : A — 2/5th; B — 2/5th; and C — 1/5th.

Prepare the new Balance Sheet of the firm and the Capital Accounts of the Partners.

Solution

Dr. **Partners' Capital Accounts** **Cr.**

Particulars	A	B	C	Particulars	A	B	C
To Balance c/d	39,200	20,800	12,000	By Balance b/d	10,000	8,000	—

Liabilities	₹	Assets	₹
Partners' Capital A/cs : A	39,200	Land and Building	18,000
B	20,800	Plant and Machinery	10,000
C	12,000	Stock of Goods	16,000
Creditors	12,000	Debtors	11,000
Workmen's Compensation Fund	2,000	Cash and Bank (Note 4)	31,000
	86,000		86,000

Working Notes :

	₹
(1) Opening combined capital ₹ (10,000 + 8,000)	18,000
Add: Goodwill premium	10,000
Revaluation profit ₹ (10,000 + 4,000)	14,000
General reserve	16,000
Workmen's compensation fund ₹ (4,000 – 2,000)	2,000
Adjusted combined capital of A and B	60,000

(2) Revaluation Account

Particulars	₹	Particulars	₹
To Partners' Capital A/cs		By Land and Building A/c	10,000
A (3/5)	8,400	By Stock of Goods A/c	4,000
B (2/5)	5,600		
	14,000		14,000

(3) Adjustment of Premium for Goodwill

Particulars	A (₹)	B (₹)	C (₹)
Right of goodwill before admission (3 : 2)	30,000	20,000	—
Right of goodwill after admission (2 : 2 : 1)	20,000	20,000	10,000
Sacrifice (–) / Gain (+)	(–)10,000	Nil	(+) 10,000

Total value of goodwill = ₹ 10,000 × 5/1 = ₹ **50,000**.

(4) Cash at Bank = ₹ 9,000 + 10,000 + 12,000 = ₹ **31,000**.

Illustration 83

A, B and C are partners sharing profits and losses in the ratio of 2 : 3 : 5. On 31st May, 2015, their Balance Sheet was as follows :

Liabilities			₹	Assets	₹
Capitals :	A	36,000		Cash	18,000
	B	44,000		Bills Receivable	24,000
	C	52,000	1,32,000	Furniture	28,000
Creditors			64,000	Stock	44,000
Bills Payable			32,000	Debtors	42,000
Profit and Loss Account			14,000	Investments	32,000
				Machinery	34,000
				Building	20,000
			2,42,000		2,42,000

They admit D into partnership on the following terms :

(1) Furniture, investments and machinery to be depreciated by 15%

(2) Stock is revalued at ₹ 48,000.

(3) Building to be valued at ₹ 26,000.

(4) Outstanding rent amounted to ₹ 1,800.

(5) Prepaid salaries ₹ 800.

(6) D to bring ₹ 32,000 towards capital for 1/6th share and other partners to re-adjust their Capital Accounts on the basis of their profit sharing ratio.

(7) Adjustments of capitals to be made by cash.

Prepare Revaluation Account, Partners' Capital Accounts, Cash Account and Balance Sheet of the new firm.

To D Capital A/c	32,000	By Balance c/d	69,100
To B Capital A/c	1,330		
To C Capital A/c	23,550		
	74,880		74,880

Balance Sheet of A, B, C and D as at 1st June, 2015

Liabilities			₹	Assets	₹
Capitals :	A	32,000		Building	26,000
	B	48,000		Machinery	28,900
	C	80,000		Furniture	23,800
	D	32,000	1,92,000	Investments	27,200
Creditors			64,000	Stock	48,000
Outstanding Rent			1,800	Debtors	42,000
Bills Payable			32,000	Bills Receivable	24,000
				Cash	69,100
				Prepaid Salaries	800
			2,89,800		2,89,800

Working Notes :

(1) Calculation of New Profit Sharing Ratio

D joins the firm for 1/6th share of profit. Therefore, 1 – 1/6 = 5/6th will be shared by A, B and C in the ratio of 2 : 3 : 5.

So, A's share of profit = 2/10 of 5/6 = 10/60

B's share of profit = 3/10 of 5/6 = 15/60

C's share of profit = 5/10 of 5/6 = 25/60

D's share of profit = 1/6 or 10/60

The new profit sharing ratio = A : B : C : D = 10 : 15 : 25 : 10 = 2 : 3 : 5 : 2

(2) Calculation of Amount of Capital to be Withdrawn / Introduced

Step 1 : Calculation of total capital of the new firm

$$\text{Total capital of the firm} = \frac{\text{Capital of the new partner}}{\text{Share of profit of the new partner}}$$

= ₹ 32,000 × 6/1 = ₹ 1,92,000

Step 2 : Calculation of proportionate capital of the old partners on the basis of the new profit sharing ratio

A's capital = ₹ 1,92,000 × 2/12 = ₹ 32,000;

B's capital = ₹ 1,92,000 × 3/12 = ₹ 48,000;

C's capital = ₹ 1,92,000 × 5/12 = ₹ 80,000.

Step 3 : Present capital of the old partners

A : ₹ (36,000 + 2,800 + 1,200 – 2,220) = ₹ 37,780; B : ₹ (44,000 + 4,200 + 1,800 – 3,330) = ₹ 46,670; C : ₹ (52,000 + 7,000 + 3,000 – 5,550) = ₹ 56,450.

Step 4 : Ascertainment of Capital to be Withdrawn or Brought in

Particulars	A (₹)	B (₹)	C (₹)
Required new capital (see Step 2)	32,000	48,000	80,000
Present capital (see Step 3)	37,780	46,670	56,450
Withdrawn (–) / Brought in (+)	(–) 5,780	(+)1,330	(+)23,550

Illustration 84

A and B share profits and losses as 3 : 1. Their Balance Sheet as on 30th June 2015 is as under:

Liabilities	₹	Assets		₹
A Capital	60,000	Land and Building		50,000
B Capital	32,000	Furniture		2,000
Creditors	75,000	Debtors	33,000	
General reserve	8,000	Less: Provision for doubtful debts	1,000	32,000
		Bills Receivable		6,000
		Stock in trade		40,000
		Cash at bank		45,000
	1,75,000			1,75,000

C is admitted on 1.7.2015 on the following terms:

(1) C to bring in ₹ 20,000 as his capital and to be entitled to a fifth share in the profits.

(2) Goodwill valued at ₹ 50,000. C was to bring half of his share of goodwill in cash and other half was to be purchased by him from the existing partners by book adjustment. The necessary amount was debited to C's current account. No Goodwill Account was to be raised in the books.

(3) The value of stock and furniture was to be reduced by 10% and the reserve for doubtful debts was to be brought to 10% of debtors.

(4) Value of land and building was to be increased by 15%.

(5) The capitals of partners in the new firm are to be in the profit sharing ratio — the capital of C being taken as the basic capital. The excess amount of capital, if any, to be paid-off in cash.

You are required to prepare Journal entries, Capital Accounts of the partners and the new Balance Sheet.

Solution

Working Notes : C is coming for 1/5th share. Therefore, 4/5th remains for A and B which will be shared in the ratio of 3 : 1. A will get 3/4 of 4/5 = 3/5; B will get 1/4 of 4/5 = 1/5 and C 1/5. Now, the capital brought in by C is ₹ 20,000 for 1/5th share. The total capital of the firm will be 5/1 x 20,000 = ₹ 1,00,000.

A = 3/5 of 1,00,000 = ₹ 60,000; B = 1/5 of 1,00,000 = ₹ 20,000; and C = ₹ 20,000.

A and B are in partnership sharing profits and losses in the proportion of three-fourth and one-fourth respectively. Their Balance Sheet on 31st March, 2015 was as follows: Cash ₹ 1,000; Sundry Debtors ₹ 25,000; Stock ₹ 22,000; Plant and Machinery ₹ 4,000; Sundry Creditors ₹ 12,000; Bank Overdraft ₹ 15,000; A's Capital ₹ 15,000; B's Capital ₹ 10,000. On 1st April 2015, they admitted C into partnership on the following terms :

(a) C is to purchase one-third of the Goodwill for ₹ 2,000 and provide ₹ 10,000 as Capital. Goodwill not to appear in the books.

(b) Future profits and losses are to be shared by A, B and C equally.

(c) Plant and machinery is to be reduced by 10% and ₹ 500 is to be provided for estimated bad debts. Stock is to be taken at a valuation of ₹ 24,940.

(d) By bringing in or withdrawing cash, the capitals of A and B are to be made proportionate to that of C on their profit sharing basis.

Set out entires to the above arrangements in the firm's journal, give the Partners' Capital Accounts in the tabular form and submit the opening Balance Sheet of the new firm.

Illustration 86

A and B are partners sharing profits and losses equally. Their Balance Sheet as on 31.12.2013 was as follows :

Liabilities		₹	Assets	₹
Capital Accounts	A	60,000	Premises	30,000
	B	70,000	Furniture	14,000
Creditors		30,000	Stock	74,000
			Debtors	24,000
			Bank	18,000
		1,60,000		1,60,000

On 1.1.2014, they decided to admit C as a partner on the following items :

(1) C should pay ₹ 60,000 as capital for being entitled to one-third share of profits. The remaining profits are to be shared by the old partners equally.

(2) Stock to be valued at ₹ 70,000 and premises to be taken at 95% of book value.

(3) After the conclusion of the first trading year, Goodwill is to valued at three times of the net profit of the year in excess of ₹ 30,100. Such goodwill should be divided between A and B in the ratio of their sacrifices in favour of C.

Transactions during the year ended 31.12.2014 were as follows : Purchases ₹ 5,30,000; Sales ₹ 6,00,000; Payments for purchases at 98% in full settlement at ₹ 4,80,200; Collection from debtors (after allowing 5% against a prompt payment of dues ₹ 40,000) ₹ 3,38,000; Sundry expenses ₹ 18,000; Administration expenses ₹ 60,000; Drawings of partners : A ₹ 5,000; B ₹ 4,000 and C ₹ 3,000.

On 31.12.2014, Stock was ₹ 1,20,000. Depreciation was to be provided on furniture ₹ 900. C contributed sufficient cash to make his capital proportionate to his share of profit after goodwill was calculated and given effect.

You are required to prepare : (a) The amended Balance Sheet of the firm on 1.1.2014; and (b) The Balance Sheet of the firm on 31.12.2014 after giving effect to the required adjustments.

Solution **Balance Sheet as on 1st January, 2014**

Liabilities		₹	Assets	₹
Capital (Note 3) :	A	57,250	Premises (95% of ₹ 30,000)	28,500
	B	67,250	Furniture	14,000
	C	60,000	Stock	70,000
Creditors		30,000	Debtors	24,000
			Bank ₹ (18,000 + 60,000)	78,000
		2,14,500		2,14,500

Balance Sheet as on 31st December, 2014

Liabilities		₹	Assets		₹
Capital (Note 3)	A	77,950	Premises		28,500
	B	88,950	Furniture	14,000	
	C	83,450	Less: Depreciation	900	13,100
Creditors (Note 5)		70,000	Stock		1,20,000
Bank Overdraft (Note 6)		1,25,250	Debtors (Note 4)		2,84,000
		4,45,600			4,45,600

Working Notes :

Dr. **(1) Trading and Profit and Loss Account for the year ended 31st December, 2014** **Cr.**

Particulars	₹	Particulars	₹
To Opening Stock	70,000	By Sales	6,00,000
To Purchases	5,30,000	By Closing Stock	1,20,000
To Gross Profit c/d	1,20,000		
	7,20,000		7,20,000

To Sundry Expenses	18,000	By Gross Profit b/d	1,20,000
To Administrative Expenses	60,000	By Discount Received (₹ 4,80,200/98 x 2)	9,800
To Discount Allowed (5% on ₹ 40,000)	2,000		
To Depreciation on Furniture	900		
To Share of Profit : (A — ₹ 16,300; B — ₹ 16,300; C — ₹ 16,300)	48,900		
	1,29,800		1,29,800

(2) Valuation of Goodwill : 3 times of the net profits of the year 2014 in excess of ₹ 30,100. Therefore, the value of the goodwill is 3 × ₹ (48,900 – 30,100) = ₹ 56,400.

A and B are partners sharing profits and losses in the ratio of 3 : 2. Their Balance Sheet stood as under on 1.1.2015 :

Liabilities		₹	Assets		₹
Capital Accounts	A	29,000	Buildings		35,000
	B	15,000	Machinery		19,000
Reserve		10,000	Furniture		5,000
Creditors		28,500	Stock		15,000
Outstanding Expenses		4,000	Debtors	9,400	
			Less: Provision for Bad Debts	400	9,000
			Prepaid Insurance		1,500
			Cash		2,000
		86,500			86,500

C is admitted as a new partner introducing a capital of ₹ 21,000. The capitals of the partners are to be adjusted in the new profit-sharing ratio, which is 5 : 3 : 2 — taking C's capital as base. C is to bring premium for goodwill in cash. Goodwill amount being calculated on the basis of C's share in the profits and capital contributed by him. Following revaluations are made : (i) Stock to be depreciated by 5%; (ii) Provision for bad debts is to be raised to ₹ 500; (iii) Furniture to be depreciated by 10%; (iv) Buildings are revalued at ₹ 41,350.

Prepare necessary Ledger Accounts and the Balance Sheet of the new firm.

Solution

In the books of the firm

Revaluation Account

Dr. Particulars	₹	Particulars	Cr. ₹
To Stock A/c	750	By Buildings A/c	6,350
To Provision for Bad Debts A/c	100		
To Furniture A/c	500		
To Partners' Capital A/cs — profit (A — ₹ 3,000; B — ₹ 2,000)	5,000		
	6,350		6,350

Partners' Capital Accounts

Dr. Date	Particulars	A	B	C	Date	Particulars	A	B	Cr. C
2015					2015				
Jan.1	To Balance c/d (Note 1)	52,500	31,500	21,000	Jan.1	By Balance b/d	29,000	15,000	—
						By Reserve A/c	6,000	4,000	—
						By Revaluation A/c	3,000	2,000	—
						By Cash A/c	—	—	21,000
						By Premium for Goodwill A/c (Note 1)	3,000	2,000	—
						By Cash A/c (Bal. Fig.)	11,500	8,500	—
		52,500	31,500	21,000			52,500	31,500	21,000

Balance Sheet of the New Firm as at 1st January, 2015

Liabilities			₹	Assets		₹
Capital Accounts :	A	52,500		Buildings		41,350
	B	31,500		Machinery		19,000
	C	21,000	1,05,000	Furniture		4,500
Creditors			28,500	Stock		14,250
Outstanding Expenses			4,000	Debtors	9,400	
				Less: Provision for Bad Debts	500	8,900
				Prepaid Insurance		1,500
				Cash ₹ (2,000 + 21,000 + 5,000 + 11,500 + 8,500)		48,000
			1,37,500			1,37,500

Working Note (1) : C is bringing in ₹ 21,000 for his 2/10th share in profit. Therefore, total capital of the firm will be ₹ 21,000 / 2 x 10 = ₹ 1,05,000.

A's capital = 5/10 x ₹ 1,05,000 = ₹ 52,500; B's capital = 3/10 x ₹ 1,05,000 = ₹ 31,500. Combined capital of A and B will be ₹ 84,000.

At present, combined capital of A and B after adjustment of Revaluation Profit and Reserve = ₹ (29,000 + 15,000 + 10,000 + 5,000) = ₹ 59,000.

Therefore, value of goodwill = ₹ (84,000 – 59,000) = ₹ 25,000.

C's share of goodwill = ₹ 25,000 / 10 × 2 = ₹ 5,000.

Illustration 88

Ranu and Mili are partners in a firm sharing profits and losses in the ratio of 2/3rd and 1/3rd.

The Balance Sheet of the firm on 31.12.2014 was as follows :

Liabilities			₹	Assets		₹
Creditors			7,000	Investments		25,000
Investment Provision			2,000	Stock		15,000
General Reserve			10,500	Debtors	20,000	
Workmen Compensation Fund			6,000	Less: Provision for bad debts	2,500	17,500
Capital Accounts :	Ranu	30,000		Bills Receivable		12,500
	Mili	24,500	54,500	Bank		10,000
			80,000			80,000

On the above date, Manisha is admitted for 2/5th share in the profits or losses of the firm. Following adjustments were made at the time of admission :

(a) Manisha is required to bring in ₹ 50,000 as capital.

(b) Her goodwill was calculated at ₹ 12,000.

(c) Ranu and Mili purchased a machinery on hire purchase system for ₹ 15,000 of which only ₹ 500 are to be paid. Both machinery and unpaid liability did not appear in the Balance Sheet.

(d) There was a joint life policy on the lives of Ranu and Mili for ₹ 75,000. Surrender value of the policy on the date of admission amounted to ₹ 12,000.
(e) Accrued incomes not appearing in the books were ₹ 500.
(f) Market value of investments is ₹ 22,500.
(g) Claim on account of compensation is estimated at ₹ 750.
(h) S, an old customer, whose account was written-off as bad, has promised to pay ₹ 1,750 in settlement of the full claim.
(i) Provision for bad debts is required at ₹ 3,000.

Prepare Revaluation Account, Partners' Capital Accounts and Opening Balance Sheet after the admission of Manisha.

Solution

In the books of the firm

Dr. Revaluation Account Cr.

Liabilities	₹	Assets	₹
To Investment Provision A/c (Note 1)	500	By Accrued Income A/c	500
To Provision for Bad Debts A/c	500	By Workmen Compensation Fund A/c (Note 2)	5,250
To Creditors A/c (hire purchase)	500	By Joint Life Policy A/c	12,000
To Partners' Capital A/cs — profit		By Machinery A/c	15,000
(Ranu — ₹ 20,833; Mili — ₹ 10,417)	31,250		
	32,750		32,750

Dr. Partners' Capital Accounts Cr.

Date	Particulars	Ranu	Mili	Manisha	Date	Particulars	Ranu	Mili	Manisha
	To Goodwill A/c	12,000	6,000	12,000		By Balance b/d	30,000	24,500	—
	To Balance c/d	65,833	42,417	38,000		By Revaluation A/c	20,833	10,417	—
						By General Reserve A/c	7,000	3,500	—
						By Goodwill A/c (Note 3)	20,000	10,000	—
						By Bank A/c	—	—	50,000
		77,833	48,417	50,000			77,833	48,417	50,000

Balance Sheet of the firm (after Manisha's admission)

Liabilities	₹	Assets		₹
Capital A/c		Machinery		15,000
Ranu	65,833	Investment		25,000
Mili	42,417	Stock		15,000
Manisha	38,000	Debtors	20,000	
Creditors	7,500	Less: Provision for bad debts	3,000	17,000
Investment Provision ₹ (2,000 + 500)	2,500	Bills Receivable		12,500
Workmen Compensation Fund ₹ (6,000 – 5,250)	750	Joint Life Policy		12,000
		Accrued Income		500
		Bank ₹ (10,000 + 50,000)		60,000
	1,57,000			1,57,000

Working Notes :

(1) Since there is a fall in the market value of investments of ₹ 2,500, investment provision is increased from ₹ 2,000 to ₹ 2,500.
(2) Workmen compensation fund is nothing but retained profit. Therefore, it is credited to Revaluation Account. Alternatively, it could have been credited to Partners' Capital Accounts in the old profit sharing ratio.
(3) Since Manisha is not paying the required amount of premium for goodwill. Therefore, ₹ 30,000 goodwill will be adjusted through the Capital Accounts of the partners.
(4) There will be no entry for the promise made by S, since it is an event and not a transaction.

Illustration 89

Taylor and Best were in partnership sharing profits and losses in the ratio 2/3 and 1/3 respectively. The partnership deed provided :

1. Interest @ 8% p.a. is to be allowed on fixed capital accounts. No interest is to be allowed on current accounts but 10% p.a. is to be charged on any debit balance at the commencement of the year.
2. Goodwill is to be valued at 1.5 times the average annual profits of the previous four or five years' whichever is lower.

The partners agreed to take Watson into partnership as on 1.1.2014 and he introduced ₹ 5,000 into the business. It was agreed that fixed capital of the business should be ₹ 20,000 contributed by the partners in their profit sharing ratio, any surplus or deficiency being transferred to their current accounts. Taylor was to be entitled to a prior share of the profits of ₹ 500 and the balance was to be shared — Taylor 2/5; Best 2/5 and Watson 1/5. In addition, it was agreed that Watson's share of the profits should not be less than ₹ 3,500 p.a.

Agreed profits for goodwill purposes of the past five years are as under:

2009 ₹ 10,420; 2010 ₹ 11,760; 2011 ₹ 9,400; 2012 ₹ 13,820; 2013 ₹ 14,600.

No account for goodwill is maintained in the books. Adjusting entries for the transactions between the partners being made in their current accounts.

Partners accounts as on 31.12.2013 were as follows:

Fixed Capital : Taylor 10,000; Best 6,000; **Current Account** : Taylor 3,400 (Cr.); Best 1,200 (Cr.).

The draft accounts for the year ended 31.12.2014 before taking into account interest on partners' accounts, show a profit of ₹ 16,400. Partners' drawings during the year are : Taylor ₹ 5,000; Best ₹ 2,500 and Watson ₹ 1,500.

You are required to prepare :

(a) a statement showing the division of profit for the year ended 31.12.2014; and

(b) the Partners' Current Accounts for the year ended 31.12.2014, recording therein the entries necessary upon Watson's admission as a partner.

Solution Statement showing Division of Profit for the year ended 31st December, 2014

Particulars	₹	₹
Profit before interest on capital and current account		16,400
Add: **Interest on debit balance of Current A/c** (See Partners' Current Accounts)		
Best : @ 10% on ₹ 2,000	200	
Watson : @ 10% on ₹ 2,600	260	460
		16,860
Less: **Interest on Fixed Capital**		
Taylor : @ 8% on ₹ 8,000	640	
Best : @ 8% on ₹ 8,000	640	
Watson : @ 8% on ₹ 4,000	320	1,600
Divisible profit		15,260
Less: Taylor's prior share of profit		500
		14,760
Less: Watson's guaranteed share of profit		3,500
Balance should be shared by Taylor and Best equally		11,260

So, Taylor's share of profit = ₹ 500 + 1/2 of ₹ 11,260 = ₹ 6,130; Best's sh. of profit = 1/2 of ₹ 11,260 = ₹ 5,630; Watson's share of profit = ₹ 3,500.

Dr. Partners' Current Accounts Cr.

Particulars	Taylor	Best	Watson	Particulars	Taylor	Best	Watson
To Goodwill A/c (written off)*	7,200	7,200	3,600	By Balance b/d	3,400	1,200	—
To Taylor's Capital A/c	—	2,000	—	By Goodwill A/c (raised)*	12,000	6,000	—
To Balance c/d	10,200	—	—	By Taylor's Capital A/c	2,000	—	1,000
				By Balance c/d	—	2,000	2,600
	17,400	9,200	3,600		17,400	9,200	3,600
To Balance b/d	—	2,000	2,600	By Balance b/d	10,200	—	—
To Interest on Current A/c	—	200	260	By Interest on Capital A/c	640	640	320
To Drawings A/c	5,000	2,500	1,500	By Share of Profit A/c	6,130	5,630	3,500
To Balance c/d	11,970	1,570	—	By Balance c/d	—	—	540
	16,970	6,270	4,360		16,970	6,270	4,360

* Adjustment for goodwill must be done through the Capital Account of the partners but in this case, it has been done through the Current Account of the partners as per the requirement of the question.

Working Notes :

(1) Valuation of Goodwill : 5 years' Average profit = (₹ 14,600 + 13,820 + 9,400 + 11,760 + 10,420) / 5 = ₹ 12,000; 4 years' Average profit = (₹ 14,600 + 13,820 + 9,400 + 11,760) / 4 = ₹ 12,355; Therefore, value of goodwill = (₹ 12,000 x 1.5) = ₹ 18,000.

(2) Total capital of the firm = ₹ 20,000.

So, Taylor's share of capital = 2/5 of ₹ 20,000 = ₹ 8,000; Best's share of capital = 2/5 of ₹ 20,000 = ₹ 8,000 and; Watson's share of capital = 1/5 of ₹ 20,000 = ₹ 4,000.

Admission of a Partner During An Accounting Year

So far we have seen that a partner is admitted to the partnership at the commencement of a new year. But in practical situation, a partner may be admitted during the course of an accounting year.

When a new partner is admitted during the course of an accounting year, the following steps should be followed:

Step 1 Divide the accounting period into two portions: (a) The pre-admission period; and (b) The post-admission period.

Step 2 Divide the whole profit between these two periods on the basis of either time or turnover. If the basis has been given in the problem, then that should be followed.

Step 3 Divide the whole expenses between these two periods on the basis of either time or turnover as the case may be. Care should be taken for the expenses which are exclusively related to pre-admission period or post-admission period. If the basis for allocation of expenses has been given in the problem, then that should be followed. If no hint has been given, then it is logical to allocate fixed expenses such as rent, rates and taxes, etc, on the basis of time and other expenses on the basis of turnover.

Step 4 Calculate profit of each period separately. Divide pre-admission period's profit in the ***old ratio*** amongst, old partners and divide post admission period's profit amongst all partners in the ***new ratio***.

Step 5 Pass necessary entries in the usual manner for other matters in relation to admission.

Illustration 90

J and K have been trading in partnership for several years, sharing profits and losses equally after allowing for interest on their capitals at 8% per annum.

At 1st September, 2014 their manager, L, was admitted as a partner and was to have a one- fifth share of the profits after interest on capitals, J and K shared the balance equally but guaranteed that L's share should not fall below ₹ 6,000 p.a. L was not required to introduce any capital at the date of admission but agreed to retain ₹ 1,500 of his profit share at the end of each year to be credited to his Capital Account until the balance reached ₹ 7,500. Until that time no interest was to be allowed on his capital.

Goodwill, calculated as a percentage of the profits of the last five years', was agreed at ₹ 15,000 at 1st September, 2014, and L paid into the business sufficient cash for his share. No Goodwill Account was to be left in the books.

Land and Buildings was professionally valued at the same date at ₹ 28,400 and this figure was to be brought into the books, while the book vaue of the equipment and vehicles was, by mutual agreement, to be reduced to ₹ 15,000 at that date.

L had previously been entitled to bonus of 5% of the gross profit, payable half-yearly; the bonus together with his manager's salary were to cease when he became a partner.

The trial balance at the end of the 2014 financial year is given below. No adjustments had yet been made in respect of L's admission, and the amount he introduced for goodwill had been put to his current account. The drawings of all the partners have been charged to their current accounts.

It can be assumed that the gross profit and trading expenses accrued evenly throughout the year. Depreciation on the equipment and Vehicles is to be charged at 20% per annum on the book value.

Balance Sheet of J, K & L as at 31st December, 2014

Liabilities	₹	Assets	₹
Capital A/c		Land and Building	28,400
(J — ₹ 35,100; K — ₹ 20,100; L — ₹ 1,500)	56,700	Equipment (Less Depreciation: ₹ 1,000)	14,000
Current A/c		Stock	9,200
(J — ₹ 700; K — ₹ 200; L — (–) ₹ 350)	550	Debtors	4,850
Creditors	3,100	Bank	3,900
	60,350		60,350

Working Notes :

(1) Total gross profit = ₹ 42,000. Gross profit of pre-admission period is ₹ 28,000. Manager's bonus @ 5% is ₹ 1,400. Out of which ₹ 1,050 has been paid and ₹ 350 is due and it is credited to L's current account.

(2) Depreciation of pre-admission period = 21,000 x 20/100 x 8/12 = ₹ 2,800

(3) Depreciation of Post-admission period = 15,000 x 20/100 x 4/12 = ₹ 1,000

(4) Book value of equipment on the date of admission is (₹ 21,000 – ₹ 2,800) = ₹ 18,200.

(5) Profit on revaluation = ₹ (28,400 –18,000) = ₹ 10,400; Loss on revaluation = ₹ (18,200 –15,000) = ₹ 3,200; Net profit on revaluation ₹ 7,200.

(6) Interest on Partners' Capital Accounts from 1st September has been calculated on the adjusted capital balances after taking goodwill and revaluation on profit, i.e., J's capital ₹ 35,100 and K's capital ₹ 20,100.

(7) L's share of profit from 1st September has been paid at the guranteed rate of ₹ 6,000 p.a.

Key Points

- Whenever a new partner is admitted, it has the effect of bringing the old partnership to an end.
- After admission, the new partner acquires two rights :
  - (i) he becomes the part owner of the assets of the firm; and
  - (ii) he is entitled to share part of the profits of the business. At the same time, he becomes partly liable for any liability of the business incurred after admission and any loss incurred by the firm.
- The ratio in which the old partners are surrendering their share of profit in favour of the new partner is called ***sacrificing ratio***.
- Goodwill can be classified into two categories : (1) Purchased Goodwill; and (2) Non-Purchased or Inherent Goodwill.
- Generally the following methods are adopted for the valuation of the goodwill :
  - (a) Average profit method
  - (b) Super profit method
  - (c) Capitalisation of average profit method
  - (d) Capitalisation of super profit method
  - (e) Annuity method.

THEORETICAL QUESTIONS

1. What do you mean by Goodwill ? What are the different types of Goodwill ?
2. State the treatment of Purchased Goodwill.
3. What are the different methods of Valuing Non-Purchase Goodwill ?
4. State the treatment of Goodwill on admission of a new partner.

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each statement or answer each question below.

1. When a new partner is admitted, the combined shares of the old partners are:
   A reduced
   B increased
   C none of these
2. Purchased goodwill arises when:
   A one business buys another
   B a value is placed on goodwill in case of a partnership firm
   C none of these
3. It is necessary to value the goodwill at the time of admission of a new partner and credit should be given to:
   A all partners
   B the old partners
   C none of these
4. The premium for goodwill brought in by the new partner is shared by the old partners on the basis of their:
   A profit-sharing ratio
   B capital ratio
   C none of these
5. Profit or loss on revaluation of assets and liabilities is shared by:
   A all the partners
   B the old partners
   C none of these

PRACTICAL QUESTIONS

1. Karuna and Ramen are partners in a firm. They share profits and losses as Karuna 60% and Ramen 40%. Their Balance Sheet as on 31st December, 2014 was as follows:

Liabilities	₹	Assets	₹
Creditors	60,000	Plant	50,000
Capital — Karuna	1,00,000	Motor car	10,000
Capital — Ramen	60,000	Stock	40,000
		Debtors	1,10,000
		Cash	10,000
	2,20,000		2,20,000

The partners agree to admit Pratip as a partner on the following terms: (a) Plant was to be reduced by 10% and a provision for Doubtful Debts @ 2.5% on Debtors is to be made. (b) The Motor Car is to be taken by Karuna for her personal use at a cost of ₹ 8,000. (c) Pratip is to pay ₹ 20,000 as Goodwill premium to the old partners and the said amount is to remain in the business. (d) Pratip is to get 1/4th share of the future profits of the firm and is also to introduce half the combined adjusted Capital of the old partners. Show the journal entries in the books of the firm and prepare the Balance Sheet of the new firm.

2. X and Y are partners sharing profits and losses in proportion to their capital. Their Balance Sheet as at 31.3.2015 is given below:

Liabilities	₹	Assets	₹
Creditors	9,000	Freehold premises	10,000
Bills payable	6,000	Plant	3,500
Reserve	2,100	Furniture	1,750
Capital — X	20,000	Office equipment	550
Capital — Y	15,000	Stock	14,100
		Bills Receivable	3,060
		Debtors	17,500
		Bank	1,590
		Cash	50
	52,100		52,100

On 1.4.2015 they admit Z on the following terms:
(1) Z is to bring in ₹ 10,000 as his capital and to pay ₹ 3,500 for goodwill and he will get 1/4th share of profit.
(2) Provision for bad debts is to be made on debtors at 2%.
(3) Stock to be written-down by 5%.
(4) Freehold premises is to be revalued at ₹ 11,400, Plant at ₹ 2,800, Furniture ₹ 1,540 and office equipment ₹ 495.
(5) Partners agreed that the values of the assets and liabilities are remaining the same and, as such, there should be no change in their book value as a result of the above-mentioned adjustment.

You are required to make necessary adjustments in the Capital Accounts of the partners and show the Balance Sheet of the new firm.

3. G and S were partners to a manufacturing concern sharing profits and losses equally on 31st December, 2014. The firms books revealed the following position:

Liabilities	₹	Assets	₹
Partners' Capital — G	20,000	Cash in hand	152
Partners' Capital — S	16,000	Cash at bank	4,900
Sundry Creditors	15,000	Bills Receivable	1,888
Bills Payable	4,000	Sundry Debtors	21,000
		Stock	4,800
		Plant and Machinery	7,000
		Furniture & fittings	1,700
		Freehold premises	13,560
	55,000		55,000

On 1st January, 2015, it was agreed to admit T into partnership on the following terms:
That he should bring into business sundry debtors amounting to ₹ 2,400 (Less a provision of 10% for bad debts). Sundry creditors amounting to ₹ 500 and also goodwill of his business at a valuation of ₹ 1,500.
His capital in the new business is to be ₹ 5,000, the balance of which he pays in cash and in consideration thereof he receives one fifth share of the profits of the firm.

It was mutually agreed that the following adjustments should be made as regards the business of G and S. Stock to be reduced by ₹ 800; Plant and Machinery to be increased by ₹ 300; Fixtures and fittings to be completely written off. It was further agreed that after the above adjustments had been effected, S should introduce sufficient cash to make his capital equal to that of G. From the above particulars show the opening balance sheet of the new firm as at 1st January, 2015 and state in what proportions the profits and losses will be shared.

4. M/s A, B and C is a firm sharing profits and losses 2:2:1. Their Balance Sheet as on 31.3.2015 is as under:

Liabilities	₹	Assets	₹
Sundry Creditors	12,850	Land and Building	25,000
Outstanding Liabilities	1,500	Furniture	6,500
General Reserve	6,500	Stock	11,750
Capital — A	12,000	Sundry Debtors	5,500
Capital — B	12,000	Cash in hand	140
Capital — C	5,000	Cash at bank	960
	49,850		49,850

They agreed to take in D from 1.4.2015 on the following terms:

1. D shall bring in ₹ 5,000 towards his capital;
2. Value of stock should be increased by ₹ 2,500;
3. Bad Debts amounting to ₹ 550 to be written off;
4. Furniture to be depreciated by 10%;
5. Value of land and building to be enhanced by 20%;
6. Value of Goodwill is ₹ 15,000;
7. New profit sharing ratio among A, B, C and D is 5:5:3:2;
8. Goodwill Account written-off after his admission. Outstanding liabilities include ₹ 1,000 due to X which has been paid by A. Entries were not made in the books.

Required: Revaluation Account, Partners' Capital Accounts and the new Balance Sheet.

5. A and B are in partnership sharing profits and losses as 2:1. As from 1.10.2013, they take C as a partner who will have 1/6th share. As between A and B, they decide to share equally, C brings in ₹ 50,000 as capital and ₹ 4,000 as premium for Goodwill. Following is the Balance Sheet as on 30.9.2014:

Liabilities	₹	Assets	₹
Capital — A	62,500	Cash	7,000
Capital — B	37,500	Stock	50,000
Creditors	50,000	Debtors	30,000
		Plant	25,000
		Investments	38,000
	1,50,000		1,50,000

The assets are revalued as : Stock ₹ 55,000; Plant ₹ 20,000; Investment ₹ 35,000; A provision for bad debts to be created against debtors @ 5%. It is further agreed that A alone is to be charged for any loss on revaluation. The profits after depreciating plant @ 5% p.a. for the year ended 30.9.2014 is ₹ 1,20,000 and the drawings of the partners are: A — ₹ 40,000; B — ₹ 40,000; C — ₹ 10,000.

You are required to journalise the opening adjustments and draw up the Balance Sheet as on 30.9.2014.

6. A and B are partners in a firm sharing profits and losses in 7:3. The balance sheet as at 31.3.2015 is as follows:

Liabilities	₹	Assets		₹
Sundry Creditors	40,000	Cash in hand		36,000
Bank overdraft	20,000	Sundry Debtors	46,000	
Reserve	10,000	Less: Provision for bad debts	2,000	44,000
Capital — A	50,000	Furniture		30,000
Capital — B	40,000	Stock in trade		50,000
	1,60,000			1,60,000

On 1.4.2015 C joins the firm as a 3rd partner for 1/4th share of the future profits of the firm on the following terms:

(a) Goodwill is valued at ₹ 40,000 and C is to bring necessary amount in cash as premium for goodwill.

(b) 20% of the reserve is to remain as a provision against bad and doubtful debts.

(c) Stock-in-trade is to be reduced by 40% and furniture is to be reduced to 40%.

(d) A is to pay off the Bank overdraft.

(e) C is to introduce ₹ 30,000 as his share of capital to which amount other partners' capital shall have to be adjusted.

You are required to show the necessary journal entries to carry out the above transactions and prepare an amended Balance Sheet of the firm immediately after C has become a partner.

7. The following is the Balance Sheet of a partnership firm as on 31.12.2014:

Liabilities	₹	Assets	₹
Capital — A	1,00,000	Property	70,000
Capital — B	82,000	Motor car	15,000
General Reserve	10,000	Furniture	2,000
Loan from A	10,000	Debtors	50,000
Sundry Creditors	30,000	Stock	90,000
Outstanding expenses	3,000	Cash	8,000
	2,35,000		2,35,000

A and B has been sharing profits in the ratio of 3:2. On 1.1.2015, they decide to take C as a partner on the following terms and conditions:

(i) The new profit sharing ratio will be 2:1:1;

(ii) C is to bring in ₹ 75,000 as capital;

(iii) Property and motor car are to be revalued at ₹ 90,000 and ₹ 13,000 respectively and a provision for doubtful debts to be created at 5%;

(iv) C is to bring in required amount of premium for goodwill which will be valued on the basis of two years' purchase of the last three years' average profits which are as under:
2012 — ₹ 10,000; 2013 — ₹ 12,000; 2014 — ₹ 15,000.
The above profits are subject to the following adjustments:
2012 — Bad debts previously written-off ₹ 800 credited to Debtors Account.
Closing stock undervalued by ₹ 2,500.
2013 — Furniture purchased ₹ 600 debited to Purchase Account — depreciation chargeable at 10% on reducing balance method. Closing Stock understated by ₹ 2,000.
2014 — A purchase invoice of ₹ 2,001 was omitted from the books. Closing Stock undervalued by ₹ 2,000.

(v) The amount of premium to be credited to old partners' loan accounts.

You are required to pass necessary Journal entries and to draw up the Balance Sheet as on 1.1.2015.

8. A and B are in partnership sharing profits and losses in the ratio 4:3 and for the last four years they have been entitled to annual salaries of ₹ 90,000 and ₹ 1,50,000 respectively, but not to interest on capitals.
The annual accounts have shown the following net profits before charging salaries:
Year ended on 31st March, 2013 ₹ 3,52,360 (Profit); 2014 ₹ 2,20,000 (Profit); 2015 ₹ 4,20,000 (Profit).
On 1st April, 2015 C is admitted to partnership on the following terms:

(i) From 1st April 2015 profits and losses are to be shared as follows: A 4/9; B 1/3 and C 2/9.

(ii) C is to bring in ₹ 1,80,000 cash for his 2/9 share of capital.

(iii) C is to bring in an additional amount to purchase his share of partnership goodwill, valued at four year's purchase of the weighted average profits of the last three years (after allowing for salaries), profits to be weighted 1:2:3, the greatest weight being given to the last year.

(iv) C is entitled to a salary of ₹ 1,20,000 p.a.; A and B to get the same salaries as before.

No Goodwill Account is to be opened in the books: any adjustments in respect of Goodwill are to be made through the Partners' current Accounts.
The balances on the Partner's Accounts on 1st April 2015 are as follows:

	Capital	Current
A	₹ 3,60,000 (Cr.)	₹ 84,000 (Cr.)
B	₹ 2,70,000 (Cr.)	₹ 32,000 (Dr.)

Prepare Partners' Capital and Current Accounts at 1st April, 2015, incorporating the entries arising on the admission of C.

9. D, H, F were equal partners of the firm 'Enterprise' and the following Balance Sheet as at 1.7.2015 was produced by them:

Fixed Assets	₹	₹	₹
Land		1,19,000	
Building		1,95,000	
Furniture		24,000	3,38,000
Working Capital			
Stock	1,14,000		
Debtors	1,08,000		
Cash	6,000	2,28,000	

Less: Creditors	33,000		
Bills payable	60,000	93,000	1,35,000
Total assets			4,73,000
Represented by :			
D Capital		2,17,000	
H Capital		1,66,000	
F Capital		90,000	4,73,000

On 1.7.2015 they agreed to take R as an equal partner on the following terms:
(a) R should bring ₹ 1,60,000 as his capital and goodwill, his share of goodwill was evaluated at ₹ 60,000; (b) Provision for loss on stock and provision for bad debts to be made at 10% and 5% respectively; (c) The value of building was to be taken at ₹ 2,70,000; (d) The total capital of the new firm was fixed at ₹ 4,00,000 and the Partners Accounts be in their profit sharing ratio. Any excess is to be transferred to Current Account or deficit to be introduced in cash.
You are required to prepare the Profit and Loss Adjustment Account, Capital Accounts of the partners and the Balance Sheet.

10. A, B and C are partners in a firm of accountants who maintain accounts on a cash basis sharing profits and losses in the ratio of 2:3:1. Their Balance Sheet as on March 31, 2015 on which date D is admitted as a partner, is as follows:

Liabilities	₹	Assets	₹
B Capital	35,000	Furniture	10,000
C Capital	22,000	Motor Car	20,000
		Cash at bank	18,000
		A Capital	9,000
	57,000		57,000

D is given 1/4 share of the profits and losses in the firm and the profit and loss sharing ratio as between the other partners remains as before. The following adjustments are to be made prior to D's admission:
(a) The motor car is taken over by B at a value of ₹ 25,000.
(b) The furniture is revalued at ₹ 18,000.
(c) Goodwill is valued at ₹ 50,000. It is agreed among A, B and C that C is interested in goodwill only up to a value of ₹ 30,000.
(d) Fees billed but not realized ₹ 11,000 are brought into account.
(e) Expenses incurred but not paid, ₹ 3,000 are provided for.

D brings in ₹ 20,000 in cash as his capital contribution. He is also to be credited with ₹ 20,000 for having agreed to amalgamate his separate practice as Chartered Accountant with this firm. The partners have decided not to show any goodwill in their new books of account.
Pass necessary Journal entries and prepare the Balance Sheet of the firm after D's admission.

11. K and L are two partners sharing profits and losses in the ratio of 5:3. Their Balance Sheet as at 30th. June, 2015 is as follows:

Liabilities	₹	Assets		₹
Creditors	30,000	Furniture		40,000
Reserve	14,000	Patent		10,000
Capital		Debtors	44,000	
K	40,000	Less: Provision for Bad Debt	5,000	39,000
L	50,000	Stock		20,000
		Cash in hand		25,000
	1,34,000			1,34,000

On 1st July, they take M into partnership. M brings ₹ 25,000 as his capital. The new profit sharing ratio of K, L and M is 2:4:1. Patent is written-off from the books and a Provision for Bad Debt is created at 5%. Reserve appears in the books of new firm at its original figure.
Show the necessary Journal entries to carry out the above transactions and prepare a Balance Sheet of the new firm as at 1st July, 2015.

12. Quick and Slow are partners in a firm sharing profits and losses in the ratio of 3 : 2. The Balance Sheet of the firm as on 31st March, 2015 was as under:

Liabilities			₹	Assets	₹
Capital Accounts :				Furniture and Fixtures	60,000
	Quick	1,20,000		Office Equipments	30,000
	Slow	77,000	1,97,000	Motor Car	75,000
General Reserve			30,000	Stock	50,000
Sundry Creditors			96,000	Sundry Debtors	90,000
				Cash at Bank	18,000
			3,23,000		3,23,000

Smooth was admitted as a new partner with effect from 1st April, 2015 and it was agreed that he would bring some private furniture worth ₹ 10,000 and private stock costing ₹ 8,000 and in addition contribute ₹ 50,000 cash towards capital.

He would also bring proportionate share of goodwill which is to be valued at two years' purchase of the average profits of the last three years. The profits of the last three years were: 2014-10 ₹ 52,000; 2013-09 ₹ 32,000; 2012-08 ₹ 28,000.

However, on a checking of the past records, it was noticed that on 1.4.2013 a new furniture costing ₹ 8,000 was purchased but wrongly debited to revenue, and in 2014-10 a purchase invoice for ₹ 4,000 dated 25.3.2015 has been omitted in the books. The firm charges depreciation on Furniture @ 10% p.a. on original cost.

Your calculation of goodwill is to be made on the basis of correct profits. On revaluation, value of stock is to be reduced by 5% and motor car is worth ₹ 85,000. Smooth duly paid the required amount for goodwill and cash towards capital.

It was decided that the future profits of the firm would be shared as Quick : 50%, Slow : 30% and Smooth : 20%.

Assuming the above-mentioned arrangements were duly carried out, show the Revaluation Account, Capital Accounts of the partners and the Balance Sheet of the firm after Smooth's admission.

Retirement of a Partner

Introduction

A partner may retire from the firm for different reasons such as differences with the other partners, better business opportunity, old age, etc. The retirement of a partner results in a new partnership, although daily operation of the firm currently are not affected. According to Sec. 32(1) of the Indian Partnership Act, a partner can retire in the following three ways :

(i) with the consent of all the other partners (such consent may be expressed or implied);
(ii) in accordance with an express agreement by the partners; and
(iii) where the partnership is at will, by giving notice in writing to all the other partners of his intention to retire.

Effects of Retirement of A Partner

The effects of retirement of a partner are the following :

1. The retirement of a partner will terminate the old partnership and a new partnership will be created.
2. An adjustment is to be made in regard to undrawn profit or accumulated losses.
3. The assets and liabilities of the firms are to be revalued and proper adjustments are to be made.
4. The goodwill of the firm has to be valued and some adjustments are to be made.
5. The combined shares of the remaining partners will be increased.
6. The claim of the retiring partners is to be determined.
7. The continuing partners may find it difficult to pay off the entire claim of the retiring partner.

Gaining Ratio

After retirement of a partner(s) the combined share of the remaining partners will be increased. The ratio in which the remaining partners are acquiring the share of the retiring partner is called gaining ratio. Calculation of gaining ratio is necessary particularly when only retiring partner's share of goodwill/reserve is to be adjusted.

Difference between Sacrificing Ratio and Gaining Ratio

	Sacrificing Ratio		Gaining Ratio
1.	It is generally calculated at the time of admission of a new partner.	1.	It is generally calculated at the time of retirement/death of a partner.
2.	It is the ratio in which the old partners are surrendering their share of profit in favour of the new partner.	2.	It is the ratio in which the remaining partners are acquiring the share of the retiring/ deceased partner.
3.	It is calculated when premium for goodwill brought in by the new partner is to be distributed amongst the old partner.	3.	It is calculated when only the retiring partner's share of goodwill/ reserve is to be adjusted.
4.	Sacrificing ratio = Old ratio – New ratio	4.	Gaining ratio = New ratio – Old ratio.

Adjustments For Retirement of A Partner

At the time of retirement of a partner, different adjustments are required. These are as follows :

1. Adjustment in regard to goodwill.
2. Adjustment in regard to revaluation of assets and liabilities.
3. Adjustment in regard to undistributed profits and losses.
4. Adjustment in regard to joint life policy.
5. Adjustment in regard to share of profits from the date of the last Balance Sheet to the date ofretirement.

1. Adjustment in Regard to Goodwill

At the time of retirement of a partner, an adjustment is necessary in respect of goodwill. The retiring partner is entitled to his share in the goodwill of the firm. In the absence of any agreement, goodwill is to be distributed in the profit-sharing ratio. The valuation of goodwill is done on the basis of the provisions of the partnership deed. If the partnership deed is silent, the valuation should be done in such a manner as must have been agreed upon by the partners (methods of valuation of goodwill have already been discussed in the Chapter on Admission of a Partner).

In this connection, Para 36 of AS—10 is very important. This para states that 'Goodwill should be recorded in the books only when some consideration in money or money's worth has been paid for it. Whenever a business is acquired for a price (payable in cash or in shares or otherwise) which is in excess of the value of the net assets of the business takenover, the excess should be termed as Goodwill'.

The effects of the above provision of AS—10 in Partnership Accounts are the following :

1. ***Only purchased goodwill to be recorded in the books of accounts.***
2. ***Non-purchased goodwill (internally generated goodwill) will be adjusted through Partners' Capital Accounts. In, effect this goodwill cannot be shown in the Partnership Balance Sheet.***

This goodwill can be treated in the books of account in any of the following manner.

Case 1 : When there is no goodwill in the present Balance Sheet and goodwill is raised in the books of the firm at full value but it is written-off immediately

In this case, goodwill is raised by crediting all the partners in the old ratio and written-off in the new ratio. The following entries are passed :

(i) ***For raising goodwill***

Goodwill Account	Dr.	[Full value]
To All Partners' Capital Accounts		[Old ratio]

(ii) ***For writing off goodwill***

Continuing Partners' Capital Accounts	Dr.	[New ratio]
To Goodwill Account		[Full value]

Illustration 1

A, B and C are partners sharing profits and losses in the ratio of 4 : 3 : 3. C retires from the business. At present goodwill is not appearing in the Balance Sheet.

The agreed value of goodwill is ₹ 1,00,000. It has been decided by A and B to share future profits and losses equally and goodwill not to be shown in the new Balance Sheet.

Pass necessary Journal Entries in respect of goodwill.

Solution

In the books of the Firm
Journal

Date	Particulars		Dr. ₹	Cr. ₹
	Goodwill A/c	Dr.	1,00,000	
	To A Capital			40,000
	To B Capital			30,000
	To C Capital			30,000
	(Being the goodwill raised in the books at full value by crediting the partners in their old orifit-sharing ratio i.e., 4 : 3 : 3)			
	A Capital A/c	Dr.	50,000	
	B Capital A/c	Dr.	50,000	
	To Goodwill A/c			1,00,000
	(Being the goodwill written-off in the books by debiting the remaining partners in their new profit-sharing ratio, i.e., 1 : 1)			

Case 2 : When there is no goodwill in the present Balance Sheet but only retiring partners'share of goodwill is to be adjusted

In this case, retiring partners' share of goodwill is raised in the books by crediting the ***retiring partner*** only. It is then written-off by debiting the remaining partners in the ***gaining ratio***.

The following entries are passed :

(i) ***For raising retiring partner's share of goodwill***

Goodwill Account Dr. [Retiring partner's share]
To Retiring Partner's Capital Account

(ii) ***For writing off the goodwill***

Continuing Partners' Capital Accounts Dr. [Gaining ratio]
To Goodwill Account

Alternatively, the following entry can be passed :

Continuing Partners' Capital Accounts Dr. [Gaining ratio]
To Retiring Partner's Capital Account [Share of retiring partner]

Illustration 2

Red, White and Blue are equal partners. White retires, his share of goodwill is ₹ 18,000. The remaining partners have decided to continue the business sharing profits and losses in the ratio of 3 : 2. At present there is no goodwill in the Balance Sheet and in future goodwill is not to be shown in the Balance Sheet. Give Journal Entry.

Solution

In the books of the Firm
Journal

Date	Particulars		Dr. ₹	Cr. ₹
	Goodwill A/c	Dr.	18,000	
	To White Capital A/c			18,000
	(Being White's share of goodwill raised in the books)			
	Red Capital A/c (Note 1)	Dr.	14,400	
	Blue Capital A/c (Note 1)	Dr.	3,600	
	To Goodwill A/c			18,000
	(Being the goodwill written-off in the books by debiting the continuing partners in the gaining ratio 4 : 1)			
	Alternatively,			
	Red Capital A/c	Dr.	14,400	
	Blue Capital A/c	Dr.	3,600	
	To White Capital A/c			18,000
	(Being the required adjustment through the Capital Accounts of the partners in regard to goodwill)			

Working Note : **(1) Calculation of Gaining Ratio**

Partners	New Ratio	Old Ratio	Sacrifice / Gain	Gaining Ratio
Red	3/5	1/3	3/5 — 1/3 = 4/15 (Gain)	Red : Blue = 4/15 : 1/15 = 4 : 1
White	—	1/3	0 – 1/3 = 5/15 (Sacrifice)	
Blue	2/5	1/3	2/5 – 1/3 = 1/15 (Gain)	

It should be noted that without calculating the gaining ratio, the amount to be adjusted in respect of goodwill can be calculated directly with the help of the following statement :

Statement Showing the Required Adjustment for Goodwill

Partners	Red (₹)	White (₹)	Blue (₹)
Right of goodwill before retirement (1 : 1 : 1)	18,000	18,000	18,000
Right of goodwill after retirement (3 : 2)	32,400	—	21,600
Gain (+) / Sacrifice (–)	(+) 14,400	(–) 18,000	(+) 3,600

Tutorial Note : In the alternative method if the full value of goodwill has not been given, then it is to be calculated on the basis of retiring partner's share of goodwill (as has been done in this case, i.e., ₹ 18,000 × 3/1 = ₹ 54,000).

Illustration 3

Ram, Shyam and Rahim are partners sharing profits in the ratio of 4:3:2. Shyam retires and the goodwill is valued at ₹ 21,600. No goodwill appears as yet in the books of the firm. Assuming that Ram and Rahim will share profits in the future in the ratio of 5:3, pass entries for goodwill separately under the following conditions: (a) When Goodwill Account is raised but written-off; (b) When only Shyam's Goodwill Account is raised and then written-off; and (c) When only Shyam's share of goodwill is adjusted through the Capital Account of Ram and Rahim.

Solution **In the books of Ram, Shyam and Rahim**

Journal **Dr.** **Cr.**

Date	Particulars		₹	₹
(a) (i)	Goodwill A/c	Dr.	21,600	
	To Ram Capital A/c			9,600
	To Shyam Capital A/c			7,200
	To Rahim Capital A/c			4,800
	(Being the goodwill raised in the books at full value crediting the partners in their old profit sharing ratio, 4:3:2)			
(ii)	Ram Capital A/c	Dr.	13,500	
	Rahim Capital A/c	Dr.	8,100	
	To Goodwill A/c			21,600
	(Being goodwill written-off in the books by debiting the remaining partners in their new ratio, 5:3)			
(b) (i)	Goodwill A/c	Dr.	*7,200	
	To Shyam Capital A/c			7,200
	(Being Shyam's share of goodwill raised)			
(ii)	Ram Capital A/c	Dr.	*3,900	
	Rahim Capital A/c	Dr.	*3,300	
	To Goodwill A/c			7,200
	(Being Shyam's share of goodwill written-off by debiting the remaining partners in the gaining ratio, 13:11)			
(c)	Ram Capital A/c	Dr.	3,900	
	Rahim Capital A/c	Dr.	3,300	
	To Shyam Capital A/c			7,200
	(Being Shyam's share of goodwill adjusted through the Capital Account of Ram and Rahim)			

*Shyam's share of goodwill = ₹ 21,600 x 1/3 = ₹ 7,200; The gaining ratio of Ram and Rahim is 13:11.

Calculation of Gaining Ratio

Partners	Ram	Shyam	Rahim
Old Ratio (4 : 3 : 2)	4/9	3/9	2/9
New Ratio (5 : 3)	5/8	—	3/8
New ratio – Old ratio	(5/8 – 4/9)		(3/8 – 2/9)
Gain	13/72		11/72

Case 3 : When there is no goodwill in the present Balance Sheet and adjustment to be done without opening Goodwill Account

In this case, continuing Partners' Capital Accounts will be debited in the gaining ratio and retiring Partner's Capital Account will be credited with his share of goodwill. The entry will be :

Continuing Partners' Capital Accounts	Dr.	[Gaining ratio]
To Retiring Partner's Capital Account		[Share of goodwill of retiring partner]

Illustration 4

Ravi, Mukesh, Naresh and Yogesh are partners in a firm sharing profits in the ratio of 2 : 2 : 1 : 1. On Mukesh's retirement, the goodwill of the firm is valued at ₹ 90,000. Ravi, Naresh and Yogesh decided to share future profits equally. Pass the necessary Journal Entry for the treatment of goodwill without opening Goodwill Account.

Solution **In the books of the Firm**

Journal

Date	Particulars	Dr. ₹	Cr. ₹
	Naresh Capital A/c (Note 1) Dr.	15,000	
	Yogesh Capital A/c (Note 1) Dr.	15,000	
	To Mukesh Capital A/c		30,000
	(Being the required adjustment for goodwill through the Partners' Capital Accounts)		

Working Note :

(1) Mukesh is entitled to 2/6th share of goodwill, i.e., ₹ 90,000 / 6 × 2 = ₹ 30,000. This amount will be debited to continuing partners in the gaining ratio. The gaining ratio is calculated as follows :

Calculation of Gaining Ratio

Partners	New Ratio	Old Ratio	Sacrifice / Gain	Gaining Ratio
Ravi	1/3	2/6	1/3 – 2/6 = Nil	Naresh : Yogesh = 1 : 1
Mukesh	–	2/6	2/6 (Sacrifice)	
Naresh	1/3	1/6	1/3 – 1/6 = 1/6 (Gain)	
Yogesh	1/3	1/6	1/3 – 1/6 = 1/6 (Gain)	

Naresh and Yogesh are gaining equally. Therefore, ₹ 30,000 will be debited to Naresh and Yogesh equally, i.e., ₹ 15,000 each. ***Alternatively***, without calculating gaining ratio, the amount of goodwill to be adjusted can be calculated directly with the help of the following statement :

Statement Showing the Required Adjustment for Goodwill

Partners	Ravi (₹)	Mukesh (₹)	Naresh (₹)	Yogesh (₹)
Right of goodwill before retirement (2 : 2 : 1 : 1)	30,000	30,000	15,000	15,000
Right of goodwill after retirement (1 : 1 : 1)	30,000	–	30,000	30,000
Gain (+) / Sacrifice (–)	Nil	(–) 30,000	(+) 15,000	(+) 15,000

Mukesh is sacrificing ₹ 30,000. Naresh and Yogesh are gaining ₹ 15,000 each. Ravi is not gaining anything.

Illustration 5

A, B and C are partners sharing profits in the ratio of 4 : 3 : 3. On C's retirement the value of firm's goodwill was agreed at ₹ 30,000. A and B agreed to share profits and losses in future in the ratio of 7 and 3 respectively. Give necessary Journal Entry in relation to goodwill, without opening its accounts.

Solution **In the books of the Firm**

Journal

Date	Particulars	Dr. ₹	Cr. ₹
	A Capital A/c Dr.	9,000	
	To C Capital A/c		9,000
	(Being the required adjustment for goodwill through the Partners' Capital Accounts)		

Working Note : **(1) Calculation of Gaining Ratio**

Partners	New Ratio	Old Ratio	Sacrifice / Gain	Gaining Ratio
A	7/10	4/10	7/10 – 4/10 = 3/10 (Gain)	Here, gaining ratio cannotbe calculated because only A is gaining
B	3/10	3/10	3/10 – 3/10 = Nil	
C	–	3/10	0 – 3/10 = 3/10 (Sacrifice)	

Alternative Working Note :

Statement Showing the Required Adjustment for Goodwill

Partners	A (₹)	B (₹)	C (₹)
Right of goodwill before retirement (4 : 3 : 3)	12,000	9,000	9,000
Right of goodwill after retirement (7 : 3)	21,000	9,000	–
Gain (+) / Sacrifice (–)	(+) 9,000	Nil	(–) 9,000

C is sacrificing ₹ 9,000. Only A is gaining ₹ 9,000. B is not gaining anything. Therefore A Account will be debited with ₹ 9,000 and C Account will be credited with ₹ 9,000.

Illustration 6

Surender, Ramesh, Naresh and Mohan are partners in a firm sharing profits in 2 : 1 : 2 : 1 ratio. On the retirement of Naresh, the goodwill was valued at ₹ 72,000. Surender, Ramesh and Mohan decided to share future profits equally. Pass the necessary Journal Entry for the treatment of goodwill, without opening Goodwill Account.

Solution **In the books of the Firm**
Journal **Dr.** **Cr.**

Date	Particulars		₹	₹
	Ramesh Capital A/c	Dr.	12,000	
	Mohan Capital A/c	Dr.	12,000	
	To Naresh Capital A/c			24,000
	(Being the required adjustment for goodwill through the Partners' Capital Accounts)			

Working Note :

(1) Naresh is entitled to 2/6th share of goodwill, i.e., ₹ 72,000 × 2/6 = ₹ 24,000. This amount will be debited to continuing Partners' Capital Accounts in the gaining ratio. The gaining ratio is calculated as under:

Calculation of Gaining Ratio

Partners	New Ratio	Old Ratio	Sacrifice / Gain	Gaining Ratio
Surender	1/3	2/6	1/3 – 2/6 = Nil	Ramesh : Mohan = 1 : 1
Ramesh	1/3	1/6	1/3 – 1/6 = 1/6 (Gain)	
Naresh	–	2/6	0 – 2/6 = 2/6 (Sacrifice)	
Mohan	1/3	1/6	1/3 – 1/6 = 1/6 (Gain)	

Ramesh and Mohan are gaining equally. Therefore, ₹ 24,000 will be debited to Ramesh and Mohan equally, i.e., ₹ 12,000 each. ***Alternatively***, the above amount can be calculated directly with the help of the following statement :

Statement Showing the Required Adjustment for Goodwill

Partners	Surender (₹)	Ramesh (₹)	Naresh (₹)	Mohan (₹)
Right of goodwill before retirement (2 : 1 : 2 : 1)	24,000	12,000	24,000	12,000
Right of goodwill after retirement (1 : 1 : 1)	24,000	24,000	–	24,000
Gain (+) / Sacrifice (–)	Nil	(+) 12,000	(–) 24,000	(+) 12,000

Illustration 7

X, Y and Z were partners in a firm sharing profits in the ratio of 3 : 2 : 1. Z retired and the new profit-sharing ratio between X and Y was 1 : 2. On Z's retirement the goodwill of the firm was valued at ₹ 30,000.

Pass necessary Journal Entry for the treatment of goodwill on Z's retirement without opening Goodwill Account.

Solution **In the books of the Firm**
Journal **Dr.** **Cr.**

Date	Particulars		₹	₹
	Y Capital A/c	Dr	10,000	
	To X Capital A/c			5,000
	To Z Capital A/c			5,000
	(Being the adjustment for goodwill on Z's retirement)			

Working Note : **(1) Statement Showing the Required Adjustment for Goodwill**

Partners	X (₹)	Y (₹)	Z (₹)
Right of goodwill before retirement (3 : 2 : 1)	15,000	10,000	5,000
Right of goodwill after retirement (1 : 2)	10,000	20,000	–
Gain (+) / Sacrifice (–)	(–) 5,000	(+) 10,000	(–) 5,000

In this case, only Y is gaining. Both X and Z are sacrificing. Therefore, Y capital will be debited with ₹ 10,000 and X capital will be credited with ₹ 5,000 and Z capital will be credited with ₹ 5,000.

Case 4 : When there is goodwill in the present Balance Sheet

In this case, the revised value of goodwill is to be compared with the book value of goodwill (i.e., which is appearing in the Balance Sheet). Accounting entries are to be passed accordingly.

(i) ***If the revised value of goodwill > book value of goodwill***

Goodwill Account Dr. [Difference]
To All Partners' Capital Accounts [Old ratio]

(ii) ***If the revised value of goodwill < book value of goodwill***

All Partners' Capital Account Dr. [Old ratio]
To Goodwill Account [Difference]

(iii) As per AS—10 para 36 no goodwill is to be shown in the Balance sheet unless it is a purchased goodwill. Therefore, after retirement, goodwill is to be written-off by debiting continuing partners in the new ratio.

(iv) If there is no change in the value of goodwill, then existing goodwill is written-off by debiting continuing parters in the new ratio.

Illustration 8

Pass Journal entries under the following circumstances:

(a) A, B and C are partners sharing profits and losses equally. A retires. B and C decided to share profits and losses in the ratio 4:1. The value of the goodwill is ₹ 45,000.

(b) A, B and C are partners sharing profits and losses in the ratio 4:3:2. B retires. The value of the goodwill is ₹ 45,000. A and C decide to share profits and losses in ratio of 3:2.

Solution

In the books of A, B and C

Journal

Date	Particulars		Dr. ₹	Cr. ₹
(a)	B Capital A/c	Dr.	21,000	
	To A Capital A/c			15,000
	To C Capital A/c			6,000
	(Being the adjustment for goodwill made through the capital accounts of the partners)			
(b)	Goodwill A/c	Dr.	45,000	
	To A Capital A/c			20,000
	To B Capital A/c			15,000
	To C Capital A/c			10,000
	(Being the goodwill raised to its full value before B's retirement)			
	A Capital A/c	Dr.	27,000	
	C Capital A/c	Dr.	18,000	
	To Goodwill A/c			45,000
	(Being the goodwill written-down to its old figure after B's retirement by debiting A and B in the ratio of 3 : 2)			

Illustration 9

A, B and C are equal partners. B retires. His share of goodwill is ₹ 9,000. The remaining partners have decided to continue the business sharing profit in the ratio of 3 : 2. Goodwill is not to be shown in the Balance Sheet. Give Journal entry.

Solution

In the books of A, B and C

Journal

Date	Particulars		Dr. ₹	Cr. ₹
	A Capital A/c	Dr.	7,200	
	C Capital A/c	Dr.	1,800	
	To B Capital A/c			9,000
	(Being the required adjustment through the capital accounts of the partners in regard to goodwill)			

Calculation of Gaining Ratio

Partners	A	B	C
Old Ratio (1 : 1 : 1)	1/3	1/3	1/3
New Ratio (3 : 2)	3/5	—	2/5
New ratio – Old ratio	(3/5 – 1/3)		(2/5 – 1/3)
Gain	4/15		1/15

Therefore, the gaining ratio of A : C = 4 : 1.

Alternatively,

Partners		A	B	C
Right of goodwill before retirement	(₹)	9,000	9,000	9,000
Right of goodwill after retirement	(₹)	16,200	—	10,800
Gain (+) / Sacrifice (–)	(₹)	(+) 7,200	(–) 9,000	(+) 1,800

Illustration 10

X, Y and Z are partners sharing profits and losses of 4 : 3 : 2. Z retires from the business. The value of goodwill is ₹ 90,000. Goodwill appearing in the Balance Sheet at ₹ 54,000. X and Y decided to share profits and losses in the ratio of 3 : 1. Pass necessary Journal Entries.

Solution

In the books of the Firm

Journal

Date	Particulars		Dr. ₹	Cr. ₹
	Goodwill A/c (₹ 90,000 – ₹ 54,000)	Dr.	36,000	
	To X Capital A/c			16,000
	To Y Capital A/c			12,000
	To Z Capital A/c			8,000
	(Being goodwill raised to its full value by crediting all partners in the old ratio, i.e., 4 : 3 : 2)			
	X Capital A/c	Dr.	67,500	
	Y Capital A/c	Dr.	22,500	
	To Goodwill A/c			90,000
	(Being the goodwill written-off in the new ratio, i.e., 3 : 1)			

Illustration 11

A, B and C are partners sharing profits and losses in the ratio of 3 : 2 : 1. C retires from the business. the value of goodwill has been agreed at ₹ 60,000. At present, goodwill appearing in the books at ₹ 90,000. After retirement, no goodwill is to be shown. Pass necessary Journal Entries.

Solution

In the books of the Firm

Journal

Date	Particulars		Dr. ₹	Cr. ₹
	A Capital A/c	Dr.	15,000	
	B Capital A/c	Dr.	10,000	
	C Capital A/c	Dr.	5,000	
	To Goodwill A/c (₹ 90,000 –₹ 60,000)			30,000
	(Being the adjustment for goodwill on C's retirement)			
	A Capital A/c	Dr.	36,000	
	B Capital A/c	Dr.	24,000	
	To Goodwill A/c			60,000
	(Being the goodwill written-off in the new ratio, i.e., 3 : 2)			

Illustration 12

Pass Journal Entries under the following circumstances:

(a) X, Y and Z are partners sharing profits and losses in the ratio 2:2:1. X retires. His share of goodwill is ₹ 6,000. Goodwill appears in the books at its full value and it has been decided not to show goodwill in the books. Y and Z decided to share profit and losses in the ratio 3:2.

(b) A, B and C are partners sharing profits and losses equally. A retires. B and C decided to share profits and losses in the ratio 4:1. The value of the goodwill is ₹ 45,000. Goodwill does not appear in the books. The continuing partners decide not to show goodwill in the books.

Solution

Journal

Date	Particulars		Dr. ₹	Cr. ₹
(a)	Y Capital A/c (Note 1)	Dr.	9,000	
	Z Capital A/c (Note 1)	Dr.	6,000	
	To Goodwill A/c			15,000
	(Being goodwill written-off from the books after X's retirement)			
	Goodwill A/c (Note 2)	Dr.	45,000	
	To A Capital A/c			15,000
	To B Capital A/c			15,000
	To C Capital A/c			15,000
	(Being goodwill raised to its full value by crediting all partners in the old ratio)			
	B Capital A	Dr.	36,000	
	C Capital A	Dr.	9,000	
	To Goodwill A/c (Note 2)			45,000
	(Being goodwill written-off in the new ratio)			
	Alternatively,			
	B Capital A/c	Dr.	21,000	
	To A Capital A/c			15,000
	To C Capital A/c			6,000
	(Being the adjustment for goodwill made through the capital accounts of the partners)			

Working Notes :

(1) X's share of goodwill is ₹ 6,000 for 2/5th share of profit. Therefore, total goodwill = ₹ 6,000 × 5/2 = ₹ 15,000. Goodwill already appearing in the Balance Sheet at full value. Therefore no further goodwill is to be raised. However, for writing off goodwill, Y and Z capital will be debited in the **new ratio**.

(2) In this case, goodwill is to be raised in the old ratio and to be written-off in the new ratio.

2. Adjustment in Regard to Revaluation of Assets and Liabilities

Unless otherwise agreed, on retirement, a partner is entitled to have the assets and liabilities of a firm revalued on a proper basis at the date of retirement, so that he gets his fair share of the firm's net assets. The purpose of revaluation is to convert the book values of the assets and liabilities into net market values.

Just like admission, here also, a Revaluation Account is prepared to ascertain the profit or loss on revaluation. The profit/loss on revaluation is transferred to All Partners' Capital Accounts in the old profit sharing ratio. After retirement, the assets and liabilities appear in the Balance Sheet at ***revised value.***

The continuing partners may decide ***not*** to show the assets and liabilities in their revised values, i.e., assets and liabilities are to appear in the ***Original Values***. In such a situation, a Memorandum Revaluation Account is prepared. The profit or loss on revaluation is transferred to ***All Partners' Capital Accounts in the old ratio.***

Thereafter, the same amount is put below the line on the reverse side of the Memorandum Account and it is closed by transferring to the Capital Accounts of the ***continuing partners in the new ratio***.

In this connection, Para 30 of AS—10 is also important. This para states that '***An increase in net book value arising on revaluation of fixed assets should be credited directly to owners' interests under the head of revaluation reserve, except that, to the extent that such increase is related to and not greater than a decrease arising on revaluation previously recorded as a charge to the profit and loss statement, it may be credited to the profit and loss statement. A decrease in net book value arising on revalutaion of fixed asset should be charged directly to the profit and loss statement except that to the extent that such a decrease is related to an increase which was previously recorded as a credit to revaluation reserve and which has not been subsequently reversed or utilised, it may be charged directly to that account***'.

In case of Partnership, revaluation profit or loss is transferred directly to Partners' Capital Accounts. Therefore, an increase in net book value arising on revaluation of fixed assets may be credited to Revaluation Account (in place of Revaluation Reserve Account because it will be utilimately closed by transferring to Partners' Capital Accounts) and loss on revaluation of fixed assets may be debited to Revaluation Account (in place of Profit and Loss Account because it will be ultimately closed by transferreing to Partners' Capital Accounts).

In this chapter or elsewhere the effects of revaluation of fixed assets have been shown through the Revaluation Account (in place of Revaluation Reserve Account / Profit and Loss Account because the effect will be same on Partners' Capital Accounts).

Computation of Retiring Partner's Interest in the Firm

For calculating the amount of money payable to the retiring partner, the following items should be considered:

1. Opening balance of Capital and Current Account of retiring partner.
2. Share of undistributed reserve and profit.
3. Share of revaluation profit or loss.
4. Share of profit till the date of his retirement.
5. Share of firm's goodwill.
6. The salary or/and interest due to the retiring partner till the date of his retirement.
7. The drawing and interest thereon, of the retiring partner.

Illustration 13

P, Q and R are partners sharing profits and losses in the ratio of 3 : 2 : 1. Following is their Balance Sheet as at 31st March, 2015:

Liabilities	₹	Assets	₹
Capital Accounts :		Plant and Machinery	2,00,000
P	2,00,000	Stock	1,00,000

Q	1,50,000	Debtors	1,00,000
R	1,00,000	Cash	1,00,000
Creditors	50,000		
	5,00,000		5,00,000

Q retires from the business from 1st April, 2015. The following was agreed upon retirement of Q.

(1) Plant and machinery has been revalued at ₹ 3,00,000.
(2) Stock has been revalued at ₹ 90,000.
(3) A sum of ₹ 15,000 is to be written-off from debtors.
(4) The goodwill of the firm has been valued at ₹ 1,50,000 but no Goodwill Account is to be raised in the books of account.
(5) P and R will continue to carry on the business and shall share profits and losses equally in future.
(6) Amount payable by Q shall remain in the business as loan.

You are required to :

(i) prepare Revaluation Account;
(ii) prepare Partners' Capital Accounts; and
(iii) show the Balance Sheet of P and R as on 1st April, 2015.

Solution

Dr. **Revaluation Account** **Cr.**

Gain (+) / Sacrifice (–)	Nil	(–) 50,000	(+) 50,000

Illustration 14

A partnership consists of three partners with capital, sharing profits and drawings as follows :

Partners	Capital (₹)	Profit (%)	Drawings (₹)
A	1,50,000	50	15,000
B	1,00,000	30	10,000
C	50,000	2015,000	

Capital is chargeable with 5% interest per annum.

B and C each receive a salary of ₹ 7,500 per annum, capital to remain fixed.

A had loaned a further of ₹ 1,00,000 to the partnership at 4% per annum interest.

Profit for the year, before charging partners' salaries, interest on loan and capital was ₹ 1,00,000.

A retired at the end of the year, and B and C, in accordance with agreement, take over his share. Total goodwill is valued at ₹ 1,25,000. Fixed assets revalued upwards by ₹ 25,000.

You are required to prepare Profit and Loss Appropriation Account and Partners' Current Accounts. Also determine the amount due to A (No account is required).

Solution

Dr. Profit and Loss Appropriation Account for the year ended ... Cr.

Particulars			₹	Particulars	₹
To Interest on Capital A/c :	A	7,500		By Net Profit (Less Interest on Loan)	
	B	5,000		[₹ 1,00,000 – (4% of ₹ 1,00,000)]	96,000
	C	2,500	15,000		
To Partners' Salaries A/c :	B	7,500			
	C	7,500	15,000		
To Share of Profit A/c :	A	33,000			
	B	19,800			
	C	13,200	66,000		
			96,000		96,000

Current Account Balance	25,500
Loan Account Balance	1,00,000
Accrued Interest on Loan	4,000
Share of Goodwill (50% of ₹ 1,25,000)	62,500
Revaluation Profit (50% of ₹ 25,000)	12,500
	3,54,500

Illustration 15

A and B were in partnership sharing profits equally. At 1.1.2015, their Balance Sheet was as follows :

Liabilities		₹	Assets	₹
Capital Accounts :	A	60,000	Freehold Premises	30,000
	B	20,000	Plant and Machinery	15,000
Current Accounts :	A	12,000	Motor Van	16,000
	B	5,000	Stock	14,000
Creditors		7,500	Debtors	12,000
			Bank Balance	17,500
		1,04,500		1,04,500

B retired on 1.1.2015 when the assets were revalued as follows :

Freehold Premises ₹ 40,000; Plant and Machinery ₹ 10,000; Motor Van ₹ 10,000.

It was also agreed that stock which had cost ₹ 7,000 was now worth ₹ 3,000, and further stock which had cost ₹ 2,000 now had nil value.

Debtors at 1.1.2015 included bad debts of ₹ 2,000; no provision for doubtful debts had been made in the past but a provision equal to 4% of debtors as at 1.1.2015 should be created.

The adjustments for the foregoing matters was made in the books as at 1.1.2015. B was paid by cheque ₹ 10,000 and the balance transferred to his Loan Account.

You are required to prepare necessary Ledger Accounts and the Balance Sheet of A, after B's retirement.

Solution — **In the books of the Firm**

Dr. **Revaluation Account** **Cr.**

Particulars	₹	Particulars		₹
To Plant and Machinery A/c	5,000	By Freehold Premises A/c		10,000
To Motor Van A/c	6,000	By Partners' Capital A/cs : A	4,700

To Revaluation A/c (Loss)	4,700	4,700	By Balance b/d	60,000	20,000
To Bank A/c	—	10,000	By B Current A/c	—	5,000
To B Loan A/c	—	10,300			
To Balance c/d	55,300				
	60,000	25,000		60,000	25,000

B Loan Account

Particulars	₹	Particulars	₹
To Balance c/d	10,300	By Partners' Capital A/cs	10,300

Balance Sheet after B's Retirement

Liabilities	₹	Assets		₹
Capital Account	55,300	Freehold Premises		40,000
Current Account	12,000	Plant and Machinery		10,000
B Loan	10,300	Motor Van		10,000
Creditors	7,500	Stock		8,000
		Debtors (₹ 12,000 – 2,000)	10,000	
		Less: Provision for Doubtful Debts	400	9,600
		Bank (₹ 17,500 – 10,000)		7,500
	85,100			85,100

Working Notes :

Partners	R (₹)
(1) Debtors as per Balance Sheet	12,000
Less: Bad Debts	2,000
	10,000
Provision for Bad Debts 4% of ₹ 10,000 = ₹ 400.	

Illustration 16

X, Y and Z are partners sharing profits in the ratio of their capitals. Y retired from the firm on 31.12.2014, the date on which the Balance Sheet of the firm was as follows :

Liabilities	₹	Assets		₹
Sundry Creditors	4,000	Cash		5,400
Bills Payable	2,500	Debtors	6,000	
Outstanding Salary	500	Less: Provision for bad debts	400	5,600
Capitals :		Stock		10,000
X	30,000	Machinery		28,000
Y	24,000	Land and Buildings		30,000
Z	18,000			
	79,000			79,000

The following adjustments were made :

(i) Buildings appreciated by 20%; stock depreciated by 10%; provision for doubtful debts was to be 5%; and a reserve for legal charges payable was to be made at ₹ 900.

(ii) Goodwill of the firm be valued at ₹ 12,000 and Y's share in it be adjusted into the Capital Accounts of X and Z without opening Goodwill Account.

(iii) ₹ 24,000 from Y's Capital Account be transferred to his Loan Account and balance be paid in cash.

(iv) New profit-sharing ratio of X and Z is decided to be 3 : 2.

Give the necessary Ledger Accounts and the Balance Sheet of the firm after Y's retirement.

Illustration 17

D, R and L were in partnership sharing profits and losses in the ratio of 3 : 2 : 1 respectively. The draft Balance Sheet as on 31.3.2015 was as follows :

Liabilities			₹	Assets		₹
Capital Accounts :	D	24,000		Buildings		12,000
	R	12,000		Plant and Equipment		18,800
	L	6,000	42,000	Stock		9,200
Current Accounts :	D	1,920		Debtors	12,400	
	R	1,680		Less: Provision for Doubtful Debts	1,200	11,200
	L	1,120	4,720	Balance at Bank		16,120
Loan — D			5,000			
Creditors			15,600			
			67,320			67,320

D retired on 31.3.2015 and, R and L continued in partnership sharing profits and losses in the ratio of 2 : 1. D's loan was repaid on 1.4.2015 and it was agreed that the remaining balance due to him, other than that of the Current Account, should remain as loan to the partnership.

For the purpose of D's retirement, it was agreed that —

(i) Buildings be revalued at ₹ 24,000 and the plant and equipment at ₹ 15,800.

(ii) The provision for doubtful debts was to be increased by ₹ 400.

(iii) A provision of ₹ 500 included in creditors was no longer required.
(iv) ₹ 1,200 was to be written-off the stock in respect of damaged items included therein.
(v) A provision of ₹ 4,240 be made in respect of outstanding legal charges.
(vi) The goodwill of the firm to be valued at ₹ 14,400. Both the partners decided that goodwill should not appear in the books of account of the firm.

You are required to prepare :
(a) Revaluation Account;
(b) Capital and Current Accounts of the partners;
(c) Balance Sheet of R and L as on 1.4.2015.

Solution

			67,800			67,800

Tutorial Note : Profits and losses arising out of revaluation of assets and liabilities directly affect the Partners' Capital Account. Therefore, it is to be transferred to Partners' Capital Accounts but not Partners' Current Accounts.

Illustration 18

A, B and C are in partnership sharing profits and losses in the ratio of 3 : 2 : 1 respectively. At 1.1.2015, their Balance Sheet was as follows :

Liabilities			₹	Assets	₹
Capital Accounts :	A	1,00,000		Fixed Assets	1,06,644
	B	50,000		Stock	71,116
	C	25,000	1,75,000	Debtors	42,655
Current Accounts :	A	24,000		Bank	24,863
	B	10,000			
	C	1,000	35,000		
Creditors			35,278		
			2,45,278		2,45,278

A retired on the above date and B and C decided to share profits and losses in the ratio of 2 : 1. Accordingly, it was agreed that —

(a) The balances on their Current Accounts would be transferred to their respective Capital Accounts.
(b) Goodwill would be valued at ₹ 24,000.
(c) Fixed assets would be revalued at ₹ 1,00,000, stock ₹ 70,000 and a debtor for ₹ 1,240 would be written-off as bad.
(d) A reserve of ₹ 30,000 is to be created.
(e) The entire amount due to A would be transferred to his Loan Account.

A took over an unrecorded asset at ₹ 3,000 against the amount due to him.

Prepare necessary Ledger Accounts and the Balance Sheet after A's retirement.

Solution **In the books of the Firm**

Dr. **Revaluation Account** **Cr.**

Particulars	₹	Particulars			₹
To Fixed Assets A/c	6,644	By A A/c (Note 1)			3,000
To Stock A/c	1,116	By Partners' Capital A/cs :	A	3,000	
To Debtors A/c	1,240		B	2,000	
			C	1,000	6,000
	9,000				9,000

Dr. **Partners' Capital Accounts** **Cr.**

Particulars	A (₹)	B (₹)	C (₹)	Particulars	A (₹)	B (₹)	C (₹)
To Revaluation A/c (Note 1)	3,000	—	—	By Balance b/d	1,00,000	50,000	25,000
To Revaluation A/c	3,000	2,000	1,000	By Partners' Current A/cs	24,000	10,000	1,000
To Goodwill A/c	—	16,000	8,000	By Goodwill A/c	12,000	8,000	4,000
To A Loan A/c	1,30,000	—	—				
To Reserve A/c (2 : 1)	—	20,000	10,000				
To Balance c/d	—	30,000	11,000				
	1,36,000	68,000	30,000		1,36,000	68,000	30,000

Balance Sheet after A's retirement

Liabilities			₹	Assets	₹
Capital :	A	30,000		Fixed Assets	1,00,000
	B	11,000	41,000	Stock	70,000
Reserve			30,000	Debtors	41,415
A Loan			1,30,000	Bank	24,863
Creditors			35,278		
			2,36,278		2,36,278

Working Notes :

(1) Unrecorded assets taken over by A at an agreed value of ₹ 3,000. A's Capital will be debited and Revaluation Account will be credited.

(2) Reserve to be created by debiting B and C Capital in the new profit-sharing ratio, i.e., 2 : 1. A has nothing to do with the Reserve.

3. Adjustment in Regard to Undistributed Profits and Losses

When a partner is retiring from the partnership, an adjustment entry is required for any reserve/accumulated losses appearing in the Balance Sheet at the time of retirement. The Journal Entry will be as follows :

General Reserve Account Dr.
Profit and Loss Account Dr.
Other Reserves Account Dr.
  To All Partners' Capital Accounts [Old ratio]

If there is any accumulated loss in the Balance Sheet at the time of retirement, the Journal Entry will be as follows :

All Partners' Capital Accounts Dr. [Old ratio]
  To Profit and Loss Account

After retirement, remaining partners may decide that the reserve to be shown in the books of the new firm at its original figure (or agreed figure). Under this situation, reserve is written-off first by debiting Reserve Account and crediting All Partners' Capital Accounts in the old profit-sharing ratio, then reserve is raised in the books at its original figure (or agreed figure) by debiting Remaining Partners' Capital Accounts in the new ratio and crediting the Reserve Account.

The accounting entries will be as follows :

(i) ***When reserve is written-off***

Reserve Account	Dr.	
To All Partners' Capital Accounts		[Old ratio]

(ii) ***When reserve is to be shown in the new Balance Sheet at agreed figure***

Remaining Partners' Capital Accounts	Dr.	[New ratio]
To Reserve Account		[Agreed amount]

Students must pass necessary entries for reserve and surplus or accumulated losses even if the question is silent on that point.

Illustration 19

X, Y and Z were partners in a firm sharing profits and losses in the ratio of 2 : 2 : 1 respectively. The Balance Sheet of the firm as on 31st December, 2014 was as follows :

Liabilities	₹	Assets		₹
Capital Accounts :		Buildings		3,00,000
X	2,00,000	Plant and Machinery		2,00,000
Y	2,00,000	Furniture		50,000
Z	1,50,000	Stock-in-Trade		1,50,000
General Reserve	75,000	Sundry Debtors	1,00,000	
Creditors	1,25,000	Less: Provision for bad debts	5,000	95,000
Bills Payable	60,000	Cash		15,000
	8,10,000			8,10,000

On 1st January, 2015, Y retired. The terms of his retirement provided the following :

(1) Plant and machinery and furniture were to be depreciated by 5% and 10% respectively.

(2) Stock and building were to be appreciated by 20% and 10% respectively.

(3) Provision for doubtful debts was to be increased to ₹ 7,500.

(4) The goodwill of the firm was to be valued at ₹ 1,00,000.

(5) The amount due to Y was to be transferred to a separate Loan Account.

You are required to show the Revaluation Account, Partners' Capital Accounts and the Balance Sheet of the new firm as on 1st January, 2015.

Solution

Balance Sheet of X and Z as on 31st January, 2015

Liabilities	₹	Assets	₹
Capital Accounts :		Buildings (₹ 3,00,000 + 30,000)	3,30,000
X	2,20,233	Plant and Machinery (₹ 2,00,000 – 10,000)	1,90,000
Z	1,60,167	Furniture (₹ 50,000 – 5,000)	45,000

Y Loan	2,87,000	Stock-in-Trade ₹ (1,50,000 + 30,000)		1,80,000
Creditors	1,25,000	Sundry Debtors	1,00,000	
Bills Payable	60,000	Less: Provision for bad debts	7,500	92,500
		Cash		15,000
	8,52,500			8,52,500

Working Notes :

(1) Goodwill is to be raised in the books at its full value by crediting all Partners' Capital Accounts in the old ratio, i.e., 2 : 2 : 1 and immediately it is to be written-off by debiting continuing partners in the new profit-sharing ratio, i.e. 2 : 1.

(2) General Reserve is to be distributed amongst the old partners even when the question is silent on this point. General Reserve Account is debited and Old Partners' Capital Accounts are credited in the old ratio, i.e., 2 : 2 : 1.

Illustration 20

A, B and C are partners sharing profits and losses equally. The Balance Sheet of the firm as on 31st December, 2015 stood as follows :

Liabilities	₹	Assets		₹
Capital Accounts :		Goodwill		19,500
A	30,000	Land and Buildings		40,000
B	20,000	Investments (at cost)		5,000
C	20,000	Stock		10,000
Contingency Reserve	6,000	Debtors	10,000	
Investment Fluctuation Fund	1,2000	Less: Provision for bad debts	800	9,200
Creditors	12,800	Cash at bank		3,300
		Cash in hand		3,000
	90,000			90,000

C retires on 1st January, 2015. In order to arrive at the balance due to C, it was mutually agreed that:

(1) Land and Buildings be valued at ₹ 50,000.
(2) Investment fluctuation fund be brought down to ₹ 500.
(3) Contingency reserve is no longer required.
(4) Debtors are all good.
(5) Stock to be taken at ₹ 9,000.
(6) Amount due to C will be transferred to his Loan Account carrying interest @ 12% p.a.
(7) Goodwill be valued at one year's purchase of the average profits of the past five years. The profits of the preceding five years were :
2015 — ₹ 11,500; 2011 — ₹ 14,000; 2012 — ₹ 9,000; 2013 — ₹ 8,000; and 2014 — ₹ 10,000.

You are required to show :

(i) Revaluation Account;
(ii) Partners' Capital Accounts; and
(iii) Balance Sheet of the new firm as on 1st January, 2015.

Solution

In the books of the Firm

Dr. Revaluation Account Cr.

Particulars	₹	Particulars	₹
To Stock A/c ₹ (10,000 – 9,000)	1,000	By Land and Buildings A/c	10,000
To Partners' Capital A/cs :		By Investment Fluctuation Fund A/c (Note 2)	700
A	3,500	By Provision of Bad Debts A/c	800
B	3,500		
C	3,500		
	11,500		11,500

Dr. Partners' Capital Accounts Cr.

Particulars	A (₹)	B (₹)	C (₹)	Particulars	A (₹)	B (₹)	C (₹)
To Goodwill A/c (Note 1)	6,500	6,500	6,500	By Balance b/d	30,000	20,000	20,000
To C Loan A/c	—	—	22,500	By Contingency Reserve A/c	2,000	2,000	2,000
To C Capital A/c	1,750	1,750	—	By A Capital A/c	—	—	1,750
To Balance c/d	27,250	17,250	—	By B Capital A/c	—	—	1,750
				By Revaluation A/c	3,500	3,500	3,500
	35,500	25,500	29,000		35,500	25,500	29,000

Balance Sheet of A and B as on 1st January, 2015

Liabilities	₹	Assets	₹
Capital Accounts :		Land and Buildings	50,000
A	27,250	Investments (at cost)	5,000
B	17,250	Stock	9,000
12% C Loan	22,500	Debtors	10,000
Investment Fluctuation Fund	500	Cash at bank	3,300
Creditors	12,800	Cash in hand	3,000
	80,300		80,300

Working Notes :

(1) Ascertainment of Goodwill :

(a) Total profits of last 5 years = (₹ 11,500 + 14,000 + 9,000 + 8,000 + 10,000) = ₹ 52,500.

(b) Average profit = ₹ 52,500 / 5 = ₹ 10,500.

(c) New value of goodwill = ₹ 10,500 × 1 = ₹ 10,500.

Goodwill already appearing in the books at ₹ 19,500. It is to be written-off first by debiting all partners equally. After this, goodwill is to be adjusted as follows :

Working Notes : (1) Statement Showing the Required Adjustment for Goodwill

Partners	A (₹)	B (₹)	C (₹)
Right of goodwill before retirement (equally)	3,500	3,500	3,500
Right of goodwill after retirement (equally)	5,250	5,250	—
Gain (+) / Sacrifice (–)	(+) 1,750	(–) 1,750	3,500

Required Journal Entry :

A Capital Account Dr. 1,750

B Capital Account Dr. 1,750

To C Capital Account 3,500

(2) Investment fluctuation fund is created to guard against the fall in the price of the investment. At the time of retirement, investment fluctuation fund is required to the extent of ₹ 500 only. Therefore, the balance of ₹ 700 will be transferred to Revaluation Account.

4. Adjustment in Regard to Joint Life Policy

When a partner is retiring from the partnership, an adjustment is required in respect of Joint Life Policy. Joint Life Policy should be adjusted according to situations.

Case 1 : When there is no Joint Life Policy in the present Balance Sheet and Joint Life Policy will be shown in the Balance Sheet after retirement

In this case, Joint Life Policy Account will be debited at surrender value and All Partners' Capital Accounts will be credited in the old ratio. Joint Life Policy will be shown in the Balance Sheet at surrender value.

Joint Life Policy Account Dr.

To All Partners' Capital Accounts

Illustration 21

A, B and C are partners sharing profits in the ratio of 4 : 3 : 2. Their Balance Sheet on 31st March, 2015 was as follows :

Liabilities			₹	Assets	₹
Creditors			33,000	Cash	10,000
General Reserve			27,000	Debtors	15,000
Capitals :	A	70,000		Stock	30,000
	B	45,000		Machinery	50,000
	C	30,000	1,45,000	Land and Building	1,00,000
			2,05,000		2,05,000

The firm had a joint life policy for ₹ 40,000. The surrender value of the policy was ₹ 13,500 as on 31st March, 2015. B retires on the above date on the following conditions :

(a) Land and building be appreciated by 20%.

(b) Goodwill to be valued at ₹ 18,000.

(c) A provision for doubtful debts of 5% is to be created and machinery and stock be written down by 10% and 5% respectively.

(d) A provision of ₹ 1,500 be made in respect of legal charges.

B to be paid ₹ 5,000 and balance be transferred to his Loan Account. Prepare Revaluation Account, Partners' Capital Accounts and Balance Sheet of A and C.

Solution

In the books of the Firm

Dr. Revaluation Account Cr.

Particulars		₹	Particulars	₹
To Provision for Doubtful Debts A/c (5% on ₹ 15,000)		750	By Land and Building A/c (20% of ₹ 1,00,000)	20,000

To Stock A/c (5% of ₹ 30,000)	1,500			
To Provision for Legal Charges A/c	1,500	3,000		
To Partners' Capital A/cs :				
A	5,000			
B	3,750			
C	2,500	11,250		
		20,000		20,000

Dr. Partners' Capital Accounts Cr.

Particulars	A (₹)	B (₹)	C (₹)	Particulars	A (₹)	B (₹)	C (₹)
To Goodwill A/c	12,000	—	6,000	By Balance b/d	70,000	45,000	30,000
To Cash A/c	—	5,000	—	By General Reserve A/c	12,000	9,000	6,000
To B's Loan A/c	—	63,250	—	By Goodwill A/c	8,000	6,000	4,000
To Balance c/d	89,000	—	39,500	By Joint Life Policy A/c	6,000	4,500	3,000
				By Revaluation A/c	5,000	3,750	2,500
	1,01,000	68,250	45,500		1,01,000	68,250	45,500

Balance Sheet of A and C as on 31st March, 2015

Liabilities	₹	Assets		₹
Capitals :		Land and Building ₹ (1,00,000 + 20,000)		1,20,000
A	89,000	Machinery ₹ (50,000 – 5,000)		45,000
C	39,500	Stock ₹ (30,000 – 1,500)		28,500
B's Loan	63,250	Debtors	15,000	
Creditors	33,000	Less: Provision for doubtful debts	750	14,250
Provision for Legal Charges	1,500	Joint Life Policy		13,500
		Cash ₹ (10,000 – 5,000)		5,000
	2,26,250			2,26,250

Case 2 : When there is no Joint Life Policy in the present Balance Sheet and Joint Life Policy will not be shown in the Balance Sheet after retirement

In this case, adjustment is done through the Partners' Capital Accounts by passing the following entry :

Continuing Partners' Capital Accounts Dr. [Gaining Ratio]
To Retiring Partners' Capital Accounts [Share of surrender value]

Illustration 22

A, B and C were partners sharing profits and losses in the ratio of 5 : 3 : 2 respectively. They had taken out a Joint Life Policy of the face value of ₹ 2,00,000. On 31st December, 2014 its surrender value was ₹ 40,000. On this date the Balance sheet of the firm stood as follows :

Liabilities		₹	Assets	₹
Sundry Creditors		53,000	Fixed Assets	2,50,000
Outstanding Expenses		7,000	Stock	1,10,000
Reserve		30,000	Book Debts	90,000
Capital A/cs :	A	2,00,000	Cash at Bank	20,000
	B	1,00,000		
	C	80,000		
		4,70,000		4,70,000

On that date, B decided to retire and for that purpose —

(a) Goodwill was valued at ₹ 1,50,000.

(b) Fixed Assets were valued at ₹ 3,00,000.

(c) Stock was considered as worth ₹ 10,000.

Amount due to B will be transferred to his Loan Account earning interest @ 10% p.a. Goodwill was to be passed through books without raising a Goodwill Account.

The Joint Life Policy was also not to appear in the Balance Sheet.

Prepare :

(1) Revaluation Account;

(2) Partners' Capital Accounts; and

(3) Balance Sheet after B's retirement.

Solution

In the books of the Firm

Dr. Revaluation Account Cr.

Particulars	₹	Particulars	₹
To Stock A/c	1,00,000	By Fixed Assets A/c	50,000

	1,00,000		1,00,000

Dr. Partners' Capital Accounts Cr.

Particulars	A (₹)	B (₹)	C (₹)	Particulars	A (₹)	B (₹)	C (₹)
To Revaluation A/c (Loss)	25,000	15,000	10,000	By Balance b/d	2,00,000	1,00,000	80,000
To B Capital A/c (Note 1)	15,000	—	30,000	By Reserve A/c	15,000	9,000	6,000
To B Capital A/c (Note 2)	4,000	—	8,000	By A Capital A/c (Note 1)	—	15,000	—
To B Loan A/c	—	1,51,000	—	By C Capital A/c (Note 1)	—	30,000	—
To Balance c/d	1,71,000	—	38,000	By A Capital A/c (Note 2)	—	4,000	—
				By B Capital A/c (Note 2)	—	8,000	—
	2,15,000	1,66,000	86,000		2,15,000	1,66,000	86,000

Balance Sheet (after B's retirement) as on 31st December, 2014

Liabilities		₹	Assets	₹
Capital A/cs :	A	1,71,000	Fixed Assets	3,00,000
	C	38,000	Stock	10,000
B Loan		1,51,000	Book Debts	90,000
Sundry Creditors		53,000	Cash at Bank	20,000
Outstanding Expenses		7,000		
		4,20,000		4,20,000

Working Notes :

(1) Adjustment for Goodwill (₹ 1,50,000)

Partners	A (₹)	B (₹)	C (₹)
Right of goodwill before retirement (5 : 3 : 2)	75,000	45,000	30,000
Right of goodwill after retirement (3 : 2)	90,000		60,000
Gain (+) / Sacrifice (–)	(+) 15,000	(–) 45,000	(+) 30,000

(2) Adjustment for Joint Life Policy (₹ 40,000)

Partners	A (₹)	B (₹)	C (₹)
Right of goodwill before retirement (5 : 3 : 2)	20,000	12,000	8,000
Right of goodwill after retirement (3 : 2)	24,000	—	16,000
Gain (+) / Sacrifice (–)	(+) 4,000	(–) 12,000	(+) 8,000

Journal Entry

A Capital Account	Dr.	4,000	
C Capital Account	Dr.	8,000	
To B Capital Account			12,000

Alternatively:

Joint Life Policy can be adjusted by calculating Gaining Ratio which is as follows :

Partners	A (₹)	B (₹)	C (₹)
Old Profit Sharing Ratio	5/10	3/10	2/10
New Profit Sharing Ratio	3/5	–	2/5
Gaining Ratio	(6 – 5) / 10		(4 – 2) / 10
	= 1/10	= 3/10	= 2/10

Gaining Ratio — A : C = 1 : 2.

B's share of the surrender value = 3/10 of ₹ 40,000 = ₹ 12,000 and it is to be borne by A and C in the Gaining Ratio, i.e., 1 : 2.

A will bear = 1/3 of ₹ 12,000 = ₹ 4,000.C will bear = 2/3 of ₹ 12,000 = ₹ 8,000.

Illustration 23

On 31st March, 2015, the Balance Sheet of M/s. A, B and C sharing profits and losses in proportion to their capitals, stood as follows :

Liabilities	₹	Assets	₹
Sundry Creditors	1,00,000	Land and Buildings	2,00,000
Capital A/cs :		Machinery	3,00,000
A	2,00,000	Closing Stock	1,00,000
B	3,00,000	Sundry Debtors	1,00,000
C	2,00,000	Cash and Bank Balances	1,00,000
	8,00,000		8,00,000

On 31st March, 2015, A desired to retire from the firm and the remaining partners decided to carry on. It was agreed to revalue the Assets and Liabilities on that date on the following basis :

(1) Land and Buildings be appreciated by 30%.

(2) Machinery is to be depreciated by 20%.

(3) Closing Stock is to be valued at ₹ 75,000.

(4) Provision for bad debts is to be made at 5%.

(5) Old credit balances of Sundry Creditors ₹ 20,000 is to be written-back.

(6) Joint Life Policy of the partners surrendered and cash obtained ₹ 80,000.

(7) Goodwill of the entire firm be valued at ₹ 1,40,000 and A's share of the Goodwill be adjusted in the accounts of B and C who share the future profits equally. No Goodwill Account being raised.

(8) The capital of the firm is to be the same as before retirement. Individual capital be in their profit-sharing ratio.

(9) Amount due to A is to be settled on the following basis : 50% on retirement and the balance 50% within one year.

Prepare Revaluation Account, Capital Accounts of Partners, Cash and Bank Account and Balance Sheet as on 1.4.2015 of M/s. B and C.

To Balance c/d (required)	—	3,50,000	3,50,000	By Bank A/c (Bal. figure)	—	30,000	1,60,000
	2,62,857	3,64,286	3,82,857		2,62,857	3,64,286	3,82,857

Balance Sheet of M/s B and C as on 1st April, 2015

Liabilities		₹	Assets		₹
Partners' Capital A/cs :	₹		Land and Buildings		2,60,000
B	3,50,000		Machinery		2,40,000
C	3,50,000	7,00,000	Closing Stock		75,000
A's Loan Account		1,30,000	Sundry Debtors	1,00,000	
Sundry Creditors		80,000	Less: Provision for Bad Debts	5,000	95,000
			Cash and Bank Balances		2,40,000
		9,10,000			9,10,000

Working Notes : **Calculation of Share of Goodwill**

Partners	A (₹)	B (₹)	C (₹)
Right of goodwill before retirement (2 : 3 : 2)	40,000	60,000	40,000
Right of goodwill after retirement (1 : 1)	—	70,000	70,000
Gain (+) / Sacrifice (–)	(–) 40,000	(+) 10,000	(+) 30,000

In this case, Joint Life Policy will be treated as an asset. Any revaluation of Joint Life Policy will be done through Revaluation Account.

Case 3 : When there is Joint Life Policy in the Balance Sheet

Illustration 24

A, B and C were partners sharing profits and losses in the ratio of 3 : 2 : 1. Their Balance Sheet as on 31.03.2015 stood as follows :

Liabilities	₹	Assets		₹
Sundry Creditors	12,500	Cash at Bank		1,500
General Reserve	18,000	Sundry Debtors	15,000	
Capital A/cs :		Less: Provision for bad debts	1,500	13,500
(A — ₹ 40,000; B — ₹ 21,000; C — ₹ 20,000)	81,000	Stock		12,500
Joint Life Policy	8,000	Office Equipments		14,000
		Furniture		12,000
		Building		50,000
	1,11,500			1,11,500

B retired on 1.4.2015 subject to the following conditions :

(i) Office equipment revalued at ₹ 15,900.

(ii) Building revalued at ₹ 75,000. Furniture is to written-down by ₹ 2,000 and stock is reduced to ₹ 10,000.

(iii) Provision for bad debts is to be calculated @ 5% on debtors.

(iv) Goodwill of the firm is to be valued at ₹ 18,000. But no Goodwill Account is to be raised.

(v) Joint Life Policy is to be shown at surrendered value. The surrender value is ₹ 7,500.

(vi) Amount due to B is to be transferred to his Loan Account.

You are required to prepare : Revaluation Account, Partners' Capital Accounts and Balance Sheet immediately after B's retirement.

Solution **In the books of the Firm**

		1,34,150			1,34,150

Working Notes : **(1) Calculation of Share for Goodwill**

Partners	A (₹)	B (₹)	C (₹)
Right of goodwill before retirement (3 : 2 : 1)	9,000	6,000	3,000
Right of goodwill after retirement (1 : 1)	12,000	—	6,000
Gain (+) / Sacrifice (–)	(+) 3,000	(–) 6,000	(+) 3,000

5. Adjustment in Regard to Share of Profits from the Date of the last Balance Sheet to the Date of Retirement

So far we have seen that a partner is retiring from the partnership either at the beginning or at the end of the accounting year. But in practical situation, a partner may retire during the course of an accounting year. In this case, the retiring partner is entitled to a share of profit of the current year up to the date of retirement, in addition to his share of goodwill, revaluation on profit and reserve. His share of interim profit is calculated on the basis of the provision in the partnership deed. If the partnership deed is silent, the amount of profit should be calculated in such a manner as must have been agreed by the partners. The interim profit can be calculated by adopting any of the following two methods.

Method 1 : Calculation of Interim Profit based on Past Profits

In this case the following steps are followed :

Step 1 : Calculate average profit based on the last few years' profit.

Step 2 : Calculate the profit of that particular period (from the beginning of the year to the date of retirement).

Step 3 : Calculate the share of profit of the retiring partner based on old profit-sharing ratio.

Step 4 : Pass necessary Journal Entries as follows :

Profit and Loss Suspense Account Dr.
   To Retiring Partner's Capital Account [Retiring partner's share of profit]
      OR
Continuing Partners' Capital Account Dr. [Old ratio]
   To Retiring Partner's Capital Account

It should be noted that when actual Profit and Loss Account will be prepared at the end of the accounting period, the balance of this Profit and Loss Suspense Account will be transferred to Profit and Loss Appropriation Account. ***Alternatively***, the Continuing Partners' Capital Account is debited in the old ratio and Profit and Loss Suspense Account is credited. Till adjustment, Profit and Loss Suspense Account is shown in the interim Balance Sheet.

Illustration 25

A, B and C are partners sharing profits and losses in the ratio of 2 : 2 : 1. C retires on 31st March, 2015. The Balance Sheet of the firm on 31st December, 2014 stood as follows :

Liabilities	₹	Assets	₹
Capital A/cs :		Land and Buildings	1,00,000
A	60,000	Investments	12,500
B	60,000	Stock	25,000
C	40,000	Debtors	40,000
General Reserve	40,000	Cash at Bank	22,500
Creditors	10,000	Cash in Hand	10,000
	2,10,000		2,10,000

In order to arrive at the balance due to C, it was mutually agreed that :

(1) Land and buildings be valued at ₹ 1,20,000.

(2) Investment be valued at ₹ 10,000.

(3) Stock be taken at ₹ 30,000.

(4) Goodwill be valued at two year's purchase of the average profit of the past five years. Goodwill will not appear in the books of the reconstituted firm.

(5) C's share of profit up to the date of retirement be calculated on the basis of average profit of the preceding three years. The profits of the preceding five years were as under : 2015—₹ 20,000; 2011—₹ 23,500; 2012—₹ 30,000; 2013—₹ 27,500; and 2014—₹ 32,500.

(6) Amount payable to C to be transferred to his Loan Account carrying interest @ 15% p.a.

You are required to prepare : (i) Revaluation Account; (ii) Partners' Capital Accounts; and (iii) a Balance Sheet as at 31st March, 2015.

Solution

Dr. **(i) Revaluation Account** **Cr.**

Particulars	₹	Particulars	₹
To Investment A/c	2,500	By Land and Building	20,000
To Partners' Capital A/cs :		By Stock	5,000
A	9,000

	25,000		25,000

Dr. **(ii) Partners' Capital Accounts** **Cr.**

Particulars	A (₹)	B (₹)	C (₹)	Particulars	A (₹)	B (₹)	C (₹)
To Goodwill A/c	26,700	26,700	—	By Balance b/d	60,000	60,000	40,000
To 15% C Loan A/c	—	—	64,680	By Goodwill A/c	21,360	21,360	10,680
To Balance c/d	79,660	79,660	—	By General Reserve A/c	16,000	16,000	8,000
				By Revaluation A/c	9,000	9,000	4,500
				By Profit & Loss Suspense A/c	—	—	1,500
	1,06,360	1,06,360	64,680		1,06,360	1,06,360	64,680

(iii) Balance Sheet of A and B as on 31st March, 2015

Liabilities	₹	Assets	₹
Capital A/cs :		Land and Buildings	1,20,000
A	79,660	Investment	10,000
B	79,660	Stock	30,000
15% C Loan	64,680	Debtors	40,000
Creditors	10,000	Cash at Bank	22,500
		Cash in Hand	10,000
		Profit & Loss Suspense A/c	1,500
	2,34,000		2,34,000

Working Notes :

(1) Calculation of Goodwill

(a) Average profit = (₹ 20,000 + 23,500 + 30,000 + 27,500 + 32,500) / 5 = ₹ 26,700.

(b) Goodwill = 2 year's purchase of average profit = 2 × ₹ 26,700 = ₹ 53,400.

(2) Calculation of C's Share of Profit

(a) Average profit (based on last three years) = (₹ 30,000 + 27,500 + 32,500) / 3 = ₹ 30,000.

(b) Profit for the month of January, February and March, 2015 = ₹ 30,000/12 × 3 = ₹ 7,500.

(c) C's share of profit = 1/5th of ₹ 7,500 = ₹ 1,500.

Illustration 26

A, B and C are equal partners. C retires on 31.3.2015. The Balance Sheet of the firm as on 31.12.2014 stood as follows:

Liabilities		₹	Assets		₹
Creditors		12,900	Cash in hand		1,000
Contingency Reserve		4,000	Cash at bank		4,000
Investment Fluctuation Fund		1,200	Debtors	10,000	
Partners' Capitals:	₹		Less: Provision for bad debts	800	9,200
A	30,000		Stock		10,000
B	20,000		Investments (cost)		5,000
C	20,000	70,000	Land and Buildings		40,000
			Goodwill		18,900
		88,100			88,100

In order to arrive at the balance due to C, it was mutually agreed that:

1. Land and Buildings be valued at ₹ 50,000;
2. Investment Fluctuation Fund be brought to ₹ 500;
3. Debtors are all good;
4. Stock be taken at ₹ 9,400;
5. Goodwill be valued at one year's purchase of the average profits of the past five years;
6. C's share of profit to the date of retirement be calculated on the basis of average profit of the preceding three years.

The p rofits for the preceding five years were as under: 2015—₹ 11,500; 2011—₹ 14,000; 2012—₹ 9,000; 2013—₹ 8,000; 2014—₹ 10,000.

Required: Journal entries, C's Capital Account and the revised Balance Sheet (show your workings).

	(Being the balance of C's capital transferred to his Loan Account)			

Dr. **C Capital Account** **Cr.**

Particulars	₹	Particulars	₹
To Goodwill A/c	2,800	By Balance b/d	20,000
To C Loan A/c	22,917	By Revaluation A/c	3,633

		By A Capital A/c – contingency reserve	667
		By B Capital A/c – contingency reserve	667
		By A Capital A/c – profit	375
		By B Capital A/c – profit	375
	25,717		25,717

Balance Sheet as on 31st March, 2015 (Revised)

Liabilities	₹	Assets	₹
Creditors	12,900	Cash in hand	1,000
Contingency Reserve	4,000	Cash at bank	4,000
Investment Fluctuation Fund	500	Debtors	10,000
C Loan Account	22,917	Stock	9,400
Partners' Capitals:		Investments	5,000
A ₹ (30,000 + 3,634 – 667 – 2,800 –375)	29,792	Land and Buildings	50,000
B ₹ (20,000 + 3,633 – 667 – 2,800 – 375)	19,791	Goodwill	10,500
	89,900		89,900

Working Notes : (1) Statement Showing the Required Adjustment for Contingency Reserve

Partners	A (₹)	B (₹)	C (₹)
Right of contingency reserve before retirement (1 : 1 : 1)	1,333	1,334	1,333
Right of contingency reserve after retirement (1 : 1)	2,000	—	2,000
Partners to be Debited (+) / Credited (–)	(+) 667	(–) 1,334	(+) 667

(2) Ascertainment of Goodwill
Total profit for the last 5 years — ₹ (11,500 + 14,000 + 9,000 + 8,000 + 10,000) = ₹ 52,500.
Average profit — ₹ 52,500 / 5 = ₹ 10,500.
Goodwill is one year's purchase of average profits of the past five years, i.e., ₹ 10,500 × 1 = ₹ 10,500.
Therefore, reduction in the value of goodwill = ₹ 18,900 – ₹ 10,500 = ₹ 8,400.
(3) Ascertainment of C's Share of Profit from 1.1.2015 to 31.3.2015
Total profit for the last 3 years — ₹ (9,000 + 8,000 + 10,000) = ₹ 27,000.
Average profit — ₹ 27,000 / 3 = ₹ 9,000.
Average profit for the 3 months, i.e., (1.1.2015 to 31.3.2015) — ₹ 9,000 × 3/12 = ₹ 2,250.
Therefore, C's share of profit — ₹ 2,250 / 3 = ₹ 750.

Method 2 : Calculation of Interim Profit after Preparing Interim Final Accounts

In this case, an interim Final Account is prepared up to the date of retirement. The profit of this interim Final Account is transferred to Partners' Capital Accounts by passing the following entry :

Profit and Loss Appropriation Account Dr. [Total profit of the interim period]
To All Partners' Capital Account [Old ratio]

Mode of Payment of Retiring Partners' Interest

The provision of the partnership deed is to be taken into consideration while deciding the mode of payment to retiring partner. If there is no partnership deed, the partners should decide it mutually. The amount payable to the retiring partner can be paid off in one of the following manner :

In One Lump Sum

When the amount payable to the retiring partner is small and there is enough cash in hand, the entire amount can be paid off in full just after retirement. The entry is :

Retiring Partner's Capital Account Dr. [Full amount]
To Cash/Bank Account

In Instalments

When the amount payable to the retiring partner is substantial and enough cash/bank balance is not there, the amount is paid in instalments. The number of instalments, rate of interest, the time and amount of each instalment is decided by the partners mutually if there is no provision in the partnership deed in this respect.

Generally, the amount payable to the retiring partner is transferred to his Loan Account. The Loan Account is credited with the periodic interest and debited with the instalment paid.

The Journal Entries are :

(i) When amount due to retiring partner is transferred to his Loan Account	
Retiring Partner's Capital Account	Dr.
To Retiring Partner's Loan Account	
(ii) For interest on the balance due	
Interest Account	Dr.
To Retiring Partner's Loan Account	
(iii) For payment of instalment	
Retiring Partner's Loan Account	Dr.
To Bank/Cash Account	

By Way of Annuity

The remaining partners may agree to settle the claim of the retiring partner by paying him a fixed annual amount called an annuity either for a certain number of years or for the whole life of the retiring partner. In this case, the total amount payable to the retiring partner is transferred to an Annuity Suspense Account, which must be credited with interest at a fixed rate per annum on the diminishing balance and debited with the amount of annuity paid.

In the event of death of the retiring partner before the amount is exhausted, the balance of the Annuity Suspense Account is transferred to remaining Partners' Capital Account in the profit-sharing ratio. When the credit balance of the Annuity Suspense Account is exhausted before the death of the retiring partner, subsequent instalment of annuity is charged to Profit and Loss Appropriation Account of the continuing partners.

Illustration 27

On 31st December, 2012 P retired from active partnership and his share of the following was ascertained on the date of retirement :

Goodwill ₹ 20,000; Interest on Capital ₹ 500; Salary ₹ 1,500; Drawings ₹ 20,000; Interest on Drawings ₹ 2,000; Share of Profit ₹ 25,000; Capital ₹ 75,000.

The amount due to P was to be kept with the firm as a loan bearing interest @ 10% p.a. was to be paid to P by annual instalments of ₹ 50,000 each, interest being calculated @ 10% p.a., on the unpaid balances. The first instalment was paid on 31st December, 2013. You are required to prepare P's Capital Account and also P's Loan Account until the payment of the whole amount due to him was made.

A, B and C are partners sharing profits and losses in the ratio of 4 : 3 : 2. Their Balance Sheet as on 31st December, 2010 was as follows :

Liabilities	₹	Assets		₹
Capital A/cs :		Land and Buildings		1,20,000
A	87,800	Plant and Machinery		37,000
B	60,800	Stock		36,000
C	43,800	Debtors	25,000	
Creditors	41,400	Less: Provision for Bad Debts	500	24,500
		Cash at bank		15,800
		Cash in hand		500
	2,33,800			2,33,800

B retired on 1st January, 2011 and these adjustments were agreed upon before ascertaining the amount payable to B:

(1) Land and building to be appreciated by 15%.

(2) Provision for bad debts raised to 5% on debtors.

(3) A provision of ₹ 650 is to be made for outstanding expenses.

(4) Stock to be reduced to ₹ 32,000.

(5) Goodwill to be valued at ₹ 45,000 and B's share to be adjusted into the accounts of A and C who decided to continue the business sharing profits and losses in the ratio of 5 : 3.

Amount payable to B will be paid in four equal annual instalment plus interest @ 10% on balance due. First instalment was paid on 31st December, 2011.

You are required to show: (i) Revaluation Account; (ii) Partners' Capital Accounts just after retirement of B; and (iii) B's Loan Account till it is finally closed.

A, B and C are partners sharing profits and losses in the ratio of 3:2:1. Following is their Balance Sheet as at 31st March 2015:

Liabilities	₹	Assets	₹
Capital — A	4,00,000	Plant and Machinery	4,00,000
Capital —B	3,00,000	Stock	2,00,000
Capital — C	2,00,000	Debtors	2,00,000
Creditors	1,00,000	Cash & Bank balances	2,00,000
	10,00,000		10,00,000

B retires from the business owing to illness from 1st April 2015. The following was agreed upon retirement of B:

(i) The goodwill of the firm has been valued at ₹ 3,00,000 but no Goodwill Account is to be raised in the books.
(ii) Plant and Machinery has been revalued at ₹ 6,00,000 and stock revalued at ₹ 1,80,000.
(iii) A sum of ₹ 30,000 out of debtors was agreed to be bad and was to be written-off.
(iv) A and C will continue to carry on the business and shall share profits and losses equally in future.
(v) Amount payable to B shall remain in the business as loan carrying interest at 18% p.a.

You are required: (a) To give Journal entries to give effect to the above, (b) To Prepare Revaluation Account, and (c) To prepare the opening Balance Sheet of A and C as at 1st April, 2015 : (i) When changes in assets and liabilities are to be brought into books. (ii) When changes in assets and liabilities are not to be brought into books.

Solution (Case i) **In the books of A, B and C**

Journal **Dr.** **Cr.**

Date	Particulars		Dr. ₹	Cr. ₹
2015 April 1	C Capital A/c	Dr.	1,00,000	
	To B Capital A/c			1,00,000
	(Being the adjustment for goodwill on B's retirement)			
	Plant & Machinery A/c	Dr.	2,00,000	
	To Revaluation A/c			2,00,000
	(Being the value of the plant increased to ₹ 6,00,000)			
	Revaluation A/c	Dr.	50,000	
	To Stock A/c			20,000
	To Sundry Debtors A/c			30,000
	(Being the value of stock and sundry debtors reduced to ₹ 1,80,000 and ₹ 1,70,000 respectively)			
	Revaluation A/c	Dr.	1,50,000	
	To A Capital A/c			75,000
	To B Capital A/c			50,000
	To C Capital A/c			25,000
	(Being the profit on revaluation on B's retirement shared by the partners in their profit sharing ratio, 3:2:1)			
	B Capital A/c	Dr.	4,50,000	
	To B Loan A/c			4,50,000
	(Being the balance of B's Capital Account transferred to B's Loan Account)			

Calculation of Share of Goodwill

Partners		A	B	C
Share of goodwill before retirement (old ratio)	(₹)	1,50,000	1,00,000	50,000
Share of goodwill after retirement (new ratio)	(₹)	1,50,000	—	1,50,000
Gain (+) / Sacrifice (–)	(₹)		(–) 1,00,000	(+) 1,00,000

Therefore, on account of goodwill, B sacrifies ₹ 1,00,000 and he gives the entire amount to C. The share of goodwill of A remains unaffected. Therefore, B is to get ₹ 1,00,000 from C.

	10,00,000		10,00,000

Illustration 31

The Balance Sheet of X, Y and Z who share profits in proportion to their capital, stood as follows on March 31, 2015 :

Liabilities	₹	Assets		₹
Capital Accounts :		Land and Buildings		25,000
X	20,000	Plant and Machinery		8,500
Y	15,000	Stock		8,000
Z	10,000	Debtors	5,000	
Creditors	6,900	Less: Provision	100	4,900
		Cash at Bank		5,500
	51,900			51,900

Y retired on the above date and the following was agreed upon :

(a) That stock to be depreciated by 6%.

(b) That the provision for doubtful be brought up to 5% on Debtors.

(c) That the land and buildings be appreciated by 20%.

(d) That a provision of ₹ 770 be made in respect of outstanding legal charges.

(e) That the goodwill of the entire firm be fixed at ₹ 10,800 and Y's share of it be adjusted into the accounts of X and Z who are going to share future profits in the ratio of 5 : 3.

(f) That the assets and liabilities (except Cash at Bank) were to appear in the Balance Sheet at their ***old figures***.

(g) That the entire capital of the firm as newly constituted be fixed at ₹ 28,000 between X and Z in the proportion of 5 : 3 (actual cash to be brought in or paid off, as the case may be).

Show the Balance Sheet after Y's retirement.

Solution **Balance Sheet of X and Z as at 31st March, 2015**

Liabilities	₹	Assets		₹
Partners' Capital A/cs :		Land and Building		25,000
X (Note 2)	17,500	Plant and Machinery		8,500
Z (Note 2)	10,500	Stock		8,000
Y Loan A/c (Note 2)	19,800	Debtors	5,000	
Creditors	6,900	Less: Provision for Doubtful Debts	100	4,900
		Cash at Bank (Note 4)		8,300
	54,700			54,700

Working Notes :

Dr. **(1) Memorandum Revaluation Account** **Cr.**

Particulars	₹	Particulars	₹
To Stock	480	By Land and Building	5,000
To Provision for Doubtful Debts	150		
To Provision for Legal charges	770		
To Partners' Capital A/cs :			
X (4/9)	1,600		
Y (3/9)	1,200		
Z (2/9)	800		
	5,000		5,000
To Land and Building	5,000	By Stock	480
		By Provision for Doubtful Debts	150
		By Provision for Legal Charges	770
		By Partners' Capital A/cs :	
		X (5/8)	2,250
		Y (3/8)	1,350
	5,000		5,000

Dr. **(2) Partners' Capital Accounts** **Cr.**

Particulars	X (₹)	Y (₹)	Z (₹)	Particulars	X (₹)	Y (₹)	Z (₹)
To Memorandum Revaluation A/c	2,250	—	1,350	By Balance b/d	20,000	15,000	10,000
To Y Capital A/c (Note 3)	1,950	—	1,650	By Memorandum Revaluation A/c	1,600	1,200	800
To Y Loan A/c	—	19,800	—	By X Capital A/c (Note 3)	—	1,950	—
To Balance c/d*	17,500	—	10,500	By Z Capital A/c (Note 3)	—	1,650	—
				By Bank (Cash brought in)	100	—	2,700
	21,700	19,800	13,500		21,700	19,800	13,500

* Total Capital = ₹ 28,000. X's Capital = ₹ 28,000 / 8 × 5 = ₹ 17,500; Z's Capital = ₹ 28,000 / 8 × 3 = ₹ 10,500.

(3) Adjustment for Goodwill

Partners	X (₹)	Y (₹)	Z (₹)
Right of goodwill before retirement (4 : 3 : 2)	4,800	3,600	2,400
Right of goodwill after retirement (5 : 3)	6,750	—	4,050
Gain (+) / Sacrifice (–)	(+) 1,950	(–) 3,600	(+) 1,650

(4) Bank Balance after Retirement

	₹
Opening Balance	5,500
Add: Cash brought in by :	
X	100
Z	2,700
	8,300

Illustration 32

Prakash, Akash and Bikash were partners of a firm sharing profits or losses in the ratio of 4 : 3 : 3. Their Balance Sheet on 31st March, 2014 is as follows :

Liabilities		₹	Assets	₹
Capital Accounts :			Land	2,80,000
Prakash	2,30,000		Building	1,00,000
Akash	1,20,000		Plant and Machinery	1,80,000
Bikash	1,50,000	5,00,000	Furniture	70,000
Reserve		2,05,000	Stock	40,000
Sundry Creditors		50,000	Debtors	30,000
			Advertisement	10,000
			Cash at bank	40,000
			Cash in hand	5,000
		7,55,000		7,55,000

On 31 December, 2014 Akash retired on the basis of following terms :

(i) The goodwill of the firm is to be valued at ₹ 1,25,000.

(ii) Land is to be appreciated by 20%.

(iii) Building, plant and machinery and furniture are to be depreciated by 10%.

(iv) Stock is to be revalued at ₹ 50,000.

(v) 5% provision for doubtful debts is to made on debtors.

(vi) Advertisement is to be written off fully.

(vii) The amount payable to Akash is to be paid in 5 equal instalments with interest at 10% p.a.; the first instalment is being payable on 31 December, 2014.

After Akash's retirement Prakash and Bikash will share profit or loss equally and also make their capital equal. The goodwill cannot be shown in books of accounts of the firm. It's average annual profit for the last five years was ₹ 1,50,000.

You are required to prepare — (a) Revaluation Account; (b) Partners' Capital Accounts; (c) Akash's Loan Account upto 31 December, 2018; and, (d) Balance Sheet of Prakash and Bikash immediately after Akash's retirement.

				By Bikash Capital A/c (Note 1)	—	25,000	—
				By Profit & Loss Suspense A/c	—	33,750	—
				By Bank A/c (Note 3)	—	—	57,475
	3,19,800	2,58,600	2,74,825		3,19,800	2,58,600	2,74,825

(d) Balance Sheet of Prakash and Bikash as at 31st December, 2014

Liabilities	₹	Assets	₹
Capital Accounts :		Land	3,36,000
Prakash	2,49,825	Building	90,000
Bikash	2,49,825	Plant and Machinery	1,62,000
Sundry Creditors	50,000	Furniture	63,000
10% Akash Loan	2,06,880	Stock	50,000

Bank Overdraft (Note 4)	11,720	Debtors	30,000	
		Less: Provision for Doubtful Debts	1,500	28,500
		Cash in hand		5,000
		Profit and Loss Suspense		33,750
	7,68,250			7,68,250

Working Notes : **(1) Adjustment for Goodwill**

Partners	Prakash (₹)	Akash (₹)	Bikash (₹)
Right of goodwill before retirement (4 : 3 : 3)	50,000	37,500	37,500
Right of goodwill after retirement (1 : 1)	62,500	—	62,500
Gain (+) / Sacrifice (–)	(+) 12,500	(–) 37,500	(+) 25,000'

(2) Akash's Share of Current Year's Profit upto 31st December, 2014 :

Total profits for 9 months (1.4.2014 to 31.12.2014) = ₹ 1,50,000 / 12 × 9 = ₹ **1,12,500**.

Akash's Share = ₹ 1,12,500 / 10 × 3 = ₹ **33,750**.

Journal Entry :

Profit and Loss Suspense Account Dr. 33,750

To Akash Capital Account 33,750

(3) The adjusted capital accounts of Prakash and Bikash after Akash's retirement are :

Prakash : ₹ 2,30,000 + ₹ 82,000 + ₹ 7,800 – ₹ 12,500 = ₹ 3,07,300.

Bikash : ₹ 1,50,000 + ₹ 61,500 + ₹ 5,850 – ₹ 25,000 = ₹ 1,92,350.

Therefore, total capital of Prakash and Bikash = ₹ 3,07,300 + ₹ 1,92,350 = ₹ 4,99,650.

Prakash capital : 1/2 of ₹ 4,99,650 = ₹ 2,49,825

Bikash capital : 1/2 of ₹ 4,99,650 = ₹ 2,49,825

Cash to be withdrawn by Prakash = ₹ 3,07,300 – ₹ 2,49,825 = ₹ 57,475.

Cash to be brought in by Bikash = ₹ 2,49,825 – ₹ 1,92,350 = ₹ 57,475.

(5) Amount payable to Akash on 31.12.2003 = 1/5 of ₹ 2,58,600 = ₹ 51,720. At that time, the bank balance was ₹ 40,000 only. It is assumed that the payment was made by availing overdraft facility of the bank. Therefore, bank overdraft = ₹ 51,720 – ₹ 40,000 = ₹ 11,720.

Illustration 33

A, B and C were partners sharing profits and losses in the ratio of 3 : 2 : 1. Their Balance Sheet as on 31.03.2015 stood as follows :

Liabilities	₹	Assets		₹
Sundry Creditors	12,500	Cash at Bank		1,500
General Reserve	18,000	Sundry Debtors	15,000	
Capital A/cs :		Less: Provision for bad debts	1,500	13,500
(A — ₹ 40,000; B — ₹ 21,000; C — ₹ 20,000)	81,000	Stock		12,500
		Joint Life Policy		8,000
		Office Equipments		14,000
		Furniture		12,000
		Building		50,000
	1,11,500			1,11,500

B retired on 1.4.2015 subject to the following conditions :

(i) A typewriter purchased on 1.10.2014 for ₹ 2,000 debited to office expenses account is to be brought into account charging depreciation @ 10% p.a.

(ii) Building revalued at ₹ 75,000. Furniture is to written-down by ₹ 2,000 and stock is reduced to ₹ 10,000.

(iii) Provision for bad debts is to be calculated @ 5% on debtors.

(iv) Goodwill of the firm is to be valued at ₹ 18,000. But no Goodwill Account is to be raised.

(v) Joint Life Policy is to be shown at surrendered value. The surrender value is ₹ 7,500.

(vi) Amount due to B is to be transferred to his Loan Account.

(vii) A and C will share profits and losses in the ratio of 2 : 1 and their capitals are to be adjusted in the profit sharing ratio.

You are required to prepare : Revaluation Account, Partners' Capital Accounts and Balance Sheet immediately after B's retirement.

Solution

In the books of the Firm

Dr. Revaluation Account Cr.

Particulars	₹	Particulars	₹
To Stock A/c	2,500	By Office Equipments A/c (Note 1)	1,900

To Balance c/d (Note 2)	54,067	—	27,033	By C Capital A/c (Note 3)	—	3,000	—
				By Revaluation A/c	11,325	7,550	3,775
				By Bank A/c (Note 2)	—	—	3,258
	60,325	40,550	30,033		60,325	40,550	30,033

Balance Sheet (after B's retirement) as at 1st April, 2015

Liabilities		₹	Assets		₹
Sundry Creditors		12,500	Cash at Bank		1,500
Loan — B		40,550	Debtors	15,000	
Capital :	A	54,067	Less: Provision for bad debts	750	14,250
	C	27,033	Stock		10,000
			Joint Life Policy		7,500
			Office Equipments ₹ (14,000 + 1,900)		15,900
			Furniture		10,000
			Buildings		75,000
		1,34,150			1,34,150

Working Notes :

(1) The typewriter purchased was wrongly debited to office expenses account, but it should have been debited to office equipments account. In effect, depreciation for 6 months (from 1.10.2014 to 31.3.2015) has not been provided. Therefore, ₹ 2,000 – ₹ 100 (depreciation for 6 months) = ₹ 1,900 should be added to Office Equipments Account.

(2) Ascertainment of Required Closing Capital

The adjusted capital accounts of A and C after B's retirement are : A — ₹ (40,000 + 9,000 + 11,325 – 3,000) = ₹ 57,325; C — ₹ (20,000 + 3,000 + 3,775 – 3,000) = ₹ 23,775. Therefore, total capital of A and C is ₹ (57,325 + 23,775) = ₹ 81,100, which will be shared by A and C in the new profit-sharing ratio, i.e., 2 : 1. Therefore, capital of A will be ₹ 81,100 x 2/3 = ₹ 54,067; and, capital of C will be ₹ 81,000 x 1/3 = ₹ 27,033. In effect, A will take away ₹ 3,258 (₹ 57,325 – 54,067) and C will introduce additional capital of the same amount of ₹ 3,258 (₹ 27,033 – 23,775).

(3) Calculation of Share of Goodwill

Partners		A	B	C
Right of goodwill prior to retirement (3 : 2 : 1)	(₹)	9,000	6,000	3,000
Right of goodwill after retirement (2 : 1)	(₹)	12,000	—	6,000
Gain (+) / Sacrifice (–)	(₹)	(+) 3,000	(–) 6,000	(+) 3,000

Illustration 34

A, B and J are partners in a firm sharing profits and losses in the ratio of 2 : 2 : 1 respectively. The Balance Sheet as at 31.12.2014 is as follows :

Liabilities		₹	Assets		₹
Capitals :	A	65,600	Land and Building		72,000
	B	43,700	Machinery		35,500
	J	32,200	Furniture		10,400
Reserve		22,000	Motor Car		18,000
Creditors		18,000	Stock		19,800
			Debtors	23,700	
			Less: Provision for Doubtful Debts	1,500	22,200
			Bank		3,600
		1,81,500			1,81,500

B retires on 31.12.2014 but A and J continue in partnership sharing profits in the ratio of 3 : 2 respectively. The terms of retirement provide the following :

(a) Goodwill is to be valued at 2 years' purchase of the average annual profits of the last 3 years, but it should not be shown in the books. The profits of the last 3 years are :2011 — ₹ 12,100; 2012 — ₹ 8,480; 2013 — ₹ 10,920.

(b) The value of land and building is to be appreciated by 20%. Machinery is to valued at ₹ 32,000 and provision for doubtful debts to be maintained at ₹ 1,800.

(c) A furniture costing ₹ 3,000 purchased on 1.7.2013 but was debited to Purchases Account. This asset is to be taken into account charging depreciation @ 10% p.a. under Straight Line Method.

(d) Annual insurance premium of ₹ 2,400 paid on 1.4.2014 had been entirely charged to Profit and Loss Account.

(e) B will take over the motor car at ₹ 16,000 and a bank loan of ₹ 50,000 is to be arranged for the balance amount payable to him on his retirement.

(f) The capital of the new firm will be readjusted by bringing in or paying off cash so that the capital of A and J be in the new profit sharing ratio.

Prepare Revaluation Account, Capital Accounts of Partners and the Balance Sheet of the new firm.

Solution

In the books of the Firm

Dr. Revaluation Account Cr.

Date	Particulars	₹	Date	Particulars	₹
31.12.2014	To Machinery A/c	3,500	31.12.2014	By Land and Building A/c	14,400

	To Balance c/d	65,334	—	43,556		By A Capital A/c (Goodwill)	—	4,580	—
						By J Capital A/c (Goodwill)	—	4,580	—
						By Bank A/c (Note 3)	—	—	9,186
		79,100	66,360	48,136			79,100	66,360	48,136

Balance Sheet of the new firm as at 31st December, 2014

Liabilities		₹	Assets		₹
Capitals :	A	65,334	Land and Building		86,400
	J	43,556	Machinery		32,000
Bank Loan		50,000	Furniture (₹ 10,400 + 2,550)		12,950
Creditors		18,000	Stock		19,800
			Debtors	23,700	
			Less: Provision for Doubtful Debts	1,800	21,900
			Bank (₹ 3,600 + 50,000 – 50,360)		3,240
			Prepaid Insurance		600
		1,76,890			1,76,890

Working Notes :

(1) Furniture is to be recorded in the books at its written-down value, which is cost less depreciation for 1.5 years (1.7.2013 to 31.12.2014), where cost is ₹ 3,000, accumulated depreciation is @ 10% p.a. on ₹ 3,000 for 1.5 years is ₹ 450. Therefore, W.D.V. of furniture is ₹ 3000 – ₹ 450 = ₹ 2,550.

(2) Calculation of Goodwill

Correct profit for 2013 = Profit (as given) + Purchase of furniture, being treated as purchases – depreciation not charged thereon for 6 months = ₹ (10,920 + 3,000 – 150) = ₹ 13,770.

Average profit for 3 years = ₹ (12,100 + 8,480 + 13,770) / 3 = ₹ 11,450.

Goodwill is 2 years' purchase of average profits = ₹ 11,450 × 2 = ₹ **22,900**.

Calculation of Share of Goodwill

Partners		A	B	J
Right of goodwill prior to retirement (2 : 2 : 1)	(₹)	9,160	9,160	4,580
Right of goodwill after retirement (3 : 2)	(₹)	13,740	—	9,160
Gain (+) / Sacrifice (–)	(₹)	(+) 4,580	(–) 9,160	(+) 4,580

(3) Ascertainment of Required Closing Capital of A and J

The adjusted capital account balances of A and J after B's retirement are :

A — ₹ (65,600 + 8,800 + 4,700 – 4,580) = ₹ 74,520.

J — ₹ (32,200 + 4,400 + 2,350 – 4,580) = ₹ 34,370.

Total capital of A and J is ₹ (74,520 + 34,370) = ₹ 1,08,890, which will be shared in their new profit sharing ratio, i.e., 3 : 2.

Therefore, Capital of A will be = ₹ 1,08,890 × 3 / 5 = ₹ 65,334

Capital of J will be = ₹ 1,08,890 × 2 / 5 = ₹ 43,556

In effect, A will take away ₹ (74,520 – 65,334) = ₹ 9,186.

J will bring in ₹ (43,556 – 34,370) = ₹ 9,186.

Illustration 35

On 31st March, 2015, the Balance Sheet of M/s. A, B and C sharing profits and losses in proportion to their capitals, stood as follows :

Liabilities		₹	Assets	₹
Sundry Creditors		1,00,000	Land and Buildings	2,00,000
Capital A/cs :			Machinery	3,00,000
A	2,00,000		Closing Stock	1,00,000
B	3,00,000		Sundry Debtors	1,00,000
C	2,00,000	7,00,000	Cash and Bank Balances	1,00,000
		8,00,000		8,00,000

On 31st March, 2015, A desired to retire from the firm and the remaining partners decided to carry on. It was agreed to revalue the Assets and Liabilities on that date on the following basis :

(1) Land and Buildings be appreciated by 30%.

(2) Machinery is to be depreciated by 20%.

(3) Closing Stock is to be valued at ₹ 75,000.

(4) Provision for bad debts is to be made at 5%.

(5) Old credit balances of Sundry Creditors ₹ 20,000 is to be written-back.

(6) Joint Life Policy of the partners surrendered and cash obtained ₹ 80,000.

(7) Goodwill of the entire firm be valued at ₹ 1,40,000 and A's share of the Goodwill be adjusted in the accounts of B and C who share the future profits equally. No Goodwill Account being raised.

(8) The capital of the firm is to be the same as before retirement. Individual capital be in their profit sharing ratio.

(9) Amount due to A is to be settled on the following basis : 50% on retirement and the balance 50% within one year.

Prepare Revaluation Account, Capital Accounts of Partners, Cash and Bank Account and Balance Sheet as on 1.4.2015 of M/s. B and C.

Illustration 36

Gold, Silver and Diamond are partners in a firm sharing profits and losses in the ratio of 5 : 3 : 2. Gold retires on 1.4.2015 on which date the Balance Sheet of the firm stood as under :

Liabilities		₹	Assets	₹
Capital Accounts :			Goodwill	10,000
Gold	80,000		Furniture	30,000
Silver	50,000		Office Equipments	25,000
Diamond	40,000	1,70,000	Building	60,000
General Reserve		20,000	Stock	77,000
Sundry Creditors		90,000	Sundry Debtors	75,000
Bills Payable		15,000	Cash	18,000
		2,95,000		2,95,000

It is provided in the Deed of Partnership that in the event of death or retirement of a partner, goodwill is to be valued at 2 years' purchase of the average profits of the last 4 years. The profits for the last 4 years were : 2014-15 : ₹ 30,000; 2013-14 : ₹ 24,000; 2012-13 : ₹ 20,000; 2011-2012 : ₹ 18,000.

Furniture and Building are revalued at ₹ 25,000 and ₹ 75,000 respectively, stock is overvalued by 10%.

It was decided that Gold should be paid ₹ 50,000 immediately on retirement and the balance on his Capital Account is to be treated as a loan to the firm. Silver and Diamond contribute necessary sums in equal proportions for payments to Gold and to leave ₹ 20,000 cash as working capital. Assuming, that above mentioned arrangements are given effect to, you are required to show the Revaluation Account, Cash Account and the Capital Accounts of the partners. Also show the Balance Sheet of the firm after Gold's retirement.

Particulars	₹	Particulars	₹
To Balance b/d	18,000	By Gold Capital A/c	50,000
To Partners' Capital A/cs (Balancing figure)		By Balance c/d	20,000
Silver — ₹ 26,000; Diamond — ₹ 26,000	52,000		
	70,000		70,000

Balance Sheet (after Gold's retirement) as on 1st April, 2015

Liabilities		₹	Assets	₹
Capital A/cs :			Building	75,000
Silver	66,100		Office Equipments	25,000
Diamond	59,400	1,25,500	Furniture	25,000
Gold Loan A/c		59,500	Stock	70,000
Sundry Creditors		90,000	Sundry Debtors	75,000
Bills Payable		15,000	Cash	20,000
		2,90,000		2,90,000

Working Notes :

(1) Calculation of the Value of the Goodwill and its Treatment

Total profit for the last 4 years ₹ (30,000 + 24,000 + 20,000 + 18,000) = ₹ 92,000. Average profit (₹ 92,000 ÷ 4) = ₹ 23,000. Goodwill is 2 years' purchase of the average profits of the last 4 years, i.e., ₹ 23,000 x 2 = ₹ 46,000. Goodwill Account has already been raised at ₹ 10,000. Therefore, before Gold's retirement, Goodwill Account is to be raised further by ₹ 36,000, i.e., ₹ (46,000 – 10,000). Thereafter, goodwill is to be written off in the new profit-sharing ratio, i.e., 3 : 2.

(2) Actual Value of Stock = $\frac{77{,}000}{110} \times 100$ = ₹ 70,000. Therefore, it is overvalued by ₹ 77,000 – 70,000 = ₹ 7,000.

Illustration 37

A, B, C and D were partners in a firm sharing profits and losses in the ratio of 4 : 3 : 2 : 1. The Balance Sheet of the firm as on 31st December, 2014 is given below :

Liabilities	₹	Assets	₹
A's Capital	4,00,000	Land and Building	3,40,000
B's Capital	3,00,000	Plant and Machinery	4,50,000
C's Capital	2,00,000	Furniture and Fittings	1,20,000
D's Capital	1,00,000	Fixed Deposit with Bank	80,000
Reserves	50,000	Stock-in-trade	35,000
Bills Payable	12,000	Sundry Debtors	26,000
Sundry Creditors	8,000	Bills Receivable	10,000
Bank Overdraft	5,000	Cash in Hand	14,000
	10,75,000		10,75,000

On 30th September, 2015, D retired from the firm. The partnership deed of the firm had the following provisions regarding the procedure to be followed in the event of retirement of a partner :

(a) The retiring partner will be entitled to his share of profit in proportion to the number of months he served as a partner in the year of his retirement. The profit of the year immediately preceding the year of his retirement will be taken as the basis for calculating his share of profit.

(b) The retiring partner will be entitled to a share of goodwill on the basis of two years' purchase of the average profit of the three years preceding the year of his retirement. The profits of 2012, 2013 and 2014 were ₹ 66,000, ₹ 87,000 and ₹ 72,000 respectively.

(c) No Goodwill Account will be raised in the books, but the retiring partner's share of goodwill is to be adjusted through the Capital Accounts of the continuing partners.

(d) Reserve, undistributed profit or loss, if any, must be transferred to the Capital Accounts of the partners.

A, B and C decided to share the future profits and losses equally and to maintain a fixed capital of ₹ 2,00,000 each, making necessary addition or withdrawal of cash immediately without affecting the bank overdraft balance. The total amount due to D will remain in the business of the firm as loan, earning 10% interest per annum.

Show the Journal Entries and the Capital Accounts of the partners on the basis of the above mentioned conditions which were duly complied with.

Solution

	To Cash A/c			3,40,000
	(Being excess money withdrawn by the partners to make their capitals equal to ₹ 2,00,000)			

Dr. **Partners' Capital Accounts** **Cr.**

Particulars	A	B	C	D	Particulars	A	B	C	D
To A & D Capital A/c	—	5,000	20,000	—	By Balance b/d	4,00,000	3,00,000	2,00,000	1,00,000
To 10% D Loan A/c	—	—	—	1,25,400	By Reserves A/c	20,000	15,000	10,000	5,000
To Cash A/c (Note 3)	2,30,000	1,10,000	—	—	By P & L Suspense A/c	—	—	—	5,400
To Balance c/d	2,00,000	2,00,000	2,00,000	—	By B & C Capital A/c	10,000	—	—	15,000
					By Cash A/c	—	—	10,000	
	4,30,000	3,15,000	2,20,000	1,25,400		4,30,000	3,15,000	2,20,000	1,25,400

Working Notes :

(1) Profit for the year 2014 is ₹ 72,000. Profit for 9 months will be ₹ 72,000 ÷ 12 x 9 = ₹ 54,000. D will get 1/10 of ₹ 54,000, i.e., ₹ 5,400.

(2) Valuation of Goodwill

Average profit of last three years = $\frac{(66,000 + 87,000 + 72,000)}{3}$ = ₹ 75,000.

Goodwill = ₹ 75,000 x 2 = ₹ 1,50,000.

Adjustment for Goodwill

Particulars	A (₹)	B (₹)	C (₹)	D (₹)
Right of Goodwill before D's retirement (4 : 3 : 2 : 1)	60,000	45,000	30,000	15,000
Right of Goodwill after D's retirement (1 : 1 : 1)	50,000	50,000	50,000	—
Sacrifice (–) / Gain (+)	(–) 10,000	(+) 5,000	(+) 20,000	(–) 15,000

(3) It is assumed that on the date of retirement, i.e., 30th September, 2015 the firm has sufficient cash balance to pay off the excess capital of A and B, though the last Balance Sheet as on 31st December, 2014 does not show sufficient cash.

Illustration 38

X and Y are partners sharing profits equally. It has been agreed that if a partner retires, the other partner, if he desires to carry on the business, shall pay to the retiring partner his share by four equal half yearly instalments, plus interest @ 5% p.a. with half-yearly rests. Goodwill is to be valued on the basis of five years capitalization of the average annual super profits of 3 preceding financial years, fixed assets being revalued for the purpose. The Balance Sheet of the firm as 31.12.2014 is as follows:

Liabilities	₹	Assets	₹
Creditors	9,160	Cash in hand	13,000
Capital — X	22,420	Book debts	10,200
Capital — Y	16,650	Closing stock	5,730
		Building	19,300
	48,230		48,230

Y retires on 1.1.2015 and X decides to carry on the business. The profits for the three years ended on 31.12.2015 were ₹ 13,500 ; ₹ 14,500; and ₹ 14,000.

For the purpose of dissolution, building has been revalued at ₹ 24,800. No interest on capital was charged and partners did not draw any salary.

Show the computation of goodwill; prepare Y's Loan Account. Assume that normal managerial remuneration is ₹ 6,000 p.a. and normal return on capital is 12%.

Illustration 39

A, B and C are partners in a firm sharing profits and losses in the ratio of 5:3:2 respectively. The partnership deed provides that in the event of retirement of any of the partners, the total amount due to him would be settled by an annuity payable to him. On 31st March, 2010, B retires and the total amount payable on account of his share of goodwill, profits and interest was calculated as ₹ 7,000. On the date of retirement, the capital of A, B and C stood at ₹ 20,000; ₹ 13,000 and ₹ 10,000 respectively. As per deed, the amount was commuted into an annuity of ₹ 2,000, which was to be paid on 1st January each year. The 1st instalment was, however paid, on 1st April 2010. On 2nd January 2015 Mr B died. Prepare Annuity Suspense Account assuming that the unpaid portion thereof carried interest @ 10% p.a. (After B's retirement, A & C shared profit and losses in the ratio of 5:3.)

Illustration 40

A, B and C are in partnership sharing profits and losses in the ratio of 3:2:1. The Balance Sheet as on 31.12.2014 is:

Liabilities	₹	Assets		₹
Capital — A	40,000	Machinery at cost	50,000	
Capital — B	60,000	Less: Provision for depreciation	8,000	42,000
Capital — C	20,000	Furniture		1,000
Reserve	30,000	Sundry Debtors	80,000	
Sundry Creditors	60,000	Less: Provision for bad debts	3,000	77,000
		Stock		50,000
		Bank		40,000
	2,10,000			2,10,000

On March 31, 2015, B retired and A and C continued in partnership sharing profits and losses in the ratio of 3:2. It was agreed that the following adjustments were to be made in the Balance Sheet as on March 31, 2015:

(a) The machinery was to be revalued at ₹ 45,000.
(b) The stock was to be reduced by 2%.
(c) The provision for doubtful debts would be ₹ 4,000.
(d) The furniture was to be reduced to ₹ 600.
(e) A provision of ₹ 300 was to be made for outstanding expenses.

The Partnership Agreement provided that on the retirement of a partner, goodwill was to be valued at ₹ 24,000 and B's share of the same was to be adjusted into the accounts of A and C. The profits up to the date of retirement were estimated at ₹ 18,000. B was to be paid off in full. A and C were to bring such an amount in cash so as to make their capitals in proportion to the new profit-sharing ratio, subject to the condition that a cash balance of ₹ 20,000 was to be maintained as working capital. Prepare necessary Journal entries to give effect to the above arrangements and prepare the Partners' Capital Accounts as on 31.3.2015. Also prepare the Balance Sheet as on that date.

Less: Existing cash balance	40,000
Cash to be brought in by A and C	64,100
Adjusted capital of A ₹ (40,000 + 150 + 15,000 — 2,400 — 1,800)	50,950
Adjusted capital of C ₹ (20,000 + 50 + 5,000 — 5,600 — 4,200)	15,250
Cash to be brought in by A and C (as ascertained)	64,100
Total combined capital of A and C	1,30,300
The combined capital of A and C will be shared in the ratio 3 : 2; Therefore,	
Closing capital of A will be (3/5 of ₹ 1,30,300)	78,180
Closing capital of C will be (2/5 of ₹ 1,30,300)	52,120
Cash to be brought in by A ₹ (78,180 — 50,950)	27,230
Cash to be brought in by C ₹ (52,120 — 15,250)	36,870
Total cash to be brought in by A and C (checked)	64,100

Dr. **Bank Account** **Cr.**

Particulars	₹	Particulars	₹
To Balance b/d	40,000	By B Capital A/c	84,100
To A Capital A/c	27,230	By Balance c/d	20,000
To C Capital A/c	36,870		
	1,04,100		1,04,100

Illustration 41

A, B and C are equal partners. C retires on 31.3.2015. The Balance Sheet of the firm as on 31.12.2014 stood as follows:

Liabilities		₹	Assets		₹
Creditors		12,900	Cash in hand		1,000
Contingency Reserve		4,000	Cash at bank		4,000
Investment Fluctuation Fund		1,200	Debtors	10,000	
Partners' Capitals:	₹		Less: Provision for bad debts	800	9,200
A	30,000		Stock		10,000
B	20,000		Investments (cost)		5,000
C	20,000	70,000	Land and Buildings		40,000
			Goodwill		18,900
		88,100			88,100

In order to arrive at the balance due to C, it was mutually agreed that:

1. Land and Buildings be valued at ₹ 50,000; 2. Investment Fluctuation Fund be brought to ₹ 500; 3. Debtors are all good; 4. Stock be taken at ₹ 9,400; 5. Goodwill be valued at one year's purchase of the average profits of the past five years; 6. C's share of profit to the date of retirement be calculated on the basis of average profit of the preceding three years.

The profits for the preceding five years were as under: 2010 ₹ 11,500; 2011 ₹ 14,000; 2012 ₹ 9,000; 2013 ₹ 8,000; 2014 ₹ 10,000.

Required: Journal entries, C's Capital Account and the revised Balance Sheet (show your workings).

				By B Capital A/c – contingency reserve	667
				By A Capital A/c – profit	375
				By B Capital A/c – profit	375
		25,717			25,717

Balance Sheet as on 31st March, 2015 (revised)

Liabilities	₹	Assets	₹
Creditors	12,900	Cash in hand	1,000
Contingency Reserve	4,000	Cash at bank	4,000
Investment Fluctuation Fund	500	Debtors	10,000
C Loan Account	22,917	Stock	9,400
Partners' Capitals:		Investments	5,000
A ₹ (30,000 + 3,634 – 667 – 2,800 – 375)	29,792	Land and Buildings	50,000
B ₹ (20,000 + 3,633 – 667 – 2,800 – 375)	19,791	Goodwill	10,500
	89,900		89,900

Working Notes: (1) Statement Showing the Required Adjustment for Contingency Reserve:

Partners		A	C	B
Right of contingency reserve prior to retirement (1 : 1 : 1)	(₹)	1,333	1,334	1,333
Right of contingency reserve after retirement (1 : 1)	(₹)	2,000	—	2,000
Partners to be debited (+) / credited (–)	(₹)	(+) 667	(–) 1,334	(+) 667

(2) Ascertainment of Goodwill

Total profit for the last 5 years — ₹ (11,500 + 14,000 + 9,000 + 8,000 + 10,000) = ₹ 52,500.

Average profit — ₹ 52,500 / 5 = ₹ 10,500.

Goodwill is one years' purchase of average profits of the past five years, i.e., ₹ 10,500 x 1 = ₹ 10,500.

Therefore, reduction in the value of goodwill = ₹ 18,900 – ₹ 10,500 = ₹ 8,400.

(3) Ascertainment of C's Share of Profit from 1.1.2015 to 31.3.2015

Total profit for the last 3 years — ₹ (9,000 + 8,000 + 10,000) = ₹ 27,000.

Average profit — ₹ 27,000 / 3 = ₹ 9,000.

Average profit for the 3 months, i.e., (1.1.2015 to 31.3.2015) — ₹ 9,000 × 3/12 = ₹ 2,250.

Therefore, C's share of profit — ₹ 2,250 / 3 = ₹ 750.

Illustration 42

X, Y and Z were in partnership sharing profits and losses as one- half, one-fourth and one-fourth respectively. It was agreed that interest should be allowed @10% p.a. on Partners' Capital Accounts and charged @ 8% p.a. on their drawings.

No interest was to be allowed or charged on current accouts. The following are the particulars of their Capital Accounts, Current Accounts and drawings (as shown by the draft accounts):

		Capital Accounts balance on 1.1.2014	Current Account balance on 1.1.2014	Drawings for the year to 31.12.2014	Interest on Drawings
X	(₹)	1,50,000 (Cr.)	20,000 (Cr.)	30,000	2,000
Y	(₹)	80,000 (Cr.)	10,000 (Cr.)	20,000	760
Z	(₹)	60,000 (Cr.)	10,000 (Dr.)	20,000	1,400

The draft accounts for the year to 31st December 2014 showed a net profit of ₹ 1,20,000 before taking into account interest on Partners' Capital Accounts balances and drawings. The audit of the draft accounts revealed the following errors:

1. The rent of X's private house, amounting to ₹ 1,500 and paid on 31st December, 2014, had been included in rents charged in Profit and Loss Account.
2. Repairs amounting to ₹ 20,000 had been treated as additions to machinery, depreciation on which had been charged @ 20%.
3. The premium, amounting to ₹ 6,000, on Y's life insurance policy, and paid on 30th June, 2014 had been included on insurance charges in the Profit and Loss Account.

Z retired from the partnership on 31st December 2014, and agreed to leave the amount due to him from the firm as a loan repayable by agreed instalments. X and Y agreed to continue in partnership sharing profits and losses as two-third and one-third. In ascertaining the amount due to Z from the firm and for the purposes of the new partnership, it was agreed to make the following adjustments :

1. Goodwill to be valued at ₹ 1,44,000, but no account for goodwill to be raised in the books.
2. The value of freehold premises to be increased by ₹ 40,000.
3. The provision for bad debts to be increased by ₹ 12,000.

You are required to prepare:

(a) the Profit and Loss Appropriation Account for the year ended 31st December, 2014, making all the necessary adjustments for the errors revealed, and

(b) Partners' Capital and Current Accounts (in columnar form) for the year ended 31st December 2014, incorporating the adjustments on Z's retirement.

Solution

Working Notes :

(1) Ascertainment of Net Profit

Particulars	₹
Net profit as per Draft Accounts	1,20,000
Add: Rent of X wrongly charged to Profit & Loss A/c	1,500
Add: Depreciation wrongly debited in Profit & Loss A/c	4,000
Add: Premium on Y's Life insurance policy wrongly charged in Profit & Loss A/c	6,000
	1,31,500
Less: Repairs wrongly capitalised	20,000
Net profit	1,11,500

(2) Adjustment in Regard to Goodwill

Partners		X	Y	Z
Right of goodwill prior to Z's retirement (2 : 1 : 1)	(₹)	72,000	36,000	36,000
Right of goodwill after Z's retirement (2 : 1)	(₹)	96,000	48,000	—

Unsettled Accounts of A Retiring Partner

As per the provision of Section 37 of the Indian Partnership Act —

"Where any member of a firm has died or otherwise ceased to be a partner, and the surviving or continuing partners carry on the business of the firm with the property of the firm without any final settlement of accounts as between them and the outgoing partner or his estate, then, in the absence of a contract to the contrary, the outgoing partner or his estate is entitled at the option of himself or his representatives to such share of the profits made since he ceased to be a partner as may be attributable to the use of his share of the property of the firm or to interest at the rate of six per cent per annum on the amount of his share in the property of the firm."

Illustration 43

A, B and C were carrying on business in partnership sharing profit and losses equally. On June 30, 2015, C retired from the firm and A and B agreed to share profits and losses in the ratio of 3:2. C continued his association with the firm as an adviser. The parties agreed that from July 1, 2015:

1. C was to be credited with a retainership fee of ₹ 2,000 p.m. while he remained the adviser.
2. The partners decided to bring into the accounts of the firm the various assets which up to now were unrecorded. The various assets on June 30, 2015 were: goodwill ₹ 60,000; office equipment ₹ 18,000; library books ₹ 3,000.
3. The values of the office equipment and library books were to be retained in the books but goodwill was not to be recorded as a permanent asset.
4. C's Capital Account was to bear the whole cost of ₹ 10,000, a payment on March 30, 2015, for providing an annuity for a long-service employee who retired on that date.

The firm's profit for the year ended September 30,2015, which is deemed to have accrued evenly, amounted to ₹ 90,000, after deduction of the cost of the pension but before adjusting for any of the events listed above. Other relevant figures are: Credit balances on Capital Accounts (1.10.2014) : A — ₹ 45,000; B — ₹ 35,000; and, C — ₹ 55,000

Drawings during the year ended 30.9.2015 : A — ₹ 7,000; B — ₹ 9,000; and, C — ₹ 6,000

All entries relevant to partners' entitlements are effected in their Capital Accounts. You are required to write up, in columnar from, the Capital Accounts of A, B and C for the year ended September 30, 2015, transferring the balance in C's Capital Account to C's Loan Account.

Solution

Dr. **Partners' Capital Accounts** **Cr.**

Particulars	A	B	C	Particulars	A	B	C
To Goodwill A/c	36,000	24,000	—	By Balance b/d	45,000	35,000	55,000
To Profit & Loss A/c (annuity)	—	—	10,000	By Goodwill A/c	20,000	20,000	20,000
To Drawings A/c	7,000	9,000	6,000	By Revaluation A/c	7,000	7,000	7,000

To Balance c/d	61,398	58,932	—	By Retainership Fees A/c	—	—	6,000
				By Profit & Loss A/c (Note 3) (after 30th June)	7,398	4,932	6,670
	1,04,398	91,932	1,19,670		1,04,398	91,932	1,19,670

Working Notes :

Dr. **(1) Profit and Loss Appropriation Account (upto 30th June, 2015)** **Cr.**

Particulars	₹	Particulars	₹
To Partners' Capital A/cs: (A — 25,000; B — 25,000; C — 25,000)	75,000	By Adjusted Net profit (₹ 90,000 + 10,000) x 9/12	75,000
	75,000		75,000

Dr. (2) Profit and Loss Appropriation Account (1st July to 30th September, 2015) Cr.

Particulars	₹	Particulars	₹
To Retainership fees A/c	6,000	By Adjusted Net profit	
To C share of Profit (as per Sec 37) (Note 3)	6,670	(₹ 90,000 + 10,000) x 3/12	25,000
To Partners' Capital A/cs:			
(A — ₹ 7,398; B — ₹ 4,932)	12,330		
	25,000		25,000

(3) Calculation of C's Share of Profit After Retirement

Partners	A	B	C
Opening capital (1.10.2014)	45,000	35,000	55,000
Add: Goodwill	20,000	20,000	20,000
Revaluation Profit (₹ 18,000 + 3,000)	7,000	7,000	7,000
	72,000	62,000	82,000
Less: Proportionate drawing (except C)	5,250	6,750	6,000
	66,750	55,250	76,000
Less: Annuity	—	—	10,000
Capital as on 30.6.2015	66,750	55,250	66,000

C share of profit = 19,000 x (66,000/1,88,000) = ₹ 6,670. Interest @ 6% p.a. = ₹ 990.
C will get higher of the two, i.e., ₹ 6,670

Admission cum Retirement

Illustration 44

A, B and C were partners, sharing profits in the ratio of 3 : 2 : 1. On 1.1.2015, B retired and D is admitted to the partnership, bringing in an amount of capital equal to a third of the new partnership's net assets.

The Balance Sheet of A, B and C as on 1.1.2015 was as under :

Liabilities		₹	Assets		₹
Capitals :	A	11,25,000	*Fixed Assets* :		
	B	7,50,000	Building		8,40,000
	C	3,75,000	*Current Assets* :		
			Stock		15,00,000
Current Liabilities :			Debtors	6,00,000	
Creditors		10,50,000	Less: Provision for Doubtful Debts	60,000	5,40,000
			Bank		4,20,000
		33,00,000			33,00,000

The terms of the changes to the partnership were as follows :

1. Goodwill was valued at ₹ 3,00,000.
2. Stock was written-down by ₹ 60,000.
3. Provision for doubtful debts was to be reduced to 5%.
4. D brought in equipments worth ₹ 3,45,000 and the balance by cheque.
5. The amount due to B was paid by cheque.
6. The new profit sharing ratio was to be equal.

Prepare necessary Ledger Accounts and the Balance Sheet of the new firm.

Solution

In the books of the Firm

Dr. Revaluation Account Cr.

To Bank A/c	—	8,40,000	—	—	By Equipment A/c	—	—	—	3,45,000
To Balance c/d (Note 1)	11,60,000	—	3,20,000	7,40,000	By Bank A/c (Balancing figure)	—	—	—	4,95,000
	12,75,000	8,50,000	4,25,000	8,40,000		12,75,000	8,50,000	4,25,000	8,40,000

Dr. **Bank Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Balance b/d	4,20,000		By B Capital A/c	8,40,000
	To D Capital A/c	4,95,000		By Balance c/d	75,000
		9,15,000			9,15,000

Balance Sheet of the New Firm

Liabilities		₹	Assets		₹
Capitals :	A	11,60,000	**Fixed Assets** :		
	C	3,20,000	Building		8,40,000
	D	7,40,000	Equipments		3,45,000
Current Liabilities :			**Current Assets** :		
Creditors		10,50,000	Stock		14,40,000
			Debtors	6,00,000	
			Less: Provision for Doubtful Debts	30,000	5,70,000
			Bank		75,000
		32,70,000			32,70,000

Working Note :

(1) D is to bring in an amount of capital equal to a third of the new partnership's net assets. This means his capital balance is to be 1/2 of the combined adjusted capital of A and C, i.e., 1/2 of ₹ (11,60,000 + 3,20,000) = ₹ 7,40,000.

Illustration 45

Dowell & Co. is a partnership firm with partners A, B and C, sharing profits and losses in the ratio of 10 : 6 : 4. The Balance Sheet of the firm as on 31st March, 2015 is as under :

Liabilities			₹	Assets	₹
Capitals :	A	80,000		Land	10,000
	B	20,000		Buildings	2,00,000
	C	30,000	1,30,000	Plant and Machinery	1,30,000
Reserves (Unappropriated profit)			20,000	Furniture	43,000
Long-term Debt			3,00,000	Investments	12,000
Bank overdraft			44,000	Stock	1,30,000
Trade creditors			1,70,000	Debtors	1,39,000
			6,64,000		6,64,000

It was mutually agreed that B will retire from partnership and in his place D will be admitted as a partner with effect from 1st April, 2015. For this purpose, the following adjustments are to be made :

(i) Goodwill is to be valued at ₹ 1,00,000 but the same will not appear as an asset in the books of the reconstituted firm.

(ii) Buildings, Plant and Machinery are to be depreciated by 5% and 20% respectively. Investments are to be taken over by the retiring partner at ₹ 15,000. Provision of 20% is to be made on debtors to cover doubtful debts.

(iii) In the reconstituted firm, the total capital will be ₹ 2,00,000 which will be contributed by A, C and D in their new profit-sharing ratio, which is 2 : 2 : 1.

(iv) The surplus funds, if any, will be used for repaying the bank overdraft.

(v) The amount due to the retiring partner shall be transferred to his Loan Account.

You are to prepare : (a) Revaluation Account; (b) Partners' Capital Accounts; (c) Bank Account; and, (d) Balance Sheet of the reconstituted firm as on 1st April, 2015. ***[C.A. (Foundation) —Adapted]***

A, B and C are in partnership sharing profits and losses equally. On 31.12.2014, the firm's Balance Sheet was as follows:

Liabilities			₹	Assets	₹
Capital :	A	40,000		Sundry Assets	88,000
	B	30,000		Cash	10,000
	C	20,000	90,000		
Sundry Creditors			8,000		
			98,000		98,000

On that date C decided to retire. The value of goodwill (which does not appear in the above Balance Sheet) was agreed to be ₹ 12,000. Sundry assets were taken to have increased in value by ₹ 24,000 on revaluation.

Draw up the re-adjusted Balance Sheet showing the amount due to C.

On C's retirement, D comes in as a partner. He pays no premium but brings ₹ 18,000 in cash as capital. Profits and Losses are now to be shared by A, B and D in the ratio of 3 : 3 : 2.

Draw up the Balance Sheet on D's admission after restoring the sundry assets to their original value and wiping out goodwill.

Solution **Balance Sheet after C's Retirement**

Liabilities			₹	Assets	₹
Capital : (Note 1)	A	46,000		Sundry Assets ₹ (88,000 + 24,000)	1,12,000

A, B and C are in partnership, sharing profits in the ratio of 3 : 2 : 1 and preparing their accounts to 30th June each year. At 1.7.2014, their capital accounts showed the following balances :

A — ₹ 3,35,000; B — ₹ 2,80,000; C — ₹ 3,10,000.

On 31.12.2014, A retired and D is admitted into the partnership. He introduced ₹ 2,00,000 as capital and also paid ₹ 1,50,000 as premium for goodwill. The new profit sharing ratio among B, C and D became 2 : 1 : 1 respectively.

The following adjustments are required to arrive at the amount due to A :

(1) The value of goodwill was agreed to be worth ₹ 6,00,000.

(2) Fixed assets are to be revalued upwards by ₹ 3,00,000.

(3) The net profit for the year ended 30.6.2015 was ₹ 4,00,000 (agreed to accrue evenly) before allowing for the following —

(a) Bad debts of ₹ 50,000 relating to the first half to be written-off;

(b) A left the amount due to him as a loan and received interest @ 10% p.a. for the half year ended 30.6.2015. The interest was paid to him on 30.6.2015.

Partners' drawings during the year were :

A ₹ 60,000 (all before 31st December); B ₹ 60,000 (₹ 30,000 in each half year)

C ₹ 40,000 (₹ 20,000 in each half year); D ₹ 25,000 (all after 31st December).

Prepare Profit and Loss Appropriation Account for the year ended 30.6.2015 and the Partners' Capital Accounts.

Solution

Dr. Profit and Loss Appropriation Account for the year ended 30th June, 2015 Cr.

Adjusted Profit for Distribution		1,50,000	1,60,000

Illustration 48

A, B and C are in partnership, compiling their accounts to 30th September each year and sharing profits in the ratio of 3 : 2 : 1. The summarised partnership Balance Sheet at 30th September, 2014 is shown below :

Liabilities		₹	Assets	₹
Capitals :	A	6,00,000	Sundry Net Assets	16,00,000
	B	6,00,000		
	C	4,00,000		
		16,00,000		16,00,000

In the year ended 30th September 2015, the following events took place :

(1) On 31.3.2015, A retired. In settling the amount due to him, goodwill was valued at ₹ 6,00,000, and a plot of land owned by the partnership was revalued upwards by ₹ 1,20,000. The balance due to A remained in the partnership as a loan, carrying no interest.
B and C continued the partnership business from 1.4.2015, sharing profits in the ratio of 2 : 1.

(2) On 1.7.2015, D joined the partnership and from this date the profit sharing ratio became 2 : 1 : 1.
D brought in ₹ 3,00,000 as capital, plus a further ₹ 1,50,000 for a one quarter share of the goodwill valued at this date at ₹ 6,00,000.

The total profit for the year ended 30.9.2015 was ₹ 6,00,000. The following basis of allocating the profit was agreed:

(a) A bad debt of ₹ 30,000 charged in arriving at the profit of ₹ 6,00,000 should be related to the six months ended 31.3.2015.

(b) Apart from the above adjustment, the profit should be divided —
6 months ended 31.3.2015 — 60%,
3 months ended 30.6.2015 — 20%,
3 months ended 30.9.2015 — 20%.

The partners' drawings for the year were (all figures in ₹) :

Partners	A	B	C	D
6 months ended 31.3.2015	50,000	40,000	30,000	—
3 months ended 30.6.2015	—	30,000	30,000	—
3 months ended 30.9.2015	—	40,000	30,000	25,000

You are required to prepare a Profit and Loss Appropriation Account for the year ended 30.9.2015. Also prepare the Partners' Capital Accounts.

Solution

Dr. Profit and Loss Appropriation Account for the year ended 30th September, 2015 Cr.

Particulars		1.10.2014 to 31.3.2015	1.4.2015 to 30.6.2015	1.7.2015 to 30.9.2015	Particulars	1.10.2014 to 31.3.2015	1.4.2015 to 30.6.2015	1.7.2015 to 30.9.2015

Working Note :

(1) Profit before charging bad debts = ₹ (6,00,000 + 30,000) = ₹ 6,30,000. This profit is to be allocated in different periods in the given ratio and, thereafter, bad debt is to be deducted as under (all figures in rupees) :

Particulars	1.10.2014 to 31.3.2015	1.4.2015 to 30.6.2015	1.7.2015 to 30.9.2015
Profit of ₹ 6,30,000 shared in the ratio — 6 : 2 : 2	3,78,000	1,26,000	1,26,000
Less : Bad Debts	30,000	—	—
Adjusted Profit for Distribution	3,48,000	1,26,000	1,26,000

Illustration 49

Ram, Rahim and Robert are partners, sharing profits and losses in the ratio of 5 : 3 : 2. It was decided that Robert would retire on 31.3.2015 and in his place Richard would be admitted as a partner with new profit sharing ratio between Ram, Rahim and Richard at 3 : 2 : 1.

Balance Sheet of Ram, Rahim and Robert as at 31.3.2015

Liabilities	₹	Assets	₹
Capital Accounts :		Cash in Hand	20,000
Ram	1,00,000	Cash at Bank	1,00,000
Rahim	1,50,000	Sundry Debtors	5,00,000
Robert	2,00,000	Stock in Trade	2,00,000
General Reserve	2,00,000	Plant and Machinery	3,00,000
Sundry Creditors	8,00,000	Land and Building	5,30,000
Loan from Richard	2,00,000		
	16,50,000		16,50,000

Retirement of Robert and admission of Richard is on the following terms :

(a) Plant and Machinery to be depreciated by ₹ 30,000.

(b) Land and Building to be valued at ₹ 6,00,000.
(c) Stock to be valued at 95% of book value.
(d) Provision for doubtful debts @ 10% to be provided on debtors.
(e) General Reserve to be apportioned amongst Ram, Rahim and Robert.
(f) The firm's goodwill to be valued at 2 years purchase of the average profits of the last 3 years.
The relevant figures are :
Year ended 31.3.2012 — Profit ₹ 50,000;
Year ended 31.3.2013 — Profit ₹ 60,000;
Year ended 31.3.2014 — Profit ₹ 55,000.
(g) Out of the amount due to Robert ₹ 2,00,000 would be retained as loan by the firm and the balance will be settled immediately.
(h) Richard's capital should be equal to 50% of the combined capital of Ram and Rahim.

Prepare : (i) Capital Accounts of the Partners; and (ii) Balance Sheet of the reconstituted firm.

Solution

In the books of the Firm

					By Bank A/c (Note 3)	—	—	—	13.5
	245	237	—	213.50		245	237	—	213.50

Ram, Rahim and Richard
Balance Sheet of A and C as at . . .

Liabilities	₹	Assets		₹
Capital Accounts :		Land and Building		6,00,000
Ram	1,90,000	Plant and Machinery		2,70,000
Rahim	2,00,333	Stock-in-trade		1,90,000
Richard	1,95,167	Sundry Debtors	5,00,000	
Sundry Creditors	8,00,000	Less: Provision for Doubtful Debts	50,000	4,50,000
Robert's Loan	2,00,000	Cash at Bank (Note 4)		55,500
		Cash in Hand		20,000
	15,85,500			15,85,000

Working Notes :

Dr. (1) Revaluation Account Cr.

Date	Particulars	₹	Date	Particulars	₹
	To Plant and Machinery A/c	30,000		By Land and Building A/c	70,000
	To Stock-in-trade	10,000		By Partners' Capital A/cs :	
	To Provision for Doubtful Debts	50,000		Ram (5/10)	10,000
				Rahim (3/10)	6,000
				Robert (2/10)	4,000
		90,000			90,000

(2) Calculation of Value of Goodwill :

Total profits of last 3 years : ₹ (60,000 + 50,000 + 55,000) = ₹ 1,65,000.
Average profit = ₹ 1,65,000 / 3 = ₹ 55,000.
Goodwill = 2 years' purchase of average profit = 2 × ₹ 55,000 = ₹ 1,10,000.

(3) Combined Capital of Ram and Rahim

	₹
Ram : ₹ (2,45,000 – 55,000)	1,90,000
Rahim : ₹ (2,37,000 – 33,667)	2,00,333
	3,90,333
Richard's Capital (50% of ₹ 3,90,333)	1,95,167
Cash to be brought in : ₹ (2,00,000 – 18,333 – 1,95,167)	13,500

Dr. **Bank Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Balance b/d	1,00,000		By Robert's Capital (paid off)	58,000
	To Richard's Capital (Brought in)	13,500		By Balance c/d	55,500
		1,13,500			1,13,500

Illustration 50

A and B are equal partners. A by agreement, retires and C joins the firm on the basis of one third share of profits on 1.1.2015. The balance of the books as on 31.12.2014 were :

Dr. Cr.

Fixed Assets — at cost	1,30,000	Sundry Creditors	20,000
Stock	60,000	Provision for depreciation	12,000
Sundry Debtors	40,000	Capital Accounts	
Bank balance	8,000	A	1,04,000
		B	1,02,000
	2,38,000		2,38,000

Fixed Assets are valued at ₹ 1,40,000 and it was agreed to be written-up accordingly before admission of C as partner. Sufficient money is to be introduced so as to enable A to be paid off and leave ₹ 5,000 cash at bank; B and C are to provide such sum as to make their capitals proportionate to their share of profit. Assuming the agreement was carried out, show the Journal entries required and prepare the Balance Sheet after admission of C. (All workings should form part of your answer).

Solution **In the books of the Firm**

Journal **Dr.** **Cr.**

Date	Particulars		₹	₹
2015	Fixed Assets A/c (Note 1)	Dr.	22,000	
Jan. 1	To Revaluation A/c			22,000
	(Being the value of fixed assets increased)			
	Revaluation A/c	Dr.	22,000	
	To A Capital A/c			11,000
	To B Capital A/c			11,000
	(Being profit on revaluation transferred to Partners' Capital Accounts in the profit-sharing ratio)			
	Bank A/c	Dr.	1,12,000	
	To B Capital A/c (Note 3)			37,000
	To C Capital A/c (Note 3)			75,000
	(Being the amount brought in cash by B & C to make their capital ₹ 1,70,000 & ₹ 85,000 respectively)			
	A Capital A/c	Dr.	1,15,000	
	To Bank A/c			1,15,000
	(Being the amount due to A paid off)			

Balance Sheet of B & C as at 1st January, 2015

Liabilities	₹	Assets		₹
Capital A/cs :		Fixed Assets	1,52,000	
B	1,50,000	Less: Provision for Depreciation	12,000	1,40,000
C	75,000	Stock		60,000
Sundry Creditors	20,000	Sundry Debtors		40,000
		Cash at bank		5,000
	2,45,000			2,45,000

Working Notes :

(1) AS—10 Para 29 states that 'When a fixed asset is revalued upwards, any accumulated depreciation existing at the date of the revaluation should not be credited to Profit and Loss Statement'. It means that at the time of upward revaluation of fixed asset, accumulated / provision for depreciation will remain the same. Only the cost of the fixed asset will be revised upwards.

In this problem, fixed asset is ₹ 1,30,000 (at cost) and provision for depreciation is ₹ 12,000. Therefore, net book value is ₹ 1,18,000 (₹ 1,30,000 – ₹ 12,000). But it has been revalued at ₹ 1,40,000. Therefore, cost of the fixed asset will be increased by ₹ 22,000 (₹ 1,40,000 – ₹ 1,18,000). In the Balance Sheet the cost of fixed asset will be (₹ 1,30,000 + ₹ 22,000) = ₹ 1,52,000 ***less*** provision for depreciation ₹ 12,000. Net book value = ₹ 1,52,000 – ₹ 12,000 = ₹ 1,40,000.

(2) For calculating capital of B and C in the new firm, a projected Balance Sheet is to be prepared :

Projected Balance Sheet

Liabilities	₹	Assets	₹
Sundry Creditors	20,000	Fixed Assets	1,40,000
Combined capital of B & C (balancing figure)	2,25,000	Stock	60,000
		Sundry Debtors	40,000
		Cash at bank	5,000
	2,45,000		2,45,000

B's share of capital: 2/3 of ₹ 2,25,000 = ₹ 1,50,000; C's share of capital: 1/3 of ₹ 2,25,000 = ₹ 75,000.

Dr. **(3) Partners' Capital Accounts** **Cr.**

Particulars	A	B	C	Particulars	A	B	C
To Bank A/c	1,15,000	—	—	By Balance b/d	1,04,000	1,02,000	—
To Balance c/d	—	1,50,000	75,000	By Revaluation A/c	11,000	11,000	—
				By Bank A/c (balancing figure)	—	37,000	75,000
	1,15,000	1,50,000	75,000		1,15,000	1,50,000	75,000

Dr. **(4) Bank Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Balance b/d	8,000		By A Capital A/c	1,15,000
	To B Capital A/c	37,000		By Balance c/d	5,000
	To C Capital A/c	75,000			
		1,20,000			1,20,000

Illustration 51

Dosi and Desai are in partnership as equal partners. Dosi, by agreement, retires and his son Dinesh joins the firm on the basis that he would get 1/3rd share of the profits. The balances in the books of M/s Dosi and Desai were:

Particulars	Dr. (₹)	Particulars	Cr. (₹)
Bank	8,000	Capital Accounts:	
Debtors	15,000	Dosi	23,000
Stock	26,000	Desai	20,000
		Creditors	6,000
	49,000		49,000

Goodwill is agreed at ₹ 30,000 and it is to be adjusted through Partners' Capital Accounts. Sufficient money is to be introduced so as to enable Dosi to be paid off and leave ₹ 4,000 in the bank; Desai and Dinesh are to provide such sum as to make their capitals proportionate to their shares of profit. Dosi agreed to contribute from his capital half of the amount Dinesh has to provide. Assuming the agreement was carried out, show the Journal entries and prepare the Balance Sheet of the firm of M/s Desai and Dinesh.

Solution **In the books of M/s Desai and Dinesh**

Journal **Dr.** **Cr.**

Date	Particulars		₹	₹
	Desai Capital A/c	Dr.	5,000	
	Dinesh Capital A/c	Dr.	10,000	
	To Dosi Capital A/c			15,000
	(Being the necessary adjustment for goodwill)			
	Bank A/c	Dr.	11,500	
	Dosi Capital A/c	Dr.	11,500	
	To Dinesh Capital A/c			23,000
	(Being 1/2 of the amount, contributed by Dosi, transferred to Dinesh Capital Account — the balance 1/2 brought in by him in cash)			
	Bank A/c	Dr.	11,000	
	To Desai Capital A/c			11,000
	(Being the required amount brought in by Desai to make his capital proportionate to his share of profit)			
	Dosi Capital A/c	Dr.	26,500	
	To Bank A/c			26,500
	(Being the amount due to Dosi paid off)			

Balance Sheet of M/s Desai and Dinesh as at ...

Liabilities	₹	Assets	₹
Capital Accounts :		Stock	26,000
Desai	26,000	Debtors	15,000
Dinesh	13,000	Bank	4,000
Creditors	6,000		
	45,000		45,000

Working Notes : (1) For calculating the required capital of Desai and Dinesh in the new firm, a projected Balance Sheet is to be prepared:

Projected Balance Sheet

Liabilities	₹	Assets	₹
Creditors	6,000	Stock	26,000
Combined Capital of Desai & Dinesh (balancing figure)	39,000	Debtors	15,000
		Bank	4,000
	45,000		45,000

Desai's share of capital 2/3 of ₹ 39,000 = ₹ 26,000; Dinesh's share of capital 1/3 of ₹ 39,000 = ₹ 13,000;

Total amount to be brought in by Dinesh = ₹ 13,000 Capital + ₹ 10,000 Premium for Goodwill = ₹ 23,000. 1/2 of this amount is to be given to him by Dosi and the balance is to be brought in by him in cash = ₹ 11,500.

Dr. (2) Partners' Capital Accounts Cr.

Particulars	Dosi	Desai	Dinesh	Particulars	Dosi	Desai	Dinesh
To Dinesh Capital A/c	11,500	—	—	By Balance b/d	23,000	20,000	—
To Dosi Capital A/c	—	5,000	10,000	By Desai Capital A/c	5,000	—	—
To Bank A/c	26,500	—	—	By Dinesh Capital A/c	10,000	—	—
To Balance c/d	—	26,000	13,000	By Bank A/c		11,000	11,500
				By Dosi Capital A/c	—	—	11,500
	38,000	31,000	23,000		38,000	31,000	23,000

(3) Adjustment in Regard to Goodwill

Partners		Dosi	Desai	Dinesh
Right of goodwill prior to retirement (1 : 1)	₹	15,000	15,000	—
Right of goodwill after retirement (2 : 1)	₹	—	20,000	10,000
Gain (+) / Sacrifice (–)	₹	(–) 15,000	(+) 5,000	(+) 10,000

Key Points

- According to Sec. 32(1) of the Indian Partnership Act, a partner can retire in the following three ways :
  (i) with the consent of all the other partners (such consent may be expressed or implied)
  (ii) in accordance with an express agreement by the partners; and
  (iii) where the partnership is at will, by giving notice in writing to all the other partners of his intention to retire.
- The effects of the above provision of AS—10 in Partnership Accounts are the following :
  1. Only purchased goodwill to be recorded in the books of accounts.
  2. Non-purchased goodwill (internally generated goodwill) will be adjusted through Partners' Capital Accounts. In, effect this goodwill cannot be shown in the Partnership Balance Sheet.
- The ratio in which the remaining partners are acquiring the share of the retiring partner is called gaining ratio.

THEORETICAL QUESTIONS

1. How is goodwill treated at the time of retirement of a partner?
2. What are the different ways in which a partner can retire from the firm?
3. Why are assets and liabilities revalued at the time of retirement?
4. Explain the mode of payment to a retired partner.
5. Explain the procedure of computation of retired partner's interest in the firm.

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each statement or answer each question below.

1. Which of the following is true ?
   A The retirement of a partner result in a new partnership.
   B Gaining ratio is the ratio in which the old partners surrender their share of profit in favour of the new partner.
   C When a partner retires, goodwill is to be distributed in the capital ratio.
   D When a partner retires, profit or loss on revaluation is to be shared in the gaining ratio.

2. Which of the following is true ?
   A When the retiring partner's share of goodwill is credited to his capital account, then the same is to be debited to the capital accounts of the remaining partners in the sacrificing ratio.
   B The amount due to the retiring partners if not paid in cash is transferred to his loan account.
   C The account of retiring partner's capital is transferred to a loan account, which carries interest @ 10% p.a. until it is paid.
   D If a partner retires on a date other than the date of preparing final accounts, then he is not entitled to any share in the profit from the date of preceding final accounts to the date of retirement.
3. Which of the following is true ?
   A The profit or loss disclosed by the revaluation account at the time of retirement of a partner is transferred to the capital account of the partners in the capital ratio.
   B When a partner retires, all accumulated losses are transferred to the capital accounts in new profit sharing ratio.
   C When a partner retires, a revaluation account is prepared in the interest of the retiring partner.
   D Unrecorded asset taken over by a retiring partner should appear in the revaluation account.
4. Which of the following is true ?
   A When a partner retires, a goodwill account may be raised which will find a place in the Balance Sheet.
   B When a partner retires, a goodwill account may be raised but it should be written off immediately.
   C When a partner retires, the remaining partners are to bring in money to pay off the retiring partner.
   D Profits and losses on revaluation of assets and liabilities directly affect the partners' current accounts.
5. State which of the following is not true ?
   A A partner can retire from the business with the consent of all the other partners.
   B The profit or loss on revaluation of assets and liabilities is transferred to continuing partners in the new ratio.
   C Upon retirement, adjustment for goodwill is made through the partners' capital accounts.
   D A retiring partner is entitled to his share in the goodwill of the firm as per the agreement between the partners.
6. On retirement of a partner, the combined shares of the continuing partners
   A will remain same
   B will reduce
   C will increase
   D will decrease or increase
7. On retirement of a partner, the assets and liabilities of the firm are
   A to be revalued upward only
   B to be revalued downward only
   C to be revalued both upward and downward where necessary
   D not to be revalued
8. At the time of retirement of a partner, if there is undistributed profit in the Balance Sheet of the firm, it
   A will not be distributed amongst the partners
   B will be distributed in the capital ratio
   C will be distributed in the old profit sharing ratio amongst all the partners
   D will be distributed amongst continuing partners
9. Upon retirement, joint life policy surrender value will be distributed
   A amongst all partners in the old ratio
   B amongst continuing partners in the new ratio
   C to retiring partners only
   D amongst continuing partners in the old ratio

PRACTICAL QUESTIONS

1. A, B and C were partners in a firm sharing profits and losses in the ratio of 2 : 2 : 1 respectively. The Balance Sheet of the firm as on 31.12.2014 was as follows :

Liabilities		₹	Assets		₹
Sundry Creditors		25,000	Cash		3,000
Bills Payable		12,000	Sundry Debtors	20,000	
Capital Accounts :			Less: Provision for Bad Debts	1,000	19,000
A	40,000		Closing Stock		30,000
B	40,000		Furniture		10,000
C	30,000	1,10,000	Plant and Machinery		40,000
Reserve		15,000	Buildings		60,000
		1,62,000			1,62,000

On 31.12.2014, B retired. The terms of retirement provided the following :

(a) The goodwill of the firm was to be valued at ₹ 20,000.

(b) Furniture, plant and machinery were to be depreciated by 10% and 5% respectively.

(c) Stock and building were to be appreciated by 20% and 10% respectively.

(d) Provision for doubtful debts was to be increased to ₹ 1,500.

(e) The reserve was to be transferred to the Capital Accounts of the partners.

(f) The amount due to B was to be transferred to a separate Loan Account earning interest @ 10% p.a.

Show the Revaluation Account, Partners' Capital Accounts and the Balance Sheet of the firm after B's retirement.

2. A, B and C are partners sharing profits and losses 4/7ths, 2/7ths, 1/7ths respectively. Their Balance Sheet on 31st December 2014 was as follows :

Liabilities	₹	Assets	₹
Capital A/cs :		Goodwill	15,000
A	45,000	Stock	22,500
B	30,000	Debtors	16,500
C	25,000	Land and Building	30,000
Bills Payable	3,000	Machinery	39,750
General Reserve	10,500	Motor Van	7,750
Creditors	22,500	Cash	4,500
	1,36,000		1,36,000

On the same date A retired from the business and the following adjustments were made :

(i) Firm's goodwill was valued at ₹ 36,000.

(ii) Assets and liabilities are to be revalued as : Stock ₹ 18,000; Land and Building ₹ 33,900; Debtors ₹ 15,750; Machinery ₹ 37,500; Creditors ₹ 21,000.

(iii) B to bring in ₹ 30,000 and C ₹ 7,500 as additional capital.

(iv) A was to be paid ₹ 24,300 in cash and the balance of his Capital Account to be transferred to his Loan Account.

Prepare Revaluation Account, Partners' Capital Accounts, Cash Account and the Balance Sheet of the firm after A's retirement.

3. A, B and C are partners sharing profits and losses in the ratio of 3:2:1. Their Balance Sheet on 31.12.2014 was :

Liabilities	₹	Assets	₹
Capital Accounts:		Cash at bank	3,500
A	45,000	Debtors	30,000
B	35,000	Stock	25,000
C	25,000	Plant	40,000
Reserve	15,000	Building	50,000
Profit & Loss A/c	12,000	Furniture	4,000
Creditors	20,500		
	1,52,500		1,52,500

C retires on that date subject to the following conditions:

(i) Goodwill of the firm is to be valued at ₹ 36,000;

(ii) Building is to be appreciated by 20%;

(iii) Plant & Furniture are to be depreciated by 10% and 15% respectively; and

(iv) Provision is to be made for doubtful debts at 5%;

A and B are to bring in cash, if necessary, in their profit-sharing ratio to pay off C's dues on retirement and leave a sum of ₹ 10,000 as working capital.

Prepare Revaluation Account, Partners' Capital Account and new Balance Sheet as at 1.1.2015.

4. A, B and C carried on partnership sharing profits as 4:3:2. Their balance Sheet on 30.6.2015 was as follows:

Liabilities	₹	Assets		₹
Creditors	41,400	Cash in hand		500
Capital — A	87,800	Cash at bank		21,000
Capital — B	66,000	Debtors	25,000	
Capital — C	43,800	Less: Provision for doubtful debts	500	24,500
		Stock		36,000
		Plant and Machinery		37,000
		Land and Buildings		1,20,000
	2,39,000			2,39,000

B Retired on 1.7.2015 and these adjustments were agreed upon before ascertaining the amount payable to B:

1. Provision for Doubtful Debts raised to 5% on debtors;
2. Land and Buildings to be appreciated by 15%;
3. A provision of ₹ 650 is to be made for outstanding legal charges;
4. Goodwill to be valued at ₹ 45,000 and B's share to be adjusted into the Accounts of A and C who decided to continue the business sharing profit as 5:3;
5. Stock to be reduced to ₹ 32,000;
6. The capital of the new firm to be adjusted in proportion to their new profit-sharing ratio and actual cash to be brought in or paid off by or to the continuing partners, as the case may be.

B agreed to leave the amount due to him by the firm as loan to the firm carrying interest at 6% p.a. Pass Journal entries and make the Balance Sheet following the retirement of B.

5. A, B and C were partners sharing profits and losses in the ratio of 5 : 3 : 2 respectively. They had taken out a joint life policy of the face value of ₹ 2,00,000. On 31st December, 2014, its surrender value was ₹ 40,000. On this date the Balance Sheet of the firm stood as follows :

Liabilities	₹	Assets	₹
Sundry Creditors	53,000	Fixed Assets	2,50,000
Outstanding Expenses	7,000	Stock	1,10,000
Reserve	30,000	Book Debts	90,000
Capital A/cs :		Cash at Bank	20,000
(A — ₹ 2,00,000; B — ₹ 1,00,000; C — ₹ 80,000)	3,80,000		
	4,70,000		4,70,000

On that date B decided to retire and for that purpose : (a) Goodwill was valued at ₹ 1,50,000; (b) Fixed assets were valued at ₹ 3,00,000; and (c) Stock was considered as worth ₹ 10,000. B was to be paid in cash brought in by A and C in such a way so as to make their capital proportionate to their new profit sharing ratio which was to be 3 : 2 respectively. Goodwill was to be passed through books without raising a Goodwill Account; the joint life policy was also not to appear in the Balance Sheet. Prepare Ledger Accounts and the resultant Balance Sheet.

6. The Balance Sheet of A, B and C, who were sharing profits in the ratio of 4:3:2 respectively stood as follows on 31.12.2014 :

Liabilities	₹	Assets		₹
Sundry Creditors	4,140	Cash at Bank		3,300
Capital — A	12,000	Sundry Debtors	3,045	
Capital — B	9,000	Less: Provision	105	2,940
Capital — C	6,000	Stock		4,800
		Plant and Machinery		5,100
		Land and Building		15,000
	31,140			31,140

B having given notice to retire from the firm, the following adjustments in the books of the firm were agreed upon:

1. That the land and building be appreciated by 10%;
2. That the provision for bad and doubtful debts is no longer necessary;
3. That the stock be appreciated by 20%;
4. That the adjustment be made in the accounts to rectify a mistake previously made whereby B was credited in excess by ₹ 810, while A and C were debited in excess of ₹ 420 and ₹ 390 respectively.

5. That goodwill of the firm be fixed at ₹ 5,400 and B's share of the same be adjusted to that of A and C who are going to share in future profits in the ratio of 2:1.
6. That the entire capital of the firm, as newly constituted, will be readjusted by bringing in or paying of cash so that the future capital of A and C be in the ratio of 2:1.

Pass Journal entries and prepare the Balance Sheet of the new firm showing B's balance as loan.

7. P, Q and R are in partnership sharing profits and losses in the ratio of 2 : 2 : 1. P retired on 31.12.2014 and on that date, the Balance Sheet of the firm was as under :

Liabilities	₹	Assets	₹
Capital Accounts :		Land and Building	10,000
P	16,000	Plant and Machinery	6,000
Q	8,000	Furniture	2,000
R	8,000	Stock	7,000
Creditors	12,000	Debtors	15,000
		Cash	4,000
	44,000		44,000

On P's retirement, Goodwill is valued at ₹ 10,000 and the assets are revalued as follows : Land and Building ₹ 12,000; Plant and machinery ₹ 5,000; Furniture ₹ 1,500; Debtors ₹ 12,500. While apportioning profits for the year 2014, an amount of ₹ 3,000 was given to P in excess, Q and R provide cash in their profit sharing ratio in order to pay-off P.

You are required to pass Journal Entries, prepare Revaluation Account, Partners' Capital Accounts and the Balance Sheet after P's retirement.

8. A, B and C are partners sharing profits and losses in the ratio of 3 : 2 : 1. The Balance Sheet of their business as on 31.3.2015 is given below :

Liabilities	₹	Assets	₹
Capital Accounts :		Machinery	40,000
A	50,000	Furniture	20,000
B	40,000	Motor Car	30,000
C	30,000	Stock	25,000
Reserve	12,000	Debtors	75,000
Creditors	60,000	Cash	2,000
	1,92,000		1,92,000

A retired w.e.f. 1.4.2015. Goodwill of the firm was valued at ₹ 24,000. On revaluation, machinery and furniture are to be appreciated by 10%. Debtors include ₹ 1,500 as bad and doubtful and are to be written-off. Value of stock is to be reduced to ₹ 23,000. Creditors include ₹ 800 as no more payable. It was decided that due effect is to be given to the retiring partners' capital account as his share of goodwill without raising any goodwill account. B and C are to share the future profits in equal proportions. Amounts payable to A is to be treated as a loan to the firm.

You are required to prepare the Revaluation Account, Capital Accounts of the partners and the Balance Sheet of the firm after A's retirement.

9. A, B and C were partners sharing profits in the ratio of 3 : 2 : 1. On 1st January, 2015, B retired, on that date Balance Sheet was as follows :

Liabilities	₹	Assets	₹
General Reserve	6,000	Plant	30,000
Expenses Owing	2,000	Patents	3,000
Bills Payable	5,000	Debtors	9,500
Creditors	10,000	Stock	11,000
Capital Accounts :		Cash	500
A	12,000		
B	10,000		
C	9,000		
	54,000		54,000

The terms were :

(i) Goodwill was to be valued to ₹ 12,000 but no Goodwill Account was to be raised.

(ii) New ratio between A and C will be 3 : 2.

(iii) Expenses owing are to be brought down to ₹ 1,500; Plant is to be valued at 10% less and patents at ₹ 4,000.

(iv) The total capital of new firm will be fixed at ₹ 25,000 to be contributed by partners in profit sharing ratio.

Prepare Ledger Accounts to record the above and prepare Balance Sheet after B's retirement.

10. A, B and C were carrying on business in partnership, sharing profits and losses in the ratio of 2 : 1 : 1. On December 31, 2014 B decided to retire from the firm and the following terms were agreed upon :
    (a) A typewriter purchased on January 1, 2013 for ₹ 1,200 was charged to the Office Expenses Account in 2014 and has to be brought into account after allowing 15% p.a. depreciation on the reducing balance basis.
    (b) Furniture and fittings are to be written-down by ₹ 603 and stock by ₹ 5,000.
    (c) The provision for bad and doubtful debts standing in the books at ₹ 4,000 are to be reduced by 25%.
    (d) A liability in respect of workmen's compensation for ₹ 2,100 not acknowledged by the partnership as a valid claim, is however, to be provided for.
    (e) Goodwill of the firm is valued at ₹ 24,000.
    (f) The capital accounts of the partners on December 31, 2014 stood at A — ₹ 20,001, B — ₹ 15,001 and C — ₹ 10,001.

    A and C agree that the Goodwill is to be adjusted through Capital Accounts of the partners and the amount payable to B shall be brought in by them in their new profit-sharing ratio.

    You are required to pass Journal Entries to record the above transactions.
11. A, B and C are in partnership sharing profits and losses in the ratio of 2 : 2: 1 respectively. It was agreed that in case of retirement or death of a partner, the value of goodwill shall be determined at 1.5 years' purchase of the average profits of the last four years. C retired from his business w.e.f. 1.7.2015 and the following matters came up for consideration in connection therewith:
    (i) Capital expenditure of ₹ 30,000 incurred on 15.11.2011, wrongly debited to Purchase Account is to be written-back and depreciation at 10% is to be charged annually on the closing balance on reducing balance method.
    (ii) No adjustment was made for goods worth ₹ 10,000 taken over by A on 28.2.2015.
    (iii) The profits for four years ended on 30th June : 2012, 2013, 2014, 2015 were ₹ 1,20,000, ₹ 1,50,000, ₹ 1,40,000, ₹ 1,60,000 respectively.
    (iv) C's Capital Account stood at ₹ 5,50,000 as on 30.6.2015.

    You are required to draw up the Capital Account of C and to find out the amount finally due to him.
12. A, B and C were in partnership sharing profits and losses in the ratio 3 : 2 : 1 respectively. The summarized Balance Sheet of the firm as on 31.3.2015 stood as follows :

Liabilities	₹	Assets		₹
Capital — A	1,20,000	Freehold Land and Building		80,000
Capital — B	60,000	Plant and Machinery		30,000
Capital — C	40,000	Motor Cars		12,000
Loan — A	20,000	Stock		56,000
Creditors	40,000	Debtors	60,000	
		Less: Provision for Doubtful Debts	6,000	54,000
		Cash at bank		48,000
	2,80,000			2,80,000

A retired on March 31, 2015 to commence business individually, and B and C continued in partnership sharing profits and losses equally.

It was agreed that A should take over certain plant and machinery valued at ₹ 7,500 and one of the firm's cars at the book value of ₹ 5,000.

It was further agreed that for the purpose of both of the dissolution and continuation of partnership, the following adjustments should be made in the Balance Sheet as on March 31, 2015 :

1. Freehold Land and Buildings should be revalued at ₹ 1,00,000 and Plant and Machinery (inclusive of that taken by A) at ₹ 25,000.
2. The provision for doubtful debts should be increased by ₹ 1,500.
3. A provision of ₹ 2,500 included in creditors for a possible claim for damages was no longer required.
4. The stock should be reduced by ₹ 4,000 in respect of obsolete and damaged items.

In accordance with the terms of the partnership deed, the total value of goodwill on March 31,2015 was agreed at ₹ 1,80,000. In view of the fact that A intended to retain some of the customers of the firm, it was agreed that the value of the proportion of goodwill to be purchased by him was ₹ 60,000. The continuing partners B and C decided that goodwill should not appear in the books of the new partnership as an asset and the necessary adjustments should be made through the Capital Accounts of the partners. Pending the introduction of further capital in cash by the continuing partners, the amount due to A was agreed to be transferred to Loan Account. You are required to prepare the Revaluation Account, the Partners' Capital Accounts and the Balance Sheet of the new firm.

13. A, B and C are in partnership sharing profits and losses in the ratio of 3 : 2 : 5 respectively. The following are the particulars of the personal accounts of the partners :

		A	B	C
1.	Capital Accounts (1.1.2014)	20,000	12,000	35,000
2.	Current Accounts (1.1.2014)	(Cr.) 4,000	(Dr.) 1,000	(Cr.) 6,000
3.	Drawings during the year 2014	2,400	3,800	4,600
4.	Interest on drawings	300	500	600

The partnership firm earned a profit of ₹ 1,200 in the year 2014. A retired from 31.12.2014 and it was agreed to settle his accounts on the following terms :

(a) Accounts for the year 2014 should be thoroughly scrutinised and rectified. Accordingly, the following discrepancies were found out during the scrutiny:
   (i) An amount of ₹ 100 paid towards life insurance of A was wrongly debited to Taxes and Insurance Account of the firm.
   (ii) Goods worth ₹ 200 taken by B were not recorded in the books of accounts.
   (iii) Wages paid ₹ 420 for extension of office building were treated as wages. The depreciation of building was charged at 2%.
   (iv) Bad debts of ₹ 300 were omitted while preparing the Profit and Loss Account.

(b) The share of A should be distributed in the ratio of 3 : 5 between B and C.

(c) The following assets should be revalued :
   (i) Stock to be depreciated by ₹ 1,000; (ii) Machinery to be depreciated by ₹ 2,500; (iii) Building to be appreciated by ₹ 5,500.

(d) Interest on capital to be charged at 6% and no interest on Current Accounts.

(e) Goodwill to be estimated at ₹ 6,000 and to be adjusted accordingly.

Prepare Profit and Loss Appropriation Account, Revaluation Account, Partners' Capital and Current Accounts.

14. On 1.1.2011, A and B started a firm, sharing profits and losses equally. Each of the partners contributed ₹ 2,000 towards the capital of the firm and was allowed to draw ₹ 400 p.m. in anticipation of profits. On 1.1.2012, they admitted C as a third partner with equal share and he contributed ₹ 3,000 towards his capital and a further sum of ₹ 2,000 towards premium for goodwill. He too was entitled to draw ₹ 400 p.m. From 1.1.2013, A got a part-time job elsewhere and considered that he would be unable to devote his full time towards the business of the firm, agreed to leave half of his share in the profits to be apportioned equally between B and C and his drawings was reduced to ₹ 200 p.m. from 1.1.2013.

On 1.1.2014, B got a full time job and in consequence, A had to leave his part time job and to devote full time in the firm. It was arranged that B will retain only a quarter of his earlier share in the firm and would be drawing nothing from 1.1.2014. A and C would be drawing @ ₹ 600 p.m. instead. The interest surrendered by B would be apportioned equally by A and C.

On 31.12.2014, B decided to retire altogether from the firm.

You are required to ascertain the amount due to B by the firm from the following particulars :

(a) Profits earned by the firm : 2011 — ₹ 17,000; 2012 — ₹ 18,000; 2013 — ₹ 24,000; 2014 — ₹ 28,896.

(b) B's share of goodwill is to be taken at 2 years' purchase of the average of his share of profits of the previous two years.

(c) The partners have drawn exactly what they could draw under the agreement.

15. On 31.12.2014, the Balance Sheet of M/s. A, B and C, sharing profits and losses in proportion to their capitals, stood as follows :

Liabilities	₹	Assets		₹
Creditors	1,08,000	Cash at Bank		80,000
Capital A/cs:		Debtors	1,00,000	
A	4,50,000	Less: Provision for Doubtful Debts	2,000	98,000
B	3,00,000	Stock		90,000
C	1,50,000	Machinery		2,40,000
		Land and Building		5,00,000
	10,08,000			10,08,000

On that date, B wants to retire from the firm and the remaining partners decide to carry on the firm. The following readjustment of assets and liabilities have been agreed upon before the ascertainment of the amount payable to B :

(i) that out of the amount of insurance premium which was debited annually entirely to Profit and Loss Account, ₹ 10,000 be carried forward for unexpired insurance on 31.12.2014;

(ii) that the land and building be appreciated by 10%.

(iii) that the provision for doubtful debts be brought up to 5% on debtors;

(iv) that machinery be depreciated by 5%;

(v) that a provision for ₹ 15,000 be made in respect of an outstanding bill for repairs;

(vi) that the goodwill of the entire firm be fixed at ₹ 1,80,000 and B's share of the same adjusted in the accounts of A and C who share future profits in the proportion of 3/4th and 1/4th respectively (no goodwill account being raised); and,

(vii) that B be paid ₹ 50,000 in cash and the balance be transferred to his Loan Account.

Prepare Revaluation Account, the Capital Accounts of the Partners and the Balance Sheet of the firm of A and C.

16. A, B and C are partners sharing profits and losses in the ratio of 3 : 2 : 1. On 31.1.2015, B decides to retire and their Capital Accounts on that date are A — ₹ 60,000; B — ₹ 45,000; and C — ₹ 50,000. Their Current Accounts on that date are A — ₹ 5,000 (Cr.); B — ₹ 2,300 (Dr.) and C — 3,000 (Cr.).

The partnership deed provided that in case of retirement, the retiring partner should be entitled to a share of the goodwill of the firm to be calculated on the average of the profits of last three years' ending on 31.3.2015 which comes to ₹ 12,000 and that the payment of the total interest of the retiring partner shall be made by annual instalments of ₹ 10,000 each. The retiring partner will be entitled to interest also at 6% on the unpaid balance. The first instalment was paid on 31.3.2015.

Show B's Loan Account until the whole payment due to him is made.

17. A, B and C were in partnership till 31.12.2013, when C retired from partnership. The amount due to him after necessary adjustments arising in connection with such retirement was ₹ 1,00,000. At the request of the other partners, he agreed to leave the amount with the new firm as loan on the following terms and conditions :

(i) Repayment of loan to be made at the end of each year by annual instalments representing 40% of future annual profits after charging salary of ₹ 7,500 p.a. to each partner.

(ii) Interest @ 5% p.a. calculated on the balance outstanding at the beginning of the year to be credited, but such interest will not be taken into account for calculation of 40% stated above.

Profits before charging partners' salaries, were as follows : 2009 — ₹ 15,000; 2010 — ₹ 1,03,125; 2011 — ₹ 1,11,875; 2012 — ₹ 1,15,000; 2013 — ₹ 1,43,250.

You are required to show C's Loan Account for all these years as it would appear in the books of the firm.

18. A, B and C were in partnership sharing profits and losses in the ratio 3:2:1. Their Balance Sheet as on 31.3.2015 was as under:

Liabilities	₹	Assets	₹
Capital — A	60,000	Machinery	80,000
Capital — B	50,000	Furniture	15,000
Capital — C	40,000	Motor car	30,000
Sundry Creditors	72,000	Stock	50,000
Bank loan	30,000	Sundry Debtors	60,000
Other liabilities	20,000	Cash at bank	37,000
	2,72,000		2,72,000

A retired on 1.4.2015 and the partnership deed provided *inter alia* that in the event of admission, retirement or death of a partner, the assets and liabilities are to be revalued and that goodwill of the firm is to be computed on the basis of 2 years' purchase of the correct profit of the last 4 years.

It is discovered that the accounts required adjustments owing to certain mistakes in earlier years. On 1.10.2012, repairs to machinery for ₹ 6,000 had been wrongly debited to Machinery Account; and on 1.4.2013, a piece of furniture, whose book value was ₹ 2,000 was disposed of for ₹ 800 but the proceeds were wrongly credited to Sales Account. The partners had been charging depreciation on all fixed assets at 10% p.a. on the reducing balance system on a time basis. Profits for the last four years without adjusting the above mentioned mistakes were as follows:

2011-12 – ₹ 20,000; 2012-13 – ₹ 24,000; 2013-14 – ₹ 32,000; 2014-15 – ₹ 36,000.

Revaluation on the date of retirement was: Machinery — ₹ 90,000; Furniture — ₹ 10,000; Motor car — ₹ 22,000.

B and C, decided to share future profits, after A's retirement, in the ratio of 3:2. It was further agreed that the retiring partner shall be credited with his due proportion of goodwill, without raising a Goodwill Account in the books.

A is to be paid 50% of the amount due to him on retirement immediately and the balance is to be transferred to his Loan Account carrying interest at 6% p.a. B and C are to bring necessary cash (in their new ratio) subject to the condition that a cash balance of ₹ 20,000 is to be maintained as working capital.

Show the Capital Accounts of the partners and the Balance Sheet of the firm after all the above mentioned transactions have been carried out. Ignore fractions. (All working should form part of your answer.)

19. A, B and C were partners sharing profits/losses in the ratio of A 40%, B 35% and C 25%. The draft Balance Sheet of the partnership as on December 31, 2014 was as follows :

Liabilities	₹	Assets		₹
Sundry Creditors	30,000	Cash in Hand and at Bank		67,000
Bills Payable	8,000	Stock		42,000
Loan from B	30,000	Sundry Debtors	34,000	
Current Accounts:		Less: Provision for Doubtful Debts	6,000	28,000
(A — ₹ 12,000; B — ₹ 8,000; C — ₹ 6,000)	26,000	Plant and Machinery (at cost)	80,000	
Capital Accounts:		Less : Provision for Depreciation	28,000	52,000
(A — ₹ 90,000; B — ₹ 50,000; C — ₹ 30,000)	1,70,000	Premises (at cost)		75,000
	2,64,000			2,64,000

B retired on December 31, 2014. A and C continued partnership sharing profits/losses in the ratio of A— 60% and C— 40%. It was agreed that the amount then remaining due to him, a sum of ₹ 80,000, should remain as loan to the partnership and the balance be carried forward as ordinary trading liability. The following adjustments were agreed to be made to the above mentioned Balance Sheet.

(a) ₹ 10,000 should be written-off from the premises;

(b) Plant and machinery were revalued at ₹ 58,000;

(c) Provision for doubtful debts to be increased by ₹ 1,200;

(d) ₹ 5,000 due to creditors for expenses had been omitted from the books of account;

(e) ₹ 4,000 to be written-off from stock; and

(f) Provide ₹ 1,200 for professional charges in connection with revaluation.

As per the deed of partnership, in the event of the retirement of a partner, goodwill was to be valued at an amount equal to one year's purchase of the average profits of the preceding three years on the date of retirement. Before determining the said average profits, a notional amount of ₹ 80,000 should be charged for remuneration to partners. The profits before charging such remuneration were : Year ended 31.12.2012 — ₹ 1,44,000; Year ended 31.12.2013 — ₹ 1,68,000; and Year ended 31.12.2014 — ₹ 1,88,200 (as per draft accounts).

It was agreed that for the purpose of valuing goodwill, the amount of profit for year 2014 be recomputed after charging the loss on revaluation in respect of premises and stock that unprovided, expenses (except professional expenses) and increase in provision for doubtful debts. The continuing partners decided to eliminate the Goodwill Account from their books.

You are required to prepare: (i) Revaluation Account; (ii) Capital Accounts (merging Current Accounts therein); (iii) B's Account showing balance due to him; (iv) Balance Sheet of A and C as on January 1,2015.

20. A, B and C sharing profits and losses as 4:3:1 had their capitals on 1.4.2015: ₹ 15,000; ₹15,000; and ₹10,000 respectively. The Deed provided: (i) that interest would be payable on capital at 10% p.a.; (ii) that in case of retirement, the goodwill would be valued at two years' purchase of the average divisible profits of the last five years; (iii) that the profit of the retiring partner to the date of retirement would be estimated on the basis of the average divisible profit of the last three years, and (iv) that the firm would effect a joint life policy of ₹ 30,000, charging the premium as expense.

A retired with effect from 1.10.2015. The surrender-value of the policy as on that date was ascertained at ₹ 8,000 and to that date drawings amounted to A — ₹ 3,000; B — ₹ 2,000 and C — ₹ 1,000. Profits after charging interest and policy premium were:

2014-15 — ₹ 10,000; 2013-14 — ₹ 9,500; 2012-13 — ₹ 7,200; 2011-12 — ₹ 8,800; 2010-11 — ₹ 8,000.

A's final claim was met to the extent of claims on revenue accounts out of the assets of the business and the rest out of cash brought in by B and C in such proportions as to set their capitals at balances equated to their shares in the profits. Prepare the Capital Accounts of A, B and C.

21. A, B and C are partners sharing profits and losses in the ratio of 3 : 3 : 4. The Balance Sheet as on 31.12.2014 is :

Liabilities	₹	Assets	₹
Sundry Creditors	12,000	Cash at Bank	3,000
Bills Payable	18,000	Bills receivable	11,000

6% Mortgage Loan	17,000	Stock	25,000
Capital Accounts		Sundry Debtors	20,000
(A — ₹ 50,000; B — ₹ 45,000; C — ₹ 65,000)	1,60,000	Furniture	5,000
General Reserve	10,000	Plant and Machinery	40,000
		Land and Building	1,13,000
	2,17,000		2,17,000

The firm earned profits as follows for the past five years: 2010 — ₹ 14,000; 2011 — ₹ 16,500; 2012 — ₹ 15,000; 2013 — ₹ 15,000 and 2014 — ₹ 15,800.

On December 31, 2014, C retired from partnership and in order to ascertain the amount due to C, the accounts of 2014 were verified and the following mistakes were detected:

(i) A bill receivable for ₹ 1,000 which was dishonoured and became irrecoverable, was not taken into consideration while preparing the final accounts.

(ii) An amount of ₹ 200 paid for the rent of the house occupied by C was wrongly debited to the Rent Account of the firm.

(iii) Goods worth ₹ 1,500 given by B to the firm were not taken into account.

(iv) An outstanding bill for ₹ 500 towards electricity was not paid and the same was not adjusted while preparing the final accounts.

(v) Purchase of machinery of July 1, 2014 at a cost of ₹ 9,500 was wrongly treated as the Purchase Account and the expenses of ₹ 500 incurred towards erection of the machinery were charged to the Machinery Repairs Account. Depreciation on the Machinery Account was charged at 10% p.a.

The partners agreed to rectify the mistakes noted above and the following adjustments were made to settle the accounts of C:

(i) A provision was made at 5% on Sundry Debtors; (ii) Stock was revalued at ₹ 21,925; (iii) Plant and Machinery were depreciated by 15%; (iv) Land and building were appreciated by 20%; (v) Sundry creditors for ₹ 2,900 will not rank; (vi) Goodwill of the firm should be ascertained at three times the average profit of the last five years. The Goodwill Account should not appear in the books. Goodwill of C should be shared by A and B; (vii) The Capital of C should be purchased by A and B in the ratio of 3:2; (viii) Since C was in urgent need of ₹ 50,000, the partners are required to make payment to him in cash in their new profit-loss sharing ratio and the balance of C's capital will be treated as loan; and (ix) The partners are also required to adjust their capitals in cash in proportion to their new profit-loss sharing ratio.

You are required to prepare the Profit and Loss Adjustment Account, Revaluation Account, Capital Accounts of the partners and also the Balance Sheet after the retirement of C.

Admission cum Retirement

22. The following is the Balance Sheet of A and B as at 30th June, 2015 on which date A retired and his son D joined that firm from 1st July, 2015 with one-fourth share in the profits of the business :

Liabilities	₹	Assets	₹
Capital Accounts :		Land	12,000
A	50,000	Plant	40,000
B	31,000	Investments	14,000
Creditors	10,000	Debtors	15,000
		Cash at Bank	10,000
	91,000		91,000

The following adjustments and arrangements have been agreed upon for the purposes of retirement and admission of partners :

1. Land to be written upto ₹ 30,000 and Plant to ₹ 50,000;
2. Sufficient money to be introduced so as to leave ₹ 11,000 cash after payment of amount due to Raman;
3. B and D to provide such fund as would make their capitals proportionate to their share of profit.

Show the Journal Entries to record the above transactions.

23. A, B and C are partners sharing profit and losses in the proportion of 3 : 2 : 1. Following is the Balance Sheet as at 31.12.2014:

Liabilities	₹	Assets	₹
Capital A/cs:		Building	10,000
(A — ₹ 65,000; B — ₹ 38,000; C — ₹ 28,000)	1,31,000	Debtors	61,400
Reserve	38,400	Sundry Assets	1,48,000
Creditors	50,000		
	2,19,400		2,19,400

C desires to retire from the firm on 1.1.2015. In terms of agreement :

Building is to be revalued at ₹ 50,000. Debtors at ₹ 41,400 and Sundry Assets at ₹ 1,50,000. The amount payable to the retired partner is for the present to be treated as loan with 5% interest.

On the same day, i.e., on 1.1.2015, D is admitted as a partner on payment of ₹ 32,000. Profit and loss are henceforth to be shared as 4:3:2 among A, B and D. No alteration is to be made in the book value of the assets other than cash brought in by D and Reserve.

Draw up the final Balance Sheet as at 1.1.2015 on the above basis after admission of D.

24. A, B and C were in partnership sharing profits and losses in the ratio 3 : 2 : 1. Their Balance Sheet as on 31.3.2015 was as follows :

Liabilities	₹	Assets		₹
Capital A/cs :		Plant and Machinery		1,70,000
(A — ₹ 50,000; B — ₹ 80,000; C — ₹ 90,000)	2,20,000	Furniture and Fixtures		30,000
General Reserve	18,000	Trade Debtors	1,79,000	
Workmen's Accidental Compensation Fund	50,000	Less: Provision	10,000	1,69,000
Trade Creditors	1,07,000	Cash in hand		26,000
	3,95,000			3,95,000

C retired on that date. It was agreed that :

(a) Plant and machinery to be revalued at ₹ 1,94,000. Provision on debtors be kept at ₹ 19,000 and liability for workmen's accident compensation was decided at ₹ 23,000.

(b) C should get, apart from other amounts due to him, his share in goodwill ₹ 40,000.

(c) The total amount payable to C was brought by A and B in their profit sharing ratio.

Immediately after this, they admitted D as a partner on his bringing ₹ 80,000 as share in goodwill and ₹ 1,40,000 as capital. It was agreed that A and B, as between themselves, will share profits and losses equally.

You are required to prepare : (i) Revaluation Account; (ii) Partners' Capital Accounts; (iii) Balance Sheet after all the adjustments are carried out.

25. A, B, C and D were in partnership sharing profits and losses as 4 : 3 : 2 : 1 respectively. The following is their Balance Sheet as on 31.12.2014 :

Liabilities	₹	Assets	₹
Capital Account — A	50,000	Furniture	40,000
Capital Account — B	70,000	Stock	20,000
Capital Account — C	60,000	Debtors	1,50,000
Capital Account — D	20,000	Bills Receivable	30,000
Trade Creditors	50,000	Profit & Loss A/c	10,000
	2,50,000		2,50,000

On the above date, B retired and the amount due to him was paid by the other partners in their profit-sharing ratio. It was agreed as among A, C and D that they should share in future as 3 : 3 : 2. E was then admitted as a partner on his bringing in ₹ 60,000 as capital and ₹ 20,000 as goodwill for 1/5th share in the future profits.

Show the Journal Entries for the above transactions and prepare the Balance Sheet of A, C, D and E after E's admission.

26. A, B and C were partners, sharing profits and losses in the proportion of 3 : 2 : 2 respectively. The Balance Sheet of the firm as on 1.1.2014 was as follows :

Liabilities	₹	Assets	₹
Capital Account — A	50,000	Plant and Machinery	36,000
Capital Account — B	40,000	Furniture	24,000
Capital Account — C	35,000	Stock	56,000
Bank Overdraft	10,000	Debtors	48,000
Sundry Creditors	28,000	Cash at Bank	9,000
	1,63,000		1,63,000

A retired on 1.1.2014, on which date D was admitted as a new partner. For the purpose of adjusting the rights as among the old partners, goodwill was to be valued at ₹ 42,000 and Sundry Debtors and Stock were to be reduced by ₹ 8,000 and ₹ 6,000 respectively. A was to receive ₹ 22,000 in cash on the date of retirement and the balance due to him was to remain on loan at 8% p.a., interest payable on 31st December each year on which date the firm closes its accounts. D was to bring in ₹ 50,000 in cash as his capital on the date of admission. The new partners were to share profits and losses equally after allowing interest on loan from A.

The net profit for the year ended 31.12.2014 was ₹ 33,200 before taking into account interest on loan from A. You are to prepare the following :

1. Capital Accounts of the partners as on 31.12.2014;
2. A's Loan Account as on 31.12.2014;
3. Profit and Loss Appropriation Account for the year ended 31.12.2014.

27. A, B and C are partners sharing profits equally. Their Balance Sheet on 30.6.2015 was :

Liabilities	₹	Assets	₹
Capital Account — A	1,00,000	Land and Property	1,00,000
Capital Account — B	1,00,000	Plant and Machinery	2,00,000
Capital Account — C	2,00,000	Furniture	50,000
Current Account — A	50,000	Stock-in-trade	1,00,000
Current Account — B	75,000	Debtors	1,00,000
Current Account — C	25,000	Cash at bank	1,50,000
Creditors	1,50,000		
	7,00,000		7,00,000

On 1.7.2015 A retires and it is agreed that he should be paid in full on that date all his dues. So, goodwill is calculated on the basis of 3 years' purchase of average profits of the past 3 years, such profits amounted to ₹ 1,00,000; ₹ 1,20,000 and ₹ 1,40,000. In order to meet this obligation, a bank loan is arranged as at 1.7.2015 for ₹ 2,00,000 by pledging fixed assets as security. To compensate a loyal manager D, it is agreed between B and C that D should be admitted as a partner who would bring in over and above a capital of ₹ 1,00,000, his share of goodwill in cash to serve as working capital. B and C agree to forego one-third of their individual share of profit to D. Show Journal and the Balance Sheet.

28. A, B and C are partners sharing profits and losses in the ratio of 6 : 5 : 3. Work-in-progress was not brought into the accounts. The Balance Sheet of the partnership as on 31.3.2015 showed the following position :

Liabilities	₹	Assets	₹
Capital A/cs :		Fixed Assets	35,350
A	25,000	Debtors	73,500
B	18,000	Bank	10,450
C	8,700		
Sundry Creditors	67,600		
	1,19,300		1,19,300

On the above date, A retired from the partnership and it was agreed to admit D as a partner on the following terms :

1. Goodwill was agreed at ₹ 13,720 and it is to be adjusted accordingly.
2. A is to take his car out of the partnership assets at an agreed value of ₹ 1,000. The car had been included in the accounts as on 31.3.2015 at a written-down value of ₹ 594.
3. Although work-in-progress had not been and will not be included in the partnership accounts, the new partners were to credit A with his share based on an estimate that work-in-progress was equivalent to 20% of the debtors.
4. The new partnership of B, C and D were to share profits in the ratio of 5 : 3 : 2. The initial capital of ₹ 25,000 subscribed in the profit-sharing ratio.
5. B, C and D were each to pay A the sum of ₹ 5,000 out of their personal resources in part repayment of his share of the partnership.
6. A to lend to D any amount required to make up his capital in the firm from the money due to him, and any further balance due to A was to be left in the new partnership as a loan bearing, interest at 9% p.a. Any adjustment required to the Capital Accounts of B and C were to be paid into or withdrawn from the partnership Bank Account.

You are required to prepare the Partners' Capital Accounts and the Balance Sheet.

29. Sun, Moon and Jupiter are partners in a business, sharing profits and losses in the ratio of 5 : 3 : 2.

It is provided, in the partnership deed, that the goodwill of the firm shall be equal to 2.5 times the average annual profits of the four years to the date of change, and that the consideration for the changes in the partners' shares, is to be calculated on this basis, but the Goodwill Account is not be brought into the firm's books. Profits, of the firm, have been : 2011 – ₹ 30,000; 2012 – ₹ 32,000; 2013 – ₹ 28,000; and 2014– ₹ 46,000. It was agreed that :

(a) On December 31, 2014 Moon and Jupiter should each acquire from Sun, an additional 1/10th share in the firm.

(b) On January 1, 2015 Venus (son of Sun) should be admitted into the partnership on the following terms : His share to be one-eighth, of which a proportion, calculated to produce ₹ 3,400 p.a. on the basis of the annual average of the past profits set out above, is to be ceded to him by his father, the balance to be purchased by him (Venus) from Moon and Jupiter, in proportion to their respective shares as they were immediately prior to the admission of Venus.

(c) On December 31, 2015 Sun should retire and the continuing partners should acquire his share of goodwill in such proportion as would make them equal owners of the same, the value of goodwill remaining unchanged and the item of goodwill not to be brought into the books as an asset.

You are required : (i) to set out the Journal Entries necessary to record the foregoing matters in the books of the firm; and (ii) to set out the revised proportion in which the partners share the profits following the admission of Venus. (Calculations to be made to the nearest rupee).

30. A, B and C are partners of M/s Evergreen & Co sharing profits and losses in the ratio of 3 : 3 : 2. Their balances as on 30th September, 2015 is as under :

Particulars		(₹)	(₹)
Fixed Assets :			
Cost		3,00,000	
Less : Depreciation		1,80,000	1,20,000
Investment : Cost (market value ₹ 2,00,000)			80,000
Working Capital			3,00,000
Financed by :			5,00,000
Loans from	D	1,50,000	
	E	1,00,000	2,50,000
Reserves			1,00,000
Capitals	B	2,00,000	
	C	1,00,000	
		3,00,000	
Less :	A	1,50,000	1,50,000
			5,00,000

On that day, A retired from business. B and C decided to admit D as a partner and E, who is a minor, to benefits of partnership. B, C, D and E are to share profits in the ratio of 3 : 3 : 2 : 2. Losses, if any, are to be borne by B, C and D in the ratio of 3 : 2 : 2.

For the purpose of the above retirement-cum-admission, it is decided that :

(a) Goodwill of the firm to be valued at ₹ 2,00,000. However, no account is to appear for goodwill. Treatment of goodwill in relation to minor, is to be deferred to the date when he opts to be a partner on attaining majority, when the value of goodwill will be deemed, for this purpose, to remain unchanged at ₹ 2,00,000.

(b) A takes over : (i) Buildings (cost ₹ 1,00,000; written-down value ₹ 35,000) for ₹ 75,000; and (ii) Investments (cost ₹ 10,000) at their market value of ₹ 5,000.

(c) The continuing partners take over the remaining assets at their book values, except investments which are taken over at their market values.

(d) Loans are to be transferred to Capital Accounts.

(e) The amount due to/from A is to be settled by cheque immediately.

You are required to prepare : (a) the Revaluation / Adjustment Account; (b) the Capital Accounts; and, (c) the Balance Sheet of the firm after giving effect to all the above points of agreement.

Death of a Partner

Introduction

The accounting procedures on the death of a partner are very similar to those that cover a partner's retirement. The retirement of a partner is voluntary in character and can be anticipated but death of a partner may occur any time. When a partner dies, a firm has to face the following problems : (1) Calculation of deceased partner's financial interest in the firm; and (2) Determination of the mode of payment.

Ascertainment of Financial Interest

The executors of the deceased partner have the following claims from the firm:

(i) Balance of Capital Account of the deceased partner as per the last Balance Sheet.
(ii) Share of Goodwill of the firm.
(iii) Share of accumulated Profit/Reserve.
(iv) Share of revaluation Profit/Loss.
(v) Share of Joint Life Policy taken by the firm.
(vi) Share of profit from the date of the last Balance Sheet to the date of death.

The problems relating to first four items have already been discussed chapter 29 (Retirement of a partner).

Here, we will discuss the matters relating to:

(i) Joint Life Insurance Policy; and
(ii) Profits earned by the firm from the date of the last Balance Sheet to the date of death.

(i) Joint Life Insurance Policy

Partners commonly take out a joint life insurance policy on the lives of all the partners to provide cash to pay the amount due to the executors of the deceased partner.

The insurance policy matures on the happening of the *first death*. When a partner dies, the firm receives the policy money and it is distributed amongst the partners (including the deceased partner) in the profit-sharing ratio. The main advantage of this policy is that it removes the hardship which might be caused by the untimely death of a partner.

The joint life insurance policy may be dealt with in the accounts by any of the following methods:

(a) ***Without taking surrender value into account.***
(b) ***Taking surrender value into account.***

Meaning of Surrender Value Surrender value is the amount receivable on a life insurance policy that is cancelled before the end of its term. In other words, it is the amount which an insurance company is prepared to return to the policy-holder if the policy is surrendered. The surrender value is calculated according to a formula adopted by the insurance company which is made known to the policyholder at the time he takes out the policy. It is usually specified in the contract. Surrender values are very low during the early years of a policy. Surrender value of a policy develops after the first few years that the policy is in force and accumulates subsequently by annual increments which is generally equal to a portion of the aggregate amount of premium paid. It should be noted that the policy issued by the Life Insurance Corporation of India acquires surrender value after two annual premiums have been paid. However, in examination problems, we may find exceptions to this rule. At any point of time, the surrender value of policy represents an asset.

Meaning of 'with profits' or 'without profits' Policy In case of a ''without profits'' policy, the holder will get only the amount specified in the policy. In case of a 'with profits' policy, the holder will get the amount specified in the policy *plus bonuses declared on each valuation.*

(a) Without taking Surrender Value into Account

Under this method, premia paid on the policy are charged to Profit and Loss Account as an expense, thus reducing divisible profits and, in effect, charging the partners with the cost of the policy in their profit sharing ratio. No Joint Life Insurance Policy is opened in the books and nothing is shown in the Balance Sheet. At any time, the surrender value of policy represents a secret reserve. On the death of a partner, the cash received is debited to Bank Account and credited to Partners' Capital Accounts (including deceased partner) in the profit-sharing ratio. The cash so made available can be applied for payment to the executors of the deceased partner.

Summary of Accounting Entries

(a) For recording payment of premia

Joint Life Insurance Premium Account	Dr.	
To Bank Account		

(b) For closing Premium Account

Profit and Loss Account	Dr.	
To Joint Life Insurance Premium Account		

(c) For recording the receipts of policy money

Bank Account	Dr.	[Amount received]
To Joint Life Policy Account		

(d) For distributing policy money

Joint Life Policy Account	Dr.	
To All Partners' Capital Accounts		[Old ratio]

Instead of passing (c) & (d) entries above, we can pass a combined entry:

Bank Account	Dr.	[Amount received]
To All Partners' Capital Accounts		[Old ratio]

(b) Taking Surrender Value into Account

This method can be divided into: (a) Joint Life Policy Method; and (b) Joint Life Policy Reserve Method.

(a) Joint Life Policy Method : Under this method, a Joint Life Policy Account is opened in the books. The premia are debited to Joint Life Policy Account as and when paid. At the end of each year, the book value of the policy is adjusted to its surrender value by transferring the difference between the premium paid and the increase in the surrender value to Profit and Loss Account. The policy will appear in the Balance Sheet at its ***Surrender Value*** on the assets side.

Summary of Accounting Entries

(a) For recording payments of premia

Joint Life Policy Account	Dr.	
To Bank Account		

(b) For adjusting the book value of policy with its surrender value

Profit and Loss Account Dr.
To Joint Life Policy Account

(c) For realization of Policy money

Bank Account Dr.
To Joint Life Policy Account

(d) The credit balance of Joint Life Policy Account is transferred to Partners' Capital Accounts in the old Profit-Sharing ratio.

(b) Joint Life Policy Reserve Method : Under this method also a Joint Life Policy Account is opened in the books, to which the premia are debited as and when paid. At the end of each year, an amount equal to annual premium is debited to Profit and Loss Appropriation Account and credited to Joint Life Policy Reserve Account. The book value of the policy is adjusted to its surrender value by a transfer from Joint Life Policy Reserve Account. After adjustment, the Joint Life Policy will appear on the assets side of the Balance Sheet at surrender value and Joint Life Policy Reserve will also appear in the Balance Sheet, but on the liabilities side. On the death of a partner, the money received under the policy will be debited to Bank Account and credited to Joint Life Policy Account. The ultimate balance of the Joint Life Policy Account is transferred to Joint Life Policy Reserve Account. The final balance of the Joint Life Policy Reserve Account is transferred to Partners' Capital Accounts (including the deceased) in the old profit-sharing ratio.

Summary of Accounting Entries

(a) For recording payment of premia

Joint Life Policy Account Dr.
To Bank Account

(b) For appropriation of amount equal to annual premium

Profit and Loss Appropriation Account Dr.
To Joint Life Policy Reserve Account

(c) For adjusting the difference between the premium paid and the increase in the surrender value

Joint Life Policy Reserve Account Dr.
To Joint Life Policy Account

(d) For realization of policy money

Bank Account Dr.
To Joint Life Policy Account

(e) For transferring the credit balance of Joint Life Policy Account

Joint Life Policy Account Dr.
To Joint Life Policy Reserve Account

(f) The final balance of the Joint Life Policy Reserve Account is transferred to Partners' Capital Accounts in the old profit-sharing ratio (including deceased partner)

Individual Policies

Instead of joint life policy, partners may take individual policies for each partner. In the event of the death of a partner, the policy of the deceased partner will mature and the firm is entitled to the full value of the policy. In such a case, the deceased partner's legal representatives will be entitled to the proportional share of: (a) the total value of the policy matured; plus (b) surrender values of the other policies.

(ii) Ascertainment of share of profit from the date of last Balance Sheet to the date of death

The executors of the deceased partner are entitled to a share of profit earned by the firm from the date of last Balance Sheet and to the date of death. The profits of this period will be calculated on the basis of the provision of the partnership deed. Generally, the following two methods are followed for finding out the profit of the said period: (a) on the basis of time; and (b) on the basis of turnover.

(a) On the Basis of Time: Under this method, profits of the year is distributed between the pre-death period and post-death period on time basis assuming that profits have been accrued evenly throughout the year. The pre-death period's profit is distributed among all the partners (including deceased) in the old profit-sharing ratio.

Example: A, B & C were partners sharing profits and losses in the ratio of 3:2:1. On 1st March 2015, C died. The average profits of the firm for the last four years were ₹ 72,000. Assume the date of closing to be 31st December every year.

C's share of profit is calculated as follows:

Total profit for the year	₹ 72,000
Pre-death period's profit (2 months)	₹ 12,000
Post -death period's profit (10 months)	₹ 60,000
C's share of profit 1/6 of ₹ 12,000	₹ 2,000

(b) On the Basis of Turnover: Under this method, profit for the year is distributed on the basis of turnover between pre-death period and post-death period. The pre-death period's profit is divided among all partners (including the deceased) in the old profit-sharing ratio.

Example: X, Y & Z are equal partners. On 30th June 2014, X died. The profit for the year ended on 31st December 2014 is ₹ 60,000. The total turnover for the year 2014 is ₹ 6,00,000. Turnover up to 30th June 2014 is ₹ 4,50,000.

X's share of profit is calculated as follows:

Total Profit for the year	₹ 60,000
Pre-death period's profit = 60,000 x 4,50,000/6,00,000	₹ 45,000
X's share of profit 1/3 of ₹ 45,000	₹ 15,000

Mode of Payment

Similar to that of 'Retirement of a Partner'.

Illustration 1

X, Y & Z are partners sharing profits and losses in the ratio of 2:2:1. On 1st January 2012, they took out a joint life policy of ₹ 1,00,000. Annual premium of ₹ 5,000 was payable on 1st January each year. Last premium was paid on 1st January 2015. Y died on 1st March, 2015, and policy money was received on 31st March, 2015.

The surrender value of policy as on 31st December each year were as follows :

2012 — Nil ; 2013 — ₹ 1,000; 2014 — ₹ 2,500.

Show necessary accounts and Balance Sheet as on 31st December, each year, assuming that:

1. The premium is charged to Profit and Loss Account every year.
2. The premium is debited to Joint Life Policy Account and the balance of the Joint Life Policy Account is adjusted every year to its surrender value.
3. The premium is debited to Joint Life Policy Account and a sum equal to premium is debited to Profit and Loss Appropriation Account and credited to Joint Life Policy Fund.

Solution

Case 1 : In this case, premium paid is charged to Profit and Loss Account every year, so nothing will appear in the Joint Life Policy Account and in the Balance Sheets of 2012; 2013 and 2014.

However, in 2015 the Joint Life Policy Account will appear as follows:

The following is the Balance Sheet of V. Fishy & Co. as at 31st December, 2014.

Balance Sheet as at 31st December, 2014

Liabilities	₹	Assets	₹
Capital : Mahseer	4,100	Machinery	5,000
Salmon	4,100	Furniture	2,800
Carp	4,500	Fixture	2,100

General Reserve	1,500	Cash		1,500
Creditors	2,350	Stock		950
		Debtors	4,500	
		Less: Provision for Bad Debts	300	4,200
	16,550			16,550

Carp died on 3rd January, 2015 and the following agreement was to be put into effect :

(a) Assets were to be revalued : Machinery to ₹ 5,850; Furniture to ₹ 2,300; Stock to ₹ 750.

(b) Goodwill was valued at ₹ 3,000 and Carp was to be credited with his share, without using a Goodwill Account.

(c) ₹ 1,000 was to be paid away to the executors of the dead partner on 5th January, 2015.

You are required to show :

(i) The Journal Entry for Goodwill adjustment.

(ii) The Revaluation Account and Capital Accounts of the partners.

(iii) Which account would be debited and which account credited if the Provision for Bad Debts in the Balance Sheet was to be found unnecessary to maintain at the death of Carp ?

Solution

Workings **(i) Statement Showing the Required Adjustment for Goodwill**

Particulars		Mahseer	Salmon	Carp
Right of goodwill before death (1 : 1 : 1)*	(₹)	1,000	1,000	1,000
Right of goodwill after death (1 : 1)*	(₹)	1,500	1,500	—
Gain (+) / Sacrifice (–)	(₹)	(+) 500	(+) 500	(–) 1,000

* Profit sharing ratio is equal before or after the death of Carp because nothing has been mentioned in respect of profit-sharing ratio.

In the books of the firm

Journal **Dr. Cr.**

To Stock A/c (₹ 950 – 750)	200		
To Partners' Capital A/cs : (Mahseer—₹ 50; Salmon—₹ 50; Carp—₹ 50)	150		
	850		850

Dr. Partners' Capital Account Cr.

Particulars	Mahseer	Salmon	Carp	Particulars	Mahseer	Salmon	Carp
To Carp Capital A/c (Goodwill)	500	500	—	By Balance b/d	4,100	4,100	4,500
To Cash A/c	—	—	1,000	By General Reserve A/c	500	500	500
To Carp Executors A/c	—	—	5,050	By Revaluation A/c (Profit)	50	50	50
To Balance c/d	4,150	4,150	—	By Mahseer Capital A/c (Goodwill)	—	—	500
				By Salmon Capital A/c (Goodwill)	—	—	500
	4,650	4,650	6,050		4,650	4,650	6,050

(iii) Provision for Bad Debts Account is a credit balance. To close this, this account is to be debited. It becomes a gain for the partners. Therefore, either Partners' Capital Accounts (including Carp) or Revaluation Account is to be credited.

Illustration 5

Bimla and Nutan were partners. The partnership deed provides inter alia :

(i) That the accounts be balanced on 31st December each year.

(ii) That the profits be divided as follows :
Bimla : one-half; Nutan : one-third; and carried to Reserve Account : one-sixth.

(iii) That in the event of death of a partner, his executor will be entitled to the following :
(a) the capital to her credit at the date of death; (b) her proportion of profit to date of death based on the average profits of the last three completed years; (c) her share of goodwill based on three years' purchases of the average profits for the three preceding completed years.

Trial Balance on 31st December, 2014

Particulars	Dr. (₹)	Cr. (₹)
Bimla Capital		90,000
Nutan Capital		60,000
Reserve		30,000
Bills Receivable	50,000	
Investments	40,000	
Cash	1,10,000	
Creditors		20,000
	2,00,000	2,00,000

The profits for the three years were : 2012 : ₹ 42,000; 2013 : ₹ 39,000; and 2014 : ₹ 45,000. Nutan died on 1st May, 2015. Show the calculation of Nutan's (i) Share of profits; (ii) Share of Goodwill; and (iii) Draw up Nutan's Executors Account as would appear in the firm's ledger transferring the amount to her Loan Account.

Solution

(i) Ascertainment of Nutan's Share of Profit	₹	(ii) Ascertainment of Value of Goodwill	₹
2012	42,000	2012	42,000
2013	39,000	2013	39,000
2014	45,000	2014	45,000
Total profit	1,26,000	Total profit for 3 years	1,26,000
Average profit	42,000	Average profit	42,000
4 Months' Profit	14,000	Goodwill—3 years' purchase of Average Profit	1,26,000
Nutan's Share in Profit (2/5th* of ₹ 14,000)	**5,600**	**Nutan's Share of Goodwill (*2/5 of ₹ 1,26,000)**	**50,400**

* Profit sharing ratio between Bimla and Nutan = 1/2 : 1/3 = 3 : 2. Therefore, Nutan's share of Profit = 2/5.

Dr. Nutan's Executors Account Cr.

Date	Particulars	₹	Date	Particulars	₹

Illustration 6

R, S and T were partners sharing profits and losses in the ratio of 5 : 3 : 2 respectively. On 31st December, 2013, their Balance Sheet stood as under :

Liabilities		₹	Assets	₹
Sundry Creditors		55,000	Leasehold	1,00,000
Reserve Fund		30,000	Patents	30,000
Capital Accounts :			Machinery	1,50,000
R	1,50,000		Stock	50,000
S	1,25,000		Debtors	40,000
T	75,000	3,50,000	Cash at Bank	65,000
		4,35,000		4,35,000

T died on 1st May, 2014. It was agreed that :

(a) Goodwill be valued at $2^1/_2$ years purchase of last four years' profits which were : 2010 — ₹ 55,000; 2011 — ₹ 50,000; 2012 — ₹ 60,000 and 2013 — ₹ 75,000.

(b) Machinery be valued at ₹ 1,40,000. Patents be valued at ₹ 40,000; Leasehold be valued at ₹ 1,25,000 on 1st May, 2014.

(c) For the purpose of calculating T's share in the profits of 2014, the profits in 2014 should be taken to have accrued on the same scale as in 2013.

(d) A sum of ₹ 21,000 to be paid immediately to the executors of T and the balance to be paid in four equal half-yearly instalments together with interest @ 10% interest per annum.

Pass the necessary journal entries to record the above transactions. Also show T Capital Account and T's Executors Account for 2014.

Solution

Average profit	60,000		
Goodwill ($2^1/_2$ years purchase of average profit)	1,50,000		

Illustration 7

The following was the Balance Sheet of A, B and C who share profits in the ratio of 1:2:2 as on 31.12.2014. C died on 31st March, 2015. His account has to be settled under the following terms :

Liabilities	₹	Assets	₹
Sundry creditors	10,000	Debtors	25,000
Capital (A—10,000; B—20,000; C—20,000)	50,000	Machinery	20,000

General Reserve	5,000	Building	30,000
Investment Fluctuation Fund	3,000	Stock	10,000
Bad Debts Reserve	2,000	Cash at bank	5,000
Bank Loan	30,000	Investments	10,000
	1,00,000		1,00,000

Goodwill is to be calculated at the rate of 3 years' purchase on the basis of the average of 5 years' profit or loss. Profit for January to March 2015 is to be calculated proportionately on the average profit of 3 years. The profits are: 2010 ₹ 3,000; 2011 ₹ 7,000; 2012 ₹ 10,000; 2013 ₹ 14,000; and 2014 Loss ₹ 12,000. During 2014, a moped costing ₹ 4,000 was purchased and debited to Travelling Account on which depreciation is to be calculated @ 25%. Other values agreed on assets are: Building ₹ 37,000; and Machinery ₹ 25,000. Investment is valued at ₹ 8,000. Debtors are considered good.

Prepare new Balance Sheet of the firm, necessary Journal Entries and Capital Accounts of the partners.

		Debtors	25,000
		Bank	5,000
		Profit and Loss Suspense A/c	500
	1,13,500		1,13,500

Working Notes :

(1) Ascertainment of Goodwill	₹	**(2) Ascertainment of C' share of profit for Jan to Mar 2015**	₹
2010	3,000	2012	10,000
2011	7,000	2013	14,000
2012	10,000	2014*	(–) 9,000
2013	14,000	Total profit for 3 years	15,000
2014*	(–) 9,000	Average profit	5,000
Total profit	25,000	3 months' profit	1,250
Average profit	5,000	C' share in profit	500
Goodwill (3 years' purchase of Average profit)	**15,000**		

*Loss 2014—₹ 12,000; Less cost of moped—₹ 4,000; Add: Depreciation 25% = ₹ 1,000; So actual loss of 2014 = ₹ 9,000.

Illustration 8

A, B and C were in partnership sharing profits and losses in the ratio of 5 : 4 : 3 respectively. A died on 31.12.2014, on which date the Balance Sheet of the firm was as under:

Liabilities	₹	Assets		₹
Capital Accounts:		Leasehold Premises	40,000	
(A—₹ 42,500; B—₹ 30,000; C—₹ 22,500)	95,000	Less: Accumulated depreciation	4,000	36,000
Current Accounts:		Plant	46,000	
(A—₹ 4,250; B—₹ 6,500; C—₹ 5,750)	16,500	Less: Accumulated depreciation	13,500	32,500
Loan Account: A	20,000	Stock		27,000
Creditors	21,250	Debtors	21,000	
		Less: Provision for doubtful debts	3,750	17,250
		Bank		40,000
	1,52,750			1,52,750

B and C decided to carry on the business sharing profits and losses in the ratio of 7 : 5 respectively. The following adjustments were made on 31.12.2014:

(a) Plant, stock and debtors were valued at ₹ 34,500, ₹ 24,300 and ₹ 16,850 respectively; (b) Valuer's charge of ₹ 700 was to be provided for; and (c) Goodwill was to be valued as equal to 3 years' purchase of super profits. The required return was to be calculated as 25% on partners' capital, current and loan accounts, and was to be set against weighted average profits of the last three years. The profits were: 2014 ₹ 52,000; 2013 ₹ 46,000; 2012 ₹ 45,250.

₹ 25,000 was repaid to A's executors on 1.1.2015, the balance owing to be a loan to the partnership.

Required: Necessary Ledger Accounts and the Balance Sheet on 1.1.2015.

Solution

Working Notes: **(a) Ascertainment of Goodwill and the Required Adjustment**

Year	Profit (₹)	Weight	₹	
				Capital + Current + Loan Accounts
2012	45,250	1	45,250	= ₹ 95,000 + ₹ 16,500 + ₹ 20,000 = ₹ 1,31,500.
2013	46,000	2	92,000	Required return = 25% x ₹ 1,31,500 = ₹ 32,875.
2014	52,000	3	1,56,000	Weighted average profit ₹ 48,875
		6	2,93,250	Less: Required return ₹ 32,875
Weighted average profit ₹ 2,93,250/6 = ₹ 48,875.				₹ 16,000
				Therefore, goodwill is ₹ 16,000 x 3 = ₹ 48,000.

Partners		A	B	C

Illustration 9

A, B and C were partners in a firm sharing profits and losses in the ratio of 3 : 2 : 1. C died on 28th February, 2015. The Balance Sheet of the firm as on that date was as follows :

Liabilities	₹	Assets	₹
A's Capital A/c	1,20,000	Plant and Machinery	1,20,000
B's Capital A/c	80,000	Furniture and Fittings	75,000
C's Capital A/c	40,000	Investments	20,000
A's Current A/c	8,000	Stock-in-Trade	32,000
B's Current A/c	2,500	Sundry Debtors	25,000
Reserve	30,000	Bills Receivable	11,000
Bills Payable	17,000	Cash at Bank	18,500
Sundry Creditors	20,000	Cash in Hand	11,000
		C's Current A/c	5,000
	3,17,500		3,17,500

The following decisions were taken by the surviving partners :

(a) Goodwill is valued at ₹ 30,000.

(b) A Provision for Bad Debts is to be raised at 5% on debtors.

(c) While Plant and Machinery to be depreciated by 10%, Furniture is to be appreciated by 5%.

(d) Revised value of stock-in-trade will be ₹ 26,500.

(e) The fixed capital method is to be converted into the fluctuating capital method by transferring the Current Account balances to the respective Partners' Capital Accounts.

Prepare a Revaluation Account, Capital Account of the three partners, showing the necessary adjustment at C's death, and prepare C's Executors Account to show that C's Executor was paid off in two half-yearly equal instalments plus the interest at 10% p.a. on the unpaid balance, the first instalment was paid on 31st August, 2015.

				By B Current A/c	—	25,000	—
	16,000	52,000	10,000		16,000	52,000	10,000

Dr. **Joint Life Policy Account** **Cr.**

Particulars	₹	Particulars	₹
To Balance b/d	6,000	By Bank A/c—policy value	35,000
To Bank A/c—premium paid in February 2015	2,000		
To Partners' Current A/cs (A—₹ 13,500; B—₹ 9,000; C—₹ 4,500)	27,000		
	35,000		35,000

Working Notes :

(1) Calculation of Goodwill

Total profit for the last 4 years	₹	
2014 (₹ 14,000 – ₹ 2,000)	12,000	Average profit = ₹ 60,000 / 4 = ₹ 15,000
2013	16,000	Goodwill is 3 years' purchase of the average profit of last 4 years = ₹ 15,000 x 3 = ₹ 45,000.
2012	20,000	
2011	12,000	
	60,000	

(2) Adjustment for Goodwill

Particulars		A	B	C
Right of goodwill before death (3 : 2 : 1)	(₹)	22,500	15,000	7,500
Right of goodwill after death (3 : 1)	(₹)	33,750	—	11,250
Gain (+) / Sacrifice (–)	(₹)	(+) 11,250	(–) 15,000	(+) 3,750

(3) Calculation of B's share of profits
Profit for 2014 — ₹ 12,000. Profit for 3 months — ₹ 12,000 / 12 x 3 = ₹ 3,000. B's share is 2/6th of ₹ 3,000 = ₹ 1,000.

(4) After adjustment of bad debts, the balance of Profit and Loss Account comes to ₹ 18,000 (₹ 20,000 – ₹ 2,000).

Illustration 11

A, B and C share profits and losses in the ratio of 5:3:2. Partner A died on February 20, 2015. The Profit and Loss Account for the period up to the date of death and the Balance Sheet as on that date were prepared.

Balance Sheet as on 20th February, 2015

Liabilities	₹	Assets	₹
Capital Accounts: (A—12,000; B—16,000; C—12,000)	40,000	Land	6,000
		Machinery	35,000
Loan from A	5,000	Furniture	6,000
General Reserve	7,000	Stock	9,000
Creditors	22,000	Debtors	15,000
		Bank	3,000
	74,000		74,000

In addition to the assets shown above, the firm had three life policies in the name of each partner, at an insured value of ₹ 20,000 each, the premiums of which were charged to the Profit and Loss Account.

According to the partnership deed, on the death of a partner, the assets and liabilities are to be revalued by a valuer. The revalued figures were:

1. Land ₹ 21,000; machinery ₹ 45,000; debtors are subject to a provision for doubtful debts at 10%; and furniture ₹ 7,000.
2. Provision for taxation to be created for ₹ 1,500.
3. Death claim for policy in the name of A realised in full and the surrender value of the other two policies were ₹ 7,500 each.

The business will be continued by B and C, henceforth sharing profits and losses equally. The net balance due to A is transferred to a Loan Account, which will be paid off later.

Show the Capital Account, Revaluation Account and the New Balance Sheet of the firm.

R, S and T were partners sharing profits and losses in the proportion of 1/2, 1/3 and 1/6 respectively. T expired on 31st May, 2014.

Partnership agreement provided that:

(a) Interest on fixed capital to be allowed at 12% p.a.

(b) T to be Credited with salary of ₹ 18,000 p.a.

(c) On the death of any of the partners, his heir will receive in addition to the balance in the Fixed Capital and Current Account:

(i) Salary and interest on Capital.

(ii) Share of proportionate profit from last Balance Sheet to the date of death based on annual average profits of last 3 years (after interest on capital and salary to the partners).

(iii) Share of goodwill calculated at twice the average profits of last 3 years (before interest on capital and salary to the partners).

(iv) Share of profit on joint assurance policy.

Following further information is available :

	(A) Fixed Capitals on 31.3.2014	(B) Current Accounts (Cr.) 31.3.2014
R	₹ 3,00,000	₹ 50,000
S	₹ 2,00,000	₹ 10,000
T	₹ 1,00,000	₹ 20,000

(C) Joint Life Policy—₹ 1,00,000.

(D) There is no change in capital and current accounts since 31.3.2014.

(E) Joint Life Policy realised ₹ 1,50,000 (on 15.6.2014, amount due to T paid on receipt of policy amount.)

(F) Profits (before interest and salary) were :
2013-14—₹ 1,24,000; 2012-13 — ₹ 1,20,000; 2011-12—₹ 80,000; 2010-11—₹ 1,30,000.

(G) The firm closes its books on 31st March, decided to continue the firm and not to raise goodwill.

Show the following accounts in the books of the firm relating to the above transactions:
(a) Current Accounts of partners;
(b) Profit and Loss Adjustment Account; and

Right of goodwill after death (3 : 2)	₹	1,29,600	86,400	—
Gain (+) / Sacrifice (–)	₹	(+) 21,600	(+) 14,400	(–) 36,000

Unsettled Accounts of A Deceased Partner

As per the provision of Section 37 of the Indian Partnership Act:

"Where any member of a firm has died or otherwise ceased to be a partner, and the surviving or continuing partners carry on the business of the firm with the property of the firm without any final settlement of accounts as between them and the outgoing partner or his estate, then, in the absence of a contract to the contrary, the outgoing partner or his estate is entitled at the option of himself or his representatives to such share of the profits made since he ceased to be a partner as may be attributable to the use of his share of the property of the firm or to interest at the rate of six per cent per annum on the amount of his share in the property of the firm".

Illustration 13

The following is the Balance Sheet of A, B and C as on 31.12.2013, sharing profits in the ratio 4:3:1.

Liabilities	₹	Assets	₹
Capital Account — A	1,00,000	Property and Assets	2,28,000
Capital Account — B	70,000	Joint Survivorship Policy	32,000
Capital Account — C	20,000	Bank	50,000
Creditors	1,20,000		
	3,10,000		3,10,000

On 1.1.2014, D was admitted as a partner, entitling him to 1/5th share of the profit. D paid ₹ 30,000 on account of capital and also ₹ 20,000 as his share of Goodwill (the latter sum to remain in the business.)

On 30.6.2014, A died. The joint survivorship policy realised ₹ 50,000. The share of the deceased partner in the goodwill of the firm was determined at ₹ 36,000.

The Profit and Loss Account for the period ending 30.6.2014 disclosed a profit of ₹ 45.000.

The surviving partners carried on the business, profit-sharing ratio remains unchanged. Net profit for the period from 1.7.2014 to 31.12.2014 amounted to ₹ 33,000.

Drawings of the partners were:	A	B	C	D
For 6 months upto 30.6.2014 (₹)	13,000	10,000	4,000	7,500
For 6 months upto 31.12.2014 (₹)	Nil	8,000	5,000	7,000

A sum of ₹ 50,000 was advanced by B as loan to facilitate payment in full on 1.12.2014 of the deceased partner's share.

Show the Partners' Capital Accounts and draft the Balance Sheet as on 31.12.2014. The Balances of 'Creditors' and 'Property and Assets' as on 31.12.2014 were ₹ 1,17,000 and ₹ 2,37,000 respectively.

Solution

To Balance c/d	—	70,182	16,977	17,954	By Share of profit A/c (Note 3)	16,387	8,182	2,727	5,454
	1,76,387	78,182	21,977	24,954		1,76,387	78,182	21,977	24,954

Balance Sheet as at 31st December, 2014

Liabilities	₹	Assets	₹
Capital Account — B	70,182	Property and Assets	2,37,000
Capital Account — C	16,977	Bank (balancing figure)	35,113
Capital Account — D	17,954		
Loan from B	50,000		
Creditors	1,17,000		
	2,72,113		2,72,113

Working Notes : **(1) Calculation of new profit-sharing ratio after D's admission**.

D was admitted for 1/5 share. The balance 4/5 share will be enjoyed by A, B & C in the ratio 4:3:1. Therefore, the new ratio will be: A = 4/5 x 4/8 = 16/40; B = 4/5 x 3/8 = 12/40; C = 4/5 x 1/8 = 4/40; D = 1/5 = 8/40; A : B : C : D = 4 : 3 : 1 : 2.

Dr. (2) Profit & Loss Appropriation Account for 6 months upto 31st December, 2014 Cr.

Particulars	₹	Particulars	₹
To A Capital (share of profit u/s 37)	16,387	By Net profit	33,000
To Interest on B Loan @ 6% for ₹ 50,000 for 1 month	250		
To Partners' Capital A/cs (A —8,182; C — 2,727; D — 5,454)	16,363		
	33,000		33,000

(3) **Profits for 5 months** = ₹ 33,000/6 x 5 = ₹ 27,500; Ratio of capital = 160 : 69.75 : 19.25 : 19.50; So A's share of profit for unsettled accounts = (27,500 x 160)/268.50 = ₹ 16,387.

(4) **Interest on B's loan** @ 6% p.a. is payable for one month as per Indian Partnership Act, 1932.

Illustration 14

A and B have been in partnership business for some years, sharing profits in the proportions of 3/5th and 2/5th respectively, after salary entitlements of ₹ 8,000 and ₹ 12,000 per annum respectively. Accounts are made upto 30th June in each year.

Their partnership agreement provides, on the death of a partner for : (i) revaluation of the firm's assets — net gain or loss to be dealt with in the capital accounts in the profit-sharing ratio; (ii) the amount due to a deceased partner's personal representatives to be the amount standing to the credit of his Capital Account, including salary and profits to date of death, less drawings on account; (iii) ₹ 10,000 to be paid immediately and the balance one year after death; and (iv) an annuity of ₹ 6,000 payable half-yearly in arrears to a deceased partner's widow.

A died on 31.12.2013, when the lease of the partnership premises was deemed to be worth ₹ 40,000, goodwill ₹ 25,000 and all other assets at their book values. Non-profit life insurance policies had been taken out on each partner's policy, being debited to him. A's life was insured for ₹ 50,000 and B's for ₹ 20,000. The surrender value of the policy on B's life on 31.12.2013 was ₹ 2,200, and the benefit thereof was assigned to him at that value by A's personal representatives.

On 31.3.2014, C was taken into partnership by B on the terms that he should : (i) introduce ₹ 25,000 as partnership capital; and (ii) receive 1/5th share of profits, after charging the annuity to A's widow, with no provision for partners' salaries.

Profits and losses are assumed to accrue evently throughout the year. The partnership Trial Balance as on 30.6.2014 was as follows :

Particulars	Dr. (₹)	Cr. (₹)	Particulars	Dr. (₹)	Cr. (₹)
Lease	15,000		Capital Account — A (30.6.2013)		37,000
Stock on 30th June, 2014	65,000		Capital Account — B (30.6.2013)		12,900
Gross trading Profit for year ended 30.6.2014		1,82,000	Sundry Debtors	33,000	
Office salaries and expenses	82,000		Sundry Creditors		41,000
Life Assurance Policy Premium :			Cash paid in by C		25,000
On A's life, paid in Nov., 2013	650		Cash paid to personal representative of A	10,000	
On B's life, paid in May, 2014	250		Partners' Drawings — A	27,000	
Cash from life assurance policy on A's life		50,000	Partners' Drawings — B	46,000	
Annuity to A's widow, paid on 30.6.2014	3,000		Partners' Drawings — C	5,000	
Balance at bank	61,000		TOTAL	3,47,900	3,47,900

You are required to prepare : (a) the Capital Accounts of partners and the account of the personal representative of A, covering the year ended 30.6.2014; (b) the Partnership Balance Sheet as on 30.6.2014.

Solution

Dr. Partners' Capital Accounts Cr.

Particulars	A	B	D	Particulars	A	B	D
To Bank A/c — Drawings	27,000	46,000	5,000	By Balance b/d	37,000	12,900	—
To Insurance Premium :				By Revaluation A/c	15,000	10,000	—
on A's life (See Note)	—	650	—	By Goodwill A/c	15,000	10,000	—
on B's life	—	250	—	By Salaries A/c (upto 31.12.2013)	4,000	6,000	—
To Executor of A A/c	—	2,200	—	By Sh. of Profit (upto 31.12.2013)	24,000	16,000	—

To Executor of A A/c	68,000	—	—	By Bank A/c — Policy of A	—	50,000	—
(final claim of A)				By Sh. of Profit (upto 31.3.2014)	—	23,500	—
To Balance c/d	—	98,100	24,700	By Sh. of Profit (upto 30.6.2014)	—	18,800	4,700
	95,000	1,47,200	29,700		95,000	1,47,200	29,700

Tutorial Note : Here life insurance policy has been taken out on each partner's life for the benefit of other. It means on the death of A, B is to get the policy money. Conversely on B's death, A will get the policy money. Again insurance premium of A's policy to be borne by B and Premium on B's Policy to be borne by A. A died before the payment of premium of B's policy, so it is payable by B.

Current Account — B	200	340	Bank	2,840
Creditors		820	Current Account — C	100
		26,160		26,160

A died suddenly on 31.10.2014.

The partnership agreed provides that in the event of the death of a partner, the sum to be paid to his estate will be the amount of his capital and current account balances at the last financial year and adjusted by his share of profit or loss since that date together with his share of goodwill. A formula for calculation of goodwill is given, and its application produced figure of ₹ 7,500. No goodwill account is to remain in the books after any change of the partnership constitution.

The stock value at 31st October has been calculated and all other accounts balanced off, including provisions for depreciation, accrued expenses and prepaid expenses. This results in the following position at 31st October:

Buildings ₹ 17,000; Equipment (including additions ₹ 400) ₹ 3,480; Stock ₹ 1,100; Debtors ₹ 2,230; Bank balance ₹ 3,370; Creditors ₹ 980.

There were no additions to, or reductions of, the capital accounts during the four months, but the following drawings have been made : A ₹ 2,000; B ₹ 1,600; C ₹ 1,800.

B has also been agreed that the share should be repaid in three equal instalments, the first payment being made as on the day after the day of death.

The surviving partners agree that D (son of A) should be admitted as a new partner w.e.f 1st November, and it is agreed that he will bring into the business ₹ 4,000 as his capital together with a premium for his share of the goodwill using the existing valuation. The new profit-sharing agreement is B : 2/5th; C : 2/5th and D 1/5th.

Required : (a) Show the partnership Balance Sheet as at 1st November, 2014, on the assumption that the above transactions have been completed by that date.

Solution

Working Notes : (1) Statement showing the Profit for the period from 1.7.2014 to 31.10.2014

Particulars	₹
Combined capital as on 31.10.2014 (assets – liabilities) [₹ 17,000 + 3,480 + 1,100 + 2,230 + 3,370 – 980]	26,200
Add: Combined drawings for the period [₹ 2,000 + 1,600 + 1,800]	5,400
	31,600
Less: Combined capital as on 1.7.2014 (Capital and Current Accounts) [₹ 9,000 + 8,000 + 8,000 + 140 + 200 – 100]	25,240
Profit for the period	6,360

(2) Statement showing the Adjustment in regard to Premium for Goodwill

Particulars	A (₹)	B (₹)	C (₹)	D (₹)
Right of goodwill before A's death (1 : 1 : 1)	2,500	2,500	2,500	—
Right of goodwill after D's admission (2 : 2 : 1)	—	3,000	3,000	1,500
Premium to be received (–) / paid (+)	(–) 2,500	(+) 500	(+) 500	(+) 1,500

Dr. (3) Partners' Capital Accounts Cr.

Particulars	A	B	C	D	Particulars	A	B	C	D
To A Capital — goodwill	—	500	500	1,500	By Balance b/d	9,000	8,000	8,000	—
To Executors of A A/c	11,500	—	—	—	By B Capital — goodwill	500	—	—	—
To Balance c/d	—	7,500	7,500	4,000	By C Capital — goodwill	500	—	—	—
					By D Capital — goodwill	1,500	—	—	—
					By Bank A/c — capital & premium	—	—	—	5,500
	11,500	8,000	8,000	5,500		11,500	8,000	8,000	5,500

Dr. (4) Partners' Current Accounts Cr.

Particulars	A	B	C	Particulars	A	B	C
To Balance b/d	—	—	100	By Balance c/d	140	200	—
To Drawings	2,000	1,600	1,800	By Share of Profit A/c	2,120	2,120	2,120
To Executors of A A/c	260	—	—				
To Balance c/d	—	720	220				
	2,260	2,320	2,120		2,260	2,320	2,120

Balance Sheet as at 1st November, 2014

Liabilities		₹	Assets	₹
Capital Account — B	7,500		Buildings	17,000
Capital Account — C	7,500		Equipment	3,480
Capital Account — D	4,000	19,000	Stock	1,100
Current Account — B	720		Debtors	2,230
Current Account — C	220	940	Bank [₹ 3,370 + 5,500 – (1/3 x 11,760)]	4,950
Executors of A [2/3 x (₹ 11,500 + 250)]		7,840		
Creditors		980		
		28,760		28,760

Key Points

- Surrender value is the amount receivable on a life insurance policy that is cancelled before the end of its term.
- In case of a "without profits" policy, the holder will get only the amount specified in the policy. In case of a 'with profits' policy, the holder will get the amount specified in the policy *plus bonuses declared on each valuation.*

THEORETICAL QUESTIONS

1. What problems arise when a partner dies ? As an accountant, how will you deal with them?
2. Why do the partners take a Joint Life Policy ? What are the different methods adopted for accounting Joint Life Policy?
3. What is surrender value? When is it paid ?

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each statement or answer each question below.

1. Joint life policy premium will be treated as
   A a personal expenses of the partners
   B an operating loss of the firm
   C an expense of the firm
   D an appropriation of profit
2. At the time of death of a partner if there is undistributed profit in the Balance Sheet of the firm, it
   A will not be distributed amongst the partners
   B will be distributed in the capital ratio
   C will be distributed amongst the surviving partners only
   D will be distributed in the old profit sharing ratio amongST all the partners
3. Upon death, the amount of joint life policy should be distributed
   A amongst all partners in the old ratio
   B amongst continuing partners in the old ratio
   C to the executors of the deceased
   D amongst continuing partners in the new ratio
4. The executors of deceased partners are entitled to the share of goodwill as per the
   A agreement between the partners
   B profit sharing ratio
   C capital ratio
   D equally
5. Which of the following is true ?
   A Due to death of a partner, the profit sharing ratio between the old partners does not change
   B The death of a partner dissolves the old partnership firm
   C A joint life policy matures on the happening of the first death
   D The premium paid on a joint life policy is charged against capital of the partners
6. Which of the following is not true ?
   A When premium payable on the policy taken on the life of partners is treated as an asset, the amount of premium is debited to the joint life policy account and credited to bank account
   B When the premium paid on the policy taken on the life of partners is treated as an asset and reserve is to be maintained, then at the end of the accounting year, an amount equal to the premium is debited to profit and loss appropriation account
   C When the premium paid on the policy taken on the life of partners is treated as an asset and a joint life policy reserve is to be maintained, then the reserve account appears on the assets side of the balance sheet
   D Joint life policy reserve account is in the nature of an accumulated profit
7. Which of the following is true ?
   A A joint life policy is always shown as an asset
   B A joint life policy is never shown as an expense
   C A joint life policy reserve is an external transaction
   D The creation of a joint life policy reserve reduces the divisible profit
8. Which of the following is true ?
   A Revaluation account is unaffected when an unrecorded asset is taken over by the executors of a deceased partner
   B Revaluation account is debited at the decrease in the value of creditors at the death of a partner
   C Revaluation account is credited when an unrecorded asset is sold on the death of a partner
   D Revaluation account is unaffected when revaluation expenses are paid by a partner

PRACTICAL QUESTIONS

1. A and B sharing profits and losses in the ratio of 3 : 2 took out joint life policy on January 1, 2011 for ₹ 20,000. The annual premium payable on the policy was ₹ 2,000. The surrender value is nil in the first year but thereafter it increases by ₹ 1,600 per annum. On December 31, 2014 A dies. Show the Policy Account and Policy Reserve Account in the books of the firm from 2011 to 2014.
2. A and B, sharing profits in the ratio of 3 : 2, took out a joint life policy on 1st January, 2012 of ₹ 20,000 for 20 years paying annual premium of ₹ 1,000. The surrender values were : 2012 : ₹ nil; 2013 : ₹ 200; 2014 : ₹ 550; 2015: ₹ 970. B dies on 8th March, 2015 and claim was received on 30th April, 2015. Prepare Joint Life Policy Account and Joint Life Policy Reserve Account.
3. A and B are in partnership sharing profits and losses in the ratio 3 : 2. They insure their lives jointly for ₹ 75,000 at an annual premium of ₹ 3,500 to be debited to the business. B died three months after the date of the last Balance Sheet. According to the partnership deed the legal personal representatives of B are entitled to the following payments: (a) his capital as per the last Balance Sheet; (b) interest on above capital @ 3 per cent per annum to the date of death; (c) his share of profits to the date of death calculated on the basis of last year's profits; and (d) his drawings are to bear interest at an average rate of 2% on the amount irrespective of the period. The net profits for the last three years, after charging insurance premium, were ₹ 20,000, ₹ 25,000 and ₹ 30,000 respectively. B's capital as per last Balance Sheet was ₹ 40,000 and his drawings to the date of death were ₹ 5,000. Draw B's Account to be rendered to his representatives.
4. A, B and C carried on business in the partnership sharing profits as 3 : 2 : 1. The Balance Sheet on 31st December, 2014 showed their capitals to be : A ₹ 10,400; B ₹ 5,000; C ₹ 3,000. On 28th February, 2015 A died and you are required to prepare necessary accounts for presentation to his executors having regard to the following facts :
   (i) The firm had insured the partners' lives severally, A for ₹ 9,000; B for ₹ 4,800; and C for ₹ 2,400. The premiums have been charged to Profit and Loss Account and the surrender value on 28th February 2015 amounted in each case to one-fourth of the sum assured;
   (ii) Capital carried interest at 5% p.a.;
   (iii) A's drawings from 1st January, 2015 to the date of his death amounted to ₹ 1,200;
   (iv) A's share of profits for the portion of the current financial year for which he lived was to be taken at the sum calculated on the average of the last three completed years and Goodwill was to be valued on the basis of two years' purchase of the average profits of those three years. The annual profits were ₹ 9,200; ₹ 7,400 and ₹ 8,600 respectively.
5. A, B and C were partners sharing profits in the proportion of one-half, one-fourth and one-fourth respectively. Their Balance Sheet on 31st December, 2014 was as follows :

Liabilities	₹	Assets	₹
Sundry Creditors	4,000	Cash	1,000
A's Capital	10,000	Sundry Debtors	4,500
B's Capital	6,000	Stock-in-Trade	5,500
C's Capital	4,000	Loan to A	3,000
		Freehold Property	10,000
	24,000		24,000

A died on 1st January, 2015. The firm had affected an assurance of ₹ 10,000 on the joint lives of the three partners and the amount on the policy was realised on 1st February, 2015. According to the partnership agreement, the goodwill was to be calculated at two years' purchase of average profits of three completed years preceding the death or retirement of a partner. The deceased partner's share of capital and goodwill, etc., was paid out in cash on 1st March, 2015, the available cash balance being supplemented by a loan from the firm's bankers on the security of the freehold property. The net profits of the years 2012, 2013 and 2014 were ₹ 5,500, ₹ 4,800 and ₹ 6,600 respectively. You are required to show the Ledger Accounts of the partners and the Balance Sheet of B and C as it would stand after A's share is paid out. (Ignore interest)

6. A, B and C are partners sharing profits and losses in the proportion of 3 : 2 : 1 and their Balance Sheet on 31st December, 2014 stood as under :

Liabilities		₹	Assets	₹
Bills Payable		7,560	Cash in hand	250
Creditors		12,300	Bank	960
Reserve		3,000	Debtors	7,450
Capitals :			Bills Receivable	3,300
A	10,000		Stock	12,470
B	6,000		Investment	10,430
C	4,000	20,000	Buildings	8,000
		42,860		42,860

B died on 28th February 2015 and according to the deed of partnership, his executors are entitled to be paid as under:

(i) The capital to his credit at the time of his death and interest upon the time of his death at 6% p.a.

(ii) His proportionate share of Reserve.

(iii) His share of profit for the period based on the figure of the previous year.

(iv) Goodwill according to his share of profits to be calculated by taking twice the amount of the average profits of the last three years. The profits of the previous years were : 2012 : ₹ 7,800; 2013 : ₹ 9,000; and 2014 : ₹ 9,600.

The investments were sold for ₹ 16,200 and his executors were paid out. Pass the necessary Journal Entries and write the account of the executors of B.

7. The partnership agreement of a firm consisting of three partners A, B and C who share profits and losses in the ratio of 2 : 1 : 1 and whose fixed capital are ₹ 10,000; ₹ 6,000 and ₹ 4,000 respectively, provide as follows :

(a) That partners be allowed interest @ 10% p.a. on their fixed capitals, but no interest be allowed on undrawn profits or charged on drawings.

(b) That, upon the death of a partner, the goodwill of the firm be valued at two years' purchase of the average net profits (after charging interest on capital) for the three years to 31st December preceding the death of a partner.

(c) That an insurance policy of ₹ 10,000 each to be taken in individual names of each partner, the premium to be charged to the profit of the firm.

(d) That, upon the death of a partner, he be credited with his share of the profits, interest on capital, etc., calculated upon 31st December, following his death.

(e) That, the share of the partnership policy and goodwill be credited to a deceased partner as on 31st December following his death.

(f) That the partnership books be closed annually on 31st December.

A died on 30th September, 2014, the amount standing to the credit of his Current Account on 31st December, 2013, was ₹ 450 and from that date to the date of death he had withdrawn ₹ 3,000 from the business.

An unrecorded liability of ₹ 2,000 was discovered on 30th September, 2013. It was decided to record it and be immediately paid-off.

The trading results of the firm (before charging interest on capital) had been as follows : 2011 : profit ₹ 9,640; 2012: profit ₹ 6,720; 2013 : loss ₹ 640; and 2014 : profit ₹ 3,670.

Assuming the surrender value of the policy to be 20% of the sum assured, you are required to prepare an account showing the amount due to A's legal representative as on 31st December, 2014.

8. A and B are partners. The Partnership deed provides, ***inter alia***, that:

1. The accounts be balanced on December 31 every year.
2. The profits be divided 1/2 to A 1/3 to B and 1/6 carried to a Reserve Account.
3. In the event of the death of a partner, his executors be entitled to be paid out :

(a) the capital to his credit at the date of death;

(b) his portion of the reserve at the date of last Balance Sheet;

(c) his portion of profits upto the date of death based on the average profits of the last three completed years; and

(d) his portion of the total profit for the three preceding years by way of goodwill.

On December 31,2014, the Ledger Balances were :

	Dr.	Cr.
A Capital A/c		90,000
B Capital A/c		60,000
Reserve		30,000
Creditors		30,000
Bills Receivable	20,000	
Investment	50,000	
Cash	1,40,000	
	2,10,000	2,10,000

The profits of the three preceding years were: 2012—₹ 42,000; 2013—₹ 39,000; and 2014—₹ 45,000.

B dies on May 1, 2015. Show the account between the firm and B's executors as on May 1, 2015.

9. The firm of P, Q and R, who share profits and losses in the ratio of 2:2:1, took out, joint supervisorship policy on 10th January, 2012 for ₹ 25,000 in order to provide a fund for repayment of a deceased partner's share. The last annual premium of ₹ 625 was paid on 10th January, 2015 and Q died on 15th February, 2015.

The surrender values of the policy were as follows :

in 2012—Nil, in 2013—₹ 175, in 2014—₹ 300. The policy amount was realized in full on Q's death.

Show the Joint Life Policy Account in firm's books which are closed on 31st December, each year.

10. A and B entered into partnership on 1.1.2012, the former introducing a capital of ₹ 90,000 and the latter ₹ 30,000. They effect a policy of insurance for ₹ 45,000 upon their joint lives in order to enable the survivor, in case of death of one, to pay out in cash part of the other's interest. The net profits before charging interest on capital as at the beginning of each year at 6% p.a. and on drawings (averaged at 4% p.a.) were as follows:

Year	Net profit (₹)	A's Drawings (₹)	B's Drawings (₹)
2012	34,800	10,000	5,000
2013	37,628	12,000	7,000
2014	38,100	14,000	7,500

Profits and losses were divided between A and B in the ratio of 2:1 respectively. The annual insurance premium which is ₹ 3,600 is charged to profit and loss account as a business expense. On 31.3.2015, A died. According to the terms of the partnership deed, the deceased partner's executors are entitled to receive his share of the capital as it stood on 31.12.2014 plus the three months share of the profit, calculated upon the previous year's rate of profit and share of goodwill which is reckoned at two-thirds of the previous three years' profits after adjusting for interest on capital and drawings but without deducting the premiums paid on the joint life insurance policy.

Make up A's Account showing the amount for which B shall be liable to account to his executors.

Workings of adjusted net profits and computation of A's share of goodwill will be considered as a part of the answer. Calculations are to be made to the nearest rupee ignoring fractions, wherever arising.

11. For some years, X has been carrying on proprietorship business with a capital of ₹ 77,500 and his accounts are closed annually on 31st March.

On 1st April, 2012 Y joined him as a partner with 1/3rd interest in the profit and goodwill. Y introduced a sum of ₹ 40,000 on account of capital and it was agreed that X be credited with goodwill of ₹ 22,500.

The deed of partnership provided inter alia:

(a) Capital and Current Account kept separately; (b) Drawings be—X ₹ 3,600 per month, Y ₹ 2,000 per month including salary as mentioned below; (c) Y be allowed salary of ₹ 6,000 per annum; and (d) Interest be allowed on capitals at 5% per annum.

On the death of a partner, executors be entitled to: (a) Balance of capital and current accounts; (b) Interest on capital and salary upto the date of death; (c) Accruing share of profit to be based on the profits for the completed year immediately preceding thedate of death; and (d) Share of goodwill, the value of which is to be calculated at two years' purchase of the average profits (after charging interest on capital and partner's salary) for 3 completed years immediately precedingthe date of death.

Profits before charging interest on capital and partner's salaries were given as: Year ending 31st March, 2013, ₹ 67,000, year ending on 31st March, 2014—₹ 70,000; and year ending 31st March, 2015—₹ 77,000.

On 30th September, 2014 Y introduced additional capital of ₹, 16,000.

Y died on 30th June, 2015. It was ascertained that upto 31st March 2015, he had drawn the amount as mentioned in (b) above and from 1st April, 2015 to the date of death his drawings had been ₹ 5,500.

Prepare:

(i) Profit and Loss Appropriation Account for each of the three years ending 31st March, 2013, 2014, 2015;

(ii) Y's Capital and Current Accounts to show respective balances on 31st March, 2015; and (iii) A chart showing computation of the amount due to the executor of the deceased as on 30th June, 2015.

Accounting for Dissolution of the Firm

Introduction

Technically, a partnership is terminated or dissolved whenever a new partner is admitted or an old partner retires or dies. The formation or dissolution of a partnership, however, does not necessarily indicate that the business is to be discontinued. The business may be continued without interruption, if the remaining partners resolve in its favour.

The process of breaking up and discontinuing a Partnership business is called ***Dissolution of the firm***. The dissolution of the firm spells an end to the business.

Dissolution by the Partners

The partnership firm may be dissolved by the partners mutually for the following reasons:

1. A business may be formed for a fixed term or for a specific purpose, and is wound up at the end of that term or when that purpose has been achieved.
2. A sharp fall in sales revenue due to changes in technology and product obsolescence may force the partners to dissolve the firm.
3. A continuous high demand for firm's products may tempt the partners to dissolve the firm and to form a limited company for additional capital and limited liability.
4. Sudden death or retirement of a partner may force other partners to dissolve the firm.
5. The business of the firm may become illegal and it may be required to dissolve the firm.

Dissolution by the Court

Section 44 of the Indian Partnership Act states that:

At the suit of a partner, the court may dissolve a firm on any of the following grounds, namely :

(a) that a partner has become of unsound mind in which case, the suit may be brought as well by the next friend of the partner who has become of unsound mind as by any other partner;

(b) that a partner, other than the partner suing, has become in any way permanently incapable of performing his duties as partner;

(c) that a partner, other than the partner suing, is guilty of misconduct which is likely to affect prejudicially the carrying on the business, regard being had to the nature of the business;

(d) that a partner, other than the partner suing, willfully or persistently commits breach of agreements relating to the management of the affairs of the firm or the conduct of its business; or, otherwise so conduct himself in matters relating to the business that it is not reasonably practicable for the other partners to carry on the business in the partnership with him;

(e) that a partner, other than the partner suing, has in any way transferred the whole of his interest in the firm to a third party or has allowed his share to be charged under the provisions of rule 49 of Order XXI of the First Schedule to the Code of Civil Procedure, 1908; or has allowed it to be sold in the recovery of arrears of land-revenue or of any dues recoverable as arrears of land-revenue due by the partner;

(f) that the business of the firm cannot be carried on without a loss; or

(g) on any other ground which renders it just and emitable that the firm should be dissolved.

Steps in the Dissolution Process

1. The ***first step*** in the dissolution process is to prepare a Balance Sheet of the firm as on the date of dissolution. Where both the date of dissolution and the date of Balance Sheet are same, no fresh Balance Sheet is required to be prepared. At the time of preparing the Balance Sheet on the date of dissolution, the effect of all transactions between the date of last Balance Sheet and the date of dissolution must be taken into consideration. [***See Illustration 15, page 1.22***]
2. In the ***next step*** of the dissolution process, non-cash assets that are not acceptable for distribution in their present form are sold and converted into cash. If the realised sales value is more than the book value of the assets, there is a gain from the sale. If it is less than the book value, it will be a loss. Procedurally, gains and losses on the realisation of assets is collected in one account (known as Realisation Account). The balance of the Realisation Account is transferred to Partners' Capital/ Current Accounts in the agreed profit-sharing ratio before any cash is distributed to them. In the preceding chapters, we have seen that we prepare a Revaluation Account when the assets are retained in the partnership, on the occasion of admission or retirement or death. In case of dissolution, instead of a Revaluation Account, a Realisation Account is prepared because the assets are to be sold or realised.
3. The ***last step*** in the dissolution is to distribute the available cash to creditors and partners.

Settlement of Accounts

Section 48 of the Indian Partnership Act,1932 states that:

"In settling the accounts of a firm after dissolution, the following rules, subject to the agreement by the partners, shall be observed:

(a) Losses, including deficiencies of capital, shall be paid first out of profits, next out of capital, and lastly, if necessary, by the partners individually in the proportions in which they were entitled to share profits.

(b) The assets of the firm, including any sums contributed by the partners to make up deficiencies of capital, shall be applied in the following manner and order:
- (i) in paying the debts of the firm to third parties;
- (ii) in paying each partner rateably what is due to him from the firm for advances as distinguished from capital;
- (iii) in paying to each partner rateably what is due to him on account of capital; and
- (iv) the residue, if any, shall be divided among the partners in the proportions in which they were entitled to share profits."

Accounting Entries for Dissolution

On the dissolution of a partnership firm, the work that has to be done is divided into two sections :

(a) Realisation of assets and settlement of liabilities, and

(b) Settlement of the accounts of the partners.

(a) Realisation of Assets and Settlement of Liabilities

Whatever may be the reason for dissolving the partnership, the accounts have to be closed. A special account — called a ***Realisation Account*** — is used to record the closing transactions, showing the net gain or loss that has resulted from the realisation of assets and settlement of liabilities.

1. To close the various assets accounts

All the tangible assets appearing in the Balance Sheet (awaiting realisation) are all having debit balances. These assets are closed by transferring to the Realisation Account by crediting them at their respective book values. The following entry is passed:

Realisation Account	Dr.
To Land and Buildings Account	
To Plant and Machinery Account	
To Furniture and Fixture Account	
To Stock Account	
To Sundry Debtors Account	

In this connection, we are to remember the following:

(i) Cash or Bank Account will not be transferred to Realisation Account because they are not to be realised — they can be distributed in their present form instead. A separate Cash and Bank Account will be opened with the balance as appearing in the last Balance Sheet. Students should remember that bank overdraft will not be transferred to Realisation Account. However, Bank Loan Account must be transferred to Realisation Account.

(ii) Sometimes, in the Balance Sheet some assets are shown at their net realisable market values or some assets at their unexpired portion. The example for the former is:

Sundry Debtors	₹ 40,500
Less : Provision for doubtful debts	₹ 500
	₹ 40,000

The example for the other is provision for depreciation, which appears as under:

Asset (at Cost)	₹ 1,00,000
Less : Provision for depreciation	₹ 10,000
	₹ 90,000

In fact, the accounts like provision for doubtful debts or provision for depreciation, etc, are called ***Valuation Accounts*** or ***Contra-Asset Accounts***. They are having credit balances and they should appear in the liability side of a Balance Sheet. But they appear on the debit side as a deduction from the main Asset Account . The assets should be transferred to the debit side of the Realisation Account at the ***gross figures*** and provisions should be transferred to the credit side of the Realisation Account.

For example, to close Sundry Debtors and provisions for doubtful debts, following entries are to be passed:

Realisation Account	Dr. ₹ 40,500	
To Sundry Debtors Account		₹ 40,500
Provision for Doubtful Debts Account	Dr. ₹ 500	
To Realisation Account		₹ 500

Similarly, to close an asset and Provisions for Depreciation Account following two entries will be passed:

Realisation Account	Dr. ₹ 1,00,000	
To Plant and Machinery Account		₹ 1,00,000
Provision for Depreciation Account	Dr. ₹ 10,000	
To Realisation Account		₹ 10,000

2. To close the various outside liabilities accounts

The various outside liabilities awaiting final settlement are to be transferred to the Realisation Account at the book values. The following entry is passed:

Sundry Creditors Account	Dr.
Bills Payable Account	Dr.
Outstanding Expenses Account	Dr.
Bank Loan Account	Dr.
To Realisation Account	

3. When the assets are sold

The proceeds or the amounts received on the sale of the assets are credited to Realisation Account and debited to Cash or Bank Account.

The following entry is passed:

Cash/Bank Account	Dr.		
To Realisation Account			

4. When some of the assets are taken over by a partner/partners

One or more of the assets may be taken over by a partner or by the partners at agreed valuation. When a partner (partners) takes over any asset, the claim of Capital Account is reduced by the taken over value of the assets. . The following entry is passed:

Partner's Capital Account	Dr. [Agreed value]		
To Realisation Account			

5. When outside liabilities of the firm are settled

After realisation of assets, the outside liabilities must be paid off first. The following entry is passed:

Realisation Account	Dr. [Actual amount paid]		
To Cash/Bank Account			

6. When some of the assets are taken over by creditors

No entry is required to be passed for assets taken over by the creditors. The actual amount paid to creditors (after adjusting the agreed value of the assets) to be debited to Realisation Account. For example, amount due to the creditors is ₹ 50,000. The creditors agree to take over a machinery of ₹ 40,000 at an agreed value of ₹ 35,000. The balance amount paid to the creditors in cash.

In this case journal entry will be:

Realisation Account (₹ 50,000 – ₹ 35,000)	Dr.	₹ 15,000	
To Cash Account			₹ 15,000

7. When unrecorded liabilities are paid

At the time of dissolution, if a liability exists which has not been recorded in the books, will have a priority over payment to partners along with other creditors .

At the time of payment the following entry is to be passed:

Realisation Account	Dr.		
To Bank Account			

8. When one of the partners agrees to discharge a liability personally

Without paying off one of the creditors directly, one of the partners may take the responsibility to settle the creditors. In such a case, Realisation Account is debited and Partner's Capital Account is credited. The effect is that the claim of the partner against the firm is increased by the amount of liability assumed. The following entry will be passed:

Realisation Account	Dr. [Assumed amount of liability]		
To Partner's Capital Account			

9. When dissolution expenses are incurred

Some expenses are definitely to be incurred during the process of liquidation. This is a loss to the firm and each partner must share this loss. Dissolution expenses must have a priority over payment to creditors. When one of the partners takes the responsibility of meeting the realisation expenses, generally a fixed sum is credited to his Capital Account. In such a case, the partnership firm has nothing to do with the actual expenses incurred by the partner towards realisation expenses (unless otherwise agreed).

The following entry will be passed:

(i) Realisation Account	Dr.		
To Cash/Bank Account			
or			
(ii) Realisation Account	Dr. [Agreed amount]		
To Partners' Capital Accounts			

10. For closing the Realisation Account

After passing all the above entries the Realisation Account is balanced and the balance is transferred to the Partners' Capital Accounts in their profit-sharing ratio. If a credit balance exists in the Realisation Account, it shows a net profit on realisation. It will be a net loss on realisation, when it shows a debit balance. The following entry will be passed according to the situation:

(i) For Profit		*(ii) For Loss*	
Realisation Account	Dr.	Partners' Capital Accounts	Dr.
To Partners' Capital Accounts		To Realisation Account	

(b) Settlement of the Accounts of the Partners

After closing the Realisation Account and transferring the balance to the Partners' Capital Accounts, the next step is to settle the accounts of the partners among themselves. Since all the tangible assets and liabilities accounts are closed, the Balance Sheet leaves only the following accounts:

Liabilities	₹	Assets	₹
Partners' Capital A/cs		Preliminary Expenses A/c	
Partners' Current A/cs		Advertisement Suspense A/c	
Partners' Loan A/cs		Profit & Loss A/c (Dr.)	
General Reserve		Partners' Capital A/cs (overdrawn)	
Investment Fluctuation Fund A/c		Partners' Current A/cs (overdrawn)	
Joint Life Policy Fund A/c		Partners' Loan A/cs	

1. First Partners' Capital Accounts are to be opened with the balances as are appearing in the Balance Sheet on the date of dissolution. When the partners are maintaining ***fixed capital method***, Current Accounts balances are closed by transferring to the respective Capital Accounts of the Partners by passing the following entry:

   Partners' Current Accounts Dr.
   To Partners' Capital Accounts

   For a debit Current Account balance, the entry will be:

   Partners' Capital Accounts Dr.
   To Partners' Current Accounts

2. Secondly, if there is any Reserve/Joint Life Policy/Investment Fluctuation Fund or Profit or Loss Account (Cr.) balance in the Balance Sheet, these should be transferred to the Partner's Capital Accounts in the profit-sharing ratio. The entry will be:

   Reserve Fund/Profit and Loss Account/Investment Fluctuation Fund Account Dr.
   Joint Life Policy Fund Account Dr.
   To Partners' Capital Accounts

Conversely, if there are any fictitious assets in the Balance Sheet like Profit and Loss Account (Dr.) balance, preliminary expenses, advertisement suspense, etc, these should be debited to Partners' Capital Accounts in the profit-sharing ratio. The entry will be:

Partners' Capital Accounts Dr.
To Preliminary Expenses Account
To Advertisement Suspense Account
To Profit and Loss Account (Dr.)

3. If the Partner has advanced any loan to the business, a Partner's Loan Account will be opened with the balance appearing in the Balance Sheet.
4. Finally, the Capital Accounts of the Partners are to be closed. The way this is done depends on the solvency of the partners. Following are the three cases to be considered in this regard. The procedure of closing the Partners' Capital Accounts will be different in each of the following cases:

Case 1 : Where all the partners are solvent.

Case 2 : Where some of the partners are solvent and others are insolvent.

Case 3 : Where all the partners are insolvent.

Case 1 : Where All the Partners are Solvent

(i) Where all the partners are solvent, the loan from any partner is to be paid first. The entry will be:

Partners' Loan Account Dr.
    To Bank/Cash Account

If a partner has taken any loan from the firm, he is required to bring in the amount in cash to the business. The entry will be:

Bank Account Dr.
    To Partner Loan Account

(ii) Thereafter, Partners' Capital Accounts are to be balanced. If one of the Partner's Capital Account shows a debit balance, the respective partner is to bring in the required amount to the business to make up his deficiency. The entry will be:

Cash/Bank Account Dr.
    To Partner's Capital Account

The final payment is to be made to partners having credit balance in their Capital Accounts .The entry will be:

Partners' Capital Accounts Dr.
    To Cash/Bank Account

After the claim of the partners are settled, there will be no balance in the Cash/Bank Account.

Illustration 1

A, B and C are partners in a firm sharing profits and losses in the ratio of 3:2:1. They decided to dissolve the partnership business as on 31st December, 2014. Following is the Balance Sheet on the date of dissolution :

Liabilities	₹	Assets	₹
Capitals :		Machinery	31,000
A	20,000	Furnitures	3,000
B	10,000	Stock	10,000
C	2,000	Debtors	6,000
Bank overdraft	6,000		
Sundry creditors	12,000		
	50,000		50,000

The following assets were realised in cash: Machinery at ₹ 22,000; 50% of the stock at ₹ 3,500; and Debtors were collected at 15% less than their book values. Remaining 50% of the stock was taken over by A at ₹ 3,200. Furniture was taken over by B at ₹ 2,400. Realisation expenses were ₹ 300.

Pass necessary Journal Entries to close the books of the firm and also prepare Realisation Account, Bank Account and Partners' Capital Accounts.

Working Note : (1) Bank overdraft represents adverse balance in the Bank Account. Therefore, it should not be transferred to Realisation Account.

Illustration 2

A, B and C are in partnership sharing profits and losses in the ratio of 5:3:2. They decide to dissolve their partnership and the Balance Sheet at the date of the dissolution is as follows :

Liabilities	₹	Assets		₹
Sundry creditors	6,000	Freehold property		52,000
Bills payable	3,000	Plant		30,000
Bank overdraft	1,500	Stock in trade		40,000
Reserve fund	5,000	Furniture		5,000
Capital — A	53,500	Sundry debtors	17,500	
Capital — B	44,100	Less: Provision for bad debts	500	17,000
Capital — C	39,400	Cash in hand		8,500
	1,52,500			1,52,500

A is to take the freehold property at ₹ 35,000, B is to take the stock-in-trade at ₹ 35,000 and C is to take furniture at ₹ 3,000. Sundry debtors realised ₹ 16,000 and Plant realised ₹ 40,000. Cost of dissolution was ₹ 2,000. Close the books of the firm showing the Realisation Account, Capital Accounts and Cash Account.

				By B Capital A/c	5,500
				By C Capital A/c	34,000
		64,500			64,500

Tutorial Note : Sundry debtors should be transferred to Realisation Account at its gross figure, i.e., ₹ 17,500 and Provision for Bad Debts should be transferred to the credit side of the Realisation Account.

Illustration 3

X, Y and Z are in partnership sharing profits and losses equally. They decided to dissolve the partnership on 1st October, 2014 on which date the Balance Sheet of the firm was as follows :

Liabilities	₹	Assets	₹
Capital : X	20,000	Premises	25,650
Capital : Y	12,000	Machinery	10,800
Reserve	6,000	Stock	8,420
Sundry creditors	20,260	Sundry debtors	15,800
Bank loan	5,120	Bills receivable	850
		Capital : Z	1,280
		Cash at bank	580
	63,380		63,380

The assets realised the following amounts : Premises ₹ 16,000; Machinery ₹ 10,000; Stock ₹ 9,000; Debtors ₹ 15,000; Bills receivable ₹ 850. The goodwill was sold for ₹ 2,500. Discount amounting to ₹ 260 were allowed by creditors while paying their claims. The expenses of realisation amounted to ₹ 540. During the course of dissolution a liability for damages was settled at ₹ 9,000 against ₹ 7,000 provided in the books of the firm.

Prepare the Accounts necessary to show the result of the realisation and also to close the books of the firm (calculations may be made to the nearest rupee).

A, B and C were partners in a firm sharing profits and losses in the ratio of 3:2:1. They decided to dissolve their firm w.e.f. 31.12.2014, the Balance Sheet on which date was as follows:

Liabilities	₹	Assets		₹
Creditors	25,000	Machinery		45,000
Loan on mortgage	20,000	Stock		20,000
Joint life policy reserve	12,000	Debtors	30,000	
Capital Account — A	45,000	Less: Provision	1,500	28,500
Capital Account — B	30,000	Joint life policy		15,000
Capital Account — C	15,000	Patents		20,000
		Cash at bank		18,500
	1,47,000			1,47,000

Additional information in connection with the dissolution was as follows:

(a) Joint Life Policy was surrendered and insurance company paid a sum of ₹ 18,000;

(b) B took some of the patents at ₹ 3,500 whose book value was ₹ 5,000;

(c) The remaining assets were realised as follows —
Machinery ₹ 30,000; Stock ₹ 15,500; Debtors ₹ 25,500; Patents 50% of the book value;

(d) Liabilities were paid and discount of ₹ 1,250 was allowed by the creditors;

(e) Expenses of dissolution amounted to ₹ 1,500.

Prepare the necessary Ledger Accounts to close the books of the firm.

Solution

In the books of the Firm

A, B and C share the profits of a business in the ratio of 2:2:1 respectively. They decide to dissolve the firm on 31st December, 2014 when their Balance Sheet appears as below :

Liabilities	₹	Assets		₹
Capital A/c : A	20,000	Building		37,000
Capital A/c : B	10,000	Machinery		17,000
Capital A/c : C	1,000	Furniture		8,000
Reserve Fund	10,000	Investment		10,000
Joint Life Policy Fund	15,000	Stock		1,500
Investment Fluctuation Fund	5,000	Debtors	8,000	
C's Loan	10,000	Less: Provision for bad debts	400	7,600
Mrs A's Loan	3,000	Joint Life Policy		15,000
Creditors	21,000	Bank		6,900
Acceptances	15,000	Profit & Loss		2,000
		C's Drawings		5,000
	1,10,000			1,10,000

A agrees to pay his wife's loan. Joint Life Policy is surrendered for ₹ 13,500 and the investment taken by B for ₹ 6,000. The remaining assets realised as below : Building ₹ 60,000; Machinery ₹ 7,000; Furniture ₹ 5,000; Stock ₹ 1,200 and Debtors 80%. Acceptances are met in full but creditors are paid ₹ 20,500 (in final settlement) including an investment worth ₹ 4,500 unrecorded in the books. Realization expenses amount to ₹ 4,800.

Journalise the entries to complete the dissolution of the firm, and show the Realization, Bank and Partners' Capital Accounts.

A, B and C were partners sharing profits and losses in the ratio of 5:3:2. The partnership was dissolved on 31.12.2014:

Liabilities	₹	Assets	₹
Sundry Creditors Capital Account : A Capital Account : B Capital Account : C	10,000 25,000 15,000 10,000	Cash in hand Furniture Stock Sundry Debtors Plant and Machinery	5,000 2,500 7,500 15,000 30,000
	60,000		60,000

C joined the firm on 1.1.2013, paying a premium for goodwill of ₹ 10,000 on the understanding that the partnership would continue for 10 years. Due to B's ill-health, the dissolution became necessary. Before C's admission, the partners were sharing profits and losses in the ratio of 3:2. Furniture and stock were realised for ₹ 2,250 and ₹ 6,750 respectively.

The debtors were taken over by A at ₹ 14,250, apprehending bad debts of ₹ 750. Plant and machinery was sold for ₹ 27,500. Sundry creditors were accepted ₹ 9,500 in full satisfaction. Prepare Ledger accounts to close the books of the firm.

Solution

					B	12,875
					C	11,250
		41,500				41,500

Working Note: (1) C paid ₹ 10,000 as premium for goodwill for 10 years but the business was dissolved after the completion of the 8th year. Therefore, unexpired portion of goodwill should be returned to C, which is ₹ 2,000 (₹ 10,000 x 2/10) by A and B. A premium of ₹ 10,000 was shared by A and B in the sacrificing ratio of 1 : 1. Therefore, their CapitalAccounts will be debited in the same ratio.

Illustration 8

Krishna and Arjun are partners in a firm. They share profits and losses in the ratio of 4:1. They decide to dissolve the firm on 31.3.2015 on which date the Balance Sheet of the same stood as follows:

Liabilities	₹	Assets		₹
Capital A/c — Krishna	16,000	Trade marks		1,200
Capital A/c — Arjun	6,000	Machinery		12,000
Bank loan	1,500	Furniture		400
Creditors for goods	8,000	Stock-in-trade		6,000
Bills payable	500	Debtors	9,000	
		Less: Provision for bad debts	400	8,600
		Cash in hand		2,800
		Profit and Loss A/c		1,000
	32,000			32,000

The realization shows the following results: (i) Debtors were realized at book value less 10%; (ii) Goodwill was sold for ₹ 1,000; (iii) Trade marks were realized for ₹ 800; (iv) Machinery and Stock-in-trade were taken over by Krishna respectively for ₹ 14,400 and ₹ 3,600; (v) An unrecorded asset estimated at ₹ 600 was sold for ₹ 200; (vi) Creditors for goods were settled at a discount of ₹ 80. The expenses on realization were ₹ 400.

Prepare Realization Account, Cash Book and Capital Accounts of the partners.

A, B and C are partners in a firm, sharing profits and losses equally, whose Balance Sheet as at 30th September, 2014 was as under:

Liabilities			₹	Assets	₹
Capital Accounts :	A	20,000		Plant and Machinery (Less: Depreciation)	23,760
	B	25,000		Furniture and Fittings	4,240
	C	12,500	57,500	Sundry Debtors	14,165
Current Accounts :	A	18,600		Joint Life Policy	12,105
	C	7,200	25,800	Bills Receivable	8,610
Sundry Creditors			17,720	Stock-in-trade	29,940
Bills Payable			8,400	Current Account : B	12,400
				Cash at bank and in hand	4,200
			1,09,420		1,09,420

The value of the joint Life Policy shown in the Balance Sheet represents the surrender value of the policy taken by the firm for ₹ 30,000 to enable the settlement of accounts with a partner's estate in case of death of a partner during the continuance of the firm.

A died on 1st October, 2014. The remaining partners could not arrive at any understanding with the legal representative of A with the result that it was decided that the firm would be dissolved, subject to the following adjustments:

(a) The sum assured was realised from the insurance company;
(b) Plant and machinery realised only 70% of the book value;
(c) Furniture and fittings were taken over by partner C, at a market value of ₹ 2,500.
(d) Bills receivable and Sundry debtors had to be discounted by 4%;
(e) Stock-in-trade comprised—
 (i) Easily marketable items — 70% of the total inventory which realised its full value;
 (ii) Obsolete items — 10% of the total inventory which had to be discarded;
 (iii) The rest of the items which realised 50% of their book value;
(f) A liability for ₹ 1,500 which had not been recorded in the firm's books had to be settled by the firm before its dissolution.

Draw up accounts showing *inter-se* settlement among the partners.

Ram, Rahim and Anthony were in partnership sharing profits and losses in the ratio of 1/2, 1/3 and 1/6 respectively. They decided to dissolve the partnership firm on 31.3.2015, when the Balance Sheet of the firm appeared as under :

Liabilities		₹	Assets	₹
Sundry Creditors		5,67,000	Goodwill	4,56,300
Bank Overdraft		6,06,450	Plant and Machinery	6,07,500
Joint Life Policy Reserve		2,65,500	Furniture	64,650
Loan from Mrs. Ram		1,50,000	Stock	2,36,700
Capital Accounts :			Sundry Debtors	5,34,000
Ram	4,20,000		Joint Life Policy	2,65,500
Rahim	2,25,000		Commission Receivable	1,40,550
Anthony	1,20,000	7,65,000	Cash in Hand	48,750
		23,53,950		23,53,950

The folowing details are relevant for dissolution :

(i) The joint life policy was surrendered for ₹ 2,32,500.
(ii) Ram took over goodwill and plant and machinery for ₹ 9,00,000.
(iii) Ram also agreed to discharge bank overdraft and loan from Mrs Ram.
(iv) Furniture and stocks were divided equally between Ram and Rahim at an agreed valuation of ₹ 3,60,000.
(v) Sundry debtors were assigned to firm's creditors in full satisfaction of their claims.
(vi) Commission receivable was received in toto in time.
(vii) A bill discounted was subsequently returned dishonoured and proved valueless ₹ 30,750 (including ₹ 500 noting charges).
(viii) Ram paid the expenses of dissolution amounting to ₹ 18,000.
(ix) Anthony agreed to receive ₹ 1,50,000 in full satisfaction of his rights, title and interest in the firm.

You are required to show accounts relating to closing of books on dissolution of the firm.

To Cash (Balancing fig.)	1,94,160	77,640	—	By Ram Capital A/c (Note 5)	—	—	6,840
				By Rahim Capital A/c (Note 5)	—	—	4,560
				By Bank A/c (Overdraft)	6,37,200	—	—
	13,57,950	3,13,500	1,75,650		13,57,950	3,13,500	1,75,650

Dr. Bank Account Cr.

Date	Particulars	₹	Date	Particulars	₹
2015	To Ram Capital A/c	6,37,200	2015	By Balance b/d	6,06,450
Mar. 31			Mar. 31	By Realisation A/c (Note 2)	30,750
		6,37,200			6,37,200

Working Notes :

(1) Joint Life Policy Reserve is transferred to Partners' Capital Accounts in the profit sharing ratio.

(2) For dishonour of discounted bill, the following entry is passed :

Sundry Debtors Account	Dr.	30,750	
To Bank Account			30,750

Here, nothing can be collected from Debtors. Therefore, it is to be treated as realisation loss and it is to be recorded by passing the following entry :

Realisation Account	Dr.	30,750	
To Sundry Debtors Account			30,750

However, a consolidated entry can be passed as follows to give effect the dishonour of the discounted bill:

Realisation Account	Dr.	30,750	
To Bank Account			30,750

(3) Loan from Mrs Ram has not been transferred to Realisation Account. It has been directly adjusted in Ram's Capital Account.

(4) No entry is required for assignment of Sundry Debtors in favour of Sundry Creditors in full satisfaction of their claim.

(5) Actual amount payable to Anthony is ₹ 1,38,600 (₹ 1,64,250 – ₹ 25,650) but agreed amount payable is ₹ 1,50,000. So the difference of ₹ 11,400 is to be borne by Ram and Rahim in their profit sharing ratio, i.e., 3 : 2.

Share of Ram : ₹ 11,400 × 3/5 =₹ **6,840**

Share of Rahim : ₹ 11,400 × 2/3 = ₹ **4,560**

Illustration 11

A, B and C are in partnership as accountants carrying on practices in Calcutta and Delhi and sharing profits in the ratio of 7:6:5 respectively. Interest @ 5% p.a. is allowed on capital accounts. They decided to dissolve the firm. The terms of dissolution were as under:

1. A to retire from business, his share of goodwill being valued at ₹ 3,300 to be paid by B and C in their profit-sharing ratio.
2. B to carry on business in Calcutta, taking over at book values furniture and debtors in Calcutta, and all liabilities, he also has to pay ₹ 600 for the lease of Calcutta office which he kept on.
3. C to take over the furniture and debtors in Delhi.
4. B and C each to be credited with 2% of the amount of the book debts taken over by them respectively by way of an allowance to cover the cost of collection.
5. Each parnter to take over a third of the cash balance and to pay his own costs in connection with the dissolution.

The following Trial Balance was extracted from the firm's books as on 30.6.2015, on which date the partnership was dissolved by agreement.

(2) For lack of information, it has been assumed that B and C bring in necessary money to pay off A.

Illustration 12

A, B and C are partners of a firm of Chartered Accountants having offices in Bombay, Hyderabad and Bhopal, sharing profits and losses in the ratio of 5 : 3 :2 respectively. The statement of affairs of the firm as on 31.3.2015 is shown below:

Particulars	₹	₹
Capital A/c — A		15,000
Capital A/c — B		12,000
Capital A/c — C		6,000
Current A/c — A		7,550
Current A/c — B	2,575	
Current A/c — C	1,115	
Accounts Payable		4,915
Accounts Receivable — Bombay	12,000	
Accounts Receivable — Hyderabad	8,625	
Accounts Receivable — Bhopal	9,875	
Goodwill	5,000	
Cash in Hand	575	
Cash with Bank	5,700	
TOTAL	45,465	45,465

On that date, due to old age, A desires to retire from the firm and the other two partners agree and it is decided that B would take over the Bomay and Hyderabad offices and C would take over the Bhopal office with the respective assets and liabilities.

You are given the following additional information :

(a) A's share of goodwill is valued at ₹ 15,000 and would be bought by B and C in their profit-sharing ratio.

(b) Accounts payable include rent of Bhopal office for the month of February and March, 2013 at the monthly rent of ₹ 250 and the balance represents outstanding expenses of Bombay and Hyderabad offices.

(c) Cash in hand is to be utilised to pay A and other settlements inter-se to take place before 1st May, 2013 and

(d) Accounts receivable to be discounted by 2%.

Draw up Realisation Account, Partners' Capital Accounts and Cash Account.

X, Y and Z carrying on business since 2002, decided to dissolve their partnership on 30th June 2015, when their Balance Sheet was as under:

Liabilities			₹	Assets	₹
Creditors			34,000	Cash	25,000
Capital Accounts :	X	1,20,000		Debtors	62,000
	Y	90,000		Stock	37,000
	Z	60,000	2,70,000	Tools	8,000
				Motor Cars	12,000
				Machinery	60,000
				Freehold Building	1,00,000
			3,04,000		3,04,000

Y and Z agreed to form a new partnership to carry on the business and it is agreed that they shall acquire from the old firm the following assets at amounts shown hereinunder:

Stock — ₹ 40,000; Tools — ₹ 5,000; Motor Cars — ₹ 25,000; Machinery — ₹ 78,000; Freehold Building — ₹ 84,000; Goodwill — ₹ 60,000.

The partnership agreement of X, Y and Z provided that trading profits and losses shall be divided in the ratio of 3:2:1 and that capital profits or losses shall be divided in proportion of their capitals.

Debtors realise ₹ 59,000 and discount amounting to ₹ 720 is secured on payments due to creditors. Y and Z bring the necessary cash to pay X in the ratio of 3:2.

You are required to prepare: (i) the necessary accounts of the firm X, Y and Z; (a) if the firm Y and Z continue the same books, and (b) if the partners open new books; (ii) The opening Balance Sheet of the firm Y and Z.

Working Notes: (1) Profit on realisation is a capital profit. **(2)** For lack of information, it has been assumed that Y and Z bring in necessary money to pay off X.

Case 2 : Where Some of the Partners are Solvent and Others Insolvent

At the time of dissolution of a partnership firm, the Capital Account of a partner may show a debit balance after his share of any profit or loss on realisation has been included in his account; and if he cannot make good the whole or part of the deficiency, what should be done? In such a situation, this deficiency must be shared by all the solvent partners. Now the question arises in what ratio?

The solvent partners may share such deficiency: (i) in their profit-sharing ratio (like any business loss); or (ii) in the ratio of their last agreed capitals (as has been decided in the case of ***Garner Vs. Murray***)

Decision in Garner Vs. Murray

Garner, Murray and Wilkins were equal partners with unequal capitals.

The assets of the firm on dissolution, after satisfying all the liabilities to creditors and advance (by Murray) from partners were insufficient to repay the capitals in full. There was a deficiency of £ 635 and the capital account of Wilkins was showing a debit balance of £ 263. Nothing could be recovered from Wilkins owing to insolvency. The decision was given by Mr. Justice Joyee in 1904. His decision was as under:

> ***"The solvent partners are only liable to make good their share of the deficiency, and that the remaining assets should be divided among them in proportion to their capitals"***

In effect, the decision in Garner Vs. Murray boiled down to this:

(a) The solvent partners should contribute to the deficiency of capital (caused by loss on realisation) in cash their share only and not the insolvent partners' share.

(b) The net effect of what has been stated above is that the deficiency of capital of the insolvent partner gets distributed among the solvent partners in the ratio of their last agreed capitals.

To Illustrate:

A, B & C are partners. A countributed ₹ 1,600; B ₹ 400; and C ₹ 250; sharing profits and losses equally. (Total Capital: ₹ 1,600 + ₹ 400 + ₹ 250 = ₹ 2,250) ₹ 1,350 were left after paying off all liabilities on dissolution. Hence, capital loss is ₹ 2,250 – ₹ 1,350 = ₹ 900. If all the partners were solvent, ₹ 300 contributed by each would have restored the capital, so that A, B and C would have got back their respective capitals, namely, ₹ 1,600 (A), ₹ 400 (B) and ₹ 250 (C).

But C being insolvent and his personal properties yeilding nothing, A and B would contribute ₹ 300 each. This will bring up the funds of the firm to ₹ 1,950 from ₹ 1,350 (₹ 1350 + ₹ 600). And, according to the decision in Garner Vs. Murray, these assets (cash/bank) amounting to ₹ 1,950 should be distributed between A and B in the ratio of 4:1, that is the last agreed capital. Now let us look at the entire picture of settlement at a glance :

Particulars	A	B
Last agreed Capital	1,600	400
Less: Realisation loss (in profit and loss ratio, that is, equally)	300	300
	1,300	100
Add: Cash brought in to make good their loss	300	300
	1,600	400
Less: Distribution of ₹ 1,950 in 4:1 (ratio of last agreed Capital)	1,560	390
Loss	40	10
(FINAL) Debit balance of C (₹ 300 – ₹ 250)	**₹ 40 + ₹ 10 = ₹ 50**	

Therefore, A and B have shared the loss due to deficiency in the capital account of the insolvent partner C, in the ratio of their last agreed capital (4:1).

Criticism of Garner Vs. Murray

1. It does not apply when the firm is having only two partners.
2. It considers only the book capital of the partners, ignoring the private estate of the solvent partners. If a partner contributed more capital than that of the other partners, he will have to bear more burden than other partners contributing less capital.
3. If a partner is having a nil capital balance or a debit balance, he will not have to bear the deficiency of the insolvent partner.
4. Introduction of cash by the solvent partners to make good their share of loss on realisation is unnecessary, when the balance of the capital accounts of the solvent partners are sufficient to bear the deficiency of the insolvent partner.

Our Comments

1. It is not unjust and inequitable law to ask a partner with larger capital to bear the larger portion of the loss. Psychologically, the partners with lower capital will not react unfavourably.
2. Many authors have described that bringing cash to the extent of loss on realization is meaningless. We do not think it is meaningless. We are aware that some of the decisions of the old English judges have laid the foundation of our modern accounting theory and auditing. In fact, the knowledge of accounting of some of the English judges was far superior to many of our modern accounting stalwarts.

Introduction of such further capital is an epitome of the doctrine of conservatism. As Shakespeare had rightly said that "there are many a slip between the cup and the lip". Who knows that of the C, A or B will not become insolvent without any attachable personal property.

Points to Remember

1. ***Garner Vs. Murray is applicable only when there is no agreement among the partners for sharing the deficiency in capital account of insolvent partner.***
2. ***Realisation loss should be divided in the profit sharing ratio in the usual manner.***
3. ***The solvent partners should bring in cash to make good the loss on realisation.***
4. ***Final debit balance (after debiting realization loss) of insolvent partner should be shared amongst the solvent partners in proportion to their last agreed capital.***
5. ***A solvent partner having debit balance in Capital Account will not share any loss due to insolvency of a partner.***

Applicability of Garner Vs. Murray to India

Section 48 of the Indian Partnership Act 1932 is identical with the section 44 of the Partnership Act in Great Britain and further there has been no case law in India which has examined this question. Therefore, it is justified to assume that Garner Vs. Murray will also apply in India.

Application of Garner Vs. Murray for Fixed and Fluctuating capital

It has already been stated that the deficiency of an insolvent partner is to be borne by the solvent partners in the ratio of their ***last agreed capitals***. In this connection, the distinction between fixed and fluctuating capitals is material.

Fixed Capital When the partners follow fixed capital method, each partner will have one Capital Account and one Current Account. To determine the ratio in which the insolvency loss is to be shared, ***only Capital Accounts*** balances are to be considered (ignoring current account balance).

Fluctuating Capital When the partners follow fluctuating capital method, only one Capital Account is maintained for each partner. To ascertain the last agreed capital, all sorts of adjustments like reserves, undrawn profits or accumulated losses, drawings etc are to be made excepting the profit or loss arising out of realisation of assets and liabilities.

Firm's Debts Vs Private Debts

The joint estate of the partners as a firm and their separate estates as individuals are administered separately.

The separate estate of each partner is to be utilised first for paying his ***private debts***. Any surplus from the separate estate can be utilised for paying firm's debts. But any deficiency of his private estate is not included in the joint estate. Similarly, the joint estate of the firm is to be utilised first for paying the debts of the firm.

Illustration 14

A, B and C had been in partnership for many years and shared profits and losses in the ratio of 1:2:2. Their respective capitals were : A — ₹ 10,000; B — ₹ 10,000; C — ₹ 2,000.

The partners decided to dissolve the partnership after a succession of losses following a fall off in demand. On dissolution, there was a loss of ₹ 15,000 to be shared among the partners. C was insolvent and unable to contribute anything towards his deficiency which had to be borne by his co-partners.

Required : Partners' Capital Accounts to record the above matters [***Apply Garner Vs. Murray***]

Solution

Dr. **Partners' Capital Accounts** **Cr.**

Particulars	A	B	C	Particulars	A	B	C
To Realisation A/c – loss	3,000	6,000	6,000	By Balance b/d	10,000	10,000	2,000
To C Capital A/c (Note 2)	2,000	2,000	—	By Bank A/c (Note 1)	3,000	6,000	—
To Bank A/c	8,000	8,000	—	By A Capital A/c	—	—	2,000
				By B Capital A/c	—	—	2,000
	13,000	16,000	6,000		13,000	16,000	6,000

Working Note: (1) The solvent partners will bring in cash equal to realisation loss.
(2) Deficiency of C is borne by A and B in the capital ratio (1:1).

Illustration 15

A, B and C are in partnership, sharing profits and losses equally. The firm's Balance Sheet at 31.12.2014 was as follows:

Liabilities			₹	Assets		₹
Sundry Creditors			64,000	Cash		1,600
Capital Accounts :	A	24,000		Sundry Debtors		53,000
	B	8,000		Stock		22,200
	C	4,000	36,000	Machinery & Plant		26,000
Current Accounts :	A		10,800	Current Accounts :	B	2,000
					C	6,000
			1,10,800			1,10,800

It was decided to dissolve the firm on that date. The Machinery and Plant, Stock and Debtors were sold by the firm for ₹ 70,000. Creditors were paid off

Assuming that C is insolvent and could not meet his liability to the firm, show necessary Ledger Accounts in the books of the firm. [***Apply Garner Vs. Murray principle***.]

Solution

Dr. **Realisation Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014	To Sundry Debtors A/c	53,000	2014	By Creditors A/c	64,000
Dec. 31	To Stock A/c	22,200	Dec. 31	By Cash A/c (Sale of assets)	70,000
	To Machinery & Plant A/c	26,000		By Partners' Capital A/cs:	
	To Cash A/c (Payment to Creditors)	64,000		(A — ₹ 10,400; B — 10,400; C — 10,400)	31,200
		1,65,200			1,65,200

Dr. **Cash Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014	To Balance b/f	1,600	2014	By Realisation A/c	64,000
Dec. 31	To Realisation A/c — sale of assets	70,000	Dec. 31	By A Capital A/c	25,500
	To A Capital A/c	10,400		By B Capital A/c	2,900
	To B Capital A/c	10,400			
		92,400			92,400

Dr. **Partners' Capital Accounts** **Cr.**

Date	Particulars	A	B	C	Date	Particulars	A	B	C
2014	To Current A/cs	—	2,000	6,000	2014	By Balance b/d	24,000	8,000	4,000
Dec. 31	To Realisation A/c (loss)	10,400	10,400	10,400	Dec. 31	By Current A/cs	10,800	—	—
	To C Capital A/c	9,300	3,100	—		By Cash A/c (Note 1)	10,400	10,400	—
	To Cash A/c	25,500	2,900	—		By A Capital A/c	—	—	9,300
						By B Capital A/c	—	—	3,100
		45,200	18,400	16,400			45,200	18,400	16,400

Working Notses : (1) The solvent partners should bring in cash to make good the loss on realisation.
(2) C's total deficiency of ₹ 12,400 (₹ 16,400 – ₹ 4,000) should be shared by A and B in the ratio of their fixed capital ₹ 24,000: ₹ 8,000 or 3 : 1. Current Account balances are to be ignored for this purpose.

Illustration 16

The following was the Balance Sheet as at 31st March, 2015 of M/s Ideal Works in which A, B and C were partners sharing profits and losses in the ratio of 6:3:5.

Liabilities	₹	Assets	₹
A's Capital A/c	25,000	Land and Building	10,000
C's Capital A/c	15,000	Furniture	5,000
A's Current A/c	1,000	Stock-in-trade	23,100
C's Current A/c	500	Sundry Debtors	30,000
Sundry Creditors	30,000	Cash at Bank	2,500
Loan on mortgage of Land and Building	4,000	B's Current A/c	4,900
	75,500		75,500

It was decided to dissolve the partnership as on the date of the Balance Sheet. The assets of the firm is realised as under:

Land and Building ₹ 6,000; Furniture ₹ 2,000; Stock-in-trade ₹15,000 and Sundry Debtors ₹ 20,000. The expenses of realisation amounted to ₹ 2,000. The Sundry Creditors agreed to receive 75 paise in a rupee in full satisfaction of their claim. Loan on mortgage was paid. It was ascertained that B had become insolvent. B's estate had contributed only 50 paise in a rupee.

Write up the Realisation Account, Bank Account, Capital Account of the partners following the rule given in Garner Vs. Murray.

Solution

In the books of M/s Ideal Works

				By Partners' Capital A/cs — B	—	—	960
	47,000	32,000	6,000		47,000	32,000	6,000

Tutorial Note: Deficiency of C : ₹ (6,000 – 3,600 = 2,400) has been borne by A and B in their capital ratio, i.e., 45 : 30 or 3 : 2.

Illustration 18

A, B and C are in partnership sharing profits and losses as 3/6th, 2/6th and 1/6th respectively. The Balance Sheet on the date of dissolution was as follows:

Liabilities	₹	Assets	₹
Sundry Creditors	38,500	Cash in hand	9,860
A's Loan Account	2,750	Sundry Debtors	30,560
Capital Account: A	15,200	Stock	18,440
Capital Account: B	11,200	Furniture	7,200
		Capital Account : C (Dr.)	1,590
	67,650		67,650

The assets realised: Stock ₹ 13,840; Furniture ₹ 5,150; and Debtors ₹ 29,200. The creditors were paid less discount amounted to ₹ 250. A and B are solvent but C is insolvent and he is unable to bring in anything. The expenses of winding up were ₹ 520. You are required to prepare: (i) Realisation Account; (ii) Cash Account; and (iii) Capital Accounts of the Partners.

To Realisation A/c	3,000	4,500	4,500	3,000	By Bank A/c (Note 1)	—	4,500	1,000	—
To Partners' Capital A/cs:					By Partners' Capital A/cs:				
R (Note 1)	4,000	—	—	—	P	—	—	4,000	3,000
S (Note 1)	3,000	—	—	—	By Q Loan A/c	—	5,000	—	—
To Partners' Capital A/cs:					By Partners' Capital A/cs:				
P (Note 2)	—	3,000	—	—	Q (Note 2)	3,000	—	—	—
To Bank A/c	—	1,500	—	—					
	13,000	13,500	9,000	6,000		13,000	13,500	9,000	6,000

Dr. **Bank Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2015	To Balance b/d	1,000	2015	By Realisation A/c — (payment of creditors)	30,000
Jan. 1	To Realisation A/c (realisation of assets)	26,000	Jan. 1	By Realisation A/c — (expenses)	1,000
	To Partners' Capital A/cs:			By Partners' Capital A/cs:	
	Q (cash brought in to make good the firm)	4,500		Q (final payment)	1,500
	R (cash brought in to make good the firm)	1,000			
		32,500			32,500

Working Notes:

(1) S cannot pay his personal liabilities, so his balance of deficiency will be ₹ 3,000. R can only pay ₹ 1,000 from his private estate, so his deficiency will be (₹ 5,000 – 1,000) = ₹ 4,000. Therefore, total deficiency of R and S will be (₹ 4,000 + ₹ 3,000) = ₹ 7,000 and this should be borne by the solvent partners (i.e., P and Q) in their capital ratio just before dissolution. But before dissolution only P has credit balance and Q has negative balance, so P will bear the whole deficiency of ₹ 7,000.

(2) After debiting the deficiency of ₹ 7,000, P's Capital Account shows a debit balance of ₹ 3,000 but P cannot bring any money and ultimately Q will have to bear it.

Illustration 20

Ajay, Vijay, Ram and Shyam are partners in a firm sharing profits and losses in the ratio of 4 : 1 : 2 : 3. The following is their Balance Sheet as at 31.3.2015 :

Liabilities			₹	Assets			₹
Creditors			3,00,000	Debtors		3,50,000	
Capital Accounts :	Ajay	7,00,000		Less : Provision for bad debts		50,000	3,00,000
	Shyam	3,00,000	10,00,000	Cash			1,40,000
				Stock			2,00,000
				Other Assets			3,10,000
				Capital Accounts :	Vijay	2,00,000	
					Ram	1,50,000	3,50,000
			13,00,000				13,00,000

On 31.3.2015, the firm is dissolved and the following points are agreed upon :

Ajay is to take over debtors at 80% of book value; Shyam is to take over the stock at 95% of the value; and Ram is to discharge creditors. Other assets realise ₹ 3,00,000 and the expenses of realisation come to ₹ 30,000. Vijay is found insolvent and ₹ 21,900 is realised from his estate.

Prepare Realisation Account, Cash Account and Capital Accounts of the partners. The loss arising out of capital deficiency may be distributed following the decision in Garner vs. Murray.

Solution

In the books of the Firm

Dr. Realisation Account Cr.

Date	Particulars	₹	Date	Particulars	₹
2015	To Debtors A/c	3,50,000	2015	By Provision for Bad Debts A/c	50,000
March 31	To Stock A/c	2,00,000	March 31	By Creditors A/c	3,00,000

To Cash A/c	2,90,430	—	1,50,000	54,470	By Ajay Capital A/c	—	1,29,570	—	—
					By Shyam Capital A/c	—	55,530	—	—
	7,28,000	2,07,000	3,14,000	3,21,000		7,28,000	2,07,000	3,14,000	3,21,000

Working Notes :

(1) Solvent partners should bring in cash to make good the loss on realisation.

(2) Vijay's deficiency of ₹ 1,85,100 (₹ 2,07,000 – ₹ 21,900) should be shared by Ajay and Shyam in the ratio of their capital, i.e., 7 : 3. Ram will not bear any loss on deficiency, because at the time of dissolution he had a debit balance in his Capital Account.

(3) The amount realised from the estate of Vijay.

Illustration 21

A, B, C and D were partners sharing profits and losses in the ratio of 3 : 3 : 2 : 2. Following was their Balance Sheet as on 31.12.2014 :

Liabilities			₹	Assets			₹
Capital Accounts :	A	60,000		Capital Accounts :	C	48,000	
	B	45,000	1,05,000		D	18,000	66,000
Creditors			46,500	Furniture			12,000
A's Loan			30,000	Trade Marks			21,000
				Stock			30,000
				Debtors		48,000	
				Less: Provision for bad debts		1,500	46,500
				Bank			6,000
			1,81,500				1,81,500

On 31.12.2014, the firm was dissolved and B was appointed to realise the assets and to pay off the liabilities. He was entitled to receive 5% commission on the amounts finally paid to other partners as capital. He was to bear the expenses of realisation. The assets were realised as follows : Debtors ₹ 33,000; Stock ₹ 24,000; Furniture ₹ 3,000; Trade Marks ₹ 12,000.

Creditors were paid off in full, in addition, a contingent liability for Bills Receivable discounted materialised to the extent of ₹ 7,500. Also, there was a joint life policy for ₹ 90,000. This was surrendered for ₹ 9,000. Expenses of realisation amounted to ₹ 1,500. C was insolvent but ₹ 11,100 was recovered from his estate.

Write up Realisation Account, Bank Account and Capital Accounts of the partners.

Solution

This problem could be solved in two ways :

1. When 5% commission payable to B is treated as '***Realisation Expenses***' and debited to Realisation Account.
2. When 5% commission payable to B is ***not*** treated as 'Realisation Expenses' and ***not*** debited to Realisation Account.

1. When 5% Commission to B is treated as Realisation Expenses

It has been given in the problem that B is entitled to 5% commission on the amounts finally payable to other partners as capital. B will bear the realisation expenses as per agreement. The main point in this problem is that B's commission is nothing but a realisation expenses to be given to B in the form of commission.

In this case, the solution of the problem will be as follows :

In the books of the Firm

Dr. **Realisation Account** **Cr.**

					By A Capital A/c (Note 4)	—	—	25,335	—
					By B Capital A/c (Note 4)	—	—	19,000	—
	60,000	46,176	55,435	25,435		60,000	46,176	55,435	25,435

Working Notes :

(1) Total assets realised = ₹ (33,000 + 3,000 + 24,000 + 12,000 + 9,000) = ₹ 81,000.

(2) Total payment = ₹ (46,500 + 7,500) = ₹ 54,000. A's loan has been paid directly.

(3) Calculation of commission payable to B :

Let B's commission = x

We can find out realisation loss before taking into account B's commission. It is ₹ 36,000.

Therefore, realisation loss after B's commission = ₹ 36,000 + x.

Share of A = 3/10 (36,000 + x) = 10,800 + 3x / 10

Share of C = 2/10 (36,000 + x) = 7,200 + 2x / 10

C's deficiency = ₹ 48,000 + (₹ 7,200 x 2x / 10) – ₹ 11,100 = ₹ 44,100 + x / 5

Share of A in C's deficiency = 4/7 of (44,100 + x/5) = ₹ 25,200 + 4x / 35

A will finally get ₹ 60,000 – (₹ 10,800 + 3x / 10 + 25,200 + 4x / 35) = ₹ 60,000 – ₹ 10,800 – 3x / 10 – 25,200 – 4x / 35

= ₹ 24,000 – (21x + 8x) / 70

= ₹ 24,000 – 29x / 70

x = 5% [24,000 – 29x / 70]

or, 5 / 100 [24.000 – 29x / 70]

or, x = 1,200 – .02071x

or, 1.0207x = 1,200

or, x = 1,200 / 1.02071

or, x = 1175.64 = 1,176 (say).

(4) C's deficiency is to be shared by A and B in their capital ratio of 60,000 : 45,000 or 4 : 3. D will not bear any deficiency loss because his capital is negative.

2. When 5% Commission Payable to B is not treated as Realisation Expenses

In this case, the 5% commission payable to B on the amount finally payable to other partners as capital is not debited to Realisation Account. The realisation loss is calculated without this commission. Commission payable to B is adjusted through Capital Account of the partners. The solution in this case will be as follows :

In the books of the Firm

To Balance b/d	—	—	48,000	18,000	By Balance b/d	60,000	45,000	—	—
To Realisation A/c (Loss)	10,800	10,800	7,200	7,200	By Bank A/c (final dividend)	—	—	11,100	—
To C Capital A/c (Note 3)	25,200	18,900	—	—	By A Capital A/c	—	—	25,200	—
To B Capital A/c (Note 4)	1,143	—	—	—	By B Capital A/c	—	—	18,900	—
To Bank A/c	22,857	16,443			By Bank A/c	—	—	—	25,200
					By A Capital A/c (Note 4)	—	1,143	—	—
	60,000	46,143	55,200	25,200		60,000	46,143	55,200	25,200

Working Notes :

(1) Total Assets Realised

	₹
Debtors	33,000
Stock	24,000
Furniture	3,000
Trade Mark	12,000
J.L.P. (Surrender Value)	9,000
	81,000

(2) Total Payments

	₹
Creditors	46,500
Contingent Liabilities	7,500
	54,000

(3) Deficiency of C

	₹
Debit balance in Capital Account	48,000
Realisation Loss (2/10 of ₹ 36,000)	7,200
	55,200
Less: Final dividend	11,100
Deficiency	44,100

A and B will share the above deficiency in the capital ratio of 60 : 45 or 12 : 9 or 4 : 3.

A's share of deficiency = 4/7 × ₹ 44,100	25,200
B;s share of deficiency = 3./7 × ₹ 44,100	18,900
	44,100

It is to be noted that D will not share any deficiency because his capital account was having debit balance.

(4) B's Commission

Amount payable to A	₹
Credit balance of Capital Account	60,000
Less: Realisation Loss	(10,800)
Less: C's share of deficiency	(25,200)
Amount payable to A before B's Commission	24,000

$$\text{B's Commission} = \frac{24{,}000}{105} \times 5 = ₹\ 1.143$$

(5) It has not been given in the problem that Garner vs. Murray principle is to be adopted. Therefore, solvent partner will ***not*** bring cash equal to realisation loss.

Students should note the following

Sl.No.	Items	1st Method	2nd Method
1.	Realisation Loss	37,176	36,000
2.	Amount of Commission to B	1,176	1,143
3.	Final Payment to Partners : A B	 23,512 16,023	 22,857 16,443
4.	Share of Deficiency : A B	 25,335 19,000	 25,200 18,900

Authors' View

Solution under 1st method is much more logical as it is taking into consideration the realisation expenses for calculating realisation loss. It is true that under this method, the calculation of commission to B is to some extent complicated. We recommend the solution under 1st method.

In the examination if you have time, then follow 1st method, otherwise you can solve it by the 2nd method.

Case 3 : Where All the Partners are Insolvent

When all the partners are insolvent and the firm's assets fall short of its liabilities, the creditors of the firm cannot be paid in full. The available cash with the firm (cash in hand + final dividend received from the partners' estate) is used first for paying realisation expenses. The balance amount is paid to creditors proportionally.

In order, to close the books of the firm, Realisation Account is prepared in the usual manner without transferring the liabilities to Realisation Account. All liabilities are discharged directly to the extent possible. Any balance left unpaid is transferred to Deficiency Account. The Partners' Capital Accounts are then closed by transferring to Deficiency Account.

The Accounting Entries are :

1. For payment of liabilities

Liabilities Account	Dr.	
To Cash/Bank Account		[Actual amount paid]
To Deficiency Account		[Unpaid amount]

2. For closing Partners' Capital Accounts

Deficiency Account	Dr.
To Partners' Capital Accounts	

Illustration 22

H and N were in equal partnership. Their Balance Sheet stood as under on 31st December, 2014 when the firm was dissolved:

Liabilities	₹	Assets	₹
Creditors	3,200	Machinery and Plant	1,200
H's Capital	400	Furniture	300
		Debtors	500
		Stock-in-trade	400
		Cash	180
		N's Drawings	1,020
	3,600		3,600

The assets realised were as follows: Machinery ₹ 600; Furniture ₹ 100; Debtors ₹ 400; and Stock-in-trade ₹ 300.

The expenses of realisation amounted to ₹ 140. H's private estate is not sufficient even to pay his private debts, whereas in N's private estate there is a surplus of ₹ 140 only. Give accounts to close the books of the firm

2014 Dec. 31	To Partners' Capital A/cs: (H — ₹ 170; N — ₹ 1,450)	1,620	2014 Dec. 31	By Creditors A/c	1,620
		1,620			1,620

Tutorial Note: When all the partners are insolvent, the balance of creditors account should not be transferred to Realisation Account. All available cash is to be used first for paying realisation expenses and the balance cash is paid to creditors. If there is any credit balance in the Creditors Account, it is transferred to Deficiency Account. The Capital Account is closed by transferring to Deficiency Account.

Illustration 23

A, B and C are equal partners, whose Balance Sheet on December 31, 2014 is as follows:

Liabilities	₹	Assets	₹
Sundry Creditors	5,000	Cash in hand	50
A's Loan	1,000	Stock	800
Capital A/cs:		Debtors	1,000
A	800	Plant & Machinery	2,000
C	500	Furniture & Fittings	800
		Land & Buildings	2,000
		B's Capital (overdrawn)	650
	7,300		7,300

Due to lack of liquidity and weak financial position of the partners, the firm is dissolved. A and C are not able to contribute anything and a sum of ₹ 200 received from B. All of them are declared insolvent. The assets are realised: Stock ₹ 500; Plant and Machinery ₹ 1,000; Furniture and Fittings ₹ 200; Land & Buildings ₹ 800; and Debtors ₹ 550 only. Realisation expenses amounted to ₹ 50. You are required to close the firm's books.

Following is the Balance Sheet as on 31st March, 2015 of a firm, having three partners, Alfa, Beta and Gama sharing profits and losses equally.

Liabilities	₹	Assets	₹
Sundry Creditors	20,000	Cash	3,120
Loan (secured by furniture)	10,000	Stock	15,630
Capital A/cs:		Debtors	4,720
Alfa	8,000	Furniture	9,530
Beta	6,000	Profit and Loss	12,000
Gama	1,000		
	45,000		45,000

The firm was dissolved due to insolvency of all the partners. Stock was sold for ₹ 9,900 while furniture fetched ₹ 5,000. ₹ 4,100 were recovered from debtors. Realisation expenses totalled ₹ 220.

Nothing could be recovered from Beta and Gamma, but ₹ 600 could be collected from Alfa's private estate. Close the books of the firm.

Solution

				By Alfa Capital A/c	900
		8,400			8,400

Working Note : (1) Loan is secured by furniture and has a priority over sundry creditors upto the amount realised from furniture — which is ₹ 5,000. For the remaining loan, it is at par with sundry creditors. Total cash available to pay out loan and sundry creditors is ₹ 17,500 (₹ 3,120 + ₹ 19,000 + 600 – 220 – 5,000) which will be shared by Loan and Sundry Creditors in the ratio of their resultant claim, i.e., 5,000 : 20,000 = 1 : 4.

Illustration 25

X, Y and Z were in partnership sharing profits and losses in the ratio of 1/5 : 3/10 : 1/2. They prepared the following Balance Sheet as on 30.6.2014, when they decided to dissolve.

Liabilities	₹	Assets	₹
Capital A/cs:		Plant & Machinery	50,000
X	30,000	Sundry Debtors	2,00,000
Y	40,000	Advance to X	20,000
Z	30,000	Profit and Loss A/c (Balance)	80,000
Trade Creditors	1,20,000	Cash	10,000
Loan from Z (advanced 1.7.2013)	20,000		
Loan from Bank on Book debts and Plant	1,20,000		
	3,60,000		3,60,000

You ascertain that the balance in Profit and Loss Account is prior to charging interest, Plant and Machinery and Debtors realised ₹ 2,00,000. X's private estate which was valued at ₹ 70,000 has a liability thereon ₹ 30,000. The private estate realised only ₹ 40,000. Y is insolvent. Z can pay only 50 paise in the rupee of what is payable on his own account to the partnership.

Show Realisation Account, Cash Account and Partners' Capital Accounts. The loss on realisation is to be determined after considering the amount ultimately paid to creditors.

Solution

Dr. **Realisation Account** **Cr.**

		X + 4,70,000			X + 4,70,000

Dr. (2) Cash Account Cr.

Date	Particulars	₹	Date	Particulars	₹
2014	To Balance b/d	10,000	2014	By Realisation A/c (payment of bank loan)	1,20,000
June 30	To Realisation A/c	2,00,000	June 30	By Realisation A/c (payment to creditors)	X + 1,00,000
	To X Capital A/c (₹ 40,000 – ₹ 30,000)	10,000			
	To Z Capital A/c	X			
		X + 2,20,000			X + 2,20,000

Dr. (3) Z Capital Account Cr.

Date	Particulars	₹	Date	Particulars	₹
2014	To Profit & Loss A/c	40,600	2014	By Balance b/d	30,000
June 30	To Realisation A/c (1/2 loss)	X/2 + 15,000	June 30	By Loan A/c (including interest)	21,200
				By Cash A/c	1/2 (X/2 + 4,400)
				By Deficiency A/c	1/2 (X/2 + 4,400)
		X/2 + 55,600			X/2 + 55,600

(4) Let the amount brought in by Z = X. X = 1/2 (X/2 + 4,400); or, 2X = X/2 + 4,400; or, 4X = X + 8,800; or, 3X = 8,800; or, X = 2,933. Therefore, Z will bring in ₹ 2,933.

Gradual Realisation of Assets and Piece-meal Distribution

In all the previous illustrations, one of the following two assumptions has been made:

(i) all the assets are realised simultaneously and all the liabilities are settled together, before the partners are paid off; or

(ii) when the assets were sold gradually, partners are paid off after realisation of ***all the assets*** and payment of all the liabilities.

In actual practice, the above assumptions are unrealistic. In fact, when a partnership is in the process of being dissolved, assets are sold gradually one after another to fetch maximum possible price. However, all the assets may be realised at a time if the business is being sold as a single unit.

When the assets are realised individually (some through agent or tender or auction), it may take several months to realise all the assets. The partners, in such a case, do not wish to wait till all the assets are realised. It is universally accepted practice that an interim distribution is made to the partners for their claims (of course, after paying off creditors) as and when cash is available for this purpose. There are two problems associated with this practice.

First, the profit-sharing ratio of the partners may not be as per their capital contribution.

Secondly, there is uncertainty of future realisations.

Therefore, when one asset is realised, partners are not paid off in their profit-sharing ratio. Instead, available cash is distributed in such a fashion that a partner, who has contributed more capital as compared to other partners, gets his surplus capital back in priority.

At the same time, at every stage of distribution, each partner bears his share of possible losses, thus avoiding overpayment to any partner and the necessity of recoupment from him at a subsequent stage. For achieving these objectives, any of the following two methods may be adopted: (i) Surplus Capital Method; or (ii) Maximum Loss Method

Priority of Distribution

When the assets are realised gradually, available cash at any particular point of time should be utilised in the following manner:

1. To meet the realisation expenses.
2. To pay off preferential creditors (e.g., government rates and taxes, etc)
3. To pay off other creditors. All the creditors are to be paid off in the ratio of their individual claim. But a secured creditor get a priority over ordinary creditors upto the amount realised from that particular asset by which his claim is secured by the firm. But for the balance of his claim, he is at par with other ordinary creditors.
4. To pay off partners' loans.
5. To pay off partners' capitals.

Surplus Capital Method

This method is suitable when the following two conditions are satisfied:

(a) the partners' profit-sharing ratio is not as per their capital contribution; and

(b) all the partners are solvent and are likely to remain so.

The partners with the absolute surplus capitals are paid off first, followed by payment to others having surplus capitals. At last, payment is to be made to the partners in the profit-sharing ratio. The surplus capital is calculated as follows :

Step 1 Divide adjusted capital (Capital Account + Current Account + Share of Reserve) of each partner by his profit-sharing ratio. The smallest quotient should be taken as ***Base Capital***.

Step 2 Calculate relative capital by multiplying base capital and profit-sharing ratio of each partner.

Step 3 Calculate surplus capital by deducting relative capital (Step 2) from adjusted capital of each partner.

Step 4 Divide surplus capital (Step 3) by profit-sharing ratio of each partner. The smallest quotient should be taken as ***Revised Base Capital***.

Step 5 Again, calculate relative capital by multiplying revised base capital and profit-sharing ratio.

Step 6 Calculate absolute surplus capital by deducting revised base capital from surplus capital (Step 3).

Illustration 26

From the following information calculate absolute surplus capital:

(i) Partners' Capital Accounts balances as per last Balance Sheet : A ₹ 40,000; B ₹ 25,000; C ₹ 10,000.
(ii) General Reserve as per last Balance Sheet : ₹ 12,000.
(iii) Profit Sharing Ratio 3 : 2 : 1.

Solution **Calculation of Absolute Surplus Capital**

Step	Particulars	A (₹)	B (₹)	C (₹)
	Capital Accounts	40,000	25,000	10,000
	General Reserve (3 : 2 : 1)	6,000	4,000	2,000
	(1) **Adjusted Capital**	46,000	29,000	12,000
	(2) Profit-sharing ratio	3	2	1
STEP 1	(3) [(1)/ (2)]	15,333	14,500	$\boxed{12,000}$
	(4) Base Capital (being smallest)	—	—	12,000
STEP 2	(5) Relative Capital (4) x (2)	36,000	24,000	12,000
STEP 3	(6) [(1) – (5)] = **Surplus Capital**	10,000	5,000	—
STEP 4	(7) [(6) / (2)]	3,333	2,500	—
	(8) Revised Base Capital (being smaller)	—	$\boxed{2,500}$	—
STEP 5	(9) Relative Capital [(8) x (2)]	7,500	5,000	—
STEP 6	(10) [(6) – (9)] **Absolute Surplus Capital**	2,500	Nil	Nil

Illustration 27

P, Q and R are partners in a firm sharing profits and losses in the ratio of 3 : 2 : 1. Their Balance Sheet is as follows :

Liabilities	₹	Assets	₹
P's Capital	24,000	Sundry Assets	50,000
Q's Capital	16,000		
R's Capital	10,000		
	50,000		50,000

They dissolved the firm and the assets were realised as: (i) 1st instalment ₹ 20,000; (ii) 2nd instalment ₹ 12,000 (iii) 3rd instalment ₹ 3,000. Prepare a statement showing how the amounts realised should be distributed as and when they are received.

Solution **Calculation of Absolute Surplus Capital**

		P (₹)	Q (₹)	R (₹)
	(1) Capital Accounts	24,000	16,000	10,000
	(2) Profit sharing ratio	3	2	1
STEP 1	(3) [(1)/(2)]	$\boxed{8,000}$	8,000	10,000
	(4) Base Capital (being smallest)	8,000	—	—
STEP 2	(5) Relative Capital (4) x (2)	24,000	16,000	8,000
STEP 3	(6) [(1) – (5)] **Surplus Capital**	Nil	Nil	2,000

Statement Showing Priority of Distribution

First, ₹ 2,000 to be paid to R. The balance of first realisation ₹ (20,000 – 2,000) = 18,000 to be paid to P, Q and R in the profit-sharing ratio. All subsequent realisations also to be distributed among P, Q and R in the profit-sharing ratio.

Statement Showing Distribution of Proceeds of Realisation

	Amount available (₹)	Capitals P (₹)	Q (₹)	R (₹)
Amount due		24,000	16,000	10,000
First Realisation	20,000			
Less: Paid to R (surplus capital)	2,000	—	—	2,000
Balance	18,000			
Less: Paid to P, Q and R (3 : 2 : 1)	18,000	9,000	6,000	3,000
Balance due		15,000	10,000	5,000
Second Realisation	12,000			
Less: Paid to P, Q and R (3 : 2 : 1)	12,000	6,000	4,000	2,000
Balance due		9,000	6,000	3,000
Third Realisation	3,000			
Less: Paid to P, Q and R (3 : 2 : 1)	3,000	1,500	1,000	500
Balance due (being loss on realisation)		7,500	5,000	2,500

Illustration 28

A, B and C were partners in a firm sharing profits and losses in the ratio of 3 : 2 : 1. The partnership was dissolved on 30.9.2014 when the Balance Sheet was as follows :

Liabilities	₹	Assets	₹
Capitals : A : ₹ 12,000; B : ₹ 11,000; C : ₹ 3,000	26,000	Cash	8,000
Loan : A : ₹ 6,000; B : ₹ 10,000	16,000	Debtors	19,000
Creditors	25,000	Stock	40,000
	67,000		67,000

It was agreed that net realisations should be distributed in due order at the end of each month. The realisations and expenses were as follows (all figures in ₹) :

	October 2014	November 2014	December 2014	January 2015	February 2015
Debtors	5,000	3,000	5,000	2,000	3,000
Stock	8,000	8,000	12,000	10,600	1,000
Expenses	2,000	1,000	1,000	2,000	500

The stock was completely disposed off. It was agreed that C should take over the remaining debtors of ₹ 100.

Show the distribution of cash as and when realised.

Solution

Calculation of Absolute Surplus Capital

Step	Particulars	A (₹)	B (₹)	C (₹)
	(1) Capital Accounts	12,000	11,000	3,000
	(2) Profit sharing ratio	3	2	1
STEP 1	(3) [(1)/(2)]	4,000	5,500	$\boxed{3{,}000}$
	(4) Base Capital (being smallest)	—	—	3,000
STEP 2	(5) Relative Capital (4) x (2)	9,000	6,000	3,000
STEP 3	(6) [(1) – (5)] = **Surplus Capital**	3,000	5,000	—
STEP 4	(7) [(6) / (2)]	$\boxed{1{,}000}$	2,500	—
	(8) Relative Base Capital (being smaller)	1,000	—	—
STEP 5	(9) Relative Capital [(8) x (2)]	3,000	2,000	—
STEP 6	(10) [(6) – (9)] **Absolute Surplus Capital**	—	3,000	—

Statement Showing Priority of Distribution

First, ₹ 25,000 to be paid to the creditors.
Next, ₹ 16,000 to be paid to A and B in the ratio of 3 : 5 for their loan.
Next, ₹ 3,000 to be paid to B for Absolute Surplus.
Next, ₹ 5,000 to be paid to A and B in the ratio of 3 : 2.
Balance to be paid to A, B and C in the ratio of 3 : 2 : 1.

Cash Available in Each Month

Month	Debtors	Stock	Expenses	Cash Available
October 2014	5,000	8,000	2,000	11,000
November 2014	3,000	8,000	1,000	10,000
December 2014	5,000	12,000	1,000	16,000
January 2015	2,000	10,600	2,000	10,600
February 2015	3,000	1,000	500	3,500

Statement Showing Distribution of Proceeds of Realisation

	Amount available	Creditors ₹	Loan A	Loan B	Capitals A	Capitals B	Capitals C
Amount Due		25,000	6,000	10,000	12,000	11,000	3,000
Cash (Note 1)	8,000						
Less : Paid to Creditors	8,000	8,000	—	—	—	—	—
Balance Due		17,000	6,000	10,000	12,000	11,000	3,000
Net Realisation of October 2014	11,000						
Less : Paid to Creditors	11,000	11,000	—	—	—	—	—
Balance Due		6,000	6,000	10,000	12,000	11,000	3,000
Net Realisation of November 2014	10,000						
Less : Paid to Creditors	6,000	6,000					
	4,000						
Less : Paid to A and B (Loan) 3 : 5	4,000	—	1,500	2,500	—	—	—
Balance Due			4,500	7,500	12,000	11,000	3,000
Net Realisation of December 2014	16,000						
Less : Paid to A and B (Loan)	12,000		4,500	7,500	—	—	—
	4,000						
Less : Paid to B (Absolute Surplus)	3,000		—	—	—	3,000	—
	1,000						
Less: Paid to A and B (3 : 2)	1,000		—	—	600	400	—
Balance Due					11,400	7,600	3,000
Net Realisation of January 2015	10,600						
Less : Paid to A and B (3 : 2)	4,000				2,400	1,600	—
	6,600						
Less : Paid to A, B and C (3 : 2 : 1)	6,600				3,300	2,200	1,100
Balance Due					5,700	3,800	1,900
Net Realisation of February 2015	3,500						
Add : Debtors taken over by C	100						
	3,600						
Less : Paid to A, B and C (3 : 2 : 1)	3,600				1,800	1,200	*600
Balance left unpaid (Being loss on realisation)					3,900	2,600	1,300

Working Note : (1) It is assumed that cash was distributed immediately. * It includes ₹ 100 for debtors.

Illustration 29

A, B and C are in partnership sharing profits and losses in the ratio of 3 : 2 : 1. They decided to dissolve the business on 31.12.2014, on which date their Balance Sheet was as follows :

Liabilities			₹	Assets	₹
Capital Accounts :	A	38,700		Land and Buildings	30,810
	B	10,680		Motor Car	5,160
	C	11,100	60,480	Investments	1,080
Loan Account :	C		3,000	Stock	19,530
Creditors			10,320	Debtors	11,280
				Cash	5,940
			73,800		73,800

The assets were realised piece-meal as follows and it was agreed that cash should be distributed as and when realised.

15.1.2015 — ₹ 10,380; 20.2.2015 — ₹ 27,900; 23.3.2015 — ₹ 3,600; 15.4.2015 — C took over investments at a value of ₹ 1,260; 27.4.1996 — ₹ 19,200.

Dissolution expenses were originally provided for an estimated amount of ₹ 2,700 but actual amount spent on 29.3.2015 was ₹ 1,920. The creditors were settled for ₹ 10,080.

You are required to prepare a statement showing distribution of cash amongst the partners.

Solution

Calculation of Absolute Surplus Capital

Step	Particulars	A (₹)	B (₹)	C (₹)
	(1) Capital Accounts	38,700	10,680	11,100
	(2) Profit sharing ratio	3	2	1
STEP 1	(3) [(1)/(2)]	12,900	$\boxed{5,340}$	11,100
	(4) Base Capital (being smallest)	—	5,340	—
STEP 2	(5) Relative Capital (4) x (2)	16,020	10,680	5,340
STEP 3	(6) [(1) – (5)] = **Surplus Capital**	22,680	—	5,760
STEP 4	(7) [(6) / (2)]	7,560	—	$\boxed{5,760}$
	(8) Relative Base Capital (being smaller)	—	—	5,760
STEP 5	(9) Relative Capital [(8) x (2)]	17,280	—	5,760
STEP 6	(10) [(6) – (9)] **Absolute Surplus Capital**	5,400	—	—

Statement Showing Priority of Distribution

First, ₹ 10,080 to be paid to the creditors (adjusting discount) after providing ₹ 2,700 for dissolution expenses.
Next, ₹ 3,000 to be paid to C for loan.
Next, ₹ 5,400 to be paid to A for Absolute Surplus.
Next, ₹ 23,040 to be paid to A and C in the ratio of 3 : 1.
Balance to be paid to A, B and C in the ratio of 3 : 2 : 1.

Statement Showing Distribution of Proceeds of Realisation

	Amount available	Creditors ₹	Loan	Capitals		
			C	A	B	C
Amount Due		10,320	3,000	38,700	10,680	11,100
Cash in hand	5,940					
Less: Provision for dissolution expenses	2,700					
	3,240					
Less: Paid to the Creditors	3,240	3,240				
Balance Due		7,080	3,000	38,700	10,680	11,100
Realisation of 15.1.2015	10,380					
Less: Paid to the Creditors	6,840	6,840	—	—	—	—
	3,540	240	—	—	—	—
Less: Paid to C (Loan)	3,000	—	3,000			
Adjusted for discount received	—	240				
	540					
Less: Paid to A (Absolute Surplus)	540			540		
Balance Due				38,160	10,680	11,100
Realisation of 20.2.2015	27,900					
Less: Paid to A (Absolute Surplus)	4,860			4,860	—	—
	23,040					
Less: Paid to A and C (3 : 1)	23,040			17,280	—	5,760

Balance Due				16,020	10,680	5,340
Realisation of 23.3.2015	3,600					
Less: Paid to A, B and C (3 : 2 : 1)	3,600			1,800	1,200	600
Balance Due				14,220	9,480	4,740
Surplus of dissolution expenses : ₹ (2,700 – 1,920)	780					
Less: Paid to A, B and C (3 : 2 : 1)	780			390	260	130
Balance Due				13,830	9,220	4,610
Investments taken over by C (Note 1)				—	—	1,260
Realisation of 27.4.2015	19,200					
Less: Paid to A and B (Note 2)	6,300			3,780	2,520	—
	12,900					
Less : Paid to A, B and C (3 : 2 : 1)	12,900			6,450	4,300	2,150
Balance left unpaid (Being loss on realisation)				3,600	2,400	1,200

Working Note :

(1) Technically, C will be allowed to take over investments only after the realisation of 27th April.

(2) Out of realisation of 27.4.2015, ₹ 3,780 (1,260 / 1 x 3) to be paid to A and ₹ 2,520 (1,260 / 1 x 2) to B to adjust the value of investments taken over by C. The balance is to be distributed among A, B and C in the ratio of 3 : 2 : 1.

Illustration 30

Vidya, Veena and Vibha were in partnershp sharing profits and losses as 3:2:1 respectively. The partnership was dissolved on 31st March 2015 following Vidya's proceeding abroad. The Balance sheet of the firm on that date was as follows:

Liabilities	₹	Assets	₹
Capital A/cs:		Cash in hand	28,000
Vidya	1,40,000	Sundry Debtors	2,94,000
Veena	70,000	Stock-in-trade	1,12,000
Vibha	14,000		
Creditors	2,10,000		
	4,34,000		4,34,000

There was a contingent liability in respect of a bill for ₹ 10,000 due on 25th August 2015 under discount. It was agreed that the net realisation should be distributed in their due order (at the end of each month) but as safely as possible. The realisation and expenses were as under:

2015	Stock and Debtors (₹)	Expenses (₹)
April	84,000	7,000
May	1,26,000	5,400
June	70,000	4,900
July	77,000	3,500
August	35,500	3,500

The Stock was completely disposed of and amounts due from debtors were realised, the balance being irrecoverable. the acceptor of bill under discount met the bill on due date. Prepare statement showing piecemeal distribution, using Surplus Capital Method.

Solution **Calculation of Absolute Surplus Capital**

Step	Particulars	Vidya (₹)	Veena (₹)	Vibha (₹)
	(1) Capital Accounts	1,40,000	70,000	14,000
	(2) Profit sharing ratio	3	2	1
STEP 1	(3) [(1)/(2)]	46,667	35,000	14,000
	(4) Base Capital (being smallest)	—	—	14,000
STEP 2	(5) Relative Capital (4) x (2)	42,000	28,000	14,000
STEP 3	(6) [(1) – (5)] = **Surplus Capital**	98,000	42,000	—
STEP 4	(7) [(6) / (2)]	32,667	21,000	—
	(8) Revised Base Capital (being smaller)	—	21,000	—
STEP 5	(9) Relative Capital [(8) x (2)]	63,000	42,000	—
STEP 6	(10) [(6) – (9)] **Absolute Surplus Capital**	35,000	Nil	Nil

Cash Available in Each Month

Month	Stock and Debtors	Expenses	Cash available
April	84,000	7,000	77,000
May	1,26,000	5,400	1,20,600
June	70,000	4,900	65,100
July	77,000	3,500	73,500
August	35,500	3,500	32,000

Statement Showing Priority of Distribution

First ₹ 2,10,000 to be paid to the creditors.
Next ₹ 10,000 to be kept for Contingent liability in respect of bill under discount.
Next ₹ 35,000 to be paid to Vidya.
Next ₹ (63,000 + 42,000) = ₹ 1,05,000 to be paid to Vidya and Veena in the ratio 3:2.
Balance in the profit sharing ratio to Vidya, Veena and Vibha.

Statement Showing Distribution of Proceeds of Realisation

	Amount available	Creditors ₹	Capitals		
			Vidya	Veena	Vibha
Amount due		2,10,000	1,40,000	70,000	14,000
Cash in hand	28,000				
Less: Paid to the creditors	28,000	28,000	—	—	—
Balance due		1,82,000	1,40,000	70,000	14,000
Realisation of April	77,000				
Less: Paid to the creditors	77,000	77,000	—	—	—
Balance due		1,05,000	1,40,000	70,000	14,000
Realisation of May	1,20,600				
Less: Paid to the creditors	1,05,000	1,05,000	—	—	—
	15,600				
Less: Retained for contingent liability (See Note)	10,000			—	—
Less: Paid to Vidya (absolute surplus capital)	5,600		5,600		
Balance due			1,34,400	70,000	14,000
Realisation of June	65,100				
Less: Paid to Vidya (Absolute Surplus)	29,400		29,400	—	—
	35,700				
Less: Paid to Vidya and Veena (3:2)	35,700		21,420	14,280	—
Balance due			83,580	55,720	14,000
Realisation of July	73,500				
Less: Paid to Vidya and Veena (3:2)	69,300		41,580	27,720	—
	4,200				
Less: Paid to Vidya, Veena and Vibha (3:2:1)	4,200		2,100	1,400	700
Balance due			39,900	26,600	13,300
Realisation of August	32,000				
Add: Retained amount for contingent liabilities	10,000				
	42,000				
Less: Paid to Vidya, Veena and Vibha (3:2:1)	42,000		21,000	14,000	7,000
Balance left unpaid (Being loss on realisation)			18,900	12,600	6,300

Tutorial Note : After paying creditors in full, an amount should be provided for bill under discount to the extent of ₹ 10,000. If the bill is met at maturity, the amount provided earlier will be available for distribution amongst the partners.

Maximum Loss Method

This method is suitable when a partner or (partners) is known to be insolvent or is likely to be so. Under this method, every instalment realised is considered as final realisation, i.e., the remaining assets and claims are worthless. The maximum possible loss (Balance due *minus* assets realised) is distributed among all the partners in the profit-sharing ratio. Any partner(s) whose apportioned loss exceeds his balance due is assumed for this purpose to be insolvent and his negative balance will be shared by the solvent partners in their capital ratio ***[assuming Garner Vs. Murray]***. This process is repeated till the negative balance is abolished. The partners having positive balance is paid-off first.

The same principle is to be followed for all subsequent realisations.

In this connection, it should be noted that: (i) cash in hand is to be considered as first realisation; and (ii) for calculating capital ratio, balance of capital account and share of reserve and surplus are to be considered when capitals are fluctuating. However, when capitals are fixed, no adjustment is required.

Illustration 31

Partners A, B and C share profits in the proportion of 1/2, 1/3 and 1/6. Their Balance Sheet is as follows:

Liabilities	₹	Assets	₹
Capital Accounts:		Sundry Assets	80,000
A	30,000		
B	30,000		
C	20,000		
	80,000		80,000

The firm is dissolved and assets are realised as follows:

First realisation ₹ 10,000; Second realisation ₹ 15,000; and Third and final realisation ₹ 25,000.

Prepare a statement showing how the distributions should be made applying Garner v. Murray principle.

Statement Showing Distribution of Cash on Capital Accounts

	Total	Capitals		
	₹	A	B	C
(1) Distribution of ₹ 10,000 (first realisation)				
Balance due	80,000	30,000	30,000	20,000
Less: Possible loss, assuming remaining assets proved to be worthless (3 : 2 : 1)	70,000	35,000	23,333	11,667
		(–) 5,000	(+) 6,667	(+) 8,333
Deficiency of A's capital written-off against those of B and C in the ratio of their capitals 3 : 2		(–) 5,000	3,000	2,000
Manner in which ₹ 10,000 is to be distributed		Nil	3,667	6,333
(2) Distribution of ₹ 15,000 (second realisation)				
Balance due after making payment as above	70,000	30,000	26,333	13,667
Less: Possible loss, assuming remaining assets proved to be worthless (3 : 2 : 1)	55,000	27,500	18,333	9,167
Manner in which ₹ 15,000 is to be distributed	15,000	2,500	8,000	4,500
(3) Distribution of ₹ 25,000 (final realisation)				
Balance due after making payment as above	55,000	27,500	18,333	9,167
Less: Possible loss, assuming remaining assets proved to be worthless (3 : 2 : 1)	30,000	15,000	10,000	5,000
Manner in which ₹ 25,000 is to be distributed	25,000	12,500	8,333	4,167

Illustration 32

Rahim, Antony and Prasad were in partnership sharing profits and losses in proportion to 5:4:3.

They agreed to dissolve the firm on 1st January, 2015 on which date their assets and liabilities were as under:

Liabilities		₹	Assets	₹
Creditors		76,000	Debtors	1,45,000
Loan from Antony		9,000	Stock	1,50,000
Capital Accounts:	Rahim	1,20,000	Plant	50,000
	Anthony	90,000	Furniture	10,000
	Prasad	60,000		
		3,55,000		3,55,000

The assets were realised in the following instalments and the proceeds were distributed as and when realised:

1st instalment 50,000; 2nd instalment 30,000; 3rd instalment 21,000; 4th instalment 90,000; 5th instalment 84,000.

The cost of dissolution was estimated at ₹ 5,000 and the amount was kept as reserve before distribution of the proceeds until the 3rd instalment when the actual cost of ₹ 4,000 was met.

Prepare a statement showing the distribution of each instalment realised.

Solution **Statement Showing Realisation and Distribution of Cash**

Particulars	Realisation	Expenses	Creditors	Loan from Anthony	Partners' Capitals
1st instalment	50,000	5,000	45,000	—	—
2nd instalment	30,000	—	30,000	—	—
3rd instalment including excess of realisation expenses	22,000	—	1,000	9,000	12,000
4th instalment	90,000	—	—	—	90,000
5th instalment	84,000	—	—	—	84,000
TOTAL	2,76,000	5,000	76,000	9,000	1,86,000

Statement Showing Distribution of Cash on Capital Accounts

	Total	Capitals		
	₹	Rahim	Anthony	Prasad
(1) Distribution of ₹ 12,000.				
Balance Due	2,70,000	1,20,000	90,000	60,000
Less: Possible loss, assuming remaining assets proved to be worthless (5 : 4 : 3)	2,58,000	1,07,500	86,000	64,500
		12,500	4,000	(–) 4,500
Deficiency of Prasad's capital written-off against those of Rahim and Anthony in the ratio of their capitals 4 : 3		2,571	1,929	(+) 4,500
Manner in which ₹ 12,000 is to be distributed		9,929	2,071	Nil
(2) Distribution of ₹ 90,000 (4th instalment)				
Balance due after making payment as above	2,58,000	1,10,071	87,929	60,000
Less: Possible loss, assuming remaining assets proved to be worthless (5 : 4 : 3)	1,68,000	70,000	56,000	42,000
Manner in which ₹ 90,000 is to be distributed	90,000	40,071	31,929	18,000
(3) Distribution of ₹ 84,000 (5th instalment)				
Balance due after making payment as above	1,68,000	70,000	56,000	42,000
Less: Possible loss, assuming remaining assets proved to be worthless (5 : 4 : 3)	84,000	35,000	28,000	21,000
Manner in which ₹ 84,000 is to be distributed	84,000	35,000	28,000	21,000

Illustration 33

A, B and C were in partnership sharing profits and losses in the ratio of 3:2:1. The partnership firm was dissolved on 30.11.2013 when the position was as follows:

Liabilities	₹	Assets	₹
Sundry creditors	3,15,000	Cash in hand	50,000
Capital Accounts:		Stock-in-trade	1,60,000
A	2,10,000	Sundry Debtors	4,40,000
B	1,05,000		
C	20,000		
	6,50,000		6,50,000

The partners desired that the net realisation should be distributed according to rules at the end of each month. The realisation and expenses were as under:

	Expenses (₹)	Stock + Debtors (₹)
31.12.2013	10,000	1,25,000
31.01.2014	9,000	1,88,600
31.03.2014	7,000	1,04,650
31.08.2014	6,000	1,14,750
30.11.2014	4,000	52,000

The stock was disposed off and debtors were all realised. Set out Cash and Capital Accounts showing monthly distribution of cash realised, applying Maximum Loss Basis.

Solution **Statement Showing Realisation and Distribution of Cash**

Particulars	Realisation	Expenses	Creditors	Partners' Capitals
31.11.2013 (Cash in hand)	50,000	—	50,000	—
31.12.2013	1,25,000	10,000	1,15,000	—
31.01.2014	1,88,600	9,000	1,50,000	29,600
31.03.2014	1,04,650	7,000	—	97,650
31.08.2014	1,14,750	6,000	—	1,08,750
30.11.2014	52,000	4,000	—	48,000
TOTAL	6,35,000	36,000	3,15,000	2,84,000

Statement Showing Distribution of Cash on Capital Accounts

	Total	Capitals		
	₹	A	B	C
(1) Distribution of ₹ 29,600

KEY POINTS

- The process of breaking up and discontinuing a Partnership business is called ***Dissolution of the firm***. The dissolution of the firm spells an end to the business.
- **Steps in the Dissolution Process**
  - ¤ The ***first step*** in the dissolution process is to prepare a Balance Sheet of the firm as on the date of dissolution.
  - ¤ In the ***next step*** of the dissolution process, non-cash assets that are not acceptable for distribution in their present form are sold and converted into cash.
  - ¤ The ***last step*** in the dissolution is to distribute the available cash to creditors and partners.
- ***In effect, the decision in Garner Vs. Murray boiled down to this:***
  - ¤ The solvent partners should contribute to the deficiency of capital (caused by loss on realisation) in cash their share only and not the insolvent partners' share.
  - ¤ The net effect of what has been stated above is that the deficiency of capital of the insolvent partner gets distributed among the solvent partners in the ratio of their last agreed capitals.
- **Criticism of Garner Vs. Murray**
  - ¤ It does not apply when the firm is having only two partners.
  - ¤ It considers only the book capital of the partners, ignoring the private estate of the solvent partners. If a partner contributed more capital than that of the other partners, he will have to bear more burden than other partners contributing less capital.
  - ¤ If a partner is having a nil capital balance or a debit balance, he will not have to bear the deficiency of the insolvent partner.
  - ¤ Introduction of cash by the solvent partners to make good their share of loss on realisation is unnecessary, when the balance of the capital accounts of the solvent partners are sufficient to bear the deficiency of the insolvent partner.
- **Firm's Debts Vs Private Debts**
  - ¤ The joint estate of the partners as a firm and their separate estates as individuals are administered separately.
  - ¤ The separate estate of each partner is to be utilised first for paying his ***private debts***. Any surplus from the separate estate can be utilised for paying firm's debts. But any deficiency of his private estate is not included in the joint estate. Similarly, the joint estate of the firm is to be utilised first for paying the debts of the firm.
- When all the partners are insolvent and the firm's assets fall short of its liabilities, the creditors of the firm cannot be paid in full. The available cash with the firm (cash in hand + final dividend received from the partners' estate) is used first for paying realisation expenses. The balance amount is paid to creditors proportionally. In order, to close the books of the firm, Realisation Account is prepared in the usual manner without transferring the liabilities to Realisation Account. All liabilities are discharged directly to the extent possible. Any balance left unpaid is transferred to Deficiency Account. The Partners' Capital Accounts are then closed by transferring to Deficiency Account.
- When the assets are realised gradually, available cash at any particular point of time should be utilised in the following manner:
  - ¤ To meet the realisation expenses.
  - ¤ To pay off preferential creditors (e.g., government rates and taxes, etc)
  - ¤ To pay off other creditors. All the creditors are to be paid off in the ratio of their individual claim. But a secured creditor get a priority over ordinary creditors upto the amount realised from that particular asset by which his claim is secured by the firm. But for the balance of his claim, he is at par with other ordinary creditors.
  - ¤ To pay off partners' loans.
  - ¤ To pay off partners' capitals.

THEORETICAL QUESTIONS

1. What do you understand by dissolution of a firm? Bring out clearly the difference between dissolution of partnership and dissolution of firm.
2. What accounting entries have to be passed for closing the books of account of the firm?
3. Explain circumstances under which a firm is dissolved.
4. Explain how the Partners' Capital Account are normally settled in the case of dissolution of the partnership firm.

5. What is the rule in Garner Vs Murray?
   In what situations would it apply?
   Does it apply to firm constituted under the Indian Partnership Act?
6. Explain the application of Garnery Vs Murray when
   (a) Capitals are fixed; and (b) Capitals are fluctuating.
7. Write a short note on Piece-meal distribution.

OBJECTIVE QUESTIONS

Multiple choice

Select the best choice to complete each statement or answer each question below.

1. The court may dissolve a firm when:
   A a partner has become of unsound mind
   B the business was formed for a fixed term
   C none of these.
2. The first step in the dissolution process is to:
   A prepare a balance sheet on the date of dissolution
   B distribute the available cash to the creditors
   C none of these.
3. The solvent partners must share the deficiency of an insolvent partner
   A in the profit-sharing ratio
   B in the capital ratio
   C none of these.
4. Surplus capital method is suitable when all the partners are
   A solvent
   B insolvent
   C none of these.
5. Under maximum loss method, every instalment realised is considered as
   A first realisation
   B final realisation
   C none of these.
6. Garner vs. Murray is applicable only when
   A there is an agreement among the partners for sharing the deficiency in capital account of insolvent partner
   B there is no agreement among the partners for sharing the deficiency in capital account of insolvenet partner
   C there is a court direction

PRACTICAL QUESTIONS

When All Partners are Solvent

1. A, B and C decide to dissolve their partnership on December 31, 2014 on which date the Balance Sheet of the firm stood as follows:

Liabilities	₹	Assets	₹
Capital — A	75,000	Plant and Machinery	2,02,500
Capital — B	52,500	Stock	1,12,500
Capital — C	22,500	Sundry Debtors	90,000
Loan Account — A	75,000		
Sundry Creditors	67,500		
Bank overdraft	1,12,500		
	4,05,000		4,05,000

In order to give effect to the above decision, draw up the Realization Account, Partners' Capital Accounts and the Cash Book after taking the following into consideration:

(a) Profits had been shared amongst A, B and C as 3:2:1.
(b) A agreed to take over part of the business for which he agreed to pay ₹ 37,500 for goodwill together with half of the plant and machinery and the stock, for which he agreed to pay ₹ 1,12,500 and ₹ 60,000 respectively.
(c) The balance of the plant and machinery was sold for ₹ 75,000 and of the stock for ₹ 30,000.
(d) Sundry debtors realized ₹ 84,750.

2. Amal, Bimal and Tamal are partners in a firm sharing profits and losses as Amal 60%, Bimal 30% and Tamal 10%. They agreed to dissolve the firm when the Balance Sheet was as under :

Liabilities	₹	Assets	₹
Capital — Amal	40,000	Land	10,000
Capital — Bimal	65,000	Building	50,000
Reserve	24,000	Plant	30,000
Loan A/c — Amal	18,000	Investments	10,000
Sundry Creditors	9,000	Loose Tools	1,000
Bank Overdraft	5,000	Furniture	2,000
		Stock	41,500
		Sundry Debtors	15,000
		Capital — Tamal	1,500
	1,61,000		1,61,000

Land and Building were taken by Amal at a valuation of ₹ 12,000 and ₹ 40,000 respectively. Plant and Investment were sold at book values. Loose Tools realized ₹ 1,300 and Stock ₹ 40,000. Of the Sundry Debtors ₹ 750 proved bad. Furniture was taken by Bimal at ₹ 1,550. Creditors were paid off subject to a discount of 6%. The expenses of dissolution was ₹ 540 and a contingent liability of ₹ 600 was paid. Show the Realization Account, Bank Account and the Capital Accounts of the partners showing the final distribution.

3. Anil, Balwant and Coomar were partners, carrying on business under the name and style of Anil & Co., sharing profits and losses in the proportion of 4 : 3 : 2. Their Balance Sheet as at 31st December, 2014 was as under:

Liabilities	₹	Assets	₹
Capital A/c — Anil	40,000	Land & Building	55,000
Capital A/c — Balwant	20,000	Motor Car	15,000
Capital A/c — Coomar	10,000	Stock-in-trade	20,000
Sundry Creditors	40,000	Sundry Debtors	18,000
		Cash	2,000
	1,10,000		1,10,000

They agreed to dissolve the partnership on that date. Anil agreed to take over stock and Debtors at a discount of 10%. Balwant took over the Motor Car for ₹ 16,000. Land and Building was sold for ₹ 75,000 and expenses of sale amounted to ₹ 1,600. Creditors were settled at a discount of 1.5%.

Show the relevant Ledger Accounts.

4. Cloud, Storm and Rain were partners in a firm sharing profits and losses in the ratio of 5:3:2. Due to difference in opinion, they decided to dissolve the partnership with effect from 1st April, 2015 on which date the firm's Balance Sheet was as under:

Liabilities	₹	Assets	₹
Capital A/c — Cloud	60,000	Plant & Machineries	80,000
Capital A/c — Storm	40,000	Furniture & Fixtures	45,000
Capital A/c — Rain	30,000	Motor car	25,000
Current A/c — Cloud	8,000	Stock-in-trade	30,000
Current A/c — Storm	10,000	Sundry debtors	71,000
Sundry Creditors	1,20,000	Cash at bank	14,000
		Current A/c — Rain	3,000
	2,68,000		2,68,000

The following information is given :

(i) Plant costing ₹ 40,000 was taken over by Cloud at an agreed valuation of ₹ 45,000 and the remaining machineries realised ₹ 50,000.

(ii) Furniture & Fixtures realised ₹ 40,000.

(iii) Motor car was taken over by Storm for ₹ 30,000.

(iv) Sundry Debtors included a bad debt for ₹ 1,200 and the rest portion was realised subject to a cash discount of 10%.

(v) Stock worth ₹ 5,000 was taken over by Rain for ₹ 5,200 and the rest realised at 20% above their book value.

(vi) A creditor for ₹ 2,000 was untraceable and other creditors accepted payments allowing 15% discount. Realisation expenses amounted to ₹ 5,000.

You are required to show the Realisation Account and the Capital Accounts of the partners on dissolution showing final payments to them.

5. A, B and C give you the following Balance Sheet as on 31.12.2014.

Liabilities	₹	Assets	₹
Loan A/c — A	15,000	Plant & Machinery at cost	30,000
Capital A/c — A	30,000	Fixture & Fittings	2,000

Capital A/c — B	10,000	Stock		10,400
Capital A/c — C	2,000	Debtors	18,400	
Sundry Creditors	17,800	Less: Provision for bad debts	400	18,000
Loan on hypothecation of stock	6,200	Joint Life Policy		15,000
Joint Life Policy Reserve	12,400	Patents and Trade Marks		10,000
		Bank		8,000
	93,400			93,400

The partners shared profits and losses in the ratio of 4:2:3. The firm was dissolved on December 31, 2014 and you are given the following information:

(a) C had taken a loan from Insurers for ₹ 5,000 on the security of the Joint Life Policy. The policy was surrendered and insurers paid a sum of ₹ 10,200 after deducting ₹ 5,000 for C's loan and ₹ 300 interest thereon.

(b) One of the creditors took some of the patents whose book value was ₹ 6,000 at a valuation of ₹ 4,500. The balance to that creditor was paid in cash.

(c) The firm had previously purchased some shares in a joint stock company and had written them off on finding them useless. The shares were now found to be worth ₹ 3,000 and the loan creditor agreed to accept the shares at this value.

(d) The remaining assets realised the following amounts :
Plant and Machinery — ₹ 17,000;
Fixture and Fittings — ₹ 1,000;
Stock — ₹ 9,000;
Debtors — ₹ 16,500;
Patents — 50% of their book value.

(e) The liabilities were paid and a total discount of ₹ 500 was allowed by the creditors.

(f) The expenses of realisation amounted to ₹ 2,300.

Prepare the Realisation Account, Bank Account and the Partners' Capital Accounts.

6. A, B and C sharing profits in the ratio of 3 : 1 : 1 agree upon dissolution. They decide to divide certain assets and liabilities and continue business separately. Their Balance Sheet was as under:

Liabilities	₹	Assets		₹
Creditors	6,000	Cash		3,200
Loan	1,500	Sundry Assets		17,000
Capital A/c — A	27,500	Debtors	24,200	
Capital A/c — B	10,000	Less: Provision for bad debts	1,200	23,000
Capital A/c — C	7,000	Stock		7,800
		Fixtures		1,000
	52,000			52,000

It is agreed that:

(a) Goodwill is to be ignored.

(b) A is to take over all the fixtures at ₹ 800; debtors amounting to ₹ 20,000 at ₹ 17,200. The creditors of ₹ 6,000 to be assumed by A at that figure.

(c) B is to take over all the stocks at ₹ 7,000 and certain of the sundry assets at ₹ 7,200 (being book value less 10%).

(d) C is to take over the remaining sundry assets at 90% of book values, less ₹ 100 allowances and assume responsibility for the discharge of the loan, together with the accruing interest of ₹ 30 which has not been recorded in the books of the firm.

(e) The expenses of dissolution were ₹ 270. The remaining debtors were sold to a debt collecting agency for 50% of book values.

Prepare:
(i) Realisation Account; (ii) Partners' Capital Accounts; and (iii) Cash Account.

7. X, Y and Z, carrying on business from 1980, decided to dissolve their partnership on June 30, 2015, when their Balance Sheet was as under:

Liabilities	₹	Assets	₹
Creditors	34,000	Cash	25,000
Capital Accounts:		Debtors	62,000
X	1,20,000	Stock	37,000
Y	90,000	Tools	8,000
Z	60,000	Motor Cars	12,000
		Machinery	60,000
		Freehold building	1,00,000
	3,04,000		3,04,000

Y and Z agreed to form a new partnership to carry on the business and agreed that they shall acquire from the old firm the following assets at the amounts shown: Stock ₹ 40,000; Tools ₹ 5,000; Motor cars ₹ 25,000; Machinery ₹ 78,000; Freehold building ₹ 84,000; and Goodwill ₹ 60,000.

The partnership agreement of X, Y and Z provided that trading profits or losses shall be divided in the ratio of 3 : 2 : 1 and that capital profits or losses shall be divided in proportion to their capitals.

Debtors realise ₹ 59,000 and discount amounting to ₹ 720 is secured on payments due to creditors.

Prepare the necessary accounts of X, Y and Z giving effect to these transactions and prepare the opening Balance Sheet of Y and Z who bring the necessary cash to pay X in the ratio of 3 : 2.

8. A and B who make up their accounts annually to 31st December were in partnership sharing profits and losses in the ratio of 2:1. No interest was charged on drawings or credited to capital.

The following was the summary of the balances as on 31.12.2014 :

	₹		₹
Fixtures and fittings	22,000	Partners Capital A/c — A	31,000
Leasehold premises	50,000	Partners Capital A/c — B	10,000
Stock (opening)	7,600	Loan from A at 8% p.a.	20,000
Debtors	1,800	Creditors	6,400
Purchases	48,000	Sales	1,04,000
General expenses	16,000	Depreciation on motor vehicle as on 1.1.2014	3,600
Partners Drawings — A	6,000	Bank overdraft	26,200
Partners Drawings — B	4,800		
Motor vehicle, at cost	9,000		
Wages	36,000		
	2,01,200		2,01,200

For the purpose of closing of accounts on 31.12.2014, closing stock was valued at ₹ 6,200 and furniture and fittings at ₹ 18,000. Provision for depreciation on motor vehicle is to be made at 20% p.a. calculated on cost and for accrued general expenses ₹ 1,200. In addition, one year's interest is to be provided on A's loan.

The partnership was dissolved on 1.1.2015, it being agreed that

(i) A should take over stock for ₹ 6,000;

(ii) B should take over motor vehicle at ₹ 2,700 and part of the fittings and fixtures for ₹ 7,500;

(iii) Interest on A's loan should cease w.e.f. 1.1.2015;

During January, 2015 the following transactions took place :

(a) Leasehold premises were sold, realising a net amount of ₹ 60,000;

(b) ₹ 1,600 was collected from debtors and the balance was taken over by A;

(c) A portion of the fittings and fixtures were auctioned and realised ₹ 10,000. It was also agreed that the balance of fixtures and fittings should be taken over by B for ₹ 500;

(d) Creditors and accrued general expenses were paid in full;

(e) Realisation expenses amounted to ₹ 1,400;

(f) All amounts receivable and payable by A and B were settled.

You are required to prepare the following :

1. Profit and Loss Account for the year ended 31.12.2014 excluding profit or loss arising on dissolution;
2. Realisation Account;
3. Cash Account for January 2015;
4. Partners' Accounts showing the final settlement of dissolution.

9. Hill, Stone and Rock were in partnership owning a riding school and livery stables. Profits and losses were shared : Hill three- fifths, Stone one-fifth, Rock one-fifth. No interest was charged on drawings or credited on capital. The firm provided an instructor to the equitation classes of the local agricultural college.

The following was a summary of the Balances as on 31 December, 2014.

	₹			₹
Drawings:		Capital:		
Hill	1,500	Hill		6,000
Stone	1,200	Stone		4,400
Rock	1,000	Rock		1,690
Freehold land and buildings	8,000	Loan : Stone	3,000	
Hay and fodder, balance on January 1, 2014	250	Interest @ 6% to June 30, 2014	90	3,090
Hay and fodder purchased	1,500	Agricultural college equitation fees		150
Harness equipment and fittings	250	Sundry creditors		130
Horses valued on January 1, 2014	1,600	Hire horses and riding lessons		2,905
Horses purchased	100	Receipts from horses at livery		870
Motor vehicles	2,500	Prize money		75
Debtors	600	Sale of horses		60

Salaries and wages	2,500	Bank overdraft	2,500
Veterinary and other fees	180		
General expenses	600		
Loan interest	90		
	21,870		21,870

On 31 December 2014, hay and fodder were valued at ₹ 50, motor vehicles at ₹ 2,000, harness, equipment and fittings at ₹ 200, and horses at ₹ 1,400. Provision was needed for veterinary fees ₹ 50. With the exception of loan interest no further provisions were considered necessary.

The partnership was dissolved on 31 December 2014, on the following terms :

1. Rock was appointed instructor to the local agricultural college, and for this privilege, he paid into the partnership ₹ 200 which is to be divided between Hills and Stone.
2. He also took over assets at the following valuation:
   (i) six horses ₹ 600;
   (ii) the hay and fodder ₹ 40;
   (iii) part of the harness and equipment ₹ 75;
   (iv) a horse box ₹ 800.
3. Hill took over a motor car at a valuation of ₹ 450.
4. Net receipts from the sale of the freehold and buildings amounted to ₹ 8,750.
5. The debtors realised ₹ 530 and the remaining assets were sold by auction, the net receipts being ₹ 1,765.
6. The loan, with interest accrued to date, was repaid on 1 January, 2015.
7. The creditors were paid and a contingent liability, not brought into the accounts, was settled early in January for ₹ 250.
8. Cups and plate, not brought into the accounts, were distributed among the partners at the following valuation : Hill ₹ 20, Stone ₹ 10, Rock ₹ 60.

All transactions were completed and all amounts receivable or payable by the partners were settled before the end of January 2015.

You are required to prepare :

(a) the Profit and Loss Account for the year ended 31 December 2014, excluding any profits or losses arising on dissolution; (b) the Realisation Account; (c) the Cash Account; and (d) Partners' Capital Accounts showing the final settlement on dissolution.

10. Smart and Swift were in partnership as hotel proprietors sharing profits and losses: Smart three-fifths, Swift two-fifths. No interest was charged on drawings or credited on capital. The following was a summary of their trial balance as on 31 December 2014:

	₹		₹
Debtors	600	Bank Overdraft	4,590
Fittings and Fixtures	1,800	Loan : Smart at 6%	3,000
Foodstuffs — stock on December 31, 2013	420	Partners' Capital Accounts:	
Foodstuffs Purchased	2,600	Smart	3,000
Freehold Premises	6,000	Swift	500
General Expenses	810	Sundry Creditors	210
Partners' Drawings:		Takings	5,100
Smart	520		
Swift	750		
Motor Vehicle	700		
Wages	2,200		
	16,400		16,400

For the purposes of accounts as on 31 December 2014, the stock of foodstuffs was valued at ₹ 300 and ₹ 200 was to be written off the book value of the motor vehicle and ₹ 100 off fittings and fixtures. A provision of ₹ 60 was required for accrued general expenses and Smart was to be credited with a year's interest on his Loan Account.

The partnership was dissolved on 31 December 2014, it being agreed that:

1. Smart should take over the stock of foodstuffs for ₹ 250 and part of the fittings and fixtures for ₹ 600;
2. Swift should take over the motor vehicle for ₹ 400;
3. Interest on Smart's loan should cease as on 31 December 2014;
   During January 2015:
   (i) The freehold premises were sold, realising a net amount of ₹ 6,800;
   (ii) ₹ 480 was collected from debtors (the balance proving irrecoverable);
   (iii) The net proceeds from an auction of the balance of fittings and fixtures was received amounting to ₹ 1,400.

It was agreed that the few unsold items should be taken over partly by Smart for ₹ 40 and the rest by Swift for ₹ 20.

(iv) Creditors were paid in full together with incidental realisation and dissolution expenses of ₹ 120;

(v) All amounts receivable or payable by Smart and Swift were settled.

You are required to prepare :

(a) the Profit and Loss Account for the year ended 31 December 2014, excluding any profit or loss arising on dissolution; (b) the Realisation Account; (c) the Cash Account for January 2015, and; (d) Partners' Capital Accounts (in columnar form) showing the final settlement on dissolution.

11. X, Y and Z were partners sharing profits and losses in the ratio of 3:2:1. The position of the firm as on 1.1.2014 was:

Liabilities	₹	Assets	₹
X's capital	30,000	Fixed Assets	40,000
Y's capital	20,000	Debtors	30,000
Z's capital	10,000	Stock	40,000
General Reserve	12,000	Bank Balance	10,000
Capital Reserve	9,000		
Creditors	39,000		
	1,20,000		1,20,000

On this date, the partners decided to change their profit and loss sharing ratio to 1:2:3. Goodwill was valued at ₹ 18,000. No entries were, however, passed to give effect to this change.

On 31.12.2014, the Balance Sheet of the firm was :

Liabilities		₹	Assets	₹
X's Capital	30,000		Fixed Assets	36,000
Less: Drawings	5,000	25,000	Debtors	45,000
Y's Capital	20,000		Stock	55,000
Less: Drawings	3,000	17,000	Advances	14,000
Z's Capital	10,000			
Less: Drawings	4,000	6,000		
General Reserve		36,000		
Capital Reserve		9,000		
Creditors		50,000		
Bank overdraft		7,000		
		1,50,000		1,50,000

On 31.12.2014, the firm was sold as a going concern to Y for ₹ 1,35,000. Y introduced sufficient funds to pay off X and Z.

You are asked to : (a) Pass journal entries on 31.12.2014 to give effect to the above change in the constitution of the firm on 1.1.2014 and to close the books of the firm, on sale of business; and (b) Prepare the Balance Sheet of Y as on 1.1.2015.

When one of the Partners is Insolvent

12. A, B and C were partners in a firm sharing profits and losses in the ratio of 3 : 2 : 1. They decided to dissolve the firm when the state of affairs was as follows:

Liabilities	₹	Assets	₹
Sundry Creditors	14,500	Bank	4,700
A's Loan Account	9,000	Sundry Debtors	18,300
Capital Account: A	25,000	Stock	14,700
Capital Account: B	12,500	Investment	8,500
		Furniture & Fixtures	2,000
		Machine	11,000
		Capital Account : C	1,800
	61,000		61,000

Investment was fully taken by A in full settlement of his loan. The other assets except Cash at bank realised ₹ 47,100. The expenses for dissolution was ₹ 600. A dispute with a creditor was settled reducing his claim by ₹ 200. C was declared insolvent and 25 p in the rupee was recovered from his estate.

Prepare Realisation Account, Bank Account and Capital Accounts of the partners to close the books of the firm. (Use Garner Vs Murray Principle).

13. A, B and C were partners in a firm dealing in toilet articles and share profits and losses in the ratio of 4 : 3 : 3. As of December 31, 2014 they decided to dissolve the firm and B was appointed to realise the assets and distribute the profits. B was to receive 5% of the amounts realised from stock and debtors as his remuneration, he is to bear all the expenses of the realisation. The Balance Sheet as on December 31, 2014 was as under:

Liabilities	₹	Assets		₹
Creditors	5,90,000	Cash at bank		15,000
Capital Accounts:		Debtors	4,55,000	
A	3,00,000	Less: Provision for doubtful debts	25,000	4,30,000
B	2,00,000	Stocks		6,00,000
		Capital Accounts : C		45,000
	10,90,000			10,90,000

B reported that the assets realised were: Debtors ₹ 4,50,000; Stock ₹ 3,50,000; Goodwill ₹ 20,000; Creditors were paid ₹ 5,75,000 in full settlement and other outstanding creditors were paid ₹ 5,000. The expenses of realisation aggregated to ₹ 6,000. A and B received ₹ 30,000 from C in full settlement of the firm's claim on him. You are required to prepare the Realisation Account, the Bank Account and Capital Accounts of the partners.

14. The following was the Balance Sheet of P, Q and R on 31st March, 2015:

Liabilities	₹	Assets	₹
P's Capital Account	25,000	Freehold Property	10,000
R's Capital Account	15,000	Furniture	5,000
P's Current Account	1,000	Stock-in-trade	23,100
R's Current Account	500	Debtors	30,000
Sundry Creditors	30,000	Cash	2,500
Loan on mortgage of Freehold Property	4,000	Q's Current Account	4,900
	75,500		75,500

The partners shared profits and losses in the proportion of 6 : 3 : 5. It was decided to dissolve the partnership as on the date of the Balance Sheet. The assets realised as under: Freehold Property ₹ 6,000; Furniture ₹ 2,000; Stock-in-trade ₹ 15,000; and Debtors ₹ 20,000. The expenses on realisation amounted to ₹ 2,000. The sundry creditors agreed to take 75 paise in the rupee in full satisfaction. It was ascertained that Q has become insolvent. A dividend of 50 p in the rupee was received from the Court Receiver.

Write-up the Realisation Account, Bank Account, Capital and Current Accounts of the partners. [***Apply Garner Vs Murray***]

15. Ram, Indra, Triveni and Umesh were partners sharing profits and losses in the ratio of 3 : 3 : 2 : 2. The Balance Sheet as on 31st March, 2015 was as under:

Liabilities	₹	Assets		₹
Sundry Creditors	46,500	Cash at bank		6,000
Ram's Loan	30,000	Sundry Debtors	48,000	
Capital Accounts:		Less: Provision for bad debts	1,500	46,500
Ram	60,000	Stock		30,000
Indra	45,000	Furniture & Fixtures		12,000
		Trade Marks		21,000
		Capital Accounts:		
		Triveni		48,000
		Umesh		18,000
	1,81,500			1,81,500

On March 31, 2015, the firm was dissolved and Indra was appointed to realise the assets and to pay off the liabilities. He was entitled to receive 5% commission on the amount finally paid to other partners as capital. He was to bear the expenses of realisation.

The assets realised as follows: Debtors ₹ 33,000; Stock ₹ 24,000; Furniture ₹ 3,000; and Trade marks ₹ 12,000.

The creditors were paid off in full, and in addition, contingent liabilities for bills receivable discounted materialised to the extent of ₹ 7,500. There was also a joint life policy for ₹ 90,000. This was surrendered for ₹ 9,000. Expenses of realisation amounted to ₹ 1,500. Triveni was insolvent, but ₹ 11,100 was received from his estate.

Write-up the necessary accounts to close the books of the firm according to the Garner Vs Murray rule.

Piecemeal

16. A partnership firm has three partners : X, Y and Z with capitals as X : ₹ 20,000; Y : ₹ 10,000 and Z ₹ 10,000. The creditors amounted to ₹ 20,000 and sundry assets to ₹ 60,000. In dissolution, the assets were realised as follows: 1st instalment ₹ 20,000; 2nd instalment ₹ 20,000 and final realisation ₹ 10,000.

The partners share profits and losses in the ratio of 3 : 2 : 1.

Show the piece-meal distribution of the realisations on — (i) Surplus Capital Method; (ii) Maximum Loss Method.

17. The firm of LMS was dissolved on 31.3.2015, at which date its Balance Sheet stood as follows :

Liabilities	₹	Assets	₹
Creditors	2,00,000	Fixed assets	45,00,000
Bank Loan	5,00,000	Cash and bank	2,00,000
L's Loan	10,00,000		
Capital : L : ₹ 15,00,000; M : ₹ 10,00,000; S : ₹ 5,00,000	30,00,000		
	47,00,000		47,00,000

Partners share profits equally. A firm of Chartered Accountants is retained to realise the assets and distribute the cash after discharge of liabilities. Their fees which are to include all expenses is fixed at ₹ 1,00,000. No loss is expected on realisation since fixed assets include valuable land and building. Realisations are :

Serial Number	1	2	3	4	5
Amount in ₹	3,00,000	15,00,000	15,00,000	30,00,000	30,00,000

The Chartered Accountant firm decided to pay-off the partners in 'Higher Relative Capital Method'. You are required to prepare a statement showing distribution of cash with necessary workings.

18. The Balance Sheet as on 31st March, 2015 of Abel, Baker and Charley, who share profits and losses in the ratio of 2 : 2 : 1 is given below:

Liabilities	₹	Assets	₹
Abel's Capital A/c	90,000	Fixed Assets	2,00,000
Baker's Capital A/c	72,000	Floating Assets	1,96,000
Charley's Capital A/c	60,000		
Abel's Advance A/c	30,000		
Baker's Advance A/c	24,000		
Sundry Creditors	72,000		
Bills Payable	48,000		
	3,96,000		3,96,000

The amounts were realised piecemeal and it was decided that the amounts received in instalments should be distributed immediately.

1st Realisation ₹ 75,000; 2nd Realisation ₹ 1,47,000; and 3rd Realisation ₹ 1,50,000.

Draw a statement to show the distribution of cash thus realised and ascertain the loss suffered by each partner, if any.

19. Luck, Duck and Pluck were partners sharing profits and losses as 2 : 1 : 1. Their Balance Sheet as on 31.12.2014 is given below and they dissolved their partnership on that date.

Liabilities	₹	Assets	₹
Creditors	15,000	Cash	9,000
Income Tax Payable	4,000	Stock	40,000
Loan from Bank (secured by pledge of stock)	30,000	Debtors	60,000
Duck's Loan	11,000	Furniture	36,000
Capital :		Motor Car	25,000
Luck	40,000		
Duck	40,000		
Pluck	30,000		
	1,70,000		1,70,000

The Bank could realise only ₹ 25,000 on disposal of stock. A sum of ₹ 3,000 was spent for motor car for getting better price. Other assets were realised as follows :

Jan. 2015 ₹ 12,000; Feb. 2015 ₹ 15,000; March 2015 ₹ 10,000; April 2015 ₹ 30,000; May 2015 ₹ 34,000.

Duck took over unsold furniture worth ₹ 1,000 at the end of May, 2015. The partners distributed the cash as and when realised. Show the distribution of Cash.

20. Mini, Midi and Maxi are three partners of the firm Variety Stores sharing profits and losses in the ratio of 1:2:3. On 30th June, 2015 the partnership was disssolved. The Balance Sheet of the firm on the date of dissolution was as follows:

Liabilities	₹	Assets	₹
Mini's Capital	8,000	Cash	6,000
Midi's Capital	12,000	Debtors	16,000
Maxi's Current	20,000	Stock	25,000
Loan from Mrs Maxi	6,000	Furniture & Fittings	15,000
Sundry Creditors	18,000	Bills Receivable	2,000
	64,000		64,000

The partners decided that payments should be made as and when the amounts were realised. Maxi would supervise all realisations and for this he would be entitled to a commission @ 5% on all gross realisations, but his claim would not have priority over the claims of outsiders. The realisations and expenses on various dates were as follows:

	Debtors (₹)	Stock (₹)	Furniture (₹)	Expenses (₹)
July	3,000	5,500	4,500	1,000
August	5,000	6,000	6,000	500
September	5,500	14,000	3,900	1,400
October	2,000	4,000	—	300

The Bills Receivable were drawn in May, 2015 and were payable after three months. These were duly received. You are required to prepare a statement showing distribution of cash.

21. P,Q and R are partners sharing profits and losses in the ratio of 1/4:1/4:1/2. They decided to dissolve their business on 31.3.2015, when their Balance Sheet was as follows:

Liabilities	₹	Assets	₹
P's Capital	10,000	Fixed Assets	82,000
Q's Capital	15,000	Stock	15,000
R's Current	25,000	Debtors	18,000
Trade Creditors	20,000	Cash	5,000
Secured Loan (secured on the fixed assets of the firm)	10,000		
Unsecured Loan	20,000		
Bank overdraft (secured against stock and book debts)	20,000		
	1,20,000		1,20,000

P is insolvent. Realisations are to be distributed monthly to creditors and partners in the order of priority. Realisations monthwise were:

	April	May	June	July
Fixed Assets (₹)	17,000	15,000	12,000	8,800
Stock and Debtors (₹)	4,000	2,000	4,000	—

Prepare a statement showing distribution of cash and the capital accounts of the partners.

22. The firm of Richpersons presented you with the following Balance Sheet drawn as at 31st March, 2015:

Liabilities	₹	Assets	₹
Sundry Creditors	37,000	Cash in hand	3,000
Partners' Capital A/cs:		Sundry Debtors	34,000
A	40,000	Stock-in-trade	39,000
B	30,000	Plant and Machinery	51,000
C	27,000	B's Current Account	4,000
		C's Current Account	3,000
	1,34,000		1,34,000

Partners shared profits and losses in the ratio of 4:3:3. Due to differences among the partners, it was decided to wind up the firm, realise the assets and distribute cash among the partners at the end of each month.

The following realisations were made:

(i) May 2015 : ₹ 15,000 from debtors and ₹ 20,000 by sale of stock. Expenses on realisation were ₹ 500

(ii) June 2015 : Balance of debtors realised ₹ 10,000. Balance stock fetched ₹ 24,000.

(iii) August 2015 : Part of machinery was sold for ₹ 18,000. Expenses incidental to sale were ₹ 600.

(iv) September 2015 : Part of machinery valued in the books at ₹ 5,000 was taken by A in part discharge at an agreed value of ₹ 10,000. Balance of machinery was sold for ₹ 30,000 (net).

Partners decided to keep a minimum cash balance of ₹ 2,000 in the first 3 months and ₹ 1,000 thereafter.

Show how the amounts due to partners will be settled. All workings should form part of your answer.

23. A, B and C were partners in a firm sharing profits and losses in the ratio of 5 : 3 : 2. On 31.3.2015, their Balance Sheet was as follows :

Liabilities	₹	Assets	₹
Creditors	40,000	Furniture	8,000
A's Loan	16,000	Stock	52,000
B's Loan	12,000	Debtors	64,000
Capitals : A ₹ 30,000; B ₹ 24,000; C ₹ 6,000	60,000	Bank	4,000
	1,28,000		1,28,000

The firm was dissolved on 1.4.2015. The assets realised were as follows (all figures in ₹) :

	Stock	Debtors	Furniture	Expenses
April 30	12,000	10,000	3,000	1,000
June 30	12,000	10,000	—	1,600
July 31	16,000	30,000	4,000	3,000
August 31	10,000	4,000	—	1,000

Cash received was paid to the rightful claimants at the end of each month. Prepare the statement showing the distribution of cash.

24. A, B and C carrying on business in the partnership decided to dissolve it on and from 30th September 2014. The following was their Balance Sheet on that date:

Liabilities	₹	Assets	₹
Creditors	20,000	Fixed Assets	50,000
A's Capital	40,000	Current Assets	42,000
B's Capital	10,000	Bank	10,000
C's Capital	20,000		
General Reserve	12,000		
	1,02,000		1,02,000

As per the arrangement with the bank, the partners were entitled to withdraw an amount of ₹ 5,000 only at present and the balance amount of ₹ 5,000 could be withdrawn after 1st December, 2014. It was actually withdrawn on 20th December, 2014.

It was decided that after keeping aside an amount of ₹ 2,000 for estimated realization expenses the available cash should be distributed between the partners immediately.

The following were the realisations:

Fixed Assets: 31st October, 2014 ₹ 10,000; 25th November, 2014 ₹ 26,000; 20th December, 2014 (Final) ₹ 10,000.

Current Assets: 31st October, 2014 ₹ 19,000; 25th November, 2014 ₹ 20,000; 20th December, 2014 (Final) ₹ 9,000.

Actual realization expenses amounted to ₹ 1,550 only.

Prepare a statement showing the distribution of cash between the partners applying the ''surplus capital method".

When all Partners are Insolvent

25. H and N were in equal partnership. Their Balance Sheet stood as under on 31st December, 2014 when the firm was dissolved:

Liabilities	₹	Assets	₹
Creditors	3,200	Machinery and Plant	1,200
H's Capital	400	Furniture	300
		Debtors	500
		Stock-in-trade	400
		Cash	180
		N's Drawings	1,020
	3,600		3,600

The assets realised were as follows: Machinery ₹ 600; Furniture ₹ 100; Debtors ₹ 400; and Stock-in-trade ₹ 300.

The expenses of realisation amounted to ₹ 140.

H's private estate is not sufficient even to pay his private debts, whereas in N's private estate there is a surplus of ₹ 140 only.

Give accounts to close the books of the firm

26. A, B and C are equal partners, whose Balance Sheet on December 31, 2014 is as follows:

Liabilities	₹	Assets	₹
Sundry Creditors	5,000	Cash in hand	50
A's Loan	1,000	Stock	800
Capital A/cs:		Debtors	1,000
A	800	Plant & Machinery	2,000
C	500	Furniture & Fittings	800
		Land & Buildings	2,000
		B's Capital (overdrawn)	650
	7,300		7,300

Due to lack of liquidity and weak financial position of the partners, the firm is dissolved. A and C are not able to contribute anything and a sum of ₹ 200 received from B.

All of them are declared insolvent.
The assets are realised:
Stock ₹ 500; Plant and Machinery ₹ 1,000; Furniture and Fittings ₹ 200; Land & Buildings ₹ 800; and Debtors ₹ 550 only.
Realisation expenses amounted to ₹ 50.
You are required to close the firm's books.

Guide to Answers

Multiple Choice

1. A; 2. A; 3. B; 4. A; 5. B.

Practical Questions

1. **Loss on realisation ₹ 5,250; A brings in cash ₹ 62,524 after adjustment of A's loan; Final payments : B ₹ 50,750 and C ₹ 21,625.**
2. **Loss on realisation ₹ 11,000; Tamal brought ₹ 200; Final payment : Amal ₹ 13,800 after adjustment of loan; Bimal ₹ 67,350.**
3. **Profit on realisation ₹ 16,200; Final payments : Anil ₹ 13,000; Balwant ₹ 9,400; and Kumar ₹ 13,600.**
4. **Profit on realisation ₹ 26,720; Final payments : Cloud ₹ 36,360; Storm ₹ 28,016; Rain ₹ 27,144.**
5. **Loss on realisation ₹ 18,700; C brings in cash ₹ 5,400; Final payments : A ₹ 27,200; B ₹ 8,600.**
6. **Loss on realisation ₹ 6,800; B brings in cash ₹ 5,560; C brings in cash ₹ 830; Final payment to A ₹ 11,420.**
7. **Profit on realisation ₹ 72,720; Balance Sheet total ₹ 2,92,000; Y brings in cash ₹ 60,900; Z brings in cash ₹ 40,640.**
8. **Trading loss during 2014 ₹ 6,000; Realisation profit ₹ 7,500; B brings in cash ₹ 5,000; Final payments : A ₹ 19,800.**
9. **Trading loss during 2014 ₹ 2,000; Profit on realisation ₹ 600; Rock brings in cash ₹ 1,165; Final payments : Hill ₹ 3,340; Stone ₹ 2,960.**
10. **Trading loss during 2014 ₹ 1,170; Profit on realisation ₹ 770; Swift brings in cash ₹ 830; Final payment : Smart ₹ 1,530.**
11. **Profit on realisation ₹ 24,000; Final payments : X ₹ 52,500; Z ₹ 36,500; Balance Sheet ₹ 1,92,000; Goodwill (balancing figure ₹ 42,000)**
12. **Profit on realisation on ₹ 1,200; C's deficiency of ₹ 1,200 is to be shared by A and B in the ratio of 2 : 1.**
13. **Loss on realisation ₹ 2,40,000.**
14. **Loss on realisation ₹ 19,600; Final payment : P ₹ 23,156; R ₹ 13,794.**
15. **Loss on realisation ₹ 37,175.64; Ram received ₹ 23,512.95; and Indra received ₹ 14,522.18.**
16. **Surplus capital of Z ₹ 3,333; Realisation loss ₹ 10,000.**
17. **Surplus capital of ₹ 5,00,000; Realisation profit : L ₹ 15,66,667; M ₹ 15,66,667; S ₹ 15,66,667.**
18. **Surplus Capital of Charley ₹ 15,000; Loss on realisation: Abel ₹ 9,600; Baker ₹ 9,600 and Charley ₹ 4,800.**
19. **Loss on realisation ₹ 37,000. Share of Loss : Luck ₹ 18,500; Duck ₹ 9,250; and Pluck ₹ 9,250.**
20. **Surplus Capital of Mini ₹ 1,333; Loss on realisation: Mini ₹ 478; Midi ₹ 957; and Maxi ₹ 1,437.**
21. **After realisation of all assets, all the liabilities cannot be satisfied. Total shortfall is ₹ 2,200. To pay off creditors and unsecured loan, the partners would contribute in the following manner: P ₹ 550; Q ₹ 550; and R ₹ 1,100. P being insolvent, his deficiency is to be borne by Q and R in their capital ratio. Finally, Q's share of deficiency is ₹ 756 and R's share of deficiency is ₹ 1,444.**
22. **Profit on realisation A ₹ 760; B ₹ 570; C ₹ 570.**
23. **Loss on realisation A ₹ 9,800; B ₹ 5,880; C ₹ 3,920. Absolute surplus capital of B ₹ 6,000.**
24. **Profit on realisation A ₹ 150; B ₹ 150; C ₹ 150. Absolute surplus capital of A ₹ 20,000.**
25. **Realisation loss ₹ 1,140; Deficiency ₹ 1,620.**
26. **Realisation loss ₹ 3,600; Deficiency ₹ 1,750.**

Amalgamation of Firms

Introduction

In case of amalgamation of firms, two or more partnership firms join under common management. The partners of the old firms will become the partners of the new firm. The business of the old firms will continue as before, though under a single name.

Reasons for Amalgamation

1. ***Economics of Scale*** : The amalgamated firm can have operating cost advantage by distributing fixed expenses to a more number of units.
2. ***Growth*** : Internal growth is time consuming. Growth can be achieved through acquisition of another firm(s).
3. ***Diversification*** : In an amalgamated firm, the risk of the firm can be reduced by diversifying into two or more industries.
4. ***Financial Economies*** : Financial economies can be in the form of higher debt capacity and lower rate of borrowing, reduction of common expenses, e.g., sales promotion.
5. ***Supnferior Management*** : More talented people can be hired for management of the firm.

Forms of Amalgamation

Amalgamation of firms may take one of the following forms :

(a) When one existing partnership firm absorbs another partnership firm; and

(b) When two or more partnership firms form a new partnership firm.

(a) When one existing partnership firm absorbs another partnership firm

In this case, the books of accounts of the liquidating / selling firm will be closed.

To close the existing sets of books, the following steps are followed :

Step 1 : Prepare the Balance Sheet of the selling firm on the date of dissolution.

Step 2 : Open a Realisation Account and transfer all assets and liabilities, except cash in hand and cash at bank, at their book values.

It should be noted that cash in hand and cash at bank are transferred to Realisation Account only when they are taken over by the purchasing firm.

Step 3 : Calculate purchase consideration on the basis of terms and conditions agreed upon by the parties. Generally, purchase consideration is calculated on the basis of agreed value of assets and liabilities taken over by the purchasing firm. The purchase consideration is calculated as under :

Agreed values of assets taken over	***
Less : Agreed values of liabilities assumed	***
Purchase consideration	***

The purchase consideration is shared between partners of the selling firm in the ratio of their respective interests in the old business.

Step 4 : Credit Realisation Account by purchase consideration.

Step 5 : If there are any unrecorded assets or liabilities, they are to be recorded.

Step 6 : The entire purchase consideration is matched against the book values of assets *minus* liabilities, to ascertain the profit or loss on realisation. This is done in the Realisation Account. The profit or loss is then transferred to the Capital Account of the partners in the profit sharing ratio.

Step 7 : To ensure that the resultant claim of the partners is equal to the purchase consideration and no account is left with a balance.

Accounting Entries in the Books of Selling / Liquidating Firm

1. For transferring different assets to Realisation Account

Realisation Account Dr.
To Sundry Assets Account [Individually]

Note : If cash in hand and cash at bank are not taken over by the purchasing firm, it should not be transferred to Realisation Account.

2. For transferring different liabilities to Realisation Account

Capital in Purchasing Firm Account	Dr.
To Purchasing Firm Account	

18. For final adjustment

Partners' Capital Accounts Dr.
To Capital in Purchasing Firm Account
To Bank Account (if any)

Accounting Entries in the Books of the Purchasing Firm

The purchasing firm records all the assets and liabilities at the values it has decided to take over. If the purchase consideration payable is more than the net assets (assets *minus* liabilities) acquired, it represents ***goodwill***. Conversely, if the purchase consideration payable is less than the net assets acquired, it represents ***capital reserve***.

1. If the net acquired assets is equal to purchase consideration, the following entry is passed:

Assets Account	Dr.	[Acquired value]
To Liabilities Account		[Assumed value]
To Partners' Capital Accounts		[Purchase consideration]

2. If the net acquired assets is ***more*** *than the purchase consideration, it represents* ***capital reserve***

The following entry is passed :

Assets Account	Dr.	[Acquired value]
To Liabilities Account		[Assumed value]
To Partners' Capital Accounts		[Purchase consideration]
To Capital Reserve Account		

3. If the net acquired assets is ***less*** *than the purchase consideration, it represents* ***goodwill***

The following entry is passed :

Asset Account	Dr.	[Acquired Value]
Goodwill Account	Dr.	[Difference]
To Liabilities Account		[Assumed Value]
To Partners' Capital Accounts		[Purchase consideration]

The assets and liabilities of the liquidating / selling firm, taken over by the purchasing firm are added with the existing assets and liabilities respectively.

Illustration 1

The Balance Sheets of two partnership firms PQ and RS as on 31.12.2014 are as below (all figures in rupees):

Liabilities	PQ	RS	Assets	PQ	RS
Capitals: P	60,000	—	Machinery	60,000	20,000
Q	30,000	—	Furniture	8,000	6,000
R	—	36,000	Stock	32,000	24,000
S	—	24,000	Debtors	18,000	30,000
Bank loan	10,000	—	Investments	—	18,000
Bills payable	30,000	40,000	Cash	12,000	2,000
	1,30,000	1,00,000		1,30,000	1,00,000

PQ absorbed RS on 01.01.2015 on the following terms :

(a) that the investments of RS to be sold out and the investment realised ₹ 24,000;
(b) that the stock of RS to be reduced to ₹ 22,000;
(c) that the machinery of RS will be increased by 40%;
(d) that the furniture of RS will be reduced by 10%.

It was further decided that for PQ, following are the adjustments to be made :

(i) Assets are to be revalued as follows: Stock: ₹ 40,000; Machinery: ₹ 84,000; Furniture: ₹ 7,200; and
(ii) Bank loan to be repaid.

You are required to show necessary Ledger Accounts to close the books of RS and to prepare necessary Journal Entries and Balance Sheet of PQ after absorption.

(b) When two or more partnership firms form a new partnership firm

When two or more pantnership firms amalgamate to form a new partnership firm, the books of account of the old firm is to be closed. In the books of each old firm, a Realisation Account is opened. All the assets and liabilities are transferred to Realisation Account at book values.

There are many Indian authors who prefer to open a Revaluation Account in place of Realisation Account, but we totally disagree with their views.

It should be remembered that Revaluation Account is opened when assets are retained in the same business but a Realisation Account is opened where assets are sold and books of account are closed.

Partners' Capital Accounts Dr.
    To Partners' Capital in New Firm Account

Illustration 2

Two partnership firms, carrying on business under the style of Black & Co. and White & Co. respectively, decided to amalgamate into Grey & Co. with effect from 1st January 2015. The respective Balance Sheets are:

Balance Sheet of Black & Co. as on 31st December, 2014

Liabilities	₹	Assets	₹
Mr B's Capital Accounts	19,000	Plant and Machinery	10,000
Sundry Creditors	10,000	Stock-in-trade	20,000
Bank Overdraft	15,000	Sundry Debtors	10,000
		Mr A's Capital Account	4,000
	44,000		44,000

A and B share profits and losses in the proportion of 1 : 2.

Balance Sheet of White & Co. as on 31st December, 2014

Liabilities	₹	Assets	₹
Mr X's Capital Account	10,000	Investment	5,000
Mr Y's Capital Account	2,000	Stock-in-trade	5,000
Sundry Creditors	9,500	Sundry Debtors	10,000
		Cash in hand	1,500
	21,500		21,500

X and Y share profit and losses equally. The following further information is given :

1. All fixed assets are to be devalued by 20%.
2. All stock in trade is to be appreciated by 50%.
3. Black and Company owes ₹ 5,000 to White & Co. as on 31st December 2014. This debit is settled at ₹ 2,000
4. Investment is to be ignored for the purpose of amalgamation, being valueless.
5. The fixed capital accounts in the new firm are to be : Mr A ₹ 2,000; Mr B ₹ 3,000 Mr X ₹ 1,000 Mr Y ₹ 4,000
6. Mr B takes over bank overdraft of Black & Co. and gifts to Mr A the amount of money to be brought in by Mr A to make up his capital contribution.
7. Mr X is paid off in cash from White & Co. and Mr Y brings in sufficient cash to make up his required capital contribution.

Pass necessary Journal Entries to close the books of both the firms as on 31st December 2014.

Solution

(5) In the new firm, A's capital should be ₹ 2,000 but his Capital Account is showing a debit balance of ₹ 333. Therefore, to make good the deficit, B will gift ₹ 2,333 to A.

Illustration 3

A and B are partners of AB Co. sharing profits and losses in the ratio of 3 : 1 and B and C are partners of BC & Co. sharing profits and losses in the ratio of 2 : 1. On 31st March, 2015, they decided to amalgamate and form a new firm ABC & Co. wherein A, B and C would be partners sharing profits and losses in the ratio of 3 : 2 : 1.

The Balance Sheet of two firms on the above date were as under :

Liabilities	AB & Co. ₹	BC & Co. ₹	Assets	AB & Co. ₹	BC & Co. ₹
Capital :			**Fixed Assets** :		
A	96,000	—	Building	20,000	—
B	64,000	80,000	Machinery	60,000	64,000
C	—	40,000	Furniture	8,000	2,400
Reserves	20,000	60,000	**Current Assets** :		
Creditors	48,000	46,400	Stock	48,000	56,000
Due to AB & Co.	—	40,000	Debtors	64,000	80,000
Bank Loan	32,000	—	Cash	20,000	40,000
			Due from BC & Co.	40,000	—
			Advances	—	24,000
	2,60,000	2,66,400		2,60,000	2,66,400

The amalgamated new firm ABC & Co. took over the business on the following terms :

(a) Building of AB & Co. was valued at ₹ 40,000.

(b) Machinery of AB & Co. was valued at ₹ 90,000 and that of BC & Co. at ₹ 80,000.

(c) Goodwill of AB & Co. was valued at ₹ 20,000 and that of BC & Co. at ₹ 16,400 but no goodwill account was to appear in the books of ABC & Co.

(d) Partners of the new firm will bring necessary cash to pay other partners to adjust their capital according to the profit sharing ratio.

Show journal entries in the books of ABC & Co. and prepare the Balance Sheet as on 31st March, 2015.

Dr. (5) Partners' Capital Accounts Cr.

Particulars	A	B	C	Particulars	A	B	C
To Goodwill A/c (written-off)	18,200	12,133	6,067	By Balance b/d :			
To Cash A/c	—	73,967	—	AB & Co	1,63,500	86,500	—
To Balance c/d (Note 6)	2,13,000	1,42,000	71,000	BC & Co	—	1,41,600	70,800
				By Cash A/c	67,700	—	6,267
	2,31,200	2,28,100	77,067		2,31,200	2,28,100	77,067

(6) Total Capital of Partners in ABC & Co :

	₹
A — 1,63,500 + 0	1,63,500
B — 86,500 + 1,41,600	2,28,100
C — 0 + 70,800	70,800
	4,62,400
Less: Goodwill written-off	36,400
Total Capital after Goodwill adjustment	4,26,000

A's capital = 3/6 × 4,26,000 = 2,13,000

B's capital = 2/6 × 4,26,000 = 1,42,000

C's capital = 1/6 × 4,26,000 = 71,000

Illustration 4

B and S are partners of S & Co sharing profits and losses in the ratio of 3 : 1. S and T are partners of T & Co sharing profits and losses in the ratio of 2 : 1. On 31.10.2011, they decided to amalgamate and form a new firm M/s BST & Co wherein B, S and T would be partners sharing profits and losses in the ratio of 3 : 2 : 1.

The Balance sheet on the date were as under :

Liabilities	S & Co (₹)	T & Co (₹)	Assets	S & Co (₹)	T & Co (₹)
Capital :			Buildings	25,000	—
B	1,20,000	—	Machinery	75,000	—
S	80,000	1,00,000	Vehicles	—	80,000
T	—	50,000	Furniture	10,000	3,000
Reserves	25,000	50,000	Stock	60,000	70,000
Other Creditors	60,000	58,000	Other Debtors	80,000	1,00,000
Due to X & Co	40,000	—	Cash in Hand	10,000	5,000
Due to S & Co	—	50,000	Cash at Bank	15,000	20,000
			Due from T & Co	50,000	—
			Due from X & Co	—	30,000
	3,25,000	3,08,000		3,25,000	3,08,000

The amalgamated firm took over the business on the following terms :

(a) Goodwill of S & Co was worth ₹ 60,000 and that of T & Co ₹ 50,000. Goodwill Account was not to be opened in the books of the new firm, the adjustments being recorded through capital accounts of the partners.

(b) Building, Machinery and Vehicles were taken over at ₹ 50,000, ₹ 90,000 and ₹ 1,00,000 respectively.

(c) Provisions for doubtful debts has to be carried forward at ₹ 4,000 in respect of debtors of S & Co and ₹ 5,000 in respect of debtors of T & Co.

You are required to prepare the Balance Sheet of the new firm, assuming that excess / deficit capitals (taking T's capital as base) with reference to share in profits are to be transferred to Current Accounts.

				T & Co.	—	1,76,666	88,334
	2,10,750	2,86,916	88,334		2,10,750	2,86,916	88,334
To Current A/c	—	1,10,250	—	By Balance c/d	1,55,750	2,50,250	70,000
To Balance c/d (Note 6)	2,10,000	1,40,000	70,000	By Current A/c	54,250	—	—
	2,10,000	2,50,250	70,000		2,10,000	2,50,250	70,000

(6) Taking T's capital as base, the total capital of the new firm M/s BST & Co will be : ₹ 70,000 × 6 = **₹ 4,20,000**.

B's capital = ₹ 4,20,000 / 6 × 3	2,10,000
S's capital = ₹ 4,20,000 / 6 × 2	1,40,000
T's capital = ₹ 4,20,000 / 6 × 1	70,000
	4,20,000

Illustration 5

Firm X & Co. consists of partners A and B sharing profits and losses in the ratio of 3 : 2. The firm Y & Co. consists of partners B and C sharing profits and losses in the ratio of 5 : 3.

On 31st March, 2015 it was decided to amalgamate both the firms and form a new firm XY & Co. wherein A, B and C would be partners sharing profits and losses in the ratio of 4 : 5 : 1.

Balance Sheet as at 31.3.2013

Liabilities	X & Co. (₹)	Y & Co. (₹)	Assets	X & Co. (₹)	Y & Co. (₹)
Capital :			Cash in hand / bank	40,000	30,000
A	1,50,000	—	Debtors	60,000	80,000
B	1,00,000	75,000	Stock	50,000	20,000
C	—	50,000	Vehicles	—	90,000
Reserve	50,000	40,000	Machinery	1,20,000	—
Creditors	1,20,000	55,000	Building	1,50,000	—
	4,20,000	2,20,000		4,20,000	2,20,000

The folowing were the terms of amalgamation :

(i) Goodwill of X & Co. was valued at ₹ 75,000. Goodwill of Y & Co. was valued at ₹ 40,000. Goodwill Account not to be opened in the books of the new firm but adjusted through the Capital Accounts of the partners.

(ii) Building, Machinery and Vehciles are to be taken over at ₹ 2,00,000, ₹ 1,00,000 and ₹ 74,000 respectively.

(iii) Provision for doubtful debts at ₹ 5,000 in respect of X & Co. and ₹ 4,000 in respect of Y & Co. are to be provided.

You are required to :

(i) Show how the Goodwill value is adjusted amongst the partners.

(ii) Prepare the Balance Sheet of XY & Co. as at 31.3.2015 by keeping partners capital in their profit sharing ratio by taking capital of 'B' as the basis. The excess or deficiency to be kept in the respective Partners' Current Account.

Solution **(i) Statement Showing the Adjustment for Goodwill**

	A (₹)	B (₹)	C (₹)
Rights of Goodwill **before** Amalgamation of X & co. (3 : 2)	45,000	30,000	—
Rights of Goodwill **before** Amalgamation of Y & co. (5: 3)	—	25,000	15,000
	45,000	55,000	15,000
Rights of Goodwill **after** Amalgamation (4 : 5 : 1)	46,000	57,500	11,500
	(1,000)	(2,500)	3,500

Dr. **(5) Partners' Capital Accounts** **Cr.**

Particulars	A	B	C	Particulars	A	B	C
To Goodwill (written off)	46,000	57,500	11,500	By Balance b/d :			
To Balance c/d	1,94,000	2,15,000	61,000	X & Co.	2,40,000	1,60,000	—
				Y & Co.	—	1,12,500	72,500
	2,40,000	2,72,500	72,500		2,40,000	2,72,500	72,500
To Current A/c (bal. fig.)	22,000	—	18,000	By Balance c/d	1,94,000	2,15,000	61,000
To Balance c/d (Note 6)	1,72,000	2,15,000	43,000				
	1,94,000	2,15,000	61,000		1,94,000	2,15,000	61,000

(6) Taking B's capital as base, the total capital of the firm $= \frac{2,15,000}{5} \times 10 = ₹\ 4,30,000$

A's Capital $= \frac{4,30,000}{10} \times 4 = ₹\ 1,72,000$

B's Capital $= \frac{4,30,000}{10} \times 5 = ₹\ 2,15,000$

C's Capital $= \frac{4,30,000}{10} \times 1 = ₹\ 43,000$

Illustration 6

M/s A and Co., having A and B as equal partners, decided to amalgamate with C and Co., having C and D as equal partners on the following terms and conditions :

1. The new firm AC and Co. to pay ₹ 12,000 to each firm for Goodwill.
2. The new firm to take over investments at 10% depreciation, land at ₹ 66,800, premises at ₹ 53,000, machinery at ₹ 9,000 and only the trade liabilities of both the firms. The debtors being taken over at given value.
3. Typewriters (written-off) worth ₹ 800, belonging to C and Co., and not appearing in the Balance Sheet was also not taken over by the new firm.
4. Bills payable pertain to trade transactions only.
5. All the four partners in the new firm to bring in ₹ 1,60,000 as capital in equal shares.

The following were the Balance Sheets of both the firms on the date of amalgamation :

Liabilities	A & Co.	C & Co.	Assets		A & Co.	C & Co.
Trade creditors	20,000	10,000	Cash		15,000	12,000
Bills payable	5,000	—	Investments		10,000	8,000
Bank overdraft	2,000	10,000	Debtors	₹ 10,000		
A's Loan	6,000	—	Less: Provision	₹ 1,000	9,000	4,000

Capitals :			Furniture	12,000	6,000
A	35,000	—	Premises	30,000	—
B	22,000	—	Land	—	50,000
C	—	36,000	Machinery	15,000	—
D	—	20,000	Goodwill (Purchased)	9,000	—
General Reserve	8,000	3,000			
Investment Fluctuation Fund	2,000	1,000			
	1,00,000	80,000		1,00,000	80,000

Assuming immediate discharge of bank overdraft, pass necessary Journal Entries to close the books of A & Co and C & Co.

Also pass Journal Entries in the books and prepare the Balance Sheet of the New firm.

Balance Sheet of AC & Co. as at ...

Liabilities	₹	Assets	₹
Partners' Capitals :		Goodwill	24,000
A	40,000	Land	66,800
B	40,000	Premises	53,000
C	40,000	Machinery	9,000
D	40,000	Investments	16,200
Creditors	30,000	Debtors *less* Provision (₹ 14,000 – ₹ 1,000)	13,000
Bills Payable	5,000	Cash	13,000
	1,95,000		1,95,000

Working Notes : **(1) Calculation of Purchase Consideration**

Assets taken over :		A & Co. (₹)	C & Co. (₹)
Cash (See Tutorial Note below)		13,000	—
Investments		9,000	7,200
Debtors		9,000	4,000
Premises		53,000	—
Machinery		9,000	—
Land		—	66,800
Goodwill		12,000	12,000
	(A)	1,05,000	90,000
Liabilities taken over:			
Trade Creditors		20,000	10,000
Bills Payable		5,000	—
	(B)	25,000	10,000
Purchase Consideration	(A — B)	80,000	80,000

Tutorial Note : Total capital of the new firm should be ₹ 1,60,000. Combined capital of A and B will be ₹ 80,000 and that of C and D will be ₹ 80,000. Net assets (other than cash) taken over by the new firm are as follows :

Assets taken over :		A & Co.	C & Co.
Investments		9,000	7,200
Debtors		9,000	4,000
Premises		53,000	—
Machinery		9,000	—
Land		—	66,800
Goodwill		12,000	12,000
	(A)	92,000	90,000

Liabilities taken over:			
Trade Creditors		20,000	10,000
Bills Payable		5,000	—
	(B)	25,000	10,000
Net Assets Taken over	(A — B)	67,000	80,000

It should be noted that A & Co.'s net assets (other than cash) comes to ₹ 67,000 whereas required capital of A and B should be ₹ 80,000. Therefore, the cash of A & Co. ₹ 13,000 is also to be taken over to make the capital of A and B equal to ₹ 80,000.

But in case of C & Co., the net assets comes to ₹ 80,000 and the required capital of C and D also ₹ 80,000. Therefore, the cash of C & Co. will not be taken over by the new firm.

Key Notes

- **Reasons for Amalgamation—** 1. Economics of Scale : The amalgamated firm can have operating cost advantage by distributing fixed expenses to a more number of units. 2. Growth: Internal growth is time consuming. Growth can be achieved through acquisition of another firm(s). 3. Diversification : In an amalgamated firm, the risk of the firm can be reduced by diversifying into two or more industries. 4. Financial Economies : Financial economies can be in the form of higher debt capacity and lower rate of borrowing, reduction of common expenses, e.g., sales promotion. 5. Supnferior Management : More talented people can be hired for management of the firm.
- The purchasing firm records all the assets and liabilities at the values it has decided to take over. If the purchase consideration payable is more than the net assets (assets *minus* liabilities) acquired, it represents ***goodwill***. Conversely, if the purchase consideration payable is less than the net assets acquired, it represents ***capital reserve***.
- When two or more pantnership firms amalgamate to form a new partnership firm, the books of account of the old firm is to be closed. In the books of each old firm, a Realisation Account is opened. All the assets and liabilities are transferred to Realisation Account at book values.

THEORETICAL QUESTIONS

1. (a) What do you mean by amalgamation of a firm ?
   (b) What are the objectives of amalgamation of firms ?
2. What are the different accounting entries to be passed in the books of the amalgamating firms to close their books of account ?
3. What are the different accounting entries to be passed in the books of the new firm at the time of amalgamation of the firms?

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each statement or answer each question below.

1. For closing the books of account of the amalgamating firms, the assets and liabilities are transferred to :
   A revaluation account
   B realisation account
   C reconciliation account.
2. Accumulated losses of amalgamating firm are transferred to :
   A realisation account
   B partners' capital accounts
   C new firm's account.
3. Profit on realisation is transferred to Partners' Capital Accounts in the :
   A profit-sharing ratio
   B capital ratio
   C equally.
4. If the unrecorded liabilities are taken over by the new firm, it is transferred to :
   A realisation account along with other liabilities
   B partners' capital accounts
   C partners' drawings accounts.

PRACTICAL QUESTIONS

1. B and S are partners of S & Co. sharing profits and losses in the ratio of 3:1. S and T are partners of T & Co. sharing profits and losses in the ratio of 2:1.
   On 31.12.2014, they decided to amalgamate and form a new firm M/s B S T & Co. wherein B, S and T would be partners sharing profits and losses in the ratio of 3:2:1. Their Balance Sheet on that date were as under :

Liabilities	S & Co.	T & Co.	Assets	S & Co.	T & Co.
Due to X & Co.	40,000	—	Cash in hand	10,000	5,000
Due to S & Co.	—	50,000	Cash at bank	15,000	20,000
Other creditors	60,000	58,000	Due from T & Co.	50,000	—
Reserve	25,000	50,000	Due from X & Co.	—	30,000
			Other debtors	80,000	1,00,000
Capitals :			Stock	60,000	70,000
B	1,20,000	—	Furniture	10,000	3,000
S	80,000	1,00,000	Vehicles	—	80,000
T	—	50,000	Machinery	75,000	—
			Building	25,000	—
	3,25,000	3,08,000		3,25,000	3,08,000

The amalgamated firm took over the business on the following terms :

(a) Goodwill of S & Co. was worth ₹ 60,000 and that of T & Co. ₹ 50,000. Goodwill account was not to be opened in the books of the new firm, the adjustments being recorded through capital accounts of the partners.

(b) Buildings, machinery and vehicles were taken over at ₹ 50,000, ₹ 90,000 and ₹ 1,00,000 respectively.

(c) Provision for doubtful debts have to be carried forward at ₹ 4,000 in respect of debtors of S & Co. and ₹ 5,000 in respect of debtors of T & Co.

You are required to :

(i) Compute the adjustment necessary for goodwill;

(ii) Pass the Journal wentries in the books of BST & Co., assuming that excess/deficit capitals (taking T's capital as base) with reference to share in profits are to be transferred to current accounts.

2. In similar type businesses, Red and Yellow are in partnership as Orange Co. and Violet and Blue as Indigo Co. It was mutually agreed that as on January 1, 2015 the partnership be amalgamated into one firm, Rainbow Co. The profit-sharing ratios in the various firms were and are to be as follows :

Particulars	Red	Yellow	Violet	Blue
Old firm	4	3	3	2
New firm	6	5	4	3

As on December 31, 2014 the Balance Sheets of the firms were as follows (all figures in rupees) :

Liabilities	Orange	Indigo	Assets	Orange	Indigo
Capital Accounts :			Property	7,400	10,000
Red	15,300	—	Fixtures	1,800	1,400
Yellow	11,000	—	Vehicles	3,000	1,800
Violet	—	11,300	Stock	8,300	6,600
Blue	—	7,400	Investment	800	—
Creditors	5,200	6,000	Debtors	6,800	5,800
Bank overdraft	—	900	Bank Balance	3,400	—
	31,500	25,600		31,500	25,600

The agreement to amalgamate contains the following provisions :

(a) Provision for doubtful debts at the rate of 5% be made in respect of debtors, and a provision for discount receivable at the rate of 2.5% be made in respect of creditors.

(b) Rainbow Co. to take over the old partnership assets at the following values :

Assets	Orange Co. (₹)	Indigo Co. (₹)
Stock	8,450	6,390
Vehicles	2,800	1,300
Fixtures	1,600	—
Property	10,000	—
Goodwill	6,300	4,500

(c) The property and fixtures of Indigo Co. not to be taken over by Rainbow Co. These assets were sold for ₹ 13,500 cash on January 1, 2015.
(d) Yellow to take over his firm's investments at a value of ₹ 760.
(e) The capital of Rainbow Co. to be ₹ 54,000 and to be contributed by the partners in profit-sharing ratios, any adjustments to be made in cash.

You are required to give Journal entries reflecting the closing of the old partnerships and opening of the new firm after taking into account the provisions of the agreement.

3. The Balance Sheets of M/s A & B and M/s C & D as on December 31, 2014 were as follows :

Liabilities	A & B (₹)	C & D (₹)	Assets	A & B (₹)	C & D (₹)
Capital Accounts :			Land and Workshops	10,000	12,000
A	10,000	—	Machinery & Tools	7,000	8,000
B	10,000	—	Furnitures & Fixtures	3,000	3,500
C	—	10,000	Sundry Debtors	6,000	8,500
D	—	10,000	Stock	8,000	10,000
Creditors	15,000	10,000	Cash & Bank	3,000	1,000
Loan	—	10,000			
Outstanding Expenses	2,000	3,000			
	37,000	43,000		37,000	43,000

The two firms decided to amalgamate and form into AB & Co. with effect from January 1, 2015. Partners would share profit and loss equally between themselves as they were doing prior to amalgamation and they agreed to following revaluation of assets and liabilities :

	A & B	C & D		A & B	C & D
Land and Workshops	10,000	10,000	Sundry Debtors	5,500	7,000
Machinery & Tools	7,000	8,000	Stock	8,000	8,000
Furniture & Fixtures	2,500	2,500	Outstanding Expenses	2,000	3,500

In addition to the above it was decided :
(a) that the new firm would not take over the loan of C and D;
(b) that the goodwills of A & B and C & D were valued at ₹ 10,000 and ₹ 5,000 respectively in the first instant but for the purpose of the Balance Sheet of the new firm, the combined goodwill would be valued at ₹ 12,000;
(c) that the reconstructed capitals of partners should be ₹ 14,000 each, partners introducing cash if necessary.

You are required to show : (i) The Realisation Accounts of M/s A & B and M/s C & D and their Capital Accounts; (ii) The opening Balance Sheet of the new firm assuming that all arrangements have been duly carried out.

4. Suresh and Kishan were in partnership as wine merchants sharing profits and losses :
Suresh 2/3, Kishan 1/3.
They agreed to amalgamate their business with that of Laxmanas on March 31, 2015.
As on that date summarised balance sheets of the two firms were as follows (all figures in rupees) :

Liabilities	Suresh & Kishan	Laxman	Assets		Suresh & Kishan	Laxman
Capital Accounts :			Freehold Premises		8,000	—
Suresh	10,000	—	Shop fittings		2,400	1,500
Kishan	8,000	—	Investments		—	3,000
Laxman	—	6,000	Stock		6,000	4,500
Current Accounts :			Debtors	2,400		
Suresh	3,400	—	Less: Provision	200	2,200	1,800
Kishan	2,800	—	Balance at bank		8,200	—
Laxman	—	800				
Loan from Mahendra	—	2,000				
Creditors	2,600	1,600				
Bank overdraft	—	400				
	26,800	10,800			26,800	10,800

The two firms were amalgamated on the following terms :
(a) Profits and losses were to be shared : Suresh 2/5, Kishan 2/5 and Laxman 1/5.
(b) An account for goodwill is to be maintained in the books of the new partnership, agreed values of goodwill of each firm being : Suresh and Kishan ₹ 12,000, Laxman ₹ 4,000.

(c) The new firm was to take over all the assets and assume the liabilities of Suresh and Kishan, certain of their assets being revalued as follows :
Freehold Premises—₹ 11,000; Shop Fittings —₹ 2,100; Stock — ₹ 6,900; Debtors — ₹ 2,320.

(d) Laxman's investments had been realised and the proceeds amounting to ₹ 4,600 were received by him on April 1, 2015. Out of this sum he discharged the loan to Mahendra and cleared his bank overdraft, the balance being taken over by the new firm. Laxman was to collect his own debts and the new firm took over his remaining assets and liabilities at book values after providing a further provision of ₹ 600 for a creditor which had not been entered in his books.

(e) The capital of the new firm was to be ₹ 40,000 contributed by the partners in their profit-sharing ratios, any differences being transferred to their current accounts.

You are required to show : (i) the Partners' Capital Accounts, in columnar form, recording these transactions; and (ii) the opening Balance Sheet of the new firm.

5. Until December 31, 2014 A,B and C were partners in A & Co. sharing capital and profits equally; D, E and F were partners in D & Co. sharing capital and profits in the proportions of 4:4:1 and G was a sole practitioner. The Balance Sheets of the respective practices at that date were as follows :

Liabilities		A & Co.	D & Co.	G	Assets	A & Co.	D & Co.	G
Capital		28,500	13,500	2,500	Goodwill	5,000	3,550	800
Current Accounts: ₹					Office Furniture	1,500	1,400	500
A	900				Work-in-Progress	6,000	3,500	800
B	1,200				Debtors	17,500	8,750	750
C	400	2,500			Cash	2,500	1,000	550
D	2,000							
E	1,300							
F	200		3,500	500				
Creditors		1,500	1,200	400				
		32,500	18,200	3,400		32,500	18,200	3,400

The respective parties agreed to amalgamate into a new partnership, New & Co., from January 1, 2015 on the following terms :

(a) A retired on December 31, 2014 and D, E and F agreed that their proportion in New & Co. would be 3:3:1.

(b) The capital of New & Co. was to be ₹ 50,000 and the profit-sharing ratio and capital contributions were to be: B & C 30% each; D & E 15% each; F and G 5% each.

(c) In the opening balance sheet of New & Co., office furniture was to be brought in at old book values except for A & Co. where the value was agreed at ₹ 1,000. Work-in-progress was agreed at book values and goodwill at ₹ 10,000.

(d) Debtors were taken into New & Co. at book values, less 20% discount, and creditors were paid by the old practices. A and G took any cash remaining in their old practices and D contributed the necessary cash in his old practice.

(e) Partners introduced their balances of capital in cash.

(f) A salary of ₹ 2,000 p.a. per partner was to be charged, and a monthly drawing of ₹ 150 each was to be allowed. Also at the end of each half year, each partner was allowed to draw ₹ 100 each 2.5% of his profit-sharing ratio.

On July 2015 it was agreed to take H into the partnership on similar terms as to salary and drawings with a 2.5% share, and at the same time the capital and profit-sharing ratios were altered as follows :
B and C 22.5% each; D and E 20% each; F 5%; G 7.5%. G and H intimated that they could only provide one half each of their additional capital requirement on July 1, 2015 and it was agreed that the remaining half should remain as a debit on their current accounts, to be cleared against future profits. B and C withdrew the cash capital introduced on July 1, 2015 by D, E, G and H.

The profit for the year ending December 2015 after deducting partners' salaries was ₹ 16,000 and this figure was deemed to have accrued evenly over the year. All allowable drawings were made.

You are required to prepare:

(a) Opening journal entries of New & Co.;

(b) Capital and current accounts of each partner

(i) in the old practices, so as to indicate the resultant indebtedness between partners; and

(ii) in the new practices, so as to indicate the balances on January 1, July 1, and December 31, 2015.

Guide to Answers

Multiple Choice

1. A; 2. B; 3. A; 4. A.

Practical Questions

1. (i) For goodwill, B will be debited with ₹ 10,000 and T will be debited with ₹ 1,667. S will be credited with ₹ 11,667.
(ii) Capital balances on transferring : (a) for S & Co. : B - ₹ 1,65,750; S - ₹ 92,250;
(b) For T & Co. S - ₹ 1,43,337; T - ₹ 71,667.
(iii) Excess / Deficit transferred to Current Accounts : B - ₹ 54,250 (Dr.); S - ₹ 1,10,250 (Cr.).

2. (i) Profit on realisation : Orange Co. - ₹ 8,400; Indigo Co. - ₹ 5,750.
(ii) Capital in Rainbow Co. : Red - ₹ 18,000; Yellow - ₹ 15,000; Violet - ₹ 12,000; Blue - ₹ 9,000.

3. Profit on realisation: A & B - ₹ 7,500; C & D - ₹ 3,500 (Loss).

4. Partners' Capital Accounts: Suresh ₹ 16,000; Kishan ₹ 16,000; Laxman ₹ 8,000 Partners' current accounts: Suresh ₹ 7,880; Kishan ₹ 40; Laxman ₹ 2,000. Balance Sheet total ₹ 54,720

5. (i) Goodwill paid: A & Co. ₹ 6,000; D & Co. ₹ 3,500; G ₹ 1,000
(ii) Cash brought in: B ₹ 5,300; C ₹ 6,100; D ₹ 300; E ₹ 1,000; F ₹ 1,000;
(iii) Cash Withdrawn: G ₹ 50; Cash paid to A ₹ 9,400;
(iv) Partner's capital after admission of H: B ₹ 11,250, C ₹ 10,000 E ₹ 10,000; F ₹ 2,500; G ₹ 3,750; H ₹ 1,250.
(v) Partners' Current Account balances on December 31st :
B ₹ 2,925; C ₹ 2925; D ₹ 1,600 E ₹ 1,600; F ₹ 1,600; G ₹ 75; H ₹ 425 (Dr).

Profit on realisation: ₹ 25,000. shares in AB Ltd: A ₹ 57,000; B ₹ 38,000. Purchase consideration ₹ 95,000.
Balance sheet total ₹ 2,45,000 (goodwill ₹ 30,000; other fixed assets ₹ 28,500 current assets ₹ 1,86,500).

Conversion of Partnership into a Limited Company

Conversion into a Company

Introduction

As a partnership continues to grow, the partners may decide to convert the partnership business into a limited company (Private or Public) in order to :

(a) limit their personal liability;
(b) have access to additional equity financing;
(c) obtain selected tax advantages;
(d) explore other sound business opportunities;
(e) continue business for a long time.

At the time of conversion, the partnership is dissolved and a new company is floated

Dissolution of the Partnership

The books of account of the partnership firm will be closed in the usual manner.

To close the books of account of the partnership firm, the following steps are generally followed :

Step 1 Prepare the Balance Sheet of the partnership firm on the date of conversion.

Step 2 Open a Realisation Account and transfer all assets and liabilities (excluding fictitious assets) to this account.

Step 3 Calculate purchase consideration on the basis of terms and conditions agreed upon.

Step 4 Credit Realisation Account with purchase consideration.

Step 5 Calculate profit or loss on realisation.

Step 6 Transfer realisation profit or loss to Partners Capital Accounts in the profit sharing ratio.

Step 7 Transfer all reserve and surplus / fictitious assets to Partners' Capital Accounts in the profit sharing ratio.

Step 8 Receiving of purchase consideration in the form of shares / debentures of the new company.

Step 9 Distribution of shares / debentures amongst the partners.

In the absence of any agreement, share received from the new company should be distributed among the partners in the same ratio as profits and losses are shared.

Illustration 1

Ranjit, Manjit and Paramjit are equal partners of M/s. Hindal & Co. The Balance Sheet of the firm as on 31.12.2014 was as follows :

Liabilities	₹	₹	Assets	₹	₹
Capital Account :			**Fixed Assets :**		
Ranjit	50,000		Land	50,000	
Manjit	1,00,000		Building	70,000	
Paramjit (Debit Balance)	(30,000)	1,20,000	Plant and Machinery	2,00,000	3,20,000
Loan from Bank		5,00,000	**Current Assets :**		
Creditors		1,00,000	Stock	3,00,000	
			Debtors	1,00,000	4,00,000
		7,20,000			7,20,000

On that date, it is decided to convert the partnership into Limited Company called Hindal Limited on the following terms :

(1) Land to be revalued at ₹ 1,50,000.
(2) Plant and Machinery to be revalued at ₹ 2,50,000.
(3) Depreciation amounting to ₹ 20,000 to be written off on building.
(4) A provision of 10% of book value to be made for obsolete stocks.
(5) A provision for doubtful debts to be made at 10% of the debtors.
(6) A discount of 6% would be earned on creditors when paid out.
(7) The new company will issue 12,000 equity shares of ₹ 10 each credited as fully paid up, such share capital being valued at ₹ 1,50,000 and the balance payable is to be discharged by issue of 10% debentures of ₹ 100 each.

Show the necessary Ledger Accounts to close the books of Hindal & Co and show the opening Balance Sheet of the new Company. All partners are solvent and have sufficient cash resources as may be necessary to settle the respective accounts, shares and debentures are divided equaly among the partners.

Nandan and Parijat were partners in a firm sharing profits and losses in the ratio of 3 : 2. The firm was following calendar year as its accounting year. The following is the Balance Sheet of the firm on 31st December, 2014 :

Liabilities	₹	Assets	₹
Partners' Capital :		Goodwill	30,000
Nandan	2,40,000	Land and Buildings	1,00,000
Parijat	2,18,000	Plant and Machinery	2,10,000
Bills Payable	35,000	Furniture and Fittings	1,00,000
Creditors for Goods	25,000	Stock-in-trade	65,000
Creditors for Expenses	40,000	Debtors	25,000
		Cash and Bank Balance	28,000
	5,58,000		5,58,000

On 1st January, 2015 a new company, Nap Ltd. was formed to take over the business of the firm on the following terms:

(a) The company would not take over creditors for expenses to the extent of ₹ 17,000.

(b) Assets are to be valued as follows :
Goodwill ₹ 50,000; Land and Buildings ₹ 1,68,000; Plant and Machinery ₹ 50,000 above book value; Furniture and fittings to be depreciated by 10%; ₹ 5,000 of Debtors to be treated as bad and of the balance 5% is to be treated as doubtful of recovery. Cash and Bank balance to be taken over in full except to meet the creditors for expenses not taken over by the company.

(c) The purchase consideration is to be satisfied by issuing 20,000 equity shares of ₹ 10 each at a premium of 20%, ₹ 1,50,000 by issuing 8% preference shares of ₹ 100 each at par and the balance in the form of 6% debentures issued at 5% discount.

Pass necessary journal entries in the books of the company and prepare the Balance Sheet after acquisition.

Illustration 3

A, B and C carried on business in partnership sharing profits and losses in the ratio of 1 : 2 : 3. They decided to form a private limited company, AB (P) Ltd. and C is not interested to take over the shares in AB (P) Ltd. The authorised share capital of the company is ₹ 12,00,000 divided into 12,000 equity shares of ₹ 100 each. The company was incorporated and took over goodwill as valued and certain assets of the partnership firm on 31.3.2015. The Balance Sheet of the partnership firm on that date was as follows :

Liabilities		₹	Assets	₹
Capital Accounts :			**Fixed Assets** :	
A		1,00,000	Machinery	1,20,000
B		2,00,000	Land	1,74,000
C		3,00,000	Motorcycles	30,000
Current Accounts :			Furniture and Fittings	11,000
A		39,420	**Current Assets** :	
B		60,580	Stock	2,35,000
A's Loan A/c	28,000		Debtors	43,000
Add: Interest accrued	2,000	30,000	Cash in Hand	87,000
Current Liability :			C's Overdrawn	1,00,000
Creditors		70,000		
		8,00,000		8,00,000

C who retired was presented by the other partners (A and B) with one motorcycle valued in the books of the firm ₹ 9,000. The remaining motorcycles were sold in the open market for ₹ 13,000. C also received certain furnitures for which he was charged ₹ 2,000. The debtors which were all considered good were taken over by C for ₹ 40,000. A and B were charged in their profit sharing ratio for the book value of motorcycle presented by them to C.

It was agreed that C who is not willing to take the shares in AB (P) Ltd. was discharged first by providing necessary cash. A and B should bring cash, if necessary.

AB (P) Ltd. took over the remaining furniture and fittings at a price of ₹ 13,000, the machinery for ₹ 1,25,000, the stock at an agreed value of ₹ 2,00,000 and the land at its book value. The value of the goodwill of the partnership firm was agreed at ₹ 88,000. The creditors of the firm were settled by the firm for ₹ 70,000. A's loan account together with interest accrued was transferred to his capital account.

The purchase consideration was discharged by the company by the issue of equal number of fully paid-up equity shares at par to A and B.

Prepare Realisation Account, Capital Account of the Partners and Cash Account. Also draw the Balance Sheet of AB (P) Ltd.

A, B and C were partners in business sharing profit and losses in the ratio of 2 : 1 : 1. Their Balance Sheet as at 31.3.2015 is as follows :

Balance Sheet as at 31.3.2015

Liabilities		₹	Assets		₹
Fixed Capital :			Fixed Assets		3,00,000
A	2,00,000		Investments		50,000
B	1,00,000		Current Assets :		
C	1,00,000	4,00,000	Stock	1,00,000	
Current Accounts			Debtors	60,000	
A	40,000		Cash & Bank	1,50,000	3,10,000
B	20,000	60,000			
Unsecured Loans		2,00,000			
		6,60,000			6,60,000

On 1.4.2015, it is agreed among the partners that BC (P) Ltd, a newly formed company with B and C having each taken up 100 shares of ₹ 10 each will take over the firm as a going concern including goodwill but excluding cash and bank balances. The following points are also agreed upon :

(a) Goodwill will be valued at 3 years purchase of super profits.
(b) The actual profit for the purpose of goodwill valuation will be ₹ 1,00,000.
(c) Normal rate of return will be 15% on fixed capital.
(d) All other assets and liabilities will be taken over at book values.
(e) The purchase consideration will be payable partly in shares of ₹ 10 each and partly in cash. Payment in cash being to meet the requirement to discharge A, who has agreed to retire.
(f) B and C are to acquire capital interest in the new company.
(g) Expenses of liquidation ₹ 40,000.

You are required to prepare the necessary Ledger Accounts.

To Realisation A/c (Purchase consideration)	4,30,000	By Cash A/c (Note 4)	1,70,000
		By Shares in BC (P) Ltd A/c	2,60,000
	4,30,000		4,30,000

Dr. Cash and Bank Account Cr.

Particulars	₹	Particulars	₹
To Balance c/d	1,50,000	By Realisation A/c (Expenses)	40,000
To C Capital A/c (Note 6)	10,000	By B Capital A/c (Note 6)	10,000
To BC (P) Ltd A/c (Note 4)	1,70,000	By A Capital A/c	2,80,000
	3,30,000		3,30,000

Working Notes :

(1) Calculation of Goodwill	₹	**(2) Calculation of Purchase Consideration**	₹
Capital Employed (Fixed Capital)	4,00,000	Goodwill (Note 1)	1,20,000
Actual Profit	1,00,000	Fixed Assets	3,00,000
Less: Normal Profit @ 15% of capital employed	60,0000	Investments	50,000
Super Profit	40,000	Stock	1,00,000
Goodwill = ₹ 40,000 x 3	1,20,000	Debtors	60,000
			6,30,000
		Less: Unsecured Loans	2,00,000
			4,30,000

(3) Goodwill has been recorded in the books by debiting Goodwill Account and crediting Partners' Capital Accounts in the profit sharing ratio of 2 : 1 : 1. After recording goodwill in the books, it is transferred to Realisation Account by debiting Realisation Account and crediting Goodwill Account.

(4) Amount payable to A is ₹ 2,80,000. After meeting realisation expenses cash in hand is ₹ 1,10,000. Therefore, ₹ 1,70,000 must be received from BC (P) Ltd to discharge A in full.

(5) Purchase consideration was agreed at ₹ 4,30,000. ₹ 1,70,000 (Note 4) was paid in cash and the balance ₹ 2,60,000 will be paid in shares in BC (P) Ltd

B's share in BC (P) Ltd will be ₹ 1,30,000 and C's share in BC (P) Ltd will be also ₹ 1,30,000.

(6) C's Capital Account of the firm is showing a balance of ₹ 1,20,000 (₹ 1,00,000 + ₹ 30,000 – ₹ 10,000). therefore, he will bring ₹ 10,000 in cash to make up the deficit.

B's Capital Account of the firm is showing a balance of ₹ 1,40,000 (₹ 1,00,000 + ₹ 20,000 + ₹ 30,000 – ₹ 10,000). Therefore, B will take away ₹ 10,000 from the firm.

Illustration 5

Star and Moon had been carrying on business independently. They agreed to amalgamate and form a new company Neptune Ltd with an authorised share capital of ₹ 2,00,000 divided into 40,000 equity shares of ₹ 5 each.

On 31st December, 2014, the respective Balance Sheets of Star and Moon were as follows :

Particulars	Star (₹)	Moon (₹)
Fixed Assets	3,17,500	1,82,500
Current Assets	1,63,500	83,875
	4,81,000	2,66,375
Less: Current Liabilities	2,98,500	90,125
Representing Capital	1,82,500	1,76,250

Additional information :

(a) Revalued figures of Fixed and Current Assets were as follows :

Particulars	Star (₹)	Moon (₹)
Fixed Assets	3,55,000	1,95,000
Current Assets	1,49,750	78,875

(b) The debtors and creditors include ₹ 21,675 owned by Star to Moon.

The purchase consideration is satifsied by issue of the following shares and debentures :

(i) 30,000 equity shares of Neptune Ltd, to Star and Moon in the proportion to the profitability of their respective business based on the average net profit during the last three years which were as follows:

Particulars	Star (₹)	Moon (₹)
2009 Profit	2,24,788	1,36,950
2010 (Loss) / Profit	(1,250)	1,71,050
2014 Profit	1,88,962	1,79,500

(ii) 15% debentures in Neptune Ltd, at par to provide an income equivalent to 8% return on capital employed in their respective business as on 31st December, 2014 after revaluation of assets.

You are requested to :

(1) Compute the amount of debentures and shares to be issued to Star and Moon.

(2) A Balance Sheet of Neptune Ltd, showing the position immediately after amalgamation.

Solution **Computation of Amount of Debentures and Shares to be Issued**

Particulars			
(i) Average Profit :	₹ (2,24,788 – 1,250 + 1,88,962) / 3	1,37,500	—
	₹ (1,36,950 + 1,71,050 + 1,79,500) / 3	—	1,62,500

(ii) Equity Shares Issued :		
(a) Ratio of Distribution	1,375	1,625
(b) No. of Shares	13,750	16,250
(c) Amount : 13,750 @ ₹ 5	68,750	—
16,250 @ ₹ 5	—	81,250
(iii) Capital Employed (after revaluation of assets) :	₹	₹
Fixed Assets	3,55,000	1,95,000
Current Assets	1,49,750	78,875
	5,04,750	2,73,875
Less: Current Liabilities	2,98,500	90,125
	2,06,250	1,83,750
(iv) Debentures Issued :	₹	₹
8% Return on Capital Employed	16,500	14,700
15% Debentures to be issued to provide equivalent income :		
Star : ₹ 16,500 x 100 / 15	1,10,000	
Moon : ₹ 14,700 x 100 / 15		98,000

Avinash, Rohit and Madwesh were carrying on business in partnership sharing profits and losses in the ratio of 5 : 4 : 3 respectively. The Trial Balance of the firm as on 31st March, 2015 was the following :

Particulars	Dr. (₹)	Cr. (₹)
Plant and Machinery at cost	1,05,000	—
Stock	60,200	—
Sundry Debtors	85,000	—
Sundry Creditors	—	1,05,200
Capital A/cs :		
Avinash	—	70,000
Rohit	—	50,000
Madwesh	—	30,000
Drawings A/c :		
Avinash	30,000	—
Rohit	25,000	—
Madwesh	20,000	—
Depreciation on Plant and Machinery	—	35,000
Trading Profit for the year	—	1,29,800
Cash at Bank	94,800	—
	4,20,000	4,20,000

Additional Information :

(a) Interest on Capital Accounts at 10% on the amount standing to the credit of Partners' Capital Accounts at the beginning of the year was not provided before preparing the above Trial Balance.

(b) On 31st March, 2015 they formed a Private Limited Company Anagha (P) Ltd. to take over the partnership business.

(c) You are further informed as under :

(i) Plant and Machinery is to be transferred at ₹ 80,000.

(ii) Equity Shares of ₹ 10 each of the company are to be issued to the partners at par in such numbers to ensure that by reason of their share holdings alone, they will have the same rights of sharing profits and losses as they had in the partnership. Balance, if any in their Capital Accounts, will be settled by giving 7.5% Preference Shares at par.

(iii) Before transferring the business, the partners withdrew by cash from partnership the following amounts over and above the drawings as shown in the Trial Balance :
(a) Avinash — ₹ 20,000; (b) Rohit — ₹ 10,600; (c) Madwesh — ₹ 14,200.

(iv) All assets and liabilities except Plant and Machinery and the Bank Balance are to be transferred at their value in the books of the partnership as at 31st March, 2015.

You are required to prepare :

(a) Profit and Loss Adjustment Account for the year ending 31st March, 2015.
(b) Capital Accounts showing all the adjustments required to dissolve the partnership.
(c) A statement showing the number of shares of each class to be issued by the company to each of the partners to settle their accounts.
(d) Balance Sheet of the company Anagha (P) Ltd. as on 31.03.2015 after take over of the business.

Sale to a Company

Introduction

Sometimes, partners may decide to sell their partnership firm to an existing limited company. In this case, the company will take over different assets and liabilities of the firm and the partners will get the shares/debentures of that company and will become the shareholders/debentureholders of the company.

The books of account of the partnership firm will be closed in the usual manner as done in case of conversion of a company.

Illustration 8

P, Q, R and S were partners in a firm sharing profits and losses in the ratio of 5 : 3 : 2 : 2. Their Balance Sheet as on 31st March, 2012 stood as follows :

Liabilities	₹	Assets	₹
Capital Accounts :		Goodwill	20,000
P	60,000	Machinery	90,000
Q	40,000	Debtors	16,000
R	6,000	Stocks	8,000
Creditors	10,000	Capital Accounts :	
Accounts Payable	20,000	S	2,000
	1,36,000		1,36,000

S did not have any private assets or liabilities. The firm was dissolved and the partners agreed to sell the fixed assets to ABC Ltd. which allotted 4,500 fully paid equity shares of ₹ 10 each (at the market value of ₹ 15 each) and paid cash ₹ 15,000. Stock and Debtors were realised at book value and the cost of realisation amounted to ₹ 2,500. R was settled off in cash and P and Q were distributed shares in ABC Ltd in their capital ratio.

Prepare Ledger Accounts to close the books of the firm.

Accounting Entries in the Books of Purchasing Company

The purchasing company records all the assets and liabilities at the values it has decided to take over. If the purchase consideration payable is more than the net assets (assets *minus* liabilities) acquired, it represents goodwill. Conversely, if the purchase consideration payable is less than the net assets acquired, it represents capital reserve.

1. If the net acquired assets is equal to purchase consideration, the following entry is passed:

Assets Account	Dr.	[Acquired value]
To Liabilities Account		[Assumed value]
To Share Capital Account		[Purchase consideration]

2. If the net acquired assets is more than the purchase consideration, it represents capital reserve. The following entry is passed :

Assets Account	Dr.	[Acquired value]
To Liabilities Account		[Assumed value]
To Share Capital Account		[Purchase consideration]
To Capital Reserve Account		

3. Conversely, if the net acquired assets is less than the amount of purchase consideration, it represents goodwill. The following entry is passed :

Assets Account	Dr. [Acquired value]
Goodwill Account	Dr. [Purchase consideration *minus* net assets]
To Liabilities Account	[Assumed value]
To Share Capital Account	[Purchase consideration]

Illustration 9

P and Q were in partnership sharing profits in the proportions 3:2. On 31st March 2015, they accepted an offer from S. Ltd to acquire at that date their fixed assets and stock at an agreed price of ₹ 7,20,000. Debtors, creditors and bank overdraft would be collected and discharged by the partnership.

The purchase consideration of ₹ 7,20,000 consisted of cash ₹ 3,60,000, debentures in S. Ltd (at par) ₹ 1,80,000 and 12,000 Equity Shares of ₹ 10 each in S. Ltd. P will be employed in S. Ltd but, since Q was retiring, P agreed to allow him ₹ 30,000 in compensation, to be adjusted through their Capital Accounts. Q was to receive 1,800 shares in S. Ltd and the balance due to him in cash.

Balance Sheet as at 31.3.2015

Liabilities	₹	Assets	₹
P Capital Account	1,20,000	Fixed Assets	4,80,000
Loan : P	2,10,000	Stock	45,000
Bank overdraft	1,50,000	Debtors	75,000
Creditors	1,80,000	Q Capital Account	60,000
	6,60,000		6,60,000

The sale of the assets to S. Ltd took place as agreed; the debtors realised ₹ 60,000 and creditors were settled for ₹ 1,71,000. The partnership then ceased business.

You are required to pass necessary Journal Entries and show: (a) Realisation Account (b) Bank Account (c) Partners' Capital Accounts, in columnar form, showing the final settlement.

Somsons Ltd. agreed to purchase the business of a firm consisting of two brothers, K. Som and D. Som as on 31st March, 2015. The Balance Sheet of the firm on that date was as follows :

Liabilities	₹	Assets	₹
Capital Account :		Land and Building	47,000
K. Som	76,000	Plant and Machinery	28,000
D. Som	58,000	Furniture and Fixtures	7,000
General Reserve	30,000	Stock-in-Trade	62,000
Sundry Creditors	37,000	Sundry Debtors	55,000
Outstanding Expenses	3,000	Cash	5,000
	2,04,000		2,04,000

The company agreed to take over the liabilities and all the assets with the exception of cash, the agreed purchase price being ₹ 1,80,000 to be satisfied as to 1/4 in cash and 3/4 by the issue of fully paid equity shares of ₹ 10 each at an agreed value of ₹ 12.50 per share.

The company made the following revaluations of the assets taken over when bringing them into books : Land and Building ₹ 62,000; Plant and Machinery ₹ 25,000; Furniture and Fixtures ₹ 5,000; Stock-in-trade ₹ 58,000; Sundry Debtors ₹ 50,000.

Give the entries necessary to record the acquisition of the business in the books of the company.

Liabilities Taken Over (at agreed value)		
Sundry Creditors	37,000	
Outstanding Expenses	3,000	40,000
(A) Net Assets Taken Over		1,60,000
(B) Purchase Consideration Paid		1,80,000
Goodwill (B – A)		20,000

KEY POINTS

- The partners may decide to convert the partnership business into a limited company (Private or Public) in order to: (a) limit their personal liability; (b) have access to additional equity financing; (c) obtain selected tax advantages; (d) explore other sound business opportunities; (e) continue business for a long time.
- At the time of conversion, the partnership is dissolved and a new company is floated.
- To close the books of account of the partnership firm, the following steps are generally followed:
  Step 1 : Prepare the Balance Sheet of the partnership firm on the date of conversion.
  Step 2 : Open a Realisation Account and transfer all assets and liabilities (excluding fictitious assets) to this account.
  Step 3 : Calculate purchase consideration on the basis of terms and conditions agreed upon.
  Step 4 : Credit Realisation Account with purchase consideration.
  Step 5 : Calculate profit or loss on realisation.
  Step 6 : Transfer realisation profit or loss to Partners Capital Accounts in the profit sharing ratio.
  Step 7 : Transfer all reserve and surplus / fictitious assets to Partners' Capital Accounts in the profit sharing ratio.
  Step 8 : Receiving of purchase consideration in the form of shares / debentures of the new company.
  Step 9 : Distribution of shares / debentures amongst the partners.
- The new company will record all the assets and liabilities at the values it has decided to take over. If the purchase consideration payable is more than the net assets acquired, it represents ***goodwill***. Conversely, if the purchase consideration payable is less than the net assets acquired, it represents ***capital reserve***.

KEY POINTS (contd.)

Step 4 : Credit Realisation Account with purchase consideration.
Step 5 : Calculate profit or loss on realisation.
Step 6 : Transfer realisation profit or loss to Partners Capital Accounts in the profit sharing ratio.
Step 7 : Transfer all reserve and surplus / fictitious assets to Partners' Capital Accounts in the profit sharing ratio.
Step 8 : Receiving of purchase consideration in the form of shares / debentures of the new company.
Step 9 : Distribution of shares / debentures amongst the partners.

- The new company will record all the assets and liabilities at the values it has decided to take over. If the purchase consideration payable is more than the net assets acquired, it represents ***goodwill***. Conversely, if the purchase consideration payable is less than the net assets acquired, it represents ***capital reserve***.

THEORETICAL QUESTIONS

1. What are the accounting implications of conversion of a partnership firm to a company ?
2. Explain the process of conversion of a partnership to a company.
3. What are the advantages of conversion of a partnership firm into a company ?
4. How shares of the new company is distributed amongst the partners ?
5. Why realisation account is prepared in place of revaluation account at the time of conversion of a partnership to a company ?
6. Why a partnership firm is sold to a company ?

PRACTICAL QUESTIONS

Conversion to a Company / Sale to a Company

1. A and B are partners sharing profits & losses in the ratio of 3 : 2. Their Balance Sheet as on 31.12.2014 was :

Liabilities	₹	Assets	₹
A's Capital	30,000	Goodwill	5,000
B's Capital	20,000	Other Fixed Assets	30,000
Reserve	15,000	Joint Life Policy	20,000
Current Liabilities	30,000	Other Assets	40,000
	95,000		95,000

On 30.6.2015, AB Ltd. was formed to take over the partnership business upto that date, a net profit of ₹ 10,000 was made after charging depreciation on fixed assets @ 10% p.a. For the purpose of transfer, Goodwill was valued at ₹ 30,000. The joint life policy was surrendered for ₹ 15,000 and nothing was withdrawn by the partners. Purchase consideration was paid by shares of ₹ 10 each. The company also issued 15,000 shares of ₹ 10 each to the public as fully paid. All shares were sold.

Close the books of the firm and prepare the opening Balance Sheet of AB Ltd.

2. Mr Brown had been trading under the name of BS. On 1st January, 2015 a company, X Limited, was formed with an authorised share capital of ₹ 8,00,000. On the same date the entire business of BS, except investments but including cash was transferred to X Limited.

From the information given below you are required to prepare:

(a) a Profit and Loss Account for BS for the year ended 31st December, 2014 and a balance sheet at that date;
(b) a realisation account showing the transfer of the business of BS at 1st January, 2015;
(c) a capital account of Mr Brown at 1st January, 2015;
(d) a balance sheet of X Limited on the completion of the takeover of the business of BS on 1st January, 2015. (Taxation is to be ignored and workings must be shown).

1. All assets taken over by X Limited were transferred at book values except the following, which were taken over by the company at the following valuations:
   Land and buildings at ₹ 4,00,000; Plant and machinery at ₹ 1,00,000;
2. Investments were valued at ₹ 40,000 and were taken over by Mr Brown at that value.

3. The shares of the new company, X Limited, were of ₹ 10 each and issued at par. Mr Brown received 8,00,000 shares in the new company and gave his wife one of these shares so that she would be a shareholder in X Limited.
4. The trial balance of BS as at 31st December, 2014 was as follows:

Debit Balances	₹	Credit Balances	₹
Land and Buildings	4,40,000	Plant Depreciation	2,20,000
Plant and Machinery	4,00,000	Fixture Depreciation	16,000
Fixtures & Fittings	40,000	Bad debts provision	6,000
Investments	20,000	Trade creditors	1,70,000
Stock	96,000	Capital – Mr Brown	7,66,000
Debtors	1,80,000	Sales	12,00,000
Cash	66,000		
Drawings – Mr Brown	1,56,000		
Purchases	8,18,000		
Wages	1,40,000		
Rates & Insurance	10,000		
Heat and Light	7,000		
Travel	3,000		
Sundries	2,000		
	23,78,000		23,78,000

5. The following adjustments were still to be recorded :
   (a) Depreciation was to be charged at 5% straight-line on plant and machinery and 10% straight line on fixtures and fittings;
   (b) At the year end a bad debts provision of ₹ 20,000 was thought necessary;
   (c) Accrued expenses at 31st December, 2014 were:
   Wages — ₹ 5,000; Head and light — ₹ 3,000; Travel — ₹ 2,000;
   (d) Stock at December, 2014 was ₹ 1,14,000.

3. Abraham, Benjamin and Chapman are in partnership sharing profits and losses in the proportion of 5 : 3 : 2 respectively. Their Balance Sheet as on March 31, 2015 was as follows:

Liabilities	₹	Assets	₹
Capitals :		Sundry assets	1,88,400
Abraham	94,000	Cash	2,700
Benzamin	61,000	Bank balance	5,500
Chapman	26,000		
Creditors	15,600		
	1,96,600		1,96,600

On April 1, 2015 they sold their business including the bank balance to ABC Ltd, on the following terms:
(a) The company to satisfy the purchase consideration by issue of ₹ 25,000 6% debentures; 9,600 equity shares of ₹ 8 each at a premium of ₹ 2 per share; and ₹ 72,000 8% preference shares of ₹ 100 each.
(b) The partners will draw cash before transfer to the company and divide the same equally among them.
(c) Out of the purchase consideration the debentures and the preference shares are agreed to be divided as follows:
Debentures : Abraham – ₹ 16,000; Benzamin – ₹ 9,000.
Preference Shares – To be shared by all in proportion to original capital amounts after adjustment of debenture value as above.
Draw up Realisation Account and the Partners'Capital Accounts showing distribution of shares amongst them.

4. Lion and Tiger were in partnership sharing profits and losses in the ratio of 3 : 1. The following is the Balance Sheet of the partnership as on March 31, 2015.

Liabilities	₹	Assets	₹
Capital Accounts:		Fixed assets	21,000
Lion	24,000	Stock	11,200
Tiger	8,000	Debtors	19,600
Current Accounts :		Cash at bank	3,720
Lion	4,200		
Tiger	2,000		
Loan – Tiger	3,000		
Creditors	14,320		
	55,520		55,520

Elephant Ltd agreed to take over stock and fixed assets, excluding the value of motor car ₹ 4,100 for a consideration of ₹ 48,000 which is to be satisfied by payment of cash ₹ 16,000, allotment of 160 preference shares of ₹ 100 each valued at ₹ 75 per share, and the balance by allotment of 1,600 equity shares of the face value of ₹ 10 each. The debtors realised ₹ 19,200 and the creditors were settled for ₹ 14,000.

The following were agreed between the partners.

(a) The equity shares should be allotted in the ratio of the Partners' Capital Accounts as per the Balance Sheet.
(b) Lion to take over the motor car at an agreed value of ₹ 4,200.
(c) The preference share to be allotted to Tiger to the value of his loan and the remainder to be allotted equally between the partners.
(d) Balance remaining to be settled in cash.

You are required to show :
(i) The Realisation Account;
(ii) Partners' Capital Accounts;
(iii) Bank Account;
(iv) Statement showing distribution of shares.

5. Mr B and Mr E are partners sharing profits and losses in the ratio of 3 : 2. On 30th September, 2014, they admit Mr C as a partner, and the new profit ratio is 2 : 2 : 1. C brought in Fixture ₹ 3,000 and cash ₹ 10,000, the goodwill being (i) B and E ₹ 20,000 and (ii) C ₹ 10,000 but neither figure is to be brought into the books.
On 31st March 2015, the partnership is dissolved. B retiring and the other two partners forming a company called BC Limited with equal capitals, taking over all remaining assets and liabilities, goodwill being agreed at ₹ 40,000 and brought into books of the company. B agrees to take over the business car at ₹ 3,700; Plant was sold for ₹ 3,000 being in excess of requirements. The profits of the two preceding year were ₹ 17,200 and ₹ 19,000 respectively and it was agreed that for the half year ended 30th September 2014, the net profit was to be taken as equal to the average of the two preceding years and the current year. No entries had been made when C entered, except cash. No new book being opened by BC Company Ltd, B agreed to have ₹ 50,000 as loan to the company, secured by 12% Debentures. the following is the Trial Balance as on 31st March, 2015 :

Heads of Account	Dr (₹)	Cr (₹)	Heads of Account	Dr (₹)	Cr (₹)
Capital Accounts :			Debtors and Creditors	31,000	12,000
B	—	35,000	Plant (B.V. of plant sold ₹ 4,000)	23,000	—
E	—	20,000	Fixtures	7,000	—
C	—	10,000	Motor Car	2,700	—
Drawing Accounts :			Stock on 31st March 2015	13,000	—
B	6,000	—	Bank	16,300	—
E	5,000	—	P&L Account for the year	—	29,800
C	2,800	—		1,06,800	1,06,800

Prepare :
(a) Goodwill Adjustment Account;
(b) Capital Accounts of Partners;
(c) Profit and Loss Appropriation Account;
(d) Balance Sheet of BC Ltd as on 31st March, 2015.

6. Riu, Inu and Sinu were running partnership business sharing profits and losses in 2 : 2 : 1 ratio. Their Balance Sheet as on 31st March, 2015 stood as follows : (all figures in ₹ '000)

Liabilities	₹	₹	Assets	₹	₹
Fixed Capital :			Fixed Assets		400
Riu	300		Investments		50
Inu	200		Current Assets :		
Sinu	100	600	Stock	100	
Current Accounts :			Debtors	275	
Riu	60		Cash and Bank	125	500
Sinu	40	100			
Unsecured Loans		100			
Current Liabilities		150			
		950			950

On 01.04.2015, they agreed to form a new company RIS (P) Ltd. with Inu and Sinu each taking up 200 shares of ₹ 10 each, which shall take over the firm as a going concern including Goodwill, but excluding Cash and Bank balances. The following are also agreed upon :

(a) Goodwill will be valued at 3 year's purchase of super profits.
(b) The actual profit for the purpose of Goodwill valuation will be ₹ 2,00,000.
(c) The normal rate of return will be 18% per annum on Fixed Capital.
(d) All other assets and liabilities will be taken over at book values.
(e) The Purchase Consideration will be payable partly in shares of ₹ 10 each and partly in cash. Payment in cash being to meet the requirement to discharge Riu, who has agreed to retire.
(f) Inu and Sinu are to acquire interest in the new company at the ratio 3 : 2.
(g) Realisation expenses amounted to ₹ 51,000.

You are required to prepare Realisation Account, Cash and Bank Account, RIS (P) Limited Account and Capital Account of Partners.

7. C & R and K & T are two partnerships, trading separately as steel stockholders. The leasehold premises of C & R are due to revert to the freeholders in five years time. K of K & T who is nearing his 70th birhday wishes to retire. It is agreed to amalgamate the two firms as at 1st April 2015 and to form a new company S Limited.

You are required, using the information given, to :

(a) prepare Journal Entries closing the books of the two partnerships;
(b) show in columnar form the Capital Accounts of the partners to include the final cash payment and shares received;
(c) prepare the opening Balance Sheet of the new company after the various adjustments have been made.

The Balance Sheet of the partnerships prior to amalgamation were (all figures in rupees) :

Liabilities	C & R	K & T	Assets	C & R	K & T
Capital Accounts :			Goodwill	4,000	—
C	7,100	—	Freehold Premises	—	15,000
R	4,800	—	Leasehold Premises	1,500	—
K	—	24,200	Plant and Equipment	1,200	2,700
T	—	10,000	Vehicles	2,500	4,000
Provision for Dilapidations	2,200	—	Investment (at cost)	—	2,600
Creditors	4,200	8,400	Stock	3,900	8,000
Bank Overdraft	—	1,700	Debtors	5,000	12,000
			Balance at Bank	200	—
	18,300	44,300		18,300	44,300

All the profits of the two firms, whether revenue or capital, were shared in the ratios : C : R – 5 : 3; K : T – 4 : 3.

You are given the following information :

1. C & R immediately surrendered the lease to the freeholder, who agreed to waive his right to dilapidations and pay them ₹ 1,000.
2. The amounts agreed for the assets and liabilities taken over by S Limited were :

	C & R	K & T		C & R	K & T
Goodwill	8,000	12,000	Stock	3,700	7,500
Freehold premises	—	25,000	Debtors	4,500	11,000
Plant and equipment	1,000	2,500	Creditors	4,100	8,300
Vehicles	2,500	3,500			

3. The investments were taken over by K at an agreed value of ₹ 6,400.
4. T agreed to pay off the bank overdraft and the final balance at the bank of C & R were shared equally between the partners.
5. C, R and T paid in such amounts as were necessary to enable K to be paid in full, so that their respective shareholders were finally C — 30%; R — 30%; T — 40%.
6. S Limited allotted shares of ₹ 10 each at par as consideration for the assets taken over.

8. A and B were in partnership sharing profits and losses in the ratio of 2 : 1. Their Summarised Balance Sheet as on March 31, 2015 was as under:

Liabilities	₹	₹	Assets	₹	₹
Fixed Capital Accounts :			Fixed Assets		70,000
A	50,000		Current Assets:		
B	40,000	90,000	Stock	35,000	

Current Accounts :			Debtors	65,000	
A	20,000		Bank	15,000	1,15,000
Less : B	10,000	10,000			
Loan — B		30,000			
Creditors		55,000			
		1,85,000			1,85,000

The fixed assets included two motor cars having book values at ₹ 8,000 and ₹ 6,000 respectively. The partners, desiring to retire from business, accepted the offer of Western Indian Limited to acquire the stock and fixed assets, other than the motor cars, at an agreed purchase price of ₹ 1,60,000. The purchase consideration was to be satisfied by a cash payment of ₹ 56,000, the allotment by the company to the partners of 400, 5% preference shares of ₹ 100 each, and the balance by the allotment by the company to the partners of 900 equity shares of ₹ 100 each.

The debtors realised ₹ 61,000 and the creditors were settled for ₹ 51,000. The partners agreed that the following should be the basis of distribution on dissolution of the partnership:

(1) A to take over one car at a valuation of ₹ 12,000 and B the other at ₹ 8,000.

(2) B to be allotted preference shares to the value of his loan, the remainder to be allotted to A.

(3) The equity shares to be allotted in proportion of fixed capitals.

(4) Both the preference and equity shares to be valued at ₹ 80 per share.

(5) The balances to be settlled in cash.

You are required to prepare :

(a) The Realisation Account;

(b) The Partners' Capital Accounts showing the final settlement between them; and (c) The Bank Account.

6. **Realisation loss : ₹ 51,000; Goodwill : ₹ 2,76,000; Purchase consideration : ₹ 8,51,000.**
7. **Purchase consideration — C & R : ₹ 15,600; K & T : ₹ 53,200. Profit on Realisation — C & R : ₹ 4,800; K & T : ₹ 23,600. Shareholding in S Ltd. : C — ₹ 20,640; R — ₹ 20,640; T — ₹ 27,520.**
8. **Realisation profit : ₹ 75,000; Final payment by cheque : A — ₹ 66,000; B — ₹ 15,000.**

34

Branch Accounting

Introduction

A branch may be defined as a section of an enterprise, geographically separated from the rest of the business, controlled by a ***head office***, and generally carrying on the same activities as of the enterprise. As a business grows, it may open up branches in different towns and cities in order to market its products/services over a large territory and thus increase its profits. For example, Bata Shoe Co. Ltd. has branches in various cities all over the country. The same example holds good for a commercial bank also.

As per the provisions of Section 2(9) of the Companies Act, 1956, branch office in relation to a company means—

(a) any establishment described as a branch by the company; or

(b) any establishment carrying on either the same or substantially the same activity as that carried on by the head office of the company; or

(c) any establishment engaged in any production, processing or manufacture,

but does not include any establishment specified in any order made by the Central Government under Section 8 of the Companies Act, 1956.

It should be mentioned that a branch is ***not a separate legal entity***; it is simply a segment of a business. From an accounting standpoint, a branch is a clearly identifiable ***profit centre***. In order to exercise greater control over the branches it is necessary to ascertain profit or loss made by such branches separately. Apart from this, specialised accounting techniques have to be adopted for controlling various branch activities and for their smooth running, both at the branch level and at the head office level. The systems of accounting vary between different enterprises in accordance with their type of activities, methods of operation and the preferences of their managements.

Need for Branch Accounting

Though a branch is typically located at some distance from the head office, it carries on all its activities under its direction and control. Therefore, it is necessary that the head office and the branch obtain information from either side at regular intervals about the proper functioning of the branch. This requires the head office and the branch to keep proper books of accounts. The need for branch accounting arises as to :

(a) ascertain the profitability of each branch separately for a particular accounting period,

(b) ascertain the financial position of each branch separately at the end of that accounting period,

(c) assess the progress and performances of each branch,
(d) fulfill the audit requirements under Section 228 of the Companies Act, 1956,
(e) incorporate the profit or loss made by the branch and its assets and liabilities in the firm's final accounts,
(f) ascertain the requirements of stock and cash for each branch,
(g) ascertain whether the branch is yielding a satisfactory rate of return on capital invested in it,
(h) ascertain whether the branch should be expanded or closed,
(i) ascertain the quantity of stock held by each branch at the end of that accounting period, and
(j) ascertain the amount of commission payable to the manager, if that is based on profits.

Types of Branches

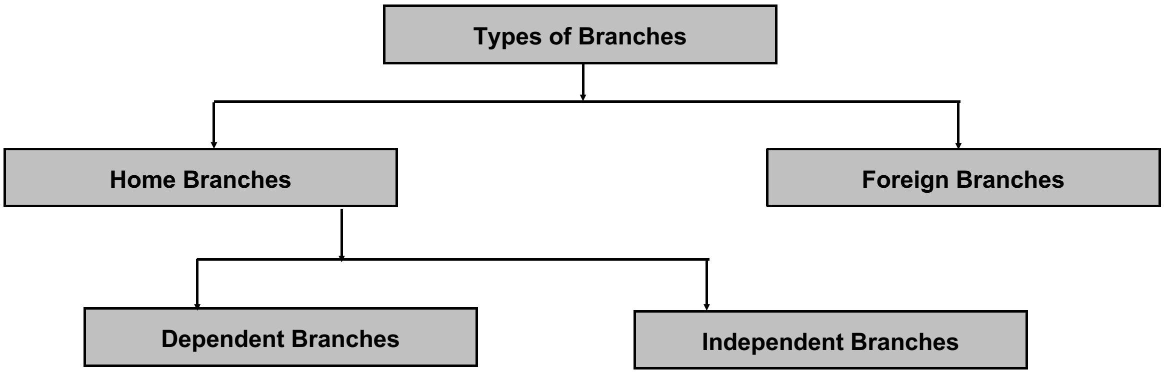
From an accounting point of view, the branches can be divided into the following main classes:

(1) Home Branches

(a) Dependent branches (where the head office maintains all the accounts)
(b) Independent branches (where the branch keeps its own accounts)

(2) Foreign Branches

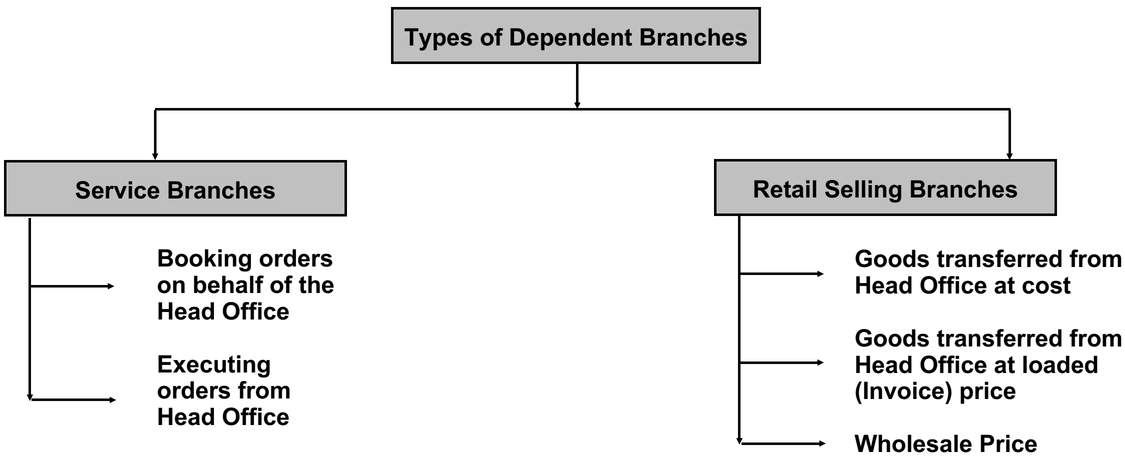
They almost invariably trade independently and record their transactions in foreign currency.



Dependent Branches

When the policies and administration of a branch are totally controlled by the head office, who also maintains its accounts, the branch is called a ***dependent branch***.

The following are the different types of dependent branches:



Service Branches

These branches are booking or executing orders on behalf of the head office. The accounts relating to these types of branches consist mainly of expenditure accounts for salaries, wages, travelling and miscellaneous expenses, etc. Generally the branch manager is provided with a small fund (similar to a petty cash fund, which is replenished periodically) to pay for small items of expense. The branch manager is required to submit periodical (weekly or monthly) expenditure statements to the head office, upon receipt of which, the head office forwards a replacement cheque for the total amount of expenditure. For proper control of branch expenditure, the expenditure returns are analysed and total of each type of expenditure are debited to the appropriate Branch Expenditure Account and credited to the Branch Cash Account in the head office books. At the time of preparation of final accounts of the head office, the different Branch Expenditure Accounts are transferred to the Profit and Loss Account of the head office.

Retail Selling Branches

For retail selling branches, the head office not only maintains all accounting records but also manufactures or purchases all or most of the required stock in bulk quantity. It is often found the most practical and economical way for the head office, (particularly with increasingly widespread use of sophisticated computers which can communicate with one another using telephone services), to undertake all the book-keeping and accounting work required, as it simply involves asking for regular 'returns' from the various branches. This practice is very useful for those organisations which operate on a large scale with numerous branches, with each branch practically being no more than a sales depot or selling outlet. The main features of retail branches are as follows:

1. A separate record of branch assets, liabilities, revenues and expenses is maintained by the head office. These branches maintain records of sales and petty expenses only but may also keep debtors accounts, if necessary. They also maintain stock register and furnish weekly or monthly stock statements to H.O.
2. All business documents originating at the branches are transmitted to the head office.
3. Goods are transferred by the head office to such branches either at cost or at loaded (invoice) price which are fixed nationally or on a local basis by the head office. The branch manager has no discretion in the fixation of price and has to sell the goods at agreed upon prices.
4. Except with the permission of the head office, such branches are not allowed to buy goods locally from the open market.
5. Goods are generally sold by such branches in cash. Though granting of credit is usually forbidden, such branches can sell goods on credit with the permission of the head office.
6. The amount collected from cash sales or debtors is either remitted to head office immediately (the same or next day) or banked intact in the account of the head office in some local bank.
7. A working fund for the branch is established and is replenished as needed. All major expenses of the branch are paid, as far as possible, by the head office. The branch manager is allowed to pay salaries and wages of the branch staff. He is allowed to incur only petty expenses like postage, telephone, etc.

Accounting Arrangements of Retail Dependent Branches

The accounting arrangement of a branch depends upon its size, the type of activities, the method of operation and the degree of control to be exercised by the head office. There are three main methods of accounting for branch transactions, viz.

1. Debtors System
2. Stock and Debtors System
3. Final Accounts System

Debtors System

This system of accounting is suitable for the small-size branches. Under this, a Branch Account is opened for each branch in the head office ledger. All transactions relating to that branch are recorded in this account. The Branch Account is prepared in such a way that it discloses the profit or loss of the branch.

Head office may send goods to branch either at "cost price" or "selling price" (also called invoice price). The accounting procedure in these two cases is slightly different. Therefore, we discuss them separately.

Cost Price Method : Under this method, at the beginning of the year the Branch Account is debited with the opening balances of assets such as stock (at cost), debtors, petty cash, furniture, prepaid expenses, accrued income, etc., lying with the branch. Similarly, it is credited with the opening balances of liabilities of the branch such as, creditors, outstanding salaries, rent etc.

The Branch Account is then debited with the amount of goods sent to the branch (at cost) and other amounts remitted to meet various expenses such as, salaries, rent, rates and taxes, etc. Likewise, the Branch Account is credited with the return of goods (at cost) by the branch, and receipts from debtors and cash sales. At the year end, Branch Account is debited with the closing values of liabilities and credited with the closing values of assets. The difference between the two sides represents profit or loss for the branch for a particular period.

6. For cash/cheque received from branch (Cash sales plus collection from debtors)	
Cash/Bank Account	Dr. [Actual including direct from debtors]
To Branch Account	
7. For 'closing balances of assets' at the branch	
(Individual) Branch Assets Account	Dr.
To Branch Account	
8. For 'closing balances of liabilities' at the branch	
Branch Account	Dr.
To Liabilities (Individual) Account	
9. For closing goods sent to branch account	
Goods Sent to Branch Account	Dr.
To Purchase Account	[Trader]
To Trading Account	[Manufacturer]
10. For credit sales	
[No entry]	
11. For normal loss	
[No entry]	
12. For goods returned by customers	
[No entry]	
13. For abnormal loss	
(a) Abnormal Loss Account	Dr. [Total]
To Branch Account	

(b) General Profit and Loss Account Dr. [Loss]
Insurance Claim Account Dr. [Claim]
To Abnormal Loss Account [Total]

In this context, it should be noted that Branch Account is prepared to know the correct profit of the branch without being affected by any abnormal loss.

14. Pilferage

One of the commonest feature of retail trade is 'shoplifting' and this has come to be regarded as a normal business loss — hence no entry is required for it.

15. Branch expenses paid by the branch

[No entry]

16. Bad debts, discount allowed to debtors

[No entry]

Reasons for not passing any entry for 10, 12 and 14 have been discussed later in details.

17. For transferring profit or loss of the branch

(i) If profit:

Branch Account Dr.
To General Profit and Loss Account

(ii) If loss:

General Profit and Loss Account Dr.
To Branch Account

It should be noted that the closing balances of branch assets and liabilities are shown in the Balance Sheet of the head office.

The Branch Account appears as follows:

In the books of the Head Office

Dr. ... Branch Account Cr.

Some Typical Items

The following items are to be ignored while preparing Branch Account under this method:

(i) Credit sales; Sales returns; Bad debts; Discount allowed; etc., (ii) Depreciation of fixed assets, (iii) Petty cash expenses paid by the branch, (iv) Shortage or surplus of stock, and (v) Profit or loss arising out of sale of a fixed asset.

The reasons are explained below:

(i) Credit sales and other related matters (such as, sales returns, bad debts, discount allowed, etc.) The Branch Account is debited with the opening balance of debtors and credited with cash received from debtors and closing balance of debtors. Credit sale, sales returns, bad debts, discount allowed, etc., are related to Debtors Account. For calculating closing debtors balance all these items have already been taken into consideration. Therefore, these items are to be ignored for the preparation of Branch Account.

(ii) Depreciation on Fixed Assets The Branch Account is debited with the opening balance of fixed assets and credited with the closing balances of fixed assets after deducting depreciation. Depreciation is automatically accounted for and it should not be shown in the Branch Account separately.

(iii) Petty Cash Expenses paid by the Branch The Branch Account is debited with the opening balance of petty cash and the amount of petty cash sent by the head office and is credited with the closing petty cash. For calculating closing petty cash, all expenses paid by the branch are taken into consideration. Therefore, it should be ignored for preparation of Branch Account.

(iv) Shortage or Surplus of Stock The Branch Account is debited with the opening balance of branch stock and credited with its closing balance. At the time of calculating closing balance of branch stock, shortage/surplus is taken into consideration. Therefore, it should be ignored for preparation of Branch Account.

(v) Profit/Loss on Sale of a Fixed Asset If an asset is sold for cash, the Branch Account is credited with the remittances. If it is sold on credit, the Branch Account will be credited with the Debtor for sale of asset. The profit/loss on sale of asset is already included in the remittance/debtors figure. Therefore, at the time of preparing Branch Account, profit/loss on sale of asset should not be shown separately.

(vi) Purchases by Branch The Branch Account is debited with the amount of remittance from head office. Therefore, any direct purchase by branch should not be shown separately in the Branch Account.

Illustration 1

From the following information relating to the Calcutta Branch for the year ending 31st March, 2015, prepare the Branch Account in the books of head office.

Opening balances on 1.4.2014 :	₹	Cheque sent to Branch:	₹
Stock at Branch	37,500	Salaries	22,500
Debtors at Branch	75,000	Rent & Taxes	3,750
Petty cash at Branch	750	Petty Cash	2,750
Goods Sent to Branch	6,30,000	Closing balances on 31.3.2015:	
Cash sales	1,50,000	Stock at Branch	62,500
Cash received from Debtors	5,25,000	Debtors at Branch	1,20,000
Goods returned by Branch	5,000	Petty Cash at Branch	500
Credit sales	5,70,000		

Solution

In the books of Head Office

Dr. Calcutta Branch Account Cr.

Date	Particulars	₹	Date	Particulars	₹
2014 Apr. 1	To Balance b/d:		2015 Mar. 31	By Goods Sent to Branch A/c (Returns)	5,000
	Stock	37,500		By Bank A/c:	
	Debtors	75,000		Cash sales	1,50,000
	Petty Cash	750		Cash received from Debtors	5,25,000
2015 Mar. 31	To Goods Sent to Branch A/c:	6,30,000		By Balance c/d:	
	To Bank A/c:			Stock	62,500
	Salaries	22,500		Debtors	1,20,000
	Rent & Taxes	3,750		Petty Cash	500
	Petty Cash	2,750			
	To General profit & Loss A/c	90,750			
		8,63,000			8,63,000

Tutorial Note: Under this method, credit sales and petty expenses are to be ignored.

The students should note that the Branch Account is a Nominal Account in nature and is peculiar in the sense that profit is ascertained here by applying the Balance Sheet approach of income determination.

We know that the difference between assets and liabilities represents capital and can be ascertained either by deducting liabilities from assets or by showing the assets and liabilities on the two sides of the same account.

Recording opening and closing assets and liabilities in the two sides of the Branch Account represents opening and closing capital of the head office in the branch.

Now, if we consider goods sent to the branch and other amounts remitted as further capital introduced into the branch, and likewise, return of goods, and receipts from debtors or cash sales as capital withdrawn from the branch, it resembles determination of profit by the networth method under single entry system. The Branch Account exhibits the profit or loss for an accounting period as well as the net assets lying with the branch.

Illustration 2

From the following particulars, prepare Branch Account in the books of the head office assuming that the sales at branch are on cash basis. (all figures are in ₹)

Opening stock at the branch	30,000	Expenses met by head office:	
Goods sent to branch	90,000	Salaries	10,000
Cash sales	1,20,000	Other expenses	4,000

Closing stock could not be ascertained, but it is known that the branch usually sells at cost plus 20%. The branch manager is entitled to a commission of 5% on the profit of the branch before charging such commission.

Solution **In the books of the Head Office**

Dr. **Branch Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Balance b/d:			By Bank A/c:	
	Stock	30,000		Cash sales	1,20,000
	To Goods Sent to Branch A/c	90,000		By Balance c/d:	
	To Bank A/c:			Stock (Note 1)	20,000
	Salaries	10,000			
	Other expenses	4,000			
	To Balance c/d:				
	Manager's commission (Note 2)	300			
	To General Profit & Loss A/c	5,700			
		1,40,000			1,40,000

(1) Calculation of Closing Stock

	₹
Opening stock	30,000
Goods sent to branch (at cost)	90,000
	1,20,000
Less: Cost of goods sold (₹ 1,20,000 x 100/120)	1,00,000
	20,000

(2) Profit before commission is ₹ (1,20,000 + 20,000) – ₹ (30,000 + 90,000 + 10,000 + 4,000) = ₹ 6,000. Manager's commission is payable @ 5%. So commission is ₹ 6,000 x 5/100 = ₹ 300. Manager's commission is still payable, and, therefore, is a liability for the business at the end of the accounting period.

Illustration 3

X of Calcutta has a branch at Bombay. Goods are supplied to the branch at cost. The expenses of the branch are paid from Calcutta and the branch keeps a sales journal and the debtors ledger only. From the following information supplied by the branch, prepare a Branch Account in the books of the head office. (all figures in ₹)

Opening stock (1.4.2014)	24,000	Sundry Debtors on 31.3.2015	9,160
Closing stock (31.3.2015)	18,000	Goods received from H.O.	33,600
Credit sales	41,000	Expenses paid by H.O. for the Branch	10,400
Cash sales	17,500	Pilferage of goods by the employees	2,000
Receipt from Debtors	37,900		

Solution — **In the books of the Head Office (Calcutta)**

Dr. Bombay Branch Account Cr.

2014 Apr. 1	To Balance b/d:		2015 Mar. 31	By Bank A/c:	
	Stock	24,000		Cash sales	17,500
	Debtors (Note 1)	6,060		Received from Debtors	37,900
2015 Mar. 31	To Bank A/c: (expenses)	10,400		By Balance c/d:	
	To Goods Sent to Branch A/c	33,600		Stock	18,000
	To General Profit & Loss A/c	8,500		Debtors	9,160
		82,560			82,560

Tutorial Note : **(1)** In this problem, the opening balance of debtors has not been given. Memorandum Branch Debtors Account is prepared below for finding out the opening balance of debtors.

Dr. Memorandum Branch Debtors Account Cr.

Particulars	₹	Particulars	₹
To Balance b/d (balancing figure)	6,060	By Cash	37,900
To Sales (credit)	41,000	By Balance c/d	9,160
	47,060		47,060

(2) Pilferage of goods by the employees is very common to all businesses. So, it should be treated as a normal event. In the Branch Account, pilferage is to be ignored.

Illustration 4

From the following details regarding West Coast Branch of Bombay Trading Co., prepare a Branch Account in respect of the year 2014: (all figures in ₹)

Stock on 1.1.2014	12,000	Returns to head office	4,800
Stock on 31.12.2014	9,600	Bad debts	600
Debtors on 1.1.2014	10,000	Discounts allowed	310
Debtors on 31.12.2014	11,500	Returns from customers	3,000
Goods sent to branch during 2014	42,000	Expenses paid by head office:	
Cash sales	25,800	Salaries and wages	8,400
Credit sales	36,000	Rent (from 1.1.2014 to 31.3.2015)	5,250
Normal loss	2,000	Sundry expenses	3,600

Solution — **In the books of Bombay Trading Co.**

Dr. West Coast Branch Account Cr.

Date	Particulars	₹	Date	Particulars	₹
2014 Jan.1	To Balance b/d:		2014 Dec. 31	By Goods Sent to Branch A/c (Returns)	4,800
	Stock	12,000		By Bank A/c:	
	Debtors	10,000		Cash sales	25,800
Dec. 31	To Goods Sent to Branch A/c	42,000		Collection from debtors (Note 2)	30,590
	To Bank A/c:			By Balance c/d:	
	Salaries & wages	8,400		Stock	9,600
	Rent	5,250		Debtors	11,500
	Sundry expenses	3,600		Prepaid Rent (Note 3)	1,050
	To General Profit & Loss A/c	2,090			
		83,340			83,340

Tutorial Notes:

(1) Under this method, normal loss, credit sales, sales returns, bad debts, discount allowed to debtors, etc., are to be ignored.

(2) The amount of cash received from debtors is not given. It has been found out by preparing Memorandum Debtors Account as follows:

Dr. Memorandum Branch Debtors Account Cr.

Particulars	₹	Particulars	₹
To Balance b/d	10,000	By Bad Debts	600
To Sales (credit)	36,000	By Discount allowed	310
		By Returns inward	3,000
		By Bank (Balancing figure)	30,590
		By Balance c/d	11,500
	46,000		46,000

(3) Pre-paid Rent = ₹ 5,250/15 x 3 = ₹ 1,050.

Illustration 5

The head office of a company invoices goods to its Shillong Branch at cost, who also purchases goods independently from local parties for which payments are made by the head office. All the cash collected by the Branch is banked on the same day to the credit of the head office and all expenses are directly paid by the head office except for a Petty Cash Account maintained by the branch for which periodical transfers are made from the head office.

From the following particulars, show the Branch Account as maintained in the head office books, reflecting the branch profit for the year ending 31.12.2014 :

Imprest Cash : 1.1.2014	2,000	Returns from Customers	3,000
Imprest Cash : 31.12.2014	1,850	Goods sent to Branch from H.O.:	50,000
Sundry Debtors on 1.1.2014	25,000	Transfer from H.O. for petty cash expenses	2,500
Stock on 1.1.2014		Bad debts	1,000
Transferred from H.O.	20,000	Discount to customers	2,000
Directly purchased by Branch	16,000	Cash received from customers	1,25,000
Shortage of stock	4,000	Branch Expenses	30,000
Cash Sales	45,000	Stock on 31.12.2014:	
Credit Sales	1,30,000	Transferred from H.O.	15,000
Direct Purchases	45,000	Directly purchased by Branch	12,000

		5,81,650			5,81,650

Balance Sheet of Head Office [Extract]
As at 31st December, 2014

Liabilities	₹	Assets	₹
Branch Profit	2,10,000	Branch Furniture	10,800
		Branch Stock	38,000
		Branch Debtors	31,900
		Branch Petty Cash	2,650
		Branch Prepaid Fire Insurance	400

Working Notes :

Dr. (1) Memorandum Branch Debtors Account Cr.

Particulars	₹	Particulars	₹
To Balance b/d	14,000	By Bank ₹ (1,35,000 + 22,000)	1,57,000
To Sales	1,83,000	By Discount allowed	1,100
		By Returns	7,000
		By Balance c/d	31,900
	1,97,000		1,97,000

Dr. (2) Branch Petty Cash Account Cr.

Particulars	₹	Particulars	₹
To Balance b/d	1,500	By Petty expenses	2,850
To Bank	4,000	By Balance c/d	2,650
	5,500		5,500

(3) Value of furniture after depreciation will be = ₹ 12,000 – ₹ 1,200 = ₹ 10,800.

(4) Prepaid insurance = ₹ 1,600/12 x 3 = ₹ 400.

(5) The Branch Account is prepared to know the correct profit of the branch without being affected by any abnormal loss. Here, goods lost by fire is an abnormal event. Therefore, abnormal is to be debited to General Profit and Loss Account and credited to Branch Account.

Illustration 8

A company with its head office at Bombay has a branch at Calcutta. The branch receives all goods from head office, who also remits cash for all expenses. Sales are made by the branch on credit as well as for cash.

Total sales by the branch for the year ending 31.3.2015 amounted to ₹ 5,60,000 out of which 20% is cash sales. The following further information is relevant:

1.4.2014: Stock — ₹ 25,000; Debtors — ₹ 60,000; Cash — ₹ 120

31.3.2015: Stock — ₹ 36,000; Debtors — ₹ 48,000; Cash — ₹ 180.

Expenses incurred by the branch: Salaries — ₹ 36,000; Rent — ₹ 12,000; Petty expenses — ₹ 5,600.

All sales are made by the branch at cost plus 25%.

You are required to prepare the Calcutta Branch Account in the books of the head office for the year ended 31st March, 2015.

Solution

Sonali Chain Stores of Calcutta has a branch in Burdwan. Goods are sent to branch at cost. Branch sells only goods received from head office. Branch sales are partly cash and partly credit. All cash collected by branch are sent to head office immediately and branch expenses are paid by head office. Following are the details of transactions relating to branch for the year ended on 31st December, 2014 (all figures in ₹) :

Stock at branch on 1.1.2014	6,800	Returns by branch customers	500
Debtors at branch on 1.1.2014	7,000	Cash received on Ledger Account	33,000
Goods in transit on 1.1.2014	4,800	Branch salary and wages paid by H.O.	6,700
Goods sent to branch during the year	78,600	Branch sundry expenses paid by H.O.	800
Goods received by branch during the year	74,800	Branch outstanding salary	1,200
Goods returned by branch	2,000	Branch prepaid wages	500
Returned goods received by H.O. during the year	1,600	Bad debts written-off	200
Cash sales at branch during the year	54,000	Wastage of stock at branch	400
Credit sales at branch during the year	35,500		

Other particulars are given below:

(a) Goods-in-transit ₹ 4,800 included goods costing ₹ 3,200 sent by H.O. to branch and goods costing ₹ 1,600 returned by branch to H.O. in previous year.

(b) During this year cash ₹ 5,000 sent by branch to H.O. on 27.12.2014 which is received by H.O. on 3.1.2015.

(c) Branch maintains a steady gross profit @ 20% on sales.

Show Branch Account in the books of head office to record the above transactions.

Solution **In the books of Sonali Chain Stores**

Dr. Burdwan Branch Account Cr.

Date	Particulars	₹	Date	Particulars	₹
2014 Jan. 1	To Balance b/d:		2014 Dec. 31	By Bank A/c (Note 1)	
	Stock at branch	6,800		Amount received from branch	82,000
	Goods-in-transit to branch	3,200		By Goods Sent to Branch A/c	1,600
	Goods-in-transit from branch	1,600		(Goods returned by branch)	
	Debtors	7,000		By Balance c/d:	
Dec. 31	To Goods Sent to Branch A/c	78,600		Stock at branch (Note 2)	8,000
	To Bank A/c:			Goods-in-transit to branch (Note 3)	7,000
	Branch Salaries & Wages	6,700		Goods-in-transit from br. (Note 4)	2,000
	Sundry expenses	800		Debtors (Note 5)	8,800
	To Balance c/d (Outstanding salaries)	1,200		Prepaid wages	500
	To General Profit & Loss A/c	9,000		Cash in transit (given)	5,000
		1,14,900			1,14,900

Tutorial Note: (1) Profit from branch can be verified with the help of the following statement:

Dr. Supplementary Verification Statement of Profit for Branch Cr.

Particulars		₹	Particulars	₹
To Sundry expenses		800	By Gross Profit	
To Salaries & Wages	6,700		(Being 20% on net sales of (₹ 54,000 + 35,500 – 500)	17,800
Add: Outstanding	1,200		= 20% of ₹ 89,000	
	7,900			
Less: Prepaid	500	7,400		
To Bad debts		200		
To Wastage of goods		400		
To Profit (Balancing figure)		9,000		
		17,800		17,800

(2) The wastage of stock has been treated separately and it has been transferred to Profit and Loss Account. If the wastage is treated as normal, then gross profit will go down to ₹ 17,800 – ₹ 400 = ₹ 17,400. This will distrot the 'norms of steady Gross Profit of 20% on sales'. Hence, it has not been treated as normal wastage.

Working Notes: **(1)** Amount remitted by branch = ₹ 54,000 (cash sales) + ₹ 33,000 (collection from debtors) = ₹ 87,000 less ₹ 5,000 (cash in transit from branch on closing date) = ₹ 82,000.

(2) Closing Stock at Branch

This can be ascertained by considering only the physical movement (actual) of stock to and from branch as follows:

		₹
Opening stock at branch		6,800
Goods received from H.O.		74,800
Total		81,600
Less: Returned to H.O.		2,000
		79,600
Less: Goods physically leaving the branch:		
Credit sales	35,500	
Less returns	500	
Net credit sales	35,000	
Cash sales	54,000	
Total sales	89,000	
Less: Gross Profit 20%	17,800	
Cost of goods sold		71,200
		8,400
Less: Wastage		400
Closing stock (physical) at branch		8,000

(3) Closing Goods-in-Transit to Branch	₹
Opening goods-in-transit to branch	3,200
Add: Goods sent by H.O.	78,600
Total goods travelling towards branch	81,800
Less: Goods actually received by branch	74,800
Closing goods-in-transit to branch (from H.O.)	7,000

(4) Closing goods in transit from Branch	₹
Opening goods-in-transit from branch	1,600
Add: Goods sent to H.O.	2,000
	3,600
Less: Goods received by H.O.	1,600
Closing goods in transit from branch (to H.O.)	2,000

Dr. Branch Debtors Account Cr.

Particulars	₹	Particulars	₹
To Balance b/d	7,000	By Bank (collection)	33,000
To Sales (credit)	35,500	By Returns	500
		By Bad debts	200
		By Balance c/d (Balancing figure)	8,800
	42,500		42,500

Invoice Price Method : Sometimes, the head office may prefer to send goods to the branch at a higher price than cost (termed as invoice price). Method of sending goods at invoice price is excellent from the point of view of stock control. As the goods are invoiced at selling price, the head office can dictate pricing policy to its branches, as well as save work at the branch because prices have already been decided. Invoicing at selling price is generally done where goods are of standard type, pre-packed and unlikely to fluctuate in price. Where head office has little control over selling prices (as for example, with perishable goods like fruits, fish, milk, etc.) the most suitable method is that of invoicing at cost price. In addition, goods may be invoiced at selling price to keep the margin of profit a secret from the branch manager.

The method of preparation of Branch Account is the same as in the cost price method, excepting that all journal entries relating to the goods (opening stock, goods sent to branch, goods returned to head office and closing stock) are made at invoice price and proper adjustments for loading (difference between cost price and invoice price) are made at the end of the accounting period by passing some additional entries.

Journal Entries

1. For 'opening balances of assets' at the branch

Branch Account	Dr.	
To (Individual) Branch Assets Account		[Opening stock at invoice price]

2. For 'opening balances of liabilities' at the branch

Illustration 10

Relax Ltd. supply goods to its New Delhi branch at cost plus 25%. All cash sales at branch are daily remitted to the head office, and the latter directly pays all the branch expenses. From the following particulars, show by Debtors System the result of the branch operations for the year ended December 31, 2014 :

	₹		₹
Stock at branch 1.1.2014 (invoice price)	3,000	Cash paid by H.O. for rent & rates	600
Goods sent to branch (invoice price)	24,000	Cash paid by H.O. for sundry expenses	2,000
Remittances from the branch	25,000	Returns from the branch (invoice price)	150
Cash paid by H.O. for salaries & wages	1,900	Stock at branch on 31.12.2014 (invoice price)	8,000

Solution **In the books of the Relax Ltd. (H.O.)**

Dr. **New Delhi Branch Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014 Jan. 1	To Balance b/d:		2014 Dec. 31	By Bank A/c (Remitances)	25,000
	Stock	3,000		By Stock Reserve A/c (Note 1)	600
Dec. 31	To Goods Sent to Branch A/c	24,000		By Goods Sent to Branch A/c	
	To Bank A/c:			(Returns)	150
	Salaries & wages	1,900		By Goods Sent to Branch A/c (Note 2)	4,770
	Rent & rates	600		By Balance c/d:	
	Sundry expenses	2,000		Stock	8,000
	To Stock Reserve A/c (Note 3)	1,600			
	To General Profit & Loss A/c	5,420			
		38,520			38,520

Working Notes:

(1) Loading on opening stock

Loading is 25% on cost but the given data are related to invoice price. Thus, if cost is ₹ 100, the invoice price will be ₹ (100 + 25) = ₹ 125. Hence, loading on invoice price = 25/125 = 1/5 or 20%. Therefore, loading on opening stock will be ₹ 3,000 x 1/5 = ₹ 600.

(2) Loading on Goods sent : Total goods sent , ₹ 24,000. Goods returned by branch at invoice price = ₹ 150. The loading on net goods sent will be ₹ 23,850 x 1/5 = ₹ 4,770.

(3) Loading on closing stock = ₹ 8,000 x 1/5 = ₹ 1,600.

Illustration 11

S. P. who carried on a retail business, opened a branch X on 1.1.2015 where all sales were on credit basis. All goods required by the branch were supplied from the head office and were invoiced to the branch at 10% above cost. The following were the transactions (all figures are in ₹) :

	Jan 2015	Feb 2015	Mar 2015
Goods sent to branch (purchase price)	40,000	50,000	60,000
Sales as shown by the branch monthly report	38,000	42,000	55,000
Cash received from debtors and remitted to head office	20,000	51,000	35,000
Returns to head office (invoice price to branch)	1,200	600	2,400

The stock of goods held by the branch on 31.3.2015 amounted to ₹ 53,400 at invoice price to branch. Record these transactions in the head office books, showing balances as on 31.3.2015 and the branch gross profit for the three months ended on that date. All working should be part of your answer.

Solution

In the books of S.P. (H.O.)

Mr. X has a branch in Calcutta. He invoices goods to the branch at selling price which is cost plus $33^1/_3$%. From the following particulars prepare Branch Account and Goods Sent to Branch Account in the books of Mr. X (all figures in ₹)

Stock on 1st January 2014 (invoice price)	15,000	Discount allowed to customers	300
Debtors on 1st January 2014	11,400	Bad debt written-off	250
Goods sent to branch at invoice price	67,000	Cheque sent to branch:	
Cash sales	31,000	Salaries	5,000
Credit sales	37,400	Sundry expenses	1,700
Cash received from debtors	40,000	Stock on 31st December 2014 (invoice price)	13,400

Solution

In the books of Mr. X (H.O.)

Calcutta Branch Account

Dr. **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014 Jan. 1	To Balance b/d:		2014 Dec. 31	By Bank A/c:	
	Stock	15,000		Cash sales	31,000
	Debtors	11,400		Cash received from Debtors	40,000
Dec. 31	To Goods Sent to Branch A/c	67,000		By Stock Reserve A/c (Note 2)	3,750
	To Bank A/c :			By Goods Sent to Branch A/c (Note 3)	16,750
	Salaries	5,000		By Balance c/d:	
	Sundry expenses	1,700		Stock	13,400
	To Stock Reserve A/c (Note 4)	3,350		Debtors (Note 1)	8,250
	To General Profit & Loss A/c	9,700			
		1,13,150			1,13,150

Goods Sent to Branch Account

Dr. **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014 Dec. 31	To Calcutta Branch A/c (Loading)	16,750	?	By Calcutta Branch A/c	67,000
?	To Purchases A/c (Note 2)	50,250			
		67,000			67,000

Working Notes:

Dr. **(1) Memorandum Branch Debtors Account** **Cr.**

Particulars	₹	Particulars	₹
To Balance b/d	11,400	By Discount allowed	300
To Sales (credit)	37,400	By Bad debts	250
		By Bank	40,000
		By Balance c/d	8,250
	48,800		48,800

(2) Loading on Opening Stock

Loading is $33^1/_3$ % on cost but the given data relates to invoice price. Thus, if cost is ₹ 100, the invoice price will be ₹ $(100 + 33^1/_3)$ or ₹ $133^1/_3$. Hence, loading on invoice price = $33^1/_3$ / $133^1/_3$ = 1/4 or 25%.

Therefore, loading on opening stock will be ₹ 15,000 x 1/4 = ₹ 3,750.

(3) Loading on goods sent to Branch = ₹ 67,000 x 1/4 = ₹ 16,750.

(4) Loading on closing stock = ₹ 13,400 x 1/4 = ₹ 3,350.

Illustration 13

A head office in Patna has two branches at Madras and Delhi. Goods are consigned to them at loaded figures of 10% and 20% on cost respectively. During the year, the invoices to the branches are ₹ 44,000 and ₹ 60,000 respectively.

Included in the item ₹ 44,000 are invoices for goods costing ₹ 12,000 and invoices to the Madras branch at ₹ 13,200 which should have been invoiced to the Delhi branch. Sales are all for cash, with that of Madras branch, being ₹ 22,000 and of Delhi branch ₹ 50,400. It may be assumed that the closing stocks are correct.

You are required to prepare: (i) Madras Branch Account, and (ii) Delhi Branch Account.

Solution **In the books of the Head Office (Patna)**

Dr. **Branch Account** **Cr.**

Date	Particulars	Madras	Delhi	Date	Particulars	Madras	Delhi
	To Goods Sent to Branch A/c (Note 1)	30,800	74,400		By Goods Sent to Branch A/c (Note 2)	2,800	12,400
	To Stock Reserve A/c	800	4,000		By Bank A/c (Sales)	22,000	50,400
	To Profit & Loss A/c	2,000	8,400		By Balance c/d : Stock (Note 3)	8,800	24,000
		33,600	86,800			33,600	86,800

Working Notes:

(1) Net goods sent to Madras branch = ₹ 44,000 – ₹ 13,200 = ₹ 30,800.

Net goods sent to Delhi branch = ₹ 60,000 + (₹ 12,000 x 120/100) = ₹ 60,000 + ₹ 14,400 = ₹ 74,400.

(2) Loading on goods sent = Madras : 1/11 x ₹ 30,800 = ₹ 2,800; Delhi : 1/6 x ₹ 74,400 = ₹ 12,400.

(3) Value of Closing Stock at Invoice Price

	Madras (₹)	Delhi (₹)
Invoice price of goods sent	30,800	74,400
Less: Goods sold	22,000	50,400
	8,800	24,000

Illustration 14

S Ltd. maintains a branch at Calcutta to which it sends goods at cost plus 25%. Calcutta branch sells goods both in cash and on credit. All collections and cash sales are directly deposited to head office Bank Account and all expenses are paid by the head office directly. From the following information, prepare Calcutta Branch Account in the books of head office:

Balances on 1.4.2014:	₹	Cash sales	30,000
Branch stock at invoice price	30,000	Bad debts	2,000
Branch debtors	40,000	Discount allowed	3,000
Transactions during the year:		Abnormal loss of goods at invoice price	8,000
Goods sent to branch at cost	1,40,000	Cheque sent by head office to branch :	
Goods returned by branch at invoice price	10,000	Rent : ₹ 4,000; Salaries : ₹ 6,000; Petty expenses : ₹ 2,000	
Goods returned by debtors to branch	3,000	Balances on 31.3.2015:	
Credit sales	1,20,000	Debtors : ₹ 45,000; Stock at invoice price : ₹ 40,000; Outstanding rent : ₹ 1,000	

Solution

In the books of S. Ltd.

Dr. Calcutta Branch Account Cr.

Date	Particulars	₹	Date	Particulars	₹
2014 Apr. 1	To Balance b/d:		2015 Mar. 31	By Stock Reserve A/c (Note 1)	6,000
	Stock	30,000		By Goods Sent to Branch A/c (Returns)	10,000
	Debtors	40,000		By Goods Sent to Branch A/c (Note 3)	33,000
2015 Mar. 31	To Goods Sent to Branch A/c (Note 2)	1,75,000		By Bank A/c:	
	To Bank A/c:			Cash sales	30,000
	Rent	4,000		Collection from Debtors (Note 4)	1,07,000
	Salaries	6,000		By Abnormal Loss A/c (Note 6)	8,000
	Petty expenses	2,000		By Balance c/d:	
	To Abnormal Loss A/c (Note 6)	1,600		Debtors	45,000
	To Stock Reserve A/c	8,000		Stock	40,000
	To Balance c/d:				
	Outstanding Rent	1,000			
	To General Profit & Loss A/c	11,400			
		2,79,000			2,79,000

Working Notes:

(1) Loading on opening stock

Loading is 25% on cost but the given data are related to invoice price. Thus, if cost is ₹ 100, the invoice price will be ₹ (100 + 25) = ₹ 125. Hence, loading on invoice price = 25/125 = 1/5 or 20%. Therefore, loading on opening stock = 30,000 x 1/5 = ₹ 6,000.

(2) Invoice prices of goods sent = ₹ 1,40,000 + 25% of ₹ 1,40,000 = ₹ 1,40,000 + ₹ 35,000 = ₹ 1,75,000.

(3) Loading on net goods sent

Total goods sent, ₹ 1,75,000. Goods returned by branch at invoice price, ₹ 10,000. The loading on net goods sent is 1/5 x ₹ 1,65,000 = ₹ 33,000.

Dr. (4) Memorandum Branch Debtors Account Cr.

Particulars	₹	Particulars	₹
To Balance b/d	40,000	By Returns	3,000
To Sales (credit)	1,20,000	By Bad debts	2,000
		By Discount allowed	3,000
		By Bank (Balancing figure)	1,07,000
		By Balance c/d	45,000
	1,60,000		1,60,000

(5) Under this method, credit sales, sales returns, bad debts, discount allowed to debtors, etc. are to be ignored.

(6) Branch Account is prepared to know the correct profit of the branch without being affected by any abnormal loss. Here, abnormal loss at invoice price = ₹ 8,000. To calculate correct profit, ₹ 8,000 is to be credited to Branch Account and loading on such loss of ₹ 1,600 is to be debited to Branch Account. The cost of goods loss ₹ 8,000 – ₹ 1,600 = ₹ 6,400 is to be charged to General Profit and Loss Account.

Stock and Debtors System

Stock and Debtors system is generally used when the goods are sent to the branch at an invoice price and the size of the branch is large. Under this system, the branch maintains a few central accounts to exercise greater control over the branch stock and other related expenses. These accounts usually are: (i) Branch Stock Account; (ii) Branch Debtors Account; (iii) Goods Sent to Branch Account; (iv) Branch Adjustment Account; (v) Branch Cash Account; (vi) Branch Expenses Account; (vii) Branch Profit and Loss Account; and (viii) Branch Fixed Assets Account. The nature and functions of different accounts are given below:

Branch Stock Account : Branch Stock Account is a practical means of controlling stock at branch. This account records the transactions in regard to the stock in the branch at ***invoice price***. The debit side of this account records the inflow of stock into the branch and credit side records its outflow from the branch.

The Branch Stock Account is opened with the opening value of stock at branch and in transit (at invoice price) and debited with the invoice value of goods sent to branch and goods returned by the customers.

This account is credited with the sales (cash and credit) and goods returned to the head office (at invoice price). Ultimately, this account is credited with the closing stock of the branch at invoice price. Sometimes, it is also credited with goods in transit at the end of the year (at invoice price).

Since this account is a statement showing the reconciliation of stock, both the sides should tally and, in effect, this account cannot have any balance. But, this is only a theoretical view. In practice, there are often slight differences — usually deficiencies. For example, it is practically impossible to weigh up exactly 100 separate kg. of butter from one quintal butter slab. In some cases, there may be a surplus for different reasons such as, sale of goods above invoice price and absorption of moisture (in case of sugar, fertiliser, etc.)

In practice, it is usual to make certain allowances in respect of such unavoidable differences. If it is more than normal allowance, enquiries should be made as to the causes of the difference. Shortage/deficiency is recorded on the credit side and surplus is recorded on the debit side.

Important features of Branch Stock Account are as under:

(i) It controls branch stock.
(ii) It is maintained at invoice price.
(iii) Actual stock with the branch is shown as the balance in this account.

The ruling of the Branch Stock Account is given below:

Dr. **Branch Stock Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014 Jan. 1	To Balance b/d:		2014 Dec. 31	By Goods Sent to Branch A/c)	
	at branch			(Returns to H.O.	
	in-transit			By Bank A/c (Cash sales)	
Dec. 31	To Goods Sent to Branch A/c			By Branch Debtors A/c (Credit sales)	
	To Branch Debtors A/c:			By Abnormal Loss by Fire A/c	
	(Returned by customers)			By Shortage in Stock (if any)	
Dec. 31	To Surplus in Stock A/c (if any)			By Balance c/d:	
				at branch	
				in-transit	
2015 Jan. 1	To Balance b/d:				
	at branch				
	in-transit				

Branch Debtors Account : Branch Debtors Account is maintained when the branch is allowed to sell goods on credit. It is used to exercise control over branch debtors. This account records transactions with the branch debtors and is prepared like any Sundry Debtors Account. Opening balance of branch debtors is brought down on the debit side of this account and this account is debited with credit sales at the branch. It is credited with the cash received, discount allowed, sales returns, bad debts, bills receivable, etc. The balance of this account represents the closing balance of debtors.

Dr. **Branch Debtors Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014 Jan. 1	To Balance b/d:		2014 Dec. 31	By Bank A/c (Collection)

				By Balance c/d:	
2015 Jan. 1	To Balance b/d:				

Goods Sent to Branch Account : Goods Sent to Branch Account is credited with the invoice price of goods sent to the branch by the head office and transferred from other branches and debited with the invoice price of the goods returned/transferred by the branch. This account is also debited with loading on net goods sent to the branch. The balancing figure on the debit side represents the cost of the net goods sent to the branch which is adjusted against Purchase/Trading Account by the head office. This account cannot have any opening or closing balance.

Dr. **Goods Sent to Branch Account** **Cr.**

	To Branch Adjustment A/c (Loading) To Purcahses/Trading A/c*				

* For a trader — Purchases Account and for a manufacturer — Trading Account (In the Head Office Book).

Branch Cash Account : Branch Cash Account is prepared with a view to exercise control over the branch cash. This account is generally opened where the branch is allowed to hold cash received from debtors and use it for branch expenses and remit the balance to head office after certain interval. Generally for big branch a separate Cash Account is maintained.

This account is debited with the opening balance of cash, the cash remitted by the head office or the branches and the cash collected from the debtors. It is credited with the branch expenses and amount remitted to head office or other branches. The balance of this account represents the closing cash lying with the branch.

Branch Expenses Account : Branch Expenses Account records all branch expenses in cash. In addition, this account is debited with the items like bad debts, discount allowed, depreciation on branch fixed assets, etc. The balance of this account is transferred to Branch Profit and Loss Account and, thereby closed. (When no separate Branch Profit and Loss Account is opened, it is closed by transferring to "Branch Adjustment Account")

Branch (Stock) Adjustment Account : Branch Adjustment Account is prepared with a view to ascertain the gross profit of the branch. This account summarises the profit "loading" on all transactions. This account is credited with the "stock reserve" on opening stock and loading on net goods sent to branch. It is credited with the loading on surplus in stock. This account is debited with the loading on shortage- in-stock; spoilage, pilferage, theft, loss by fire, loss in transit and "stock reserve" on closing stock. The balance of this account is transferred to Branch Profit and Loss Account.

Dr. **Branch (Stock) Adjustment Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014 Dec.31	To Shortage in Stock A/c (Loading) To Loss by Fire A/c (Loading) To Loss in transit A/c (Loading) To Loss by Theft A/c (Loading) To Pilferage A/c (Loading) To Stock Reserve A/c* (Loading on closing stock) To Gross Profit c/d		2014 Dec. 31	By Stock Reserve A/c* (Loading on opening stock) By Goods Sent to Branch A/c (Loading on net goods sent) By Surplus in Stock A/c (Loading on surplus) By Gross Loss c/d	

* It may be shown as **By Balance b/d** and **To Balance c/d**.

Branch Profit and Loss Account : Branch Profit and Loss Account is prepared to ascertain the net profit or loss of the branch. This account is credited with the gross profit as ascertained from the Branch Adjustment Account and cost of surplus in stock. This account is debited with the branch expenses and cost of shortage in stock, pilferage, theft, etc. If the credit side is more, it represents net profit, and it is net loss when the debit side is more.

The students should note that the branch profit should not be affected by the abnormal events beyond the control of the branch such as loss by fire, loss in transit etc. The cost of such goods should be charged to General Profit and Loss Account instead of Branch Profit and Loss Account to calculate the correct profit of the branch.

If the nature of the loss is normal (such as spoilage, pilferage, theft, etc.) and if it can be identified with the branch, the cost of such goods should be charged to Branch Profit and Loss Account.

Dr. **Branch Profit and Loss Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014 Dec.31	To Branch Expenses A/c To Loss by Theft A/c (Cost) To Shortage in Stock A/c (Cost) To Pilferage A/c (Cost) To General Profit & Loss A/c		2014 Dec. 31	By Gross Profit b/d By Surplus in Stock A/c (Cost)	

Sometimes, a separate Branch Profit and Loss Account is not opened. In that situation, the Branch Adjustment Account will show net profit/loss of the branch. In this case, branch expenses, pilferage (cost + loading), theft (cost + loading), and shortage in stock (cost + loading) are charged to Branch Adjustment Account. Similarly, surplus in stock (cost + loading) is credited to Branch Adjustment Account.

Branch Fixed Assets Account : The head office may maintain separate asset accounts for each fixed asset. This account is debited with the opening value of asset and purchase of an asset, if any. This account is credited with the depreciation provided on the asset. The balance of the account represents the closing value of the asset.

Treatment of Some Typical Items

Normal loss : No treatment is required even if it is given specifically in the examination problem. However, for calculating Branch Closing Stock (when it is not given) normal loss is credited to Branch Stock Account at invoice price. Normal Loss Account is closed by debiting to Branch Adjustment Account.

Pilferage/Theft : In retail trade, pilferage or shoplifting is very common and this has come to be regarded as a normal business loss. The loading of such goods is charged to Branch Adjustment Account and cost is charged to Branch Profit and Loss Account.

Shortage in stock : Shortage in stock may be due to spoilage, leakage, sales in small quantity, etc. Loading on shortage in stock should be charged to Branch Adjustment Account and cost of such goods should be charged to Branch Profit and Loss Account.

Surplus in stock : Loading on surplus in stock is credited to Branch Adjustment Account and cost of such goods is credited to Branch Profit and Loss Account.

Loss by fire/loss-in-transit : Loading on goods lost by fire/in-transit should be charged to Branch Adjustment Account and the cost of such goods should be charged to **General Profit and Loss Account**.

Students should note that the branch profit should not be affected by the abnormal items. Some authors prefer to charge the cost of the goods lost by fire to Branch Profit and Loss Account. But, in our opinion, this practice should not be encouraged because heavy loss due to fire by converting branch profit into branch loss may mislead the management at the time of decision-making.

Inter-branch transfer of goods : Sometimes goods may be transferred by one branch to another branch. At the time of making entry for transferring branch, it should be treated as a transfer to head office (though the goods is actually transferred to a particular branch). Similarly, for receiving branch it will be treated as received from head office.

For the transferring branch, the entry will be:
Goods Sent to Branch Account Dr. [Invoice Price]
To Branch Stock Account

For the receiving branch, the entry will be:
Branch Stock Account Dr. [Invoice Price]
To Goods Sent to Branch Account

Illustration 15

On 1st January, 2014 goods costing ₹ 1,32,000 were invoiced by Madras head office to its new branch at Delhi and charged at selling price to produce a gross profit of 25% on the selling price.

At the end of the year, the return from Delhi Branch showed that the credit sales were ₹ 1,50,000.

Goods invoiced at ₹ 2,000 to Delhi branch have been returned to Madras head office.

The closing stock at Delhi branch was ₹ 24,000 at selling price.

Record the above transactions in the

(i) Delhi Branch Stock Account;
(ii) Goods Sent to Delhi Branch Account;
(iii) Delhi Branch Adjustment Account; and,
(iv) Delhi Branch Debtors Account in the head office book and close the said accounts on 31st December, 2014.

Solution **In the books of the Head Office, Madras**

Dr. **Delhi Branch Stock Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014 Dec. 31	To Stock Reserve A/c (Note 2)	6,000	2014 Dec. 31	By Goods Sent to Delhi Branch A/c (Note 1)	43,500
	To General Profit & Loss A/c	37,500			
		43,500			43,500

Working Notes:

(1) Total goods sent to Delhi branch at selling price is ₹ 1,76,000. Goods returned to head office at selling price is ₹ 2,000. Net goods sent is ₹ 1,74,000. Loading @ 25% on selling price = 25% of ₹ 1,74,000 = ₹ 43,500.

(2) Value of closing stock at selling price = ₹ 24,000. Loading on closing stock = 25% of ₹ 24,000 = ₹ 6,000.

(3) When no separate Branch Profit and Loss Account is prepared, the Branch Adjustment Account will disclose the branch profit.

Illustration 16

On January 1, 2014, the goods invoiced by Calcutta head office of a trader to its Madras branch were ₹ 48,000 at selling price, being $33^{1}/_{3}$ % on cost price. For six months ending June 30, 2014 the branch return showed that the credit sales were ₹ 29,200. The goods invoiced at ₹ 2,000 were returned by the branch to the head office. The closing stock at Madras branch on June 30, 2014 was ₹ 16,800 at selling price.

Record the above transactions, showing the Madras Branch Stock Account, Madras Branch Adjustment Account and the Goods Sent to Branch Account in Calcutta head office books and balance them on June 30, 2014.

Solution **In the books of the Head Office, Calcutta**

Dr. **Madras Branch Stock Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014 Jan. 1	To Goods Sent to Branch A/c	48,000	2014 June 30	By Goods Sent to Branch A/c (Returns)	2,000
				By Branch Debtors A/c	29,200
				By Balance c/d	16,800
		48,000			48,000
July 1	To Balance b/d	16,800			

Dr. **Madras Branch Adjustment Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014 June 30	To Stock Reserve A/c (Note 2)	4,200	2014 June 30	By Goods Sent to Branch A/c (Note 1)	11,500
	To Branch Profit & Loss A/c	7,300			
		11,500			11,500

Dr. **Goods Sent to Branch Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014 June 30	To Branch Stock A/c	2,000	2014 Jan. 1	By Branch Stock A/c	48,000
	To Branch Adjustment A/c (Net loading)	11,500			
	To Purchases A/c (Transfer)	34,500			
		48,000			48,000

Working Notes:

(1) Loading on goods sent (net) : Loading in $33^1/_3$ on cost but the given data are related to invoice price. Thus, if cost is ₹ 100, the invoice price will be (₹ 100 + $33^1/_3$) = ₹ $133^1/_3$. Hence, loading on invoice price = $33^1/_3$ / $133^1/_3$ = 1/4 or 25%. Therefore, loading on net goods sent (after return) = 1/4 (₹ 48,000 – ₹ 2,000) = ₹ 11,500.

(2) Loading on Closing stock = 1/4 x ₹ 16,800 = ₹ 4,200.

Tutorial Note: Where no separate Branch Profit and Loss Account is opened, the Branch Adjustment Account will disclose the branch profit or loss.

Illustration 17

B Ltd of Kanpur has a branch in Ambala. Goods sent to branch are invoiced at selling price, i.e., cost plus $33^1/_3$%. From the following particulars, you are required to prepare the Branch Stock Account and Branch Adjustment Account as they would appear in the head office books.

	₹
Stock on 01.04.2014 at invoice price	15,000
Stock on 31.03.2015 at invoice price	12,000
Goods sent to Ambala during the year at invoice price	1,00,000
Sales at branch :	
On Credit	32,000
For Cash	75,000
Returns to head office at invoice price	5,000
Invoice value of goods lost by fire not covered by Insurance	1,000

Solution

In the books of B Ltd., (H.O.)

Ambala Branch Stock Account

Dr. **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014 Apr 1	To Balance b/d	15,000	2015 Mar 31	By Goods Sent to Branch (Returns)	5,000
2015 Mar 31	To Goods Sent to Branch	1,00,000	"	By Cash A/c (Cash Sales)	75,000
"	To Branch Adjustment A/c (Surplus)	10,000	"	By Branch Debtors A/c (Credit Sales)	32,000
			"	By Goods Lost by Fire A/c (Note 4)	1,000
			"	By Balance c/d	12,000
		1,25,000			1,25,000

Ambala Branch Adjustment Account

Dr. **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2015 Mar 31	To Goods Sent to Branch A/c (Note 3)	1,250	2014 Apr 1	By Stock Reserve A/c (Note 1)	3,750
"	To Goods Lost by Fire A/c (Note 4)	250	2015 Mar 31	By Goods Sent to Branch A/c (Note 2)	25,000
"	To Stock Reserve A/c (Loading on Closing Stock)	3,000	"	By Branch Stock A/c (Surplus) (Note 6)	10,000
"	To General Profit & Loss A/c (Note 5)	34,250			
		38,750			38,750

Working Notes :

(1) Goods are sent at cost + $33^1/_3$%. Therefore, the loading is 25% of Invoice Price. Loading on opening stock = 25% of ₹ 15,000 = ₹ 3,750.

(2) Loading on goods sent = 25% of ₹ 1,00,000 = ₹ 25,000.

(3) Loading on goods returned = 25% of ₹ 5,000 = ₹ 1,250.

(4) Loading on goods lost by fire = 25% of ₹ 1,000 = ₹ 250.

(5) Cost of goods lost by fire (₹ 1,000 – 250) = ₹ 750 should not be charged to Branch as it is an abnormal loss.

(6) No separate Branch Profit and Loss Account has been asked to prepare. Therefore, entire ***surplus*** has been credited to Branch Adjustment Account.

Illustration 18

BT Ltd. sends goods to the Chennai Branch at cost plus 25% on cost. From the following particulars, you are required to show the Branch Stock Account, Branch Stock Adjustment Account and Branch Profit and Loss Account in the head office books:

Opening stock at branch at invoice price	20,000
Goods sent to branch at invoice price	80,000
Loss-in-transit at invoice price	10,000
Pilferage at invoice price	4,000

Sales	1,22,000
Expenses	32,000
Closing stock at branch at invoice price	24,000
Recovered from insurance company against loss-in-transit	6,000

Solution

In the books of BT Ltd., (H.O.)

	To Branch Expenses A/c	32,000		By Chennai Branch Adjustment A/c	24,400
	To General Profit and Loss A/c (Profit)	37,200			
		74,400			72,400

Dr. Surplus in Stock Account Cr.

Particulars	₹	Particulars	₹
To Chennai Branch Adjustment A/c (Note 1)	12,000	By Chennai Branch Stock A/c	60,000
To Chennai Branch Profit & Loss A/c (Note 1)	48,000		
	60,000		60,000

Working Notes :

(1) Surplus in stock represents excess realisation from sales by selling goods above the fixed price (i.e., cost + 25% profit). When Branch Adjustment Account and Branch Profit and Loss Account are prepared separately, loading on surplus is credited to Branch Adjustment Account and the balance of the surplus is credited to Branch Profit and Loss Account. However, when only Branch Adjustment Account is prepared, the entire surplus is credited to Branch Adjustment Account ***(See Illustration 17)***.

(2) Loading on pilferage = 25% of ₹ 4,000 = ₹ 1,000. The loading is charged to Branch Adjustment Account. The cost of goods pilfered ₹ 3,000 (₹ 4,000 – ₹ 1,000), however, is to be charged to Branch Profit and Loss Account. Generally, pilferage is treated as ***normal loss*** and that is why it is charged to Branch Profit and Loss Account [Not General Profit and Loss Account].

(3) Loading on goods lost-in-transit = 25% of ₹ 10,000 = ₹ 2,500. The loading on goods lost-in-transit is charged to Branch Adjustment Account. The net cost of goods lost in transit ₹ 2,000 (Note 4) should be charged to General Profit and Loss Account being abnormal in nature.

Dr. (4) Goods Lost-in-Transit Account Cr.

Date	Particulars	₹	Date	Particulars	₹
2014	To Branch Stock A/c (Returned)	2,400	2014	By Branch Stock A/c	
Dec. 31	To Branch Adjustment A/c (Loading)	23,520	Dec. 31	(Goods Sent to Branch)	1,20,000
	To Purchases A/c	94,080			
		1,20,000			1,20,000

Working Notes :

(1) Stock Reserve on Opening Stock : Loading is 25% of cost, i.e., 20% of invoice price. Therefore, loading on opening stock = 20% of ₹ 12,000 = ₹ **2,400**.

(2) Loading on Goods Sent to Branch : 20% of ₹ 1,17,600 (₹ 1,20,000 – 2,400) = ₹ **23,520**.

(3) Loading on Closing Stock = 20% of ₹ 24,000 = ₹ **4,800**.

Illustration 20

X Ltd. of Calcutta has a branch at Delhi. Goods are invoiced to the branches at cost plus $33^1/_3$%. The branch remits all cash received to the head office and all expenses are paid by the head office. From the following particulars prepare Branch Stock Account, Branch Adjustment Account, Branch Debtors' Account and Branch Profit and Loss Account in the books of the head office (all figures in ₹) :

Branch Debtors on 1.1.2014	6,000	Cash received from Debtors	57,600
Branch Stock on 1.1.2014 (Invoice price)	2,400	Discount allowed to Debtors	1,400
Sales : Cash	3,000	Bad debts	300
Credit	60,000	Branch expenses paid by H.O.	15,000
Goods from head office (Invoice price)	72,000	Branch stock on 31.12.2014 (Invoice price)	11,400

Solution **In the books of X Ltd., (H.O.)**

				Discount allowed	1,400
				Bad debts	300
Dec. 31	To Branch Stock A/c	60,000		By Balance c/d	6,700
		66,000			66,000

Dr. Branch Profit & Loss Account Cr.

Date	Particulars	₹	Date	Particulars	₹
2014 Dec. 31	To Branch Expenses A/c:		2014 Dec. 31	By Gross Profit b/d	15,750
	Discount allowed	1,400		By General Profit & Loss A/c (Loss)	950
	Bad debts	300			
	Cash expenses	15,000			
		16,700			16,700

Working Notes:

(1) Stock reserve on opening stock : Loading is $33^1/_3$ on cost, i.e., $33^1/_3$ %/ $133^1/_3$ % or 1/4 of invoice price. Therefore, loading on opening stock = 1/4 x ₹ 2,400 = ₹ 600.

(2) Loading on goods sent : 1/4 of ₹ 72,000 = ₹ 18,000. **(3) Loading on closing stock** : 1/4 of ₹ 11,400 = ₹ 2,850.

Turotial Note: When a separate Branch Profit and Loss Account is opened, Branch Adjustment Account will show gross profit and Branch Profit and Loss Account will show net profit of the branch.

Illustration 21

A Calcutta firm has a retail branch at Dhanbad. All goods are supplied to the branch by the head office which invoices the goods at the selling price which is calculated at cost plus 25 per cent. All expenses incurred by the branch are paid out of an imprest account of ₹ 10,000 which is replenished by the head office every week. All collections by the branch are banked intact to the credit of the head office. The branch maintains no books of account except a memorandum debtors ledger. Physical verification of stock at the branch is done annually and the difference between the actual stock and the book balance is adjusted. (figures in ₹)

Branch Debtors A/c (Jan. 1)	25,000	Cash collections at Br. (including cash sales of ₹ 85,000)	2,85,000
Branch Stock A/c (at Invoice value — Jan. 1)	80,000	Discounts allowed to debtors	10,000
Cash at Branch	10,000	Credit sales at Branch	2,40,000
Goods sent to Branch (at Invoice value)	3,00,000	Amount sent to Branch for expenses	36,000

As at 31st December, 2014, the branch had cash on hand representing unspent imprest of ₹ 8,000. The stock on hand on 31st December, 2014 valued at invoice value was ₹ 43,000.

Prepare the following accounts as appearing in the books of the head office: (a) Branch Stock Account; (b) Branch Adjustment Account; (c) Branch Debtors Account; and, (d) Branch Profit and Loss Account.

Solution

2014 Dec. 31	To Branch Stock A/c	12,000	2014 Dec. 31	By Branch Adjustment A/c (Loading)	2,400
				By Branch Profit & Loss A/c (Cost)	9,600
		12,000			12,000

Tutorial Note: Shortage in stock may be due to different reasons, e.g., shoplifting, normal loss, etc. Loading on shortage in stock (1/5 of ₹ 12,000 = ₹ 2,400) is to be charged to Branch Adjustment Account and cost of shortage (4/5 of ₹ 12,000 = ₹ 9,600) is to be charged to Branch Profit and Loss Account assuming that it is normal in nature.

(4) Loading on opening stock is 1/5 of ₹ 80,000 = ₹ 16,000.

(5) Loading on goods sent to branch is 1/5 of ₹ 3,00,000 = ₹ 60,000.

(6) Loading on closing stock = 1/5 of ₹ 43,000 = ₹ 8,600.

Illustration 22

Maruti Ltd. has a branch at Lucknow. Goods are invoiced from head office at cost plus 50%. Branch remits all cash received to head office and all expenses are met by head office.

Prepare (i) Lucknow Branch Account; (ii) Surplus in Stock Account; (iii) Lucknow Branch Debtors Account; (iv) Goods Sent to Branch Account; (v) Stock Reserve Account; (vi) Lucknow Branch Adjustment Account; (vii) Lucknow Branch Expenses Account; and, (viii) Lucknow Branch Profit and Loss Account in the books of Maruti Ltd. under Stock and Debtors system to show profit earned at the branch from the following: (all figures in ₹)

Stock on 1st April 2014 (Invoice price)	15,600	Cash collected from Debtors	29,800
Debtors on 1st April 2014	8,700	Goods returned by Debtors	1,500
Goods invoiced at cost during the year	36,000	Surplus in stock (Invoice price)	300
Sales at Branch : Cash sales	35,000	Discount allowed by Debtors	350
Credit sales	30,100	Expenses at Branch	6,700

Solution

In the books of Maruti Ltd.

Date	Particulars	₹	Date	Particulars	₹
31.3.2015	To Bank A/c	6,700	31.3.2015	By Lucknow Branch Profit & Loss A/c	7,050
	To Lucknow Branch Debtors A/c (Discount allowed)	350			
		7,050			7,050

Dr. **Lucknow Branch Profit and Loss Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
31.3.2015	To Sundry Expenses	7,050	31.3.2015	By Gross Profit b/d	21,200
	To Net Profit (Transferred to General Profit & Loss A/c)	14,350		By Surplus in Stock A/c	200
		21,400			21,400

Working Notes:

(1) Invoice Price of Goods Sent	₹
Cost of goods sent	36,000
Add: Loading 50% of cost	18,000
	54,000

(2) Loading on Opening Stock

Loading is 50% of cost, i.e., 50/150 or 1/3 of invoice price. Therefore, loading on opening stock = ₹ 15,600/3 = ₹ 5,200.

(3) Loading on Closing Stock = 1/3 of ₹ 6,300 = ₹ 2,100.

Tutorial Note: "Loading" of surplus in stock (₹ 100) is to be credited to Branch Adjustment Account and "Cost" of surplus in stock (₹ 200) is to be credited to Branch Profit and Loss Account.

Illustration 23

Red and Co. of Mumbai started a branch at Bangalore on 1.4.2014 to which goods were sent at 20% above cost. The branch makes both cash sales and credit sales. Branch expenses are met from branch cash and balance money returned to H.O. The branch does not maintain double entry books of account and necessary accounts relating to branch are maintained by H.O. Following further details are given for the year ending on 31.3.2015:

	₹
Cost of Goods Sent to Branch	1,00,000
Goods Received by Branch till 31.3.2015 at invoice price	1,08,000
Credit Sales for the year	1,16,000
Closing Debtors on 31.3.2015	41,600
Bad Debts written off during the year	400
Cash remitted to H.O.	86,000
Closing Cash on Hand at Branch on 31.3.2015	4,000
Cash Remitted by H.O. to Branch during the year	6,000
Closing Stock in Hand at Branch at invoice price	12,000
Expenses incurred at Branch	24,000

Draw up the necessary ledger accounts like Branch Debtors Account, Branch Stock Account, Goods Sent to Branch Account, Branch Cash Account, Branch Expenses Account and Branch Adjustment Account for ascertaining gross profit and Branch Profit and Loss Account for ascertaining branch profit.

Date	Particulars	₹	Date	Particulars	₹
2015 Mar 31	To Stock Reserve A/c :		2015 Mar 31	By Goods Sent to Branch A/c (Note 1)	20,000
	in Hand (Note 4)	2,000	"	By Branch Stock A/c (Note 3)	54,000
	in Transit (Note 5)	2,000			
"	To Branch Profit and Loss A/c	70,000			
		74,000			74,000

Dr. **Branch Profit and Loss Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2015 Mar 31	To Branch Expenses A/c	24,400	2015 Mar 31	By Branch Adjustment A/c	70,000
"	To General Profit and Loss A/c	45,600			
		70,000			70,000

Working Notes :

(1) Loading on Goods Sent = ₹ 1,20,000 – ₹ 1,00,000 = ₹ 20,000.

(2) Goods in Transit = Invoice Price of goods sent – Invoice price of goods received by the branch
= ₹ 1,20,000 – ₹ 1,08,000 = ₹ 12,000 (at invoice price).

(3) Surplus in Branch Stock Account represents excess price realisation over and above the invoice price.

(4) Loading on closing stock = 1/6 of ₹ 12,000 = ₹ 2,000.

(5) Loading on goods in transit = 1/6 of ₹ 12,000 = ₹ 2,000.

Illustration 24

Eastern Chemicals Ltd. has two branches at Bombay and Nagpur. Goods are invoiced to branches at cost plus 50%. Branches remit all cash received to the head office and all expenses are also met by head office. From the following particulars, prepare (i) Branch Stock Account; (ii) Branch Stock Adjustment Account; (iii) Branch Debtors Account; (iv) Goods Sent to Branch Account; and, (v) Branch Profit and Loss Account for the year ended 31.12.2014:

	Bombay (₹)	Nagpur (₹)		Bombay (₹)	Nagpur (₹)
Stock on 1.1.2014 (Invoice price)	18,600	31,200	Goods returned to head office	3,000	—
Debtors on 1.1.2014	13,600	17,400	Transfer from Nagpur to Bombay	4,200	4,200
Goods invoiced (Cost price)	68,000	72,000	Shortage of stock	900	—
Cash sales	50,020	70,000	Surplus in stock	—	600
Credit sales	62,000	60,200	Discount allowed to customers	400	700

2014 Dec. 31	To Branch Stock Adjustment A/c	—	200	2014 Dec. 31	By Branch Stock A/c	—	600
	To Branch Profit & Loss A/c	—	400				
		—	600			—	600

(3) **Loading on net goods sent including transfer to Bombay branch**: Goods sent to branch (direct) ₹ 1,02,000 plus goods received from Nagpur ₹ 4,200 Less goods returned to head office ₹ 3,000. Therefore, net goods sent = ₹ 1,03,200. Loading is 1/3 of ₹ 1,03,200 = ₹ 34,400.
Nagpur Branch: Goods sent to branch directly ₹ 1,08,000 less goods transferred to Bombay ₹ 4,200. Therefore, net goods sent to branch = ₹ 1,03,800. Loading is 1/3 of ₹ 1,03,800 = ₹ 34,600.

(4) **Branch expenses** : Total branch expenses are actual expenses plus discount allowed, i.e., ₹ 10,800 + ₹ 900 = ₹ 11,200 for Bombay Branch and ₹ 13,400 + ₹ 700 = ₹ 14,100 for Nagpur Branch.

Tutorial Note: In case of transfer of goods between the branches, the sending branch will treat the transfer 'as if returned to head office' and receiving branch will treat that 'as if received from H.O.'

Illustration 25

A Company with its head office at Calcutta has a branch at New Delhi. Goods are invoiced to the branch at cost plus $33^1/_3$%, which is the selling price. The following information is given in respect of the branch for the year ended 31st March, 2015:

	₹		₹
Goods Sent to branch (Invoice value)	4,80,000	Discount allowed	1,000
Stock at branch (1.4.2014) at selling price	24,000	Bad debts	1,500
Cash sales	1,80,000	Stock at branch (31.3.2015) at selling price	48,000
Returns from Debtors	6,000	Branch Debtors' balance (31.3.2015)	36,500
Branch expenses paid for cash	53,500	Collections from Debtors	2,70,000
Branch Debtors' balance (1.4.2014)	30,000	Branch Debtors' cheques returned dishonoured	5,000

You are required to prepare the Branch Stock Account, Branch Debtors' Account and the Branch Adjustment Account to reveal the profit of the branch for the year 2014-15.

Solution

In the books of Head Office, Calcutta

Dr. New Delhi Branch Stock Account Cr.

Date	Particulars	₹	Date	Particulars	₹
1.4.2014	To Balance b/d	24,000	31.3.2015	By Bank A/c (cash sales)	1,80,000
31.3.2015	To Goods Sent to Branch A/c	4,80,000		By New Delhi Branch Debtors A/c (Note 1)	2,80,000
	To New Delhi Br. Debtors A/c (Returns)	6,000		By Shortage-in-stock A/c (Balancing figure)	2,000
				By Balance c/d	48,000
		5,10,000			5,10,000

Dr. **New Delhi Branch Debtors Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
1.4.2014	To Balance b/d	30,000	31.3.2015	By Bank A/c (Collection)	2,70,000
31.3.2015	To Bank A/c (Dishonour of cheques)	5,000		By New Delhi Branch Stock A/c	6,000
	To New Delhi Branch Stock A/c (Note 1)	2,80,000		By New Delhi Branch A/c:	
				Bad debt ₹ 1,500	
				Discount allowed ₹ 1,000	2,500
				By Balance c/d	36,500
		3,15,000			3,15,000

Dr. **New Delhi Branch Adjustment Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
31.3.2015	To Branch Expenses A/c (Note 4)	56,000	1.4.2014	By Stock Reserve A/c (Note 2)	6,000
	To Shortage-in-stock A/c (Note 5)	2,000		By Goods Sent to Branch A/c (Note 3)	1,20,000
	To Stock Reserve A/c (Note 6)	12,000			
	To Net Profit (Trans. to General P & L A/c)	56,000			
		1,26,000			1,26,000

Working Notes:

(1) Credit sales have not been given in the problem. So, the balancing figure of Branch Debtors Account is to be taken as credit sales.

(2) Loading is $33^1/_3$ on cost, i.e., $33^1/_3\%/\ 133^1/_3$ % or 1/4 on invoice value. Therefore, loading on opening stock is ₹ 24,000/4 = ₹ 6,000.

(3) Loading on goods sent = ₹ 4,80,000/4 = ₹ 1,20,000.

(4) Total branch expenses = Cash expenses are ₹ 53,500 + Bad Debts ₹ 1,500 + Discount allowed ₹ 1,000 = ₹ 56,000.

(5) When no separate Branch Profit and Loss Account is prepared, the entire amount of shortage or surplus in stock is transferred to Branch Adjustment Account.
If the Branch Adjustment Account and Branch Profit and Loss Account are prepared separately, the loading on shortage/surplus is transferred to Branch Adjustment Account and cost is transferred to Branch Profit and Loss Account.

(6) Loading on closing stock = ₹ 48,000/4 = ₹ 12,000.

Illustration 26

X Ltd. has a retail branch at Allahabad. Goods are sent by the H.O. to the branch marked at selling price which is cost *plus* 25%. All the expenses of the branch are paid by the H.O. All cash collected by the branch (from customers and cash sales) is deposited to the credit of H.O. Account.

From the following particulars of the branch, prepare Branch Stock Account, Branch Debtors Account, Branch Expenses Account and Branch Adjustment Account in the books of the H.O.: (all figures in ₹)

Debtors on 1.1.2014	12,000	Goods returned to H.O. at Invoice Price	5,000
Debtors on 31.12.2014	14,000	Salaries paid	6,000
Inventory with Branch at Invoice Price on 1.1.2014	16,000	Rent paid	4,000
Inventory with Branch at Invoice Price on 31.12.2014	17,000	Discount allowed to customers	2,000
Cash sales during the year	60,000	Bad debts written-off	1,000
Amount deposited in the H.O. A/c during the year	1,27,000	Spoilage at Invoice price	2,000

Solution

In this problem, credit sales and goods sent to branch are missing. Therefore, the balancing figure of Branch Debtors Account will be treated as credit sales and the balancing figure of Branch Stock Account will be treated as goods sent to branch.

In the books of X Ltd. (H.O.)

Dr. **Branch Stock Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹

2014 Dec. 31	To Spoilage A/c (Note 3)	400	2014 Dec. 31	By Stock Reserve A/c	3,200
	To Stock Reserve A/c	3,400		By Goods Sent to Branch A/c (Note 2)	27,000
	To Branch Profit & Loss A/c	26,400			
		30,200			30,200

Dr. **Branch Profit & Loss Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014 Dec. 31	To Branch Expenses A/c	13,000	2014 Dec. 31	By Branch Adjustment A/c	26,400
	To Spoilage A/c (Cost)	1,600			
	To General Profit & Loss A/c	11,800			
		26,400			26,400

Working Notes:

(1) Total amount deposited in H.O. Account is ₹ 1,27,000 but it includes ₹ 60,000 for cash sales. Therefore, amount collected from debtors = ₹ 1,27,000 – ₹ 60,000 = ₹ 67,000.

(2) Goods sent to branch have not been given. The balancing figure of Branch Stock Account will be treated as goods sent to branch. Total goods sent to branch = ₹ 1,40,000. ₹ 5,000 (at invoice price) has been returned to head office. Loading on net goods sent = 1/5 of ₹ 1,35,000 = ₹ 27,000.

(3) **Loading on spoilage** ₹ 400 is to be debited to Branch Adjustment Account and the balance amount ₹ 2,000 – ₹ 400 = ₹ 1,600 is to be charged to Branch Profit and Loss Account.

(4) **Loading on opening stock** = 1/5 of ₹ 16,000 = ₹ 3,200; **Loading on closing stock** = 1/5 of ₹ 17,000 = ₹ 3,400.

Illustration 27

Multichained Stores Ltd., Delhi has its branches at Lucknow and Madras. It charges goods to its branches at cost plus 25%. Following information is available of the transactions of the Lucknow branch for the year ended on 31st March, 2015.

Balances on 1.4.2014: Stock ₹ 30,000; Debtors ₹ 10,000 and Petty Cash ₹ 50.

Transactions during 2014-15 (Lucknow branch) (all figures in ₹) :

Goods sent to Lucknow branch at Invoice price	3,25,000	Cash sent for Petty expenses	34,000
Goods returned to Head Office at Invoice price	10,000	Bad debts at Branch	500
Cash sales	1,00,000	Goods transferred to Madras branch under H.O. advice	15,000
Credit sales	1,75,000	Insurance charges paid by H.O.	500
Goods pilferred (Invoice price)	2,000	Goods returned by Debtors	500
Goods lost in fire (Invoice price)	5,000	Insurance Co. paid to H.O. for loss by fire at Lucknow	3,000

Balances on 31.3.2015: Petty Cash ₹ 230; Debtors ₹ 14,000. Goods worth ₹ 15,000 (included above) sent by Lucknow branch to Madras branch was in transit on 31.3.2015. Show the following accounts in the books of Multichained Stores Ltd. : (a) Lucknow Branch Stock Account; (b) Lucknow Branch Debtors Account; (c) Lucknow Branch Adjustment Account; (d) Lucknow Branch Profit and Loss Account; (e) Stock Reserve Account; and, (f) Goods Sent to Lucknow Branch Account.

		34,820			34,820

Dr. (3) Goods Pilferred Account Cr.

Date	Particulars	₹	Date	Particulars	₹
31.3.2015	To Lucknow Branch Stock A/c	2,000	31.3.2015	By Lucknow Branch Adj. A/c (Loading)	400
				By Lucknow Branch P & L A/c (Cost)	1,600
		2,000			2,000

Dr. (4) Goods Lost by Fire Account Cr.

Date	Particulars	₹	Date	Particulars	₹
31.3.2015	To Lucknow Branch Stock A/c	5,000	31.3.2015	By Lucknow Branch Adj. A/c (Loading)	1,000
				By Bank A/c (Claim received)	3,000
				By General Profit & Loss A/c (Note 6)	1,000
		5,000			5,000

(5) Net Goods sent to Branch

Goods sent to branch = ₹ 3,25,000 *less* goods returned by the branch ₹ 10,000 *less* goods transferred to Madras branch ₹ 15,000 = ₹ **3,00,000. Loading = 1/5 of ₹ 3,00,000 = ₹ 60,000.**

(6) For calculating true profit of the branch, any abnormal loss should be debited to General Profit & Loss Account. Here, ₹ 1,000 has been charged to General Profit & Loss Account. However, if it is charged to Branch Profit & Loss Account, the profit would be ₹ 17,480.

Illustration 28

Madras Ltd. invoices goods to its branch at cost plus $33^1/_3$%. From the following particulars prepare Branch Stock Account, Branch Stock Adjustment Account and Branch Profit and Loss Account as they would appear in the books of head office: (all figures in ₹)

Stock at commencement at branch at invoice price	1,50,000	Return of goods to head office (invoice price)	50,000
Stock at close at branch at invoice price	1,20,000	Credit sales at branch	50,000
Goods sent to branch during the year at invoice price (including goods invoiced at ₹ 20,000 to branch on 31.3.2015 but not recd. by branch before close of the year)	10,00,000	Invoice value of goods pilferred	10,000
		Normal loss at branch due to wastage and deterioration of stock (at invoice value)	15,000
		Cash sales at branch	9,00,000

Madras Ltd. closes its books on March 31, 2015.

Solution

In the books of Madras Ltd.

Dr. Branch Stock Account Cr.

Date	Particulars	₹	Date	Particulars	₹
1.4.2014	To Balance b/d	1,50,000	31.3.2015	By Bank A/c (Cash sales)	9,00,000
31.3.2015	To Goods Sent to Branch A/c	10,00,000		By Goods Sent to Branch A/c (Returns)	50,000
				By Branch Debtors A/c (Credit sales)	50,000
				By Goods Pilferred A/c	10,000
				By Balance c/d: at branch	1,20,000
				in-transit	20,000
		11,50,000			11,50,000

Dr. Branch Stock Adjustment Account Cr.

Date	Particulars	₹	Date	Particulars	₹
31.3.2015	To Goods Pilferred A/c (Loading)	2,500	31.3.2015	By Stock Reserve A/c	37,500
	To Stock Reserve A/c (Note 2)	35,000		By Goods Sent to Branch A/c (Note 1)	2,37,500
	To Gross Profit c/d	2,37,500			
		2,75,000			2,75,000

Dr. Branch Profit & Loss Account Cr.

Date	Particulars	₹	Date	Particulars	₹
31.3.2015	To Goods Pilferred A/c (Cost)	7,500	31.3.2015	By Gross Profit b/d	2,37,500
	To General Profit & Loss A/c	2,30,000			
		2,37,500			2,37,500

Tutorial Note: No entry is required to be passed for normal loss, though it is given specifically in the question. The effect of normal loss is automatically adjusted in the Branch Stock Account. In this problem, normal loss of ₹ 15,000 has been neutralised by the profit on sales above invoice price of ₹ 15,000. If the entry is made for normal loss, the Branch Stock Account will be as under:

Dr. **Branch Stock Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
1.4.2014	To Balance b/d	1,50,000	31.3.2015	By Bank A/c (Cash sales)	9,00,000
31.3.2015	To Goods Sent to Branch A/c	10,00,000		By Goods Sent to Branch A/c	50,000
	To Branch Stock Adjustment A/c	15,000		By Branch Debtors A/c	50,000
	(Profit on sales above invoice price)			By Goods Pilferred A/c	10,000
				By Normal Loss A/c*	15,000
				By Balance c/d: at branch	1,20,000
				in transit	20,000
		11,65,000			11,65,000

*Normal loss is to be debited to Branch Stock Adjustment Account by ₹ 15,000 and it will be credited by ₹ 15,000 for profit on sales, above invoice prices. The gross profit will remain ***unchanged***. **In the examination it is better to ignore normal loss.**

Working Notes:

(1) Total goods sent to branch is ₹ 10,00,000. Goods of ₹ 50,000 has been returned by the Branch. Therefore, net goods sent is ₹ 9,50,000. Loading on goods sent (Net) = 1/4 of ₹ 9,50,000 = ₹ 2,37,500.

(2) Stock reserve is also to be created on goods in transit in addition to closing stock at branch. Therefore, the loading is 1/4 of ₹ (1,20,000 + 20,000) = ₹ 35,000.

(3) Loading on goods pilferred is to be charged to Branch Stock Adjustment Account and cost is to be charged to Branch Profit and Loss Account.

Illustration 29

Subhash Electricals has its branches at Chandigarh and Gwalior to whom goods are invoiced at cost plus 25%.

Following information is available of the transactions at Chandigarh Branch for the year ended 31.3.2015 :

Balances on 1.4.2014 : Stock at invoice price ₹ 40,000; Debtors ₹ 12,000; Petty Cash ₹ 150.

Transactions during 2014-15 : (all figures in ₹)

Goods sent to branch at invoice price	4,20,000	Insurance company paid to head office	3,000
Goods returned to head office at invoice price	15,000	Cash sent for petty expenses	32,000
Cash sales	1,05,000	Bad debts	400
Credit sales	1,80,000	Goods transferred to Gwalior branch at invoice price	12,000
Normal loss at invoice price	350	Insurance charges paid by head office	200
Goods pilfered at invoice price	3,000	Goods returned by debtors	500
Goods lost by fire at invoice price	4,000		

Balances on 31.3.2015 : Debtors ₹ 11,000; Petty Cash ₹ 250; Stock ?

Note : Goods transferred to Gwalior Branch were in transit on 31.3.2015.

Prepare for Chandigarh Branch : (i) Branch Stock Account; (ii) Branch Adjustment Account; (iii) Branch Profit and Loss Account; (iv) Stock Reserve Account; and (v) Branch Debtors Account.

				By Bank A/c (Cash Collected)	1,80,100
			31.3.2015	By Balance c/d	11,000
		1,92,000			1,92,000

Working Notes :

(1) For calculating Branch Closing Stock (when it is not given), normal loss is credited to Branch Stock Account at invoice price. Normal Loss Account is closed by debiting to Branch Adjustment Account.

(2) Loading on net goods sent: Goods sent to branch ₹ 4,20,000 less goods returned to head office ₹ 15,000. Therefore, net goods sent = ₹ 4,05,000. Loading is 1/5 of ₹ 4,05,000 = ₹ 81,000.

(3) Loading on goods transferred to Gwalior Branch: 1/5 of ₹ 12,000 = ₹ 2,400.

(4) Loading on goods pilfered: 1/5 of ₹ 3,000 = ₹ 600. Cost of goods pilfered ₹ 2,400 (₹ 3,000 – ₹ 600) will be debited to *Branch Profit and Loss Account.*

(5) Loading on goods lost by fire: 1/5 of ₹ 4,000 = ₹ 800. Cost of goods lost by fire ₹ 3,200 (₹ 4,000 – ₹ 800) will be debited to *General Profit and Loss Account.*

(6) Loading on opening stock: 1/5 of ₹ 40,000 = ₹ 8,000.

(7) Loading on closing stock: 1/5 of ₹ 1,41,150 = ₹ 28,230.

(8) Petty Expenses = Opening petty cash ₹ 150 *plus* cash sent by head office for petty cash = ₹ 32,000 *less* closing petty cash ₹ 250 = ₹ 31,900.

Sometimes, Branch Stock Account may be maintained under two columns on both the sides — Invoice Price Column and Cost Price Column. The 'Invoice Price Column' being a mere memorandum column, all double entries are with the 'Cost Price Column'.Gross Profit or Loss is disclosed by the 'Cost Price Column'. The sales and sales returns are same for both the columns.

Illustration 30

Atlantic Paper Products sends goods to their Bhopal branch at cost plus 25%. You are given the following particulars:

	₹		₹
Opening stock at branch at its cost	5,000	Sales	25,500
Goods sent to branch at invoice price	20,000	Expenses	8,000
Loss in transit at invoice price	2,500	Closing stock at branch at cost to branch	6,000
Theft at invoice price	1,000	Claim recd. from the insurance company for loss in transit	2,000
Loss in weight (normal) at invoice price	500		

You are required to prepare in the head office books:
(a) Branch Stock Account;
(b) Branch Adjustment Account;
(c) Branch Profit and Loss Account;
(d) Surplus in Stock Account;
(e) Loss-in-transit Account; and (f) Loss by Theft Account.

Dr. **Loss by Theft Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
	To Branch Stock A/c	1,000		By Branch Adjustment A/c	200
				By Branch Profit & Loss A/c	800
		1,000			1,000

Tutorial Note: (1) No entry is required for normal loss; (2) Loss by theft should be treated as normal because 'shoplifting' is very common to all businesses particularly in the retail trade.

Working Notes:

(1) Here, opening stock value has been given at cost to the branch, i.e., at invoice price. Therefore, there is no need for converting that into the invoice price.

(2) It is assumed that all sales are made on credit.

(3) Loading is 25% on cost, i.e., 25/125 or 1/5 of invoice price. So, Loading on opening stock = 1/5 of ₹ 5,000 = ₹ 1,000.

(4) Loading on goods sent is 1/5 of ₹ 20,000 = ₹ 4,000.

(5) Loading on surplus in stock is 1/5 of ₹ 10,000 = ₹ 2,000. Loading on surplus in stock is credited to Branch Adjustment Account and cost is credited to Branch Profit and Loss Account.

(6) Loading on lost-in-transit is 1/5 of ₹ 2,500 = ₹ 500. Loading on lost-in-transit is debited to Branch Adjustment Account. Cost of goods lost-in-transit (₹ 2,000) is equal to insurance claim received. So, there is no abnormal loss which is to be transferred to the General Profit and Loss Account.

Sale of Goods Above / Below Invoice Price

Sometimes goods may be sold by the branch below or above the invoice price as a matter of policy, for example, cash sales at invoice price but credit sales at 10% above invoice price. In such a situation, the Branch Stock Account does not balance. For adjusting excess/short amount realised over the invoice price, the following entries are passed:

(i) *When goods are sold above invoice price*

Branch Stock Account To Branch Adjustment Account	Dr. [Difference between actual selling price and invoice price]

(ii) *When goods are sold below invoice price*

Branch Adjustment Account To Branch Stock Account	Dr. [Difference between invoice price and actual selling price]

Illustration 31

B. Ltd., Bombay has a branch in Calcutta. Goods are sent to Branch at cost plus 50% (all figures in ₹):

Opening stock at branch at invoice price	6,00,000	Debtors paid during the year	11,00,000
Opening debtors at branch	2,00,000	Stock shortage (detected at the end of the year) at invoice price	60,000
Goods received by branch during the year	18,00,000		
Goods in transit to branch (opening) at invoice price	30,000	Goods returned by branch during the year (invoice price)	90,000
Cash sales during the year (₹ 30,000 below invoice price)	6,30,000	Bad debts written-off	20,000
Credit sales during the year (₹ 75,000 above invoice price)	12,00,000	Branch expenses	40,000

From the above information, you are required to prepare: Branch Stock Account; Branch Adjustment Account and Branch Profit and Loss Account for the year ended 31st December, 2013. (You may assume that there is stock in transit at the year-end).

Solution

In the books of B Ltd.

Dr. Branch Stock Account Cr.

	To Shortage-in-Stock A/c	20,000		By Stock Reserve A/c (Note 5)	2,10,000
	To Stock Reserve A/c (Note 7)	1,55,000		By Goods Sent to Branch A/c (Note 6)	5,60,000
	To Gross Profit c/d	6,40,000			
		8,45,000			8,45,000

Dr. Branch Profit & Loss Account Cr.

Date	Particulars	₹	Date	Particulars	₹
2013 Dec. 31	To Branch Expenses A/c:		2013 Dec. 31	By Gross Profit b/d	6,40,000
	Bad debts	20,000			
	Cash expenses	40,000			
	To Shortage-in-Stock A/c (Loading)	40,000			
	To General Profit & Loss A/c	5,40,000			
		6,40,000			6,40,000

Working Notes:

(1) Goods received by branch during the year is ₹ 18,00,000. It includes ₹ 30,000 opening stock in transit. Therefore, actual goods sent to branch during the year is ₹ 18,00,000 – ₹ 30,000 = ₹ 17,70,000.

(2) For sale of goods ***below*** invoice price, Branch Adjustment Account is debited and Branch Stock Account is credited.

(3) For sale of goods ***above*** invoice price, Branch Stock Account is debited and Branch Adjustment Account is credited.
(4) Loading of shortage in stock is debited to Branch Adjustment Account and "cost" is debited to Branch Profit and Loss Account. Loading of shortage-in-stock = 1/3 of ₹ 60,000 = ₹ 20,000 and Cost = ₹ 60,000 – ₹ 20,000 = ₹ 40,000.
(5) Loading on opening stock including goods-in-transit = 1/3 of ₹ (6,00,000 + 30,000) = ₹ 2,10,000.
(6) Loading on net goods sent to branch during the year = 1/3 of ₹ (17,70,000 – 90,000) = ₹ 5,60,000.
(7) Loading on closing stock = 1/3 of ₹ 4,65,000 = ₹ 1,55,000.

Illustration 32

White Ltd. with their head office at Kolkata, invoiced goods to their Ranchi branch at 20% less than list price, which is cost plus 100%, with instruction that cash sales are made at invoice price and credit sales at list price. From the following particulars, prepare Branch Stock Account and Branch Stock Adjustment Account for the year ended 31.12.2014 :

Stock on 1st 1.1.2014 (at invoice price)		2,400	Cash received from debtors	17,127
Debtors on 1.1.2014		2,000	Expenses at branch	3,473
Goods received from H.O. (at invoice price)		26,400	Remittance to H.O.	24,000
Goods returned to H.O.		200	Debtors on 31.12.2014	4,873
Sales —	Cash	9,200	Stock on 31.12.2014	3,520
	Credit	20,000

Dec. 31	To Goods Sent to Branch A/c	26,400		By Bank A/c (Cash Sales)	9,200
	To Surplus in Stock A/c	120		By Branch Debtors A/c	20,000
	To Ranchi Branch Adjustment A/c (Note 1)	4,000		By Balance c/d	3,520
		32,920			32,920

Dr. **Ranchi Branch Stock Adjustment Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014 Dec. 31	To Stock Reserve A/c (Note 6)	1,320	2014 Dec. 31	By Ranchi Branch Stock A/c (Note 1)	4,000
	To Gross Profit c/d	13,450		By Stock Reserve A/c (Note 4)	900
	[Transferred to Branch P/L A/c]			By Surplus in Stock A/c (Note 3)	45
				By Goods Sent to Branch A/c (Note 5)	9,825
		14,770			14,770

Working Notes :

(1) Let cost price be ₹ 100. The list price is 100% of cost price. Therefore, list price = ₹ 100 + ₹ 100 = ₹ 200. The invoice price is 20% less than list price, i.e., ₹ 200 – 20% of ₹ 200 = ₹ 200 – ₹ 40 = ₹ 160. Cash sales are made at invoice price, i.e., ₹ 160, whereas credit sales are made at list price, i.e., ₹ 200. Amount charged on credit sales is more than invoice price = ₹ 200 – ₹ 160 = ₹ 40, i.e., 40 / 200 × 100 = 20% of list price.
Goods sold on credit = ₹ 20,000 – amount charged in excess of invoice price = 20% of ₹ 20,000 = ₹ **4,000**.
(2) If cost is ₹ 100 then invoice price is ₹ 160. Therefore, loading on invoice price = 60 / 160 × 100 = 37.5%.
(3) Loading on surplus : 37.5% of 120 = ₹ 45. This ₹ 45 represents loading. Therefore, it is to be credited to Branch Stock Adjustment Account. The balance ₹ 75 (120 – 45) is to be credited to Branch Profit and Loss Account. [***See next Illustration***]
(4) Loading on opening stock = 37.5% of ₹ 2,400 = ₹ **900**.
(5) Loading on goods sent to branch (net) : 37.5% of (26,400 – 200) = ₹ **9,825**.
(6) Loading on closing stock : 37.5% of ₹ 3,520 = ₹ **1,320**. **(7)** Expenses at branch of ₹ 3,473 will be charged to Branch P/L Account.

Illustration 33

Dara Stores Ltd. with its head office at Delhi, invoiced goods to its branch at Ghaziabad at 20% less than the list price which is cost plus 100%, with instructions that cash sales were to be made at invoice price and credit sales at catalogue price (i.e., list price).

From the following particulars available from the branch, prepare Branch Stock Account, Branch Adjustment Account, Branch Profit and Loss Account and Branch Debtors Account for the year ending 31st December, 2014. (figures in ₹)

Stock on 1st January 2014 (invoice price)			6,000	Cash received from debtors	42,817
Debtors on 1st January 2014			5,000	Expenses at branch	8,683
Goods received from head office (invoice price)			66,000	Debtors on 31st December 2014	12,183
Sales —	Cash	23,000		Stock on 31st December 2014 (invoice price)	8,800
	Credit	50,000	73,000	Remittances to head office	60,000

Solution **In the books of Dara Stores Ltd.**

	To Stock Reserve A/c (Note 5)	3,300		By Stock Reserve A/c (Note 3)	2,250
	To Gross Profit c/d	33,625		By Goods Sent to Branch A/c (Note 4)	24,750
		37,000			37,000

Dr. **Branch Profit & Loss Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014 Dec.31	To Branch Expenses A/c	8,683	2014 Dec. 31	By Gross Profit b/d	33,625
	To Shortage-in-stock A/c (Cost)	125			
	To General Profit & loss A/c	24,817			
		33,625			33,625

Dr. **Branch Debtors Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014 Jan. 1	To Balance b/d	5,000	2014 Dec. 31	By Bank A/c	42,817
Dec. 31	To Branch Stock A/c	50,000		By Balance c/d	12,183
		55,000			55,000

Working Notes:

(1) Let the cost price be ₹ 100. The list price is 100% of cost price. Therefore, ***list price*** = ₹ 100 + ₹ 100 = ₹ 200. The ***invoice price*** is 20% less than list price, i.e., ₹ 200 – 20% of ₹ 200 = ₹ 200 – ₹ 40 = ₹ 160.

Cash sales are made at invoice price, i.e., ₹ 160 whereas credit sales are made at list price, i.e., ₹ 200. Amount charged on credit sales is more than invoice price = ₹ 200 – ₹ 160 = ₹ 40, i.e., 40/200 x 100 = 20% of list price.

Goods sold on credit = ₹ 50,000. Amount charged in excess of invoice price = 20% of list price, i.e., 20% of ₹ 50,000 = ₹ 10,000.

(2) If cost is ₹ 100 then invoice price is ₹ 160. Therefore, loading on invoice price = 60/160 x 100 = 37.5%.

Loading on shortage = 37.5% of ₹ 200 = ₹ 75. Cost = ₹ 200 – ₹ 75 = ₹ 125.

(3) Loading on opening stock = 37.5% of ₹ 6,000 = ₹ 2,250.

(4) Loading on goods sent to branch = 37.5% of ₹ 66,000 = ₹ 24,750.

(5) Loading on closing stock = 37.5% of ₹ 8,800 = ₹ 3,300.

Final Accounts System

The head office may also prepare a Memorandum Branch Trading and Profit and Loss Account to find out the profit or loss of a branch, apart from preparing the Branch Account. Here, the Trading and Profit and Loss Account is prepared in the usual manner, after converting all figures at cost price. The reason for preparing the Memorandum Trading and Profit and Loss Account is to have full information of all transactions which are ignored in ***Debtors System*** (discussed earlier).

The following points are important:

(1) All items of Trading and Profit and Loss Account are to be converted into cost price. (if these are given at invoice price).

(2) Branch Account will be of a Personal Account in nature. It will show only the mutual transactions between head office and branch. The balance of Branch Account is nothing but net assets of the branch at the end of the accounting year.

(3) Branch Trading and Profit and Loss Account is merely a Memorandum Account and, therefore, the entries made therein do not have any double-entry effect. The only object of this account is to disclose profit made or loss incurred by the branch.

Illustration 34

B Co. having its head office at Bombay has a branch at Calcutta. You are given the following particulars relating to the Calcutta Branch for the year ending 31.12.2014: (all figures in ₹)

Stock at branch on 1.1.2014	15,700	Petty cash at branch on 1.1.2014	110
Goods sent to branch during 2014	45,600	Goods returned by branch	3,900
Total sales at branch (including ₹ 19,700 for cash sales)	73,300	Cash sent to branch for expenses:	
Cash received from debtors	52,200	Salary : ₹ 12,800; Petty Cash : ₹ 2,600; Rent : ₹ 3,000	
Branch debtors on 1.1.2014	16,900	Stock at branch on 31.12.2014	18,800
		Petty cash at branch on 31.12.2014	90

Prepare Calcutta Branch Account and Memorandum Branch Trading and Profit and Loss Account in the head office books.

Ilustration 35

A Calcutta merchant has a branch at Delhi to which he charges out the goods at cost plus 25%. The Delhi branch keeps his own sales ledger and transmits all cash received to the head office every day. All expenses are paid from the head office. The transactions for the Branch were as follows: (all figures in ₹)

Stock on 1.1.2014	22,000	Allowances to customers	500
Debtors on 1.1.2014	200	Returns inward	1,000
Petty cash on 1.1.2014	200	Cheques sent to branch:	
Cash sales	5,300	Rent : ₹ 1,200; Wages : ₹ 400; Salaries : ₹ 1,800	
Goods sent to branch	40,000	Stock on 31.12.2014	26,000
Collections on ledger accounts	42,000	Debtors on 31.12.2014	4,000
Goods returned to head office	600	Petty cash on 31.12.2014 (including miscellanous income	250
Bad debts	600	not remitted ₹ 50)	

Prepare the Branch Account and the Branch Trading and Profit and Loss Account for the year ending 31.12.2014 in the head office books.

Solution

In the books of Head Office

Delhi Branch Account

Dr. **Cr.**

Date	Particulars	₹	Date	Particulars	₹
2014 Jan. 1	To Balance b/d:		2014 Dec. 31	By Bank A/c (Cash sales)	5,300
	Stock	22,000		By Bank A/c (Collections)	42,000

Delhi Branch Trading and Profit & Loss Account
For the year ended 31st December, 2014

Dr. **Cr.**

Particulars		₹	Particulars		₹
To Opening Stock (₹ 22,000 – ₹ 4,400)		17,600	By Sales:		
To Goods sent to Branch (Cost)	32,000		Cash	5,300	
Less: Returns to H.O. (Cost)	480	31,520	Credit	47,900	
To Wages		400		53,200	
To Gross Profit c/d		23,480	Less: Returns Inward	1,000	52,200
			By Closing Stock ₹ (26,000 – 5,200)		20,800
		73,000			73,000
To Rent		1,200	By Gross Profit b/d		23,480
To Salaries		1,800	By Miscellaneous Income		50
To Bad Debts		600			
To Allowances to Customers		500			
To General Profit & Loss A/c		19,430			
		23,530			23,530

Tutorial Note: At the time of preparing Branch Trading and Profit and Loss Account, all figures should be converted into cost.

Working Notes :

(1) 25 / 125 x ₹ 22,000 = ₹ 4,400.

(2) 25 / 125 x ₹ (40,000 – 600) = ₹ 7,880.

Illustration 36

M/s. Ayaram Gayaram, Cuttack started on April 1, 2014, two branches at Berhampur and Nagpur. All goods sold at the branches are received from the head office invoiced at cost plus 25%. All expenses relating to the branches are paid by the head office. Each branch has its own sales ledger and sends weekly statements. All cash collections are remitted daily to the head office by the branches. The following particulars relating to the half-year ending September 30, 2014 have been extracted from the weekend statements sent by the branches: (all figures in ₹)

	Berhampur	Nagpur		Berhampur	Nagpur
Credit sales	1,25,200	1,10,000	Bad debts	6,000	—
Cash sales	78,600	85,200	Salaries	16,000	18,000
Sales returns	2,300	1,200	General expenses	2,600	1,500
Sundry Debtors	34,500	23,600	Goods received from H.O.	1,50,000	1,25,000
Rent and Taxes	3,200	4,500	Advertisement	7,500	5,200
			Stock on September 30, 2014	45,000	35,000

You are required to prepare the Branch Accounts as they would appear in the books of the head office, showing the profit or loss for the period and the Trading and Profit and Loss Account separately for each branch.

Solution

In the books of Messrs. Ayaram Gayaram

Dr. Branch Account Cr.

Date	Particulars	Berhampur	Nagpur	Date	Particulars	Berhampur	Nagpur
2014 Apr. 1	To Goods Sent to Branch A/c	1,50,000	1,25,000	2014 Sept. 30	By Bank A/c (Cash sales)	78,600	85,200
Sept. 30	To Bank A/c (Remittances):				By Bank A/c (Note 1)	82,400	85,200

To General Profit & Loss A/c	82,200	92,800			
	1,17,500	1,22,000		1,17,500	1,22,000

Working Notes :

Dr. (1) Branch Debtors Account Cr.

Date	Particulars	Berhampur	Nagpur	Date	Particulars	Berhampur	Nagpur
2014 Sept. 30	To Sales (credit)	1,25,200	1,10,000	2014 Sept. 30	By Sales returns	2,300	1,200
					By Bad Debts	6,000	—
					By Bank A/c (balancing figure)	82,400	85,200
					By Balance c/d	34,500	23,600
		1,25,200	1,10,000			1,25,200	1,10,000

(2) Goods are sent to branch at cost plus 25%. If the cost price is ₹ 100, then profit is ₹ 25 and invoice price is ₹ 125. Therefore, loading on invoice price 25/125 is 20% of invoice price. Loading for Berhampur = 1/5 of ₹ 1,50,000 = ₹ 30,000 and loading for Nagpur = 1/5 of ₹ 1,25,000 = ₹ 25,000.

(3) Loading on closing stock :
Berhampur = 1/5 of ₹ 45,000 = ₹ 9,000 and
Nagpur = 1/5 of ₹ 35,000 = ₹ 7,000.

(4) Cost of goods sent to Branch :
Berhampur = (₹ 1,50,000 – ₹ 30,000) = ₹ 1,20,000; and
Nagpur = (₹ 1,25,000 – ₹ 25,000) = ₹ 1,00,000.

(5) Cost of closing stock :
Berhampur = (₹ 45,000 – ₹ 9,000) = ₹ 36,000; and
Nagpur = (₹ 35,000 – ₹ 7,000) = ₹ 28,000.

Wholesale and Retail Profit at Branch

Sometimes, the head office (particularly, the manufacturing concern) sells goods to actual consumers through its retail shops. In this case, the head office sends goods to the branches at wholesale prices which is cost plus a percentage of profit. The branch is likely to sell those goods at retail prices which is more than the wholesale prices. The real profit earned by the branch is the difference between the retail price and the wholesale price. For example, the cost price of an article is ₹ 100, the wholesale price, ₹ 160 and the retail price, ₹ 180. If an article is sold by the branch, the actual profit is ₹ 180 – ₹ 100 = ₹ 80 but the branch's real profit is ₹ 180 – 160 = ₹ 20.

This system is followed when ***a branch is treated as a profit centre***. The real cost of the branch is the wholesale price of the goods sent. But, we must remember that wholesale prices are fixed above cost. Therefore, if all the goods that have been sent to branch are sold, no problem is created. The real problem arises when a part of the stock remains unsold, which includes an element of profit made by the head office. To calculate actual profit earned, the value of unsold stock lying with the branch to be reduced from wholesale prices to cost prices. The following Journal Entry is passed at the year-end:

Profit and Loss Account (head office) Dr. [wholesale price — cost]
  To Stock Reserve Account

In the Balance Sheet, branch stock is shown after deducting stock reserve.

At the beginning of the next year, a reverse entry is passed, i.e.,

Stock Reserve Account Dr.
  To Profit and Loss Account [Head office]

The students should note the following important points:

1. Branch Trading Account is debited with the opening stock (if any) at invoice price (wholesale price).
2. Branch Trading Account is also debited with the goods sent to branch (net) at invoice price (wholesale price).
3. Branch Trading Account is credited with the retail price of goods sold.
4. Branch Trading Account is also credited with closing stock at branch at invoice price (wholesale price).
5. The Head Office Trading Account will be debited by opening stock (if any, at cost), goods purchased etc., and will be credited by direct sales (generally at wholesale price) and goods sent to branch (net) at invoice prices (wholesale price). The closing stock (at cost) of head office is also credited to Head Office Trading Account.
6. If there is any closing stock lying at branch, a Stock Reserve Account is opened by debiting Profit and Loss Account (head office) and crediting Stock Reserve Account. The amount of stock reserve is the difference between wholesale price and cost price of head office.
7. If there is any opening stock lying at branch, Stock Reserve Account is debited and head office profit and loss is credited with the loading (i.e., wholesale price of opening *less* cost price of such goods).

Illustration 37

XYZ Ltd operates a number of retail shops. Goods are invoiced at wholesale price which is cost plus 25%. Shops sell the goods at the list price which is cost plus 100%.

From the following particulars, prepare:
(a) Branch Stock Account (at wholesale price); (b) Branch Profit and Loss Account; (c) Stock Reserve Account;
(d) An extract of head office Profit and Loss Account.

Particulars:

Opening stock at shops ₹ 2,000; Goods sent to shops ₹ 8,00,000; Goods returned by shops ₹ 8,000; Goods sold at the shops ₹ 5,20,000; Goods returned by customers at the shop ₹ 20,000; Goods destroyed by fire (retail value) ₹ 6,400; Expenses at the shops ₹ 1,01,500.

Solution

In the books of XYZ Ltd.

Dr. Branch Stock Account (at Wholesale Price) Cr.

Date	Particulars	₹	Date	Particulars	₹
	To Balance b/d	2,000		By Sales	5,20,000
	To Goods Sent to Shops	8,00,000		By Goods Sent to Shops (Returned)	8,000
	To Sales Returns	20,000		By Goods Destroyed by Fire (Note 2)	4,000
	To Gross Profit c/d (Note 1)	1,87,500		By Balance c/d	4,77,500
		10,09,500			10,09,500

Dr. Branch Profit and Loss Account for the year ended . . . Cr.

Particulars	₹	Particulars	₹
To Expenses at the Shops	1,01,500	By Gross Profit b/d	1,87,500
To Goods Destroyed by Fire (Note 2)	4,000		
To Net Profit (Transferred to H. O. Profit & Loss Account)	82,000		
	1,87,500		1,87,500

Dr. Stock Reserve Account Cr.

Date	Particulars	₹	Date	Particulars	₹
	To Head Office Profit and Loss A/c (Transfer)	400		By Balance b/d (Note 3)	400
	To Balance c/d	95,500		By Head Office Profit and Loss A/c (Reserve required — Note 3)	95,500
		95,900			95,900

Dr. Head Office Profit and Loss Account (Extract) for the year ended . . . Cr.

Particulars	₹	Particulars	₹
To Stock Reserve (Note 3) (Reserve required for closing stock)	95,500	By Branch Profit and Loss A/c	82,000
		By Stock Reserve (Note 3) (Reserve on opening stock)	400

Working Notes:

(1) Calculation of Gross Profit

Particulars		₹
Cost Price		100
Add: Profit @ 25%		25
Wholesale Price	(A)	125
Cost Price		100
Add : Profit @ 100%		100
Retail Price	(B)	200
Gross Profit at the Shops (B – A)		75
Gross Profit = ₹ 5,00,000 x 75/200 = ₹ **1,87,500**.		

(2) Calculation of Wholesale Value of Goods Destroyed by Fire

Particulars
When retail value is ₹ 200 the wholesale value is ₹ 125
When retail value is Re 1 the wholesale value is ₹ 125/200
When retail value is ₹ 6,400 the wholesale value is ₹ 125/200 x ₹ 6,400 = ₹ 4,000

(3) Calculation of Stock Reserve

On opening stock = ₹ 2,000 x 25/125 = ₹ 400

On closing stock = ₹ 4,77,500 x 25/125 = ₹ 95,500

(4) Wholesale retail branch is treated as independent profit center. Therefore, goods destroyed by fire has been charged to wholesale branch profit and loss account

Illustration 38

Rahul Ltd operates a number of retail outlets to which goods are invoiced at wholesale price which is cost plus 25%. These outlets sell the goods at the retail price which is wholesale price plus 20%.

Following is the information regarding one of the outlets for the year ended 31.3.2015 (all figures in ₹) :

Stock at the outlet (1.4.2014)	30,000	Goods lost by fire	?
Goods invoiced to the outlet during the year	3,24,000	Expenses for the outlet for the year	20,000
Gross profit made by the outlet	60,000	Stock at the outlet (31.3.2015)	36,000

You are required to prepare the following accounts in the books of Rahul Ltd for the year ended 31.3.2015:

(a) Outlet Stock Account;

(b) Outlet Profit and Loss Account; (

c) Stock Reserve Account.

Solution

In the books of Rahul Ltd

Dr. Outlet Stock Account Cr.

?	To Goods Sent to Outlet	3,24,000	?	By Goods Lost by Fire (Note 2)	18,000
31.3.2015	To Gross Profit c/d	60,000	31.3.2015	By Balance c/d	36,000
		4,14,000			4,14,000

Dr. Outlet Profit and Loss Account for the year ended 31st March, 2015 Cr.

Particulars	₹	Particulars	₹
To Expenses of the Outlet	20,000	By Gross Profit b/d	60,000
To Goods Lost by Fire	18,000		
To Net Profit (Transferred to H. O. Profit & Loss A/c)	22,000		
	60,000		60,000

Dr. Stock Reserve Account Cr.

Date	Particulars	₹	Date	Particulars	₹
31.3.2015	To Head Office Profit and Loss A/c (Transfer)	6,000	1.4.2014	By Balance b/d (Note 3)	6,000
	To Balance c/d	7,200	31.3.2015	By Head Office Profit and Loss A/c (Reserve required — Note 3)	7,200
		13,200			13,200

Working Notes:

(1) Calculation of Sales

Particulars		₹
Cost Price		100
Add: Profit @ 25%		25
Wholesale Price	(A)	125
Wholesale Price		125
Add : Profit @ 20%		25
Retail Price	(B)	150
Gross Profit at the Outlet (B – A)		25
Retail Sales Value = ₹ 60,000 x 150/25 = ₹ **3,60,000**		

(2) Goods Lost by Fire at Wholesale Value

Particulars	₹
Opening Stock	30,000
Add: Goods Sent to Outlet	3,24,000
Add: Gross Profit	60,000
	4,14,000
Less: Sales	3,60,000
	54,000
Less: Closing Stock	36,000
	18,000

(3) Calculation of Stock Reserve : On opening stock = ₹ 30,000 × 25/125 = ₹ **6,000**.
On closing stock = ₹ 36,000 × 25/125 = ₹ **7,200**.

Illustration 39

White Ltd. has a retail branch at Gurgaon. Goods are sold on 60% profit on cost. The wholesale price is cost plus 40%. Goods are invoiced from Calcutta head office to Gurgaon branch at wholesale price. From the following particulars, ascertain the profit made at head office and branch for the year ended 31.12.2014:

	H.O. (₹)	Branch (₹)		H.O. (₹)	Branch (₹)
Stock on 1.1.2014	1,75,000	—	Expenses (Selling)	56,000	7,000
Purchases	10,50,000	—	Sales	10,71,000	3,50,000
Goods sent (invoice price)	3,78,000	—	Stock on 31.12.2014	4,20,000	63,000

Solution

Dr. Trading and Profit and Loss Account Cr.
For the year ended 31st December, 2014

Particulars	Head Office	Gurgaon	Particulars	Head Office	Gurgaon
To Opening Stock	1,75,000	—	By Sales	10,71,000	3,50,000
To Purchases	10,50,000	—	By Goods Sent to Branch	3,78,000	—
To Goods Sent to Branch	—	3,78,000	By Closing Stock	4,20,000	63,000
To Gross Profit c/d	6,44,000	35,000			
	18,69,000	4,13,000		18,69,000	4,13,000
To Expenses (Selling)	56,000	7,000	By Gross Profit b/d	6,44,000	35,000
To Stock Reserve (Note 1)	18,000	—			
To Net Profit	5,70,000	28,000			
	6,44,000	35,000		6,44,000	35,000

Working Note: **(1)** Goods sent to branch at invoice price should be treated as sale of the head office. Some of the goods are still unsold at the branch. For calculating actual profit of the head office, a stock reserve is to be created by debiting head office Profit and Loss Account. The amount of loading will be 40 / 140 x ₹ 63,000 = ₹ 18,000.

Illustration 40

A head office sends goods to its branch at 20% less than list price, i.e., catalogue price. Goods are sold to consumers at cost plus 100%. From the following particulars, ascertain the profit made at the head office and the branch on the wholesale basis for the year ended 31.12.2014:

	H.O. (₹)	Branch (₹)
Purchases	2,00,000	—
Goods sent to branch (at invoice price)	80,000	—
Sales	1,70,000	80,000

Assume that head office sells goods to customers at catalogue price.

Solution

Trading and Profit and Loss Account
For the year ended 31st December, 2014

Dr. **Cr.**

Particulars	Head Office	Branch	Particulars	Head Office	Branch
To Purchases	2,00,000	—	By Sales	1,70,000	80,000
To Goods Sent to Branch	—	80,000	By Goods Sent to Branch	80,000	—
To Gross Profit c/d	1,15,000	16,000	By Closing Stock (Note 2)	65,000	16,000
	3,15,000	96,000		3,15,000	96,000
To Stock Reserve (Note 3)	6,000	—	By Gross Profit b/d	1,15,000	16,000
To Net Profit	1,09,000	16,000			
	1,15,000	16,000		1,15,000	16,000

Working Notes:

(1) Let cost price be ₹ 100, then catalogue price = Cost + 100%, of Cost, i.e., ₹ 200. Invoice price = catalogue price less 20% of catalogue price = ₹ 200 – ₹ 40 = ₹ 160.

(2) Valuation of Closing Stock at Head Office	₹	(4) Valuation of Closing Stock at Branch	₹
Cost of goods purchased	2,00,000	Goods received from H.O. at invoice price	80,000
Less: Cost of goods sold to customers	85,000	Less: Invoice price of goods sold (160/200 x ₹ 80,000)	64,000
(100/200 x ₹ 1,70,000)		Invoice price of goods unsold	16,000
	1,15,000		
Less: Cost of goods sent to branch (100/160 x ₹ 80,000)	50,000		
Cost of goods unsold	65,000		

(3) Stock reserve for goods unsold at branch = 60/160 x ₹ 16,000 = ₹ 6,000

Illustration 41

A head office invoices goods to its branch at 20% less than the list price (i.e. catalogue price). Goods are sold to customers at cost plus 100%. From the following particulars, ascertain the profit made at the head office and the branch on the wholesale basis for the year ended 31st December 2014.

	H.O. (₹)	Branch (₹)		H.O. (₹)	Branch (₹)
Opening Stock at cost (at I.P. for Branch)	40,000	16,000	Sales	6,00,000	80,000
Purchases	4,00,000	—	Expenses	86,000	4,000
Goods sent to branch at invoice price	96,000	—			

Assume that head office sells goods to customers at catalogue price.

Solution

Trading and Profit and Loss Account
For the year ended 31st December, 2014

Dr. **Cr.**

Particulars	Head Office	Branch	Particulars	Head Office	Branch
To Opening Stock	40,000	16,000	By Sales	6,00,000	80,000
To Purchases	4,00,000	—	By Goods Sent to Branch	96,000	—
To Goods Sent to Branch	—	96,000	By Closing Stock (Note 2)	80,000	48,000
To Gross Profit c/d	3,36,000	16,000			
	7,76,000	1,28,000		7,76,000	1,28,000
To Expenses	86,000	4,000	By Gross Profit b/d	3,36,000	16,000
To Stock Reserve (Note 3)	18,000	—	By Stock Reserve (Note 4)	6,000	—
To Net Profit	2,38,000	12,000			
	3,42,000	16,000		3,42,000	16,000

Working Notes:

(1) Let the cost price be ₹ 100, then ***catalogue price*** = cost plus 100% of cost = ₹ 100 + ₹ 100 = ₹ 200. ***Invoice price*** = catalogue price less 20% of catalogue price = ₹ 200 – ₹ 40 = ₹ 160.

(2) Valuation of Closing Stock at Head Office	₹	(3) Valuation of Closing Stock at Branch	₹
Opening stock at cost	40,000	Opening stock at invoice price	16,000
Add: Purchases	4,00,000	Add: Goods sent to branch	96,000
	4,40,000		1,12,000
Less: Cost of goods sold to customers		Less: Invoice price of goods sold	
(100/200 x ₹ 6,00,000)	3,00,000	(160/200 x ₹ 80,000)	64,000
	1,40,000	Invoice price of goods unsold	48,000
Less: Cost of goods sent to branch			
(100 / 160 x ₹ 96,000)	60,000		
Cost of goods unsold	80,000		

(3) Stock reserve for goods unsold at branch = 60/160 × ₹ 48,000 = ₹ 18,000.

(4) Stock reserve for opening a stock at branch = 60/160 × ₹ 16,000 = ₹ 6,000.

Illustration 42

P K Co Ltd with their head office at Calcutta, invoiced goods to their Bombay Branch at invoice price. The invoice price is 20% less than list price, which is cost plus 100% with instruction that sales are made at list price. From the following particulars, ascertain the profit earned by the head office and branch :(all figures in ₹)

	H.O.	Branch		H.O.	Branch
Opening Stock	40,000	32,000	Goods received from H.O. at invoice price	—	96,000
Purchases	2,00,000	—	Sales	1,70,000	80,000
Goods Sent to Branch at Cost Price	62,500	—	Trade expenses	14,000	8,000

Stocks at head office are valued at cost price but those of branch are valued at invoice price.

Solution

P K Co Ltd

Dr. Trading and Profit and Loss Account for the year ended . . . Cr.

Particulars	Head Office (₹)	Bombay Branch (₹)	Particulars	Head Office (₹)	Bombay Branch (₹)
To Opening Stock	40,000	32,000	By Sales	1,70,000	80,000
To Purchases	2,00,000	—	By Goods Sent to Branch	1,00,000	—
To Goods Sent to Branch	—	1,00,000	By Goods-in-Transit (Note 7)	—	4,000
To Gross Profit c/d	1,22,500	16,000	By Closing Stock (Note 2 & 3)	92,500	64,000
	3,62,500	1,48,000		3,62,500	1,48,000
To Trade Expenses	14,000	8,000	By Gross Profit b/d	1,22,500	16,000
To Stock Reserve (Note 5)	25,500	—	By Stock Reserve (Note 4)	12,000	—
To Net Profit	95,000	8,000			
	1,34,500	16,000		1,34,500	16,000

Working Notes:

(1) Let the cost price be ₹ 100,then list price = Cost *plus* 100% of cost = (₹ 100 + 100) = ₹ **200.**
Invoice price = List price less 20% = ₹ 200 less ₹ 40 = ₹ **160.**

(2) Valuation of Closing Stock at Head Office	₹	(3) Valuation of Closing Stock at Branch	₹
Particulars	₹	Particulars	₹
Opening Stock at cost	40,000	Opening Stock at invoice price	32,000
Add: Purchases	2,00,000	Add: Goods received from Head Office at invoice price	96,000
	2,40,000		1,28,000
Less: Cost of Goods Sold to Customers		Less: Invoice price of goods sold (160/200 x ₹ 80,000)	64,000
(100/200 x ₹ 1,70,000) (Note 6)	85,000	**Invoice Price of Goods Unsold**	64,000
	1,55,000		
Less: Cost of Goods Sent to Branch (Given)	62,.500		
Cost of Goods Unsold	92,500		

(4) Stock reserve for opening stock = 60/160 × ₹ 32,000 ₹ 12,000

(5) Stock reserve for closing stock = 60/160 × ₹ 64,000	₹ 24,000
Stock reserve for stock-in-transit = 60/160 × ₹ 4,000	₹ 1,500
Total	₹ 25,500
(6) It is assumed that head office sells goods to customers at list price.	
(7) Invoice price of goods sent by head office = ₹ 62,500 / 100 × 160	₹ 1,00,000
Invoice price of goods received by branch	₹ 96,000
Goods-in-Transit (at invoice price)	₹ 4,000

Independent Branch

When the size of the branches is very large, their functions become complex. In such a situation, it is desirable or practicable for each branch to establish its own double entry book-keeping system quite separate from those of head office. Under this system of branch accounting, the branches are treated as separate, independent units. These types of branches are known as ***Independent Branches***. An independent branch is given more freedom of action, with the manager acquiring more responsibility. Apart from receiving goods from the head office, these branches are allowed to purchase goods from the open market locally. From the amount received from cash sales or debtors, they can incur expenses and can operate the bank account in their own name. The only link an independent branch has with the head office is that they are owned by the head office, because the latter provides and possesses the premises and other physical assets which a branch needs before it can become operational, and the profit or loss of the branch ultimately belongs to the head office.

The accounting arrangements are quite simple. Each branch maintains a 'Head Office Account' in its Ledger, whilst the head office maintains an account in the name of each branch, just as if individual branches were 'customers' of it. All transactions between the two are passed through these accounts, which, if book-keeping is up to date and accurate, will have equal and opposite balances.

A branch account in the head office books may have the following entries.

In the books of the Head Office

Dr. Delhi Branch Account Cr.

Particulars	₹	Particulars	₹
To Balance b/d	40,000	By Bank A/c (cash received from branch)	1,90,000
To Goods Sent to Branch A/c	2,00,000	By Goods Returned from Branch A/c	10,000
To Bank A/c (Expenses paid by head office)	10,000	By Balance c/d	50,000
	2,50,000		2,50,000

In respect of the above account the following points should be noted carefully:

(1) The balance on the ***Delhi Branch Account*** (₹ 50,000) is an asset to the head office and represents the net investment by the head office in Delhi branch.

(2) The balance on the ***Head Office Account*** in the Delhi branch books (₹ 50,000) is a liability of the Delhi branch and represents its capital (i.e., the head office is financing the branch to the extent of ₹ 50,000).

(3) The balances of the two account should be equal and opposite. Where they do not, the discrepancy will be due to cash or goods in-transit.

At the end of each financial or trading period the branch either sends its Trial Balance to the head office for preparation of Trading and Profit and Loss Account and Balance Sheet or prepares its own final accounts (head office being shown as a debtor or a creditor as appropriate). In either case, the net profit made by a branch is credited to head office account; net loss, on the other hand, is debited to that account in the branch books. In this connection, it should be noted that the profit or loss made by each branch is transferred to head office (by passing the above entry), instead of being distributed in the normal way.

After receiving branch Trial Balance by the head office, a consolidated Trading and Profit and Loss Account can be prepared for the entire enterprise, together with a combined Balance Sheet.

The main features of the accounting system of an independent branch are as under:

(1) The branch maintains its entire books of account under double entry system.

(2) The branch in its books opens a Head Office Account to record all the transactions that take place between head office and the branch. This account is personal in nature. It is credited by the amount

of goods received from head office and the allocated head office expenses charged to the branch, and is debited with the amount of cash sent to head office and goods returned.

(3) The head office maintains a Branch Account to record the above transactions. This is a reciprocal account of the Head Office Account maintained by the branch. This account is debited by the amount of goods sent to the branch and the allocated head office expenses charged to the branch, and is credited with the amount of cash received from branch and goods returned.

(4) At the end of the accounting period, the branch prepares its Trial Balance and Trading and Profit and Loss Account, and sends copies of these statements to the head office for incorporation.

(5) After receiving the final statements from the branch, the head office reconciles between the two balances — Branch Account as would appear in the books of head office with the Head Office Account as would appear in the books of the branch. The differences are investigated and required adjusting entries are passed in the head office books to reconcile these two balances.

(6) Lastly, the head office passes necessary Journal Entries to incorporate the branch Trial Balance in its books.

Some Special Items

The following items require some special accounting treatment in case of an independent branch:

(i) Goods-in-transit;
(ii) Cash-in-transit;
(iii) Head office expenses chargeable to branch;
(iv) Depreciation on branch fixed assets; and
(v) Inter-branch transactions.

Goods-in-Transit

It is quite common that the head office and the branch send goods to each other very frequently. The head office is to send goods to the branch at regular intervals as per the requirement of the branch and branch also returns goods to the head office what it cannot sell at a profit. When the head office sends goods to the branch, it immediately debits the Branch Account in its books and credits the Goods Sent to Branch Account. But the branch will pass entry (in respect of this transaction) only when it receives the goods. Similarly, when branch sends or returns some goods to the head office, it immediately debits Head Office Account and credits Goods Returned to Head Office Account. But the head office will pass entry (in respect of this transaction), only when it receives the goods. These goods which are on the way to branch/head office are called '***Goods-in-transit***'.

Some accounting adjustment is required, if there are still some goods in transit at the end of the year. For 'goods-in-transit' the balance in the Head Office Account in the books of the branch will not tally with that of Branch Account in the books of the head office. For reconciling these balances, adjustment entry may be passed either in the books of the head office or in the books of the branch, ***but not in both sets of books***.

(a) When the adjustment entry is passed in the books of the head office:

Goods-in-Transit Account Dr.
To Branch Account

(b) When the adjustment entry is passed in the books of the branch :

Goods-in-Transit Account Dr.
To Head Office Account

The students should remember that the above adjustment entry should be passed only in one set of books, either at head office level or branch level.

On principle, the adjustment entry should be passed in the books of the head office because all in-transit items are detected by the head office after receiving copy of Trial Balance (or copy of Final Accounts) and at this stage, it is not desirable to change the balances in the branch books.

Goods-in-Transit are shown in the Balance Sheet of head office.

Cash-in-Transit

Branch may send cash to head office at regular intervals. At the end of the accounting period, if there is any cash-in-transit it should be adjusted just like goods-in-transit. Here also, adjustment entry may be passed either in the head office books or the branch books. For the reasons explained (in the box) above, the entry should be passed in the head office books only.

The entry will be:

Cash-in-Transit Account Dr.
    To Branch Account

Illustration 43

During March 2015 Bombay head office despatched nine batches of goods to its branch at Calcutta, with each batch costing ₹ 10,000. During the same period Calcutta branch remitted three cheques of ₹ 25,000 each. At the year ended on 31st March 2015 branch had received only eight batches of goods, and the head office had received only two cheques.

The above items will appear in the respective books as follows:

In the books of Calcutta Branch

Dr. Goods from Head Office Account Cr.

Particulars	₹	Particulars	₹
To Head Office A/c (8 batches)	80,000		

Dr. Head Office Account Cr.

Particulars	₹	Particulars	₹
To Bank A/c (3 x ₹ 25,000)	75,000	By Goods from Head Office A/c	80,000
To Balance c/d	5,000		
	80,000		80,000

Dr. Bank Account Cr.

Particulars	₹	Particulars	₹
		By Head Office (3 x ₹ 25,000)	75,000

In the books of the Head Office

Dr. Goods Sent to Branch Account Cr.

Particulars	₹	Particulars	₹
		By Calcutta Branch A/c (9 batches)	90,000

Dr. Calcutta Branch Account Cr.

Particulars	₹	Particulars	₹
To Goods sent to branch A/c	90,000	By Bank A/c (2 x ₹ 25,000)	50,000

Dr. Bank Account Cr.

Particulars	₹	Particulars	₹
To Calcutta Branch A/c (2 cheques @ ₹ 25,000 each)	50,000		

Thus, at the year end balance of Calcutta Branch Account (in the head office books) and balance of Head Office Account (in the branch books) are different. ₹ 40,000 compared with ₹ 5,000 because of the items in-transit. To reconcile the balances the following entry is to be passed in the books of the head office:

Goods-in-Transit Account (1 batch) Dr. ₹ 10,000
Cash-in-Transit Account (1 cheque of ₹ 25,000) Dr. ₹ 25,000
    To Calcutta Branch Account ₹ 35,000

After adjustment, Calcutta Branch Account, Cash-in-Transit Account and Goods-in-Transit Account will appear in the books of the head office as follows:

Dr. Calcutta Branch Account Cr.

Particulars	₹	Particulars	₹
To Goods Sent to Branch A/c	90,000	By Bank A/c (2 x ₹ 25,000)	50,000
		By Goods-in-Transit A/c	10,000
		By Cash-in-Transit A/c	25,000
		By Balance c/d	5,000
	90,000		90,000

Dr. Goods-in-Transit Account Cr.

Particulars	₹	Particulars	₹
To Calcutta Branch A/c	10,000		

Dr. Cash-in-Transit Account Cr.

Particulars	₹	Particulars	₹
To Calcutta Branch A/c	25,000		

Now, both accounts have equal and opposite balances. It should be noted that goods-in-transit and cash-in-transit will appear in the head office Balance Sheet as at 31st March, 2013.

Illustration 44

From the following information, reconcile the Calcutta Head Office Account with Delhi Branch Account:

Particulars	Head Office		Delhi Branch	
	Dr. (₹)	Cr. (₹)	Dr. (₹)	Cr. (₹)
Goods Sent to Delhi Branch	—	13,02,400	—	—
Goods Received by Delhi Branch	—	—	12,80,400	—
Cash Sent by Delhi Branch	—	—	—	1,86,500
Cash Received by Head Office	1,00,000	—	—	—
Delhi Branch Account	4,11,100	—	—	—
Head Office Account	—	—	—	3,02,600

Solution

In the books of the Head Office

Dr. Delhi Branch Account Cr.

Date	Particulars	₹	Date	Particulars	₹
	To Balance b/d	4,11,100		By Goods-in-Transit A/c (Note 2)	22,000
				By Cash-in-Transit A/c (Note 3)	86,500
				By Balance c/d	3,02,600
		4,11,100			4,11,100

Working Notes:

(1) Net difference = ₹ 4,11,100 – ₹ 3,02,600 = ₹ 1,08,500.
(2) Difference due to goods in transit = ₹ 13,02,400 – ₹ 12,80,400 = ₹ 22,000.
(3) Difference due to cash in transit = ₹ 1,86,500 – ₹ 1,00,000 = ₹ 86,500.
(4) Journal entry in the books of the head office will be:

Goods-in-Transit Account	Dr. ₹ 22,000	
Cash-in-Transit Account	Dr. ₹ 86,500	
To Delhi Branch Account		₹ 1,08,500

Head Office Expenses Chargeable to Branch

The head office may, for acceptable reasons, like to allocate a part of its own expenses among the branches for the centralised services rendered by it. In fact, quite a good amount of time of the head office staff may be devoted in doing the jobs of the branches. Hence, the head office may well decide to charge a part of its expenditure on salaries etc., on the branches. The same may also hold true of certain other items of expenses (e.g., on advertisements). If the head office decides to put down some expenses to the branches, the following entries will be passed:

In the books of the Head Office		**In the books of the Branch**	
Branch Account	Dr.	Head Office Expenses Account	Dr.
To Expenses Account		To Head Office Account	
(Being expenses chargeable to branch)		(Being the share of head office expenses)	

Illustration 45

Journalise the following in the books of the head office as well as branch office:

Head office charges ₹ 5,000 from Calcutta Branch as head office administrative expenses.

Solution

In the books of the Head Office
Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
	Calcutta Branch A/c Dr. To Office Administrative Expenses A/c (Being office administrative expenses chargeable to branch)		5,000	5,000

In the books of Calcutta Branch
Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
	Head Office Administrative Expenses A/c Dr. To Head Office A/c (Being the share of head office administrative expenses provided)		5,000	5,000

Depreciation on Branch Fixed Assets

Branch Assets Account may be maintained at branch or at head office. Accounting entry for depreciation will differ according to situations.

(i) If the accounts of branch fixed assets are maintained at branch :

Depreciation Account Dr.
To Fixed Assets Account
[No entry is to be passed in the head office books]

(ii) If the account of branch fixed assets is maintained at head office :

In this case, all entries regarding purchase or sale of such assets are made in the head office books only. No entry is passed in the books of the branch in this respect. For example, when a branch fixed asset is purchased, the head office debits Branch Fixed Assets Account and credits Bank Account/Branch Account (if paid by branch).

As the assets are used by the branch, the depreciation for such assets is also to be charged to the branch. For depreciation the following entry is passed:

In the books of the Head Office	In the books of the Branch
Branch Account Dr. To Branch Fixed Assets Account (Being the depreciation on branch fixed assets)	Depreciation Account Dr. To Head Office Account (Being the depreciation on fixed assets)

Here, both the head office and the branch pass the required entry for depreciation. The important point to note here is that depreciation is an expense for the branch because the asset is used up by it but the Asset Account is maintained by the head office. The head office debits the branch and credits the particular Asset Account. Likewise, the branch credits the head office and debits the particular expense — Depreciation Account.

Illustration 46

Journalise the following in the books of the head office as well as branch office :

Head office has charged ₹ 10,000 as depreciation on Bangalore Branch Fixed Assets.

Solution

	Depreciation A/c Dr. To Head Office A/c (Being the depreciation on fixed assets provided)		10,000	10,000

Inter-branch Transfers

It is quite possible that one branch may send goods (or cash) to another branch directly, with of course, the consent of the head office. The usual procedure, in such a case is that the head office, in its books, should debit the receiving branch and credit the sending branch. But in the books of the head office, it regards the transaction as returning the goods to the head office and thereafter sending the goods to another branch. The following entries are passed:

Head Office	Sending Branch	Receiving Branch
Receiving Branch Account Dr. To Sending Branch Account (Being goods transferred to .... branch to .... branch)	Head Office Account Dr. To Goods Sent to H.O. Account (Being goods sent to .... branch as per head office instruction)	Goods from H.O. Account Dr. To Head Office Account (Being goods received from .... branch as per head office instruction)

Illustration 50

A Calcutta firm whose accounting year ends on 31st December has two branches — one at Allahabad, and the other at Varanasi. The branches keep a complete set of books. On 31.12.2014, the Allahabad and Varanasi Branch Accounts in the Calcutta books showed balance of ₹ 30,450 and ₹ 45,000 respectively before taking the following information into account:

(i) Goods valued at ₹ 2,000 were transferred from Allahabad branch to Varanasi branch under instruction from the head office.

(ii) Allahabad branch collected ₹ 2,500 from an Allahabad customer of the head office.

(iii) Varanasi branch paid ₹ 5,000 for certain goods purchased by the head office in Varanasi.

(iv) ₹ 5,000 remitted by Allahabad branch to Calcutta on 29th December, 2014 were received on 3rd January following.

(v) For the year 2014, the Allahabad branch showed a net loss of ₹ 1,250 and the Varanasi branch a net profit of ₹ 5,400.

Pass Journal Entries to record the above transactions in the books of the head office and then write-up the two Branch Accounts therein.

Solution

(v)	Already it is recorded in the branch books. Therefore, no entry is required			
(vi)	Head Office A/c Dr. To Cash A/c (Being advertisement expenses paid on behalf of branch B, now adjusted)		3,000	3,000

Illustration 52

A Calcutta head office passes one entry at the end of each month to adjust the position arising out of inter-branch transactions during the month. From the following inter-branch transactions in April, 2015, make the entries in the books of Calcutta head office.

(a) ***Delhi branch***:

(i) Received goods from Nagpur branch ₹ 9,000 and Ahmedabad branch ₹ 6,000.
(ii) Sent goods to Ahmedabad branch ₹ 15,000 and Nagpur branch ₹ 12,000.
(iii) Received bills receivable from Ahmedabad branch ₹ 9,000.
(iv) Sent acceptances to Nagpur branch ₹ 6,000 and Ahmedabad branch ₹ 3,000.

(b) ***Kanpur branch*** [apart from (a) above]:

(i) Received goods from Nagpur branch ₹ 15,000 and Delhi branch ₹ 6,000.
(ii) Cash sent to Nagpur branch ₹ 3,000 and Delhi branch ₹ 6,000.

(c) ***Nagpur branch*** [apart from (a) and (b) above]:

(i) Sent goods to Ahmedabad branch ₹ 9,000.
(ii) Received bills receivable from Ahmedabad branch ₹ 9,000.
(iii) Received cash from Ahmedabad branch ₹ 5,000

Solution **In the books of the Head Office**

Incorporation of Branch Trial Balance in the Head Office Books

It has already been stated that an independent branch prepares its own Trial Balance and Final Accounts and remits the copies of these statements to the head office.

After receiving Branch Trial Balance, head office proceeds to incorporate it in its own books. This is absolutely necessary because the branch belongs to the head office, and if the branch Trial Balance is not incorporated in the head office books, the latter will not show correct position.

The incorporation of Branch Trial Balance can be divided into two parts:

(a) Incorporation of Branch Profit and Loss; and
(b) Incorporation of Branch Assets and Liabilities.

Incorporation of Branch Profit and Loss

For the purpose of incorporation of branch profit and loss, the head office may follow any of the following two methods:

(i) Detailed Incorporation
(ii) Abridged Incorporation

Detailed Incorporation

Under this method, incorporation is done with a view to prepare Branch Trading and Profit and Loss Account in the books of the head office. Head office opens a separate Branch Trading and Profit and Loss Account to incorporate all revenue transactions of the branch. This account is temporary in nature and is prepared to ascertain the real profit or loss of the branch after making all adjustments.

In this connection, we must remember that head office maintains only the ***Branch Account*** and the statements received from the branch do not form a part of the double entry system. Therefore, all the Journal Entries should be passed through the Branch Account maintained in the head office. The required Journal Entries are as follows:

Journal Entries

1. For items on the debit side of the Branch Trading Account

Branch Trading Account Dr.
To Branch Account

The above entry is passed for the total amount of items like opening stock, purchases, carriage inwards, wages, processing cost, goods received from head office, sales returns, etc.

2. For items on the credit side of the Branch Trading Account

Branch Account Dr.
To Branch Trading Account

The above entry is passed for the total amount of items like sales, goods sent to head office, closing stock, purchases returns, abnormal loss of stock, etc.

3. For Gross Profit of the Branch

Branch Trading Account Dr.
To Branch Profit and Loss Account

4. For Gross Loss of the Branch

Branch Profit and Loss Account Dr.
To Branch Trading Account

5. For items on the debit side of the Branch Profit and Loss Account

Branch Profit and Loss Account Dr.
To Branch Account

The above entry is passed for the total amount of items like salaries, rent, depreciation, bad debts, repairs, discount allowed, etc.

6. For items on the credit side of the Branch Profit and Loss Account

Branch Account Dr.
To Branch Profit and Loss Account

The above entry is passed for the total amount of items like discount received, miscellaneous income, etc.

7. For net profit of the Branch

Branch Profit and Loss Account Dr.
To General Profit and Loss Account

8. For net loss of the Branch

General Profit and Loss Account Dr.
To Branch Profit and Loss Account

Abridged Incorporation

Under this method, a Memorandum Trading and Profit and Loss Account is prepared for ascertaining branch profit. Only one entry is passed (in place of 8 above) for incorporating branch net profit/loss.

Branch Account Dr.
To General Profit and Loss Account
(In case of loss the above entry shall be reversed).

Incorporation of Branch Assets and Liabilities

This part of the incorporation is done with a view to include branch assets and liabilities in the annual Balance Sheet of the whole business. At the beginning of the new financial year, assets and liabilities are sent back to the books of the branch by means of reverse entries. The following entries are passed for incorporation :

Journal Entries

1. For branch assets

Branch Assets Account(s) Dr. [Individually]
To Branch Account

2. For branch liabilities

Branch Account Dr. [Individually]
To Branch Liabilities Account

Illustration 53

The following is the Trial Balance of Meerut Branch as on 31st December, 2014:

Particulars	Dr. (₹)	Cr. (₹)	Particulars	Dr. (₹)	Cr. (₹)
Delhi head office		5,000	Debtors	3,700	
Stock 1st January 2014	6,000		Creditors		1,850
Purchases	1,06,040		Rent	1,960	
Goods received from head office	19,000		Sundry office expenses	1,470	
Sales		1,38,000	Cash at bank	1,780	
Goods supplied to head office		6,000	Furniture	6,000	
Salaries	4,500		Depreciation on furniture	400	
			TOTAL	1,50,850	1,50,850

Stock at branch on 31st December, 2014 was valued at ₹ 7,700.

Meerut Branch Account in the head office books on 31st December, 2014 stood at ₹ 8,700 (debit balance). On 28th December, 2014 the head office forwarded goods of the value of ₹ 3,700 to the branch where they were received on 3rd January, 2015.

(i) Prepare Trading and Profit and Loss Account of Meerut branch for the year ended 31st December, 2014 and its Balance Sheet as on that date.
(ii) Pass Journal Entries in the books of the head office to incorporate the above-mentioned trial balance, and
(iii) Show Meerut Branch Account as it would be closed in the head office's ledger.

Solution

(i) In this problem, Meerut Branch Trading and Profit and Loss Account as well as Balance Sheet are to be prepared in the usual manner as if it is a separate business. The balance of Head Office Account (₹ 5,000) should be treated as Capital.

Dr. Meerut Branch Trading and Profit and Loss Account for the year ended 31st December, 2014 Cr.

Particulars	₹	Particulars	₹
To Opening stock	6,000	By Sales	1,38,000
To Purchases	1,06,040	By Goods supplied to H.O. (Note 4)	6,000
To Goods received from H.O.	19,000	By Closing stock	7,700
To Gross Profit c/d	20,660		
	1,51,700		1,51,700
To Salaries	4,500	By Gross Profit b/d	20,660
To Rent	1,960		
To Sundry office expenses	1,470		
To Depreciation on furniture	400		
To Net Profit	12,330		
	20,660		20,660

Meerut Branch Balance Sheet as at 31st December, 2014

Liabilities		₹	Assets	₹
Delhi head office:			Furniture	6,000
Opening balance	5,000		Debtors	3,700
Add: Profit	12,330	17,330	Closing stock	7,700
Creditors		1,850	Cash at bank	1,780
		19,180		19,180

(ii) For incorporation of Branch Trial Balance, the following entries are to be passed:

In the books of the Head Office

Journal

Date	Particulars		L.F.	Dr. ₹	Cr. ₹
2014 Dec. 31	Meerut Branch Trading A/c	Dr.		1,31,040	
	To Meerut Branch A/c (Note 1)				1,31,040
	(Being the incorporation of opening stock purchases and goods received from head office)				
	Meerut Branch A/c	Dr.		1,51,700	
	To Meerut Branch Trading A/c (Note 2)				1,51,700
	(Being the incorporation of sales, goods supplied to head office and closing stock)				
	Meerut Branch Trading A/c	Dr.		20,660	
	To Meerut Branch Profit & Loss A/c				20,660
	(Being the gross profit transferred to Branch Profit & Loss Account)				
	Meerut Branch Profit & Loss A/c	Dr.		8,330	
	To Meerut Branch A/c (Note 3)				8,330
	(Being the incorporation of branch expenses i.e. salaries, rent etc.)				
	Meerut Branch Profit & Loss A/c	Dr.		12,330	
	To General Profit & Loss A/c				12,330
	(Being the incorporation of branch net profit)				
	Goods-in-Transit A/c	Dr.		3,700	
	To Meerut Branch A/c				3,700
	(Being the goods sent to branch on 28th December 2014 received on 3rd Jan., 2014)				
	Meerut Branch Furniture A/c	Dr.		6,000	
	Meerut Branch Debtors A/c	Dr.		3,700	
	Meerut Branch Stock A/c	Dr.		7,700	
	Meerut Branch Cash A/c	Dr.		1,780	
	To Meerut Branch A/c				19,180
	(Being the incorporation of branch assets)				
	Meerut Branch A/c	Dr.		1,850	
	To Meerut Branch Creditors A/c				1,850
	(Being the incorporation of branch liability)				

Dr. (iii) In the books of the Head Office Meerut Branch Account Cr.

Date	Particulars	₹	Date	Particulars	₹
31.12.2014	To Balance b/d	8,700	31.12.2014	By Meerut Branch Trading A/c (Note 1)	1,31,040
	To Meerut Branch Trading A/c (Note 2)	1,51,700		By Meerut Branch Profit & Loss A/c	8,330
	To Meerut Branch Creditors A/c	1,850		By Goods-in-Transit A/c	3,700
				By Meerut Branch Assets A/c	19,180
		1,62,250			1,62,250

Tutorial Notes:

(1) In Branch Trial Balance, Delhi Head Office Account shows a ***credit*** balance of ₹ 5,000. It means that in the head office book, Meerut Branch Account should show a ***debit*** balance of ₹ 5,000. But in the head office book, it shows a ***debit*** balance of ₹8,700. The difference of ₹ 3,700 is due to goods in transit.

(2) After incorporation of Branch Trial balance, the Branch Account in the head office book will not show any balance.

Working Notes:

(1) Opening stock ₹ 6,000 + Purchases ₹ 1,06,040 + Goods received from H.O. ₹ 19,000 = ₹ 1,31,040.

(2) Sales ₹ 1,38,000 + Goods supplied to H.O. ₹ 6,000 + Closing stock ₹ 7,700 = ₹ 1,51,700.

(3) Salaries ₹ 4,500 + Rent ₹ 1,960 + Office expenses ₹ 1,470 + Depreciation ₹ 400 = ₹ 8,330.

(4) Goods supplied to head office should not be treated as goods returned to head office. They have been treated as goods sold to head office.

Abridged Incorporation

Illustration 54

From information given in ***Illustration 61***, prepare Memorandum Branch Trading and Profit and Loss Account and pass necessary Journal Entries to incorporate Meerut branch balances and prepare Meerut Branch Account in the head office books.

Solution — Memorandum Meerut Branch Trading and Profit and Loss Account

	To General Profit & Loss A/c	12,330			
		22,880			22,880

Tutorial Notes:

(1) The students should note that, under this method, individual items of Trading and Profit and Loss Account are not incorporated in the books of the head office. Only the net profit of the branch is incorporated. Branch profit is calculated with the help of a Memorandum Trading and Profit and Loss Account.

(2) Branch assets and liabilities are incorporated in the same manner in the case of detailed incorporation method.

Illustration 55

C. Co. Ltd. of Calcutta had a branch in Bombay which maintained its accounts independently. Accounts relating to fixed assets in the Bombay branch were, however, kept in the books of accounts of the head office. On 31st December, 2014 the Bombay branch extracted the following Trial Balance from its own books of accounts and forwarded the same to the head office.

Particulars	Dr. (₹)	Cr. (₹)	Particulars	Dr. (₹)	Cr. (₹)
Stock-in-Trade (1.1.2014)	20,000		Cash in hand and at bank	2,500	
Purchases	50,000		Sales		75,900
Carriage and freight inward	2,500		Sundry creditors		5,000
Goods received from head office	15,000		Miscellaneous receipts		500
Transit Insurance ch. on goods received	1,000		Purchases returns		800
Salaries	10,000		Sales returns	500	
Rents rates and taxes	3,800		Bills receivable	1,500	
General office expenses	9,000		Discount allowed	200	
Sundry debtors	7,200		Head office account		41,000
			TOTAL	1,23,200	1,23,200

The Closing stock (as at 31.12.2014) at Bombay branch was ₹ 16,000. Depreciation was to be allowed @ 15% p.a. on Branch Plant and Machinery of ₹ 25,000 and @ 20% p.a. on Branch Furniture and Fittings of ₹ 6,000. Outstanding rent in respect of the year 2014 amounted to ₹ 500. Bombay Branch account, in the head office books, showed a debit balance of ₹ 46,000 and it was revealed that the difference in the balances shown by Head Office Account and Bombay Branch Account was on account of cash-in-transit.

You are to show Journal Entries required to incorporate the above Trial Balance and other particulars in the books of the head office and also the Bombay Branch Account.

(1) Opening stock ₹ 20,000 + Purchases ₹ 50,000 + Carriage and freight ₹ 2,500 + Goods from head office ₹ 15,000 + Transit insurance ₹ 1,000 + Sales return ₹ 500 = ₹ 89,000.

(2) Sales ₹ 75,900 + Closing stock ₹ 16,000 + Purchase returns ₹ 800 = ₹ 92,700.

(3) Salaries ₹ 10,000 + Rent, rates (including outstanding) ₹ 4,300 + General office expenses ₹ 9,000 + Discount allowed ₹ 200 + Depreciation on Plant and Machinery ₹ 3,750 + Depreciation on Furniture and Fittings ₹ 1,200 = ₹ 28,450.

Illustration 56

A limited company with its Head Office in Bombay whose Branch Office in Delhi, which obtain goods partly from head office and partly from outsiders. The branch keeps a separate set of books. The following balances were extracted on 31.12.2014 :

Particulars	Bombay		Delhi	
	Dr. (₹)	Cr. (₹)	Dr. (₹)	Cr. (₹)
Share Capital Account	—	4,00,000	—	—
Plant and Machinery	2,80,000	—	—	—
Furniture and Fixture	50,000	—	25,000	—
Loose Tools	40,000	—	18,000	—
Profit and Loss Account on 1.1.2014	—	35,000	—	—
Debtors and Creditors	2,30,000	55,000	10,000	25,000
Cash in Hand	5,000	—	2,800	—
Cash at Bank	5,000	—	6,000	—
Purchases and Sales	6,00,000	8,10,000	1,12,000	2,45,000
Salaries and Wages	30,000	—	16,000	—

Rent	15,000	—	8,500	—
General Expenses	5,000	—	7,500	—
Goods from Head Office to Branch		90,000	80,000	—
Current Accounts	70,000	—	—	55,800
Opening Stock (1.1.2014)	50,000	—	40,000	—
	13,90,000	13,90,000	3,25,800	3,25,800

The difference between the balances of the Head Office Current Account and Branch Current Account is due to goods and cheque in transit as at the date of the preparation of the Trial Balance. Rent of branch office remains unpaid ₹ 150. Plant, Furniture and Loose Tools are to be depreciated at 10% p.a., 15% p.a., and 20% p.a. respectively. Stock-in-trade valued at 31.12.2014 were as follows: Head office ₹ 65,000; Branch ₹ 35,000.

Prepare a combined Trading and Profit and Loss Account for the year ended 31.12.2014 and a Balance Sheet as at the date.

Head Office	55,000			58,000	
Branch	25,000	80,000	Less: Depreciation (₹ 8,000 + ₹ 3,600)	11,600	46,400
Outstanding Rent (Branch)		150	**Investments**		Nil
			Current Assets, Loans and Advances		
			Debtors :		
			Head Office	2,30,000	
			Branch	10,000	2,40,000

			Stock-in-Trade :		
			Head Office	65,000	
			Branch	35,000	1,00,000
			Goods-in-Transit		10,000
			Cash at Bank :		
			Head Office	15,000	
			Branch	6,000	21,000
			Cheque-in-Transit		4,200
			Cash in Hand :		
			Head Office	5,000	
			Branch	2,800	7,800
		7,45,150			7,45,150

Working Note : (1) In the books of the Head Office, Branch Current Account balance is ₹ 70,000 but in the books of the Delhi Branch, Head Office Current Account balance is ₹ 55,800. Total difference is ₹ 70,000 – ₹ 55,800 = ₹ 14,200. Difference due to Goods-in-Transit' is ₹ 10,000 (₹ 90,000 – ₹ 80,000) and the balance ₹ 4,200 is due to cheque-in-transit. The Branch Current Account will appear as follows:

Dr. Delhi Branch Current Account Cr.

Date	Particulars	₹	Date	Particulars	₹
	To Balance b/d	70,000		By Goods-in-Transit*	10,000
				By Cash-in-Transit	4,200
				By Balance c/d	55,800
		70,000			70,000

*Goods sent by head office = ₹ 90,000 but goods received by the branch ₹ 80,000. Therefore, goods of ₹ 10,000 still in transit.

Illustration 57

Imphal Branch of a business having head office in Calcutta prepares its accounts independently. The position as on 31.12.2014 is depicted below :

Particulars	Calcutta Head Office		Imphal Branch	
	Dr. (₹)	Cr. (₹)	Dr. (₹)	Cr. (₹)
Bills Receivable / Bills Payable	—	11,800	6,000	—
Debtors / Creditors	78,500	39,600	58,400	29,200
Stock	1,42,000	—	72,000	—
Cash and Bank	1,07,400	—	44,200	—
Fixed Assets	4,53,500	—	1,59,400	—
Profit and Loss Account	—	1,46,600	—	30,600
Capital	—	8,82,000	—	—
Branch Account	2,98,600	—	—	—
Head Office Account	—	—	—	2,80,200
TOTAL	10,80,000	10,80,000	3,40,000	3,40,000

It is revealed that the above accounts for the year ended 31.12.2014 were prepared without considering the following facts:

(a) Goods worth ₹ 4,400 had been despatched by the head office to Imphal on 27.12.2014 but the goods did not reach there till 2.1.2015.

(b) As per convention, the branch should be charged with ₹ 3,000 for administrative services rendered by the head office.

(c) The branch had sent a bank draft to the head office on 30.12.2014 for ₹ 10,000. But the draft reached head office after 31.12.2014.

(d) Stock stolen in transit ₹ 4,000 (uninsured). The stock was invoiced by the head office to the branch and charged to the Branch Account. But the branch manager refused to consider it in the branch books.

(e) Depreciation on some branch assets (of which accounts are maintained in head office books) not provided for ₹ 2,500.

(f) The balance of branch profit should be transferred to the head office books.

Show the necessary adjustment entries in the books of the head office and the branch and prepare the Balance Sheet of the business as on 31.12.2014.

Solution **In the books of Head Office (Calcutta)**

Journal

Date	Particulars	L.F.	Dr. ₹	Cr. ₹
2014 (a) Dec. 31	Goods-in-Transit A/c Dr.		4,400	
	To Imphal Branch A/c			4,400
	(Being goods sent to Imphal Branch on 27.12.2014 but the goods have not been received by branch, now adjusted)			
(b)	Imphal Branch A/c Dr.		3,000	
	To Profit and Loss A/c			3,000
	(Being amount charged to Imphal Branch for admisinistrative services rendered by H.O.)			
(c)	Cash-in-Transit A/c Dr.		10,000	
	To Imphal Branch A/c			10,000
	(Being bank draft sent by branch on 30.12.2014 but received by H.O. after 31.12.2014, now adjusted)			
(d)	Profit and Loss A/c Dr.		4,000	
	To Imphal Branch A/c			4,000
	(Being goods stolen in transit and charged to Branch but the branch manager refused to accept it, now adjusted in the H.O. Profit and Loss Account)			
	Tutorial Note : It should be noted that after passing (a), (c) and (d) entries above, the Branch A/c balance in H.O. book will be (₹ 2,98,600 – ₹ 4,400 – ₹ 10,000 – ₹ 4,000) = ₹ 2,80,200. Now it is matching with the balance of Head Office Account (in the branch's books).			
(e)	Imphal Branch A/c Dr.		2,500	
	To Imphal Branch Fixed Assets A/c			2,500
	(Being depreciation on fixed assets of Imphal Branch adjusted)			
(f)	Imphal Branch A/c Dr.		25,100	
	To Profit and Loss A/c (Note 1)			25,100
	(Being the incorporation of branch profit)			
	Profit and Loss A/c (Note 3) Dr.		1,70,700	
	To Capital Account			1,70,700
	(Being total profit transferred to Capital Account)			
	Branch Bills Receivable A/c Dr.		6,000	
	Branch Debtors A/c Dr.		58,400	
	Branch Stock A/c Dr.		72,000	
	Branch Cash and Bank A/c Dr.		44,200	
	Branch Fixed Assets A/c Dr.		1,59,400	
	To Imphal Branch A/c			3,40,000
	(Being the incorporation of branch assets in the H.O. book)			
	Imphal Branch A/c Dr.			
	To Branch Creditors A/c		29,200	
	(Being the incorporation of branch liability in the H.O. book)			29,200
	Tutorial Note : Last four entries have not been asked in the question. Yet, these entries are required to be passed to close the Imphal Branch Account in the H.O., book (See Working Note 4 for details).

Closing the Books of Account of the Branch

At the end of the accounting period, the books of accounts of the branch are also closed.

For the purpose of closing the books of accounts, any of the following two methods can be adopted by the branch:

Method 1

Under this method all items of Trial Balance are closed through the ***Head Office Account***. Usual entries are passed in the branch books for depreciation on fixed assets, outstanding salaries etc. The following entries are passed to close the books of the branch:

1. For revenue items on the debit side of the Branch Trading and Profit and Loss Account

Head Office Account Dr.

To Opening Stock Account

To Purchases Account
To Goods received from Head Office Account
To Wages Account
To Rent Account
To Salaries Account
To Depreciation etc. Account

2. For revenue items on the credit side of the Branch Trading and Profit and Loss Account

Sales Account Dr.
Purchases Returns Account Dr.
Closing Stock Account Dr.
Discount Received Account Dr.
To Head Office Account

3. For branch assets

Head Office Account Dr.
To Debtors Account
To Cash at Bank Account
To Cash-in-Transit Account
To Closing Stock Account

4. For branch liabilities

Outstanding Expenses Account Dr.
Creditors Account Dr.
To Head Office Account

[After passing the above entries, the Head Office Account will not show any balance]

Illustration 58

A Madras Head Office has an independent branch at Ahmedabad. From the following particulars, give Journal Entries to close the books of the Ahmedabad branch. Show also the Madras Head Office Account in the branch books.

Trial Balance of Ahmedabad Branch as at 31st December, 2014

Particulars	₹.	Particulars	₹.
Stock on 1st January	8,200	Creditors	2,700
Purchases	12,800	Sales	34,950
Wages	6,550	Head office	14,000
Manufacturing expenses	3,400	Discount	150
Rent	1,700	Purchase returns	300
Salaries	5,500		
Debtors	4,000		
General expenses	2,000		
Goods received from Head Office	7,200		
Cash at bank	750		
	52,100		52,100

(a) Closing stock at branch was ₹ 14,350.
(b) The branch fixed assets maintained at H.O. books were: Machinery ₹ 25,000, Furniture ₹ 1,000. Depreciation was to be allowed at 10 per cent on Machinery and 15 per cent on Furniture.
(c) Rent due was ₹ 150.
(d) A remittance of ₹ 4,000 made by the branch on 28th December, 2014 was received by the Head Office on 4th January, 2015.

Vivek & Co of Bombay have a branch in Goa. Goods sold at Goa are supplied from Bombay but no charge is made in the books as between the branch and the head office. Cash remittances are made by the branch to the head office from time to time. On September 30, 2014, the branch Balance Sheet after closing the book was as follows:

Liabilities	₹	Assets	₹
Creditors	60,000	Debtors	3,00,000
Head Office Account	2,52,000	Cash at bank	12,000
		Building extension A/c transferred to H.O. A/c	Nil
	3,12,000		3,12,000

For the six months ending 31st March, 2015, the following transactions took place at Goa Branch (all figures in ₹):

Sales	3,60,000	Discount allowed	12,000
Purchases	72,000	Discount earned	1,800
Wages paid	30,000	Cash paid to creditors	90,000
Salaries (including ₹ 3,000 paid in advance)	6,000	Cash sent to bank	1,20,000

Fire Insurance premium paid for one year	4,800	Building A/c (further payments to contractors)	6,000
Manager's salary for 9 months	10,800	Cash in hand	2,400
Cash collection from Debtors	2,40,000	Cash at bank	42,000

Prepare the Head Office Account in the books of Goa branch as on 31st March 2015 to show entries after the books are closed and also the branch Balance Sheet on the same date, assuming that it is to be made on the same lines as on 30th September 2014.

Method 2

Under this method, branch will pass usual closing entries for transforming all revenue items to its Trading and Profit and Loss Account. The net profit or loss is transferred to Head Office Account. Different assets and liabilities are closed through Head office Account in the usual manner. The following Journal Entries are passed:

1. For net profit

Profit and Loss Account Dr.
To Head Office Account

2. For net loss

Head Office Account Dr.
To Profit and Loss Account

After transferring branch profit/loss to Head Office Account, the balance of the Head Office Account in the branch books will be equal to net assets (Assets – Liabilities). Now the branch can prepare its Balance Sheet, taking net assets as capital of the branch.

However, the branch may also close the Assets and Liabilities Account by passing the following entries.

1. For closing Assets Account

Head Office Account Dr.
To Assets Accounts [Individually]

2. For closing Liabilities Account

Liabilities Accounts Dr. [Individually]
To Head Office Account

[After passing above entries, the Head Office Account will not show any balance].

Illustration 60

From the information given in ***Illustration 58***, pass Journal Entries in the books of Ahmedabad branch to close the books and prepare its Head Office Account.

Foreign Branches

When a branch is established abroad, it is called a ***Foreign Branch***. The accounting arrangements for a foreign branch are exactly the same as for any independent branch, up to the Trial Balance. But in this case accounts are maintained in foreign currency to correspond with the local conditions. The main problem which the Head Office has to face is the restatement of accounts of one currency into another. In order to incorporate the Trial Balance of a foreign branch in the books of the Head Office, it must be translated into the currency of the Head Office as per the provision of AS-11 — "***The Effects of Changes in Foreign Exchange Rates***".

The conversion rate will depend upon the classification of foreign operations.

Classification of Foreign Operations

Foreign operations are classified as :

(i) Integral foreign operations; and (ii) Non-integral foreign operations.

An ***integral*** foreign operation is a dependent foreign operation or an extension of the activities of the reporting enterprise.

For example, Tata Motors Ltd. has a branch office at Dhaka, Bangladesh. This branch is exclusively selling Tata commercial vehicles and passenger cars and remits the cash immediately to Tata Motors Ltd.
This is an integral foreign operation.

A ***non-integral*** foreign operation tends to act as a ***stand-alone*** unit, accumulates cash and other monetary items, incurs expenses, generate incomes and perhaps arranges borrowings, all substantially in its local currency.

The following are indications that a foreign operation is a non-integral foreign operation rather than an integral foreign operation:

(a) while the reporting enterprise may ***control the foreign operation***, the activities of the foreign operation are carried out with a ***significant degree of autonomy*** from those of the reporting enterprise;
(b) transactions with the reporting enterprise are not a high proportion of the foreign operation's activities;
(c) the activities of the foreign operation are financed mainly from its own operations or local borrowings rather than from the reporting enterprise;
(d) costs of labour, material and other components of the foreign operation's products or services are primarily paid or settled in the local currency rather than in the reporting currency;
(e) the foreign operation's sales are mainly in currencies other than the reporting currency;
(f) cash flows of the reporting enterprise are insulated from the day-to-day activities of the foreign operation rather than being directly affected by the activities of the foreign operation;
(g) sales prices for the foreign operation's products are not primarily responsive on a short-term basis to changes in exchange rates but are determined more by local competition or local government regulation; and
(h) there is an active local sales market for the foreign operation's products, although there also might be significant amounts of exports.

The appropriate classification for each operation can, in principle, be established from factual information related to the indicators listed above. In some cases, the classification of a foreign operation as either a non-integral foreign operation or an integral foreign operation of the reporting enterprise may not be clear, and judgement is necessary to determine the appropriate classification.

Translation of Foreign Integral Operations

The financial statements of an integral foreign operation should be translated as if the transactions of the foreign operation had been those of the reporting enterprise itself.

The cost and depreciation of tangible fixed assets is translated using the exchange rate at the date of purchase of the asset or, if the asset is carried at fair value or other similar valuation, using the rate that existed on the date of the valuation. The cost of inventories is translated at the exchange rates that existed when those costs were incurred. The recoverable amount or realisable value of an asset is translated using the exchange rate at the date as at which the net realisable value is determined. The rate used is therefore usually the closing rate.

Illustration 61

On 31st March, 2014, the following ledger balances have been extracted from the books of Washington Branch Office :

Ledger Accounts	
Building	180
Stock as on 1.4.2013	26
Cash and Bank Balances	57
Purchases	96
Sales	110
Commission Receipts	28
Debtors	46
Creditors	65

You are required to convert above ledger balances into Indian Rupees.
Use the following rates of exchange :
(a) Opening rate : ₹ 46 per $
(b) Closing rate : ₹ 50 per $
(c) Average rate : ₹ 48 per $
(d) For fixed assets : ₹ 42 per $.
[Assumed that the branch is an integral foreign operation of the Indian company.]

Solution **Conversion of Ledger Balances (in Dollars) into Rupees**

Ledger Balances	Dollar		Rate of Exchange	Rupees	
	Dr.	Cr.	Per $	Dr.	Cr.
1. Building	180	–	42	7,560	–
2. Stock as on 1.4.2013	26	–	46	1,196	–
3. Cash and Bank Balances	57	–	50	2,850	–
4. Purchases	96	–	48	4,608	–
5. Sales	–	110	48	–	5,280
6. Commission Receipts	–	28	48	–	1,344
7. Debtors	46	–	50	2,300	–
8. Creditors	–	65	50	–	3,250

Points to Remember

Sl. No.	Items	Conversion Rules
1.	Fixed assets and depreciation thereon	Rate applicable on the date of purchase
2.	Fixed liabilities	Rate applicable when incurred
3.	Current assets/liabilities	Rate prevailing at the year-end
4.	Opening stock	Rate prevailing at the beginning of the year
5.	Revenue items	Average rate of the period
6.	Closing stock	Rate prevailing at the year-end
7.	Remittances	Actual rates at which these were made
8.	H.O. Current Account	At the actual figures shown for the Branch Account in the books of the H.O.

Illustration 62

DM Ltd., Delhi has a branch in London. London branch is an integral foreign operation of DM Ltd. At the end of the year 31st March, 2015, the branch furnishes the following Trial Balance in UK Pound.

Particulars	Dr.	Cr.
Fixed Assets (acquired on 1st April, 2011)	24,000	—
Stock as on 1st April, 2014	11,200	—
Goods from Head Office	64,000	—
Expenses	4,800	—
Debtors	4,800	—

Creditors	—	3,200
Cash at Bank	1,200	—
Head Office Account	—	22,800
Purchases	12,000	—
Sales	—	96,000
	1,22,000	1,22,000

In head office books, the Branch Account stood as shown below :

London Branch Account

Particulars	₹	Particulars	₹
To Balance b/d	20,10,000	By Bank A/c	52,16,000
To Goods Sent to Branch	49,26,000	By Balance c/d	17,20,000
	69,36,000		69,36,000

The following further information are given :

(a) Fixed assets are to be depreciated @ 10% p.a. on straight line basis.

(b) On 31st March, 2015 :
Expenses outstanding £ 400
Prepaid expenses £ 200
Closing stock £ 8,000

(c) Rate of Exchange :
1st April, 2011 ₹ 70 to £ 1
1st April, 2014 ₹ 76 to £ 1
31st March, 2015 ₹ 77 to £ 1
Average ₹ 75 to £ 1

You are required to prepare :

(i) Trial Balance incorporating adjustments of outstanding and prepaid expenses, converting UK Pound into Indian Rupees.

(ii) Trading and Profit and Loss Account for the year ended 31st March, 2015 and the Balance Sheet as on that date of London branch as would appear in the books of Delhi head office of DM Ltd.

Solution

DM Ltd.

London Branch Converted Trial Balance as at 31st March, 2015

Sl.No.	Heads of Account	UK Pound (£)		Exchange Rate	Indian Rupee (₹)	
		Dr.	Cr.		Dr.	Cr.
1.	Fixed Assets	24,000	–	70	16,80,000	–
2.	Stock as on 1st April, 2008	11,200	–	76	8,51,200	–
3.	Goods from H.O.	64,000	–	Actual	49,26,000	–
4.	Expenses (₹ 4,800 + 400 – 200)	5,000	–	75	3,75,000	–
5.	Debtors	4,800	–	77	3,69,600	–
6.	Creditors	–	3,200	77	–	2,46,400
7.	Cash at Bank	1,200	–	77	92,400	–
8.	Head Office Account	–	22,800	Actual	–	17,20,000
9.	Purchases	12,000	–	75	9,00,000	–
10.	Sales	–	96,000	75	–	72,00,000
11.	Prepaid Expenses	200	–	77	15,400	–
12.	Outstanding Expenses	–	400	77	–	30,800
	Difference on Exchange	–	–	–	–	12,400
		1,22,400	1,22,400		92,09,600	92,09,600

Closing Stock at ₹ 77 per pound = 8,000 × ₹ 77 = ₹ **6,16,000**.

DM Ltd.

Dr. Trading, Profit and Loss Account for the year ended March, 2015 Cr.

Particulars	₹	Particulars	₹
To Opening Stock	8,51,200	By Sales	72,00,000
To Purchases	9,00,000	By Closing Stock	6,16,000

To Goods from H.O.	49,26,000		
To Gross Profit c/d	11,38,800		
	78,16,000		78,16,000
To Expenses	3,75,000	By Gross Profit b/d	11,38,800
To Depreciation (10% of ₹ 16,80,000)	1,68,000	By Difference on Exchange (See Note below)	12,400
To Net Profit	6,08,200		
	11,51,200		11,51,200

Tutorial Note : AS-11 (revised) states that in case a foreign operation is determined as an integral operation, financial statements should be translated using the same principle, as if the foreign operation had been those of the reporting entity itself. The resulting exchange gain or loss should be recognised in the Statement of Profit and Loss.

DM Ltd.
Balance Sheet of as at 31st March, 2015

Liabilities	₹	₹	Assets	₹	₹
Head Office Balance	17,20,000		Fixed Assets	16,80,000	
Add: Profit	6,08,200	23,28,200	Less: Depreciation	1,68,000	15,12,000
Outstanding Expenses		30,800	Debtors		3,69,600
Creditors		2,46,400	Prepaid Expenses		15,400
			Closing Stock		6,16,000
			Cash at Bank		92,400
		26,05,400			26,05,400

Translation of Foreign Non-integral Operations

In translating the financial statements of a non-integral foreign operation for incorporation in its financial statements, the reporting enterprise should use the following procedures:

(a) the assets and liabilities, both monetary and non-monetary, of the non-integral foreign operation should be translated at the ***closing rate***;

(b) income and expense items of the non-integral foreign operation should be translated at exchange rates at the ***dates of the transactions***; and

(c) all resulting exchange differences should be accumulated in a foreign currency translation reserve until the disposal of the net investment.

For practical reasons, a rate that approximates the actual exchange rates, for example an average rate for the period, is often used to translate income and expense items of a foreign operation.

Illustration 63

An Indian company, Moon Star Limited has a branch at Vergina (USA). The branch is a non-integral foreign operation of the Indian company. The Trial Balance of the branch as at 31st March, 2014 is as follows :

Particulars	US $	
	Dr.	Cr.
Office equipments	48,000	—
Furniture and fixtures	32,000	—
Stock (April 1, 2013)	22,400	—
Purchases	96,000	—
Sales	—	1,66,400
Goods Sent from H.O.	32,000	—
Salaries	3,200	—
Carriage Inward	400	—
Rent, Rates and Taxes	800	—
Insurance	400	—
Trade Expenses	400	—

Head Office Account	—	45,600
Sundry Debtors	9,600	—
Sundry Creditors	—	6,800
Cash at Bank	2,000	—
Cash in Hand	400	—
TOTAL	2,18,800	2,18,800

The following further information is given :

(1) Salaries outstanding $ 400.

(2) Depreciate office equipment and furniture and fixtures @ 10% p.a. at written-down value.

(3) The head office sent goods to branch for ₹ 15,80,000.

(4) The head office shows an account of ₹ 20,50,000 due from Branch.

(5) Stock on 31st March, 2014 – $ 21,500.

(6) There were no transit items either at the start or at the end of the year.

(7) On April 1, 2014 when the fixed assets were purchased the rate of exchange was ₹ 43 to one $. On April 1, 2013, the rate was ₹ 47 per $. On March 31, 2014 the rate was ₹ 50 per $. Average rate during the year was ₹ 45 to one $.

Prepare :

(a) Trial Balance incorporating adjustments given converting dollars into rupees.

(b) Trading, Profit and Loss Account for the year ended 31st March, 2014, and Balance Sheet as on date depicting the profitability and net position of the branch as would appear in the books of Indian company for the purpose of incorporating in the main Balance Sheet.

Solution

Moon Star Limited

Virginia (USA) Branch Converted Trial Balance as at 31st March, 2014

Heads of Account	US Dollar ($)		Rate of Exchange	Indian Rupee (₹)	
	Dr.	Cr.		Dr.	Cr.
Office Equipments	43,200		50	21,60,000	
Furniture and Fixtures	2,880		50	1,44,000

Outstanding Salaries	20,000	Cash in Hand	20,000
	39,79,000		39,79,000

Tutorial Note : AS-11 (revised) states that in case a foreign operation is determined as a non-integral operation, all exchange differences should be accumulated in a foreign currency transaction reserve.

Illustration 64

S & M Ltd., Mumbai, have a branch in Sydney, Australia. The Sydney branch is an integral foreign operation of S & M Ltd. At the end of 31st March, 2015, the following ledger balances have been extracted from the books of the Mumbai Office and the Sydney Office :

Particulars	Mumbai (₹ '000)		Sydney (Austr $ '000)	
	Dr.	Cr.	Dr.	Cr.
Share Capital	—	2,000	—	—
Reserve and Surplus	—	1,000	—	—
Land	500	—	—	—
Buildings (cost)	1,000	—	—	—
Building Depreciation Reserve	—	200	—	—
Plant and Machinery (cost)	2,500	—	200	—
Plant and Machinery Depreciation Reserve	—	600	—	130
Debtors / Creditors	280	200	60	30
Stock (1.4.2014)	100	—	20	—
Branch Stock Reserve	—	4	—	—
Cash and Bank Balances	10	—	10	—
Purchases / Sales	240	520	20	123
Goods Sent to Branch	—	100	5	—
Managing Director's Salary	30	—	—	—
Wages and Salaries	75	—	45	—
Rent	—	—	12	—
Office Expenses	25	—	18	—
Commission Receipts	—	256	—	100
Branch / H.O. Current A/c	120	—	—	7
TOTAL	4,880	4,880	390	390

The following information is also available :

(1) Stock as at 31.3.2015 — Mumbai ₹ 1,50,000; Sydney A $ 3,125.

(2) Head office always sent goods to the branch at cost plus 25%.
(3) Provision is to be made for doubtful debts at 5%.
(4) Depreciation is to be provided on buildings at 10% and on plant and machinery at 20% on written-down values.
(5) The Managing Director is entitled to 2% commission on net profits.
(6) Income tax is to be provided at 47.5%.

You are required to:

(a) Convert the Branch Trial Balance into Rupees; (use the following rates of exchange)
Opening rate A$ = ₹ 20; Closing rate A$ = ₹ 24; Average rate A$ = ₹ 22; For Fixed Assets A$ = ₹ 18.

(b) Prepare the Trading and Profit and Loss Account for the year ended 31st March, 2015 showing to the extent possible H.O. results and Branch results separately. (Balance Sheet not required).

Solution (a)

	6,86	40,41	47,27		6,86	40,41	47,27
To Managing Directors Remuneration :				By Balance b/d			19,52
Salary			30				
Commission (Note 3)			41				
To Provision for Income Tax (Note 4)			8,93				
To Balance c/d			9,88				
			19,52				19,52

Working Notes :

(1) Calculation of Depreciation (₹'000)

Particulars	H.O.	Branch
Building (at cost)	10,00	—
Less : Depreciation Reserve	2,00	—
	8,00	—
(A) Depreciation @ 10%	80	—
Plant and Machinery (at cost)	25,00	36,00
Less: Depreciation Reserve	6,00	23,40
	19,00	12,60
(B) Depreciation @ 20%	3,80	2,52
Total Depreciation (A + B)	4,60	2,52

(2) Calculation of Stock Reserve (₹'000)

Particulars	₹
Closing Stock	75
Stock Reserve reqd. on Closing Stock (1/5 of 75)	15
Less: Stock Reserve on 1.4.1995	4
Additional Stock Reserve required	11

(3) Calculation of Managing Director's Commission (000)

Particulars	
Profit before Commission	19,52
Add: Provision for Doubtful Debts	86
Profit u/s 349*	20,38
Commission @ 2%	41 (aprox.)

* For calculating profit u/s 349 of the Companies Act, 1956, depreciation should be deducted based on rates given in Schedule XIV to the Companies Act, 1956. In the Question, rates as per Schedule XIV are not given. Therefore, adjustment for depreciation is ignored.

(4) Calculation of Provision for Income Tax **('000)**

Particulars		
Profit before commission)		19,52
Less: Managing Director's Remuneration		71
		18,81

Provision for income tax@47.5% on ₹18,81,000 =₹ 8,93,000.

KEY POINTS

- From an accounting point of view, the branches can be divided into the following main classes:
  - ¤ Home Branches
    (a) Dependent branches (where the head office maintains all the accounts)
    (b) Independent branches (where the branch keeps its own accounts)
  - ¤ Foreign Branches
    They almost invariably trade independently and record their transactions in foreign currency.
- There are three main methods of accounting for branch transactions, viz.
  - ¤ Debtors System
  - ¤ Stock and Debtors System
  - ¤ Final Accounts System
- Under 'Debtors System', a Branch Account is opened for each branch in the head office ledger. all transactions relating to that branch are recorded in this account. the Branch Account exhibits the profit or loss for an accounting period as well as net assets laying with the branch.
- Stock and Debtors system is generally used when the goods are sent to the branch at an invoice price and the size of the branch is large. Under this system, the branch maintains a few central accounts to exercise greater control over the branch stock and other related expenses. These accounts usually are: (i) Branch Stock Account; (ii) Branch Debtors Account; (iii) Goods Sent to Branch Account; (iv) Branch Adjustment Account; (v) Branch Cash Account; (vi) Branch Expenses Account; (vii) Branch Profit and Loss Account; and (viii) Branch Fixed Assets Account.
- Sometimes, a separate Branch Profit and Loss Account is not opened. In that situation, the Branch Adjustment Account will show net profit/loss of the branch. In this case, branch expenses, pilferage (cost + loading), theft (cost + loading), and shortage in stock (cost + loading) are charged to Branch Adjustment Account. Similarly, surplus in stock (cost + loading) is credited to Branch Adjustment Account.
- **Treatment of Some Typical Items**
  - ¤ ***Normal loss*** : No treatment is required even if it is given specifically in the examination problem. However, for calculating Branch Closing Stock (when it is not given) normal loss is credited to Branch Stock Account at invoice price. Normal Loss Account is closed by debiting to Branch Adjustment Account.
  - ¤ ***Pilferage/Theft*** : In retail trade, pilferage or shoplifting is very common and this has come to be regarded as a normal business loss. The loading of such goods is charged to Branch Adjustment Account and cost is charged to Branch Profit and Loss Account.

KEY POINTS (Contd.)

- ¤ ***Shortage in stock*** : Shortage in stock may be due to spoilage, leakage, sales in small quantity, etc. Loading on shortage in stock should be charged to Branch Adjustment Account and cost of such goods should be charged to Branch Profit and Loss Account.
- ¤ ***Surplus in stock*** : Loading on surplus in stock is credited to Branch Adjustment Account and cost of such goods is credited to Branch Profit and Loss Account.
- ¤ ***Loss by fire/loss-in-transit*** : Loading on goods lost by fire/in-transit should be charged to Branch Adjustment Account and the cost of such goods should be charged to **General Profit and Loss Account**.

- When the size of the branches is very large, their functions become complex. In such a situation, it is desirable or practicable for each branch to establish its own double entry book-keeping system quite separate from those of head office. Under this system of branch accounting, the branches are treated as separate, independent units. These types of branches are known as ***Independent Branches***.
- On principle, the adjustment entry should be passed in the books of the head office because all in-transit items are detected by the head office after receiving copy of Trial Balance (or copy of Final Accounts) and at this stage, it is not desirable to change the balances in the branch books.
  Goods-in-Transit are shown in the Balance Sheet of head office.

THEORETICAL QUESTIONS

1. Explain the distinguishing features between branch accounts and departmental accounts.
2. What are the main classes of branch accounts ?

Hire Purchase Accounts

Introduction

With an increasing demand for better life, the consumption of goods has been on the expanding scale. But, this has not been backed up by adequate purchasing power, transforming it into effectual demand, i.e, actual sale at set or settled prices. This has created the market for what is called ***hire purchase***.

When a person is unable to acquire an asset against immediate cash payment, or is not sure to make payment within a stipulated period of time he may make some arrangements with the seller to stagger the payment. This enables the purchaser to use the asset while paying for it by instalments over an agreed period of time. This type of a business deal is known as ***hire purchase transaction***. Here, the customer pays the entire amount either in monthly or quarterly or yearly instalments, while the asset — the durable (television, fridge, etc.,) remains the property of the seller until the buyer squares up his entire liability. For the seller the contracted instalments include his interest on the credit to the purchaser. Therefore, when the total amount is paid in instalments over a period of time, the total amount paid is certainly higher than the cash down price of the article because of the counterveiling interest charges.

Obviously, both the parties gain in the bargain. By virtue of this process, the purchaser has the immediate use of the asset without making down right payment from his own, he gets both credit and product from the same seller. From the point of view of the seller, the benefit rests in the enhancement of his sale while he recovers his own cost of credit — the credit he had from the financier — from the hire purchaser.

Thus, it is not surprising that in consumer durables, in particular, the hire purchase system has increased its share of the total market. It is to be noted that the process is being extended to the production firms where the producers obtain costly machinery and implements under this system as in a single-window operation — credit and asset from the same business entity.

Nature of Hire Purchase Agreement

Under the Hire Purchase System the customer (called the Hire Purchaser) obtains possession of the goods at the outset and can use it, while paying for it by instalments over an agreed period of time. However, the ownership of the goods remains with the seller (called the Hire Vendor) until the hire purchaser has made all the payments. Each instalment paid by the hire purchaser is treated as hire charges for using the asset. In case he fails to pay any of the instalments (even the last one) the hire vendor will take back his goods without compensating the buyer, i.e., the hire vendor is not going to pay back a part or whole of the amount received through instalments from the buyer.

The special features of the hire purchase agreement are:

(1) The hire vendor transfers only possession of the goods to the hire purchaser immediately after the contract for hire purchase is made.

(2) The goods should be delivered by the hire vendor on the condition that a hire purchaser should pay the agreed amount in periodical instalments.

(3) The hire purchaser generally makes a down payment (initial payment) on signing the agreement and the balance of the amount alongwith interest is paid in instalments at regular intervals for a specified period.

(4) Each instalment including down-payment (if any) is treated as hire charges by the seller.

(5) Each instalment consists partly of a finance charge (interest) and partly of a capital payment.

(6) The hire purchaser should be given power to exercise the option to purchase the hired goods.

(7) The property in goods is to pass to the hire purchaser on the payment of the last instalment and exercising the option conferred upon him under the agreement.

(8) The hire purchaser has the right to terminate the agreement at any time before the property so passes.

(9) In case of default in respect of payment of even the last instalment, the hire vendor has the right to take the goods back without making any compensation.

Legal Position

"Hire Purchase" and "Hire Purchase Agreements" have been defined in the Hire Purchase Act, 1972. Though the Act was passed by the Parliament and had got the assent of the President, the date of coming into effect of the Act, was rescinded.

Section 2: Definition — In this Act, unless the context otherwise requires, — "hire purchase agreement" means an agreement under which goods are let on hire and under which the hirer has an option to purchase them in accordance with the terms of the agreement and includes an agreement under which —

(i) possession of goods is delivered by the owner thereof to a person on condition that such person pays the agreed amount in periodical instalments, and

(ii) the property in the goods is to pass to such person on the payment of the last of such instalments, and

(iii) such person has a right to terminate the agreement at any time before the property so passes.

Accounting Arrangements of Hire Purchase Transaction

In connection with the accounting for goods sold on the hire purchase system, we should know the meaning of the following terms:

1. **Hire Vendor** : The seller in a hire purchase agreement.
2. **Hire Purchaser** : The buyer in a hire purchase agreement.
3. **Cash Price** : The amount to be paid on outright purchase in cash.
4. **Down Payment** : Initial payment made at the time of signing the hire purchase agreement.
5. **Hire Purchase Price** : The amount to be paid if the goods are purchased under the hire purchase system. It includes the cash price and interest of the future instalments.

Under a hire purchase agreement, the hire purchaser obtains possession of the goods at the outset, but the ownership is not transferred until the last instalment is paid. Therefore, on a strict legal interpretation of the facts of the transaction, the hire vendor should not take any profit out of the hire purchase transaction until the final payment is made. Similarly, the hire purchaser should not include the goods as fixed assets (as most hire purchase items are of asset type) in his Balance Sheet until the final instalment is paid.

In this connection, the following points are very important :

1. AS—19 (Accounting Standard for Leases) is applicable to Hire Purchase agreement. ***Para 4*** states that "The definition of a lease includes agreements for the hire of an asset which contain a provision

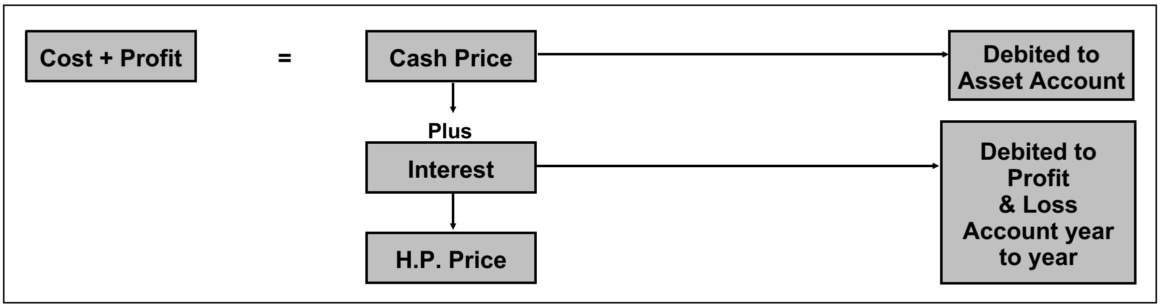
giving the hirer an option to acquire title to the asset upon the fulfillment of agreed conditions. These agreements are commonly known as hire purchase agreements. Hire purchase agreements include agreements under which the property in the asset is to pass to the hirer on the payment of the last instalment and the hirer has a right to terminate the agreement at any time before the property so passes.

2. At the inception of the hire purchase agreement, the hire purchaser should record the asset acquired on hire purchase as an ***asset***. Assets cannot be recorded on piecemeal basis with the payment of instalments.
3. Hire purchaser should recognise the ***liability*** at the inception of the hire purchase agreement.

Books of the Hire Purchaser

To have proper accounting record, some information is required in regard to the hire purchase transactions. They are as : (1) Date of purchase of the asset; (2) Cash price of the asset; (3) Hire purchase price of the asset; (4) The amount of down payment; (5) Number and amount of each instalment; (6) Rate of interest; (7) Method and rate of depreciation; and (8) Date of closing the books of account.

Before passing journal entries the students should consider the make-up of the hire purchase price:



Recording of Asset

Method 1

Under this method, the full ***cash price*** of the asset is debited to the Asset Account and credited to the Hire Vendor Account. At the time of payment of instalment, Interest Account is debited and Hire Vendor Account is credited (with the interest on outstanding balance). When instalment is paid, the Hire Vendor Account is debited and Bank Account is credited. At the time of preparation of Final Accounts, interest is transferred to Profit and Loss Account and asset is shown in the Balance Sheet at cost less depreciation. The balance due to hire vendor is shown in the Balance Sheet as a liability (alternatively it can be shown as a deduction from Asset Account). [***See Illustration 5***]

Depreciation on asset acquired on hire purchase must be charged from the date of acquisition of possession (not from the date of legal ownership) and it is to be calculated on cash price.

On January 1, 2012 Gopinath and Co. acquired a pick-up Van on hire purchase from French Motor Co. Ltd. The terms of the contract were as follows:

(a) The cash price of the van was ₹ 1,00,000.
(b) ₹ 40,000 were to be paid on signing of the contract.
(c) The balance was to be paid in annual instalments of ₹ 20,000 plus interest.
(d) Interest chargeable on the outstanding balance was 6% p.a.
(e) Depreciation at 10% p.a. is to be written-off using the straight-line method.

You are required to:

(i) Give Journal Entries and show the relevant accounts in the books of Gopinath and Co. from January 1, 2012 to December 31, 2014; and
(ii) Show the relevant items in the Balance Sheet of the purchaser as on December 31, 2012 to 2014.

Method 2

This method is almost similar to Method 1, excepting the accounting for interest. Under this method, like method 1, the full cash price of the asset is debited to Asset Account and credited to the Hire Vendor Account. At the same time the entire amount of interest payable (for all instalments) is debited to the H.P. Interest Suspense Account and credited to the Hire Vendor Account. At the time of payment of each instalment, the Hire Vendor Account is debited and the Bank Account is credited. At the same time an appropriate amount of interest is removed from the H.P. Interest Suspense Account and debited to the Interest Account. At the time of preparation of Final Accounts, the interest is transferred to the Profit and Loss Account and the balance of the H.P. Interest Suspense Account is shown in the Balance Sheet as a deduction from the Hire Vendor Account. All other entries are similar to method 1.

Sri S. Nandi purchased a machine on 30.6.2011 from A. Ltd. on Hire Purchase System. The cash price of the machine was ₹ 34,000. The agreement provided that he would pay ₹ 8,000 on delivery of the machine and the balance in 6 half-yearly instalments of ₹ 4,800 each. A. Ltd. charged interest at 6% per annum of half-yearly balances. The buyer closed his books of accounts on 31st December every year. Assuming that he decided to write-off depreciation on the machine at 10% p.a. under the diminishing balance method. Show the necessary Ledger Accounts in the books of Sri S. Nandi.

M H Ltd bought a motor vehicle on 1.1.2014, for ₹ 4,34,180 under a hire-purchase agreement. The cash price was ₹ 3,60,000. The vehicle was financed by Tata Finance Ltd. The agreement required an initial deposit of ₹ 1,20,000 on acquisition, followed by two equal instalments of ₹ 1,57,090 on 31.12.2014 and 31.12.2015, hire purchase interest being calculated @ 20% p.a. on the balance at 31 December each year.

On 31.12.2013, the balance on the Motor Vehicle Account was ₹ 16,00,000 and on the provision for depreciation (motor vehicles) ₹ 7,60,000. Depreciation is calculated @ 25% p.a. on a straight line basis, assuming no residual value. No other acquisitions or disposals took place.

Prepare necessary ledger accounts for the two years ended 31.12.2014 and 31.12.2015 and also show the relevant items in the Balance Sheet of M H Ltd as at 31st December, 2014.

Buyers Ltd. purchased a truck on January 1, 2012 on hire purchase basis from Vendors Ltd. The cash down price was ₹ 30,000. The terms of purchase were as under:

(a) ₹ 12,000 is payable as deposit.

(b) Balance being payable by 12 quarterly instalments of ₹ 1,920, falling due from April 1, 2012.

The financial year of the company (Buyers Ltd.) ends on June 30.

On September 30, 2013 the truck was sold for ₹ 20,000 and the hire purchase balances were settled for ₹ 10,200.

Buyers Ltd. brings the Asset Account at cash price and spreads interest equally over the period of hire purchase payments. Depreciation at 20% p.a. on cost was provided up to the date of sale.

Show the Truck Account, Vendors Ltd. Account and the Interest Suspense Account in the books of Buyers Ltd.

				By Profit & Loss A/c (Balancing figure)	1,200
		2,520			2,520

Working Notes :

(1) Depreciation @ 20% on ₹ 30,000 for 6 months = ₹ 3,000

(2) Depreciation @ 20% on ₹ 30,000 for 3 months = ₹ 1,500

(4) Interest for 2011-12 = 2/12 x ₹ 5,040 = ₹ 840. Interest has been allocated on the basis of number of instalments due in each accounting period.

(5) Interest for 2012-13 = 4/12 x ₹ 5,040 = ₹ 1,680.

(3) Calculation of total interest:

Instalments ₹ 1,920 x 12	₹ 23,040
Down payment	₹ 12,000
Hire Purchase price	₹ 35,040
Less: Cash price	₹ 30,000
Total interest	₹ 5,040

Illustration 7

Mahalaxmi Traders has bought three computers since 2013. All are subject to hire purchase agreements with the vendor, XYZ Ltd. Data relating to the computers are as follows :

Particulars	Computer A	Computer B	Computer C
Date of purchase	30.6.2013	31.3.2014	31.3.2013
Cash price	₹ 80,000	₹ 60,000	₹ 60,000
Deposit	₹ 10,400	₹ 7,200	₹ 7,200
Total interest	₹ 19,200	₹ 13,200	₹ 8,000
Number of quarterly instalments	12	12	8

The hire purchase agreements state that the first quarterly instalment is due three months after the date of purchase.

It is the firm's policy to assume that hire purchase interest accrues evenly over the life of the agreement and to credit the total hire purchase price to the vendor at the date of purchase. A Hire Purchase Interest Suspense Account is maintained.

The accounting year of the firm ends on 31st December. Depreciation on computers is at 20% p.a. on the written down value. A full year's depreciation is charged against profit in the year of purchase.

Prepare the following ledger accounts for the years ended 31.12.2013, 31.12.2014 and 31.12.2015 : (a) Computers; (b) Provision for Depreciation on Computers; (c) XYZ Limited; (d) Hire Purchase Interest Suspense.

Books of the Hire Vendor

There are different methods of recording hire purchase transactions in the books of the hire vendor. It is selected according to the type and value of goods sold, volume of transactions, the length of the period of purchase, etc. The different methods are discussed below:

Sales Method

A business that sells a few relatively large items on hire purchase may adopt this method. Under this method, hire purchase sale is treated as a credit sale. The only exception is that the vendor agrees to accept payments in instalments and for that he charges interest. Generally, a special Sales Day Book is maintained for recording all sales under hire purchase agreement. The hire vendor debits the hire purchaser with the ***cash price*** of the goods and the credit is given to the H.P. Sales Account. When an instalment falls due, the hire purchaser is debited with the interest on the amount owing and credit is given to the Interest Account. When the instalment is received, the Bank Account is debited and Hire Purchaser Account is credited. The amount due from the hire purchaser at the end of the year is shown in the Balance Sheet on the assets side as Hire Purchase Debtors.

In this connection, the students should note the following:

(i) The entire profit on sale under hire purchase agreement is credited to the Profit and Loss Account of the year in which the sale has taken place.

(ii) Interest pertaining to each accounting period is credited to the Profit and Loss Account of that year.

Interest Suspense Method

This method is almost similar to the sales method, excepting the accounting for interest. Under this method, the hire purchaser is debited with full cash price and interest (total) included in the hire selling price. Credit is given to the H.P. Sales Account and Interest Suspense Account. When the instalment is received, the Bank Account is debited and the Hire Purchaser Account is credited. At the same time an appropriate amount of interest (i.e., interest for the relevant accounting period) is removed from the Interest Suspense Account and credited to the Interest Account. At the time of preparation of Final Accounts, interest is transferred to the credit of the Profit and Loss Account. The balance of the Interest Suspense Account is shown in the Balance Sheet as a deduction from Hire Purchase Debtors.

Ascertainment of Total Cash Price

We know that the basis for accounting in the books of the hire purchaser is the ***total cash price***. Sometimes, (particularly in examination problems) the total cash price may not be given. For the purpose of ascertaining the total cash price we can use any of the following methods according to the need.

(1) Calculation of total cash price when no annuity table is given.

(2) Calculation of total cash price when annuity table is given.

Calculation of Total Cash Price when the Annuity Table is not Given

In this method, the interest included in the last instalment is to be calculated first with the help of the appropriate formula (explained below).

For example in a hire purchase transaction, apart from down payment, four other instalments are payable. The interest will be calculated first on the 4th instalment, then on the 3rd instalment, then on the 2nd instalment and lastly on the 1st instalment. Interest on down payment will be nil.

In this connection, it should be noted that the amount of interest will go on increasing from the 4th instalment to the 3rd instalment, from the 3rd instalment to the 2nd instalment and from the 2nd instalment to the 1st instalment.

We know that interest is to be calculated on the outstanding balance of cash price.

In this case, we will have to calculate the interest with the help of the total amount due on hire purchase price since the cash price is not known. For the purpose of calculating the interest, the following steps should be followed:

Step 1 : Calculate the ratio between interest and the amount due with the help of the following formula:

$$\text{Ratio of interest and amount due} = \frac{\text{Rate of interest}}{100 + \text{Rate of interest}}$$

Step 2 : Calculate the interest included in the last instalment by applying the following formula:
Interest = Total amount due at the time of instalment x Ratio of interest and amount due (as calculated in Step 1).

Step 3 : Subtract the interest (as calculated in Step 2) from this instalment to get the amount of outstanding ***cash price*** at the time of last instalment.

Step 4 : Add the cash price calculated in Step 3 to the amount of instalment due at the end of the third year.

Step 5 : Calculate the interest on the entire sum (cash price included in the 4th instalment + amount of 3rd instalment). Deduct this interest from the total amount due at the end of 3rd year to get the outstanding cash price at the time of 3rd instalment.

Step 6 : Add the cash price calculated in Step 5 to the amount of instalment due at the end of 2nd year.

Step 7 : Calculate the interest on the entire sum so obtained in Step 6.
Deduct this interest from the total amount due at the end of 2nd year to get the outstanding cash price at the time of 2nd instalment.

Step 8 : Add the cash price calculated in Step 7 to the amount of instalment due at the end of 1st year.

Step 9 : Calculate the interest on the entire sum so obtained in Step 8. Deduct this interest from the total amount due at the end of 1st year to get the outstanding cash price at the time of 1st instalment.

Step 10 : Add the cash price calculated in Step 9 to the amount of down payment, if any. The sum so obtained will be the ***total cash price***.

Illustration 10

A & Co. purchased a truck on hire purchase system. As per terms he is required to pay ₹ 70,000 down. ₹ 53,000 at the end of first year, ₹ 49,000 at the end of second year and ₹ 55,000 at the end of third year. Interest is charged @ 10% p.a.

You are required to calculate the total cash price of the truck and the interest paid with each instalment.

Solution

(1) Ratio of interest and amount due $= \frac{\text{Rate of interest}}{100 + \text{Rate of interest}} = \frac{10}{110} = 1/11$

(2) Calculation of Interest and Cash Price

No. of instalments [1]	Amount due at the time of instalment [2]	Interest [3]	Cash price [2 – 3]
3rd	55,000	1/11 of ₹ 55,000 = ₹ 5,000	50,000
2nd	*99,000	1/11 of ₹ 99,000 = ₹ 9,000	90,000
1st	**1,43,000	1/11 of ₹ 1,43,000 = ₹ 13,000	1,30,000

Total cash price = ₹ 1,30,000 + 70,000 (down payment) = ₹ 2,00,000
*₹ 50,000 + 2nd instalment of ₹ 49,000 = ₹ 99,000 ** ₹ 90,000 + 1st instalment of ₹ 53,000 = ₹ 1,43,000.

Illustration 11

On 1st January, 2012, Ray & Co. purchased a motor car from Automobile Co. on the hire purchase system. At the time of agreement a sum of ₹ 24,000 was paid out of the cash down price of the car and the balance was payable in 3 equal annual instalments together with interest @ 5% p.a. The amount of the last instalment including interest was ₹ 33,600. Depreciation was to be provided at 10% p.a. on the reducing balances.

Prepare (i) Motor Car Account and (ii) Automobile Company Account in the books of Ray & Co for the year ended on 31st December 2012 to 2014.

		13,740			13,740

Working Notes : (1) Interest is payable @ 10% p.a. but it is to be calculated at 1/2 yearly rest. The effective rate = 5% half yearly.

(1) Ratio of interest and amount due = $\frac{5}{100 + 5} = \frac{5}{105} = \frac{1}{21}$

(2) Calculation of Interest and Cash Price

No. of instalments [1]	Amount due at the time of instalment [2]	Interest [3]	Cash price [2 – 3]
3rd	₹ 6,300	1/21 of ₹ 6,300 = ₹ 300	₹ 6,000
2nd	(₹ 6,000 + 7,440) = ₹ 13,440	1/21 of ₹ 13,440 = ₹ 640	₹ 12,800
1st	(₹ 12,800 + 8,200) = ₹ 21,000	1/21 of ₹ 21,000 = ₹ 1,000	₹ 20,000
Total Cash Price = ₹ 20,000 + ₹ 10,000 = ₹ 30,000.			

Calculation of Total Cash Price when the Annuity Table is Given

The ascertainment of interest included in each instalment is relatively simple with the help of an annuity table. Under this method, the interest in each instalment is calculated from the annuity table. In an ordinary annuity table, the present values of one rupee (known as factor) are given for different interest rates and different years. To get the present value of each instalment, the amount of each instalment is multiplied by these factors. The sum of these present values are added to the down payment (if any) to arrive at the total cash price of a hire purchase transaction. The different steps are summarised below:

Step 1 : Ascertain the factors (from annuity table) applicable to different years from a given rate of interest.

Step 2 : Multiply the factors with the respective instalments to arrive at the present values of different instalments.

Step 3 : Take the total of all the present values.

Step 4 : Add down payment (if any) with the total of present values (step 3) to arrive at the cash price.

An annuity table is given below:

PRESENT VALUE FACTORS

Present value of Re 1 to be received in one payment at the end of a given number of years $(1 + r)^{-n}$

Future years	Percentage rate of Discount														
	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
1	0.990	0.980	0.971	0.962	0.952	0.943	0.935	0.926	0.917	0.909	0.901	0.893	0.885	0.877	0.870

Illustration 14

On 1.1.2012 Sharma purchased a plant from Ahuja on the hire purchase system. The hire purchase rate was settled at ₹ 60,000 payable as to ₹ 15,000 on 1.1.2012 and ₹ 15,000 at the end of three successive years. Interest was charged at the rate of 5% p.a. The asset was to be depreciated in the books of the purchaser at 10% p.a. on the reducing instalment method.

The annuity table shows that the present value of Re 1 for one, two and three years are .9524; .9070; and .8639 respectively. Calculate the total cash price of the plant.

Solution **Calculation of Cash Price**

No. of instalments	Amount of instalment [1]	Present Value of Re 1 [2]	Present Value of the Instalment [1 x 2]
1st	₹ 15,000	.952	14,280
2nd	₹ 15,000	.907	13,605
3rd	₹ 15,000	.864	12,960
		2.723	40,845
Add: Down Payment			15,000
Total Cash Price			55,845

Tutorial Note : When the amount of each instalment is equal, we can get the present value of all instalments at a time by multiplying sum of the present value factors with the amount of instalment. For example : ₹ 15,000 x 2.7230 = ₹ 40,845.

Ascertainment of Interest

We know that the hire purchase price consists of two things : (i) cash price; and (ii) interest. Cash price is the capital expenditure incurred for the acquisition of an asset and (ii) interest is the revenue expense for the delay in making the full payment. Ascertainment of any of these two gives the answer for the other, e.g., if we ascertain the total amount of interest, it becomes very simple to ascertain the cash price just by deducting the interest from the hire purchase price.

Interest is charged on the amount outstanding. Therefore, if the hire purchaser makes a down payment on signing the contract, it will not include any amount of interest. It should be noted that though the instalments of a hire purchase agreement may be equal, the interest element in each instalment is not the same.

At the time of calculating interest, students may face the following two situations:

(a) When the cash price, rate of interest and the amount of different instalements are given; and

(b) When the cash price and the amount of different instalments are given, but the rate of interest is not given.

Now, let us consider the above two situations.

When the cash price, rate of interest and the amount of different instalments are given

In this situation, the total amount of interest is to be ascertained first. It is the difference between the hire purchase price (down payment + total instalments) and the cash price. To calculate the amount of interest involved in each instalment the following steps are followed:

Step 1 : Deduct down payment from the cash price. Calculate the interest at the given rate on the remaining balance. This represents the amount of interest included in the first instalment.

Step 2 : Deduct the interest of Step 1 from the amount of first instalment. The resultant figure is the cash price included in the first instalment.

Step 3 : Deduct the cash price of the 1st instalment (Step 2) from the balance due after down payment. It represents the amount outstanding after the 1st instalment is paid.

Step 4 : Calculate the interest at the given rate on the balance outstanding after the 1st instalment. Deduct this interest from the amount of the 2nd instalment to get the cash price included in the 2nd instalment.

Step 5 : Deduct the cash price of the 2nd instalment (Step 4) from the balance due after the 1st instalment. It represents the amount outstanding after the 2nd instalment is paid.

Repeat the above steps till the last instalment is paid.

Illustration 15

X Ltd. purchased a machine on hire purchase basis from Ideal Machinery Co. Ltd. on the following terms:

(a) cash price ₹ 40,000; (b) down payment at the time of signing the agreement on 1.1.2014 ₹ 10,811; (c) 5 annual instalments of ₹ 7,700, the first to commence at the end of twelve months from the date of down payment and (d) Rate of interest is 10% p.a.

You are required to calculate the total interest and interest included in cash instalment.

Solution **Calculation of Interest**

	Total [₹]	Interest in each instalment [1]	Cash Price in each instalment [2]
Cash Price	40,000		
Less: Down Payment	10,811	Nil	₹ 10,811
Balance due after down payment	29,189		
Interest/Cash Price of 1st instalment	—	₹ 29,189 x 10/100 = ₹ 2,919	₹ 7,700 – ₹ 2,919 = ₹ 4,781
Less: Cash price of 1st instalment	4,781		
Balance due after 1st instalment	24,408		
Interest/Cash price of 2nd instalment	—	₹ 24,408 x 10/100 = ₹ 2,441	₹ 7,700 – ₹ 2,441 = ₹ 5,259
Less: Cash price of 2nd instalment	5,259		
Balance due after 2nd instalment	19,149		
Interest/Cash price of 3rd instalment	—	₹ 19,149 x 10/100 = ₹ 1,915	₹ 7,700 – ₹ 1,915 = ₹ 5,785
Less: Cash price of 3rd instalment	5,785		
Balance due after 3rd instalment	13,364		
Interest/Cash price of 4th instalment	—	₹ 13,364 x 10/100 = ₹ 1,336	₹ 7,700 – ₹ 1,336 = ₹ 6,364
Less: Cash price of 4th instalment	6,364		

Balance due after 4th instalment Interest/Cash price of 5th instalment Less: Cash price of 5th instalment	7,000 — 7,000	₹ 7,000 x 10/100 = ₹ 700	₹ 7,700 – ₹ 700 = ₹ 7,000
Total	Nil	₹ 9,311	₹ 40,000

Total interest can also be calculated as follows:
(Down payment + instalments) – Cash price = ₹ (10,811 + 7,700 x 5) – ₹ 40,000 = ₹ 9,311.

When the cash price and the amount of different instalments are given, but the rate of interest is not given

When the rate of interest is not given, but the cash price and the amount of instalments are given, the following steps are followed to calculate the interest:

Step 1 : Calculate the total interest by deducting the cash price from the hire purchase price (i.e., down payment + amount of instalment x number of instalments).
Step 2 : Deduct down payment from the hire purchase price.
Step 3 : Calculate the amount of outstanding balance of the hire purchase price at the beginning of each year.
Step 4 : Calculate the ratio of outstanding balance of Step 3.
Step 5 : Calculate the amount of interest of each instalment on the basis of the ratio of Step 4.

Illustration 16

P. Ltd. purchases a plant on hire purchase basis for ₹ 50,000 and makes the payment in the following order: Down payment ₹ 10,000; the 1st instalment after one year ₹ 20,000; the 2nd instalment after two years ₹ 10,000; and the last instalment after three years. The cash price of the plant is ₹ 43,000.

You are required to calculate : (i) the total interest and (ii) the interest included in each instalment.

Solution
(i) Total interest = Hire Purchase Price – Cash Price = ₹ 50,000 – ₹ 43,000 = ₹ 7,000.
(ii) Hire Purchase Price outstanding at the beginning of each year

	₹
Hire Purchase price	50,000
Less: Down payment	10,000
(a) Hire Purchase Price outstanding at the beginning of the 1st year	40,000
Less: 1st instalment	20,000
(b) Hire Purchase Price outstanding at the beginning of the 2nd year	20,000
Less: 2nd instalment	10,000
(c) Hire Purchase Price outstanding at the beginning of the 3rd year	10,000
Less: 3rd instalment	10,000
	Nil
Ratio of (a) : (b) : (c) = 40 : 20 : 10 or 4 : 2 : 1 Interest of 1st instalment = 4/7 x ₹ 7,000 = ₹ 4,000; Interest of 2nd instalment = 2/7 x ₹ 7,000 = ₹2,000; and Interest of 3rd instalment = 1/7 x ₹ 7,000 = ₹ 1,000.	

The students should note that if the amount of each instalment is equal, the total interest can be allocated to different instalments by the sum of the years digits method (without following the steps 2 to 5). Under this method, the interest in each instalment is calculated by multiplying the total interest by a fraction based on the sum of the number of instalments. The following illustration will explain the concept.

Illustration 17

Taking the relevant data from **Illustration 15** excluding point no. (d), calculate the interest included in each instalments.

Solution

(i) Sum of the number of instalments = (5 + 4 + 3 + 2 + 1) = 15.
(ii) Total interest = ₹ (10,811 + 7,700 x 5) – ₹ 40,000 = ₹ 9,311.
(iii) Interest of 1st instalment = 5/15 x ₹ 9,311 = ₹ 3,104
Interest of 2nd instalment = 4/15 x ₹ 9,311 = ₹ 2,483
Interest of 3rd instalment = 3/15 x ₹ 9,311 = ₹ 1,862
Interest of 4th instalment = 2/15 x ₹ 9,311 = ₹ 1,241
Interest of 5th instalment = 1/15 x ₹ 9,311 = ₹ 621

It should be noted that the amount of interest for each instalment calculated under this method will marginally vary with a given rate of interest.

Illustration 18

M/s. India Motors Ltd. sells scooters under the hire purchase system. Their payment for the sale of scooter is ₹ 1,000 on delivery, ₹ 1,040 at the end of the first year, ₹ 960 at the end of the second year, and ₹ 880 at the end of the third year, inclusive of finance charges.

Calculate the interest.

Solution

In this problem, neither the cash price nor the rate of interest is given. It may be assumed that the cash price included in each instalment (excluding down payment) is equal and the difference in the various instalments (excluding down payment) is due to the interest. It is also assumed that the rate of interest is equal althrough.

On the basis of the above assumption, we have the following equations:

Let, x = cash price included in each instalment and i = interest included in each instalment.

$x + i = ₹\ 880$ .. (i)

$x + 2i = ₹\ 960$ .. (ii)

$x + 3i = ₹\ 1{,}040$ .. (iii)

By adding equations (i) and (ii), we get $2x + 3i = ₹\ 1{,}840$ .. (iv)

By subtracting (iii) from (iv) we get

$$\begin{array}{rcl} 2x + 3i & = & ₹\ 1{,}840 \\ -x - 3i & = & -₹\ 1{,}040 \\ \hline x & = & ₹\ 800 \end{array}$$

Therefore, the cash price included in each instalment = ₹ **800**.

Details of each instalment is given in the following table: (in ₹)

	Instalment [1]	Cash Price included in each instalment [2]	Interest [1 – 2]
Down payment	1,000	1,000	Nil
1st instalment	1,040	800	240
2nd instalment	960	800	160
3rd instalment	880	800	80
Total	3,880	3,400	480

Repossession

In a hire purchase agreement the hire purchaser has an obligation to pay up to the last instalment so that the ownership of goods passes to him. If the hire purchaser fails to pay any of the instalments, the hire vendor has the right to take the asset back in its actual form without any compensation to the hire purchaser. The amounts received from the hire purchaser through down payment and instalments are treated as the hire charges by the hire vendor. This act of recovery of possession of the asset is termed as ***repossession***.

Repossessed assets are ultimately sold to other customers after repairing or reconditioning (if necessary). Accounting figures relating to repossessed assets are segregated from those which continue under hire purchase contracts in the usual way. Repossessions are then accounted for in a separate account of that name — "Goods Repossessed Account".

So far as the repossession of assets are concerned, the hire vendor can take back the whole of the asset or a part thereof depending on the agreement between the parties. The former is called "Complete Repossession" and the latter "Partial Repossession".

Complete Repossession

In the case of a complete repossession, the hire vendor closes the Hire Purchaser's Account in his books by transferring the balance of the Hire Purchaser Account to the Goods Repossessed Account. Likewise, the hire purchaser closes the Hire Vendor's Account in his books by transferring the balance of the Hire Purchase Assets Account to the Hire Vendor Account.

Entries in the Books of the Hire Vendor

1. All the entries (except the entry for payment) are passed in the usual manner upto the date of default.

2. When the goods are repossessed and the account of the hire purchaser is closed.

Goods Repossessed Account Dr.
 To Hire Purchaser Account

3. When repairing and reconditioning expenses are paid

Goods Repossessed Account Dr.
 To Bank/Cash Account

4. When repossessed goods are sold

Bank/Cash Account Dr.
 To Goods Repossessed Account

When all the above entries are incorporated in the Goods Repossessed Account, it may show a balance. If it is a debit balance, it shows a loss. Conversely, if it is a credit balance, it indicates a profit. The balance is ultimately transferred to the Profit and Loss Account.

5. For closing goods repossessed account

(i) Profit and Loss Account Dr. [***In case of Loss***]
 To Goods Repossessed Account
 OR
(ii) Goods Repossessed Account Dr. [***In case of Profit***]
 To Profit and Loss Account

Entries in the Books of the Hire Purchaser

The hire purchaser keeps two accounts — Asset Account and the Hire Vendor Account. At the time of complete repossession, both the accounts are to be closed. The following are the important Journal Entries :

1. All entries (except the entry for payment) are passed in the usual manner up to the date of default.

2. Usual entry for depreciation is also passed.

3. When the asset is taken back and the account of the hire vendor is closed

Hire Vendor Account Dr.
 To Assets Account

4. When the asset account is closed

Profit and Loss Account Dr.
 To Asset Account

Generally, an asset is repossessed at a price less than the book value. Therefore, it is a loss to the hire purchaser. In case of profit, the above entry will be reversed.

Illustration 19

Modern Transporter purchased a truck on hire purchase from Hindustan Motors for ₹ 56,000. The truck was purchased on 1st January, 2013. Payment to be made ₹ 15,000 down cash and 3 instalments of ₹ 15,000 each at the end of each year. Rate of interest charged is 5% p.a. Buyer depreciates assets at 10% p.a. on written down value method. Because of financial difficulties, Modern Transporter after having paid the down cash and the first instalment at the end of the first year could not pay the second instalment and Hindustan Motors took possession of the truck.

Prepare (a) the Truck Account; and (b) the Sellers' Account in the books of the buyer assuming that the year ends on 31st December.

Solution

In the books of Modern Transporter

Dr. **Truck Account** **Cr.**

				By Interest A/c	1,402
		29,452			29,452

Working Notes :

(1) Calculation of Interest

Interest to be paid on ₹ (56,000 – 15,000) = ₹ 41,000 @ 5% p.a. Therefore, interest will be 5% of ₹ 41,000 = ₹ 2,050.

(2) The balance in Hindustan Motors Account will be closed by transferring the amount to Truck Account. After surrender, there will be no balance in the Hindustan Motors Account.

(3) After adjusting the balance of Hindustan Motors Account, if there is any balance in the Truck Account it should be treated as loss on surrender of asset. It is to be charged to Profit and Loss Account of the year of surrender.

Illustration 20

On 1st January 2013, C.S.T.C. purchased a bus on hire purchase from French Motor Co. Ltd. for ₹ 5,60,000. Payment to be made, ₹ 1,50,000 down payment and three instalments of ₹ 1,50,000 each at the end of each year. Rate of interest is charged at 5% p.a. C.S.T.C. depreciates the bus at 10% p.a. on written-down value method. Because of financial difficulties C.S.T.C. after having paid the down payment and 1st instalment at the end of the first year could not pay the 2nd instalment and French Motor Co. Ltd. took possession of the bus on 31.12.2014 and sold it for ₹ 3,01,100 on the same date. You are required to prepare : (a) C.S.T.C. Account and Goods Repossessed Account in the books of the French Motor Co. Ltd.; and (b) Bus Account and French Motor Co. Ltd. Account in the books of C.S.T.C.

Illustration 21

Auto Distributors Ltd. sold a motor car to Sita Travel Agency on hire purchase on terms as to payment requiring four annual instalments of ₹ 28,200 at the end of each year commencing from the date of agreement on 1st January, 2012. The rate of interest was taken at 5% p.a. and the interest is included in the annual payment of ₹ 28,200.

Show Ledger Accounts in the books of Sita Travel Agency who defaulted in the payment of the third yearly instalment whereupon the vendor re-possessed the car. Sita Travel Agency was to provide depreciation on the motor car @ 10% p.a. on the straight line method.

Solution **In the books of the Sita Travel Agency**

31.12.2013	To Balance c/d	52,435	31.12.2013	By Interest A/c (Note 2)	3,840
		80,635			80,635
31.12.2014	To Motor Car A/c	55,057	1.1.2014	By Balance b/d	52,435
			31.12.2014	By Interest A/c	2,622
		55,057			55,057

Working Note: (1) Interest is payable @ 5% p.a. Therefore, the ratio of interest and amount due = $^{5}/_{105}$ = $^{1}/_{21}$.

(2) Calculation of Interest and Cash Price

No. of instalments [1]	Amount due at the time of instalment [2]	Interest [3]	Cash price [2 – 3]
4th	28,200	1/21 of ₹ 28,200 = ₹ 1,343	26,857
3rd	(26,857 + 28,200) 55,057	1/21 of ₹ 55,057 = ₹ 2,622	52,435
2nd	(52,435 + 28,200) 80,635	1/21 of ₹ 80,635 = ₹ 3,840	76,795
1st	(76,795 + 28,200)1,04,995	1/21 of ₹ 1,04,995 = *₹ 4,995	1,00,000

Total cash price = ₹ 1,00,000. *Interest for 1st year actually comes to ₹ 5,000. For balancing purposes, it has been taken as ₹ 4,995.

Illustration 22

On 1st January, 2014 Ashok acquired furniture on the hire purchase system from Real Aids Ltd., agreeing to pay four semi- annual instalments of ₹ 800 each, commencing on 30th June 2014. The cash price of the items was ₹ 3,010 and an interest of 5% p.a. was chargeable.

On 30th September, 2014 Ashok expressed his inability to continue and Real Aids seized the property. It was agreed that Ashok would pay the due proportion of the instalment upto the date of seizure and also a further sum of ₹ 200 towards depreciation. At the time of repossession, Real Aids valued the furniture at ₹ 1,500.

The company after incurring ₹ 200 towards repairs of the furniture sold the items for ₹ 1,800 on 15th October, 2014.

Show the Ledger Accounts as they would appear in the books of Real Aids Ltd., working out the profit or loss on the transaction, assuming that the company passes hire purchase transactions through its books as sales.

Solution

In the books of Real Aids Ltd.

To Goods Repossessed A/c	114	By Interest A/c ₹ (75 + 29)	104
		By Net Loss (Balancing figure)	10
	114		114

Working Notes:

(1) Amount of instalment for 6 months is ₹ 800. Therefore, amount of instalment for 3 months will be ₹ 400. Ashok paid ₹ 400 + ₹ 200 (for depreciation) = ₹ 600.

(2) Alternatively, Goods Repossessed Account can be debited at ₹ 1,500 and ₹ 214 will be charged to Profit and Loss Account. However, net loss will be the same.

Illustration 23

GH Limited acquired three excavators from MN Limited under hire purchase agreements which provided for a deposit of 10% with the balance to be paid in three annual instalments, the first of which was due one year after the signing of the agreement and the payment of the deposit. The date of purchase, capital cost and annual repayments are as under :

Excavator	Date of acquisition	Capital cost (₹)	Annual repayment (₹)
A	31st December 2011	15,000	5,428
B	31st December 2012	15,000	5,428
C	31st December 2013	25,000	8,042

All instalments were paid on the due dates except that when the excavator C was purchased, the vendor agreed to take back excavator A on the basis that GH Limited was to be credited with ₹ 5,000 in lieu of a deposit on excavator C and that no further payment was to be made in respect of excavator A after the instalment paid on 31st December, 2013.

The practice of GH Limited was to capitalise the cash value of each excavator immediately on purchase, crediting it to the vendor. Each yearly instalment included interest at the rate of 10% per annum calculated on the outstanding balance at the beginning of the year. GH Limited makes up its accounts to 31st December of each year and provides depreciation on excavators at the rate of 20% on reducing balance.

You are required to : write-up in the books of GH Limited in columnar form for the three years ended 31st December, 2014 :

(i) Asset Account for each Excavator; (ii) Vendors Account for Excavators; (iii) Assets Disposal Account; and (iv) Depreciation Provision Account for each Excavator.

		15,336			15,336

Working Note :

(1) Depreciation for 2013 = 20% of ₹ (15,000 – 3,000) = ₹ 2,400.

(2) Depreciation for 2014 = 20% of ₹ (15,000 – 5,400) = ₹ 1,920 (B).

Partial Repossession

In case of a partial repossession, only a part of the asset is taken back by the hire vendor and other part is left with the hire purchaser. The Journal Entries are as usual upto the date of default (excepting entry for payment) in the books of both the parties. As a portion of the asset is still left with the hire purchaser, neither party closes the account of the other in their respective books.

Assets are repossessed at a mutually agreed value (based on agreed rate of depreciation which is an enhanced rate). The hire vendor debits the Goods Repossessed Account and credit the Hire Purchaser Account with the value as agreed upon on the repossession. Similarly, the hire purchaser debits the Hire Vendor Account and credits the Assets Account with the same amount. If the repossessed value is less than the book value of the asset, the difference is charged to the Profit and Loss Account of the hire purchaser as '***loss on surrender***'.

For the remaining portion of the asset lying with the hire purchaser, he (Hire Purchaser) applies the usual rate of depreciation and shows the Asset Account at its usual written-down value.

Illustration 24

On 1.1.2013, X acquires on hire purchase from Y, machinery valued at ₹ 60,000 payable in three yearly instalments of ₹ 20,000, plus interest at 6% per annum. X paid the first instalment but could not pay the second. Y took back the machinery which cost ₹ 40,000, allowing ₹ 22,500 therefore. X paid all the interest due to that date on the full amount owing.

X had written off depreciation at 10% per annum on diminishing balance. Show Machinery Account and Y Account in the books of X.

Solution

		42,400			42,400
			2015 Jan 1	By Balance b/d	19,900

Working Notes :

(1) Machinery costing ₹ 40,000 was taken over by Y at an agreed value of ₹ 22,500. Machinery costing ₹ 20,000 (60,000 – 40,000) is still with X.For calculating loss on surrender of machinery, the written down value as on the date of surrender is to be calculated. The calculation has been done in the following manner :

Calculation of Loss on Surrender of Machinery Costing ₹ 40,000	₹
Cost of machinery on 1.1.2013	40,000
Less: Depreciation for 2013 @ 10% on ₹ 40,000	4,000
Written down value on 1.1.2014	36,000
Less: Depreciation for 2014 (10% of ₹ 36,000)	3,600
Written down value on 31.12.2014	32,400
Less: Agreed value for surrender of machinery	22,500
Loss on surrender	9,900

Illustration 25

From the following particulars, calculate :

(i) Value of plant taken back by the vendor.
(ii) Value of plant left with the purchaser.
(iii) Profit or loss on plants taken back.
(iv) Profit or loss on plant repossessed when sold by vendor.

Particulars :

(i) X purchased 3 plants from Y costing ₹ 1,00,000 each.

(ii) Purchaser charged depreciation @ 20% p.a. on diminishing balance method.

(iii) 2 plants were seized by the vendor when second instalment was not paid at the end of the second year and vendor valued the plants at cost less 30% depreciation annually charged at diminishing balance method.

(iv) The vendor spent ₹ 40,000 on overhauling the plants and sold for ₹ 1,60,000.

Solution

	₹	₹
(i) Value of Two Plants Taken Back by the Vendor		
Cost of 2 plants seized by the vendor = ₹ 1,00,000 x 2		2,00,000
Less: Depreciation for two years @ 30% p.a. on Diminishing Balance Method —		
1st year (30% of ₹ 2,00,000)	60,000	
2nd year (30% of ₹ 1,40,000)	42,000	1,02,000
		98,000
(ii) Value of One Plant left with the Purchaser		
Cost of 1 plant		1,00,000
Less: Depreciation for two years @ 20% p.a. on Diminishing Balance Method —		
1st year (20% of ₹ 1,00,000)	20,000	
2nd year (20% of ₹ 80,000)	16,000	36,000
		64,000
(iii) Profit or Loss on Plants Taken Back		
Book value of two plants (₹ 64,000 x 2) [See (ii) above]		1,28,000
Agreed value of two plants taken over [See (i) above]		98,000
Loss on plant taken back		30,000
(iv) Profit or Loss on Plants Repossessed		
Value of 2 plants taken over by the Vendor [See (ii) above]		98,000
Add: Cost of overhauling		40,000
Total Cost		1,38,000
Sale Price		1,60,000
Profit on Sale of Repossessed Plants		22,000

Illustration 26

Rajesh purchased seven trucks on hire purchase on 1st July, 2014. The cash purchase price of each truck was ₹ 50,000. He was to pay 20% of the cash purchase price at the time of delivery and the balance in five half-yearly instalments starting from 31st December, 2014 with interest at 5% p.a.

On Rajesh's failure to pay the instalment due on 30th June 2015, it was agreed that Rajesh would return 3 trucks to the vendor and remaining four would be retained by him. The returning price of 3 trucks was ₹ 40,500. Rajesh charged depreciation @ 20% p.a. Vendor after spending ₹ 1,000 on repairs, sold away all three trucks for ₹ 40,000.

Show Trucks Account and Vendor's Account in the books of Rajesh and Rajesh Account and Goods Repossessed Account in the books of the vendor, assuming that their books are closed on 30th June every year.

Solution

In the books of Rajesh

Trucks Account

Dr. **Cr.**

Date	Particulars	₹	Date	Particulars	₹
1.7.2014	To Vendor A/c (₹ 50,000 x 7) (Cost of Trucks)	3,50,000	30.6.2015	By Depreciation A/c (20% of ₹ 3,50,000)	70,000
			30.6.2015	By Vendor A/c (Agreed value of trucks retruned)	40,500
			30.6.2015	By Profit & Loss A/c (Note 4)	79,500
			30.6.2015	By Balance c/d (Note 5)	1,60,000
		3,50,000			3,50,000
1.7.2015	To Balance b/d	1,60,000			

Dr. Vendor Account Cr.

Date	Particulars	₹	Date	Particulars	₹
1.7.2014	To Bank A/c (Down payment)	70,000	1.7.2014	By Trucks A/c (₹ 70,000 x 5)	3,50,000
31.12.2014	To Bank A/c (Note 3)	63,000	31.12.2014	By Interest A/c (Note 1)	7,000
30.6.2015	To Trucks A/c	40,500	30.6.2015	By Interest A/c (Note 2)	5,600
30.6.2015	To Balance c/d	1,89,100			
		3,62,600			3,62,600

Working Notes :

(1) Interest is to be calculated @ 5% on ₹ (3,50,000 – 70,000) for 6 months = 5/100 x 1/2 x ₹ 2,80,000 = ₹ 7,000.

(2) Interest is to be calculated @ 5% on ₹ (3,50,000 – 70,000 + 7,000 – 63,000) for 6 months = ₹ 5,600.

(3) Amount of 1st instalment = 1/5 ₹ (3,50,000 – 70,000) + ₹ 7,000 (interest) = ₹ 56,000 + ₹ 7,000 = ₹ 63,000.

(4) Book value of three trucks returned

Cash price of 7 trucks = ₹ 50,000 x 7	= ₹ 3,50,000
Less: Depreciation for 2014-13 @ 20%	= ₹ 70,000
Book value of 7 trucks on 30.6.2013	= ₹ 2,80,000

Therefore, book value of 3 trucks = ₹ 2,80,000 / 7 x 3 = ₹ 1,20,000. Agreed value of 3 trucks = ₹ 40,500. Loss on surrender = ₹ 1,20,000 – ₹ 40,500 = ₹ 79,500.

(5) Book value of 4 trucks = ₹ 2,80,000 / 7 x 4 = ₹ 1,60,000.

Arunagshu Transport Agency purchased 2 motor vans costing ₹ 80,000 each from Debika Auto Company on 1st January 2012, on the hire purchase system. The terms of payment were as follows:

Payment of ₹ 20,000 each for motor van on delivery. Remainder in three equal instalments together with interest 10% p.a. to be paid at the end of each year.

Arunagshu Transport Agency write-off 20% depreciation each year on the diminishing balance method. The hire purchaser paid two instalments due on 31st December 2012 and 2013 but could not pay the final instalment.

Debika Auto Company re-possessed one motor van adjusting its value against the amount due. The re-possession was done on the basis of 25% depreciation on the Fixed Instalment Method.

Write-up the Ledger Accounts in the books of Arunagshu Transport Agency.

Seema Agency purchased three trucks from Vishal Automobiles Ltd on 1.1.2012, under hire purchase agreement. The cash price of each truck is ₹ 1,50,000. According to the terms and conditions of Vishal Automobiles Ltd 10% of cash price is to be paid on delivery and balance cash price in three equal yearly instalments payable at the end of each year together with interest @ 10% p.a.

Seema Agency writes off 20% depreciation on straight line method. Seema Agency paid the first and second instalment in due time but failed to pay the last instalment due on 31.12.2014.

Vishal Automobiles Ltd agreed to leave two trucks with Seema Agency and take back the third one, adjusting the value against amount due. The returned truck being valued @ 30% depreciation on diminishing balance method.

Vishal Automobiles Ltd sold the re-possessed truck for ₹ 45,000 in cash on 7.1.2015 after incurring repairing expenses of ₹ 8,000.

Show Trucks Account and Vishal Automobiles Ltd Account in the books of Seema Agency and Re-possessed Truck Account in the books of Vishal Automobiles Ltd to give effect to the above transactions.

Bombay Roadways Ltd. purchased three trucks costing ₹ 1,00,000 each from Hindusthan Auto Ltd. on 1st January, 2012 on the Hire Purchase System. The terms were : on delivery payment of ₹ 25,000 for each truck and balance of the principal amount in 3 equal instalments plus interest at 15% per annum to be paid at the end of each year.

Bombay Roadways Ltd. writes-off 25% depreciation each year on the Diminishing Balance Method. Bombay Roadways Ltd. paid the instalments due on 31st December, 2012 and 31st December, 2013 but could not pay the final instalment.

Hindusthan Auto Ltd. repossessed two trucks adjusting values against the amount due. The repossession was done on 1st January, 2015 on the basis of 40% depreciation on the Diminishing Balance Method.

You are required to: (a) Write-up the ledger accounts in the books of Bombay Roadways Ltd. showing the above transactions upto 1.1.2015, and (b) Show the disclosure of the balances arising from the above transactions in the Balance Sheet of Bombay Roadways Ltd. as on 31st December, 2014.

Hire Purchase Agreements for Goods of Small Value

The discussion so far was limited to the hire purchase transactions for goods of substantial sales value — invariably the fixed assets and the transactions were between ***two business units***. Now, the discussion will focus on the transactions between a retailer and the consumers and the hire purchase items i.e., consumer durables like T.V., fridge, etc. It should be noted that a large volume of the transactions of goods of these nature are being contracted every day and the accounting is important only from the point of view of ***the seller*** and not the buyer.

Since the sale of items of this nature are numerous and of small value, it becomes practically inconvenient for a particular retailer to maintain separate accounts for each transaction. In this case, the retailer is not interested to know the profit earned or losses incurred on each transaction — rather he is interested in knowing the overall profit or loss arising from all the transactions in a particular accounting period. It should be noted that profit and hire purchase interest are combined into one figure and it is apportioned over the hire purchase period.

When the hire purchase transactions are numerous and value of the items are small, it is preferable to open separate ***memorandum*** hire purchase books. A Hire Purchase Sales Register is kept, to disclose both the hire purchase price and the cost price of the goods. This register should also show the number of instalments payable, amount of down payment and the number of hire purchase agreement. In addition to Hire Purchase Sales Register, a Memorandum Hire Purchase Ledger is also maintained in which accounts of the customers are kept. The sale price is debited to the individual customers' accounts and these accounts being credited with all instalments paid. The total of the "sale price" column is credited to a Control Account, which is debited with the total instalments received.

It must be noted that above entries are of a memorandum nature only, and do not form a part of the double entry system. In practice, such accounts are vital and useful only for reference; but from the point of view of double entry, they are entirely useless and unnecessary.

In the general ledger, personal aspect is ignored, the entries being recorded in total only.

A specimen of the Hire Purchase Sales Register is given below:

Hire Purchase Sales Register

S.N.	Date of Agree-ment	Name of Custo-mer	Name of Article	Cost Price	H.P. Price	Down Pay-ment	No. of Instal-ments	Instalments Due				Total Instal-ments Recd.	Instal-ments due but not recd.	Instal-ment not yet due
								1	2	3	4			

The book keeper should be very careful in recording the different items in the register and casting (totalling) of the individual column, because these are the basis for the ascertainment of the profit or loss from hire purchase business. The totals of the columns of the register are very relevant for posting to the respective Control Accounts at regular intervals.

Relevant Expressions in Regard to Hire Purchase Sales of Small Items

Before studying the different accounting methods for ascertaining profit or loss on hire purchase transactions, we should be conversant to some relevant expressions which are used frequently. These are:

(1) Cost price of goods sold on hire purchase; (2) Value of goods sold on hire purchase; (3) Cash received; (4) Hire purchase debtors; (5) Hire purchase stock; and (6) Stock at shop.

(1) Cost price of goods sold on hire purchase The hire vendor buys goods either from the manufacturers directly or from the wholesellers. He sells them either against cash or under the hire purchase system. When he sells goods against cash, he does so at a profit — at a price more than the cost price. But when he sells the goods under hire purchase, he sells them at a price which is higher than the price of cash purchase. The extra charge is just to cover the loss of interest on these transactions. However, ***the interest in these transactions are not calculated separately, applying the concept of materiality***. Profit, in this case, is calculated on the

basis of the difference between cost price and hire purchase price. This difference is generally known as 'loading'. Loading can be expressed as a percentage of cost (***known as 'mark-up'***) or as a percentage of sales value or hire purchase price (***known as 'margin'***). For example, if the cost price of an item is ₹ 1,000 and the hire purchase price is ₹ 1,250, the profit is ₹ 250. If the profit is expressed as a percentage of cost, mark-up becomes 25%. Likewise, if it is expressed as a percentage of the hire purchase price, the margin becomes 20%.

(2) Value of goods sold on hire purchase It is the total of the hire purchase price of all goods sold during the accounting period under the hire purchase system. Generally, the value of goods sold on hire purchase is given in the examination problem. If, however, it is not given, it can be worked out as follows:

(i) Applying loading rate to the cost of goods sold under hire purchase system.

(ii) [Down payment + (Number of instalments x amount of each instalment] x Number of items sold.

(3) Cash received It represents the total amount received during the accounting period in respect to hire purchase sales. It includes down payment, instalments received in respect to previous year(s) as well as of the current year.

(4) Hire purchase debtors Commonly, a debtor is a person to whom goods are sold on credit. There is some difference between an ordinary debtor and a hire purchase debtor. A hire purchase customer is required to pay different instalments on different due dates. In the case of hire purchase debtors it is the total amount of such instalments which have ***fallen due during a particular accounting period but have not yet been paid by the hire purchase customers***. (see example of next item). Hire purchase debtors is also known as (i) Instalments due but not yet paid; or (ii) Instalment due, customers paying, etc.

(5) Stock on hire purchase It is also known as instalments not yet due or goods with hire purchase customers. Under a hire purchase agreement, some instalments fall due during the current accounting period while others fall due on the subsequent accounting year(s). The total amount of instalments which ***have not yet become due during the current accounting period is called stock on hire purchase***. It should be noted that it does not represent any ***physical stock***. For example, if the cash price of an item is ₹ 1,000 and the hire purchase price is ₹ 1,200. The payment is to be made in twenty four monthly equal instalments, i.e., ₹ 50 p.m. Out of 24 instalments, 10 instalments are due for payment during the current accounting period 2013-12 and the balance 14 instalments are due for payment in the subsequent years. In this case, the hire purchase stock will be ₹ 50 (24 – 10) = ₹ 700. In this example, let us assume that out of the 10 instalments due during 2013-12, the hire purchase customers paid only 6 instalment during the year. Therefore, the hire purchase debtors for 2013-12 will be ₹ 50 (10 – 6) = ₹ 200.

(6) Stock at shop It is the physical stock of unsold goods lying in the godown of the retailer. The cost of unsold stock in the shop has nothing to do with the ascertainment of profit or loss arising out of the hire purchase transactions. However, this figure is relevant towards the ascertainment of cost of goods sold on hire purchase, which can be ascertained by deducting the stock in the shop from the total purchases. When the cost of goods sold is given, it becomes very simple to ascertain the value of goods sold on hire purchase by simply adding the percentage of mark-up.

Ascertainment of Profit/Loss

There are two common methods of ascertaining profit / loss of goods of small value sold on hire purchase. These are:

(1) the Hire Purchase Trading Account Method; and (2) the Stock and Debtors Method

Hire Purchase Trading Account Method

Under this method, a Hire Purchase Trading Account is prepared as follows, following the method of preparation of a Consignment Account.

(a) Debit the Hire Purchase Trading Account with:

(i) Opening balance of H.P. Stock (Instalments not yet due) brought forward from the previous year. Generally, it is shown at hire purchase price. If it is given at cost, convert that into Hire Purchase price by adding loading.

(ii) Opening balance of H.P. Debtors (Instalment due but not yet paid) brought forward from the previous year.
(iii) Value of goods sold on Hire Purchase during the accounting period.
(iv) Expenses incurred during the accounting period.
(v) Loss on repossession of goods.

(b) Credit the Hire Purchase Trading Account with:

(i) Cash received from hire purchase customers during the accounting period. It includes down payment, hire purchase instalments of the previous year as well as of the current year collected during the accounting period.
(ii) Instalments due but not paid on goods repossessed.
(iii) Closing balance of H.P. Stock (Instalment not yet due) at hire purchase price carried forward to the next period. If it is not given in the problem, it can be calculated by preparing Memorandum Goods with H.P. Customers Account.
(iv) The closing balance of H.P. Debtors (Instalments due but not yet paid) is carried forward to next period. If the closing balance of H.P. Debtors is not given in the problem, it can be calculated by preparing Memorandum H.P. Debtors Account.

Pass adjustment entries for the following:

(i) For loading on opening balance of Hire Purchase Stock (Instalments not yet due / Goods with H.P. Customers)
Stock Reserve Account Dr.
To Hire Purchase Trading Account

(ii) For loading on goods sold on Hire Purchase during the year
Goods sold on Hire Purchase Account Dr.

From the following information, prepare Hire Purchase Trading Account:

		₹
1.1.2014	Stock with hire purchase customers at hire purchase price	6,480
31.12.2014	Goods sold on hire purchase basis during the year	26,136
	Cash received from hire purchase customers during the year	8,400
	Hire purchase debtors	1,520
	Stock with hire purchase customers at hire purchase price	22,696

Solution

Dr. Hire Purchase Trading Account Cr.

Date	Particulars	₹	Date	Particulars	₹
1.1.2014	To Balance b/d :		31.12.2014	By Stock Reserve A/c (Note 1)	2,430
	Hire Purchase Stock	6,480	31.12.2014	By Goods Sold on H P A/c (Note 2)	9,801
31.12.2014	To Goods Sold on H P A/c	26,136	31.12.2014	By Cash A/c	8,400
31.12.2014	To Stock Reserve A/c (Note 3)	8,511	31.12.2014	By Balance c/d :	
31.12.2014	To Profit and Loss A/c	3,720		Hire Purchase Stock	22,696
				Hire Purchase Debtors	1,520
		44,847			44,847

Working Notes :

(1) Loading on opening balance of hire purchase stock = 60/160 × ₹ 6,480 = ₹ 2,430.

(2) Loading on goods sold on hire purchase = 60/160 × ₹ 26,136 = ₹ 9,801.

(3) Loading on closing balance of hire purchase stock = 60/160 × ₹ 22,696 = ₹ 8,511.

Illustration 32

Domestic Appliances started trading on 1.1.2015 selling goods on hire purchase. Hire purchase terms require a deposit of 30% of the hire purchase selling price at the time of sale, followed by 10 equal monthly instalments, the first of which is payable on month after payment of the deposit.

A summary of the first six months' hire purchase transactions showed :

Month	January	February	March	April	May	June
Cost Price (₹)	2,400	13,200	1,500	6,000	3,900	3,600
H P Selling Price (₹)	4,000	22,000	3,000	11,000	7,000	6,000

All instalments were paid promptly on the due dates. You are requested to prepare Hire Purchase Trading Account.

Solution

Workings **Calculation of Amount of Deposits and Instalments**

Month of Sale ₹	Cost of Sale ₹	HP Selling Price ₹	Deposits and Instalments Received							Instalments Not Yet Due
			Jan ₹	Feb ₹	Mar ₹	Apr ₹	May ₹	Jun ₹	Total ₹	
Jan	2,400	4,000	1,200	280	280	280	280	280	2,600	1,400
Feb	13,200	22,000	—	6,600	1,540	1,540	1,540	1,540	12,760	9,240
Mar	1,500	3,000	—	—	900	210	210	210	1,530	1,470
Apr	6,000	11,000	—	—	—	3,300	770	770	4,840	6,160

Jun	3,600	6,000	—	—	—	—	—	1,800	1,800	4,200
Total	30,600	53,000	1,200	6,880	2,720	5,330	4,900	5,090	26,120	26,880

In the books of Domestic Appliances

Dr **Hire Purchase Trading Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
30.6.2015	To Goods Sold on H P A/c	53,000	30.6.2015	By Goods Sold on H P A/c (Loading — ₹ 53,000 – 30,600)	22,400
30.6.2015	To Stock Reserve A/c (Note 1)	11,360			
30.6.2015	To Profit and Loss A/c	11,040	30.6.2015	By Cash A/c (Deposits and instalments received)	26,120
			30.6.2015	By Balance c/d : H P Stock	26,880
		75,400			75,400

Working Note : (1) Loading on closing balance of hire purchase stock : ₹ 22,400 / ₹ 53,000 × ₹ 26,880 = ₹ 11,360.

Calculation of Missing Figures

Sometimes in the examination, some figures required to calculate profit/loss are not given. These may be: (i) Hire Purchase Stock; (ii) Hire Purchase Debtors; (iii) Purchases; or, (iv) Cash received, etc.

Before preparing the Hire Purchase Trading Account, the missing item(s) should be calculated first. The following steps are followed:

Step 1 : Draw up the following Memorandum Accounts.
(a) Memorandum Stock at Shop Account
(b) Memorandum H.P. Stock Account / Stock with H.P. Customers Account
(c) Memorandum H.P. Debtors Account / Instalments Due Account.

Step 2 : Place the available figures in the respective accounts.

Step 3 : Balance the account having maximum figures available. It will be helpful in finding out the missing figure of that account.

Step 4 : Place the figures so calculated in Step 3 to the relevant account.

Step 5 : Continue the process of transfer until all the figures are available.

The proforma of these accounts are given below:

Dr. **Memorandum Stock at Shop Account** **Cr.**

Particulars	₹	Particulars	₹
To Balance b/d (at cost)		By Goods sold on Hire Purchase A/c (at cost)	
To Purchases		By Balance c/d	

Dr. Memorandum Hire Purchase Stock Account Cr.

Particulars	₹	Particulars	₹
To Balance b/d (at H.P. price)		By Hire Purchase Debtors A/c	
To Goods sold on H.P. (at H.P. price)		By Goods Repossessed A/c (instalments not yet due)	
		By Balance c/d	

Dr. Memorandum Hire Purchase Debtors Account Cr.

Particulars	₹	Particulars	₹
To Balance b/d (at H.P. price)		By Cash A/c	
To H.P. Stock A/c (total instalments due)		By Goods Repossessed A/c (instal. due but not yet recd.)	
		By Balance c/d	

It should be noted here that the Memorandum Stock at Shop Account shows all figures at cost, but the Memorandum H.P. Stock Account and the Memorandum H.P. Debtors Account show all figures at hire purchase price. Therefore, any figure transferred from the Memorandum Stock at Shop Account to any other account should be converted at hire purchase price. Similarly, any figure transferred to the Memorandum Stock at Shop Account from other account should be converted at cost price.

Illustration 33

ESS Ltd. has a hire purchase department. Goods are sold on hire purchase at a profit of 25% on sales price. From the following particulars, prepare Hire Purchase Trading Account in the books of ESS Ltd. for the year to 31st March, 2015:

Particulars	₹	Particulars	₹
1.4.2014		**During the year ended 31.3.2015**	
Stock in the shop	10,000	Goods sold on H.P. at H.P. price	1,76,000
Instalments due	6,000	Purchases	1,36,000
Stock out with customers at H.P. price	80,000	Cash A/c	1,60,000
		31.3.2015	
		Stock in the shop	14,000
		Stock out with customers at H.P. price	92,000

Solution

In the books of ESS Ltd.

Dr. Hire Purchase Trading Account Cr.

Date	Particulars	₹	Date	Particulars	₹
1.4.2014	To Balance b/d :		31.3.2015	By Cash A/c	1,60,000
	Stock out with Customers	80,000	31.3.2015	By Stock Reserve A/c (Note 1)	20,000
	H.P. Debtors	6,000	31.3.2015	By Goods Sold on H.P. A/c (Note 2)	44,000
31.3.2015	To Goods Sold on H.P. A/c	1,76,000	31.3.2015	By Balance c/d :	
31.3.2015	To Stock Reserve A/c (Note 3)	23,000		Stock out with Customers	92,000
31.3.2015	To Profit & Loss A/c	41,000		H.P.Debtors (Note 4)	10,000
		3,26,000			3,26,000

Working Notes:

(1) Loading on opening balance of stock with customers = 25/100 x ₹ 80,000 = ₹ 20,000.

(2) Loading on goods sold on H.P. = 25/100 x ₹ 1,76,000 = ₹ 44,000.

(3) Loading on closing balance of stock with customers = 25/100 x ₹ 92,000 = ₹ 23,000.

(4) Closing balance of instalments due (H.P., Debtors) at the end is calculated as follows:

Dr. Memorandum Hire Purchase Debtors Account Cr.

Particulars	₹	Particulars	₹
To Balance b/d	6,000	By Cash A/c	1,60,000
To Stock out with Customers A/c (Note 5)	1,64,000	By Balance c/d	10,000

Dr. Hire Purchase Trading Account Cr.

Date	Particulars	₹	Date	Particulars	₹
31.3.2015	To Goods Sold on H.P. A/c (Note 1)	20,700	31.3.2015	By Goods Sold on H.P. A/c (Note 4)	8,200
31.3.2015	To Stock Reserve A/c (Note 7)	5,736	31.3.2015	By Cash A/c (Note 5)	6,400
31.3.2015	To Profit & Loss A/c	2,464	31.3.2015	By Balance c/d :	
				Hire Purchase Stock (Note 6)	14,300
		28,900			28,900

Dr. General Trading Account for the year ended on 31st March, 2015 Cr.

Particulars	₹	Particulars	₹
To Purchases A/c	90,000	By Sales A/c	85,000
To Gross Profit c/d	22,500	By Goods Sold on H.P. A/c (Note 8)	12,500
		By Closing Stock A/c	15,000
	1,12,500		1,12,500

Working Notes: **(1) Details of sales 2014-15**

Item No. 1 : (6 x 30 + ₹ 30) x 30 = ₹ 6,300

Item No. 2 : (8 x 80 + ₹ 80) x 20 = ₹ 14,400

= ₹ 20,700

(2) Profit on item no. 1 : (₹ 6,300 – 30 x ₹ 150) = ₹ 1,800. Therefore, profit included in sales = ₹ 1,800 / ₹ 6,300 = 2/7.

(3) Profit on item no. 2 : (₹ 14,400 – 20 x ₹ 400) = ₹ 6,400. Therefore, profit included in sales ₹ 6,400/14,400 = 4/9.

(4) Total profit = ₹ 1,800 + ₹ 6,400 = ₹ 8,200.

(5) Cash Received		₹
Item No. 1 : Cash down (30 x ₹ 30)	900	
Instalments (50 x ₹ 30)	1,500	2,400

	20,700		20,700

Illustration 35

Ravi Tandon commenced business as a hire purchase trader on 1.1.2014, with a capital of ₹ 1,00,000. He decided to sell vacuum cleaners (VC) and electric polishers (EP) and his terms were that payment should be made in eight equal instalments, the first payable on the date of sale and the remainder at quarterly intervals thereafter.

The following information is extracted from his books at the end of 2014 :

Items	Numbers Purchased	Numbers Sold	Cost per Unit (₹)	HP Selling Price per Unit (₹)
VCs	300	250	960	1,680
EPs	250	200	1,440	2,520

The following is the summary of the Bank Account for 2014 :

Receipts	₹	Payments	₹
Capital introduced	1,00,000	Payment in respect of purchases :	
Receipts in respect of sales :		VCs — 250 @ ₹ 960 each	2,40,000
VCs — 250 @ ₹ 840 each	2,10,000	EPs — 250 @ ₹ 1,440 each	3,60,000
EPs — 200 @ ₹ 630 each	1,26,000	Expenses	19,800
Overdraft at 31.12.2014	2,29,660	Drawings	35,000
		Bank Interest	10,860
	6,65,660		6,65,660

All instalments due from customers were received on due date. Credit for profit on sales is taken in respect of instalments received.On 31.12.2014, outstanding expenses were ₹ 4,600.

Prepare Hire Purchase Trading Account and Profit and Loss Account for the year ended 31.12.2014 and a Balance Sheet as on that date.

200 Electric Polishers @ ₹ 630 each	1,26,000
	3,36,000
(4) Loading on Closing Balances of H P Stock	
On Vacuum Cleaner = ₹ 1,80,000 / ₹ 4,20,000 × ₹ 2,10,000	90,000
On Electric Polisher = ₹ 2,16,000 / ₹ 5,04,000 × ₹ 3,78,000	1,62,000
	2,52,000
(5) Hire Purchase Stock = H.P. Sales – Instalments Received	
Vacuum Cleaner = ₹ 4,20,000 – ₹ 2,10,000	2,10,000
Electric Polisher = ₹ 5,04,000 – ₹ 1,26,000	3,78,000
	5,88,000

Repossession

When goods are repossessed for default in payment, the number of instalments due but not yet received on the goods are not recoverable. The amounts of these instalments in respect to the repossessed goods are transferred from the Memorandum Hire Purchase Debtors Account to the Goods Repossessed Account by debiting the latter and crediting the former in the Memorandum Hire Purchase Ledger.

In the General Ledger, Goods Repossessed Account is debited and Hire Purchase Trading Account is credited with the instalments due but not yet received. If the selling price / market price of the goods repossessed is less than the instalments due but not paid, it represents a loss on repossession and is transferred to the Hire Purchase Trading Account by debiting the Hire Purchase Trading Account and crediting the Goods Repossessed Account. Likewise, if the selling price / market price of the goods repossessed is more than the instalments due but not paid, it represents a profit and it is credited to the Hire Purchase Trading Account.

The following are the Journal Entries for repossession :

(1) When the goods are repossessed

Goods Repossessed Account Dr. [Instalments due but not yet paid]
To Hire Purchase Trading Account

(2) When there is a loss on repossession

[Selling price / market price is ***less*** than Instalments due but not yet paid]
Hire Purchase Trading Account Dr.
To Loss on Repossession Account

(3) When there is a profit on repossession

[Selling price / market price is ***greater*** than Instalments due but not yet paid]
Profit on Repossession Account Dr.
To Hire Purchase Trading Account

Amar & Co. has a hire purchase department and goods are sold on hire purchase at cost plus 60%. From the following information, prepare the Hire Purchase Trading Account to ascertain the profit or loss made in the hire purchase department. Show your workings clearly.

Particulars	₹	Particulars	₹
Jan.1, 2013		Cash received during the year	56,000
Hire Purchase Stock (at H.P. price)	16,000	Goods received back from customers (instalment due ₹ 2,000) valued at	300
Dec. 31, 2013		Goods with H.P. customers at H.P. price	36,000
Goods sold on H.P. during the year	80,000	Instalments due but not yet received	2,000

Solution

In the books of Amar & Co.

Dr. Hire Purchase Trading Account Cr.

Date	Particulars	₹	Date	Particulars	₹
1.1.2013	To Balance b/d :		31.12.2013	By Cash A/c	56,000
	Hire Purchase Stock	16,000	31.12.2013	By Stock Reserve A/c (Note 1)	6,000
31.12.2013	To Goods Sold on H.P. A/c	80,000		By Goods Sold on H.P. A/c (Note 2)	30,000
31.12.2013	To Loss on Goods Repossessed A/c (Note 6)	1,700		By Goods Repossessed A/c (Note 6)	2,000
31.12.2013	To Stock Reserve A/c (Note 3)	13,500		By Hire Purchase Stock (Note 3)	36,000
31.12.2013	To Profit & Loss A/c	20,800		By Hire Purchase Debtors (Note 4)	2,000
		1,32,000			1,32,000

Working Notes:

(1) Loading on opening balance of goods with customers = 60/160 x ₹ 16,000 = ₹ 6,000.

(2) Loading on goods sold on hire purchase = 60/160 x ₹ 80,000 = ₹ 30,000.

(3) Loading on closing balance of goods with customers = 60/160 x ₹ 36,000 = ₹ 13,500.

(4) Closing balance of instalment due (H.P. Debtors) can be verified by preparing the following accounts:

Dr. Memorandum Hire Purchase Debtors Account Cr.

Particulars	₹	Particulars	₹
To Hire Purchase Stock A/c (Note 5)	60,000	By Cash A/c	56,000
		By Goods Repossessed A/c	2,000
		By Balance c/d	2,000
	60,000		60,000

Dr. (5) Memorandum Hire Purchase Stock Account Cr.

Particulars	₹	Particulars	₹
To Balance b/d (given)	16,000	By Hire Purchase Debtors A/c (Balancing figure)	60,000
To Goods sold on H.P. A/c (given)	80,000	By Balance c/d (given)	36,000
	96,000		96,000

(6) Instalment due on repossessed goods is ₹ 2,000. It has been valued at ₹ 300. Therefore, loss on repossession = ₹ 2,000 – ₹ 300 = ₹ 1,700. Alternatively, only ₹ 300 (realisable value of goods repossessed can be credited to H.P. Trading Account).

Illustration 37

Mr X is a hire purchase trader and sells goods on hire purchase basis at cost plus 50%.

From the following information, prepare Hire Purchase Trading Account to determine profit for the year ending 31.3.2015:

To Balance b/d	90,000	By HP Debtors A/c (Note 3)	6,60,000
To Goods Sold on HP A/c (Balancing figure)	8,70,000	By Balance c/d	3,00,000
	9,60,000		9,60,000

Dr. (3) Memorandum Hire Purchase Debtors Account Cr.

Particulars	₹	Particulars	₹
To Balance b/d (given)	50,000	By Cash (given)	6,00,000
To HP Stock A/c (Instalments falling due during the year)	6,60,000	By Goods Repossessed A/c (given)	20,000
		By Balance c/d (given)	90,000
	7,10,000		7,10,000

(4) Loading on Opening Stock with Customers : It is given that loading is 50% of cost. It means, loading is 1/3 of the hire purchase price. Total loading = 1/3 of ₹ 90,000 = ₹ 30,000.

(5) Loading on Closing Stock with Customers : 1/3 of ₹ 3,00,000 = ₹ 1,00,000.

(6) Instalments due on repossessed goods is ₹ 20,000. It has been valued at ₹ 5,000. Therefore, loss on repossession is ₹ 15,000.

Illustration 38

Following are the particulars from the books of a trader who sells goods of small value on the hire purchase system at 50% profit on cost. Prepare the Hire Purchase Trading Account for the year ending December 31, 2014:

Particulars	₹	Particulars	₹
January 1 :		Goods repossessed (instalment due ₹ 8,000) valued at	
Stock with the customers	27,000	₹ 1,500 which has been included in the stock at the end	
Stock in the shop	54,000	at ₹ 1,500	
Instalments due	15,000	Cash received from customers	1,80,000
December 31 :		Goods purchased during the year	1,80,000
Stock in the shop	61,500		
Instalments due	27,000		

Solution

In the books of a Trader

Dr. Hire Purchase Trading Account Cr.

Date	Particulars	₹	Date	Particulars	₹
1.1.2014	To Balance b/d :		31.12.2014	By Cash A/c	1,80,000

Working Notes :

Dr. (1) Memorandum Stock at Shop Account Cr.

Particulars	₹	Particulars	₹
To Balance b/d (cost)	54,000	By Goods sold on H.P. A/c (at cost) (Balancing figure)	1,74,000
To Purchases A/c	1,80,000	By Balance c/d (₹ 61,500 – ₹ 1,500)	60,000
	2,34,000		2,34,000

Dr. (2) Memorandum H.P. Stock Account Cr.

Particulars	₹	Particulars	₹
To Balance b/d	27,000	By Hire Purchase Debtors A/c	2,00,000
To Goods sold on H.P. (at H.P. price) (₹ 1,74,000 x 150/100)	2,61,000	By Balance c/d	88,000
	2,88,000		2,88,000

Dr. (3) Memorandum H.P. Debtors Account Cr.

Particulars	₹	Particulars	₹
To Balance b/d	15,000	By Cash A/c	1,80,000
To H.P. Stock A/c (Balancing figure)	2,00,000	By Goods Repossessed A/c	8,000
		By Balance c/d	27,000
	2,15,000		2,15,000

(4) Loading on opening stock with customers. It is given that loading is 50% of cost. It means, loading is 1/3 of hire purchase price. Total loading = 1/3 of ₹ 27,000 = ₹ 9,000.

(5) Loading on closing stock with customers. 1/3 of ₹ 88,000 = ₹ 29,333.

(6) Instalments due on repossessed goods is ₹ 8,000. It has been valued at ₹ 1,500. Therefore, loss on repossession is ₹ 8,000 – ₹ 1,500 = ₹ 6,500.

Stock and Debtors System

The Stock and Debtors System (similar to the system followed in case of Branch Accounts) can also be applied for the ascertainment of profit or loss on goods of small value sold on hire purchase basis. Under this system, the following accounts are opened : (i) Hire Purchase Stock Account; (ii) Hire Purchase Debtors Account; (iii) Goods Sold on Hire Purchase Account; (iv) Goods Repossessed Account; and (v) Hire Purchase Adjustment Account.

Illustration 39

Sambhu Bros. sells its product under the hire purchase method. The following information was available as on the dates noted below :

Particulars	1.1.2013 (₹)	31.12.2013 (₹)
Stock out on hire purchase price	90,000	1,03,000
Shop stock balance	11,250	15,750
Instalments due (customers still paying)	6,750	11,250

It is ascertained that cash of ₹ 1,80,000 has been received during the year and gross profit is reckoned at 25% of the selling price.

Prepare : (i) H.P. Trading Account; and (ii) The accounts under Stock and Debtors Method.

Solution (i) **In the books of Sambhu Bros.**

Dr. **Hire Purchase Trading Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
1.1.2013	To Balance b/d:		31.12.2013	By Cash A/c	1,80,000
	Hire Purchase Stock	90,000	31.12.2013	By Stock Reserve A/c (Note 1)	22,500
	Hire Purchase Debtors	6,750	31.12.2013	By Goods Sold on H. Pur. A/c (Note 2)	49,375
	To Goods Sold on Hire Purchase A/c	1,97,500		By Balance c/d:	
31.12.2013	To Stock Reserve A/c (Note 3)	25,750		Hire Purchase Stock	1,03,000

		3,66,125			3,66,125

Tutorial Note : Students should prepare different accounts of the "Stock and Debtors System" as given below for finding out the relevant figures appearing in the above Hire Purchase Trading Account.

Solution (ii)

Dr. **Hire Purchase Stock Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
1.1.2013	To Balance b/d	90,000	?	By Hire Purchase Debtors A/c	1,84,500
?	To Goods Sold on Hire Purchase A/c	1,97,500	31.12.2013	By Balance c/d	1,03,000
		2,87,500			2,87,500

Dr. **Hire Purchase Debtors Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
1.1.2013	To Balance b/d	6,750	?	By Cash	1,80,000
?	To Hire Purchase Stock A/c (Bal. figure)	1,84,500	31.12.2013	By Balance c/d	11,250
		1,91,250			1,91,250

Dr. **Hire Purchase Adjustment Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
31.12.2013	To Stock Reserve A/c (Note 3)	25,750	1.1.2013	By Stock Reserve A/c (Note 1)	22,500
31.12.2013	To Profit & Loss A/c	46,125	31.12.2013	By Goods Sold on Hire Purchase A/c (Note 2)	49,375
		71,875			71,875

Dr. **Shop Stock Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
1.1.2013	To Balance b/d	11,250	?	By Goods Sold on Hire Purchase A/c (at cost) (3/4 of ₹ 1,97,500)	1,48,125
?	To Purchase A/c (Balancing figure)	1,52,625	31.12.2013	By Balance c/d	15,750
		1,63,875			1,63,875

Working Notes:

(1) Goods are sold at a profit of 25% on selling price. So, loading is 1/4 of the selling price. Therefore, loading on opening balance of hire purchase stock = 1/4 of ₹ 90,000 = ₹ 22,500

(2) Loading on goods sold on hire purchase = 1/4 of ₹ 1,97,500 = ₹ 49,375.

(3) Loading on closing balance of hire purchase stock = 1/4 of ₹ 1,03,000 = ₹ 25,750.

Illustration 40

Decor Ltd. supply goods on hire purchase system at a profit of 50% over the cost. the following are the transactions for the year ending December 31, 2014 :

Stock out on hire purchase at Cost on	₹
01.01.2014	60,000
31.12.2014	48,000
Instalments due (customers are still paying) on	
01.01.2014	5,400
31.12.2014	9,000
Goods re-possessed during the year (for instalments unpaid ₹ 900) valued at	450
Instalments realised during the year	1,17,000

Prepare the Hire Purchase Stock Account, Hire Purchase Debtors' Account and the Hire Purchase Adjustment Account.

Solution

In the books of Decor Ltd.

Date	Particulars	₹	Date	Particulars	₹
1.1.2014	To Balance b/d (Note 1)	90,000	31.12.2014	By Hire Purchase Debtors a/c	1,21,500
31.12.2014	To Goods Sold on Hire Purchase A/c (Balancing figure)	1,03,500	31.12.2014	By Balance c/d (Note 2)	72,000
		1,93,500			1,93,500

Dr. **Hire Purchase Debtors' Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
1.1.2014	To Balance b/d	5,400		By Bank A/c	1,17,000
	To Hire Purchase Stock A/c (Balancing figure)	1,21,500		By Goods Repossessed A/c (Instalment unpaid)	900
			31.12.2014	By Balance c/d	9,000
		1,26,900			1,26,900

Dr. **Hire Purchase Adjustment Account** **Cr.**

Date	Particulars	₹	Date	Particulars	₹
31.12.2014	To Goods Repossessed (Note 4) (Loss on repossession)	450	1.1.2014	By Stock Reserve A/c	30,000
	To Profit and Loss A/c (Balancing figure)	40,050		By Goods Sold on Hire Purchase A/c (Note 3)	34,500
	To Stock Reserve a/c	24,000			
		64,500			64,500

Working Notes :

(1) Hire purchase price = Cost + 50%. Stock out on hire purchase on 1.1.2014 at hire purchase price = ₹ 60,000 + 50% of ₹ 60,000 = ₹ 60,000 + ₹ 30,000 = ₹ 90,000.
(2) Stock out on hire purchase on 31.12.2014 at hire purchase price = ₹ 48,000 + 50% of ₹ 48,000 = ₹ 48,000 + ₹ 24,000 = ₹ 72,000.
(3) Loading on goods sold on hire purchase = 1/3 of ₹ 1,03,500 = ₹ 34,500.
(4) Goods repossessed at ₹ 900 but it has been valued at ₹ 450. Therefore, loss on repossession is ₹ 450.

Illustration 41

Varun sells goods on hire purchase basis also. He fixes the hire purchase price by adding 50% to the cost of the goods with him. The following are the figures relating to his hire purchase business for the year, 2014 :

Particulars	₹	Particulars	₹
Balance of Hire Purchase Stock Account as on 1.1.2014	12,000	Selling price of goods sold on hire purchase basis during the year	90,600
Balance of Hire Purchase Debtors Account as on 1.1.2014	300	Total amount of instalments that fell due during the year	92,700
Cash received from customers during the year	92,400		

A customer to whom goods for ₹ 1,200 had been sold paid only 5 instalments of ₹ 100 each. On his failure to pay the monthly instalment of ₹ 100 due on 4.12.2014, the goods were reprossessed on 27.12.2014 after due legal notice.

Prepare ledger accounts on the Stock-Debtors System for the year ended 31.12.2014.

Solution

In the books of Varun

Date	Particulars	₹	Date	Particulars	₹
31.12.2014	To Stock Reserve A/c (Note 3)	3,100	1.1.2014	By Stock Reserve A/c (Note 1)	4,000
31.12.2014	To Profit & Loss A/c	31,200	32.12.2014	By Goods sold on Hire Purchase A/c (Note 2)	30,200
			31.12.2014	By Goods Repossessed A/c (Profit)	100
		34,300			34,300

Dr. Goods Repossessed Account Cr.

Date	Particulars	₹	Date	Particulars	₹
27.12.2014	To Hire Purchase Stock A/c	600	31.12.2014	By Balance c/d (Note 4)	800
27.12.2014	To Hire Purchase Debtors A/c	100			
31.12.2014	To Hire Purchase Adjustment A/c	100			
		800			800

Working Notes:

(1) If cost is ₹ 100, profit is ₹ 50 and hire purchase price is ₹ 100 + ₹ 50 = ₹ 150. Profit on hire purchase price = 50/150 = 1/3. Therefore, loading on opening stock = 1/3 of ₹ 12,000 = ₹ 4,000.
(2) Loading on goods sold on hire purchase = 1/3 of ₹ 90,600 = ₹ 30,200.
(3) Loading on closing balance of hire purchase stock = 1/3 of ₹ 9,300 = ₹ 3,100.
(4) It is assumed that the repossessed goods have been valued at cost i.e., 2/3 of ₹ 1,200 = ₹ 800.

Illustration 42

Furnishers Ltd. supply furnishing on hire-purchase terms at a profit of 50% over the cost. The following are the transactions for the year ending December 31, 2014 :

Particulars	₹	Particulars	₹
Jan. 1 Stock out on hire purchase at cost	20,000	Instalments realised during the year	39,000
Jan. 1 Instalments due (customers still paying)	1,800	Dec. 31 Stock out on hire purchase at cost	16,000
Goods re-possessed during the year (for instalments unpaid ₹ 300) evaluated at	150	Instalments due (customers still paying)	3,000

Prepare the Hire-Purchase Stock Account, Hire-Purchase Debtors' account and the Hire-Purchase Adjustment Account.

Solution

In the books of Furnishers Ltd.

			31.12.2014	By Balance c/d	3,000
		42,300			42,300

Hire Purchase Adjustment Account

Dr. **Cr.**

Date	Particulars	₹	Date	Particulars	₹
31.12.2014	To Goods Repossessed A/c	150	1.1.2014	By Stock Reserve A/c (Note 1)	10,000
31.12.2014	To Stock Reserve A/c (Note 3)	8,000	?	By Goods Sold on Hire Purchase A/c (Note 2)	11,500
31.12.2014	To Profit & Loss A/c	13,350			
		21,500			21,500

Working Notes:

(1) Goods are sold at a profit of 50% on cost. It means, if cost is ₹ 100 then profit = ₹ 50 and hire purchase price = ₹ 100 + ₹ 50 = ₹ 150. Therefore loading on hire purchase price = 50/150 = 1/3. Loading on opening balance of hire purchase stock = 1/3 of ₹ 30,000 = ₹ 10,000.

(2) Loading on goods sold on hire purchase = 1/3 of ₹ 34,500 = ₹ 11,500.

(3) Loading on closing balance of hire purchase stock = 1/3 of ₹ 24,000 = ₹ 8,000.

Dr. Hire Purchase Adjustment Account Cr.

Date	Particulars	₹	Date	Particulars	₹
31.12.2014	To Stock Reserve A/c (Note 3)	34,500	1.1.2014	By Stock Reserve A/c (Note 1)	30,000
31.12.2014	To Profit & Loss A/c	61,500	31.12.2014	By Goods Sold on Hire Purchase A/c (Note 2)	66,000
		96,000			96,000

Working Notes:

(1) Goods are sold at a profit of $33^{1}/_{3}$% on cost. It means, if the cost is ₹ 100, then profit is ₹ 33.33 and hire purchase price = ₹ 100 + ₹ 33.33 = ₹ 133.33. Therefore, loading on hire purchase price = 33.33/133.33 = 1/4. Loading on opening balance of hire purchase stock = 1/4 of ₹ 1,20,000 = ₹ 30,000.

(2) Loading on goods sold on hire purchase = 1/4 of ₹ 2,64,000 = ₹ 66,000.

(3) Loading on closing balance of hire purchase stock = 1/4 of ₹ 1,38,000 = ₹ 34,500.

Instalment Payment System

An instalment sale is a credit sale in which payments are made in instalments over a period of time. Under this system the buyer is given the possession and also ownership of the goods right at the time of signing the agreement. If the buyer defaults, the seller cannot repossess the goods but he can sue the buyer for the amount due.

The following are the features of an Instalment Payment System :

(a) It is an outright credit sale of goods.

(b) The buyer has the facility to pay the price in instalments over a period of time.

(c) The buyer gets immediate possession as well as ownership of the goods.

(d) In the event of default by the buyer in the payment of any instalment, the seller cannot repossess the goods (because the ownership has already been transferred).

(e) In case of default, the total amount of instalments paid by the buyer are not forfeited. The seller can only bring a suit against the buyer for the unpaid instalments.

The difference between the hire purchase system and the instalment payment system is as follows:

	Hire Purchase System	Instalment Payment System
(i) Nature of Contract	It is an agreement of hiring of goods.	It is an agreement of sale of goods.
(ii) Passing of Title	The title of the goods is passed on to the buyer after the payment of the final instalment or as agreed by the parties.	The title of the goods is passed on to the buyer at the time of signing the agreement.

(iii) Rights of Seller	If the buyer fails to pay any of the instalments, the goods can be repossessed by the seller.	The seller cannot repossess the goods. He can sue the buyer for the amount due.
(iv) Rights of Disposal	The buyer cannot hire out, sell, transfer, destroy, pledge the goods.	The buyer can hire out, sell, transfer, destroy, pledge the goods and the bona fide purchaser can get good title.
(v) Return of Goods	The buyer may return goods without further payment, except for the instalments already due.	Except seller's default, goods cannot be returned. Buyer is liable to pay the amount due.
(vi) Forfeiture of Amount Received	In case of default, the total amount of instalments paid is forfeited and treated as hire charges.	In case of default, the total amount of instalments paid by the buyer cannot be forfeited.

Accounting Arrangements

Under the instalment payment system, the property in the goods passes to the buyer at the time of signing the contract. When accounting entries are to be passed in the books of the buyer and seller, this fact should be taken into account. The seller will treat the transaction as a credit sale. Likewise, the buyer treats it as an outright credit purchase (but the payment should be made in instalments). The buyer credits the seller with the total amount payable to him (including interest) and debits the Asset Account with cash price and Interest Suspense Account (with total interest).

The seller debits the buyer with full amount and credits sales account with cash price and the Interest Suspense Account with total interest. A proportionate part of the Interest Suspense Account is transferred each year to the credit of the Profit and Loss Account. The buyer maintains the Assets Account in a manner similar to that of the Hire Purchase System. The depreciated value of the asset is shown in the asset side of the Balance Sheet. The amount due to seller is shown in the Balance Sheet as a liability. The seller shows the balance due from the buyer as debtors (not as stock as in the case of Hire Purchase System) in the Balance Sheet.

The Books of the Buyer

The following journal entries are passed in the books of the buyer.

1. When the asset is acquired on instalment payment system.

Asset Account	Dr. [Full cash price]
Interest Suspense Account	Dr. [Total interest]
To Vendor Account	[Instalment price]

2. When down payment is made

Vendor Account	Dr.
To Bank Account	

3. For interest of the relevant period

Interest Account	Dr.
To Interest Suspense Account	

4. For payment of instalment

Vendor Account	Dr.
To Bank Account	

5. When depreciation is charged on the asset

Depreciation Account	Dr.
To Asset Account	

6. For closing interest and depreciation account.

Profit and Loss Account	Dr.
To Interest Account	
To Depreciation Account	

The Books of the Seller/Vendor

The following Journal Entries are passed in the books of the seller.

1. When goods are sold and delivered under the instalment payment system.

Purchaser Account	Dr.	[Full cash price + total interest]
To Sales Account		[Cash price]
To Interest Suspense Account		[Total interest]

2. When down payment is received

Bank Account Dr.
To Purchaser Account

3. For interest of the relevant period

Interest Suspense Account Dr.
To Interest Account

4. For receipt of the amount of instalment

Bank Account Dr.

Eastern Collieries Ltd. purchased wagons from Texmaco Ltd. under the Instalment Payment System on 1st January 2013. It was agreed that ₹ 15,000 was to be paid on signing the agreement and a sum of ₹ 15,000 was to be paid annually for 3 years. The cash price of the wagons was ₹ 52,300 and the rate of interest was 10%. Depreciation is charged @ 20% on the straight line method.

You are required to give Journal entries recording the above transactions in the books of both the parties.

Solution

In the books of Eastern Collieries Ltd.

		20,480			20,480
1.1.2015	To Balance b/d	16,384	31.12.2015	By Depreciation A/c	3,277
31.12.2015	To Profit & Loss A/c (Profit on Sale)	1,893	31.12.2015	By Bank A/c	15,000
		18,277			18,277

Working Notes: **(1) Calculation of Cash Price**

No. of instalments	Amount of instalment	Interest	Principal
5th	7,700	* 1/11 of ₹ 7,700 = ₹ 700	7,000 (7,700 – 700)
4th	7,700	1/11 of ₹ 14,700 = ₹ 1,336	6,364 (7,700 – 1,336)
3rd	7,700	1/11 of ₹ 21,064 = ₹ 1,915	5,785 (7,700 – 1,915)
2nd	7,700	1/11 of ₹ 26,849 = ₹ 2,441	5,259 (7,700 – 2,441)
1st	7,700	1/11 of ₹ 32,108 = ₹ 2,919	4,781 (7,700 – 2,919)
	₹ 38,500	₹ 9,311	29,189
		Add : Cash Down Payment	10,811
		Cash price	40,000

* Let the amount due at the beginning of the 5th year be ₹ 100. Interest is 10%, i.e., ₹ 10. Amount payable at the end of the 5th year is ₹ 100 + 10 = ₹ 110. Therefore, the ratio between interest and the amount due = 10/110 = 1/11. (See also Note 2).

(2) Calculation of the amount due at the year-end

5th year :	₹ 7,700
4th year : ₹ (7,000 + 7,700)	₹ 14,700
3rd year : ₹ (6,364 + 7,000 + 7,700)	₹ 21,064
2nd year : ₹ (5,785 + 6,364 + 7,000 + 7,700)	₹ 26,849
1st year : ₹ (5,259 + 5,785 + 6,364 + 7,000 + 7,700)	₹ 32,108

Illustration 47

On 1st January 2012 A sells a truck to B, on the instalment payment system, on the following condition :

(1) The purchase price of the truck is ₹ 1,00,000.

(2) This amount is payable to A in four equal annual instalments along with 12% interest per annum on the outstanding balance, the first instalment being payable on the date of sale.

B, in turn, hires out the truck to A for a monthly sum of ₹ 3,000 per month from 1st January 2012. The hire charges are to be adjusted at the end of each year against the amount due to A on account of principal and interest, any difference being settled in cash. B charges 20% depreciation (on the Written Down Value method) on the truck.

All payments are made as per the agreement. On 1st January 2014, the truck is sold by B to A for ₹ 15,000 in cash.

Show in B's books, the Truck Account, the Interest Suspense Account, the Hire Charges Account; the Interest Account and A's account.

1.1.2015	To Balance b/d	8,000	1.1.2015	By Cash A/c	8,000

Working Notes :

(1) Calculation of interest : For 2012 on ₹ 75,000 @ 12% = ₹ 9,000; For 2013 on ₹ 50,000 @ 12% = ₹ 6,000; For 2014 on ₹ 25,000 @ 12% = ₹ 3,000. Total ₹ 18,000.

(2) Cash settlement

Date	Principal + Interest Due	Hire Charges	Cash received
1.1.2013	₹ 25,000 + ₹ 9,000 = ₹ 34,000	₹ 36,000	₹ 2,000
1.1.2014	₹ 25,000 + ₹ 6,000 = ₹ 31,000	₹ 36,000	₹ 5,000
1.1.2015	₹ 25,000 + ₹ 3,000 = ₹ 28,000	₹ 36,000	₹ 8,000

Key Points

- Under the Hire Purchase System the customer (called the Hire Purchaser) obtains possession of the goods at the outset and can use it, while paying for it by instalments over an agreed period of time.
- **Hire Vendor** : The seller in a hire purchase agreement.
- **Hire Purchaser** : The buyer in a hire purchase agreement.
- **Cash Price** : The amount to be paid on outright purchase in cash.
- **Down Payment** : Initial payment made at the time of signing the hire purchase agreement.
- **Hire Purchase Price** : The amount to be paid if the goods are purchased under the hire purchase system. It includes the cash price and interest of the future instalments.
- The entire profit on sale under hire purchase agreement is credited to the Profit and Loss Account of the year in which the sale has taken place. Interest pertaining to each accounting period is credited to the Profit and Loss Account of that year.
- **Hire Purchase Price** consists of two things : (i) cash price; and (ii) interest. Cash price is the capital expenditure incurred for the acquisition of an asset and (ii) interest is the revenue expense for the delay in making the full payment. Ascertainment of any of these two gives the answer for the other, e.g., if we ascertain the total amount of interest, it becomes very simple to ascertain the cash price just by deducting the interest from the hire purchase price

THEORETICAL QUESTIONS

1. What are the accouting procedures to be adopted in respect of the Hire Purchase System ?
2. What is meant by Hire Purchase System and how does it differ from the Instalment Payment System ?
3. State the nature of hire purchase agreement.
4. State para 4 of AS–19 in respect of hire purchase accounting.

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each statement or answer each question below :

1. Each instalment including down payment (if any) is treated as hire charges by the
   A buyer
   B seller
   C none of these.
2. The hire purchaser can record the asset at its
   A hire purchase price
   B cash down price
   C none of these.
3. Interest is charged on the amount
   A outstanding
   B paid
   C none of these.
4. Assets are generally repossessed at a mutually agreed
   A value
   B current price
   C none of these.
5. Under instalment payment system, the seller treats the transaction as a
   A cash sale
   B credit sale
   C none of these.
6. Minimum lease payments are :
   (i) payments over the lease term, the lessee is to make
   (ii) contingent rent
   (iii) any residual value guaranteed by the lessee.
   Which of the following is correct ?
   A (i), (ii) and (iii)
   B (i) and (iii)
   C (i) and (ii)
7. Gross investment in the lease is the aggregate of the
   A minimum lease payments under finance lease from the stand point of the lessor
   B minimum lease payments under finance lease from the stand point of the lessor and any guaranteed residual value accruing to the lessor
   C minimum lease payments under finance lease from the stand point of lessor and any unguaranteed residual value accruing to the lessor
8. Leased assets appear in the Balance Sheet of the lessee in the case of
   A all leases
   B operating leases
   C finance leases
9. Lease liabilities are
   A long-term liability
   B current liability
   C split between A and B

10. At the beginning of the lease
    A major portion of the payment is principal, with a small element of interest
    B major portion of the payment is interest, with a small element of principal
    C the principal and interest payments are equal

PRACTICAL QUESTIONS

Hire Purchase System

Section A : Cash Price is Given

1. On January 1, 2013, Sharda purchased a machine from Kusum on a hire-purchase basis. The particulars are as follows:
   (a) Cash price ₹ 10,000.
   (b) ₹ 4,000 to be paid on signing the contract.
   (c) Balance in three instalments of ₹ 2,000 plus interest.
   (d) Interest charged on outstanding balance at 5%.
   (e) Depreciation at 5% p.a. on the Straight-line Method.
   Give Journal Entries and the necessary Ledger Accounts for the year ended on 31st December, 2013, 2014 and 2015 in the books of both the parties.
2. On 1st April, 2012, A Ltd. purchased a machine from B Ltd. on hire-purchase basis. The cash price of the machine was ₹ 20,000. the payment was to be made at ₹ 5,000 on delivery and the balance in 3 equal annual instalments of ₹ 5,000, plus interest at 5% p.a. payable on 31st December each year. A. Ltd. charges depreciation at 10% p.a. on the original cost. Show Ledger Accounts in the books of A Ltd.
3. On 1st January, 2014, Sun Co. Ltd. took delivery from Star Co. Ltd. five machines on hire purchase system. A sum of ₹ 200 per machine was paid on delivery and the balance was payable in five instalments of ₹ 300 each per machine, annualy on 31st December. The suppliers agreed to replace the machine. A new agreement was signed for that purpose and a sum of ₹ 500 was paid for cancelling the first agreement by the manufacturing company. The following are the necessary particulars :

Particulars	1st Machine	2nd Machine
1. Date of Purchase	1.6.2014	31.8.2014
2. Cash Price	35,000	42,860
3. Initial Payment	6,920	—
4. Allowance for payments made under cancelled agreement	—	9,500
5. Hire charges	3,240	3,840
6. Hire Purchase price	38,240	46,700
7. Number of Instalments	18	24
8. Instalment payable every month commencing on	1.7.2014	1.10.2014
9. All payment were made on due dates		
10. Ignore depreciation on machinery		

You have to prepare the following Ledger Accounts in the books of the manufacturing company for the year ending 31st March, 2015 :
(a) Machinery on H. P. Account (b) Hire-Purchase Company's Account (c) Hire-Purchase Disposal Account
(d) Hire-Purchase Interest Suspense Account.

26. A company sells goods on hire-purchase on the basis of 25% down, the balance, with 20% interest thereon being payable in 8 equal quarterly instalments on 31st March, 30th June, 30th September and 31st December each year. The first instalment is payable at the end of the quarter in which the sale is made. The company transfers 50% , 30% and 20% of the interest to the Profit and Loss Account in the first , second and third years respectively.

Balance on 1.1.2014	₹
Hire Purchase Debtors	75,735
Hire Purchase Interest Suspense	9,900

Hire-Purchase sales (exclusive of Interset), which have evenly occured over each of the three calender years, are :
2012 — ₹ 80,000; 2013 — ₹ 1,00,000; 2014 — ₹ 76,000.
All dues were promptly paid in each year.
Make out for the year 2014.
(1) Hire-Purchase Debtors Account.
(2) Hire-Purchase Interest Suspense Account and prove the opening and closing balances of the latter account.

27. X commenced business on 1.1.2013 selling television sets for cash as well as hire purchase basis.
He started with a capital of ₹ 4,50,000 and acquired leasehold premises with a 10-year life for a premium of ₹ 2,40,000, furnitures and fittings for ₹ 1,50,000 and a motor van. The motor van was acquired under a hire purchase contract. The terms were : Cash price ₹ 1,20,000; Deposit ₹ 30,000 payable on 1.1.2013; Interest rate 10% p.a.; Three equal instalments on 31st December in 2013, 2014 and 2015.
The lease and fixtures are to be depreciated over the life of the lease and the motor van is to be depreciated @ 25% p.a. on the reducing balance.
During the period 1.1.2013 to 30.4.2013, the number of sets sold were :

	January	February	March	April
Cash Sales	20	60	90	120
Hire Purchase Sales	—	30	60	90

The prices and terms of purchase and sale were :
Cost price ₹ 3,000; Cash price ₹ 4,200; Hire purchase price ₹ 5,000. Hire purchase terms — deposit of ₹ 1,700 payable on the day of sale followed by 11 monthly instalments of ₹ 300 starting in the month following the sale.
During the period 1.1.2013 to 30.4.2013, the following payments were made:
Wages to sales assistant ₹ 68,400; Rent and other expenses ₹ 1,00,000; Suppliers ₹ 11,25,000.
On 30.4.2013, the firm repossessed 3 television sets that had been sold on hire purchase on 1.2.2013 and on which only 1 instalment has been paid. X valued the 3 repossessed sets at ₹ 700 each. X decided to take credit for gross profit in proportion to cash received in the accounting period and to spread interest evenly over the life of the agreement, except for repossessed sets when it was proposed to deal with them separately and to include profit or loss on repossession as a separate item in the Profit and Loss Account.
There were 40 television sets on hand at 30.4.2013 excluding the sets that had been repossessed.
Prepare a Trading and Profit and Loss Account for the period 1.1.2013 to 30.4.2013 which shows clearly the separate contributions from cash and hire purchase sales, and a Balance Sheet as at 30.4.2013.

28. Majestic & Co. commenced business on January 1, 2014 dealing in radio sets and record players. They sell goods both directly as well as on hire purchase. You are furnished with the following information for the year ended 31st December, 2014:

	Radio sets		Record players	
Purchases	No.	1,000		100
Sales: Direct for cash	No.	800		50
On hire purchase	No.	40		20
To employees as explained below	No.	3		2
Purchase cost per unit	₹	400	₹	1,200
Direct sales price per unit	₹	500	₹	1,500
Terms of hire purchase sale:				
Cash down at the time of delivery	₹	100	₹	300
Monthly instalments	₹	50	₹	150
Number of instalments		10		12
Instalment collected		260		110
Instalments due but not yet collected		15		10

During the year the firm repossessed 3 radio sets and 2 record players for failure to pay the instalments. The hire purchase customers had paid only 4 instalments each in respect of these radio sets and record players. At the time of repossession, the radio sets were valued at ₹ 200 each and the record players were valued at ₹ 500 each. The firm spent ₹ 30 per radio set and ₹ 70 per record player on reconditioning. These sets were sold to employees at a concessional rate of ₹ 300 per radio set and ₹ 700 per record player and the amount was recovered from their salaries before the close of the year.
You are required to prepare columnar :
(i) Hire Purchase Trading Account; (ii) Goods sold on Hire Purchase Account; (iii) Purchases Account; (iv) Goods Repossessed Account; and (iv) General Trading Profit and Loss Account.

Section E : Stock and Debtors Method

29. Ramchandra sells goods on hire purchase at cost plus 50%. From the following particulars relating to the hire purchase department find out the profit for the year ending 31st December, 2014 by following stockand debtors system (all figures in ₹):

Jan 1. Stock with hire purchase customers at S.P.	4,500	Dec. 31 Cash received from customers	30,000

36

Departmental Accounts

Introduction

A business is generally split up into a number of departments when it sells different types of goods or carries on several activities under the same roof. Such departments are found in businesses of all sizes (particularly in urban areas). A department is generally a physical part of the rest of the business. It should not be assumed that departmental accounts refers only to departmental stores. In fact, they refer to the verious facets of a business. Each department is treated as a separate ***profit centre***, though none of the departments is separated geographically from the rest of the departments. This type of organisational subdivision creates a need for internal information about the operating results of each department. Since different departments may have different rates of growth, profitability and degrees of risk, managerial decisions in regard to pricing, closure etc. can be made on the basis of such information.Therefore, the various pros and cons of the actions to be taken to increase the over all profitability of the business concern can not be properly considered until the departmental profits and losses are known.

Advantages of Departmental Accounting

The main advantages of departmental accounting are as follows:

1. The performance of each department can be evaluated separately on the basis of trading results. An endeavour may be made to push up the sales of that department which is earning maximum profit.
2. It helps the management to decide whether to drop a department or add a new one.
3. The growth potential of a department as compared to others can be evaluated.
4. More detailed information can be provided to the users of the accounting information like the shareholders, investors, creditors etc.
5. Friendly rivalry between different departments may help to increase the overall profit of the organisation.
6. Departmental managers and staff can be rewarded properly on the basis of results.
7. It helps the management to determine the justification of capital outlay in each department.
8. It facilitates the comparison of expense items with those in other departments and in the previous period.

9. It helps to calculate stock turnover ratio of each department separately, and thus the efficiency of each department can be revealed.
10. Departmental accounting information also provides a basis for intelligent planning and control.

Methods of Departmental Accounts

In order to ascertain the departmental profit accurately, it is necessary to identify the different expenses and revenues of each department. The accounting system must be designed in such a manner that it provides maximum information and is simple to operate.

There are two methods of keeping Departmental Accounts:

(a) where separate set of books are kept for each department; and
(b) where accounts of all the departments are kept together on columnar books.

(a) Where Separate Set of Books are Kept for Each Department

This method of accounting is employed when the size of the organisation is very large or the law of the land requires the maintenance of separate books for each department. For example, in India, general insurance company is required to prepare separate revenue account for each type of business — fire, marine, accidents, etc.

Under this method each department is regarded as a separate unit and accounts are kept independently. At the year end the trading results of all the departments are combined to get the trading results of the organisation as a whole. This method is rarely used and is also expensive in operation.

(b) Where Accounts of All Departments are Kept Together on Columnar Books

When the size of the organisation is small, the entire book keeping system for the business as a whole is generally kept by a central accounts department.

A department does not maintain a full double-entry book-keeping system of its own, but some records are normally kept regarding purchases, sales and direct expenses, stock within the department, etc. The central accounts department generally maintains an analytical or columnar Purchase and Sales Day Book to distinguish between the purchases and sales of different departments.

After ascertaining purchases and sales of each department and also the direct expenses incurred, it only requires a departmental closing stock-taking in order to prepare a Trading Account for each department. Following is a specimen of Departmental Trading Account.

ABC Departmental Store Ltd.

Dr. Departmental Trading Account for the year ended ... Cr.

Particulars	Dept. A	Dept. B	Dept. C	Total	Particulars	Dept. A	Dept. B	Dept. C	Total
To Op. Stock	4,000	10,000	15,000	29,000	By Sales	50,000	70,000	80,000	2,00,000
To Purchases	37,000	45,000	55,000	1,37,000	By Cl. Stock	10,000	5,000	20,000	35,000
To Direct Exp.	10,000	5,000	5,000	20,000					
To G. P. c/d	9,000	15,000	25,000	49,000					
	60,000	75,000	1,00,000	2,35,000		60,000	75,000	1,00,000	2,35,000
Gross profit ratio	15%	20%	25%						

Under this system, the ***gross profit*** of individual department can be determined accurately. Where it is desired to determine the departmental net profit in addition to the gross profit, each department is charged with a share of the common expenses which is apportioned on a suitable basis.

Allocation of Departmental Expenses

In practice, the following general rules are usually applied for allocation and apportionment of expenses:

1. Expenses directly related to a particular department should be charged to that department. For example, salary of employees of a particular department or bad debts from the sale of a particular department can be charged to the concerned department directly.

2. The expenses which have a direct bearing with the sales should be apportioned on the basis of net sales. For example, advertisement expenses should be apportioned on the basis of departmental sales to outside customers.
3. All other business expenses, e.g. rent, rates, lighting, heating, depreciation, insurance etc. should be apportioned on the most logical basis. The nature of the expense, and the nature of the business will determine the basis for apportionment of expenses. The basis for apportionment of some important expenses are given below:

Sl.	Expenses	Basis
1.	(a) Travelling salesman's salary and commission (b) Selling expenses (c) After-sales service (d) Discount allowed (e) Freight outwards (f) Provision for discounts on debtors (g) Sales manager's salary and other benefits	Sales of each department
2.	(a) Rent, rates and taxes (b) Air conditioning expenses (c) Heating	Area or value of floor space
3.	Lighting	Light points
4.	Insurance on Stock	Average stock carried
5.	Insurance on Building	Area
6.	Insurance on Plant & Machinery	Value of Plant & Machinery
7.	Group insurance premium	Direct wages
8.	Power	H.P. or H.P. x Hours worked
9.	(a) Depreciation (b) Repairs and renewals	Value of assets in each department
10.	(a) Canteen expenses (b) Labour welfare expenses	Number of employees
11.	Works manager's salary	Time spent in each department
12.	Carriage inwards	Purchases of each department

There are certain types of expenses, most being of a financial nature, which cannot be apportioned on a suitable basis. Examples are loss on sale of investment or assets, damages payable for the infringement of law, interest on bank loan etc. There are also some purely financial incomes which cannot be suitably apportioned among different departments. To ascertain the total profit of a business as whole profits from all the departments should be added. If department(s) suffers a loss, it should be deducted from the total profits of the other departments. This figure should be brought down in one total and all the expenses should be deducted from that figure to arrive at the net profit.

Technique of Departmental Accounts

Columnar Purchases and Sales Books, etc. (Manual System)

If the number of departments are small, it is convenient to use columnar or analytical Purchase Day Book and Sales Day Book for recording credit purchases and credit sales of each department. Return Inwards Book and Return Outwards Book are ruled in a similar manner. For recording cash sales and cash purchases, special columns are also provided in the Cash Book.

Purchases Day Book

Date	Particulars	Invoice No.	L.F.	Total ₹	Departments		
					A	B	C
2013							
April 4	Century Mills Ltd.	19 / 11		40,000	—	—	40,000
18	Bombay Dyeing Ltd.	14 / 11		50,000	50,000	—	—
30	Raymond's Mills Ltd.	17 / 11		60,000	—	60,000	—
				1,50,000	50,000	60,000	40,000

The total monthly purchases of each department are posted to the debit of the respective Department's Purchases Account. The Suppliers' Account is credited in the usual manner.

In the General Ledger the Purchases Account will appear as follows:

Dr. **Purchases Account** **Cr.**

Date	Particulars	Departments			Date	Particulars	Departments		
		A	B	C			A	B	C
30.4.2013	To S. Creditors A/c	50,000	60,000	40,000					

The same ruling will do for Sales Day Book, Returns Inwards Book and Returns Outwards Book.

Computerised System

If the number of departments are very large, the use of separate journal column for each department would result in journal of unmanageable size. Now-a-days almost all large departmental stores are using computer to record transaction data directly into a computerised accounting system. With the help of computer terminals each department enter sales information into a main computer at the time each sale is rung up. Journals, ledgers and other reports are prepared at the end of each month for the use of the management.

Distinction between Departmental Accounts and Branch Accounts

1. In case of a dependent branch, all important accounting records are kept at the head office. The branch maintains only Cash Account and Customers Account (if necessary). However, an independent branch, usually maintains its own books of account and prepares its own Trading and Profit and Loss Account. In case of Departmental Accounts, all accounting records are maintained at one place and Departmental Trading and Profit and Loss Account is prepared accordingly.
2. As the departments are not geographically separated from each other, the problem of allocation of common expenditure among different departments arises. But in case of a branch account this problem of allocation of common expenditure does not arise since branches are geographically separated from each other.
3. In case of an independent branch, at the end of the accounting year, some adjustment and reconciliation of head office and branch accounts are required. In case of Department Accounts, the question of adjustments and reconciliation of accounts does not arise.
4. At the time of finalisation of accounts of head office, the conversion of foreign branch figures may create some problems. In case of Departmental Accounts, this type of problem does not arise.

Illustration 1

The following balances as at 31.12.2014 have been extracted from the books of Sri Ram & Co which has two departments:

Particulars	Dept. A (₹)	Dept. B (₹)
Opening Stock as on 1.1.2014	25,000	20,000
Purchases	2,30,000	1,90,000
Purchase Returns	2,000	1,000
Sales	6,33,000	4,92,000
Sales Returns	3,000	2,000
Wages	1,80,000	1,60,000
Miscellaneous Charges	35,000	32,000

General:

Sundry Debtors — ₹ 1,90,000; Sundry Creditors — ₹ 1,73,000; Plant and Machinery — ₹ 2,40,000; Leaseholds — ₹ 80,000; Buildings — ₹ 1,20,000; Furniture and Fittings — ₹ 48,000; Office and Selling Expenses — ₹ 1,28,000; Cash in hand on 31.12.2014 — ₹ 8,000; Cash at Bank on 31.12.2014 — ₹ 1,10,000; Capital — ₹ 5,00,000.

Plant and Machinery is to be depreciated by 10%; Buildings by 2%; Furniture and Fittings by 5%; Leaseholds are to be written-off by ₹ 8,000. The stock on hand as on 31.12.2014: Department A — ₹ 26,000; Department B — ₹ 24,000.

All unallocated expenditure is to be apportioned in the ratio of the net sales of each department.

Prepare in columnar form, the Trading, Profit and Loss Account of the two departments and Balance Sheet of the combined business as a whole on 31.12.2014.

To Depreciation	320	160			
To Net Profit - transferred to Capital	—	1,463			
	3,255	3,287		3,255	3,287

Balance Sheet of P & Co. as at 31st December, 2014

Liabilities	₹	₹	Assets	₹	₹
Capital (opening)	9,530		Plant and Machinery	4,200	
Add: Profit from Dept. B	1,463		Less: Depreciation	420	3,780
Less: Loss from Dept. A	339		Furniture and Fittings	600	
	10,654		Less: Depreciation	60	540
Less: Drawings	900	9,754	Sundry Debtors		1,820
Outstanding exp. for lighting and heating		180	Stock in trade		5,149
Sundry Creditors		3,737	Cash at bank		1,980
			Cash in hand		32
			Prepaid rent		370
		13,671			13,671

Working Note: (1) Carriage inwards and discount received are apportioned in the purchase ratio and discount allowed and advertisement in the sales ratio.

Particulars	Dept. A	Dept. B
(a) Carriage Inward	$\frac{469}{17,150} \times 9,800 = ₹\ 268$	$\frac{469}{17,150} \times 7,350 = ₹\ 201$
(b) Discount received	$\frac{133}{17,150} \times 9,800 = ₹\ 76$	$\frac{133}{17,150} \times 7,350 = ₹\ 57$
(c) Discount allowed	$\frac{441}{30,420} \times 16,900 = ₹\ 245$	$\frac{441}{30,420} \times 13,520 = ₹\ 196$
(d) Advertisement	$\frac{738}{30,420} \times 16,900 = ₹\ 410$	$\frac{738}{30,420} \times 13,520 = ₹\ 328$
(e) Rent (₹ 1,870 – 370)	$\frac{1,500}{3} \times 2 = ₹\ 1,000$	$\frac{1,500}{3} \times 1 = ₹\ 500$
(f) Lighting & heating (₹ 420 + 180)	$\frac{600}{3} \times 2 = ₹\ 400$	$\frac{600}{3} \times 1 = ₹\ 200$
(g) Salaries	$\frac{1,320}{3} \times 2 = ₹\ 890$	$\frac{1,320}{3} \times 1 = ₹\ 440$
(h) Depreciation (₹ 420 + 60)	$\frac{480}{3} \times 2 = ₹\ 320$	$\frac{480}{3} \times 1 = ₹\ 160$

Illustration 3

M/s Suman Hosiery Mills produces three varieties of products: Sona, Mona and Dona. The cost of production during the year 2014 of these varieties amounted to ₹ 8,00,000. Output during the year were: Sona — 4,000 units; Mona — 8,000 units and Dona — 9,600 units.

Stock on 1st January, 2014 were: Sona — 450 units; Mona — 300 units and Dona — 600 units.

Sales during the year were: Sona — 4,100 units @ ₹ 48 each; Mona — 7,700 units @ ₹ 54 each and Dona — 10,000 units @ ₹ 60 each. The rate of gross profit is the same in each case. Total departmental expenses of ₹ 96,000 were to be apportioned to various products in the ratio of 1:2:2.

Prepare Departmental Trading Account.

Solution **M/s Suman Hosiery Mills**

Dr. **Departmental Trading Account for the year ended 31st December, 2014** **Cr.**

Particulars	Sona	Mona	Dona	Particulars	Sona	Mona	Dona
To Opening Stock (Note 1)				By Sales			
Sona (450 x ₹ 32)	14,400			Sona (4,100 x ₹ 48)	1,96,800		
Mona (300 x ₹ 36)		10,800		Mona (7,700 x ₹ 54)		4,15,800	
Dona (600 x ₹ 40)			24,000	Dona (10,000 x ₹ 60)			6,00,000
To Cost of Production:				By Closing Stock:			
Sona (4,000 x ₹ 32)	1,28,000			Sona (350 x ₹ 32)	11,200		
Mona (8,000 x ₹ 36)		2,88,000		Mona (600 x ₹ 36)		21,600	
Dona (9,600 x ₹ 40)			3,84,000	Dona (200 x ₹ 40)			8,000
To Department Gross Profit ($33^1/_3$ of Sales)	65,600	1,38,600	2,00,000				
	2,08,000	4,37,400	6,08,000		2,08,000	4,37,400	6,08,000

Tutorial Note: Departmental expenses of ₹ 96,000 should not be charged to Trading Account, because they are not directly related with production. However, for the purpose of determining departmental net profit, these expenses are to be charged to: Sona — ₹ 19,200; Mona — ₹ 38,400; and Dona — ₹ 38,400. The resultant profits will be: Sona — ₹ 46,400; Mona — ₹ 1,00,200; and Dona — ₹ 1,61,600.

Working Notes: For the purpose of calculating G.P. ratio, the cost of production to be deducted from the sale value of goods produced only.

(1) Calculation of Rate of Gross Profit and Cost of Production

	₹	₹
Sales value of goods produced:		
Sona : 4,000 x ₹ 48	1,92,000	
Mona : 8,000 x ₹ 54	4,32,000	
Dona : 9,600 x ₹ 60	5,76,000	12,00,000
Less: Total cost of production		8,00,000
Expected Gross Profit		4,00,000
(a) Rate of gross profit = $\frac{4,00,000}{12,00,000} \times 100 = 33\frac{1}{3}\%$ (on sales)		

(b) Respective departmental cost prices (i.e., Sales price less 33 $^1/_3$%) :
Sona : ₹ 48 – ₹ 16 = ₹ 32; Mona : ₹ 54 – ₹ 18 = ₹ 36; and Dona : ₹ 60 – ₹ 20 = ₹ 40.

(2) Calculation of Number of Units Unsold

Department	Opening Stock (+)	Production (—)	Sales (=)	Closing Stock
Sona (units)	450	4,000	4,100	350
Mona (units)	300	8,000	7,700	600
Dona (units)	600	9,600	10,000	200

Assumption : Cost of production and sales prices are constant for the last 2 years.

Illustration 4

Brahma Limited has three departments and submits the following information for the year ending on 31st March, 2013 :

Particulars	A	B	C	Total (₹)
Purchases (units)	5,000	10,000	15,000	—
Purchases (Amount)	—	—	—	8,40,000
Sales (units)	5,200	9,800	15,300	—
Selling price (₹ per unit)	40	45	50	—
Opening stock (units)	400	600	700	—

You are required to prepare Departmental Trading Account of Brahma Limited assuming that the rate of profit on sales is uniform in each case.

Solution

Brahma Ltd

Dr. Departmental Trading Account for the year ended 31st March, 2013 Cr.

Particulars	A (₹)	B (₹)	C (₹)	Particulars	A (₹)	B (₹)	C (₹)
To Opening Stock (Note 4)	14,400	10,800	30,000	By Sales (Note 6)	2,08,000	4,41,000	7,65,000
To Purchases (Note 2)	1,20,000	2,70,000	4,50,000	By Closing Stock (Note 5)	9,600	16,200	21,000
To Gross Profit	83,200	1,76,400	3,06,000				
	2,17,600	4,57,200	7,86,000		2,17,600	4,57,200	7,86,000

Working Notes :

(1) Calculation of Profit Margin Rate

Particulars	₹	₹
Department A (5,000 units @ ₹ 40)	2,00,000	
Department B (10,000 units @ ₹ 45)	4,50,000	
Department C (15,000 units @ ₹ 50)	7,50,000	
Total Sales Value		14,00,000
Less: Purchases (given)		8,40,000
Gross Profit		5,60,000

$$\text{Profit Margin Rate} = \frac{\text{Gross Profit}}{\text{Sales Value}} \times 100 = \frac{5,60,000}{14,00,000} \times 100 = 40\%$$

(2) Calculation of Purchase Price and Total Purchases of Each Department

Particulars	A	B	C
Selling Price per unit (₹)	40	45	50
Less: Profit Margin @ 40%	16	18	20
Purchase Price per unit (X)	24	27	30
Number of Units Purchased (Y)	5,000	10,000	15,000
Total Purchases (X) x (Y) (₹)	1,20,000	2,70,000	4,50,000

(3) Calculation of Opening Stock of Each Department

Department	A	B	C
Closing Stock (units)	400	600	700
Add: Sales (units)	5,200	9,800	15,300
	5,600	10,400	16,000
Less: Purchases (units)	5,000	10,000	15,000
Opening Stock (units)	600	400	1,000

(4) Calculation of Value of Opening Stock

Department A : 600 × ₹ 24 = ₹ 14,400
Department B : 400 × ₹ 27 = ₹ 10,800
Department C : 10,000 × ₹ 30 = ₹ 30,000

(5) Calculation of Value of Closing Stock

Department A : 400 × ₹ 24 = ₹ 9,600
Department B : 600 × ₹ 27 = ₹ 16,200
Department C : 700 × ₹ 30 = ₹ 21,000

(6) Calculation of Sales Value

Department A : 5,200 × ₹ 40 = ₹ 2,08,000
Department B : 9,800 × ₹ 45 = ₹ 4,41,000
Department C : 15,300 × ₹ 50 = ₹ 7,65,000

Illustration 5

Rohit Choudhury is the proprietor of a retail business which has two main departments which sell respectively hardware and electrical goods. On 31.12.2014, the balances in the books of the business were as follows :

Particulars	Dr. (₹)	Cr. (₹)	Particulars	Dr. (₹)	Cr. (₹)
Capital		71,000	Drawings	3,000	
Sales — Hardware		59,000	Buildings (Cost)	43,000	
Electrical		29,500	Equipments at W.D.V. — Hardware	18,000	
Purchases — Hardware	20,000		Electrical	7,000	
Electrical	10,000		Debtors and Creditors	10,200	5,319
Stock on 1.1.2014 — Hardware	2,320		Bank	5,600	
Electrical	2,136		Rent and Rates	1,580	
Salaries — Hardware	20,560		Canteen Charges	875	
Electrical	15,440		Heating and Lighting	880	
Advertising	615		Insurance of Stock	940	
Discount allowed — Hardware	400		General Administrative Expenses	2,073	
Electrical	200		**Total**	1,64,819	1,64,819

Additional information —

(i) At 31.12.2014, the following amounts were outstanding :
Salaries — Hardware ₹ 250; Electrical ₹ 170; Heating and Lighting ₹ 20.

(ii) The general administrative expenses and the rent and rates included prepayments of ₹ 33 and ₹ 80 respectively.

(iii) Stocks at 31.12.2014 were : Hardware ₹ 2,800; Electrical ₹ 2,450.

(iv) Depreciation is to be provided on equipments at 10% on W.D.V.

(v) The managers of the hardware and electrical departments are to be paid a commission of 5% of the net profit (prior to the commission payment) of the respective departments.

(vi) In apportioning the various expenses between the two departments due regard is to be given to the following information :

	Number of Workers	Average Stock Levels (₹)	Floor Area (sq.ft)
Hardware	9	2,500	4,000
Electrical	6	2,200	2,000

(vii) The general administrative expenses are primarily incurred in relation to the processing of purchases and sales invoices.

Prepare a Departmental Trading and Profit and Loss Account and the Balance Sheet.

Solution

	39,480	19,814		39,480	19,814

Balance Sheet of Rohit Choudhury as at 31st December, 2014

Liabilities		₹	Assets		₹
Capital (Opening)	71,000		Buildings (cost)		43,000
Add: Profit from Hardware	11,471		Equipments at W.D.V. (₹ 18,000 + 7,000)	25,000	
Add: Profit from Electrical	788		Less: Depreciation (₹ 1,800 + 700)	2,500	22,500
	83,259		Stock — Hardware	2,800	
Less: Drawings	3,000	80,259	Electrical	2,450	5,250
Creditors		5,319	Debtors		10,200
Outstanding :			Bank		5,600
Salaries (₹ 250 + 170)		420	Prepayments :		
Heating and Lighting		20	General Administrative Expenses		33
Commission (₹ 604 + 41)		645	Rent and Rates		80
		86,663			86,663

Working Notes : **(1) Apportionment of Common Expenses**

Expenses	Basis	Hardware Department	Electrical Department
(i) Advertising	Sales	$\frac{615}{88,500} \times$ Rs $59,000 =$ ₹ 410	$\frac{615}{88,500} \times 29,500 =$ ₹ 205
(ii) Rent and Rates	Floor Area	$\frac{1,500 \text{ (Note 3)}}{6} \times 4 =$ ₹ 1,000	$\frac{1,500}{6} \times 2 =$ ₹ 500
(iii) Canteen Charges	Number of Workers	$\frac{875}{15} \times 9 =$ ₹ 525	$\frac{875}{15} \times 6 =$ ₹ 350
(iv) Heating and Lighting	Floor Area	$\frac{900 \text{ (Note 3)}}{6} \times 4 =$ ₹ 600	$\frac{900}{6} \times 2 =$ ₹ 300
(v) Insurance of Stock	Average Stock Level	$\frac{940}{4,700} \times 2,500 =$ ₹ 500	$\frac{940}{4,700} \times 2,200 =$ ₹ 440
(vi) General Administrative Expenses	Total of Sales and Purchases	$\frac{2,040 \text{ (Note 3)}}{1,18,500} \times 79,000 =$ ₹ 1,360	$\frac{2,040}{1,18,500} \times 39,500 =$ ₹ 680

(2) Managers' Commission:
Hardware : 5% of ₹ 12,075 = ₹ 604 (approx.)
Electrical : 5% of ₹ 829 = ₹ 41 (approx.)

(3) Rent and Rates : ₹ 1,580 – ₹ 80 (prepaid) = ₹ 1,500;
Heating and Lighting : ₹ 880 + ₹ 20 (outstanding) = ₹ 900;
General Administrative Expenses : ₹ 2,073 – ₹ 33 (prepaid) = ₹ 2,040

Illustration 6

The following balances as at 31.12.2014 have been extracted from the books of David, the proprietor of a departmental store :

Wages and Salaries ₹ 1,42,500; Maintenance ₹ 12,360; Rent ₹ 27,050; Advertising ₹ 15,000; Sundry Debtors ₹ 41,900; Sundry Creditors ₹ 16,800; Provision for doubtful debts ₹ 5,000; Investments ₹ 50,000; Furniture ₹ 46,500; Cash ₹ 21,550; Capital Account ₹ 2,00,000; Current Account ₹ 880 (Cr.); Drawings ₹ 75,120.

The records relating to the stocks are : (all figures in ₹)

	Stock on 1.1.2014	Purchases	Purchase Returns	Stock on 31.12.2014
Dept. X	10,700	94,600	900	21,000
Dept. Y	68,000	2,20,980	2,200	61,600

Additional information :

(1) Department X sells articles for ₹ 40 each which is equivalent to 80% above cost price, while department Y sells articles for ₹ 60 each which is equivalent to double the cost price.

(2) Write off bad debts ₹ 3,300 and adjust the provision for doubtful debts to 10% of the remaining outstanding debtors. These adjustments should be apportioned equally between department X and department Y.

(3) Provide ₹ 4,000 investment income due to be received.
(4) Provide ₹ 1,150 rent due to be paid.
(5) Depreciate furniture by 10%.
(6) All general expenses should be apportioned between department X and department Y on the basis of the number of articles sold by these departments during the year.

You are required to prepare Departmental Trading and Profit and Loss Account for the year ended 31.12.2014 and a Balance Sheet as on that date.

Solution **David**

Dr. Departmental Trading and Profit and Loss Account for the year ended 31st December, 2014 Cr.

Particulars	Dept. X (₹)	Dept. Y (₹)	Particulars	Dept. X (₹)	Dept. Y (₹)
To Opening Stock	10,700	68,000	By Sales (Note 1)	1,50,120	4,50,360
To Purchases	94,600	2,20,980	By Closing Stock	21,000	61,600
Less: Returns	(900)	(2,200)			
To Gross Profit c/d	66,720	2,25,180			
	1,71,120	5,11,960		1,71,120	5,11,960
To Wages and Salaries (Note 3)	47,500	95,000	By Gross Profit b/d	66,720	2,25,180
To Maintenance (Note 3)	4,120	8,240	By Provision for Doubtful Debts (equally — Note 2)	570	570
To Rent (₹ 27,050 + 1,150)	9,400	18,800	By Departmental Loss c/d	1,930	—
To Advertising (Note 3)	5,000	10,000			
To Depreciation on Furniture (Note 3)	1,550	3,100			
To Bad Debts (equally)	1,650	1,650			
To Departmental Profit c/d	—	88,960			
	69,220	2,25,750		69,220	2,25,750
To Departmental Loss b/d		1,930	By Departmental Profit b/d		88,960
To Net Profit		91,030	By Accrued Income from Investments		4,000
		92,960			92,960

Balance Sheet of David as at 31st December, 2014

Liabilities		₹	Assets		₹
Capital Account		2,00,000	Furniture	46,500	
Current Account :	₹		Less : Depreciation	4,650	41,850
Opening balance	880		Stock (₹ 21,000 + 61,600)		82,600
Add : Net Profit	91,030		Sundry Debtors	41,900	
	91,910		Less : Bad Debts	3,300	
Less : Drawings	75,120	16,790		38,600	
Sundry Creditors		16,800	Less : Provision for Doubtful Debts	3,860	34,740
Outstanding Rent		1,150	Investments	50,000	
			Add : Accrued Income	4,000	54,000
			Cash		21,550
		2,34,740			2,34,740

Working Notes : **(1) Calculation of Sales**

Particulars	Dept X (₹)	Dept Y (₹)
Opening Stock	10,700	68,000
Add : Purchases	94,600	2,20,980
	1,05,300	2,88,980
Less: Purchases Return	900	2,200
	1,04,400	2,86,780
Less : Closing Stock	21,000	61,600
Cost of Goods Sold	83,400	2,25,180

(a) Department X sells goods at 80% above cost. Therefore, sales = ₹ 83,400 / 100 × 180 = ₹ **1,50,120**.

(b) Department Y sells goods at 100% above cost. Therefore, sales = ₹ ₹ 2,25,180 / 100 × 200 = ₹ **4,50,360**.

(2) Calculation of Excess Provision for Doubtful Debts

	₹
Balances of Sundry Debtors	41,900
Less : Bad Debts to be written off	3,300
Adjusted balance of Sundry Debtors	38,600

Existing balance of provision for doubtful debts	5,000
Less: Provision for Doubtful Debts required : 10% of ₹ 38,600	3,860
Excess	1,140

This excess provision for doubtful debts will be credited to department X and Y equally, i.e., ₹ 570 each.

(3) Calculation of Number of Articles Sold

Department X : ₹ 1,50,120 / 40 = 3,753

Department Y : ₹ 4,50,360 / 60 = 7,506

Ratio of number of articles sold : 3,753 : 7,506 or 1 : 2

All general expenses are to be apportioned in the ratio of 1 : 2.

Illustration 7

Robinhood is a retail trader whose stores has two departments dealing in clothing and sports equipment respectively. The following Trial Balance was extracted from books at 31.12.2014, the accounting year end :

Particulars	Dr. (₹)	Cr. (₹)
Sales — Clothing		1,20,000
Sports Equipment		1,60,000
Stock at cost at 1.1.2014 — Clothing	10,000	
Sports Equipment	16,000	
Purchases — Clothing and Sports Equipment	1,92,000	
Establishment Expenses — Clothing	15,000	
Sports Equipment	16,920	
Sales and Administrative Expenses — Clothing	7,400	
Sports Equipment	5,840	
Capital		20,000
Reserve		21,460
Creditors		5,800
Bank Overdraft		2,300
Debtors	8,600	
Building — At cost	20,000	
Provision for Depreciation		800
Furniture — At cost	26,000	
Provision for Depreciation		9,000
Vehicles — At cost	42,000	
Provision for Depreciation		20,400
Total	3,59,760	3,59,760

Additional information —

(a) Gross profit is earned as follows : Clothing — 1/3rd of sales; Sports equipment — 3/10th of sales.

(b) Stock is valued at cost on 31.12.2014 :
Clothing ₹ 8,000; Sports equipment ₹ 14,000

(c) Amounts prepaid at 31.12.2014 :
Establishment expenses — Clothing ₹ 300.

(d) Amount outstanding on 31.12.2014 :
Sales and administrative expenses — Clothing ₹ 200; Sports equipment ₹ 700.

(e) The sales staff receive commission in June of each year based on the gross profit earned in their department in the previous financial year :
Clothing — 2% of gross profit; Sports equipment — 3% of gross profit.

(f) In June 2014, additional furniture was acquired at a cost of ₹ 4,000 was debited to purchases.

(g) Depreciation is provided annually on fixed assets at the following percentage of the cost of assets held at the relevant accounting year end :
Building — 2%; Furniture — 10%; Vehicles — 20%.

(h) In August 2014, a motor vehicle which had been bought in January 2007 at a cost of ₹ 6,000 was scrapped, the firm did not receive anything for the scrap.

(i) The fixed assets depreciation is apportioned to departments as follows :

	Clothing	Sports Equipment
Building	1/2	1/2
Furniture	3/5	2/5
Vehicles	5/12	7/12

You are required to prepare the Trading and Profit and Loss Account for the year ended 31.12.2014 and the Balance Sheet as on that date.

Solution

Robinhood

Dr. Departmental Trading and Profit and Loss Account for the year ended 31st December, 2014 Cr.

Particulars	Clothing (₹)	Sports Equipment (₹)	Particulars	Clothing (₹)	Sports Equipment (₹)
To Opening Stock	10,000	16,000	By Sales	1,20,000	1,60,000
To Purchases (Balancing figure)	78,000	1,10,000	By Closing Stock	8,000	14,000
To Gross Profit c/d (given)	40,000	48,000			
	1,28,000	1,74,000		1,28,000	1,74,000
To Establishment Expenses (Note 1)	14,700	16,920	By Gross Profit b/d	40,000	48,000
To Sales and Administrative Exp. (Note 2)	7,600	6,540			
To Outstanding Sales Staff Comm. (Note 5)	800	1,440			
To Depreciation on (Note 3) :					
Building (1 : 1)	200	200			
Furniture (3 : 2)	1,800	1,200			
Vehicles (5 : 7)	3,000	4,200			
To Loss on Scrap of Vehicle (Note 4)	500	700			
To Net Profit (transferred)	11,400	16,800			
	40,000	48,000		40,000	48,000

Balance Sheet of Robinhood as at 31st December, 2014

Liabilities		₹	Assets		₹
Capital (opening)	20,000		Building	20,000	
Add: Profit from Clothing	11,400		Less: Provision for depreciation	1,200	18,800
Add: Profit from Sports Equipment	16,800	48,200	Furniture (₹ 26,000 + ₹ 4,000)	30,000	
Reserve		21,460	Less: Provision for depreciation	12,000	18,000
Creditors		5,800	Vehicles (₹ 42,000 – ₹ 6,000)	36,000	
Outstanding :			Less: Provision for depreciation	22,800	13,200
Sales and Administrative Expenses (₹ 200 + 700)		900	Stock (₹ 8,000 + ₹ 14,000)		22,000
Sales Staff Commission		2,240	Debtors		8,600
Bank Overdraft		2,300	Prepaid Establishment Expenses		300
		80,900			80,900

Working Notes :

(1) Establishment Expenses

Clothing — ₹ 15,000 – ₹ 300 (prepaid) = ₹ 14,700.

(2) Sales and Administrative Expenses

Clothing — ₹ 7,400 + ₹ 200 (outstanding) = ₹ 7,600.

Sports Equipment — ₹ 5,840 + ₹ 700 (outstanding) = ₹ 6,540.

(3) Calculation of Depreciation

On Building — ₹ 20,000 @ 2% = ₹ 400.

On Furniture — ₹ 30,000 @ 10% = ₹ 3,000

On Vehicles — (₹ 42,000 – ₹ 6,000) @ 20% = ₹ 7,200.

(4) Loss on Scrap of Vehicle

	₹
Cost	6,000
Less: Accumulated depreciation (4 years @ ₹ 1,200)	4,800
Written down value on the date the asset was scrapped	1,200
Amount realised	Nil
Loss	1,200

Loss on scrap of vehicle will be shared by Clothing Department and Sports Equipment Department just like depreciation. Therefore, clothing department will bear the loss of ₹ 500 (5/12 of ₹ 1,200) and sports equipment department will bear the loss of ₹ 700 (7/12 of ₹ 1,200).

(5) Sales staff will get commission in June, 2013 on the basis of gross profit of 2014. Therefore, in the Profit and Loss Account of 2014, provision must be made for such future payment.

Illustration 8

Praveen Choudhury commenced trading on 1.4.2014 as Highway Stores, retail stationers and confectioners, with an initial capital of ₹ 30,000 which was utilised in the opening of a business Bank Account. All receipts and payments are passed through the Bank Account. The following is a summary of the items credited in the business Cash Book during the year ended 31.3.2015:

Particulars	(₹)	Particulars	(₹)
Purchase of fixtures and fittings :		Rent for the period 1.4.2014 to 30.4.2015	13,000
Stationery department	26,000	Rates for the year ended 31.3.2015	5,700
Confectionery department	15,000	Electricity	3,700
Staff salaries :		Advertising	11,000
Stationery department	22,000	Payment to suppliers	5,35,500
Confectionery department	15,400	Drawings	50,000

The purchases during the year under review were :

Stationery department ₹ 2,60,000; Confectionery department ₹ 2,92,500.

The above purchases do not include goods costing ₹ 5,000 bought by the business and then taken by Mr Choudhury for his own domestic use. The figure of ₹ 5,000 is included in payment to suppliers.

The gross profit in the stationery department is @ 20% on sales while in the confectionery department, it is @ 25% on sales. In both departments, sales in each month are always at a uniform level. The policy of Mr Choudhury is to have the month end stocks in each department just sufficient for the following month's sales. The prices of all goods bought by Highway Stores have not changed since the business began.

The sundry debtors at 31.3.2015 amounted to ₹ 90,000.

In August 2014, Mr Choudhury invested an additional capital of ₹ 90,000.

At 31.3.2015, outstanding electricity bill amounted to ₹ 1,100. Mr Choudhury has decided that expenses not incurred by a specific department should be apportioned to departments as follows :

1. Rent and rates — according to floor area occupied.
2. Electricity — according to consumption.
3. Advertising — according to turnover.

Two-thirds of the business floor space is occupied by the stationery department while three-quarters of the electricity is consumed by that department.

It has been decided that depreciation on fixtures and fittings should be provided @ 10% of the cost of assets held at the year end.

Required :

(a) A Trading and Profit and Loss Account for the year ended 31.3.2015 for the — (i) stationery department; and (ii) confectionery department.

(b) A Balance Sheet as on 31.3.2015.

Solution

Highway Stores

Dr. Departmental Trading and Profit and Loss Account for the year ended 31st March, 2015 Cr.

Particulars	Stationery (₹)	Confectionery (₹)	Particulars	Stationery (₹)	Confectionery (₹)
To Purchases	2,60,000	2,92,500	By Sales (Note 4)	3,00,000	3,60,000
To Gross Profit c/d	60,000	90,000	By Closing Stock (Note 3)	20,000	22,500
	3,20,000	3,82,500		3,20,000	3,82,500

To Net Profit	15,000	60,000			
	60,000	90,000		60,000	90,000

Balance Sheet of Highway Stores as at 31st March, 2015

Liabilities		₹	Assets		₹
Capital : Introduced	30,000		Fixtures and Fittings (₹ 26,000 + 15,000)	41,000	
Add: Further introduced	90,000		Less : Depreciation	4,100	36,900
Profit from Stationery	15,000		Stock (₹ 20,000 + ₹ 22,500) (Note 3)		42,500
Profit from Confectionery	60,000		Debtors		90,000
	1,95,000		Prepaid Rent (Note 6)		1,000
Less: Drawings (₹ 50,000 + 5,000)	55,000	1,40,000			
Creditors (Note 2)		22,000			
Outstanding Electricity		1,100			
Bank Overdraft (Note 1)		7,300			
		1,70,400			1,70,400

Working Notes :

Dr. **(1) Bank Account** **Cr.**

Particulars	₹	Particulars	₹
To Cash (Capital introduced)	30,000	By Fixtures and Fittings	41,000
To Sundry Debtors (Note 5)	5,70,000	By Staff Salaries	37,400
To Cash (Further capital)	90,000	By Rent	13,000
To Balance c/d	7,300	By Rates	5,700
		By Electricity	3,700
		By Advertising	11,000
		By Creditors	5,35,500
		By Drawings	50,000
	6,97,300		6,97,300

Dr. **(2) Creditors Account** **Cr.**

Particulars	₹	Particulars	₹
To Bank	5,35,500	By Purchases	
To Balance c/d	22,000	— Stationery	2,60,000
		— Confectionery	2,92,500
		By Drawings (Adjustment for stationery taken over)	5,000
	5,57,500		5,57,500

(3) Closing stock will be equal to next month's sale. Sales are uniform in each month.
Therefore, purchases during 2014-15 are equal to 13 months' sale. Therefore, closing stock will be —
Stationery department : ₹ 2,60,000 / 13 = ₹ 20,000. Confectionery department ₹ 2,92,500 / 13 = ₹ 22,500.

(4) Calculation of Sales

Stationery Department	₹	Confectionery Department	₹
Sales	100	Sales	100
Less: Gross Profit @ 20%	20	Less: Gross Profit @ 25%	25
Cost	80	Cost	75
Cost of Goods Sold (Purchases – Closing Stock)	2,40,000	Cost of Goods Sold (Purchases – Closing Stock)	2,70,000
Sales = $\frac{\text{Cost of Goods Sold}}{80} \times 100$	3,00,000	Sales = $\frac{\text{Cost of Goods Sold}}{75} \times 100$	3,60,000

(5) Total sales = ₹ 3,00,000 + ₹ 3,60,000 = ₹ 6,60,000. Amount due from sundry debtors at the end of the year ₹ 90,000.
Therefore, amount collected from sundry debtors = ₹ 6,60,000 – ₹ 90,000 = ₹ 5,70,000.

(6) Rent has been paid for 13 months (1.4.2014 to 30.4.2015).
Therefore, prepaid rent will be — ₹ 13,000 / 13 = ₹ 1,000.

(7) Apportionment of Common Expenses

Expenses	Basis	Stationery	Confectionery
(i) Rent	Floor Area (2 : 1)	₹ 12,000 x 2/3 = ₹ 8,000	₹ 12,000 x 1/3 = ₹ 4,000
(ii) Rates	Floor Area (2 : 1)	₹ 5,700 x 2/3 = ₹ 3,800	₹ 5,700 x 1/3 = ₹ 1,900
(iii) Electricity	Consumption (3 : 1)	₹ 4,800 x 3/4 = ₹ 3,600	₹ 4,800 x 1/4 = ₹ 1,200
(iv) Advertising	Turnover (5 : 6)	₹ 11,000 x 5/11 = ₹ 5,000	₹ 11,000 x 6/11 = ₹ 6,000

Illustration 9

X and Y are in partnership managing a small retail store which specialises in sweets and confectionary - managed by X and newspapers and periodicals - managed by Y. The partnership agreement provides for X to receive three-fifths of the profit, and Y two-fifths, each partner to be allowed 8% interest on capital and each to receive a commission of 10% of the profit of their respective sections prior to any other appropriation of profit. During the year to 31st March 2015, a trial balance extracted at that date revealed the following features. (all figures in ₹).

Particulars	Dr.	Cr.
Capital - X		14,000
Y		8,000
Current Accounts - X		2,020
Y	250	
Drawings - X	1,100	
Y	900	
Freehold shop premises	10,000	
Equipment (at written-down value) :		
Confectionery section	4,500	
Periodical section	3,500	
Purchases : Confectionery section	15,900	
Periodical section	17,700	
Stock at 1st April : Confectionery section	2,300	
Periodical section	3,100	
Sales : Confectionery section		18,500
Periodical section		21,500
Wages: Confectionery section	1,175	
Periodical section	1,470	
Miscellaneous expenses	230	
Rates	500	
Light and heat	400	
Advertising	250	
Debtors and creditors	1,800	2,100
Bad debts - Periodical section	95	
Cash in hand	950	
Cash at bank	50	
Provision for doubtful debts : Periodical section		50
Total	66,170	66,170

Additional information available:

(i) Stock at 31st March, 2015 was ₹ 3,600 in the Confectionery section, and ₹ 4,400 in the Periodical section.

(ii) The partners have agreed that rates should be apportioned between the Confectionery and Periodical sections on a 3:2 ratio, advertising on a 1:1 ratio, lighting and heating on a 2:3 ratio, and miscellaneous expenses on a 1:1 ratio.

(iii) Wages owing at 31st March, 2015 : ₹ 25 and ₹ 30 for the Confectionery and Periodical section respectively.

(iv) Advertising prepaid at 31st March, 2013 amounted to ₹ 100.

(v) The provision for doubtful debts is to be increased to 5% of the debtors of the Periodical section, which amount to ₹ 1,500 at 31st March 2015.

(vi) Equipment of both sections is to be depreciated at 10% of the written-down value at 1st April, 2014.

Required:

(a) Prepare a Trading and Profit and Loss Account for the Confectionery and the Periodical sections, and also for the business as a whole, for the year ended 31st March, 2015. (Note : A Balance Sheet is not required).

(b) Prepare an Appropriation Account for the year ended 31st March, 2015.

Solution **XY**

Dr. Departmental Trading and Profit & Loss Account for the year ended 31st March, 2015 Cr.

Particulars	Confec-tionery	Periodical	Total ₹	Particulars	Confec-tionery	Periodical	Total ₹
To Opening Stock	2,300	3,100	5,400	By Sales	18,500	21,500	40,000
To Purchases	15,900	17,700	33,600	By Closing Stock	3,600	4,400	8,000
To Wages (Note 1)	1,200	1,500	2,700				
To Gross Profit c/d	2,700	3,600	6,300				
	22,100	25,900	48,000		22,100	25,900	48,000

To Depreciation	450	350	800				
To Net Profit - transferred	1,600	2,500	4,100				
	2,700	3,600	6,300		2,700	3,600	6,300

Dr. Appropriation Account for the year ended 31st March, 2015 Cr.

Particulars	₹	Particulars	₹
To Commission:		By Net Profit	4,100
X	160		
Y	250		
To Interest on Capital:			
X	1,120		
Y	640		
To Share of Profit			
X	1,158		
Y	772		
	4,100		4,100

Working Notes:

(1) Wages : Confectionery ₹ 1,175 + outstanding ₹ 25 = ₹ 1,200; and Periodical ₹ 1,470 + outstanding ₹ 30 = ₹ 1,500.
(2) Miscellaneous expenses : Confectionery - 1/2 of ₹ 230 = ₹ 115 and Periodical - 1/2 of ₹ 230 = ₹ 115.
(3) Rates : Confectionery - 3/5 of ₹ 500 = ₹ 300 and Periodical 2/5 of ₹ 500 = ₹ 200.
(4) Advertising : Confectionery - 1/2 of (₹ 250 – ₹ 100) = ₹ 75 and Periodical 1/2 of ₹ 150 = ₹ 75.
(5) Lighting and heating : Confectionery - 2/5 of ₹ 400 = ₹ 160 and Periodical - 3/5 of ₹ 400 = ₹ 240.

Inter-Departmental Transfer

Sometimes prices are charged for goods or services transferred by one department to another department. Since each department is considered as a separate profit centre, it is necessary to have separate records for inter-departmental transfer. Generally a weekly or monthly Departmental Transfer Analysis Sheet is prepared to arrange all inter-departmental transfer. The sheet may be in the following form:

Departmental Transfer Analysis Sheet

Date	Supplying Departments			Receiving Departments		
2015	Dept X	Dept Y	Dept Z	Dept X	Dept Y	Dept Z
April 3	400	—	—	—	400	—
April 10	—	500	—	500	—	—
April 20	—	—	300	—	300	—
April 30	200	—	—	—	—	200
	600	500	300	500	700	200

At the end of the week/month, the transfer is recorded by passing the following entry:

Receiving Department Dr. [Transfer price]

To Supplying Department

Transfer prices can be cost-based or market-based. Dual pricing is also sometimes used. They are discussed below:

Cost-based Transfer Price

Under cost-based transfer pricing, the price may be based on actual cost, total cost or standard cost. Marginal cost is also sometimes used as a basis of ascertaining transfer price. Standard cost is preferred to actual cost since the inefficiency of one department cannot be passed on to another department. Taking full cost as transfer price means that the supplying departments' fixed cost becomes the variable cost of the receiving department.

Illustration 10

A firm had two departments X and Y. Department Y (which was a Manufacturing Department) received goods from Department X as its raw materials. Department X supplied the said goods to Y at cost price. From the following particulars you are required to prepare a Departmental Trading and Profit and Loss Account for the year ended on 31st December, 2014. (all figures in ₹).

Particulars	Dept X	Dept Y
Opening Stock (as on 1.1.2014)	2,50,000	75,000
Purchases (from outside suppliers)	10,00,000	20,000
Sales (to outside customers)	12,00,000	3,00,000
Closing stock (as on 31.12.2014)	1,50,000	50,000

The following information is to be taken into account:

(a) Depreciation of Buildings to be provided at 20% p.a. The value of the Building occupied by both the Departments was ₹ 1,05,000 (Department X occupying two-third portion and Department Y occupying the rest).

(b) Goods transferred from Department X to Department Y ₹ 2,50,000 at cost.

(c) Manufacturing Expenses amounted to ₹ 10,000.

(d) Selling expenses amounted to ₹ 15,000 (to be apportioned on the basis of sales of respective departments).

(e) General expenses of the business as a whole amounted to ₹ 58,000.

Solution

Dr. Departmental Trading and Profit & Loss Account for the year ended 31st December, 2014 Cr.

To Net Profit			2,51,000				
			3,09,000				3,09,000

Illustration 11

A hotel proprietor has two departments, viz, (i) Apartment Department, and (ii) Meals Department. Following trial balance of the business is given on 31.12.2014: (all figures in ₹)

Provisions	15,500	Income from Apartment Department	46,000
Stock of provisions in the beginning	1,020	Income from Meals Department	32,000
Cash at bank	10,000	Capital	2,20,000

Customers Account	800	Suppliers' Account	9,800
Buildings (1/10 is used for Meals Dept.)	2,10,000	Provision for Depreciation on Buildings	24,000
Furniture and equipments	60,000	Interest	1,130
General expenses	27,410		
Interest accrued	200		
Income Tax	400		
Life Insurance Premium (for Proprietor)	1,600		
Wages	6,000		
	3,32,930		3,32,930

Additional information: (i) The servants in the Apartment Department had occupied a room worth ₹ 120 and took meals worth ₹ 60. Similarly, servants in the Meals Department had occupied a room worth ₹ 150 and took meals worth ₹ 90; (ii) Wages are charged in the proportion of half to the Apartment Department, one- quarter to the Meals Department and remaining to the General Profit and Loss Account; (iii) Increase provision for depreciation of Buildings to ₹ 30,000; (iv) A sum of ₹ 800 representing accommodation ₹ 240, and meals ₹ 560 is to be charged to proprietor of the hotel.

You are required to prepare Final Accounts (including Balance Sheet) for the year ending 31.12.2014.

Solution

Dr. Departmental Profit and Loss Account for the year ended 31st December, 2014 Cr.

Particulars	Appartment Dept.	Meal Dept.	Particulars	Appartment Dept.	Meal Dept.
To Opening Stock of Provisions	—	1,020	By Income	46,000	32,000
To Provisions (purchases)	—	15,500	By Drawings	240	560
To Depreciation on Building	5,400	600	By Meal Dept - transfer	150	—
To Wages (Note 1)	3,000	1,500	By Appartment Dept - transfer	—	60
To Appartment Dept. - transfer	—	150			
To Meal Dept. - transfer	60	—			
To Departmental profit	37,930	13,850			
	46,390	32,620		46,390	32,620

Dr. General Profit and Loss Account for the year ended 31st December, 2014 Cr.

Particulars	₹	Particulars	₹
To Wages (Note 1)	1,500	By Departmental Profit (₹ 37,930 + ₹ 13,850)	51,780
To General Expenses	27,410	By Interest	1,130
To Net Profit — transferred to Capital	24,000		
	52,910		52,910

Dr. Balance Sheet as at 31st December, 2014 Cr.

Liabilities		₹	Assets		₹
Capital	₹ 2,20,000		Building	₹ 2,10,000	
Add: Net Profit	₹ 24,000		Less: Provision for depreciation	₹ 30,000	1,80,000
	₹ 2,44,000		Furniture & Equipment		60,000
Less: Drawings (Note 2)	₹ 2,800	2,41,200	Customers Account		800
Suppliers Account		9,800	Interest Accrued		200
			Cash at Bank		10,000
		2,51,000			2,51,000

Working Notes:

(1) Wages as per trial balance = ₹ 6,000. Apartment Dept. will bear 1/2 of ₹ 6,000 = ₹ 3,000; Meals Dept. will bear 1/4 of ₹ 6,000 = ₹ 1,500; General Profit and Loss Account will bear ₹ 1,500.

(2) Total Drawing = ₹ 240 for accommodation + ₹ 560 for meals + ₹ 1,600 for L.I.P. + ₹ 400 for I.T. = ₹ 2,800.

(3) Departmental Transfer Analysis Sheet

Date	Nature of Service	Supplying Department (₹)		Receiving Department (₹)	
		Appartment Dept.	Meals Dept.	Appartment Dept.	Meals Dept.
?	Meal	—	60	60	—
?	Accommodation	150	—	—	150
		150	60	60	150

As per rule, receiving department will be debited and supplying department will be credited.

To Meals Dept.			60
(ii) Meals Dept.	Dr.	150	
To Appartment Dept			150

Tutorial Note: No adjustment is required for providing facility to own departmental staff.

Illustration 12

Mohit Udyog operates a general business and the firm's Trial Balance prepared at 31.12.2014 was as follows:

Particulars	Dr. (₹)	Cr. (₹)	Particulars	Dr. (₹)	Cr. (₹)
Purchases : Cars	83,500		Debtors and Creditors	14,000	10,800
Petrol	27,500		Bank	4,700	
Spare parts	4,000		Cash	14,600	
Capital		62,000	Freehold Garage Premises	42,000	
Stock on 1.1.2014 : Cars	9,000		Rates and insurance	1,900	
Petrol	2,800		Sales : Cars		1,20,000
Spare parts	400		Petrol		32,000
Workshop wages	10,200		Spare parts		4,700
Plant and Equipment	7,000		Repairs		14,700
Car salesmen's salaries	7,700		Petrol pump attendant's wages	3,100	
General expenses	6,300				
Office wages	5,500		**Total**	2,44,200	2,44,200

Other information is as follows :

(1) The plant and equipment, all of which is used for repair work, is to be depreciated by 10%.

(2) Stocks at 31.12.2014 were — Cars ₹ 7,400; Petrol ₹ 1,600; Spare parts ₹ 700.

(3) No entries have been made for the following —
(i) Petrol used in demonstration runs cost ₹ 200; (ii) Parts used in repair jobs cost ₹ 750;
(iii) Repairs on cars subsequently sold were charged out at ₹ 2,400.

(4) Expenses which cannot be specifically allocated to one activity are to be apportioned — 60% to Cars; 10% to Petrol; 10% to Spare parts; 20% to Repairs.

(5) General expenses accrued amount to ₹ 300, and a provision is to be made of ₹ 500 for car salesmen's commission.

Prepare Trading and Profit and Loss Account, preferably in columnar form, to show clearly the profit or loss in each of the four main areas of business activity for the year ended 31.12.2014.

Also prepare the Balance Sheet at that date.

Solution

Mohit Udyog

Dr. Departmental Trading and Profit and Loss Account for the year ended 31st December, 2014 Cr.

Particulars	Cars (₹)	Petrol (₹)	Spare Parts (₹)	Repairs (₹)	Particulars	Cars (₹)	Petrol (₹)	Spare Parts (₹)	Repairs (₹)
To Opening Stock	9,000	2,800	400	—	By Sales	1,20,000	32,000	4,700	14,700

To Repairs on cars sold (Note 3)	2,400	—	—	—					
To Wages	—	3,100	—	10,200					
To Gross Profit c/d	32,500	400	1,750	6,150					
	1,27,400	33,800	6,150	17,100		1,27,400	33,800	6,150	17,100
To Office wages (Note 4)	3,300	550	550	1,100	By Gross Profit b/d	32,500	400	1,750	6,150
To Rates and insurance	1,140	190	190	380	By Net Loss	—	1,000	—	—
To Salesmen's salaries and commission(7,700 + 500)	8,200	—	—	—					
To General expenses (Note 4)	3,960	660	660	1,320					
To Demonstration petrol cost (Note 1)	200	—	—	—					
To Depreciation on: Plant and Equipment	—	—	—	700					
To Net Profit	15,700	—	350	2,650					
	32,500	1,400	1,750	6,150		32,500	1,400	1,750	6,150

Balance Sheet of Mohit Udyog as at 31st December, 2014

Liabilities		₹	Assets		₹
Capital (Opening)	62,000		Freehold Garage Premises		42,000
Add: Profit from Cars	15,700		Plant and Equipment	7,000	
Add: Profit from spare parts	350		Less: Depreciation	700	6,300
Add: Profit from Repairs	2,650		Stock (₹ 7,400 + 1,600 + 700)		9,700
Less: Loss from Petrol	(1,000)	79,700	Debtors		14,000
Creditors		10,800	Bank		4,700
Outstanding : General Expenses		300	Cash		14,600
Cars Salesmen's Commission		500			
		91,300			91,300

Working Notes :

(1) Petrol used for demonstration run will be treated as selling expenses of Car department and sales of Petrol department.

(2) Spare parts used in repairs ₹ 750 will be treated as direct expenses of Repairs department and sales of Spare parts department.

(3) Repairs on car subsequently sold ₹ 2,400 will be treated as direct expenses of Car department and sales of Repairs department.

(4) Apportionment of Common Expenses

Expenses	Basis	Total (₹)	Cars (₹)	Petrol (₹)	Spare Parts (₹)	Repairs (₹)
(i) General Expenses	6 : 1 : 1 : 2	6,600*	3,960	660	660	1,320
(ii) Office Wages	6 : 1 : 1 : 2	5,500	3,300	550	550	1,100
(iii) Rates and Insurance	6 : 1 : 1 : 2	1,900	1,140	190	190	380

*₹ 6,300 +₹ 300(outstanding) =₹ 6,600.

Illustration 13

Shri Gangaram sells two products manufactured in his own factory. The goods are made in two departments A and B for which separate sets of accounts are maintained. Some of the manufactured goods of Department A are used as raw materials by Department B and *vice versa*. From the following particulars, you are required to ascertain the total cost of goods manufactured in these two departments:

	Dept. A	Dept. B
Total units manufactured	10,00,000	5,00,000
Total cost to manufacture (excluding inter-departmental transfers)	₹ 10,000	₹ 5,000

Department A transferred 2,50,000 units to Department B and the latter transferred 1,00,000 units to the former.

Solution

Department A has transferred 1/4th of the units produced to B, whereas Department B has transferred 1/5th of the units produced.

Let, X be the total cost of Department A and Y be the total cost of Department B.

Therefore, $X = ₹\ 10{,}000 + {}^{1}/_{5}\ Y$ ... (1) and

$Y = ₹\ 5{,}000 + {}^{1}/_{4}\ X$ ... (2)

Putting the value of Y in the first equation, we get

$X = ₹\ 10{,}000 + {}^{1}/_{5}\ (₹\ 5{,}000 + {}^{1}/_{4}\ X)$

$= ₹\ 10{,}000 + ₹\ 1{,}000 + {}^{1}/_{20}\ X$

or, $X - {}^{1}/_{20}\ X = 11{,}000$,

Therefore X = ₹ 11,579 (approx.)

Putting the value of X as ₹ 11,579 in the 2nd equation, we get

$Y = ₹\ 5{,}000 + {}^{1}/_{4}\ (₹\ 11{,}579)$

or Y = ₹ 7,895 (approx.)

Ascertainment of the Total Cost of Goods Manufactured

Particulars	Dept. A	Dept. B
Cost as ascertained above (₹)	11,579	7,895
Less: Transfers to the other department	(${}^{1}/_{4}$) 2,895	(${}^{1}/_{5}$) 1,579
Net cost of goods manufactured	8,684	6,316

Market-based Transfer Price

To avoid passing on inefficiencies of one department to the other, market based transfer prices may be used. It does not give any advantage to either the selling or buying department, compared with trading with the outsiders. Sometimes a standard market price may also be used.

Dual Pricing

To motivate both the departments, buying and selling departments may be debited and credited respectively with two different prices. For example, buying department may be debited with the cost price and selling department credited with the market price.

If the goods are transferred by one department to another department at a profit and at the end of the accounting period such goods are included in the unsold stock, an appropriate adjustment must be made for unrealised profit on stock. The entry is :
General Profit and Loss Account Dr.
To Provision for Unrealised Profit on Stock Account
At the beginning of the next year reverse entry will be passed.
Provision for Unrealised Profit on Stock Account Dr.
To General Profit and Loss Account

Illustration 14

Raman carries on a business of selling (both wholesale and retail) electrical materials. The wholesale and retail departments are separately organised, all goods are purchased by the wholesale department which adds one-seventh on to cost for charging out goods transferred to the retail department. At 31.12.2014, the total balance of the business as a whole is as follows :

Particulars	Dr. (₹)	Cr. (₹)
Capital		1,00,000
Freehold Premises	65,000	
Motor Vans : Cost and Accumulated Depreciation (1.1.2014)	9,000	4,000
Motor Cars : Cost and Accumulated Depreciation (1.1.2014)	6,000	3,000
Fixtures etc : Cost and Accumulated Depreciation (1.1.2014)	7,800	7,300
Stock (1.1.2014) : Wholesale at Cost	65,000	
Retail and provision for unrealised profit	32,000	4,000
Debtors (31.12. 2014) : Wholesale customers only	67,100	
Creditors (31.12. 2014)		41,200
Bad Debts	6,800	
Discount Received		4,850
Discount Allowed	8,500	
Salaries : Van drivers	8,800	
Warehouse staff	24,300	
Shop staff	8,250	
Car and Van running expenses	5,400	
Other Expenses	15,500	
Sales : Wholesale		3,40,000
Retail		96,000
Purchases	3,28,000	
Cash and Bank (31.12. 2014)	400	21,800
Reserve		35,700
Total	6,57,850	6,57,850

Additional information —

(i) Transfers of goods amounted to ₹ 76,000 at transfer prices.
(ii) Stocks at 31.12.2014 : Wholesale at cost ₹ 71,500; Retail at transfer price ₹ 36,000.
(iii) There are four vans, one of which is likely to be in use by the retail department at any one time.
(iv) The two cars are used by X, who divides their time between the two departments as to two-thirds wholesale and one-third retail.
(v) Depreciation of cars and vans is at 20% p.a. on cost. It is estimated that the remaining costs of a car and a van (excluding drivers' wages) do not differ materially.
(vi) Other expenses are 80% wholesale.
(vii) No further depreciation need be provided on fixtures etc.

You are required to prepare Trading and Profit and Loss Account for the year ended 31.12.2014 and Balance Sheet as on that date.

Solution

Raman

Dr. Departmental Trading and Profit and Loss Account for the year ended 31st December, 2014 Cr.

Particulars	Wholesale (₹)	Retail (₹)	Total (₹)	Particulars	Wholesale (₹)	Retail (₹)	Total (₹)
To Opening Stock	65,000	32,000	97,000	By Sales	3,40,000	96,000	4,36,000
To Purchases	3,28,000	—	3,28,000	By Transfer to Retail	76,000	—	—
To Transfer from Wholesale	—	76,000	—	By Closing Stock	71,500	36,000	1,07,500
To Gross Profit c/d	94,500	24,000	1,18,500				
	4,87,500	1,32,000	5,43,500		4,87,500	1,32,000	5,43,500

To Salaries :							
Van drivers (Note 3)	6,600	2,200	8,800				
Warehouse staff	24,300	—	24,300				
Shop staff	—	8,250	8,250				
To Van Running Expenses (Note 4a)	2,700	900	3,600				
To Car Running Expenses (Note 4b)	1,200	600	1,800				
To Other Expenses	12,400	3,100	15,500				
To Depreciation on :							
Vans (3 : 1)	1,350	450	1,800				
Cars (2 : 1)	800	400	1,200				
To Net Profit c/d	34,700	8,100	42,800				
	99,350	24,000	1,23,350		99,350	24,000	1,23,350
To Provision for Unrealised Profit on Closing Stock (Note 5)			4,500	By Reserve b/d			35,700
To Reserve c/d			78,000	By Provision for Unrealised Profit on Opening Stock			4,000
				By Net Profit b/d			42,800
			82,500				82,500

Balance Sheet of Raman as at 31st December, 2014

Liabilities	₹	Assets		₹
Capital	1,00,000	Freehold Premises		65,000
Reserve	78,000	Motor Vans (at cost)	9,000	
Creditors	41,200	Less : Accumulated Depreciation	5,800	3,200
Bank Overdraft	21,800	Motor Cars (at cost)	6,000	
		Less : Accumulated Depreciation	4,200	1,800
		Fixtures (at cost)	7,800	
		Less : Accumulated Depreciation	7,300	500
		Stock	1,07,500	
		Less : Provision for Unrealised Profit	4,500	1,03,000
		Debtors		67,100
		Cash		400
	2,41,000			2,41,000

Working Notes :

(1) Goods are sold on credit by the wholesale department only. Therefore, discount allowed is totally related to wholesale department. Similarly, bad debt is also related to wholesale department.

(2) Goods are purchased by wholesale department. Therefore, discount received is totally related to wholesale department.

(3) Out of four vans, one van is used by the retail department. Therefore, 1/4th of van driver's salary is to be borne by the retail department and 3/4th is to be borne by the wholesale department.

(4) There are four vans and two cars. Total running cost is ₹ 5,400. Running cost of a car and a van (excluding driver's salaries) do not differ materially. Therefore, entire running cost will be distributed between van and car in the ratio of 2 : 1.

Vans running cost will be — 2/3 of ₹ 5,400 = ₹ 3,600.

Cars running cost will be — 1/3 of ₹ 5,400 = ₹ 1,800.

(a) Vans running cost will be shared by wholesale department and retail department in the ratio 3 : 1.

(b) Cars running cost will be shared by wholesale department and retail department in the ratio 2 : 1.

(c) Goods are transferred to retail deprtment by adding 1/7th to cost. Therefore, the unrealised profit on closing stock will be :

₹ 36,000 × 1/8 = ₹ 4,500.

Illustration 15

From the following data, prepare Departmental Trading and Profit and Loss Account for the year ended December 31, 2014:

Particulars	Dept. A	Dept. B
Opening Stock	40,000	—
Purchases from Outside	2,00,000	20,000
Wages	10,000	1,000
Transfer of Goods from Department A	—	50,000
Closing Stock at cost to the Department	30,000	10,000
Sales to Outsiders	2,00,000	71,000

B's entire stock represents goods from Department A which transfers them at 25% above its cost. Administrative and Selling Expenses amount to ₹ 15,000 which are to be allocated between Departments A and B in the ratio of 4 : 1 respectively. Also show the amount of provision to be made for unrealised profit.

Solution

Dr. Departmental Trading and Profit and Loss Account for the year ended 31st December, 2014 Cr.

Particulars	Dept A (₹)	Dept B (₹)	Total (₹)	Particulars	Dept A (₹)	Dept B (₹)	Total (₹)
To Opening Stock	40,000	—	40,000	By Sales	2,00,000	71,000	2,71,000
To Purchases	2,00,000	20,000	2,20,000	By Goods transferred to B	50,000	—	—
To Goods from Dept A	—	50,000	—	By Closing Stock	30,000	10,000	40,000
To Wages	10,000	1,000	11,000				
To Gross Profit c/d	30,000	10,000	40,000				
	2,80,000	81,000	3,11,000		2,80,000	81,000	3,11,000
To Selling Expenses (4 : 1)	12,000	3,000	15,000	By Gross Profit b/d	30,000	10,000	40,000
To Net Profit c/d	18,000	7,000	25,000				
	30,000	10,000	40,000		30,000	10,000	40,000
To Provision for Unrealised Profit on Closing Stock (Note 1)			2,000	By Net Profit b/d			25,000
To Capital A/c (Net Profit transferred)			23,000				
			25,000				25,000

Working Note :

(1) Goods are transferred to Dept. A at cost plus 25%. It means the unrealised profit is 20% (25/125) on transfer price. Therefore, unrealised profit on closing stock = 20% of ₹ 10,000 = ₹ 2,000.

Illustration 16

A & Co has two departments P and Q. Department P sells goods to Department Q at normal selling prices. From the following particulars, prepare Departmental Trading and Profit and Loss Account for the year ended 31.3.2014 and also ascertain the Net Profit to be transferred to Balance Sheet :

	Department P (₹)	Department Q (₹)
Opening Stock	5,00,000	—
Purchases	28,00,000	3,00,000
Goods from P	—	8,00,000
Wages	3,50,000	2,00,000
Travelling Expenses	20,000	1,60,000
Closing Stock at cost to the Department	8,00,000	2,09,000
Sales	30,00,000	20,00,000
Printing and Stationery	30,000	25,000

The following expenses incurred for both the departments were not apportioned between the departments :

(a) Salaries ₹ 3,30,000; (b) Advertisement expenses ₹ 1,20,000; (c) General expenses ₹ 5,00,000; (d) Depreciation is to be charged @ 30% on the machinery value of ₹ 96,000.

The advertisement expenses of the departments are to be apportioned in the turnover ratio. Salaries and depreciation are to be apportioned in the ratio 2 : 1 and 1 : 3 respectively. General expenses are to be apportioned in the ratio 3 : 1.

Solution

A & Co

Dr. Departmental Trading and Profit and Loss Account for the year ended 31st March, 2014 Cr.

Particulars	Dept P (₹)	Dept Q (₹)	Total (₹)	Particulars	Dept P (₹)	Dept Q (₹)	Total (₹)
To Opening Stock	5,00,000	—	5,00,000	By Sales	30,00,000	20,00,000	50,00,000
To Purchases	28,00,000	3,00,000	31,00,000	By Goods transferred to Q	8,00,000	—	—
To Goods from Dept P	—	8,00,000	—	By Closing Stock	8,00,000	2,09,000	10,09,000
To Wages	3,50,000	2,00,000	5,50,000				
To Gross Profit c/d	9,50,000	9,09,000	18,59,000				
	46,00,000	22,09,000	60,09,000		46,00,000	22,09,000	60,09,000
To Travelling Expenses	20,000	1,60,000	1,80,000	By Gross Profit b/d	9,50,000	9,09,000	18,59,000
To Printing and Stationery	30,000	25,000	55,000				
To Salaries (2 : 1)	2,20,000	1,10,000	3,30,000				
To Advertisement Expenses (3 : 2)	72,000	48,000	1,20,000				
To General Expenses (3 : 1)	3,75,000	1,25,000	5,00,000				
To Depreciation on Machinery (1:3)	7,200	21,600	28,800				
To Net Profit c/d	2,25,800	4,19,400	6,45,200				
	9,50,000	9,09,000	18,59,000		9,50,000	9,09,000	18,59,000
To Provision for Unrealised Profit on Closing Stock (Note 2)			38,000	By Net Profit b/d			6,45,200
To Capital A/c (Net Profit transferred)			6,07,200	By Provision for Unrealised Profit on Opening Stock			Nil
			6,45,200				6,45,200

Working Notes :

(1) Gross Profit Ratio of Department P = $\frac{9,50,000}{30,00,000 + 8,00,000} \times 100 = \mathbf{25\%}$

(2) Proportionate P Department's stock in Department Q

$$= \frac{\text{Purchase from Department P}}{\text{Total Purchases of Department Q}} \times \text{Total Stock of Department Q} = \frac{8,00,000}{11,00,000} \times \text{Rs } 2,09,000 = ₹\ 1,52,000$$

Unrealised profit = 25% of ₹ 1,52,000 = ₹ 38,000.

Illustration 17

The firm "Tantuja" has two departments - first one is "cloth" and the second is "tailoring". Tailoring department gets all its requirements of cloth from the cloth department at the usual selling price. From the following particulars prepare Departmental Trading Account and Profit and Loss Account for the year ended 31st March, 2015 : (all figures in ₹)

Particulars	Cloth Dept.	Tailoring Dept.
Manufacturing Expenses	—	1,08,000
Selling Expenses	45,000	18,000
Stock on 1.4.2014	5,40,000	72,000
Sales	36,00,000	7,20,000
Transfer of Cloth to Tailoring Dept.	4,50,000	—
Purchases	30,60,000	45,000
Stock on 31.3.2015	9,00,000	1,35,000

The stock in Tailoring Department may be assumed to consist 80% cloth and 20% other expenses. General expenses of the business for the year came to ₹ 2,07,000. In 2013-14 the Cloth Department earned a gross profit of 30% on sales.

Solution

To General expenses			2,07,000	By Departmental Profit b/d			14,67,000
To Provision for unrealised profit on Departmental Closing Stock (Note 2)			36,000	By Provision for unrealised profit on Departmental Opening Stock (Note 2)			17,280
To Net Profit transferred to Capital			12,41,280				
			14,84,280				14,84,280

Working Notes:

(1) Calculation of unrealised profit on stock

Rate of Gross profit in cloth department = $\frac{13,50,000}{40,50,000} \times 100 = 33\frac{1}{3}$ % on sales.

* (₹ 36,00,000 + ₹ 4,50,000) = ₹ 40,50,000.

(2) Element of cloth in tailoring department = 80%

Therefore, element of cloth in opening stock — 80% of ₹ 72,000 = ₹ 57,600

Element of cloth in closing stock — 80% of ₹ 1,35,000 = ₹ 1,08,000

Unrealised profit including in opening stock = 30% of ₹ 57,600 = ₹ 17,280

Unrealised profit included in closing stock = $33^1/_3$% on ₹ 1,08,000 = ₹ 36,000.

Illustration 18

Modern Engineering Works carried on business with two departments : Raw Materials and Manufacturing. The finished goods are produced by the Manufacturing Department with raw material supplied from Raw Materials Department at selling price.

Prepare Departmental Trading and Profit and Loss Account for the year ending on 31st December, 2014 after allocation of expenses on reasonable basis between the two departments.

Necessary particulars are furnished below :

	Raw Materials Department	Manufacturing Department
Opening Stock	60,000	10,000
Purchases	4,00,000	3,000
Raw materials transferred to Manufacturing Department	60.000	—
Sales	4,40,000	90,000
Manufacturing Expenses	—	12,000
Sellling Expenses	800	400
Closing Stock	40,000	12,000

It is estimated that the cost of closing stock in the hands of Manufacturing Department consists of 80% for raw materials and 20% for manufacturing expenses. The rate of gross profit earned during the preceding year by the Raw Materials Department was 10%. Other administrative expenses are as follows :

(i) Salaries ₹ 2,500; (ii) Insurance premium ₹ 800.

Solution **Modern Engineering Works**

Dr. Departmental Trading and Profit and Loss Account for the year ended 31st December, 2014 Cr.

Particulars	R.M. Dept (₹)	Mfg. Dept (₹)	Total (₹)	Particulars	R.M. Dept (₹)	Mfg. Dept (₹)	Total (₹)
To Opening Stock	60,000	10,000	70,000	By Sales	4,40,000	90,000	5,30,000
To Purchases	4,00,000	3,000	4,03,000	By Raw Materials transferred to Manufacturing Dept.	60,000	—	—
To Manufacturing Expenses	—	12,000	12,000				
To Raw Materials from Mfg. Dept.	—	60,000	—	By Closing Stock	40,000	12,000	52,000
To Gross Profit c/d	80,000	17,000	97,000				
	5,40,000	1,02,000	5,82,000		5,40,000	1,02,000	5,82,000
To Selling Expenses	800	400	1,200	By Gross Profit b/d	80,000	17,000	97,000
To Salaries (Note 3)	2,119	381	2,500				
To Insurance Premium (Note 4)	656	144	800				
To Net Profit c/d	76,425	16,075	92,500				
	80,000	17,000	97,000		80,000	17,000	97,000

To Provision for Unrealised Profit on Closing Stock (Note 1)	1,536	By Net Profit b/d	92,500
To Capital A/c (Net Profit transferred)	91,764	By Provision for Unrealised Profit on Opening Stock	800
	93,300		93,300

Working Notes :

(1) Gross Profit Ratio of Raw Materials Department $= \dfrac{80,000}{(4,40,000 + 60,000)} \times 100 = \dfrac{80,000}{5,00,000} \times 100 = 16\%$

(2) Provision for Unrealised Profit on Opening Stock = (10,000 × 80%) × 10% = ₹ 800.

Provision for Unrealised Profit on Closing Stock = (12,000 × 80%) × 16% = ₹ 1,536.

(3) Salaries can be shared by the R.M. Dept and Mfg. Dept. in the ratio of Sales of each department. The ratio will be :

(4,40,000 + 60,000) : 90,000

or 5,00,000 : 90,000

or 50 : 9.

(a) Raw materials department's share = 2,500 / 59 × 50 = ₹ 2,119

(b) Manufacturing department's share = 2,500 / 59 × 9 = ₹ 381.

(4) Insurance premium can be shared by R.M. Dept. and Mfg. Dept. in the ratio of average stock of each department. The ratio will be :

$= \dfrac{(60,000 + 40,000)}{2} : \dfrac{(10,000 + 12,000)}{2}$

or 50,000 : 11,000

or 50 : 11

(a) Raw materials department's share = 800 / 61 × 50 = ₹ 656.

(b) Mfg. department's share = 800 / 61 × 11 = ₹ 144.

Illustration 19

O and K are two departments of Red Company of Calcutta. O Department sells goods to K Department at normal market prices. From the following particulars, prepare a Trading and Profit and Loss Account of the two departments for the year ended 31st March 2015:

Particulars	O	K	General
Stocks on April 1, 2014	12,000	Nil	—
Purchases	2,76,000	24,000	—
Goods from O Dept.	—	84,000	—
Wages	12,000	19,200	—
Salaries	8,000	5,000	—
Stock on March 31, 2015 at cost to Dept.	60,000	21,600	—
Sales	2,76,000	1,74,000	—
Stationery and Printing	2,560	1,960	—
Plant and Machinery	—	14,400	—
Salaries (General)	—	—	18,000
Miscellaneous Expenses	—	—	3,600
Advertisement	—	—	9,600
Bank charges	—	—	2,400

Depreciate Plant & Machinery by 10%. The general unallocated expenses are to be apportioned in the ratio — O:3, K:2.

Solution

Red Company

Dr. Departmental Trading and Profit & Loss Account for the year ended 31st March, 2015 Cr.

Particulas	Dept O	Dept K	Total	Particulas	Dept O	Dept K	Total
To Opening Stock	12,000	—	12,000	By Sales	2,76,000	1,74,000	4,50,000
To Purchases	2,76,000	24,000	3,00,000	By Goods transferred to K	84,000	—	—
To Goods from Dept O	—	84,000	—	By Closing Stock	60,000	21,600	81,600
To Wages	12,000	19,200	31,200				
To Gross Profit c/d	1,20,000	68,400	1,88,400				
	4,20,000	1,95,600	5,31,600		4,20,000	1,95,600	5,31,600

To Salaries	8,000	5,000	13,000	By Gross Profit b/d	1,20,000	68,400	1,88,400
To Printing & Stationery	2,560	1,960	4,520				
To Salaries (General)	10,800	7,200	18,000				
To Miscellaneous expenses	2,160	1,440	3,600				
To Advertisement	5,760	3,840	9,600				
To Bank charges	1,440	960	2,400				
To Depreciation	—	1,440	1,440				
To Net Profit c/d	89,280	46,560	1,35,840				
	1,20,000	68,400	1,88,400		1,20,000	68,400	1,88,400
To Provision for unrealised profit on Departmental Closing Stock (Note 1)			5,600	By Net Profit b/d			1,35,840
To Capital A/c (net profit transferred)			1,30,240	By Provision for unrealised profit on Dept. Opening Stock			Nil
			1,35,840				1,35,840

Working Note:

(1) Gross profit ratio of Department O = $\dfrac{1,20,000}{(2,76,000 + 84,000)} \times 100 = 33\frac{1}{3}\%$

Proportionate Department O stock in Department K = $\dfrac{\text{Purchases from Dept. O}}{\text{Total Purchases of Dept. K}} \times$ Total Stock of Dept. 'K'

$= \dfrac{84,000}{1,08,000} \times 21,600 =$ ₹ 21,600. Profit thereon : $33\frac{1}{3}\%$ of 16,800 = ₹ 5,600.

Illustration 20

M/s G,B,T carried on business as Drapers and Tailors in Jaipur. The partners G,B and T were in charge of the Departments, X,Y and Z respectively. The partners are entitled to a remuneration equal to 50% of the profits (without taking the Partner's remuneration into consideration) of the respective departments of which they are in charge and the balance of the profits are to be divided among G,B and T in the ratio of 5:3:2. The following are the balances of the revenue items in the books for the year ending March 31, 2015:

Opening Stock : X — ₹ 75,780; Y — ₹ 48,000; and Z — ₹ 40,000.
Purchases : X — ₹ 2,81,400; Y — ₹ 1,61,200; and Z — ₹ 88,800.
Sales : X — ₹ 3,60,000; Y — ₹ 2,70,000; and Z — ₹ 1,80,000.
Closing Stock : X — ₹ 90,160; Y — ₹ 34,960; and Z — ₹ 43,180.
Salaries and wages — ₹ 96,000; Advertising — ₹ 4,500; Rent — ₹ 21,600; Discount allowed — ₹ 2,700;
Discount received — ₹ 1,600; Sundry expenses — ₹ 24,300; Depreciation on Furniture & Fittings — ₹ 1,500.

(i) Prepare the Departmental Accounts for each of the three departments in columnar form.
(ii) Show the distribution of profits amongst the partners after taking into account the following:
(a) Goods having a transfer price of ₹ 21,400 and ₹ 1,200 were transferred from Departments X and Y respectively to Department Z. The inter-departmental transfers are made at 125% of the cost.
(b) The various items shall be apportioned amongst the three departments in the following proportions:

Nos.	Particulars	Department X	Department Y	Department Z
1.	Rent	2	2	5
2.	Salaries	1	1	1
3.	Depreciation	1	1	1
4.	Discounts received	8	5	3
5.	All the other expenses	On the basis of the sales (excluding inter-departmental transfers) of each department.		

(c) The opening stock of Department Z does not include any goods transferred from other departments, but the closing stock includes ₹ 17,100 valued at the inter-departmental transfer prices.

Dr. Consolidated Trading Account for the year ended 31st December, 2014 Cr.

Particulars	₹	Particulars	₹
To Opening Stock (₹ 40,000 + 24,000)	64,000	By Sales (₹ 2,80,000 + ₹ 2,24,000)	5,04,000
To Purchases (₹ 1,84,000 + 1,36,000)	3,20,000	By Closing Stock :	
To Carriage Inwards (₹ 4,000 + 4,000)	8,000	Purchased goods (₹ 9,000 + ₹ 12,000)	21,000
To Wages (₹ 24,000 + 16,000)	40,000	Finished goods (Note 2)	71,720
To Gross Profit	1,64,720		
	5,96,720		5,96,720

Tutorial Note : For combined Trading Account, inter-departmental transfer should be ignored.

Working Notes : (1) Calculation of Stock reserve in Closing Stock

Particulars	Dept A (₹)	Dept B (₹)
Sales	2,80,000	2,24,000
Add: Transfer of finished goods	80,000	70,000
	3,60,000	2,94,000
Less: Return of finished goods	20,000	14,000
Sales (Net)	3,40,000	2,80,000
Gross profit	85,000	84,000
Rate of gross profit	$\frac{85,000}{3,40,000} \times 100 = 25\%$	$\frac{84,000}{2,80,000} \times 100 = 30\%$

Finished goods from other Department included in Closing Stock

Department A	₹	Department B	₹
20% of ₹ 48,000	9,600	20% of ₹ 28,000	5,600
Unrealised profit = 30% of ₹ 9,600 (30% is the G.P. ratio of Dept B)	2,880	Unrealised profit = 25% of ₹ 5,600	1,400

(2) Closing Stock of Finished Goods

	Dept A	Dept B	Total
Closing Stock (₹)	48,000	28,000	76,000
Less: Unrealised profit as calculated above	2,880	1,400	4,280
Closing stock (excluding unrealised profit)	45,120	26,600	71,720

Illustration 22

Bubbles Ltd has three operating departments. The details of operations of each department during 2014 had been as follows:

	Department I (₹)	Department II (₹)	Department III (₹)
Sales to Customers	4,00,000	6,00,000	8,00,000
Purchases from Outsiders	3,00,000	4,00,000	5,00,000
Opening Stock (out of local purchases)	80,000	1,00,000	1,20,000
Transfer to Department III	1,35,000	—	—
Closing Stock	50,000	50,000	1,00,000

Common expenses :

Selling commission ₹ 36,000; Depreciation ₹ 45,000; Administration expenses ₹ 1,60,000; Interest on capital ₹ 90,000.

Stock of department III includes 20% transfers from department I.

Prepare Departmental Trading and Profit and Loss Account and ascertain the net profit of the company after considering the following details :

	Department I (₹)	Department II (₹)	Department III (₹)
Fixed assets installed	3,60,000	2,00,000	1,60,000
Capital employed	2,00,000	3,00,000	3,00,000
Administration expenses to be shared	4/10	3/10	3/10

Department I transfers supplies to Department III at normal price less 10%.

Solution **Bubbles Ltd**

Dr. Departmental Trading and Profit and Loss Account for the year ended 31st December, 2014 Cr.

Particulars	Dept I (₹)	Dept II (₹)	Dept III (₹)	Total (₹)	Particulars	Dept I (₹)	Dept II (₹)	Dept III (₹)	Total (₹)
To Opening Stock	80,000	1,00,000	1,20,000	3,00,000	By Sales	4,00,000	6,00,000	8,00,000	18,00,000
To Purchases	3,00,000	4,00,000	5,00,000	12,00,000	By Transfer to Dept III	1,35,000	—	—	—
To Transfer from Dept I	—	—	1,35,000	—	By Closing Stock	50,000	50,000	1,00,000	2,00,000
To Gross Profit c/d	2,05,000	1,50,000	1,45,000	5,00,000					
	5,85,000	6,50,000	9,00,000	20,00,000		5,85,000	6,50,000	9,00,000	20,00,000
To Selling Commission	8,000	12,000	16,000	36,000	By Gross Profit b/d	2,05,000	1,50,000	1,45,000	5,00,000
To Depreciation	22,500	12,500	10,000	45,000					
To Administrative Expenses	64,000	48,000	48,000	1,60,000					
To Interest on Capital	22,500	33,750	33,750	90,000					
To Net Profit c/d	88,000	43,750	37,250	1,69,000					
	2,05,000	1,50,000	1,45,000	5,00,000		2,05,000	1,50,000	1,45,000	5,00,000
To Provision for Unrealised Profit on Closing Stock (Note 2)				6,667	By Net Profit b/d				1,69,000
To Net Profit (Transferred)				1,62,333	By Provision for Unrealised Profit on Opening Stock				Nil
				1,69,000					1,69,000

Working Notes :

(1) Goods transferred by Department I to Department III at normal price less 10%. Normal price of goods transferred to Department III = ₹ 1,35,000 / 90 × 100 = ₹ 1,50,000.

Normal Gross Profit of Department I would have been :	₹	₹
Sales to outside customers		4,00,000
Transfer to Department III at normal price (as calculated above)		1,50,000
		5,50,000
Less: Cost of Goods Sold :	₹	
Opening Stock	80,000	
Purchases	3,00,000	
	3,80,000	
Less: Closing Stock	50,000	3,30,000
Gross Profit		2,20,000

$$\text{Normal rate of Gross Profit} = \frac{2,20,000}{5,50,000} \times 100 = 40\%$$

(a) Cost of goods transferred to Department III = 60% of ₹ 1,50,000 = ₹ 90,000.

(b) Value of goods transferred to Department III = ₹ 1,35,000

Therefore, profit on goods transferred (b – a) = ₹ 1,35,000 – ₹ 90,000 = ₹ 45,000.

$$\text{Ratio of profit made by Department I on goods transferred to Department III} = \frac{45,000}{1,35,000} \times 100 = 33\frac{1}{3}\%$$

(2) Stock of Department III includes 20% transferred from Department I, i.e., 20% of ₹ 1,00,000 = **₹ 20,000**.

Therefore, unrealised profit on closing stock = $33^1/_3$% of ₹ 20,000 = ₹ 6,667.

Illustration 23

Vijoya Ltd has three departments, I, N and K. For the year ended 31.12.2014, the information is given below :

Paticulars	I (₹)	N (₹)	K (₹)
Stock on 1.1.2014	13,500	18,000	27,000
Materials consumed	36,000	54,000	—
Manufacturing expenses	22,500	45,000	—
Stock on 31.12.2014	18,000	63,000	36,000
Unrealised profit on stock on 1.1.2014	—	4,500	6,000
Sales	—	—	1,53,000

Each department values its stocks at cost to the department concerned. Whereas department I transferred goods to department N at 30% above departmental cost, department N transferred to departrment K at 25% above departmental cost. Other expenses were : Staff remuneration ₹ 6,000; Stationery ₹ 4,500; Rent ₹ 27,000; Depreciation ₹ 18,000; and Advertising ₹ 13,500. These expenses are to be shared by the departments in the ratio of gross profit.

Prepare Departmental Trading and Profit and Loss Account.

Vijoya Ltd

Dr. Departmental Trading and Profit and Loss Account for the year ended 31st December, 2014 Cr.

Particulars	Dept. I (₹)	Dept. N (₹)	Dept. K (₹)	Total (₹)	Particulars	Dept. I (₹)	Dept. N (₹)	Dept. K (₹)	Total (₹)
To Opening Stock	13,500	18,000	27,000	58,500	By Sales	—	—	1,53,000	1,53,000
To Direct Materials	36,000	54,000	—	90,000	By Transfer to Dept. N	70,200	—	—	—
To Manufacturing Expenses	22,500	45,000	—	67,500	By Transfer to Dept. K	—	1,55,250	—	—
To Transfer from Dept. I	—	70,200	—	—	By Closing Stock	18,000	63,000	36,000	1,17,000
To Transfer from Dept. N	—	—	1,55,250	—					
To Gross Profit c/d	16,200	31,050	6,750	54,000					
	88,200	2,18,250	1,89,000	2,70,000		88,200	2,18,250	1,89,000	2,70,000
To Staff Remuneration	1,800	3,450	750	6,000	By Gross Profit b/d	16,200	31,050	6,750	54,000
To Stationery	1,350	2,587	563	4,500	By Net Loss c/d	4,500	8,625	1,875	15,000
To Rent	8,100	15,525	3,375	27,000					
To Depreciation	5,400	10,350	2,250	18,000					
To Advertising	4,050	7,763	1,687	13,500					
	20,700	39,675	8,625	69,000		20,700	39,675	8,625	69,000
To Net Loss b/d				15,000	By Provision for Unrealised Profit on Opening Stock (₹ 4,500 + ₹ 6,000)				10,500
To Provision for Unrealised Profit on Closing Stock(Note 2)				15,989	By Profit and Loss A/c — Transfer				20,489
				30,989					30,989

Working Notes :

(1) Calculation of the Value of Transfer

(a) From Dept I to N	₹	(b) From Dept N to K	₹
Opening stock	13,500	Opening stock	18,000
Add: Materials consumed	36,000	Add: Materials consumed	54,000
Add: Manufacturing expenses	22,500	Add: Manufacturing expenses	45,000
	72,000	Add: Transfer (as calculated)	70,200
Less: Closing stock	18,000		1,87,200
Cost of goods transferred	54,000	Less: Closing stock	63,000
Add: Loading @ 30%	16,200	Cost of goods transferred	1,24,200
Value of transfer	70,200	Add: Loading @ 25%	31,050
		Value of transfer	1,55,250

(2) Calculation of Unrealised Profit on Closing Stock

(a) For Dept N	(b) For Dept K
Dept I transferred to Dept N at 30% above cost, i.e., unrealised profit included in Dept N's stock is at 30/130 on transfer price. Therefore, unrealised profit on stock $= \frac{30}{130}$ [Closing Stock $\times \frac{\text{Transfer}}{\text{Departmental Cost}}$] $= \frac{30}{130}$ [$63{,}000 \times \frac{70{,}200}{54{,}000 + 45{,}000 + 70{,}200}$] = ₹ 6,032 Total provision for unrealised profit = ₹ 6,032 (Dept N) + ₹ 9,957 (Dept K) = ₹ 15,989.	Dept N transferred to Dept K at 25% of cost, i.e., unrealised profit included in Dept. K's stock is 25/125 = 1/5 on transfer price. Therefore, unrealised profit on stock arising from Dept N 1/5 of ₹ 36,000 = ₹ 7,200. And unrealised profit on stock arising from Dept I = 30 / 130 (₹ 36,000 – ₹ 7,200) x (₹ 70,200 / ₹ 1,69,200) Therefore, total = (₹ 7,200 + ₹ 2,757) = ₹ 9,957.

Memorandum Stock Account and Memorandum Mark-up Account

For an adequate check on department stock, sometimes a Memorandum Stock Account is maintained at selling price/inflated price. A Memorandum Mark-up Account is also maintained for the loading (selling price – cost price). Departmental gross profit comes out from the Memorandum Mark-up Account. This Account can be compared with the Branch Adjustment Account which is prepared when goods are sent to branch at inflated price.

Accounting Arrangement

1. The opening stock is brought down on the debit side of the Memorandum Stock Account at selling price (cost + mark-up).
   Amount of mark-down on opening stock is brought down on the credit side of the Memorandum Stock Account.
2. The loading on opening stock is brought down on the credit side of the Memorandum Mark-up Account. Amount of mark-down on opening stock is brought down on the debit side of the Memorandum Stock Account.
3. ***For goods purchased***

Memorandum Stock Account	Dr. [Selling price]
To Purchases Account	[Cost price]
To Memorandum Mark-up Account	[Loading]

4. ***For sale of goods***

Sales Account	Dr. [Selling price]
To Memorandum Stock Account	[Selling price]

5. ***For transfer of goods by one department to another (say by X to Y)***

Y's Memorandum Stock Account	Dr. [Cost price]
To X's Memorandum Stock Account	[Cost price]

6. ***For loading on transfer by X Department***

Memorandum Mark-up Account	Dr. [Loading of X Department]
To Memorandum Stock Account	

7. ***For loading on goods received by Y Department***

Memorandum Stock Account	Dr. [Loading of Y Department]
To Memorandum Mark-up Account	

8. Sometimes goods may have to be marked-down due to competition or due to deterioration of goods lying in stock. In such a case, the entry will be:

Memorandum Mark-up Account	Dr. [Mark-down]
To Memorandum Stock Account	

9. ***For loss of stock***
   Loss of Stock Account Dr. [Cost price]
   Memorandum Mark-up Account Dr. [Loading]
   To Memorandum Stock Account [Selling price]

10. ***For mark-down on goods lying in stock***
    Memorandum Stock Account Dr.
    To Memorandum Mark-up Account

Now, the balance of Memorandum Stock Account will represent the closing stock at selling price. Loading on closing stock is to be carried forward. The balance of Memorandum Mark-up Account will represent gross profit.

Illustration 24

Southern Store Ltd. is a retail store operating two departments. The company maintains a Memorandum Stock Account and Memorandum Mark-up Account for each of the departments.

Supplies issued to the departments are debited to the Memorandum Stock Account of the department at cost plus the mark-up, and departmental sales are credited to this account. The mark-up on supplies issued to the departments is credited to the mark-up account for the department.

When it is necessary to reduce the selling price below the normal selling price, i.e., cost plus mark-up, the reduction (mark-down) is entered in the Memorandum Stock Account and in the mark-up account. Department Y has a mark-up of $33^1/_3$% on cost and Department Z 50% on cost.

Following information has been extracted from the records of Southern Store Ltd. for the year ended 31st December, 2014 (all figures in ₹) :

Particulars	Dept. Y	Dept. Z
Stock (1.1.2014) at cost	24,000	36,000
Purchases	1,62,000	1,90,000
Sales	2,10,000	2,85,000

1. The stock of Department Y at 1st January 2014 includes goods on which the selling price has been marked down by ₹ 510. These goods were sold in January 2014 at the reduced price.
2. Certain goods purchased in 2014 for ₹ 2,700 for department Y, were transferred during the year to department Z, and sold for ₹ 4,050. Purchase and sale are recorded in the purchases of department Y and the sales of department Z respectively, but no entries in respect of the transfer have been made.
3. Goods purcahsed in 2014 were marked down as follows:

	Dept. Y	Dept. Z
Cost	8,000	21,000
Mark down	800	4,100

   At the end of the year there were some items in the stock of department Z, which had been marked down to ₹ 2,300. With this exception, all goods marked down in 2014 were sold during the year at the reduced prices.
4. During stock taking at 31st December 2014 goods which had cost ₹ 240 were found to be missing in department Y. It was determined that the loss should be regarded as irrecoverable.
5. The closing stock in both departments are to be valued at cost for the purpose of the annual accounts.

You are required to prepare for each department for the year ended 31st December 2014:

(a) a Trading Account; (b) a Memorandum Stock Account; and (c) a Memorandum Mark-up Account.

Solution

Southern Stores Ltd.

Dr. Trading Account for the year ended 31st December 2014 Cr.

Particulars	Dept. Y	Dept. Z	Particulars	Dept. Y	Dept. Z
To Opening Stock, at cost	24,000	36,000	By Sales	2,10,000	2,85,000
To Purchases	1,62,000	1,90,000	By Dept. Z - transfer	2,700	—
To Dept Y - transfer	—	2,700	By Profit & Loss A/c - goods lost	240	—
To Gross profit	51,518	92,496	By Closing stock (Note 1)	24,578	36,196
	2,37,518	3,21,196		2,37,518	3,21,196

Dr. **Memorandum Stock Account** **Cr.**

Particulars	Dept. Y	Dept. Z	Particulars	Dept. Y	Dept. Z
To Balance b/d (cost + mark up)	32,000	54,000	By Balance b/d (Mark-down on opening stock)	510	—
To Purchases A/c	1,62,000	1,90,000	By Sales A/c	2,10,000	2,85,000
To Memorandum Mark Up A/c (Mark-up on purchases)	54,000	95,000	By Dept Z - transfer	2,700	—
To Dept Y - transfer	—	2,700	By Memorandum Mark Up A/c (mark up on transfer)	900	—
To Memorandum Mark Up A/c (Mark up on transferred goods)	—	1,350	By Memorandum Mark Up A/c (marked down)	800	4,100
To Memorandum Mark Up A/c (Note 2) (On marked down goods lying in stock)	—	344	By Loss of Stock A/c	240	—
			By Memorandum Mark Up A/c (on stock cost)	80	—
			By Balance c/d (closing stock)	32,770	54,294
	2,48,000	3,43,394		2,48,000	3,43,394

Dr. **Memorandum Mark Up Account** **Cr.**

Particulars	Dept. Y	Dept. Z	Particulars	Dept. Y	Dept. Z
To Balance b/d (Mark-down opening stock)	510	—	By Balance b/d (Mark-up on opening stock)	8,000	18,000
To Memorandum Stock A/c (mark up on transfer)	900	—	By Memorandum Stock A/c (Mark up on purchase)	54,000	95,000
To Memorandum Stock A/c (Mark-down)	800	4,100	By Memorandum Stock A/c (Mark up on transfer)	—	1,350
To Memorandum Stock A/c (mark down on goods destroyed)	80	—	By Memorandum Stock A/c (marked down on goods lying in stock)	—	344
To Gross profit (balancing figure)	51,518	92,496			
To Balance c/d (Mark-down closing stock)	8,192	18,098			
	62,000	1,14,694		62,000	1,14,694

Working Notes : (1) Ascertainment of Closing Stock at Cost

Particulars	Dept. Y	Dept. Z
Closing stock at Invoice price (from Memorandum Stock Account)	₹ 32,770	₹ 54,294
Closing Stock at cost	3/4 of ₹ 32,770 = ₹ 24,578	2/3 of ₹ 54,294 = ₹ 36,196
Loading on closing stock	1/3 of ₹ 24,578 = ₹ 8,192	1/2 of ₹ 36,196 = ₹ 18,098

(2) Ascertainment of Mark-down in Closing Stock of Dept. Z

$$\frac{(\text{Mark down})}{(\text{Value after down})} \times \text{Value of closing stock} = \frac{4{,}100}{27{,}400*} \times 2{,}300 = ₹\,344$$

*Value after mark-down = ₹ 21,000 + 50% of ₹ 21,000 – ₹ 4,100 = ₹ 27,400.

(3) Verification of Gross Profit

	₹ Dept. Y	₹ Dept. Z
Sales	2,10,000	2,85,000
Add: Mark down (₹ 510 + ₹ 800) / (₹ 4,100 – ₹ 344)	1,310	3,756
	2,11,310	2,88,756
Gross profit (Dept Y 1/4 and Dept Z 1/3)	52,828	96,252
Less: Mark down	1,310	3,756
Gross Profit as per Memorandum Mark up Account	51,518	92,496

Key Points

- A department is generally a physical part of the rest of the business. It should not be assumed that departmental accounts refers only to departmental stores. In fact, they refer to the verious facets of a business. Each department is treated as a separate ***profit centre***, though none of the departments is separated geographically from the rest of the departments.
- **Distinction between Departmental Accounts and Branch Accounts**
  - ¤ In case of a dependent branch, all important accounting records are kept at the head office. The branch maintains only Cash Account and Customers Account (if necessary). However, an independent branch, usually maintains its own books of account and prepares its own Trading and Profit and Loss Account. In case of Departmental Accounts, all accounting records are maintained at one place and Departmental Trading and Profit and Loss Account is prepared accordingly.
  - ¤ As the departments are not geographically separated from each other, the problem of allocation of common expenditure among different departments arises. But in case of a branch account this problem of allocation of common expenditure does not arise since branches are geographically separated from each other.
  - ¤ In case of an independent branch, at the end of the accounting year, some adjustment and reconciliation of head office and branch accounts are required. In case of Department Accounts, the question of adjustments and reconciliation of accounts does not arise.
  - ¤ At the time of finalisation of accounts of head office, the conversion of foreign branch figures may create some problems. In case of Departmental Accounts, this type of problem does not arise.
- Under cost-based transfer pricing, the price may be based on actual cost, total cost or standard cost. Marginal cost is also sometimes used as a basis of ascertaining transfer price. Standard cost is preferred to actual cost since the inefficiency of one department cannot be passed on to another department. Taking full cost as transfer price means that the supplying departments' fixed cost becomes the variable cost of the receiving department.
- If the goods are transferred by one department to another department at a profit and at the end of the accounting period such goods are included in the unsold stock, an appropriate adjustment must be made for unrealised profit on stock. The entry is :

  General Profit and Loss Account Dr.
  To Provision for Unrealised Profit on Stock Account

  At the beginning of the next year reverse entry will be passed.

  Provision for Unrealised Profit on Stock Account Dr.
  To General Profit and Loss Account

THEORETICAL QUESTIONS

1. (a) State briefly the advantages to be derived from a system of Departmental Accounts.
   (b) What difficulties are there in the way of arriving at the net profit of each department?
2. Is there any difference between Branches and Departments, from the accounting point of view?
3. Explain the distinguishing features between Departmental Accounts and Branch Accounts and the advantages derived from Departmental Accounts.
4. How the following indirect expenses are distributed amongst different departments?
   (i) Rent;
   (ii) Insurance premium;
   (iii) Lighting;
   (iv) Advertisement;
   (v) Depreciation; and
   (vi) Managing Director's remuneration.

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each statement or answer each question below :

1. The expenses which have a direct bearing with the sales should be apportioned on the basis of net
   A profit
   B sales
   C none of these.
2. Friendly rivalry between different departments may help to increase the overall profit of
   A the organisation
   B a particular department
   C none of these.
3. In order to ascertain the departmental profit accurately, it is necessary to identify expenses and revenues of
   A the organisation
   B each department
   C none of these.
4. There may be some purely financial incomes which cannot be suitably apportioned
   A to a particular department
   B among different departments
   C none of these.
5. Each department is charged with a share of the common expenses which is apportioned
   A equally
   B on a suitable basis
   C none of these.

PRACTICAL QUESTIONS

1. Grewal Brothers own a business which has two departments, A and B.
   The following balances appeared in the books for the year ended 31.12.2014 :

Particulars	Dept A (₹)	Dept B (₹)	Total (₹)
Stock (1.1.2014)	5,800	6,400	12,200
Purchases	40,000	50,000	90,000
Sales	1,50,000	1,00,000	2,50,000
Wages of shop assistants			21,800
Rent, rates and insurance			4,320
Stationery and office expenses			1,260
Motor vehicle expenses and depreciation			3,240
Carriage on purchases			1,440
Light and heat			1,270

   You are required to prepare a Columnar Trading Account as specified above and Profit and Loss Account (columnar form is not required) for the year ended 31.12.2014, taking into consideration the following :
   (a) Carriage on purchases which is to be apportioned to the separate departments in proportion to purchases, and wages to be allocated on the same basis as sales.
   (b) Stock on 31.12.2014 was: Dept A — ₹ 9,000; Dept B — ₹ 6,000.
   (c) An amount owing for insurances, ₹ 120, has not been recorded in the books.
   (d) The provision for doubtful debts which is shown in the books at ₹ 300 is to be increased to ₹ 400.
2. Raj Singh runs a business which has two departments. The following balances were extracted from his books on 30.6.2015 :

Particulars	Dept. A (₹)	Dept. B (₹)	Common Expenses	₹
Opening Stock on 1.1.2015	12,000	13,000	Commission payable	1,500
Purchases	24,520	36,544	Salaries	15,100
Sales	86,030	89,070	Advertising	2,500
Closing Stock	12,100	13,300	Rates	1,450

Wages	22,800	21,200	Insurance	400
Returns in	1,030	4,070	Repairs	800
Returns out	520	544	Lighting and heating	2,000

You are required to prepare Departmental Trading and Profit and Loss Account for the six month ended on 30.6.2015, after taking into account the following information :

(a) (i) Salaries of ₹ 400 are outstanding;
(ii) Rates ₹ 250 have been paid in advance; and
(iii) Insurance ₹ 80 is prepaid.

(b) Commission, salaries and advertising are to be charged to the departments in proportion to net turnover (sales minus returns in); all other expenses are to be apportioned 1/4th to department A and 3/4th to department B.

3. M/s Z & Co has two departments. You are required to prepare the Trading and Profit and Loss Account for each department for the year ended on 31st March, 2015 on the basis of the following information :

Particulars	Dept. I (₹)	Dept. II (₹)
Opening Stock (1.4.2014)	25,000	20,000
Purchases	2,30,000	1,90,000
Sales	6,33,000	4,92,000
Sales Returns	3,000	2,000
Closing Stock (31.3.2015)	30,000	18,000
Wages	80,000	60,000
Salaries	40,000	25,000

Other common expenses : Rent ₹ 15,000; Electricity ₹ 6,000; Depreciation ₹ 18,000; Selling expenses ₹ 8,000. Some other relevant information is given below :

Particulars	Dept.A (₹)	Dept. B (₹)
Light Points	18	9
Value of Assets (₹)	1,50,000	1,20,000
Floor Area (sq.ft.)	300	200

4. A departmental stores carries on its business through five departments, A, B, C, D and E.

(i) The following information for 2014 is now made available to you:
Salaries and Commission ₹ 11,020; Rent and Rates ₹ 2,900; Insurance ₹ 1,160; Miscellaneous Expenses ₹ 2,610. All these expenses are chargeable to each department in proportion to the cost of the articles sold in the respective departments.

(ii) The following balances as at 31.12.2014 were ascertained: (all figures in ₹)

Particulars	A	B	C	D	E
Opening stock at cost	10,000	6,000	15,000	8,000	9,000
Purchases	1,00,000	60,000	20,000	52,000	60,000
Sales	96,000	62,000	19,000	46,000	60,000
Closing stock at cost	23,000	8,000	6,000	2,000	11,000

Prepare the Profit and Loss Account to show the final result of each department and also the combined results with respective percentages on sales.

5 The Trading and Profit and Loss Account of Hindustan Electronics for the year ending March 31, 2015 is as under: (all figures in ₹).

To Purchases:		By Sales:	
Transistors (X)	1,60,000	Transistors (X)	1,75,000
Tape Records (Y)	1,25,000	Tape Records (Y)	1,40,000
Spare parts for servicing & repair jobs (Z)	80,000	Servicing and repair jobs (Z)	35,000
To Wages	48,000	By Stock on 31.3.2015	
To Rent	10,800	Transistors (X)	60,100
To Sundry Expenses	11,000	Tape Records (Y)	20,300
To Net Profit	40,200	Spare parts for servicing and repair jobs (Z)	44,600
	4,75,000		4,75,000

Prepare Deparqtmental Accounts for each of the three Departments X, Y and Z mentioned above after taking into consideration the following:

(a) Transistors and Tape Recorders are sold at the showroom. Servicing and repairs are carried out at the workshop.

(b) Wages comprise: Showroom 3/4; Workshop 1/4.
It was decided to allocate the showroom wages in the ratio of 1:2 between Departments X and Y respectively.

(c) The workshop rent is ₹ 500 per month. The rent of the showroom is to be divided equally between Dept X & Y.

(d) Sundry expenses are to be allocated on the basis of the turnover of each department.

6. The Profit and Loss Account for the year ended 31st December 2014 of D Q Holidays Limited, a company which provides holidays at several resorts in Jammu and Kashmir is as follows: (all figures in ₹).

Agents' commission	90,600	Sales of holidays	9,06,000
Hire of aeroplanes	1,05,000	Net loss for the year	10,000
Coaches from airport to resort	7,000		
Hotel accommodation	5,81,400		
Salary & expenses of resort representatives	32,000		
Brochures, advertising, head office and common costs	1,00,000		
	9,16,000		9,16,000

The managing director has complained to you, as chief accountant, that the form of presentation of this Profit and Loss Account does not tell him where or why the net loss has been incurred and is of little use for management purposes.

You are required to redesign the Profit and Loss Account, using also the information given below, so that it will overcome the complaints of the managing director. You are given the following information:

1. The public book their holidays with the company through local travel agents who were paid a commission of 10% of the gross price of the holiday.
2. Holidays were offered at six resorts in Jammu and Kashmir, namely P, Q, R, S,T and U.
3. Only one hotel was used in each resort.
4. Flights were from Delhi Airport to three airports in Jammu and Kashmir, as follows:

Airport	For resorts	Annual cost (₹)
X	P and Q	30,000
Y	R and S	40,000
Z	T and U	35,000

5. Separate coaches were used for the journey from the aiport to each resort hotel. The annual costs of these were:
To Resort : P — ₹ 1,100; Q — ₹ 900; R — ₹ 1,400; S — ₹ 1,100; T — ₹ 1,700; and U — ₹ 800.
6. The annual cost of hotel accommodation at each resort were:
P — ₹ 3,05,900; Q — ₹ 1,53,200; R — ₹ 22,600; S — ₹ 45,400; T — ₹ 10,200; and U — ₹ 44,100.
7. A separate representative was employed at each resort, and the annual costs were:
P — ₹ 5,000; Q — ₹ 4,500; R — ₹ 6,000; S — ₹ 5,500; T — ₹ 5,700; and U — ₹ 5,300.
8. Sales of holidays at the various resorts were:
P — ₹ 4,80,000; Q — ₹ 2,49,000; R — ₹ 30,000; S — ₹ 60,000; T — ₹ 24,000; and U — ₹ 68,000.

7. Shivam Ltd has three departments D1, D2 and D3. From the following particulars calculate :
1. The Departmental Gross Profit for the year ended 31st March, 2015.
2. The values of stocks as on 31st March, 2015 :

Particulars	D1 (₹)	D2 (₹)	D3 (₹)
Stock as on 1st April, 2014	24,000	36,000	12,000
Purchases	1,46,000	1,24,000	48,000
Actual Sales	1,72,500	1,59,400	74,600
Gross Profit on normal selling prices	20%	25%	$33^1/_3$%

During the year some items were sold at discount and these discounts were reflected in the values of the sales shown above. The items sold at discount were :

Particulars	D1 (₹)	D2 (₹)	D3 (₹)
Sales at normal prices	10,000	3,000	1,000
Sales at actual prices	7,500	2,400	600

8. The following is the Trial Balance as at 31st December 2014 of a firm having two partners: A and B, who agreed to share the annual profits and losses in equal proportion. They have three distinct departments of business. You are required to prepare Departmental Trading and profit and Loss Account and the Balance Sheet as at 31st December 2014. While preparing the accounts, make the following provisions and adjustments: (1) Allow and charge interest @ 5% per annum on the partners' capitals and drawings respectively; (2) Write-off as bad and irrecoverable debts amounting to ₹ 1,600 and thereafter, increase the provision for bad and doubtful debts to 5% on book-debts outstanding; (3) Bring into account the purchase of stationery on credit for ₹ 200, not accounted for the Trial balance; (4) Write-off depreciation on Furniture and Fixtures @ 5% on cost; (5) ₹ 100 of the Insurance premium are prepaid; (6) The following are the values of the closing stock in the respective departments: Department X ₹ 10,462; Department Y ₹ 10,001; Department Z ₹ 4,940; (7) Advertisement materials of the value of ₹ 300 is in hand; it has not been adjusted in the Trial Balance; (8) All expenses and losses are to be apportioned among the respective departments in the proportion of 7 : 6 : 2.

Trial Balance as at 31st December, 2014

Particulars		Dr. (₹)	Cr. (₹)	Particulars	Dr. (₹)	Cr. (₹)
Capital Account : A			33,333	Salaries	6,418	
Capital Account : B			16,666	Advertising	3,612	
Drawings Account : A		4,000		Investments Income		1,200
Drawings Account : B		3,000		Investments	20,000	
Stock (1.1.2014) : Dept	X	11,438		Debtors and Creditors	8,955	5,493

9. Orchard carried on trade as a fruit grower and as a canner. On December 31, 2014 the trial balance extracted from his book was as follows:

Particulars	Dr.	Cr.	Particulars	Dr.	Cr.
Orchard : Capital (1.1.2014)		13,500	Bought Ledger balances:		
Drawings	1,200		Farm		200
Freehold land and premises at cost	14,900		Cannery		740
Sales during the year		800	Purchases :		
Plant and machinery at cost:			Farm	250	
Farm	1,900		Cannery	1,210	
Cannery	4,800		Wages :		
Purchases of plant and machinery			Farm	1,600	
less sales during the year	500		Cannery	2,400	
Provisions for depreciation:			Sales :		
Farm		1,100	Farm		530
Cannery		1,640	Cannery		9,950
Fruit trees and bushes at cost	800		Trade expenses	920	
Stock (1.1.2014)			Administration and motor expenses		
Farm	400		(including loan interest to Sept. 30 2014)	584	
Cannery	1,650		Repairs :		
Loan at 6% (interest payable on			Farm	80	
March 31 and September 30)		8,000	Cannery	360	
Balance at bank	864		Salaries	1,400	
Sales ledger balances	642			36,460	36,460

You are instructed to prepare the accounts and are given further information as follows:

1. Provision is to be made for depreciation for the year of plant and machinery on cost at the end of the year at the rate of 10 per cent in the case of the farm and $7^{1}/_{2}$ per cent in case of the cannery.
2. During the year tractor, included in farm plant and machinery at a cost of ₹ 600 and in respect of which depreciation of ₹ 500 had been provided was sold for ₹ 300 and was replaced by a new tractor costing ₹ 800.
3. Fruit to the value of ₹ 2,200 was supplied by the farm to the cannery.
4. Stocks in hand on December 31 2014, were valued as follows: Farm ₹ 300, Cannery ₹ 1,720.
5. Amounts owing, excluding loan interest accrued due at the end of the year were: Purchases : Cannery (included in stock but not entered in the books) ₹ 140; Trade expenses ₹ 80.
6. Bought ledger balances at the end of the year included ₹ 320 for cans supplied. Since the books were closed the supplier agreed to allow ₹ 160 as the cans were sub-standard. This allowance had been taken into account in valuing the stock on December 31, 2014.
7. All expenses except where otherwise indicated, are to be apportioned on the basis : Farm — one-fourth, Cannery — three-fourths.
8. Orchard is to be charged ₹ 2 per week for expenses incurred on his private car.
9. Freehold land, sold for ₹ 850, had cost ₹ 350.
10. Pippin, the manager of the cannery, is to be credited with 5 per cent of the cannery profits after charging his commission.

You are required to prepare (a) Trading and Profit and Loss Account showing, separately, the net profit or loss of the farm and of the cannery for the year ended December 31, 2014, and (b) Balance Sheet as on that date. Ignore taxation.

10. The following is the Trial Balance of Automatic Motors and Garage on March 31 2015:

Particulars	Dr.	Cr.	Particulars	Dr.	Cr.
Opening Stock :			Capital Account		76,250
Petrol and Oil	1,675		Drawings	8,500	
Spare Parts and Tyres	5,500		Sales :		
Tools	2,200		Petrol and Oil		23,000
Hire Cars	72,000		Spare Parts and Tyres		37,000
Purchases :			Garage Receipts		4,000
Tools	4,000		Repairs Department		14,000
Spare Parts and Tyres	32,000		Hire Receipts		70,000
Petrol and Oil	41,250		Licence fees & permit fees for HireCars	3,000	
Advertising Expenses	4,500		Office expenses	4,000	
Rent, Rates and Taxes	12,000		Sundry Debtors	400	
Insurance Premia :			Sundry Creditors		1,200
On Hire Cars	4,000		Commission received on cars sold		5,000
Fire, theft and burglary cases	425		Loan		4,000
Wages :			Cash in hand and at bank	2,000	
Drivers	12,000				
Repairs Department	16,500				
Office	7,500				
Garage	1,000			2,34,450	2,34,450

The following additional information is also given to you:

(a) The loan was taken on January 1, 2015 on which 12% interest is to be paid.
(b) Stock in hand on March 31, 2015 were as under:
(i) Tools ₹ 5,000; (ii) Petrol and oil ₹ 4,300; (iii) Spare parts and tyres ₹ 10,000.
(c) Petrol and oil whose value were ₹ 15,600 and ₹ 1,800 were used by hired cars and the repairs department respectively.
Besides, the owner of the garage drew petrol and oil worth ₹ 3,000 for his personal car.
(d) The repairs department performed work during the year as under:
On owner's car ₹ 600; On hire cars ₹ 7,500.
(e) Spare parts used by the repairs department in the year cost ₹ 4,000 and the hire cars ₹ 750.
(f) Depreciation on hire cars to be provided at 30% p.a.
(g) Licences and taxes amounting to ₹ 200 on owner's car have been paid and included in rent, rates and taxes.

(h) Rent, rates and taxes to be distributed as under:
(i) Repairs department 1/2; (ii) Spare parts 1/4; (iii) Garage 1/8; and (iv) Office 1/8.

You are required to prepare a : (a) Department Trading Account; (b) Profit and Loss Account for the year ending March 31, 2013; and (c) Balance Sheet as on that date.

11. From January 1 2014, Ramesh & Co have been running three departments A, B and C and the following particulars have been taken from their books on December 31 2014:
Opening Stock : January 1 : A — ₹ 36,000; B — ₹ 24,000; and C — ₹ 20,000.
Purchases : A — ₹ 1,20,000; B — ₹ 1,00,000; and C — ₹ 95,000.
Goods from other departments : A — ₹ 8,000; B — ₹ 5,000; and C — ₹ 3,000.
Direct wages : A — ₹ 54,000; B — ₹ 48,000; and C — ₹ 35,000.
Sales : A — ₹ 2,44,000; B — ₹ 1,96,000; and C — ₹ 1,44,000.
Goods to other departments : A — ₹ 6,000; B — ₹ 4,000; and C — ₹ 6,000.
Stock in hand on December 31 : A — ₹ 49,000; B — ₹ 14,000; and C — ₹ 18,000.
Carriage inward : A — ₹ 3,000; B — ₹ 2,000; and C — ₹ 2,000.
Other information:
Drawing — ₹ 8,000; Printing & Stationery — ₹ 2,400; Carriage outwards — ₹ 6,000; Salaries — ₹ 24,000; Rent & Rates — ₹ 18,000; Bad debts — ₹ 3,600; Discount allowed — ₹ 8,400; Advertisement — ₹ 12,000; Miscellaneous expenses — ₹ 6,600.
Inter-departmental supplies have been made during the year by each department at market price and the stocks at close valued at cost to A department include ₹ 4,000 worth goods supplied by B. Miscellaneous expenses include ₹ 600 on account of supplies to a partner for personal expenses.
You are required to prepare Departmental Trading and Profit and Loss Account apportioning general unallocated expenses on the basis of turnover (i.e., sales plus transfers).

12. Complex Ltd. has 3 departments: A, B and C. The following information is provided : (all figures in ₹)

Particulars	Dept A	Dept B	Dept C
Opening Stock (1.4.2014)	3,000	4,000	6,000
Consumption of direct materials	8,000	12,000	—
Wages	5,000	10,000	—
Closing stock	4,000	14,000	8,000
Sales	—	—	34,000

Stocks of each department are valued at cost to the department concerned. Stocks of A Department are transferred to B at a margin of 50% above departmental cost. Stocks of B Department are transferred to C Department at a margin of 10% above departmental cost.
Other expenses were: Salaries — ₹ 2,000; Printing and stationery — ₹ 1,000; Rent — ₹ 6,000; Insurance paid — ₹ 4,000; Depreciation — ₹ 3,000.
Allocate expenses in the ratio of departmental gross profits. Opening figures of reserves for unrealised profits on departmental stocks were: Department B — ₹ 1,000; Department C — ₹ 2,000.
Prepare Departmental Trading and Profit and Loss Account for the year ended 31st March 2015.

13. You are given the following particulars of a business having three departments:

Particulars	Purchases	Opening Stock	Sales
Department A	1,000 Units	120 Units	1,020 Units @ ₹ 20 each
Department B	2,000 Units	80 Units	1,920 Units @ ₹ 22.50 each
Department C	2,400 Units	152 Units	2,496 Units @ ₹ 25 each

Additional information:
(i) Purchases were made at a total cost of ₹ 92,000.
(ii) The rate of gross profit is the same in each case.
(iii) Purchases and sales prices are constant for the last two years.
Prepare Departmental Trading Account for the year 2015.

14. You are given the following particulars of a business having three departments:

Particulars	Purchases	Opening Stock	Closing Stock
Department A	1,500 Units	200 Units	100 Units
Department B	1,000 Units	300 Units	160 Units
Department C	2,000 Units	150 Units	200 Units

Additional information:

(i) Purchases were made at a total cost of ₹ 92,000.

(ii) The percentage of gross profit on turnover is the same in each case.

(iii) Purchases and sales prices are constant for the last 2 years.

(iv) Selling price per unit: Department A ₹ 20; Department B ₹ 25; and Department C ₹ 30.

You are required to prepare Departmental Trading Account.

15. A company manufacturing electric components operates with two departments. Transfers are made between the departments of both purchased goods and manufactured finished goods. Goods purchased are transferred at cost and manufacturing goods are transferred only at selling price as in the case with open market.

Transactions for the year ended 30th June, 2015 are given below:

Particulars	Dept X (₹)	Dept Y (₹)
Opening Stock	20,000	15,000
Sales	1,90,000	1,35,000
Wages	12,500	7,500
Purchases	1,00,000	80,000
Closing stock :		
Purchased goods	2,000	5,000
Manufactured goods	7,000	8,000

The following were the transfers from Department X to Department Y : purchased goods ₹ 6,000 and finished goods ₹ 20,000 and from Department Y to Department X : purchased goods ₹ 5,000 and finished goods ₹ 35,000.

Stocks were valued at cost to the department concerned. Only in closing stock of manufactured goods in the departments transferred finished goods are 20%.

Draw out Departmental Trading Account and the Company's Trading Account for the year ended 30th June 2015.

Lease Accounting

Introduction

A ***Lease*** is a contract by which the owner of an asset, the ***Lessor***, allows another person, the ***Lessee***, to use it in exchange for regular payments. Leasing has become extremely common in the business world. From the lessee's point of view, ***leasing*** provides an alternative to the purchase of an asset required for use in the business. The main distinguishing feature of leasing is that the lessee never obtains legal ownership of the asset during lease period. The advantage is that the lessee obtains the unrestricted use of the asset for a specified period without incurring major capital expenditure or incurring long-term loan, while the rental can be paid to the lessor out of the income generated by the use of the asset over that specified period.

The range of assets covered by the leasing agreements is very wide. Plant and Machinery, Land and Buildings, Cars, Ships and Aircraft are frequently leased.

Before the introduction of AS—19 : Leases, many enterprises were disclosing in the Balance Sheet neither the leased assets nor the full lease liabilities. Now, AS—19 ensures that the entity controlling the assets, irrespective of ownership, ***recognises the assets and resulting liability*** in order to provide a true and fair view of the financial position.

Objective

The objective of this Statement is to prescribe, for lessees and lessors, the appropriate accounting policies and disclosures in relation to finance leases and operating leases.

Scope

This Statement should be applied in accounting for all leases other than:

(a) lease agreements to explore for or use natural resources, such as oil, gas, timber, metals and other mineral rights; and

(b) licensing agreements for items such as motion picture films, video recordings, plays, manuscripts, patents and copyrights; and

(c) lease agreements to use lands.

This Statement applies to agreements that transfer the right to use assets even though substantial services by the lessor may be called for in connection with the operation or maintenance of such assets.

This Statement does not apply to agreements that are contracts for services that do not transfer the right to use assets from one contracting party to the other.

Example : X Ltd. has taken on lease a fully furnished office. The lessor provides secretarial services and all office equipments. This is covered by AS—19.

Definitions

The following terms are used in this Statement with the meanings specified:

Lease

A lease is an agreement whereby the lessor conveys to the lessee in return for a payment or series of payments the right to use an asset for an agreed period of time.

Finance Lease

A finance lease is a lease that transfers substantially all the risks and rewards incident to ownership of an asset.

Operating Lease

An operating lease is a lease other than a finance lease.

Non-cancellable Lease

A non-cancellable lease is a lease that is cancellable only:

(a) upon the occurrence of some remote contingency; or
(b) with the permission of the lessor; or
(c) if the lessee enters into a new lease for the same or an equivalent asset with the same lessor; or
(d) upon payment by the lessee of an additional amount such that, at inception, continuation of the lease is reasonably certain.

Inception of the Lease

The inception of the lease is the earlier of the date of the lease agreement and the date of a commitment by the parties to the principal provisions of the lease.

Lease Term

The lease term is the non-cancellable period for which the lessee has agreed to take on lease the asset together with any further periods for which the lessee has the option to continue the lease of the asset, with or without further payment, which option at the inception of the lease it is reasonably certain that the lessee will exercise.

Minimum Lease Payments

Minimum lease payments are the payments over the lease term that the lessee is, or can be required, to make excluding contingent rent, costs for services and taxes to be paid by and reimbursed to the lessor, together with:

(a) in the case of the lessee, any residual value guaranteed by or on behalf of the lessee; or
(b) in the case of the lessor, any residual value guaranteed to the lessor:
    i. by or on behalf of the lessee; or
    ii. by an independent third party financially capable of meeting this guarantee.

However, if the lessee has an option to purchase the asset at a price which is expected to be sufficiently lower than the fair value at the date the option becomes exercisable that, at the inception of the lease, is reasonably certain to be exercised, the minimum lease payments comprise minimum payments payable over the lease term and the payment required to exercise this purchase option.

Fair Value

Fair value is the amount for which an asset could be exchanged or a liability settled between knowledgeable, willing parties in an arm's length transaction.

Economic Life

Economic life is either:

(a) the period over which an asset is expected to be economically usable by one or more users; or

(b) the number of production or similar units expected to be obtained from the asset by one or more users.

Useful Life

Useful life of a leased asset is either:

(a) the period over which the leased asset is expected to be used by the lessee; or

(b) the number of production or similar units expected to be obtained from the use of the asset by the lessee.

Residual Value

Residual value of a leased asset is the estimated fair value of the asset at the end of the lease term.

Guaranteed Residual Value

Guaranteed residual value is:

(a) in the case of the lessee, that part of the residual value which is guaranteed by the lessee or by a party on behalf of the lessee (the amount of the guarantee being the maximum amount that could, in any event, become payable); and

(b) in the case of the lessor, that part of the residual value which is guaranteed by or on behalf of the lessee, or by an independent third party who is financially capable of discharging the obligations under the guarantee.

Unguaranteed Residual Value

Unguaranteed residual value of a leased asset is the amount by which the residual value of the asset exceeds its guaranteed residual value.

Example : Magma Leasing Ltd. has given a car on lease for 4 years to Sita Travels Ltd. The cost of the car is ₹ 5,00,000. The estimated residual value of the car is ₹ 50,000 at the end of the lease.

A dealer of 2nd hand car gives a guarantee to purchase the car for ₹ 40,000 at the end of the lease period. This ₹ 40,000 is the guaranteed residual value. The remaining ₹ 10,000 is the unguaranteed residual value.

Gross Investment

Gross investment in the lease is the aggregate of the minimum lease payments under finance lease from the standpoint of the lessor and any unguaranteed residual value accruing to the lessor.

Unearned Finance Income

Unearned finance income is the difference between:

(a) the gross investment in the lease; and

(b) the present value of

(i) the minimum lease payments under a finance lease from the standpoint of the lessor; and

(ii) any unguaranteed residual value accruing to the lessor, at the interest rate implicit in the lease (***See Illustration 2***).

Net Investment

Net investment in the lease is the gross investment in the lease less unearned finance income.

Interest Rate Implicit in the Lease

The interest rate implicit in the lease is the discount rate that, at the inception of the lease, causes the aggregate present value of

(a) the minimum lease payments under a finance lease from the standpoint of the lessor; and
(b) any unguaranteed residual value accruing to the lessor, to be equal to the fair value of the leased asset.

Lessee's Incremental Borrowing Rate of Interest

The lessee's incremental borrowing rate of interest is the rate of interest the lessee would have to pay on a similar lease or, if that is not determinable, the rate that, at the inception of the lease, the lessee would incur to borrow over a similar term, and with a similar security, the funds necessary to purchase the asset.

Contingent Rent

Contingent rent is that portion of the lease payments that is not fixed in amount but is based on a factor other than just the passage of time (e.g., percentage of sales, amount of usage, price indices, market rates of interest).

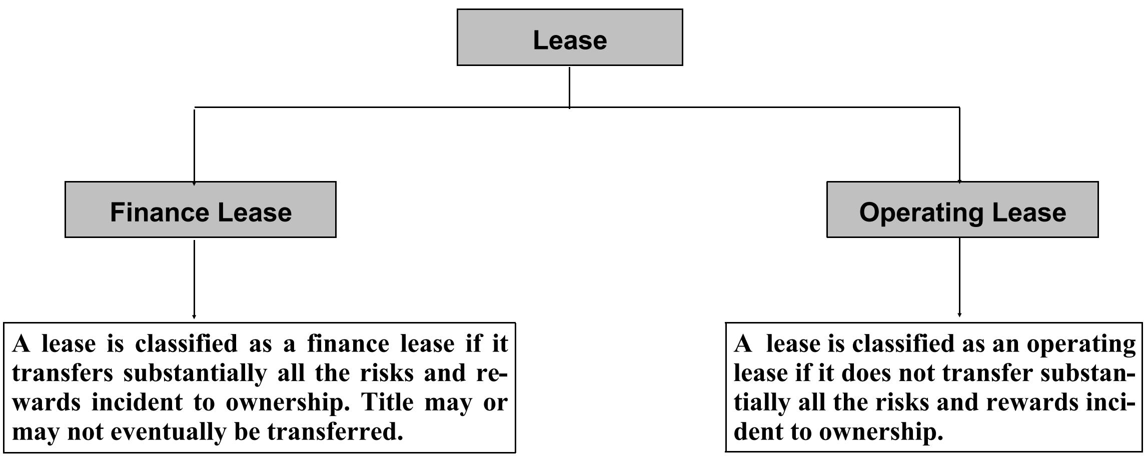
Example : Fast Food Ltd. has taken a restaurant on lease in New Delhi Railway Station. Rent payable per month is ₹ 20,000 plus 10% of sales as contingent rent.

Hire Purchase

The definition of a lease includes agreements for the hire of an asset which contain a provision giving the hirer an option to acquire title to the asset upon the fulfillment of agreed conditions. These agreements are commonly known as hire purchase agreements. Hire purchase agreements include agreements under which the property in the asset is to pass to the hirer on the payment of the last installment and the hirer has a right to terminate the agreement at any time before the property so passes.

Classification of Leases

The classification of leases adopted in this Statement is based on the extent to which risks and rewards incident to ownership of a leased asset lie with the lessor or the lessee. Risks include the possibilities of losses from idle capacity or technological obsolescence and of variations in return due to changing economic conditions. Rewards may be represented by the expectation of profitable operation over the economic life of the asset and of gain from appreciation in value or realisation of residual value.



Since the transaction between a lessor and a lessee is based on a lease agreement common to both parties, it is appropriate to use consistent definitions. The application of these definitions to the differing circumstances of the two parties may sometimes result in the same lease being classified differently by the lessor and the lessee.

Whether a lease is a finance lease or an operating lease depends on the substance of the transaction rather than its form. Examples of situations which would normally lead to a lease being classified as a ***finance lease*** are:

(a) the lease transfers ownership of the asset to the lessee by the end of the lease term;

(b) the lessee has the option to purchase the asset at a price which is expected to be sufficiently lower than the fair value at the date the option becomes exercisable such that, at the inception of the lease, it is reasonably certain that the option will be exercised;

(c) the lease term is for the major part of the economic life of the asset even if title is not transferred;

(d) at the inception of the lease the present value of the minimum lease payments amounts to at least substantially all of the fair value of the leased asset; and

(e) the leased asset is of a specialised nature such that only the lessee can use it without major modifications being made.

Indicators of situations which individually or in combination could also lead to a lease being classified as a ***finance lease*** are:

(a) if the lessee can cancel the lease, the lessor's losses associated with the cancellation are borne by the lessee;

Example : Your company, Go Airways Ltd. has taken on lease an aircraft for 5 years. If the company wants to cancel the lease, it will have to pay all the remaining payment up to the end of the lease. This is a finance lease, because there is no way of paying a reduced rental.

(b) gains or losses from the ***fluctuation in the fair value of the residual fall to the lessee*** (for example in the form of a rent rebate equalling most of the sales proceeds at the end of the lease); and

Example : Magma Leasing Ltd. has given a car on lease for 4 years to Sita Travels Ltd. The cost of the car is ₹ 5,00,000. The estimated residual value is ₹ 50,000.

As per the terms and conditions of the lease, if the car's residual value is more than ₹ 50,000, When the car is sold, Sita Travels Ltd. (lessee) will receive the excess money. If it is less than ₹ 50,000, Sita Travels Ltd. will have to pay Magma Leasing Ltd. the deficit amount. This is a financial lease.

(c) the lessee can continue the lease for a secondary period at a rent which is substantially lower than the market value.

Example : Your company Modern Printer Ltd. has taken on lease a printing machine for 5 years at a commercial rent from HMT Ltd. At the end of the lease period, your company can continue to rent at 1/10th of the present rental but a service contract is to be signed with the HMT Ltd.

HMT Ltd. does not want the printing machine back. It would prefer to leave it with the lessee for a minimum rent and earn some income from service contract.

This is a finance lease, as the lessor wants that the lessee should enjoy the entire economic life of the machine.

Lease classification is made at the ***inception of the lease***. If at any time the lessee and the lessor agree to change the provisions of the lease, other than by renewing the lease, in a manner that would have resulted in a different classification of the lease, the revised agreement is considered as a new agreement over its revised term. Changes in estimates (for example, changes in estimates of the economic life or of the residual value of the leased asset) or changes in circumstances (for example, default by the lessee), however, do not give rise to a new classification of a lease for accounting purposes.

Characteristics of A Finance Lease

1. Lessor retains title to asset but transfers substantially (not, of course, identically) the risks and rewards incident to owner of an asset.
2. The full cost of the asset will generally be repaid by the lessee to the lessor.
3. Lessee is responsible for insurance and maintenance of the asset.
4. Lessee cannot sell the asset without the permission of the lessor.
5. Lessee has the right of uninterrupted use of the asset till lease payments are made.
6. The contractual obligation to pay the lessor is generally non-cancellable.
7. At the end of the lease-term the lessor can take back the possession of the asset from the lessee or there can be a bargain purchase/renewal option.

Characteristics of Operating Lease

1. The lessee pays a periodic rental to the lessor for the period of the lease.
2. The lessor retains the risks and rewards of ownership.
3. The lessor assumes responsibility for repairs, maintenance and insurance.
4. An operating lease is usually short-term.
5. The lessee has use of the asset generally over a period which is less than its useful economic life.

Distinction Between Finance Lease and Operating Lease

	Finance Lease		Operating Lease
1.	The lease exists generally for the whole useful life of the asset and rentals receivable are sufficient to recoup capital outlay and show a profit.	1.	The lease period is less than the useful life of the asset. The lessor relies on subsequent leasing or eventual sale of the asset to cover the capital outlay and show a profit.
2.	The lessor usually does not deal directly in this type of asset.	2.	The lessor may very well carry on a trade in this type of asset.
3.	The lessor does not retain the risks and rewards of ownership.	3.	The lessor is usually responsible for repairs and maintenance.
4.	The lease agreement cannot generally be cancelled. the lessee has a liability for the payments.	4.	The lease can sometimes be cancelled at a short notice.
5.	The substance of the transaction is the purchase of the asset by the lessee financed by a loan from the lessor.	5.	The substance of the transaction is the short-term rental of an asset.
6.	Lessee will record it as an asset.	6.	Lessor will record it as an asset.

Illustration 1

On 1st January, 2015 Gamon India Ltd. leased a heavy duty new crane from Magma Leasing Co. Ltd. The capital cost of the crane is ₹ 25,00,000. 6 half-yearly payments of ₹ 5,00,000 are payable. 1st installment is payable on 1st January, 2015. The estimated economic life of the crane is 5 years with a nil residual value. The leasing company has offered a secondary term of 3 years for ₹ 2,00,000 per annum only. Gamon India Ltd. has not yet decided if they will accept it.

After the expiry of lease period, the crane is expected to have a residual value of ₹ 5,00,000. As per the lease agreement, Gamon India Ltd. will get 90% of the proceeds should the assets be sold.

How this lease should be classified ?

Solution

The minimum lease payment = (₹ 5,00,000 × 6)	₹	30,00,000
Fair value of the asset (capital cost)	₹	25,00,000
Finance Charge	₹	5,00,000

This will be classified as a finance lease on the following grounds :

(i) The primary lease period is 3 years which is majority of asset's economic life.

(ii) The lessee has the option to extend the lease for a secondary period at a much lower rent.

(iii) The lessee will get 90% of the proceeds of sale of the crane.

Illustration 2

An equipment is leased for 3 years and its useful life is 5 years. Both the cost and the fair value of the equipment are ₹ 3,00,000. The amount will be paid in 3 installments and at the termination of lease — lessor will get back the equipment. The unguaranteed residual value at the end of 3 years is ₹ 40,000.

The Implicit Rate of Return (IRR) of the investment is 10%. The present value of annuity factor of Re 1 due at the end of 3rd year at 10%. IRR is 2.4868. The present value of ₹ 1 due at the end of 3rd year at 10% rate of interest is 0.7513.

(i) State with reason whether the lease constitutes finance lease.

(ii) Calculate unearned finance income.

Solution (i)

This lease constitutes finance lease on the following grounds :

(1) The primary lease period is 3 years which is majority of assets' economic value.

(2) The present value of lease payments is 89.98% (See Working Note below) of the fair value which is substantial portion thereof.

Working Note :

Present value of residual value — ₹ 40,000 × 0.7513 = ₹ 30,052.

Present value of lease payment — ₹ 3,00,000 – ₹ 30,052 = ₹ 2,69,948.

Percentage of fair value = $\frac{2,69,948}{3,00,000}$ = 89.98%

Solution (ii)

Annual lease payments = $\frac{2,69,948}{2.4868}$ = ₹ 1,08,552

Annual lease payment has been calculated on the basis that :

[Present value of lease payments plus residual value = Fair value of the assets (cost)].	₹
Gross investment in the lease [(₹ 1,08,552 × 3) + ₹ 40,000]	3,65,656
Less: Cost of the equipment	3,00,000
Unearned finance income	65,656

Leases in Financial Statement of Lessees

Finance Leases

At the inception of a finance lease, the lessee should recognise the lease as an asset and a liability. Such recognition should be at an amount equal to the fair value of the leased asset at the inception of the lease. However, if the fair value of the leased asset exceeds the present value of the minimum lease payments from the standpoint of the lessee, the amount recorded as an asset and a liability should be the present value of the minimum lease payments from the standpoint of the lessee. In calculating the present value of the minimum lease payments the discount rate is the interest rate implicit in the lease, if this is practicable to determine; if not, the lessee's incremental borrowing rate should be used.

Illustration 3

X Ltd wishes to acquire a new machine. The company could purchase outright for cash for ₹ 8,10,000 or alternatively, enter into a finance lease agreement. The asset has an estimated useful life of 5 years with a residual value of ₹ 4,250. The terms and conditions of the finance lease agreement are as follows :

(i) Minimum lease payment ₹ 2,00,000 p.a. payable on first day of each year.

(ii) Lessee is responsible for insurance and maintenance of the machine.

You are required to calculate :

(i) interest rate implicit in lease; and

(ii) present value of minimum lease payment.

Solution

(i) Interest Rate Implicit in Lease

This is the discount rate, which when applied at the outset of the lease equates the following :

(a) the fair value of the asset;

(b) the present value of minimum lease payments plus any **unguaranteed residual value**.

Here in this ***Illustration***,

(a) Fair value of the asset = ₹ 8,10,000.

(b) Present value of lease payment at different rate of interest is calculated as follows :

Lease Payments (Beginning)	Present Value Factor at 11%	Present Value of Lease Payments	Present Value Factor at 12%	Present Value of Lease Payments	Present Value Factor at 13%	Present Value of Lease Payments
2,00,000	1	2,00,000	1	2,00,000	1	2,00,000
2,00,000	.900	1,80,000	.893	1,78,600	.885	1,77,000
2,00,000	.811	1,62,200	.797	1,59,400	.783	1,56,600
2,00,000	.731	1,46,200	.712	1,42,400	.693	1,38,600
2,00,000	.659	1,31,800	.636	1,27,200	.613	1,22,600
*4,250	.593	2,520	.567	2,410	.543	2,308
(*at the end of 5th year)						
		8,22,720		8,10,010		7,97,108

From the above calculation, it is clear that 12% rate of interest will equate the fair value.
Therefore, 12% is the implicit rate of interest in the lease.
(ii) Present Value of Minimum Lease Payments (12% rate of interest)

Year (Beginning)	Amount of Lease Payments	Present Value of ₹ 1	Present Value of Lease Payments
1	2,00,000	1	2,00,000
2	2,00,000	.893	1,78,600
3	2,00,000	.797	1,59,400
4	2,00,000	.712	1,42,400
5	2,00,000	.636	1,27,200
	10,00,000		8,07,600

It should be noted that the lessee will record the machine at ₹ 8,07,600, although the fair value of the asset is ₹ 8,10,000.

Presentation of the Asset and Liability

Transactions and other events are accounted for and presented in accordance with their substance and financial reality and not merely with their legal form. While the legal form of a lease agreement is that the lessee may acquire no legal title to the leased asset, in the case of finance leases the substance and financial reality are that the lessee acquires the economic benefits of the use of the leased asset for the major part of its economic life in return for entering into an obligation to pay for that right an amount approximating to the fair value of the asset and the related finance charge.

If such lease transactions are not reflected in the lessee's balance sheet, the economic resources and the level of obligations of an enterprise are understated thereby distorting financial ratios. It is therefore appropriate that a finance lease be recognised in the lessee's balance sheet both as an asset and as an obligation to pay future lease payments. At the inception of the lease, the asset and the liability for the future lease payments are recognised in the balance sheet at the same amounts.

It is not appropriate to present the liability for a leased asset as a deduction from the leased asset in the financial statements. The liability for a leased asset should be presented separately in the balance sheet as a current liability or a long-term liability as the case may be.

Initial Direct Cost

Initial direct costs are often incurred in connection with specific leasing activities, as in negotiating and securing leasing arrangements. The costs identified as directly attributable to activities performed by the lessee for a finance lease are included as part of the amount recognised as an asset under the lease.

Apportion of Lease Payments

Lease payments should be apportioned between the finance charge and the reduction of the outstanding liability. The finance charge should be allocated to periods during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Schedule of payments, split between capital and interests is normally available from the lessor.

Depreciation and Impairment

A finance lease gives rise to a depreciation expense for the asset as well as a finance expense for each accounting period. The depreciation policy for a leased asset should be consistent with that for depreciable assets which are owned, and the depreciation recognised should be calculated on the basis set out in Accounting Standard (AS) 6, Depreciation Accounting. If there is no reasonable certainty that the lessee will obtain ownership by the end of the lease term, the asset should be fully depreciated over the lease term or its useful life, whichever is shorter.

To determine whether a leased asset has become impaired, an enterprise applies the Accounting Standard dealing with impairment of assets, that sets out the requirements as to how an enterprise should perform the review of the carrying amount of an asset, how it should determine the recoverable amount of an asset and when it should recognise, or reverse, an impairment loss.

Illustration 4

Lessee Ltd. took a machine on lease from Lessor Ltd., the fair value being ₹ 7,00,000. The economic life of the machine as well as lease term is 3 years. At the end of each year Lessee Ltd. pays ₹ 3,00,000. Guaranteed Residual Value (GRV) is ₹ 22,000 on expiry of the lease. Implicit Rate of Return (IRR) is 15% p.a. and present value factors at 15% are 0.869, 0.756 and 0.657 at the end of first, second and third years respectively.

Calculate the value of machine to be considered by the Lessee Ltd. and the interest (finance charges) in each year.

Solution **Calculation of Present Value of Minimum Lease Payments**

End of	Minimum Lease Payments	Present Value at 15%	Present Value Amount (₹)
1st Year	3,00,000	0.869	2,60,700
2nd Year	3,00,000	0.756	2,26,800
3rd Year	3,00,000	0.657	1,97,100
	(Residual Value) 22,000	0.657	14,454
			6,99,054

Value of machine will be the lower of fair value and present value of minimum lease payment *plus* residual value. Hence, present value of minimum lease payment *plus* residual value is ₹ 6,99,054 but the fair value is ₹ 7,00,000. Therefore, the value of machine will be taken as ₹ **6,99,054**.

Calculation of Interest (Finance Charge)

Year (A)	Balance Due (₹) (B)	Interest @ 12% for the Year (15% of B) (C)	Repayment of Capital (₹ 3,00,000 – C) (₹) (D)	Closing Balance (B – D) (₹) (E)
1st	6,99,054	1,04,858	1,95,142	5,03,912
2nd	5,03,912	75,587	2,24,413	2,79,499
3rd	2,79,499	41,925	2,58,075	*21,424 (Residual Value)

*The difference between this figure and guaranteed residual value (₹ 22,000) is due to approximation.

Illustration 5

On 1.1.2012, X leased a machine from Y on the following terms :

(1) It is to be treated as a finance lease, since substantially all risks and rewards incident to ownership will be transferred by lessor to the lessee.
(2) The ownership of the asset will be transferred to the lessee at the end of the lease period.
(3) The lessee will make ten annual payments of ₹ 33,000 each.

Other information :

(1) The cost of the asset is ₹ 1,78,207, expected life 15 years and scrap value ₹ 37,957.
(2) The cost incurred in installing the machine is ₹ 8,250.
(3) The present value of the minimum lease payments is ₹ 1,86,457 (@ 12% p.a.).
(4) The first instalment is paid on 31.12.2012.

You are required to :

(i) Prepare a complete schedule for 10 years showing the division of lease rent between repayment of capital and finance charge.
(ii) Pass Journal Entries in the books of X for the first three years.

Solution

(i) Statement Showing the Schedule of Payments

Year (A)	Opening balance (B)	Interest @ 12% for the year (12% of B) (C)	Repayment of Capital (₹ 33,000 – (C) (D)	Closing balance [(B) – (D)] (E)

Operating Leases

Lease payments under an operating lease should be recognised as an expense in the statement of profit and loss on a straight line basis over the lease term unless another systematic basis is more representative of the time pattern of the user's benefit.

For operating leases, lease payments (excluding costs for services such as insurance and maintenance) are recognised as an expense in the statement of profit and loss on a straight line basis unless another systematic basis is more representative of the time pattern of the user's benefit, even if the payments are not on that basis.

Leases in the Financial Statements of Lessors

Leases in Financial Statement of Lessor

Finance Leases

An enterprise, e.g., a finance or a leasing company buys an asset from outside with the specific purpose of leasing it to a lessee. The lessor of a finance lease treats the transaction as ***a sale of an asset*** on long-term credit with the assumption that collection of periodic rentals is reasonably certain and there is no uncertainty about the future costs to be incurred with regard to the transaction. Therefore, a finance lease should be recorded in the lessor's Balance Sheet as a long-term ***debtor*** at the amount of the ***net investment in the lease***. Therefore, in the books of the lessor, a physical asset is converted into a non-current financial asset, i.e., debtors.

The lessor should recognise assets given under a finance lease in its balance sheet as a receivable at an amount equal to the net investment in the lease.

Where the cash flows under a finance lease may be predicted with reasonable certainty, the total finance charge should be allocated to different accounting periods during the lease term so as to produce a constant periodic rate of return on the remaining balance. This means to apply the finance charges at a constant percentage on the reducing net investment in the asset being leased.

The recognition of finance income should be based on a pattern reflecting a constant periodic rate of return on the net investment of the lessor outstanding in respect of the finance lease.

The manufacturer or dealer lessor should recognise the transaction of sale in the statement of profit and loss for the period, in accordance with the policy followed by the enterprise for outright sales. If artificially low rates of interest are quoted, profit on sale should be restricted to that which would apply if a commercial rate of interest were charged. Initial direct costs should be recognised as an expense in the statement of profit and loss at the inception of the lease.

Illustration 6

Global Ltd. has initiated a lease for three years in respect of an equipment costing ₹ 1,50,000 with expected useful life of 4 years. The asset would revert to Global Ltd. under the lease agreement.

The other information available in respect of lease agreement are :

(i) the unguaranteed residual value of the equipment after the expiry of the lease term is estimated at ₹ 20,000;
(ii) the implicit rate of interest is 10%; and
(iii) the annual payments have been determined in such a way that the present value of the lease payment plus the residual value is equal to the cost of asset.

Ascertain in the hands of Global Ltd. :

(i) Annual Lease Payment;
(ii) The unearned finance income;
(iii) The segregation of financial income;

Solution

(i) Calculation of Annual Lease Payment
(Assumed to be paid at the end of the year)

	₹
Cost of the equipment	1,50,000
Unguaranteed residual value	20,000
Present value of residual value @ 10% (₹ 20,000 × 0.7513)	15,026
Fair Value to be Recovered for Lease Payment	
Cost of equipment	1,50,000
Less: Present value of residual value	15,026
	1,34,974

Cumulative P.V. for 3 years @ 10% = 2.4868 (See Annuity Table)

Annual Lease Payment = $\frac{1,34,974}{2.4868}$ = **₹ 54,276**

(ii) Unearned Financial Income

Total lease payments (₹ 54,276 × 3)	1,62,828
Add: Residual value	20,000
Gross Investments	1,82,828
Less: Cost of equipment	1,50,000
	32,828

(iii) Calculation of Finance Income

Year	Lease Rentals (₹)	Finance Charges @ 10% on outstanding amount of the year (₹)	Repayment (₹)	Outstanding Liability (₹)
0	—	—	—	1,50,000
1	54,276	15,000	39,276	1,10,724
2	54,276	11,072	43,204	67,520
3	74,276 (Including residual value)	*6,756	67,520	—

* Actual interest is ₹ 6,752. The difference is due to approximation which has been adjusted in finance charge.

Operating Leases

An asset held by a lessor under an operating lease is required to be recorded as a fixed asset because the lessor keeps with himself all the substantial burdens and benefits of ownership.

Para 39 of AS—19 states that ***the lessor should present an asset given under operating lease in its balance sheet under fixed assets***.

Rental income is recognised in the Profit and Loss Account is a revenue to the lessor on a straight-line basis, even if the payments are not received on such a basis. However, if another systematic and rational basis is more representative of the time pattern in which the lessor receives rentals, it can also be used.

Para 40 of AS—19 states that ***lease income from operating leases should be recognised in the statement of profit and loss on a straight line basis over the lease term, unless another systematic basis is more representative of the time pattern in which benefit derived from the use of the leased asset is diminished***.

Para 43 of AS—19 states that ***the depreciation of leased assets should be on a basis consistent with the normal depreciation policy of the lessor for similar assets, and the depreciation charge should be calculated on the basis set out in AS 6, Depreciation Accounting***.

ABC Ltd., a leasing company, purchased a machine for ₹ 1,19,063 and leased that to PQR Ltd. on 1.1.2012. The lease is non-cancellable and the lease period is 4 years. The life of the machine is estimated to be 5 years and the estimated scrap value is ₹ 1,400.

The lessee is entitled to buy the asset at the scrap value at the end of the lease period. The lessee is required to pay ₹ 35,000 p.a. in advance towards the capital repayment and financial charges. The implicit interest rate of the lessor is 12%. Assume that repairs are estimated to be ₹ 2,800.

Pass Journal Entries in the books of both the parties.

Working Note : (1) Depreciation = ₹ 1,19,063 / 4 = ₹ 23,813.

Sale and Leaseback Transactions

A sale and leaseback transaction occurs when an owner sells an asset and immediately reacquires the right to use the asset by entering into a lease with the purchaser—which may be either a finance lease or an operating lease. The original owner of the asset becomes the lessee of a lease agreement and the purchaser, the lessor.

For the purpose of sale and leaseback, the asset is generally sold to a finance or leasing company. The sum of the periodic rentals or lease period is independent of the selling price of the asset and may not represent the asset's fair value. There is no specific problem as far as the lessor is concerned. His net cash investment is the purchase price and that should be equal to the present value of minimum lease payments. In his books, accounting treatments are same as what has been explained previously.

From the lessee's point of view, the accounting problem is at what amount should the asset be recorded in the books and, in effect, when he should recognise a gain or loss from the sale of the asset that is now being used.

As a general rule, the acquisition cost should be considered as the original cost. The present value of minimum lease payments is not considered as the value of the leased asset, since the sale and leaseback are independent. The gain or loss from the sale of such an asset is deferred and recognised depending on whether it is a finance lease or an operating lease. the treatment is consistent with the economic substance of the transaction.

Following steps are to be followed :

(i) If the fair market value is lower than the original cost, the original cost is adjusted to the fair market value—the difference in values is recognised as a loss.

(ii) When sale is recorded, the difference between sale price and the original cost is recognised as unrealised gain or loss.

(iii) When leaseback is recorded the asset under finance lease should be valued at the present value of minimum lease payments.

(iv) The unrealised gain or loss is treated as an extra-cost account and is amortized in the same manner, the asset is depreciation.

Para 48 of AS—19 states that ***if a sale and leaseback transaction results in a finance lease, any excess or deficiency of sales proceeds over the carrying amount should not be immediately recognised as income or loss in the financial statements of a seller-lessee. Instead, it should be deferred and amortised over the lease term in proportion to the depreciation of the leased asse***t.

Para 50 of AS—19 states that ***if a sale and leaseback transaction results in an operating lease, and it is clear that the transaction is established at fair value, any profit or loss should be recognised immediately. If the sale price is below fair value, any profit or loss should be recognised immediately except that, if the loss is compensated by future lease payments at below market price, it should be deferred and amortised in proportion to the lease payments over the period for which the asset is expected to be used. If the sale price is above fair value, the excess over fair value should be deferred and amortised over the period for which the asset is expected to be used***.

Para 52 of AS—19 states that ***for operating leases, if the fair value at the time of a sale and leaseback transaction is less than the carrying amount of the asset, a loss equal to the amount of the difference between the carrying amount and fair value should be recognised immediately***.

Illustration 9

ABC Ltd. makes a special purpose machine for its own use, the fair market value of which is ₹ 61,000. Under a sale and leaseback agreement, it is sold to PQR Ltd. on 1.1.2013 for ₹ 69,902 and leased back for its entire expected life of 4 years. The implicit rate of interest for the lessor is 12%. The total lease rental is payable in 4 equal instalments of ₹ 23,014 starting from 31.12.2013. The asset has no salvage value and ABC Ltd. follows straight-line method of depreciation. The construction cost recorded in the books is ₹ 58,800.

Pass Journal Entries in the books of ABC Ltd. for the first two years.

"	Profit and Loss A/c To Depreciation A/c To Interest A/c (Being depreciation and interest charged to Profit and Loss Account)	Dr.	21,333	 14,700 6,633

Working Notes :

(1) Depreciation = ₹ 58,800 / 4 = ₹ 14,700.

(2) Unrealised Gain under Sale and Leaseback to be adjusted = ₹ 11,102 / 4 = ₹ 2,775 (approx.)

KEY POINTS

- **Lease** : A lease is an agreement whereby the lessor conveys to the lessee in return for a payment or series of payments the right to use an asset for an agreed period of time.
- **Finance Lease** : A finance lease is a lease that transfers substantially all the risks and rewards incident to ownership of an asset.
- **Operating Lease** : An operating lease is a lease other than a finance lease.
- **Non-cancellable Lease** : A non-cancellable lease is a lease that is cancellable only upon the occurrence of some remote contingency; or with the permission of the lessor; or if the lessee enters into a new lease for the same or an equivalent asset with the same lessor; or upon payment by the lessee of an additional amount such that, at inception, continuation of the lease is reasonably certain.
- **Fair Value** : Fair value is the amount for which an asset could be exchanged or a liability settled between knowledgeable, willing parties in an arm's length transaction.
- **Contingent rent** is that portion of the lease payments that is not fixed in amount but is based on a factor other than just the passage of time (e.g., percentage of sales, amount of usage, price indices, market rates of interest).
- An **operating lease** is a lease which is not a finance lease. It is of a short-term nature — assets are generally leased

THEORETICAL QUESTIONS

1. What is a lease ? What are the types of leases ?
2. Distinguish between finance lease and operating lease.
3. State the methods of accounting for finance lease and operating lease.
4. What is sale and leaseback agreement ? How they are accounted for in the books of lessor and lessee ?
5. How should finance leases be prepared in the financial statement of lessor and lessee ?

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each sentence or answer each question below.

1. A lease that transfers substantially all the risks and rewards incident to ownership is called
   A finance lease
   B operating lease
   C none of these.
2. Residual value of a leased asset is the estimated fair value of the asset at the end of the
   A economic life of the asset
   B lease term
   C none of these.
3. A lease is generally
   A cancellable
   B non-cancellable
   C none of these.

4. Lease payments under an operating lease should be recognised as an
   A expense
   B asset
   C none of these.
5. The lessor should present an asset given under operating lease in its balance sheet under
   A current assets
   B fixed assets
   C none of these.

PRACTICAL QUESTIONS

1. X and Company leases an asset on a non-cancellable lease contract with a lease term of 5 years from 1.1.2012. The rental is ₹ 35,000 p.a. payable in advance. The leased asset could have been purchased for cash, at the start of the lease for ₹ 1,04,250. X and Company is required to pay all maintenance and insurance costs as they arise, which are estimated to be ₹ 15,000. The lessee estimates that the asset will have a useful life of 8 years. The guaranteed and unguaranteed residual value at the end of the lease term is ₹ 15,000 and ₹ 10,000 respectively.
   Pass journal entries in the books of both the parties. Show your workings clearly (make assumptions, where necessary).
2. ABC Manufacturing Company has entered into an agreement with a finance company, to lease a machine for a 4-year period. Under the terms of the agreement, the machine is to be made available to ABC Manufacturing Company on 1.1.2013, when an immediate payment of ₹ 1,50,000 has to be made, followed by seven semi-annual payments of an equivalent amount.
   The fair value of the machine on 1.1.1999 is ₹ 9,60,000. The estimated life of such machines is 4 years. ABC Manufacturing Company can borrow money from the bank @ 18% p.a.
   ABC Manufacturing Company has a policy of depreciating the machines in this type that it owns over a 4-year period on a straight-line basis.
   You are required to :
   (i) prepare a complete schedule for 4 years showing the division of lease rent between repayment of capital and finance charge.
   (ii) pass journal entries in the books of both the parties for the lease term.
3. PQR Manufacturing Company, whose accounting year is 31st December, has acquired two items of machinery on leases, the terms of which would mean that they should be treated as finance leases.
   The details are as under :
   Item A
   10 annual instalments of ₹ 1,00,000 each, the first payable on 1.1.2012. The machine was completely installed and first operated on 1.1.2012 and its purchase price on that date was ₹ 8,00,000. The machine has an estimated useful life of 10 years at the end of which it will be of no value.
   Item B
   10 annual instalments of ₹ 1,50,000 each, the first payable on 1.1.2014. The machine was completely installed and first operated on 1.1.2016 and its purchase price on that date was ₹ 16,70,000. The machine has an estimated useful life of 12 years at the end of which it will be of no value.
   You are required to pass necessary journal entries.

Guide to Answers

Farm Accounting

A farm is an area of land (and/or water), together with appropriate buildings, where crops are grown or animals are reared for commercial purposes. Therefore, farming activities mainly consist of growing crops and rearing livestock. Crop is any group of plants grown by people for food or other use. Livestock is an asset consisting of fish, animals or birds. It is usually applied to an agricultural business to refer to cattle, pigs, sheep etc.

Farm accounts are accounts giving the results of farming activities. They are intended to keep a record of each farming activity to ascertain the cost and profit/loss of each such type of activity.

Farming transactions are recorded mostly on cash basis. If the size of the farming business is small, it may not be necessary to follow the double entry principles of accounting. The books of account can be maintained under single entry system with a proper record of receipts and payments of cash. If the activities are large, transactions should be recorded under double entry principles like any other business. But, there are special problems concerned with the valuation of growing crops, marketable produce and livestock. Marketable produce may be valued at its ***net realisable value*** rather than cost. In effect, the profit on it is included in the accounts for the accounting year in which it is produced. This is justified by the certainty attaching to many market selling prices. Livestock may be valued on the ***Herd Basis***. *Herd* means a large number of domestic animals, especially cattle, often of the same breed, that are kept, driven or reared together. Herd basis allows for developing value as animals mature and new ones are born. Use of this basis allows the farmer to treat a collection of animals of the same type as a fixed asset. The alternative would be to treat each animal separately and thus to determine the profit/loss on the occasion of each disposal.

Khetibari Farm presents the following balances for the year ended 31.3.2015 :

Particulars	₹	Particulars	₹
Agricultural Equipments	18,00,000	Land	25,00,000
Capital	45,00,000	Cash and Bank	90,000
Debtors	6,40,000	Loan from Bank	10,00,000
Opening Stock of Crops	5,00,000	Opening Stock of Fertiliser	2,20,000
Opening Stock of Livestock	4,00,000	Sales of Livestock	11,00,000
Purchase of Livestock	2,30,000	Farm Workers' Wages	1,60,000
Farmhouse Electricity	30,000	Farm Manager's Salary	1,20,000
Livestock Feed Purchase	4,70,000	Sales of Crops	22,50,000
Creditors	90,000	Administrative Expenses	40,000
Interest	1,20,000	Crop Insurance	40,000
Farmhouse	6,80,000	Purchase of Fertiliser	6,00,000
Crops Processing Expenses	3,00,000		

Depreciation is to be charged on agricultural equipment @ 10% p.a.; and on farm house @ 5% p.a. The former is to be borne fully by the crops section while the latter is to be equally shared by the crops section and the livestock section.

Livestock section is to bear 25% of all manpower cost. During the year, crops worth ₹ 50,000 were used as livestock feed. Farmhouse electricity is to be shared equally by the two sections.

The closing stock of crops, fertiliser, livestock and livestock feed amounts to ₹ 2,00,000; ₹ 2,40,000; ₹ 3,20,000 and ₹ 20,000 respectively. Loan from bank is used for crops section and livestock section in the ratio of 2 : 1 respectively.

Prepare the Crops and Livestock Account, and Profit and Loss Account for the year ended 31.3.2015 and the Balance Sheet as on that date.

THEORETICAL QUESTIONS

1. What is a farm ? What are farm activities ?
2. What special problems may arise while valuing closing stock in farm accounting ?
3. Explain what do you mean by Herd Basis ?

PRACTICAL QUESTIONS

1. From the information given below, ascertain gross profit / loss from each of the following activities :
   (a) mushrooms; (b) poultry; (c) dairy; (d) crops.
   Also, ascertain the net profit / loss of the firm for the year ended 31.3.2015.
   (i) (figures in ₹)

Date	Fertilisers	Mushrooms	Poultry	Poultry Feed	Cattle	Cattle Feed	Crops	Growing Crops	Seeds
1.4.2014	24,000	5,000	30,000	8,000	6,30,000	16,000	84,000	62,000	10,800
31.3.2015	32,000	7,400	70,000	16,000	8,04,000	15,000	1,10,000	86,000	9,000

(ii) Purchases made during the year ended 31.3.2015 — Fertilisers ₹ 70,000; Mushroom seeds ₹ 10,400; Poultry ₹ 1,10,000; Poultry feed ₹ 35,000; Cattle ₹ 2,40,000; Cattle feed ₹ 35,000; Seeds ₹ 15,600.

(iii) Expenses incurred during the year ended 31.3.2015 — Wages ₹ 75,600; Repairs ₹ 3,800; Insurance ₹ 7,400; Bank interest ₹ 16,600.

(iv) The owner has withdrawn the following from the farm — Milk ₹ 6,400; Butter ₹ 1,400; Eggs ₹ 1,400; Crops ₹ 10,000; Vegetables ₹ 1,600; Fruits ₹ 400; Poultry ₹ 2,200.

(v) Depreciation to be charged on farm equipments ₹ 5,000.

(vi) Sales made during the year ended 31.3.2015 — Vegetables ₹ 17,000; Mushrooms ₹ 18,000; Crops ₹ 2,04,000; Fruits ₹ 18,000; Flowers ₹ 12,000; Milk ₹ 95,000; Eggs ₹ 56,000; Butter ₹ 25,400; Cattle ₹ 90,000; Poultry ₹ 82,000.

2. From the following Trial Balance and additional information, prepare farm accounts for the year 2014 :

Particulars	Dr. (₹)	Cr. (₹)	Particulars	Dr. (₹)	Cr. (₹)
Capital	—	1,90,000	Expenses : Crop — Labour	7,800	—
Opening Stock : Fertilisers	8,600	—	Direct costs	800	—
Paddy	30,000	—	Cattle — Labour	6,000	—
Cattle	60,000	—	Medicines	1,800	—
Cattle Feed	4,000	—	Dairy Expenses	2,200	—
Loan @ 8% p.a. (taken on 1.1.2012)	—	24,000	Equipments	46,000	—
General Expenses	2,400	—	Buildings	1,40,000	—
Purchases : Fertilisers	1,300	—	Sales : Paddy	—	65,000
Seeds	12,000	—	Cattle	—	15,000
Cattle	6,400	—	Dairy Products	—	36,000
Cattle Feed	1,600	—	Cash	14,000	—
Creditors	—	14,900	**TOTAL**	3,44,900	3,44,900

Additional information —

(1) Depreciation @ 10% p.a. is to be provided on equipments.

(2) The owner has consumed the following for personal purposes — Paddy ₹ 2,000; Dairy products ₹ 4,000.

(3) Closing Stock— Fertilisers ₹ 600; Paddy ₹ 4,600; Cattle ₹ 66,000; Cattle feed ₹ 1,600.

Guide to Answers

Practical Questions

1. **Gross Profit : Mushrooms ₹ 10,000; Poultry ₹ 44,600; Dairy ₹ 1,16,200; Crop ₹ 2,33,600; Net Profit : ₹ 2,96,000.**
2. **Gross Profit : ₹ 51,500; Net Profit : ₹ 43,380; Balance Sheet total : ₹ 2,68,200.**

Introduction to Indian Government Accounting

Commercial Accounting and Government Accounting

Commercial accounting pertains to a firm, which is a ***production unit***, as per its economic definition. A firm may be known by different names as per its form and character — a joint stock company or a partnership or a single-owner entity. It is to be remembered that in India, a firm is a partnership, while a corporate body is a company. The production unit or the firm carries on its operations with an eye on profit-maximisation. Indeed, it is the chief motivation of a commercial enterprise. Necessarily, the accounts of a firm are directed to this end, i.e., profit-maximising, and to pointing out the loopholes in the pursuit of its objectives and indicating albeit indirectly, reasons for them. To put it another way, commercial accounting reflects upon financial management in so far as it falls short of its objective — that of earning maximum profit.

A government is, on the other hand, an agency of the state, carrying out its ideals and objectives through positive functions. A state exists to promote good life, as observed by Aristotle. This maxim is indeed eternal — a state is and should be there for giving its population a taste of good life, rather better and better life. What Aristotle implied by good life has been conceptualised by the economic concept of welfare (or well-being). Thus, the state exists to promote welfare, i.e., it strives to give its citizens a better and better quality of life. How it should be done is decided by the government, which in a democracy consists of representatives of the people. The government decides for itself the catalogue of functions for securing the above objective — promotion or welfare of the people — which, of course, varies from time to time as dictated by the situation.

To be able to discharge its catalogued functions, the government has to raise money and to spend it as per dictates of the representatives of the people. This is what is broadly called ***financial administration***, and herein comes the role of government accounting, which points out any aberration and also by its analysis, a better course of action. To reiterate, while profit-maximisation is the motive of a firm, maximisation of welfare is the objective of the state. This broad difference in the source of motivation enumerates the differences between commercial accounting and government accounting. For example, the idea of loss is never entertained by a commercial entity, while the government may have to run a service at a loss for public welfare. Thus, government accounting may be directed to a loss-minimisation, which is never the charge of commercial accounting except in the short run.

We may now enumerate the broad differences between government accounting and commercial accounting.

(1) Accounting Methods

A commercial enterprise generally prepares the following ***two basic*** statements:

(a) Profit and Loss Account — to ascertain the profit earned or loss incurred during an accounting period.

(b) Balance Sheet — to ascertain financial position of the business as on the last day of the accounting period.

Again, the purpose of commercial accounting is to ascertain profit or loss for an accounting period, which usually has numerous financial transactions on behalf of the business unit. The essential idea behind maintaining books of account is to show the correct position regarding each head of income and expenditure. A commercial entity maintains a permanent record of each transaction of the business and shows its financial effect on the enterprise. Thereafter, the combined effect of all the transactions made during an accounting period upon the financial position of the business as a whole is ascertained. Therefore, commercial accounting includes not only the maintenance of accounting records, but also the preparation of financial and economic information which involves the ***measurement of transactions*** and other events pertaining to a business. To operate a business profitably and to keep it solvent, its profitability and solvency should be measured at regular intervals. For this, it is essential to know whether a business is earning sufficient profits or incurring losses and if it has sufficient money to pay off its debts. Commercial accounting provides all this information which enables the management to guide the business along a profitable and solvent course.

The first point to note is that government accounts are mostly kept on a cash basis. The reason for this can be well comprehended from the nature of government functions. A government has to decide upon its range of activities first and then decide how to get the money for it — through taxation, borrowing or deficit financing. Thus, the government decides the size of the coat first and then proceeds to gather the necessary cloth through methods so chosen as to put the least burden on the community. Imposition of ***least burden*** is the first directive principle of government finance.

Besides the state, of whom government is an agency, is regarded as a vast benefit club. Necessarily, it does not have a profit motive. Indeed, it is not after profit-making except in public-commercial enterprises. Even in some of these enterprises, it may run services or produce goods at a loss for promoting the welfare of the people (for example supplying electricity in sparsely populated areas or running hill railways). Hence, the saying:' It may pay a government to run a service at a loss'.

Since profit motive is absent, the Profit and Loss Account is rarely prepared for the government (except, of course, in the case of certain listed public enterprises). It is thus not important for the government authorities to know how much they are likely to accrue in the future. What is more important for them is to ascertain how much cash they may draw upon for the socially oriented activities the government has decided to carry on or expand. Thus, ***cash basis accounting*** becomes the norm for government finance.

(2) Financial Statements

As pointed out earlier, every commercial enterprise prepares a Profit and Loss Account and a Balance Sheet. While the Profit and Loss Account serves as a report that summarises the revenues and expenses of an accounting period to reflect the changes in various critical areas of firm's operations, the Balance Sheet shows the financial position of a business by detailing the sources of funds and their utilisation.

But in case of government accounting, most of the transactions are recorded on the ***single entry basis***. The following two statements are generally prepared:

(a) Government Account — to show the net result of all incomes and expenditures including expenditure on capital account; and

(b) Statement of Balancing Accounts — to show whether the government owes or has to receive money.

Government accounts are maintained strictly on a ***cash basis*** as contrasted to commercial accounting which maintains accounts on ***mercantile basis***.

(3) Classification of Account Heads

In a commercial enterprise, for the purpose of analysis and record, accounts are broadly divided into four classes — real, nominal, personal and valuation. But in the case of government accounting, this classification becomes much wider than in that of commercial accounting. Though government accounting broadly comprises three categories of accounts, each category is subdivided into major heads of account. Also, major heads are further subdivided into minor heads and so on. This process is continued till the preparation of detailed heads of account. The three main accounts are: (i) consolidated fund; (ii) contingency fund; and, (iii) public accounts. The consolidated fund is again classified into : (i) Revenue and Expenditure Heads; (ii) Capital Receipts and Disbursement Heads; and (iii) Public Debt and Loans and Advances. Public Account is also divided into: (i) Debt and deposit division; and (ii) Remittance division.

Objectives of Government Accounting

Accounting is very important in a democracy where people have a right to know how government finances are being managed by their representatives. This knowledge enables them to have faith in their representatives or substitute them by new ones. The above role of government accounting may be discussed separately as following:

(1) Information about Revenue

Revenue of the government is of vital importance in so far as it has a bearing on the pockets of the people. The pockets should be touched only to the extent welfare is promoted. Whether this rule is being observed is indicated by the accountant's analysis and collection.

Government revenues are classified into (a) tax revenues and (b) non-tax revenues. Information about both the types has to be sufficient to enable the government to decide which way to stretch its arms next year or withdraw them to the needed extent. Gone are the tyrannical days of government. Today, it has to meet the people's directive, and the directive is for general well-being. By providing information about revenue in detail, government accounting enables the people to form their idea about the directive to be given.

(2) Information about Expenditure

After revenue information, government accounting seeks to provide information on different expenditures. This is rather mandatory in nature in view of the fact that expenditure sanctioning authorities like the legislature have a right and really want to know whether expenditures have been made as per sanctions. It is to be noted that expenditure of public money raised through taxation and borrowing etc., is sanctioned by the representatives of the people who compose the legislature.

(3) Information about Loans and Deposits

As already indicated, public money consists of loans, deposits and other receipts besides tax revenue. Public borrowing is rather inevitable. Likewise, governments also lend money to different parties, individual or otherwise. These loans and deposits must be fully displayed in government accounting so as to provide information to the legislature who authorises the raising of money through this method .

(4) Information about Cash Availability

Finances are raised through taxation and borrowing and other methods throughout the year, while expenditures are also incurred perennially. Thus, there may exist a gap between cash receipts and cash availability at any given time. Those who are authorised to make expenditures must be made aware of this. And, it is the function of the government accounts to provide information about this. This information also encompasses ***bank reconciliation***.

Some Terms and Expressions of Government Finance

In government finance one often comes across certain expressions which are unfamiliar in private accounts parlance. They are: (a) demand for grant; (b) supplementary grant; (c) treasury; (d) votable and non-votable items; (e) Public Accounts Committee; (f) Comptroller and Auditor General of India, etc. These are discussed below :

(a) Demand for grant : A basic principle of government finance is that no expenditure can be made by any public authority without parliamentary sanction, and the public authority has to request the parliament for such sanction. It is this request which is called demand for grant. The demand may be granted, refused or reduced. A refusal or reduction may jeopardise the legitimacy of the government in a parliamentary democracy, if it is taken as an expression of no-confidence in it.

(b) Supplementary grant : Normal grants are demanded at the time of presentation of the budget, but the amount granted may be found inadequate at some later date. A supplementary demand for grant may then be made. For example, the amount rated for drought relief may be found inadequate because of prolonged failure of the monsoons; and then an additional grant may be requested by the ministry. If granted, this becomes a supplementary grant for drought relief.

(c) Treasury : It is a term adopted from the British financial system. In simple language, it means the place where all government monies are treasured for the purpose of public payments. In Britain, the prime minister is also the first Lord of the Treasury, i.e., the head of government pay office. In India, there is no central treasury as such, but there are district treasuries in the states. There are sub-divisional treasuries too in some cases, which are called sub-treasuries. These treasuries are for making public payments. Normally a branch of the State Bank of India or a nationalised bank is attached to the treasury which together function as "government pay office".

The treasury system is being increasingly phased out in this country and the vacuum is being filled up by the State Bank or by state associated banks.

(d) Votable and non-votable items : Certain items of expenditure are charged to the consolidated fund or the Public Account. They are to be incurred regardless of legislative approval. They are called non-rateable items or items charged.

Other items are votable and expenditures thereon can be made only after parliamentary sanction. The government makes the demand for grants for these items of expenditure. This demand may be reduced or even rejected but in the case of non-votable items, it can just be debated and nothing more.

(e) Public Accounts Committee : This is a committee of parliament or of state legislature to scrutinise expenditures of public monies by the executive branch of the government. No minister can be a member of this committee, nor a member of the party in power. In other words, it consists of the opposition members who are to check whether the expenditures have been made according to the form and norms laid down by the legislature. Any deviation reported to the Comptroller and Auditor General of India also is brought to the notice of the House. But, scrutiny by the Public Accounts Committee is, at best, in the nature of a post-mortem. The omissions of the government are brought into focus after they have been committed. Yet, it helps build public opinion about the government, which is very important in a parliamentary system like ours.

(f) Comptroller and Auditor General of India : Legislative control over the purse of the nation is one of the basic principles of parliamentary form of government that obtains in this country as well as in Britain and other commonwealth countries. This control is exercised through different modes and agencies, the chief agency being the Comptroller and Auditor General of India (CAGI).

Thus, following the British practice, the constitution of India provides for CAGI under articles 148 – 150.

The CAGI is appointed by the president but is removable only by impeachment in the same manner and on the same grounds as a judge of the supreme court or a high court.

The duties, powers and functions of CAGI are varied, as given below :

(1) He is to advise the President on the form in which account of both the centre and the states are to be kept.

(2) He is to check that the amounts granted or authorised by the legislatures have been properly spent.

(3) He is to submit his audit reports to the president and to the state governments, who in their turn, have to place them before their respective legislatures.

(4) The CAGI is an important institution in government finance, nay, for that purpose, of any parliamentary finance.

Basic Principles of Government Accounting in India

Government accounting in India largely follows the British pattern. The following points are relevant in this regard.

(1) Pinpointing Responsibility

The Indian audit and accounts department, which functions under the aegis of the CAGI, is responsible for maintaining all government accounts except of railways, defence and transactions made outside the territorial limits of the country. Of late, a tendency of maintaining accounts departmentally is also being witnessed.

(2) Accounting Systems

Normally, the government follows the single entry system of keeping accounts. But in certain matters, such as loans and borrowings, the double entry system is also pursued. The reason behind this is to ascertain the exact balance. Books are kept with a view to preparing a trial balance for correcting errors.

(3) Public Sector Commercial Enterprises

The system of double entry book keeping on accrual basis is followed in respect of public sector commercial enterprises. The Profit and Loss Account and the Balance Sheet are prepared for the undertakings. But other appropriate management accounting techniques like cash and fund flow statements, ratio analysis, budgetary control, etc. are also resorted to for cost control and thus for profit effectiveness.

(4) Recording and Consolidation of Transactions

In government accounting system, transactions are initially recorded in different account and then consolidated in such a way as to display the combined results during the period in question. For example, expenditures under the head contingencies are first recorded, consolidated and then so analysed as to show the splitting-up under the different heads.

(5) Incomes and Expenditures Classifications

It is customary for the government to classify services under different heads and then sub-classify these services according to their essential natures. For example, government activities, as in our central budgets, are classified into: (i) general services; (ii) social services; (iii) economic services, and (iv) grants-in-aid and contributions.

The general services are further classified into: (i) administrative services; (ii) defence services; (iii) servicing of debts; and (iv) fiscal services; and so on.

Likewise, revenues are classified into: (i) tax revenue; and (ii) non-tax revenue.

Tax revenue, again, consists of: (i) taxes on incomes and expenditures; (ii) taxes on property and capital transactions; and (iii) taxes on commodities and services.

Following the same pattern, non-tax revenue is split-up into: (i) fiscal services; (ii) interest receipts (from the state governments, public sector projects, the corporate sector or from the individual); (iii) dividends and profits, and (iv) those designated as social services.

The classification proceeds further — each item is classified into major heads, then minor heads and, lastly into subheads.

(6) Maintaining Internal Accounts

Every paisa of the public money is to be accounted for. The function of recording each transaction and maintenance of internal accounts is a job of the department through which transactions take place. The job also may be centralised in the treasury in a small country. (such centralisation is not quite possible in a vast country with huge transactions, like our own).

(7) Combined Accounts

Federal though it may be, the government is normally viewed as a single whole. Incomes and expenditures of the government as a whole are a matter of interest and concern for all the citizens. A consolidated account of the incomings and outgoings needs to be prepared for popular scrutiny and review. In India, this is done by the accounts and audit department, which largely functions under the aegis of the CAGI, which is a constitutional authority for overseering the purse of the nation.

In some cases, however, consolidated budgets of the states are separately shown from that of the centre [refer Reserve Bank Bulletin or the Economic Survey].

Government Financial Administration

As an army marches on its stomach, so does a government on its revenues and receipts. Gone are the days of autocracy when the government authorities could make any expenditures they liked and in any amounts. Today, in a democracy, in particular, they have to raise money and expend them in accordance with certain norms fixed by popular opinion. And in matters of expenditure in particular, government is accountable to the people. This is called ***public accountability***. In other words, government has to convince the people through their chosen representatives in the legislature that monies have been spent for the purposes of which they were raised. These requirements make what is called the system of financial administration, format of which varies in detail from country to country but broadly is of the same shape and nature in all democracies.

In India, the system of financial administration follows the British pattern inasmuch as it has been a British legacy. It may be analysed thus:

(1) Consolidated Funds

In the federal system of government prevailing in India, there is a consolidated fund for the centre and for each of the states. To this fund all monies raised and received through taxation, borrowings, etc., are credited, and from this, all expenditures are met as per authorisation of Parliament at the centre and Legislatures in the states.

(2) Contingency Funds

Besides the consolidated funds, there is a contingency fund both for the centre and for each of the states.

The difference between the two is as follows:

To the consolidated fund, all monies received in the normal way are credited and all normal expenditures are defrayed therefrom. On the other hand, the contingency fund remains at the disposal of the President or the Governor, as the case may be, to enable the respective governments to meet expenditure in contingencies like war, earthquake, flood, etc., pending authorisation by parliament or the legislatures.

(3) Public Accounts

Like any individual a government has to have its own account, which is called Public Account. To this account are credited all money receipts as per fixed norms and rules.

(4) Budget

It is one of the basic principles of financial administration in a democracy that all money receipts and expenditures have to be budgeted and sanctioned. This means that estimates of expenditures are made, consolidated and classified and expenditure incurred for each of the heads as per legislative sanction. It is to be noted here that without legislative sanction neither a paisa can be raised through taxation or borrowing, nor can it be spent on any account, except from the Contingency Account, in which case no sanction is necessary.

Thus a budget — proposal for raising money and for making expenditures — must be passed by the legislature, which consists of people's representatives. In India, the formal name of the budget is Annual Financial Statement, of the Central Government or of a state government, as the case may be.

The budget has to be presented before Parliament or a state legislature before 31st of March, which is the last day of the financial year, also simply called the fiscal.

The budget has to display:

(a) The monies that are charged upon the Consolidated Fund in each case. In the case of the Centre, the sums in connection with the office of the President, the Vice President, the Supreme Court Judges etc. are charged upon the Consolidated Fund of India. This means they are to be appropriated from the Consolidated Fund without any Parliamentary approval. Members of Parliament may just discuss the proposals for these expenditures but can neither reject nor reduce any sum of this nature asked for.

(b) Other expenditures are to be made ***out of the consolidated fund*** as per parliamentary sanction. Parliament may sanction, reject or reduce any sum asked for by the government through the budget proposal.

It is to be noted that in all financial matters it is the Lower House or the Lok Sabha which is supreme. The Upper House or the Rajya Sabha may discuss, debate, propose but cannot impose any modification in a budget proposal.

The budget is normally presented by the finance minister at both levels of the government — the central and the state.

(5) Appropriation Act

Parliamentary or legislatory approval of budget proposal does not authorise the government to proceed with its expenditures immediately, for which purpose an Appropriation Act has to be passed. This means that the executive branch of government has to be authorised through this Act to make expenditures as per parliamentary approval. This is why, immediately after the presentation of the budget, at both layers of government, Appropriation Bills are introduced and when a bill is passed, it becomes an act — the law enabling the government to make expenditure lawfully.

(6) Disbursement of Grants

The Appropriation Act formalises appropriation for the purpose of expenditure to each of the ministries or departments of the government. In other words, parliament or the legislative assembly okays the grants for each of the government departments. When this is done, it is communicated to them and, they can then make expenditures within the sanctioned limits for their own purposes.

(7) Supplementary Budget

Sometimes, after the expiration of a period of time, it is found that monies sanctioned in the original budget have become or are going to be inadequate for the entire fiscal (financial year). In such cases, supplementary budgets are presented for obtaining parliamentary or legislative sanction.

(8) Financial Control and Audit

That the monies are spent as per legislative authorisation is overseen by the Comptroller and Auditor-General of India, who is an important officer of the parliament. Of late, he has somewhat relaxed his control over state finance. Yet, both the central and the state financial administration remain under his overall control. But his analysis and report are largely of the nature of a post mortem examination — they are done after the expenditures have already been made and prevention is not possible. Yet, the Comptroller and Auditor-General reports (CAG reports) are in the nature of both reflection and caution, seeking to keep the government within the four walls of parliamentary sanction. In a popular government, this is very important, no doubt.

Classification of Government Accounting in India

For a specific treatment of government accounts in India, the constitution of India has clearly provided for three funds or accounts:

(1) The Consolidated Fund of India;
(2) The Public Account; and
(3) The Contingency Fund of India.

Each of them will perhaps bear a word of exposition.

(1) Consolidated Fund of India

There is both for the centre and each of the states, a consolidated fund to which all incomes received by the government are credited. These income comprise all revenues, (i) tax or non-tax; (ii) all short-term loans like the Treasury Bills and ways and means, and (3) moneys received by the government in repayment of loans its had advanced previously.

Certain expenditures like the salaries and allowances of the President, the Chief Election Commissioner, the Comptroller and Auditor General of India, the Supreme Court charged upon it, i.e.,they have to paid out of regardless of legislative sanction. They are described as non-rateable items of expenditure.

In the case of states, salaries and allowances of the governor, and the high court judges etc. come under this category. Except these charged items of expenditure, all the other votable items have to be appropriated out of the consolidated fund through financial legislation passed by parliament or the state legislatures.

It is for the audit and accounts department of the government of India to record the amounts thus drawn and to scrutinise that they have been lawfully appropriated.

(2) Public Account

To the public account are deposited all the monies raised through loans (other than short-term advances through the Treasury Bill procedure, etc.) which go to the Consolidated Fund. To be precise, Public Account consists of money raised through loans, advances and deposits for which the government undertakes the liability of refunding at some future date. Some of the money receipts like the provident fund or deposits in the ***panchayat*** may initially be kept in the Remittance and Suspense Account for final remittance to the Consolidated Fund or for retaining by the public account itself.

(3) Contingency Fund

This fund is for meeting contingencies like earthquakes, floods, foreign aggression, etc. Theoretically, the fund remains at the disposal of the President in the case of the centre, and the Governor, in the case of a State. They can authorise appropriation from the fund to meet contingencies, pending approval by the Parliament or the state legislature.

Accounting Procedure of Government Expenditure

The form in which government accounts are to be kept is decided by the President in consultation with the Comptroller and Auditor-General of India. The pattern has to be uniform both for the centre and the states.

The Constitution of India provides that an Annual Financial Statement, popularly called the budget, is to be laid before Parliament in the case of the centre, and in the case of states, before their respective legislatures. This has to be passed by them before the next fiscal year (1st April of the current year to 31st March of the next calendar year). It is the approved budget that authorises the executive branch of the government to incur expenditure out of the consolidated fund. For this purpose, Appropriation Bills are introduced by the executive for being passed by the legislatures. If the Appropriation Bill is not passed, the government will be unable to incur any expenditure and, thus, its smooth functioning will be jeopardised.

The basic procedure principle is to put down all government expenditures in the three funds viz., the consolidated fund, the contingency fund, and the public account.

(1) Consolidated Fund

It is a broad head consisting of three divisions: (a) revenue division, (b) capital division, and (c) public debt division.

(a) Revenue division In the revenue division are accorded all receipts from taxes and other sources and all expenditures therefrom. When the receipts and expenditures do not balance (as normally they do not) the division exhibits either deficit or surplus during the (fiscal) year concerned. The following heads comprise the revenue receipts: (i) ***tax revenues*** : as per budgetary classification, all taxes on income and expenditure on property, on capital transactions and on commodities and services; and (ii) ***non-tax revenues*** : all interest receipts, dividends and profits, charges for fiscal services and grants-in-aid and contributions. On the expenditure side, the classification is as follows:

(a) General services : The following comprise the general services: administrative services, defence service, and servicing of loans and debts.

(b) Social services : Social services head consists of education, sports and games, health and family welfare, information and broadcasting and also arts and culture. These services are basically intended to improve the quality of social life.

(c) Economic services : Economic services consists of those which are directed to contributory economic life of facilitating production, or providing infrastructure for it. Agriculture and allied activities, power generation, transport and communication come under this head.

(d) Grants-in-aid and contributions : All grants-in-aid and contributions in all forms are made from the consolidated fund. Consequently, they constitute an important expenditure head under revenue division. Of course, the head is of more importance for the centre than for the states inasmuch as the states do not defray much expenditure as grants-in-aid though they make some contributions now and then.

(b) Capital division As can be well guessed, capital division consists of capital receipts and capital expenditures. Capital receipts are receipts of a capital nature, i.e., sums received all at once such as from discarded assets like plants and machinery. Capital expenditures consist of those long-run costs incurred either for increasing tangible capital assets or for reducing recurring liabilities thereon. For example, commutation of pension is an instance of capital expenditure. It reduces pension payment liability in the future and its expenditure on a new implement reduces the cost of running a project.

(c) Public debt Public debt is a broad category in so far as it includes all loans raised by the government from the public, and all loans and advances taken by it from the central bank and other statutory authorities. Hence, this division of public debt goes under the name of public debt, loans and advances division. It consists of all loans raised, taken and granted as also all advances obtained and granted. Since they are all loans, they are concerned with repayment or recovery, as the case may be. Transactions under this division are grouped into sections, which again are subdivided into major heads of account, then into minor heads, subheads and so on.

Furthermore, the heads of expenditure under each of these heads and subheads are classified as ***charged*** and ***voted***. ***Charged*** are those which are to be incurred and, therefore, charged on the consolidated fund of India. On the other hand, ***voted*** are those items, which may not be incurred or at least as per demands made by the executive. Whether charged or voted, any expenditure from the consolidated fund can be made after authorisation by the legislature — the central parliament or the state legislature.

(2) Contingency Fund

Expenditures under contingency fund require authorisation after they have been met. This fund is at the disposal of the President in respect of the centre, and of the Governor in a state. These functionaries are authorised to expend from the fund concerned to meet contingencies pending final authorisation by the legislature concerned. Necessarily, this final authorisation is in the nature of a post mortem approval or compulsory ***ex-post facto*** legislation.

(3) Public Account

Public account is in no way related to the capital division of the consolidated fund. The former consists of all monies received by or on behalf of the government outside of the consolidated fund. This account consists of two main divisions: (i) debt and deposit division; and (ii) remittance division.

(i) Debt and deposit division This division consists of all liabilities of the government in the shape of debts and loans, and of all refundable deposits such as earnest money and court deposits.

(ii) Remittance division This division is concerned with remittances from one head to another or from one place to another with a view to making adjustments among accounting circles.

Since the division deals with adjustments alone, approval of the legislature is not necessary for making payments on public account.

A Point to Note

An important point to note in respect of classification of government expenditure is that the manner in which it is done has a closer reference to the department incurring a particular expenditure than to the object for which it is done. It is the President in the case of the centre and the Governor in the case of a state, who orders, in consultation with the Comptroller and Auditor-General of India, how the transactions are to be classified. Here, consultation may be taken to mean 'on the advice of'. Thus, classification of the transactions is the preserve of the Comptroller and Auditor-General, and consultation with the President or the Governor, as the case may be, is just a formality.

The office of the Comptroller and Auditor General of India, not only directs the classification, but also sees to it that it is properly observed. This is one of the primary functions of government audit, i.e. of the institution of the Comptroller and Auditor General of India.

THEORETICAL QUESTIONS

1. Distinguish between commercial accounting and government accounting.
2. State the accounting methods for government accounting.
3. State the objectives of government accounting.
4. State the basic principles of government accounting in India.
5. Discuss the accounting procedure for government expenditure.
6. Write short notes on :
   (a) Public account; (b) Consolidated fund; (c) Demand for grant; and (d) Votable and non-votable items.

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each sentence or answer each question below.

1. Government accounts are mostly kept on a
   A cash basis
   B credit basis
   C none of these.
2. Treasury is a term adopted from the
   A Indian financial system
   B British financial system
   C none of these.
3. For keeping accounts, the government follows
   A single entry system
   B double entry system
   C none of these.
4. When the receipts and expenditures do not balance, Revenue division exhibits
   A deficit
   B surplus
   C either deficit or surplus.
5. Public account is in no way related to the capital division of the
   A contingency fund
   B consolidated fund
   C none of these.

Insolvency Accounts

Introduction

Insolvency is the inability of a debtor to pay debts as they fall due. A person is said to be insolvent when his liabilities exceed his assets and against whom the court makes an order of adjudication. In English law, the terms *bankrupt* and *bankruptcy* are used in same sense as the terms *insolvent* and *insolvency* are used in Indian law. Bankruptcy has been defined by Blackstone as, "a proceeding by which, when a debtor cannot pay his debts or discharge his liabilities or the person to whom he owes money or has incurred liabilities cannot obtain satisfaction of their claims, the State, in certain circumstances, takes possession of his property by an officer appointed for the purpose and such property is realised and distributed in equal proportions among the persons to whom the debtor owes money or has incurred pecuniary liabilities".

The law relating to insolvency in India is contained in two statutes:

(a) ***The Presidency Towns Insolvency Act of 1909*** which applies to the Presidency Towns of Mumbai, Kolkata and Chennai.

(b) ***The Provincial Insolvency Act of 1920*** which applies to the rest of India.

The two Acts are based on the same principles. However, the following are the points of differences, mostly to matters of procedure, between the two Acts.

1. The procedure from the date of presentation of petition to the date of adjudication.
2. The duties of the debtor, including his examination.
3. The person in whom the debtor's property is to be vested.
4. The Doctrine of Relation Back.
5. The constitution of the courts.

The main objectives of the insolvency legislation are :

(a) to secure an equitable distribution of property of the debtor among the creditors;

(b) to enable the debtor to be free from debts and to make a fresh start; and

(c) to protect the interests of the creditors and the public.

The above two Acts are applicable only to individuals, firms, Hindu undivided families and not to joint stock companies. For a joint stock company, the word "insolvency" is substituted by the word "liquidation". The special provisions of the Companies Act, 2013 are applicable for the liquidation of a company.

Important Terms / Expressions

Act of Insolvency

An 'Act of Insolvency' is an act of the debtor upon which an insolvency petition may be grounded, if committed before presentation of the petition and being one of the nine acts specified in statutes stated above.

Dividend

It means the proportion of payment to be made per rupee to the unsecured creditors from the realisable estate of the insolvent.

Official Receivers / Assignees

They are the officers appointed by the insolvency court to supervise the realisation and administration of the estate and the conduct of the debtors. Under Provincial Insolvency Act, 1920, this officer is called ***Official Receiver*** and under Presidency Towns Insolvency Act, 1909 it is known as ***Official Assignee***.

Preferential Creditors

Preferential Creditors are those who are given preference in payment over all other unsecured creditors.

Secured Creditors

Secured Creditors are those who are holding a mortgage, charge or lien on the property of the debtor as a security.

Unsecured Creditors

Unsecured Creditors are those who are not holding a mortgage, charge or lien on the property of the debtor. Creditors have provided loan to the insolvent debtor on his personal security.

When Can a Person be Declared Insolvent ?

A person can be adjudicated insolvent if the following two conditions are satisfied :

(a) he must be a debtor and his assets must be insufficient to meet all his liabilities; and

(b) he has committed an 'act of insolvency'.

Each of the following acts committed by the debtor is an act of insolvency.

1. If, in India or elsewhere, he transfers all or substantially all of his property to a third person for the benefit of creditors generally;
2. If, in India or elsewhere, he transfers any of his properties with the interest to defraud or delay his creditors;
3. If, in India or elsewhere, he makes a fradulent conveyance, gift, delivery or transfer of any property;
4. If he is trying to run away from his dwelling house or his usual place of business or to go out of India to prevent communication from his creditors with an intent to defeat or delay the creditors;
5. If any of his property has been sold or attached for a period of not less than 24 days in execution of the decree of any court for the payment of money. Under Provincial Insolvency Act, only a sale in execution is an act of insolvency, not attachment in execution;
6. If he has filed a petition to the court that he be adjudged as insolvent;
7. If he is imprisoned in execution of the decree of any court for the payment of money;
8. If he has given any notice to any creditor that he has suspended or is about to suspend payment of his debts;
9. Failure to comply with an insolvency notice.

The Procedures of Insolvency

The insolvency procedure under Indian Law is quite simple. Under both the Acts, insolvency is done through the following successive stages :

Stage 1

Presentation of an insolvency petition in a competent court of law with the evidence of it. The petition may be filed either by the insolvent debtor himself or by his creditors.

Stage 2

The appointment of an interim Assignee or Receiver. (He will function till the Regular Receiver is appointed)

Stage 3

Passing the order of adjudication, and

Stage 4

The discharge of the insolvent.

Accounting Procedures

When a debtor is adjudicated as insolvent, he is required to submit to the Official Receiver / Assignee a ***Statement of Affairs*** supported by a schedule known as ***Deficiency Account***. The Statement of Affairs shows the estimated financial position of the debtor while the Deficiency Account explains how he has arrived in that position.

Statement of Affairs

A Statement of Affairs is similar to a Balance Sheet but it shows the expected realisable values of the assets owned by the debtor and a list of his liabilities, indicating clearly the nature of creditors: unsecured, secured, partly secured, and preferential creditor. This statement is prepared in the prescribed form and supported by schedules marked 'A to H' successively which contains detailed list of the different types of creditors and of the debtor's property.

Difference Between Statement of Affairs and Balance Sheet

Though a Statement of Affairs is very similar to a Balance Sheet in look, the following are the important points of difference between the two :

(1) The Balance Sheet of a sole proprietorship or a partnership firm is not prepared according to any Act or in any prescribed form, whereas a Statement of Affairs is to be prepared in a prescribed form according to the rules given in the Insolvency Acts.

(2) A Balance Sheet is generally prepared on a stated day, i.e., on the last date of the accounting period, whereas a Statement of Affairs is prepared on the eve of liquidation of the business, i.e., when the order of adjudication is passed against the debtor.

(3) A Balance Sheet records assets and liabilities at their book values but in a Statement of Affairs, assets are shown at their estimated realisable values and liabilities at their payable values, which is commonly known as "expected to rank".

(4) A Balance Sheet shows intangible or fictitious assets like goodwill, preliminary expenses, deferred revenue expenditure etc. Such types of assets do not appear in a Statement of Affairs.

(5) A Balance Sheets shows proprietor's capital, reserves, drawings, interest on capital/drawings. But a Statement of Affairs excludes all these accounts.

(6) A Balance Sheet shows capital as a liability to the owner being the excess of assets over liabilities. But in a Statement of Affairs, capital disappears from the liabilities side and deficiency appears on the assets side, being the difference between the excess of liabilities over asets.

(7) In the Balance Sheet assets are recorded in the order of liquidity or dischargeability or in the order of permanence. But in a Statement of Affairs the assets are classified as Properties, Book Debts and Bills of Exchange. Moreover, the assets which were used as securities for loans availed of previously, are not shown on the assets but on the liabilities side as a deduction from the concerned loan.

(8) A Balance Sheet does not classify creditors. But in a Statement of Affairs, creditors are broadly classified as unsecured, fully secured, partly secured and preferential creditors.

(9) The Balance Sheet of a sole trader does not include personal assets or liabilities of the sole trader. But the Statement of Affairs of a sole trader includes the above assets and liabilities as well.

(10) In a Balance Sheet, contingent liabilities do not appear on the liabilities side — they are disclosed as a footnote at the bottom of the Balance Sheet. But in a Statement of Affairs, contingent liabilities appear on the liabilities side to the extent expected to rank.

The prescribed form of a Statement of Affairs and those of its accompanying schedules are given below :

STATEMENT OF AFFAIRS

(As required by the Presidency-Towns Insolvency Act, 1909)
In the High Court of Judicature at ...
In Insolvency

To the Insolvent — You are required to fill up, carefully and accurately, this sheet and the several sheets A, B, C, D, E, F, G and H, showing the state of your affairs on the day on which the order of adjudication was made against you, viz., the .... day of .... 201............
Such sheet, when filled up, will constitute your schedule and must be verified by Oath or Declaration.

LIST A: UNSECURED CREDITORS

The names to be arranged in alphabetical order and numbered consecutively, preferential creditors, being placed first. The information indicated by the column headings must be furnished fully.

No.	Name	Address in Full and Occupation	Amount of Debt		Date when contracted		Consideration, i.e., "Wages", "Taxes", "Goods Sold And Delivered", "Work and Labour Done", "Money Lent", &c.
					Month	Year	
	Preferential Creditors Ordinary Creditors						

LIST B: FULLY SECURED CREDITORS

No.	Name of Creditor	Address in full and occupation	Amount of Debt		Date when contracted		Conside-ration	Particulars of Security	Date when given	Estimated value of security at present		Estimated surplus from security	
					Month	Year							

LIST C: PARTLY SECURED CREDITORS

No.	Name of Creditor	Address in full and occupation	Amount of Debt		Date when contracted		Conside-ration	Particulars of Security	Month and Year when given	Estimated value of security at present		Balance of Debts Unsecured	
					Month	Year							

LIST D : PREFERENTIAL CREDITORS

No.	Name	Address & Occupation	Nature of Claim	Period during which claim accrued due	Date when due	Amount of claim	Amount payable in full	Difference ranking for Dividend

LIST E : PROPERTY

Full Statement and Nature of Property	Estimated to produce ₹	P
(a) Cash at bankers (b) Cash in hand (c) Cash deposited with solicitor, if any, for costs of petition (d) Stock in trade at (cost ₹ ....) (e) Machinery at (cost ₹ ....) (f) Total fixtures, fittings, utensils, at (g) Household furniture and effects (h) Life Policies (i) Other property (state particulars), viz.,		

LIST F : BOOK DEBTS

No.	Name of Debtor	Address in full and Occupation	Amount of Debt						Ledger Folio	When contracted		Estimated to produce	Particulars of any Securities held for Debt
			Good		Bad		Doubtful			Month	Year		

LIST G : BILLS AND NOTES

No.	Acceptor of Bill or Maker of Note	Address in full	Amount of bill or note	Date when due	Estimated to produce	Particulars of any property held as security for payment of bill or note

The different items of Statement of Affairs are explained below :

Liabilities Side

Unsecured Creditors as per List A

It includes creditors for goods, creditors for expenses, creditors on bills payable and creditors on unsecured loans. In respect of preferential creditors, the amount in excess of the preferential limit should also be included in this list. It should be noted that this list will also include both the business and private liabilities of the insolvent. On insolvency of the debtor, no distinction is made between those liabilities.

The total amount payable to unsecured creditors is taken to the column "Expected to Rank".

Fully Secured Creditors as per List B

This list will include those creditors who provided loans to the insolvent debtor against mortgage, lien, charge or hypothecation of some of the debtor's assets.

It should be noted that any estimated surplus from any such asset should be transferred to the assets side of the Statement of Affairs and it is shown under the heading '***Surplus from securities in the hands of creditors fully secured (as per contra)***'.

If the partly secured creditors hold a second mortgage or charge on such assets, then the balance of the security (after meeting full secured creditors claim) should be transferred to partly secured creditors.

The total amount payable to Secured Creditors is ***not taken*** to the column "***Expected to Rank***".

Partly Secured Creditors as per List C

This list will include those creditors who hold securities which are insufficient to meet the entire debt. On the Statement of Affairs, the available securities are deducted from the debt and any deficiency extended into the main column "***Expected to Rank***".

Preferential Creditors as per List D

This list will include those unsecured creditors who are given preference in payment over all other unsecured creditors.

Amount available (after meeting realisation expenses and remuneration to the Official Assignee or Receiver) is paid to the preferential creditors at once.

The following types of creditors come under this head :

Presidency Towns Insolvency Act, 1909		Provincial Insolvency Act, 1920	
1.	All debts due to Government or local authority	1.	All debts due to Government or local authority.
2.	Salaries of clerks for services rendered during the prcceding four months, not exceeding ₹ **300 per clerk**.	2.	Salaries of clerks for services rendered during the preceding four month, not exceeding ₹ **20 per clerk**.
3.	Wages of servants and workmen for services rendered during the preceding four months, not exceeding ₹ **100 per worker**.	3.	Wages of servants and workmen for services rendered during the preceding four months not exceeding ₹ **20 per worker**.
4.	Rent due to landlord not exceeding one month's rent.	4.	Rent is not preferential.

Preferential creditors are shown in the liabilities side of the Statement of Affairs but the amount is not extended to outer column. However, the amount is deducted from the asset side, since they are payable in full. The preferntial creditors are paid in full before paying anything to those in the succeeding class. If the estate of the debtor is insufficient to pay all these debts, they will rank equally.

It should be noted that charges for electric light, gas, telephone, and sales tax are not treated as preferential creditors.

Assets Side

Property as per List E

This list will include cash at bank; cash in hand; cash deposited with solicitors; stock in trade; machinery; furniture, fittings and utencils, etc.; life policies and other properties.

Book Debts as per List F

Book debts are classified under the heading "Good", "Doubtful" and "Bad", the total of which is extended as being the amount expected to be realised from Sundry Debtors.

Bills and Notes as per List G

Bills Receivables and Promissory Notes are listed under this heading.

Deficiency Account

Deficiency Account is prepared by the insolvent debtor with the objective to show how the insolvency has been brought about and to explain deficiency or surplus, as the case may be. This account is supposed to be as per List H of the Insolvency Act. It is filed with the Statement of Affairs. This account should relate back to twelve months before the date of adjudication or to such other period as the court or Official Receiver / Assignee may have fixed.

This account looks like a Capital Account of a trader with two sides (left hand side and right hand side) without the words "To" and "By". On the left hand side, the capital plus all that increase capital (e.g., profit, interest, commission, salary, etc., payable to the proprietor) are shown. On the right hand side, losses; bad debts, withdrawals, etc., (all that reduce capital) are shown.

In case of a sole proprietor, any surplus of household assets over household liabilities are shown on the left hand side. Similarly, any excess of household liabilities over household assets are shown on the right hand side. The excess of right hand side total over left hand side total is called ***deficiency***. Similarly, the excess of left hand side total over right hand side total is called ***surplus***. It should be noted that this figure (deficiency/surplus) must tally with the figure appearing in the Statement of Affairs.

LIST H : DEFICIENCY ACCOUNT (or SURPLUS ACCOUNT)

1.	Excess of assets over liabilities on... (a)	₹	1.	Excess of liabilities over assets on ...(a)	₹
2.	Net profit arising from carrying on business from ... to ... after meeting usual trade expenses (a).		2.	Net Loss arising from carrying on business from ... to ... the date of adjudication (a)	
3.	Income or profit from other sources.		3.	Bad debts as per List F	
4.	Deficiency as per Statement of Affairs (b)		4.	Expenses incurred since .. other than usual business expenses, viz., household expenses	
			5.	Other losses: Speculation loss Realisation loss	
			6.	Surplus as per Statement of Affairs (b)	
		(C)			(C)

Explanation

(a) This date should be 12 months before the date of adjudication or such other time as the Official Receiver / Assignee may have fixed.
(b) Strike out words which do not apply.
(c) These figures should agree.

Key Points to Remember in Respect of Liabilities side of the Statement of Affairs

1. ***A column for "Gross Liabilities" is to be provided on the extreme left hand side. All liabilities including contingent liabilities are shown in this column at full value. The figures of this column are not to be considered for calculation of deficiency/surplus.***
2. ***A column for "Expected to Rank" is to be provided on the extreme right hand side with an inner column.***
3. ***Preferential creditors are shown only in the inner column (it is actually deducted from the assets side).***
4. ***Fully secured creditors are also shown only in the inner column along with the estimated value of security.***
5. ***All items of the liabilities side of the Balance Sheet of the insolvent debtor are not taken in the liabilities side of the Statement of Affairs (e.g., capital of the insolvent debtor) — only liabilities to third parties are shown.***
   It should be noted that a loan received from wife cannot be treated as liabilities to third party. However, when the amount is provided out of the "Stridhan" given by her parents, it is to be considered as "Unsecured Creditor".
6. ***After meeting the fully secured creditors, the balance of the security should be transferred to partly secured creditors, provided the security was offered as a second charge on mortgage.***
7. ***No creditors are entitled to receive any interest from the estate of the insolvent debtor from the date of insolvency. However, interst @ 6% p.a. is allowable upto the date of payment to creditors, if all debts of the insolvent debtors are discharged in full.***

Key Points to Remember in Respect of Assets side of the Statement of Affairs

1. ***Two columns are to be provided on the extreme right hand side. First column will show "Book Value" and the second column "Expected to Produce".***
2. ***Assets offered as securities are not shown in the assets side of the Statement of Affairs. Any surplus left after satisfying secured creditors (if there is no partly secured creditors who have second charge on the assets) are shown under the heading "Surplus from Securities in the hands of the creditors fully secured".***
3. ***The amount of preferential creditors is deducted from the total of "Expected to Produce" column of the assets side.***
4. ***Only legally clean properties are shown on the assets side.***

Illustration 1

Assets of Mr. Least Bothered of Mumbai on 30th June 2015 as shown by his books were ₹ 28,000 and his liabilities were ₹ 22,000. He filed his petition in the insolvency court and estimated his deficiency to be ₹ 15,000. After making the above estimate, he found that the following items were not passed through his books of accounts :

Interest @ 6% on his capital. A contingent liability of ₹ 1,250 on bills discounted by him for ₹ 5,000. Amount due as wages ₹ 300; salary ₹ 200; rent ₹ 100; taxes ₹ 150.

Prepare Statement of Affairs and Deficiency Account.

Solution **Statement of Affairs of Mr. Least Bothered as on 30th June, 2015**

Gross Liabilities ₹	Liabilities		Expected to Rank ₹	Assets	Book Value ₹	Estimated to Produce ₹
27,000	Unsecured creditors as per List 'A' (Note 1)		23,250	Property as per List 'E' (Note 3)	28,000	7,000
	Fully secured creditors as per List 'B'	***		Book debts as per List 'F'	—	—
	Estimated value of security	***		Bills of exchange as per List 'G'	—	—
	Surplus	***		Surplus from securities in the hands of fully		
	Less : Amount thereof carried to List 'C'	***		secured creditors as per contract	—	—
	Surplus carried to contra	***			28,000	7,000

	Creditors partly secured as per List 'C' *** Less : Estimated value of securities ***	***	Preferential creditors for wages, salaries and rent as per List 'D' deducted as per contra		750
					6,250
	Creditors for wages, salaries and rent payable in full as per List 'D' (Note 2) 750		Deficiency as explained in List 'H'		17,000
750	Deducted as per contra 750				
27,750		23,250			23,250

Deficiency Account (List H)

Particulars	₹	Particulars	₹
Excess of assets over liabilities (Capital)	6,000	Loss on sale of assets (Note 4)	21,000
Deficiency as per Statement of Affairs	17,000	Loss on bill discounted (Net)	1,250
		Loss due to expenses (Wages ₹ 300 + salary ₹ 200 + rent ₹ 100 + taxes ₹ 150)	750
	23,000		23,000

Working Notes:

(1) List A : Unsecured Creditors (Figures in Rupees)

Particulars	Gross Liabilities	Expected to Rank
Liabilities	22,000	22,000
Contingent Liability for bill	5,000	1,250
	27,000	23,250

(2) List D : Preferential Creditors

	₹
Wages	300
Salaries	200
Taxes	150
Rent	100
	750

(3) Realisable Value of Assets

Deficiency = Liabilities expected to Rank – Assets estimated to produce.

or, Assets estimated to produce = Liabilities expected to Rank – Deficiency = ₹ 22,000 – ₹ 15,000 = ₹ 7,000.

(4) Loss on Sale of Assets : Book value – Realisable value = ₹ 28,000 – ₹ 7,000 = ₹ 21,000 (Loss).

(5) Interest on Capital : Mr. Least Bothered has become insolvent at the beginning of this year. He must pay his creditor first before taking interest on capital. Therefore, interest on capital has been ignored.

Illustration 2

Mr. Haradhan is insolvent. He supplies to you the following information as on March 31, 2015 :

Particulars	₹	Particulars	₹
Creditors for goods	52,500	Stock (expected to realise 60%)	52,500
Salary due to clerks	700	Book debts (good)	7,000
Taxes due to Government	2,100	Book debts (doubtful, expected to realise 40%)	17,500
Bank loan secured by lien on stock of ₹ 35,000	17,500	Bill receivable (₹ 5,250 bad)	8,750
Cash in hand	100	Bills discounted (₹ 3,500 bad)	10,500
Furniture (expected to realise ₹ 3,500)	7,000	Loan from Mrs. Haradhan	17,500

Mr. Haradhan commenced business six years ago with a capital of ₹ 43,750. He drew ₹ 8,750 each year for private purposes, but did not maintain proper books of accounts. Mrs. Haradhan gave up her jewellery valued at ₹ 7,000 to the receiver.

Prepare the Statement of Affairs and Deficiency Account of Mr. Haradhan.

Solution **Statement of Affairs of Mr. Haradhan as on 31st March, 2015**

Gross Liabilities ₹	Liabilities	Expected to Rank ₹	Assets	Book Value ₹	Estimated to Produce ₹
80,500	Unsecured creditors as per List 'A' : (Note 1)	73,500	Property as per List 'E' :

Nil	Partly secured creditors as per List 'C' :	Nil	Book debts as per List 'F' :		
			Good	7,000	7,000
	Creditors for rent, rates etc. payment in full		Doubtful	17,500	7,000
	as per List 'D' (Note 4) 2,800		Estimated to realise 40%	—	
	Deducted as per contra 2,800		Bills rec. as per List 'G' : ₹ (8,750 – 5,250)	8,750	3,500
			Surplus from securities in the hands of fully secured creditors as per contra		3,500
				57,850	42,100

			Preferential creditors for rents, rates, etc. deducted as per contra		2,800
					39,300
			Deficiency as explained in List 'H' :		34,200
98,000		73,500			73,500

Deficiency Account (List H)

Particulars	₹	Particulars	₹
Excess of assets over liabilities as on 1st April, 2009	43,750	Bad debts as per List 'F' :	10,500
Net profit arising from carrying on business from 1st April, 2009 to the date of adjudication, after meeting usual expenses (Note 2)	11,300	Expenses incurred other than usual business expenses viz. household expenses since 1st April, 2009 (₹ 8,750x6)	52,500
Income or profit from other sources :		Other Losses :	
Jewellery from wife	7,000	Loss on realisation of assets	
Deficiency as per Statement of Affairs	34,200	Stock (40% of ₹ 52,500)	21,000
		Furniture	3,500
		Receivable	5,250
		Loss on bills discounted	3,500
	96,250		96,250

Working Notes :

(1) List A : Unsecured Creditors

Particulars	Gross ₹	Expected to Rank
Trade creditors	52,500	52,500
Liabilities for bills disc.	10,500	3,500
Loan from Mrs. Haradhan*	17,500	17,500
	80,500	73,500

* It has been included in unsecured creditors on the assumption that it was given from her "Stridhan".

(2) For calculating net loss, a Balance Sheet is to be prepared on 31.3.2015 as under:

Balance Sheet as at 31.3.2015

Liabilities	₹	Assets	₹
Capital	43,750	Furniture	7,000
Creditors	52,500	Stock	52,500
Bank loan	17,500	Debtors ₹ (7,000 + 17,500)	24,500
Loan from Mrs. Haradhan	17,500	Bills receivable	8,750
Salary outstanding	700	Drawings ₹ (8,750 x 6)	52,500
Taxes outstanding	2,100	Cash	100
Profit & Loss (Bal. figure)	11,300		
	1,45,350		1,45,350

(3) 60% of ₹ 35,000 (stock); (4) Salary ₹ 700 + Government tax ₹ 2,100 = ₹ 2,800.

Illustration 3

A filed his petition for bankruptcy on 31st December, 2014. His books showed that he owed ₹ 50,000 to trade creditors; ₹ 30,000 to creditors holding lien on stock-in-trade for ₹ 8,000; ₹ 10,000 mortgage on works; and ₹ 1,000 for salaries, wages and rates. Bills for exchange for ₹ 10,000 had been discounted with his bankers, and it was estimated that there was a liability of ₹ 3,000 in respect of them.

A's assets were :

Consignments ₹ 20,000; estimated to realise ₹ 2,000; Good book debts, ₹ 18,000; Doubtful debts ₹ 6,000 estimated to realise ₹ 3,000. Bad debts, ₹ 15,650; Works cost, ₹ 1,00,000 (depreciated out of the profit and loss to ₹ 75,000), estimated to realise ₹ 50,000; Furniture and fittings ₹ 2,000, estimated to realise ₹ 1,000; Stock-in-trade ₹ 25,000 estimated to realise ₹ 8,000; Cash ₹ 1,350.

He commenced business on 1st January 2010 with a capital of ₹ 90,000. After charging annually ₹ 5,000 for depreciation on works and ₹ 5,500 for interest on capital, the trading shows profit of ₹ 6,500 in 2010, ₹ 5,000 in 2011 and losses of ₹ 6,000 in 2012; ₹ 7,000 in 2013 and ₹ 9,500 in 2014. He lost ₹ 14,500 in speculation while his drawings averaged ₹ 4,000 a year.

Draw up his Statement of Affairs and Deficiency Account.

Solution **Statement of Affairs of A as on 31st December, 2014**

Gross Liabilities ₹	Liabilities		Expected to Rank ₹	Assets	Book Value ₹	Estimated to Produce ₹
60,000	Unsecured creditors as per List 'A' : (Note 1)		53,000	Property as per List 'E' :		
10,000	Secured creditors as per List 'B' :	10,000		Cash	1,350	1,350
	Estimated value of security	50,000		Consignments	20,000	2,000
		40,000		Stock-in-trade (Note 2)	17,000	5,440

				80,000	70,790
			Preferential creditor for rent, rates, etc. deducted as per contra		1,000
					69,790
			Deficiency as explained in List 'H' :		10,650
1,01,000		80,440			80,440

Deficiency Account (List H)

Particulars	₹	Particulars	₹
Excess assets over liabilities on 1st January, 2010	90,000	Net loss arising from carrying on business from 1st January, 2010, to the date of adjudication	22,500
Net profit arising from business from 1st Jan., 2010 to the date of adjudication after meeting usual trade expenses	11,500	Bad debts as per List 'F' : ₹ (15,650 + 3.000)	18.650
Income or profit from other sources :		Expenses incurred other than usual business since 1st January, 2010 ₹ (5,000 x 4)	20,000
Interest on capital ₹ (5,500 x 5)	27,500		
Deficiency as per Statement of Affairs	10,650	Other Losses :—	
		Loss on realisation of assets	
		Stock-in-trade	17,000
		Furniture	1,000
		Consignments	18,000
		Works	25,000
		Loss on speculation	14,500
		Loss on bills discounted	3,000
	1,39,650		1,39,650

Working Notes:

(1) List A : Unsecured Creditors

Particulars	Gross Liability	Expected to Rank
Trade creditors	50,000	50,000
Contingent liability for bill discounted	10,000	3,000
Total (₹)	60,000	53,000

(2) Realisable Value of Stock

₹ 8,000 / 25,000 x 8,000 = ₹ 2,560. The value of remaining stock will be ₹ 8,000 / 25,000 x 17,000 = ₹ 5,440.

Illustration 4

Shiam Mohan filed a petition for bankruptcy on 30th June. His books showed the following in balance :

Particulars	₹	Particulars	₹
Cash in hand	10	Sundry creditors :	
Fixtures and fittings (estimated to produce ₹ 80)	250	Trade creditors	2,000
Stock in trade (estimated to produce ₹ 1,200)	1,800	Bills payable	2,000
Sundry debtors		Mrs. Shiam Mohan	200
Good : ₹ 1,000; Doubtful (estimated at 50%) : ₹ 2,000; Bad : ₹ 2,000	5,000	Bank overdraft	1,200
		Capital	1,660
	7,060		7,060

Liability on bills discounted ₹ 500, expected to rank ₹ 100. The amount due to Mrs. Shiam Mohan was a loan out of money given to her by Shiam Mohan.

His household furniture etc., was valued at ₹ 250. He owned a house valued at ₹ 750, having a mortgage on it of ₹ 600 at 4%. Interest paid up to the preceding 31st December.

Preferential Creditors amounted to ₹ 35 (included in Sundry Creditors) and ₹ 15 for rates on the house.

Prepare a Statement of Affairs and Deficiency Account.

Solution **Statement of Affairs of Mr. Shiam Mohan as on 30th June ....**

Gross Liabilities ₹	Liabilities	Expected to Rank ₹	Assets	Book Value ₹	Estimated to Produce ₹
5,865	Unsecured creditors as per List 'A' : (Note 4)	5,265	Property as per List 'E' :

(3) List 'C' : Partly Secured Creditors

Creditors holding 2nd charge on shares of B Ltd.	20,000	15,000

(4) No distinction has been made between the business assets and liabilities and private assets and liabilities because it is a sole proprietorship business.

Illustration 6

On 31st December 2014 Shri Sadanand Khaitan files his petition in bankruptcy on which date the Receiving Order was made. You are instructed by the Official Receiver in Bankruptcy to assist the debtor in the preparation of the Statement of Affairs and Deficiency Account. Your investigations disclosed the following:

Assets	Book value	Estimated to Produce
Freehold property of a book value of ₹ 1,20,000 estimated to produce ₹ 1,00,000, a first mortgage thereon having been given to fully secured creditors and a second charge limited to ₹ 10,000 to partly secured creditors:	₹	₹
Stock in trade	57,840	39,000
Trade fixtures and fittings	7,000	3,000
Book debts : Good	61,410	61,410
Doubtful	27,010	20,000
Bad	17,330	Nil
Bills receivable	3,000	Nil
Cash in hand	270	270

Liabilities : His liabilities amounted to ₹ 3,54,500 of which ₹ 74,000 was fully secured, ₹ 38,000 partly secured and ₹ 2,500 was preferential. There was also a contingent liability on bills under discount of ₹ 27,400 of which ₹ 2,000 was expected to rank. He has household furniture of the estimated value of ₹ 2,500 and Life Policies of the surrender value of ₹ 6,000. A creditor for ₹ 5,000 gave up his claims against Shri Khaitan.

On 1st January 2012 his capital was ₹ 1,30,000.

During the three intervening years, trading results, interest on capital and drawings were as follows:

Year ending	Trading Results	Drawings	Interest on Capital
31st December, 2012	₹ 3,760 (Profit)	₹ 8,400	₹ 6,500
31st December, 2013	₹ 75,230 (Loss)	₹ 10,000	₹ 6,000

Accounts for 2014 were not made up; but he had withdrawn ₹ 15,000 for domestic use.

Prepare the Statement of Affairs and Deficiency Account.

Insolvency of a Partnership Firm

A partnership firm has no seperate legal entity apart from its partners. An order of adjudication passed against a partnership firm automatically becomes an order against the individual partners of the firm.

The main difference between the insolvency of a partnership firm and that of a sole proprietor is that in case of the latter, no distinction is made between private assets and liabilities and business assets and liabilities. But this distinction is made in respect of each partner in the case of insolvency of a partnership firm.

In the case of insolvency of a firm, the joint estate of the partners as a firm and their separate estates as individuals are administered separately. ***The separate estate of each partner is to be utilised first for paying his private debts***. Any surplus from the separate estate can be utilised for paying firm's debts. But any deficiency of his private estate is not included in the joint estate. Similarly, the joint estate of the firm is to be utilised first for paying the debts of the firm. Hence, a separate Statement of Affairs and a Deficiency Account are to be prepared for the firm as well as for each partner and the deficiency of a partner will not be transferred to the Statement of Affairs of the firm. Here, it should be noted that the question of insolvency of a firm does not arise if any of the partners has sufficient assets to pay off debts.

Illustration 7

Prepare Statement of Affairs and Deficiency Account of C and Company, who filed the petition on 31st December 2014. Their books showed that they owed ₹ 40,100 of which creditors amounting to ₹ 6,500 held stock of the estimated value of ₹ 7,500, others amounting to ₹ 29,000 held stock of the estimated value of ₹ 15,000 and a mortgage on the property at Calcutta valued at ₹ 13,000, the landlord being a preferential creditor for ₹ 100. Bills had been discounted amounting to ₹ 3,500 in respect of which it was estimated that the firm would be liable for ₹ 500.

The assets consisted of Book Debts Good ₹ 1,500. Doubtful ₹ 600, estimated to produce ₹ 300 and Bad ₹ 700, Furniture and fittings ₹ 300, estimated to realise ₹ 150, Cash ₹ 50, Bills receivable ₹ 350, Stock ₹ 1,600, estimated to produce ₹ 1,200. The firm commenced business on 1st January 2010 with a capital of ₹ 25,000. After charging ₹ 1,000 a year for interest on capital, and ₹ 1,300 a year for partners' salaries (which were credited to the capital accounts and not withdrawn) they made a profit in the first year of ₹ 2,700, but in the succeeding four years losses were incurred of ₹ 2,500; ₹ 3,200; ₹ 4,500 and ₹ 6,000 respectively. They drew out cash at the rate of ₹ 1,200 a year. The property at Calcutta cost ₹ 22,000 and the stock mortgaged was subject to discount of 25 per cent.

Solution **Statement of Affairs of C & Company as on 31st December, 2014**

Gross Liabilities ₹	Liabilities		Expected to Rank ₹	Assets	Book Value ₹	Estimated to Produce ₹
8,000	Unsecured creditors as per List 'A' :		5,000	Property as per List 'E' :		
6,500	Secured creditors as per List 'B' :	6,500		Cash	50	50
	Estimated value of security	7,500		Stock	1,600	1,200
		1,000		Furniture and fittings	300	150

43,600			6,000			6,000

Deficiency Account (List H)

Particulars	₹	Particulars	₹
Excess of assets over liabilities (capital)	25,000	Net loss arising from carrying on business from 1st January, 2010 to the date of adjudication (Note 1)	16,200
Net profit arising from carrying on business from 1st January 2010 to the date of adjudication after meeting usual trade expenses	2,700	Bad debts as per List 'F' :	1,000
Income or profit from other sources :		Expenses incurred other than usual business expenses, viz. household expenses since 1st January, 2010 (₹ 1,000 x 6)	6,000
Interest on capital (₹ 1,000 x 5)	5,000	Other Losses :	
Salary credited (₹ 1,300 x 5)	6,500	Loss on sale of assets :	
Deficiency as per Statement of Affairs	1,550	Stock (Note 4)	7,900
		Furniture and fittings	150
		Property at Calcutta	9,000
		Loss on bills discounted (Net)	500
	40,750		40,750

Working Notes: (1) Total net loss : ₹ (2,500 + 3,200 + 4,500 + 6,000) = ₹ 16,200.

(2) Unsecured Creditors

	₹
Total creditors	40,100
Less: Fully secured creditors	6,500
	33,600
Less: Partly secured creditors	29,000
	4,600
Less: Preferential creditors	100
	4,500

(3) List A : Unsecured Creditors

	Gross Liability (₹)	Expected to Rank (₹)
Unsecured creditors (Note 2)	4,500	4,500
Liability for bills discounted	3,500	500
	8,000	5,000

(4) Calculation of loss on stock mortgaged

(₹ 7,500 + ₹ 15,000) x 25/75 + ₹ 400 = ₹ 7,900

Illustration 8

A and B carrying on business in partnership share profits and losses in the proportion of two-thirds and one-third. They file their petition in bankruptcy on September 30, 2014, when their Balance Sheet showed the following position:

Liabilities	₹	Assets	₹
Bank overdraft secured by a charge on machinery	30,000	Machinery	18,000
Sundry creditors	64,500	Furniture	2,500
Bills payable	5,000	Stock	14,200
A's capital	12,400	Debtors (including ₹ 3,000 for dishonoured bill and	
B's capital	4,200	₹ 2,000 doubtful of recovery)	29,500
		Investments	12,800
		A's Drawings	6,200
		B' Drawings	3,000
		Speculation losses carried forward	20,300
		Cash	1,400
		Profit and Loss A/c	8,200
	1,16,100		1,16,100

The assets of the firm are estimated to realise as under : machinery ₹ 12,000; furniture ₹ 2,000; investments ₹ 16,500; and stock ₹ 12,000. Some goods left for safe custody with the firm by X, of the book value of ₹ 4,000, were estimated to be worth ₹ 1,000.

The Bank overdraft was further secured by a charge on B's cottage. Creditors include ₹ 1,200 due to Preferential Creditors and ₹ 5,400 in respect of a claim against the firm which is not expected to rank.

It is expected that A's private estate would show a deficit of ₹ 4,100. B had no personal property other than the cottage which is expected to realise ₹ 8,000.

Prepare the Statement of Affairs and the Deficiency Account of the firm.

Solution **Statement of Affairs of A & B as on 30th September, 2014**

Gross Liabilities ₹	Liabilities	Expected to Rank ₹	Assets	Book Value ₹	Estimated to Produce ₹
62,900	Unsecured creditors as per List 'A'	62,900	Property as per List 'E'		
30,000	Partly secured creditors as per List 'C' ₹ 30,000		Cash	1,400	1,400
			Investments	12,800	16,500
	Estimated value of security 12,000	18,000	Stock (Note 1)	18,200	13,000
1,200	Creditors for rent, rates, and taxes etc.		Furniture	2,500	2,000
	payable in full as per List 'D' 1,200		Book Debts as per List 'F'		
	Deducted as per contra 1,200		Good	24,500	24,500
			Doubtful	2,000	—
			Bad	3,000	—
			Estimated to produce	—	—
				64,400	57,400
			Preferential creditors for rent, rates, etc.		1,200
					56,200
			Deficiency as explained in List 'H'		24,700
94,100		80,900			80,900

Deficiency Account (List H)

Particulars	₹	Particulars	₹
Excess of assets over liabilities as on 30th Sept., 2014	16,600	Net loss arising from carrying on business from ... to	
Profit or income from other sources	—	the date of adjudication	8,200
Profit on realisation of investments	3,700	Bad debts as per List 'F'	5,000
Goods with X (Doctrine of reputed ownership)	1,000	Expenses incurred other than usual business expenses	
Claim not expected to rank	5,400	viz., Household expenses since	9,200
Deficiency as per Statement of Affairs	24,700	Other Losses:	
		Loss on realisation of assets	
		Stock ₹ (14,200 – 12,000)	2,200
		Furniture ₹ (2,500 – 2,000)	500
		Machinery ₹ (18,000 – 12,000)	6,000
		Speculation Loss	20,300
	51,400		51,400

Working Notes :

(1) Total value of stock = ₹ (14,200 + 4,000) = ₹ 18,200. Expected amount to be realised = ₹ (12,000 + 1,000) = ₹ 13,000.

(2) It is assumed that B's private liabilities are more than his private assets. Therefore, B's statement of affairs will also show a deficit. The calculation of bank claim against B's cottage is as follows :
Deficit of all the creditors of the firm ₹ (62,900 + 18,000 = ₹ 80,900) is ₹ 24,700. Therefore, deficit of the bank = ₹ 24,700 x ₹ 18,000 / ₹ 80,900 = ₹ 5,496. The bank will claim ₹ 5,496 against the cottage. The balance of ₹ 2,504 (₹ 8,000 – ₹ 5,496) will be available for distribution to B's creditors.

Illustration 9

A and B are in partnership and file their petition in bankruptcy. From the following particulars, prepare the Statement of Affairs and Deficiency Accounts of the joint estate as also the private estates of the partners. (all figures in ₹)

Balance Sheet

Liabilities	A and B	A	B	Assets	A and B	A	B
Mortgage on Freehold	3,000	—	—	Freeholds	6,000	—	—
Bank overdraft	3,000	—	—	Plant	6,500	—	—
Sundry creditors	12,400	1,500	2,900	Furniture	400	1,000	1,200
Preferential creditors	100	—	—	Stock	5,500	—	—
Capital A	3,000	—	—	Debtors	5,000	—	—
Capital B	2,000	—	—	Investments	—	2,500	800
Surplus	—	5,000	1,100	Cash	100	—	—
				Capitals in A and B	—	3,000	2,000
	23,500	6,500	4,000		23,500	6,500	4,000

The bank overdraft was secured by a second mortgage on freeholds, and B's personal guarantee, supported by the deposit of B's investments as collateral security.

The firm's assets are estimated to realise the following : freehold ₹ 4,500; plant ₹ 3,000; furniture ₹ 150; stock ₹ 3,100; debtors: good ₹ 2,575; doubtful ₹ 1,000 (50 paisa in the rupee), bad ₹ 1,425 (nil); A's assets : furniture ₹ 600, investments ₹ 2,000; B's assets : furniture ₹ 800; investments ₹ 300.

	5,000		5,000

Statement of Affairs of B as on ...

Gross Liabilities ₹	Liabilities		Expected to Rank ₹	Assets	Book Value ₹	Estimated to Produce ₹
2,900	Unsecured creditors as per List 'A'		2,900	Property as per List 'E' :		
	Partly secured creditors as per List 'C'	375		Furniture	1,200	800
375	Estimated value of security	300	75	Deficiency as explained in List 'H'		2,175
3,275			2,975			2,975

Deficiency / Surplus Account of B

Particulars	₹	Particulars	₹
Excess of assets over liabilities	1,100	Other Losses:	
Deficiency as per Statement of Affairs	2,175	Loss on realisation of assets:	
		Investment	500
		Furniture	400
		Loss of capital in the firm of M/s. A & B	2,000
		Creditors of the firm (Note 2)	375
	3,275		3,275

Tutorial Note : Surplus from A's estate after meeting private liability is ₹ 1,100. This surplus is to be carried to the Statement of Affairs of the firm and can be utilised for paying firm's debts. But the deficiency of B's estate will not be carried forward to firm's statement of affairs.

Working Notes:

(1) Calculation of amount paid by the firm for Bank Loan	₹	(2) Calculation of Creditors of the firm
As partly secured creditors	1,500	The balance of ₹ 375 (₹ 3,000 – ₹ 2,625) should be treated as partly secured creditors of 'B' because the bank holds personal guarantee of B.
As unsecured creditors ₹ (10,425 / 13,900 x 1,500)	1,125	
	2,625	

Key Points

- Insolvency is the inability of a debtor to pay debts as they fall due. A person is said to be insolvent when his liabilities exceed his assets and against whom the court makes an order of adjudication.
- The law relating to insolvency in India is contained in two statutes:
  - (a) ***The Presidency Towns Insolvency Act of 1909*** which applies to the Presidency Towns of Mumbai, Kolkata and Chennai.
  - (b) ***The Provincial Insolvency Act of 1920*** which applies to the rest of India.
- It means the proportion of payment to be made per rupee to the unsecured creditors from the realisable estate of the insolvent.
- Preferential Creditors are those who are given preference in payment over all other unsecured creditors.
- Secured Creditors are those who are holding a mortgage, charge or lien on the property of the debtor as a security.

THEORETICAL QUESTIONS

1. What do you understand by a Statement of Affairs and a Deficiency Account? How are these prepared?
2. How does the insolvency of a partnership firm differ from the insolvency of an individual?
3. What do you mean by preferential creditors?

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each statement or answer each question below.

1. The provincial Insolvency Act of 1920 is applicable to :
   A individuals only
   B individuals, firms and limited company
   C individuals, firms and hindu undivided family.
2. Official receiver is appointed by the
   A the chief justice of India
   B the insolvency court
   C none of the above.
3. All debts due to government or local authority are treated as :
   A secured creditors
   B unsecured creditors
   C preferential creditors.
4. Charges for electric light, gas and telephone :
   A are not treated as preferential creditors
   B are treated as preferential creditors
   C are treated as secured creditors.

PRACTICAL QUESTIONS

Insolvency of Individuals

1. On January 1, 2012 Raman commenced business with a capital of ₹ 6,350. His profits for the years 2012 and 2013 amounted to ₹ 5,554. In 2014 he suffered a loss of ₹ 2,500. His total drawings upto December 31, 2014 were ₹ 9,000. From the following figures prepare a Statement of Affairs and the Deficiency Account of Raman as on December 31, 2014. Cash ₹ 230; Stock-in-trade ₹ 1,000; Debtors — good ₹ 7,000; doubtful ₹ 1,800; bad ₹ 1,500; Furniture and fittings ₹ 564; Investments in shares ₹ 500; Unsecured creditors (including ₹ 1,000 of his wife) ₹ 13,000; secured creditors ₹ 2,500; Value of securities held by secured creditors ₹ 3,500; Preferential creditors for rent, rates and taxes ₹ 190. Assume the stock realised ₹ 666; fixtures and fittings ₹ 282; investments in shares at book value and the bad and doubtful debts ₹ 600.
2. Prepare Statement of Affairs and Deficiency Account of Mr. Gambler as at 31st December, 2014. (all figures in ₹)

Cash	500	Securities held by fully secured creditors	8,000
Stock (estimated to realise ₹ 2,000)	3,000	Securities held by partly secured creditors	6,000
Furniture (estimated to realise ₹ 1,600)	2,500	Partly secured creditors	8,000
Bills receivable (estimated to realise ₹ 1,900)	2,400	Fully secured creditors	5,000
Debtors — Good	5,000	Unsecured creditors	25,000
Doubtful (estimated to produce ₹ 1,000)	2,500	Preferential creditors	1,000
Bad	2,100		

   On 1st January 2012 he commenced business with a capital of ₹ 10,000. His profits for 2012 and 2013 amounted to ₹ 5,000. He suffered a loss of ₹ 4,000 in 2014. He lost ₹ 10,000 in speculation. His drawings amounted to ₹ 8,000.
3. A merchant became insolvent on January 1, 2015 on which date his total assets were ₹ 75,000 and liabilities ₹ 65,000 and he estimated a deficiency of ₹ 20,000; before taking the following items into consideration which were not passed through his account books:
   (1) Interest on his capital of ₹ 25,000 at 6% for one year.
   (2) A contingent liability for ₹ 3,000 on bills discounted by him for ₹ 8,000.
   (3) Amounts due as wages ₹ 300; as salaries ₹ 600; as rent ₹ 500; as rates and taxes ₹ 1,000.
   (4) A loan of ₹ 5,000 taken from a friend for the marriage of his daughter and ₹ 2,000 from his wife.
   Showing detailed working notes, prepare a Statement of Affairs and the Deficiency Account of the merchant.

4. Mr. Dukhi finds himself insolvent on 31.12.2014. On that date, his position was as follows : (all figures in ₹)

Sundry Debtors — Good	15,000	Stock (estimated to realise ₹ 32,000)	40,500
Doubtful (estimated to produce ₹ 10,000)	22,000	Bills receivable (estimated to realise ₹ 5,200)	12,000
Bad	8,000	Sundry creditors	80,000
Shares in Rosy Co. (estimated to produce ₹ 12,000)	30,000	Creditors holding first charge on shares in Green Co.	25,000
Shares in Green Co. (estimated to produce ₹ 68,000)	75,000	Creditors holding second charge on shares in Green Co. to the extent of ₹ 40,000	52,000
Loss through speculation	13,000		
Furniture (estimated to produce ₹ 4,000)	5,000	Bills Receivable discounted (expected to rank ₹ 6,500)	8,000
Cash in hand	500	Creditors for rent, taxes etc. of which ₹ 2,800 are preferential	4,000
Cash at bank	1,000		

He commenced his business with a capital of ₹ 70,000 on 1st January, 2012 and the business resulted in a profit of ₹ 20,000. He incurred losses of ₹ 6,000 and ₹ 2,000 in two years, after allowing ₹ 1,000 as interest on capital each year. Withdrawals for the whole period amounted to ₹ 24,000. Prepare Statement of Affairs and Deficiency Account.

5. Dil Mohan filed his petition on 31st December 2014 and his Statement of Affairs consisted of the following:

Particulars	₹	Particulars	₹
Creditors for goods	37,500	Book Debts	
Bills payable	2,500	Good	10,000
Creditors secured by lien on shares	20,000	Doubtful & bad (estimated to produce ₹ 1,000)	5,000
Creditors secured by lien on stock	7,500	Consignments considered good	2,500
Liability on bills discounted (estimated to rank ₹ 1,500)	3,500	Stock (estimated to realise ₹ 20,000)	30,000
Mortgage on factory	5,000	Cash at Bank	50
Creditors payable in full	1,500	Fixtures (estimated to realise ₹ 750)	1,500
Bills of exchange	700	Cottages (estimated to realise ₹ 1,500)	3,400
Factory (estimated to realise ₹ 5,500)	10,000	Shares (estimated to realise ₹ 8,000)	7,500
Machinery (estimated to realise ₹ 6,000)	7,500		

On 1st January six years ago, he had a capital of ₹ 25,000. Profits were made in the six years totalling ₹ 22,750 and losses were incurred totalling ₹ 12,500 after allowing ₹ 1,250 per year interest on capital. Withdrawals amounted to ₹ 38,600. Prepare Statement of Affairs and Deficiency Account.

6. Mr. S. Srinivasan of Salem commenced business on January 1, 2015 with a capital of ₹ 65,000. His profit for the three years were ₹ 35,000; he did not prepare accounts for the next two years. His drawings averaged ₹ 4,800 per annum. On December 31, 2014 an order of adjudication was made against him when his affairs were as follows:

Particulars	₹	Particulars	₹
Building cost ₹ 60,000, estimated to realise	20,000	Mortgage on buildings	10,000
Plant & machinery : cost ₹ 28,000 estimated to realise	10,000	Unsecured creditors	40,000
Book debts : Good ₹ 12,000; Doubtful ₹ 4,000 estimated to realise ₹ 1,000		Household furniture	3,000
		Household debts	2,000
Bad debts	10,000	Furniture : cost ₹ 2,000, estimated to realise	800
Bills receivable discounted and expected to rank	5,000	Stock : cost ₹ 16,000, estimated to realise	11,000
Preferential creditors	1,000	Cash in hand	200
Partly secured creditors (security : Life Policy estimated to be worth ₹ 8,000)	23,000		

Mr. S. Srinivasan gave up his jewellery valued at ₹ 2,500 to the official receiver. You are required to prepare the Statement of Affairs and the Deficiency Account from the above particulars.

7. Sattaram is insolvent. He supplies to you the following information as at June 30, 2015: (all figures in ₹)

Creditors for goods	30,000	Stock (expected to realise 60%)	30,000
Salary due to clerk	400	Book debts — Good	4,000
Taxes owing to Government	1,200	Doubtful (expected to realise 40%)	10,000
Bank loan sec. by lien on stock of bk. value of ₹ 20,000	10,000	Bills receivable (₹ 3,000 bad)	5,000
Cash in hand	100	Bills discounted (₹ 2,000 bad)	6,000
Furniture (expected to realise ₹ 2,000)	4,000	Loan from Mrs. Sattaram	10,000

Sattaram commenced business six years ago with a capital of ₹ 25,000. He drew ₹ 5,000 each year for private purpose but did not maintain proper books of account. Mrs. Sattaram gave up her jewellery valued at ₹ 4,000 to the receiver. Prepare the Statement of Affairs and the relevant Deficiency Account.

8. Govind filed his petition for bankruptcy on December 31, 2014 on which date his books showed the following balances:

Particulars	Dr. (₹)	Cr. (₹)
Cash in hand	200	
Fixtures and fittings (estimated to produce ₹ 1,600)	5,000	
Stock in trade (estimated to produce ₹ 24,000)	36,000	
Trade creditors		40,000
Bills payable		44,000
Sundry debtors : Good	20,000	
Doubtful (estimated to produce 50%)	40,000	
Bad	40,000	
Bank overdraft		24,000
Capital		33,200
	1,41,200	1,41,200

Preferential creditors included trade creditors amounting to ₹ 700.
Liability on bills discounted was ₹ 10,000 out of which ₹ 2,000 were expected to rank. His household furnitures, etc., was valued at ₹ 5,000. He owned a house valued at ₹ 15,000 having a mortgage on it of ₹ 12,000 at 4% interest, which was paid on 30th June, 2013. Creditor for rates on the house amounted to ₹ 300. Prepare the Statement of Affairs and Deficiency Account of Govind.

9. On December 31, 2014 Insolvent filed his petition for bankruptcy on which date a receiving order was made. The debtor requests you to assist him in the preparation of a Deficiency Account and a Statement of Affairs from the following details:

Particulars	Book Value ₹	Estimated to Produce ₹
Business Assets		
Freehold property subject to a first charge to the bank and a second charge to sundry creditors	1,50,000	2,00,000
Stock in trade	3,20,000	1,50,000
Fixtures and fittings	16,000	5,000
Book Debts :		
Good	80,000	80,000
Doubtful	40,000	20,000
Bad	10,000	—
Bills receivable	2,500	1,000
Cash in hand	4,000	4,000
Business Liabilities		
Overdraft with bank (secured fully against freehold property)		1,20,000
Sundry creditors (partly secured)		6,00,000
Liabilities for rent, salaries, etc., claimed as preferential debts		5,000
Contingent liability for bills under discount : ₹ 24,000 — expected to rank		2,500
Personal assets not recorded in business books:		
Surrender value of Life policies ₹ 15,000; Household furniture expected to yield ₹ 3,000		

Insolvent started business in 2011 with a capital of ₹ 1,50,000 and details about profit and loss up to December 31, 2014 are :

Year ended	Trading Results (₹)	Drawings (₹)	Interest on Capital (₹)
To 31st December, 2011	15,000 (Profit)	9,000	12,000
To 31st December, 2012	60,000 (Loss)	18,000	6,000
To 31st December, 2013	8,000 (Profit)	18,000	4,000
To 31st December, 2014		16,000	2,000

Out of the drawings, he purchased jewellery for ₹ 10,000 (for his wife) whose market value on December 31, 2014 was ₹ 20,000. This is available for meeting Insolvent's debts. Losses for the year 2012 included speculation losses of ₹ 20,000.

10. Raghunath finds himself insolvent on December 31, 2014. His position is as follows:

Particulars	₹	Particulars	₹
Sundry Debtors : good ₹ 5,000; doubtful ₹ 30,000 (estimated to produce ₹ 25,000); bad ₹ 15,000		Creditors holding a first charge on the shares of Alexander Co. Ltd.	40,000
1,000 shares in Asian Co. Ltd. (estimated to produce ₹ 15,000)	25,000	Bills Payable	4,000
Shares in Alexander Co. Ltd. (estimated to realise ₹ 75,000)	91,500	Creditors for Rent, rates, taxes, wages, etc. (of which ₹ 4,600 is preferential)	5,000
Loss through betting	2,000	Furniture and fixtures (estimated to realise ₹ 3,000)	15,000
Creditors on open account	85,600	Cash in hand and in bank	550
Creditors holding a second charge on the shares in Alexander Co. Ltd. to the extent of ₹ 25,000	30,000	Stock in trade (estimated to realise ₹ 30,450)	35,950
		Bills receivable (estimated to realise ₹ 7,000)	9,000

Raghunath started with a capital of ₹ 70,000 on January 1, 2012 and the business resulted in a profit of ₹ 8,800 and ₹ 10,100 for the first two years respectively and a loss of ₹ 5,000 for the third year, after allowing ₹ 3,500 as interest on capital each year. Withdrawals for the whole period amounted to ₹ 30,000.

Prepare the Deficiency Account and the Statement of Affairs.

11. Shree Bhagyawan filed his insolvency petition on December 31, 2014 and his Statement of Affairs was composed of the following figures. Prepare a Statement of Affairs and Deficiency Account of Shree Bhagyawan.

Particulars		Dr. (₹)	Cr. (₹)	Estimated to realise or rank (₹)
Buildings		70,000	—	60,000
Machinery		3,00,000	—	2,40,000
Electric Machinery		2,20,000	—	2,20,000
Furniture		60,000	—	30,000
Stock-in-trade		13,00,000	—	9,00,000
Book debts :				
Good		4,00,000	—	4,00,000
Doubtful		1,00,000	—	40,000
Bad		1,00,000	—	—
Investments		3,20,000	—	3,20,000
Mortgage on Electric Machinery		—	2,00,000	2,00,000
Loan partly secured on investments		—	8,00,000	8,00,000
Loan fully secured by lien on stock in trade		—	2,000	2,000
Loan unsecured		—	15,00,000	15,00,000
Liability on Bills Discounted worth ₹ 1,40,000		—	—	70,000
Preferential creditors		—	60,000	60,000
Bills of exchange		28,000	—	28,000
Cash with bank		2,000	—	2,000
Capital account:	₹			
Introduced on 1.1.2010	10,00,000			
Add profit	4,10,000			
Add interest	2,00,000			
	16,10,000			
Less: Drawings	12,72,000		3,38,000	
		29,00,000	29,00,000	

Insolvency of Partnership Firms

12. Ploughman and Carter are equal partners. Insolvency petition is filed on 30.6.2015. The Balance Sheet as on 30.6.2015 is as follows (realisable value indicated in brackets):

Liabilities	₹	Assets	₹
Mortgage Loan (on Freehold)	20,000	Freehold (₹ 60,000)	80,000
Bank O/D (secured by second mortgage on Freehold)	80,000	Plant and Machinery (₹ 36,000)	60,000
Preferential creditors	3,000	Fixture (₹ 2,000)	6,000
Unsecured creditors	1,00,000	Stock (₹ 20,000)	40,000
Capital — Ploughman	44,000	Debtors (₹ 30,000)	50,000
		Cash	1,000
		Carter — Capital overdrawn	10,000
	2,47,000		2,47,000

The overdraft is secured, in addition to second mortgage, by Ploughman's personal guarantee, against which his investments have been deposited. Ploughman's investments are estimated to realise ₹ 34,000 and after meeting his guarantee his private estate was insolvent. Carter was solvent and ₹ 19,000 was available from his estate for firm's creditors.

Prepare:

(a) Statement of Affairs (indicating rate of dividend for unsecured creditors); (b) Deficiency Account; (c) Capital Accounts in the Ledger (assuming realisations are as per estimates).

13. The following particulars of M/s. Unfortunate, a firm consisting of two partners, Abdul and Rahim are given:
    (1) The firm was formed two years ago. The firm made a profit of ₹ 15,000 in the first year. Then it incurred substantial losses.
    (2) Mohammed, a minor, was admitted to the benefits of partnership from the beginning.
    (3) The firm is insolvent.
    (4) The financial position of the firm and the partners are given below: (all figures in ₹)

Liabilities	Firm	Abdul	Rahim	Mohammed
Mortgage loan	22,000	—	—	—
Unsecured creditors	10,000	2,000	5,000	—
Preferential creditors	10,000	—	—	—
Assets				
Buildings (realisable value ₹ 25,000)	20,000	—	—	—
Other assets (realisable value ₹ 5,000) [firm assets]	20,000	—	1,000	10,000

    (5) Other assets of Mohammed include ₹ 5,000 deposited in a Bank. This represented the share of profit drawn from the firm,
    (6) The partners Abdul and Rahim each had contributed ₹ 10,000 and Mohammed, the minor, contributed ₹ 5,000 when the business was commenced. The partners shared profits equally.

Prepare the Statement of Affairs of the firm and of two partners and also the firm's Deficiency Account.

Voyage Accounts

Introduction

A voyage is a journey made by water or in space. Voyage accounting is accounting for a voyage which includes both the outward and return journies. In this chapter, we are concerned with voyage accounting in the shipping industry.

In the shipping industry, voyages are numbered and each voyage is separately accounted for. A Voyage Account is just like a Profit and Loss Account in form — the only difference is that it is not prepared for a particular accounting period but for a particular voyage and includes both outward and return journey of the vessel.

Voyage Account is debited with all expenses relating to the voyage, including stores, wages, insurance, commission, brokerage, depreciation, etc. On the other hand, this account is credited with all earnings, freight, passage money (if any). This account is closed at the end of the voyage and the profit or loss is ascertained after making proper adjustment for any balances of unconsumed stores or fuel. These unconsumed stores and fuel are carried forward to the succeeding Voyage Account of the same vessel. The profit or loss is transferred to General Profit and Loss Account. If the voyage is incomplete at the end of the accounting year, a proportionate amount of expenses and incomes earned are carried forward to the next year as ***Voyage-in-Progress***.

Important Terms/Expressions in connection with Voyage Accounting

Address Commission This is a commission paid by the shipping companies to the brokers for procurement of freight from different parties. If a ship has been chartered, the commission is payable either to the agents of the charterers or to the charterers themselves. It is computed as a percentage on the freight earned including primage (discussed below) and it is debited to Voyage Account as an expense.

Primage This is an additional freight, calculated as a percentage of freight earned. Previously, it represented the commission payable to the captain of the ship to encourage him in the safe delivery of the cargo. However, at present it is an income of the shipping company and credited to Voyage Account.

Passage Money It is collected from a few passengers carried side by side with the merchandise. It is an income of the shipping company and is credited to the Voyage Account.

Bunker Costs The term 'bunker' means the bin where ship's coal are kept. Now-a-days in place of coal, diesel and fuel are used. Cost incurred for diesel, fuel and fresh water is termed as 'Bunker Costs".

Port Charges Amount payable to the port authority for using the port facility for loading and unloading of the cargo is called Port Charges.

Illustration 1

S.S. Jai Hind commenced a voyage on 1st October 2014 from Bombay to London and back. The voyage was completed on 30th November, 2014. It carried a consignment of tea on its outward journey and of Machinery on its return journey. The ship was insured and the annual premium was ₹ 1,20,000. Prepare Voyage Account from the following particulars:

Particulars	₹	Particulars	₹
Freight earned (Outward)	5,00,000	Sundry expenses	25,000
Freight eaned (Inward)	3,50,000	Passage money received	50,000
Port dues	25,000	Lighterage charges	33,000
Bunker	1,50,000	Depreciation (Annual)	4,80,000
Wages and salaries	2,50,000	Address comm. 5% on outward and 4% on inward freight	
Stores	84,000	Primage is 5% on freight	

The manager is entitled to 5% commission on the profit earned after charging such commission. Stores and coal on hand were valued at ₹ 15,000 on 30th November, 2014.

Solution **Voyage Account of S.S. Jai Hind**

Dr. **[Voyage No. ...; Period : 1st October to 30th November, 2014]** **Cr.**

Particulars	₹	Particulars		₹
To Port dues	25,000	By Outward freight	5,00,000	
To Bunker	1,50,000	*Add* : Primage 5%	25,000	5,25,000
To Wages and salaries	2,50,000	By Inward freight	3,50,000	
To Stores	84,000	*Add* : Primage 5%	17,500	3,67,500
To Sundry expenses	25,000	By Passage money		50,000
To Lighterage charges	33,000	By Closing stock of stores & coal		15,000
To Depreciation (Note 1)	80,000			
To Insurance (Note 2)	20,000			
To Address commission (Note 3) :				
— 5% on outward freight	26,250			
— 4% on inward freight	14,700			
To Manager's commission (Note 4)	11,883			
To Net Profit — Transferred to Profit & Loss A/c	2,37,667			
	9,57,500			9,57,500

Working Notes :

(1) Depreciation for 2 months = ₹ 4,80,000 / 12 x 2 = ₹ 80,000.

(2) Insurance for 2 months = ₹ 1,20,000/12 x 2 = ₹ 20,000.

(3) Address commission is payable on freight and primage. Address commission on outward freight — 5% of ₹ 5,25,000 = ₹ 26,250; Address commission on inward freight — 4% of ₹ 3,67,500 = ₹ 14,700.

(4) Profit before charging commission is ₹ 2,49,550; Commission payable to manager — 5/105 x ₹ 2,49,550 = ₹ 11,883.

Illustration 2

The S. S. Odyssey undertook a voyage from Athens to Calcutta starting 1st January, 2015 and reaching on 31st March, 2015. The cargo consisted of 900 tonnes of foodgrains and 100 tonnes of engineering goods. The freight charges were ₹ 150 per tonne for foodgrains and ₹ 100 per tonne for engineering goods. In addition, primage was 10%. Brokerage was payable at 5%. The expenses were :

Expenses	Athens (₹)	Calcutta (₹)	Other expenses	₹
Coal and diesel	20,000	—	Stores	10,000
Port charges	9,000	2,000	Discharging expenses	2,000
Harbour wages	3,000	1,000	Postage	1,000
Loading charges	2,000	—	Salaries of crew	10,000

The ship was insured for ₹ 10,00,000 at 1% for voyage policy of Hull. The freight was insured @ $^1/_2$%. Depreciation is charged on the written-down value of the ship at 5% per annum. The value as on 1st January, 2015 was ₹ 8,00,000. Prepare the Voyage Account.

Solution **Voyage Account of S.S. Odyssey**

Dr. **[Voyage No. ...; Period : 1st January to 31st March, 2015]** **Cr.**

Particulars	₹	Particulars		₹
To Coal and diesel	20,000	By Freight (Note 1)	1,45,000	
To Port charges	11,000	*Add* : Primage 10%	14,500	1,59,500
To Harbour wages	4,000			
To Loading charges	2,000			
To Other expenses :				
Stores	10,000			
Discharging expenses	2,000			
Postage	1,000			
Salaries of Crew	10,000			
To Depreciation (Note 1)	10,000			
To Insurance :				
Hull (1% on ₹. 10,00,000)	10,000			
Freight ($^1/_2$% on ₹ 1,59,500)	798			
To Brokerage (5% on ₹ 1,59,500)	7,975			
To Net Profit — Transferred to Profit & Loss A/c	70,727			
	1,59,500			1,59,500

Working Notes :

(1) Calculation of Freight Earned	₹	(2) Calculation of Depreciation	₹
Foodgrains (900 x ₹ 150)	1,35,000	₹ 8,00,000 x 5/100 x 3/12	₹ 10,000
Engineering Goods (100 x ₹ 100)	10,000		
	1,45,000

M.V. Indian Empress is regularly employed on cargo trade between India and East Africa. Ship set on her voyage on 1st July, 2015 and arrived at her destination on 14th August, 2015. You are requested to prepare a Voyage Account bearing in mind the following particulars:

(i) The vessel was purchased in 2007 for ₹ 100 lakhs and at the time of purchase had 16 years of working life left; (Depreciation on ship is charged on straight line basis).

(ii) Standing cost per day excluding recovery of depreciation is ₹ 22,000.

(iii) The vessel consumes daily 14 tonnes of fuel oil, 2 tonnes of diesel and 15 tonnes of fresh water. The costs of these are ₹ 1,000, ₹ 1,350 and ₹ 20 per tonne respectively.

(iv) The vessel loaded the under-mentioned cargo:
4,000 tonnes on which freight of ₹ 375 per tonne was charged and 3,500 tonnes on which the rate of freight was ₹ 190 per tonne. Both the rates are to be enhanced by a surcharge of 20% over the basic rates.

(v) Freight brokers were due a brokerage of 2-$^1/_2$%.

(vi) Port charges at loading and discharging ports were ₹ 40,000 and ₹ 85,000 respectively.

Solution **Voyage Account of M.V. Indian Express**

Dr. **[Voyage No. ...; Period : 1st July to 14th August, 2015]** **Cr.**

Particulars	₹	Particulars	₹
To Standing cost (₹ 22,000 x 45)	9,90,000	By Freight (Note 1)	25,98,000
To Bunker cost (Note 2)	7,65,000		
To Port charges (₹ 40,000 + ₹ 85,000)	1,25,000		
To Depreciation (Note 3)	77,055		
To Brokerage (Note 4)	64,950		
To Net Profit — Transferred to Profit & Loss A/c	5,75,995		
	25,98,000		25,98,000

Working Notes :

(1) Calculation of Freight Earned	₹	(2) Bunker Cost	₹
4,000 tonnes @ ₹ 375 per tonne	15,00,000	Fuel (14 x 45 x ₹ 1,000)	6,30,000
3,500 tonnes @ ₹ 190 per tonne	6,65,000	Diesel (2 x 45 x ₹ 1,350)	1,21,500
	21,65,000	Fresh water (15 x 45 x ₹ 20)	13,500
Add : Surcharge 20%	4,33,000		7,65,000
	25,98,000	**(4) Brokerage**	
(3) Depreciation for 45 days		$2^1/_2$% on ₹ 25,98,000	64,950
₹ 1,00,00,000 x 1/16 x 45/365	77,055		

Illustration 4

S.S. Kanishka sailed from Calcutta Port on 1.2.2015 and arrived at Madras Port on 31.3.2015 via Visakhapatnam Port on voyage no. 403. The following goods were loaded:

1,000 m.t. and 200 m.t. at Calcutta Port for Madras Port and Visakhapatnam Port respectively. Another 500 m.t. were loaded at Visakhapatnam for Madras. The freight charges were:

Calcutta Port to Madras Port	₹ 600 per m.t.
Calcutta Port to Visakhapatnam Port	₹ 500 per m.t.
Visakhapatnam Port to Madras Port	₹ 400 per m.t.

The freight is subject to 10% primage, 5% address commission and 2.5% brokerage. The freight was insured at $^1/_2$%. The hull was insured for the voyage at 1%. Depreciation was provided at 3% p.a. The cost of the ship is ₹ 1 crore. The following were the expenses incurred at different ports: (all figures in ₹)

	Calcutta	Visakhapatnam	Madras
Port charges	36,000	20,000	20,000
Coal	1,00,000	30,000	—
Captains contingencies	7,000	2,000	10,000
Harbour wages	10,000	20,000	15,000

Stores purchased for the voyage amounted to ₹ 50,000. Opening stock of stores was ₹ 40,000 and closing stock was estimated at ₹ 30,000. Stock of coal at close was estimated at ₹ 30,000 as against stock of ₹ 10,000 at the beginning. The ship was not come back to Calcutta port in the near future as part of the voyage programme. Salaries and wages amounted to ₹ 80,000 p.m. Prepare this Voyage No. 403 Account.

Solution

Voyage Account of S.S. Kanishka

Dr. [Voyage No. 403.; Period : 1st February to 31st March, 2015] Cr.

Particulars	₹	Particulars		₹
To Port charges	76,000	By Freight (Note 2)	9,00,000	
To Coal consumed (Note 1)	1,10,000	*Add* : Primage 10%	90,000	9,90,000
To Stores consumed (Note1)	60,000			
To Catain's contingencies	19,000			
To Address commission (Note 3)	49,500			
To Harbour wages	45,000			
To Brokerage (Note 4)	24,750			
To Freight Insurance (Notes 5)	4,950			
To Hull insurance (1% of ₹ 1 crore)	1,00,000			
To Hull depreciation (Note 6)	50,000			
To Salaries & wages (₹ 80,000 x 2)	1,60,000			
To Net Profit — Transferred to Profit & Loss A/c	2,90,800			
	9,90,000			9,90,000

Working Notes :

(1) Calculation of Stores & Coal Consumed	Stores ₹	Coal ₹
Opening Stock	40,000	10,000
Add : Purchases	50,000	1,30,000
	90,000	1,40,000
Less : Closing Stock	30,000	30,000
	60,000	1,10,000

(2) Calculation of Freight Earned	₹
Calcutta to Madras 1,000 tons @ ₹ 600	6,00,000
Calcutta to Visakhapatnam 200 tonnes @ ₹ 500	1,00,000
Visakhapatnam to Madras 500 tonnes @ ₹ 400	2,00,000
Total	9,00,000

(3) Address commission is payable on freight and primage @ 5%. Therefore, address commission is 5% of ₹ 9,90,000 = ₹ 49,500.

(4) Brokerage is payable @ 2.5% on freight including primage. Therefore, total brokerage = ₹ 9,90,000 x 2.5/100 = ₹ 24,750.

(5) Freight insurance is payable @ 1/2% on ₹ 9,90,000, i.e., ₹ 4,950.

(6) Depreciation = 3% of ₹ 1,00,00,000 = ₹ 3,00,000 p.a. Therefore, depreciation for 2 months will be ₹ 3,00,000/12 x 2 = ₹ 50,000.

Illustration 5

S.S. Jalasakti sailed from Bombay on 1st February, 2015 and arrived at Calcutta on 31st March, 2015 via Marmagoa, Cochin and Vizag. She was loaded with 800 tons of cotton at Bombay for Vizag. At Cochin a further load of 600 tons of cocoanut oil was booked for Calcutta. Besides, 100 tons of textiles were also loaded at Bombay for Marmagoa. The freight charges were as follows:

Bombay to Vizag : ₹ 80 per ton; Bombay to Marmagoa : ₹ 25 per ton; and Cochin to Calcutta : ₹ 60 per ton plus primage 10% and subject to commission at 4% and brokerage at 2%. The following were the expenses at different ports :

	Bombay (₹)	Marmagoa (₹)	Cochin (₹)	Vizag (₹)	Calcutta (₹)
Coal	14,000	—	—	2,000	—
Port charges	4,000	600	1,000	1,000	3,000
Captain's expenses	800	500	300	600	700
Harbour wages	1,200	700	1,100	1,200	2,000
Loading charges	1,600	—	1,200	—	—

The following were the other expenses:

Stores supplied ₹ 8,400; Discharging expenses ₹ 5,200; Despatching of funds ₹ 400; Interest on advances ₹ 500; Portage bills ₹ 600.

The ship was insured for ₹ 5,00,000 at 1.5% premium for the voyage and the total freight was insured at $^1/_2$% premium. Depreciation is to be charged on the book value of the ship at ₹ 4,50,000 at 4% p.a. The wages of the sailors are ₹ 8,400 per month. Prepare the Voyage Account.

Solution **Voyage Account of S.S. Jalasakti**

	1,12,750			1,12,750

Working Notes :

(1) Calculation of Freight Earned	₹	**(2) Calculation of Depreciation**	₹
Bombay to Vizag : 80 tonnes @ ₹ 80 per tonne	64,000	₹ 4,50,000 x 4/100 x 2/12	3,000
Bombay to Marmagoa : 100 tonnes @ ₹ 25 per tonne	2,500		
Cochin to Calcutta : 600 tonnes @ ₹ 60 per tonne	36,000		
	1,02,500		

Illustration 6

S.S. Himalaya set out on a voyage from Calcutta to Bombay. On December 31, 2014 on which date the accounts are to be closed, the return voyage had not been completed. The details for the entire voyage to Bombay and back to Calcutta completed after December 31 were :

Freight ₹ 4,00,000; Coal consumption ₹ 70,000; Stores consumed ₹ 30,000; Port charges ₹ 15,000; Salaries of the crew ₹ 40,000; Depreciation ₹ 40,000; Insurance (ship) ₹ 20,000; Insurance (freight) ₹ 8,000; Primage 10%; Address commission 5%. Only ₹ 1,50,000 freight was available on the return journey. Prepare the Voyage Account up to December 31.

Solution **Voyage Account of S.S. Himalaya**

Dr. **[Voyage No. ...; Period : ... ... 2014 to 31.12.2014]** **Cr.**

Particulars	₹	Particulars		₹
To Coal consumed	70,000	By Freight	4,00,000	
To Stores consumed	30,000	*Add* : Primage 10%	40,000	4,40,000
To Port charges	15,000	By Voyage in progress (Note 2)		1.18,750
To Salary of the crew	40,000			

To Insurance :				
Ship		20,000		
Freight		8,000		
To Address commission (Note 1)		22,000		
To Depreciation		40,000		
To Voyage in progress :	₹			
— Freight	1,50,000			
— Primge 10%	15,000	1,65,000		
To Net Profit — Transferred to Profit & Loss A/c		1,48,750		
		5,58,750		5,58,750

Working Notes :
(1) Address Commission is payable on freight and primage @ 5%. Therefore, address commission is 5% of ₹ 4,40,000 = ₹ 22,000.

(2) Voyage in Progress	₹
1/2 of total expenses (excluding address commission and freight insurance) i.e., ₹ 2,15,000*	1,07,500
Address commission & freight insurance $\left[\frac{1,50,000}{4,00,000} \times (8,000 + \text{Rs } 22,000)\right]$	11,250
* It is assumed that the expenses on the full return voyage have also been already included.	1,18,750

Illustration 7

Bharat Shipping Ltd. of Bombay acquired a new ship, M.V. Jalabahi at a cost of ₹ 25,00,000. The ship was ready for service on 1.1.2015. Upto 31.3.2015, the ship had made 2 complete voyages one to London and back and was half way through the next to London. The ship carried the following freight :

To London 7,500 tonnes @ ₹ 30 per tonne. From London 9,000 tonnes @ ₹ 25 per tonne. Unfinished voyage 9,500 tonnes @ ₹ 25 per tonne. The following expenses were incurred: Salaries and wages of crew ₹ 80,000; Fuel ₹ 40,000; Sundry stores ₹ 8,000; Port dues — Bombay ₹ 8,400 and London ₹ 6,000; Stevedoring @ ₹ 2 per tonne ₹ 52,000; Share of overhead for the ship for the period ₹ 30,000.

You are further informed that 5% commission was paid to agents in addition to 1% address commission. An insurance policy was taken out @ 2% p.a. on the ship and freight was insured at a premium of ₹ 1,200 p.a.

You are required to prepare the Voyage Account for the period of 3 months ending on 31.3.2015.

M.V. India Glory is employed on conference trade and is on a regular run between India and the United Kingdom. The conference freight rate is ₹ 200 per freight tonne to be enhanced by a surcharge of 20% for port congestion and an adjustment of + $7^1/_2$% for currency factor.

The vessel arrived in Calcutta on 20th February, 2015 and started loading cargo. Loading was over on 1st March (morning) when she set sail for London where she arrived on the night of the 20th of March 2015. Unloading of the cargo was over and the vessel commenced her next employment on 1st April, 2015 (evening). The total voyage time was calculated at 40 days.

At Calcutta, the ship took in 8,500 freight tonnes. The following direct expenses were incurred :

(i) Entry fee, tug hire, berth hire at Calcutta ₹ 72,000.
(ii) Port charges at London ₹ 85,000.
(iii) Hooghly river dues and light house dues ₹ 7,600.
(iv) Insurance premia on cargo at 0.25% of the basic freight rate.
(v) Stevedoring charges are ₹ 18 and ₹ 25 per freight tonne at Calcutta and London respectively.
(vi) Consumption of bunkers:
  (a) During port stay — 4 tonnes of fuel oil and 25 tonnes of fresh water per day.
  (b) On sailing days — 12 tonnes of fuel oil and 10 tonnes of fresh water per day;
  Cost of fuel oil — ₹ 1,350 and fresh water ₹ 25 per tonne.
(vii) Annual costs of maintenance of ship (you can adopt 360 days as normal working days in a year):
  (a) Salaries to officers and crew ₹ 30,00,000.
  (b) Insurance premia ₹ 12,15,000.
  (c) Repairs and maintenance ₹ 25,00,000.
  (d) Interest on loan and capital ₹ 11,25,000.
  (e) Working life of vessel bought for ₹ 75 lakhs is to be taken as six years.
(viii) Freight brokerage at $1^1/_2$% is payable.

Kindly draw a Voyage Account and ascertain the result of the voyage.

Solution

Voyage Account of M.V. India Glory

Dr. [Voyage No. ...; Period : 20th February to 31st March, 2015] Cr.

Particulars	₹	Particulars		₹
To standing charges (Note 1)	10,10,000	By Freight :		
To Consumption of bunkers (Note 2)	4,49,500	8500 x ₹ 20137,00,000		
To Entry fee, tug hire, berth hire at Calcutta	72,000	*Add* : Surcharge @ 20%	3,40,000	
To London port charges	85,000		20,40,000	
To Hooghly river dues and light house dues	7,600	*Add* : Currency factor =$7^1/_2$%	1,53,000	
To Stevedoring charges (Note 3)	3,65,500		21,93,000	
To Cargo insurance (Note 4)	4,250	*Less* : Brokerage $1^1/_2$%	32,895	21,60,105
To Net Profit — Transferred to Profit & Loss A/c	1,66,255			
	21,60,105			21,60,105

Working Notes :

(1) Calculation of Proportionate Standing Charges	₹
Depreciation (1/6 of ₹ 75,00,000)	12,50,000
Salaries of officers and crew	30,00,000
Insurance premia	12,15,000
Repairs & maintenance	25,00,000
Interest on loan capital	11,25,000
Annual Standing Cost	90,90,000

Standing charges for 40 days = ₹ 90,90,000 x 40/360 = ₹ 10,10,000

(2) Consumption of Bunkers	Fuel oil (Tonnes)	Fresh water (Tonnes)
Port Stay 20 days	80	500
Sailing 20 days	240	200
Total consumption (A)	320	700
Cost per tonne (B)	₹ 1,350	₹ 25
Total (A x B)	4,32,000	17,500

(3) Stevedoring Charges @ ₹ 43 (18 + 25) on 8,500 tonnes = ₹ 3,65,500.

(4) Cargo Insurance @ 1/4% on 8,500 tonnes @ ₹ 200 per tonne = ₹ 4,250.

Illustration 9

S. S. Jalaksha voyaged from Visakhapatnam for Calcutta on 1st February, 2015. On 31st March, 2015, when the accounts of the company are closed, S.S. Jalakha was on her way back to Visakhapatnam from Calcutta on Voyage No. 707, having covered half of the return voyage. The following details of expenses and income for the entire voyage to and from Calcutta are furnished :

	₹
Freight charges	8,00,000
Port charges	30,000
Salary of crew	80,000
Consumption of : Coal	1,40,000
Stores	60,000
Insurance of : Ship for the voyage	1,00,000
Freight	40,000
Depreciation of the ship for the two months of the voyage	80,000

Primage is at 10% on freight charges. Address commission is at 5% on freight charges and primage. Only ₹ 3,00,000 freight was available on return journey to Visakhapatnam. Three-fourths of the total voyage including return journey is complete on 31st March, 2015. Of the total expenses, expenses unconnected with freight shall be carried forward as "in process" for the balance of the journey. As freight is actually earned only on completion of a voyage, you have to carry forward the freight in respect of the return journey as well as all incidental incomes.

Prepare Voyage Account for the period 1st February, 2015 to 31st March, 2015.

Solution

Voyage Account of S. S. Jalaksha

M.V. Indian Glory owned by Hindustan Shipping Company Ltd., on the Bombay-London lines trade. Her daily standing charges (fixed costs) are ₹ 45,000. In the period between July 1 and December 31, 2014 the ship had finished one round voyage to London and on the date when the books of account of the company were closed at the end of the year, the vessel was on her way to London, having sailed out of Bombay after midnight of 21st December. Loading for London commenced on 1.12.2014.

From the following details, prepare a Voyage Account.

Freight earned:

(a) Completed voyage — Bombay to London : (1) 20,000 tonnes textiles at ₹ 280 per tonne;
10,000 tonnes copra at ₹ 340 per tonne.
On textiles a surcharge of 10% was also recovered.
London to Bombay : 32,000 tonnes of urea at ₹ 300 per tonne.

(b) Unfinished voyage : 30,000 tonnes of general cargo at ₹ 240 per tonne plus a surcharge of 15%.

Expenses :

(a) Stevedoring expenses : (i) at ₹ 20 per tonne at Bombay for general cargo and ₹ 25 per tonne for textiles and copra; (ii) at London on a uniform rate of £ 1 per tonne.

(b) Fuel consumption :
(i) On sailing days : 30 tonnes of fuel oil per day; 5 tonnes of diesel per day.
(ii) On days in port : 10 tonnes of fuel oil per day; 5 tonnes of diesel per day.
(iii) Cost per tonne : Fuel oil ₹ 1,400 per tonne; diesel ₹ 2,500 per tonne.

(c) Port dues : at London £ 2,000; at Bombay ₹ 2,40,000 (inclusive of ₹ 60,000 for the incomplete voyage).

(d) Sundry stores ₹ 60,000.

(e) During the period, the vessel was in Bombay port for 70 days and in London port for 40 days.

(f) Conversion rate per £ 1 could be adopted at ₹ 20.

Solution

Voyage Account of M.V. Indian Glory

To Stevedoring charges (Note 3)	32,30,000		
To Port dues	2,80,000		
To Sundry stores	60,000		
To Voyage-in-Progess (c/d)	82,80,000		
To Net Profit — Transferred to Profit & Loss A/c	35,28,500		
	3,06,06,500		3,06,06,500

Working Notes :

(1) Calculation of Freight Earned	₹
Bombay to London :	
20,000 tonnes of textile @ ₹ 308 (i.e., 280 + 10%) per tonne	61,60,000
10,000 tonnes of copra @ ₹ 340 per tonne	34,00,000
London to Bombay :	
32,000 tonnes of urea @ ₹ 300 per tonne	96,00,000
Unfinished voyage :	
30,000 tonnes of general cargo @ ₹ 276 per tonne (i.e., 240 + 15%)	82,80,000
	2,74,40,000

(2) Fuel Consumption	Fuel oil (Tonnes)	Diesel (Tonnes)
Stay at port 110 days	1,100	550
Sailing 74 days	2,220	370
	3,320	920
Cost of fuel oil @ ₹ 1,400 per tonne and diesel @ ₹ 2,500 per tonne	₹ 46,48,000	₹ 23,00,000

(3) Stevedoring Charges	₹
At Bombay :	
30,000 tonnes of textiles & copra @ ₹ 25 per tonne	7,50,000
At London :	
30,000 tonnes of textiles & copra @ ₹ 20 per tonne	6,00,000
32,000 tonnes of urea @ ₹ 20 per tonne	6,40,000
At Bombay :	
32,000 tonnes of urea @ ₹ 20 per tonne	6,40,000
30,000 tonnes of general cargo @ ₹ 20 per tonne	6,00,000
	32,30,000

(4) Expenses of Incomplete Voyage	₹
Fuel oil (Note 5)	7,14,000
Diesel (Note 5)	3,87,500
Stevedoring charges	6,00,000
Port charges	60,000
Standing charges for 31 days @ ₹ 45,000	13,95,000
Sundry Stores (1/6 on time basis)	10,000
	31,66,500

(5) Fuel Consumption on Incomplete Voyage	Fuel oil (Tonnes)	Diesel (Tonnes)
Stay at port 21 days	210	105
Sailing 10 days	300	50
	510	155
Cost per tonne	1,400	2,500
Total	7,14,000	3,87,500

Key Points

- A Voyage Account is just like a Profit and Loss Account in form — the only difference is that it is not prepared for a particular accounting period but for a particular voyage and includes both outward and return journey of the vessel.
- ***Address Commission:*** This is a commission paid by the shipping companies to the brokers for procurement of freight from different parties.
- ***Primage*** : This is an additional freight, calculated as a percentage of freight earned.
- ***Passage Money*** : It is collected from a few passengers carried side by side with the merchandise. It is an income of the shipping company and is credited to the Voyage Account.

THEORETICAL QUESTIONS

1. What is a Voyage Account ? Why is it prepared ?
2. Write short notes on : (i) Address commission; (ii) Bunker cost; (iii) Primage; and (iv) Passage money.

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each statement or answer each question below :

1. A voyage is a journey made by water or
   A road
   B in space
   C none of these.
2. A voyage account, in form, is just like a
   A trading account
   B rofit and loss account
   C none of these.
3. Address commission is calculated as a percentage on the freight earned including
   A primary
   B passage money
   C none of these.
4. The voyage account is closed at the end of the
   A accounting period
   B voyage
   C none of these.
5. The voyage account is prepared for a particular
   A voyage
   B accounting period
   C none of these.

PRACTICAL QUESTIONS

1. S.S. Maharaja commenced a voyage on 1st April, 2015 from Bombay to London and back. The voyage was completed on 31st May, 2015. She carried a consignment of tea on her outward journey and of woolen garments on her return journey. The ship was insured at an annual premium of ₹ 24,000.
   From the following particulars, prepare a Voyage Account:

Particulars	₹	Particulars	₹
Port charges	4,800	Annual depreciation	84,000
Coal	30,000	Freight earned(Outward)	1,10,000
Wages	50,000	Freight earned (Return)	75,000
Sundry expenses	12,000	Passage money received	10,000
Stores purchased	16,000	Stores & coal in total were in hand at the end of journey	6,000

Address commission @ 4% on outward and 5% on return freight. The manager is entitled to the commission of 10% on the profit earned before charging such commission.

2. S.S. Sagarika commenced a voyage on 1st June, 2015 from Bombay to London and back. The voyage was completed on 31st July, 2015. She carried tea cargo on its outward journey and machinery on her return journey. The ship was insured at an annual premium of ₹ 24,000. Prepare a Voyage Account from the following information :

Particulars	₹	Particulars	₹
Port dues	5,000	Bunker Coal	30,000
Salaries & wages	50,000	Stores	16,800
Miscellaneous expenses	11,600	Depreciation (annual)	96,000
Freight earned —		Passage money received	10,000
Outward	1,00,000	Lighterage charges	5,000
Return	70,000		

Address commission received @ 5% on outward and 4% on inward freight. Primage is 5% on freight. Stores and coal on hand on 31st July, 2015 was valued at ₹ 3,000. Commission to manager is payable at 5% on the profit earned on this voyage after charging such commission.

3. Great India Shipping Co. Ltd. of Bombay acquired a new ship M.V. Sumudra at a cost of ₹ 37,50,000. The ship was ready for service on 1st April, 2015. An insurance policy was taken out at 2% p.a. on the ship, freight was insured at ₹ 10,000 per annum. During 3 months ended 30th June, 2015, the ship completed one round trip to Calcutta and was half through the second trip (single way) to Calcutta.
The ship carried the following cargo:
To Calcutta — 9,000 tons @ ₹ 300 per ton (2 trips)
From Calcutta — 10,000 tons @ ₹ 270 per ton (2 trips)
To Calcutta — 12,000 tons @ ₹ 250 per ton (1 trip).
5% commission was paid to agents in addition to 1% address commission. The expenses were as follows:
Salaries and wages of the crew ₹ 8,00,000; Fuel ₹ 4,00,000; Sundry stores ₹ 80,000; Port dues (Bombay ₹ 70,000; Calcutta ₹ 50,000) ₹ 1,20,000; Stevedoring at ₹ 20 per ton — ₹ 6,20,000; Share of overheads for the ship for the period ₹ 2,50,000. Provide depreciation for the period at 5% per annum. Prepare the Consolidated Voyage Account for the period of three months ending 30th June, 2015.

4. The following details are furnished by a Shipping Company in connection with voyage no. 45 which was commenced from port A on 1st February 2015. The ship arrived at port D on 31st March, 2015 when the voyage was completed. 2,000 tons and 500 tons were loaded at port A for port D and C respectively. Another 300 tons were loaded at C for D. The freight charges were : A to D ₹ 100 per ton; A to C ₹ 80 per ton; and C to D ₹ 50 per ton.
The freight is subject to 10% primage, 5% address commission and 3% brokerage. The freight was insured at $^1/_2$%. The hull was insured for the voyage @ 1%. Depreciation is provided @ 5% p.a.

Particulars	A (₹)	B (₹)	C (₹)	D (₹)
Port Charges	5,000	1,000	3,000	3,000
Coal	18,000	—	4,000	—
Captain's expenses	1,200	800	600	900
Harbour wages	4,000	—	3,000	2,500

Stores provided at commencement amounted to ₹ 8,000. Opening stock of stores was ₹ 5,000 and closing stock is estimated at ₹ 2,000. Stock of coal at close is estimated at ₹ 4,500 as against stock ₹ 1,500 beginning. Salaries and wages of sailors etc., amount to ₹ 12,000 per month. Prepare the Voyage Account.

5. Packard Streamship Ltd. owes a tramp steamer by name "M.V. Vaikunt" which was chartered on a voyage on 1st March, 2015 on the following terms:
(i) Bombay to Basra with general cargo at ₹ 500 per tonne. The charter stipulates for an address commission to the charterers at 2% of the freight payable on raising the bill of lading together with a brokerage of 5% to the charter's agent, one third of which is repayable to the ship.
(ii) Basra to Dubai with fertilizers at ₹ 240 per tonne. Address commission of 2% on freight payable to charterers and a brokerage of 1% is payable to agents on signing the charter.
The vessels is insured with Lloyds on an annual premium of ₹ 6,60,000. The master of the vessel is entitled to 1% of the net profits of each voyage after charging such commission.
Further details are:
Repairs and renewals : At Bombay ₹ 40,000 and at Basra ₹ 18,000.
Stores suppliers and provisions : At Bombay ₹ 1,40,000 at Basra ₹ 1,60,000 and at Dubai ₹ 90,000 out of which ₹ 40,000 was in stock at conclusion of voyage.
Consumption of Bunkers : Fuel oil 6 tonnes a day, diesel 2 tonnes a day and fresh water 25 tonnes a day while the vessel in port and fuel oil 15 tonnes a day, diesel 2 tonnes a day and fresh water 25 tonnes a day while sailing. Fuel oil, diesel and fresh water cost ₹ 1,200; ₹ 2,500 and ₹ 50 per tonne respectively.

Stevedoring charges : At Bombay ₹ 20 per tonne; at Basra ₹ 15 per tonne for loading and ₹ 20 per tonne for discharging and at Dubai ₹ 12 per tonne for load/discharge.
Captain's expenses : At Basra ₹ 16,000 and at Dubai ₹ 20,000.
Port charges : At Bombay ₹ 60,000; at Basra ₹ 70,000 and at Dubai ₹ 54,000.
The steamer loaded the following cargo : At Bombay general cargo 8,000 tonnes, out of which 6,000 tonnes were to be discharged at Basra and the rest at Dubai. The freight from Bombay to Dubai was fixed at ₹ 600 per tonne.
At Basra : Fertiliser - for discharge at Dubai 6,000 tonnes.
The ship completed the voyage on 30th April, 2015. Number of sailing days as per ship's log came to 16.
Prepare a Voyage Account bearing in mind that the company has to provide towards special survey repairs of the ship ₹ 24 lakhs every year.

6. S.S. Brahmaputra commenced a voyage on 1st October, 2014 from Bombay to London and back. The voyage was completed on 30th November, 2014. It carried a consignment of Tea on its outward journey and of Machinery on its return journey. The ship was insured at an annual premium of ₹ 1,32,000.
You are given the following particulars in connection with the voyage:

Particulars	₹	Particulars	₹
Port due	30,000	Sundry expenses	40,000
Bunker	1,75,000	Passage money received	75,000
Wages & salaries	2,80,000	Lighterage charges	45,000
Stores	90,000	Depreciation (annual)	4,80,000
Freight : Outward	5,60,000		
Freight : Inward	4,00,000		

Address commission 5% on outward and 4% on inward freight.
Primage is 5% on freight.
The manager is entitled to 5% commission on the freight earned after charging such commission. Stores and coal on hand were valued at ₹ 11,997 on 30th November, 2014.
Prepare the Voyage Account.

Guide to Answers

Multiple Choice

1. B; 2. B; 3. A; 4. B; 5. A.

Practical Questions

1. **Manager's commission — ₹ 6,205; Profit on voyage — ₹ 35,845.**
2. **Address commission — ₹ 8,190; Manager's commission — ₹ 2,139; Profit on voyage — ₹ 42,771.**
3. **Cost of voyage in progress — ₹ 7,62,958; Profit on voyage — ₹ 33,20,833.**
4. **Profit on voyage — ₹ 1,55,658.**
5. **Commission to master — ₹ 28,114; Profit on voyage — ₹ 28,11,436.**

42

Royalty Accounts

Introduction

The owner of an asset (e.g. mines, quarries, patent, copyright, etc), as a business arrangement, may allow another party (lessee, licencee, publisher, etc) the right to use that asset against some consideration. Such a consideration is calculated with reference to the quantity produced or sold. This payment to the owner by the user of the asset is termed as ***royalty***. We can therefore say that the royalty is the amount of consideration paid by one party to the owner of the asset in return for the right to use that asset. For example, when a publisher publishes a book, he makes a payment — royalty to the author which is based on the number of copies sold.

A royalty is, generally, paid to the owner of the right, under the following cases:

1. where the owner of a mine allows another the right to extract minerals from land;
2. where right such as patents or copyrights are licenced in favour of another;
3. where an author, artist or designer gives exclusive rights to another to copy the work.

In this chapter, the generic term 'landlord' has been used to include lessors, authors and patent owners and the term 'lessee' to include publishers, licencees, etc.

Some Terms / Expressions Used in Connection with Accounting for Royalty

Minimum Rent / Dead Rent

A contract is entered into between the landlord and the lessee for payment of royalty, ususally calculated upon the quantum of production or sale at a certain stipulated rate. This means that if there is little or no production or sale, the landlord would receive little or no royalty at all, thus undermining the monetary interest of the landlord. For some reasons or other, the lessee may not take that much dash and enthusiasm in the execution of the work to which royalty relates. To avoid such a situation, the landlord and the lessee agree upon a minimum periodical amount that the landlord will receive from the lessee, even if the actual royalty as calculated on the basis of actual production or sale is less than such minimum amount. This assured and mutually agreed periodical minimum amount is known as "***Minimum Rent***".

Example: Suppose royalty per ton of production is ₹ 100 and the minimum (annual) rent is ₹ 5,00,000. Now, if the actual production is 3,000 tons, then actual royalty would become ₹ 3,00,000. In this case the minimum rent of ₹ 5,00,000 will have to be paid by the lessee. On the other hand, if the actual production is 6,000 tons, then the actual royalty would become ₹ 6,00,000. In this case ₹ 6,00,000 will have to be paid by the lessee.

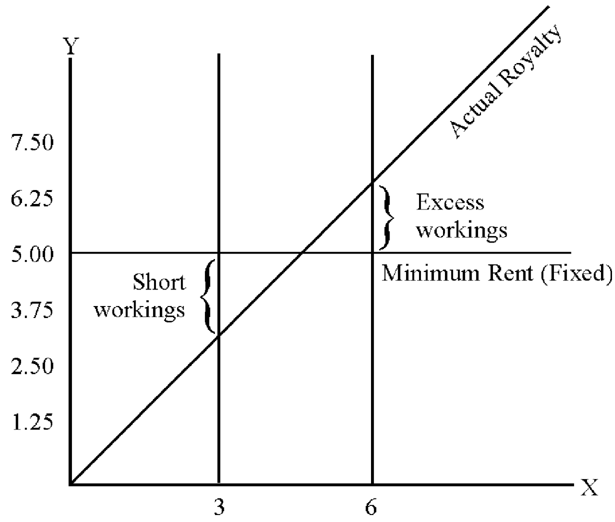
Thus, as there is a stipulation for minimum rent, then either the minimum rent or the actual royalty whichever is more shall have to be paid by the lessee.

The minimum rent is also called ***dead rent***, ***certain rent***, ***fixed rent***, etc.

Shortworkings / Redeemable Dead Rent

Shortworkings is the amount by which the minimum rent exceeds the actual royalty. In other words, it refers to the amount by which the actual royalty falls short of the minimum rent. In the above example, the shortworkings is ₹ 2,00,000 (₹ 5,00,000 – ₹ 3,00,000). Where there is shortworkings in any period the lessee is liable to pay the minimum rent and, in effect, shortworkings becomes the part of the minimum rent not represented by the use of rights.

The question of shortworkings will arise only when there is a stipulation for minimum rent in the agreement. The following diagram will help to understand the above matters:



Excess Workings / Surplus

It refers to the amount by which the actual royalty exceeds the minimum rent. In the above example, the excess workings is ₹ 1,00,000 (₹ 6,00,000 – ₹ 5,00,000) if the production is 6,000 tons.

Ground Rent / Surface Rent

It refers to the fixed yearly or half-yearly rent payable by the lessee to the landlord in addition to the minimum rent.

Recoupment of Shortworkings

Generally the royalty agreement contains a provision for carrying forward of shortworkings with a view to adjust it in the future. In the subsequent years, such shortworking is adjusted against the surplus royalty. This process of adjustment is called ***recoupment of shortworkings***. The right of recoupment of shortworkings enables the lessee to recover the excess payment, made in the earlier years (when actual royalty was less than minimum rent) in subsequent years. A time is usually set upon the number of years for which such shortworkings can be recouped. This time limit for recoupment of shortworkings may be fixed or fluctuating. If the shortworkings (partly or wholly) cannot be recouped within the specified time, they lapse and are charged to Profit and Loss Account in the year when that specified time limit for recoupment ends. Therefore, ***shortworkings are the losses of the lessee, not in the year of their occurence, but in the year they lapse***.

Fixed right : When the lessee can recoup shortworkings within a certain period from the date of the lease, it is termed as ***fixed right***. For example, shortworkings can be recouped within four years from the date of lease. The shortworkings of subsequent years cannot be recouped. (***Illustration 1***)

Fluctuating right : When the lessee can recoup shortworkings of any year during the next following year(s), as per agreement, it is termed as ***fluctuating right***. For example, shortworkings can be recouped in the next two years subsequent to the year of shortworkings.

Any shortworkings which cannot be recouped within the specified period becomes irrecoverable and it should be charged to Profit and Loss Account in the year in which it becomes so. However, the recoupable shortworkings should be carried forward and they are shown in the Balance Sheet as a current asset.

Creation of Provision Against Shortworkings

Recoupable shortworkings are shown in the Balance Sheet as a current asset though it is not certain that in future they can be recouped. For different reasons (such as fall in demand, increase in completion, etc) it may not be possible to recoup the shortworkings in future though the legal right to recoup exists. Therefore, as a prudent policy, a provision for recoupable shortworkings should be made by debiting Profit and Loss Account in the year in which shortworkings arise. In this case, in the Balance Sheet, provision is to be shown on the liability side and shortworkings on the assets side. The irrecoverable shortworkings are adjusted against such provision instead of charging it to the Profit and Loss Account of the year in which it becomes irrecoverable. After shortworkings are recouped, the excess provision is credited to Profit and Loss Account as a prior period adjustment.

The above method of accounting for shortworkings is adopted, when the amount of shortworkings is huge and chances of recovery uncertain.

Purpose of Fixing Minimum Rent

The following are the main purposes of fixing a minimum rent:

1. The landlord receives periodically at least a minimum rational amount.
2. The lessee is indirectly inspired for the sake of his own interest to reach a minimum level of performance.
3. In the absence of minimum rent, the lessee may acquire rights from different landlords to obviate competition and deliberately may under-utilise such rights.

How does Minimum Rent and Shortworkings Arise?

From lessee's point of view

When the amount of actual royalty as calculated on the actual production or sale at the agreed rate is less than the amount of minimum rent, minimum rent comes into picture. As stated earlier the shortfall of actual royalty as compared with the minimum rent is called shortworkings. Thus actual royalty is less than minimum rent,

Minimum rent – Actual royalty = Shortworkings.

or, ***Minimum rent = Actual royalty + Shortworkings***.

From landlord's point of view

Minimum rent = Actual royalty receivable + Shortworkings suffered by the lessee.

In fact, landlord is to receive the higher of the minimum rent and the actual royalty. Therefore, when the actual royalties fall short of minimum rent, he gets the minimum rent. In this case, the expression 'Royalty Suspense' is more appropriate than 'Shortworkings Allowable'.

Therefore, the equation will be: ***Minimum rent = Royalty receivable + Royalty suspense***

It is called "Royalty Suspense" because, usually the extra payment (i.e. over the actual royalty) that the landlord receives, can be recovered by the lessee from the excess working (when the royalty is more than minimum rent). The matter of recovery hangs uncertainly over future, and that is why it is called "Royalty Suspense".

Strike and Lockout, etc

In the event of a strike or lockout, the minimum rent can be reduced proportionately ***only when there is an agreement to that effect between the parties***. Otherwise as per Section 56 of the Contract Act, the strikes and lockout will not be an excuse for reduction in the minimum rent.

In the examination when it is given that there was strike or lockout for some period, the minimum rent cannot be reduced proportionately without giving a proper note.
In this connection, it should be noted that there may be an agreement between the parties to reduce shortworkings instead of minimum rent in the event of any strike or lockout. (Illustration 12)

Income Tax

As per the provision of the Income Tax Act 1961, it is the duty of the payer of royalty to deduct tax at the prescribed rate, and to deposit the tax so deducted to the credit of the Central Government within a specified time. The payment may be made at any office of the RBI or SBI or its subsidiaries conducting Government business.

This tax deducted at source in no way affects the amount of charge for royalty. The landlord will get the amount of royalty after adjustment of tax. ***Income Tax is also deductible on any amount paid as minimum rent***.

Accounting Entries in the Books of User [Lessee/Licencee/Publisher]

1. Where a minimum rent exists with right to recoup shortworkings

(a) Where the actual royalty is less than the minimum rent

(i) Royalties (Payable) Account	Dr. [Actual royalties for the period]
Shortworkings Account	Dr. [Amount by which the royalties fall short]
To Landlord Account	[Minimum rent]
(ii) Landlord Account*	Dr. [Minimum rent]
To Bank Account	[Net amount paid]
To Income Tax Payable Account	[Tax deducted at source]
(iii) Manufacturing / Profit and Loss Account	Dr. [Transfer]
To Royalties (Payable) Account	[Actual royalties for the period]

If the user is a manufacturer and royalties are calculated on the basis of production, the actual royalties are debited to Manufacturing Account. Where royalties are calculated on the basis of sales, they are debited to Profit and Loss Account.
In case of a limited company which does not prepare Manufacturing Account separately, the actual royalties are charged to Statement of Profit and Loss.

Alternatively,

When a separate ***Minimum Rent Account*** is maintained by the user, the accounting entries will be as follows:

(i) Minimum Rent Account	Dr. [Minimum rent payable]
To Landlord Account*	
(ii) Royalties (Payable) Account	Dr. [Actual royalties for the period]
Shortworkings Account	Dr. [Amount by which the royalties fall short of minimum rent]
To Minimum Rent Account	
(iii) Landlord Account*	Dr. [Minimum rent]
To Bank Account	[Net amount paid]
To Income Tax Payable Account	[Tax deducted at source]
(iv) Manufacturing / Profit and Loss Account	Dr. [Transfer]
To Royalties (Payable) Account	[Actual royalties for the period]

* Landlord to include lessor, authors and patent owners.

[It should be noted that Minimum Rent Account is opened generally in the year when actual royalty is less than minimum rent.]

There are different opinions in respect of opening the Minimum Rent Account, because, even without opening this the entries can be effected all right, as shown below:

Suppose, actual royalty payable is ₹ 5,00,000 and the minimum rent is ₹ 8,00,000.

When Minimum Rent Account is not opened, the entry will be:

Royalty (Payable) Account	Dr.	₹ 5,00,000	
Shortworkings Account	Dr.	₹ 3,00,000	
To Landlord Account			₹ 8,00,000

When Minimum Rent Account is opened, the entry will be:

(i) Minimum Rent Account	Dr.	₹ 8,00,000	
To Landlord Account			₹ 8,00,000
(ii) Royalty (Payable) Account	Dr.	₹ 5,00,000	
Shortworkings Account	Dr.	₹ 3,00,000	
To Minimum Rent Account			₹ 8,00,000

If the entries (i) and (ii) are combined; the effect will be:

Royalty (Payable) Account	Dr.	₹ 5,00,000	
Shortworkings Account	Dr.	₹ 3,00,000	
To Landlord Account			₹ 8,00,000

So the result would be the same as without opening the Minimum Rent Account.

Thus, it is found that even without maintaining the Minimum Rent Account, the same result can be achieved. However, there are sufficient grounds to maintain the Minimum Rent Account.

1. ***Minimum Rent Account is debited and Landlord Account is credited only in the year when shortworkings arise. So it helps to identify the particular year when the performance was not upto the minimum level and the causes of such shortworkings can be examined by the lessee and necessary steps taken.***
2. ***Minimum rent may vary from year to year; according to the lease agreement. In such a situation, a Minimum Rent Account can also be opened.***

(b) Where the actual royalty is more than the minimum rent

(i) Royalties (Payable) Account To Landlord Account	Dr. [Actual royalties for the period]
(ii) Landlord Account To Shortworkings Account	Dr. [Shortworkings, if any recouped during the period]
(iii) Landlord Account To Bank Account To Income Tax Payable Account	Dr.
(iv) Profit and Loss Account To Shortworkings Account	Dr. [Shortworkings which cannot be recouped]
(v) Manufacturing / Profit and Loss Account To Royalties (Payable) Account	Dr.

Key Points to Remember

1. ***When the royalty agreement does not contain a clause for minimum rent, the question of shortworkings and its recoupment does not arise.***
2. ***The landlord is always entitled to get either the minimum rent or the actual royalty whichever is more, subject to any adjustment for shortworkings recouped.***
3. ***Minimum Rent Account is generally opened when the actual royalty is less than the minimum rent.***
4. ***In the event of a strike or lockout, the minimum rent can be reduced if there is an agreement between the parties.***

Key Points to Remember (contd.)

5. ***Recoupable shortworkings should be carried forward and shown in the Balance Sheet as a current asset.***
6. ***Lapsed shortworkings should be charged to Profit and Loss Account in the year in which it becomes irrecoverable.***
7. ***Royalty on actual production should be charged to Manufacturing Account if the royalty payable is based on production. If the royalty is payable on the basis of sales, it should be charged to Profit and Loss Account. In case of a limited company, royalty payable on the basis of production should be charged to Profit and Loss Account and it is shown in the production or manufacturing section of the Profit and Loss Account.***
8. ***In any particular year if a part or whole of the shortworkings lapse the landlord can get only the minimum rent.***

Illustration 1

The Raniganj Coal Co. Ltd. took from Ram a lease of coalfield for a period of 25 years from January 1, 2011 on a royalty of 50 paise per ton of coal raised, with a minimum rent of ₹ 30,000 per year and power to recoup shortworkings during the first three years of the lease. The annual output was as follows (in tons):

2011 — 10,000; 2012 — 70,000; 2013 — 80,000; and 2014 — 1,20,000.

You are required to pass necessary Journal Entries in the books of The Raniganj Coal Co Ltd. when (a) no separate Minimum Rent Account is maintained; (b) a separate Minimum Rent Account is maintained. Ignore taxation.

Solution

In solving a practical question, certain preliminary workings are necessary. These can conveniently be prepared in a tabular format.

Workings : Analysis of Royalties Payable [All figures in ₹]

Year	Output (Tons)	Actual Royalties	Minimum Rent	Excess Workings	Shortworkings				Amount Payable
					Suffered	Recouped	Written-off	C/F	
2011	10,000	5,000	30,000	—	25,000	—	—	25,000	30,000
2012	70,000	35,000	30,000	5,000	—	5,000	—	20,000	30,000
2013	80,000	40,000	30,000	10,000	—	10,000	10,000	—	30,000
2014	1,20,000	60,000	30,000	30,000	—	—	—	—	60,000

Explanations:

(i) In the year 2011 the actual royalty is ₹ 5,000 but the minimum rent is ₹ 30,000. Therefore, the shortworkings = ₹ 25,000 (₹ 30,000 – ₹ 5,000). Minimum payment is, therefore, ₹ 30,000.

(ii) In the year 2012 the actual royalty is ₹ 35,000. Therefore, the excess workings = ₹ 5,000. Only ₹ 5,000 of the 2011's shortworkings can be recouped. The balance shortworkings of ₹ 20,000 to be carried forward to next year (2013).

(iii) In the year 2013 the actual royalty is ₹ 40,000. Therefore, the excess workings = ₹ 10,000. Only ₹ 10,000 of the 2011's shortworkings can be recouped. The balance ₹ 10,000 to be written-off to Profit and Loss Account because 2013 is the last year for recoupment of shortworkings.

Tutorial Note : (1) Minimum Rent Account is opened generally in the year when actual royalty is less than the minimum rent.
(2) In practice all cash transactions are recorded in the Cash Book.

Illustration 2

The Bengal Coal Co. Ltd. holds a lease of coal mines for a period of ten years, commencing from 1st January 2009. According to the lease, the company is to pay 75 paise as royalty per ton with a minimum rent of ₹ 15,000 per year. Shortworkings can, however, be recovered out of the royalty in excess of the minimum rent of the next two years only. For the year of a strike the minimum rent is to be reduced to 60%. The output in tons for the 6 years is as under:

2009 — 10,000; 2010 — 12,000; 2011 — 25,000; 2012 — 20,000; 2013 — 50,000; and 2014 — 15,000 (strike).

Write up the necessary Ledger Accounts in the books of Bengal Coal Co. Ltd.

Solution

Working Notes : **Analysis of Royalties Payable** **[All figures in ₹]**

Year	Output (Tons)	Actual Royalties	Minimum Rent	Excess Workings	Shortworkings				Amount Payable
					Suffered	Recouped	Written-off	C/F	
2009	10,000	7,500	15,000	—	7,500	—	—	7,500	15,000
2010	12,000	9,000	15,000	—	6,000	—	—	13,500	15,000
2011	25,000	18,750	15,000	3,750	—	3,750	*3,750	6,000	15,000
2012	20,000	15,000	15,000	—	—	—	**6,000	—	15,000
2013	50,000	37,500	15,000	22,500	—	—	—	—	37,500
2014	15,000	11,250	9,000	2,250	—	—	—	—	11,250

*As per the lease agreement, shortworkings of any year can be recouped out of the excess workings of the next two years. In 2009, the shortworkings were ₹ 7,500. The last year for recoupment is 2011. In 2011, excess workings were ₹ 3,750 only. Therefore, the balance ₹ 3,750 (₹ 7,500 – ₹ 3,750) is to be written-off in 2011.

**In 2010, the shortworkings are ₹ 6,000. The last year for recoupment is 2012. In 2012, there are no excess workings. Therefore, the whole amount of ₹ 6,000 is to be written-off in 2012.

Illustration 3

Raniganj Ltd. took a mine on lease from Sri Bharatia, the landlord, at a given rate of royalty with a minimum rent of ₹ 60,000 per year. Each year's excess of minimum rent over royalties is recoverable out of the royalties for the next two years. In the event of a strike and the minimum rent not being reached, it was provided that the actual royalties earned for the year would be the full royalty obligation for the year. The actual royalties were as follows:

First year — Nil; Second year — ₹ 18,000; Third year (strike) — ₹ 45,000; Fourth year — ₹ 70,000; Fifth year — ₹ 80,000. Draw up Shortworkings, Sri Bharatia, Minimum Rent and Royalties Accounts.

Solution

Working Notes : Analysis of Royalties Payable [All figures in ₹]

Year	Actual Royalties	Minimum Rent	Excess Workings	Shortworkings				Amount Payable
				Suffered	Recouped	Written-off	C/F	
1st	Nil	60,000	—	60,000	—	—	60,000	60,000
2nd	18,000	60,000	—	42,000	—	—	1,02,000	60,000
3rd	45,000	45,000	—	—	—	*60,000	42,000	60,000
4th	70,000	60,000	10,000	—	10,000	**32,000	—	60,000
5th	80,000	60,000	20,000	—	—	—	—	80,000

*As per the lease agreement, each year's shortworkings are recoverable out of the excess workings of the next two years. In the first year, the shortworkings are ₹ 60,000. The shortworkings for the 1st year can be recouped within third year. In the third year there is no excess workings. Therefore, the whole amount of ₹ 60,000 is to be written-off in the third year.

** In the second year, the shortworkings are ₹ 42,000. The last year for recoupment was 4th year. In the 4th year, there are excess workings of ₹ 10,000. Therefore, the balance of ₹ 32,000 (₹ 42,000 – ₹ 10,000) is to be written-off in the 4th year.

PQR Limited is engaged in the manufacturing of magnifying glasses. The company leased a machine from WXY Limited on 1.1.2010 for this purpose.

The terms of the lease are as follows:

(1) The lessee should pay ₹ 5 for every magnifying glass produced.
(2) The minimum rent shall be ₹ 10,000 p.a.
(3) The lessee may recover any shortworkings in the first year of operation out of the excess workings in the next two following years. Shortworkings in the second or subsequent years may be recovered out of any excess in the year next following that in which the shortworking arose.
(4) The royalties are payable on 31 December of each year.

Details of magnifying glasses produced are :

Year	2010	2011	2012	2013	2014
Units	1,600	1,900	2,460	1,840	2,720

You are required to prepare necessary ledger accounts in the books of PQR Limited for the five years ended 31.12.2014.

Business Texts is a small publishing firm. It has commissioned Prof. A.K. Ahuja to write a book. The initial sales of this book are not expected to be good, although demand is likely to increase as time passes. Ahuja's contract states that his royalties will be calculated as follows:

(1) He will receive a basic payment of ₹ 20 for every book sold.
(2) The minimum payment during each of the first two years will be ₹ 20,000. The publisher is entitled to recover any payment additional to royalties earned made because of this clause, from the royalties of the third and fourth years. The maximum amount which can be recovered during any given year is, however, limited to 25% of that year's royalties.
(3) There are no minimum royalties from year three onwards.
(4) All royalties are to be paid on 31st December, the last day of the firm's accounting year.
(5) The book was published during 2011. The number of copies sold in each of the first four years were as follows: 2011 — 400; 2012 — 450; 2013 — 700; 2014 — 900.

You are required to prepare necessary ledger accounts in the books of Business Texts.

Solution

Working Notes : **Analysis of Royalties Payable** **[All figures in ₹]**

Year	Number of Books	Actual Royalties	Minimum Royalty	Excess Workings	Shortworkings				Amount Payable
					Suffered	Recouped	Written-off	C/F	
2011	400	8,000	20,000	—	12,000	—	—	12,000	20,000
2012	450	9,000	20,000	—	11,000	—	—	23,000	20,000
2013	700	14,000	—	—	—	*3,500	—	19,500	10,500
2014	900	18,000	—	—	—	4,500	**15,000	—	13,500

* As per lease agreement, shortworkings of 1st year and 2nd year can be recouped from the royalties of 3rd and 4th year subject to maximum of 25% of that year's royalties. In 2013, carried forward balance of shortworkings was ₹ 23,000. Actual royalty of 2013 is ₹ 14,000. Therefore, only ₹ 3,500 (25% of ₹ 14,000) can be recouped in 2013.

** In 2014, carried forward balance of shortworkings was ₹ 19,500. Actual royalty of 2014 is ₹ 18,000. Therefore, only ₹ 4,500 (25% of ₹ 18,000) can be recouped in 2014. However, balance ₹ 15,000 (₹ 19,500 – 4,500) is to be written off in 2014 being the last year for recoupment of shortworkings.

Illustration 6

X, who had patented a vacuum cleaner, granted ABC Ltd a licence for 5 years to manufacture and sale the cleaner on the following terms :

(1) ABC Ltd to pay a royalty of ₹ 100 for every cleaner sold with a minimum payment of ₹ 2,50,000 p.a.

(2) If, for any year, the royalties calculated on cleaners sold amount to less than ₹ 2,50,000, ABC Ltd may set off the deficiency against royalties payable in excess of the sum as under —
(i) 50% in the next year; and (ii) the balance in the next following year.

(3) As from the commencement of the third year, the agreement was varied and ₹ 2,00,000 was substituted for ₹ 2,50,000, stated above — the other terms of the agreement remaining unchanged.
The number of cleaners sold was : 2010 — 2,000; 2011 — 2,200; 2012 — 2,300; 2013 — 2,100; 2014 — 1,800.

You are required to prepare necessary ledger accounts in the books of ABC Ltd.

Solution

Working Notes : **Analysis of Royalties Payable** **[All figures in ₹]**

Year	Units Sold	Actual Royalties	Minimum Rent	Excess Workings	Shortworkings				Amount Payable
					Suffered	Recouped	Written-off	C/F	
2010	2,000	2,00,000	2,50,000	—	50,000	—	—	50,000	2,50,000
2011	2,200	2,20,000	2,50,000	—	30,000	—	*25,000	55,000	2,50,000
2012	2,300	2,30,000	2,00,000	30,000	—	30,000	**10,000	15,000	2,00,000
2013	2,100	2,10,000	2,00,000	10,000	—	10,000	***5,000	—	2,00,000
2014	1,800	1,80,000	2,00,000	—	20,000	—	****20,000	—	2,00,000

* As per lease agreement, 50% shortworkings can be adjusted in the next year and the balance in the next following year. In 2010, shortworkings were ₹ 50,000. 50%, i.e., ₹ 25,000 can be adjusted in 2011 and ₹ 25,000 can be adjusted in 2012. In 2011, there is no excess workings. Therefore, ₹ 25,000 is to be written off in 2011.

** In 2011, shortworkings were ₹ 30,000. ₹ 15,000 can be adjusted in 2012 and the balance ₹ 15,000 in 2013. In 2012, excess workings are ₹ 30,000. Out of this ₹ 30,000, ₹ 25,000 (related to 2010) is to be adjusted first and the balance ₹ 5,000 is to be adjusted against the shortworkings of 2011. Therefore, ₹ 10,000 (₹ 15,000 – 5,000) shortworkings of 2011 is to be written off in 2012.

*** In 2013, excess workings were ₹ 10,000. Shortworkings of 2011 carried forward ₹ 15,000. Only ₹ 10,000 can be adjusted in 2013 and the balance ₹ 5,000 is to be written off in 2013.

**** 2014 is the last year of lease. Therefore, any shortworkings arising in that year is to be written off immediately.

Illustration 7

Prof P Ali wrote a book and authorised ABC Publishing Co Ltd to publish the book.

The book was published on 1.10.2011. The amount of royalty is paid on 31st December every year when the books of accounts of the publishers are closed. The shortworkings for any accounting period can be recouped in the following year only.

The royalty is to be calculated on the printed price of book, based on the number of copies sold. The rate of royalty is as under :

1 to 5,000 copies	10%	[See Note below]
5,001 to 10,000 copies	12.5%	
10,001 copies and above	15%	

[Note : Not to be calculated in a given accounting year but, on the life of the book.]

The minimum amount payable per annum is to be calculated on a time basis and is as under :

2011: ₹ 1,00,000; 2012: ₹ 1,20,000; 2013: ₹ 1,40,000; 2014 and afterwards ₹ 1,50,000.

The following additional information is provided :

	2011	2012	2013	2014
(a) Year	**2011**	**2012**	**2013**	**2014**
Copies printed (Nos.)	3,000	7,000	10,000	12,000
Printed price (₹.)	100	120	140	150
(b) Year ended 31st December	**2011**	**2012**	**2013**	**2014**
Copies sold (Nos.)	2,000	7,000	8,000	13,000

Prepare necessary ledger accounts in the books of ABC Publishing Co Ltd for the 4 accounting periods ended on 31.12.2014.

Solution

Working Notes : **(1) Analysis of Royalties Payable** **[All figures in ₹]**

Year	Actual Royalties	Minimum Royalty	Excess Workings	Shortworkings				Amount Payable
				Suffered	Recouped	Written-off	C/F	
2011	20,000	$25,000	—	5,000	—	—	5,000	25,000
2012	94,000	1,20,000	—	26,000	—	5,000	26,000	1,20,000

Illustration 8

The Eastern Colleries Ltd. leased a coalfield from C Ltd. at a royalty of ₹ 6 per ton with a minimum rent of ₹ 8,000 per annum and power to recoup each year's shortworkings out of the royalties of next 3 years.

In the event of a strike, it was decided that shortworkings, if any, would stand reduced proportionately to time actually worked.

The annual outputs (in tonnes) were as follows:

2009 — 600; 2010 — 1,250; 2011 — 1,500; 2012 — 1,800; 2013 (strike for 3 months) — 800; 2014 — 1,600.

Write up the Royalties, Shortworkings and C Ltd. Accounts.

Solution

Working Notes : **Analysis of Royalties Payable** **[All figures in ₹]**

Year	Output (Tonnes)	Actual Royalties	Minimum Rent	Excess Workings	Shortworkings				Amount Payable
					Suffered	Recouped	Written-off	C/F	
2009	600	3,600	8,000	—	4,400	—	—	4,400	8,000
2010	1,250	7,500	8,000	—	500	—	—	4,900	8,000
2011	1,500	9,000	8,000	1,000	—	1,000	—	3,900	8,000
2012	1,800	10,800	8,000	2,800	—	2,800	600	500	8,000
2013	800	4,800	*7,200	—	*2,400	—	500	2,400	7,200
2014	1,600	9,600	8,000	1,600	—	1,600	—	800	8,000

*Actual shortworkings are ₹ 3,200 (₹ 8,000 – ₹ 4,800). But it is reduced to 75% (9 months), i.e., ₹ 2,400. Therefore, minimum rent is adjusted accordingly (₹ 4,800 + ₹ 2,400 = ₹ 7,200).

2. Where no minimum rent exists

In certain cases, the lease agreement may not contain any clause for minimum rent. Therefore, the question of shortworkings does not arise. The landlord is entitled to get only the actual royalties. In this situation, the accounting entries are very simple and are as under:

(i) Royalties (Payable) Account Dr. [Actual royalties for the period]
  To Landlord Account
(ii) Landlord Account Dr.
  To Bank Account
  To Income Tax Payable Account
(iii) Manufacturing/Profit and Loss Account Dr.
  To Royalties (Payable) Account

Illustration 9

The Bengal Coal Co. Ltd. is the lessee of a mine on a royalty of Re 1 per ton of coal raised, without any minimum rent. The output (in tons) for the first 3 years were as : 2012 — 10,000; 2013 — 50,000; and 2014 — 75,000.

Pass necessary Journal Entries and show the necessary Ledger Accounts in the books of The Bengal Coal Co Ltd.

Illustration 11

M owned the patent of a folding chair. On 1.1.2010, he granted N a licence for 5 years to manufacture and sell the chair on the following terms :

(a) Royalty of ₹ 10 per chair sold;
(b) Minimum rent of ₹ 15,000 p.a.;
(c) Shortworkings could be recouped only within 2 years following the year in which the shortworking occurs subject to a maximum of ₹ 3,500 p.a.; and
(d) If in any year normal sale was not attained due to strike, the minimum rent was to be regarded as having been reduced proportionately having regard to the length of the stoppage.

The number of chairs sold during the lease period was as follows :

Year	2010	2011	2012	2013	2014
Sold	900	1,300	2,000	1,100	1,400

During the year 2013, there was a stoppage due to strike lasting 4 months.

You are required to show : (i) Royalties Receivable Account; (ii) Royalties Suspense Account; and (iii) N Account in the books of M for each of the above years.

Solution

Working Notes : Analysis of Royalties Receivable [All figures in ₹]

Year	Units Sold	Actual Royalties	Minimum Royalty	Excess Workings	Shortworkings				Amount Receivable
					occured	Adjusted	Credited to P/L	C/F	
2010	900	9,000	15,000	—	6,000	—	—	6,000	15,000
2011	1,300	13,000	15,000	—	2,000	—	—	8,000	15,000
2012	2,000	20,000	15,000	5,000	—	3,500	*2,500	2,000	16,500
2013	1,100	11,000	10,000	1,000	—	1,000	**1,000	—	10,000
2014	1,400	14,000	15,000	—	1,000	—	***1,000	—	15,000

* As per lease agreement, shortworkings can be adjusted within two years following the year in which shortworkings occurred but maximum of ₹ 3,500 can be adjusted in a particular year. In 2010, shortworkings were ₹ 6,000. Last year for adjustment of this shortworkings is 2012. In 2012, excess workings were ₹ 5,000 but maximum ₹ 3,500 can be adjusted. Therefore, ₹ 2,500 (₹ 6,000 – ₹ 3,500) is to be credited to Profit and Loss Account of 2012.

** Shortworkings in 2011 were ₹ 2,000. Last year for adjustment is 2013. In 2013, excess workings were ₹ 1,000 only. Therefore, the balance (₹ 2,000 – ₹ 1,000) of ₹ 1,000 is to be credited to Profit and Loss Account of 2013.

*** In 2014 shortworkings were ₹ 1,000. No further adjustment of shortworking will be allowed since the lease is for a period of 5 years. Therefore, shortworking cannot be carried forward to next year.

Illustration 12

X, who has patented a vacuum cleaner, granted PQR Ltd., a licence for 10 years to manufacture and sell the cleaner on the following terms:

(a) PQR Ltd. to pay a royalty of ₹ 1 for every cleaner sold with a minimum payment of ₹ 25,000 p.a. Calculations to be made annually on 31st March and payment to be made on 30th April.

(b) If, for any year, the royalties calculated on cleaners sold amount to less than ₹ 25,000, PQR Ltd. may set off the deficiency against royalties payable in excess of that sum in the next two years.

As from the commencement of the third year the agreement was revised and a minimum annual payment of ₹ 20,000 was substituted for ₹ 25,000, the other terms of the agreement remaining unchanged. The number of cleaners sold was (year ended 31st March): 2011 — 10,000; 2012 — 20,000; 2013 — 30,000; 2014 — 25,000.

You are required to prepare the following Ledger Accounts recording the above transactions in respect of royalties in the books of X, which are closed annually on 31st March: (i) Royalties (Receivable) Account; (b) Shortworkings Allowable Account; (iii) the account of PQR Ltd.

Solution

General Illustrations

Illustration 13

XY & Co. raises minerals from the mines, then incurs some processing costs and sells the product. Royalty is payable to landlord at 20% of the cost of material, being the cost including the royalty but before incurring the processing costs. Processing cost is 20% of selling price and profit on sale is 30% of the selling price. Stock is valued at total cost (including the processing cost). The sales and stock at close of the respective years were as follows:

Sales : 2012 — ₹ 12,00,000; 2013 — ₹ 14,00,000; and 2014 — ₹ 13,00,000.

Closing Stock : 2012 — ₹ 14,000; 2013 — ₹ 21,000; and 2014 — ₹ 70,000.

Minimum annual rent payable is ₹ 1,35,000. Shortworkings can be recovered anytime in first three years starting from 2012 and not thereafter. Show necessary Ledger Accounts in the books of the lessee.

Solution

Working Notes :

Relationship between Royalty and Total Cost	₹	Relationship between Royalty and Selling Price	₹
Let, Selling price	100	Let, Selling price	*100
Less: Profit (30% of Sales)	30	*Less*: Profit (30% of Sales)	30
Total cost of Production	*70	Total cost of Production	70
Less: Processing cost (20% of Sales)	20	*Less*: Processing cost (20% of Sales)	20
Total cost of materials (including royalty)	50	Total cost of materials (including royalty)	50
Royalty (20% of ₹ 50 above)	*10	Royalty (20% of ₹ 50 above)	*10
Other cost on materials	40	Other cost on materials	40
*Where total cost is ₹ 70., royalty = ₹ 10 i.e. 10/70 or 1/7 of total cost of production will be the royalty.		*where , Sales is ₹ 100, royalty = ₹ 10 i.e. 10/100 or 1/10 of Sales will be the royalty.	

Calculation of Actual Royalty Payable **[All figures in ₹]**

Year	Cost of Sales (Selling Price — 30%)	Total Cost of Production (Cost of Sales + Closing Stock – Opening Stock)	Royalty 1/7 of total cost of production
2012	12,00,000 – 3,60,000 = 8,40,000	8,40,000 + 14,000 – nil = 8,54,000	1,22,000
2013	14,00,000 – 4,20,000 = 9,80,000	9,80,000 + 21,000 – 14,000 = 9,87,000	1,41,000
2014	13,00,000 – 3,90,000 = 9,10,000	9,10,000 + 70,000 – 21,000 = 9,59,000	1,37,000

Alternatively,

Year	Sales	Stock (converted into selling price)	Selling Price of Production	Royalty @ 10% of Sales
2012	12,00,000	100/70 x 14,000 = ₹ 20,000	12,00,000 + 20,000 – nil = 12,20,000	1,22,000
2013	14,00,000	100/70 x 21,000 = ₹ 30,000	14,00,000 + 30,000 – 20,000 = 14,10,000	1,41,000
2014	13,00,000	100/70 x 70,000 = ₹ 1,00,000	13,00,000 + 1,00,000 – 30,000 = 13,70,000	1,37,000

Illustration 14

Menthol India Ltd., entered into a collaboration agreement with Menthol U.K. Ltd., under which the Indian company is to pay the London company, commencing with the date of start of production in the Indian factory, a royalty at 1% of sales during each quarter, subject to deduction of income-tax at 30%, so that the remittance in any quarter should not be less than £ 400. Shortworkings are recoupable from out of royalty payable in subsequent quarters within the same calendar year and not beyond.

Sales of each quarters are given below:

30.9.2013 — ₹ 4,00,000; 31.12.2013 — ₹ 6,00,000; 31.3.2014 — ₹ 10,00,000; 30.6.2014 — ₹ 16,00,000; 30.9.2014 — ₹ 10,00,000; and 31.12.2014 — ₹ 14,00,000.

Production commenced on 1st July 2013. Rate of exchange to be adopted for remittances will be £1 = ₹ 20 for 2013 payments and £1 = ₹ 22 for 2014 payments. Remittance of each quarter's royalty was made within 30 days of the end of the quarter. Draw Royalty Account, Shortworkings Account and Menthol U.K. Ltd. Account in the books of Menthol India Ltd. for all the years.

Solution

Working Notes : Analysis of Royalties Payable [All figures in ₹]

Quarter ending	Sales	Actual Royalties#	Minimum Rent	Excess Workings	Shortworkings				Amount Payable
					Suffered	Recouped	Written-off	C/F	
30.9.2013	4,00,000	4,000	*11,429	—	7,429	—	—	7,429	11,429
31.12.2013	6,00,000	6,000	11,429	—	5,429	—	**12,858	—	11,429
31.3.2014	10,00,000	10,000	12,571	—	2,571	—	—	2,571	12,571
30.6.2014	16,00,000	16,000	12,571	3,429	—	2,571	—	—	13,429
30.9.2014	10,00,000	10,000	12,571	—	2,571	—	—	2,571	12,571
31.12.2014	14,00,000	14,000	12,571	1,429	—	1,429	1,142	—	12,571

@ 1% of sales.

* Minimum royalty to be paid to Menthol U.K. Ltd. is £ 400 after tax. The value of one pound in 2013 was ₹ 20. Royalty to be paid in Indian ₹ = 400 x ₹ 20 = ₹ 8,000 (after tax). Rate of tax is 30%. Therefore, in 2013 the minimum rent will be ₹ 8,000/70% = ₹ 11,429 (approx.).

Similarly for 2014, the minimum rent will be (400 x ₹ 22) / 70% = ₹ 12,571 (approx.).

** As per lease agreement, shortworkings are recoupable by next quarter of the same calendar year. For quarter ending on 30.9.2013, there were shortworkings of ₹ 7,429 and for quarter ending on 31.12.2013 again there were shortworkings of ₹ 5,429. At the end of 2013 total shortworkings were ₹ 12,858. In 2013 the full amount of ₹ 12,858 is to be written-off.

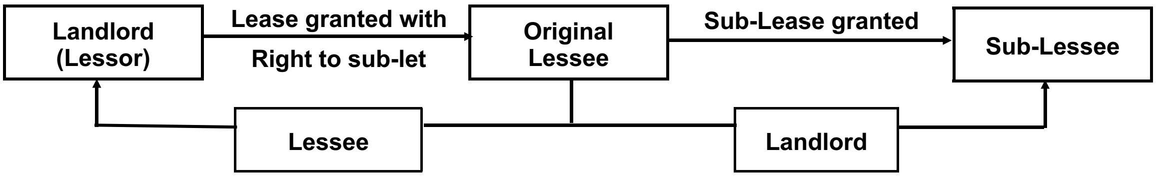
Sub-Lease

If the lease agreement contains a provision for sub-lease, the original lessee may grant a sub-lease to another person either of the whole or a part of the mine (or any other right), generally at an increased royalty. In the sub-lease, the original lessee takes the place of the landlord. Thus a third party becomes involved.

In this case, the original lessee is liable to the landlord for the agreed royalty on the total output/sale (own + sub-lessee) irrespective of the terms and conditions of the agreement made between the original lessee and the sub-lessee. The original lessee has two sets of relationship:

(a) he is a lessee of the original landlord, and

(b) he is a landlord of the sub-lessee.



Accounting Arrangements

(a) In the books of the original lessee

The lessee will maintain the following accounts in his book:

In respect of his Landlord	In respect of his Sub-Lessee
1. Royalty Payable Account	1. Royalty Receivable Account
2. Shortworkings Recoupable Account	2. Royalty Suspense Account/Shortworkings Allowable Account
3. Landlord's Account	3. Sub-Lessee's Account

Royalty Payable Account : This account is debited with the total amount of royalties (own + sub-lessee) payable to the landlord and is credited by (i) Manufacturing/Profit and Loss Account (in respect of royalty on own production/sale) (ii) Royalty Receivable Account (in respect of sub-lessee's production/sale).

Royalty Receivable Account : This account is debited with the amount of royalties on sub-lessee's production/sale (calculated at the rate of original lease) and is Credited with the amount of royalties earned (calculated as per sub-lease agreement). The balance at the year end is transferred to Profit and Loss Account (being profit or loss on sub-lease).

Shortworkings Recoupable Account : This account is opened when minimum rent (as agreed with the landlord) is more than the total amount of royalties payable. It is debited with the difference between minimum rent and total royalties payable. At the end of the year it is carried forward to next period for recoupment and it will appear in the Balance Sheet as an asset. In the subsequent years, this account is credited with (i) shortworkings recouped (when there is excess working); and (ii) shortworkings lapsed.

Royalty Suspense Account/Shortworkings Allowable Account: This account is opened when minimum rent (as agreed with the sub- lessee) is more than the royalties receivable from the sub- lessee. It is credited with the difference between minimum rent and actual royalty receivable. At the end of the year it is carried forward to next period for adjustment against excess workings of the sub-lessee. It will appear in the Balance Sheet as a liability. In the subsequent years, it is debited with (i) excess workings adjusted by the sub-lessee; and (ii) the amount lapsed.

Landlord Account : This account is maintained in the similar manner as we do in case of original lease. It is debited with the amount of minimum rent or actual royalties (on all production/sale) whichever is higher and is credited with the amount of actual royalty and shortworkings recoupable.

Sub-lessee Account : This account is debited with the amount of actual royalty receivable and shortworkings allowable and is credited with the amount of minimum rent or actual royalty receivable whichever is higher.

In order to facilitate the entries, the original lessee will prepare two analytical tables — (i) in respect of royalties payable to the landlord; and (ii) in respect of royalties receivable from the sub-lessee.

(b) In the books of the landlord : The accounting entries are made in the similar manner as we do in case of original lease (explained earlier).

(c) In the books of the sub-lessee : The accounting entries are made in the similar manner as we do in case of original lease (assuring that sub-lessee is taking the place of lessee).

Accounting Entries

When a minimum rent exists with right to recoup shortworkings

(a) ***Where the actual royalty (own + sub-lessee) is less than the minimum rent***

(i) Royalties Payable Account Dr. [Actual royalties (own + sub-lessee)]

Tutorial Note : A Ltd. is a limited company. Therefore, royalty on own production should be charged to Profit and Loss Account (production account section). The royalty on sub-lessee's production is adjusted against the Royalty Receivable Account.

Illustration 16

Bharat Ltd. took a licence for production of electronic machines from Hindusthan Ltd. Royalty is payable @ ₹ 20 per electronic machine produced.

Bharat Ltd. issued a sub-licence to Bengal Ltd. on the basis of a royalty payment of ₹ 25 per machine sold.

Minimum royalty payable by Bengal Ltd. was fixed at ₹ 30,000 per annum with a right to recoup shortworkings in the following year.

From the following details show Royalty Payable Account, Royalty Receivable Account, Shortworking Account and Shortworking Suspense Account in the books of Bharat Ltd.

	Bharat Ltd.		Bengal Ltd.	
Year	Sales (No. of Units)	Closing Stock (No. of Units)	Production (No. of Units)	Closing Stock (No. of Units)
2012	4,000	1,000	400	200
2013	5,000	2,000	2,000	400
2014	9,000	3,000	3,000	900

Solution

Calculation of Production in Units

Bharat Ltd.	2012	2013	2014
Sales	4,000	5,000	9,000

31.12.2014	To Profit and Loss A/c	12,500			
		62,500			62,500

Tutorial Note:

1. In 2012, the production of sub-lessee was 400 units and royalty paid on that production was ₹ 8,000. Out of 400 units only 200 units were sold in 2012. Therefore, royalty paid on (400 – 200) = 200 units @ ₹ 20 = ₹ 4,000 is to be carried forward to 2013. Profit on sub-lease ₹ 5 (₹ 25 – ₹ 20) per unit sold. In 2012, 200 units were sold. Therefore, profit of ₹ 5 x 200 = ₹ 1,000 is to be transferred to Profit and Loss Account of 2012.
2. In 2013, the production of sub-lessee was 2,000 units and royalty paid on that production was ₹ 40,000. Out of 2,000 units only 1,600 units were sold (total units sold were 1,800 but 200 from opening stock) in 2013. Therefore, royalty paid on (2,000 – 1,600) = 400 units @ ₹ 20 = ₹ 8,000 is to be carried forward to 2014. Profits on sub-lease is ₹ 5 x 1,800 = ₹ 9,000.
3. In 2014, the production sub-lessee was 3,000 units and royalty paid on that production was ₹ 60,000. Out of 3,000 units only 2,100 units were sold (total units sold were 2,500 but 400 units from opening stock) in 2014. Therefore, royalty paid on (3,000 – 2,100) = 900 units @ ₹ 20 = ₹ 1,800 to be carried forward to 2015. Profit on sub-lease is ₹ 5 x 2,500 = ₹ 12,500.

Key Points

- the landlord and the lessee agree upon a minimum periodical amount that the landlord will receive from the lessee, even if the actual royalty as calculated on the basis of actual production or sale is less than such minimum amount. This assured and mutually agreed periodical minimum amount is known as "***Minimum Rent***".
- Shortworkings is the amount by which the minimum rent exceeds the actual royalty.
- Generally the royalty agreement contains a provision for carrying forward of shortworkings with a view to adjust it in the future. In the subsequent years, such shortworking is adjusted against the surplus royalty. This process of adjustment is called ***recoupment of shortworkings***.
- In the event of a strike or lockout, the minimum rent can be reduced if there is an agreement between the parties.

THEORETICAL QUESTIONS

1. What do you mean by (i) Minimum Rent; and (ii) Surface Rents ?
2. State the importance of minimum rent in lease agreeement.
3. Write short notes on: (a) Dead Rent; (b) Royalty Suspense; and (c) Shortworkings.
4. What do you mean by Royalty? Why the Minimum Rent Account is opened in the books of the lessee?

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each statement or answer each question below :

1. Recoupable shortworkings are shown in the Balance Sheet as a
   A current asset
   B fixed asset
   C none of these.
2. Income tax to be deposited to the credit of the Central Government within a specified time for royalty by the
   A payee
   B payer
   C none of these.
3. The landlord receives a minimum rent as royalty
   A periodically
   B at a time
   C none of these.
4. The dead rent or the actual royalty shall have to be paid by the lessee, whichever is
   A lower
   B higher
   C none of these.
5. The owner of an asset may allow another party the right to use that asset against some consideration to be
   A paid
   B received
   C none of these.

PRACTICAL QUESTIONS

1. On 1.1.2011, X acquired on lease from Mr Landlord, certain mica fields at a minimum rent of ₹ 48,000 p.a., merging into a royalty of Re 1 per ton of mica ore raised. The shortworkings were recovered in next two years of such shortworkings only, but on condition that if full shortworkings could not be recovered in the next year, X would lose his right to recover 50% of the unrecovered balance of shortworkings.
   The output of the first four years were (figures in tons): 2011 — 12,000; 2012 — 30,000; 2013 — 60,000; 2014 — 56,000. Prepare necessary ledger accounts in the books of X.
2. A Ltd. obtained from B. S. Ltd. a lease of some coal bearing land, the terms being a royalty of ₹ 15 per ton of coal raised subject to minimum rent of ₹ 75,000 per annum with a right of recoupment of shortworkings over the first four years of the lease. From the following details show (i) Royalties Account; (ii) Shortworkings Account; and (iii) B.S. Ltd. Account in the books of A Ltd.

Year	2010	2011	2012	2013	2014
Sales (Tonnes) Closing Stock (Tonnes)	2,000 300	3,500 400	4,800 600	5,600 500	8,000 800

3. Prof. P. Sen wrote a book of Accountancy. He gave Standard Publishers the right to publish the book. The stipulated terms with effect from 1.1.2010 were as follows:
   (a) Royalties @ 10% on published price of the copies sold.
   (b) Minimum payment ₹ 6,000 in the first year and ₹ 10,000 p.a. thereafter.
   (c) The right to deduct in following two years any excess of minimum payment over the calculated royalties in any year.
   (d) Revision of books by the author on request and to pay ₹ 600 per month to Standard Publishers for every month of delay after six months of request made by Standard Publishers.
   (e) In the event of delay, the condition of minimum amount payable to Prof. Sen was not to apply. At the end of third year Prof. Sen was requested to revise the book. The revised manuscripts reached Standard Publishers on 1st November of fourth year. Show the Journal Entries in the books of Standard Publishers and draw up the record of following particulars:

Years	1	2	3	4	5
Copies sold (Nos.) Published price (₹)	1,500 20	4,900 20	5,000 25	4,000 25	5,000 25

4. Mr Raman, a scientist owned a patent for the manufacture of electric blanket. In 2011, he allowed Hindusthan Manufacturers Ltd., the use of the patent on the terms that he would receive a royalty of ₹ 10 per blanket manufactured subject to a minimum of ₹ 12,000 in 2011, ₹ 16,000 in 2012 and thereafter ₹ 30,000 every year. Any shortworkings is recoverable out of the royalties of the two years subsequent to the year in which shortworkings may arise.
   The actual output is as follows: 2011 — 1,000; 2012 — 1,200; 2013 — 3,200; and 2014 — 3,200.
   Income tax was deducted at source @ 20% every year before actual payment of royalty. You are required to show (i) Royalties Account; (ii) Shortworkings Account; and (iii) Mr. Raman Account from 2011 to 2014.
5. East India Machine Distributors Ltd., leased out three machines for manufacturing burners to Calcutta Stove Manufacturers in three successive years. The terms of lease for the machines were as follows:
   (i) The lessee would pay a royalty of 50 paise for every 10 burners produced subject to a minimum payment of ₹ 500 per annum for every machine.
   (ii) The lessee could recoup any shortworkings arising in the first year of the leased machine in the second year only, but not afterwards.
   Details of three machines on lease are given below:

	Machine No. 1	Machine No. 2	Machine No. 3
Date of Commencement of lease	1.1.2011	1.1.2012	1.1.2013
Production of burners for the year ended 31st December	Nos.	Nos.	Nos.
2011	8,000	—	—
2012	15,000	10,000	—
2013	17,400	9,600	8,000
2014	18,000	12,400	7,400

   You are required to show the Ledger Accounts giving effect to the above transactions in the books of Calcutta Stove Manufacturers. (Details of calculations to be separately shown).
6. On 1st January 2010, Bright Limited, patentees of a new type of gas-burner, issued a licence to Popular Limited for the manufacture and sale of burners for 5 years on the following terms and conditions.
   (a) Popular Limited to pay a royalty of ₹ 100 for every burner manufactured subject to a minimum rent of ₹ 50,000 p.a.
   (b) If, for any year, the royalties calculated on burners manufactured amount to less than minimum rent, Popular Limited may recoup the shortworkings against royalties payable in excess of the minimum rent in the next year only, but not afterwards.
   (c) Payment should be made on 31st December.
   Sales and closing stock of burners for five years wer

Years	2010	2011	2012	2013	2014
Sales (Units)	200	400	600	550	230
Closing Stock (Units)	50	100	70	150	20

   You are required to show the (i) Royalties Account; (ii) Shortworkings Account; and (iii) Bright Limited Account in the books of Popular Limited who close their accounts on 31st December in each year.

7. Mining Corporation Ltd. obtained a lease of field for 99 years from Mr Landlord on the following terms from 01.01. 2011.
   (a) Mining Corporation Ltd. will develop the land and will bear the cost of development.
   (b) Royalties will be ₹ 2 per tonne of coal raised during the period.
   (c) Minimum rent will be ₹ 10,000 for the first year with an annual increase of ₹ 1,000 till it reaches ₹ 15,000.
   (d) Shortworkings, if any, are recoverable within 3 years only.

   Mining Corporation Ltd. developed the land at the cost of ₹ 2 crores and estimated coal deposit of 20 lacs tonnes. It was decided to depreciate this expenditure on depletion method of depreciation. The coal raised in tonnes by Mining Corporation Ltd. is as: 2011 — 1,000; 2012 — 2,000; 2013 — 10,000; and 2014 — 15,000.

   You are required to show: (i) Royalties Account; (ii) Mr Landlord Account; (iii) Shortworkings Account; and (iv) Land Development Account in the books of Mining Corporation Ltd.

8. M owned certain patent rights. He granted a licence to N to use such rights on royalty basis. The following are the relevant particulars:

Years	1st	2nd	3rd	4th (strike)	5th
Actual Royalties (₹)	5,000	10,000	8,000	8,000	14,000
Minimum Rent (₹)	8,000	9,000	10,000	12,000	13,000

   The deficiency of any year is to be set off against royalties payable in excess of the minimum rent in two following years. In the event of a strike and the minimum rent not being realised, it was provided that the actual royalties earned for the year would be the full royalty obligation for the year.

   You are required to show the Royalties Account, M Account and Shortworkings Account in the books of N.

9. Landlord Ltd gave the lease of a mine to the Mining Co Ltd for a period of 20 years from 1.4.2011 on the following terms and conditions :
   (a) A royalty of Re 0.50 per metric tonne of production to be paid, subject to a minimum rent of ₹ 12,000 p.a.
   (b) Each year's excess of minimum rent over the actual royalty (shortworking) can be recovered during the subsequent two years.
   (c) In the event of a strike and the minimum rent not being reached, the minimum rent is to be reduced by 1/3rd of minimum rent given in (a) above.
   (d) The following details are available from accounting records —

Year ended	Opening Stock (in M.T.)	Sales (in M.T.)	Closing Stock (in M.T.)
31.3.2012	Nil	12,000	2,000
31.3.2013	2,000	16,000	4,000
31.3.2014	4,000	32,000	2,000
31.3.2015	2,000	20,000	4,000

   (Strike for 3 months in 2014-15)

   Write up the Royalties, Shortworkings and Landlord Accounts for 4 years in the books of Mining Co. Ltd.

10. ABC Limited has been given sole manufacturing and selling rights for a patented product by XYZ Limited. The agreement is that 50 paise will be paid to XYZ Limited for each unit sold during the year (1 October to 30 September) subject to a minimum payment of ₹ 5,000 each year. These royalty payments are to be made at the end of each quarter and any shortfall below ₹ 5,000 for the year made up to ₹ 5,000 and included with the September payment. Such shortfall payments cannot be recovered later.

    The number of units sold were :

    October to December, 2013 — 1,000; January to March, 2014 — 1,200; April to June, 2015 — 1,800.

    A market for the product is gradually being established and it is expected that about 2,400 units will be sold in the next quarter.

    You are required to prepare necessary ledger accounts for the year ended 30.6.2014 in the books of ABC Limited.

11. Mahesh wrote a boook on Accountancy and got it published from Singh on the terms that royalty will be 15% on the published price of the copies sold with a minimum payment of ₹ 20,000 every year. Mahesh agreed to revise the book at the end of 3 years, within 6 months of request made by Singh. In the event of delay, the condition of minimum payment was not to apply.

Year	Copies sold	Published price (₹)
1	4,000	20
2	10,000	22
3	11,000	25
4	4,000	25

The revision of the book took 9 months. Pass Journal Entries in the books of both the parties, assuming that Mahesh has the right to recoup shortworkings in first 3 years.

12. Jaya Ltd., owned the patent of safety locks. It granted, to X and Company, a licence for seven years to manufacture locks on the following terms :
    (1) X and Company to pay Jaya Ltd., a royalty of ₹ 5 for each lock sold with a minimum annual payment of ₹ 50,000. Accounts to be settled annually on 31st December.
    (2) If in any year royalty calculation locks sold amounted to less than ₹ 50,000 X and Company to have the right to deduct the deficiency from the royalty payable in excess of that sum in the two following years.
    The number of locks sold was as follows :
    Year ended 31.12.2011 — 8,000;
    Year ended 31.12.2013 — 11,000;
    Year ended 31.12.2012 — 9,000;
    Year ended 31.12.2014 — 18,000

    You are required to show the Ledger Accounts necessary to record the above royalty transactions in the books of X and Company which are closed annually on 31st December.
13. Show your understanding of each of the following Journal Entries in the books of the Bharat Coking Coal Ltd. (royalties payable at 50 paise per ton as per lease agreement).

Journal **Dr.** **Cr.**

14. Sri K. Roy, leased out the mining rights over property to Bose Co. Ltd. for a period of 20 years from 1st January 2010. The minimum rent was agreed at ₹ 30,000 a year merging in a royalty of ₹ 2 per ton payable in each year. It was agreed that each year's shortworkings, if any, was to be recouped only out of excess royalties in the next year but not later.
    The following was the result of working in the property (in tonnes):
    2010 — 15,000; 2011 — 37,500; 2012 — 20,000; 2013 — 35,000; and 2014 — 32,500.
    Prepare necessary Ledger Accounts in the books of Bose Co. Ltd.
15. P. Co. Ltd. took a mine on lease from A at an agreed rate of royalty with a minimum rent of ₹ 20,000 a year. Each year's excess of minimum rent over royalties is recoverable out of the royalties of the next year only. In the event of a strike and the minimum rent not being realised, it was provided that the actual royalties earned for that year would be the full royalty obligation for the year.
    The actual royalties were calculated as follows:
    2011 — Nil; 2012 — ₹ 24,000; 2013 — ₹ 16,000; 2014 — ₹ 18,000.
    The reason for the fall in the amount of royalties for 2012 was a strike lasting over a period of three months.
    Prepare necessary Ledger Accounts in the books of P. Co. Ltd. recording the above transactions for all the years.
16. Minerals Ltd. leased a property from Shri B. Sarkar at a royalty of ₹ 1.50 per ton with a minimum rent of ₹ 10,000 per annum. Each year's excess of minimum rent over royalties is recoverable out of royalties of next five years. In the event of a strike and the minimum rent not being reached, the lease provided that the actual royalties earned for the year discharged all rental obligations for the year.
    The results of working of the property are given below: (actual royalty)
    2007— Nil; 2008 — ₹ 3,300; 2009 — ₹ 9,000; 2010 — ₹ 11,100; 2011 — ₹ 14,000; 2012 — ₹ 15,000; 2013 (strike year) — ₹ 8,000; 2014 — ₹ 15,200.
    Write up the Minimum Rent Account and Royalties Account showing the amount charged to Profit and Loss Account each year.

17. Coal Ltd. leased land from Sunil Kumar at a royalty of Re 0.25 per tonne of coal raised. The minimum rent was ₹ 24,000. Shortworkings were to be recouped during the first 4 years. The coal raised in the first 4 years was as follows (in tonnes): 2011 — 80,000; 2012 — 90,000; 2013 — 60,000 (strike for three months); 2014 — 1,20,000. There was a provision for proportionate reduction in the minimum rent in case of stoppage of work by strike, lock-out, accident, etc. Show the relevant Ledger Accounts in the books of Coal Ltd.
18. P owned the patent of a new type of electrical fan. He granted Q a licence for five years as on 1.1.2010. The licence provided for the payment of royalty of ₹ 2 for each fan manufactured subject to a minimum annual payment of ₹ 6,000 for 2010 increasing by ₹ 400 a year. If in any year the royalties, calculated on the fans manufactured, be less than the minimum payment, the deficiency could be set off against royalties in excess of the minimum during the following two years, but not afterwards. The accounts were to be settled annually on December 31.
    The number of fans manufactured for the five years was as follows:
    2010 — 800; 2011 — 600; 2012 — 5,400; 2013 — 3,600; 2014 — 3,200.
    You are required to show the (a) Royalties; (b) Shortworkings; and (c) P's Accounts in the books of Q which are closed annually on December 31.
19. Magickey Limited took certain lands on lease from Manganese Estates Limited for a period of 15 years for mining of manganese ore with a stipulated royalty of ₹ 1.50 per ton and a minimum rent of ₹ 21,000 with a clause to recoup shortworkings over three subsequent years.
    The actual working results were:

Year	2010	2011	2012	2013	2014
Output (in tonnes)	8,000	16,000	13,000	17,000	43,800

    You are required to show the necessary Ledger Accounts in the books of Magickey Limited.
20. G, a scientist holds a patent for the manufacture of a certain electrical appliance. He allows the Electricals Limited to use the patent on the terms that he will receive a royalty of ₹ 10 per electrical appliance manufactured subject to the minimum of ₹ 6,000 in the first year and thereafter ₹ 10,000 per year. Any shortworkings is recoverable within 3 years of the contract date. The number of appliances manufactured are: 1st year — 200; 2nd year — 500; 3rd year — 1,300; and 4th year — 2,000. The payments are duly made to the patentee every year. Show the necessary Ledger Accounts in the books of both the parties.
21. X has taken on lease coal fields from Y on the following terms:
    (i) Lease is for 99 years;
    (ii) Lease rent is to be 50 paise p.a. for every ton of coal raised;
    (iii) Minimum royalty per annum to be ₹ 30,000, the lease has a right to recoup any shortworkings within a period of three years for which the excess payment was made;
    (iv) In case the working of the mines was affected by any strike or riot and there is no raisings, then the minimum rent payable would abate proportionately;
    (v) The raisings of the different years were (in tonnes): 2009 — 20,000; 2010 — 35,000; 2011 — 30,000 (there was a strike for 3 months during which no coal was mined); 2012 — 70,000; 2013 — 80,000; and 2014 — 1,00,000.

    You are required to show the Royalties Account; Shortworkings Account and Y Account in the books of X.
22. Agro (India) Ltd. Madras, entered into a collaboration agreement with Agro (U.K.) Ltd., Birmingham, under which the former was to pay the latter, commencing with the date on which they started production, a royalty @ 5% of sales during each quarter of the calendar year, subject to deduction of tax in India (which may be assumed @ 50%) subject to the condition that the remittance in any such quarter should not be less than £ 500, the shortworkings being recoupable from out of royalty payable in subsequent quarters during the same calendar year but not beyond.
    The following are the sales figures of Agro (India) Ltd.: 30.9.2013 — ₹ 1,00,000; 31.12.2013 — ₹ 2,00,000; 31.3.2014 — ₹ 5,00,000; 30.6.2014 — ₹ 3,36,000; 30.9.2014 — ₹ 6,00,000; 31.12.2014 — 12,00,000
    The production had begun on 1.7.2013. The rate of exchange may be taken at £ 1 = ₹ 13.33 for remittances up to 6.6.2014 and thereafter at £ 1 = ₹ 21. The remittance has been made in each case within one month from the end of the relevant quarters. Show Royalty Account, Agro (U.K.) Account and Shortworkings Account.
23. MMC Ltd. obtained a lease from EC Ltd., for a coal mine on 1st January 2009 on the following terms and conditions:
    (a) Royalty @ ₹ 10 per tonne raised.
    (b) Minimum rent ₹ 1,20,000 p.a.
    (c) Recoupment of shortworkings of each year during three years following, subject to a maximum of ₹ 25,000 p.a.
    (d) In the event of strike the minimum rent would be taken pro-rata on the basis of actual working days, but in the event of lockout, the lessee would enjoy a concession in respect of minimum rent for 50% of the period of lockout.
    Besides the above, MMC Ltd. have been granted a cash subsidy equal to 25% of the unrecoupable shortworkings by the Central Govt. up to the first 5 years of the lease.

(e) The actual royalties of the first 6 years are as follows: 2009 — ₹ 70,000; 2010 — ₹ 1,02,000; 2011 — ₹ 1,61,000; 2012 — ₹ 1,36,000; 2013 — ₹ 1,08,000 (strike 73 days); 2014 — ₹ 97,000 (lockout for 4 months).

You are required to show Royalties Account; Shortworkings Account; EC Ltd. Account in the books of MMC Ltd.

24. P took a lease of mines from N w.e.f. January 1, 2002 for 20 years. The terms provided for the royalty payment @ ₹ 6 per ton raised, subject to a minimum rent of ₹ 1,20,000 p.a. with a right to recoup shortworkings within next 3 years. It was also agreed that the minimum rent should be reduced proportionately in case of strikes or lock-outs in any year. The following are the details of the output in tons: 2009 — 23,000; 2010 — 18,700; 2011 — 15,400 (strike for 3 months); 2012 — 19,000; 2013 — 20,600; 2014 — 22,600. The balance in Shortworkings Account as on January 1 2009, was ₹ 49,000, of which ₹ 22,000 arose in 2006 and the balance in 2007.

Show the Royalties Account; Shortworkings Account and N Account in the books of P for all the above 6 years.

25. The following information has been obtained from the books of a lessee relating to the years 2009-10 to 2012-13 (all figures in ₹):

Year	Payments to Landlord After Deduction of Tax @ 20%	Shortworkings Recovered	Shortworkings Lapsed
2009-10	12,000	—	800
2010-11	12,000	2,500	—
2011-12	12,000	1,000	500
2012-13	19,200	—	—

Shortworkings Account balance brought forward on 1.4.2009 was ₹ 800 (which arose in 2007-08).

According to the terms of agreement, shortworkings are recoverable within the next two years following the year in which shortworking arises.

You are required to prepare Royalties Account and Shortworkings Account for the four years ended 31.3.2013.

26. The following balances appeared in the books of a Lessee as on January 1, 2009: Landlord's Account (Cr.) ₹ 28,000; Shortworkings Account (Dr.) ₹ 6,000 (out of which ₹ 3,000 arose in 2008, ₹ 2,000 in 2007 and the rest in 2006).

The agreement of royalty provided the following:

(a) Minimum rent ₹ 56,000 p.a.

(b) The power to recoup shortworkings within 3 years immediately following the year in which it arises.

(c) Payments to the landlord to be made as under:

50% of the amount is payable in the year in which it becomes due and the balance of 50% in the next year.

You are given the following particulars from 2009 to 2012:

Year	Payments to Landlord (₹)	Shortworkings (₹)	Shortworkings Recouped (₹)
2009	56,000	—	800
2010	58,000	—	5,000
2011	58,000	2,000	—
2012	60,000	—	2,000

Show the Royalty Account, Shortworkings Account and the Landlord's Account in the books of the lessee from 2009 to 2012. *[I.C.W.A. (Inter) — Adapted]*

SUB-LEASE

27. Das obtained on 1.1.2010 from Jalan a lease of some coal bearing land, the terms being a royalty of ₹ 10 per ton of coal raised subject to a minimum rent of ₹ 40,000 p.a. with a right of recoupment of shortworkings over the first four years of the lease. On the same date Das granted a sub lease of part of the land to Raghunath on a royalty of ₹ 15 per ton merging into a minimum rent of ₹ 20,000 per annum with a right of recoupment of shortworkings during the next two years following. The output for the first five years were as follows : (in tons)

Year	2010	2011	2012	2013	2014
Das	2,200	2,320	2,600	2,800	3,600
Raghunath	800	1,080	1,400	1,800	2,400
Total	3,000	3,400	4,000	4,600	6,000

Show Ledger Accounts in the books of Das.

28. M/s Coal Extractors Ltd. took lease of a coal mine from M/s Coal Mines Ltd. at an annual dead rent of ₹ 10,000 subject to a royalty payable @ ₹ 2 per ton extracted. Shortworkings are recoupable one year after they arise.

Coal Extractors Ltd. sub-leased a part of the mine to Miners' Co-operative at an annual dead rent of ₹ 5,000 subject to a royalty payable @ Re 1 per ton extracted. The right to recoup shortworkings arise one year after they take place. However, such right lapses at the end of the year in which shortworkings become recoupable.

Details of extraction (in tonnes) are as follows:

	2011	2012	2013	2014
Coal Extractors Ltd.	2,000	3,000	4,000	5,000
Miners' Co-operative	2,000	3,000	4,000	5,000

In 2014 the whole mine was closed for 6 months due to a mine collapse.

Show Royalty Payable Account, Shortworkings Repayable Account, Coal Mines Ltd. Account and Miners' Co-operative Account in the books of Coal Extractors Ltd.

29. West Bengal Coal Co. obtained the lease (with powers to sub- lease) of a coal mine from K. Roy for a period of 30 years from 1st January, 2011. The terms of the lease contained, amongst others, the following provisions:
(a) Minimum rent payable is ₹ 20,000 merging into a royalty of Re 1 per ton of coal raised in any year.
(b) Shortworking is recoverable throughout the term of the lease.
(c) West Bengal Coal Co. granted sub-lease of a portion of the colliery on 1st January, 2012 for a period 15 years to Coal Syndicate on the following terms: (i) Minimum rent payable is ₹ 12,500 merging into a royalty of ₹ 1.50 per ton of coal raised in any year; and (ii) Shortworking is recoverable during the first three years of the lease. In the first 4 years the raisings were as follows:

Year	By West Bengal Coal (Tons)	By Coal Syndicate (Tons)
2011	7,000	—
2012	8,000	5,000
2013	12,000	8,000
2014	15,000	10,000

You are required to show: (i) Royalties Payable Account; (ii) Royalties Receivable Account; (iii) Shortworkings Recoupable Account; (iv) Royalties Suspense Account; and (v) Coal Syndicate Account in the books of West Bengal Coal Co.

30. Alpha Co. Ltd. holds a lease of mines from Sri A Shah for a period of 30 years from 1st July, 2012. Under the lease, royalty of 50 paise per ton merging in a minimum rent of ₹ 20,000 a year is payable half-yearly on 30th June and on 31st December, 2012. They granted a sub-lease for 20 years from 1st December, 2012 to Neera Co. Ltd. of one half of the area for a royalty of 75 paise a ton merging in a minimum rent of ₹ 15,000 a year payable half yearly on 30th June and 31st December. Alpha Co. Ltd. is entitled under the lease from the landlord to recoup shortworkings out of subsequent excess workings without any limitation of period but Neera Co. Ltd. under the sublease is allowed to recoup shortworkings out of excess working in any of the three years immediately following that in which the shortworkings accrued.
Minerals raised were as following:

	By Alpha Co Ltd.	By Neera Co Ltd.
Half year ended 31st Dec, 2012	8,000	—
Half year ended 30th June, 2013	10,000	10,000
Half year ended 31st Dec, 2013	15,000	16,000
Half year ended 30th June, 2014	20,000	25,000
Half year ended 31st Dec, 2014	30,000	10,000

Show the necessary Ledger Accounts in the books of Alpha Co. Ltd.

31. On 1.1.2010, A obtained a mining lease and from that date he sub-leased a part of the mine to B. Show Ledger Accounts in A's books from the following data:

Year	2010	2011	2012	2013	2014	Royalty per ton	Dead rent p.a.	Shortworkings Recoverable
Lease (tons)	1,000	3,000	12,000	9,000	5,000	₹ 2	₹ 15,000	3 years
Sub-Lease (tons)	1,000	2,000	5,000	2,000	12,000	₹ 3	₹ 10,000	2 years

There was a strike in the year, 2013. In case of strike, royalty earned will discharge all liabilities for the year only.

32. Iron Ore Limited leased its mines to Digwell Limited on the following terms: (1) Royalty will be payable at ₹ 2 per tonne of raising, with a minimum of ₹ 4,000 per annum; (2) Shortworking can be recouped within the first 3 years and not thereafter.
Digwell Limited with permission from Iron Ore Limited sub-leased a part of the mine to Dowell Limited on the following terms:
(1) Royalty will be payable at ₹ 3 per tonne of raising, with a minimum of ₹ 2,400 per annum;
(2) Shortworking can be recouped within the first 3 years and not thereafter.

Raising (in tonnes) are :

Year	Digwell Limited	Dowell Limited	Total
1	1,000	500	1,500
2	1,100	600	1,700
3	1,400	400	1,800
4	1,800	700	2,500

Show how the relevant items will appear in the Manufacturing Account, Profit and Loss Account and the Balance Sheet, in the Annual Accounts, for each of the 4 years of Digwell Limited.

33. SN took on lease mining rights in an area of 100 square miles for a period of 33 years from 1st January 2012. Under the terms of the lease, a royalty of Re 1 per tonne is payable merging in a minimum rent of ₹ 40,000 per annum payable half yearly on 1st January and 1st July every year.
SN granted a sub-lease for 20 years of a portion of the above area measuring 50 square miles to KS from 1st July 2012 in terms of which a royalty of ₹ 1.50 per tonne merging in a minimum rent of ₹ 39,000 per annum was payable again in equal instalments on every 1st January or 1st July.
SN can recoup shortworkings throughout the period of lease whereas the sub-lease provides that any shortworkings could be recouped only out of excess workings in any of the three half years immediately following that in which the shortworkings accrued. Details for minerals obtained were: (figures in tons)

	30.6.2012	31.12.2012	30.6.2013	31.12.2013	30.6.2014	31.12.2014

35. Miners Ltd. holds a lease of a mine from Mr Landlord from January 1, 2012. The royalty, payable under this lease is Re 1 a tonne, the minimum rent being ₹ 40,000 a year. The royalty was payable half-yearly on June 30 and December 31. With effect from July 1, 2012 they granted a sub-lease to Mr Industrious of one-half of the area for a royalty of ₹ 1.50 a tonne, the minimum rent being ₹ 30,000 a year, payable half-yearly on June 30 and December 31. Miners Ltd. is entitled under the lease from Mr Landlord to recoup shortworkings out of subsequent excess workings throughout the term of the lease. Mr Industrious, however, is entitled to recoup shortcomings out of excess workings in any of the three half-years immediately following that in which the shortworkings accrued.
The minerals raised in tonnes are as follows:

Half-yearly ending	30.6.2012	31.12.2012	30.6.2013	31.12.2013	30.6.2014
Computed Total	5,000	5,000	20,000	30,000	25,000
By Mr Industrious	—	5,000	6,000	6,000	12,000

Show the Royalties Accounts and the Shortworkings Accounts in the books of Miners Ltd. both under the lease from Mr Landlord and the sub-lease to Mr Industrious. The books of Miners Ltd. are balanced yearly on June 30.

36. Dobsons Ltd. took a licence for production of a foreign medicine from Johnson Ltd. at royalty of Re 1 per bottle produced.
Dobsons Ltd. issued a sub-licence to Medico Ltd. on the basis of a royalty payment of ₹ 1.25 per bottle sold. Minimum royalty payable to Medico Ltd. was fixed at ₹ 15,000 per annum with a right to recoup shortworkings in the following year.

From the following details show Royalty Receivable Account, Royalty Payable Account and Shortworkings Account, in the books of Dobsons Ltd.

	Dobsons Ltd.		Medico Ltd.	
	Sales	Closing Stock	Production	Closing Stock
1st Year	50,000	5,000	10,000	2,000
2nd Year	70,000	8,000	18,000	4,000
3rd Year	1,00,000	10,000	25,000	5,000

37. P Co Ltd took lease of a colliery from a landlord of Jharia for a period of 30 years from 1.1.2013 with a power to sub-lease the property.
Under the terms of this lease, a royalty of Re 1 per tonne is payable, minimum rent being ₹ 14,000 a year, payable half yearly on 30th of June and 31st December.
P Co Ltd are entitled under the lease to recoup shortworkings from the landlord out of excess working throughout the term of the lease. P Co Ltd granted a sub-lease of a part of the property to Q Co Ltd from 1.7.2013 for a royalty of ₹ 1.50 per tonne merging into a minimum rent of ₹ 21,000 per year payable half yearly on 30th June and 31st December.
The sub-lessee, Q Co Ltd, are entitled to recoup shortworkings only out of the excess workings in any of the three half years immediately following that in which the shortworkings occurs. The output was as follows :

Half Year ended	30.6.2013	31.12.2013	30.6.2014	31.12.2014	30.6.2015
P Co Ltd (Tonnes)	7,000	7,000	28,000	42,000	35,000
Q Co Ltd (Tonnes)	—	7,000	8,400	8,400	16,800

Show necessary accounts in the books of P Co Ltd, whose books are closed on 30th June each year.

38. Homeo Research Laboratories (P) Ltd developed Soft Skinobit, a new cosmetic and got it patented.
On 1.3.2011 it issued a licence to M/s M Bhattacharya & Sons for commercial production and sale of the product. Later in the day, M Bhattacharya & Sons granted a sub-licence to Chowdhury Bros for the same purpose.
The terms are stated below :
Licence : Royalty ₹ 5 per unit produced ; Minimum Rent ₹ 36,000 p.a
.Sub-licence: Royalty ₹ 7.50 per unit sold ; Minimum Rent ₹ 14,000 p.a.
Recoupment of shortworkings : If the royalty for any year falls short of the minimum rent, the shortworkings can be recouped out of royalties in excess of the minimum rent for either of the two immediately following years (applicable to both parties).
From the following particulars prepare Royalty Accounts and Shortworkings Accounts in the books of M/s M Bhattacharya & Sons for the entire period :

	M/s M Bhattacharya & Sons		Chowdhury Bros	
	Sales (Units)	Closing Stock (Units)	Production (Units)	Closing Stock (Units)
Year I	2,500	500	2,100	200
Year II	5,800	600	1,800	400
Year III	4,800	1,000	2,000	700

39. On 1.1.2011, Hari obtained a mining lease on a term that for every ton of output a royalty of 50 paise is payable subject to a minimum rent of ₹ 12,000 p.a. On 1.7.2012, Hari granted a sub- lease of part of this mine to Ram on the basis that a royalty of 75 paise per ton of output merging into a minimum of ₹ 5,000 p.a.
The recoupment of shortworkings was limited under the principal lease to a period of first three years of lease and under the sub-lease to a period up to 31.12.2013.
From the following information, you are required to show ledger accounts in the books of Hari: (output in tons)

	2011	2012	2013	2014
Own	18,000	16,000	18,000	15,000
Sub-lease	—	3,000	9,000	10,000

40. On 1.1.2010, Sudarshan Sinha obtained a mining lease and from that date he sub-leased a part of the mine to Sujit Saha. Show ledger accounts in the books of Sudarshan Sinha from the following data :

Year	Lease (tons)	Sub-lease (tons)
2010	1,500	1,000
2011	4,000	4,500
2012	18,000	10,000

2013	15,000	(strike) 3,000
2014	8,000	15,000
Royalty per ton	₹ 3.00	₹ 4.00
Minimum rent p.a.	₹ 35.000	₹ 25,000
Shortworkings recoverable in following	3 years	2 years

In the event of a strike and the minimum rental not being reached, the lease provided that the actual royalties earned for the year discharged all rental obligations for the year.

Practical Questions

1. **2011 : Shortworkings ₹ 36,000; 2012 : Shortworings written-off ₹ 18,000; 2013 : Shortworkings recouped ₹ 12,000 and written-off ₹ 15,000; 2014 : Shortworkings recouped ₹ 8,000 and written-off ₹ 1,000.**
2. **Production (tonnes) — 2010 : 2,300; 2011 : 3,600; 2012 : 5,000; 2013 : 5,500; 2014 : 8,300.**
   2010 : Shortworkings ₹ 40,500; 2011 : Shortworings : ₹ 21,000; 2013 : Shortworkings recouped ₹ 7,500 and written-off ₹ 5,400.
3. **Year 1 — Shortworkings : ₹ 3,000; Year 2 — Shortworkings : ₹ 200; Year 3 — Shortworkings recouped : ₹ 2,500 and written-off ₹ 500; Year 4 — Shortworkings written-off ₹ 200; Year 5 — Excess workings : ₹ 2,500.**
4. **2011 : Shortworkings ₹ 2,000; 2012 : Shortworings ₹ 4,000; 2013 : Shortworkings recouped ₹ 2,000; 2014 : Shortworkings recouped ₹ 2,000 and written-off ₹ 2,000.**
5. **2011 : Shortworkings ₹ 200; 2012 : Shortworings recouped ₹ 100; 2013 : Shortworkings ₹ 20 (Machine 2) and ₹ 100 (Machine 3) , Shortworkings written-off ₹ 20 (Machine 2); 2014 : Shortworkings ₹ 300 (Machine 3) and Shortworkings written-off ₹ 230 (Machine 3).**
6. **Production (unit) — 2010 : 250; 2011 : 450; 2012 : 570; 2013 : 630; 2014 : 100.**
   2010 : Shortworkings ₹ 25,000; 2011 : Shortworings : ₹ 5,000 and written-off ₹ 25,000; 2012 : Shortworkings recouped ₹ 5,000; 2014 : Shortworkings written-off ₹ 40,000 (of 2014).
7. **2011 : Shortworkings ₹ 8,000; 2012 : Shortworings ₹ 7,000; 2013 : Shortworkings recouped ₹ 8,000 and written-off ₹ 7,000; 2014 : Amount paid ₹ 30,000.**
8. **1st year — Shortworkings : ₹ 3,000; 2nd year — Shortworkings recouped : ₹ 1 ,000; 3rd year — Shortworkings lapsed : ₹ 2,000; 5th year — Shortworkings recouped : ₹ 1,000; and Shortworkings lapsed : ₹ 1,000.**
   Amount paid : 1st year } ₹ 8,000; 2nd year } ₹ 9,000; 3rd year } ₹ 10,000; 4th year } ₹ 8,000; 5th year — ₹ 13,000.
9. **31.3.2012 — Shortworkings : ₹ 5,000; 31.3.2013 — Shortworkings : ₹ 3,000; 31.3.2014 — Shortworkings recouped : ₹ 3,000; Shortworkings lapsed — ₹ 2,000; 31.3.2015 — Shortworkings recouped : ₹ 3,000.**
   Amount paid : 31.3.2012 — ₹ 12,000; 31.3.2013 — ₹ 12,000; 31.3.2014 — ₹ 12,000; 31.3.2015 — ₹ 8,000.
10. **Amount paid : October to December, 2013 — ₹ 500; January to March, 2014 — ₹ 600; April to June, 2014 — ₹ 900 and July to September, 2014 — ₹ 3,000.**
11. **1st year — Shortworkings : ₹ 8,000; 2nd year — Shortworkings recouped : ₹ 8,000. Amount paid : 1st year : ₹ 20,000; 2nd year : ₹ 25,000; 3rd year : ₹ 41,250; 4th year : ₹ 15,000.**
12. **2011 — Shortworkings : ₹ 10,000; 2012 — Shortworkings : ₹ 5,000; 2013 — Shortworkings recouped : ₹ 5,000 and Shortworkings lapsed : ₹ 5,000; 2014 — Shortworkings recouped : ₹ 5,000.**
13. **2013 — Actual royalties : ₹ 17,000; Minimum rent : ₹ 25,000; and Shortworkings : ₹ 8,000.**
    2014 — Actual royalties : ₹ 30,000; Shortworkings recouped : ₹ 5,000; and Shortworkings lapsed : ₹ 3,000.
    Shortworkings can be recouped within next year.
14. **Actual royalty — 2010 : ₹ 30,000; 2011 : ₹ 75,000; 2012 : ₹ 40,000; 2013 : ₹ 70,000; 2014 : ₹ 65,000. As the minimum rent is equal to or lower than the actual royalties, the question of shortworking does not arise. Hence, there is no question of shortworking recovery or shortworking lapse.**
15. **2011 — Shortworkings : ₹ 20,000; 2012 : Shortworkings recouped : ₹ 4,000; Shortworkings lapsed : ₹ 16,000; 2014 — Shortworkings : ₹ 2,000.**
16. **Amount charged to each year's Profit and Loss Account — 2007 : Nil; 2008 : ₹ 3,300; 2009 : ₹ 9,000; 2010 : ₹ 11,100; 2011: ₹ 14,000; 2012 : ₹ 15,000; 2013 : ₹ 14,600; 2014 : ₹ 15,200, Shortworkings lapsed in 2013 : ₹ 6,600.**
17. **2011 : Shortworkings — ₹ 4,000; 2012 : Shortworkings — ₹ 1,500; 2013 : Shortworkings : ₹ 3,000; 2014 : Shortworkings recouped : ₹ 6,000 and Shortworkings lapsed : ₹ 2,500.**
18. **2010 : Shortworkings — ₹ 4,400; 2011 : Shortworkings — ₹ 5,200; 2012 : Shortworkings recouped — ₹ 4,800; 2013 : Shortworkings lapsed — ₹ 4,800; 2014 — Shortworkings : ₹ 1,200.**
19. **2010 : Shortworkings — ₹ 9,000; 2011 : Shortworkings recouped : ₹ 3,000; 2012 : Shortworkings — ₹ 1,500; 2013 : Shortworkings recouped : ₹ 4,500 and Shortworkings lapsed : ₹ 1,500; 2014 : Shortworkings recouped — ₹ 1,500.**
20. **1st year's Shortworkings : ₹ 4,000; 2nd year's Shortworkings : ₹ 5,000; 3rd year's Shortworkings recouped : ₹ 3,000 and Shortworkings lapsed : ₹ 3,000.**

21. **2009 : Shortworkings : ₹ 20,000; 2010 : Shortworkings : ₹ 12,500; 2011 : Shortworkings : ₹ 7,500; 2012 : Shortworkings recouped : ₹ 5,000 and amount written-off : ₹ 15,000; 2013 : Shortworkings recouped : ₹ 10,000 and Shortworkings written-off: ₹ 2,500; 2014 : Shortworkings recouped — ₹ 7,500.**

Packages and Containers

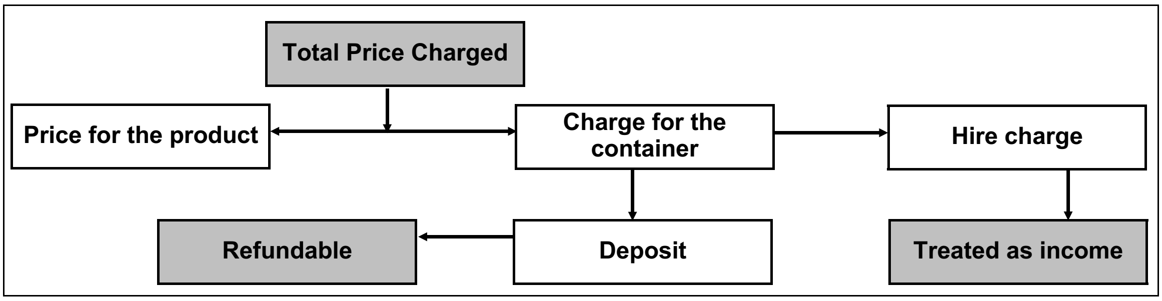
A container is anything in which goods are packed for sale. For most products some sort of packing is essential inasmuch as they cannot be sold without a container (e.g., soft drinks, ink, milk, etc.) or by their very nature, cannot be conveniently supplied in a loose form (e.g., cigarettes, potato chips, etc).

Containers of small values as compared to these of the product are generally non-returnable, and are passed on to the customers as part of the total price of the finished product. This is because these types of containers cannot be re-used and are thrown away by the customer when the product is used up. Obviously, the sale price covers both the contained, i.e., the product, and the container. When the container price is just a small fraction of the total costs, it is ignored by the customer. The price he pays is thought to be the price of the product alone. In these cases, no separate accounting treatment is required for containers since these are treated as a part of the total cost of product. But when the cost of the container is a significant portion of the total cost, the charge for the container is separated from the price of the product with a view to compete with sellers of similar other products. Containers of these types can usually be re-used and are returnable to the seller when empty. Bottled soft drinks are a case in point. Normally, a major portion of the charge for the container is refunded to the customers if the container is returned within a specified time (in proper condition, of course). The difference between the charge out price and the refund is treated as hire charge. For example, if the charge out price of a container is ₹ 15 and the refund is ₹ 12, then ₹ 3 represent the ***hire charge***.

The total price charge for the product sold in container has two elements:

(i) price for the product itself, which is actually sold, and

(ii) charge for the container (major portion of which is held as deposit and is refunded when the container is returned, the remaining portion being treated as hire charges).



The refundable price is generally set higher than the cost price of the container to encourage the customers to return it. If only the cost price is charged, which is essentially lower than the retail price, many customers may not be induced to return the container. If a higher price is charged, the consumer will be eager to return the container within the stipulated time.

Meaning of Important Terms/Expressions

Cost Price : It is the purchase price of the container

Charge out Price : It is the price charged to the customers for the container.

Returnable Price : It is the amount refunded when container is returned within a stipulated time.

Hire Charge : It is the difference between charge out price and returnable price.

Containers Retained (sold) : When containers are not returned within the specified time, these are treated as sold or retained by the customers.

Returnable Containers : These containers are lying with the customers on the closing date of the accounting period but the time limit for returning these has not yet expired.

Objectives of Keeping Separate Accounts for Containers

Returnable containers necessitate keeping separate accounts for the following reasons :

1. To ascertain the profit or loss arising out of containers.
2. To exercise control over the movement of containers. There is a regular inflow and outflow of containers, which demands reconciliation.
3. A substantial amount is involved in the investment for containers.

Income from Containers

1. Income from hire charges, which is ascertained as under:
   Number of containers sent out x (Charge out price – Returnable price)
2. Income from retained containers, which is ascertained as under:
   Number of containers retained x (Returnable price – Cost price)
3. Sale of scrap/insurance claim.

Important points to note:

(i) Income from hire charges arises in the accounting year when they are sent out, and has nothing to do with whether containers are retained or returned.

(ii) The income from retained containers is over and above the hire charges. It arises when the mandatory time limit expires, which may be in a different accounting period. In other words, containers may be sent out to customers and hire charges taken as income in one accounting period, while the profit on the retained containers may fall in another accounting period.

Expenses/Losses on Containers

1. Depreciation of the containers — It is the difference between the opening and closing values.
2. Containers scrapped — It is the cost price of the containers.
3. Repairs — It is the actual cost of repairs.

Accounting Arrangements in the Books of the Seller

Accounting treatment of non-returnable containers of a small value is different from the treatment of returnable containers. It is, therefore, convenient to discuss the matter separately.

1. Non-returnable Containers

In case of non-returnable containers, the charge is included in the total price of the finished product, and any profit made on the containers is automatically included in the profit on the sale of finished product.

2. Returnable Containers

In case of returnable containers, charge for containers is separated from the price of the product. For proper accounting, different methods of accounts are followed. Some of these are given below:

Method-1 [Stock and Trading Method]

Under this method, the following accounts should be opened.

1. Containers Stock Account.
2. Containers Trading Account.
3. Containers Deposit/Suspense/Reserve/Provision Account.
4. Containers Debtors Account.

1. Containers Stock Account

A Containers Stock Account is opened in the General Ledger to exercise greater control over the containers. It is ruled to record number, rate and value. All entries are made in this account at cost price (or lower stock-taking price).

This account is debited with the cost or lower stock-taking price of containers in hand and with customers at the beginning of the period. Containers purchased during the period are also debited to this account at ***purchase price***.

This account is credited with the (i) cost (or lower stock-taking price) of containers retained by customers, and (ii) containers destroyed or scrapped during the period. The depreciation on containers is also credited to this account. At the end of the accounting period, containers in hand and with customers are carried down at cost or lower stock-taking price, thus balancing both the monetary and unit columns. This account does not disclose any profit or loss on containers. The closing balance is shown in the Balance Sheet on the assets side. In the Containers Stock Account, no entry is passed for containers sent out to the customers and containers returned by the customers.

	To Balance b/d: In hand With customers To Bank A/c (Purchases)					By Containers Trading A/c (Cost of containers retained) By Containers Trading A/c (Depreciation) By Balance c/d In hand (new) With customers (old)			

2. Containers Trading Account

A Containers Trading Account is opened in the General Ledger to determine the profit or loss on returnable containers. It is a Nominal Account to record number, rate and value. This account is debited with the amount transferred from Containers Stock Account in respect of: (i) Containers retained by customers; (ii) Containers scrapped; (iii) Containers destroyed ; and (iv) Depreciation on the containers, etc. This account is also debited with the amount spent for repairs of containers.

This account is credited with (i) Hire charges on containers sent out; (ii) Sale of scrap; and (iii) Returnable price on retained containers. The balance of this account represents profit or loss on containers and it is transferred to the Profit and Loss Account.

Dr. Containers Trading Account Cr.

Date	Particulars	Nos.	Rate	₹	Date	Particulars	Nos.	Rate	₹
	To Containers Stock A/c (Cost of containers retained) To Containers Stock A/c (Cost of containers scrapped) To Profit & Loss A/c - Profit					By Hire Charges A/c By Containers Deposit A/c (Containers retained) By Bank A/c (Sale of scrap) By Profit & Loss A/c (Acc. loss)			

3. Containers Deposit/Suspense/Provision/Reserve Account

Containers Deposit Account records (at returnable price) opening and closing refundable deposits, containers sent out to customers and these returned or retained by them. This account always shows a credit opening balance equal to refundable deposits (containers with customers at the beginning *multiplied by* returnable price). It is credited by the amount of deposits on containers sent out to customers during the year.

This account is debited by the amount of deposits on containers returned and deposits no longer refundable for retained (sold) containers. The balance of this account represents deposit on returnable containers at the year end. The closing balance of refundable deposits on containers with customers is shown in the Balance Sheet as a deduction from Containers Debtors Account.

	To Balance c/d: (Deposit on containers still returnable)								

4. Containers Debtors Account

Containers Debtors Account is a Personal Account. This account shows a debit balance at the beginning of the year with amount due from customers in respect of containers. It is debited with the amount of deposits on containers sent out during the year and hire charges on such containers.

This account is credited with the deposits on containers returned and payments made during the year. The balance represents the amount due from customers in respect of the containers. This balance is shown in the Balance Sheet after deducting the balance of Containers Deposit Account.

10. At the end of the accounting period :

(i) The containers in hand as well as with the customers (returnable) are valued at cost or lower stock-taking price and these are carried forward as a debit balance on Containers Stock Account.

(ii) The balance of Containers Trading Account represents profit or loss on containers and it is transferred to Profit and Loss Account.

(iii) The credit balance of Containers Suspense / Deposit Account is carried forward to the next period.

(iv) The debit balance of Containers Debtors Account is also carried forward to next period. For Balance Sheet purposes the credit balance of the Containers Suspense Account is set-off against Containers Debtors Account debit balance.

The above related matters are shown in the Balance Sheet as follows:

Balance Sheet as at ..... [Extract]

In solving a practical question, certain workings are necessary to find out the missing information. These can be done in the following manner:

Inflow → **Containers in Hand** → **Outflow**

Containers in Hand

	Nos.		Nos.
Opening balance		Sent out to customers	
Purchased		Containers scrapped	
Returned by customers		Containers sold	
		Containers lost	
		Closing balance	

Inflow → **Containers with Customers** → **Outflow**

Containers with Customers

	Nos.		Nos.
Opening balance		Returned by customers	
Sent out to customers		Retained by customers	
		Closing balance	

What comes into the business → **Reconciliation of Stock (as a whole)** → **What goes out of the business for ever**

Reconciliation of Stock (as a whole)

	Nos.		Nos.
Opening balance		Retained by customers	
— in hand		Containers scrapped	
— with customers		Containers lost	
Purchased		Containers sold	
		Closing balance	
		— in hand	
		— with customers	

Alternatively,

Containers in Hand

Important points

(i) **Sent out** → **Charge out Price** → *Debited* **to Containers Debtors Account**

Charge out Price → **Hire charges** → *Credited* **to Hire Charges Account**

Charge out Price → **Deposit** → *Credited* **to Depost/Suspense/Provision Account**

(ii) **Returned** → **Returnable Price** → *Debited* **to Deposit/Suspense/ Provision Account**

↓

Credited **to Containers Debtor Account**

(iii) **Retained** → **Returnable Price** → *Debited* **to Deposit/Suspense/ Provision Account**

↓

Credited **to Containers Trading Account**

At the end of the year:

Hire charges are credited to Containers Trading Account separately (when stock and trading method is followed). It is credited to Container Stock Account (when stock and suspense method is followed).

The word "Containers" may be substituted for "Drums", "Boxes", "Packages", "Cases", "Crates", "Bottles" and "Barrels", etc. in appropriate situations.

Illustration 1

Chandra sells its goods in special packages costing ₹ 20 each. Packages are charged out at ₹ 28 each to the customers and credited at ₹ 18 each if returned in good condition within 3 months. For stock taking purposes, all the packages are valued at ₹ 15 each. From the following particulars, show (i) Packages Stock Account; and (ii) Packages Trading Account.

	Nos.		Nos.
Number of packages as on 1.1.2014			
— in hand	3,000	Sent to the customers during the year	9,000
— with customer	2,000	Returned by the customers during the year	6,000
Purchased during the year	5,000	Packages retained by the customers	2,200

Solution

Working Notes:

			₹
(1) Charge out price (₹)	28	**(2) Total Hire Charges**	
Less: Returnable price (₹)	18	Number of packages sent out x Hire charges per unit	
Hire charges per unit (₹)	10	(9,000 x ₹ 10)	90,000

(3) Packages in hand				**(4) Packages with customers**			
Particulars	Nos.	Particulars	Nos.	Particulars	Nos.	Particulars	Nos.
Opening balance	3,000	Sent out	9,000	Opening balance	2,000	Returned	6,000
Purchased	5,000	Closing balance	5,000	Sent out	9,000	Retained (sold)	2,200
Returned	6,000					Closing balance	2,800
	14,000		14,000		11,000	(Balancing figure)	11,000

(5) Depreciation on packages = 5,000 × ₹ 5 (₹ 20 – ₹ 15) = ₹ 25,000. No depreciation has been charged on old packages because their opening stock price and closing stock price are the same.

Drums on loan	280		
Drums in store	1,140		
	1,420	@ Cost less depreciation	?

Depreciation is charged @ 30% p.a. Purchases may be regarded as spread evenly throughout the year and disposes should be taken as from the drums in hand at 1 January.

You are required to prepare Drums Stock Account and Drums Trading Account.

Solution **In the books of Reliance Ltd**

Dr. **Drums Stock Account** **Cr.**

Date	Particulars	Nos.	₹	Date	Particulars	Nos.	₹
2014	To Balance b/d :			2014	By Drums Trading A/c	90	3,600
Jan. 1	On loan	230		Dec. 31	(Cost of drums not returned by the		
	On rental	140			customers — Note 1)		
	In store	470			By Drums Trading A/c	330	13,200
		840	33,600		(Cost of drums scrapped)		
Dec. 31	To Bank A/c (Purchases)	1,000	63,200		By Drums Trading A/c		14,520
					(Depreciation — Note 2)		
					By Balance c/d : (Note 3)		
					On loan 280		
					In store 1140	1,420	65,480
		1,840	96,800			1,840	96,800

Dr. **Drums Trading Account** **Cr.**

Date	Particulars	Nos.	₹	Date	Particulars	Nos.	₹
2014	To Drums Stock A/c	90	3,600	2014	By Customers A/c (Rental charged)		9,500
Dec. 31	(Cost of drums not returned)			Dec. 31	By Customers A/c (Drums charged)	90	9,000
	To Drums Stock A/c	330	13,200		By Bank A/c	330	660
	(Cost of drums scrapped)				(Proceeds of drums scrapped)		
	To Bank A/c (Repairs)		4,900		By Profit and Loss A/c (Loss)		19,260
	To Drums Stock A/c						
	(Depreciation — Note 2)		14,520				
	To Customers A/c (Rentals credited)		2,200				
		420	38,420			420	38,420

Working Notes :

(1) Written down value of each drum at the beginning = ₹ 33,600 / 840 = ₹ 40. Number of drums not returned by the customers = ₹ 9,000 / ₹ 100 = 90.

Cost of drums not yet returned by the customers = ₹ 40 × 90 = ₹ 3,600.

(2) Calculation of Depreciation

			₹
Opening stock		840 units at cost less depreciation	33,600
Less : Drum charged	90		
Scrapped	330	420	16,800
		420	16,800

(a) Depreciation on ₹ 16,800 for one year at 30% per annum is ₹ 5,040.

(b) During the year a further 1,000 drums are purchased for ₹ 63,200. Purchase of these regarded as spread evenly throughout the year, i.e., they have been owned on average, for 6 months. Depreciation, therefore, will be :
₹ 63,200 × 30% × 6/12 = ₹ 9,480. Total depreciation for the year = ₹ 5,040 (a) + ₹ 9,480 (b) = ₹ **14,520**.

(3) Written down value of closing stock

	₹	₹
(i) Opening stock	16,800	
Less : Depreciation (a)	5,040	11,760
(ii) Purchased during the year	63,200	
Less : Depreciation (b)	9,480	53,720
		65,480

Illustration 6

Madras Chemicals Ltd. supplies its products in returnable drums which are charged at ₹ 20 each. Customers returning the drums within a month are credited with ₹ 18. The company's procedure is to retain ₹ 18 in Deposit Account till the expiry of the option period for return of the drums.

The following particulars are available from the books:

	Nos.		Nos.
Returnable drums as on 1.1.2014	8,000	Drums returned by customers in 2014	2,88,000
Drums in stock as on 1.1.2014	16,000	Drums returnable on 31.12.2014	15,000
Drums purchased during 2014 at ₹ 15 per drum	20,000	Drums scrapped in 2014 sold for ₹ 10,000	2,000
Drums sent to customers during 2014	3,00,000		

All drums as on 31.12.2013 and 31.12.2014 are to be valued at ₹ 10 each. All the amounts due in respect of drums have been collected from the customers.

You are asked to show the Ledger Accounts for 2014 of:

(a) Drum Stock; (b) Drum Debtors; (c) Drum Deposits; and (d) Drum Trading.

Solution

Working Notes:

(1) Charge out price (₹)	20	**(2) Total Hire Charges**	₹
Less: Returnable price (₹)	18	Number of drums sent out x Hire charge per drum	
Hire charges per unit (₹)	2	(3,00,000 x ₹ 2) =	6,00,000

(3) Drums in hand				**(4) Drums with customers**			
Particulars	Nos.	Particulars	Nos.	Particulars	Nos.	Particulars	Nos.
Opening balance	16,000	Sent out	3,00,000	Opening balance	8,000	Returned	2,88,000
Purchased	20,000	Scrapped	2,000	Sent out	3,00,000	Retained (Bal. figure)	5,000
Returned	2,88,000	Closing balance	22,000			Closing balance	15,000
	3,24,000		3,24,000		3,08,000		3,08,000

(5) Depreciation on drums = ₹ 20,000 (15 – 10) = ₹ 1,00,000. No depreciation has been charged on old drums because their opening stock-taking price and closing stock-taking price are the same.

Method - 2 [Stock and Suspense Method]

Under this method, Containers Trading Account is merged with the Containers Stock Account. The common entries between the two accounts are eliminated. The Containers Stock Account will disclose profit or loss on containers. Containers Deposit Account and Containers Debtors Account are prepared in the usual manner.

The following accounts should be opened:

1. Containers Stock Account
[Mixture of Containers Stock and Containers Trading Account of Method - 1]

2. Containers Deposit/Suspense/Reserve/Provision Account
[Similar to Method - 1]

3. Containers Debtors Account
[Similar to Method - 1]

Accounting Entries

1. For purchase of containers
Containers Stock Account Dr. [Cost price]
To Cash/Bank/Sundry Creditors Account

2. For containers sent out to customers
Containers Debtors Account Dr. [Charge out price]
To Hire Charges Account [Hire charges]
To Containers Suspense/Deposit Account [Returnable price]

3. For containers returned by customers
Containers Suspense/Deposit Account Dr. [Returnable price]
To Containers Debtors Account

4. For containers retained (sold) by customers
Containers Suspense/Deposit Account Dr. [Returnable price]
To Containers Stock Account

5. For containers scrapped
Cash/Bank Account Dr. [Sale proceeds]
To Containers Stock Account

6. For repairing of containers

Containers Stock Account	Dr.	[Actual expenditure]
To Bank/Cash Account		

7. For accidental loss of containers

Bank Account	Dr.	[Insurance claims received]
Profit and Loss Account	Dr.	[Loss]
To Containers Stock Account		

8. For depreciation on containers

No entry

9. For transfer of hire charges

Hire Charges Account	Dr.	[Hire charges]
To Containers Stock Account		

10. At the end of the accounting period

(i) The containers in hand as well as with customers (returnable) are valued at cost or lower stock-taking price and these are carried forward as a debit balance on Containers Stock Account.

(ii) The balance of Containers Stock Account represents profit or loss on containers and it is transferred to Profit and Loss Account.

(iii) The credit balance of Containers Suspense/Deposit Account is carried forward to the next period.

(iv) The debit balance of Containers Debtors Account is also carried forward to the next period.

In the Balance Sheet, all the relevant matters are shown in the similar manner as for Method - 1.

Illustration 7

Durgapur Chemicals Ltd. delivers goods to customers in drums (which are valued in books at ₹ 30 each) charging them out at ₹ 60 each. Customers are credited with ₹ 40 each if the drums are returned in time. Following are the details of drums:

	Drums		Drums
Stock in hand on 1st January, 2014	2,000	Drums returned by customers	4,600
Drums with customers on 1st January, 2014	4,200	Drums destroyed in an accident	60
Purchases at ₹ 50 each	3,000	Drums sold as scrap for ₹ 1,000	100
Drums sent out to customers	6,400	Drums with customers (returnable) as on 31.12.2014	3,800

Show the necessary Ledger Accounts in the books of the Company.

Solution

Working Notes:

(1) Charge out price (₹)	60	**(2) Total Hire Charges**	₹
Less: Returnable price (₹)	40	Number of drums sent out x Hire charges per unit	
Hire charges per unit (₹)	20	(6,400 x ₹ 20)	1,28,000

(3) Drums in hand				**(4) Drums with customers**			
Particulars	Nos.	Particulars	Nos.	Particulars	Nos.	Particulars	Nos.
Opening balance	2,000	Sent out	6,400	Opening balance	4,200	Returned	4,600
Purchased	3,000	Scrapped	100	Sent out	6,400	Retained (Bal. fig.)	2,200
Returned	4,600	Destroyed	60			Closing balance	3,800
		Closing balance	3,040				
	9,600		9,600		10,600		10,600

(5) Total drums in hand = 3,040. Out of these 3,000 drums are assumed to be new and are, therefore, valued @ ₹ 50 each.

This problem can be solved as follows: (a) Stock and Trading Method; as well as (b) Stock and Suspense Method. The profit to be disclosed under both the methods is the same.

The Accounts opened under these methods are:

(a) Stock and Trading Method	**(b) Stock and Suspense Method**
(i) Drums Stock Account →	(i) Drums Stock Account
(ii) Drums Trading Account	
(iii) Drums Deposit Account →	(ii) Drums Deposit Account

(a) Stock and Trading Method

M/s L & Co. deliver their products in drums which are returnable. The containers cost ₹ 100 each and are valued at that price for stock-taking purposes. They are charged to customers at ₹ 140 each and credited on return within 2 months at ₹ 120 each.

On 1st April 2014, there were 150 drums in stock and 360 with customers which were returnable within 2 months. During the 6 months ended 30th September 2014, 1,000 new drums were purchased, 4,800 were sent to customers and 4,300 were returned by them. Of the drums returned, 250 were sold at ₹ 25 each and 130 were destroyed. On 30th September 2014, there were 270 drums in stock and 660 returnable drums with customers, and the remaining were retained by the customers.

You are to record the above transactions in the Drums Stock Account and the Drums Suspense Account in the books of M/s L & Co.

XYZ Ltd. sells goods in returnable boxes which are charged to customers at ₹ 50 each and credited with ₹ 40 each if returned within a month. From the following particulars prepare Boxes Stock Account, Boxes Reserve Account and Boxes Debtors Account assuming that the boxes were valued in the books at ₹ 20 each.

	Boxes		Boxes
Stock in hand on 1.1.2014	500	Returned by customers	1,800
Stock with customers on 1.1.2014	800	Destroyed in accident	100
Boxes Debtors balance on 1.1.2014 ₹ 48,000	—	Sold as scrap at ₹ 5 per box	40
Purchased at ₹ 30 each	1,200	Stock with customers on 31.12.2014	700
Sent out to customers	2,100	Cash received from customers ₹ 32,000	—

Solution

Working Notes:

(1) Charge out price (₹)	50	(2) Total Hire Charges	₹
Less: Returnable price (₹)	40	Number of boxes sent out x Hire charges per box	
Hire charges per unit (₹)	10	(2,100 x ₹ 10)	21,000

(3) Boxes in hand				(4) Boxes with customers

Tutorial Note : In the Balance Sheet, "Boxes Reserve Account" is shown as a deduction from "Boxes Debtors Account".

Method - 3 [Trading and Suspense Method]

Under this method, Containers Stock Account is merged with the Containers Trading Account. The common entries between the two accounts are eliminated. The Containers Trading Account discloses profit or loss on containers. Containers Deposits aand Containers Debtors Accounts are prepared in the usual manner.

The following accounts should be opened:

1. *Containers Trading Account*
   [Mixture of Containers Stock and Containers Trading Account of Method - 1]
2. *Containers Deposit/Suspense/Reserve/Provision Account*
   [Similar to Method - 1]
3. *Containers Debtors Account*
   [Similar to Method - 1]

Accounting Entries

1. For purchase of containers

Containers Trading Account Dr. [Cost price]
To Cash/Bank/Sundry Creditors Account

2. For containers sent out to customers

Containers Debtors Account Dr. [Charge out price]
To Hire Charges Account [Hire charges]
To Containers Suspense Account [Returnable price]

3. For containers returned by customers

Containers Suspense/Deposit Account Dr. [Returnable price]
To Container Debtors Account

4. For containers retained (sold) by customers

Containers Suspense Account Dr.
To Containers Trading Account

5. For containers scrapped

Cash/Bank Account Dr. [Sales proceeds]
To Containers Trading Account

6. For repairing of containers

Containers Trading Account Dr.
To Cash/Bank Account

7. For accidental loss of containers

Bank Account Dr. [Insurance claim received]
Profit and Loss Account Dr. [Loss]
To Containers Stock Account

8. For depreciation on containers

No entry

9. For transfer of hire charges

Hire Charges Account Dr. [Hire charges]
To Containers Trading Account

10. At the end of the accounting period

(i) The containers in hand as well as with the customers (returnable) are valued at cost or lower stock-taking price and these are carried forward as a debit balance on Containers Trading Account.
(ii) The balance of Containers Trading Account represents profit or loss on containers and is transferred to the Profit and Loss Account.
(iii) The credit balance of Containers Suspense/Deposit Account is carried forward to the next period.
(iv) The debit balance of Containers Debtors Account is also carried forward to the next period.

In the Balance Sheet, all the relevant matters are shown in the similar manner as we do in case of Method - 1.

Illustration 11

Gavaskar Co. Ltd. delivers goods to the customers in packages costing ₹ 30 each but charging them out at ₹ 60 each and crediting them at ₹ 48 each, if returned within three months.

On 1st April 2014, there were 5,000 packages in the godown of the company and 10,500 returnable packages in the hands of the customers. During the year ending 31st March 2015, 7,500 packages were purchased at ₹ 50 each and 16,000 packages were sent out to customers. Customers returned 11,500 packages in the year. 150 packages from the old lot were completely destroyed by a fire in the warehouse and another 250 packages from the old lot were accidentally broken and were sold as scrap value for ₹ 20 each. On 31st March 2015, 9,500 returnable packages from the old lot were with customers and the stock in godown of the company included all the new packages besides the old ones. The packages are valued at their cost price for stock-taking purposes.

Prepare for the year ended March 31 2015: (i) the Packages Trading Account; and (ii) the Packages Provision Account.

Solution

Working Notes:

(1) Charge out price (₹)	60	**(2) Total Hire Charges**	₹
Less: Returnable price (₹)	48	Number of packages sent out x Hire charges per unit	
Hire charges per unit (₹)	12	(16,000 x ₹ 12)	1,92,000

(3) Packages in hand

Particulars	Nos.	Particulars	Nos.
Opening balance	5,000	Sent out	16,000

Illustration 12

New Chemical Company sells its products in returnable canboys. Customers are billed at ₹ 5 for each canboy at the time of sale and credited with ₹ 4 if the canboys are returned in two months. In case the canboys are returned in a damaged condition credit is given only of ₹ 2.

The following figures are available for the year ended on 31st March 2015:

Particulars	Nos.	₹
Returnable stock with customers as on 1.4.2014	20,000	40,000
Stock on hand as on 1.4.2014	5,000	10,000
Canboys purchased during the year	15,000	45,000
Canboys sent out during the year	50,000	
Returnable canboys with customers as on 31.3.2015	10,000	
Canboys returned in damaged condition during the year	5,000	
Canboys not returned within the scheduled time during the year	20,000	

All stock is to be valued at cost. Damaged canboys are to be valued at 50% of cost. During the year ₹ 1,00,000 was received from debtors on account of canboys. Write-up the necessary Ledger Accounts.

Solution

Working Notes:

(1) Charge out price (₹)	5	**(2) Total Hire Charges**	₹
Less: Returnable price (₹)	4	Number of canboys sent out x Hire charges per unit	
Hire charges per unit (Re)	1	(50,000 x Re 1)	50,000

(3) Special charge for damaged canboys = 5,000 x ₹ 2 = ₹ 10,000.

(4) Canboys in hand

On 1.1.2014 stock of packages in hand was ₹ 8,000 (valued in the books at cost less 25%) and ₹ 1,200 in the hands of customers at invoice price, which is cost plus 50%.

For the year ended 31st December 2014, packages were charged out at cost plus 50% and full credit was given in respect of those returned in good condition. Packages sent out during the year were ₹ 16,000 (invoice price) and returns (all in good condition) ₹ 10,000. Customers retained packages at an invoice price of ₹ 300 and closing stock of packages in hand at cost was ₹ 6,666.67.

Write-up the Packages Stock Account and Packages Reserve Account.

Solution

Working Notes:

Cost Price	Working Price	Invoice Price
₹ 100	₹ 75 (cost less 25%)	₹ 150 (cost plus 50%)

(1) Valuation price of packages in the hands of customers on 1.1.2014 = ₹ 1,200 x $\frac{75}{150}$ = **₹ 600**.

(2) Valuation price of packages in hand on 31.12.2014 = ₹ 6,666.67 x $\frac{75}{100}$ = ₹ 5,000

(3) Valuation price of packages with customers on 31.12.2014 = ₹ 6,900 x $\frac{75}{150}$ = ₹ 3,450

(4) Calculation of Purchases

Illustration 14

Bombay Chemicals Limited supplies its products in returnable containers. A container is invoiced to the customer at ₹ 50, but if it is returned within two months, a credit of ₹ 45 is given to the customer. A container costs ₹ 40 to the company and its life is estimated at 5 years at the end of which the scrap value is likely to be ₹ 5.

The following particulars are supplied to you:

	Nos.		Nos.
Containers with customers (1.1.2014)	20,000	Containers returnable	12,000
Containers in stock (1.1.2014)	4,000	Containers purchased during the year	5,000
Containers sent to customers during the year 2014	80,000	Containers condemned during the year, useful life being over	1,000
Containers returned by customers	85,000	Amount realised by sale of condemned containers	6,000

Depreciation is to be provided on straight line method. Prepare Containers Stock Account and Containers Suspense Account for the year and ascertain the profits or losses earned or incurred in the year assuming a separate account for provision of depreciation is maintained.

Solution

Working Notes:

(1) Charge out price (₹)	50	**(2) Total Hire Charges**	₹
Less: Returnable price (₹)	45	Number of containers sent out x Hire charges per unit	
Hire charges per unit (₹)	5	(80,000 x ₹ 5)	4,00,000

(3) Containers in hand				**(4) Containers with customers**			
Particulars	Nos.	Particulars	Nos.	Particulars	Nos.	Particulars	Nos.
Opening balance	4,000	Sent out	80,000	Opening balance	20,000	Returned	85,000
Purchased	5,000	Scrapped	1,000	Sent out	80,000	Retained (Bal. figure)	3,000
Returned	85,000	Closing balance	13,000			Closing balance	12,000
	94,000		94,000		1,00,000		1,00,000

(5) Cost of container is ₹ 40. Scrap value is ₹ 5. Therefore, depreciable value = ₹ 40 – ₹ 5 = ₹ 35. The life of containers is 5 years. Provision for depreciation is to be created per container = 35/5 = ₹ 7. Total provision for depreciation = ₹ 7 (13,000 + 12,000) = ₹ 1,75,000.

In the books of Bombay Chemicals Ltd.

Dr. Containers Stock Account Cr.

Date	Particulars	Nos.	Rate	₹	Date	Particulars	Nos.	Rate	₹
2014	To Balance b/d:				2014	By Containers Suspense A/c			
Jan. 1	In hand	4,000	40	1,60,000	Dec. 31	(Dep. on contnr. retained)	3,000	45	1,35,000
	With customers	20,000	40	8,00,000		By Hire Charges A/c (Note 2)			4,00,000
Dec. 31	To Bank A/c (Purchases)	5,000	40	2,00,000		By Bank A/c (Sale of scrap)			6,000
	To Prov. for Dep. A/c (Note 5)			1,75,000		By Prov. for Dep. A/c (Note)			35,000
	To Profit & Loss A/c — Profit			2,41,000		By Balance c/d:			
						In hand	13,000	40	5,20,000
						With customers	12,000	40	4,80,000
		29,000		15,76,000			29,000		15,76,000

Note : The useful life of 1,000 containers is over. The accumulated depreciation (₹ 7 x 5 = ₹ 35 each) should be credited to Containers Stock Account. The total amount involved = ₹ 35 x 1,000 = ₹ 35,000.

Tutorial Note : When containers are valued at cost (both opening stock and closing stock) and a depreciation is also to be charged then the following entries are made in the books:

(i) For depreciation

Containers Stock Account Dr. [Yearly depreciation]
To Provision for Depreciation Account

(ii) For containers condemned (useful life being over)

Provision for Depreciation Account Dr. [Accumulated depreciation]
To Containers Stock Account

Dr. Containers Suspense Account Cr.

THEORETICAL QUESTIONS

1. What are the objectives of keeping separate accounts for returnable containers?
2. Discuss the nature of the following accounts:
   (i) Containers Stock Account;
   (ii) Containers Debtors Account; and
   (iii) Containers Suspense Account.

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each statement or answer each question below :

1. The income from retained containers is over and above the
   A cost price
   B hire charges
   C none of these.
2. The refundable price is generally set higher than the cost price of the container to encourage the customers to
   A return it
   B retain it
   C none of these.
3. The difference between the charge out price and the refund is treated as
   A loss
   B hire charges
   C none of these.

4. Income from hire charges arises in the accounting year when they are
   A sent out
   B returned
   C none of these.
5. Hire charges is the difference between charge out price and
   A cost price
   B returnable price
   C none of these.

PRACTICAL QUESTIONS

1. X sells his goods in special containers costing ₹ 20 each. Containers are charged out at ₹ 30 each to customers and credited at ₹ 25 each if returned in good condition within 2 months.
   On 1.1.2014, there were 5,000 containers in the factory godown and 3,000 in the hands of the customers (all returnable). During the year ended 31.12.2014, 20,000 containers were purchased by X : 16,000 containers were sent out to customers and 12,000 was received back from the customers within 2 months.
   On 31.12.2014, there were 5,000 containers in the hands of the customers (all returnable). You are required to show Containers Stock Account and Containers Trading Account.
2. A manufacturer sends his goods in drums which are valued in books at ₹ 40 each, but charged out to customers at ₹ 80 each. Customers are credited with ₹ 60 for each drum if returned in time and in good condition.
   From the following particulars, draw the Drums Stock Account and Drums Suspense Account for the year ended 31.12.2014.

Particulars	Nos.	Particulars	Nos.
Stock in hand on 1.1.2014	5,000	Returned by customers	12,630
Stock with customers on 1.1.2014	10,500	Destroyed in an accident	80
Purchases during 2014 at ₹ 50 each	8,200	Sold as scrap for ₹ 3,000	250
Sent out to customers	16,500		

3. A manufacturer sells his goods in containers bought at ₹ 30 each. Customers are charged at ₹ 40 per container and are allowed ₹ 35 each for containers returned within one month. For stock taking purposes, containers are valued at ₹ 18 each.
   From the following information, prepare Containers Stock Account and Containers Reserve Account.

Number of containers in hand on 1.1.2014	9,000	Sent out to customers during the year	20,000
Number of containers with customers on 1.1.2014	7,000	Returned by the customers during the year	18,000
Purchased during the year	10,000	Containers with customers on 31.12.2014	7,000

4. Calcutta Chemicals sells its goods in special containers costing ₹ 15 each. Containers are charged out at ₹ 20 each and credited at ₹ 18 each, if returned in good condition within 3 months. For stock taking purposes, all containers are valued at ₹ 12 each.
   On 1.1.2014, there were 5,000 containers in the factory godown and 3,000 were in the hands of the customers (all returnable).
   During the year ended 31.12.2014, 7,000 containers were purchased, 10,000 were sent out to customers and 6,000 were received back from them.
   On 31.12.2014, there were 4,000 containers in the hands of customers within the required period.
   Draw-up Containers Stock Account and Containers Suspense Account bearing in mind that 100 containers were destroyed (scrap value realised ₹ 100) and 200 containers were sold for ₹ 5 each.
5. X sells his goods in special packages costing ₹ 25 each. Packages are charged out at ₹ 45 each. The customers are credited with ₹ 35 each, if returned in good condition within 30 days. For stock taking purposes, all packages in the factory and with the customers are valued at ₹ 20 each.
   On 1.1.2014, there were 10,000 packages in the factory and 7,500 in the hands of customers (all returnable). During the year ended 31.12.2014, 15,000 packages were purchased by Mr. X, 20,000 packages were sent to customers (of which 7,000 were new) and 15,000 were received back from customers.
   On 31.12.2014, there were 12,000 packages in the hands of the customers capable of being returned within the required period.
   200 packages were destroyed, 100 packages were sold as scrap and ₹ 200 were realised. Some others were repaired at a cost of ₹ 300.
   You are required to prepare Package Stock Account, Package Trading Account and Package Reserve Account.

6. A firm sends its products in cases which it purchases at ₹ 18 each and which are charged to customers at ₹ 21 each, if there are returned within two months, credit is given at ₹ 19 each. The following are the particulars for the year ended 31.12.2014.

Particulars	Nos.	Particulars	Nos.
Cases with customers on 1.1.2014 (returnable)	5,000	Cases returned by customers	7,000
Cases with the firm on 1.1.2014	2,000	Cases sold as scrap for ₹ 600	150
Cases purchased during the year	3,000	Cases with customers on 31.12.2014 (returnable)	4,500
Cases sent out to customers during the year	8,000		

Write-up Cases Stock Account and Cases Trading Account.

Introduction to Accounting Standard

Introduction

Accounting standards are accounting rules and procedures relating to measurement, valuation and disclosure issued by the Council of The Institute of Chartered Accountants of India. Accounting standards are stated to be the norms of accounting policies and practices by way of guidelines that should be followed while preparing accounts and disclosed in the annual financial statements. The accounting standards are intended to apply only to items which are material.

Since accounting standards are the rules to be followed in the preparation of financial statements, these are regarded as a *mechanism* for resolving the conflicts of interest among various preparers and users of accounting information. Accounting standards are generally appropriate to the normal conduct of business and are in conformity with local conditions. Accounting standards serve public interest and are based on a conceptual framework of accounting. Necessarily, the utility of accounting standards results in a consequential improvement in the quality of preparation of financial statements.

Nature

Accounting standards are *mandatory* in nature. They are mainly applicable to the published accounts of limited companies. However, in case of sole proprietorships or partnerships, accounting standards mandatorily apply when the financial statements are statutorily required to be audited.

The accounting standards apply to the preparation of general purpose financial statements, i.e., Balance Sheet, Profit and Loss Account, and other statements and statutory notes which form part of the financial statements. It is necessary to examine whether the mandatory accounting standards are complied with in the preparation of financial statements. If there is any deviation, adequate disclosure should be made so that the users of financial statements become aware of such deviations.

Accounting policies have a *direct effect* on the working results and the financial position of a business concern. Accounting policies are the specific accounting bases adopted and constantly followed by a business unit in the preparation of its financial statements. Owing to varying circumstances, different accounting policies are adopted by different business enterprises. Accounting standards, therefore, require that all significant policies adopted in the preparation and presentation of financial statements should be disclosed and should form part of the financial statements. Any change in the accounting policies which has a material effect, and the amount by which any item in the financial statement is affected by such a change should be disclosed. Lastly, if a fundamental *accounting assumption* is not followed, the fact should be disclosed.

Accounting standards could be national, international or both. Every national institute frames its own accounting standards, which generally are in keeping with the international norms. In effect, the development of accounting standards in India has been contemporaneous with that of the International Accounting Standards, which are formulated by global organisations of accounting bodies. As such, there is not much difference among the parameters of these standards.

Scope

1. Accounting Standards are to be issued in conformity with the provisions of the applicable laws, customs, usages and business environment of our country. If there is any conflict between the accounting standards and laws (because of subsequent amendments in the law), the provisions of the said law will prevail and financial statements should be prepared in conformity with such law.
2. Accounting Standards can not override the local regulations.
3. Accounting Standards are intended to apply only to items which are material.
4. The Institute will use its best endeavours to persuade the government, appropriate authorities, industrial and business community to adopt these standards in order to achieve uniformity in the preparation of financial statements.
5. In carrying out the task of formulation of Accounting Standards, the intention would be to concentrate on basic matters.

Purposes

The concepts of accounting have permitted a variety of practices to follow and, in effect, different results can be drawn from the same set of data. Consequently, the lack of uniformity of such practices has made it difficult for users of accounting information to compare the results of different firms. The overall direction of the accountant should be towards *uniformity*, so that accounting information may become comparable, leading to better analysis and comparison of performances.

The need for accounting standards is based on the necessity of harmonising the diverse policies and practices adopted by different business firms. When accounting standards are followed, accounting information become transparent and, in effect, it helps towards meaningful comparison and study. It also ensures consistency in the accounting statements of a business enterprise from year to year. In effect, it facilitates a more meaningful comparison among accounting statements of different enterprises. As a result, the users of accounting information can understand and make proper use of accounting statements for decision-making.

The need for the *uses* of accounting standards are as follows :

(1) Accounting standards promote better understanding of accounting statements, the disclosure of significant accounting policies and the manner in which accounting policies are disclosed in the statements.
(2) Accounting information is more useful if it is published on a comparable basis, and *comparability* is not possible without accounting standards.
(3) Accounting standards provide a generally accepted language for financial statements that renders them more comprehensible to the users of accounting information.
(4) Accounting standards may be regarded as a means to establish that the collective wisdom and experience rather than the viewpoint of individual accountant may prevail in the matter.

Accounting Standard Board (ASB)

On April 21, 1977, The Institute for Chartered Accountants of India constituted the Accounting Standard Board (ASB) for formulation of Accounting Standards in India. The main functions of ASB is to formulate different accounting standards after taking into consideration the applicable laws, customs, usages and business environment. ASB will issue guidance notes on the Accounting Standards and give clarifications on issues arising therefrom.

ASB will also review the Accounting Standards at periodical intervals. However, the Accounting Standards will be issued under the authority of the Council of the Institute of Chartered Accountants of India.

Procedure for Issuing Accounting Standards

Broadly, the following procedures are adopted by ASB for formulating Accounting Standards :

1. Determination of the broad areas in which Accounting Standards need to be formulated.
2. Formulation of Study Groups. At the time of formation of study groups, provisions will be made for wide participation by the members of the Institute and others. The study groups will help ASB in the preparation of the Accounting Standards.
3. Holding of dialogue by ASB with the representatives of the Government, Public Sector Undertakings, Industry and other organisations for ascertaining their views.
4. Preparation and publication of an exposure draft of the proposed standard for comments by members of the Institute and the public at large. An exposure draft is prepared on the basis of the work of the study groups and the dialogue with the different parties as mentioned above.

The draft of the proposed standard will include the following basic points :
(a) A statement of concepts and fundamental accounting principles relating to the Standard.
(b) Definitions of the terms used in the Standard.
(c) The manner in which the accounting principles have been applied for formulating the Standard.
(d) The presentation and disclosure requirements in complying with the Standard.
(e) Class of enterprises to which the Standard will apply.
(f) Date from which the Standard will be effective.

5. Finalisation of the draft by ASB after considering the comments received from different corners.
6. Submission of the final draft to the Council of the Institute of Chartered Accountants of India.
7. The Council will consider the final draft of the proposed standard and if found necessary modify the same in consultation with ASB.
8. Publication of the Standard on the relevant subject under the authority of the Council.

National and International Accounting Authorities

In response to the long felt need for standardisation of accounting on a global scale, the International Accounting Standards Committee (IASC) was formed in 1973. This leading professional accounting institute of nine developed countries was set up for securing more sophistication and precision in accounting procedure worldwide. In 2001, the IASC was dissolved and the IASB (International Accounting Standard Board) was established.

The sixteen accounting bodies from these nine nations are as follows :

Sl. No.	Nations	Sl. No.	Bodies
1.	Australia	1.	The Institute of Chartered Accountants in Australia.
		2.	Australian Society of Accountants.
2.	Canada	3.	The Canadian Institute of Chartered Accountants.

		14.	The Institute of Cost and Management Accountants.
		15.	The Chartered Institute of Public Finance and Accountancy.
9.	United States of America	16.	The American Institute of Certified Public Accountants.

The revised agreement and constitution were signed in November 1982. Both the Institute of Chartered Accountants of India and the Institute of Cost and Works Accountants of India are the members of the IASC.

Adoption of International Financial Reporting Standard (IFRS)

Introduction

In the last decade of the past century phenomenal growth in the fields of communication and transportation has created the concept of an economic global village and this has given tremendous thrust in trade and commerce worldwide.

In the present scenario, the corporate entities are going for cross border businesses. More and more countries are opening their doors to foreign investments. Many foreign companies, e.g., Nokia, Toyota, Honda, HP and Dell computers are investing huge amount of capital in India and China. Similarly, many Indian companies are also investing in foreign countries, for example, Tata Motors Ltd., has invested in UK, Korea and Thailand, etc. In the same way, Reliance Industries Ltd. has invested in Brazil, Iraq, etc.

In addition, more and more Indian companies are increasingly accessing the global capital market to fulfill their capital needs.

For example:

During 2014-15, more than ₹ 1,20,000 crores of capital were arranged from global market by the Indian Companies [Source: Hindu Business Line]

There has been a paradigm shift in the economic environment of our country too, so the need for a country-specific accounting standard has given way to a need for global or international accounting standards. In present scenario, the corporate entities are going for cross border businesses. You must be hearing about the multinational companies everyday in newspapers and other media. So, do you understand what huge amount of capitals will be required and raised by these companies and how these can change the economic prospects of all of us, you and me and all learned persons who are actually investing in these companies? Yes, it involves humongous amount of money and so we the users and our investors need to understand their working to put so much money in them. Well, we can just study the reports they present us and these reports better be based on an uniform standard which is followed by every country taking part in the world-wide trade and commerce.

The International Accounting Standards Board (IASB), has developed and issued the International Financial Reporting Standards (IFRS) which has been recognized as Global Reporting Standards. More than 120 countries like the European Union, Australia, New Zealand and Russia has either already adopted or permitted the IFRSs as a tool for financial reporting.

The Ministry of Corporate Affairs (MCA) has issued 39 converged Accounting Standards on 16th February, 2015. The list of Accounting Standards are given in the next page.

The list of these new standards are given below. It is called 'Ind-AS". However, the MCA has not notified the date from when these Ind-AS will be effective.

1. **Ind-AS : 1 Presentation of Financial Statements**
2. **Ind AS : 2 Inventories**
3. **Ind AS : 7 Statement of Cash Flows**
4. **Ind AS : 8 Accounting Policies, Changes in Accounting Estimates and Errors**
5. **Ind AS : 10 Events after the Reporting Period**
6. **Ind AS : 12 Income Taxes**
7. **Ind AS : 16 Property, Plant and Equipment**
8. **Ind AS : 17 Leases**
9. **Ind AS : 19 Employee Benefits**
10. **Ind AS : 20 Accounting for Government Grants and Disclosure of Government Assistance**
11. **Ind AS : 21 The Effects of Changes in Foreign Exchange Rates**
12. **Ind AS : 23 Borrowing Costs**
13. **Ind AS : 24 Related Party Disclosures**
14. **Ind AS : 27 Separate Financial Statements**
15. **Ind AS : 28 Investments in Associates and Joint Ventures**
16. **Ind AS : 29 Financial Reporting in Hyperinflationary Economies**
17. **Ind AS : 32 Financial Instruments: Presentation**
18. **Ind AS : 33 Earnings per Share**
19. **Ind AS : 34 Interim Financial Reporting**
20. **Ind AS : 36 Impairment of Assets**
21. **Ind AS : 37 Provisions, Contingent Liabilities and Contingent Assets**
22. **Ind AS : 38 Intangible Assets**
23. **Ind AS : 40 Investment Property**
24. **Ind AS : 41 Agriculture**
25. **Ind-AS : 101 First-time Adoption of Indian Accounting Standards**
26. **Ind AS : 102 Share-based Payment**
27. **Ind AS : 103 Business Combinations**
28. **Ind AS : 104 Insurance Contracts**
29. **Ind AS : 105 Non-current Assets Held for Sale and Discontinued Operations**
30. **Ind AS : 106 Exploration for and Evaluation of Mineral Resources**
31. **Ind AS : 107 Financial Instruments: Disclosures**
32. **Ind AS : 108 Operating Segments**
33. **Ind AS : 109 Financial Instruments**
34. **Ind AS : 110 Consolidated Financial Statements**
35. **Ind AS : 111 Joint Arrangements**
36. **Ind AS : 112 Disclosure of Interests in Other Entities**
37. **Ind AS : 113 Fair Value Measurement**
38. **Ind AS : 114 Regulatory Deferral Accounts**
39. **Ind AS : 115 Revenue from Contracts with Customers**

Obligation to comply with Indian Accounting Standards (Ind AS)

The Companies and their auditors shall comply with the Indian Accounting Standards (Ind AS) specified in Annexure to these rules in preparation of their financial statements and audit respectively, in the following manner, namely :

(i) any company may comply with the Indian Accounting Standards (Ind AS) for financial statements for accounting periods beginning on or after **1stApril, 2015**, with the comparatives for the periods ending on 31st March, 2015, or thereafter;

(ii) the following companies shall comply with the Indian Accounting Standards (Ind AS) for the accounting periods beginning on or after **1st April, 2016**, with the comparatives for the periods ending on 31st March, 2016, or thereafter, namely :

(a) companies whose equity or debt securities are listed or are in the process of being listed on any stock exchange in India or outside India and having net worth of rupees five hundred crore or more;

(b) companies other than those covered by sub-clause (a) of clause (ii) of subrule (1) and having net worth of rupees five hundred crore or more;

(c) holding, subsidiary, joint venture or associate companies of companies covered by sub-clause (a) of clause (ii) of sub- rule (1) and sub-clause (b) of clause (ii) of sub- rule (1) as the case may be; and

(iii) the following companies shall comply with the Indian Accounting Standards (Ind AS) for the accounting periods beginning on or after **1st April, 2017**, with the comparatives for the periods ending on 31st March, 2017, or thereafter, namely :

(a) companies whose equity or debt securities are listed or are in the process of being listed on any stock exchange in India or outside India and having net worth of less than rupees five hundred crore;

(b) companies other than those covered in clause (ii) of sub- rule (1) and sub-clause (a) of clause (iii) of sub-rule (1), that is, unlisted companies having net worth of rupees two hundred and fifty crore or more but less than rupees five hundred crore.

(c) holding, subsidiary, joint venture or associate companies of companies covered under sub-clause (a) of clause (iii) of sub- rule (1) and sub-clause (b) of clause (iii) of sub- rule (1), as the case may be.

Provided that nothing in this sub-rule, except clause (i), shall apply to companies whose securities are listed or are in the process of being listed on SME exchange as referred to in Chapter XB or on the Institutional Trading Platform without initial public offering in accordance with the provisions of Chapter XC of the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2009.

Explanation 1. – SME Exchange shall have the same meaning as assigned to it in Chapter XB of the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations, 2009.

Explanation 2. – 'Comparatives' shall mean comparative figures for the preceding accounting period.

Benefits of Achieving the Convergence with IFRSs

To understand the benefits of achieving the convergence with the IFRSs, you need to understand who or what are exactly the prime beneficiaries. The beneficiaries are:

1. The economy of our country
2. The investors
3. The industry
4. The accounting professionals

Let us now consider the advantages of having a uniform global accounting standard and regulatory framework from the viewpoint of all the above-mentioned aspects.

1. The Economy of Our Country

Globalization has given birth to lots of hope and scopes for the economic benefit of our country. With globalization and liberalization of policies, the entire world has taken the form of an economic village. Advent of Internet and the revolution in telecommunication has made it possible for businesses to reach out to foreign shores crossing borders. More and more countries are opening their doors to foreign investments and more and more markets are emerging to fulfill the capital needs as well as the end users or customers for the businesses. In such a situation, convergence of our accounting principles with an international standard is of vital importance. It helps the economy to:

- Expand.
- Be more dynamic.
- Be more strategic.
- Be more competitive
- Maintain the capital markets more efficiently.
- Encourage investment from foreign investors.
- Bring more foreign capital.

2. The Investors

Investors could be stated as the party most benefited by the convergence. They are the people to invest money into different companies and markets. So they are in need of relevant, reliable and comparable financial reports available at right time. They are taking the risks of investing money crossing not only geographic borders but also crossing different jurisdiction. Convergence with IFRSs will help them in:

- Acquiring relevant, reliable, comparable and timely information regarding businesses across the globe.
- Understanding the business opportunities better.
- Reducing cost of interpretation of different accounting standards for different countries.
- Gaining confidence.

3. The Industry

A global market with a global and standard regulatory framework gives tremendous thrust to the industry. A global market will bring more foreign capital and give boost to the country's economy. A globally accepted accounting standard will simplify the process of financial reporting which in turn will reduce cost. So if we list out the benefits, these are:

- More foreign investors.
- More foreign capital.
- Simplicity in financial reporting.
- Reduced cost of reporting.

4. The Accounting Professionals

Accounting professionals provide their services and expert knowledge to different business entities and enterprises. Presence of a global accounting standard will help in opening doors for our professionals to different parts of the world. You must have observed our engineers, doctors and technicians have gone to foreign countries and have done extremely well in all aspects of life. But it was not the case for our accounting professionals. India traditionally had followed her own 'Generally Accepted Accounting Principles' which was substantially different from other developed countries. It hindered the scope for our accounting professionals to sell their expertise and knowledge in these countries. With convergence to IFRSs they can:

- Provide their skills and knowledge in different parts of the world.
- Can provide recommendation in financial reporting to different MNCs and foreign companies both as professionals in industry or private practice.

List of Current Accounting Standards

AS– 1 : Disclosure of Accounting Policies
AS– 2 : Valuation of Inventories
AS– 3 : Cash Flow Statement
AS– 4 : Contingencies and Events Occurring After the Balance Sheet Date

AS–31 : Financial Instruments : Presentation
AS–32 : Financial Instruments : Disclosure

AS — 1 : Disclosure of Accounting Policies [Effective Date : 1st April, 1991]

Introduction

Accounting policies are the specific accounting principles and the methods of applying these principles adapted by an enterprise in preparing and presenting financial statements. For some type of transactions and events, an Accounting Standard provides alternative accounting principles and methods of accounting.

For example, a business enterprise is required to provide for depreciation on its fixed assets and also to value the stock at the end of each accounting period. There are, however, a number of alternative methods of providing for depreciation (e.g., Straight Line Method, Reducing Balance Method, etc.) or of valuing stock (e.g., FIFO, Weighted Average, etc.).

The other examples are:

» Treatment of expenditure during construction
» Conversion or translation of foreign currency items
» Treatment of goodwill
» Valuation of investments
» Treatment of retirement benefits
» Recognition of profit on long-term contracts
» Valuation of fixed assets
» Treatment of contingent liabilities.

Since there is no list of accounting policies which are applicable to all circumstances, the accountant should evaluate the appropriateness of accounting policies employed by management. An entity shall select and apply its accounting policies consistently for similar transactions, other events and conditions. In the absence of a standard of an interpretation that specifically applies to a situation of diverse and complex economic activity, management shall use its judgment in developing and applying an accounting policy that results in information that is relevant and reliable.

Fundamental Accounting Assumptions

Certain fundamental accounting assumptions underlie the preparation and presentation of financial statements. They are usually not specifically stated because their acceptance and use are assumed. Disclosure is necessary if they are not followed.

The following have been generally accepted as fundamental accounting assumptions:

(a) Going Concern
(b) Consistency
(c) Accrual

Going Concern

Unless otherwise stated, the users of financial statements assume that the enterprise is a going concern, and it will continue operation for the foreseeable future. It is assumed that the enterprise has neither the intention nor the necessity of liquidation or of curtailing materially the scale of the operations.

Consistency

Unless otherwise stated, the users of financial statements assume that there is no change in the accounting policies from one period to another.

If it is necessary to change the method being employed, then an explanation of the change and the effects it is having on the results must be disclosed for the benefit of the users of financial statements.

For example, X Ltd. charging depreciation following straight line method for last 5 years (2009-10 to 2013-14). The users of financial statements will assume that the straight line method of depreciation has been adapted at the time of preparation of financial statements for the year 2014-15 also.

Accrual

Unless otherwise stated, the users of financial statements assume that the financial statements have been prepared on accrual basis. Under accrual basis of accounting revenues and costs are recognised as they are earned or incurred, not as money is received or paid.

Example 1 : X Ltd. sold goods of ₹ 10,00,000 on 20th March, 2014. Credit term — one month. At the time of preparing financial statements for the period 2013-14, this revenue from sale of ₹ 10,00,000 will be recognised in the accounts of 2013-14, though cash will be received in the next financial year.

Example 2 : X Ltd has received electricity bill for the month of March 2014. The due date for payment is 10th April, 2014. As the electricity bill is related to accounting year 2013-14, it should be recognised as expenses for the year 2013-14, though the payment to be made in the next financial year.

Considerations in the Selection of Accounting Policies

The primary consideration in the selection of Accounting Policies by an enterprise is that the financial statements prepared and presented on the basis of such accounting policies should represent a true and fair view of the state of affairs of the enterprise as at the Balance Sheet date and of the profit or loss for the period ended on that date. For this purpose, the major considerations governing the selection and application of accounting policies are:

Prudence

Future is always uncertain. Many times, accountants are faced with uncertainties in estimating and judging some items at the time of preparation of financial statements. In these situations the accountants look to the concept of prudence / conservatism.

This concept requires that assets and profits should not be overstated and revenue should never be anticipated at the time when the financial statements are prepared. Revenue can only be recorded in the books of account when there is a reasonable certainty about its realisation. At the same time, provision must be made for all possible liabilities. It is not important whether the amount of liability is known with certainty or is based on estimation. To illustrate, inventories are recorded at their cost or Net Realisable Value (NRV), whichever is lower. Likewise, if there is an anticipation that a debt may not be realised, a specific amount is set aside from profit as a provision for doubtful debts. This concept is expressed as : "Recognise all losses and anticipate no gains". This concept attempts to state the *lowest likely value* of assets and profits, and the *highest likely amount* of any losses or liabilities incurred.

Substance over Form

The accounting treatment and presentation in financial statements of transactions and events should be governed by their substance and not merely by the legal form. In accounting, substance should normally take *precedence* over form in deciding how a particular transaction should be recorded. The legal form of a transaction is frequently descriptive of its economic substance. However, the form occassionally misrepresents the characteristics that are relevant to users. If the substance can be reliably determined, the accountant should describe the transaction in terms of the substance rather than the form. Accounting for hire-purchase transactions, for example, is based on the above concept, i.e., it looks at the substance of the transaction rather than its legal form. The hire-purchaser can record the asset at its cash down price, while paying for it by installments over an agreed period of time.

Materiality

Financial statements should disclose all material items. An item is material if the user would have done something differently if he or she had not known about the item. The accountants are often faced with decisions about small items or events that make little difference to users of financial statements no matter how they are handled. For example, Reliance Industries Ltd. may decide that expenditure for utensils in Workers' Canteen should be charged as expenses rather than recorded as long-term assets and depreciated.

Disclosure of Accounting Policies

To ensure proper understanding of financial statements, it is necessary that all significant accounting policies adopted in the preparation and presentation of financial statements should be disclosed.

Such disclosure should form part of the financial statements. It would be helpful to the reader of financial statements if they are all disclosed as such in one place instead of being scattered over several statements, schedules and notes.

Any change in the accounting policy which may have a material effect should be disclosed. The amount by which any item in the financial statements is affected by such change should also be disclosed to the extent ascertainable. Where such amount is not ascertainable, wholly or in part, the fact should be indicated. If a change is made in the accounting policies which has no material effect on the financial statements for the current period but which is reasonably expected to have a material effect in later periods, the fact of such change should be appropriately disclosed in the period in which the change is adopted.

OBJECTIVE TYPE QUESTIONS

Multiple Choice

Select the best choice to complete each sentence or answer each question below :

1. Disclosure of fundamental accounting assumptions are :
   A necessary if they are followed at the time of preparation of financial statements
   B necessary if they are not followed at the time of preparation of financial statements
   C none of the above

2. What does the going concern mean ?
   A a business is profitable
   B a business will continue to operate for the foreseeable future
   C the assets of a business exceed its liabilities
3. A very large company has prepared financial statements without including very small items of furniture in its fixed assets. What accounting concept has the company applied ?
   A prudence
   B consistency
   C materiality
4. Two companies buy identical computer equipment. The large company writes it off immediately, but the smaller company treats it as a fixed asset. Which accounting concept are the companies applying ?
   A going concern
   B materiality
   C consistency
5. Which is an example of the prudence concept ?
   A only items with a monetary value are included in accounting
   B accrued expenses are charged to profit and loss account
   C profit is not over-stated
6. Which of the following statements explain prudence concept most closely ?
   A All legislation and accounting standards have been complied with
   B Understatement of assets or gains and overstatements of liabilities or losses
   C The application of a degree of caution in exercising judgment under conditions of uncertainty
7. Which of the following statements is / are correct ?
   (1) In order to achieve comparability it may sometimes be necessary to override the prudence concept.
   (2) Substance over form is an accounting concept whereby transactions and other events are accounted for and presented in accordance with their economic reality rather than legal form.
   A both (1) and (2)
   B (1) only
   C (2) only
8. A company purchases a machinery on hire purchase over four years but does not own the machinery until the final payment has been made. At the end of year 1, the company shows the machinery in its Balance Sheet as a fixed asset and also records the liability for the amount still owed. Which accounting concept is being applied ?
   A going concern
   B substance over form
   C prudence

Guide to Answers

1. B; 2. B; 3. C; 4. B; 5. C; 6. C; 7. C; 8. B.

AS–2 "Valuation of Inventories" — See Chapter 9 — Page 9.1 to 9.13

AS — 3 : Cash Flow Statement (Revised)
[Effective Date : 1st April, 2001]

Introduction

Balance Sheet and Profit and Loss Account prepared by an enterprise (on accrual basis) can not provide the information in respect of its cash flow. An enterprise can earn good profits by selling goods on credit but it may not generate sufficient cash to carry on its operating activities or investing activities. A cash flow statement shows an enterprise's inflows and outflows of cash during a particular accounting period. The statement shows the impact of operating, financing and investing activities on cash.

The ability to make profits may not be enough for the survival of an enterprise. It is also important for the enterprise to generate sufficient cash for its survival. The enterprise must pay great attention to liquidity as well as profitability if they are to succeed.

Negative cash flows for more than one accounting period is a strong sign of potential problem that can affect enterprise's operations as well as financing and investing activities. Therefore, cash flow statement is extremely useful for proper financial planning and control.

Objective

Information about the cash flows of an enterprise is useful in providing users of financial statements with a basis to assess the ability of the enterprise to generate cash and cash equivalents and the needs of the enterprise to utilise those cash flows. The economic decisions that are taken by users require an evaluation of the ability of an enterprise to generate cash and cash equivalents and the timing and certainty of their generation.

Scope

1. An enterprise should prepare a cash flow statement and should present it for each period for which financial statements are presented.
2. Users of an enterprise's financial statements are interested in how the enterprise generates and uses cash and cash equivalents. This is the case regardless of the nature of the enterprise's activities and irrespective of whether cash can be viewed as the product of the enterprise, as may be the case with a financial enterprise.

Enterprises need cash for essentially the same reasons, however different their principal revenue-producing activities might be. They need cash to conduct their operations, to pay their obligations, and to provide returns to their investors.

Benefits of Cash Flow Information

1. It provides information about an enterprise's liquidity, flexibility and ability to generate future cash flows, which is critically important to survival and to successful growth.
2. It can provide information about an entity's ability to meet its obligations as they become due.
3. It enhances the comparability of the reporting of operating performance by different enterprises because it eliminates the effects of using different accounting treatments of the same transactions and events.
4. It helps to assess the reliability of the amount of net profit.
5. It can account for the difference between net profit and net cash flow from operating activities.
6. The statement enables users to assess why assets and liabilities are increased or decreased during an accounting period.
7. It can provide information concerning cash and non-cash, financing and investing transactions during an accounting period.
8. It will help in assessing likely future financing needs.
9. It will help in assessing the effect of major events such as issue of shares or acquiring another business on the liquidity of the business.

Definitions

Cash: Cash comprises cash in hand and demand deposits with bank.

Cash Equivalents: Cash equivalents are short term, highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value.

For example, your company at present holding cash of ₹ 200 crores received from recent IPO. All these cash will be required after two months from now. To earn interest on this cash balance, your company put it in 60 days short-term deposits. This short-term deposit will be treated as cash equivalent.

Cash Flows: Cash flows are inflows and outflows of cash and cash equivalents.

Operating Activities : Operating activities are the principal revenue-producing activities of the enterprise and other activities that are not investing or financing activities.

Investing Activities : Investing activities are the acquisition and disposal of long-term assets not included in cash equivalents.

Financing Activities : Financing activities are activities that result in changes in the size and composition of the owners' capital (including preference share capital in the case of a company) and borrowings of the enterprise.

Cash and Cash Equivalents

Cash equivalents are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes. For an investment to qualify as a cash equivalent, it must be readily convertible to a known amount of cash and be subject to an insignificant risk of changes in value. Therefore, an investment normally qualifies as a cash equivalent only when it has a short maturity of, say, three months or less from the date of acquisition. Investments in shares are excluded from cash equivalents unless they are, in substance, cash equivalents; for example, preference shares of a company acquired shortly before their specified redemption date (provided there is only an insignificant risk of failure of the company to repay the amount at maturity).

For example, X Ltd. has purchased some preference shares of Reliance Industries Ltd. on 20th January, 2014. These preference shares are due for redemption on 4th April, 2014. These may be considered to be cash equivalents because there is no risk of failure of RIL to pay the amount at maturity.

Here, it should be noted that bank overdraft will be treated as cash and cash equivalents. Bank overdraft is an integral part of an enterprise's cash management.

For example, your company is manufacturing woollen garments only. From September to February, your company is having positive cash balance because of seasonal sale. Your company is putting it in short-term deposit. From March to August the company is having negative cash balance because of purchase of raw materials and other expenses and these are financed by bank overdraft. The overdraft is treated as a cash equivalent.

Cash flows excluded movements between items that constitute cash or cash equivalents because these components are part of the cash management of an enterprise rather than part of its operating, investing and financing activities. Cash management includes the investment of excess cash in cash equivalents.

Presentation of a Cash Flow Statement

The standard requires that three separate categories of cash flow should be shown in the Cash Flow Statement. These are :

1. Operating Activities;
2. Investing Activities; and
3. Financing Activities.

An enterprise presents its cash flows from operating, investing and financing activities in a manner which is most appropriate to its business. Classification by activity provides information that allows users to assess the impact of those activities on the financial position of the enterprise and the amount of its cash and cash equivalents. This information may also be used to evaluate the relationships among those activities.

A single transaction may include cash flows that are ***classified differently***.

For example, when the installment paid in respect of a fixed asset acquired on deferred payment basis includes both interest and loan, the interest element is classified under financing activities and the loan element is classified under investing activities.

Operating Activities

The amount of cash flows arising from operating activities is a key indicator of the extent to which the operations of the enterprise have generated sufficient cash flows to maintain the operating capability of the enterprise, pay dividends, repay loans and make new investments without recourse to external sources of financing.

For example, H Ltd. manufactures motor cars. Because of poor response for the new model introduced recently, the operating activity is not generating cash. Inventories are increasing rapidly and dealers are asking excessive credit period. Unless corrective action is taken, H Ltd. will have to take loan from the bank or will have to sell its investments. Therefore, cash flow from operating activities are important.

Information about the specific components of historical operating cash flows is useful, in conjunction with other information, in forecasting future operating cash flows.

For example, RIL run chain of super markets — "Reliance Fresh". Every retail store that the company opens require ₹ 50,00,000 of additional inventory. Proper communication of this information will help users to predict the future operating cash flow.

Cash flows from operating activities are primarily derived from the principal revenue-producing activities of the enterprise. Therefore, they generally result from the transactions and other events that enter into the determination of net profit or loss.

Examples of cash flows from operating activities are:

(a) cash receipts from the sale of goods and the rendering of services;

(b) cash receipts from royalties, fees, commissions and other revenue;

For example, your company is the owner of few patented life savings drugs. Your company receive an annual licence fee from each manufacturer of the drug, and a royalty for every unit sold. This royalty and licence fee will be treated as cash flows from operating activities.

(c) cash payments to suppliers for goods and services;

(d) cash payments to and on behalf of employees;

(e) Cash receipts and cash payments of an insurance enterprise for premiums and claims, annuities and other policy benefits;

(f) Cash payments or refunds of income taxes unless they can be specifically identified with financing and investing activities; and

(g) Cash receipts and payments relating to future contracts, forward contracts, option contracts and swap contracts when the contracts are held for dealing or trading purposes.

Some transactions, such as the sale of an item of plant, may give rise to a gain or loss which is included in the determination of net profit or loss. However, the cash flows relating to such transactions are cash flows from investing activities.

For example, X Ltd. sold a plant for ₹ 5,00,000. The book value was ₹ 4,00,000. The company made a profit of ₹ 1,00,000. For cash flow purposes, this profit is deducted from net profit and shown in investing activities ₹ 5,00,000 (₹ 4,00,000 + ₹ 1,00,000).

An enterprise may hold securities and loans for dealing or trading purposes, in which case they are similar to inventory acquired specifically for resale. Therefore, cash flows arising from the purchase and sale of dealing or trading securities are classified as operating activities. Similarly, cash advances and loans made by financial enterprises are usually classified as operating activities since they relate to the main revenue-producing activity of that enterprise.

Example 1 : Reliance Securities Ltd. is buying and selling securities. Cash flows arising from such activity will be treated as cash flow from operating activities.

Example 2 : HDFC Ltd. is giving housing loans and receiving repayments. The cash flows from these loans are shown as operating activity.

Investing Activities

The separate disclosure of cash flows arising from investing activities is important because the cash flows represent the extent to which expenditures have been made for resources intended to generate future income and cash flows.

Examples of cash flows arising from investing activities are:

(a) cash payments to acquire fixed assets (including intangibles). These payments include those relating to capitalised research and development costs and self-constructed fixed assets;

For example, your company T.M. Ltd. has developed a new fuel efficient Bharat III diesel engine for its cars. Total cost for development of the engine is ₹ 150 crores. After successful trial it has been decided by the company to capitalise these expenses. For cash flow purposes, this will be treated as investing activity.

(b) cash receipts from disposal of fixed assets (including intangibles);

(c) cash payments to acquire shares, warrants or debt instruments of other enterprises and interests in joint ventures (other than payments for those instruments considered to be cash equivalents and those held for dealing or trading purposes);

For example, your Company Gujarat Chemicals Ltd. has purchased 15% equity shares of RPL which is supplying raw materials to your company. For cash flow purposes, this purchase of shares will be treated as investing activity.

(d) cash receipts from disposal of shares, warrants or debt instruments of other enterprises and interests in joint ventures (other than receipts from those instruments considered to be cash equivalents and those held for dealing or trading purposes);

(e) cash advances and loans made to third parties (other than advances and loans made by a financial enterprise);

(f) cash receipts from the repayment of advances and loans made to third parties (other than advances and loans of a financial enterprise);

(g) cash payments for futures contracts, forward contracts, option contracts and swap contracts except when the contracts are held for dealing or trading purposes, or the payments are classified as financing activities; and

(h) cash receipts from futures contracts, forward contracts, option contracts and swap contracts except when the contracts are held for dealing or trading purposes, or the receipts are classified as financing activities.

When a contract is accounted for as a hedge of an identifiable position, the cash flows of the contract are classified in the same manner as the cash flows of the position being hedged.

Example 1 : Your company, Kamal Printers Ltd. has purchased a printing machine from Germany on credit. This is an investing activity. Your company will have to pay the price in 3 months' time in Euro. Your company has a forward contract to fix the purchase price of the Euro. This will also be treated as investing activity.

Example 2 : Let us assume that Kamal Printers Ltd has purchased ink from Mitsubishi Company, Japan on credit. This is an operating activity. The payment is to be made in two months in Yen. The company has a forward contract to fix the purchase price of the Yen. This is also treated as operating activity.

Financing Activities

The separate disclosure of cash flows arising from financing activities is important because it is useful in predicting claims on future cash flows by providers of funds (both capital and borrowings) to the enterprise. Examples of cash flows arising from financing activities are:

(a) cash proceeds from issuing shares or other similar instruments;

(b) cash proceeds from issuing debentures, loans, notes, bonds, and other short or long-term borrowings; and

(c) cash repayments of amounts borrowed.

Reporting Cash Flows from Operating Activities

An enterprise should report cash flows from operating activities using either:

(a) the direct method, whereby major classes of gross cash receipts and gross cash payments are disclosed; or

(b) the indirect method, whereby net profit or loss is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments, and items of income or expense associated with investing or financing cash flows.

The ***direct method*** provides information which may be useful in estimating future cash flows and which is not available under the indirect method and is, therefore, considered more appropriate than the indirect method. Under the direct method, information about major classes of gross cash receipts and gross cash payments may be obtained either:

(a) from the accounting records of the enterprise; or

(b) by adjusting sales, cost of sales (interest and similar income and interest expense and similar charges for a financial enterprise) and other items in the statement of profit and loss for:

i. changes during the period in inventories and operating receivables and payables;
ii. other non-cash items; and
iii. other items for which the cash effects are investing or financing cash flows.

Illustration 1

From the following summarised Cash Book of Green View Ltd calculate Net Cash Flows from Operating Activities.

Dr. Summarised Cash Book Cr.

Date	Particulars	₹ '000	Date	Particulars	₹ '000
2014			2015		
April 1	To Balance b/d	50	?	By Payment to Suppliers	2,600
	To Receipts from Customers	3,000	?	By Purchase of Plant	400
	To Issue of Shares	1,000	?	By Wages and Salaries	200
	To Sale of Plant	450	?	By Rent, Rates and Taxes	100
			?	By Income Tax	50
			?	By Dividends	100
			2015	By Repayment of Bank Loan	150
			March 31	By Balance c/d	900
		4,500			4,500

Solution

Green View Ltd.
Calculation of Net Cash Flows from Operating Activities [Direct Method]

Particulars	₹ ('000)	₹ ('000)
Cash receipts from Customers	3,000	
Cash payments to Suppliers	(2,600)	
Cash paid to Employees (Wages and Salaries)	(200)	
Other Cash Payments (for rent, rates and taxes)	(100)	
Cash Generated from Operations	100	
Income taxes paid (Note 1)	(50)	
Net Cash from Operating Activities		50

Working Note : **(1)** Income tax paid to be shown separately.

Illustration 2

From the following information calculate net cash flows from operating activities :

Dr. Trading, Profit and Loss Account for the year ended 31st March, 2015 Cr.

Particulars	₹	Particulars	₹
To Purchases :		By Sales :	
Cash	6,00,000	Cash	9,00,000
Credit	2,00,000	Credit	1,00,000
To Wages	1,00,000		
To Gross Profit c/d	1,00,000		
	10,00,000		10,00,000
To Depreciation on Plant	20,000	By Gross Profit b/d	1,00,000
To Salaries	50,000	By Interest Received	20,000
To Loss on Sale of Plant	5,000	By Profit on Sale of Long-term Investments	30,000
To Net Profit	75,000		
	1,50,000		1,50,000

All credit sales and purchases were made during the last quarter of the financial year. Therefore, no cash was paid to creditors or collected from debtors during the year.

You are required to calculate Cash Flows from Operating Activities by adopting Direct Method.

Solution

Calculation of Net Cash Flows from Operating Activities [Direct Method]

Particulars	₹	₹
Cash Sales		9,00,000
Cash Received from Customers		—
		9,00,000
Less: Cash Purchases	6,00,000	
Cash paid to Suppliers	—	
Cash Expenses (Wages + Salaries)	1,50,000	7,50,000
Net Cash Flows from Operating Activities		1,50,000

Under the indirect method, the net cash flow from operating activities is determined by adjusting net profit or loss for the effects of:

(a) changes during the period in inventories and operating receivables and payables;

(b) non-cash items such as depreciation, provisions, deferred taxes, and unrealised foreign exchange gains and losses; and

(c) all other items for which the cash effects are investing or financing cash flows.

Alternatively, the net cash flow from operating activities may be presented under the indirect method by showing the operating revenues and expenses excluding non-cash items disclosed in the statement of profit and loss and the changes during the period in inventories and operating receivables and payables.

Illustration 3

Calculate net cash flows from operating activities from the following :

(i) Profits made during the year ₹ 2,50,000 after considering the following items : —

	₹
(a) Depreciation on fixed assets	10,000
(b) Amortisation of goodwill	5,000
(c) Transfer to General Reserve	7,000
(d) Profit on sale of land	3,000

(ii) The following is the position of current assets and current liabilities —

Particulars	2014 (₹)	2013 (₹)
Debtors	15,000	12,000
Creditors	10,000	15,000
Bills Receivable	8,000	10,000
Prepaid Expenses	4,000	6,000

Solution **Calculation of Net Cash Flows From Operating Activities**

Particulars	₹	₹
Profit for the year 2014 after transferring to General Reserve		2,50,000
Add: Transferred to General Reserve		7,000
		2,57,000
Add back :		
Depreciation on fixed assets	10,000	
Amortisation of goodwill	5,000	15,000
		2,72,000
Deduct :		
Profit on sale of land		3,000
Cash Generated from Operations before Working Capital Changes		2,69,000
Increase in debtors	(3,000)	
Decrease in creditors	(5,000)	
Decrease in bills receivable	2,000	
Decrease in prepaid expenses	2,000	(4,000)
Net Cash Flows from Operating Activities		2,65,000

Reporting Cash Flows from Investing and Financing Activities

An enterprise should report separately major classes of gross cash receipts and gross cash payments arising from investing and financing activities, except to the extent that cash flows are reported on a net basis.

Reporting Cash Flows on a Net Basis

Cash flows arising from the following operating, investing or financing activities may be reported on a net basis:

(a) cash receipts and payments on behalf of customers when the cash flows reflect the activities of the customer rather than those of the enterprise; and

Examples of cash receipts and payments are:

(a) the acceptance and repayment of demand deposits by a bank;

(b) funds held for customers by an investment enterprise; and

(c) rents collected on behalf of, and paid over to, the owners of properties.

(b) cash receipts and payments for items in which the turnover is quick, the amounts are large, and the maturities are short.

Examples of cash receipts and payments are advances made for, and the repayments of:
- **(a) principal amounts relating to credit card customers;**
- **(b) the purchase and sale of investments; and**
- **(c) other short-term borrowings, for example, those which have a maturity period of three months or less.**

Cash flows arising from each of the following activities of a financial enterprise may be reported on a net basis:
- (a) cash receipts and payments for the acceptance and repayment of deposits with a fixed maturity date;
- (b) the placement of deposits with and withdrawal of deposits from other financial enterprises; and
- (c) cash advances and loans made to customers and the repayment of those advances and loans.

Foreign Currency Cash

Cash flows arising from transactions in a foreign currency should be recorded in an enterprise's reporting currency by applying to the foreign currency amount, the exchange rate between the reporting currency and the foreign currency at the date of the cash flow.

For example, your company Kid's Wear Ltd. has received $ 1,00,000 on March 20, 2015. Company's reporting currency is Rupee. The exchange rate on March 20, was $1 = ₹ 40. The transaction should be reported at ($1,00,000 × ₹ 40) = ₹ 40,00,000.

A rate that approximates the actual rate may be used if the result is substantially the same as would arise if the rates at the dates of the cash flows were used.

This permits the use of approximate rate in place of actual rate for recording foreign currency transaction.

For example, your company Kid's Wear Ltd. has received $1,00,000 on March 20, 2015. Company's reporting currency is Rupee. The policy of the company is to use Weighted Average Rate. The weighted average rate for the period is 39.95. The rate on March 20 was ₹ 40. The transaction can be reported at ($1,00,000 × ₹ 39,95) = ₹ 39,95,000.

Cash flows denominated in foreign currency are reported in a manner consistent with Accounting Standard (AS) 11, Accounting for the Effects of Changes in Foreign Exchange Rates.

Unrealised gains and losses arising from changes in foreign exchange rates are not cash flows.

For example, your Company, Tata Steel Ltd. has a foreign investment worth £250 crores. Company's reporting currency is Rupee. The exchange rate on January 1, 2015 was £1 = ₹ 60, but on 31st March, 2015 it is £1 = ₹ 65. The unrealised gain in rupee is not a cash flow.

However, the effect of exchange rate changes on cash and cash equivalents held or due in a foreign currency is reported in the cash flow statement in order to reconcile cash and cash equivalents at the beginning and the end of the period. This amount is presented separately from cash flows from operating, investing and financing activities and includes the differences, if any, had those cash flows been reported at the end of period exchange rates.

For example, your company, REL has a cash balance of 10,000 Euros. Company's reporting currency is Rupee. The exchange rate on 1st April, 2013 was 1 Euro = ₹ 60. The exchange rate on 31st March, 2015 is 1 Euro = ₹ 62. The gain of ₹ 20,000 is an exchange difference and is to be shown separately as part of reconciliation of change in cash and cash equivalents for the period.

Extraordinary Items

The cash flows associated with extraordinary items should be classified as arising from operating, investing or financing activities as appropriate and separately disclosed.

The cash flows associated with extraordinary items are disclosed separately as arising from operating, investing or financing activities in the cash flow statement, to enable users to understand their nature and effect on the present and future cash flows of the enterprise. These disclosures are in addition to the separate disclosures of the nature and amount of extraordinary items required by Accounting Standard (AS) 5, Net Profit or Loss for the Period, Prior Period Items and Changes in Accounting Policies.

For example, your company, Dunlop India Ltd. had a plot of prime land in Kolkata. During the year 2014-15 it has been sold at ₹ 150 crores which is 100 times more than the book value.

This is an extraordinary item and it is to be disclosed separately as cash flowfrom investing activity.

Interest and Dividend

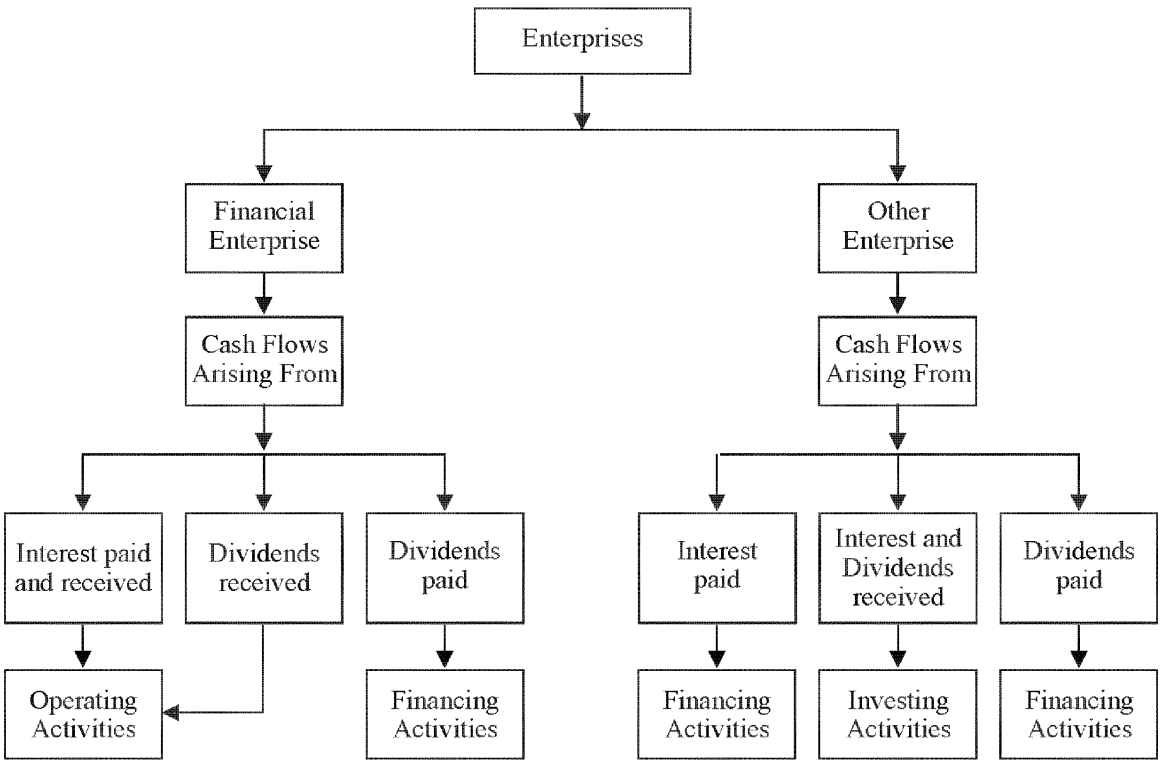
Interest and dividend shall be classified as follows :

For a financial enterprise

Interest paid and received, dividend received as ***operating activities***.
Dividend paid as ***financing activities***.

For other enterprises

Interest and dividend received as ***investing activities***.
Interest and dividend paid as ***financing activities***.
The following diagram will clear the matter.



Interest and dividends are received from investments. Naturally, they should be classified as cash inflows from investment activities (in case of other enterprises).
It should be noted that interest and dividend received from short-term investments included in cash and cash equivalents should be considered as cash inflows from operating activities. Similarly, any interest received on advance to employees, suppliers should be treated as cash inflows from operating activities. Interest paid on long term loan and dividend paid on equity / preference shares should be treated as cash outflows for financing activities. But interest on overdue payment, interest on overdraft etc. should be treated as outflows from operating activities.

Income-tax

Cash flows arising from taxes on income should be separately disclosed and should be classified as cash flows from operating activities unless they can be specifically identified with financing and investing activities.

Similarly, income tax refund should be treated as cash inflow from operating activities and to be shown separately.

When tax cash flow are allocated over more than one class of activity, the ***total amount*** of taxes paid is disclosed.

Example 1 : Your company, Dunlop India Ltd. has sold a plot of land in Kolkata for ₹ 150 crores. Capital gain tax of ₹ 30 crores were paid for that transaction. This can be classified as a tax on investing activities.

Example 2 : Your company, X Ltd. has paid ₹ 2,00,000 tax for operating activities, ₹ 3,00,000 for investing activities and ₹ 1,00,000 for financing activities.

In each individual section, tax paid is to be shown separately and total tax paid ₹ 6,00,000 should be disclosed in the cash flow statement as a note.

Investment in Subsidiaries, Associates and Joint Ventures

When accounting for an investment in an associate or a subsidiary or a joint venture, an investor restricts its reporting in the cash flow statement to the cash flows between itself and the investee / joint venture, for example, cash flows relating to dividends and advances.

For example, X Ltd. owns 20% of Y Ltd. X Ltd. provided a loan of ₹ 10,00,000 to Y Ltd. and received ₹ 6,00,000 as dividends. These transactions will appear in the cash flow statement of X Ltd.

The internal cash flows of Y Ltd. are not consolidated into the cash flow figure of X Ltd.

Acquisitions and Disposals of Subsidiaries and Other Business Units

The aggregate cash flows arising from acquisitions and from disposals of subsidiaries or other business units should be presented separately and classified as ***investing activities***.

For example, X Ltd. has sold one of its subsidiary for ₹ 40 crores. This proceeds of ₹ 40 crores is to be shown in the cash flow statement of X Ltd. as an investing activity.

An enterprise should disclose, in aggregate, in respect of both acquisition and disposal of subsidiaries or other business units during the period each of the following :

(a) the total purchase or disposal consideration; and
(b) the portion of the purchase or disposal consideration discharged by means of cash and cash equivalents.

The separate presentation of the cash flow effects of acquisitions and disposals of subsidiaries and other business units as single line item helps to distinguish those cash flows from other cash flows. The cash flow effects of disposals are not deducted from those of acquisitions.

For example, during 2014-15 H Ltd. buy S Ltd.'s 30% equity shares for ₹ 100 crores. For this purpose, H Ltd. sold one of its subsidiary, X Ltd. for ₹ 80 crores. The flow for purchase of S Ltd. and sale of X Ltd. is to be disclosed in the cash flow statement separately. Net ₹ 20 crores outflow will not be shown in the cash flow statement.

Non-Cash Transactions

Investing and financing transactions that do not require the use of cash or cash equivalents should be excluded from a cash flow statement. Such transactions should be disclosed elsewhere in the financial statements in a way that provides all the relevant information about these investing and financing activities.

Many investing and financing activities do not have a direct impact on current cash flows although they do affect the capital and asset structure of an enterprise. The exclusion of non-cash transactions from the cash flow statement is consistent with the objective of a cash flow statement as these items do not involve cash flows in the current period. Examples of non-cash transactions are :

(a) the acquisition of assets by assuming directly related liabilities;
(b) the acquisition of an enterprise by means of issue of shares; and
(c) the conversion of debt to equity.

For example, during 2012-13 X Ltd. issued 20,000, 10% fully convertible debentures of ₹ 100 each. These debentures were converted into 2,00,000 equity shares of ₹ 10 fully paid during 2014-15. This conversion of debt into equity involves no inflow or outflow of cash. Therefore, it will not be shown in the cash flow statement of X Ltd. for the year 2014-15.

Components of Cash and Cash Equivalents

An enterprise should disclose the components of cash and cash equivalents and should present a reconciliation of the amounts in its cash flow statement with the equivalent items reported in the Balance Sheet.

For example, cash and cash equivalents includes :
(i) Cash in hand;
(ii) Cash at bank — in current account;
(iii) Short-term bank deposits;
(iv) 5% Government bonds (to be matured within 60 days)

In view of the variety of cash management practices, an enterprise discloses the policy which it adopts in determining the composition of cash and cash equivalents.

The effect of any change in the policy for determining components of cash and cash equivalents is reported in accordance with Accounting Standard (AS) – 5, Net Profit or Loss for the period, prior period items and changes in Accounting Policies.

Other Disclosures

An enterprise should disclose, together with a commentary by management, the amount of significant cash and cash equivalent balances held by the enterprise that are not available for use by it.

There are various circumstances in which cash and cash equivalent balances held by an enterprise are not available for use by it.

Example 1 : G Ltd. has a subsidiary in Bangladesh. It has cash balance of 20 lakhs Taka. The Bangladesh Government has frozen the bank account of the company for violation of foreign exchange regulations. This amount would be disclosed as cash not available for use with proper explanation by the management.
Example 2 : ₹ 20 crores has been deposited by your company in an 'Escrow Account' for the purpose of buy-back of its shares from the market. This amount would be disclosed as cash not available for use.

Additional information may be relevant to users to understand the financial position and liquidity of an enterprise. Disclosure of this information, together with a commentary by management, is encouraged and may include :

(a) the amount of undrawn borrowing facilities that may be available for future operating activities and to settle capital commitments, indicating any restrictions on the use of these liabilities; and

(b) the aggregate amount of cash flows that represent increases in operating capacity separately from those cash flows that are required to maintain operating capacity.

Example 1 : For future requirement, H Ltd. applied for long-term loan. SBI has sanctioned ₹ 100 crores, which can be used in coming 4 years. At present, H Ltd. is using only ₹ 20 crores. This piece of information will help the users to understand the company's future plans for expansion and how it will be financed.

Example 2 : At present, M Ltd.'s Chennai Plant is operating at 100% capacity. During the accounting year 2014-15 the operating activities have generated ₹ 100 crores cash. For the purpose of increasing capacity M Ltd. has purchased 50 acres of land from Tamil Nadu Government which is adjacent to its existing Plant.

A separate disclosure will help the users to understand the future plan of the company.

The separate disclosure of cash flows that represent increases in operating capacity and cash flows that are required to maintain operating capacity is useful in enabling the user to determine whether the enterprise is investing adequately in the maintenance of its operating capacity. An enterprise that does not invest adequately in the maintenance of the operating capacity may be prejudicing future profitability for the sake of current liquidity and distributions to owners.

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each sentence or answer each question below :

1. A cash flow statement provides information that enables users to evaluate
   A the profitability of the company
   B the solvency of the company
   C the liquidity, flexibility and ability of the company to generate future cash flows.
2. Revenue from sales, expenses paid for purchases, employee salary and overheads comprise
   A operating activities
   B financing activities
   C investing activities
3. Payment to acquire plant and machinery and patents are
   A operating activities
   B investing activities
   C financing activities
4. Cash equivalents are held
   A for investment purposes
   B for the purpose of meeting short-term cash commitments
   C for other purposes
5. Activities that result in changes in the size and composition of the owners' capital and borrowing of the enterprise are
   A investing activities
   B financing activities
   C operating activities

6. An investment normally qualifies as a cash equivalent only when it has a short maturity of, say,
   A six months or less
   B four months or less
   C three months or less
7. Examples of cash flows arising from investing activities are :
   1. Cash received for sale of plant and machinery.
   2. Cash proceeds from issuing of shares.
   3. Cash received from disposal of shares of other enterprise.
   4. Cash paid for buy-back of shares.
   A all four
   B 1, 3 and 4
   C 1 and 3 only
   D 3 and 4 only
8. Examples of cash flows arising from financing activities are :
   1. Cash repayments of amount borrowed on long-term basis.
   2. Cash advances and loans made to third parties by a non- financial enterprise.
   3. Cash proceeds from short-term borrowings.
   A all three
   B 1 and 2 only
   C 1 and 3 only
   D 2 and 3 only
9. Which method of cash flow reporting starts with net profit for calculating cash flow from operating activities ?
   A Direct method
   B Indirect method
   C Neither
   D Both
10. Interest and dividend received from short-term investments included in cash and cash equivalents should be considered as
    A cash flow from investing activities
    B cash flow from financing activities
    C cash flow from operating activities
11. Dividend paid will be treated as cash flow from
    A operating activities in case of a financial enterprise
    B financing activities in case of a financial enterprise only
    C financing activities in case of both financial enterprise and other enterprise
12. Interest on overdue payment and interest on overdraft should be treated as cash flow from
    A financing activities
    B operating activities
    C investing activities
13. Generally cash flows arising from taxes on income should be classified as cash flows from
    A operating activities
    B investing activities
    C financing activities
14. Which of the following statement is true ?
    A The cash flows arising from acquisitions and from disposals of subsidiaries or other business units should be presented after netting off and classified as investing activities.
    B The cash flows arising from acquisitions and from disposals of subsidiaries or other business units should be presented separately as financing activities.
    C The cash flows arising from acquisitions and from disposals of subsidiaries or other business units should be presented separately as investing activities.

15. The acquisition of an enterprise by issue of shares will
    A be shown in the cash flow statement under investing activities
    B not be shown in the cash flow statement
    C be shown in the cash flow statement under financing activities
16. Cash flows arising from transactions in a foreign currency should be recorded
    A in an enterprise's reporting currency at the rate on the date of closing the books of account
    B in an enterprise's reporting currency at the rate on the opening date of the accounting period
    C in an enterprise's reporting currency at the rate on the date of cash flow
17. Unrealised gains and losses arising from changes in foreign exchange rates
    A are treated as cash flows from operating activities
    B are not treated as cash flow
    C are treated as cash flows from financing activities
18. Which of the following statement is correct ?
    A cash equivalents are short-term, highly liquid investments that are readily convertible into cash but the amount is not known
    B cash equivalents are short-term, semi-liquid investments that can be converted into cash at a discount
    C cash equivalents are short-term, highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value

AS — 4 : Contingencies and Events Occurring After Balance Sheet Date*
[Effective Date : 1 April, 1995]

Introduction

There is a time gap between the Balance Sheet date and the date of approval of accounts by the Board of Directors. Many events may take place between these two dates, which can influence the profits of the enterprise. In many countries these events are reported through notes to the financial statements. However, in India, there is a specific accounting standard AS–4 to deal with post Balance Sheet events.

Events occurring after Balance Sheet date may be favourable or unfavourable.

These events can be disclosed either by changing the amounts included, or by way of disclosure. These measures are considered necessary as a means of ensuring that the financial statements are not misleading.

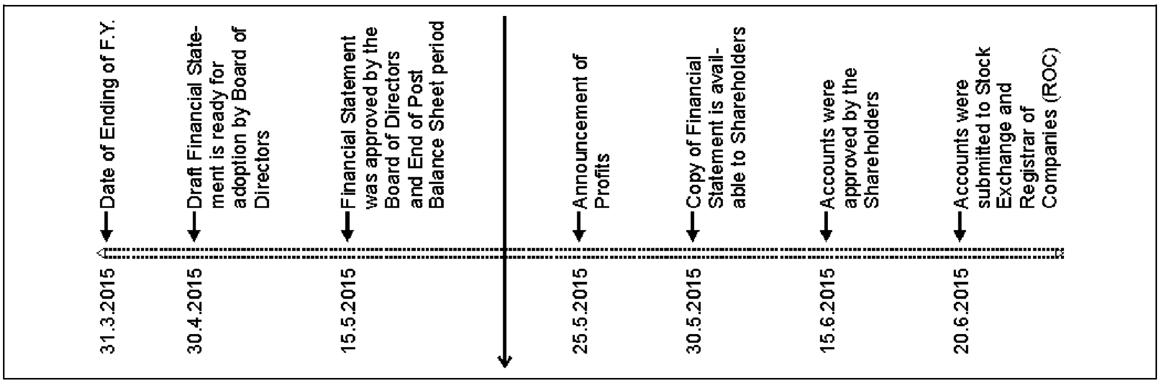
Definitions

Events after the Balance Sheet Date

Events occurring after the Balance Sheet date are those significant events, both favourable and unfavourable, that occur between the Balance Sheet date and the date on which the financial statements are approved by the Board of Directors in the case of a company, and, by the corresponding approving authority in the case of any other entity.

Here, date of approval of financial statements by the Board of Directors is very important. This date may vary depending on factors such as requirement of the Companies Act, Stock Exchange, etc. The date of approval by the Board of Directors is the end of the post Balance Sheet period.

Example :
(i) On 30.4.2015, A Ltd.'s draft financial statement was ready for the financial year ending on 31st March, 2015.
(ii) On 15.5.2015, the Board of Directors of A Ltd. approved the financial statements for issue.
(iii) On 25.5.2015, the enterprise announced its profits and selected other financial information.
(iv) On 30.5.2015, the financial statements were available with the shareholders of the company.
(v) On 15.6.2015, A Ltd.'s annual general meeting was held and the financial statements of the company was approved by the shareholders.
(vi) On 20.6.2015, the approved financial statements was filed with the Stock Exchange and ROC.
In this case, post Balance Sheet period starts from 1.4.2015 and ending on 15.5.2015.
Date of approval by the shareholders is not vital for this purpose.



*In this section, events occurring after Balance Sheet date will be discussed. Matters relating to "**Contingencies in AS–4**" have been superseded by "**AS–29 — Provisions, Contingent Liabilities**".

Events after Balance Sheet Date are classified into ***two*** categories :

(i) Adjusting Events

(ii) Non-adjusting Events

Adjusting Events

Adjusting Events are events that provide additional evidence relating to conditions ***existed*** at the Balance Sheet date and they require changes to be included in the financial statements.

Example 1 : A trade customer, for whose balance, a full specific provision has been made at 31st March, 2015, paid the full amount of ₹ 84,000 before the date of approval of financial statements by the Board of Directors.

It is an adjusting event. Provision for bad debts is to be reduced by ₹ 84,000 in the financial statements.

Journal entry :

Provision for Bad Debts Account	**Dr.**	**₹ 84,000**	
To Profit and Loss Account			**₹ 84,000**

The other examples are :

(a) The valuation of a fixed asset indicating a permanent diminution of value at the Balance Sheet date.

(b) The insolvency of a debtor included in the year and figure for debtors.

(c) The discovery of an error in the accounts.

Example 2 : Swapna Printing Press Ltd. is in the process of repairing one of its printing machine on 31st March, 2015 (the date of closing the books of account). On 10th May, 2015, the servicing company informed that the printing machine is irreparable for non-availability of some vital parts.

The machine at present appearing in the Balance Sheet of 31st March, 2015 at ₹ 40,00,000. The scrap value of the machine is ₹ 5,00,000 only.

Financial statements have not yet been approved by the Board of Directors.

This is an adjusting event. The value of the printing machine should be reduced to ₹ 5,00,000.

Journal Entry

Depreciation Account	**Dr. ₹ 35,00,000**	
To Accumulated Depreciation Account		**₹ 35,00,000**

Non-adjusting Events

Non-adjusting Events concerns conditions that ***did not exist*** at the Balance Sheet date and they do not result in changes in the financial statements, but they may be significant enough to justify a note to the accounts. The financial figures remain unaltered.

Example 1 : In April, 2015 a fire destroyed part of the company's warehouse, with an uninsured loss of inventory worth ₹ 10,00,000 and damaged the building, also uninsured, of ₹ 25,00,000. The going concern status of the company is not affected.

It is a non-adjusting event. The profit of the period under consideration will not be altered. However, a detailed note should be given stating the fact and its impact.

Example 2 : X Ltd. has invested a large amount in shares of Indian Bluechip Companies like Reliance Industries, ONGC and SBI. These shares performed well during the year 2014. Because of different factors, stock market crashed in the month of January, 2015 and remained very depressed until the date of approval of the financial statements. X Ltd. prepares its accounts on calendar year basis.

It is a non-adjusting event and financial figures remain unaltered. However, it is to be disclosed by way of a note stating the amounts involved.

Going Concern

Events occurring after the Balance Sheet date may indicate that the enterprise ceases to be a going concern. A deterioration in operating results and financial position, or unusual changes affecting the existence or substratum of the enterprise after the Balance Sheet date (e.g., destruction of a major production plant by a fire after the Balance Sheet date) may indicate a need to consider whether it is proper to use the fundamental accounting assumption of going concern in the preparation of the financial statements.

Example 1 : B Ltd. has prepared its account for year ended 31st March, 2015 in the usual manner. B Ltd.'s only plant has been destroyed by fire on 5th May, 2015. The plant was not insured. Now it is certain that the company will be liquidated.
The financial statements to 31st March, 2015 should be produced on a liquidation basis, not a going concern basis.

Example 2 : R Securities Ltd. has a client, A Agarwal & Co. that owes the company ₹ 50 crores in respect of securities trading on 31st March, 2015.
On 3rd April, 2015, A Agarwal & Co. goes into liquidation. It is estimated that nothing can be recovered from them.
R Securities Ltd. may be able to raise funds to recover the loss but the company is not sure about the timing.
The financial statements to 31st March, 2015 should be produced on a liquidation basis, not a going concern basis because of the uncertainty.

Disclosures

The following information should be disclosed in the report of the approving authority (i.e., Board of Directors) in respect of the events occurring after the Balance Sheet date :

(a) the nature of the event;
(b) an estimate of the financial effect or a statement that such an estimate cannot be made.

Illustration 1

State with reasons, whether the following are adjusting or non- adjusting events :

(a) The professional valuation of a fixed asset one month after the Balance Sheet date at a figure of ₹ 3,00,000 below the current book value. The diminution in value is considered to be permanent.
(b) The destruction of the company's warehouse two weeks after the Balance Sheet date. The loss on the building and the stock it contained amounted to ₹ 6,00,000; due to administrative error neither was insured.

Solution

(a) This is an adjusting event, because the valuation provides information about a condition existing at the Balance Sheet date. If it could be established that the decline in value occurred after the Balance Sheet date, it would become a non-adjusting event.
(b) This is a non-adjusting event which concerns a condition which did not exist at the Balance Sheet date. Moreover this event does not indicate that the enterprise ceases to be a going concern. Therefore, it should be disclosed in the notes to the financial statements.

Illustration 2

An earthquake destroyed a major warehouse of Daya Ltd on 18th May, 2015. The accounting year of the company ended on 31st March, 2015. The accounts were approved on 30th June, 2015. The loss from earthquake is estimated at ₹ 45 lakhs. State with reasons, whether the loss due to earthquake is an adjusting or non-adjusting event and how the fact of loss is to be disclosed by the company ?

Solution

The loss due to earthquake is ***not an adjusting event*** because on the Balance Sheet date the event 'earthquake' did not exist.

The loss of ₹ 45 lakhs due to earthquake need not be recognised in the financial statement of 2014-15.

As the earthquake loss is significant, it should be mentioned in the Directors' Report of 2014-15. In this report, it is also to be stated that whether going concern assumption is still applicable or not.

Illustration 3

Cashier of A-One Limited embezzled cash amounting to ₹ 6,00,000 during March, 2015. However, the same comes to the notice of the company's management during April, 2015 only. Financial Statements of the company is not yet approved by the Board of Directors of the company. With the help of provisions of AS-4 'Contingencies and Events Occurring after the Balance Sheet Date' decide, whether the embezzlement of cash should be adjusted in the books of account for the year ending March, 2015 ?

What will be your answer, if embezzlement of cash comes to the notice of the company's management only after approval of Financial Statements of the company ?

Solution

The loss due to embezzlement by the cashier is ***an adjusting event*** because on the Balance Sheet date the embezzlement was existing though it was detected after Balance Sheet date but before approval of financial statements by the Board of Directors. The loss of ₹ 6,00,000 should be recognised in the financial statement of 2014-15.

If the embezzlement of cash comes to the notice of the company's management after the approval of financial statements by the Board of Directors, then it should be treated under AS-5. The loss should be shown in the Statement of Profit and Loss of 2015-16 as ***extraordinary item***. The nature and the amount of prior period items should be disclosed separately in the Statement of Profit and Loss.

Illustration 4

A company entered into an agreement to sell its immovable property to another company for ₹ 35 lakhs. The property was shown in the Balance Sheet at ₹ 7 lakhs. The agreement to sell was concluded on 15th February, 2015 and sale deed was registered on 30th April, 2015. The financial statements for the year 2014-15 were approved by the Board on 12th May, 2015.

You are required to state, how this transaction would be dealt with in the financial statements for the year ended 31st March, 2015.

Solution

According to para 13 of AS-4 'Contingencies and Events Occurring after the Balance Sheet Date', assets and liabilities should be adjusted for events occurring after the Balance Sheet date that provide additional evidence to assist the estimation of amounts relating to conditions existing at the Balance Sheet date. The agreement to sell was concluded on 15th February, 2015, i.e., before the Balance Sheet date. However, the registration of the property was done on 30th April, 2015 and this provides additional information relating to the conditions existing on the Balance Sheet date. Therefore, the assets should be adjusted and the profit on sale of property should be recognised in the financial statements of 2014-15.

Illustration 5

While preparing its final accounts for the year ended 31.3.2015, a company made a provision for bad debts @ 5% of its total debtors. In the last week of February 2015, a debtor for ₹ 2 lakhs had suffered heavy losses due to an earthquake, the loss was not covered by any insurance policy. In April, 2015 the debtor became bankrupt.

Can the company provide for the full loss arising out of insolvency of the debtor in the final accounts for the year ended 31.3.2015?

Solution

This is an adjusting event because it provides additional evidence relating to conditions ***existed*** at the Balance Sheet date. The company should provide for the entire amount of ₹ 2 lakhs arising out of bankruptcy of the debtors as loss of the current period.

Illustration 6

A company closed its accounting year on 31.3.2015 and the accounts for that period were considered and approved by the Board of Directors on 20.5.2015. The company was engaged in laying pipeline for an oil company, deep beneath the earth. While doing the boring work on 1.6.2015, it had made a rocky surface for which it was estimated that there would be an extra cost to the tune of ₹ 80 lakhs.

You are required to state with reasons, how the event would be dealt within the financial statements for the year ended 31.3.2015.

Solution

The date of approval by the Board of Directors is the end of the post Balance Sheet period. Here, accounts were approved by the Board of Directors on 20.5.2015. Any event occurring after this date should be disclosed as a note so as to enable the users of financial statements to make proper evaluations and decisions.

Illustration 7

A company deals in petroleum products. The sale price of petrol is fixed by the Government. After the Balance Sheet date, but before the finalisation of the company's accounts, the Government unexpectedly increased the price retrospectively.

Can the company account for additional revenue at the close of the year ? Discuss.

Solution

The company cannot recognise the unexpected increase in sale price as additional revenue. As per para 8 of AS—4: 'Events Occurring After the Balance Sheet Date', unexpected increase in sale price cannot be regarded as an event occurring after Balance Sheet date, which requires an adjustment of the Balance Sheet date, since it does not represent a condition present at the Balance Sheet date.

This retrospective increase in sale price of petrol should not be considered as a prior period item, as per AS—5 because there was no error in the preparation of previous period's financial statements. This revenue should be recognised in the subsequent year and it should be disclosed properly.

Illustration 8

A company follows April to March as its financial year. The company recognises cheques dated 31st March or before, received from customers after Balance Sheet date, but before approval of financial statement by debiting 'Cheques in Hand Account' and crediting 'Debtors Account'. The cheques in hand is shown in the Balance Sheet as an item of cash and cash equivalents. All cheques in hand are presented to bank in the month of April and are also realised in the same month in normal course after deposit in the bank. State with reasons, whether the collection of cheques bearing date 31st March or before, but received after Balance Sheet date is an adjusting event and how this fact is to be disclosed by the company ?

Solution

Cheques received after Balance Sheet date bearing the date of 31st March or before is ***not an adjusting event*** because receiving cheques after Balance Sheet date, do not represent any condition existing on the Balance Sheet date.

Collection of cheques after Balance Sheet date does not represent any material change affecting the financial position of the business. Therefore, ***no disclosure in Directors' Report is required***.

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each sentence or answer each question below :

1. Events occurring after balance sheet date are events, favourable or unfavourable, which occur between the Balance Sheet date and the date on which the financial statements:
   A are approved by the shareholders
   B are approved by the accounts committee
   C are approved by the Board of Directors
   D are approved by the audit committee.

2. Which of the following dates marks the end of the period covered by AS–4 ?
   A on 2nd May, 2015 the draft financial statements are ready for issue to accounts committee
   B on 9th May, 2015, accounts committee approves the financial statements
   C on 15th May, 2015 Board of Directors approves the financial statements
   D on 30th May, 2015 shareholders approve the financial statements in the general meeting
3. T.M. Ltd. made a major acquisition after the date of Balance Sheet but before the approval of the financial statements by the Board of Directors. The company should :
   A adjust the financial statements
   B ignore it
   C leave the financial statements but, disclose it by way of a note
4. R Ltd., a pharmaceutical company, has been sued by its competitor for patent violation. For this law suit, the company made a provision of ₹ 10,00,000 in its financial statements at 31st March, 2013 which have not yet been approved.
   On 14th April, 2015 the court awards ₹ 12,00,000 damages against R Ltd. The company should :
   A adjust the financial statements
   B leave the financial statements, but disclose it by way of a note
   C ignore it
5. X Ltd. sold its subsidiary, S Ltd. to Y Ltd. on 1st July, 2014 for ₹ 200 crores. In addition, X Ltd. will get ₹ 10 crores if the subsidiary (S Ltd.) can earn a targeted profit of ₹ 20 crores for the year 2014-15. At the time of preparing financial statements for the period 2014-15, X Ltd. had the information that S Ltd.'s profit for the period was less than targeted profit of ₹ 20 crores. Therefore, sales proceeds of ₹ 200 crores were taken into consideration. Before the approval of financial statements, X Ltd. was informed officially by Y Ltd. that the profits of S Ltd. for the year 2014-15 as per audited accounts is ₹ 21 crores. Now, X Ltd. should :
   A adjust the financial statements for additional ₹ 10 crores sale proceeds (to be received)
   B leave the financial statements but, disclose it by way of a note
   C ignore it now
6. Which of the following events after the balance sheet date would normally qualify as adjusting events according to AS–4 (Events after Balance Sheet date) ?
   1. The insolvency of a customer with a balance outstanding at the balance sheet date.
   2. A decline in the market value of investments.
   3. The declaration of an ordinary dividend.
   4. The determination of the cost of assets purchased before the balance sheet date.

   A 1, 3 and 4
   B 1 and 2 only
   C 2 and 3 only
   D 1 and 4 only
7. Which of the following events occurring after the balance sheet date are classified as adjusting events according to AS–4 (Events after balance sheet date) ?
   1. The sale of inventories valued at cost at a balance sheet date for a figure in excess of cost.
   2. A valuation of land and buildings providing evidence of an impairment in value at the year end.
   3. Issue of shares and debentures.
   4. The insolvency of a customer with balance outstanding at the end.

   A 1 and 3
   B 2 and 4
   C 2 and 3
   D 1 and 4
8. Which of the following material events after the balance sheet date and before the financial statements are approved by the directors should be adjusted for in those financial statements ?
   1. A valuation of property providing evidence of impairment in value at the balance sheet date
   2. Sale of inventory held at the balance sheet date for less than cost.

3. Discovery of fraud or error affecting the financial statements
4. The insolvency of a customer with a debt owing at the balance sheet date which is still outstanding.

A all of them
B 1, 2 and 4 only
C 3 and 4 only
D 1, 2 and 3 only

9. The draft financial statements of X Ltd. are under consideration. The accounting treatment of the following material events after the balance sheet date needs to be determined.
   1. The insolvency of a major customer with a substantial debt outstanding at the balance sheet date.
   2. A fire destroying some of the company's inventory (the company's going concern status is not affected).
   3. An issue of shares to finance expansion.
   4. Sale for less than cost of some inventory held at the balance sheet date.

   According to AS–4 (Events after Balance Sheet date), which of the above events require an adjustment to the figures in the draft financial statements ?

   A 1 and 4 only
   B 1, 2 and 3 only
   C 2 and 3 only
   D 2 and 4 only

10. H Ltd.'s one of the major client has gone into liquidation after the balance sheet date but before the approval of the financial statements by the Board of Directors.
    The amount due was very large and H Ltd. can not survive the loss.
    The financial statements for the year to be produced

    A on a going concern basis
    B on a liquidation basis
    C none of the above

AS — 5 : Net Profit or Loss for the Period, Prior Period Items and Changes in Accounting Policies

[Effective Date : 1st April, 1996]

Introduction

The Profit and Loss Account for any accounting period should be prepared in such a manner that it is comparable with those of the other years and with the financial statements of other enterprises. This standard is intended to enhance the ***relevance*** and ***reliability*** of the financial statements of the enterprise.

Though the financial information provided by the Profit and Loss Account about the financial performance of an enterprise is historical in nature, yet users use this information to evaluate the enterprise's future performance.

Objective

The objective of this statement is to prescribe the classification and disclosure of certain items in the statement of profit and loss so that all enterprises prepare and present such a statement on a uniform basis.

This statement requires the classification and disclosure of ***extraordinary*** and ***prior period*** items, and disclosure of certain items within profit or loss from ordinary activities.

It also specifies the accounting treatment for changes in ***accounting estimates*** and the disclosures to be made in the financial statements regarding changes in ***accounting policies***.

Scope

1. This Statement should be applied by an enterprise in ***presenting profit or loss*** from ordinary activities, extraordinary items and prior period items in the statement of profit and loss, in accounting for changes in accounting estimates, and in disclosure of changes in accounting policies.
2. This Statement deals with, among other matters, the disclosure of certain items of net profit or loss for the period. These disclosures are made in addition to any other disclosures required by other Accounting Standards.
3. This Statement ***does not deal*** with the tax implications of extraordinary items, prior period items, changes in accounting estimates, and changes in accounting policies for which appropriate adjustments will have to be made depending on the circumstances.

Definitions

Ordinary Activities

Ordinary activities are any activities which are undertaken by an enterprise as part of its business and such related activities in which the enterprise engages in furtherance of, incidental to, or arising from, these activities.

Example : X Ltd. is a software development company operating from Kolkata. Recently they have started a training institute for future software developers. All activities relating to training institute will be treated as ordinary activities.

Extraordinary Items

Extraordinary items are income or expenses that arise from events or transactions that are clearly distinct from the ordinary activities of the enterprise and, therefore, are not expected to re-occur frequently or regularly.

Example : Sale of old machinery and furniture at a profit / loss is an ordinary activity but sale of excess land adjacent to existing factory should be treated as an extraordinary item. Similarly, loss due to earthquake shall be treated as an extraordinary item.

Prior Period Items

Prior period items are income or expenses which arise in the current period as a result of ***errors*** or ***omissions*** in the preparation of the financial statements of one or more prior periods.

Example : Inventory had been overstated in 2014 but it was detected only in 2015. It is a prior period item.

Accounting Policies

Accounting policies are the specific accounting principles and the methods of applying those principles adopted by an enterprise in the preparation and presentation of financial statements.

Net Profit or Loss for the Period

All items of income and expense which are recognised in a period should be included in the determination of net profit or loss for the period unless an Accounting Standard requires or permits otherwise.

The net profit or loss for the period comprises the following components, each of which should be disclosed on the face of the statement of profit and loss:

a. profit or loss from ordinary activities; and
b. extraordinary items.

Profit or Loss from Ordinary Activities

When items of income and expense within profit or loss from ordinary activities are of such size, nature or incidence that their disclosure is relevant to explain the performance of the enterprise for the period, the nature and the amount of such items should be disclosed separately. This disclosure will enhance the ***transparency*** in reporting income and expenses.

Example : Sale of old furniture is an ordinary transaction, the profit or loss from such sale should be disclosed separately because it is not related to operation of the business.

A separate disclosure of items of income and expense is necessary in the following cases.

a. the write-down of inventories to net realisable value as well as the reversal of such write-downs;
b. a restructuring of the activities of an enterprise and the reversal of any provisions for the costs of restructuring;
c. disposals of items of fixed assets;
d. disposals of long-term investments;
e. legislative changes having retrospective application;
f. litigation settlements; and
g. other reversals of provisions.

Illustration 1

During the year 2014-15, a medium size manufacturing company wrote down its inventories to net realisable value by ₹ 5,00,000. Is a separate disclosure necessary?

Solution

This is an ordinary activity. Ordinary activities are any activities which are usually, frequently or regularly, undertaken by an enterprise as part of its business.

Expenses or income which are exceptional on account of size (large or small) and/or incidence (extent or frequency of occurrence) that arises from the ordinary activities of a business, should be separately disclosed.

Therefore, writing down inventories to net realisable value by ₹ 5,00,000 is ***to be disclosed separately***.

Extraordinary Items

Extraordinary items are those items which arise from abnormal or unusual events lying outside the ordinary range of firm's activities and which are both ***material and expected not to occur frequently or regularly***.

Classification of an item as extraordinary will depend on the circumstances of a business. An event or transaction may be extraordinary for one enterprise but not so for another enterprise. This is because of the differences between their respective ordinary activities. ***For example***, losses sustained as a result of an earthquake may qualify as an extraordinary item for many enterprises. However, claims for an insurance company that insures against such risks is an ordinary item.

Extraordinary items should be disclosed in the statement of profit and loss as a part of net profit and loss for the period. The nature and the amount of each extraordinary item should be ***separately disclosed*** in the statement of profit and loss in such a manner that its impact on current profit or loss will be clearly observed.

It should be remembered that ***only on rare*** occasions do an event or transaction give rise to an extraordinary item.

Illustration 2

A company signed an agreement with the Employees Union on 1.9.2014 for revision of wages with retrospective effect from 30.9.2013. This would cost the company an additional liability of ₹ 5,00,000 p.a.

Is a disclosure necessary for the amount paid in 2014-15?

Solution

The additional wages liability of ₹ 7,50,000 (₹ 5,00,000 p.a. for $1^1/_2$ years) should be included in current year's wages, as it arises from ordinary activities of the organisation. This should not be treated as a prior period item since it does not arise because of an error in an earlier accounting year has been discovered. Likewise, the nature of additional expense is not such that it can be treated as an extraordinary item, which arises only on ***rare occasion***.

Ordinary activities which are exceptional on account of size (large or small) and/or incidence (extent of frequency or incidence) should be separately disclosed. Therefore, in this case, ***disclosure*** is necessary for the additional wage payment to be made.

Illustration 3

X Co. Ltd. signed an agreement with its employees union for revision of wages in June 2014. The wage revision is with retrospective effect from 1.4.2010. The arrear wages up to 31.3.2014 amounts to ₹ 80 lakhs. Arrear wages for the period from 1.4.2014 to 30.6.2014 (being the date of agreement) amounts to ₹ 7 lakhs.

Decide whether a separate disclosure of arrear wages is required.

Solution

Revision of wages was made in June 2014 with retrospective effect from 1.4.2010. The additional wages liability ₹ 87 lakhs (₹ 80 lakhs + ₹ 7 lakhs) should not be treated as a prior period item since it does not arise because of an error or omission in an earlier accounting year which has been discovered now. Likewise, the nature of additional wages is not such that it can be treated as an extraordinary item, which arises only on rare occasion. This additional wages of ₹ 87 lakhs should be shown in the Profit and Loss Account for the year ended 31st March, 2015.

Para 12 of AS—5 (Revised) states that when items of income and expense within profit and loss from ordinary activities are of such size, nature or incidence that their disclosure is relevant to explain the performance of the enterprise for the period, the nature and amount of such items should be disclosed separately.

Therefore, ₹ 80 lakhs wages (for the period 1.4.2010 to 31.3.2014) should be ***disclosed separately***. However, wages payable for the current year (1.4.2014 to 30.6.2014) ₹ 7 lakhs need not be shown separately. It will be merged with the wages of the current year, i.e., 2014-15.

Prior Period Items

The term 'Prior Period Items' refers only to income and expenses which occurred in a previous period. It will normally arise because some errors in an earlier account has been discovered. Errors may occur as a result of mathematical mistakes, mistakes in applying accounting policies, misinterpretation of facts, or oversight. Material errors in the Profit and Loss Account of one accounting period that are discovered in a subsequent period usually involve an asset or liability and a revenue or expense of a period. They do not include normal recurring adjustments (e.g., arrears payable to workers in current period as a result of retrospective revision of wages) or correction of accounting estimates made in prior years.

Prior period items are normally included in the determination of net profit or loss for the current period. An alternative approach is to show such items in the statement of profit and loss after determination of current net profit or loss. In either case, the objective is to indicate the effect of such items on the current profits or losses.

The nature and amount of prior period items should be separately disclosed in the statement of profit and loss in a manner that their impact on the current profit or loss can be perceived.

Illustration 4

In preparing the financial statements of R Limited for the year ended 31.3.2015, you come across the following information. State with reasons, how you would deal with them in the financial statements:

There was a major theft of stores valued at ₹ 10 lakhs in the preceding year which was detected only during the current financial year.

Solution

This is a prior period item. It is an error as a result of oversight. This error was discovered in the subsequent period. Since this loss was not charged in the previous year, there was an overstatement of profit, brought forward to the current year. Therefore, adjustments are to be made in the opening stock of the current year and the profit brought forward from the previous year. The amount of loss should be shown in the Profit and Loss Account after ***determination of current net profit or loss***.

Illustration 5

Goods worth ₹ 5,00,000 were destroyed due to flood in September, 2013. A claim was lodged with insurance company. But no entry was passed in the books for insurance claim in the financial year 2013-14.

In March 2015, the claim was passed and the company received a payment of ₹ 3,50,000 against the claim. Explain the treatment of such receipt in final accounts for the year ended 31st March, 2015.

Solution

This is a prior period item. This is an error occurred in 2013-14 due to negligence. In March 2015, claim of ₹ 3,50,000 was received and it should be separately disclosed in the Statement of Profit and Loss for the year ending on 31st March, 2015.

Illustration 6

During the course of the last three years, a company owning and operating Helicopters lost four Helicopters. The company's accountant felt that after the crash, the maintenance provision created in respect of the respective helicopters was no longer required and proposed to write back to the Profit and Loss Account as a prior period item.

Is the company's proposed accounting treatment correct ? Discuss.

Solution

Company's proposed accounting treatment of writing back off the 'maintenance provision' as a prior period item is ***not correct***.

As per definition given in AS—5: "Net Profit or Loss for the Period, Prior Period Items and Change in Accounting Policies", prior period items are income or expenses which arise in the current period as a result of errors or omissions in the preparation of the financial statements of prior periods. However, the company should disclose it as an extraordinary item if the amount is material.

Change in Accounting Estimates

The use of reasonable estimates is an essential part of the preparation of financial statements. The process of accounting requires estimation in many areas, ***for example***, allowance for doubtful debts, inventory obsolescence or estimated useful lives of fixed assets.

Estimation involves judgments based on the latest available information. Accounting estimates, by their very nature, can rarely be measured with precision. Where circumstances change or new information becomes available the accounting estimate may need to be revised. ***The revision of an estimate does not relate to prior periods and is not the correction of an error***.

The effect of a change in an accounting estimate should be included in the determination of net profits and losses in :

(a) the period of the change, if the change affects that period only (e.g., provision for doubtful debts);

(b) the period of change and future periods, if the change affects both (e.g., change in the estimated life of a fixed asset).

Example : Your company Delhi Transport (P) Ltd. has a fleet of 20 diesel buses which are operating in NCR (National Capital Region) area. New legislation on pollution will ban them for use in NCR from 1st April, 2015, reducing their useful lives. The company will need to accelerate depreciation and review their residual values. This is a revision in estimates and will have no effect on prior periods, but the depreciation of the current year and subsequent years will increase.

Illustration 7

While preparing its final accounts for the year ended 31.3.2015, Rainbow Limited created a provision for bad and doubtful debts at 2% on trade debtors. A few weeks later, the company found that the payments from some of the major debtors were not forthcoming. Consequently, the company decided to increase the provision to 10% on the debtors as on 31.3.2015 as the accounts were still open awaiting approval of the Board of Directors. Is this to be considered as an extraordinary item or prior period item?

Solution

This is a change in accounting estimate. It is not to be considered as an extraordinary item or prior period item.

The provision for bad and doubtful debts has been increased from 2% to 10%. The effect of change should be shown in the Profit and Loss Account for the year ending on 31st March, 2015.

Illustration 8

A limited company created a provision for bad and doubtful debts at 2.5% on debtors in preparing the financial statements for the year 2014-15.

Subsequently, on a review of the credit period allowed and financial capacity of the customers, the company decides to increase the provision to 8% on debtors as on 31.3.2015. The accounts were not approved by the Board of Directors till the date of decision. While applying the relevant accounting standard, can this revision be considered as an extraordinary item or prior period item ?

Solution

This is a change in accounting estimate. It is not to be considered as an extraordinary item or prior period item.

The provision for bad and doubtful debts has been increased from 2.5% to 8%. The effect of change should be shown in the Profit and Loss Account for the year ending on 31st March, 2015.

Disclosure

Change in estimates are disclosed, except when it is impracticable to estimate the impact and the reasons for non-disclosure should be disclosed.

Changes in Accounting Policies

Users need to be able to compare the financial statements of an enterprise over a period of time in order to identify trends in its financial position, performance and cash flows. Therefore, the same accounting policies are normally adopted for similar events or transactions in each period.

Example : Sita Travels Ltd. is a tour operator, operating 50 luxury buses at present. The company is charging depreciation under Straight Line Method for all buses (AC and non-AC). During the accounting period 2014-15 the company has acquired 10 Volvo buses. It can be assumed that the company will depreciate these new buses under Straight Line Method also.

A change in an accounting policy should be made only if the adoption of a different accounting policy is required by statute or for compliance with an accounting standard or if it is considered that the change would result in a more appropriate presentation of the financial statements of the enterprise.

Example : H Ltd.'s inventory has been accounted for using Last-In-First-Out (LIFO) method. AS—2 (Inventories) does not allow LIFO for valuation of inventory. The company has changed its policy to FIFO in accordance with AS—2.

A more appropriate presentation of events or transactions in the financial statements occurs when the new accounting policy results in more relevant or reliable information about the financial position, performance or cash flows of the enterprise.

Students should note that the following are not changes in accounting policies :

a. the adoption of an accounting policy for events or transactions that differ in substance from previously occurring events or transactions.

Example : Introduction of a formal retirement gratuity scheme by an employer in place of ad-hoc ex-gratia payments to employees on retirement.

b. the adoption of a new accounting policy for events or transactions which did not occur previously or that were immaterial.

Example : X Ltd. is using financial instruments for the first time and apply AS—30. This is not a change in accounting policy.

Disclosure of Change in Accounting Policies

(a) Any change in an accounting policy should be disclosed if it has a material effect.

(b) The impact of change should be shown in the financial statements of the period in which such change is made.

(c) Where the effect of such change is not ascertainable, the fact should be indicated.

(d) If a change is made in the accounting policies which has no material effect on the financial statements for the current period but which is reasonably expected to have a material effect in later periods, the fact of such change should be appropriately disclosed in the period in which the change is adopted.

Example : X Ltd. at present showing buildings at cost in its books of account. At the end of the financial year 2014-15, the company has decided to revalue the buildings (because the price of properties have increased three times in that locality).
The revaluation profit will increase charge for depreciation on buildings in the current and future periods. This change in policy should be appropriately disclosed in the year 2014-15.

A change in accounting policy consequent upon the adoption of an Accounting Standard should be accounted for in accordance with the specific transitional provisions, if any, contained in that Accounting Standard.

Students should note that in many cases it could be difficult to distinguish between a change in accounting policy and a change in an accounting estimate. In such a situation, the change is treated as a change in an accounting estimate.

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each sentence or answer each question below :

1. Profit on sale of old furniture :
   A is an ordinary activity
   B is an extraordinary activity
   C is a prior period item
2. Extraordinary items
   A are both material and expected to occur frequently or regularly
   B are not material and expected not to occur frequently or regularly
   C are both material and expected not to occur frequently or regularly
3. Errors include :
   1. Mathematical mistakes
   2. Mistakes in applying accounting policies
   3. Changes in provisions for bad and doubtful debts
   4. Misinterpretation of facts, or oversight.
   Which of the following is correct ?
   A all four
   B all except 4
   C all except 3
4. Revision of salary with retrospective effect is a
   A change in policy
   B change in accounting estimate
   C prior period item
5. Change in accounting policies
   A should only make the change in the coming period
   B should only make the change in the current period
   C should make the change in the periods reported
6. Change in the method of depreciation will be treated as
   A change in the accounting policy
   B change in the accounting estimate
   C none of the above
7. Revision of estimated useful life of a fixed asset
   A is a change in accounting policy
   B is a change in an accounting estimate
   C none of the above
8. The effect of a change in an accounting estimate should be included in the determination of net profits or losses of the
   A current period only
   B previous periods only
   C current period as well as future periods
9. Accounting estimates are made for
   1. Change in accounting policy
   2. Provision for bad and doubtful debts
   3. Inventory obsolescence
   A all three above
   B all except 1
   C all except 2

Guide to Answers

AS — 6 : Depreciation Accounting (Revised)
[Effective Date : 1st April, 1995]

Introduction

Different fixed assets, for example, buildings, machinery and furnitures are used by an enterprise for different purposes like production, administration, sales and service, etc. Expenditure is made early in the life of the assets for acquiring the assets but benefits are derived throughout their useful life.

When a fixed asset is acquired, it is recorded in the books of account at its acquisition cost and it is capitalised. In each accounting period, a portion of acquisition cost is charged to the Profit and Loss Account as expense. This accounting process of gradually converting the acquisition cost of fixed asset into expense over a series of accounting periods is called ***depreciation***.

Objectives

Depreciation has a significant effect in the preparation of the financial statements of an enterprise. It will influence the profit / loss and value of assets of the enterprise. Different enterprises adopt different accounting policies for depreciation.

The main objective of this accounting standard is to prescribe the ***guidelines for charging depreciation*** for different assets.

Scope

This statement deals with depreciation accounting and applies to all depreciable assets, except the following items to which special considerations apply —

(i) forests, plantations and similar regenerative natural resources;
(ii) wasting assets including expenditure on the exploration for and extraction of minerals, oils, natural gas and similar non-regenerative resources;
(iii) expenditure on research and development;
(iv) goodwill;
(v) live stock.

This statement also does not apply to land unless it has a limited useful life for the enterprise.

Definitions

Depreciation

Depreciation is a measure of the wearing out, consumption or other loss of value of a depreciable asset arising from use, effluxion of time or obsolescence through technology and market changes. Depreciation is allocated so as to charge a fair proportion of the depreciable amount in each accounting period during the expected useful life of the asset. Depreciation includes amortisation of assets whose useful life is predetermined.

Depreciable Assets

Depreciable assets are assets which

(i) are expected to be used during more than one accounting period; and
(ii) have a limited useful life; and
(iii) are held by an enterprise for use in the production or supply of goods and services, for rental to others, or for administrative purposes and not for the purpose of sale in the ordinary course of business.

Useful Life

Useful life is either :

(i) the period over which a depreciable asset is expected to be used by the enterprise; or
(ii) the number of production or similar units expected to be obtained from the use of the asset by the enterprise.

Depreciable Amount

Depreciable amount of a depreciable asset is its historical cost, or other amount substituted for historical cost in the financial statements, less the estimated residual value.

Factors in the Measurement of Depreciation

The amount of depreciation to be charged for a particular fixed asset will depend upon the following three factors :

(i) Cost of the asset
(ii) Useful life of the asset
(iii) Residual value of the asset

Cost of the Asset

The cost of an asset is the basis for calculation of depreciation. For the purpose of determination of cost of an asset, the following points are important as stated in AS—10 "Accounting for Fixed Assets" :

(a) Where an asset is purchased from a supplier: The cost of a fixed asset should comprise its purchase price and any attributable cost of bringing the asset to its working condition for its intended use.

Examples of directly attributable costs are :

(i) site preparation;
(ii) initial delivery and handling costs;
(iii) installation cost, such as special foundations for plant; and
(iv) professional fees, for example, fees of architects and engineers.

(b) Where an asset is self-constructed : The cost of a self-constructed fixed asset should comprise those costs that relate directly to the specific asset and those that are attributable to the construction activity in general and can be allocated to the specific asset.

(c) Where a fixed asset is acquired either in exchange or in part exchange for another asset: The asset acquired should be recorded either :

(i) at its fair value; or
(ii) the net book value of the asset given up, adjusted for any balancing payment or receipt of cash or other consideration.

Useful Life of the Asset

The useful life of an asset is its ***service life*** which can be defined as the number of accounting periods during which it will be useful to the business. The physical life of an asset may be considered longer than its economic life. When the operating cost of an asset is considered to be more than the revenue which it generates, it has exceeded its economic life and should not be kept in use. Since there is no way to measure correctly how long an asset will be useful, the asset's useful economic life is always estimated.

The useful life of a depreciable asset should be estimated after considering the following factors:

(i) expected physical wear and tear;
(ii) obsolescence;
(iii) legal or other limits on the use of the asset, e.g., safety limitation or the expiry dates of assets taken on lease.

Estimation of useful life of the asset is very difficult. It is a matter of judgment and depending on the experience of the enterprise with similar assets. Depreciation will vary directly with the useful life of the asset. If the estimated life is too long, each year's depreciation charge will be less and profits in the periods before disposal will be inflated.

Residual Value of the Asset

Residual value of asset is the estimated value of a fixed asset at the end of its economic life. It is the amount which is expected to be received when the asset is sold after being removed from service. The purpose of estimating residual value is to ascertain the ***depreciable amount*** (acquisition cost – residual value), which is allocated to different accounting periods during which the asset is gainfully employed. Depreciable amount is calculated as under:

Acquisition cost (say)	₹ 11,00,000
Less : Residual Value (say)	₹ 1,00,000
Depreciable Amount	₹ 10,00,000

Example : It is the policy of Sita Travel (P) Ltd. to keep their tourist bus in service for 5 years only. The company has purchased one new tourist bus for ₹ 25,00,000. A similar bus purchased 5 years back can be sold at present for ₹ 5,00,000 (Net). Here ₹ 5,00,000 is a reasonable estimate for the residual value of the new bus.
The depreciable amount will be ₹ 20,00,000 (₹ 25,00,000 – 5,00,000).
Annual depreciation = ₹ 20,00,000 / 5 = ₹ 4,00,000.

Unless the residual value of the asset is guaranteed (e.g., buyback by the manufacturer at a guaranteed amount), the residual value will only be ***estimate*** because of future uncertainties.

In some cases, residual value is insignificant and it is taken as zero for calculating the amount of depreciation.

The higher the residual value, the lower will be the depreciation charge. In effect, the profits of the previous periods will be inflated and there may be a loss on disposal of the asset.

Depreciation Methods

There are several methods of allocating depreciation over the useful life of the assets. Those most commonly employed in industrial and commercial enterprises are the ***straight line*** method and the ***reducing balance*** method. The management of a business selects the most appropriate method(s) based on various important factors e.g., (i) type of asset, (ii) the nature of the use of such asset and (iii) circumstances prevailing in the business. A combination of more than one method is sometimes used. In respect of depreciable assets which do not have material value, depreciation is often allocated fully in the accounting period in which they are acquired.

No particular method is specified by AS—6. However, it has been stated in para 20 that the depreciable amount of a depreciable asset should be allocated on a systematic basis to each accounting period during the useful life of the asset.

1. Straight Line Method

This is the most popular method because of its simplicity and consistency. It requires allocation of an equal amount to each period. The asset is written down in value each year by the same amount. Since this method assumes that the cost of the asset expires at a steady (straight line) function of time, the acquisition cost less residual value is divided by the estimated economic life.

$$\textit{Annual Depreciation} = \frac{\textit{Cost of the Asset} - \textit{Residual Value}}{\textit{Estimated Economic Life}}$$

Example : If a machine costs ₹ 1,20,000 on 1.1.2008, has a residual value at ₹ 20,000 and a life of 10 years, assuming the accounting year ends on 31st December, the depreciation per annum will be :

$$\textit{Depreciation} = \frac{1,20,000 - 20,000}{10} = ₹\ 10,000.$$

2. Reducing Balance Method

Under this method, a fixed rate on the reduced balance of the asset is charged as depreciation every year. Though the percentage at which depreciation is charged remains fixed, the amount of depreciation goes on diminishing.

Example : On 1st January, 2014, X Ltd. purchased a motor car for ₹ 5,00,000. It is the policy of the company to charge depreciation @ 20% p.a. on reducing balance method.

The depreciation will be as follows :

2014 — 20% of ₹ 5,00,000	**₹ 1,00,000**
2015 — 20% of ₹ (5,00,000 – 1,00,000)	**80,000**
2016 — 20% of ₹ (5,00,000 – 1,80,000)	**64,000**
2017 — 20% of ₹ (5,00,000 – 2,44,000)	**51,200**

3. Machine Hour Rate Method / Unit of Production Method

This method of depreciation is suitable for those assets whose life mainly depends upon the usage of the assets. Depreciation is calculated as :

(1) Depreciation per hour $= \dfrac{\text{Cost of the Asset} - \text{Residual Value}}{\text{Effective Working Hours}}$

(2) Depreciation per unit $= \dfrac{\text{Cost of the Asset} - \text{Residual Value}}{\text{Total Estimated Number of Units}}$

Example 1 : 'Dell Laptop - EXP' is estimated to have effective life of 20,000 hours. The cost of the laptop is ₹ 60,000 with no residual value. If the laptop has worked for 2,000 hours in 2012 and 3,000 hours in 2013, then the depreciation will be as follows :

Depreciation per hour $= \dfrac{\text{Cost of the Laptop} - \text{Residual Value}}{\text{Estimated Effective Working Hours}}$

$= \dfrac{60{,}000}{20{,}000} = ₹\ \mathbf{3}$

Depreciation for 2012 = 2000 × ₹ 3 = ₹ 6,000

2013 = 3,000 × ₹ 3 = ₹ 9,000.

Example 2 : Apollo Hospital has purchased a new 'X-Ray' machine for ₹ 5,00,000. It is estimated that 10,000 X-ray plates can be exposed throughout its economic life. The residual value is expected to be ₹ 50,000.

Depreciation per X-Ray plate $= \dfrac{5{,}00{,}000 - 50{,}000}{10{,}000} = ₹\ \mathbf{45}$

Change in the Method of Depreciation

The depreciation method selected should be applied consistently from period to period. A change from one method of providing depreciation to another should be made only if the adoption of the new method is required by statute or for compliance with an accounting standard or if it is considered that the change would result in a more appropriate preparation or presentation of the financial statements of the enterprise. When such a change in the method of depreciation is made, depreciation should be recalculated in accordance with the new method from the date of the asset coming into use.

The deficiency or surplus arising from retrospective recomputation of depreciation in accordance with the new method should be adjusted in the accounts in the year in which the method of depreciation is changed. In case the change in the method results in deficiency in depreciation in respect of past years, the deficiency should be charged in the statement of profit and loss. In case the change in the method results in surplus, the surplus should be credited to the statement of profit and loss. Such a change should be treated as a change in accounting policy and its effect should be quantified and disclosed.

The following points are important :

1. ***The change in the method of depreciation should be treated as a change in accounting policy. Accordingly, depreciation should be recomputed in accordance with the new method from the date of first use of the asset.***
2. ***The deficiency or surplus arising from retrospective recomputation of depreciation in accordance with the new method should be adjusted in the accounts in the year in which the method of depreciation is changed.***
3. ***The deficiency or surplus of depreciation in respect of past years, should be debited or credited to the Profit and Loss Account of the year of change in the method of depreciation.***

Illustration 1

X Co. Ltd. charged depreciation on its assets on SLM basis. For the year ended 31.3.2015, it changed to WDV basis. The impact of the change when computed from the date of the asset coming to use amounts to ₹ 20 lakhs being additional charge.

Decide how it must be disclosed in Profit and Loss Account. Also discuss, when such change in method of depreciation can be adopted by an enterprise as per AS—6.

Solution

Para 21 of AS—6 states that in case the change in the method results in deficiency in depreciation in respect of past years, the deficiency should be charged to the Statement of Profit and Loss.

Here, ₹ 20 lakhs should be charged to the Profit and Loss Account for the year ended on 31st March, 2015.

An enterprise may change the method of depreciation only under the following conditions :

(a) the change is required by a statute or an Accounting Standard;
(b) the change would produce a more appropriate presentation.

Illustration 2

Ram Co. (P) Ltd. furnishes you the following information for the year ended 31.3.2015 : (₹ in lakhs)

(i)	Depreciation for the year ended 31.3.2015 (under SLM)	100
(ii)	Depreciation for the year ended 31.3.2015 (under WDV)	200
(iii)	Excess of depreciation for the earlier years calculated under WDV over SLM	500

The company wants to change its method of charging depreciation from straight line method to written down value method.

Decide how the depreciation should be disclosed in the financial statement for the year ended 31.3.2015.

Solution

Para 21 of AS—6 states that

"When such a change in the method of depreciation is made, depreciation should be recalculated in accordance with the new method from the date of the asset coming into use. The deficiency or surplus arising from retrospective recomputation of depreciation in accordance with the new method should be adjusted in the accounts in the year in which the method of depreciation is changed. In case the change in the method results in deficiency in depreciation in respect of past years, the deficiency should be charged in the statement of profit and loss. In case the change in the method results in surplus, the surplus should be credited to the statement of profit and loss. Such a change should be treated as a change in accounting policy and its effect should be quantified and disclosed."

In this case, the deficiency of ₹ 500 lakhs would be charged to the Profit and Loss Account for the year ending on 31st March, 2015.

In the notes to account the reasons for change in the method of depreciation is to be elaborated. The effect of ₹ 500 lakhs is also to be disclosed. Current year's depreciation of ₹ 200 lakhs is to be charged to Profit and Loss Account for the year ended 31st March, 2015.

Illustration 3

A plant was depreciated under two different methods as under :

Year	SLM (₹ in Lakhs)	WDV (₹ in Lakhs)
1	7.80	21.38
2	7.80	15.80
3	7.80	11.68
4	7.80	8.64
	31.20	57.50
5	7.80	6.38

What should be the amount of resultant surplus / deficiency, if the company decides to switch over from W.D.V. method to S.L.M. method for first four years ? Also state, how will you treat the same in accounts.

Solution

Here, in this case, there is a surplus of ₹ 26.30 lakhs (57.50 – 31.20) on account of change in the method of depreciation.

As per para 21 of AS—6, when a change in the method of depreciation is made, depreciation should be recalculated in accordance with the new method from the date of the asset coming into use. The surplus arising from retrospective recomputation of depreciation in accordance with the new method should be credited to the statement of profit and loss. Such a change should be treated as a change in accounting policy and its effect should be quantified and disclosed.

Therefore, the surplus of ₹ 26.30 lakhs will be ***credited*** to Profit and Loss Account.

Revision of the Estimated Useful Life

The useful lives of major depreciable assets or classes of depreciable assets may be reviewed periodically. Where there is a revision of the estimated useful life of an asset, the ***unamortised depreciable amount*** should be charged over the ***revised remaining useful life***.

Illustration 4

On 1.4.2012, ABC Limited purchased plant and machinery worth ₹ 20,00,000, useful life being 8 years. Till the year ended 31.3.2015, the amount of accumulated depreciation on this plant and machinery was ₹ 8,00,000. The remaining useful life of the plant and machinery was reviewed during 2015-16, which was estimated at 2 years due to wear and tear. Calculate the amount of depreciation to be charged from the year 2015-16 onwards.

Solution

Here, in this case, the unamortised depreciable amount is ₹ (20,00,000 – 8,00,000) = ₹ 12,00,000 and the revised remaining useful life is 2 years. Therefore, the amount of depreciation to be charged from the year 2015-16 onwards is ₹ 12,00,000 / 2 = ₹ 6,00,000 p.a.

Depreciation on Addition or Extention of the Asset

Any addition or extension which becomes an integral part of the existing asset should be depreciated over the remaining useful life of that asset. The depreciation on such addition or extension may also be provided at the rate applied to the existing asset. Where an addition or extension retains a separate identity and is capable of being used after the existing asset is disposed of, depreciation should be provided independently on the basis of an estimate of its own useful life.

Example : ACC Ltd. has installed a conveyor belt system for material handling at its 25 years old cement plant. The cost of the entire conveyor belt unit is ₹ 20,00,000 and its useful life is 10 years without any residual value. However, the remaining life of the principal plant is 5 years.
The conveyor belt unit should be recognised as an item of fixed asset separate from principal plant. It will be depreciated over its useful life, i.e., 10 years. However, if the 'conveyor belt' cannot be used separately, its useful life will terminate with the life of the principal plant, i.e., 5 years. The entire amount of ₹ 20,00,000 is to be depreciated in 5 years.

Illustration 5

On 1.4.2015, the value of X Limited's plant and machinery was ₹ 1,000 lakhs. The company provided depreciation @ 15% p.a. under Reducing Balance Method. It was found that about ₹ 150 lakhs of imported asset, which is the component of plant and machinery acquired on 1.4.2013, would be obsolete in 3 years. Accordingly, X Limited wants to write off this asset over 3 years. Can the company do so as per AS–6?

Solution

As per para 24 of AS–6, any addition or extention which becomes an integral part of the existing asset should be depreciated **over the remaining useful life of that asset**. The depreciation on such addition or extention may also be provided at the rate applied to the existing asset. Where an addition or extention retains a separate identity and is **capable of being used after the existing asset is disposed of**, depreciation should be provided **independently** on the basis of an estimate of its own useful life.

Therefore, in this case, the company can write off the asset in 3 years, since the asset has independent useful life.

Change in the Historical Cost

Where the historical cost of a depreciable asset has undergone a change due to increase or decrease in long term liability on account of exchange fluctuations, price adjustments, changes in duties or similar factors, the depreciation on the revised unamortised depreciable amount should be provided ***prospectively*** over the residual useful life of the asset.

Illustration 6

ABC Ltd. purchased an imported Printing Machinery from Germany for ₹ 20,00,000 on 1.4.2009. The life of the machine is 10 years without any residual value. The company followed straight line method of depreciation. During 2013-14 due to change in foreign exchange rate the amount of unpaid liability increased by ₹ 3,00,000.

Calculate amount of depreciation to be charged for the year 2013-14 and onwards.

Solution

		₹
Cost of the printing machinery		20,00,000
Less: Depreciation under SLM :		
2009-10	2,00,000	
2010-11	2,00,000	
2011-12	2,00,000	
2012-13	2,00,000	8,00,000
Unamortised depreciable amount on 1.4.2013		12,00,000
Add: Increase in liability for change in foreign exchange		3,00,000
Revised depreciable amount		15,00,000

Depreciation for the year 2013-14 and onwards :

$$\text{Depreciation p.a. - } \frac{15,00,000}{(10 - 4)} = ₹\ 2,50,000$$

Depreciation of Revalued Assets

Where the depreciable assets are revalued, the provision for depreciation should be based on the revalued amount and on the estimate of the remaining useful lives of such assets. In case the revaluation has a material effect on the amount of depreciation, the same should be disclosed separately in the year in which revaluation is carried out.

Illustration 7

A Ltd acquired a building on 1st January, 1997 at a cost of ₹ 6,40,000. The useful life of the building was estimated as 50 years and depreciation is provided on a straight line basis. The building was revalued on 30th June 2014 for ₹ 16,80,000 and the revaluation incorporated in the accounts. Assuming no change made to the remaining useful life. You are required to calculate : (i) the surplus on revaluation; (ii) depreciation to be charged in the Profit and Loss Account of 2014.

Solution

(i) Surplus on Revaluation

	₹
Revaluation at 30th June, 2014	16,80,000
Net book value at 30th June, 2014 (Note 1)	4,16,000
Surplus	12,64,000

This surplus of ₹ 12,64,000 should be credited directly to owners' interests under the heading of Revaluation Reserve as per the requirement of AS—10 Para 30.

(ii) Depreciation Charged in the Profit and Loss Account of 2014

Here, it should be noted that upto 30.6.2014 depreciation will be calculated on original value and from 1.7.2014 it is to be calculated on revalued value.

	₹
(a) On historical cost (upto 30.6.2014) — $\frac{6,40,000}{50} \times \frac{1}{2}$	6,400
(b) On revalued amount (1.7.2014 to 31.12.2014) — $\frac{16,80,000}{32\frac{1}{2}} \times \frac{1}{2}$	25,846
Total	32,246

Working Note :

(1) Net Book Value on 30th June, 2014

	₹
Original cost on 1.1.1997	6,40,000
Less: Depreciation for 17.5 years (₹ 6,40,000 / 50 × 17.5)	2,24,000
	4,16,000

Disclosure

1. If any depreciable asset is disposed of, discarded or destroyed, the net surplus or deficiency, if material, should be disclosed separately.
2. The following information should be disclosed in the financial statements:
   (i) the historical cost or other amount substituted for historical cost of each class of depreciable assets;
   (ii) total depreciation for the period for each class of assets; and
   (iii) the related accumulated depreciation.
3. The following information should also be disclosed in the financial statements alongwith the disclosure of other accounting policies:
   (i) depreciation methods used; and
   (ii) depreciation rates or the useful lives of the assets, if they are different from the principal rates specified in the statute governing the enterprise.

OBJECTIVE TYPE QUESTIONS

Multiple Choice

Select the best choice to complete each sentence or answer each question below :

1. AS—6 deals with depreciation accounting and applies to all depreciable assets, except :
   A assets used for administrative purposes
   B assets used for sales and service
   C wasting assets
2. Depreciable assets are assets which
   A have unlimited useful life, e.g., land
   B have a limited useful life, e.g., furniture
   C are expected to be used not for more than one year
3. Residual value is specifically
   A scrap value
   B the estimated value of a fixed asset at the end of its economic life
   C the estimated value of a fixed asset at the end of its physical life

4. The useful life of an asset is :
   A its service life
   B its physical life
   C none of the above
5. Which of the following statement is **not** correct ?
   A depreciation will vary directly with the useful life of the asset
   B the higher the residual value, the lower will be the depreciation charge
   C the higher the residual value, the higher will be the depreciation
6. Repairs and maintenance costs are :
   A normally capitalised
   B expensed in the profit and loss account as incurred
   C recorded as deferred expenses
7. Which of the following statement is correct in relation to AS—6 ?
   A only straight line method can be adopted for calculation of depreciation
   B only reducing balance method can be adopted for calculation of depreciation
   C no particular method has been specified for calculation of depreciation
8. Which of the following statement is correct in relation to AS—6 ?
   A the change in the method of depreciation should be treated as a change in estimate
   B the change in the method to depreciation should be treated as change in accounting policy but the depreciation should be computed in accordance with the new method from the date of change in the method of depreciation
   C the change in the method of depreciation should be treated as change in accounting policy but the depreciation should be recomputed in accordance with the new method from the date of first use of the asset
9. The cost of a fixed asset should comprise :
   (i) its purchase price
   (ii) any attributable cost of bringing the asset to its working condition for intended use
   (iii) overhead of purchase department relating to the purchase of asset
   Which of the following is correct ?
   A (i) only **B** (i) and (ii) only **C** (i), (ii) and (iii)
10. Depreciation charges for a period are recorded
   A only in the Profit and Loss Account
   B only in the Balance Sheet
   C in the Profit and Loss Account or as part of the Cost of another asset (such as inventory).

AS — 7 : Accounting for Construction Contracts (Revised)
[Effective Date : 1st April, 2003]

Introduction

AS—7 deals with accounting for construction contract in the financial statements of the contractor. It also applies to enterprises undertaking construction activities on their own account (not as contractors) as a venture of a commercial nature where the enterprises have entered into agreement for sale.

In many cases, contracts can span for more than one accounting year and this creates some dilemma.

The question which arises are :

(i) how much revenue should be included in the Profit and Loss Account ?
(ii) how much should be charged for related costs ?
(iii) how much profit should be recognised in the current period in respect of a particular contract ?

AS—7 prescribe the accounting treatment for the above matters.

Meaning of Some Important Terms

Fixed Price Contract

In this type of contract, price is usually fixed and agreed upon in advance. Generally, tenders are invited, giving details of the contract, to fix up the contract price. As per agreement between the parties, any additional work may be charged separately. There may be a provision in the agreement to allow the contractor to pass to the contractee additional costs incurred due to price rise of materials or wages, awards, etc.

Cost Plus Contract

Cost plus contract is a contract in which price is not agreed upon in advance for one reason or other. This type of contract is entered into when it is impossible to calculate future price or cost with reasonable accuracy because of lack of past records and experience or because of particular circumstances, for example, digging of an oil well. The contract price is ascertained later by adding a fixed percentage of profit to the total cost of the contract. The different items of expenditure to be considered for ascertaining cost of the contract are agreed upon in advance.

Scope

Construction contracts include :

(i) Services related to the construction, such as project managers and architects.
(ii) Contracts for destruction, or restoration, of assets and the restoration of the environment.

Example 1 : L&T Ltd. has received a contract for the construction of a bridge over Hooghly river near Kolkata. For the construction of the new bridge, the old existing bridge is to be demolished. This demolition is a part of the bridge contract.
Example 2 : Your company HRBC Ltd. is constructing a new 6 lane highway on behalf of Highway Authority of India. A clause in the contract requires that on both the sides of the highway, three rows of trees are to be planted at the cost of the company. This is a part of the highway contract.

Combining and Segmenting Construction Contracts

When a contract covers more than a single asset, the construction of each asset should be treated as a separate contract when :

(i) separate proposals have been submitted for each asset;
(ii) separate negotiation for each asset and each party has the right to reject the part of the contract
(iii) costs and revenue of each asset can be measured.

Example : Jindal Steel Co. Ltd. is putting a new steel plant in West Bengal. L&T Ltd., the contractor has submitted three separate bids for the following :

(a) Blast Furnace ₹ 600 crore
(b) Captive Power Plant ₹ 100 crore
(c) Conveyor Belt ₹ 20 crore.

Each one of the above should be treated as a separate contract.

A group of contracts, with one client or more, should be treated as a single contract when :

(i) the contracts were signed as a single package;
(ii) the contracts are in essence part of a single project with the overall profit margin.
(iii) the contracts are executed concurrently or in a continuous sequence.

For example : Simplex Ltd. has received a contract from West Bengal Industrial Development Corporation Ltd. for the design, development and construction of a IT Park in Siliguri, West Bengal. Contract includes the construction of :

(a) Buildings for IT companies;
(b) Common Conference Hall;
(c) Food Court;
(d) Swimming Pool;
(e) Gymnasium, etc.

All the contracts are covered under a master contract. For accounting purposes, Simplex Ltd. should treat all contracts as a single contract.

Contract Revenue

Contract revenue should comprise the following :

(i) The amount of revenue agreed by the contractee initially.
(ii) Variation in contract work, claims and incentive payments.
(These are included in the revenue if there is a chance that they will result in revenue and are capable of being reliably measured).

For various reasons, such as cost escalation clauses, claims, penalties, etc., contract revenue could be increased or decreased from one period to next.

Variation in Contract Work

Contract variation may change the scope of the contract and in return the revenue of the contract will also be changed.

For example : Your company Modern Road Construction Company Ltd. has received a contract for converting a two lane road into four lane road through the city. Public is protesting for demolition of unauthorised construction of two sides of the present road. It is becoming a political issue. Now the Municipal Corporation has decided that a flyover will be constructed to solve the problem. The contract would be revised accordingly along with the revenue.

Claims

In some cases, contractor claims extra money from the client for cost not included in the original contract. It might so happen because of some unforeseen events which is beyond the control of the client.

For example : HCC Ltd. has received a contract from Tata Motors Ltd. for the construction of factory buildings. The work was held up for two months for protest by the farmers.
This may be the basis for a claim.
Now, Tata Motors may raise some objection, so claim should be included in the project revenue only when the amount of claim that is likely to be received can be reliably determined.

Incentive Payments

There may be a clause in a contract that bonus will be given to the contractor for early completion of the project.

When a project is completed before the planned date, the contractor is entitled to get extra money as bonus. They are included in the contract revenue when it can be measured reliably.

Contract Cost

Costs incurred by a contractor can be divided into:

(i) Costs that relate directly to a specific contract;
(ii) Costs that can be attributed to the contract activity in general and can be allocated to specific contracts;
(iii) Costs that relate to the activities of the contractor generally, or that relate to contract activity but cannot be related to specific contracts.

Direct Cost

Costs relating specifically to the contract include :

(i) site labour costs, including supervision;
(ii) materials used for project construction;
(iii) depreciation of plant and equipment required for a contract;
(iv) costs of moving plant and equipment to and from a site;
(v) hiring cost of special plant and equipment;
(vi) consultancy fees that directly relate to the contract;
(vii) contract design cost;
(viii) rectification, guarantee, and expected warranty cost;
(ix) claim from third parties.

Common Cost

Costs that can be attributed to the contract activity in general and can be allocated to specific contracts include the following :

(i) Insurance
(ii) Construction overheads
(iii) Design and technical assistance from central office.

It should be noted that incidental income (e.g., sale of scrap, surplus materials, sale of equipment and plant at the end of the contract) will reduce the contract cost.

Cost Not to be Included

Costs not specifically attributable to any contract incurred by the contractor before a contract is secured will be treated as general overhead and charged to the Profit and Loss Account of the concerned period. Other expenses which will not be treated as contract costs are :

(a) general administration costs;
(b) selling cost;
(c) finance cost;
(d) research and development cost.

Recognition of Contract Revenue and Expenses

In order to estimate an appropriate part of revenue and cost (expense) to be included in the Profit and Loss Account, any of the following two methods can be adopted according to situations :

(i) Percentage of Completion Method
(ii) Completed Contract Method

When a contractor uses a particular method of accounting for a contract then the same method should be adopted for all other contracts which meet similar criteria.

Percentage of Completion Method

Under the percentage of completion method, the amount of revenue recognised is determined by reference to the stage of completion of the contract activity at the end of each accounting period.

For calculating stage of completion, any of the following methods can be adopted by the contractor. The methods are :

(1) the proportion that ***cost incurred to date*** bear to the ***estimated total cost of the contract***. Alternatively, it can be expressed as follows :

$$\frac{\text{Cost incurred for the work up to date}}{\text{Estimated Total Cost}} \times 100$$

Example : Your company X Ltd. has received a contract for construction of a fly over in Delhi. The contract price is ₹ 200 crore and estimated cost is ₹ 160 crore. The company has incurred cost so far worth ₹ 80 crore.

The percentage of completion = $\frac{80 \text{ crore}}{160 \text{ crore}} \times 100 = 50\%$.

(2) ***Surveys of the work done*** : In this case, client's surveyor or independent surveyor survey the progress of the work and issue certificate accordingly.

Example : GMR Ltd. is constructing a stadium at Delhi. The Delhi Government surveyors have confirmed that 40% of the work is completed and recommend payment for the work.

(3) ***Completion of a physical portion of the work*** : Stage of completion can be calculated on the basis of physical completion of the work.

Example : Your company H Ltd has received a contract for building of 150 km, 6 lane highway. Out of 150 km, 100 km has been completed in all respect.

The percentage of completion = $\frac{100 \text{ km}}{150 \text{ km}} \times 100 = 66.67\%$.

The following points are important in respect of above discussion:
(i) Cost to be incurred relating to future work on the contract should not be included in the calculation.
(ii) Progress payments and advanced received from clients often do not reflect the work done.

Under this method '***Contract Revenue***' is recognised as :

Year

1 (Total contract revenue × % of completion) = Revenue to be recognised at the end of 1st year.

2 (Total contract revenue × % of completion) **–** Revenue recognised in the year 1
= Revenue to be recognised at the end of 2nd year.

3 (Total contract revenue × % of completion) **–** Revenue recognised in the year 1 and 2
= Revenue to be recognised at the end of 3rd year.

Illustration 1

GMR Infrastructure Ltd. has the following details of a contract that started in 2011.

(i) Contract Value ₹ 10,00,000.

(ii) Percentage of completion :
2012 — 40%;
2013 — 60%;
2014 — 80%.

Calculate the amount of revenue to be recognised in the Profit and Loss Account of 2012, 2013 and 2014.

Solution **Revenue to be Recognised**

Particulars	2012 (₹)	2013 (₹)	2014 (₹)
2012 : 40% of ₹ 10,00,000	4,00,000	—	—
2013 : 60% of ₹ 10,00,000	—	6,00,000	—
2014 : 80% of ₹ 10,00,000	—	—	8,00,000
Less: Revenue recognised in prior periods	—	(4,00,000)	(6,00,000)
Revenue for the period	4,00,000	2,00,000	2,00,000

Note : ***In the Profit and Loss Account, contract revenue is recorded only once. If the contract span is 3 years, we must deduct any contract revenues previously recognised.***

Illustration 2

Mr. X as a contractor has just entered into a contract with a local municipal body for building a flyover. As per the contract terms, X will receive an additional ₹ 2 crores if the construction of the flyover were to be finished within a period of two years of the commencement of the contract. Mr. X wants to recognise this revenue since in the past he has been able to meet similar targets very easily.

Solution

AS—7: "Accounting for Construction Contract" states that incentive payments should be included in contract revenue if the following conditions are satisfied :

(i) the contract is sufficiently advanced and it is probable that the specified performance will be met or exceeded; and

(ii) the amount of the incentive payment can be measured reliably.

In this case, the contract has not even begun and hence Mr. X (the contractor) ***should not recognise any revenue of this contract.***

Applicability of Percentage of Completion Method

The percentage of completion method can be used if the ***outcome*** of the contract can be ***reliably estimated.***

(a) In case of fixed price contracts, this degree of reliability would be provided if the following conditions are satisfied :

   (i) total contract revenues to be received can be reliably estimated;

   (ii) both the costs to complete the contract and the stage of contract performance completed at the reporting date can be reasonably estimated; and

   (iii) the cost attributable to the contract can be clearly identified so that actual expenses can be compared with the prior estimates.

(b) In the case of cost plus contracts this degree of reliability would be provided only if both the following conditions are satisfied :

   (i) cost attributable to the contract can be clearly identified; and

   (ii) costs other than those which are specifically reimbursable under the contract, can be reliably estimated.

Completed Contract Method

Under completed contract method, the recognition of revenue is based on results as determined when the contract is completed or substantially completed.

The main advantage of this method is that the risk of recognising profits that may not have been earned is therefore minimised.

The principal disadvantage of the completed contract method is that periodic reported income does not reflect the level of activity on contracts during the period. For example, when a few large contracts are completed in one accounting period but no contracts have been completed in the previous period or are to be completed in the subsequent period, the level of reported income can be erratic although the level of activity on contracts may have been relatively constant throughout. Even when numerous contracts are regularly completed in each accounting period, and reported income may appear to reflect the level of activity on contracts, there is a continuous lag between the time when work is performed and the related revenue is recognised.

It should be mentioned here that this method is not suitable for long-term contracts. This method is suitable for those contracts which are started and completed within the accounting period.

Recognition of Profits

(a) Profit in case of fixed price contracts normally should not be recognised unless the work on contract has progressed to a ***reasonable extent***. Ordinarily, this test is not considered as having been satisfied unless 20% to 35% of the work is completed.

(b) While recognising the profit under percentage of completion method an appropriate allowance for future unforeseeable factors should be made on either a specific or a percentage basis.

Outcome of the Contract

When the outcome of a contract cannot be estimated the following ***rules must be observed*** :

(1) No profit is to be recognised, though an expected loss should be recognised immediately.
(2) Revenue should be recognised only to the extent of contract costs incurred.
(3) Costs should be recognised in the period in which they are incurred.

Uncertainty over the outcome of the contract may arise from any of the following events :

(a) Financial difficulty of the client

Example : Your company RCC Ltd. has completed 80% work of the new office building of its client R. Securities Ltd. Last installment of payment has not been received from the client. It is the apprehension of the management of RCC Ltd. that this client is in financial trouble and the contract is at risk.

(b) Disputes on reimbursement of costs

Example : Your company Unitech Ltd. is constructing a shopping mall for RPG Ltd. Government officials of fire department is asking for additional fire safety features. Your company has submitted a variation proposals to RPG Ltd. They are not ready to bear the additional cost on the ground that it is contractor's cost.

(c) Anticipated failure to complete the contract in time

Example : Your company L&T Ltd. is executing a 100 km. highway project in Madhya Pradesh. Company's original plan was to work in night shift also. Because of 'Naxalite' problem no night shift work is possible. The management of the company is apprehending that the project will not be completed within the contract period.

Recognition of Foreseeable Losses

A foreseeable loss on the entire contract should be provided for in the financial statements irrespective of:

(i) Whether or not work has started on the contract

Example : Your company X Ltd. has been awarded a contract by HPC Ltd. for building a chemical factory at Haldia, West Bengal. Staff, machinery and materials have been transported to the site. Farmers are protesting for acquisition of farm land. There is no sign of settlement of disputes. The client offers another site, but for the same contract price.
If alternative site is accepted, it will reduce loss, but not eliminate it.
X Ltd. should recognise the loss up to date immediately.

(ii) The stage of completion of the contract or
(iii) The amount of profits expected to arise from other contracts

Example : Your company Simplex Ltd. is constructing 3 shopping malls for RIL at Kolkata, Howrah and Jamshedpur. The company's project at Jamshedpur is hit by labour problems. The company will have to incur extra labour costs and penalties are to be paid for late completion. The management of the company is estimating that there will be a loss of ₹ 50,00,000 in Jamshedpur project but there will be profits in Kolkata and Howrah project of ₹ 2 crore each.
Simplex Ltd. must still recognise the loss on the Jamshedpur project immediately.

Illustration 3

A company took a construction contract for ₹ 100 lakhs in January 2013. It was found that 80% of the contract was completed at a cost of ₹ 92 lakhs on the closing date, i.e., on 31.3.2014. The company estimates further expenditure of ₹ 23 lakhs for completing the contract. The expected loss would be ₹ 15 lakhs. Can the company recognise the loss in the financial statements prepared for the year ended 31st March, 2014 ?

Solution

	₹
Cost upto 31.3.2014	92 Lakhs
Add: Cost to be incurred	23 Lakhs
	115 Lakhs
Less: Contract Price	100 Lakhs
Loss	15 Lakhs

Here, the company should recognise the loss of ₹ 15 lakhs in the Profit and Loss Account for the year ending on 31.3.2014.

Illustration 4

On 1st December, 2013, Viswakarma Construction Company Ltd undertook a contract to construct a building for ₹ 85 lakhs. On 31st March, 2014 the company found that it had already spent ₹ 64,99,000 on the construction. Prudent estimate of the additional cost for completion was ₹ 32,01,000. What is the additional provision for foreseeable loss which must be made in the final accounts for the year ended 31st March 2014 as per provision of the AS7 on "Accounting for Construction Contracts"?

Solution

As per para 35 of AS–7, when it is probable that total contract costs will exceed total contract revenue, the expected loss should be recognised as an expense immediately.

Here, in the present case, the contract price is ₹ 85 lakhs whereas the costs incurred and costs to be incurred to complete the contract comes to ₹ 97 lakhs (₹ 64.99 lakhs + 32.01 lakhs). Therefore, the probable loss is ₹ 12 lakhs (₹ 97 lakhs – ₹ 85 lakhs). As per the requirement of the AS–7, the company should recognise the ***entire loss of ₹ 12 lakhs*** in the current accounting year.

Illustration 5

Sagar Limited belongs to the engineering industry. The Chief Accountant has prepared the draft accounts for the year ended 31.3.2014. You are required to advise the company on the following items from the viewpoint of finalisation of accounts, taking note of the mandatory accounting standards:

The company undertook a contract for building a crane for ₹ 10 lakhs. As on 31.3.2014, it incurred a cost of ₹ 1.5 lakhs and expects that there will be ₹ 9 lakhs more for completing the crane. It has received so far ₹ 1 lakh as progress payment.

Solution

As per para 35 of AS–7 when it is probable that total contract costs will exceed total contract revenue, the expected loss should be recognised as an expense immediately.

Here, in this case, total contract estimated cost is ₹ 10.5 lakhs (₹ 1.5 lakhs + ₹ 9 lakhs), whereas the contract price is ₹ 10 lakhs. Therefore, it is probable that total contract costs will exceed total contract revenue.

As per the requirements of the standard, the foreseeable loss of ₹ 50,000 ***should be recognised as an expense*** in the financial statements of 2013-14.

Illustration 6

A firm of contractors obtained a contract for completion of bridges across river Revathi. The following details are available in the records kept for the year ended 31st March, 2014: (₹ in Lakhs)

Total contract price	1,000
Work certified	500
Work not certified	105
Estimated further cost to completion	495
Progress payment received	400
Progress payment to be received	140

The firm seeks your advice and assistance in the presentation of accounts keeping in view the requirements of AS7 "Accounting for Construction Contracts". ***[C.A. — Adapted]***

Solution

Here, in this case, the total contract costs exceed total contract revenue. Therefore, there is a foreseeable loss, which is calculated as under:

		₹ in Lakhs
Contract price		1,000
Less: Total contract cost — Incurred (500 + 105)	605	
To be incurred	495	1,100
Anticipated loss on contract		(100)

Calculation of Stage of Completion	₹ in Lakhs
Work certified	500
Work uncertified	105
	605

Therefore, the percentage of completion of contract is : 605/1100 × 100 = 55%.

Amount of contract revenue to be recognised	₹ in Lakhs
55% of contract value	550
Less: Cost incurred to date to complete 55% of contract value	605
Loss to be recognised	55

As per para 35 of AS–7, when it is probable that total contract costs will exceed total contract revenue, the expected loss should be recognised as an expense immediately. Therefore, the total loss of ₹ 100 lakhs is to be recognised (₹ 55 lakhs current loss and ₹ 45 lakhs anticipated future loss) as an expense in the financial statements during 2013-14.

Disclosure

There should be disclosure in the financial statements of

i. the amount of construction work-in-progress;
ii. progress payments received and advances and retentions on account of contracts included in construction work-in-progress; and
iii. the amount receivable in respect of income accrued under cost plus contracts not included in construction work-in-progress.

If both the percentage of completion method and the completed contract method are simultaneously used by the contractor the amount of contract work described in (i) above should be analysed to disclose separately the amounts attributable to contracts accounted for under each method.

Disclosure of changes in an accounting policy used for construction contracts should be made in the financial statements giving the effect of the change and its amount. However if a contractor changes from the percentage of completion method to the completed contract method for contracts in progress at the beginning of the year it may not be possible to quantify the effect of the change. In such cases disclosure should be made of the amount of attributable profits reported in prior years in respect of contracts in progress at the beginning of the accounting period.

OBJECTIVE TYPE QUESTIONS

Multiple Choice

Select the best choice to complete each sentence or answer each question below :

1. Cost-plus contract is a contract in which price is
   A agreed upon in advance
   B not agreed upon in advance
   C agreed upon in advance but subject to change in future
2. Contract revenue should comprise
   A all cash flows
   B initial revenue agreed *plus* variations, claims and incentive payments and proceeds from sale of scrap
   C initial revenue agreed, plus variations, claims and incentive payments
3. Incidental income, such as from the sale of scrap income, should be shown as
   A contract revenue
   B deduction from cost
   C other income in the profit and loss account
4. A foreseeable loss on the entire contract should be
   A recognised at the end of the contract
   B recognised immediately
   C spread over the remaining period of the contract
5. When the outcome of a contract cannot be estimated
   A a portion of the revenue may be recognised
   B revenue should not be recognised
   C all revenues can be recognised

Guide to Answers

1. B 2. C 3. B 4. B 5. A.

AS–9 "Revenue Recognition" — See Chapter 13.

AS — 10 : Accounting for Fixed Assets
[Effective Date : 1st April, 1991]

Introduction

Fixed assets represent a significant portion of the total assets of an enterprise. In some industries like iron and steel, oil refinery etc., fixed assets consist of 70% to 80% of the total assets. Therefore, fixed assets are very important in the presentation and preparation of financial statements. Furthermore, the operating profits of an enterprise will depend upon whether an expenditure represents an asset or an expense.

This statement deals with accounting for fixed assets. Generally, fixed assets are grouped into various categories, e.g., land, building, plant and machinery, furniture and fixtures, vehicles, patents, trade marks, etc.

Objectives

The main objectives of this statement are :

(a) the recognition of the fixed assets; and

(b) determining their carrying amounts.

Scope

1. This statement does not deal with accounting for the following items to which special considerations apply :
   (a) forests, plantations and similar regenerative natural resources;
   (b) wasting assets including mineral rights, expenditure on the exploration for and extraction of minerals, oil, natural gas and similar non-generative resources;
   (c) expenditure on real estate development; and
   (d) livestock.

Expenditure on individual items of fixed assets used to develop or maintain the activities covered in (a) to (d) above, but separable from those activities, are to be accounted for in accordance with this statement.

Example : Irrigation equipments used for plantation are to be accounted for in accordance with this statement, though plantations is outside the scope of this statement.

2. This statement does not deal with the ***accounting for depreciation*** of the fixed assets.
3. This statement does not deal with the ***treatment of government grants and subsidies*** and assets under ***leasing rights***.

Definitions

Fixed Assets

Fixed asset is an asset held with the intention of being used for the purpose of producing or providing goods or services and is ***not held for sale*** in the normal course of business.

Fair Market Value

Fair market value is the price that would be agreed in an open and unrestricted market between knowledgeable and willing parties dealing at arm's length who are fully informed and are not under any compulsion to transact.

Gross Book Value

Gross book value of a fixed asset is its historical cost or other amount substituted for historical cost in the books of account or financial statements. When this amount is shown net of accumulated depreciation, it is termed as ***net book value***.

Identification of Fixed Assets

An asset will be accounted for as a ***fixed asset*** if the following conditions are satisfied :

(a) It is held with the intention of being used for the purpose of producing or providing goods and services; and

(b) It is not held for sale in the normal course of business.

In some cases, an enterprise may treat an item as expense though it would otherwise be classified as fixed asset.

It is done because the amount of the expenditure is not material.

Example : Saraswati Printers (P) Ltd purchased a punching machine for ₹ 500. Life of the punching machine is 5 years. As the amount of expenditure is small, it can be treated as an expense instead of recording it as a fixed asset.

It should be noted that the Standard permits the aggregation of individually insignificant items, such as tools, modules and dies, as one fixed asset.

Stand-by Equipment and Servicing Equipment

Stand-by equipment and servicing equipment are accounted for as fixed assets.

Example : Factory washing machine and stand-by generator are fixed assets.

Spare Parts

Regularly used spare parts are usually carried as inventory. It is charged to Profit and Loss Account when consumed.

However, if spare parts can only be used in connection with an item of fixed asset and their use is expected to be irregular, they are accounted for as ***fixed assets***. They are depreciated on a systematic basis over the useful life of the ***principal fixed asset***.

Component Accounting

In certain circumstances, the accounting for an item of fixed asset should be done on the basis of its ***separable components***, if

(a) they are in practice separable;

(b) their useful lives are different.

Example : Instead of treating an aircraft and its engines as one unit, it will be better to treat engines and aircraft as separate units. The useful life of engines are usually shorter than that of the aircraft. It should be noted that separate recognition will lead to better estimation of depreciation.

Components of Cost

The cost of an item of fixed assets comprises its purchase price, including import duties and other non-refund-able taxes of levies and any directly attributable cost of bringing the asset to its working condition for its intended use; any trade discounts and rebates are deducted in arriving at the purchase price.

Examples of directly attributable costs are:

(i) site preparation;

(ii) initial delivery and handling costs;

(iii) installation cost, such as special foundations for plant; and

(iv) professional fees, for example fees of architects and engineers.

The cost of a fixed asset may undergo changes subsequent to its acquisition or construction on account of exchange fluctuations, price adjustments, changes in duties or similar factors.

Modvat Credit

Modvat credit is a refund of excise duty. Modvat credit is deducted from the cost of the fixed asset provided certain conditions are satisfied.

Start-up and Commissioning Costs

The expenditure incurred on start-up and commissioning of the project, including the expenditure incurred on test runs and experimental production, is usually capitalised as an indirect element of the construction cost. However, the expenditure incurred after the plant has begun commercial production, i.e. production intended for sale or captive consumption, is not capitalised and is treated as revenue expenditure even though the contract may stipulate that the plant will not be finally taken over until after the satisfactory completion of the guarantee period.

Illustration 1

A company is in the process of setting up a production line for manufacturing a new product. Based on trial runs conducted by the company, it was noticed that the production lines output was not of the desired quality. However, the company has taken a decision to manufacture and sell the sub-standard product over the next one year due to the huge investment involved.

In the background of the relevant accounting standard, advice the company on the cut-off date for capitalisation of the project cost.

Solution

The cut-off date for capitalisation of the project cost would be the date when the ***trial run was completed***. Here, the company has taken a decision to manufacture and sell the sub-standard product over the next one year due to huge investment involved. Any loss incurred on sale of sub-standard product will not be capitalised but to be charged to Profit and Loss Account.

Compensation from the Supplier of the Fixed Asset

Sometimes, as per the terms and conditions of the contract, an enterprise may receive compensation from the supplier of the fixed asset. The amount of compensation will be deducted from the cost of the fixed asset. However, if the enterprise is receiving any penalty also from the supplier, it should be credited to Profit and Loss Account.

Administration and Other General Overhead

Administration and other general overhead expenses are usually excluded from the cost of fixed assets because they do not relate to a specific fixed asset. However, in some circumstances, such expenses as are specifically attributable to construction of a project or to the acquisition of a fixed asset or bringing to its working condition, may be included as part of the cost of the construction project or as a part of the cost of the fixed asset.

Example 1 : Goodricke Ltd is planning to set up a plant for instant tea in Assam. To explore the possibility of getting special equipment, the managing director of the company visited China. During this trip, MD short-listed two manufacturers and negotiation is going on for different matters. The company had incurred ₹ 1,00,000 as expense for this trip. This expense should be charged to Profit and Loss Account because the cost do not relate to a specific fixed asset.

Example 2 : Let us assume that Goodricke Ltd had placed an order with a manufacturer for supply of the equipment. The chief engineer visited China to inspect the equipment before despatch. The company incurred ₹ 80,000 for this visit.

This ₹ 80,000 forms part of the cost of the equipment as it is directly attributable.

Commercial Production

If the interval between the date of a project is ready to commence commercial production and the date at which commercial production actually begins is prolonged, all expenses incurred during this period are charged to the profit and loss statement.

Self-Constructed Fixed Assets

In arriving at the cost of self-constructed fixed asset, the same principles apply as for an acquired asset. The cost of a self-constructed fixed asset should comprise those costs that relate directly to the specific asset and those that are attributable to the construction activity in general and can be allocated to the specific asset.

Exchange of Fixed Assets

(i) When a fixed asset is acquired in exchange or in part exchange for another asset, the cost of the asset acquired should be recorded either :

(a) at fair value; or

(b) at the net book value of the assets given up, adjusted for any balancing payment or receipt of cash or other consideration.

For those purposes 'fair value' may be determined by reference either to the asset given up or to the asset acquired, whichever is more clearly evident.

Example: On 1st January, 2012 P. Ltd. purchased a roasting machine for ₹ 60,000. On 1st January, 2014 the roasting machine got out of order and new roasting machine was purchased after surrendering old one and paying cash of ₹ 90,000. The cost of the new machine in the market is ₹ 1,20,000. Rate of depreciation is 20% and residual value is nil.

Here, new roasting machine purchased on 1st January, 2014 will be recorded at ₹ 1,20,000 because fair value of asset acquired is more clearly evident (see (a) below)

(a) Fair value (which is market price)		**₹ 1,20,000**
(b) Net book value of the asset given up (₹ 60,000 – 24,000)	**36,000**	
Add: Balance payment	**90,000**	**₹ 1,26,000**

(ii) When a fixed asset is acquired in exchange for shares or other securities in the enterprise should be recorded at its fair market value or the fair market value of the securities issued whichever is more clearly evident.

Subsequent Expenditure

Subsequent expenditures related to an item of fixed asset should be added to its book value only if they increase the ***future benefits*** from the existing asset beyond its previously assessed standard of performance.

Illustration 2

On 1.1.2011, X Ltd. purchased a plant at a cost of ₹ 1,80,000. Additionally, installation costs totalled ₹ 20,000. During 2013, major repairs costing ₹ 31,500 had been carried out on this plant. In order to increase the capacity of the plant, a new motor had been fitted on 1.1.2014 at a cost of ₹ 22,000. A further overhauling cost of ₹ 13,500 had been carried out during 2014. You are required to determine the cost of the plant at different years (assume rate of depreciation 10% on straight-line basis).

Solution

(i) Cost of Plant on 1 January, 2011	₹
Purchase price	1,80,000
Add: Installation costs	20,000
	2,00,000
(ii) Book Value on 1 January, 2012	
After depreciation for 2011 @ 10% on ₹ 2,00,000 = ₹ 1,80,000.	
(iii) Book Value on 1 January, 2013	
After depreciation for 2012 @ 10% on ₹ 2,00,000 = ₹ 1,60,000.	
(iv) Cost of Plant on 1 January, 2014	
Book value on 1.1.2014 (₹ 160,000 – 20,000)	1,40,000
Add: **Cost of new motor**	22,000
	1,62,000

Tutorial Note : Major repairs in 2013 costing ₹ 31,500 are to be treated as revenue expenses and are to be charged to Profit and Loss Account. Similarly, overhauling cost of ₹ 13,500 in 2014 is to be treated as revenue expenses and it is to be charged to the Profit and Loss Account of that year.

Illustration 3

During the current year 2014-15, X Limited made the following expenditure relating to its plant building:

	₹ in Lakhs
Routine Repairs	4
Repairing	1
Partial replacement of roof bills	0.5
Substantial improvements to the electrical wiring system which will increase efficiency	10

What amount should be capitalised?

Solution

As per para 12.1 of AS—10, only expenditure that increases the future benefits from the existing asset beyond its previously assessed standard of performance is included in the gross book value, e.g., an increase in capacity.

Here, in this case, repairs of ₹ 5 lakhs and partial improvement of ₹ 50,000 do not meet the above criterion. Therefore, these should be charged to Profit and Loss Account as expenses. But, substantial improvements to the electrical wiring system which will increase efficiency will be capitalised, i.e., ***added*** to the cost of the plant.

Retirements and Disposals

Material items retired from active use and held for disposal should be stated at the lower of their net book value and net realisable value and shown separately in the financial statements.

Fixed asset should be eliminated from the financial statements on disposal or when no further benefit is expected from its use and disposal.

Losses arising from the retirement or gains or losses arising from disposal of fixed asset which is carried at cost should be recognised in the profit and loss statement.

Example: Swapna Printers (P) Ltd. replaced its offset printing machine with a modern Web Printing Machine during the year 2013-14.

The book value of the offset printing machine is ₹ 5,00,000 but it can be sold as scrap for ₹ 3,00,000 (net) only. Negotiation is going on with two buyers. Till the end of the accounting year (31st March, 2014) nothing has been finalised.

At the time of preparation of financial statements for the year 2013-14, this machine will be shown in the Balance Sheet at ₹ 3,00,000 and to be disclosed separately. The loss of ₹ 2,00,000 (₹ 5,00,000 – 3,00,000) will be recognised as expenses and to be charged to the Profit and Loss Account of 2013-14.

Revaluation of Tangible Fixed Assets

When a fixed asset is revalued in financial statements, an entire class of assets should be revalued, or the selection of assets for revaluation should be made on a systematic basis. This basis should be disclosed.

Points to be noted:

(1) If an item is revalued, the entire class to which that asset belongs will also be revalued.

(2) A class is a grouping of assets of a similar nature and use (e.g., land, building, plant and machinery, furnitures and fixtures, etc.).

(3) Revaluation should not be selective but carried out in a methodical and organised manner. For example, an enterprise may revalue all the fixed assets within an unit.

The revaluation in financial statements of a class of assets should not result in the net book value of that class beyond the recoverable amount of assets of that class.

The ***recoverable amount*** is the higher of the following :
(i) an asset's net selling price; or
(ii) its value in use*

Example

We consider the following example (all figures in rupees) :

Assets	A	B	C
Net book value (before revaluation)	10,000	12,000	15,000
Recoverable amount	12,000	15,000	8,000

If the business decides to revalue assets A and B but not C, the position will be as under :

Assets	A	B	C	Total
Net book value (after revaluation)	12,000	15,000	15,000	42,000
Recoverable amount	12,000	15,000	8,000	35,000

Here, the net book value is more than the recoverable amount. This is not permissible under the standard.

Surpluses / Deficits on Revaluation

An increase in net book value arising on revaluation of fixed assets should be credited directly to owners' interests under the head of revaluation reserve, except that, to the extent that such increase is related to and not greater than a decrease arising on revaluation previously recorded as a charge to the profit and loss statement, it may be credited to the profit and loss statement. A decrease in net book value arising on revaluation of fixed asset should be charged directly to the profit and loss statement except that to the extent that such a decrease is related to an increase which was previously recorded as a credit to revaluation reserve and which has not been subsequently reversed or utilised, it may be charged directly to that account.

An increase in net book value arising on revaluation of a fixed asset is to be recorded by debiting the Asset Account and crediting the Revaluation Reserve Account. Conversely, a decrease in net book value arising on revaluation of a fixed asset is to be recorded by debiting Profit and Loss Account and crediting Asset Account.

A fixed asset which was revalued downwards in a previous accounting period, may be revalued upwards in the current accounting period. In such a case, the previous decrease is to be adjusted against the current increase by crediting Profit and Loss Account. The surplus balance, if any, is to be transferred to Revaluation Reserve Account.

For example, an asset is revalued downwards in 2013 by ₹ 5,000, debiting the Profit and Loss Account and crediting the Asset Account. In 2014, the same asset is revalued upwards by ₹ 7,000. Here, Asset Account is to be debited by ₹ 7,000, Profit and Loss Account is to be credited by ₹ 5,000 and Revaluation Reserve Account to be credited by ₹ 2,000.

On the other hand, a fixed asset which was revalued upwards in a previous accounting period, may be revalued downwards in the current accounting period. In such a case, the previous increase is to be adjusted against the current decrease by debiting Revaluation Reserve Account. The deficit balance, if any, is to be transferred to Profit and Loss Account.

For example, an asset is revalued upwards in 2013 by ₹ 5,000, debiting the Asset Account and crediting Revaluation Reserve Account. In 2014, the same asset is revalued downwards by ₹ 7,000. Here, Revaluation Reserve Account is to be debited by ₹ 5,000, Profit and Loss Account is to be debited by ₹ 2,000 and Asset Account is to be credited by ₹ 7,000.

Illustration 4

How will you treat the following ?

A revaluation of land and building of a firm during the year showed surpluses totalling ₹ 40,00,000 and a revaluation of plant and machinery showed deficits totalling ₹ 5,00,000. The firm's revaluation reserve of ₹ 65,00,000 includes previous revaluation surpluses of ₹ 2,00,000 on plant and machinery now showing a deficit on revaluation.

*It is the present value of estimated future cash flows expected to arise from the continuing use of a fixed asset over its useful life and from its ultimate disposal.

Solution

The revaluation surplus of ₹ 40,00,000 must be taken directly to revaluation reserve. The revaluation deficit of ₹ 5,00,000 will be taken to the Profit and Loss Account to the extent that it is not covered by previous unrealised surpluses on the same assets. Thus ₹ 2,00,000 will be adjusted against revaluation reserve and the remaining ₹ 3,00,000 written-off to the Profit and Loss Account, **being disclosed as an exceptional item**.

Sale of Previously Revalued Assets

On disposal of a previously revalued item of fixed asset, the difference between net disposal proceeds and the net book value should be charged or credited to the profit and loss statement except that to the extent that such a loss is related to an increase which was previously recorded as a credit to revaluation reserve and which has not been subsequently reversed or utilised, it may be charged directly to that account.

The amount standing in Revaluation Reserve following the retirement or disposal of an asset which relates to that asset may be transferred to General Reserve.

Example: The net book value of an asset is ₹ 10,000 which is disposed off for ₹ 6,000. The asset was previously revalued upwards by ₹ 3,000. Here, the loss of ₹ 4,000 (₹ 10,000 – 6,000) is to be adjusted first by debiting Revaluation Reserve (₹ 3,000) and the balance by debiting Profit and Loss Account (₹ 1,000).

It should be noted that if the Revaluation Reserve Account in respect of that asset has already been reversed or utilised, no adjustment against Revaluation Reserve Account is possible. In this case, the entire amount is to be debited to Profit and Loss Account.

Jointly Owned Fixed Assets

In the case of fixed assets owned by the enterprise jointly with others, the extent of the enterprise's share in such assets, and the proportion of the original cost, accumulated depreciation and written-down value should be stated in the Balance Sheet. Alternatively, the pro rata cost of such jointly owned assets may be grouped together with similar fully-owned assets with an appropriate disclosure thereof.

Purchase of Several Fixed Assets for a Consolidated Price

Where several fixed assets are purchased for a consolidated price, the consideration should be apportioned to the various assets on a fair basis as determined by competent valuers.

Goodwill should be recorded in the books only when some consideration in money or money's worth has been paid for it. Whenever a business is acquired for a price (payable in cash or in shares or otherwise) which is in excess of the value of the net assets of the business taken over, the excess should be termed as "goodwill".

Disclosures

The following information should be disclosed in the financial statements:

(i) gross and net book values of fixed assets at the beginning and end of an accounting period, showing additions, disposals, acquisitions and other movements;

(ii) expenditure incurred on account of fixed assets in the course of construction or acquisition; and

(iii) revalued amount substituted for historical costs of fixed assets, the method adopted to compute the revalued amounts, the nature of indices used, the year of any appraisal made, and whether an external valuer was involved, in case where fixed assets are stated at revalued amounts.

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each sentence or answer each question below :

1. AS—10: 'Accounting for Fixed Assets' deal with accounting for the following items :
   A forest, plantations and solar energy
   B livestock
   C equipments used for plantations
2. Regularly used spare parts are usually
   A treated as expense on purchase
   B carried as inventory and treated as an expense on consumption
   C treated as a fixed asset and depreciated accordingly
3. Standby equipment and servicing equipments are
   A ignored
   B accounted for as current assets
   C accounted for as fixed assets
4. Modvat credit is
   A added with the cost of the fixed asset
   B deducted from the cost of the fixed asset without any condition
   C deducted from the cost of the fixed asset if certain conditions are satisfied
5. The expenditure incurred on test runs is usually
   A capitalised as a direct element of the construction cost
   B capitalised as an indirect element of the construction cost
   C treated as revenue expenditure
6. The expenditure incurred between the date of a project is ready to commence commercial production and the date of actual commercial production will be
   A capitalised
   B ignored
   C charged to Profit and Loss Account
7. Individually-insignificant items, such as moulds, tools and dies may be
   A expensed on purchase
   B aggregated as one asset
   C ignored
8. Components of cost are
   (i) purchase price
   (ii) general office overheads
   (iii) any costs directly attributable to bringing the asset to its working condition for its intended use
   A all the above
   B all except (iii)
   C all except (ii)
9. When a fixed asset is acquired in exchange for another asset, the cost of the asset acquired should be recorded
   A at replacement cost
   B at fair value
   C at the net book value of the asset given up only
10. Subsequent expenditures related to an item of fixed asset should be added to its book value
   A only if it is recommended by the auditors
   B only if it is recommended by the Board of Directors
   C only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance.

AS — 11 : The Effects of Changes in Foreign Exchange Rates

[Effective Date : 1st April, 2009]

Introduction

Today, it is very common for enterprises to operate in more than one country. There are many multinational companies which are operating throughout the world. HP, for example, has operations in more than 100 countries. Similarly many Indian companies, for example, Reliance Industries Ltd., Tata Motors Ltd., TISCO Ltd., are operating in foreign countries. Reliance Industries Ltd. is operating in more than 10 countries like Kenya, Malaysia, Australia, UK, UAE, etc.

Again many Indian companies exports goods to foreign countries and imports goods, raw materials, plant etc., from foreign countries. All these transactions involve foreign exchange.

International business transactions have major effects on accounting. Different countries follow different currencies and majority of sales and purchases are made in local currencies. Thus local currency value needs to be converted into reporting currency value using exchange rates.

Like any commodity, the exchange rate also changes daily according to supply and demand for the currency. As a consequence, the profit of an enterprise, trading in foreign currency is influenced by the fluctuation in the exchange rate.

The main theme of this accounting standard is to prescribe for the accounting treatment of exchange difference.

Objective

An enterprise may carry on activities involving foreign exchange in two ways. It may have transactions in foreign currencies or it may have foreign operations. In order to include foreign currency transactions and foreign operations in the financial statements of an enterprise, transactions must be expressed in the enterprise's reporting currency and the financial statements of foreign operations must be translated into the enterprise's reporting currency.

The principal issues in accounting for foreign currency transactions and foreign operations are to decide which exchange rate to use and how to recognise in the financial statements the financial effect of changes in exchange rates.

Scope

1. This Statement should be applied :
   (a) in accounting for ***transactions*** in foreign currencies; and
   (b) in ***translating*** the financial statements of foreign operations.
2. This Statement also deals with accounting for foreign currency transactions in the nature of forward exchange contracts.
3. This Statement does not specify the currency in which an enterprise presents its financial statements. However, an enterprise normally uses the currency of the country in which it is domiciled. If it uses a different currency, this Statement requires disclosure of the reason for using that currency. This Statement also requires disclosure of the reason for any change in the reporting currency.
4. This Statement does not deal with the restatement of an enterprise's financial statements from its reporting currency into another currency for the convenience of users accustomed to that currency or for similar purposes.
5. This Statement does not deal with the presentation in a cash flow statement of cash flows arising from transactions in a foreign currency and the translation of cash flows of a foreign operation (see AS 3, Cash Flow Statements).
6. This Statement does not deal with exchange differences arising from foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs (see paragraph 4(e) of AS 16, Borrowing Costs).

Definitions

The following terms are used in this Statement with the meanings specified:

Average rate is the mean of the exchange rates in force during a period.

Closing rate is the exchange rate at the balance sheet date.

Exchange difference is the difference resulting from reporting the ***same number of units of a foreign currency*** in the reporting currency at different exchange rates.

Exchange rate is the ratio for exchange of two currencies.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledge-able, willing parties in an arm's length transaction.

Foreign currency is a currency other than the reporting currency of an enterprise.

Foreign operation is a subsidiary , associate , joint venture or branch of the reporting enterprise, the activities of which are based or conducted in a country other than the country of the reporting enterprise.

Forward exchange contract means an agreement to exchange different currencies at a forward rate.

Forward rate is the specified exchange rate for exchange of two currencies at a specified future date.

Integral foreign operation is a foreign operation, the activities of which are an integral part of those of the reporting enterprise.

Monetary items are money held and assets and liabilities to be received or paid in fixed or determinable amounts of money.

Net investment in a non-integral foreign operation is the reporting enterprise's share in the net assets of that operation.

Non-integral foreign operation is a foreign operation that is not an integral foreign operation.

Non-monetary items are assets and liabilities other than monetary items.

Reporting currency is the currency used in presenting the financial statements.

Foreign Currency Transactions

Initial Recognition

A foreign currency transaction is a transaction which is denominated in or requires settlement in a foreign currency, including transactions arising when an enterprise either:

(a) buys or sells goods or services whose price is denominated in a foreign currency;

(b) borrows or lends funds when the amounts payable or receivable are denominated in a foreign currency;

(c) becomes a party to an unperformed forward exchange contract; or

(d) otherwise acquires or disposes of assets, or incurs or settles liabilities, denominated in a foreign currency.

A ***foreign currency transaction*** should be recorded in the reporting currency using the exchange rate between the reporting currency and the foreign currency at the ***date of the transaction***.

The rate that should be used is the mid market rate, or 'spot' rate of the date of transaction.

An average rate may be used for a week, or a month, for all transactions in each foreign currency, if there is no significant fluctuation in the exchange rates.

The date of transaction is the date when the transaction is ***contracted*** or ***recognised***, rather than the date of receiving (or paying) cash.

Example: On 1st January, 2015 your company TCS Ltd. has raised an invoice for $ 10,000 on its USA client. The payment was received on 1st March, 2015. The exchange rate was :

1st January, 2013 — $1 = ₹ 59

1st March, 2013 — $1 = ₹ 60

It is to be recorded in the books of TCS Ltd. as follows :

1st January, 2015

Accounts Receivable Account (USA Client)	**Dr.**	**₹ 5,90,000**	
To Sales Account (₹ 59× 10,000)			**₹ 5,90,000**

1st March, 2015			
Bank Account (₹ 60 × 10,000)	**Dr.**	**₹ 6,00,000**	
To Accounts Receivable Account			**₹ 5,90,000**
To Foreign Exchange Difference Account			**₹ 10,000**

Reporting at Subsequent Balance Sheet Dates

(a) ***Foreign Currency monetary*** items like money held in cash and cash equivalents, accounts receivable and accounts payable should be reported using the ***closing rate***.

(b) ***Non-monetary items*** like property, plant and equipments, which are carried in terms of historical cost denominated in a foreign currency should be reported using the exchange rate at the date of the transaction.

Example : **HPCL purchased a plant for its chemical factory on 1st January, 2015 but had not been paid for by 31st March, 2015, the date of closing the books of accounts. The cost of the plant was $ 1,00,000.**

The exchange rates were :

1st January, 2015 — $1 = ₹ 59

31st March, 2015 — $1 = ₹ 60

In the books of HPCL, it will be recorded as follows :

1st January, 2015			
Plant Account (₹ 59× 1,00,000)	**Dr.**	**₹ 59,00,000**	
To Accounts Payable Account			**₹ 59,00,000**
31st March, 2015			
Exchange Difference Account	**Dr.**	**₹ 1,00,000**	
To Accounts Payable Account			**₹ 1,00,000**

(c) ***Non-monetary items*** which are carried at fair value or other similar valuation denominated in a foreign currency should be reported using the exchange rates that existed when the values were determined.

Recognition of Exchange Differences

Exchange differences arising on the settlement of monetary items or on reporting an enterprise's monetary items at rates different from those at which they were initially recorded during the period, or reported in previous financial statements, should be recognised as ***income*** or as ***expenses*** in the period in which they arise.

Net Investment in a Non-integral Foreign Operation

Exchange differences arising on a monetary item that, in substance, forms part of an enterprise's net investment in a non-integral foreign operation should be accumulated in a foreign currency translation reserve in the enterprise's financial statements until the disposal of the net investment, at which time they should be recognised as income or as expenses.

Illustration 1

From the following information, calculate foreign exchange gain / loss for the financial years 2011-12 and 2012-13 :

	Exchange Rate (₹)
Goods purchased on 22.1.2012 for US $ 20,000	45.80
Exchange rate on 31.3.2012	46.10
Payment made on 4.4.2013	46.30

Solution

As per AS-11 (revised), a foreign currency transaction should be recorded by applying the exchange rate between the reporting currency and the foreign currency at the ***date of the transaction***. Therefore, both purchases and creditors should be recorded at the following figure: 20,000 × ₹ 45.80 = ₹ 9,16,000.

AS-11 (revised) prescribes that all monetary items in the Balance Sheet should be reported using closing rate. Therefore, the creditors should be valued at : 20,000 × ₹ 46.10 = ₹ 9,22,000.

The exchange loss of ₹ 6,000 (₹ 9,22,000 – 9,16,000) should be debited in the Statement of Profit and Loss for the year 2011-12.

AS-11 (revised) states that exchange differences arising on the settlement of monetary items at rates different from those at which they were reported in previous financial statements should be recognised as income or loss in the period in which they arise.

In this case, though the value of the creditors is ₹ 9,22,000, they are settled at ₹ 9,26,000 (20,000 × ₹ 46.30). The exchange loss of ₹ 4,000 (₹ 9,26,000 – 9,22,000) should be debited to the Statement of Profit and Loss for the year 2012-13.

Illustration 2

How will you treat the following as per AS-11 (revised)?

(1) Debtors include amount due from X Limited, USA, fo r ₹ 6,00,000, which was recorded at $1 = ₹ 39.20 — the prevailing exchange rate on the date of sales. The exchange rate on the Balance Sheet date was $1 = ₹ 40.10.

(2) A long-term loan was obtained from Y Limited, amounting to ₹ 20,00,000, which was recorded at $1 = ₹ 36.20 — the prevailing exchange rate on the date of transaction. The exchange rate on the Balance Sheet date was $1 = ₹ 37.40.

(3) For credit purchase of plant, another loan was obtained from Z Ltd., UK for ₹ 12,00,000, which was recorded at £ = ₹ 64.10. The exchange rate on the Balance Sheet date was £ = ₹ 67.20.

Solution

AS-11 (revised) provides for the following :

(a) A foreign currency transaction should be recorded by applying the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

(b) Monetary items in the Balance Sheet should be reported using the closing rate.

(c) Exchange rate differential in respect of foreign currency deferred liability relatable to fixed assets will have to be absorbed in the Statement of Profit and Loss.

(1) Initial recognition : ₹ 6,00,000 / ₹ 39.20 = $15,306.
Rate at the Balance Sheet date : $1 = ₹ 40.10.
Debtors to be shown on the Balance Sheet date : 15,306 × ₹ 40.10 = ₹ 6,13,770.
Therefore, the exchange difference is a gain of ₹ 13,770 (₹ 6,13,770 – 6,00,000) which should be credited in the Statement of Profit and Loss.

(2) Initial recognition : ₹ 20,00,000 / ₹ 36.20 = $ 55,249.
Rate at the Balance Sheet date : $1 = ₹ 37.40.
Long-term loan to be shown on the Balance Sheet date : 55,249 × ₹ 37.40 = ₹ 20,66,312.
Therefore, the exchange difference is a loss of ₹ 66.312 (₹ 20,66,312 – 20,00,000) which should be debited in the Statement of Profit and Loss.

(3) Initial recognition : ₹ 12,00,000 / ₹ 64.10 = £ 18,721.
Rate at the Balance Sheet date : £1 = ₹ 67.20.
Long-term loan for the purchase of plant on credit to be shown on the Balance Sheet :
18,721 × ₹ 67.20 = ₹ 12,58,051.
Therefore, the exchange difference is a loss of ₹ 58,051 (₹ 12,58,051 – 12,00,000) which should be debited in the Statement of Profit and Loss.

Illustration 3

A company had imported raw materials worth US $ 6,00,000 on 5th January, 2010 when the exchange rate was ₹ 43 per US $. The company had recorded the transaction in the books at the above mentioned rate. The payment for the import transaction was made on 5th April, 2010 when the exchange rate was ₹ 47 per US$. However, on 31st March, 2010, the rate of exchange was ₹ 48 per US$. The company passed an entry on 31st

March, 2010 adjusting the cost of raw materials consumed for the difference between ₹ 47 and ₹ 43 per US$.

In the background of the relevant accounting standard, is the company's accounting treatment correct ? Discuss.

Solution

AS—11 "The Effects of Changes in Foreign Exchange Rates", states that foreign currency monetary items should be reported using the ***closing rate***.

Exchange difference arising on reporting an enterprise's monetary items at rates different from those at which they were initially recorded during the period should be recognised as income or as expenses in the period in which they arise.

(a) On 5th January, 2010 creditors were recorded for	₹ 258,00,000	(₹ 43 × 6,00,000)
(b) On 31st March, 2010 creditors were reported for	₹ 288,00,000	(₹ 48 × 6,00,000)
Loss due to exchange difference [(b) – (a)]	₹ 30,00,000	

This ₹ 30,00,000 will be charged to Profit and Loss Account for the year **2009-10** as expenses.

The accounting treatment adopted by the company was not correct **at all**.

It should be noted that in the year 2010-11 when the creditors were paid off, the exchange rate was lower than closing rate by Re 1 (₹ 48 – ₹ 47). Therefore, in 2010-11, ₹ 6,00,000 should be credited to Profit and Loss Account of 2010-11 as income.

Financial Statements of Foreign Operations

Classification of Foreign Operations

Foreign operations are classified as :

(i) Integral foreign operations; and (ii) Non-integral foreign operations.

An ***integral*** foreign operation is a dependent foreign operation or an extension of the activities of the reporting enterprise.

For example, Tata Motors Ltd. has a branch office at Dhaka, Bangladesh. This branch is exclusively selling Tata commercial vehicles and passenger cars and remits the cash immediately to Tata Motors Ltd. This is an integral foreign operation.

A ***non-integral*** foreign operation tends to act as a ***stand-alone*** unit, accumulates cash and other monetary items, incurs expenses, generate incomes and perhaps arranges borrowings, all substantially in its local currency.

The following are indications that a foreign operation is a non-integral foreign operation rather than an integral foreign operation:

(a) while the reporting enterprise may ***control the foreign operation***, the activities of the foreign operation are carried out with a ***significant degree of autonomy*** from those of the reporting enterprise;
(b) transactions with the reporting enterprise are not a high proportion of the foreign operation's activities;
(c) the activities of the foreign operation are financed mainly from its own operations or local borrowings rather than from the reporting enterprise;
(d) costs of labour, material and other components of the foreign operation's products or services are primarily paid or settled in the local currency rather than in the reporting currency;
(e) the foreign operation's sales are mainly in local currencies other than the reporting currency;
(f) cash flows of the reporting enterprise are insulated from the day-to-day activities of the foreign operation rather than being directly affected by the activities of the foreign operation;
(g) sales prices for the foreign operation's products are not primarily responsive on a short-term basis to changes in exchange rates but are determined more by local competition or local government regulation; and

(h) there is an active local sales market for the foreign operation's products, although there also might be significant amounts of exports.

The appropriate classification for each operation can, in principle, be established from factual information related to the indicators listed above. In some cases, the classification of a foreign operation as either a non-integral foreign operation or an integral foreign operation of the reporting enterprise may not be clear, and judgement is necessary to determine the appropriate classification.

Translation of Foreign Integral Operations

The financial statements of an integral foreign operation should be translated as if the transactions of the foreign operation had been those of the reporting enterprise itself.

The cost and depreciation of tangible fixed assets is translated using the exchange rate at the date of purchase of the asset or, if the asset is carried at fair value or other similar valuation, using the rate that existed on the date of the valuation. The cost of inventories is translated at the exchange rates that existed when those costs were incurred. The recoverable amount or realisable value of an asset is translated using the exchange rate at the date as at which the net realisable value is determined. The rate used is therefore usually the closing rate.

Translation of Foreign Non-integral Operations

In translating the financial statements of a non-integral foreign operation for incorporation in its financial statements, the reporting enterprise should use the following procedures:

(a) the assets and liabilities, both monetary and non-monetary, of the non-integral foreign operation should be translated at the ***closing rate***;

(b) income and expense items of the non-integral foreign operation should be translated at exchange rates at the ***dates of the transactions***; and

(c) all resulting exchange differences should be accumulated in a foreign currency translation reserve until the disposal of the net investment.

For practical reasons, a rate that approximates the actual exchange rates, for example an average rate for the period, is often used to translate income and expense items of a foreign operation.

Illustration 4

X Limited has a foreign branch in New York, USA. On 31.3.2013, the following trial balance was prepared from the books of New York office (figures in US $):

Particulars	Dr.	Cr.
Plant and machinery at cost	40,000	—
Accumulated depreciation on plant and machinery	—	26,000
Opening stock (1.4.2012)	4,000	—
Debtors and Creditors	12,000	6,000
Purchases and Sales	4,000	24,600
Cash and Bank	2,000	—
Salaries	9,000	—
Rent	2,400	—
Goods received from head office	1,000	—
Office expenses	3,600	—
Commission	—	20,000
Head Office Current Account	—	1,400
TOTAL	78,000	78,000

Additional information :

Goods sent to branch ₹ 20,000; Branch current account in the books of head office ₹ 24,000; Closing stock $625.

You are required to convert the above trial balance into rupees assuming that the branch is (a) an integral foreign operation; and (b) a non-integral foreign operation.

The exchange rates were as under :

Opening rate $1 = ₹ 40; Closing rate $1 = ₹ 48; Average rate $1 = ₹ 44, which approximates the actual exchange rate. For plant and machinery $1 = ₹ 36.

Solution

(a) AS-11 (revised) states that in case a foreign operation is determined as an integral operation, financial statements should be translated using the same principle, as if the foreign operation had been those of the reporting entity itself. The resulting exchange gain or loss should be recognised in the Statement of Profit and Loss.

New York Branch
Trial balance as at 31.3.2013 (figures in ₹)

Particulars	Conversion Rate	Dr.	Cr.
Plant and machinery at cost	36	14,40,000	—
Accumulated depreciation on plant and machinery	36	—	9,36,000
Opening stock (1.4.2012)	40	1,60,000	—
Debtors and Creditors	48	5,76,000	2,88,000
Purchases and Sales	44	1,76,000	10,82,400
Cash and Bank	48	96,000	—
Salaries	44	3,96,000	—
Rent	44	1,05,600	—
Goods Received from Head Office		20,000	—
Office Expenses	44	1,58,400	—
Commission	44	—	8,80,000
Head Office Current Account		—	24,000
Foreign Exchange Loss (balancing figure)		82,400	—
		32,10,400	32,10,400
Closing Stock	48	30,000	

(b) AS-11 (revised) states that in case a foreign operation is determined as a non-integral operation, assets and liabilities (both monetary and non-monetary items) are to be converted by applying closing rate, but incomes and expenses are to be converted by applying average rate. The resulting exchange difference gain or loss should be accumulated in a foreign currency translation reserve.

New York Branch
Trial balance as at 31.3.2013 (figures in rupees)

Particulars	Conversion Rate	Dr.	Cr.
Plant and machinery at cost	48	19,20,000	—
Accumulated depreciation on plant and machinery	48	—	12,48,000
Opening stock (1.4.2012)	40	1,60,000	—
Debtors and Creditors	48	5,76,000	2,88,000
Purchases and Sales	44	1,76,000	10,82,400
Cash and Bank	48	96,000	—
Salaries	44	3,96,000	—
Rent	44	1,05,600	—
Goods Received from Head Office		20,000	—
Office Expenses	44	1,58,400	—
Commission	44	—	8,80,000
Head Office Current Account		—	24,000
Foreign Currency Translation Reserve (balancing figure)		—	85,600
		36,08,000	36,08,000
Closing Stock	48	30,000	—

Disposal of a Non-integral Foreign Operation

On the disposal of a non-integral foreign operation, the cumulative amount of the exchange differences which have been deferred and which relate to that operation should be recognised as income or as expenses in the same period in which the gain or loss on disposal is recognised.

Change in the Classification of a Foreign Operation

When there is a change in the classification of a foreign operation, he translation procedures applicable to the revised classification should be applied from the date of the change in the classification.

Forward Exchange Contracts

An enterprise may enter into a forward exchange contract or another financial instrument that is in substance a forward exchange contract, which is not intended for trading or speculation purposes, to establish the amount of the reporting currency required or available at the settlement date of a transaction. The premium or discount arising at the inception of such a forward exchange contract should be amortised as expense or income over the life of the contract. Exchange differences on such a contract should be recognised in the statement of profit and loss in the reporting period in which the exchange rates change. Any profit or loss arising on cancellation or renewal of such a forward exchange contract should be recognised as income or as expense for the period.

Illustration 5

Sterling Ltd. purchased a plant for US $ 20,000 on 31st December, 2011 payable after 4 months. The company entered into a forward contract for 4 months @ ₹ 48.85 per dollar. On 31st December, 2011 the exchange rate was ₹ 47.50 per dollar.

How will you recognise the profit or loss on forward contract in the books of Sterling Limited for the year ended 31st March, 2012 ?

Solution **Calculation of Profit or Loss to be Recognised in books of Sterling Ltd**

Particulars		₹
Forward Contract Rate		48.85
Less: Spot Rate		47.50
Loss per Dollar		1.35
Forward contract Amount	($)	20,000
Total Loss on entering into Forward Contract (20,000 x 1.35)	(₹)	27,000
Contract Period		4 Months
Loss per month to be Amortised (27,000 ÷ 4)		6,750
In 2011-12 Loss to be recognised (3 x ₹ 6,750)	(₹)	20,250
In 2012-13 Loss to be recognised (1 x ₹ 6,750)	(₹)	6,750

Illustration 6

X Limited closes its books of account on 31st December.

On 1.9.2011, it took a forward contract cover against US $ 1,00,000. This is to be repaid on 28.2.2012. The spot rate was ₹ 46.10 and the forward rate was ₹ 46.60. What will be the treatment as per AS-11 (revised) for the accounting years 2011 and 2012 for the premium paid on the forward contract, if the exchange rate on 31.12.2011 was as follows:

(i) ₹ 46.30; (ii) ₹ 45.90; and (iii) ₹ 46.80.

Solution

The premium on the forward contract is = 1,00,000 (₹ 46.60 – 46.10)

= 1,00,000 × Re 0.50

= ₹ 50,000.

AS-11 (revised) provides for the following:

(1) The premium at the inception of a forward contract should be amortised over the tenor of the contract period.

(2) Any exchange difference on a forward contract should be recognised in the Statement of Profit and Loss at the Balance Sheet date in which the exchange rates change.

Calculation of Exchange Difference for the year ending on 31.12.2011

Particulars	Case 1 (₹)	Case 2 (₹)	Case 3 (₹)
Initial recognition (Amount x Spot Rate)	46,10,000	46,10,000	46,10,000
Value at the Balance Sheet Date (Amount x Closing Rate)	46,30,000	45,90,000	46,80,000
Exchange Difference : Profit / (Loss)	(20,000)	20,000	(70,000)

Calculation of Exchange Difference for the year ending on 31.12.2012

Particulars	Case 1 (₹)	Case 2 (₹)	Case 3 (₹)
Value at the Balance Sheet Date	46,30,000	45,90,000	46,80,000
Contracted Forward Rate Payable (Amount x forward rate)	46,60,000	46,60,000	46,60,000
Exchange Difference : Profit / (Loss)	(30,000)	(70,000)	20,000

It can be seen that the loss is ₹ 50,000 in all the above cases.

Disclosure

An enterprise should disclose:

(a) the amount of exchange differences included in the net profit or loss for the period; and

(b) net exchange differences accumulated in foreign currency translation reserve as a separate component of shareholders' funds, and a reconciliation of the amount of such exchange differences at the beginning and end of the period.

When the reporting currency is different from the currency of the country in which the enterprise is domiciled, the reason for using a different currency should be disclosed. The reason for any change in the reporting currency should also be disclosed.

When there is a change in the classification of a significant foreign operation, an enterprise should disclose:

(a) the nature of the change in classification;

(b) the reason for the change;

(c) the impact of the change in classification on shareholders' funds; and

(d) the impact on net profit or loss for each prior period presented had the change in classification occurred at the beginning of the earliest period presented.

The effect on foreign currency monetary items or on the financial statements of a foreign operation of a change in exchange rates occurring after the balance sheet date is disclosed in accordance with AS–4, 'Contingencies and Events Occurring After the Balance Sheet Date'.

Disclosure is also encouraged of an enterprise's foreign currency risk management policy.

OBJECTIVE QUESTIONS

Multiple Choice

Select the best choice to complete each sentence or answer each question below :

1. Monetary items are
   A cash only
   B cash and cash equivalent
   C money held and assets and liabilities to be received or paid in fixed or determinable amounts of money
2. Forward rate is
   A the determinable exchange rate for exchange of two currencies at a specified future date
   B the specified exchange rate for exchange of two currencies at a specified future date
   C neither of the above
3. Foreign currency is a currency
   A other than the functional currency
   B other than the reporting currency of an enterprise
   C neither of the above

4. A foreign currency transaction should be recorded in the reporting currency, using the exchange rate between the reporting currency and the foreign currency
   A at the date of settlement
   B at the last date of the month of transaction
   C at the date of transaction
5. Foreign currency monetary items should be reported using
   A the average rate for the year
   B the closing rate on the Balance Sheet date
   C the rate on the date of transaction
6. Non-monetary items should be reported using
   A the average rate for the year
   B the closing rate on the Balance Sheet date
   C the rate on the date of transaction
7. The date of transaction is
   A the date on which it is recorded in the books of account
   B the date when the transaction is contracted or recognised
   C the date of receiving (or paying) cash
8. Exchange differences arising on the settlement of monetary items should be recognised
   A in the Balance Sheet as capital reserve
   B in the Profit and Loss Account as income or expenses
   C neither of the above
9. Net investment in a non-integral foreign operation is
   A the amount invested by the reporting enterprise at cost
   B the reporting enterprises' share in the net assets of that operation
   C neither of the above
10. If the US$ falls in value against the Indian rupees (INR), and you have net $ liability
    A an exchange loss will result
    B an exchange gain will result
    C neither gain or loss will result

Guide to Answer

1. C; 2. B; 3. B; 4. C; 5. B; 6. C; 7. B; 8. B; 9. B; 10. B.
